Cite this Code: CFR

To cite the regulations in this volume use title, part and section number. Thus, 15 CFR 301.1 refers to title 15, part 301, section 1.
Explanation

The Code of Federal Regulations is a codification of the general and permanent rules published in the Federal Register by the Executive departments and agencies of the Federal Government. The Code is divided into 50 titles which represent broad areas subject to Federal regulation. Each title is divided into chapters which usually bear the name of the issuing agency. Each chapter is further subdivided into parts covering specific regulatory areas.

Each volume of the Code is revised at least once each calendar year and issued on a quarterly basis approximately as follows:

Title 1 through Title 16 ..............................................................as of January 1
Title 17 through Title 27 .................................................................as of April 1
Title 28 through Title 41 .................................................................as of July 1
Title 42 through Title 50 .............................................................as of October 1

The appropriate revision date is printed on the cover of each volume.

LEGAL STATUS

The contents of the Federal Register are required to be judicially noticed (44 U.S.C. 1507). The Code of Federal Regulations is prima facie evidence of the text of the original documents (44 U.S.C. 1510).

HOW TO USE THE CODE OF FEDERAL REGULATIONS

The Code of Federal Regulations is kept up to date by the individual issues of the Federal Register. These two publications must be used together to determine the latest version of any given rule.

To determine whether a Code volume has been amended since its revision date (in this case, January 1, 2000), consult the “List of CFR Sections Affected (LSA),” which is issued monthly, and the “Cumulative List of Parts Affected,” which appears in the Reader Aids section of the daily Federal Register. These two lists will identify the Federal Register page number of the latest amendment of any given rule.

EFFECTIVE AND EXPIRATION DATES

Each volume of the Code contains amendments published in the Federal Register since the last revision of that volume of the Code. Source citations for the regulations are referred to by volume number and page number of the Federal Register and date of publication. Publication dates and effective dates are usually not the same and care must be exercised by the user in determining the actual effective date. In instances where the effective date is beyond the cutoff date for the Code a note has been inserted to reflect the future effective date. In those instances where a regulation published in the Federal Register states a date certain for expiration, an appropriate note will be inserted following the text.

OMB CONTROL NUMBERS

The Paperwork Reduction Act of 1980 (Pub. L. 96-511) requires Federal agencies to display an OMB control number with their information collection request.
Many agencies have begun publishing numerous OMB control numbers as amendments to existing regulations in the CFR. These OMB numbers are placed as close as possible to the applicable recordkeeping or reporting requirements.

**OBSOLETE PROVISIONS**

Provisions that become obsolete before the revision date stated on the cover of each volume are not carried. Code users may find the text of provisions in effect on a given date in the past by using the appropriate numerical list of sections affected. For the period before January 1, 1986, consult either the List of CFR Sections Affected, 1949–1963, 1964–1972, or 1973–1985, published in seven separate volumes. For the period beginning January 1, 1986, a “List of CFR Sections Affected” is published at the end of each CFR volume.

**CFR INDEXES AND TABULAR GUIDES**

A subject index to the Code of Federal Regulations is contained in a separate volume, revised annually as of January 1, entitled CFR INDEX AND FINDING AIDS. This volume contains the Parallel Table of Statutory Authorities and Agency Rules (Table I). A list of CFR titles, chapters, and parts and an alphabetical list of agencies publishing in the CFR are also included in this volume.

An index to the text of “Title 3—The President” is carried within that volume.

The Federal Register Index is issued monthly in cumulative form. This index is based on a consolidation of the “Contents” entries in the daily Federal Register.

A List of CFR Sections Affected (LSA) is published monthly, keyed to the revision dates of the 50 CFR titles.

**REPUBLICATION OF MATERIAL**

There are no restrictions on the republication of material appearing in the Code of Federal Regulations.

**INQUIRIES**

For a legal interpretation or explanation of any regulation in this volume, contact the issuing agency. The issuing agency’s name appears at the top of odd-numbered pages.

For inquiries concerning CFR reference assistance, call 202–523–5227 or write to the Director, Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408 or e-mail info@fedreg.nara.gov.

**SALES**

The Government Printing Office (GPO) processes all sales and distribution of the CFR. For payment by credit card, call 202–512–1800, M–F 8 a.m. to 4 p.m. e.s.t. or fax your order to 202–512–2233, 24 hours a day. For payment by check, write to the Superintendent of Documents, Attn: New Orders, P.O. Box 371954, Pittsburgh, PA 15250–7954. For GPO Customer Service call 202–512–1803.

**ELECTRONIC SERVICES**

The Office of the Federal Register also offers a free service on the National Archives and Records Administration's (NARA) World Wide Web site for public law numbers, Federal Register finding aids, and related information. Connect to NARA's web site at www.nara.gov/fedreg. The NARA site also contains links to GPO Access.

RAYMOND A. MOSLEY,
Director,
Office of the Federal Register.

Title 15—Commerence and Foreign Trade is composed of three volumes. The parts in these volumes are arranged in the following order: parts 0-299, 300-799, and part 800-End. The first volume containing parts 0-299 is comprised of Subtitle A—Office of the Secretary of Commerce, Subtitle B, chapter I—Bureau of the Census, Department of Commerce, and chapter II—National Institute of Standards and Technology, Department of Commerce. The second volume containing parts 300-799 is comprised of chapter III—International Trade Administration, Department of Commerce, chapter IV—Foreign-Trade Zones Board, and chapter VII—Bureau of Export Administration, Department of Commerce. The third volume containing part 800-End is comprised of chapter VIII—Bureau of Economic Analysis, Department of Commerce, chapter IX—National Oceanic and Atmospheric Administration, Department of Commerce, chapter XI—Technology Administration, Department of Commerce, chapter XIII—East-West Foreign Trade Board, chapter XIV—Minority Business Development Agency, chapter XX—Office of the United States Trade Representative, and chapter XXIII—National Telecommunications and Information Administration, Department of Commerce. The contents of these volumes represent all current regulations codified under this title of the CFR as of January 1, 2000.

A redesignation table appears in the Finding Aids section of the volume containing Parts 300-799.

For this volume, Shelley C. Featherson was Chief Editor. The Code of Federal Regulations publication program is under the direction of Frances D. McDonald, assisted by Alomha S. Morris.
Would you like to know... if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the LSA (List of CFR Sections Affected), the Federal Register Index, or both.

LSA
The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected. $27 per year.

Federal Register Index
The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references. $25 per year.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Superintendent of Documents Subscription Order Form

Order Processing Code: *

YES, send me the following indicated subscriptions for one year:

☐ LSA (List of CFR Sections Affected), (LCS) for $27 per year.
☐ Federal Register Index (FRSU) $25 per year.

The total cost of my order is $________.
Price is subject to change. International customers please add 25%.

Company or personal name

Street address

City, State, ZIP code

Daytime phone with area code

Purchase order No. (optional)

Fax your orders (202) 512–2250
Phone your orders (202) 512–1800

(Includes regular shipping and handling.)
For privacy check box below:

PART 301—INSTRUMENTS AND APPARATUS FOR EDUCATIONAL AND SCIENTIFIC INSTITUTIONS

Sec. 301.1 General provisions.
301.2 Definitions.
301.3 Application for duty-free entry of scientific instruments.
301.4 Processing of applications by the Department of the Treasury (U.S. Customs Service).
301.5 Processing of applications by the Department of Commerce.
301.6 Appeals.
301.7 Final disposition of an application.
301.8 Instructions for entering instruments through U.S. Customs under tariff item 851.60.
301.9 Uses and disposition of instruments entered under item 851.60, TSUS.
301.10 Importation of repair components under item 851.65 for article previously entered under item 851.60.

AUTHORITY: Sec. 6(c), Pub. L. 89–651, 80 Stat. 897 (19 U.S.C. 1202).

SOURCE: 47 FR 32517, July 28, 1982, unless otherwise noted.

§ 301.1 General provisions.

(a) Purpose. This part sets forth the regulations of the Department of Commerce and the Department of the Treasury applicable to the duty-free importation of scientific instruments and apparatus by public or private nonprofit institutions.

(b) Background. (1) The Agreement on the importation of Educational, Scientific, and Cultural Materials (Florence Agreement; "the Agreement") is a multinational treaty, contracted to by approximately 89 countries, which seeks to further the cause of peace through the freer exchange of ideas and knowledge across national boundaries, primarily by eliminating tariffs on certain educational, scientific and cultural materials.

(2) Annex D of the Agreement provides that scientific instruments and apparatus intended exclusively for educational purposes or pure scientific research use by qualified nonprofit institutions shall enjoy duty-free entry if instruments or apparatus of equivalent scientific value are not being manufactured in the country of importation.

(3) Pub. L. 89–651, the Educational, Scientific, and Cultural Materials Importation Act of 1966 (19 U.S.C. 1202; "the Act"); implements the Agreement in the United States. Section 6(c) of the Act gives effect to Annex D of the Agreement. This section added tariff item 851.60 to the Tariff Schedules of the United States (TSUS) to provide for the duty-free importation of instruments and apparatus "entered for the use of any nonprofit institution, whether public or private, established for educational or scientific purposes ** if no instrument or apparatus of equivalent scientific value for the purposes for which the instrument or apparatus is intended to be used is being manufactured in the United States." Headnote 1 to Schedule 8, part 4, TSUS, was amended by Pub. L. 89–651 and provides for the use, disposition and transfer of articles and their repair components accorded duty-free entry under tariff items 851.60 and 851.65, respectively, and Headnote 6, added by Pub. L. 89–651, sets forth the duty-free procedures and responsibilities.

(c) Summary of statutory procedures and requirements. (1) Headnote 1 provides, among other things, that articles covered by tariff items 851.60 (scientific instruments and apparatus) and 851.65 (repair components therefor) must be exclusively for the use of the institutions involved and not for distribution, sale or other commercial use within five years after being entered. These articles may be transferred by a qualified nonprofit institution to another such institution without duty liability being incurred. However, if such article is transferred other than as provided by the preceding sentence, or is used for commercial purposes within five years after having been entered, duty shall be assessed in accordance with the procedures established in Headnote 1.

(2) Pursuant to Headnote 6 an institution desiring to enter an instrument or apparatus under tariff item 851.60 TSUS must file an application with the
§ 301.2 Definitions.

For the purposes of these regulations and the forms used to implement them:

(a) Director means the Director of the Statutory Import Programs Staff, International Trade Administration, U.S. Department of Commerce.

(b) Customs means the U.S. Customs Service and the "The Commissioner" means Commissioner of the U.S. Customs Service, or the official(s) designated to act on the Commissioner's behalf.

(c) Customs Port or the Port means the port where a particular claim has been or will be made for duty-free entry of a scientific instrument or apparatus under tariff item 851.60.

(d) Entry means entry of an instrument into the Customs territory of the United States for consumption or withdrawal of an instrument from a Customs bonded warehouse for consumption.

(e) United States includes only the several States, the District of Columbia and the Commonwealth of Puerto Rico.

(f) Instrument means only instruments and apparatus classifiable under the tariff items specified in headnote 6(a) of part 4 of Schedule 8. A combination of basic instrument or apparatus and accompanying accessories shall be treated as a single instrument provided that, under normal commercial practice, such combination is considered to be a single instrument and provided further that the applicant has ordered or, upon favorable action on its application, firmly intends to order the combination as a unit. Unless the context indicates otherwise, instrument or apparatus shall mean a foreign "instrument or apparatus" for which duty-free entry is sought under tariff item 851.60. Spare parts typically ordered and delivered with an instrument are also considered part of an instrument for purposes of these regulations. The term "instruments" shall not include:

(1) Materials or supplies used in the operation of instruments and apparatus such as paper, cards, tapes, ink, recording materials, expendable laboratory materials, apparatus that loses identity or is consumed by usage or other materials or supplies.

(2) Ordinary equipment for use in building construction or maintenance; or equipment for use in supporting activities of the institution, such as its administrative offices, machine shops, libraries, centralized computer facilities, eating facilities, or religious facilities; or support equipment such as copying machines, glass working apparatus and film processors.
(3) General purpose equipment such as air conditioners, electric typewriters, electric drills, refrigerators.

(4) General-purpose computers. Accessories to computers which are not eligible for duty-free treatment are also ineligible. Scientific instruments containing electronic components which are to be used in a dedicated process or in instrument control, as opposed to general data processing or computation, are, however, eligible for duty-free consideration.

(5) Instruments initially imported solely for testing or review purposes which were entered under bond under tariff item 864.30, subject to the provisions of Headnote 1(a) of subpart C, part 5, schedule 8 TSUS and must be exported or destroyed within the time period specified in that headnote.

(g) Domestic instrument means an instrument which is manufactured in the United States. A domestic instrument need not be made exclusively of domestic components or accessories.

(h) Accessory has the meaning which it has under normal commercial usage. An accessory, whether part of an instrument or an attachment to an instrument, adds to the capability of an instrument. An accessory for which duty-free entry is sought under item 851.60 shall be the subject of a separate application when it is not an accompanying accessory.

(i) Accompanying accessory means an accessory for an instrument that is listed as an item in the same purchase order and that is necessary for accomplishment of the purposes for which the instrument is intended to be used.

(j) Ancillary equipment means an instrument which may be functionally related to the foreign instrument but is not operationally linked to it. Examples of ancillary equipment are vacuum evaporators or ultramicrotomes, which can be used to prepare specimens for electron microscopy. Further, equipment which is compatible with the foreign instrument, but is also clearly compatible with similar domestic instruments, such as automatic sampling equipment sold for use with a variety of mass spectrometers, will be treated as ancillary equipment. A separate application will be required for ancillary equipment even if ordered with the basic instrument.

(k) Components of an instrument means parts or assemblies of parts which are substantially less than the instrument to which they relate. A component enables an instrument to function at a specified minimum level, while an accessory adds to the capability of an instrument. Applications shall not be accepted for components of instruments that did not enter duty-free under tariff item 851.60 or for components of instruments being manufactured or assembled by a commercial firm or entity in the U.S. In determining whether an item is a component ineligible for duty-free consideration or an accessory eligible for such consideration, Customs shall take into account such factors as the item's complexity, novelty, degree of integration and pertinency to the research purposes to be performed by the instrument as a whole.

(l) Produced for stock means an instrument which is manufactured, on sale and available from a stock.

(m) Produced on order means an instrument which a manufacturer lists in current catalog literature and is able and willing to produce and have available without unreasonable delay to the applicant.

(n) Custom-made means an instrument which a manufacturer is willing and able to make to purchaser's specifications. Instruments resulting from a development effort are treated as custom-made for the purposes of these regulations. Also, a special-order variant of a produced on order instrument, with significant modifications specified by the applicant, may be treated as custom-made.

(o) Same general category means the category in which an instrument is customarily classified in trade directories and product-source lists, e.g., scanning electron microscope, mass spectrometer, light microscope, x-ray spectrometer.

(p) Comparable domestic instrument means a domestic instrument capable or potentially capable of fulfilling the applicant's technical requirements or intended uses, whether or not in the same general category as the foreign instrument.
§ 301.3 Application for duty-free entry of scientific instruments.

(a) Who may apply. An applicant for duty-free entry of an instrument under tariff item 851.60 must be a public or private nonprofit institution which is established for educational or scientific purposes and which has placed a bona fide order or has a firm intention to place a bona fide order for a foreign instrument within 60 days following a favorable decision on the institution’s application.

(b) Application forms. Applications must be made on form ITA-338P which may be obtained from the Statutory Import Programs Staff, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230, or from the various District Offices of the U.S. Department of Commerce. (Approved by the Office of Management and Budget under control number 0625-0037.)

(c) Where to apply. Applications must be filed with the U.S. Customs Service, Department of the Treasury, at the address specified on page 1 of the form.

(d) Five copies of the form, including relevant supporting documents, must be submitted. One copy of the form shall be signed in the original by the person in the applicant institution under whose direction and control the foreign instrument will be used and who is familiar with the intended uses of the instrument.

(q) Specifications means the particulars of the structural, operational and performance characteristics or capabilities of a scientific instrument.

(r) Guaranteed specifications are those specifications which are an explicit part of the contractual agreement between the buyer and the seller (or which would become part of the agreement if the buyer accepted the seller’s offer), and refer only to the minimum and routinely achievable performance levels of the instrument under specified conditions. If a capability is listed or quoted as a range (e.g., “5 to 10 angstroms”) or as a minimum that may be exceeded (e.g., “5 angstroms or better”), only the inferior capability may be considered the guaranteed specification. Evidence that specifications are “guaranteed” will normally consist of their being printed in a brochure or other descriptive literature of the manufacturer; being listed in a purchase agreement upon which the purchase is conditioned; or appearing in a manufacturer’s formal response to a request for quote. If, however, no opportunity to submit a bid was afforded the domestic manufacturer or if, for any other reason, comparable guaranteed specifications of the foreign and domestic instruments do not appear on the record, other evidence relating to a manufacturer’s ability to provide an instrument with comparable specifications may, at the discretion of the Director, be considered in the comparison of the foreign and domestic instruments’ capabilities.

(s) Pertinent specifications are those specifications necessary for the accomplishment of the specific scientific research and/or science-related educational purposes described by the applicant. Specifications of features (even if guaranteed) which afford greater convenience, satisfy personal preferences, accommodate institutional commitments or limitations, or assure lower costs of acquisition, installation, operation, servicing or maintenance are not pertinent. For example, a design feature, such as a small number of knobs or controls on an instrument primarily designed for research purposes, would be a convenience. The ability to fit an instrument into a small room, when the required operations could be performed in a larger room, would be either a cost consideration or a matter of convenience and not a pertinent specification. In addition, mere difference in design (which would, for example, broaden the educational experience of students but not provide superior scientific capability) would not be pertinent. Also, unless the applicant demonstrates it is necessary for the accomplishment of its specific scientific purposes, the terms does not extend to such characteristics as size, weight, appearance, durability, reliability, complexity or (simplicity), ease of operation, ease of maintenance, productivity, versatility, “state of the art” design, specific design, or other such characteristics.

[47 FR 32517, July 28, 1982; 47 FR 34368, Aug. 9, 1982]
§ 301.4 Processing of applications by the Department of the Treasury (U.S. Customs Service).

(a) Review and determination. The Commissioner shall date each application when received by Customs. If the application appears to be complete, the Commissioner shall determine:

(1) Whether the institution is a nonprofit private or public institution established for research and educational purposes and therefore authorized to import instruments into the U.S. under tariff item 851.60. In making this determination the Commissioner will generally review the application to determine if the applicant has attached a copy of the letter from the Internal Revenue Service (IRS) granting the institution nonprofit status (exemption from Federal income tax) under section 501(c)(3) of the IRS Code or will determine if the institution is listed in a current edition of “Cumulative List of Exempt Organizations”;

(2) Whether the instrument falls within the classes of instruments eligible for duty-free entry consideration under tariff item 851.60 (for eligible classes see Headnote 6(a), part 4, Schedule 8, TSUS); and

(3) Whether the instrument which is the subject of the application is intended for the exclusive use of the applicant institution and is not intended to be used for commercial purposes.

For the purposes of this section, commercial uses would include, but not necessarily be limited to: Distribution or sale of the instrument by the applicant institution; any use by, or for the primary benefit of, a commercial entity; or use of the instrument for demonstration purposes in return for a fee or other valuable consideration. In making the above determination, the Commissioner may consider, among other things, whether the results of any research to be performed with the instrument will be fully and timely made available to the public. For the purposes of this section, use of an instrument for the treatment of patients is considered noncommercial.

(b) Forwarding of applications to the Department of Commerce. If the Commissioner finds the application to be within the scope of the Act and these regulations, the Commissioner shall (1) assign a number to the application and (2) forward one copy to the Secretary of the Department of Health and Human Services (HHS), and two copies, including the one that has been signed in the original, to the Director. The Commissioner shall retain one copy and return the remaining copy to the applicant stamped “Accepted for Transmittal to the Department of Commerce.” The applicant shall file the stamped copy of the form with the Port when formal entry of the article is made. If entry has already occurred
§ 301.5 Processing of applications by the Department of Commerce.

(a) Public notice and opportunity to present views. (1) Within 10 days of receipt of an application from the Commissioner, the Director shall make a copy available for public inspection during ordinary business hours of the Department of Commerce. Unless the Director determines that an application has deficiencies which preclude consideration on its merits (e.g., insufficient description of intended purposes to rule on the scientific equivalency of the foreign instrument and potential domestic equivalents), he shall publish in the FEDERAL REGISTER a notice of the receipt of the application to afford all interested persons a reasonable opportunity to present their views with respect to the question "whether an instrument or apparatus of equivalent scientific value for the purpose for which the article is intended to be used is being manufactured in the United States." The notice will include the application number, the name and address of the applicant, a description of the instrument(s) for which duty-free entry is requested, the name of the foreign manufacturer and a brief summary of the applicant’s intended purposes extracted from the applicant’s answer to question 7 of the application. In addition, the notice shall specify the date the application was accepted by the Commissioner for transmittal to the Department of Commerce.

(2) If the Director determines that an application is incomplete or is otherwise deficient, he may request the applicant to supplement the application, as appropriate, prior to publishing the notice of application in the FEDERAL REGISTER. Supplemental information/material requested under this provision shall be supplied to the Director in two copies within 20 days of the date of the request and shall be subject to the certification contained in Question 11 of the form. Failure to provide the requested information on time shall result in a denial of the application without prejudice to resubmission.

(3) Requirement for presentation of views (comments) by interested persons. Any interested person or government agency may make written comments to the Director with respect to the question whether an instrument of equivalent scientific value, for the purposes for which the foreign instrument is intended to be used, is being manufactured in the United States. Except for comments specified in paragraph (a)(4) of this section, comments should be in the form of supplementary answers to the applicable questions on the application form. Comments must be postmarked no later than 20 days from the date on which the notice of application is published in the FEDERAL REGISTER. In order to be considered, comments and related attachments must be submitted to the Director in duplicate; shall state the name, affiliation and address of the person submitting the comment; and shall specify the application to which the comment applies. Separate comments should be supplied on each application in which a person has an interest. However, brochures, pamphlets, printed specifications and the like, included with previous comments, if properly identified, may be incorporated by reference in subsequent comments. If the Director knows of the availability of a domestic instrument which may be comparable to the foreign instrument, he may: (i) Require the applicant to compare the domestic instrument with the foreign instrument; or (ii) compare the two instruments whether or not comments are received from a domestic manufacturer on the specific application.

(4) Comments by domestic manufacturers. Comments of domestic manufacturers opposing the granting of an application should:
(i) Specify the domestic instrument considered to be scientifically equivalent to the foreign article for the applicant's specific intended purposes and include documentation of the domestic instrument's guaranteed specifications and date of availability.

(ii) Show that the specifications claimed by the applicant in response to question 8 to be pertinent to the intended purpose can be equaled or exceeded by those of the listed domestic instrument(s) whether or not it has the same design as the foreign instrument; that the applicant's alleged pertinent specifications should not be considered pertinent within the meaning of §301.2(s) of the regulations for the intended purposes of the instrument described in response to question 7 of the application; or that the intended purposes for which the instrument is to be used do not qualify the instrument for duty-free consideration under the Act.

(iii) Where the comments regarding paragraphs (a)(4)(i) and (a)(4)(ii) of this section relate to a particular accessory or optional device offered by a domestic manufacturer, cite the type, model or other catalog designation of the accessory device and include the specification therefor in the comments.

(iv) Where the justification for duty-free entry is based on excessive delivery time, show whether:

(A) The domestic instrument is as a general rule either produced for stock, produced on order, or custom-made and;

(B) An instrument or apparatus of equivalent scientific value to the article, for the purposes described in response to question 7, could have been produced and delivered to the applicant within a reasonable time following the receipt of the order.

(v) Indicate whether the applicant afforded the domestic manufacturer an opportunity to furnish an instrument or apparatus of equivalent scientific value to the article for the purposes described in response to question 7 and, if such be the case, whether the applicant submitted a formal invitation to bid that included the technical requirements of the applicant.

(5) Untimely comments. Comments must be made on a timely basis to ensure their consideration by the Director and the technical consultants, and to preserve the commenting person's right to appeal the Director's decision on an application. The Director, in his discretion, may entertain comments filed untimely to the extent that they contain factual information, as opposed to arguments, explanations or recommendations.

(6) Provision of general comments. A domestic manufacturer who does not wish to oppose duty-free entry of a particular application, but who desires to apprise the Director of the availability and capabilities of its instrument(s), may at any time supply documentation to the Director without reference to a particular application. Such documentation shall be routinely taken into account by the Director when applications involving comparable foreign instruments are received. The provision of general comments does not preserve the commentor's right to appeal the Director's decision on a particular application.

(7) Provision of application to domestic manufacturers. To facilitate timely comments, the Director may furnish copies of certain applications to domestic manufacturers who intend to comment on applications, provided:

(i) The manufacturer requests the service in writing;

(ii) The manufacturer provides copies of current company literature regarding the domestic instrument and its guaranteed capabilities; and

(iii) The manufacturer identifies the specific models or types of comparable foreign instrument(s) that it proposes to comment on. The Director may furnish for comment copies of the appropriate applications to the domestic manufacturer until the firm requests that the service be discontinued, provided the firm utilizes the service to supply written comments on applications. If the recipient of the service fails to avail itself of the opportunity to comment on appropriate applications for a period of one year, the Director may at his discretion discontinue the service. For reasons of cost and administrative burden, the service may be discontinued at the discretion of the Director. In such case the Director shall notify all recipients.
(b) Additions to the record. The Director may solicit from the applicant or from foreign or domestic manufacturers, and agents thereof, or any other person or Government agency considered by the Director to have competence on any issue pertaining to an application, any additional information the Director deems necessary to the rendering of a decision. The Director may attach such conditions and time limitations deemed appropriate upon the provision of such information and may draw appropriate inferences from a person's failure to provide the requested information.

(c) Advice from technical consultants.

(1) The Director shall consider any written advice from the Secretary of HHS, or his delegate, on the question whether a domestic instrument of equivalent scientific value to the foreign instrument, for the purposes for which the instrument is intended to be used, is being manufactured in the United States.

(2) After the comment period has ended (§ 301.5(a)(3)), the complete application and any comments received and related information are forwarded to the appropriate technical consultants for their written advice.

(3) The technical consultants are requested to provide their written recommendation within 30 days of the date of transmittal. The technical consultants relied upon for advice may include, but are not limited to, the National Institutes of Health (delegated the function by the Secretary of HHS), the National Bureau of Standards and the National Oceanographic and Atmospheric Administration.

(d) Criteria for the determinations of the Department of Commerce—(1) Scientific equivalency. (i) The determination of scientific equivalency shall be based on a comparison of the pertinent specifications of the foreign instrument with similar pertinent specifications of comparable domestic instruments (see § 301.2(s) for the definition of pertinent specification). Ordinarily, the Director will consider only those performance characteristics which are "guaranteed specifications" within the meaning of § 301.2(r) of this part. In no event, however, shall the Director consider performance capabilities superior to the manufacturer's guaranteed specifications or their equivalent. In making the comparison the Director may consider a reasonable combination of domestic instruments that combines two or more functions into an integrated unit if the combination of domestic instruments is capable of accomplishing the purposes for which the foreign instrument is intended to be used. If the Director finds that a domestic instrument possesses all of the pertinent specifications of the foreign instrument, he shall find that there is being manufactured in the United States an instrument of equivalent scientific value for such purposes as the foreign instrument is intended to be used. If the Director finds that the foreign instrument possesses one or more pertinent specifications not possessed by the comparable domestic instrument(s), the Director shall find that there is not being manufactured in the United States an instrument of equivalent scientific value to the foreign instrument for such purposes as the foreign instrument is intended to be used.

(ii) Programs that may be undertaken at some unspecified future date shall not be considered in the Director's comparison. In making the comparison, the Director shall consider only the instrument and accompanying accessories described in the application and determined eligible by the U.S. Customs Service. The Director shall not consider the planned purchase of additional accessories or the planned conversion of the article at some unspecified future time for such programs.

(iii) In order for the Director to make a determination with respect to the "scientific equivalency" of the foreign and domestic instruments, the applicant's intended purposes must include either scientific research or science-related educational programs. Instruments used exclusively for nonscientific purposes have no scientific value, thereby precluding the requisite finding by the Director with respect to "whether an instrument or apparatus of equivalent scientific value to such article, for the purposes for which the article is intended to be used, is being
manufactured in the United States." In such cases the Director shall deny the application for the reason that the instrument has no scientific value for the purposes for which it is intended to be used. Examples of nonscientific purposes would be the use of an instrument in routine diagnosis or patient care and therapy (as opposed to clinical research); in teaching a nonscientific trade (e.g., printing, shoemaking, metalworking or other types of vocational training); in teaching nonscientific courses (e.g., music, home economics, journalism, drama); in presenting a variety of subjects or merely for presenting coursework, whether or not science related (e.g., video tape editors, tape recorders, projectors); and in conveying cultural information to the public (e.g., a planetarium in the Smithsonian Institution).

(2) Manufactured in the United States. An instrument shall be considered as being manufactured in the United States if it is customarily "produced for stock," "produced on order," or "custom-made" within the United States. In determining whether a U.S. manufacturer is able and willing to produce an instrument, and have it available without unreasonable delay, the normal commercial practices applicable to the production and delivery of instruments of the same general category shall be taken into account, as well as other factors which in the Director's judgment are reasonable to take into account under the circumstances of a particular case. For example, in determining whether a domestic manufacturer is able to produce a custom-made instrument, the Director may take into account the production experience of the domestic manufacturer including (i) the types, complexity and capabilities of instruments the manufacturer has produced, (ii) the extent of the technological gap between the instrument to which the application relates and the manufacturer's customary products, (iii) the manufacturer's technical skills, (iv) the degree of saturation of the manufacturer's production capability, and (v) the time required by the domestic manufacturer to produce the instrument to the purchaser's specification. Whether or not the domestic manufacturer has field tested or demonstrated the instrument will not, in itself, enter into the decision regarding the manufacturer's ability to manufacture an instrument. Similarly, in determining whether a domestic manufacturer is willing to produce an instrument, the Director may take into account the nature of the bid process, the manufacturer's policy toward manufacture of the product(s) in question, the minimum size of the manufacturer's production runs, whether the manufacturer has bid similar instruments in the past, etc. Also, if a domestic manufacturer was formally requested to bid an instrument, without reference to cost limitations and within a leadtime considered reasonable for the category of instrument involved, and the domestic manufacturer failed formally to respond to the request, for the purposes of this section the domestic manufacturer would not be considered willing to have supplied the instrument.

(3) Burden of proof. The burden of proof shall be on the applicant to demonstrate that no instrument of equivalent scientific value for the purposes for which the foreign instrument is to be used is being manufactured in the United States. Evidence of applicant favoritism towards the foreign manufacturer (advantages not extended to domestic firms, such as additional lead time, know-how, methods, data on pertinent specifications or intended uses, results of research or development, tools, jigs, fixtures, parts, materials or test equipment) may be, at the Director's discretion, grounds for rejecting the application.

(4) Excessive delivery time. Duty-free entry of the instrument shall be considered justified without regard to whether there is being manufactured in the United States an instrument of equivalent scientific value for the intended purposes if excessive delivery time for the domestic instrument would seriously impair the accomplishment of the applicant's intended purposes. For purposes of this section, (i) except when objective and convincing evidence is presented that, at the time of order, the actual delivery time
§ 301.5  15 CFR Ch. III (1–1–00 Edition)

would significantly exceed quoted delivery time, no claim of excessive delivery time may be made unless the applicant has afforded the domestic manufacturer an opportunity to quote and the delivery time for the domestic instrument exceeds that for the foreign instrument; and (ii) failure by the domestic manufacturer to quote a specific delivery time shall be considered a non-responsive bid (see § 301.5(d)(2)). In determining whether the difference in delivery times cited by the applicant justifies duty-free entry on the basis of excessive delivery time, the Director shall take into account (A) the normal commercial practice applicable to the production of the general category of instrument involved; (B) the efforts made by the applicant to secure delivery of the instruments (both foreign and domestic) in the shortest possible time; and (C) such other factors as the Director finds relevant under the circumstances of a particular case.

(e) Denial without prejudice to resubmission (DWOP). The Director may, at any stage in the processing of an application by the Department of Commerce, DWOP an application if the application contains any deficiency which, in the Director’s judgment, prevents a determination on its merits. The Director shall state the deficiencies of the application in a letter to the applicant in making the provisional denial.

(1) The applicant has 60 days from the date of the DWOP to correct the cited deficiencies in the application unless a request for an extension of time for submission of the supplemental information has been received by the Director prior to the expiration of the 60-day period and is approved.

(2) The written request (letter or telegram) for an extension should indicate the reasons for the request and the amount of additional time needed. If granted, extensions of time will generally be limited to 30 days.

(3) Resubmissions must reference the application number of the earlier application. The resubmission shall be made by letter and filed in quadruplicate with the Director. The record of a resubmitted application shall include the original submission on file with the Department. Any new material or information contained in a resubmission, which should address the specific deficiencies cited in the DWOP letter, should be clearly labeled and referenced to the applicable question(s) on the application form. The resubmission should be signed and dated by the individual in the applicant institution who signed the original application or, in his/her absence, the individual in the applicant institution under whose direction and control the foreign instrument will be used and who is familiar with the intended uses of the instrument. The resubmission must be for the instrument covered by the original application unless the DWOP letter specifies to the contrary. The resubmission shall be subject to the certification contained in question 11 on the original application.

(4) If the applicant fails to resubmit within the applicable time period, the prior DWOP shall, irrespective of the merits of the case, result in a denial of the application.

(5) The Director shall use the postmark date of the fully completed resubmission in determining whether the resubmission was made within the allowable time period. Certified or registered mail, or some other means which can unequivocally establish the date of mailing, is recommended.

(6) The applicant may, at any time prior to the end of the resubmission period, notify the Director in writing that it does not intend to resubmit the application. Upon such notification, the application will be deemed to have been withdrawn. (See § 301.5(g).)

(7) Information provided in a resubmission that, in the judgment of the Director, contradicts or conflicts with information provided in a prior submission, or is not a reasonable extension of the information contained in the prior submission, shall not be considered in making the decision on an application that has been resubmitted. Accordingly, an applicant may elect to reinforce an original submission by elaborating in the resubmission on the description of the purposes contained in a prior submission and may supply additional examples, documentation and/or other clarifying detail, but the applicant shall not introduce new purposes.
or other material changes in the nature of the original application. The re-submission should address the specific deficiencies cited in the DWOP. The Director may draw appropriate inferences from the failure of an applicant to attempt to provide the information requested in the DWOP.

(8) In the event an applicant fails to address the noted deficiencies in the response to the DWOP, the Director may deny the application.

(9) Upon receipt of a responsive re-submission the Director shall publish a notice in the Federal Register citing the number of the earlier application, the name and address of the applicant institution, the instrument(s) involved, and any other information the Director deems relevant. The notice will also include the Federal Register citation for the original notice of application. Procedures applicable to comments on the processing of original applications shall thereafter apply.

(f) Decisions on applications. The Director shall prepare a written decision granting or denying each application. However, when he deems appropriate, the Director may issue a consolidated decision on two or more applications. The Director shall promptly forward a copy of the decision to each applicant institution and to the Federal Register for publication.

(g) Withdrawal of applications. The Director shall discontinue processing an application withdrawn by the applicant and shall publish notice of such withdrawal in the Federal Register. If at any time while its application is pending before the Director, either during the initial application or resubmission stage, an applicant cancels an order for the instrument to which the application relates or ceases to have a firm intention to order such instrument, the institution shall promptly notify the Director. Such notification shall constitute a withdrawal. Withdrawals shall be considered as having been finally denied for purposes of §301.7(c) below.

(h) Nothing in this subsection shall be construed as limiting the Director's discretion at any stage of processing to insert into the record and consider in making his decision any information in the public domain which he deems relevant.

§301.6 Appeals.

(a) An appeal from any decision made pursuant to §301.5(f) may be taken, in accordance with headnote 6(e) to part 4 of Schedule 8, only to the U.S. Court of Customs and Patent Appeals and only on questions of law, within 20 days after publication of the decision in the Federal Register. If at any time while its application is under consideration by the Court of Customs and Patent Appeals on an appeal from a finding by the Director an institution cancels an order for the instrument to which the application relates or ceases to have a firm intention to order such instrument, the institution shall promptly notify the court.

(b) An appeal may be taken by: (1) The institution which makes the application;

(2) A person who, in the proceeding which led to the decision, timely represented to the Secretary of Commerce in writing that he/she manufactures in the United States an instrument of equivalent scientific value for the purposes for which the instrument to which the application relates is intended to be used;

(3) The importer of the instrument, if the instrument to which the application relates has been entered at the time the appeal is taken; or

(4) An agent of any of the foregoing.

(c) Questions regarding appeal procedures should be addressed directly to the U.S. Court of Customs and Patent Appeals, Clerks' Office, Washington, DC 20439.

§301.7 Final disposition of an application.

(a) Disposition of an application shall be final when 20 days have elapsed after publication of the Director's final decision in the Federal Register (see §301.6(a)), and no appeal has been taken pursuant to §301.6 of these regulations, of if such appeal has been taken, when final judgment is made and entered by the Court.
§ 301.8 Instructions for entering instruments through U.S. Customs under tariff item 851.60.

Failure to follow the procedures in this section may disqualify an instrument for duty-free entry notwithstanding an approval of an application on its merits by the Department of Commerce.

(a) Entry procedures. (1) An applicant desiring duty-free entry of an instrument may make a claim at the time of entry of the instrument into the Customs territory of the United States that the instrument is entitled to duty-free classification under tariff item 851.60.

(2) If no such claim is made the instrument shall be immediately classified without regard to tariff item 851.60, duty will be assessed, and the entry liquidated in the ordinary course.

(3) If a claim is made for duty-free entry under tariff item 851.60, the entry shall be accepted without requiring a deposit of estimated duties provided that a copy of the form, stamped by Customs as accepted for transmittal to the Department of Commerce in accordance with §301.4(b), is filed simultaneously with the entry.

(4) If a claim for duty-free entry under tariff item 851.60 is made but is not accompanied by a copy of the properly stamped form, a deposit of the estimated duty is required. Liquidation of the entry shall be suspended for a period of 180 days from the date of entry. On or before the end of this suspension period the applicant must file with the Customs Port a properly stamped copy of the form. In the event that the Customs Port does not receive a copy of the properly stamped form within 180 days the instrument shall be classified and liquidated in the ordinary course, without regard to tariff item 851.60.

(5) Entry of an instrument after the Director's approval of an application. Whenever an institution defers entry until after it receives a favorable final determination on the application for duty-free entry of the instrument, the importer shall file with the entry of the instrument (i) the stamped copy of the form, (ii) the institution's copy of the favorable final determination, and (iii) proof that a bona fide order for the merchandise was placed on or before the 60th day after the favorable decision became final pursuant to §301.7 of these regulations. Liquidation in such case shall be made under tariff item 851.60.

(b) Normal Customs entry requirements. In addition to the above entry requirements mentioned in paragraph (a) of this section, the normal Customs entry requirements must be met. In most of the cases, the value of the merchandise will be such that the formal Customs entry requirements, which generally include the filing of a Customs entry bond, must be complied with. (For further information, see 19 CFR 142.3 and 142.4 (TD-221).)

(c) Late filing. Notwithstanding the preceding provisions of §301.8 any document, form, or statement required by regulations in this section to be filed in connection with the entry may be filed at any time before liquidation of the entry becomes final, provided that failure to file at the time of entry or within the period for which a bond was filed for its production was not due to willful negligence or fraudulent intent. Liquidation of any entry becomes conclusive upon all persons if the liquidation is not protested in writing in accordance with 19 CFR part 174, or the necessary document substantiating duty-free entry is not produced in accordance with 19 CFR 10.112, within 90 days after notice of liquidation. Upon notice of such final and conclusive liquidation, the Department of Commerce will cease the processing of any pending application for duty-free entry of the subject article. In all other respects, the provisions of this section do not apply to Department of Commerce
§ 301.9 Uses and disposition of instruments entered under item 851.60, TSUS.

(a) An instrument granted duty-free entry may be transferred from the applicant institution to another eligible institution provided the latter institution agrees not to use the instrument for commercial purposes within 5 years of the date of entry of the instrument. In such cases title to the instrument must be transferred directly between the institutions involved. An institution transferring a foreign instrument entered under item 851.60 within 5 years of its entry shall so inform the Customs Port in writing and shall include the following information:

(1) The name and address of the transferring institution.
(2) The name and address of the transferee.
(3) The date of transfer.
(4) A detailed description of the instrument.
(5) The serial number of the instrument and any accompanying accessories.
(6) The entry number, date of entry, and port of entry of the instrument.

(b) Whenever the circumstances warrant, and occasionally in any event, the fact of continued use for 5 years for noncommercial purposes by the applicant institution shall be verified by Customs.

(c) If an instrument is transferred in a manner other than specified above or is used for commercial purposes within 5 years of entry, the institution for which such instrument was entered shall promptly notify the Customs officials at the Port and shall be liable for the payment of duty in an amount determined on the basis of its condition as imported and the rate applicable to it.

§ 301.10 Importation of repair components under item 851.65 for article previously entered under item 851.60.

(a) An institution which owns an instrument entered under tariff item 851.60 and desires to enter repair components for such instrument under tariff item 851.65 may do so without regard to the application procedures applicable to entries under item 851.60 provided the institution certifies to the customs official at the port of entry upon entry of such components that they are needed repair components for an instrument owned by that institution and previously entered and classified under tariff item 851.60.

(b) Instruments entered under item 851.60 and subsequently returned to the foreign manufacturer for repair, replacement or modification are not covered by tariff item 851.65, although they may, in certain circumstances, be considered non-dutiable under other Customs provisions (e.g., drawback within the specified period pursuant to 19 U.S.C. 1313(c)). Such instruments, if classified as dutiable by Customs, may nevertheless be made the subject of a new application under tariff item 851.60.

[47 FR 32517, July 28, 1982; 47 FR 34368, Aug. 9, 1982]
§ 303.1 Purpose.

(a) This part implements the responsibilities of the Secretaries of Commerce and the Interior ("the Secretaries") under Pub. L. 97-446, enacted on 12 January 1983, which substantially amended Pub. L. 89-805, enacted 10 November 1966, amended by Pub. L. 94-88, enacted 8 August 1975, and amended by Pub. L. 94-241, enacted 24 March 1976, and amended by Pub. L. 103-465, enacted 8 December 1994. The law provides for exemption from duty of territorial watches and watch movements without regard to the value of the foreign materials they contain, if they conform with the provisions of U.S. Legal Note 5 to Chapter 91 of the Harmonized Tariff Schedule of the United States ("91/5"). 91/5 denies this benefit to articles containing any material which is the product of any country with respect to which Column 2 rates of duty apply; authorizes the Secretaries to establish the total quantity of such articles, provided that the quantity so established does not exceed 10,000,000 units or one-ninth of apparent domestic consumption, whichever is greater, and provided also that the quantity is not decreased by more than ten percent nor increased by more than twenty percent (or to more than 7,000,000 units, whichever is greater) of the quantity established in the previous year.

(b) The law directs the International Trade Commission to determine apparent domestic consumption for the preceding calendar year in the first year U.S. insular imports of watches and watch movements exceed 9,000,000 units. 91/5 authorizes the Secretaries to establish territorial shares of the overall duty-exemption within specified limits; and provides for the annual allocation of the duty-exemption among insular watch producers equitably and on the basis of allocation criteria, including minimum assembly requirements, that will reasonably maximize the net amount of direct economic benefits to the insular possessions.

(c) The amended law also provides for the issuance to producers of certificates entitling the holder (or any transferee) to obtain duty refunds on watches and watch movements and parts (except discrete watchcases) imported into the customs territory of the United States. The amounts of these certificates may not exceed specified percentages of the producers' verified creditable wages in the insular possessions (90% of wages paid for the production of the first 300,000 units and declining percentages, established by the Secretaries, of wages paid for incremental production up to 750,000 units by each producer) nor an aggregate annual amount for all certificates exceeding $5,000,000 adjusted for growth by the ratio of the previous year's gross national product to the gross national product in 1982. Refund requests are governed by regulations issued by the Department of the Treasury. The Secretaries are authorized to issue regulations necessary to carry out their duties under Headnote 6 and may cancel or restrict the license or certificate of any insular manufacturer found violating the regulations.

§ 303.2

(2) Secretaries means the Secretary of Commerce and the Secretary of Interior or their delegates, acting jointly.

(3) Director means the Director of the Statutory Import Programs Staff, International Trade Administration, U.S. Department of Commerce.

(4) Sale or transfer of a business means the sale or transfer of control, whether temporary or permanent, over a firm to which a duty-exemption has been allocated, to any other firm, corporation, partnership, person or other legal entity by any means whatsoever, including, but not limited to, merger and transfer of stock, assets or voting trusts.

(5) New firm means an entity which is completely separate from and unassociated with (by way of ownership or control) any duty-exempt recipient in any territory. A new entrant is a new firm which has received an allocation.

(6) Producer means a duty-exemption holder which has maintained its eligibility for further allocations by complying with these regulations.

(7) Established industry means all producers, including new entrants, that have maintained their eligibility for further allocations.

(8) Territories, territorial, and insular possessions refer to the insular possessions of the United States (i.e., the U.S. Virgin Islands, Guam, and American Samoa) and the Northern Mariana Islands.

(9) Duty-exemption refers to the authorization of duty-free entry of a specified number of watches and watch movements into the Customs Territory of the United States.

(10) Total annual duty-exemption refers to the entire quantity of watches or watch components which may enter duty-free into the customs territory of the United States from the territories under 91/5 in a calendar year, as determined by the Secretaries or by the International Trade Commission in accordance with the Act.

(11) Territorial distribution refers to the apportionment by the Secretaries of the total annual duty-exemption among the separate territories; territorial share means the portion consigned to each territory by this apportionment.

(12) Allocation refers to the distribution of all parts of a territorial share, or a portion thereof, among the several producers in a territory.

(13) Creditable wages means all wages—up to the amount per person shown in § 303.14(a)(1)(i)—paid to permanent residents of the territories employed in a firm’s 91/5 watch and watch movement assembly operations, plus any wages paid for the repair of non-91/5 watches up to an amount equal to 50 percent of the firm’s total creditable wages. Excluded, however, are wages paid for special services rendered to the firm by accountants, lawyers, or other professional personnel and for the repair of non-91/5 watches and movements to the extent that such wages exceed the foregoing ratio. Wages paid to persons engaged in both creditable and non-creditable assembly and repair activities may be credited proportionately provided the firm maintains production and payroll records adequate for the Departments’ verification of the creditable portion.

(14) Non-91/5 watches and watch movements include, but are not limited to, watches and movements which are liquidated as dutiable by the U.S. Customs Service; contain any material which is the product of any country with respect to which Column 2 rates of duty apply; are ineligible for duty-free treatment pursuant to law or regulation; or are units the assembly of which the Department has determined not to involve substantial and meaningful work in the territory (as elsewhere defined in these regulations).

(15) Discrete movements and components means screws, parts, components and subassemblies not assembled together with another part, component or subassembly at the time of importation into the territory. (A mainplate containing set jewels or shock devices, together with other parts, would be considered a single discrete component, as would a barrel bridge subassembly.)

(b) Forms—(1) ITA–334P “Application for License to Enter Watches and Watch
§ 303.3 Determination of the total annual duty-exemption.

(a) Procedure for determination. If, after considering the productive capacity of the territorial watch industry and the economic interests of the territories, the Secretaries determine that the amount of the total annual duty-exemption, or the territorial shares of the total amount, should be changed, they shall publish in the FEDERAL REGISTER a proposed limit on the quantity of watch units which may enter duty-free into the customs territory of the United States and proposed territorial shares thereof and, after considering comments, establish the limit and shares by FEDERAL REGISTER notice. If the Secretaries take no action under this section, they shall make the allocations in accordance with the limit and shares last established by this procedure.

(b) Standards for determination.

(1) Notwithstanding paragraph (b)(2) of this section, the limit established for any year may be 7,000,000 units if the limit established for the preceding calendar year was a smaller amount.

(2) Subject to paragraph (c) of this section, the total annual duty-exemption shall not be decreased by more than 10% of the quantity established for the preceding calendar year, or increased, if the resultant total is larger than 7,000,000, by more than 20% of the quantity established for the calendar year immediately preceding.

(3) The Secretaries shall determine the limit after considering the interests of the territories; the domestic or international trade policy objectives of the United States.” This form must be completed annually by all producers desiring to receive an annual allocation. It is also used, with appropriate special instructions for its completion, by new firms applying for duty-exemptions.

(2) ITA-333 “License to Enter Watches and Watch Movements into the Customs Territory of the United States.” This form is issued by the Director to producers who have received an allocation and constitutes authorization for issuing specific shipment permits by the territorial governments. It is also used to record the balance of a producer’s remaining duty-exemptions after each shipment permit is issued.

(3) ITA-340 “Permit to Enter Watches and Watch Movements into the Customs Territory of the United States.” This form may be obtained, by producers holding a valid license, from the territorial government or may be produced by the licensee in an approved computerized format or any other medium or format approved by the Departments of Commerce and the Interior. The completed form authorizes duty-free entry of a specified amount of watches or watch movements at a specified U.S. Customs port.

(4) ITA-360P “Certificate of Entitlement to Secure the Refund of Duties on Watches and Watch Movements.” This document authorizes an insular producer to request the refund of duties on imports of watches, watch movements and parts thereof, with certain exceptions, up to a specified value. Certificates may be used to obtain duty refunds only when presented with a properly executed Form ITA-361P.

(5) ITA-361P “Request for Refund of Duties on Watches and Watch Movements.” This form must be completed to obtain the refund of duties authorized by the Director through Form ITA-360P. After authentication by the Department of Commerce, it may be used for the refund of duties on items which were entered into the customs territory of the United States during a specified time period. Copies of the appropriate Customs entries must be provided with this form to establish a basis for issuing the claimed amounts. The forms may also be used to transfer all or part of the producer’s entitlement to another party. (See §303.12.) (The information collection requirements in paragraph (b)(1) were approved by the Office of Management and Budget under control number 0625-0040. The information collection requirements in paragraphs (b)(4) through (6) were approved under control number 0625-0134.)
the United States; the need to maintain the competitive nature of the territorial industry; the total contribution of the industry to the economic well-being of the territories; and the territorial industry's utilization of the total duty-exemption established in the preceding year.

(c) Determinations based on consumption. (1) The Secretaries shall notify the International Trade Commission whenever they have reason to believe duty-free watch imports from the territories will exceed 9,000,000 units, or whenever they make a preliminary determination that the total annual duty-exemption should exceed 10,000,000 units.

(2) In addition to the limitations in paragraph (b) of this section, the Secretaries shall not establish a limit exceeding one-ninth of apparent domestic consumption if such consumption, as determined by International Trade Commission, exceeds 90 million units.

§ 303.4 Determination of territorial distribution.

(a) Procedure for determination. The Secretaries shall determine the territorial shares concurrently with their determination of the total annual duty exemption, and in the same manner (see § 303.3, above).

(b) Standards for determination—(1) Limitations. A territorial share may not be reduced by more than 500,000 units in any calendar year. No territorial share shall be less than 500,000 units.

(2) Criteria for setting precise quantities. The Secretaries shall determine the precise quantities after considering, inter alia, the territorial capacity to produce and ship watch units. The Secretaries shall further bear in mind the aggregate benefits to the territories, such as creditable wages paid, creditable wages per unit exported, and corporate income tax payments.

(3) Limitations on reduction of share. The Secretaries shall not reduce a territory's share if its producers use 85% or more of the quantity distributed to that territory in the immediately preceding year, except in the case of a major increase or decrease in the number of producers in a territory or if they believe that a territorial industry will decrease production by more than 15% from the total of the preceding year.

(4) Standby redistribution authority. The Secretaries may redistribute territorial shares if such action is warranted by circumstances unforeseen at the time of the initial distributions, such as that a territory will use less than 80% of its total by the end of a calendar year, or if a redistribution is necessary to maintain the competitive nature of the territorial industries.

§ 303.5 Application for annual allocations of duty-exemptions.

(a) Application forms (ITA-334P) shall be furnished to producers by January 1, and must be completed and returned to the Director no later than January 31, of each calendar year.

(b) All data supplied are subject to verification by the Secretaries and no allocation shall be made to producer until the Secretaries are satisfied that the data are accurate. To verify the data, representatives of the Secretaries shall have access to relevant company records including:

(1) Work sheets used to answer all questions on the application form;

(2) Original records from which such data are derived;

(3) Records pertaining to ownership and control of the company and to the satisfaction of eligibility requirements of duty-free treatment of its product by the U.S. Customs Service;

(4) Records pertaining to corporate income taxes, gross receipts taxes and excise taxes paid by each producer in the territories on the basis of which a portion of each producer's annual allocation is or may be predicated;

(5) Customs, bank, payroll, and production records;

(6) Records on purchases of components and sales of movements, including proof of payment; and

(7) Any other records in the possession of the parent or affiliated companies outside the territory pertaining to any aspect of the producer's 91/5 watch assembly operation.
§ 303.6 Allocation and reallocation of exemptions among producers.

(a) Interim allocations. As soon as practicable after January 1 of each year the Secretaries shall make an interim allocation to each producer equaling 70% of the number of watch units it has entered duty-free into the customs territory of the United States during the first eight months of the preceding calendar year, or any lesser amount requested in writing by the producer. The Secretaries may also issue a lesser amount if, in their judgment, the producer might otherwise receive an interim allocation in an amount greater than the producer’s probable annual allocation. In calculating the interim allocations, the Director shall count only duty-free watches and watch movements verified by the U.S. Customs Service, or verified by other means satisfactory to the Secretaries, as having been entered on or before August 31 of the preceding year. Interim allocations shall not be published.

(b) Annual allocations. (1) By March 1 of each year the Secretaries shall make annual allocations to the producers in accordance with the allocation formula based on data supplied in their annual application (Form ITA-334P) and verified by the Secretaries.

(2) The excess of a producer’s duty-exemption earned under the allocation criteria over the amount formally requested by the producer shall be considered to have been relinquished voluntarily (see paragraph (f) below). A producer’s request may be modified by written communication received by the Secretaries by February 28, or, at the discretion of the Secretaries, before the annual allocations are made. An allocation notice shall be published in the FEDERAL REGISTER.

(c) Supplemental allocations. At the request of a producer, the Secretaries may supplement a producer’s interim allocation if the Secretaries determine the producer’s interim allocation will be used before the Secretaries can issue the annual allocation. Allocations to supplement a producer’s annual allocation shall be made under the reallocation provisions prescribed below.

(d) Allocations to new entrants. In making interim and annual allocations to producers selected the preceding year as new entrants, the Secretaries shall take into account that such producers will not have had a full year’s operation as a basis for computation of its duty-exemption. The Secretaries may make an interim or annual allocation to a new entrant even if the firm did not operate during the preceding calendar year.

(e) Special allocations. A producer may request a special allocation if unusual circumstances kept it from making duty-free shipments at a level comparable with its past record. In considering such requests, the Secretaries shall take into account the firm’s proposed assembly operations; its record in contributing to the territorial economy; and its intentions and capacity to make meaningful contributions to the territory. They shall also first determine that the amount of the special allocation requested will not significantly affect the amounts allocated to other producers pursuant to §303.6(b)(1).

(f) Reallocations. Duty-exemptions may become available for reallocation as a result of cancellation or reduction for cause, voluntary relinquishment or nonplacement of duty-exemption set aside for new entrants. At the request of a producer, the Secretaries may reallocate such duty-exemptions among the remaining producers who can use additional quantities in a manner judged best for the economy of the territories. The Secretaries shall consider such factors as the wage and income
tax contributions of the respective producers during the preceding year and the nature of the producer's present assembly operations. In addition, the Secretaries may consider other factors which, in their judgment, are relevant to determining that applications from new firms, in lieu of reallocations, should be considered for part or all of unused portions of the total duty exemptions. Such factors may include:

1. The ability of the established industry to use the duty-exemption;
2. Whether the duty-exemption is sufficient to support new entrant operations;
3. The impact upon the established industry if new entrants are selected, particularly with respect to the effect on local employment, tax contributions to the territorial government, and the ability of the established industry to maintain satisfactory production levels; and
4. Whether additional new entrants offer the best prospect for adding economic benefits to the territory.

(g) Section 303.14 of this part contains the criteria and formulae used by the Secretaries in calculating each watch producer's annual watch duty-exemption allocation, and other special rules or provisions the Secretaries may periodically adopt to carry out their responsibilities in a timely manner while taking into account changing circumstances. References to duty-exemptions, unless otherwise indicated, are to the amount available for reallocation in the current calendar year. Specifications of or references to data or bases used in the calculation of current year allocations (e.g., economic contributions and shipments) are, unless indicated otherwise, those which were generated in the previous year.

(h) The Secretaries may propose changes to §303.14 at any time they consider it necessary to fulfill their responsibilities. Normally, such changes will be proposed towards the end of each calendar year. Interested parties shall be given an opportunity to submit written comments on proposed changes.

§ 303.8 Maintenance of duty-exemption entitlements.

(a) The Secretaries may order a producer to show cause within 30 days of receipt of the order why the duty-exemption to which the firm would otherwise be entitled should not be cancelled, in whole or in part, if:

(1) At any time after June 30 of the calendar year:

(i) A producer’s assembly and shipment record provides a reasonable basis to conclude that the producer will use less than 80 percent of its total allocation by the end of the calendar year, and

(ii) The producer refuses a request from the Departments to relinquish that portion of its allocation which they conclude will not be used; or

(2) A producer fails to satisfy or fulfill any term, condition or representation, whether undertaken by itself or prescribed by the Departments, upon which receipt of allocation has been predicated or upon which the Departments have relied in connection with the sale or transfer of a business together with its allocation; or

(3) A producer, in the judgment of the Secretaries, has failed to make a meaningful contribution to the territory for a period of two or more consecutive calendar years, when compared with the performance of the duty-free watch assembly industry in the territory as a whole. This comparison shall include the producer’s quantitative use of its allocations, amount of direct labor employed in the assembly of watches and watch movements, and the net amount of corporate income taxes paid to the government of the territory. If the producer fails to satisfy the Secretaries as to why such action should not be taken, the firm’s allocation shall be reduced or cancelled, whichever is appropriate under the show-cause order. The eligibility of a firm whose allocation has been cancelled to receive further allocations may also be terminated.

(b) The Secretaries may also issue a show-cause order to reduce or cancel a producer’s allocation or production incentive certificate (see §303.12, below), as appropriate, or to declare the producer ineligible to receive an allocation or certificate if it violates any regulation in this part, uses a form, license, permit, or certificate in an unauthorized manner, or fails to provide information or data required by these regulations or requested by the Secretaries or their delegates in the performance of their responsibilities.

(c) If a firm’s allocation is reduced or cancelled, or if a firm voluntarily relinquishes a part of its allocation, the Secretaries may:

(1) Reallocate the allocation involved among the remaining producers in a manner best suited to contribute to the economy of the territory;

(2) Reallocate the allocation or part thereof to a new entrant applicant; or
§ 303.12 Issuance and use of production incentive certificates.

(a) Issuance of certificates. (1) Certificates of Entitlement, Form ITA-360, shall be issued before March 1 of the current year.

(b) Securities and handling of certificates. (1) Certificate holders are responsible for the security of the certificates. The certificates shall be kept at the territorial address of the insular producer or at another location having the advance approval of the Departments.

(2) All refund requests made pursuant to the certificates shall be entered on the reverse side of the certificate.

(3) Certificates shall be returned by registered, certified or express carrier mail to the Departments when:

(i) A refund is requested which exhausts the entitlement on the face of the certificate,

(ii) The certificate expires, or

(iii) The Departments request their return with good cause.

(4) Certificate entitlements may be transferred according to the procedures described in (c) of this section.

(c) The use and transfer of certificate entitlements. (1) Insular producers issued a certificate may request a refund by executing a Form ITA-361P (see § 303.2(b)(5) and the instructions on the form). After authentication by the Department of Commerce, the Form ITA-361P may be used to obtain duty refunds on watch movements, watches, and parts therefore. Duties on watchcases not containing a movement

(3) Do neither of the above if deemed in the best interest of the territories and the established industry.

§ 303.13

(1) Regulations issued by the U.S. Customs Service, U.S. Department of the Treasury, govern the refund of duties under Pub. L. 97-446, as amended by Public Law 103-465. If the Departments receive information from the Customs Service that a producer has made unauthorized use of any official form, they shall cancel the affected certificate.

(3) The insular producer may transfer a portion of all of its certificate entitlement to another party by entering in block C of Form ITA-361P the name and address of the party.

(4) After a Form ITA-361P transferring a certificate entitlement to a party other than the certificate holder has been authenticated by the Department of Commerce, the form may be exchanged for any consideration satisfactory to the two parties. In all cases, authenticated forms shall be transmitted to the certificate holder or its authorized custodian for disposition (see paragraph (b) above).

(5) All disputes concerning the use of an authenticated Form ITA-361P shall be referred to the Departments for resolution. Any party named on an authenticated Form ITA-361P shall be considered an “interested party” within the meaning of § 303.13 of this part.

§ 303.13 Appeals.

(a) Any official decision or action relating to the allocation of duty-exemptions or to the issuance or use of production incentive certificates may be appealed to the Secretaries by any interested party. Such appeals must be received within 30 days of the date on which the decision was made or the action taken in accordance with the procedures set forth in paragraph (b) of this section. Interested parties may petition for the issuance of a rule, or amendment or repeal of a rule issued by the Secretaries. Interested parties may also petition for relief from the application of any rule on the basis of hardship or extraordinary circumstances resulting in the inability of the petitioner to comply with the rule.

(b) Petitions shall bear the name and post office address of the petitioner and the name and address of the principal attorney or authorized representative (if any) for the party concerned. They shall be addressed to the Secretaries and filed in one original and two copies with the U.S. Department of Commerce, Import Administration, International Trade Administration, Washington, D.C. 20230. Attention: Statutory Import Programs Staff. Petitions shall contain the following:

(1) A reference to the decision, action or rule which is the subject of the petition;

(2) A short statement of the interest of the petitioner;

(3) A statement of the facts as seen by the petitioner;

(4) The petitioner’s argument as to the points of law, policy of fact. In cases where policy error is contended, the alleged error together with the policy the submitting party advocates as the correct one should be described in full;

(5) A conclusion specifying the action that the petitioner believes the Secretaries should take.

(c) The Secretaries may at their discretion schedule a hearing and invite the participation of other interested parties.

(d) The Secretaries shall communicate their decision which shall be final, to the petitioner by registered mail.

(e) If the outcome of any petition materially affects the amount of the petitioner’s allocation and if the Secretaries’ consideration of the petition...
continues during the calculation of the annual allocations, the Secretaries shall set aside a portion of the affected territorial share in an amount which, in their judgment, protects the petitioner's interest and shall allocate the remainder among the other producers.

§ 303.14 Allocation factors and miscellaneous provisions.

(a) The allocation formula. (1) Except as provided in (a)(2) of this section, the territorial shares (excluding any amount set aside for possible new entrants) shall be allocated among the several producers in each territory in accordance with the following formula:

(i) Fifty percent of the territorial share shall be allocated on the basis of the dollar amount of economic contributions to the territory consisting of the dollar amount of creditable wages, up to a maximum of $38,650 per person, paid by each producer to territorial residents, plus the dollar amount of income taxes (excluding penalty and interest payments and deducting any income tax refunds and subsidies paid by the territorial government), and

(ii) Fifty percent of the territorial share shall be allocated on the basis of the number of units of watches and watch movements assembled in the territory and entered by each producer duty-free into the customs territory of the United States.

(2) If there is only one producer in a territory, the entire territorial share, excluding any amount set aside for possible new entrants, may be allocated without recourse to any distributive formula.

(b) Minimum assembly requirements and prohibition of preferential supply relationship. (1) No insular watch movement or watch may be entered free of duty into the customs territory of the United States unless the producer used 30 or more discrete parts and components to assemble a mechanical watch movement and 33 or more discrete parts and components to assemble a mechanical watch.

(2) Quartz analog watch movements must be assembled from components with a value of more than $35 for watch movements and $500 for watches shall not be eligible for duty-exemption upon entry into the U.S. Customs territory. Value means the value of the merchandise plus all charges and costs incurred up to the last point of shipment (i.e., prior to entry of the parts and components into the territory).

(3) No producer shall accept from any watch parts and components supplier advantages and preferences which might result in a more favorable competitive position for itself vis-a-vis other territorial producers relying on the same supplier. Disputes under this paragraph may be resolved under the appeals procedures contained in §303.13(b).

(c) Calculation of the value of production incentive certificates. (1) The value of each producer's certificate shall equal the producer's average creditable wages per unit shipped (including non-91/5 units as provided for in §303.2(a)(13)) multiplied by the sum of:

(i) The number of units shipped up to 300,000 units times a factor of 90%; plus

(ii) Incremental units shipped up to 450,000 units times a factor of 85%; plus

(iii) Incremental units shipped up to 600,000 units times a factor of 80%; plus

(iv) Incremental shipments up to 750,000 units times a factor of 75%.

(2) The Departments may make adjustments for these data in the manner set forth in §303.5(c).

(d) New entrant invitations. Applications from new firms are invited for any unused portion of any territorial share.

(e) Territorial shares. The shares of the total duty exemption are 2,240,000 for the Virgin Islands, 500,000 for Guam,
§ 303.15

500,000 for American Samoa, and 500,000 for the Northern Mariana Islands.

Subpart B—Jewelry

SOURCE: 64 FR 67150, Dec. 1, 1999, unless otherwise noted.

§ 303.15 Purpose.

(b) The amended law provides for the issuance of certificates to insular jewelry producers who have met the requirements of the laws and regulations, entitling the holder (or any transferee) to obtain refunds of duties on watches and watch movements and parts (except discrete watch cases) imported into the customs territory of the United States. The amounts of these certificates may not exceed specified percentages of the producers' verified creditable wages in the insular possessions (90% of wages paid for the production of the first 300,000 duty-free units and declining percentages, established by the Secretaries, of wages paid for incremental production up to 750,000 units by each producer) nor an aggregate annual amount that is available, the watch producers shall receive their calculated amounts and the jewelry producers would receive amounts proportionately reduced from the remainder. Refund requests are governed by regulations issued by the Department of the Treasury (see 19 CFR 7.4).

(c) Section 2401(a) of Pub. L. 106±36 and additional U.S. note 5 to chapter 91 of the HTSUS authorize the Secretaries to issue regulations necessary to carry out their duties. The Secretaries may cancel or restrict the certificate of any insular manufacturer found violating the regulations.

§ 303.16 Definitions and forms.

(a) Definitions. For purposes of the subpart, unless the context indicates otherwise:

(2) Secretaries means the Secretary of Commerce and the Secretary of the Interior or their delegates, acting jointly.

(3) Director means the Director of the Statutory Import Programs Staff, International Trade Administration, U.S. Department of Commerce.

(4) Sale or transfer of a business means the sale or transfer of control, whether temporary or permanent, over a firm (or any transferee) to obtain refunds of duties on watches and watch movements and parts (except discrete watch cases) imported into the customs territory of the United States. The amounts of these certificates may not exceed specified percentages of the producers' verified creditable wages in the insular possessions (90% of wages paid for the production of the first 300,000 duty-free units and declining percentages, established by the Secretaries, of wages paid for incremental production up to 750,000 units by each producer) nor an aggregate annual amount that is available, the watch producers shall receive their calculated amounts and the jewelry producers would receive amounts proportionately reduced from the remainder. Refund requests are governed by regulations issued by the Department of the Treasury (see 19 CFR 7.4).

(5) New firm means a jewelry company which has requested in writing to the Secretaries permission to participate in the program. In addition to any other information required by the Secretaries, new firm requests shall include a representation that the company agrees to abide by the laws and regulations of the program, an outline of the company's anticipated economic contribution to the territory (including the number of employees) and a statement as to whether the company is affiliated by ownership or control with
any other watch or jewelry company in the insular possessions. The Secretaries will then review the request and make a decision based on the information provided and the economic contribution to the territory. A new jewelry firm may not be affiliated through ownership or control with any other jewelry duty-refund recipient. In assessing whether persons or parties are affiliated, the Secretaries will consider the following factors, among others: stock ownership; corporate or family groupings; franchise or joint venture agreements; debt financing; and close supplier relationships. The Secretaries may not find that control exists on the basis of these factors unless the relationship has the potential to affect decisions concerning production, pricing, or cost. Also, no jewelry duty-refund recipient may own or control more than one watch duty-refund recipient.

(6) Jewelry producer means a company, located in one of the insular territories (see paragraph (a)(8) of this section), that produces jewelry provided for in heading 7113, HTSUS, which meets all the U.S. Customs Service requirements for duty-free entry set forth in General Note 3(a)(iv), HTSUS, and 19 CFR 7.3, and has maintained its eligibility for duty refund benefits by complying with these regulations.

(7) Unit of jewelry means a single article, pair (example: earrings, cufflinks), subassembly or component which is contained in HTSUS heading 7113.

(8) Territories, territorial and insular possessions refers to the insular possessions of the United States (i.e., the U.S. Virgin Islands, Guam, American Samoa and the Northern Mariana Islands).

(9) Creditable wages means all wages—up to the amount per person of $38,650—paid to permanent residents of the territories employed in the firm’s manufacture of HTSUS heading 7113 articles of jewelry which are a product of the insular possessions and have met the U.S. Customs Service’s criteria for duty-free entry into the United States, plus any wages paid for the repair of non-insular HTSUS heading 7113 jewelry up to an amount equal to 50 percent of the firm’s total creditable wages. Excluded, however, are wages paid for special services rendered to the firm by accountants, lawyers, or other professional personnel plus any wages paid for the assembly of dutiable jewelry or the repair of dutiable jewelry to the extent that such wages exceed the percentage set forth above. Wages paid to persons engaged in production of jewelry that has entered the U.S. both duty-free and duty-paid may be credited proportionately provided the firm maintains production and payroll records adequate for the Department’s verification of the creditable wages portion (see Sec. 303.17(b)).

(10) Dutiable jewelry includes jewelry which does not meet the requirements for duty-free entry under General Note 3(a)(iv), HTSUS, and 19 CFR 7.3, contains any material which is the product of any country with respect to which Column 2 rates of duty apply or is ineligible for duty-free treatment pursuant to other laws or regulations.

(b) Forms.

(1) ITA—334P “Annual Application for License to Enter Watches and Watch Movements into the Customs Territory of the United States.” The Director shall issue instructions for jewelry manufacturers on the completion of the form. The form must be completed annually by all jewelry producers desiring to request the refund of duties on imports of watches, watch movements and parts therefor, up to a specified value. Certificates may be used to obtain duty refunds only when presented with a properly executed Form ITA—360P.

(2) ITA—360P “Certificate of Entitlement to Secure the Refund of Duties on Watches and Watch Movements.” This document authorizes a territorial jewelry producer to request the refund of duties on imports of watches, watch movements and parts therefor, with certain exceptions, up to a specified value. Certificates may be used to obtain duty refunds only when presented with a properly executed Form ITA—360P.

(3) ITA—361P “Request for Refund of Duties on Watches and Watch Movements.” This form must be completed to obtain the refund of duties authorized by the Director through Form ITA—360P. After authentication by the Department of Commerce, it may be used for the refund of duties on items which were entered into the customs territory of the United States during a specified time period. Copies of the appropriate Customs entries must be provided with this form to establish a
§ 303.17 Annual jewelry application.

(a) Form ITA-334P shall be furnished to producers by January 1 and must be completed and returned to the Director no later than January 31 of each calendar year.

(b) All data supplied are subject to verification by the Secretaries and no duty refund shall be made to producers until the Secretaries are satisfied that the data are accurate. To verify the data, representatives of the Secretaries shall have access to relevant company records including, but not limited to:

1. Work sheets used to answer all questions on the application form, as specified by the instructions;
2. Original records from which such data are derived;
3. Records pertaining to ownership and control of the company;
4. Records pertaining to all duty-free and dutiable shipments of HTSUS 7113 jewelry, including Customs entry documents;
5. Records pertaining to corporate income taxes, gross receipts taxes and excise taxes paid by each producer in the territories;
6. Customs, bank, payroll, and production records;
7. Records on purchases of components and sales of jewelry, including proof of payment; and
8. Any other records in the possession of the parent or affiliated companies outside the territory pertaining to any aspect of the producer’s jewelry operations.

(c) Data verification shall be performed in the territories, unless other arrangements satisfactory to the Departments are made in advance, by the Secretaries’ representatives by the end of February of each calendar year. In the event a company cannot substantiate the data in its application, the Secretaries shall determine which data will be used.

(d) Records subject to the requirements of paragraph (b) of this section, shall be retained for a period of two years following their creation.

§ 303.18 Sale or transfer of business.

(a) The sale or transfer of a business together with its duty refund entitlement shall be permitted with prior written notification to the Departments. Such notification shall be accompanied by certifications and representations, as appropriate, that:

1. The transferee is neither directly nor indirectly affiliated with any other territorial duty refund jewelry recipient in any territory;
2. The transferee will not modify the jewelry operations in a manner that will significantly diminish its economic contributions to the territory.

(b) At the request of the Departments, the transferee shall permit representatives of the Departments to inspect whatever records are necessary to establish to their satisfaction that the certifications and representations contained in paragraph (a) of this section have been or are being met.

(c) Any transferee who is either unwilling or unable to make the certifications and representations specified in paragraph (a) of this section shall secure the Departments’ approval in advance of the sale or transfer of the business. The request for approval shall specify which of the certifications specified in paragraph (a) of this section the firm is unable or unwilling to make, and give reasons why such fact should not constitute a basis for the Departments’ disapproval of the sale or transfer.

§ 303.19 Issuance and use of production incentive certificates.

(a) Issuance of certificates. (1) Certificates of Entitlement, Form ITA-360, shall be issued before March 1 of each year.

(2) Certificates shall not be issued to more than one jewelry company in the territories owned or controlled by the same corporate entity.
§ 303.20 Duty refund.

(a) Territorial jewelry producers are entitled to duty refund certificates only for jewelry that they produce which is provided for in heading 7113, HTSUS, is a product of a territory and otherwise meets the requirements for duty-free entry under General Note 3 (a)(iv), HTSUS, and 19 CFR 7.3.

(1) An article of jewelry is considered to be a product of a territory if:

(i) The article is wholly the growth or product of the territory; or

(ii) The article became a new and different article of commerce as a result of production or manufacture performed in the territories.

(2) Two-year exception. Any article of jewelry provided for in heading 7113, HTSUS, entered or withdrawn from warehouse for consumption during the two-year period beginning August 9, 1999, that is assembled in a territory shall be considered a product of the insular possessions. At the expiration of the two-year period, only jewelry which satisfies either of the criteria set forth in paragraph (a)(1) of this section shall be considered a product of an insular possession.

(b) Calculation of the value of production incentive certificates. (1) The
§ 303.21 Appeals.

(a) Any official decision or action relating to the issuance or use of production incentive certificates may be appealed to the Secretaries by any interested party. Such appeals must be received within 30 days of the date on which the decision was made or the action taken in accordance with the procedures set forth in paragraph (b) of this section. Interested parties may petition for the issuance of a rule, or amendment or repeal of a rule issued by the Secretaries. Interested parties may also petition for relief from the application of any rule on the basis of hardship or extraordinary circumstances resulting in the inability of the petitioner to comply with the rule.

(b) Petitions shall bear the name and post office address of the petitioner and the name and address of the principal attorney or authorized representative (if any) for the party concerned. They shall be addressed to the Secretaries and filed in one original and two copies with the U.S. Department of Commerce, Import Administration, International Trade Administration, Washington, DC 20230, Attention: Statutory Import Programs Staff. Petitions shall contain the following:

1. A reference to the decision, action or rule which is the subject of the petition;
2. A short statement of the interest of the petitioner;
3. A statement of the facts as seen by the petitioner;
4. The petitioner’s argument as to the points of law, policy or fact. In cases where policy error is contended, the alleged error together with the policy the submitting party advocates as the correct one should be described in full;
5. A conclusion specifying the action that the petitioner believes the Secretaries should take.

(c) The Secretaries may at their discretion schedule a hearing and invite the participation of other interested parties.
(d) The Secretaries shall communicate their decision, which shall be final, to the petitioner by registered, certified or express mail.
The BIE divides international expositions into different categories and types and requires each member nation to observe specified minimum time intervals in scheduling each of these categories and types of expositions. Under BIE rules, member nations may not ordinarily participate in an international exposition unless such exposition has been approved by the BIE.

The United States became a member of the BIE on April 30, 1968, upon ratification of the Paris Convention by the U.S. Senate (114 Cong. Rec. 11012).

Federal participation in a recognized international exposition requires a specific authorization by the Congress, upon a finding by the President that such participation would be in the national interest. The Act provides for the transmission to Congress of a participation proposal by the President. This proposal transmits to the Congress information regarding the exposition, including a statement that it has been registered by the BIE and a plan for Federal participation prepared by the Secretary of Commerce in cooperation with other interested Federal departments and agencies.

§310.2 Definitions.

For the purpose of this part, except where the context requires otherwise:
(a) Act means Pub. L. 91-269.
(b) Secretary means the Secretary of Commerce.
(c) Commissioner General means the person appointed to act as the senior Federal official for the exposition as required by BIE rules and regulations.
(d) Director means the Director of the International Expositions Staff, Office of the Deputy Assistant Secretary for Export Development, International Trade Administration, Department of Commerce.
(e) Applicant means a State, County, municipality, a political subdivision of the foregoing, private non-profit or not-for-profit organizations, or individuals filing an application with the Director seeking Federal recognition of an international exposition to be held in the United States.
(f) State means one of the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Trust Territory of the Pacific Islands.
(g) Exposition means an international exposition proposed to be held in the United States for which an application has been filed with the Director seeking Federal recognition under the Act; which proposes to invite more than one foreign country to participate; and,
§ 310.3 Applications for Federal recognition.

(a) Applications for Federal recognition of an exposition shall be filed with, and all official communications in connection therewith addressed to, the International Expositions Staff, International Trade Administration, Department of Commerce, Washington, DC 20230.

(b) Every application, exhibit, or enclosure, except where specifically waived by the Director, shall be in quadruplicate, duly authenticated and referenced.

(c) Every application shall be in letter form and shall contain the date, address, and official designation of the applicant and shall be signed by an authorized officer or individual.

(d) Every application, except where specifically waived by the Director, shall be accompanied by the following exhibits:

1. Exhibit No. 1. A study setting forth in detail the purpose for the exposition, including any historical, geographic, or other significant event of the host city, State, or region related to the exposition.

2. Exhibit No. 2. An exposition plan setting forth in detail (i) the theme of the exposition and the “storyline” around which the entire exposition is to be developed; (ii) whatever preliminary architectural and design plans are available on the physical layout of the site plus existing and projected structures; (iii) the type of participation proposed in the exposition (e.g., foreign and domestic exhibitors); (iv) cultural, sports, and special events planned; (v) the proposed BIE category of the event and evidence of its conformity to the regulations of the BIE (a copy of these regulations can be obtained from the Director upon request); (vi) the proposed steps that will be taken to protect foreign exhibitors under the BIE model rules and regulations; and (vii) in writing commit its organization to the completion of the exposition.

3. Exhibit No. 3. Documentary evidence of State, regional and local support (e.g., letters to the applicant from business and civic leadership of the region, pledging assistance and/or financing; State and/or municipal resolutions, acts, or appropriations; referendums on bond issues, and others).

4. Exhibit No. 4. An organization chart of the exposition management structure (actual or proposed) of the applicant, including description of the functions, duties and responsibilities of each official position, with bibliographic material, including any professional experience in the fields of architecture, industrial design, engineering, labor relations, concession management, interpretative theme planning, exhibit development, etc., on principal officers, if available. (The principal officials should also be prepared to submit subsequent individual statements under oath of their respective financial holdings and other interests.)

5. Exhibit No. 5. A statement setting forth in detail (i) the availability of visitor services in existence or projected to accommodate tourists at the exposition (e.g., number of hotel and motel units, number and type of restaurants, health facilities, etc.); (ii) evidence of adequate transportation facilities and accessibility of the host city to large groups of national and international visitors (e.g., number and schedule of airlines, bus lines, railroads, and truck lines serving the host city); and (iii) plans to promote the exposition as a major national and international tourist destination.

6. Exhibit No. 6. A statement setting forth in detail the applicant’s plans for acquiring title to, or the right to occupy and use real property, other than that owned by the applicant or by the United States, essential for implementing the project or projects covered by the application. If the applicant, at the time of filing the application, has acquired title to the real property, he should submit a certified copy of the deed(s). If the applicant, at the time of filing the application, has by easement, lease, franchise, or otherwise acquired the right to occupy and use real property owned by others, he should submit a certified copy of the appropriate legal instrument(s) evidencing this right.

7. Exhibit No. 7. A statement of the latest prevailing hourly wage rates for construction workers in the host city (e.g., carpenters, cement masons, sheet metal workers, etc.).

8. Exhibit No. 8. Information on attitudes of labor leaders as to “no strike” agreements during the development and operation of the exposition. Actual “no strike” pledges are desirable.

9. Exhibit No. 9. A detailed study conducted and certified by a nationally recognized firm(s) in the field of economics, accounting, management, etc., setting forth (i) proposed capital investment cost; cash flow projections; and sources of financing available to meet these costs, including but not limited to funds from State and municipal financing, general obligation and/or general revenue bond issues, and other public or private sources of front-end capital; (ii) assurances that the “guaranteed financing” is or will be
available in accordance with Section 2(a)(1)(b) of Pub. L. 91-269; (iii) the project expenses for managing the exposition; (iv) projected operational revenues broken down to include admissions, space rental, concessions, service fees and miscellaneous income; and (v) cost-benefit projections. These should be accompanied by a statement of the firm that the needed cash flow, sources of funding, and revenue projections are realistic and attainable.

10. Exhibit No. 10. A description of the exposition implementation time schedule and the management control system to be utilized to implement the time schedule (e.g., PERT, CPM, etc.).

11. Exhibit No. 11. A statement setting forth in detail the public relations, publicity and other promotional plans of the applicant. For example, the statement could include: (i) an outline of the public relations/publicity program broken down by percentage allocations among the various media; (ii) a public relations/publicity program budget with the various calendar target dates for completion of phases prior to the opening, the opening and post-opening of the exposition; and (iii) protocol plans for U.S. and foreign dignitaries, as well as for special ceremonies and events and how these plans are to be financed.

12. Exhibit No. 12. A study setting forth in detail the benefits to be derived from the exposition and residual use plans. For example, the study might include: (i) extent of immediate economic benefits for the city/region/nation in proportion to total investment in the exposition; (ii) extent of long range economic benefits for the city/region/nation in proportion to total investment in the exposition; and (iii) extent of intangible (social, psychological, “good will”) benefits accruing to the city/region/nation including the solution or amelioration of any national/local problems.

13. Exhibit No. 13. A statement committing the applicant to develop and complete an environmental impact statement which complies with section 102(2)(c) of the National Environmental Policy Act of 1969 (83 Stat. 852; 42 U.S.C. 4331). Sample copies of environmental impact statements may be obtained from the Director. Prior to the Director’s submitting a report to the Secretary containing his findings on the application for Federal recognition pursuant to § 310.4, the applicant must have completed the required Environmental Impact Statement (EIS), in a form acceptable to the Department of Commerce.

14. Exhibit No. 14. A detailed set of general and special rules and regulations governing the exposition and participation in it, which, if Federal recognition is obtained, can be used by the Federal Government in seeking BIE registration.

15. Exhibit No. 15. A statement from the applicant agreeing to accept a U.S. Commissioner General, appointed by the President. He will be recognized as the senior Federal official and titular head of the exposition, final arbiter in disputes with exhibitors, and the official contact with foreign governments. The applicant should also agree to furnish the Commissioner General and his staff with suitable facilities in the host community during the development and operation of the exposition.

§ 310.4 Action on application.

(a) Upon receipt of an application, the Director will analyze the application and all accompanying exhibits to insure compliance with the provisions of § 310.3 and report his findings with respect thereto to the Secretary.

(b) If more than one applicant applies for Federal recognition for expositions to be held within three years or less of each other, the applications will be reviewed concurrently by the Director. The following standards will be considered in determining which if any of the competing applicants will be recommended for Federal recognition:

1. The order of receipt of the applications by the Director, complete with all exhibits required by § 310.3.

2. The financial plans of the applications. Primary consideration will be given to those applications which do not require Federal financing for exposition development. This does not extend to funding for a Federal pavilion, if one is desired.

3. The relative merit of the applications in terms of their qualifications as tourism destination sites, both with respect to existing facilities and those facilities planned for the proposed exposition. If necessary, to assist in making this determination, the Director will appoint a panel of travel industry experts representing tour developers, the transportation, entertainment and hotel/motel industries for the purpose of studying the competing applications and reporting to the Director its views as to which proposed site best meets the above criteria. If such a panel is deemed necessary, the provisions of the Federal Advisory Committee Act (86 Stat. 770, 5 U.S.C. App. 1) will be applicable.
§ 310.5 Report of the Secretary on Federal recognition.

If the Director's report recommends Federal recognition, the Secretary, within a reasonable time, shall submit a report to the President.

(a) The Secretary's report shall include: (1) An evaluation of the purposes and reasons for the exposition; and (2) a determination as to whether guaranteed financial and other support has been secured by the exposition from affected State and local governments and from business and civic leaders of the region and others in amounts sufficient to assure the successful development and progress of the exposition.

(b) If the Director, in his discretion, decides to hold a public hearing, notice of such hearing shall be published in the Federal Register, and a copy of the notice shall be furnished to local newspapers. The notice shall state the subject to be considered and when and where the hearing will be held, specifically designating the date, hour, and place.

(e) The following general procedure shall govern the conduct of public hearings: (1) Stenographic minutes of the proceedings shall be made; (2) the names and addresses of all parties present or represented at the hearing shall be recorded; and (3) the Director or Examiner shall read aloud for the record and for the benefit of the public such parts of the Act and of these regulations as bear on the application. He shall also read aloud for the record and for the benefit of the public such other important papers, or extracts therefrom, as may be necessary for a full understanding of the issues which require clarification. The Director or Examiner shall impress upon the parties in attendance at the public hearing, and shall specifically state at the commencement of the hearing, that the hearing is not adversary in nature and that the sole objective thereof is to clarify issues that might have been raised by the application.

(f) Statements of interested parties may be presented orally at the hearing, or submitted in writing for the record.

(g) Within six months after receipt of a fully completed application and/or the adjournment of the public hearing, the Director shall submit his report containing his findings on the application to the Secretary.

§ 310.6 Recognition by the President.

If the President concurs in the favorable reports from the Secretaries of State and Commerce, he may grant Federal recognition to the exposition by indicating his concurrence to the two Secretaries and authorizing them to seek BIE registration.

§ 310.7 Statement for Federal participation.

If Federal participation in the exposition, as well as Federal recognition thereof is desired, the applicant shall in a statement to the Director outline the nature of the Federal participation envisioned, including whether construction of a Federal pavilion is contemplated. (It should be noted, however, that before Federal participation can be authorized by the Congress under the Act, the exposition must have (i) met the criteria for Federal recognition and be so recognized, and (ii) been registered by the BIE. Although applicants need not submit such a statement until these prerequisites are satisfied, they are encouraged to do so.) Where the desired Federal participation includes a request for construction of a Federal pavilion, the statement shall be accompanied by the following exhibits:

1. Exhibit No. 1. A survey drawing of the proposed Federal pavilion site, showing its areas and boundaries, its grade elevations, and surface and subsoil conditions.

2. Exhibit No. 2. Evidence of resolutions, statutes, opinions, etc., as to the applicant's ability to convey by deed the real property comprising the proposed Federal pavilion site in fee-simple and free of liens and encumbrances to the Federal Government.
only consideration on the part of the Government for the conveyance of the property shall be the Government's commitment to participate in the exposition.

3. Exhibit No. 3. A certified copy of the building code which would be applicable should a pavilion be constructed.

4. Exhibit No. 4. An engineering drawing showing the accessibility of the proposed pavilion site to utilities (e.g., sewerage, water, gas, electricity, etc.).

5. Exhibit No. 5. A statement setting forth the security and maintenance and arrangements which the applicant would undertake (and an estimate of their cost) while a pavilion is under construction.

6. Exhibit No. 6. A study pursuant to Executive Order 11296 of August 10, 1966, entitled "Evaluation of flood hazard in locating Federally owned or financed buildings, roads and other facilities and in disposing of Federal land and properties."

§ 310.8 Proposed plan for Federal participation.

(a) Upon receipt of the statement, and the exhibits referred to in § 310.7, the Director shall prepare a proposed plan in cooperation with other interested departments and agencies of the Federal Government for Federal participation in the exposition.

(b) In preparing the proposed plan for Federal participation in the exposition, the Director shall conduct a feasibility study of Federal participation including cost estimates by utilizing the services within the Federal Government, professional consultants and private sources as required and in accordance with applicable laws and regulations.

(c) The Director, in the proposed plan for Federal participation in the exposition, shall determine whether or not a Federal pavilion should be constructed and, if so, whether or not the Government would have need for a permanent structure in the area of the exposition or whether a temporary structure would be more appropriate.

(d) The Director shall seek the advice of the Administrator of the General Services Administration to the extent necessary in carrying out the proposed plan for Federal participation in the exposition.

(e) Upon completion of the proposed plan for Federal participation in the exposition, the Director shall submit the plan to the Secretary.

§ 310.9 Report of the Secretary on Federal participation.

Upon receipt of the Director's proposed plan for Federal participation, the Secretary, within a reasonable time, shall submit a report to the President including: (a) Evidence that the exposition has met the criteria for Federal recognition and has been so recognized; (b) a statement that the exposition has been registered by the BIE; and (c) a proposed plan for the Federal participation referred to in § 310.8.

PART 315—DETERMINATION OF BONA FIDE MOTOR-VEHICLE MANUFACTURER

Sec.
315.1 Scope and purpose.
315.2 Definitions.
315.3 Application.
315.4 Determination by the Under Secretary.
315.5 Maintenance and publication of a list of bona fide motor-vehicle manufacturers.

§ 315.1 Scope and purpose.

The purpose of this part is to set forth regulations implementing headnote 2 to subpart B, part 6, schedule 6 of the Tariff Schedules of the United States as proclaimed by Proclamation No. 3682 of October 21, 1965 (3 CFR 140-65 Comp.), issued pursuant to the Automotive Products Trade Act of 1965 (19 U.S.C. 2031), by establishing a procedure under which a person may apply to be determined a bona fide motor-vehicle manufacturer. Under headnote 2 to subpart B, part 6, schedule 6 of the Tariff Schedules of the United States, whenever the Secretary of Commerce has determined a person to be a bona fide motor-vehicle manufacturer, such person is eligible to obtain duty-free importation of certain Canadian articles and to issue certain orders, contracts, or letters of intent under or
§ 315.2 Definitions.

For the purpose of the regulations in this part and the forms issued to implement it:

(b) Under Secretary means Under Secretary for International Trade of the Department of Commerce, or such official as may be designated by the Under Secretary to act in his or her behalf.

(c) Motor vehicle means a motor vehicle of a kind described in item 692.05 or 692.10 of subpart B, part 6, schedule 6, of the Tariff Schedules of the United States (excluding an electric trolley bus and a three-wheeled vehicle) or an automotive truck tractor.

(d) Bona fide motor-vehicle manufacturer means a person who upon application to the Under Secretary is determined by the Under Secretary to have produced no fewer than 15 complete motor vehicles in the United States during the 12-month period preceding the date certified in the application, and to have had as of such date installed capacity in the United States to produce 10 or more complete motor vehicles per 40-hour week. A person shall only be regarded as having had the capacity to produce a complete motor vehicle if his operation included the assembly of two or more major components (e.g., the attachment of a body to a chassis) to create a new motor vehicle ready for use.

(e) Person includes any individual, corporation, partnership, association, company, or any kind of organization.

(f) United States includes only the States, the District of Columbia and Puerto Rico.

§ 315.3 Application.

Any person in the United States desiring to be determined a bona fide motor vehicle manufacturer shall apply to the Under Secretary by filing two copies of Form BIE-3 in accordance with the instructions set forth on the form and this part. Application forms may be obtained from the Under Secretary, District offices of the U.S. Department of Commerce, or from U.S. Collectors of Customs, and should be mailed or delivered to:

U.S. Department of Commerce, International Trade Administration, Office of Automotive Industry Affairs—APTA, 14th and Constitution Avenue, NW., Room 4036, Washington, DC 20230.

§ 315.4 Determination by the Under Secretary.

(a) As soon as practicable after receipt of the application, the Under Secretary shall determine whether an applicant has produced no fewer than 15 complete motor vehicles in the United States during the 12-month period preceding the date certified in the application and as of such date, had installed capacity in the United States to produce 10 or more complete motor vehicles per 40-hour week. The Under Secretary may request such additional data from an applicant as he may deem appropriate to establish whether the applicant has satisfied the requirements of this part.

(b) A determination by the Under Secretary under this part shall be effective for a 12-month period to begin on the date as of which the Under Secretary determines that the applicant qualified under this part. Within 60 days prior to the termination of such period, a bona fide motor vehicle manufacturer may apply for another determination under this part.
(c) The Under Secretary will promptly notify each applicant in writing of the final action taken on his application.

§ 315.5 Maintenance and publication of a list of bona fide motor-vehicle manufacturers.

The Under Secretary shall maintain and publish from time to time in the Federal Register, a list of the names and addresses of bona fide motor vehicle manufacturers, and the effective dates from each determination.

PART 325—EXPORT TRADE CERTIFICATES OF REVIEW

§ 325.1 Scope.

This part contains regulations for issuing export trade certificates of review under title III of the Export Trading Company Act, Pub. L. 97-290. A holder of a certificate of review and the members named in the certificate will have specific protections from private treble damage actions and government criminal and civil suits under U.S. Federal and State antitrust laws for the export conduct specified in the certificate and carried out during its effective period in compliance with its terms and conditions.

§ 325.2 Definitions.

As used in this part:
(a) Act means title III of Pub. L. 97-290, Export Trade Certificates of Review.
(b) Antitrust laws means the antitrust laws, as the term is defined in the first section of the Clayton Act (15 U.S.C. 12), section 5 of the Federal Trade Commission Act (15 U.S.C. 45) (to the extent that section 5 prohibits unfair methods of competition), and any State antitrust or unfair competition law.
(c) Applicant means the person or persons who submit an application for a certificate.
(d) Application means an application for a certificate to be issued under the Act.
(e) Attorney General means the Attorney General of the United States or his designee.
(f) Certificate means a certificate of review issued pursuant to the Act.
(g) Control means either (1) holding 50 percent or more of the outstanding voting securities of an issuer; or (2) having the contractual power presently to designate a majority of the directors of a corporation, or in the case of an unincorporated entity, a majority of the individuals who exercise similar functions.
(h) Controlling entity means an entity which directly or indirectly controls a member or applicant, and is not controlled by any other entity.
(i) Export conduct means specified export trade activities and methods of operation carried out in specified export trade and export markets.
(j) Export trade means trade or commerce in goods, wares, merchandise, or services that are exported, or are in the course of being exported, from the United States or any territory of the United States to any foreign nation.
(k) Export trade activities means activities or agreements in the course of export trade.
(l) Member means an entity (U.S. or foreign) or a person which is seeking protection under the certificate with
§ 325.3 Applying for a certificate of review.

(a) Place of filing. The applicant shall submit an original and two copies of a completed application form (ITA 4093-P, OMB control number 0625-0125) by personal delivery during normal business hours or by first class mail to the Office of Export Trading Company Affairs, Room 5618, International Trade Administration, Department of Commerce, Washington, DC 20230. Although not required, the applicant should consider using registered mail or some other delivery method that provides evidence of receipt.

(b) Contents of application. Any person may submit an application for certification. The application shall contain, where applicable, the information listed below. Some information, in particular the identification of goods or services that the applicant exports or proposes to export, is requested in a certain form (Standard Industrial Classification [SIC] numbers) if reasonably available. Where information does not exist in this form, the applicant may satisfy the request for information by providing it in some other convenient form. If the applicant is unable to provide any of the information requested or if the applicant believes that any of the information requested would be both burdensome to obtain and unnecessary for a determination on the application, the applicant should state that the information is not being provided or is being provided in lesser detail, and explain why.

1. Name and principal address of the applicant and of its controlling entity, if any. Include the name, title, address, telephone number, and relationship to the applicant of each individual to whom the Secretary should address correspondence.

2. The name and principal address of each member, and of each member’s controlling entity, if any.

3. A copy of any legal instrument under which the applicant is organized or will operate. Include copies, as applicable, of its corporate charter, by-laws, partnership, joint venture, membership or other agreements or contracts under which the applicant is organized.

4. A copy of the applicant’s most recent annual report, if any, and that of its controlling entity, if any. To the extent the information is not included in the annual report, or other documents submitted in connection with the application, a description of the applicant’s domestic (including import) and export operations, including the nature of its business, the types of products or services in which it deals, and the places where it does business.
This description may be supplemented by a chart or table.

(5) A copy of each member's most recent annual report, if any, and that of its controlling entity, if any. To the extent the information is not included in the annual report, or other documents submitted in connection with the application, a description of each member’s domestic (including import) and export operations, including the nature of its business, the types of products or services in which it deals, and the places where it does business. This description may be supplemented by a chart or table.

(6) The names, titles, and responsibilities of the applicant's directors, officers, partners and managing officials, and their business affiliations with other members or other businesses that produce or sell any of the types of goods or services described in paragraph (b)(7) of this section.

(7)(i) A description of the goods or services which the applicant exports or proposes to export under the certificate of review. This description should reflect the industry’s customary definitions of the products and services.

(ii) If it is reasonably available, an identification of the goods or services according to the Standard Industrial Classification (SIC) number. Goods should normally be identified according to the 7-digit level. Services should normally be identified at the most detailed SIC level available.

(iii) The foreign geographic areas to which the applicant and each member export or intend to export their goods and services.

(8) For each class of the goods, wares, merchandise or services described in paragraph (b)(7) of this section:

(i) The principal geographic area or areas in the United States in which the applicant and each member sell their goods and services.

(ii) For their previous two fiscal years, the dollar value of the applicant’s and each member’s (A) total domestic sales, if any; and (B) total export sales, if any. Include the value of the sales of any controlling entities and all entities under their control.

(9) For each class of the goods, wares, merchandise or services described in paragraph (b)(7) of this section, the best information or estimate accessible to the applicant of the total value of sales in the United States by all companies for the last two years. Identify the source of the information or the basis of the estimate.

(10) A description of the specific export conduct which the applicant seeks to have certified. Only the specific export conduct described in the application will be eligible for certification. For each item, the applicant should state the antitrust concern, if any, raised by that export conduct. (Examples of export conduct which applicants may seek to have certified include the manner in which goods and services will be obtained or provided; the manner in which prices or quantities will be set; exclusive agreements with U.S. suppliers or export intermediaries; territorial, quantity, or price agreements with U.S. suppliers or export intermediaries; and restrictions on membership or membership withdrawal. These examples are given only to illustrate the type of export conduct which might be of concern. The specific activities which the applicant may wish to have certified will depend on its particular circumstances or business plans.).

(11) If the export trade, export trade activities, or methods of operation for which certification is sought will involve any agreement or any exchange of information among suppliers of the same or similar products or services with respect to domestic prices, production, sales, or other competitively sensitive business information, specify the nature of the agreement or exchange of information. Such information exchanges are not necessarily impermissible and may be eligible for certification. Whether or not certification is sought for such exchanges, this information is necessary to evaluate whether the conduct for which certification is sought meets the standards of the Act.

(12) A statement of whether the applicant intends or reasonably expects that any exported goods or services covered by the proposed certificate will re-enter the United States, either in their original or modified form. If so, identify the goods or services and the manner in which they may re-enter the U.S.
§ 325.4 Calculating time periods.

(a) When these regulations require action to be taken within a fixed time period, and the last day of the time period falls on a non-working day, the time period shall be extended to the next working day.

(b) The day after an application is deemed submitted shall be deemed the
International Trade Admin., Commerce

§ 325.5 Issuing the certificate.

(a) Time period. The Secretary shall determine whether to issue a certificate within ninety days after the application is deemed submitted (excluding any suspension pursuant to § 325.3(f) of the time period for making a determination). If the Secretary or the Attorney General considers it necessary, and the applicant agrees, the Secretary may take up to an additional thirty days to determine whether to issue a certificate.

(b) Determination. The Secretary shall issue a certificate to the applicant if he determines, and the Attorney General concurs, that the proposed export trade, export trade activities and methods of operation will—

(1) Result in neither a substantial lessening of competition or restraint of trade within the United States nor a substantial restraint of the export trade of any competitor of the applicant;

(2) Not unreasonably enhance, stabilize, or depress prices within the United States of the class of the goods, wares, merchandise or services exported by the applicant;

(3) Not constitute unfair methods of competition against competitors who are engaged in the export of goods, wares, merchandise or services exported by the applicant; and

(4) Not include any act that may reasonably be expected to result in the sale for consumption or resale within the United States of the goods, wares, merchandise, or services exported by the applicant.

(c) Concurrence of the Attorney General. (1) Not later than seven days after an application is deemed submitted, the Secretary shall deliver to the Attorney General a copy of the application, any information submitted in connection with the application, and any other relevant information in his possession. The Secretary and the Attorney General shall make available to each other copies of other relevant information that was obtained in connection with the application, unless otherwise prohibited by law.

(2) Not later than thirty days before the day a determination on the application is due, the Secretary shall deliver a proposed certificate to the Attorney General for discussion and comment. If the Attorney General does not agree that the proposed certificate may be issued, he shall, not later than ten days before the day a determination on the application is due, so advise the Secretary and state the reasons for the disagreement. The Secretary with the concurrence of the Attorney General, may modify or revise the proposed certificate to resolve the objections and problems raised by the Attorney General, or deny the application.

(3) If the Attorney General receives the proposed certification by the date specified in the preceding paragraph and does not respond within the time period specified in that paragraph, he shall be deemed to concur in the proposed certificate.

(d) Content of certificate. The certificate shall specify the export conduct and all persons or entities which are protected from liability under the antitrust laws. The Secretary may certify the proposed export conduct contained in the application, in whole or in part, with such changes, modifications, terms, or conditions as are appropriate. If the Secretary intends to issue a certificate different from a draft certificate submitted by the applicant, the Secretary shall first consult with the applicant.

(e) Certificate obtained by fraud. A certificate shall be void ab initio with respect to any export conduct for which a certificate was obtained by fraud.

(f) Minimum thirty-day period. The Secretary may not issue a certificate until thirty days after the summary of the application is published in the Federal Register.

§ 325.6 Publishing notices in the Federal Register.

(a) Within ten days after an application is deemed submitted, the Secretary shall deliver to the Federal Register a notice summarizing the application. The notice shall identify the applicant and each member and shall include a summary of the export conduct for which certification is sought.
46

§ 325.7  Amending the certificate.

An application for an amendment to a certificate shall be treated in the same manner as an original application. The application for an amendment shall set forth the proposed amendment(s) and the reasons for them. It shall contain any information specified in § 325.3(b) that is relevant to the determination on the application for an amendment. The effective date of an amendment will be the date on which the application for the amendment was deemed submitted.

§ 325.8  Expediting the certification process.

(a) Request for expedited action. (1) An applicant may be granted expedited action on its application in the discretion of the Secretary and the Attorney General. The Secretary and the Attorney General will consider such requests in light of an applicant’s showing that it has a special need for a prompt decision. A request for expedited action should include an explanation of why expedited action is needed, including a statement of all relevant facts and circumstances, such as bidding deadlines or other circumstances beyond the control of the applicant, that require the applicant to act in less than ninety days and that have a significant impact on the applicant’s export trade.

(2) The Secretary shall advise the applicant within ten days after the application is deemed submitted whether it will receive expedited action. The Secretary may grant the request in whole or in part and process the remainder of the application through the normal procedures. Expedited action may be granted only if the Attorney General concurs.

(b) Time period. The Secretary shall determine whether to issue a certificate to the applicant within forty-five days after the Secretary granted the request for expedited action, or within a longer period if agreed to by the applicant (excluding any suspension pursuant to § 325.3(f) of the time period for making a determination). The Secretary may not issue a certificate until thirty days after the summary of the application is published in the Federal Register.

(c) Concurrence of the Attorney General. (1) Not later than ten working days before the date on which a determination on the application is due, the Secretary shall deliver a proposed certificate to the Attorney General for discussion and comment. If the Attorney General does not agree that the proposed certificate may be issued, he shall, not later than five working days before the date on which a determination on the application is due, so advise the Secretary and state the reasons for the disagreement. The Secretary, with the concurrence of the Attorney General, may revise the proposed certificate to resolve the objections and problems raised by the Attorney General, or deny the application.

(2) If the Attorney General receives the proposed certificate by the date specified in the preceding paragraph and does not respond within the time period specified in that paragraph, he
shall be deemed to concur in the proposed certificate.

(Information collection requirements in paragraph (a)(1) approved by the Office of Management and Budget under control number 0625-0125)

§ 325.9 Reconsidering an application that has been denied.

(a) If the Secretary determines to deny an application in whole or in part, he shall notify the applicant in writing of his decision and the reasons for his determination.

(b) Within thirty days after receiving a notice of denial, the applicant may request the Secretary to reconsider his determination.

(1) The request for reconsideration shall include a written statement setting forth the reasons why the applicant believes the decision should be reconsidered, and any additional information that the applicant considers relevant.

(2) Upon the request of the applicant, the Secretary and the Attorney General will meet informally with the applicant and/or his representative to discuss the applicant's reasons why the determination on the application should be changed.

(c) The Secretary shall consult with the Attorney General with regard to reconsidering an application. The Secretary may modify his original determination only if the Attorney General concurs.

(d) The Secretary shall notify the applicant in writing of his final determination after reconsideration and of his reasons for the determination within thirty days after the request for reconsideration has been received.

§ 325.10 Modifying or revoking a certificate.

(a) Action subject to modification or revocation. The Secretary shall revoke a certificate, in whole or in part, or modify it, as the Secretary or the Attorney General considers necessary, if:

(1) The export conduct of a person or entity protected by the certificate no longer complies with the requirements set forth in §325.4(b);

(2) A person or entity protected by the certificate fails to comply with a request for information under paragraph (b) of this section; or

(3) The certificate holder fails to file a complete annual report.

(b) Request for information. If the Secretary or the Attorney General has reason to believe that the export trade, export trade activities, or methods of operation of a person or entity protected by a certificate no longer comply with the requirements set forth in §325.4(b), the Secretary shall request any information that he or the Attorney General considers to be necessary to resolve the matter.

(c) Proceedings for the revocation or modification of a certificate—(1) Notification letter. If, after reviewing the relevant information in their possession, it appears to the Secretary or the Attorney General that a certificate should be revoked or modified for any of the reasons set forth in paragraph (a) above, the Secretary shall so notify the certificate holder in writing. The notification shall be sent by registered or certified mail to the address specified in the certificate. The notification shall include a detailed statement of the facts, conduct, or circumstances which may warrant the revocation or modification of the certificate.

(2) Answer. The certificate holder shall respond to the notification letter within thirty days after receiving it, unless the Secretary, in his discretion, grants a thirty day extension for good cause shown. The certificate holder shall respond specifically to the statement included with the notification letter and state in detail why the facts, conduct or circumstances described in the notification letter are not true, or if they are true, why they do not warrant the revoking or modifying of the certificate. If the certificate holder does not respond within the specified period, it will be considered an admission of the statements contained in the notification letter.

(3) Resolution of factual disputes. Where material facts are in dispute, the Secretary and the Attorney General shall, upon request, meet informally with the certificate holder. The Secretary or the Attorney General may require the certificate holder to provide any documents or information
§ 325.11 Judicial review.

(a) Review of certain determinations. (1) Any person aggrieved by a final determination of the Secretary under § 325.5, § 325.7, § 325.9, or § 325.10 of these regulations may, within thirty days of the determination, bring an action in an appropriate district court of the United States to set aside the determination on the ground that it is erroneous. If a certificate is denied, the applicant may bring suit within thirty days after the notice of denial is published in the FEDERAL REGISTER, or, if the applicant seeks reconsideration, within thirty days after the Secretary publishes in the FEDERAL REGISTER notice of his determination after reconsideration.

(b) For purposes of judicial review, determinations of the Secretary are final when notice is published in the FEDERAL REGISTER.

(c) Record for judicial review. For purposes of judicial review, the record shall include all information presented to or obtained by the Secretary which had a bearing on the determination, the determination itself, the supporting statement setting forth the reasons for the determination, and the Attorney General's response to the Secretary indicating concurrence or nonconcurrence.

(d) Limitation of judicial review. Except as provided in paragraph (a) of this section, no agency action taken under the Act shall be subject to judicial review.

§ 325.12 Returning the applicant's documents.

(a) Upon the denial or withdrawal of an application for a certificate in its entirety, the applicant may request the return of all copies of the documents submitted by the applicant in connection with the application to the Department of Commerce or the Department of Justice. The applicant shall submit this request in writing to both the Secretary and the Attorney General.
§ 325.16 Protecting confidentiality of information.

(a) Any information that is submitted by any person under the Act is exempt from disclosure under the Freedom of Information Act (5 U.S.C. 552).

(b)(1) Except as authorized under paragraph (b)(3) of this section, no officer or employee of the United States shall disclose commercial or financial information submitted under this Act if the information is privileged or confidential, and if disclosing the information would cause harm to the person who submitted it.

(2) A person submitting information shall designate the documents or information which it considers privileged or confidential and the disclosure of which would cause harm to the person submitting it. The Secretary shall endeavor to notify these persons of any requests or demands before disclosing any of this information.

(3) An officer or employee of the United States may disclose information covered under paragraph (b)(1) of this section only under the following circumstances—

(i) Upon a request made by either House of Congress or a Committee of the Congress,

(ii) In a judicial or administrative proceeding subject to issuance of an appropriate protective order,

(iii) With the written consent of the person who submitted the information,

(iv) When the Secretary considers disclosure of the information to be necessary for determining whether or not to issue, amend, or revoke a certificate, if—

(A) The Secretary determines that a non-confidential summary of the information is inadequate; and

(B) The person who submitted the information is informed of the intent to disclose the information, and has an opportunity to advise the Secretary of the potential harm which disclosure may cause,

(v) In accordance with any requirement imposed by a statute of the United States.

(c) In any judicial or administrative proceeding in which disclosure is sought from the Secretary or the Attorney General of any confidential or privileged documents or information submitted under this Act, the Secretary or Attorney General shall attempt to notify the party who submitted the information of the request or demand for disclosure. In appropriate circumstances the Secretary or Attorney General may seek or support
§ 325.17 Waiver.

The Secretary may waive any of the provisions of this part in writing for good cause shown, if the Attorney General concurs and if permitted by law.

§ 325.17 an appropriate protective order on behalf of the party who submitted the documents or information.

PART 400—REGULATIONS OF THE FOREIGN-TRADE ZONES BOARD

Subpart A—Scope and Definitions

Sec.
400.1 Scope.
400.2 Definitions.

Subpart B—Foreign-Trade Zones Board

400.11 Authority of the Board.
400.12 Responsibilities and authority of the Executive Secretary.
400.13 Board headquarters.

Subpart C—Establishment and Modification of Zone Projects

400.21 Number and location of zones and subzones.
400.22 Eligible applicants.
400.23 Criteria for grants of authority for zones and subzones.
400.24 Application for zone.
400.25 Application for subzone.
400.26 Application for expansion or other modification to zone project.
400.27 Procedure for processing application.
400.28 Conditions, prohibitions and restrictions applicable to grants of authority.
400.29 Application fees.

Subpart D—Manufacturing and Processing Activity—Reviews

400.31 Manufacturing and processing activity; criteria.
400.32 Procedure for review of request for approval of manufacturing or processing.
400.33 Restrictions on manufacturing and processing activity.

Subpart E—Zone Operations and Administrative Requirements

400.41 Zone operations; general.
400.42 Requirements for commencement of operations in a zone project.
400.43 Restriction and prohibition of certain zone operations.
400.44 Zone-restricted merchandise.
400.45 Retail trade.
400.46 Accounts, records and reports.
400.47 Appeals to the Board from decisions of the Assistant Secretary for Import Administration and the Executive Secretary.

Subpart F—Notice, Hearings, Record and Information

400.51 Notice and hearings.
400.52 Official record; public access.
400.53 Information.

SOURCE: 56 FR 50798, Oct. 8, 1991, unless otherwise noted.
use of zone procedures in specific cases on public interest grounds. Merchandise moved into zones for export (zone-restricted status) may be considered exported for purposes such as federal excise tax rebates and Customs drawback. Foreign merchandise (tangible personal property) admitted to a zone and domestic merchandise held in a zone for exportation are exempt from certain state and local ad valorem taxes (19 U.S.C. 81o(e)). Articles admitted into zones for purposes not specified in the Act shall be subject to the tariff laws and regular entry procedures, including the payment of applicable duties, taxes, and fees.

§ 400.2 Definitions.

(a) Act means the Foreign-Trade Zones Act of 1934, as amended.

(b) Board means the Foreign-Trade Zones Board, which consists of the Secretary of the Department of Commerce (chairman) and the Secretary of the Treasury, or their designated alternates.

(c) Customs Service means the United States Customs Service of the Department of the Treasury.

(d) Executive Secretary is the Executive Secretary of the Foreign-Trade Zones Board.

(e) Foreign-trade zone is a restricted-access site, in or adjacent to a Customs port of entry, operated pursuant to public utility principles under the sponsorship of a corporation granted authority by the Board and under supervision of the Customs Service.

(f) Grant of authority is a document issued by the Board which authorizes a zone grantee to establish, operate and maintain a zone project or a subzone, subject to limitations and conditions specified in this part and in 19 CFR part 146. The authority to establish a zone includes the authority to operate and the responsibility to maintain it.

(g) Manufacturing, as used in this part, means activity involving the substantial transformation of a foreign article resulting in a new and different article having a different name, character, and use.

(h) Port Director is normally the director of Customs for the Customs jurisdictional area in which the zone is located.

(i) Port of entry means a port of entry in the United States, as defined by part 101 of the regulations of the Customs Service (19 CFR part 101), or a user fee airport authorized under 19 U.S.C. 58b and listed in part 122 of the regulations of the Customs Service (19 CFR part 122).

(j) Private corporation means any corporation, other than a public corporation, which is organized for the purpose of establishing a zone project and which is chartered for this purpose under a law of the state in which the zone is located.

(k) Processing, when referring to zone activity, means any activity involving a change in condition of merchandise, other than manufacturing, which results in a change in the Customs classification of an article or in its eligibility for entry for consumption.

(l) Public corporation means a state, a political subdivision (including a municipality) or public agency thereof, or a corporate municipal instrumentality of one or more states.

(m) State includes any state of the United States, the District of Columbia, and Puerto Rico.

(n) Subzone means a special-purpose zone established as an adjunct to a zone project for a limited purpose.

(o) Zone means a foreign-trade zone established under the provisions of the Act and these regulations. Where used in this part, the term also includes subzones, unless the context indicates otherwise.

(p) Zone grantee is the corporate recipient of a grant of authority for a zone project. Where used in this part, the term “grantee” means “zone grantee” unless otherwise indicated.

(q) Zone operator is a corporation, partnership, or person that operates a zone or subzone under the terms of an agreement with the zone grantee or an intermediary entity, with the concurrence of the Port Director.

(r) Zone project means the zone plan, including all of the zone and subzone sites that the Board authorizes a single grantee to establish.

(s) Zone site means the physical location of a zone or subzone.
Subpart B—Foreign-Trade Zones Board

§ 400.11 Authority of the Board.

(a) In general. In accordance with the Act and procedures of this part, the Board has authority to:

(1) Prescribe rules and regulations concerning zones;
(2) Issue grants of authority for zones and subzones, and approve modifications to the original zone project;
(3) Approve manufacturing and processing activity in zones and subzones as described in subpart D of this part;
(4) Make determinations on matters requiring Board decisions under this part;
(5) Decide appeals in regard to certain decisions of the Commerce Department's Assistant Secretary for Import Administration or the Executive Secretary;
(6) Inspect the premises, operations and accounts of zone grantees and operators;
(7) Require zone grantees to report on zone operations;
(8) Report annually to the Congress on zone operations;
(9) Restrict or prohibit zone operations;
(10) Impose fines for violations of the Act and this part;
(11) Revoke grants of authority for cause; and
(12) Determine, as appropriate, whether zone activity is or would be in the public interest or detrimental to the public interest.

(b) Authority of the Chairman of the Board. The Chairman of the Board (Secretary of the Department of Commerce) has the authority to:

(1) Appoint the Executive Secretary of the Board;
(2) Call meetings of the Board, with reasonable notice given to each member; and
(3) Submit to the Congress the Board's annual report as prepared by the Executive Secretary.

(c) Alternates. Each member of the Board will designate an alternate with authority to act in an official capacity for that member.

(d) Determinations of the Board. (1) The determination of the Board will be based on the unanimous vote of the members (or alternate members) of the Board.

(2) All votes will be recorded.

(3) The Board will issue its determination in proceedings under the regulations in the form of a Board order.

§ 400.12 Responsibilities and authority of the Executive Secretary.

The Executive Secretary has the following responsibilities and authority:

(a) Represent the Board in administrative, regulatory, operational, and public affairs matters;
(b) Serve as director of the Commerce Department's Foreign-Trade Zones staff;
(c) Execute and implement orders of the Board;
(d) Arrange meetings and direct circulation of action documents for the Board;
(e) Arrange with other sections of the Department of Commerce, Board agencies and other governmental agencies for studies and comments on zone issues and proposals;
(f) Maintain custody of the seal, records, files and correspondence of the Board, with disposition subject to the regulations of the Department of Commerce;
(g) Issue notices on zone matters for publication in the Federal Register;
(h) Determine subzone sponsorship questions as provided in §400.22(d);
(i) Determine whether additional information is needed for evaluation of applications and other requests for decisions under this part, as provided for in various sections of this part, including §§400.24, 400.25, and 400.26;
(j) Issue guidelines on information required for subzone applications under §400.25(a)(6);
(k) Determine whether proposed modifications involve major changes under §400.25(a)(2);
§ 400.13 Board headquarters.
The headquarters of the Board is located within the U.S. Department of Commerce (Herbert C. Hoover Building), Pennsylvania Avenue and 14th Street, NW., Washington, DC 20230, as part of the office of the Foreign-Trade Zones staff.

Subpart C—Establishment and Modification of Zone Projects

§ 400.21 Number and location of zones and subzones.
(a) Number of zone projects—port of entry entitlement. (1) Provided that the other requirements of this subpart are met:
   (i) Each port of entry is entitled to at least one zone project;
   (ii) If a port of entry is located in more than one state, each of the states in which the port of entry is located is entitled to a zone project; and
   (iii) If a port of entry is defined to include more than one city separated by a navigable waterway, each of the cities is entitled to a zone project.
(2) Zone projects in addition to those approved under the entitlement provision of paragraph (a)(1) of this section may be authorized by the Board if it determines that existing project(s) will not adequately serve the public interest (convenience of commerce).
(b) Location of zones and subzones—port of entry adjacency requirements. (1) The Act provides that the Board may approve “zones in or adjacent to ports of entry” (19 U.S.C. 81b).
   (2) The “adjacency” requirement is satisfied if:
      (i) A general-purpose zone is located within 60 statute miles or 90 minutes’ driving time from the outer limits of a port of entry;
      (ii) A subzone meets the following requirements relating to Customs supervision:
         (A) Proper Customs oversight can be accomplished with physical and electronic means; and
         (B) All electronically produced records are maintained in a format compatible with the requirements of the U.S. Customs Service for the duration of the record period; and
      (C) The grantee/operator agrees to present merchandise for examination at a Customs site selected by Customs when requested, and further agrees to present all necessary documents directly to the Customs oversight office.

§ 400.22 Eligible applicants.
(a) In general. Subject to the other provisions of this section, public or private corporations may apply for a grant of authority to establish a zone project. The board will give preference to public corporations.
(b) Public and non-profit corporations. The eligibility of public and non-profit
corporations to apply for a grant of authority shall be supported by a enabling legislation of the legislature of the state in which the zone is to be located, indicating that the corporation, individually or as part of a class, is authorized to so apply.

(c) Private for-profit corporations. The eligibility of private for-profit corporations to apply for a grant of authority shall be supported by a special act of the state legislature naming the applicant corporation and by evidence indicating that the corporation is chartered for the purpose of establishing a zone.

(d) Applicants for subzones—(1) Eligibility. The following entities are eligible to apply for a grant of authority to establish a subzone:
   (i) The zone grantee of the closest zone project in the same state;
   (ii) The zone grantee of another zone in the same state, which is a public corporation, if the Board, or the Executive Secretary, finds that such sponsorship better serves the public interest; or
   (iii) A state agency specifically authorized to submit such an application by an act of the state legislature.

(2) Complaints. If an application is submitted under paragraph (d)(1)(ii) or (iii) of this section, the Executive Secretary will:
   (i) Notify, in writing, the grantee specified in paragraph (d)(1)(i) of this section, who may, within 30 days, object to such sponsorship, in writing, with supporting information as to why the public interest would be better served by its acting as sponsor;
   (ii) Review such objections prior to filing the application to determine whether the proposed sponsorship is in the public interest, taking into account:
      (A) The complaining zone's structure and operation;
      (B) The views of State and local public agencies; and
      (C) The views of the proposed subzone operator;
   (iii) Notify the applicant and complainants in writing of the Executive Secretary's determination;
   (iv) If the Executive Secretary determines that the proposed sponsorship is in the public interest, file the application (see §400.47 regarding appeals to decisions of the Executive Secretary).

§ 400.23 Criteria for grants of authority for zones and subzones.

(a) Zones. The Board will consider the following factors in determining whether to issue a grant of authority for a zone project:
   (1) The need for zone services in the port of entry area, taking into account existing as well as projected international trade related activities and employment impact;
   (2) The adequacy of the operational and financial plans and the suitability of the proposed sites and facilities, with justification for duplicative sites;
   (3) The extent of state and local government support, as indicated by the compatibility of the zone project with the community's master plan or stated goals for economic development and the views of State and local public officials involved in economic development. Such officials shall avoid commitments that anticipate outcome of Board decisions;
   (4) The views of persons and firms likely to be affected by proposed zone activity; and
   (5) If the proposal involves manufacturing or processing activity, the criteria in §400.31.

(b) Subzones. In reviewing proposals for subzones the Board will also consider:
   (1) Whether the operation could be located in or otherwise accommodated by the multi-purpose facilities of the zone project serving the area;
   (2) The specific zone benefits sought and the significant public benefit(s) involved supported by evidence to meet the requirement in §400.31(c); and
   (3) Whether the proposed activity is in the public interest, taking into account the criteria in §400.31.

§ 400.24 Application for zone.

(a) In general. An application for a grant of authority to establish a zone project shall consist of a transmittal letter, an executive summary and five exhibits.
   (b) Letter of transmittal. The transmittal letter shall be currently dated and signed by an authorized officer of
the corporation and bear the corporate seal.

(c) Executive summary. The executive summary shall describe:

(1) The corporation’s legal authority to apply;

(2) The type of authority requested from the Board;

(3) The proposed zone site and facilities and the larger project of which the zone is a part;

(4) The project background, including surveys and studies;

(5) The relationship of the project to the community’s and state’s overall economic development plans and objectives;

(6) The plans for operating and financing the project; and

(7) Any additional pertinent information needed for a complete summary description of the proposal.

(d) Exhibits. (1) Exhibit One (Legal Authority for the Application) shall consist of:

(i) A certified copy of the state enabling legislation described in § 400.22;

(ii) A copy of pertinent sections of the applicant’s charter or organization papers; and

(iii) A certified copy of the resolution of the governing body of the corporation authorizing the official signing the application.

(2) Exhibit Two (Site Description) shall consist of:

(i) A detailed description of the zone site, including size, location, address, and a legal description of the area proposed for approval; a table with site designations shall be included when more than one site is involved;

(ii) A summary description of the larger project of which the zone is a part, including type, size, location and address;

(iii) A statement as to whether the zone is within or adjacent to a customs port of entry;

(iv) A description of zone facilities and services, including dimensions and types of existing and proposed structures;

(v) A description of existing or proposed site qualifications including: land-use zoning, relationship to floodplain, infrastructure, utilities, security, and access to transportation services;

(vi) A description of current activities carried on in or contiguous to the project;

(vii) If part of a port facility, a summary of port and transportation services and facilities; if not, a summary description of transportation systems indicating connections from local and regional points of arrival to the zone; and

(viii) A statement as to the possibilities and plans for zone expansion.

(3) Exhibit Three (Operation and Financing) shall consist of:

(i) A statement as to site ownership (if not owned by the applicant or proposed operator, evidence as to their legal right to use the site);

(ii) A discussion of the operational plan (if the zone or a portion thereof is to be operated by other than the grantee, a summary of the selection process used or to be used, the type of operation agreement and, if available, the name and qualifications of the proposed operator);

(iii) A brief explanation of the plans for providing facilities, physical security, and for satisfying the requirements for Customs automated systems;

(iv) A summary of the plans for financing capital and operating costs, including a statement as to the source and use of funds; and

(v) The estimated time schedule for construction and activation.

(4) Exhibit Four (Economic Justification) shall include:

(i) A statement of the community’s overall economic goals and strategies in relation to those of the region and state;

(ii) A reference to the plan or plans on which the goals are based and how they relate to the zone project;

(iii) An economic profile of the community including identification and discussion of dominant sectors in terms of percentage of employment or income, area resources and problems, economic imbalances, unemployment rates, area foreign trade statistics, and area port facilities and transportation networks;

(iv) A statement as to the role and objective of the zone project, and a justification for each of the proposed sites;
§ 400.25 Application for subzone.

(a) In general. An application to establish a subzone as part of a proposed or existing zone shall be submitted in accordance with the format in §400.24, except that the focus of the information provided in Exhibit Four shall be on the specific activity involved and its net economic effect. The information submitted in Exhibit Four shall include:

(1) A summary as to the reasons for the subzone and an explanation of its anticipated economic effects;

(2) Identity of the subzone user and its corporate affiliation;

(3) Description of the proposed activity, including:

   (i) Products;

   (ii) Materials and Components;

   (iii) Sourcing plans (domestic/foreign);

   (iv) Tariff rates and other import requirements or restrictions;

(4) Reason operation cannot be conducted within a general-purpose zone;

(5) Additional information. The Board or the Executive Secretary may require additional information needed to adequately evaluate a proposal.

(b) Amendment of application. The Board or the Executive Secretary may allow amendment of the application.

(c) Drafts. Applicants may submit a draft application to the Executive Secretary for review.

(d) Format and number of copies. Unless the Executive Secretary alters the requirements of this paragraph, submit an original and 8 copies of the application on 8½" × 11" (216 × 279 mm) paper. Exhibit Five of the original application shall contain full-sized maps, and copies shall contain letter-sized reductions.

(i) Where to file. Address and mail the application to the Secretary of Commerce, Attention: Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Pennsylvania Avenue and 14th Street, NW., Washington, DC 20230.

 phêch(130,668),(976,898)
§ 400.26 Application for expansion or other modification to zone project.

(a) In general. (1) A grantee may apply to the Board for authority to expand or otherwise modify its zone project.

(2) The Executive Secretary, in consultation with the Port Director, will determine whether the proposed modification involves a major change in the zone plan and is thus subject to paragraph (b) of this section, or is minor and subject to paragraph (c) of this section. In making this determination the Executive Secretary will consider the extent to which the proposed modification would:

(i) Substantially modify the plan originally approved by the Board; or

(ii) Expand the physical dimensions of the approved zone area as related to the scope of operations envisioned in the original plan.

(b) Major modification to zone project. An application for a major modification to an approved zone project shall be submitted in accordance with the format in §400.24, except that:

(1) Reference may be made to current information in an application from the same applicant on file with the Board; and

(2) The content of Exhibit Four shall relate specifically to the proposed change.

(c) Minor modification to zone project. Other applications or requests under this subpart, including those for minor revisions of zone boundaries, grant of authority transfers, or time extensions, shall be submitted in letter form with information and documentation necessary for analysis, as determined by the Executive Secretary, who shall determine whether the proposed change is a minor one subject to this paragraph (c) instead of paragraph (b) of this section (see, §400.27(f)).

(d) Applications for other revisions to grants of authority. Applications or requests for revisions to grants of authority, such as restriction modifications, shall be submitted in letter form with information and documentation necessary for analysis, as determined by the Executive Secretary. If the change involves removal or significant modification of a restriction included by the Board in a grant of authority, the review procedures of §400.32 shall apply. If not, the procedure set forth in §400.27(f) shall apply.

(Approved by the Office of Management and Budget under control number 0625-0139)

§ 400.27 Procedure for processing application.

(a) In general. This section outlines the procedure followed in processing applications submitted under §§400.24-400.26. In addition, it sets forth the time schedules which will normally be applied in processing applications. The schedules will provide guidance to applicants with respect to the time frames for each of the procedural steps involved in the Board’s review. Under these schedules, applications involving manufacturing or processing activity would be processed within 1 year, and those not involving such activity, within 10 months. While the schedules set forth a standard time frame, the Board may determine that it requires additional time based on special circumstances, such as when the public comment period must be reopened pursuant to paragraphs (d)(2)(v)(B) and (d)(3)(vi)(B) of this section.

(b) Prefiling review. Applications subject to §400.29 shall be accompanied with a check in accordance with that section, and will be dated upon receipt at the headquarters of the Board. The Executive Secretary will determine whether the application satisfies the requirements of §§400.22-400.24, 400.25, 400.26, 400.32, and other applicable provisions of this part.
§ 400.27

(1) If the application is deficient, the Executive Secretary will notify the applicant within 20 days of receipt of the application, specifying the deficiencies. The applicant shall correct the deficiencies and submit the correct application within 30 days of notification. Otherwise, the application (original) will be returned.

(2) If the application is sufficient, the Executive Secretary will within 45 days of receipt of the application:
   (i) Formally file the application, thereby initiating the proceeding or review;
   (ii) Assign a case docket number in cases requiring a Board order; and
   (iii) Notify the applicant.

(c) Procedure—Executive Secretary responsibilities. After initiating a proceeding based on an application under §§ 400.24–400.25, or 400.26(b), the Executive Secretary will:
   (1) Designate an examiner to conduct a review and prepare a report with recommendations for the Board;
   (2) Publish in the FEDERAL REGISTER a notice of the formal filing of the application and initiation of the review which includes the name of the applicant, a description of the zone project, information as to any hearing scheduled at the outset, and an invitation for public comment, including a time period during which the public may submit evidence, factual information, and written arguments. Normally, the comment period will close 60 days after the date the notice appears, except that, if a hearing is held (see, § 400.51), the period will not close prior to 15 days after the date of the hearing. The closing date for general comment will ordinarily be followed by an additional 15-day period for rebuttal comments;
   (3) Send copies of the filing and initiation notice and the application to the Commissioner of Customs and the Port Director, or a designee;
   (4) Arrange for hearings, as appropriate;
   (5) Transmit the reports and recommendations of the examiner and of the officials identified in paragraph (c)(3) of this section to the Board for appropriate action; and
   (6) Notify the applicant in writing and publish notice in the FEDERAL REGISTER of the Board's determination.

(d) Case reviews—procedure and time schedule—(1) Customs review. The Port Director, or a designee, in accordance with agency regulations and directives, will submit a technical report to the Executive Secretary within 45 days of the conclusion of the public comment period described in paragraph (c)(2) of this section.
   (2) Examiners reviews—non-manufacturing/processing. Examiners assigned to cases not involving manufacturing or processing activity shall conduct a review taking into account the factors enumerated in § 400.23 and other appropriate sections of this part, which shall include:
      (i) Conducting or participating in necessary hearings scheduled by the Executive Secretary;
      (ii) Reviewing case records, including public comments;
      (iii) Requesting case records, including public comments;
      (iv) Developing information and evidence necessary for evaluation and analysis of the application in accordance with the criteria of the Act and this part;
      (v) Preparing a report with recommendations to the Board and submitting it to the Executive Secretary;

(A) If the report is unfavorable to the applicant, it shall be considered a preliminary report and the applicant shall be notified within 5 days (in writing or by phone) and given 30 days from the date of notification in which to respond to the report and submit additional evidence.

(B) If the response contains new evidence on which there has not been an opportunity for public comment, the Executive Secretary will publish notice in the FEDERAL REGISTER after completion of the review of the response. The new material will be made available for public inspection and the FEDERAL REGISTER notice will invite further public comment for 30 days, with an additional 15-day period for rebuttal comments.

(C) The Customs adviser shall be notified when necessary for further comments, which shall be submitted within 45 days after notification.
§ 400.28 Conditions, prohibitions and restrictions applicable to grants of authority.

(a) In general. Grants of authority issued by the Board for the establishment of zones or subzones, including

(D) The examiners report in a situation under paragraph (d)(2)(v)(A) of this section shall be completed and submitted to the Executive Secretary within 30 days after receipt of additional evidence or notice from the applicant that there will be none; except that, if paragraph (d)(2)(v)(B) of this section applies, the report will be submitted within 30 days of the close of the period for public comment.

(3) Examiners reviews—cases involving manufacturing or processing activity. Examiners shall conduct a review taking into account the factors enumerated in §400.23, §400.31, and other appropriate sections of this part, which shall include:

(i) Conducting or participating in hearings scheduled by the Executive Secretary;

(ii) Reviewing case records, including public comments;

(iii) Requesting information and evidence from parties of record;

(iv) Developing information and evidence necessary for analysis of the threshold factors and the economic factors enumerated in §400.31;

(v) Conducting an analysis to include:

(A) An evaluation of policy considerations pursuant to §§400.31(b)(1)(i) and 400.31(b)(1)(ii);

(B) An evaluation of the economic factors enumerated in §§400.31(b)(1)(iii) and 400.31(b)(2), which shall include an evaluation of the economic impact on domestic industry, considering both producers of like products and producers of components/materials used in the manufacture/processing or assembly of the products. The evaluation will take into account such factors as market conditions, price sensitivity, degree and nature of foreign competition, effect on exports and imports, and the net effect on U.S. employment;

(vi) Conducting appropriate industry surveys when necessary; and

(vii) Preparing a report with recommendations to the Board and submitting it to the Executive Secretary within 150 days of the close of the period for public comment:

(A) If the report is unfavorable to the applicant, it shall be considered a preliminary report and the applicant shall be notified (in writing or by phone) and given 45 days from the date of notification in which to respond to the report and submit additional evidence pertinent to the factors considered in the report.

(B) If the response contains new evidence on which there has not been an opportunity for public comment, the Executive Secretary will publish notice in the Federal Register after completion of the review of the response. The new material will be made available for public inspection and the Federal Register notice will invite further public comment for 30 days, with an additional 15-day period for rebuttal comments.

(e) Procedure—Completion of review—

(1) The Executive Secretary will circulate the examiners report with recommendations to Board members for their review and votes (by resolution).

(2) The Treasury and Army Board members will return their votes to the Executive Secretary within 30 days, unless a formal meeting is requested (see, §400.11(d)).

(3) The Commerce Department will complete the decision process within 15 days of receiving the votes of both other Board members, and the Executive Secretary will publish the Board decision.

(f) Procedure—Application for minor modification of zone project.

(1) The Executive Secretary, with the concurrence of the Port Director, will make a determination in cases under §400.26(c) involving minor changes to zone projects that do not require a Board order, such as boundary modifications, including certain relocations, and will notify the applicant in writing of the decision within 30 days of the determination that the application or request can be processed under §400.26(c).

(2) The Port Director shall provide the decision as to concurrence within 20 days after being notified of the request or application.

Foreign-Trade Zones Board, Commerce  § 400.28

those already issued, are subject to the Act and this part and the following general conditions or limitations:

(1) Approvals from the grantee and the Port Director, pursuant to 19 CFR part 146, are required prior to the activation of any portion of an approved zone project; and

(2) Approval of the Board or the Commerce Department’s Assistant Secretary for Import Administration pursuant to subpart D of this part is required prior to the commencement of manufacturing beyond the scope of that approved as part of the application or pursuant to reviews under this part (e.g., new end products, significant expansions of plant production capacity), and of similar changes in processing activity which involves foreign articles subject to quantitative import controls (quotas) or results in articles subject to a lower (actual or effective) duty rate (inverted tariff) than any of their foreign components.

(3) Sourcing changes—(i) Notification requirement. The grantee or operator of a zone or subzone shall notify the Executive Secretary when there is a change in sourcing for authorized manufacturing or processing activity which involves foreign articles subject to quantitative import controls (quotas) or results in articles subject to a lower (actual or effective) duty rate (inverted tariff) than any of their foreign components,

(A) Entries for consumption are not to be made at the lower duty rate; or

(B) The product in which the foreign articles are to be incorporated is being produced for exportation.

(ii) Notification procedure. Notification shall be given prior to the commencement of the activity, when possible, otherwise at the time the new foreign articles arrive in the zone or are withdrawn from inventory for use in production. Requests may be made to the Executive Secretary for authority to submit notification of sourcing changes on a quarterly federal fiscal year basis covering changes in the previous quarter.

(iii) Reviews. (A) Upon notification of a sourcing change under paragraph (a)(3)(i) of this section, within 30 days, the Executive Secretary will conduct a preliminary review of the changes in relation to the approved activity to determine whether they could have significant adverse effects, taking into account the factors enumerated in §400.31(b), and will submit a report and recommendation to the Commerce Department’s Assistant Secretary for Import Administration, who shall determine whether review is necessary. The procedures of §400.32(b) shall be used in these situations when appropriate.

(B) The Board or the Commerce Department’s Assistant Secretary for Import Administration may, based on public interest grounds, prohibit or restrict the use of zone procedures in regard to the change in sourcing, including requiring that items be placed in privileged foreign status (19 CFR 146.41) upon admission to a zone or subzone.

(C) The Executive Secretary shall direct reviews necessary to ensure that activity involved in these situations continues to be in the public interest.

(4) Prior to activation of a zone, the zone grantee or operator shall obtain all necessary permits from federal, state and local authorities, and except as otherwise specified in the Act or this part, shall comply with the requirements of those authorities.

(5) A grant of authority for a zone or a subzone shall lapse unless the zone project (in case of subzones, the subzone facility) is activated, pursuant to 19 CFR part 146, and in operation not later than five years from:

(i) A Board order (authorizing the zone or subzone) issued after November 7, 1991; or

(6) A grant of authority approved under this subpart includes authority for the grantee to permit the erection of buildings necessary to carry out the approved zone project subject to concurrence of the Port Director.

(7) Zone grantees, operators, and users shall permit federal government officials acting in an official capacity to have access to the zone project and records during normal business hours and under other reasonable circumstances.

(8) A grant of authority may not be sold, conveyed, transferred, set over, or assigned (FTZ Act, section 17; 19 U.S.C. 81q). Private ownership of zone land and facilities is permitted provided the zone grantee retains the control necessary to implement the approved zone
§ 400.29 Application fees.

(a) In general. This section sets forth a uniform system of charges in the form of fees to recover some costs incurred by the Foreign-Trade Zones staff of the Department of Commerce in processing the applications listed in paragraph (b) of this section. The legal authority for the fees is 31 U.S.C. 9701, which provides for the collection of user fees by agencies of the Federal Government.

(b) Uniform system of user fee charges. The following graduated fee schedule establishes fees for certain types of applications and requests for authority based on their average processing time. Applications combining requests for more than one type of approval are subject to the fee for each category.

<table>
<thead>
<tr>
<th>Type of Application</th>
<th>Fee</th>

</tr>
</tbody>
</table>
| (2) Special-purpose subzones (§ 400.25):  
  (i) Non-manufacturing/processing or less than three products | 4,000 |
  (ii) Manufacturing/processing—three or more products | 6,500 |
| (3) Expansions (§ 400.26(b)) | 1,600 |

(c) Applications submitted to the Board shall include a check drawn on a national or state bank or trust company of the United States or Puerto Rico in the amount called for in paragraph (b) of this section. Uncertified checks must be acceptable for deposit by a Federal Reserve bank or branch.

(d) Applicants shall make their checks payable to the U.S. Department of Commerce ITA. The checks will be deposited by ITA into the Treasury receipts account. If applications are found deficient under § 400.27(b)(1), or withdrawn by applicants prior to formal filing, refunds will be made.

Subpart D—Manufacturing and Processing Activity—Reviews

§ 400.31 Manufacturing and processing activity; criteria.

(a) In general. Pursuant to section 15(c) of the Act (19 U.S.C. 81o(c)), the Board has authority to restrict or prohibit zone activity “that in its judgment is detrimental to the public interest.” When evaluating zone and subzone manufacturing and processing activity, either as proposed in an application, in a request for manufacturing/
processing approval, or as part of a review of an ongoing operation, the Board shall determine whether the activity is in the public interest by reviewing it in relation to the evaluation criteria contained in paragraph (b) of this section. With regard to processing activity, this section shall apply only when the activity involves foreign articles subject to quantitative import controls (quotas) or results in articles subject to a lower duty rate (inverted tariff) than any of their foreign components. Such a review involves consideration of whether the activity is consistent with trade policy and programs, and whether its net economic effect is positive.

(b) Evaluation criteria—(1) Threshold factors. It is the policy of the Board to authorize zone activity only when it is consistent with public policy and, in regard to activity involving foreign merchandise subject to quotas or inverted tariffs, when zone procedures are not the sole determining cause of imports. Thus, without undertaking a review of the economic factors enumerated in §400.31(b)(2), the Board shall deny or restrict authority for proposed or ongoing activity if it determines that:

(i) The activity is inconsistent with U.S. trade and tariff law, or policy which has been formally adopted by the Executive branch;

(ii) Board approval of the activity under review would seriously prejudice U.S. tariff and trade negotiations or other initiatives; or

(iii) The activity involves items subject to quantitative import controls or inverted tariffs, and the use of zone procedures would be the direct and sole cause of imports; but for such procedures, would not likely otherwise have occurred, taking into account imports both as individual items and as components of imported products.

(2) Economic factors. After its review of threshold factors, if there is a basis for further consideration, the Board shall consider the following factors in determining the net economic effect of the activity or proposed activity:

(i) Overall employment impact;

(ii) Exports and reexports;

(iii) Retention or creation of manufacturing or processing activity;

(iv) Extent of value-added activity;

(v) Overall effect on import levels of relevant products, including import displacement;

(vi) Extent and nature of foreign competition in relevant products;

(vii) Impact on related domestic industry, taking into account market conditions; and

(viii) Other relevant information relating to public interest and net economic impact considerations, including technology transfers and investment effects.

(c) Methodology and evidence—(1)(i) The first phase (§400.31(b)) involves consideration of threshold factors. If an examiner or reviewer makes a negative finding on any of the factors in paragraph (b)(1) of this section in the course of a review, the applicant shall be informed pursuant to §400.27(d)(3)(vii)(A). When threshold factors are the basis for a negative recommendation in a review of ongoing activity, the zone grantee and directly affected party shall be notified and given an opportunity to submit evidence pursuant to §400.27(d)(3)(vii)(A). If the Board determines in the negative any of the factors in paragraph (b)(1) of this section, it shall deny or restrict authority for the proposed or ongoing activity.

(ii) The process for paragraph (b)(2) of this section involves consideration of the enumerated economic factors, taking into account their relative weight and significance under the circumstances. Previous evaluations in similar cases are considered. The net effect is arrived at by balancing the positive and negative factors and arriving at a net economic effect.

(2) Contributory effect. In assessing the significance of the economic effect of the zone activity as part of the consideration of economic factors, and in consideration of whether there is a significant public benefit, the Board may consider the contributory effect zone savings have as an incremental part of cost effectiveness programs adopted by companies to improve their international competitiveness.

(3) Burden of proof. Applicants for subzones shall have the burden of submitting evidence establishing that the
activity does or would result in a significant public benefit, taking into account the factors in paragraph (b) of this section. Applicants for approval of manufacturing or processing in general-purpose zones shall submit evidence regarding the positive economic effects that would result from activity within the zone and may submit evidence and comments as to policy considerations. Both types of applicants are expected to submit information in response to evidence of adverse economic effects during the public comment period. Parties should submit evidence that is probative and substantial in addressing the matter in issue.

(d) Monitoring and post-approval reviews—(1) Ongoing zone activity may be reviewed at anytime to determine whether it is in compliance with the Act and regulations, as well as the authority granted by the Board. Reviews may also be conducted to determine whether there are changed circumstances that raise questions as to whether the activity is detrimental to the public interest, taking into account the factors enumerated in §400.31. The Board may prescribe special monitoring requirements in its decisions when appropriate.

(2) Reviews may be initiated by the Board, the Commerce Department’s Assistant Secretary for Import Administration, or the Executive Secretary; or, they may be undertaken in response to requests from parties directly affected by the activity in question and showing good cause.

(3) Upon review, if the Board finds that zone activity is no longer in the public interest, taking into account the provisions of §400.31, it may restrict the activity in question. The appropriateness of a delayed effective date will be considered in such cases.

[56 FR 50798, Oct. 8, 1991; 56 FR 56544, Nov. 5, 1991]

§400.32 Procedure for review of request for approval of manufacturing or processing.

(a) Request as part of application for grant of authority. A request for approval of proposed manufacturing or processing activity may be submitted as part of an application under §§400.24–400.26(a). The Board will review the request taking into account the criteria in §400.31(b).

(b) Request for manufacturing/processing in approved zone or subzone. Prior to the commencement of manufacturing in a zone or subzone involving activity beyond the scope of that which has been previously authorized at the facility (i.e., new end products, significant expansions of plant production capacity), and of similar changes in processing activity that involves foreign articles subject to quotas or inverted tariffs, zone grantees or operators shall request the determination referred to in §400.31(a) by submitting a request in writing to the Executive Secretary (§400.28(a)(2)). Such requests shall include the information required by §§400.24(d)(4)(vii) and 400.25.

(1) The Commerce Department’s Assistant Secretary for Import Administration may make determinations in these cases based upon a review by the FTZ staff and the recommendation of the Executive Secretary, when:

(i) The proposed activity is the same, in terms of products involved, to activity recently approved by the Board and similar in circumstances; or

(ii) The activity is for export only; or

(iii) The zone benefits sought do not involve the election of non-privileged foreign status (19 CFR 146.42) on items involving inverted tariffs; or

(iv) The Port Director determines that the activity could otherwise be conducted under Customs bonded procedures.

(2) When the informal procedure in paragraph (b)(1) of this section is not appropriate—

(i) The Executive Secretary will:

(A) Assign a case docket number and give notice in the Federal Register inviting public comment;

(B) Arrange a public hearing, if appropriate;

(C) Appoint an examiner, if appropriate, to conduct a review and prepare a report with recommendations for the Board; and

(D) Prepare and transmit a report with recommendations, or transmit the examiner’s report, to the Board for appropriate action; and
(ii) The Board will make a determination on the requests, and the Executive Secretary will notify the grantee in writing of the Board’s determination, and will publish notice of the determination in the Federal Register.

(c) Scope determinations. Determinations shall be made by the Executive Secretary as to whether changes in activity are within the scope of related activity already approved for the facility involved under this part. When warranted, the procedures of paragraph (b)(2) of this section will be followed.

§ 400.33 Restrictions on manufacturing and processing activity.

(a) In general. In approving manufacturing or processing activity for a zone or subzone the Board may adopt restrictions to protect the public interest, health, or safety. The Commerce Department’s Assistant Secretary for Import Administration may similarly adopt restrictions in exercising authority under §400.32(b)(1).

(b) Restrictions on items subject to antidumping and countervailing duty actions—(1) Board policy. Zone procedures shall not be used to circumvent antidumping (AD) and countervailing duty (CVD) actions under 19 CFR parts 353 and 355.

(2) Admission of items subject to AD/CVD actions. Items subject to AD/CVD orders or items which would otherwise be subject to suspension of liquidation under AD/CVD procedures, if they entered U.S. Customs territory, shall be placed in privileged foreign status (19 CFR 146.41) upon admission to a zone or subzone. Upon entry for consumption, such items shall be subject to duties under AD/CVD orders or to suspension of liquidation, as appropriate, under 19 CFR parts 353 and 355.

Subpart E—Zone Operations and Administrative Requirements

§ 400.41 Zone operations; general.

Zones shall be operated by or under the contractual oversight of zone grantees, subject to the requirements of this Act and this part, as well as those of other local agencies having jurisdiction over the site and operation. Zone grantees shall ensure that the reasonable zone needs of the business community are served by their zone projects. The Port Director represents the Board with regard to the zone projects in the district and is responsible for enforcing, including physical security and access requirements, as provided in 19 CFR part 146.

§ 400.42 Requirements for commencement of operations in a zone project.

(a) In general. The following actions are required before operations in a zone may commence:

(1) Approval by the Port Director of an application for activation is required as provided in 19 CFR part 146; and

(2) The Executive Secretary will review proposed manufacturing or processing, pursuant to §400.32, and a zone schedule as provided in this section.

(b) Zone schedule. (1) The zone grantee shall submit to the Executive Secretary and to the Port Director a zone schedule which sets forth:

(i) Internal rules and regulations for the zone; and

(ii) A statement of the rates and charges (fees) applicable to zone users.

(2) A zone schedule shall consist of typed, loose-leaf, numbered, letter-sized pages, enclosed in covers, and shall contain:

(i) A title page, with information to include:

(A) The name of the zone grantee and operator(s);

(B) Schedule identification;

(C) Site description;

(D) Date of original schedule; and

(E) Name of the preparer;

(ii) A table of contents;

(iii) Administrative information;

(iv) A statement of zone operating policy, rules and regulations, including uniform procedures regarding the construction of buildings and facilities; and

(v) A section listing rates and charges for zones and subzones with information sufficient for the Board or the Executive Secretary to determine

VerDate 20<MAR>2000 12:47 Mar 21, 2000 Jkt 190045 PO 00000 Frm 00067 Fmt 8010 Sfmt 8010 Y:\SGML\190045T.XXX pfrm07 PsN: 190045T
§ 400.43 Restriction and prohibition of certain zone operations.

(a) In general. After review, the Board may restrict or prohibit any admission of merchandise into a zone project or operation in a zone project when it determines that such activity is detrimental to the public interest, health or safety.

(b) Initiation of review. The Board may conduct a proceeding, or the Executive Secretary a review, to consider a restriction or prohibition under paragraph (a) of this section either self-initiated, or in response to a complaint made to the Board by a party directly affected by the activity in question and showing good cause.

§ 400.44 Zone-restricted merchandise.

(a) In general. Merchandise which has been given export status by Customs officials ("zone-restricted merchandise"—19 CFR 146.44) may be returned to the Customs Territory of the United States only when the Board determines that the return would be in the public interest. Such returns are subject to the Customs laws and the payment of applicable duties and excise taxes (19 U.S.C. 81c, 4th proviso).

(b) Criteria. In making the determination described in paragraph (a) of this section, the Board will consider:

(1) The intent of the parties;
(2) Why the goods cannot be exported;
(3) The public benefit involved in allowing their return; and
(4) The recommendation of the Port Director.

(c) Procedure. (1) A request for authority to return "zone-restricted" merchandise into Customs territory shall be made to the Executive Secretary in letter form by the zone grantee or operator of the zone in which the merchandise is located, with supporting information and documentation.

(2) The Executive Secretary will investigate the request and prepare a report for the Board.

(3) The Executive Secretary may act for the Board under this section in cases involving merchandise valued at 500,000 dollars or less, provided requests

§ 400.45 Retail trade.

(a) In general. Retail trade is prohibited in zones, except that sales or other commercial activity involving domestic, duty-paid, and duty-free goods may be conducted within an activated zone project under permits issued by the zone grantee and approved by the Board, with the further exception that no permits shall be necessary for sales involving domestic, duty-paid or duty-free food and non-alcoholic beverage products sold within the zone or subzone for consumption on premises by persons working therein. The Port Director will determine whether an activity is retail trade, subject to review by the Board when the zone grantee requests such a review with a good cause.

(b) Procedure. Requests for Board approval under this section shall be submitted in letter form, with supporting documentation, to the Port Director, who is authorized to act for the Board in these cases, subject to the concurrence of the Executive Secretary.

(c) Criteria. In evaluating requests under this section, the Port Director and the Executive Secretary will consider:

1. Whether any public benefits would result from approval; and

2. The economic effect such activity would have on the retail trade outside the zone in the port of entry area.

§ 400.46 Accounts, records and reports.

(a) Zone accounts. Zone accounts shall be maintained in accordance with generally accepted accounting principles, and in compliance with the requirements of Federal, State or local agencies having jurisdiction over the site or operation.

(b) Records and forms. Zone records and forms shall be prepared and maintained in accordance with the requirements of the Customs Service and the Board, and the zone grantee shall retain copies of applications it submits to the Board.

(c) Maps and drawings. Zone grantees or operators, and Port Directors, shall keep current layout drawings of approved sites as described in §400.24(d)(5), showing activated portions, and a file showing required approvals. The zone grantee shall furnish necessary maps to the Port Director.

(d) Annual reports. (1) Zone grantees shall submit annual reports to the Board at the time and in the format prescribed by the Executive Secretary, for use by the Executive Secretary in the preparation of the Board's annual report to the Congress.

(2) The Board shall submit an annual report to the Congress.

(Approved by the Office of Management and Budget under control number 0625-0109)

§ 400.47 Appeals to the Board from decisions of the Assistant Secretary for Import Administration and the Executive Secretary.

(a) In general. Decisions of the Assistant Secretary for Import Administration and the Executive Secretary made pursuant to §§ 400.22(d)(2)(ii), 400.32(b)(1), 400.44(c)(3), and 400.45(b)(2) may be appealed to the Board by adversely affected parties showing good cause.

(b) Procedures. Parties appealing a decision under paragraph (a) of this section shall submit a request for review to the Board in writing, stating the basis for the request, and attaching a copy of the decision in question, as well as supporting information and documentation. After a review, the Board will notify the complaining party of its decision in writing.

Subpart F—Notice, Hearings, Record and Information

§ 400.51 Notice and hearings.

(a) In general. The Executive Secretary will publish notice in the Federal Register inviting public comment on applications docketed for Board action (see, §400.27(c)), and with regard to other reviews or matters considered under this part when public comment is necessary. Applicants shall
§ 400.52  Official record; public access.

(a) Content. The Executive Secretary will maintain at the location stated in §400.53(d) an official record of each proceeding within the Board's jurisdiction. The Executive Secretary will include in the official record all factual information, written argument, and other material developed by, presented to, or obtained by the Board in connection with the proceeding. The official record will contain material that is public, business proprietary, privileged, and classified. While there is no requirement that a verbatim record shall be kept of public hearings, the proceedings of such hearings shall ordinarily be recorded and transcribed when significant opposition is involved.

(b) Opening and closing of official record. The official record opens on the date the Executive Secretary files an application or receives a request that satisfies the applicable requirements of this part and closes on the date of the final determination in the proceeding or review, as applicable.

(c) Protection of the official record. Unless otherwise ordered in a particular case by the Executive Secretary, the official record will not be removed from the Department of Commerce. A certified copy of the record will be made available to any court before which any aspect of a proceeding is under review, with appropriate safeguards to prevent disclosure of proprietary or privileged information.

§ 400.53  Information.

(a) Request for information. The Board may request submission of any information, including business proprietary information, and written argument necessary or appropriate to the proceeding.

(b) Public information. Except as provided in paragraph (c) of this section, the Board will consider all information submitted in a proceeding to be public information. If the person submitting the information does not agree to its public disclosure, the Board will return the information and not consider it in the proceeding.

(c) Business proprietary information. Persons submitting business proprietary information and requesting protection from public disclosure shall mark the cover page “business proprietary,” as well as the top of each page on which such information appears.

(d) Disclosure of information. Disclosure of public information will be governed by 15 CFR part 4. Public information in the official record will be available for inspection and copying at the Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce Building, Pennsylvania Avenue and 14th Street, NW., Washington, DC 20230.

SUBCHAPTER A—NATIONAL SECURITY INDUSTRIAL BASE REGULATIONS

PART 700—DEFENSE PRIORITIES AND ALLOCATIONS SYSTEM

Subpart A—Purpose

Sec.
700.1 Purpose of this regulation.

Subpart B—Overview

700.2 Introduction.
700.3 Priority ratings and rated orders.
700.4 Priorities and allocations in a national emergency.
700.5 Special priorities assistance.
700.6 Official actions.
700.7 Compliance.

Subpart C—Definitions

700.8 Definitions.

Subpart D—Industrial Priorities

700.10 Delegation of authority.
700.11 Priority ratings.
700.12 Elements of a rated order.
700.13 Acceptance and rejection of rated orders.
700.14 Preferential scheduling.
700.15 Extension of priority ratings.
700.16 Changes or cancellations of priority ratings and rated orders.
700.17 Use of rated orders.
700.18 Limitations on placing rated orders.

Subpart E—Industrial Priorities for Energy Programs

700.20 Use of priority ratings.

Subpart F—National emergency Preparedness and Critical Items

700.30 Priorities and allocations in a national emergency.
700.31 Metalworking machines.

Subpart G [Reserved]

Subpart H—Special Priorities Assistance

700.50 General provisions.
700.51 Requests for priority rating authority.
700.52 Examples of assistance.
700.53 Criteria for assistance.
700.54 Instances where assistance may not be provided.
700.55 Assistance programs with Canada and other nations.

Subpart I—Official Actions

700.60 General provisions.
700.61 Rating Authorizations.
700.62 Directives.
700.63 Letters of Understanding.

Subpart J—Compliance

700.70 General provisions.
700.71 Audits and investigations.
700.72 Compulsory process.
700.73 Notification of failure to comply.
700.74 Violations, penalties, and remedies.
700.75 Compliance conflicts.

Subpart K—Adjustments, Exceptions, and Appeals

700.80 Adjustments or exceptions.
700.81 Appeals.

Subpart L—Miscellaneous Provisions

700.90 Protection against claims.
700.91 Records and reports.
700.92 Applicability of this regulation and official actions.
700.93 Communications.

APPENDIX I TO PART 700—FORM BXA-999-REQUEST FOR SPECIAL PRIORITIES ASSISTANCE

SOURCE: 49 FR 30414, July 30, 1984, unless otherwise noted. Redesignated at 54 FR 601, Jan. 9, 1989.
§ 700.2

priority performance of contracts and orders necessary or appropriate to promote the national defense over other contracts or orders; to allocate materials, services, and facilities as necessary or appropriate to promote the national defense; and to require the allocation of, or the priority performance under contracts or orders relating to, supplies of materials, equipment, and services in order to assure domestic energy supplies for national defense needs.

(b) Section 18 of the Selective Service Act of 1948 (50 U.S.C. app. 468) (Selective Service Act) authorizes the President to place an order with a supplier for any articles or materials required for the exclusive use of the U.S. armed forces whenever the President determines that in the interest of national security, prompt delivery of the articles and materials is required. The supplier must give precedence to the order so as to deliver the articles or materials in a required time period. 10 U.S.C. 2538, and 50 U.S.C. 82, provide similar authority specifically for Department of Defense procurement, but only in time of war or when war is imminent.

(c) Section 602(b) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5195a(b)) provides that the terms “national defense” and “defense” as used in the Defense Production Act includes “emergency preparedness activities” conducted pursuant to Title VI of the Stafford Act. The definition of “national defense” in Section 702(13) of the Defense Production Act provides that this term includes “emergency preparedness activities” conducted pursuant to Title VI of the Stafford Act.

(d) The Defense Priorities and Allocations System (DPAS) regulation implements the priorities and allocations authority of the Defense Production Act and as this authority pertains to Title VI of the Stafford Act, and the priorities authority of the Selective Service Act and related statutes, all with respect to industrial resources. The DPAS ensures the timely availability of industrial resources for approved programs and provides an operating system to support rapid industrial response to a national emergency.

(e) To aid in understanding and using the DPAS, an overview of its major provisions is incorporated into this regulation as subpart B—Overview. The full text of the DPAS is found in subparts D through L.

§ 700.2 Overview

§ 700.2 Introduction.

(a) Certain national defense and energy programs (including emergency preparedness activities) are approved for priorities and allocations support. For example, military aircraft production, ammunition, and certain programs which maximize domestic energy supplies are “approved programs.” A complete list of currently approved programs is provided at Schedule 1 to this part.

(b) The Department of Commerce administers the DPAS to ensure the timely delivery of industrial items to meet approved program requirements.

(c) Commerce has delegated authority to place priority ratings on contracts or orders necessary or appropriate to promote the national defense to the government agencies that issue such contracts or orders. Schedule I includes a list of agencies delegated this authority. Copies of the Delegations of Authority are provided at Appendix II. They set forth the authorities delegated and those retained by Commerce.

§ 700.3 Priority ratings and rated orders.

(a) Rated orders are identified by a priority rating consisting of the rating—either DX or DO—and a program identification symbol. Rated orders take preference over all unrated orders as necessary to meet required delivery dates. Among rated orders, DX rated orders take preference over DO rated orders. Program identification symbols
§ 700.4 Priorities and allocations in a national emergency.

(a) In the event of a national emergency, special rules may be established as needed to supplement this part, thus ensuring rapid industrial response and the timely availability of critical industrial items and facilities to meet the urgent national defense requirements, including domestic emergency preparedness requirements, of approved programs.

(b) The special rules established in response to the emergency may include provisions for the taking of certain emergency official actions and the allocation of critical and scarce materials and facilities.

§ 700.5 Special priorities assistance.

(a) The DPAS is designed to be largely self-executing. However, from time-to-time production or delivery problems will arise. In this event, special priorities assistance is available from Commerce and from the Delegate Agencies.

(b) Special priorities assistance is available for any reason consistent with this regulation. Generally, special priorities assistance is provided to expedite deliveries, resolve delivery conflicts, place rated orders, locate suppliers, or to verify information supplied by customers and vendors. Special priorities assistance may also be used to request rating authority for items not automatically ratable.

§ 700.6 Official actions.

When necessary, Commerce takes specific official actions to implement or enforce the provisions of this regulation and to provide special priorities assistance. Such actions may include the issuance of: Rating Authorizations, Directives, Letters of Understanding, Set-asides, and compliance documents (Administrative Subpoenas, Demands for Information, and Inspection Authorizations).

§ 700.7 Compliance.

(a) Compliance with the provisions of this regulation and official actions is required by the Defense Production Act and the Selective Service Act and related statutes. Violators are subject to criminal penalties.

(b) Any person who places or receives a rated order should be thoroughly familiar with, and must comply with, the provisions of this regulation.
Subpart C—Definitions

In addition to the definitions provided in Section 702 of the Defense Production Act (excepting the definition of "industrial resources") and Section 602(a) of the Stafford Act, the following definitions pertain to all sections of this part:

Approved program—a program determined as necessary or appropriate for priorities and allocations support to promote the national defense by the Secretary of Defense, the Secretary of Energy, or the Director, Federal Emergency Management Agency, under the authority of the Defense Production Act, the Stafford Act, and Executive Order 12919, or the Selective Service Act and related statutes and Executive Order 12742.

Construction. The erection, addition, extension, or alteration of any building, structure, or project, using materials or products which are to be an integral and permanent part of the building, structure, or project. Construction does not include maintenance and repair.

Delegate Agency. A government agency authorized by delegation from the Department of Commerce to place priority ratings on contracts or orders needed to support approved programs.

Industrial resources—all materials, services, and facilities, including construction materials, the authority for which has not been delegated to other agencies under Executive Order 12919. This term also includes the term "item" as defined and used in this part.

Item. Any raw, in process, or manufactured material, article, commodity, supply, equipment, component, accessory, part, assembly, or product of any kind, technical information, process, or service.

Maintenance and repair and operating supplies (MRO):

(a) Maintenance is the upkeep necessary to continue any plant, facility, or equipment in working condition.

(b) Repair is the restoration of any plant, facility, or equipment to working condition when it has been rendered unsafe or unfit for service by wear and tear, damage, or failure of parts.

(c) Operating supplies are any items carried as operating supplies according to a person's established accounting practice. Operating supplies may include hand tools and expendable tools, jigs, dies, fixtures used on production equipment, lubricants, cleaners, chemicals and other expendable items.

(d) MRO does not include items produced or obtained for sale to other persons or for installation upon or attachment to the property of another person, or items required for the production of such items; items needed for the replacement of any plant, facility, or equipment; or items for the improvement of any plant, facility, or equipment by replacing items which are still in working condition with items of a new or different kind, quality, or design.

Official action. An action taken by Commerce under the authority of the Defense Production Act, the Selective Service Act and related statutes, and this regulation. Such actions include the issuance of Set-asides, Rating Authorizations, Directives, Letters of Understanding, Demands for Information, Inspection Authorizations, and Administrative Subpoenas.

Person—any individual, corporation, partnership, association, or any other organized group of persons, or legal successor or representative thereof; or any authorized State or local government or agency thereof; and for purposes of administration of this part, includes the United States Government and any authorized foreign government or agency thereof, delegated authority as provided in this part.

Production equipment. Any item of capital equipment used in producing materials or furnishing services that has a unit acquisition cost of $2,500 or more, an anticipated service life in excess of one year, and the potential for maintaining its integrity as a capital item.

Rated order. A prime contract, a subcontract, or a purchase order in support of an approved program issued in accordance with the provisions of this regulation.
Bureau of Export Administration, Commerce

§ 700.12

Set-aside. The amount of an item for which a supplier must reserve order book space in anticipation of the receipt of rated orders.

Stafford Act—Title VI (Emergency Preparedness) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, as amended (42 U.S.C. 5195 et seq.).

Subpart D—Industrial Priorities

§ 700.10 Delegation of authority.

(a) The priorities and allocations authorities of the President under Title I of the Defense Production Act with respect to industrial resources have been delegated to the Secretary of Commerce under Executive Order 12919 of June 3, 1994 (59 FR 29525). The priorities authorities of the President under the Selective Service Act and related statutes with respect to industrial resources have also been delegated to the Secretary of Commerce under Executive Order 12742 of January 8, 1991 (56 FR 1079).

(b) Within the Department of Commerce, these responsibilities have been assigned to the Office of Strategic Industries and Economic Security. The Department of Commerce has authorized the Delegate Agencies to assign priority ratings to orders for items needed for approved programs. Copies of these Delegations of Authority are provided at Appendix II. They set forth the authorities delegated and those retained by Commerce.

§ 700.11 Priority ratings.

(a) Levels of priority. (1) There are two levels of priority established by this regulation, identified by the rating symbols “DO” and “DX”.

(2) All DO rated orders have equal priority with each other and take preference over DX rated orders and unrated orders. (For resolution of conflicts among rated orders of equal priority, see § 700.14(c).)

(3) In addition, a Directive issued by Commerce takes preference over any DX rated order, DO rated order, or unrated order, as stipulated in the Directive. (For a full discussion of Directives, see § 700.62.)

(b) Program identification symbols. Program identification symbols indicate which approved program is being supported by a rated order. The list of approved programs and their identification symbols are listed in Schedule I. For example, A1 identifies defense aircraft programs and A7 signifies defense electronic programs. Program identification symbols, in themselves, do not connote any priority.

§ 700.12 Elements of a rated order.

Each rated order must include:

(a) The appropriate priority rating (e.g., DO-A1, DX-A4, DO-H1);

(b) A required delivery date or dates. The words “immediately” or “as soon as possible” do not constitute a delivery date. A “requirements contract,” “basic ordering agreement,” “prime vendor contract,” or similar procurement document bearing a priority rating may contain no specific delivery date or dates and may provide for the furnishing of items from time-to-time or within a stated period against specific purchase orders, such as “calls”, “requisitions”, and “delivery orders”. These purchase orders must specify a required delivery date or dates and are to be considered as rated as of the date of their receipt by the supplier and not as of the date of the original procurement document;
(c) The written signature on a manually placed order, or the digital signature or name on an electronically placed order, of an individual authorized to sign rated orders for the person placing the order. The signature or use of the name certifies that the rated order is authorized under this part and that the requirements of this part are being followed; and

(d) A statement that reads in substance:

This is a rated order certified for national defense use, and you are required to follow all the provisions of the Defense Priorities and Allocations System regulation (15 CFR part 700).

§ 700.13 Acceptance and rejection of rated orders.

(a) Mandatory acceptance. (1) Except as otherwise specified in this section, a person shall accept every rated order received and must fill such orders regardless of any other rated or unrated orders that have been accepted.

(2) A person shall not discriminate against rated orders in any manner such as by charging higher prices or by imposing different terms and conditions than for comparable unrated orders.

(b) Mandatory rejection. Unless otherwise directed by Commerce:

(1) A person shall not accept a rated order for delivery on a specific date if unable to fill the order by that date. However, the person must inform the customer of the earliest date on which delivery can be made and offer to accept the order on the basis of that date. Scheduling conflicts with previously accepted lower rated or unrated orders are not sufficient reason for rejection under this section.

(2) A person shall not accept a DO rated order for delivery on a date which would interfere with delivery of any previously accepted DX rated orders. However, the person must offer to accept the order based on the earliest delivery date otherwise possible.

(3) A person shall not accept a DX rated order for delivery on a date which would interfere with delivery of any previously accepted DX rated orders, but must offer to accept the order based on the earliest delivery date otherwise possible.

(4) If a person is unable to fill all the rated orders of equal priority status received on the same day, the person must accept, based upon the earliest delivery dates, only those orders which can be filled, and reject the other orders. For example, a person must accept order A requiring delivery on December 15 and order B requiring delivery on December 31. However, the person must offer to accept the rejected orders based on the earliest delivery dates otherwise possible.

(c) Optional rejection. Unless otherwise directed by Commerce, rated orders may be rejected in any of the following cases as long as a supplier does not discriminate among customers:

(1) If the person placing the order is unwilling or unable to meet regularly established terms of sale or payment;

(2) If the order is for an item not supplied or for a service not performed;

(3) If the order is for an item produced, acquired, or provided only for the supplier’s own use for which no orders have been filled for two years prior to the date of receipt of the rated order. If, however, a supplier has sold some of these items, the supplier is obligated to accept rated orders up to that quantity or portion of production, whichever is greater, sold within the past two years;

(4) If the person placing the rated order, other than the U.S. Government, makes the item or performs the service being ordered;

(5) If acceptance of a rated order or performance against a rated order would violate any other regulation, official action, or order of the Department of Commerce issued under the authority of the Defense Production Act or the Selective Service Act and related statutes [See § 700.75].

(d) Customer notification requirements.

(1) A person must accept or reject a rated order in writing or electronically within fifteen (15) working days after receipt of a DO rated order and within ten (10) working days after receipt of a DX rated order. If the order is rejected, the person must give reasons in writing (not electronically) for the rejection.
(2) If a person has accepted a rated order and subsequently finds that shipment or performance will be delayed, the person must notify the customer immediately, give the reasons for the delay, and advise of a new shipment or performance date. If notification is given verbally, written or electronic confirmation must be provided within five (5) working days.

(The information collection requirements in paragraphs (d)(1) and (d)(2) are approved by the Office of Management and Budget under OMB control number 0694-0053.)

§ 700.14 Preferential scheduling.

(a) A person must schedule operations, including the acquisition of all needed production items, in a timely manner to satisfy the delivery requirements of each rated order. Modifying production or delivery schedules is necessary only when required delivery dates for rated orders cannot otherwise be met.

(b) DO rated orders must be given production preference over unrated orders, if necessary to meet required delivery dates, even if this requires the diversion of items being processed or ready for delivery against unrated orders. Similarly, DX rated orders must be given preference over DO rated orders and unrated orders.

Examples: If a person receives a DO rated order with a delivery date of June 3 and if meeting that date would mean delaying production or delivery of an item for an unrated order, the unrated order must be delayed. If a DX rated order is received calling for delivery on July 15 and a person has a DO rated order requiring delivery on June 2 and operations can be scheduled to meet both deliveries, there is no need to alter production schedules to give any additional preference to the DX rated order.

(c) Conflicting rated orders. (1) If a person finds that delivery or performance against any accepted rated orders conflicts with the delivery or performance against other accepted rated orders of equal priority status, the person shall give preference to the conflicting orders in the sequence in which they are to be delivered or performed (not to the receipt dates). If the conflicting rated orders are scheduled to be delivered or performed on the same day, the person shall give preference to those orders which have the earliest receipt dates.

(2) If a person is unable to resolve rated order delivery or performance conflicts under this section, the person should promptly seek special priorities assistance as provided in §§ 700.50 through 700.54. If the person’s customer objects to the rescheduling of delivery or performance of a rated order, the customer should promptly seek special priorities assistance as provided in §§ 700.50 through 700.54. For any rated order against which delivery or performance will be delayed, the person must notify the customer as provided in § 700.13(d)(2).

(d) If a person is unable to purchase needed production items in time to fill a rated order by its required delivery date, the person must fill the rated order by using inventoried production items. A person who uses inventoried items to fill a rated order may replace those items with the use of a rated order as provided in § 700.17(b).

§ 700.15 Extension of priority ratings.

(a) A person must use rated orders with suppliers to obtain items needed to fill a rated order. The person must use the priority rating indicated on the customer’s rated order, except as otherwise provided in this regulation or as directed by the Department of Commerce.

For example, if a person is in receipt of a DO-A3 rated order for a navigation system and needs to purchase semiconductors for its manufacture, that person must use a DO-A3 rated order to obtain the needed semiconductors.

(b) The priority rating must be included on each successive order placed to obtain items needed to fill a customer’s rated order. This continues from contractor to subcontractor to supplier throughout the entire procurement chain.

§ 700.16 Changes or cancellations of priority ratings and rated orders.

(a) The priority rating on a rated order may be changed or cancelled by:
§ 700.17 Use of rated orders.

(a) A person must use rated orders to obtain:

1. Items which will be physically incorporated into other items to fill rated orders, including that portion of such items normally consumed, or converted into scrap or by-products, in the course of processing;

2. Containers or other packaging materials required to make delivery of the finished items against rated orders;

3. Services, other than contracts of employment, needed to fill rated orders; and

4. MRO needed to produce the finished items to fill rated orders. However, for MRO, the priority rating used must contain the program identification symbol H7 along with the rating symbol contained on the customer’s rated order. For example, a person in receipt of a DO-A3 rated order, who needs MRO, would place a DO-H7 rated order with the person’s supplier.

(b) A person may use a rated order to replace inventoried items (including finished items) if such items were used to fill rated orders, as follows:

(1) The order must be placed within 90 days of the date of use of the inventory.

(2) A DO rating symbol and the program identification symbol indicated on the customer’s rated order must be used on the order. A DX rating symbol may not be used even if the inventory was used to fill a DX rated order.

(3) If the priority ratings on rated orders from one customer or several customers contain different program identification symbols, the rated orders may be combined. In this case, the program identification symbol H1 must be used (i.e., DO-H1).

(c) A person may combine DX and DO rated orders from one customer or several customers if the items covered by each level of priority are identified separately and clearly. If different program identification symbols are indicated on those rated orders of equal priority, the person must use the program identification symbol H1 (i.e., DO-H1 or DX-H1).

(d) Combining rated and unrated orders. (1) A person may combine rated and unrated order quantities on one purchase order provided that:

(i) The rated quantities are separately and clearly identified; and

(ii) The four elements of a rated order, as required by §700.12, are included on the order with the statement required in §700.12(d) modified to read in substance:

This purchase order contains rated order quantities certified for national defense use, and you are required to follow all the provisions of the Defense Priorities and Allocations System regulation (15 CFR part 700) only as it pertains to the rated quantities.

(2) A supplier must accept or reject the rated portion of the purchase order as provided in §700.13 and give preferential treatment only to the rated quantities as required by this part.
§ 700.18 Limitations on placing rated orders.

(a) General limitations. (1) A person may not place a DO or DX rated order unless entitled to do so under this regulation.

(2) Rated orders may not be used to obtain:

(i) Delivery on a date earlier than needed;

(ii) A greater quantity of the item than needed, except to obtain a minimum procurable quantity. Separate rated orders may not be placed solely for the purpose of obtaining minimum procurable quantities on each order;

(iii) Items in advance of the receipt of a rated order, except as specifically authorized by Commerce (see §700.51(c) for information on obtaining authorization for a priority rating in advance of a rated order); or

(iv) Any of the following items unless specific priority rating authority has been obtained from a Delegate Agency or Commerce:

(A) Items for plant improvement, expansion or construction, unless they will be physically incorporated into a construction project covered by a rated order; and

(B) Production or construction equipment or items to be used for the manufacture of production equipment. [For information on requesting priority rating authority, see §700.53.]

(v) Any items related to the development of chemical or biological warfare capabilities or the production of chemical or biological weapons, unless such development or production has been authorized by the President or the Secretary of Defense.

(b) Jurisdictional limitations. (1) The priorities and allocations authority for certain items has been delegated under Executive Orders 12919 and 12742, other executive order, or Interagency Memoranda of Understanding to other agencies. Unless otherwise agreed to by the concerned agencies, the provisions of this part are not applicable to these items which include:

(i) Food resources, food resource facilities, and the domestic distribution of farm equipment and commercial fertilizer (Department of Agriculture—see Attachment A to DPAS Delegation 1 in Appendix II to part 700 concerning combat rations);

(ii) All forms of energy, including radioisotopes, stable isotopes, source material, and special nuclear material produced in Government-owned plants or facilities operated by or for the Department of Energy (Department of Energy);

(iii) Health resources (Department of Health and Human Services);

(iv) All forms of civil transportation (Department of Transportation);

(v) Water resources (Department of Defense/U.S. Army Corps of Engineers);

(vi) Communications services (National Communications System under Executive Order 12472 of April 3, 1984); and

(vii) Mineral resources and mineral processing facilities (Department of the Interior/U.S. Geological Survey—see Memorandum of Understanding Between Interior and Commerce in DPAS Appendix III to part 700).
§ 700.20  Use of priority ratings.

(a) Section 101(c) of the Defense Production Act authorizes the use of priority ratings for projects which maximize domestic energy supplies.

(b) Projects which maximize domestic energy supplies include those which maintain or further domestic energy exploration, production, refining, and transportation; maintain or further the conservation of energy; or are involved in the construction or maintenance of energy facilities.

§ 700.21  Application for priority rating authority.

(a) For projects believed to maximize domestic energy supplies, a person may request priority rating authority for scarce, critical, and essential supplies of materials, equipment, and services (related to the production of materials or equipment, or the installation, repair, or maintenance of equipment) by submitting DOE Form PR 437 to the Department of Energy. Blank applications and further information may be obtained from the U.S. Department of Energy, Office of Clearance and Support, Field/Headquarters Support Division, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585; Attn.: PR-132.

(b) On receipt of the application, the Department of Energy will:

(1) Determine if the project maximizes domestic energy supplies; and

(2) Find whether the materials, equipment, or services involved in the application are critical and essential to the project.

(c) If the Department of Energy notifies Commerce that the project maximizes domestic energy supplies and that the materials, equipment, or services are critical and essential, Commerce must find whether the items in question are scarce and whether there is a need to use the priorities and allocations authorities.

(1) Scarcity implies an unusual difficulty in obtaining the materials, equipment, or services in a timeframe consistent with the timely completion of the energy project. Among the factors to be used in making the scarcity finding will be the following:

(i) Value and volume of material or equipment shipments;

(ii) Consumption of material and equipment;

(iii) Volume, market trends of imports and exports;

(iv) Domestic and foreign sources of supply;

(v) Normal levels of inventories;

(vi) Rates of capacity utilization;

(vii) Volume of new orders; and

(viii) Lead times for new orders.

(2) In finding whether there is a need to use the priorities and allocations authorities, Commerce will consider alternative supply solutions and other measures.

(d) If Commerce does not find that the items of materials, equipment, or services are scarce, it will not proceed to analyze the need to use the priorities and allocations authorities.

(e) Commerce will inform the Department of Energy of the results of its analysis. If Commerce has made the two required findings, it will authorize the Department of Energy to grant the use of a priority rating to the applicant.
Bureau of Export Administration, Commerce

§ 700.30

(f) Schedule I includes a list of approved programs to support the maximization of domestic energy supplies. A Department of Energy regulation setting forth the procedures and criteria used by the Department of Energy in making its determination and findings is published in 10 CFR part 216.

Subpart F—National Emergency Preparedness and Critical Items

SOURCE: 63 FR 31923, June 11, 1998, unless otherwise noted.

§ 700.30 Priorities and allocations in a national emergency.

(a) In the event of a national emergency, special rules may be established as needed to supplement this part, thus ensuring rapid industrial response and the timely availability of critical industrial items and facilities to meet the urgent national defense requirements, including domestic emergency preparedness requirements, of approved programs.

(i) Emergency official actions. As needed, this part may be supplemented to include additional definitions to cover civilian emergency preparedness items, support for essential civilian programs, and provisions for the taking of certain emergency official actions under subparts §§ 700.60 through 700.63. These elements can be used to assure the availability of any scarce and critical item for approved programs. Currently, a set-aside applies only to metalworking machines (see § 700.31).

(ii) Allocation rules (i.e., controlled materials programs) were established in response to previous periods of national security emergency such as World War II and the Korean Conflict. The basic elements of the controlled materials programs were the set-aside (the amount of an item for which a producer or supplier must reserve order book space in anticipation of the receipt of rated orders), the production directive (requires a producer to supply a specific quantity, size, shape, and type of an item within a specific time period), and the allotment (the maximum quantity of an item authorized for use in a specific program or application). These elements can be used to assure the availability of any scarce and critical items for approved programs. Currently, a set-aside applies only to metalworking machines (see § 700.31).

(b) Regional Emergency Coordinators. If due to a catastrophic national security emergency event, communications with Commerce headquarters in Washington, D.C. are severed, DPAS Emergency Delegation 1 will provide authority to the Regional Emergency Coordinators (REC) located in the Standard Federal Region Council cities (Boston, New York, Philadelphia, Atlanta, Dallas, Kansas City, Chicago, Denver, San Francisco, and Seattle) to represent the Secretary of Commerce.
and as necessary, act for the Secretary to carry out the emergency industrial production and distribution control functions of Commerce as set forth in this part, in any supplement thereto, or other applicable authority. See DPAS Emergency Delegation 1 for further information about the authority and duties of the RECs, and the effective date of the Delegation.

(2) If DPAS Emergency Delegation 1 is implemented due to a catastrophic national security emergency event, requests for special priorities assistance under §§700.50 through 700.55 should be filed with the nearest Regional Emergency Coordinator located in one of the Standard Federal Region Council cities as provided in DPAS Delegation 1.

§ 700.31 Metalworking machines.

(a) "Metalworking machines" include power driven, manual or automatic, metal cutting and metal forming machines and complete machines not supported in the hands of an operator when in use. Basic machines with a list price of $2,500 or less are not covered by this section.

(b) Metalworking machines covered by this section include:

- Bending and forming machines
- Boring machines
- Broaching machines
- Drilling and tapping machines
- Electrical discharge, ultrasonic and chemical erosion machines
- Forging machinery and hammers
- Gear cutting and finishing machines
- Grinding machines
- Hydraulic and pneumatic presses, power driven
- Machining centers and way-type machines
- Manual presses
- Mechanical presses, power driven
- Milling machines
- Miscellaneous machine tools
- Miscellaneous secondary metal forming and cutting machines
- Planers and shapers
- Polishing, lapping, boring, and finishing machines
- Punching and shearing machines
- Riveting machines
- Saws and filing machines
- Turning machines, lathes, including automatic
- Wire and metal ribbon forming machines

(c) A metalworking machine producer is not required to accept DO rated orders calling for delivery in any month of a total quantity of any size of machine in excess of 60 percent of scheduled production of that size of machine for that month, or any DO rated orders received less than three months prior to the beginning of the month for which delivery is requested. However, DX rated orders must be accepted without regard to a set-aside or the lead time, if delivery can be made by the required date.

Subpart G [Reserved]

Subpart H—Special Priorities Assistance

§ 700.50 General provisions.

(a) The DPAS is designed to be largely self-executing. However, it is anticipated that from time-to-time problems will occur. In this event, a person should immediately contact the appropriate contract administration officer for guidance or assistance. If additional formal aid is needed, special priorities assistance should be sought from the Delegate Agency through the contract administration officer. If the Delegate Agency is unable to resolve the problem or to authorize the use of a priority rating and believes additional assistance is warranted, the Delegate Agency may forward the request to the Department of Commerce for action. Special priorities assistance is a service provided to alleviate problems that do arise.

(b) Special priorities assistance can be provided for any reason in support of this regulation, such as assisting in obtaining timely deliveries of items needed to satisfy rated orders or authorizing the use of priority ratings on orders to obtain items not automatically ratable under this regulation.

(c) A request for special priorities assistance or priority rating authority must be submitted on Form BXA-999 (OMB control number 0694-0057) to the local contract administration representative. Form BXA-999 may be obtained from the Delegate Agency representative or from the Department of
§ 700.51 Requests for priority rating authority.

(a) If a rated order is likely to be delayed because a person is unable to obtain items not normally rated under this regulation, the person may request the authority to use a priority rating in ordering the needed items. Examples of items for which priority ratings can be authorized include:

1. Production or construction equipment;
2. Computers when not used as production items; and
3. Expansion, rebuilding or replacing plant facilities.

(b) Rating authority for production or construction equipment. (1) A request for priority rating authority for production or construction equipment must be submitted to the appropriate Delegate Agency. The Delegate Agency may establish particular forms to be used for these requests (e.g., Department of Defense Form DD 691).

(2) When the use of a priority rating is authorized for the procurement of production or construction equipment, a rated order may be used either to purchase or to lease such equipment. However, in the latter case, the equipment may be leased only from a person engaged in the business of leasing such equipment or from a person willing to lease rather than sell.

(c) Rating authority in advance of a rated prime contract. (1) In certain cases and upon specific request, Commerce, in order to promote the national defense, may authorize a person to place a priority rating on an order to a supplier in advance of the issuance of a rated prime contract. In these instances, the person requesting advance rating authority must obtain sponsorship of the request from the appropriate Delegate Agency. The person shall also assume any business risk associated with the placing of rated orders if these orders have to be cancelled in the event the rated prime contract is not issued.

2. The person must state the following in the request:

   It is understood that the authorization of a priority rating in advance of our receiving a rated prime contract from a Delegate Agency and our use of that priority rating with our suppliers in no way commits the Delegate Agency, the Department of Commerce or any other government agency to enter into a contract or order or to expend funds. Further, we understand that the Federal Government shall not be liable for any cancellation charges, termination costs, or other damages that may accrue if a rated prime contract is not eventually placed and, as a result, we must subsequently cancel orders placed with the use of the priority rating authorized as a result of this request.

(3) In reviewing requests for rating authority in advance of a rated prime contract, Commerce will consider, among other things, the following criteria:

   (i) The probability that the prime contract will be awarded;
   (ii) The impact of the resulting rated orders on suppliers and on other authorized programs;
   (iii) Whether the contractor is the sole source;
   (iv) Whether the item being produced has a long lead time;
   (v) The political sensitivity of the project; and
   (vi) The time period for which the rating is being requested.

(4) Commerce may require periodic reports on the use of the rating authority granted under paragraph (c) of this section.

(5) If a rated prime contract is not issued, the person shall promptly notify all suppliers who have received rated orders pursuant to the advanced rating authority that the priority rating on those orders is cancelled.

§ 700.52 Examples of assistance.

(a) While special priorities assistance may be provided for any reason in support of this regulation, it is usually provided in situations where:

1. A person is experiencing difficulty in obtaining delivery against a rated order by the required delivery date; or
2. A person cannot locate a supplier for an item needed to fill a rated order.

(b) Other examples of special priorities assistance include:
§ 700.53 Criteria for assistance.

Requests for special priorities assistance should be timely, i.e., the request has been submitted promptly and enough time exists for the Delegate Agency or Commerce to effect a meaningful resolution to the problem, and must establish that:

(a) There is an urgent need for the item; and

(b) The applicant has made a reasonable effort to resolve the problem.

§ 700.54 Instances where assistance will not be provided.

Special priorities assistance is provided at the discretion of the Delegate Agencies and Commerce when it is determined that such assistance is warranted to meet the objectives of this regulation. Examples where assistance may not be provided include situations when a person is attempting to:

(a) Secure a price advantage;

(b) Obtain delivery prior to the time required to fill a rated order;

(c) Gain competitive advantage;

(d) Disrupt an industry apportionment program in a manner designed to provide a person with an unwarranted share of scarce items; or

(e) Overcome a supplier’s regularly established terms of sale or conditions of doing business.

§ 700.55 Assistance programs with Canada and other nations.

(a) To promote military assistance to foreign nations, this section provides for authorizing priority ratings to persons in Canada and in other foreign nations to obtain items in the United States in support of approved programs. Although priority ratings have no legal authority outside of the United States, this section also provides information on how persons in the United States may obtain informal assistance in Canada.

(b) Canada. (1) The joint U.S.-Canadian military arrangements for the defense of North America and the integrated nature of their defense industries as set forth in the U.S.-Canadian Statement of Principles for Economic Cooperation (October 26, 1950) require close coordination and the establishment of a means to provide mutual assistance to the defense industries located in both countries.

(2) The Department of Commerce coordinates with the Canadian Public Works and Government Services Canada on all matters of mutual concern relating to the administration of this regulation. A copy of the Memorandum of Understanding between the two departments is provided at appendix IV.

(3) Any person in the United States ordering defense items in Canada should inform the Canadian supplier that the items being ordered are to be used to fill a rated order. The Canadian supplier should be informed that if production materials are needed from the United States by the supplier or the supplier’s vendor to fill the order, they should contact the Canadian Public Works and Government Services Canada for authority to place rated orders in the United States.

(4) Any person in Canada producing defense items for the Canadian government may also obtain priority rating authority for items to be purchased in the United States by applying to the Canadian Public Works and Government Services Canada in accordance with procedures specified by that Department.

(5) Persons in Canada needing special priorities assistance in obtaining defense items in the United States may apply for such assistance to the Canadian Public Works and Government Services Canada. Public Works and Government Services Canada will forward appropriate requests to Commerce.

(6) Any person in the United States requiring assistance in obtaining items in Canada must submit a request through the Delegate Agency to Commerce on Form BXA-999. Commerce
will forward appropriate requests to the Canadian Public Works and Government Services Canada.

(c) Foreign nations. (1) Any person in a foreign nation other than Canada requiring assistance in obtaining defense items in the United States or priority rating authority for defense items to be purchased in the United States, should apply for such assistance or rating authority to the U.S. Department of Defense. The request must be sponsored by the government of the foreign nation prior to its submission.

(2) If the Department of Defense endorses the request, it will be forwarded to Commerce for appropriate action.

§ 700.63 Letters of Understanding.

(a) A Letter of Understanding is an official action which may be issued in resolving special priorities assistance cases to reflect an agreement reached by all parties (Commerce, the Delegate Agency, the supplier, and the customer).

(b) A Letter of Understanding is not used to alter scheduling between rated orders, to authorize the use of priority ratings, to impose restrictions under this regulation, or to take other official actions. Rather, Letters of Understanding are used to confirm production or shipping schedules which do not require modifications to other rated orders.

Subpart J—Compliance

§ 700.70 General provisions.

(a) Compliance actions may be taken for any reason necessary or appropriate to the enforcement or the administration of the Defense Production Act, the Selective Service Act and related statutes, this regulation, or an official action. Such actions include audits, investigations, or other inquiries.

(b) Any person who places or receives a rated order should be thoroughly familiar with, and must comply with, the provisions of this regulation.

(c) Willful violation of any of the provisions of Title I or section 705 of the Defense Production Act, this regulation, or an official action of the Department of Commerce, is a criminal act, punishable as provided in the Defense Production Act and as set forth in § 700.74 of this regulation.

§ 700.71 Audits and investigations.

(a) Audits and investigations are official examinations of books, records, documents, other writings and information to ensure that the provisions of the Defense Production Act, the Selective Service Act and related statutes, this regulation, and official actions have been properly followed. An audit or investigation may also include interviews and a systems evaluation to detect problems or failures in the implementation of this regulation.

(b) When undertaking an audit, investigation, or other inquiry, the Department of Commerce shall:

(1) Define the scope and purpose in the official action given to the person under investigation, and

(2) Have ascertained that the information sought or other adequate and authoritative data are not available from any Federal or other responsible agency.

(c) In administering this regulation, Commerce may issue the following documents which constitute official actions:

(1) Administrative Subpoenas. An Administrative Subpoena requires a person to appear as a witness before an official designated by the Department of Commerce to testify under oath on matters of which that person has knowledge relating to the enforcement or the administration of the Defense Production Act, the Selective Service Act and related statutes, this regulation, or official actions. An Administrative Subpoena may also require the production of books, records, documents, other writings and physical objects or property.

(2) Demand for Information. A Demand for Information requires a person to furnish to a duly authorized representative of the Department of Commerce any information necessary or appropriate to the enforcement or the administration of the Defense Production Act, the Selective Service Act and related statutes, this regulation, or official actions. An Administrative Subpoena may also require the production of books, papers, records, documents and physical objects or property.

(3) Inspection Authorizations. An Inspection Authorization requires a person to permit a duly authorized representative of Commerce to interview the person’s employees or agents to inspect books, records, documents, other writings and information in the person’s possession or control at the place where that person usually keeps them, and to inspect a person’s property when such interviews and inspections are necessary or appropriate to the enforcement or the administration of the Defense Production Act, the Selective Service Act and related statutes, this regulation, or official actions.

(d) The production of books, records, documents, other writings and information will not be required at any place other than where they are usually kept if, prior to the return date specified in the Administrative Subpoena or Demand for Information, a duly authorized official of Commerce is furnished with copies of such material that are certified under oath to be true copies. As an alternative, a person may enter into a stipulation with a duly authorized official of Commerce as to the content of the material.

(e) An Administrative Subpoena, Demand for Information, or Inspection Authorization, shall include the name, title or official position of the person to be served, the evidence sought to be adduced, and its general relevance to the scope and purpose of the audit, investigation, or other inquiry. If employees or agents are to be interviewed; if books, records, documents, other writings, or information are to be produced; or if property is to be inspected; the Administrative Subpoena, Demand for Information, or Inspection Authorization will describe them with particularity.

(f) Service of documents shall be made in the following manner:

(1) Service of a Demand for Information or Inspection Authorization shall be made personally, or by Certified Mail—Return Receipt Requested at the person’s last known address. Service of an Administrative Subpoena shall be made personally. Personal service may also be made by leaving a copy of the document with someone of suitable age and discretion at the person’s last known dwelling or place of business.

(2) Service upon other than an individual may be made by serving a partner, corporate officer, or a managing or general agent authorized by appointment or by law to accept service of process. If an agent is served, a copy of
§ 700.74 Violations, penalties, and remedies.

(a) Willful violation of the provisions of Title I or Sections 705 or 707 of the Defense Production Act, the Selective Service Act and related statutes, this part, or an official action, is a crime and upon conviction, a person may be punished by fine or imprisonment, or both. The maximum penalty provided by the Defense Production Act is a $10,000 fine, or one year in prison, or both. The maximum penalty provided by the Selective Service Act and related statutes is a $50,000 fine, or three years in prison, or both.

(b) The government may also seek an injunction from a court of appropriate jurisdiction to prohibit the continuance of any violation of, or to enforce compliance with, the Defense Production Act, this regulation, or an official action.

(c) In order to secure the effective enforcement of the Defense Production Act, this regulation, and official actions, the following are prohibited (see section 704 of the Defense Production Act; see also, for example, sections 2 and 371 of Title 18, United States Code):

(1) No person may solicit, influence or permit another person to perform any act prohibited by, or to omit any act required by, the Defense Production Act, this regulation, or an official action.
(2) No person may conspire or act in concert with any other person to perform any act prohibited by, or to omit any act required by, the Defense Production Act, this regulation, or an official action.

(3) No person shall deliver any item if the person knows or has reason to believe that the item will be accepted, re-delivered, held, or used in violation of the Defense Production Act, this regulation, or an official action. In such instances, the person must immediately notify the Department of Commerce that, in accordance with this provision, delivery has not been made.

§ 700.75 Compliance conflicts.

If compliance with any provision of the Defense Production Act, the Selective Service Act and related statutes, this regulation, or an official action would prevent a person from filling a rated order or from complying with another provision of the Defense Production Act, this regulation, or an official action, the person must immediately notify the Department of Commerce for resolution of the conflict.

Subpart K—Adjustments, Exceptions, and Appeals

§ 700.80 Adjustments or exceptions.

(a) A person may submit a request to the Office of Strategic Industries and Economic Security, U.S. Department of Commerce, for an adjustment or exception on the ground that:

(1) A provision of this regulation or an official action results in an undue or exceptional hardship on that person not suffered generally by others in similar situations and circumstances; or

(2) The consequence of following a provision of this regulation or an official action is contrary to the intent of the Defense Production Act, the Selective Service Act and related statutes, or this regulation.

(b) Each request for adjustment or exception must be in writing and contain a complete statement of all the facts and circumstances related to the provision of this regulation or official action from which adjustment is sought and a full and precise statement of the reasons why relief should be provided.

(c) The submission of a request for adjustment or exception shall not relieve any person from the obligation of complying with the provision of this regulation or official action in question while the request is being considered unless such interim relief is granted in writing by the Office of Strategic Industries and Economic Security.

(d) A decision of the Office of Strategic Industries and Economic Security under this section may be appealed to the Assistant Secretary for Export Administration, U.S. Department of Commerce. (For information on the appeal procedure, see § 700.81.)

§ 700.81 Appeals.

(a) Any person who has had a request for adjustment or exception denied by the Office of Strategic Industries and Economic Security under §700.80, may appeal to the Assistant Secretary for Export Administration, U.S. Department of Commerce, who shall review and reconsider the denial.

(b) An appeal must be received by the Office of the Assistant Secretary for Export Administration, Bureau of Export Administration, U.S. Department of Commerce, Washington, D.C. 20230, Ref: DPAS, no later than 45 days after receipt of a written notice of denial from the Office of Strategic Industries and Economic Security. After this 45-day period, an appeal may be accepted at the discretion of the Assistant Secretary for Trade Administration for good cause shown.

(c) Each appeal must be in writing and contain a complete statement of all the facts and circumstances related to the action appealed from and a full and precise statement of the reasons the decision should be modified or reversed.
(d) In addition to the written materials submitted in support of an appeal, an appellant may request, in writing, an opportunity for an informal hearing. This request may be granted or denied at the discretion of the Assistant Secretary for Export Administration.

(e) When a hearing is granted, the Assistant Secretary for Export Administration may designate an employee of the Department of Commerce to conduct the hearing and to prepare a report. The hearing officer shall determine all procedural questions and impose such time or other limitations deemed reasonable. In the event that the hearing officer decides that a printed transcript is necessary, all expenses shall be borne by the appellant.

(f) When determining an appeal, the Assistant Secretary for Export Administration may consider all information submitted during the appeal as well as any recommendations, reports, or other relevant information and documents available to the Department of Commerce, or consult with any other persons or groups.

(g) The submission of an appeal under this section shall not relieve any person from the obligation of complying with the provision of this regulation or official action in question while the appeal is being considered unless such relief is granted in writing by the Assistant Secretary for Export Administration.

(h) The decision of the Assistant Secretary for Export Administration shall be made within a reasonable time after receipt of the appeal and shall be the final administrative action. It shall be issued to the appellant in writing with a statement of the reasons for the decision.

Subpart L—Miscellaneous Provisions

§700.90 Protection against claims.
A person shall not be held liable for damages or penalties for any act or failure to act resulting directly or indirectly from compliance with any provision of this regulation, or an official action, notwithstanding that such provision or action shall subsequently be declared invalid by judicial or other competent authority.

§700.91 Records and reports.
(a) Persons are required to make and preserve for at least three years, accurate and complete records of any transaction covered by this regulation (OMB control number 0694-0053) or an official action.

(b) Records must be maintained in sufficient detail to permit the determination, upon examination, of whether each transaction complies with the provisions of this regulation or any official action. However, this regulation does not specify any particular method or system to be used.

(c) Records required to be maintained by this regulation must be made available for examination on demand by duly authorized representatives of Commerce as provided in §700.71.

(d) In addition, persons must develop, maintain, and submit any other records and reports to Commerce that may be required for the administration of the Defense Production Act, the Selective Service Act and related statutes, and this regulation.

(e) Section 705(e) of the Defense Production Act provides that information obtained under this section which the President deems confidential, or with reference to which a request for confidential treatment is made by the person furnishing such information, shall not be published or disclosed unless the President determines that the withholding of this information is contrary to the interest of the national defense. Information required to be submitted to Commerce in connection with the enforcement or administration of the Act, this regulation, or an official action, is deemed to be confidential under section 705(e) of the Act and shall not be published or disclosed except as required by law.

§700.92 Applicability of this regulation and official actions.
(a) This regulation and all official actions, unless specifically stated otherwise, apply to transactions in any
§ 700.93 Communications.

All communications concerning this regulation, including requests for copies of the regulation and explanatory information, requests for guidance or clarification, and requests for adjustment or exception shall be addressed to the Office of Industrial Resource Administration, Room 3876, U.S. Department of Commerce, Washington, DC 20230, Ref: DPAS; telephone: (202) 482-3634 or FAX: (202) 482-5650.

Schedule I to Part 700—Approved Programs and Delegate Agencies

The programs listed in this schedule have been approved for priorities and allocations support under this part. They have equal preferential status. The Department of Commerce has authorized the Delegate Agencies to use this part in support of those programs assigned to them, as indicated below.

\[63 F.R. 31925, June 11, 1998\]
**APPENDIX I TO PART 700—FORM BXA-999—REQUEST FOR SPECIAL PRIORITIES ASSISTANCE**

**REQUEST FOR SPECIAL PRIORITIES ASSISTANCE**

**READ INSTRUCTIONS ON BACK PAGE**

**TYPE OR PRINT IN INK**

Submission of a completed application is required to request Special Priorities Assistance (SPA). See sections 705-50-55 of the Defense Priorities and Allocations System (DPAS) regulations (15 CFR 700). It is a criminal offense under 18 U.S.C. 1001 to make a false statement or representation to any U.S. Government agency as to any matter within its jurisdiction. All company information furnished in this application will be deemed BUSINESS CONFIDENTIAL under Sec. 705(d) of the Defense Production Act of 1945 (50 U.S.C. app. 2352(d)) which prohibits publication or disclosure of this information unless the President determines that withholding it is contrary to the interest of the national defense. The Department of Commerce will assert the appropriate Freedom of Information Act (FOIA) exemptions if such information is the subject of FOIA requests. The unauthorized publication or disclosure of such information by Government personnel is prohibited by law. Violations are subject to fine and/or imprisonment.

### 1. APPLICANT INFORMATION

<table>
<thead>
<tr>
<th>A. Name and complete address of Applicant (Applicant can be any person providing assistance - government agency, contractor, or supplier. See definition of &quot;Applicant&quot; in Footnotes section on back page of this form).</th>
</tr>
</thead>
<tbody>
<tr>
<td>B. If Applicant is not end-user Government agency, give name and complete address of Applicant's customer.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>

### 2. APPLICANT ITEM(S). If Applicant is not end-user Government agency, describe item(s) to be delivered by Applicant under its customer's contract or purchase order through the use of item(s) listed in Block 3. If known, identify Government program and end item for which these items are required. If Applicant is end-user Government agency and Block 3 item(s) are not end item, identify the end-item for which the Block 3 item(s) are required. See definition of "item" in Footnotes section on page 4 of this form.

### 3. ITEM(S) (including service) FOR WHICH APPLICANT REQUESTS ASSISTANCE

<table>
<thead>
<tr>
<th>Quantity</th>
<th>Description</th>
<th>Dollar Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Piece, units</td>
<td>include identifying information such as model or part number</td>
<td>Each quantity listed</td>
</tr>
</tbody>
</table>
4. SUPPLIER INFORMATION

a. Name and complete address of Applicant's Supplier.

Contact's name: ____________________________

Title: ____________________

Teleph  _______  FAX  _______

b. Applicant's contract or purchase order to Supplier.

Number: ____________________________

Dated: ____________________________

Priority rating: ____________________________

If Supplier is an agent or distributor, give complete producer or lower tier supplier information in Continuation Block on page 3, including purchase order number, cites, and priority rating if none, so state.

5. SHIPMENT SCHEDULE OF ITEM(S) SHOWN IN BLOCK 3

a. Applicant's original shipment/production requirement

Month Year: ____________________________

Number of units: ____________________________

b. Supplier's original shipment/production promise

Month Year: ____________________________

Number of units: ____________________________

c. Applicant's revised shipment/production requirement

Month Year: ____________________________

Number of units: ____________________________

d. Supplier's revised shipment/production promise

Month Year: ____________________________

Number of units: ____________________________

6. REASONS GIVEN BY SUPPLIER for inability to meet Applicant's required shipment or performance date(s).

7. BRIEF STATEMENT OF NEED FOR ASSISTANCE. As applicable, explain effect of delay in meeting Block 3 item(s) on achieving timely shipment of Block 2 item(s) (e.g., production line shutdowns), or the impact on program or project schedules. Describe attempts to resolve problems and give specific reasons why assistance is required. If priority rating authority is requested, please so state.

8. CERTIFICATION: I certify that the information contained in Blocks 1 - 7 of this form, and all other information attached, is correct and complete to the best of my knowledge and belief (sign signature if this form is electronically generated and transmitted - use of name is deemed certification).

Signature of Applicant's authorized official: ____________________________

Title: ____________________________

Print or type name of authorized official: ____________________________

Date: ____________________________
9. U.S. GOVERNMENT AGENCY INFORMATION

a. Name/address of cognizant sponsoring service/agency/activity
   headquarters office. Provide lower level activity, program, project,
   contract administration, or field office information in Continuation
   Block below, on duplicate of this page, or on separate sheet of paper.

b. Case reference no.

c. Government agency program or project to be supported by Block 2
   item(s). Identify and user agency if not sponsoring agency.

d. Statement of urgency of particular program or project and Applicant's part in it. Specify the extent to which failure to obtain requested assistance will adversely affect the program or project.

e. Government agency/activity actions taken to attempt resolution of problem.

f. Recommendation.

10. ENDORSEMENT by authorized Department or Agency headquarters official. (Most signature if this form is electronically generated and transmitted - use of name is deemed authorization). This endorsement is required for all Department of Defense and foreign government requests for assistance.

   Signature of authorized official
   
   Title

   Print or type name of authorized official
   
   Date

CONTINUATION BLOCK

Identify each statement with appropriate block number

96
INSTRUCTIONS FOR FILING FORM BXA-999

REQUESTS FOR SPECIAL PRIORITIES ASSISTANCE (SPA) MAY BE FILED for any reason in support of the Defense Priorities and Allocations System (DPAS), e.g., when the regular provisions are not sufficient to obtain delivery of items in time to meet urgent customer or program/project requirements; for help in locating a supplier or placing a stand order; to ensure that stand orders are receiving necessary preferential treatment by suppliers; to resolve production or delivery conflicts between or among stand orders; to verify the urgency or determine the validity of stand orders; or to request authority to use a priority rating. Requests for SPA must be sponsored by the cognizant U.S. Government agency responsible for the program or project supported by the Applicant's contract or purchase order.

REQUESTS FOR SPA SHOULD BE TIMELY AND MUST ESTABLISH:
- The urgent defense (including civil emergency, preparedness or energy program or project) need for the item(s); and that
- The Applicant has made a reasonable effort to resolve the problem.

APPLICANT MUST COMPLETE BLOCKS 1-8. SPONSORING U.S. GOVERNMENT AGENCY/ACTIVITY MUST COMPLETE BLOCKS 9-10. Sponsoring agency, if not the Department of Defense (DOD), must obtain DOD concurrence if the agency is supporting a DOD program or project. This form may be mechanically or electronically prepared and may be mailed, faxed, or electronically transmitted.

WHERE TO FILE THIS FORM:
- Private sector Applicants should file with their respective customers as follows: lower-tier suppliers file with customer/subcontractor for forwarding to subcontractor/prime contractor/subcontractor/prime vendor. Higher-tier suppliers file with prime contractor for forwarding to one of the below listed cognizant U.S. Government (DOD) agencies. Requests for SPA for Defense agencies should be filed with the Department of Defense Contract Management Area Office, phone representative, or requesting agency, program, or project office.
- Department of Energy (DOE) — File with the appropriate Field Operations Office. Requests for SPA for DOE projects must be filed with DOE headquarters in Washington, D.C.
- General Services Administration (GSA) — File with the GSA Contracting Office in Washington, D.C.
- Department of Education (ESEA) — File with the appropriate Field Operations Office. Requests for SPA for Energy Department projects must be filed with DOE headquarters in Washington, D.C.

CONTACTS FOR FURTHER INFORMATION:
- For any information related to the production or delivery of items against a specific contract or purchase order, contact the cognizant U.S. Government agency, activity, contract administration, program, project, or field office (see WHERE TO FILE above).
- If your request is denied or not approved, contact the cognizant U.S. Government agency, activity, contract administration, program, project, or field office (see WHERE TO FILE above).
- Applicants requiring priority rating authorization to obtain production or construction equipment for the purchase of stand orders or support of DOD programs or projects must file DOD Form DD 591, "Application for Priority Rating for Production or Construction Equipment" in accordance with the instructions on that form. For DOE, GSA, or ESEA programs or projects, Applicants may use this form unless the agency requires its own form.

SPECIAL INSTRUCTIONS:
- If the space in any block is insufficient to provide a clear and complete statement of the information requested, use the continuation block provided on this form or a separate sheet of paper to be attached to this form.
- Entities in Block 5 should be limited to information from a single contract or purchase order. If SPA is requested for additional contracts or purchase orders placed with a supplier for the same or similar items, information from those contracts or purchase orders may be included in one application. However, each contract or purchase order number must be identified and the quantities, priority rating, delivery requirements, etc., must be shown separately.
- If disclosure of certain information on this form is prohibited by security regulations or other security considerations, enter "classified" in the appropriate block in lieu of the restricted information.

FOOTNOTES:
1. "Item" is defined in the DPAS as any raw, in-process or manufactured material, article, commodity, supply, equipment, component, accessory, part, assembly, or product of any kind, technical information, process, or service.
2. "Applicant," as used in this form, refers to any person requiring Special Priorities Assistance and eligible for such assistance under the DPAS.
3. "Person" is defined in the DPAS to include any individual, corporation, partnership, association, any other organized group of persons, a U.S. Government agency, or any other government.

BUREAUX ESTIMATE AND REQUEST FOR COMMENT
Public reporting burden for this collection of information is estimated to average 20 minutes per response, including the time for reviewing instructions, gathering the data needed, and completing the form. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Robert Sagelstein, Director of Administration, Bureau of Export Administration, Room 8149, U.S. Department of Commerce, Washington, D.C. 20230. Other than any other provision of law, no person is compelled to respond to nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a currently valid OMB Control Number.
PART 701—REPORTING OF OFFSET AGREEMENTS IN SALES OF WEAPON SYSTEMS OR DEFENSE-RELATED ITEMS TO FOREIGN COUNTRIES OR FOREIGN FIRMS

Sec.
701.1 Purpose.
701.2 Definitions.
701.3 Applicability and scope.
701.4 Procedures.
701.5 Confidentiality.

SOURCE: 59 FR 61796, Dec. 2, 1994, unless otherwise noted.

§ 701.1 Purpose.

The Defense Production Act Amendments of 1992 require the Secretary of Commerce to promulgate regulations for U.S. firms entering into contracts for the sale of defense articles or defense services to foreign countries or foreign firms that are subject to offset agreements exceeding $5,000,000 in value to furnish information regarding such agreements. The Secretary of Commerce has designated the Bureau of Export Administration as the organization responsible for implementing this provision. The information provided by U.S. firms will be aggregated and used to determine the impact of offset transactions on the defense preparedness, industrial competitiveness, employment, and trade of the United States. Summary reports will be submitted annually to the Congress pursuant Section 309 of the Defense Production Act of 1950, as amended.

§ 701.2 Definitions.

(a) Offsets—Compensation practices required as a condition of purchase in either government-to-government or commercial sales of defense articles and/or defense services as defined by the Arms Export Control Act and the International Traffic in Arms Regulations.

(b) Military Export Sales—Exports that are either Foreign Military Sales (FMS) or commercial (direct) sales of defense articles and/or defense services as defined by the Arms Export Control Act and International Traffic in Arms Regulations.

(c) Prime Contractor—A firm that has a sales contract with a foreign entity or with the U.S. Government for military export sales.

(d) United States—Includes the 50 states, the District of Columbia, Puerto Rico, and U.S. territories.

(e) Offset Agreement—Any offset as defined above that the U.S. firm agrees to in order to conclude a military export sales contract. This includes all offsets, whether they are “best effort” agreements or are subject to penalty clauses.

(f) Offset Transaction—Any activity for which the U.S. firm claims credit for full or partial fulfillment of the offset agreement. Activities to implement offset agreements may include, but are not limited to, coproduction, licensed production, subcontractor production, overseas investment, technology transfer, countertrade, barter, counterpurchase, and buy back.

(g) Direct Offset—Contractual arrangements that involve defense articles and services referenced in the sales agreement for military exports.

(h) Indirect Offset—Contractual arrangements that involve defense goods and services unrelated to the exports referenced in the sales agreement.

§ 701.3 Applicability and scope.

(a) This rule applies to U.S. firms entering contracts for the sale of defense articles or defense services (as defined in the Arms Export Control Act and International Traffic in Arms Regulations) to a foreign country or foreign firm for which the contract is subject to an offset agreement exceeding $5,000,000 in value.

(b) This rule applies to all offset transactions completed in performance of existing offset commitments since January 1, 1993 for which offset credit of $250,000 or more has been claimed from the foreign representative, and new offset agreements entered into since that time.

§ 701.4 Procedures.

(a) To avoid double counting, firms should report only offset transactions for which they are directly responsible for reporting to the foreign customer (i.e., prime contractors should report
for their subcontractors if the subcontractors are not a direct party to the offset agreement).

(b) Reports should be delivered to the Offsets Program Manager, U.S. Department of Commerce, Office of Strategic Industries and Economic Security, Bureau of Export Administration, Room 3878, 14th Street and Pennsylvania Avenue, N.W., Washington DC 20230. The first industry reports should be submitted to the Bureau of Export Administration not later than March 15, 1995 and should cover offset transactions completed during the calendar year 1993, as well as information regarding unfulfilled offset agreements. After this initial submission, companies should provide information once yearly not later than June 15 covering the preceding calendar year. All submissions should include a point of contact (name and telephone number) and should be by a company official authorized to provide such information.

(c) Companies may submit this information in computerized spreadsheet/database format (e.g., Lotus 1-2-3, Quattro Pro, dbase IV) using a 3.5 inch 1.44 megabyte diskette, accompanied by a printed copy.

(d) Offset Transaction Reporting. (1) Reports should include an itemized list of offset transactions completed during the reporting period, including the following data elements (Estimates are acceptable when actual figures are unavailable; estimated figures should be followed by the letter “E”):
   (i) Name of Country—Country of entity purchasing the weapon system, defense item or service subject to offset.
   (ii) Name or Description of Weapon System, Defense Item, or Service Subject to Offset.
   (iii) Name of Offset Fulfilling Entity—Entity fulfilling offset transaction (including first tier subcontractors).
   (iv) Name of Offset Receiving Entity—Entity receiving benefits from offset transaction.
   (v) Offset Credit Value—Dollar value credits claimed by fulfilling entity including any intangible factors/multipliers.
   (vi) Actual Offset Value—Dollar value of the offset transaction without multipliers/intangible factors.
   (vii) Description of Offset Product/Service—Short description of the type of offset (e.g., coproduction, technology transfer, subcontract activity, training, purchase, cash payment, etc.).
   (viii) Broad Industry Category—Broad classification of the industry in which the offset transaction was fulfilled (e.g., aerospace, electronics, chemicals, industrial machinery, textiles, etc.). Firms may request a list of the Standard Industry Classification (SIC) codes to assist in identifying an appropriate industry category. Forward such requests to the Offsets Program Manager, U.S. Department of Commerce, Office of Strategic Industries and Economic Security, Bureau of Export Administration, Room 3878, 14th Street and Pennsylvania Avenue, N.W., Washington, D.C. 20230 or Fax 202-482-5650.
   (ix) Direct or Indirect Offset—Specify whether the offset transaction was direct or indirect offset.
   (x) Name of Country in Which Offset was Fulfilled—United States, purchasing country, or third country.

(2) Offset transactions of the same type (same fulfilling entity, receiving entity, and offset product/service) completed during the same reporting period may be combined.

(3) Any necessary comments or explanations relating to the above information should be footnoted and supplied on separate sheets attached to the report.

(e) Reporting on Offset Agreements Entered into. (1) In addition to the itemized list of offset transactions completed during the year as specified above, U.S. firms should provide information regarding new offset agreements entered into during the year, including the following elements:
   (i) Name of Country—Country of entity purchasing the weapon system, defense item or service subject to offset;
   (ii) Name or Description of Weapon System, Defense Item, or Service Subject to Offset;
   (iii) Names/Titles of Signatories to the Offset Agreement;
   (iv) Value of Export Sale Subject to Offset (approximate);
   (v) Total Value of the Offset Agreement;
§ 701.5

(vi) Term of Offset Agreement (months);
(vii) Description of Performance Measures—(e.g., “Best Efforts,” Liquidated Damages, (describe)).

(2) [Reserved]

§ 701.5 Confidentiality.

(a) As provided by § 309(c) of the Defense Production Act of 1950, as amended, BXA shall not publicly disclose the information it receives pursuant to this part, unless the firm furnishing the information subsequently specifically authorizes public disclosure.

(b) Public disclosure must be authorized in writing by an official of the firm competent to make such an authorization.

(c) Nothing in this provision shall prevent the use of data aggregated from information provided pursuant to this part in the summary report to the Congress described in § 701.1.

PARTS 702–704 [RESERVED]

PART 705—EFFECT OF IMPORTED ARTICLES ON THE NATIONAL SECURITY

Sec.
705.1 Definitions.
705.2 Purpose.
705.3 Commencing an investigation.
705.4 Criteria for determining effect of imports on the national security.
705.5 Request or application for an investigation.
705.6 Confidential information.
705.7 Conduct of an investigation.
705.8 Public hearings.
705.9 Emergency action.
705.10 Report of an investigation and recommendation.
705.11 Determination by the President and adjustment of imports.
705.12 Disposition of an investigation and report to the Congress.

§ 705.4 Criteria for determining effect of imports on the national security.

(a) To determine the effect on the national security of the imports of the article under investigation, the Department shall consider the quantity of the article in question or other circumstances related to its import. With regard for the requirements of national security, the Department shall also consider the following:

(1) Domestic production needed for projected national defense requirements;
(2) The capacity of domestic industries to meet projected national defense requirements;
(3) The existing and anticipated availabilities of human resources,
products, raw materials, production equipment and facilities, and other supplies and services essential to the national defense;

(4) The growth requirements of domestic industries to meet national defense requirements and the supplies and services including the investment, exploration and development necessary to assure such growth; and

(5) Any other relevant factors.

(b) In recognition of the close relationship between the strength of our national economy and the capacity of the United States to meet national security requirements, the Department shall also, with regard for the quantity, availability, character and uses of the imported article under investigation, consider the following:

(1) The impact of foreign competition on the economic welfare of any domestic industry essential to our national security;

(2) The displacement of any domestic products causing substantial unemployment, decrease in the revenues of government, loss of investment or specialized skills and productive capacity, or other serious effects; and

(3) Any other relevant factors that are causing or will cause a weakening of our national economy.

§ 705.5 Request or application for an investigation.

(a) A request or application for an investigation shall be in writing. The original and 12 copies shall be filed with the Director, Office of Strategic Industries and Economic Security, Room 3876, U.S. Department of Commerce, Washington, DC 20230.

(b) When a request, application or motion is under investigation, or when an investigation has been completed pursuant to § 705.10 of this part, any subsequently filed request or application concerning imports of the same or related article that does not raise new or different issues may be either consolidated with the investigation in progress as provided in § 705.7(e) of this part, or rejected. In either event, an explanation for taking such action shall be promptly given to the applicant. If the request or application is rejected, it will not be returned unless requested by the applicant.

(c) Requests or applications shall describe how the quantity, availability, character, and uses of a particular imported article, or other circumstances related to its import, affect the national security, and shall contain the following information to the fullest extent possible:

(1) Identification of the applicant;

(2) A precise description of the article;

(3) Description of the domestic industry affected, including pertinent information regarding companies and their plants, locations, capacity and current output of the industry;

(4) Pertinent statistics on imports and domestic production showing the quantities and values of the article;

(5) Nature, sources, and degree of the competition created by imports of the article;

(6) The effect that imports of the article may have upon the restoration of domestic production capacity in the event of national emergency;

(7) Employment and special skills involved in the domestic production of the article;

(8) Extent to which the national economy, employment, investment, specialized skills, and productive capacity is or will be adversely affected;

(9) Revenues of Federal, State, or local Governments which are or may be adversely affected;

(10) National security supporting uses of the article including data on applicable contracts or sub-contracts, both past and current; and

(11) Any other information or advice relevant and material to the subject matter of the investigation.

(d) Statistical material presented should be, if possible, on a calendar-year basis for sufficient periods of time to indicate trends. Monthly or quarterly data for the latest complete years should be included as well as any other breakdowns which may be pertinent to show seasonal or short-term factors.

§ 705.6 Confidential information.

(a) Any information or material which the applicant or any other party desires to submit in confidence at any
§ 705.7 Conduct of an investigation.

(a) If the Department determines that it is appropriate to afford interested parties an opportunity to present information and advice relevant and material to an investigation, a public notice shall be published in the Federal Register soliciting from any interested party written comments, opinions, data, information or advice relative to the investigation. This material shall be submitted as directed within a reasonable time period to be specified in the notice. All material shall be submitted with 6 copies. In addition, public hearings may be held pursuant to § 705.8 of this part.

(b) All requests and applications filed and all material submitted by interested parties, except information on material that is classified or determined to be confidential as provided in § 705.6 of this part, will be available for public inspection and copying in the Bureau of Export Administration Freedom of Information Records Inspection Facility, Room H-4525, U.S. Department of Commerce, Washington, DC 20230, in accordance with regulations published in part 4 of title 15, Code of Federal Regulations.

(c) Further information may be requested by the Department from other sources through the use of questionnaires, correspondence, or other appropriate means.

(d) The Department shall, as part of an investigation, seek information and advice from, and consult with, appropriate officers of the United States or their designees, as shall be determined. The Department shall also consult with the Secretary of Defense regarding the methodological and policy questions raised in the investigation. Upon the request of the Secretary, the Secretary of Defense shall provide the Secretary with an assessment of the defense requirements of the article in question. Communications received from agencies of the U.S. government or foreign governments will not be made available for public inspection.

(e) Any request or application that is filed while an investigation is in progress, concerning imports of the same or related article and raising similar issues, may be consolidated with the request, application or motion that initiated the investigation.

§ 705.8 Public hearings.

(a) If it is deemed appropriate by the Department, public hearings may be held to elicit further information.

(1) A notice of hearing shall be published in the Federal Register describing the date, time, place, the subject matter of each hearing and any
Bureau of Export Administration, Commerce § 705.11

other information relevant to the conduct of the hearing. The name of a person to contact for additional information or to request time to speak at the hearing shall also be included. Public hearings may be held in more than one location.

(2) Hearings shall be open to the public unless national security classified information will be presented. In that event the presiding officer at the hearing shall close the hearing, as necessary, to all persons not having appropriate security clearances or not otherwise authorized to have access to such information. If it is known in sufficient time prior to the hearing that national security classified information will be presented the notice of hearing published in the FEDERAL REGISTER shall state that national security classified information will be presented and that the hearing will be open only to those persons having appropriate security clearances or otherwise specifically authorized to have access to such information.

(b) Hearings shall be conducted as follows:

(1) The Department shall appoint the presiding officer;

(2) The presiding officer shall determine all procedural matters during the hearing;

(3) Interested parties may appear, either in person or by representation, and produce oral or written information relevant and material to the subject matter of the investigation;

(4) Hearings will be fact-finding proceedings without formal pleadings or adverse parties. Formal rules of evidence will not apply;

(5) After a witness has testified, the presiding officer may question the witness. Questions submitted to the presiding officer in writing by any interested party may, at the discretion of the presiding officer, be posed to the witness. No cross examination of any witness by a party shall be allowed.

(6) Each hearing will be stenographically reported. Transcripts of the hearing, excluding any national security classified information, may be purchased from the Department at actual cost of duplication, and will be available for public inspection in the Bureau of Export Administration Freedom of Information Records Inspection Facility, Room H–4525, U.S. Department of Commerce, Washington, DC 20230.

§ 705.12 Disposition of an investigation and report to the Congress.

(a) Upon the disposition of each request, application, or motion made under this part, a report of such disposition shall be submitted by the Secretary to the Congress and published in the Federal Register.

(b) As required by Section 232(e) of the Trade Expansion Act of 1962, as amended (19 U.S.C. 1862(c)), the President shall submit to the Congress an annual report on the operation of this part.

[63 FR 31623, June 10, 1998]

PARTS 706–709 [RESERVED]
SUBCHAPTER B—CHEMICAL WEAPONS CONVENTION REGULATIONS

PART 710—GENERAL INFORMATION AND OVERVIEW OF THE CHEMICAL WEAPONS CONVENTION REGULATIONS (CWCR)

§ 710.1 Definitions of terms used in the Chemical Weapons Convention Regulations (CWCR).

The following are definitions of terms used in the CWCR (parts 710 through 722 of this subchapter, unless otherwise noted):

By-product. Means any chemical substance or mixture produced without a separate commercial intent during the manufacture, processing, use or disposal of another chemical substance or mixture.

Chemical Weapon. Means the following, together or separately:

(1) A toxic chemical and its precursors, except where intended for purposes not prohibited under the Chemical Weapons Convention (CWC), provided that the type and quantity are consistent with such purposes;

(2) A munition or device, specifically designed to cause death or other harm through the toxic properties of those toxic chemicals specified in paragraph (1) of this definition, which would be released as a result of the employment of such munition or device; or

(3) Any equipment specifically designed for use directly in connection with the employment of munitions or devices specified in paragraph (2) of this definition.

Consumption. Means the conversion into another chemical via a chemical reaction. Unreacted material must be accounted for as either waste or as recycled starting material.

Declaration or report form. Means a multi-purpose form due to BXA regarding activities involving Schedule 1, Schedule 2, Schedule 3, or unscheduled discrete organic chemicals. Declaration forms will be used by facilities that have data declaration obligations under the CWCR and are “declared” facilities whose facility-specific information will be transmitted to the OPCW. Reporting forms will be used by entities that are “undeclared” facilities or trading companies that have limited reporting requirements for only export and import activities under the CWCR and whose facility-specific information will not be transmitted to the OPCW. Information from declared facilities, undeclared facilities and trading companies will also be used to compile U.S. national aggregate figures on the production, processing, consumption, export and import of specific chemicals.
See also related definitions of declared facility, undeclared facility and report.

Declared facility or plant site. Means a facility or plant site required to complete data declarations of activities involving Schedule 1, Schedule 2, Schedule 3, or unscheduled discrete organic chemicals above specified threshold quantities. Only certain declared facilities and plant sites are subject to routine inspections under the CWCR. Plant sites that produced either Schedule 2 or Schedule 3 chemicals for CW purposes at any time since January 1, 1946, are also "declared" plant sites. However, such plant sites are not subject to routine inspection if they are not subject to declaration requirements because of past production, processing or consumption of Scheduled or unscheduled discrete organic chemicals above specified threshold quantities.

Discrete organic chemical. Means any chemical belonging to the class of chemical compounds consisting of all compounds of carbon, except for its oxides, sulfides, and metal carbonates, identifiable by chemical name, by structural formula, if known, and by Chemical Abstract Service registry number, if assigned.

Domestic transfer. Means, with regard to declaration requirements for Schedule 1 and chemicals under the CWCR, any movement of any amount of Schedule 1 chemical outside the geographical boundary of a facility in the United States to another destination in the United States, for any purpose. Domestic transfer includes movement between two divisions of one company or a sale from one company to another. Note that any movement to or from a facility outside the United States is considered an export or import for reporting purposes, not a domestic transfer.

EAR. Means the Export Administration Regulations (15 CFR parts 730 through 799).

Explosive. Means a chemical (or a mixture of chemicals) that is included in Class 1 of the United Nations Organization hazard classification system.

Facility. Means any plant site, plant or unit.

Facility agreement. Means a written agreement or arrangement between a State Party and the Organization relating to a specific facility subject to on-site verification pursuant to Articles IV, V, and VI of the Convention.

Host Team. Means the U.S. Government team that accompanies the inspection team from the Organization for the Prohibition of Chemical Weapons during a CW inspection for which the regulations in this subchapter apply.

Host Team Leader. Means the representative from the Department of Commerce who heads the U.S. Government team that accompanies the Inspection Team during a CW inspection for which the regulations in this subchapter apply.

Hydrocarbon. Means any organic compound that contains only carbon and hydrogen.

Impurity. Means a chemical substance unintentionally present with another chemical substance or mixture.

Inspection Team. Means the group of inspectors and inspection assistants assigned by the Director-General of the Technical Secretariat to conduct a particular inspection.

ITAR. Means the International Traffic in Arms Regulations (22 CFR parts 120 through 130).

Organization for the Prohibition of Chemical Weapons (OPCW). Means the international organization, located in The Hague, the Netherlands, that administers the CWC.

Person. Means any individual, corporation, partnership, firm, association, trust, estate, public or private institution, any State or any political subdivision thereof, or any political entity within a State, any foreign government or nation or any agency, instrumentality or political subdivision of any such government or nation, or other entity located in the United States.

Plant. Means a relatively self-contained area, structure or building containing one or more units with auxiliary and associated infrastructure, such as:

1. Small administrative area;
2. Storage/handling areas for feedstock and products;
3. Effluent/waste handling/treatment area;
4. Control/analytical laboratory;
(5) First aid service/related medical section; and
(6) Records associated with the movement into, around, and from the site, of declared chemicals and their feedstock or product chemicals formed from them, as appropriate.

Plant site. Means the local integration of one or more plants, with any intermediate administrative levels, which are under one operational control, and includes common infrastructure, such as:
(1) Administration and other offices;
(2) Repair and maintenance shops;
(3) Medical center;
(4) Utilities;
(5) Central analytical laboratory;
(6) Research and development laboratories;
(7) Central effluent and waste treatment area; and
(8) Warehouse storage.

Precursor. Means any chemical reactant which takes part, at any stage in the production, by whatever method, of a toxic chemical. The term includes any key component of a binary or multicomponent chemical system.

Processing. Means a physical process such as formulation, extraction and purification in which a chemical is not converted into another chemical.

Production. Means the formation of a chemical through chemical reaction.

Purposes not prohibited by the CWC. Means the following:
(1) Any peaceful purpose related to an industrial, agricultural, research, medical or pharmaceutical activity or other activity;
(2) Any purpose directly related to protection against toxic chemicals and to protection against chemical weapons;
(3) Any military purpose of the United States that is not connected with the use of a chemical weapon and that is not dependent on the use of the toxic or poisonous properties of the chemical weapon to cause death or other harm; or
(4) Any law enforcement purpose, including any domestic riot control purpose and including imposition of capital punishment.

Report. Means information due to BXA on exports and imports of Schedule 1, Schedule 2 or Schedule 3 chemicals above applicable thresholds. Such information is included in the national aggregate declaration transmitted to the OPCW. Facility-specific information is not included in the national aggregate declaration. Note: This definition does not apply to parts 719 and 720 (see § 719.1) of this subchapter.

Schedules of Chemicals. Means specific lists of toxic chemicals, groups of chemicals, and precursors contained in the CWC. See Supplements No. 1 to parts 712 through 714 of this subchapter.

State Party. Means a country for which the CWC is in force. See Supplement No. 1 to this part.

Storage. For purposes of Schedule 1 chemical reporting, means any quantity that is not accounted for under the categories of production, export, import, consumption or domestic transfer.

Synthesis. Means production of a chemical from its reactants.

Technical Secretariat. Means the organ of the OPCW charged with carrying out administrative and technical support functions for the OPCW, including carrying out the verification measures delineated in the CWC.

Toxic Chemical. Means any chemical which, through its chemical action on life processes, can cause death, temporary incapacitation, or permanent harm to humans or animals. The term includes all such chemicals, regardless of their origin or of their method of production, and regardless of whether they are produced in facilities, in munitions, or elsewhere. Toxic chemicals that have been identified for the application of verification measures are in schedules contained in Supplements No. 1 to parts 712 through 714 of this subchapter.

Trading company. Means any person involved in the export and/or import of scheduled chemicals in amounts greater than specified thresholds, but not in the production, processing or consumption of such chemicals in amounts greater than threshold amounts requiring declaration. If such persons exclusively export or import scheduled chemicals in amounts greater than specified thresholds, they are subject to reporting requirements but are not subject to routine inspections.
§ 710.2 Scope of the CWCR.

The Chemical Weapons Convention Regulations (parts 710 through 722 of this subchapter), or CWCR, implement certain obligations of the United States under the Convention on the Prohibition of the Development, Production, Stockpiling and Use of Chemical Weapons and on Their Destruction, known as the CWC or Convention.

(a) Persons and facilities subject to the CWCR. (1) The CWCR declaration, reporting, and inspection requirements apply to all persons and facilities located in the United States, except U.S. Government facilities as follows:

(i) Department of Defense facilities;

(ii) Department of Energy facilities; and

(iii) Facilities of other U.S. Government agencies that notify the USNA of their decision to be excluded from the CWCR.

(2) For purposes of this subchapter, “United States Government facilities” are those facilities owned and operated by a U.S. Government agency (including those operated by contractors to the agency), and those facilities leased to and operated by a U.S. Government agency (including those operated by contractors to the agency). “United States Government facilities” does not include facilities owned by a U.S. Government agency and leased to a private...
company or other entity such that the private company or entity may independently decide for what purposes to use the facilities.

(b) Activities subject to the CWCR. The CWCR compel data declarations and reports from facilities subject to the CWCR (parts 710 through 722 of this subchapter) on activities, including production, processing, consumption, exports and imports, involving chemicals further described in parts 712 through 715 of this subchapter. These regulations do not apply to activities involving inorganic chemicals other than those listed in the Schedules of Chemicals or to other specifically exempted unscheduled discrete organic chemicals. In addition, these regulations set forth procedures for routine inspections of “declared” facilities by teams of international inspectors in part 716 of this subchapter, and set forth clarification procedures and procedures for challenge inspections (see part 717) that could be requested at any facility or location in the United States subject to the CWCR. Finally, the CWCR restrict certain imports of Schedule 1 and 2 chemicals into the United States from non-States Parties and prohibit imports of Schedule 1 chemicals except for research, medical, pharmaceutical, or protective purposes.

§ 710.4 Overview of scheduled chemicals and examples of affected industries.

The following provides examples of the types of industries that may be affected by the CWCR (parts 710 through 722 of this subchapter). These examples are not exhaustive, and you should refer to parts 712 through 715 of this subchapter to determine your obligations.

(a) Schedule 1 chemicals are listed in Supplement No. 1 to part 712 of this subchapter. Schedule 1 chemicals have little or no use in industrial and agricultural industries, but may have limited use for research, pharmaceutical, medical, public health, or protective purposes.

(b) Schedule 2 chemicals are listed in Supplement No. 1 to part 713 of this subchapter.
subchapter. Although Schedule 2 chemicals may be useful in the production of chemical weapons, they also have legitimate uses in areas such as:

1. Flame retardant additives and research;
2. Dye and photographic industries (e.g., printing ink, ball point pen fluids, copy mediums, paints, etc.);
3. Medical and pharmaceutical preparation (e.g., anticholinergics, arsenicals, tranquilizer preparations);
4. Metal plating preparations;
5. Epoxy resins; and
6. Insecticides, herbicides, fungicides, defoliants, and rodenticides.

(c) Schedule 3 chemicals are listed in Supplement No. 1 to part 714 of this subchapter. Although Schedule 3 chemicals may be useful in the production of chemical weapons, they also have legitimate uses in areas such as:

1. The production of:
   i. Resins;
   ii. Plastics;
   iii. Pharmaceuticals;
   iv. Pesticides;
   v. Batteries;
   vi. Cyanic acid;
   vii. Toiletries, including perfumes and scents;
   viii. Organic phosphate esters (e.g., hydraulic fluids, flame retardants, surfactants, and sequestering agents); and
2. Leather tannery and finishing supplies.
(d) Unscheduled discrete organic chemicals are used in a wide variety of commercial industries, and include acetone, benzoyl peroxide and propylene glycol.

§ 710.5 Authority.
The CWCR (parts 710 through 722 of this subchapter) implement certain provisions of the Chemical Weapons Convention under the authority of the Chemical Weapons Convention Implementation Act of 1998 (Act), the National Emergencies Act, the International Emergency Economic Powers Act (IEEPA), as amended, and the Export Administration Act of 1979, as amended, by extending verification and trade restriction requirements under Article VI and related parts of the Verification Annex of the Convention to U.S. persons. In Executive Order 13128 of June 25, 1999, the President delegated authority to the Department of Commerce to promulgate regulations to implement the Act, and consistent with the Act, to carry out appropriate functions not otherwise assigned in the Act but necessary to implement certain reporting, monitoring and inspection requirements of the Convention and the Act.

§ 710.6 Relationship between the Chemical Weapons Convention Regulations and the Export Administration Regulations.
Certain obligations of the U.S. government under the CWC pertain to exports. These obligations are implemented in the Export Administration Regulations (EAR) (15 CFR parts 730 through 799) and the International Traffic in Arms Regulations (ITAR) (22 CFR parts 120 through 130). See in particular § 742.18 and part 745 of the EAR, and Export Control Classification Numbers 1C350, 1C351 and 1C355 of the Commerce Control List (Supplement No. 1 to part 774 of the EAR).

SUPPLEMENT NO. 1 TO PART 710—STATES PARTIES TO THE CONVENTION ON THE PROHIBITION OF THE DEVELOPMENT, PRODUCTION, STOCKPILING, AND USE OF CHEMICAL WEAPONS AND ON THEIR DESTRUCTION

PART 711—GENERAL INFORMATION REGARDING DECLARATION, REPORTING AND NOTIFICATION REQUIREMENTS

Sec.

711.1 Overview of declaration, reporting, and notification requirements.

711.2 Who submits declarations, reports, and notifications.

711.3 Assistance in determining your obligations.

711.4 Declaration and reporting of activities occurring prior to December 30, 1999.

711.5 Numerical precision of submitted data.

711.6 Where to obtain forms.

Source: 64 FR 73768, Dec. 30, 1999, unless otherwise noted.
§ 711.1 Overview of declaration, reporting, and notification requirements.

Parts 712 through 715 of the CWCR (parts 710 through 722 of this subchapter) describe the declaration, notification and reporting requirements for Schedules 1, 2 and 3 chemicals and for unscheduled discrete organic chemicals (UDOCs). For each type of chemical, the Convention requires an initial declaration and subsequent annual declarations. If, after reviewing parts 712 through 715 of this subchapter, you determine that you have declaration, notification or reporting requirements, you may obtain the appropriate forms by contacting the Bureau of Export Administration (see § 711.6).

§ 711.2 Who submits declarations, reports, and notifications.

The owner, operator, or senior management official of a facility subject to declaration, report, or notification requirements under the CWCR (parts 710 through 722 of this subchapter) is responsible for the submission of all required documents in accordance with all applicable provisions of the CWCR.

§ 711.3 Assistance in determining your obligations.

(a) Determining if your chemical is subject to declaration, reporting or notification requirements.

(1) If you need assistance in determining if your chemical is classified as a Schedule 1, Schedule 2, or Schedule 3 chemical, or is an unscheduled discrete organic chemical, submit your written request for a chemical determination to BXA. Such requests may be faxed to (703) 235-1481, e-mailed to cdr@cwc.gov, or mailed to Information Technology Team, Bureau of Export Administration, U.S. Department of Commerce, 1555 Wilson Boulevard, Suite 710, Arlington, Virginia 22209-2405. Your request should include the following information:

(i) Date of request;
(ii) Company name and complete street address;
(iii) Point of contact;
(iv) Phone and fax number of contact;
(v) E-mail address of contact, if you want an acknowledgment of receipt sent via e-mail;
(vi) Chemical Name;
(vii) Structural formula of the chemical, if the chemical is not specifically identified by name and chemical abstract service registry number in Supplements No. 1 to parts 712 through 714 of the CWCR; and
(viii) Chemical Abstract Service registry number, if assigned.

(b) Other inquiries. If you need assistance in interpreting the provisions of this subchapter or need assistance with other CWC-related issues, and you require a response from BXA in writing, submit a detailed request to BXA that explains your question, issue, or request. Send the request to the address or fax included in paragraph (a) of this section, or e-mail the request to cwcqa@cwc.gov.

(c) BXA response to your request. BXA will respond in writing to your chemical determination request submitted under paragraph (a) of this section within 10 working days of receipt of the request. BXA will respond to other inquiries about industry obligations under the CWCR in a timely manner.

(d) Other BXA contact information. (1) Declaration and report requirements. For questions on declaration or report requirements, or help in completing forms, you may also contact BXA’s Information Technology Team (ITT) by phone at (703) 235-1335.
§ 712.1 Round to zero rule that applies to activities involving Schedule 1 chemicals.

(a) See §711.6 of this subchapter for information on obtaining the forms you will need to declare and report activities involving Schedule 1 chemicals.

(b) Facilities that produce, export or import mixtures containing less than 0.5% aggregate quantities of Schedule 1 chemicals as unavoidable by-products or impurities may round to zero and are not subject to the provisions of this part.
§ 712.2 Prohibitions involving imports of Schedule 1 chemicals.

(a) You may not import any Schedule 1 chemical unless:

1. The import is from a State Party;
2. The import is for research, medical, pharmaceutical, or protective purposes;
3. The import is in types and quantities strictly limited to those that can be justified for such purposes; and
4. You have notified BXA 45 calendar days prior to the import pursuant to § 712.5.

(b)(1) The provisions of paragraph (a) of this section do not apply to the retention, ownership, possession, transfer, or receipt of a Schedule 1 chemical by a department, agency, or other entity of the United States, or by a person described in paragraph (b)(2) of this section, pending destruction of the Schedule 1 chemical;

2. A person referred to in paragraph (b)(1) of this section is:
   (i) Any person, including a member of the Armed Forces of the United States, who is authorized by law or by an appropriate officer of the United States to retain, own, possess, transfer, or receive the Schedule 1 chemical;
   (ii) In an emergency situation, any otherwise non-culpable person if the person is attempting to seize or destroy the Schedule 1 chemical.

NOTE TO §712.2: For specific provisions relating to the prior notification of exports of all Schedule 1 chemicals, see §742.18 of the Export Administration Regulations (EAR) (15 CFR parts 730 through 799). For specific provisions relating to license requirements for exports of Schedule 1 chemicals, see §§742.2 and 742.18 of the EAR for Schedule 1 chemicals subject to the jurisdiction of the Department of Commerce and see the International Traffic in Arms Regulations (22 CFR parts 120 through 130) for Schedule 1 chemicals subject to the jurisdiction of the Department of State.

§ 712.3 Initial and annual declaration requirements for facilities engaged in the production of Schedule 1 chemicals for purposes not prohibited by the CWC.

(a) Declaration requirements. (1) Initial declaration. You must complete the forms specified in paragraph (b)(1) of this section, providing a current technical description of your facility or its relevant parts, if you produced Schedule 1 chemicals at your facility in excess of 100 grams aggregate in any one of the calendar years 1997, 1998, or 1999. Note: Do not include production data in your initial declaration. Such information should be included in your annual declaration on past activities. See paragraph (a)(2) of this section.

2. Annual declaration on past activities. You must complete the forms specified in paragraph (b)(2) of this section if you produced Schedule 1 chemicals in the previous calendar year, beginning with calendar year 1997. As a declared Schedule 1 facility, in addition to declaring the production of each Schedule 1 chemical that comprises your aggregate production of Schedule 1 chemicals, you must also declare the total amount of each Schedule 1 chemical used (consumed) and stored at your facility, and domestically transferred from your facility during the previous calendar year, whether or not you produced that Schedule 1 chemical at your facility.

3. Annual declaration on anticipated activities. You must complete the forms specified in paragraph (b)(3) of this section if you anticipate that you will produce at your facility more than 100 grams aggregate of Schedule 1 chemicals in the next calendar year. If you are not already a declared facility, you must complete an initial declaration (see paragraph (a)(1) of this section) 200 calendar days before commencing operations or increasing production which will result in production of more than 100 grams aggregate of Schedule 1 chemicals (see §712.4).

(b) Declaration forms to be used. (1) Initial declaration. (i) You must complete the Certification Form, Form 1-1 and Form A if you produced at your facility in excess of 100 grams aggregate of Schedule 1 chemicals in calendar year
§ 712.4 New Schedule 1 production facility.

(a) Establishment of a new Schedule 1 production facility. (1) If your facility was not declared under §712.3 in a previous calendar year, and you intend to begin production of Schedule 1 chemicals at your facility in quantities greater than 100 grams aggregate per year for research, medical, or pharmaceutical purposes, you must provide an initial declaration (a current detailed technical description of your facility) to BXA at least 200 calendar days in advance of commencing such production. Such facilities are considered
"new Schedule 1 production facilities" and are subject to an initial inspection within 200 calendar days of submitting an initial declaration.

(2) New Schedule 1 production facilities that submit an initial declaration pursuant to paragraph (a)(1) of this section are considered approved Schedule 1 production facilities for purposes of the CWC, unless otherwise notified by BXA within 30 days of receipt by BXA of that initial declaration.

(b) Types of declaration forms required.
If your new Schedule 1 production facility will produce in excess of 100 grams aggregate of Schedule 1 chemicals, you must complete the Certification Form, Form 1-1 and Form A. You must also provide a detailed technical description of the new facility or its relevant parts, including a detailed diagram of the declared areas in the facility, and an inventory of equipment in the declared areas.

(c) Two hundred days after a new Schedule 1 production facility submits its initial declaration, it is subject to the annual declaration requirements of §712.3(a)(2) and (a)(3).

§712.5 Advance notification and annual report of all exports and imports of Schedule 1 chemicals to, or from, other States Parties.

Pursuant to the Convention, the United States is required to notify the OPCW not less than 30 days in advance of every export or import of a Schedule 1 chemical, in any quantity, to or from another State Party. In addition, the United States is required to provide a report of all exports and imports of Schedule 1 chemicals to or from other States Parties during each calendar year. If you plan to export or import any quantity of a Schedule 1 chemical from or to your declared facility, undeclared facility or trading company, you must notify BXA in advance of the export or import and complete an annual report of exports and imports that actually occurred during the previous calendar year. The United States will transmit to the OPCW the advance notifications and a detailed annual declaration of each actual export or import of a Schedule 1 chemical from/to the United States. Note that the notification and annual report requirements of this section do not relieve you of any requirement to obtain a license from the Department of Commerce for the export of Schedule 1 chemicals subject to the Export Administration Regulations (15 CFR parts 730 through 799) or from the Department of State for the export of Schedule 1 chemicals subject to the International Traffic in Arms Regulations (22 CFR parts 120 through 130). Only facilities that produce in excess of 100 grams aggregate of Schedule 1 chemicals annually are "declared" facilities and are subject to routine inspections pursuant to part 716 of this subchapter.

(a) Advance notification of exports and imports. (1) You must notify BXA at least 45 calendar days prior to exporting or importing any quantity of a Schedule 1 chemical listed in Supplement No. 1 to this part to or from another State Party. Note that notifications for exports may be sent to BXA prior to or after submission of a license application to BXA for Schedule 1 chemicals subject to the EAR and controlled under ECCNs 1C350 or 1C351 or to the Department of State for Schedule 1 chemicals controlled under the ITAR. Such notices must be submitted separately from license applications.

(i) Notifications should be on company letterhead or must clearly identify the reporting entity by name of company, complete address, name of contact person and telephone and fax numbers, along with the following information:
(A) Chemical name;
(B) Structural formula of the chemical;
(C) Chemical Abstract Service (CAS) Registry Number;
(D) Quantity involved in grams;
(E) Planned date of export or import;
(F) Purpose (end-use) of export or import (i.e., research, medical, pharmaceutical, or protective purpose);
(G) Name(s) of exporter and importer;
(H) Complete street address(es) of exporter and importer;
(I) U.S. export license or control number, if known; and
Bureau of Export Administration, Commerce § 712.6

(i) Company identification number, once assigned by BXA.
(ii) Send the notification by fax to (703) 235-1481 or to the following address for mail and courier deliveries:

Information Technology Team, Bureau of Export Administration, Department of Commerce, 1555 Wilson Boulevard, Suite 710, Arlington, VA 22209-2405, Attn: “Advance Notification of Schedule 1 Chemical [Export] [Import].”

(iii) Upon receipt of the notification, BXA will inform the exporter of the earliest date the shipment may occur under the notification procedure. To export the Schedule 1 chemical subject to an export license requirement either under the EAR or the ITAR, the exporter must have applied for and been granted a license (see §§ 742.2 and 742.18 of the EAR, or the ITAR at 22 CFR parts 120 through 130).

(b) Annual report requirements for exports and imports of Schedule 1 chemicals. Any person subject to the CWCR that exported or imported any quantity of Schedule 1 chemical to or from another State Party during the previous calendar year, beginning with calendar year 1997, has a reporting requirement under this section.

(i) Annual report on exports and imports. Declared and undeclared facilities, trading companies, and any other person subject to the CWCR that exported or imported any quantity of Schedule 1 chemical to or from another State Party during the previous calendar year, beginning with calendar year 1997, must submit an annual report on exports and imports.

Note to paragraph (b)(1): The U.S. Government will not submit to the OPCW company-specific information relating to the export or import of Schedule 1 chemicals contained in reports. The U.S. Government will add all export and import information contained in reports to establish the U.S. national aggregate declaration on exports and imports.

(ii) Report forms to submit. (i) Declared Schedule 1 facilities. (A) If your facility declared production of a Schedule 1 chemical and you also exported or imported any amount of that same Schedule 1 chemical, you may report the export or import by:

(1) Submitting, along with your declaration, Form 1-3 for that same Schedule 1 chemical to be reported. Attach Form A, as appropriate; Form B is optional; or

(2) Submitting, separately from your declaration, a Certification Form, Form 1-1, and a Form 1-3 for each Schedule 1 chemical to be reported. Attach Form A, as appropriate; Form B is optional.

(B) If your facility declared production of a Schedule 1 chemical and exported or imported any amount of a different Schedule 1 chemical, you may report the export or import by:

(1) Submitting, along with your declaration, a Form 1-3 for each Schedule 1 chemical to be reported. Attach Form A, as appropriate; Form B is optional; or

(2) Submitting, separately from your declaration, a Certification Form, Form 1-1, and a Form 1-3 for each Schedule 1 chemical to be reported. Attach Form A, as appropriate; Form B is optional.

(ii) If you are an undeclared facility, trading company, or any other person subject to the CWCR, and you exported or imported any amount of a Schedule 1 chemical, you must submit a Certification Form, Form 1-1, and a Form 1-3 for each Schedule 1 chemical to be reported. Attach Form A, as appropriate; Form B is optional.

(c) Paragraph (a) of this section does not apply to the activities and persons set forth in § 712.2(b).

§ 712.6 Frequency and timing of declarations, reports and notifications.

Declarations, reports and notifications required under this part must be postmarked by the appropriate date identified in Table 1 of this section. Required declarations, reports and notifications include:

(a) Initial declaration (technical description);

(b) Annual declaration on past activities (production during the previous calendar year, beginning with 1997);

(c) Annual report on exports and imports from trading companies, facilities and other persons (during the previous calendar year, beginning with 1997);
§ 712.7 15 CFR Ch. VII (1–1–00 Edition)

(d) Annual declaration on anticipated activities (production in the next calendar year, beginning in calendar year 2000 for production anticipated for calendar year 2001);

e) Advance notification of any export to or import from another State Party; and

(f) Initial declaration of a new Schedule 1 production facility.

TABLE 1 TO § 712.6.—DEADLINES FOR SUBMISSION OF SCHEDULE 1 DECLARATIONS

<table>

<tr>
<th>Declarations and notifications</th>
<th>Applicable forms</th>
<th>Due dates</th>
</tr>
</thead>
<tbody>
<tr>
<td>Annual Declaration on Anticipated Activities (next calendar year).</td>
<td>Certification, 1–1, 1–4, A (as appropriate), B (optional).</td>
<td>August 3 of each year prior to the calendar year in which anticipated activities will take place, beginning in calendar year 2000.</td>
</tr>
</tbody>
</table>

Advance Notification of any export to or import from another State Party. Initial Declaration of a new Schedule 1 facility. Notify on letterhead. See § 712.5 of this subchapter. Certification, 1–1, A (as appropriate), B (optional). 45 calendar days prior to the export or import. 200 calendar days before commencing such production.

§ 712.7 Amended declaration or report.

(a) You must submit an amended declaration or report for changes to previously submitted information on chemicals, activities and end-use purposes or the addition of new chemicals, activities and end-use purposes.

(b) For declared Schedule 1 facilities, changes that may affect verification activities, such as changes of owner or operator, company name, address, or inspection point of contact, require an amended declaration. Non-substantive typographical errors and changes to the declaration point of contact do not require submission of an amended report and may be corrected in subsequent declarations or reports.

(c) For undeclared Schedule 1 facilities, trading companies and other persons, changes that do not directly affect the purpose of the Convention, such as changes to a company name, address, point of contact, or non-substantive typographical errors, do not require submission of an amended report and may be corrected in subsequent reports.

(d) If you are required to submit an amended declaration or report pursuant to paragraph (a) or (b) of this section, you must complete and submit a new Certification Form and the specific form(s) being amended (e.g., annual declaration on past activities, annual declaration on anticipated activities). Only complete that portion of each form that corrects the previously submitted information.

SUPPLEMENT NO. 1 TO PART 712—SCHEDULE 1 CHEMICALS

A. Toxic chemicals:

(1) O-Alkyl (≤C10, incl. cycloalkyl) alkyl (Me, Et, n-Pr or i-Pr)-phosphonofluoridates e.g. Sarin: O-Isopropyl methylphosphonofluoridate (107–44–8)

O-Pinacolyl methylphosphonofluoridate (96–64–0)

(2) O-Alkyl (≤C10, incl. cycloalkyl) N,N-dialkyl (Me, Et, n-Pr or i-Pr) phosphoramidocyanidates e.g. Tabun: O-Ethyl N,N-dimethyl phosphoramidocyanidate (77–81–6)

O-Pinacolyl methylphosphonofluoridate

(3) O-Alkyl (H or ≤C4, incl. cycloalkyl) S±2-dialkyl (Me, Et, n-Pr or i-Pr)-aminoethyl alkyl (Me, Et, n-Pr or i-Pr) phosphonothiolates and corresponding alkylated or protonated salts e.g. VX: O-Ethyl S±2-disopropylaminoethyl methyl phosphonothiolate (50782–69–9)
§ 713.1 Prohibition on imports of Schedule 2 chemicals from non-States Parties.

(a) See § 711.6 of this subchapter for information on obtaining the forms you will need to declare and report activities involving Schedule 2 chemicals. You may not import any Schedule 2 chemical (see Supplement No. 1 to this part) or Schedule 2 chemicals from non-State Parties. You may not import any Schedule 2 chemical. You may not import any Schedule 2 chemical or Schedule 2 chemicals from non-State Parties. See Supplement No. 1 to part 710 of this subchapter for a list of States that are party to the Convention. See Supplement No. 1 to part 710 of this subchapter for a list of States that are party to the Convention.

NOTE TO PARAGRAPH (a). See § 742.18 of the Export Administration Regulations (35 CFR part 742) for prohibitions that apply to exports of Schedule 2 chemicals or after April 29, 2000 to non-
States Parties and for End-Use Certification requirements for exports of Schedule 2 chemicals prior to April 29, 2000 to such destinations.

(b) Paragraph (a) of this section does not apply to:

(1) The transfer or receipt of a Schedule 2 chemical from a non-State Party by a department, agency, or other entity of the United States, or by any person, including a member of the Armed Forces of the United States, who is authorized by law, or by an appropriate officer of the United States to transfer or receive the Schedule 2 chemical; or

(2) Mixtures containing Schedule 2 chemicals, if the concentration of each Schedule 2 chemical in the mixture is 10% or less by weight. Note, however, that such mixtures may be subject to regulatory requirements of other federal agencies.

§ 713.2 Declaration on past production of Schedule 2 chemicals for chemical weapons purposes.

You must complete the Certification Form and Forms 2-1, 2-2, 2-4, Form A, if you produced at your plant site any quantity of a Schedule 2 chemical at any time since January 1, 1946, for chemical weapons purposes. Form B is optional. You must declare the total quantity of such a chemical produced, rounded to the nearest kilogram. Note that you are not subject to routine inspection unless you are a declared facility pursuant to §713.3.

§ 713.3 Initial and annual declaration requirements for plant sites that produce, process or consume Schedule 2 chemicals in excess of specified thresholds.

(a) Declaration of production, processing or consumption of Schedule 2 chemicals for purposes not prohibited by the CWC.

(1) Quantities of production, processing or consumption that trigger declaration requirements. You must complete the forms specified in paragraph (b) of this section if you have been or will be involved in the following activities:

(i) Initial declaration. You produced, processed or consumed at one or more plants on your plant site during any of the calendar years 1994, 1995, or 1996 a Schedule 2 chemical in excess of the following declaration threshold quantities:

(A) 1 kilogram of chemical BZ: 3-Quinuclidinyl benzilate (see Schedule 2, paragraph A.3 included in Supplement No. 1 to this part);

(B) 100 kilograms of chemical PFIB: 1,1,3,3,3-Pentafluoro-2( trifluoromethyl)-1-propene or 100 kilograms of chemical Amiton: 0,0-Diethyl S-[2-(diethylamino) ethyl] phosphorothiolate and corresponding alkylated or protonated salts (see Schedule 2, paragraphs A.1 and A.2 included in Supplement No. 1 to this part); or

(C) 1 metric ton of any chemical listed in Schedule 2, Part B (see Supplement No. 1 to this part).

NOTE TO PARAGRAPH (a)(1)(i). To determine whether you have an initial declaration requirement for Schedule 2 activities, you must determine whether you produced, processed or consumed a Schedule 2 chemical above the applicable threshold quantity at one or more plants on your plant site in calendar years 1994, 1995, or 1996. For example, if you determine that one plant on your plant site produced greater than 1 kilogram of the chemical BZ in calendar year 1995, and no plants on your plant site produced, processed or consumed any Schedule 2 chemical above the applicable threshold quantity in calendar years 1994 or 1996, you have an initial declaration requirement under this paragraph. You must submit three Forms 2-3—one for each of the calendar years 1994, 1995, and 1996—and complete question 2-3.1 on each of the forms to declare production data on BZ for calendar years 1994, 1995, and 1996. For calendar year 1995, you would declare the quantity of BZ actually produced. For calendar years 1994 and 1996, you would declare “0” production quantity. Since the plant site did not engage in any other declarable activity (i.e., consumption, processing), you would leave blank questions 2-3.2 and 2-3.3 on Form 2-3 for calendar years 1994, 1995, and 1996. Note that declaring a “0” quantity for production in 1994 and 1996, as opposed to leaving the question blank, permits BXA to distinguish the activity that triggered the initial declaration requirement for each year from...
activities that were not declarable during that period.

(ii) Annual declaration on past activities. You produced, processed or consumed at one or more plants on your plant site during any of the previous three calendar years, a Schedule 2 chemical in excess of the applicable declaration threshold quantity specified in paragraphs (a)(1)(i)(A) through (C) of this section.

NOTE TO PARAGRAPH (a)(1)(ii). To determine whether you have an annual declaration on past activities requirement for Schedule 2 chemicals, you must determine whether you produced, processed or consumed a Schedule 2 chemical above the applicable threshold quantity at one or more plants on your plant site in any one of the three previous calendar years. For example, for the 1997 declaration period, if you determine that one plant on your plant site produced greater than 1 kilogram of the chemical BZ in calendar year 1995, and no plants on your plant site produced, processed or consumed any Schedule 2 chemical above the applicable threshold quantity in calendar years 1996 or 1997, you still have a declaration requirement under this paragraph for the previous calendar year (1997). However, you must only declare on Form 2-3 (question 2-3.1), production data for calendar year 1997. You would declare “0” production quantity because you did not produce BZ above the applicable threshold quantity in calendar year 1997. Since the plant site did not engage in any other declarable activity (i.e., consumption, processing) in the 1996-1997 declaration period, you would leave blank questions 2-3.2 and 2-3.3 on Form 2-3. Note that declaring a “0” production quantity for 1997, as opposed to leaving the question blank, permits BXA to distinguish the activity that triggered the declaration requirement from activities that were not declarable during that period.

(iii) Annual declaration on anticipated activities. You anticipate that you will produce, process or consume at one or more plants on your plant site during the next calendar year, starting with activities anticipated for calendar year 2001, a Schedule 2 chemical in excess of the applicable declaration threshold quantity set forth in paragraphs (a)(1)(i)(A) through (C) of this section.

(2) Mixtures containing a Schedule 2 chemical. (i) The quantity of a Schedule 2 chemical contained in a mixture must be counted when determining the total quantity of a Schedule 2 chemical produced, processed, or consumed at your plant only if the concentration of the Schedule 2 chemical in the mixture is 30% or more by volume or by weight, whichever yields the lesser percent.

(ii) Counting the amount of the Schedule 2 chemical in a mixture. If your mixture contains 30% or more concentration of a Schedule 2 chemical, you must count only the amount (weight) of the Schedule 2 chemical in the mixture, not the total weight of the mixture.

(iii) Determining declaration requirements for production, processing and consumption. You must include the amount (weight) of a Schedule 2 chemical in a mixture when determining the total production, total processing, or total consumption of that Schedule 2 chemical at a plant on your plant site. If the total amount of the produced, processed or consumed Schedule 2 chemical exceeds the applicable declaration threshold set forth in paragraphs (a)(1)(i)(A) through (C) of this section, you have a declaration requirement. For example, if during calendar year 1997, a plant on your plant site produced a mixture containing 300 kilograms of thiodiglycol in a concentration of 32% and also produced 800 kilograms of thiodiglycol, that plant produced 1100 kilograms and exceeded the declaration threshold of 1 metric ton for that Schedule 2 chemical. You must declare past production of thiodiglycol at that plant site for calendar year 1997. If, on the other hand, a plant on your plant site processed a mixture containing 300 kilograms of thiodiglycol in a concentration of 32% and also processed 800 kilograms of thiodiglycol in other than mixture form, the total amount of thiodiglycol processed at that plant for CWCR purposes would be 800 kilograms and would not trigger a declaration requirement.
kilograms of processed thiodiglycol at that plant.

(b) Types of declaration forms to be used. (1) Initial declaration. You must complete the Certification Form and Forms 2-1, 2-2, 2-3, 2-3A, and Form A if you produced, processed or consumed at one or more plants on your plant site a Schedule 2 chemical in excess of the applicable declaration threshold quantity specified in paragraphs (a)(1)(i)(A) through (C) of this section during any of the three calendar years 1994, 1995, or 1996. Form B is optional. If you are subject to initial declaration requirements, you must include data for each of the calendar years 1994, 1995, and 1996.

(2) Annual declaration on past activities. You must complete the Certification Form and Forms 2-1, 2-2, 2-3, 2-3A, and Form A if one or more plants on your plant site produced, processed or consumed more than the applicable threshold quantity of a Schedule 2 chemical described in paragraphs (a)(1)(i)(A) through (C) of this section in any of the three previous calendar years. Form B is optional. If you are subject to annual declaration requirements, you must include data for the previous calendar year only.

(3) Annual declaration on anticipated activities. You must complete the Certification Form and Forms 2-1, 2-2, 2-3, 2-3A, 2-3C, and Form A if you plan to produce, process, or consume at any plant on your plant site a Schedule 2 chemical above the applicable threshold quantity set forth in paragraphs (a)(1)(i)(A) through (C) of this section during the following calendar year, beginning with activities planned for calendar year 2001. Form B is optional.

(c) Quantities to be declared. (1) Production, processing and consumption of a Schedule 2 chemical above the declaration threshold—(i) Initial declaration. If you are required to complete forms pursuant to paragraph (a)(1)(i) of this section, you must declare the aggregate quantity resulting from each type of activity (production, processing or consumption) from each plant on your plant site that exceeds the applicable threshold quantity for that Schedule 2 chemical during any of the calendar years 1994, 1995, and 1996. Do not aggregate amounts of production, processing or consumption from plants on the plant site that did not individually produce, process or consume the declared chemical below the declaration threshold, you declare “0” only for the declared activities.

(ii) Annual declaration on past activities. If you are required to complete forms pursuant to paragraph (a)(1)(ii) of this section, you must declare the aggregate quantity resulting from each type of activity (production, processing or consumption) from each plant on your plant site that exceeds the applicable threshold quantity for that Schedule 2 chemical. Do not aggregate amounts of production, processing or consumption from plants on the plant site that did not individually produce, process or consume a Schedule 2 chemical in amounts greater than the applicable threshold levels. If in the previous calendar year you produced, processed or consumed below the declaration threshold, but your declaration requirement is triggered because of activities occurring in an earlier year, you declare “0” only for the declared activities.

(iii) Rounding. For the chemical BZ, report quantities to the nearest hundredth of a kilogram (10 grams). For PFIB and the Amiton family, report quantities to the nearest 1 kilogram. For all other Schedule 2 chemicals, report quantities to the nearest 10 kilograms.

(d) “Declared” Schedule 2 plant sites. A plant site that comprises at least one plant that produced, processed or consumed a Schedule 2 chemical above the applicable threshold quantity in the next calendar year is a “declared” Schedule 2 plant site for those years.

(e) Declared Schedule 2 plant sites subject to routine inspections. A “declared”
Schedule 2 plant site is subject to initial and routine inspection by the Organization for the Prohibition of Chemical Weapons if it produced, processed or consumed in any of the three previous calendar years, or is anticipated to produce, process or consume in the next calendar year, in excess of ten times the applicable declaration threshold quantity set forth in paragraphs (a)(1)(i)(A) through (C) of this section (see part 716 of this subchapter). A plant site that submitted an initial declaration for calendar years 1994, 1995, and 1996, and exceeded the applicable inspection threshold is also subject to an initial inspection.

§ 713.4 Initial and annual declaration and reporting requirements for exports and imports of Schedule 2 chemicals.

(a) Declarations and reports of exports and imports of Schedule 2 chemicals.

(1) Declarations. A Schedule 2 plant site that is declared because it produced, processed or consumed a Schedule 2 chemical above the applicable threshold quantity, and also exported from or imported to the plant site the same Schedule 2 chemical above the applicable threshold quantity, must submit export and import information as part of its declaration.

NOTE TO PARAGRAPH (a)(1): A declared Schedule 2 plant site may need to declare exports or imports of Schedule 2 chemicals that it produced, processed or consumed above the applicable threshold quantity and also report exports or imports of different Schedule 2 chemicals that it did not produce, process or consume above the applicable threshold quantities.

(2) Reports. A declared plant site that does not meet the description of paragraph (a)(1) of this section, and an undeclared plant site or a trading company or any other person subject to the CWCR must submit a report if it exported or imported a Schedule 2 chemical above the applicable threshold quantity.

NOTE TO PARAGRAPH (a)(2): The U.S. Government will not submit to the OPCW company-specific information relating to the export or import of Schedule 2 chemicals contained in reports. The U.S. Government will add all export and import information contained in reports to export and import information contained in declarations to establish the U.S. national aggregate declaration on exports and imports.

NOTE TO PARAGRAPHS (a)(1) AND (2): Declared and undeclared plant sites must count, for declaration or report purposes, all exports from and imports to the entire plant site, not only from or to individual plants on the plant site.

(b) Quantities of exports or imports that trigger a declaration or report requirement. (1) You have a declaration or report requirement and must complete the forms specified in paragraph (d) of this section if you exported or imported a Schedule 2 chemical in excess of the following threshold quantities:

(i) 1 kilogram of chemical BZ: 3-Quinuclidinyl benzilate (See Schedule 2, paragraph A.3 included in Supplement No.1 to this part);

(ii) 100 kilograms of chemical PFIB: 1,1,3,3,3-Pentafluoro-2(trifluoromethyl)-1-propene or 100 kilograms of Amiton: O,O Diethyl S-[2(diethylamino)ethyl] phosphorothiolate and corresponding alkylated or protonated salts (see Schedule 2, paragraphs A.1 and A.2 included in Supplement No.1 to this part);

(iii) 1 metric ton of any chemical listed in Schedule 2, Part B (see Supplement No.1 to this part).

(2) Mixtures containing a Schedule 2 chemical. The quantity of a Schedule 2 chemical contained in a mixture must be counted for the declaration or reporting of an export or import only if the concentration of the Schedule 2 chemical in the mixture is 30% or more by volume or by weight, whichever yields the lesser percent.

NOTE 1 TO PARAGRAPH (b)(2). See §713.3(a)(2)(ii) for information on counting amounts of Schedule 2 chemicals contained in mixtures and determining declaration and report requirements.

NOTE 2 TO PARAGRAPH (b)(2). The “30% and above” mixtures rule applies.
only for declaration and report purposes. This rule does not apply for purposes of determining whether the export of your mixture to a non-State Party requires an End-Use Certificate or for determining whether you need an export license from the Department of Commerce (see §§742.2, 742.18 and 745.2 of the Export Administration Regulations) or from the Department of State (see the International Traffic in Arms Regulations (22 CFR parts 120 through 130).

c Declaration and report requirements.

(1) Initial declaration. A plant site described in paragraph (a)(1) of this section that has an initial declaration requirement for production, processing, or consumption of a Schedule 2 chemical must also declare the export or import of that same Schedule 2 chemical if the amount exported or imported in 1994, 1995 or 1996 exceeded the applicable threshold quantity set forth in paragraph (b)(1)(i) through (iii) of this section. For the initial declaration, the plant site must only declare the export or import information for any of the calendar years (1994, 1995 and/or 1996) in which the export or import exceeded the applicable threshold quantity.

(2) Initial report on exports and imports. Declared plant sites described in paragraph (a)(2) of this section, undeclared plant sites, trading companies or any other person subject to the CWCR that exported or imported a Schedule 2 chemical in 1996 in excess of the applicable threshold quantity set forth in paragraph (b) of this section, must submit an initial report on exports or imports.

(3) Annual declaration on past activities. A plant site described in paragraph (a)(1) that has an annual declaration requirement for production, processing, or consumption of a Schedule 2 chemical if the amount exceeded the applicable threshold quantity set forth in paragraph (b) of this section, must submit an annual report on exports or imports for calendar year 1996.

(4) Annual report on exports and imports. Declared plant sites described in paragraph (a)(2), and undeclared plant sites, trading companies or any other person subject to the CWCR that exported or imported a Schedule 2 chemical in a previous calendar year, beginning in 1997, in excess of the applicable threshold quantity set forth in paragraphs (b)(1)(i) through (iii) must submit an annual report on exports or imports.

(d) Types of declaration and report forms to be used.

(1) Initial declaration. If you are a declared Schedule 2 plant site as described in paragraph (a)(1), you must complete Form 2±3B in addition to the forms required by §713.3(b)(1). You must complete the forms for each declared Schedule 2 chemical and for each of the calendar years 1994, 1995, and 1996, in which the export or import exceeded the applicable threshold quantity.

(2) Initial report on exports and imports.

(i) If you are a declared plant site as described in paragraph (a)(2), you may fulfill your reporting requirements by:

(A) Submitting, along with your initial declaration, a Form 2±3B for each Schedule 2 chemical you exported or imported above the applicable threshold quantity. Attach Form A, as appropriate; Form B is optional.

(B) Submitting, separately from your initial declaration, a Certification Form, Form 2-1, and Form 2±3B for each Schedule 2 chemical you exported or imported above the applicable threshold quantity. Attach Form A, as appropriate; Form B is optional.

(ii) If you are an undeclared plant site or trading company, you must complete the Certification Form, Form 2-1, and Form 2±3B for each Schedule 2 chemical you exported or imported above the applicable threshold quantity. Attach Form A, as appropriate; Form B is optional.

(3) Annual declaration on past activities. If you are a declared Schedule 2 plant site as described in paragraph (a)(1), you must complete Form 2±3B in addition to the forms required by §713.3(b)(2), for each declared Schedule 2 chemical exported or imported above the applicable threshold quantity in the previous calendar year.

(4) Annual report on exports and imports. (i) If you are a declared plant site as described in paragraph (a)(2), you
may fulfill your annual reporting requirements by:

(A) Submitting, along with your annual declaration on past activities, a Form 2-3B for each Schedule 2 chemical you exported or imported above the applicable threshold quantity. Attach Form A, as appropriate; Form B is optional.

(B) Submitting, separately from your annual declaration on past activities, a Certification Form, Form 2-1, and Form 2-3B for each Schedule 2 chemical you exported or imported above the applicable threshold quantity. Attach Form A, as appropriate; Form B is optional.

(ii) If you are an undeclared plant site, trading company or any other person subject to the CWCR, you must complete the Certification Form, Form 2-1, and Form 2-3B for each Schedule 2 chemical you exported or imported above the applicable threshold quantity. Attach Form A, as appropriate; Form B is optional.

(e) Quantities to be declared. (1) Calculations. If you exported from or imported to your plant site, trading company, or other location more than the applicable threshold quantity of a Schedule 2 chemical, you must declare or report all exports and imports by destination, and indicate the total amount exported to or imported from each destination. Only indicate the total annual quantity to or from that destination is more than 1% of the applicable threshold (i.e., more than 10 grams of BZ, 1 kilogram of PFIB and Amiton and corresponding alkylated or protonated salts, or 10 kilograms of all other Schedule 2 chemicals). However, in determining whether your total exports and imports worldwide for the year in question trigger a declaration or report requirement, you must include all exports and imports, including exports and imports falling within the 1% exemption in your calculation.

(2) Rounding. For purposes of declaring or reporting exports and imports of a Schedule 2 chemical, you must total all exports and imports per calendar year per recipient or source destination and then round as follows: for the chemical BZ, the total quantity for each destination should be reported to the nearest hundredth of a kilogram (10 grams); for PFIB and Amiton and corresponding alkylated or protonated salts, the quantity for each destination should be reported to the nearest 1 kilogram; and for all other Schedule 2 chemicals, the total quantity for each destination should be reported to the nearest 10 kilograms.

§ 713.5 Advance declaration requirements for additionally planned production, processing, or consumption of Schedule 2 chemicals.

(a) Declaration requirements for additionally planned activities. (1) You must declare additionally planned production, processing, or consumption of Schedule 2 chemicals after the annual declaration on anticipated activities for the next calendar year has been delivered to BXA if:

(i) You plan that a previously undeclared plant on your plant site under § 713.3(a)(1)(iii) will produce, process, or consume a Schedule 2 chemical above the applicable declaration threshold;

(ii) You plan to produce, process, or consume at a plant declared under § 713.3(a)(1)(iii) an additional Schedule 2 chemical above the applicable declaration threshold;

(iii) You plan an additional activity (production, processing, or consumption) at your declared plant above the applicable declaration threshold for a chemical declared under § 713.3(a)(1)(iii);

(iv) You plan to increase the production, processing, or consumption of a Schedule 2 chemical by a plant declared under § 713.3(a)(1)(iii) from the amount exceeding the applicable declaration threshold to an amount exceeding the applicable inspection threshold (see § 716.1(b)(2));

(v) You plan to change the starting or ending date of anticipated production, processing, or consumption declared under § 713.3(a)(1)(iii) by more than three months; or

(vi) You plan to increase your production, processing, or consumption of a Schedule 2 chemical by a declared plant site by 20 percent or more above that declared under § 713.3(a)(1)(iii).
§ 713.6 Frequency and timing of declarations and reports.

Declarations and reports required under this part must be postmarked by the appropriate date identified in Table 1 of this section. Required declarations and reports include:

(a) Declaration on past production of Schedule 2 chemicals for chemical weapons (CW) purposes since January 1, 1946;

(b) Initial declaration (production, processing, consumption, export, or import of Schedule 2 chemicals during calendar years 1994, 1995, and 1996);

(c) Initial report on exports and imports from trading companies, plant sites and other persons (during calendar year 1996);

(d) Annual declaration on past activities (production, processing, consumption, export or import of Schedule 2 chemicals during the previous calendar year, beginning with 1997);

(e) Annual report on exports and imports from trading companies, plant sites and other persons (during the previous calendar year, beginning with 1997); and

(f) Annual declaration on anticipated activities (production, processing or consumption during the next calendar year, beginning in calendar year 2000 for activities anticipated for calendar year 2001).

§713.7  Amended declaration or report.

(a) You must submit an amended declaration or report for changes to previously submitted information on chemicals, activities and end-use purposes or the addition of new chemicals, activities and end-use purposes.

(b) For declared plant sites subject to inspection, changes that may affect verification activities, such as changes of owner or operator, company name, address, or inspection point of contact require an amended declaration.

(c) For declared plant sites not subject to inspection, undeclared plant sites, trading companies, and other persons, changes that do not directly affect the purpose of the Convention, such as changes to a company name, address, declaration point of contact, or non-substantive typographical errors, do not require submission of an amended declaration or report and may be corrected in subsequent declarations or reports.

(d) If you are required to submit an amended declaration or report pursuant to paragraph (a) or (b) of this section, you must complete and submit a new Certification Form and the specific form(s) being amended (e.g., annual declaration on past activities). Only complete that portion of each form that corrects the previously submitted information.

SUPPLEMENT NO. 1 TO PART 713—SCHEDULE 2 CHEMICALS

A. Toxic chemicals:

(1) Amiton: O,O-Diethyl S-[2-(diethylamino)ethyl] phosphorothioate and corresponding alkylated or protonated salts ....................................................... (78–53–5)

(2) PFIB: 1,1,3,3,3-Pentafluoro-2-(trifluoromethyl)-1-propene ........................................ (382–21–8)

(3) BZ: 3-Quinuclidinyl benzilate ........................................................................ (6581–06–2)

B. Precursors:

(4) Chemicals, except for those listed in Schedule 1, containing a phosphorus atom to which is bonded one methyl, ethyl or propyl (normal or iso) group but not further carbon atoms, e.g. Methylphosphonyl dichloride ................................................................. (676–97–1)

(5) N,N-Dialkyl (Me, Et, n-Pr or i-Pr) phosphoramidic dihalides

(6) Dialkyl (Me, Et, n-Pr or i-Pr) N,N-dialkyl (Me, Et, n-Pr or i-Pr)-phosphoramidates

(7) Arsenic trichloride ............................................................................................... (7784–34–1)

(8) 2,2-Diphenyl-2-hydroxyacetic acid ...................................................................... (76–93–7)

(9) Quinuclidine-3-ol ................................................................................................. (1619–34–7)

(10) N,N-Dialkyl (Me, Et, n-Pr or i-Pr) aminoethyl-2-chlorides and corresponding protonated salts

(11) N,N-Dialkyl (Me, Et, n-Pr or i-Pr) aminoethane-2-ols and corresponding protonated salts

Exemptions: N,N-Dimethylaminoethanol and corresponding protonated salts ............. (108–01–0)

N,N-Diethylnaminoethanol and corresponding protonated salts ................................ (100–37–8)

(12) N,N-Dialkyl (Me, Et, n-Pr or i-Pr) aminoethane-2-thiols and corresponding protonated salts

(13) Thiodiglycol: Bis(2-hydroxyethyl) sulfide ................................................................ (111–48–8)

(14) Pinacolyl alcohol: 3,3-Dimethylbutane-2-ol .......................................................... (464–07–3)
PART 714—ACTIVITIES INVOLVING SCHEDULE 3 CHEMICALS

Sec.
714.1 Declaration on past production of Schedule 3 chemicals for chemical weapons purposes.
714.2 Initial and annual declaration requirements for plant sites that produce a Schedule 3 chemical in excess of 30 metric tons.
714.3 Initial and annual reporting requirements for exports and imports of Schedule 3 chemicals.
714.4 Advance declaration requirements for additionally planned production of a Schedule 3 chemical.
714.5 Frequency and timing of declarations.
714.6 Amended declaration or report.

SUPPLEMENT NO. 1 TO PART 714—SCHEDULE 3 CHEMICALS

SOURCE: 64 FR 73777, Dec. 30, 1999, unless otherwise noted.

§ 714.1 Declaration on past production of Schedule 3 chemicals for chemical weapons purposes.

(a) See § 711.6 of this subchapter for information on obtaining the forms you will need to declare and report activities involving Schedule 3 chemicals.

(b) You must complete the Certification Form, Forms 3-1, 3-2, 3-4, Form A if you produced at one or more plants on your plant site any quantity of a Schedule 3 chemical at any time since January 1, 1946, for chemical weapons purposes. Form B is optional. You must declare the total quantity of such chemical produced, rounded to the nearest tenth of a metric ton (or 100 kilograms). You are not subject to routine inspection unless you are a declared facility pursuant to § 714.2.

§ 714.2 Initial and annual declaration requirements for plant sites that produce a Schedule 3 chemical in excess of 30 metric tons.

(a) Declaration of production of Schedule 3 chemicals for purposes not prohibited by the CWC. (1) Production quantities that trigger the declaration requirement. You must complete the appropriate forms specified in paragraph (b) of this section if you have produced or anticipate producing a Schedule 3 chemical as follows:

(i) Initial declaration. You produced at one or more plants on your plant site in excess of 30 metric tons of any single Schedule 3 chemical during calendar year 1996.

(ii) Annual declaration on past activities. You produced at one or more plants on your plant site in excess of 30 metric tons of any single Schedule 3 chemical during the previous calendar year, beginning with 1997.

(iii) Annual declaration on anticipated activities. You anticipate that you will produce at one or more plants on your plant site in excess of 30 metric tons of any single Schedule 3 chemical in the next calendar year.

(2) Mixtures containing a Schedule 3 chemical. (i) The quantity of a Schedule 3 chemical contained in a mixture must be counted for declaration purposes only if the concentration of the Schedule 3 chemical in the mixture is 80% or more by volume or by weight, whichever yields the lesser percent.

(ii) Counting the amount of the Schedule 3 chemical in a mixture. If your mixture contains 80% or more concentration of a Schedule 3 chemical, you must count only the amount (weight) of the Schedule 3 chemical in the mixture, not the total weight of the mixture.

(b) Types of declaration forms to be used. (1) Initial declaration. You must complete the Certification Form and Forms 3-1, 3-2, 3-3, and Form A if you produced at one or more plants on your plant site in excess of 30 metric tons of any single Schedule 3 chemical during calendar year 1996. Form B is optional.

(2) Annual declaration on past activities. You must complete the Certification Form and Forms 3-1, 3-2, 3-3, and Form A if you produced at one or more plants on your plant site in excess of 30 metric tons of any single Schedule 3 chemical during calendar year, beginning with production during calendar year 1997. Form B is optional.

(3) Annual declaration on anticipated activities. You must complete the Certification Form, and Forms 3-1 and 3-3 if you anticipate that you will produce at one or more plants on your plant site in excess of 30 metric tons of any single Schedule 3 chemical in the next calendar year.
(c) Quantities to be declared. (1) Production of a Schedule 3 chemical in excess of 30 metric tons. If your plant site is subject to the declaration requirements of paragraph (a) of this section, you must declare the range within which the production at your plant site falls (30 to 200 metric tons, 200 to 1,000 metric tons, etc.) as specified on Form 3-3. When specifying the range of production for your plant site, you must aggregate the production quantities of all plants on the plant site that produced the Schedule 3 chemical in amounts greater than 30 metric tons. You must complete a separate Form 3-3 for each Schedule 3 chemical for which production at your plant site exceeds 30 metric tons.

(2) Rounding. To determine the production range into which your plant site falls, add all the production of the declared Schedule 3 chemical during the calendar year from all plants on your plant site that produced the Schedule 3 chemical in amounts exceeding 30 metric tons, and round to the nearest ten metric tons.

(d) "Declared" Schedule 3 plant sites. A plant site that comprises at least one plant that produced in excess of 30 metric tons of a Schedule 3 chemical during the previous calendar year, or that you anticipate will produce more than 30 metric tons of a Schedule 3 chemical in the next calendar year, is a "declared" Schedule 3 plant site. A plant site that submitted an initial declaration for 1996 and/or annual declaration on past activities for 1997 or 1998 is a "declared" Schedule 3 plant site for the years declared.

(e) Routine inspections of declared Schedule 3 plant sites. A "declared" Schedule 3 plant site is subject to routine inspection by the Organization for the Prohibition of Chemical Weapons (see part 716 of this subchapter) if the declared plants on your plant site produced during the previous calendar year or you anticipate they will produce during the next calendar year in excess of 200 metric tons aggregate of any Schedule 3 chemical. A plant site that submitted an initial declaration for 1996 and/or an annual declaration on past activities for 1997 or 1998, and exceeded the inspection threshold, is also subject to a routine inspection.

§ 714.3 Initial and annual report requirements for exports and imports of Schedule 3 chemicals.

(a) Any person subject to the CWCR that exported from or imported to the United States a Schedule 3 chemical in excess of 30 metric tons in any calendar year, beginning with calendar year 1996, has a reporting requirement under this section.

(1) Initial report on exports and imports. Declared plant sites, undeclared plant sites, trading companies, and any other person subject to the CWCR that exported from or imported to the United States in excess of 30 metric tons of a Schedule 3 chemical in calendar year 1996 must submit an initial report on exports and imports.

(2) Annual report on exports and imports. Declared plant sites, undeclared plant sites, trading companies, and any other person subject to the CWCR that exported from or imported to the United States in excess of 30 metric tons of a Schedule 3 chemical in a previous calendar year, beginning with calendar year 1997, must submit an annual report on exports and imports.

NOTE 1 TO PARAGRAPHS (a)(1) AND (a)(2). Declared and undeclared plant sites must count, for report purposes, all exports from and imports to the entire plant site, not only from or to individual plants on the plant site.

NOTE 2 TO PARAGRAPHS (a)(1) AND (a)(2): The U.S. Government will not submit to the OPCW company-specific information relating to the export or import of Schedule 3 chemicals contained in reports. The U.S. Government will add all export and import information contained in reports to establish the U.S. national aggregate declaration on exports and imports.

(3) Mixtures containing a Schedule 3 chemical. The quantity of a Schedule 3 chemical contained in a mixture must be counted for reporting an export or import only if the concentration of the Schedule 3 chemical in the mixture is 80% or more by volume or by weight, whichever yields the lesser percent. For reporting purposes, only count the weight of the Schedule 3 chemical in the mixture, not the entire weight of the mixture.
§ 714.4 Advance declaration requirements for additionally planned production of Schedule 3 chemicals.

(a) Declaration requirements. (1) You must declare additionally planned production of Schedule 3 chemicals after the annual declaration on anticipated activities for the next calendar year has been delivered to BXA if:

(i) You plan that a previously undeclared plant site or trading company, or any other person subject to the CWCR, you must submit a Certification Form, Form 3-1, and a Form 3-3 for each Schedule 3 chemical to be reported, completing only question 3-3.3. Attach Form A, as appropriate; Form B is optional.

(2) If you are an undeclared plant site or trading company, or any other person subject to the CWCR, you must submit a Certification Form, Form 3-1, and a Form 3-3 for each Schedule 3 chemical to be reported, completing only question 3-3.3. Attach Form A, as appropriate; Form B is optional.

(c) Quantities to be reported. (1) Calculations. If you exported from or imported to your plant site or trading company more than 30 metric tons of a Schedule 3 chemical in the previous calendar year, you must report all exports and imports of that chemical by destination, and indicate the total amount exported to or imported from each destination. Only indicate the total annual quantity exported to or imported from a specific destination if the total annual quantity to or from that destination is more than 1% of the applicable threshold (i.e., more than 0.3 metric tons). However, in determining whether your total exports and imports worldwide for the year in question trigger a report requirement, you must include all exports and imports, including exports and imports falling within the 1% exemption in your calculation.

(2) Rounding. For purposes of reporting exports and imports of a Schedule 3 chemical, you must total all exports and imports per calendar year per recipient or source destination and then round to the nearest 0.1 metric tons.

NOTE TO § 714.3: Under the Convention, the United States is obligated to provide the OPCW a national aggregate annual declaration of the quantities of each Schedule 3 chemical exported and imported. The U.S. Government will not submit your company-specific information relating to the export or import of a Schedule 3 chemical reported under this § 714.3. The U.S. Government will add all export and import information submitted by various facilities under this section to produce a national aggregate annual declaration of destination-by-destination trade for each Schedule 3 chemical.

§ 714.4 Advance declaration requirements for additionally planned production of Schedule 3 chemicals.

(a) Declaration requirements. (1) You must declare additionally planned production of Schedule 3 chemicals after the annual declaration on anticipated activities for the next calendar year has been delivered to BXA if:

(i) You plan that a previously undeclared plant site or trading company, or any other person subject to the CWCR, you must submit a Certification Form, Form 3-1, and a Form 3-3 for each Schedule 3 chemical to be reported, completing only question 3-3.3. Attach Form A, as appropriate; Form B is optional.

(2) If you are an undeclared plant site or trading company, or any other person subject to the CWCR, you must submit a Certification Form, Form 3-1, and a Form 3-3 for each Schedule 3 chemical to be reported, completing only question 3-3.3. Attach Form A, as appropriate; Form B is optional.

(c) Quantities to be reported. (1) Calculations. If you exported from or imported to your plant site or trading company more than 30 metric tons of a Schedule 3 chemical in the previous calendar year, you must report all exports and imports of that chemical by destination, and indicate the total amount exported to or imported from each destination. Only indicate the total annual quantity exported to or imported from a specific destination if the total annual quantity to or from that destination is more than 1% of the applicable threshold (i.e., more than 0.3 metric tons). However, in determining whether your total exports and imports worldwide for the year in question trigger a report requirement, you must include all exports and imports, including exports and imports falling within the 1% exemption in your calculation.

(2) Rounding. For purposes of reporting exports and imports of a Schedule 3 chemical, you must total all exports and imports per calendar year per recipient or source destination and then round to the nearest 0.1 metric tons.

NOTE TO § 714.3: Under the Convention, the United States is obligated to provide the OPCW a national aggregate annual declaration of the quantities of each Schedule 3 chemical exported and imported. The U.S. Government will not submit your company-specific information relating to the export or import of a Schedule 3 chemical reported under this § 714.3. The U.S. Government will add all export and import information submitted by various facilities under this section to produce a national aggregate annual declaration of destination-by-destination trade for each Schedule 3 chemical.

§ 714.4 Advance declaration requirements for additionally planned production of Schedule 3 chemicals.

(a) Declaration requirements. (1) You must declare additionally planned production of Schedule 3 chemicals after the annual declaration on anticipated activities for the next calendar year has been delivered to BXA if:

(i) You plan that a previously undeclared plant site or trading company, or any other person subject to the CWCR, you must submit a Certification Form, Form 3-1, and a Form 3-3 for each Schedule 3 chemical to be reported, completing only question 3-3.3. Attach Form A, as appropriate; Form B is optional.

(c) Quantities to be reported. (1) Calculations. If you exported from or imported to your plant site or trading company more than 30 metric tons of a Schedule 3 chemical in the previous calendar year, you must report all exports and imports of that chemical by destination, and indicate the total amount exported to or imported from each destination. Only indicate the total annual quantity exported to or imported from a specific destination if the total annual quantity to or from that destination is more than 1% of the applicable threshold (i.e., more than 0.3 metric tons). However, in determining whether your total exports and imports worldwide for the year in question trigger a report requirement, you must include all exports and imports, including exports and imports falling within the 1% exemption in your calculation.

(2) Rounding. For purposes of reporting exports and imports of a Schedule 3 chemical, you must total all exports and imports per calendar year per recipient or source destination and then round to the nearest 0.1 metric tons.

NOTE TO § 714.3: Under the Convention, the United States is obligated to provide the OPCW a national aggregate annual declaration of the quantities of each Schedule 3 chemical exported and imported. The U.S. Government will not submit your company-specific information relating to the export or import of a Schedule 3 chemical reported under this § 714.3. The U.S. Government will add all export and import information submitted by various facilities under this section to produce a national aggregate annual declaration of destination-by-destination trade for each Schedule 3 chemical.
Schedule 3 chemical above the declaration threshold;
(ii) You plan to produce at a plant declared under §714.2(a)(1)(iii) an additional Schedule 3 chemical above the declaration threshold;
(iii) You plan to increase the production of a Schedule 3 chemical by declared plants on your plant site from the amount exceeding the applicable declaration threshold to an amount exceeding the applicable inspection threshold (see §716.1(b)(3)); or
(iv) You plan to increase the aggregate production of a Schedule 3 chemical at a declared plant site to an amount above the upper limit of the range previously declared under §714.2(a)(1)(iii).

(2) If you must submit a declaration on additionally planned activities because you plan to engage in any of the activities listed in paragraphs (a)(1)(i) through (iv) of this section, you should also declare any changes to the anticipated purposes of production or product group codes. You do not have to submit a declaration on additionally planned activities if you are only changing your purposes of production or product group codes.

(b) Declaration forms to be used. If you are required to declare additionally planned activities pursuant to paragraph (a) of this section, you must complete the Certification Form and Forms 3-1, 3-2, and 3-3 as appropriate.

§714.5 Frequency and timing of declarations.

Declarations and reports required under this part must be postmarked by the appropriate date identified in Table 1 of this section. Required declarations and reports include:
(a) Declaration on past production of any amount of Schedule 3 chemicals for chemical weapons (CW) purposes since January 1, 1946;
(b) Initial declaration (production of Schedule 3 chemicals during calendar year 1996);
(c) Initial report on exports and imports from trading companies, plant sites and other persons (during calendar year 1996);
(d) Annual declaration on past activities (production of Schedule 3 chemicals during the previous calendar year, beginning with 1997);
(e) Annual report on exports and imports from trading companies, plant sites and other persons (during the previous calendar year, beginning with 1997); and
(f) Annual declaration on anticipated activities (production during the next calendar year, beginning in calendar year 2000 for activities anticipated for calendar year 2001).

§ 714.6 Amended declaration or report.

(a) You must submit an amended declaration or report for changes to previously submitted information on chemicals, activities and end-use purposes or the addition of new chemicals, activities and end-use purposes.

(b) For declared plant sites subject to inspection, changes that may affect verification activities, such as changes of owner or operator, company name, address, or inspection point of contact, require an amended declaration.

(c) For declared plant sites not subject to inspection, undeclared plant sites, trading companies, and other persons, changes that do not directly affect the purpose of the Convention, such as changes to a company name, address, declaration point of contact, or non-substantive typographical errors, do not require submission of an amended declaration or report and may be corrected in subsequent declarations or reports.

(d) If you are required to submit an amended declaration or report pursuant to paragraph (a) or (b) of this section, you must complete and submit a new Certification Form and the specific form(s) being amended (e.g., annual declaration on past activities). Only complete that portion of each form that corrects the previously submitted information.

Note to Supplement No. 1: Refer to Supplement No. 1 to part 774 of the Export Administration Regulations (the Commerce Control List), ECCN 1C355, Related Controls for chemicals controlled under the International Traffic in Arms Regulations (22 CFR parts 120 through 130).

PART 715—ACTIVITIES INVOLVING UNSCHEDULED DISCRETE ORGANIC CHEMICALS (UDOCS)

Sec. 715.1 Initial and annual declaration requirements for production by synthesis of unscheduled discrete organic chemicals (UDOCS).

715.2 Frequency and timing of declarations.

715.3 Amended declaration.

Supplement No. 1 to Part 715—Definition of an Unscheduled Discrete Organic Chemical

Supplement No. 2 to Part 715—Examples of Unscheduled Discrete Organic Chemicals (UDOCS) and UDOC Production

Source: 64 FR 73780, Dec. 30, 1999, unless otherwise noted.

§ 715.1 Initial and annual declaration requirements for production by synthesis of unscheduled discrete organic chemicals (UDOCS).

(a) See §711.6 of this subchapter for information on obtaining the forms you will need to declare production of
unscheduled discrete organic chemicals. Declaration of production by synthesis of UDOCs for purposes not prohibited by the CWC. (1) Production quantities that trigger the declaration requirement. You must complete the forms specified in paragraph (b) of this section if your plant site produced by synthesis:

(i) In excess of 200 metric tons aggregate of all UDOCs (including all UDOCs containing the elements phosphorus, sulfur or fluorine, referred to as “PSF-chemicals”) in calendar year 1996 (for the initial declaration) or the previous calendar year beginning with 1997 (for an annual declaration); or

(ii) In excess of 30 metric tons of an individual PSF-chemical at one or more plants in calendar year 1996 (for the initial declaration) or in the previous calendar year beginning with 1997 (for an annual declaration).

(2) UDOCs subject to declaration requirements under this part. (i) UDOCs subject to declaration requirements under this part are those produced by synthesis that have been isolated for:

(A) Use; or

(B) Sale as a specific end product.

(ii) Exemptions. (A) Polymers and oligomers consisting of two or more repeating units which are formed by the chemical reaction of monomeric or polymeric substances;

(B) Chemicals and chemical mixtures produced through a biological or biomediated process;

(C) Products from the refining of crude oil, including sulfur-containing crude oil;

(D) Metal carbides (i.e., chemicals consisting only of metal and carbon); and

(E) UDOCs produced by synthesis that are ingredients or by-products in foods designed for consumption by humans and/or animals.

NOTE TO PARAGRAPH (a)(2): See Supplement No. 2 to this part for examples of UDOCs subject to the declaration requirements of this part, and for examples of activities that are not considered production by synthesis.

(3) Exemptions for UDOC plant sites. UDOC plant sites that exclusively produced hydrocarbons or explosives are exempt from UDOC declaration requirements. For the purposes of this part, the following definitions apply for hydrocarbons and explosives:

(i) Hydrocarbon means any organic compound that contains only carbon and hydrogen; and

(ii) Explosive means a chemical (or a mixture of chemicals) that is included in Class 1 of the United Nations Organization hazard classification system.

(b) Types of declaration forms to be used. (1) Initial declaration. You must complete the Certification Form and Form UDOC (consisting of two pages). Attach Form A as appropriate; Form B is optional.

(2) Annual declaration on past activities. You must complete the Certification Form and Form UDOC (consisting of two pages). Attach Form A as appropriate; Form B is optional.

(c) “Declared” UDOC plant sites. A plant site that produced by synthesis in excess of 200 metric tons aggregate of all UDOCs (including all PSF-chemicals), or that comprises at least one plant that produced by synthesis in excess of 30 metric tons of an individual PSF-chemical during the previous year, is a “declared” UDOC plant site. A plant site that submitted an initial declaration for 1996 and/or annual declaration on past activities for 1997 or 1998 is a “declared” UDOC plant site for the years declared.

(d) Routine inspections of declared UDOC plant sites. A “declared” UDOC plant site is subject to routine inspection by the Organization for the Prohibition of Chemical Weapons (see part 716 of this subchapter) if it produced by synthesis during the previous calendar year more than 200 metric tons aggregate of UDOCs. A plant site that submitted an initial declaration for 1996 and/or annual declaration on past activities for 1997 or 1998, and exceeded the inspection threshold, is also subject to a routine inspection.

§715.2 Frequency and timing of declarations.

Declarations required under this part must be postmarked by the appropriate dates identified in Table 1 of this section. Required declarations include:

(a) Initial declaration (production during calendar year 1996).
§ 715.3 Amended declaration.

(a) Amended declarations are required to correct certain inaccuracies in a previously submitted declaration. These amended declarations are necessary to change a production range above the amount originally declared, or the production of a PSF-chemical above 30 metric tons by a plant not previously counted as a PSF-plant.

(b) Changes that do not directly affect the purpose of the Convention, such as changes to a company name, address, point of contact, or non-substantive typographical errors, do not require submission of an amended declaration and may be corrected in subsequent declarations.

(c) If you are required to submit an amended declaration pursuant to paragraph (a) of this section, you must complete and submit a new Certification Form and the specific form(s) being amended (e.g., annual declaration on past activities). Only complete that portion of each form that amends the previously submitted information.

Supplement No. 1 to Part 715—Definition of an Unscheduled Discrete Organic Chemical

Unscheduled discrete organic chemical means any chemical: (1) belonging to the class of chemical compounds consisting of all compounds of carbon except for its oxides, sulfides and metal carbonates identifiable by chemical name, by structural formula, if known, and by Chemical Abstract Service registry number, if assigned; and (2) that is not contained in the Schedules of Chemicals (see Supplements No. 1 to parts 712 through 714 of this subchapter). Unscheduled discrete organic chemicals subject to declaration under this part are those produced by synthesis that are isolated for use or sale as a specific end-product.

NOTE: Carbon oxides consist of chemical compounds that contain only the elements carbon and oxygen and have the chemical formula C\(_x\)O\(_y\), where \(x\) and \(y\) denote integers. The two most common carbon oxides are carbon monoxide (CO) and carbon dioxide (CO\(_2\)). Carbon sulfides consist of chemical compounds that contain only the elements carbon and sulfur, and have the chemical formula C\(_a\)S\(_b\), where \(a\) and \(b\) denote integers. The most common carbon sulfide is carbon disulfide (CS\(_2\)). Metal carbonates consist of chemical compounds that contain a metal (i.e., the Group I Alkalis, Groups II Alkaline Earths, the Transition Metals, or the elements aluminum, gallium, indium, thallium, tin, lead, bismuth or polonium), and the elements carbon and oxygen. Metal carbonates have the chemical formula M\(_d\)(CO\(_3\))\(_e\), where \(d\) and \(e\) denote integers and M represents a metal. Common metal carbonates are sodium carbonate (Na\(_2\)CO\(_3\)) and calcium carbonate (CaCO\(_3\)). In addition, metal carbides or other compounds consisting of only a metal, as described above, and carbon (e.g., calcium carbide (CaC\(_2\))), are exempt from declaration requirements (see §715.1(a)(2)(ii)(D) of this part).

Supplement No. 2 to Part 715—Examples of Unscheduled Discrete Organic Chemicals (UDOCs) and UDOC Production

(i) Examples of UDOCs not subject to declaration include:

(i) UDOCs produced coincidentally as by-products that are not isolated for use or sale as a specific end product, and are routed to, or escape from, the waste stream of a stack, incinerator, or waste treatment system or any other waste stream;

(ii) UDOCs, contained in mixtures, which are produced coincidentally and not isolated for use or sale as a specific end-product;

(iii) UDOCs produced by recycling (i.e., involving one of the processes listed in paragraph (3) of this supplement) of previously declared UDOCs;
Bureau of Export Administration, Commerce

§ 716.1 General information on the conduct of initial and routine inspections of declared facilities subject to inspection under CWC Verification Annex Part VI (E), Part VII(B), Part VIII(B) and Part IX(B). See part 717 of this subchapter for provisions concerning challenge inspections.

(a) Overview. Each State Party to the CWC, including the United States, has agreed to allow certain inspections of declared facilities by inspectors employed by the Organization for the Prohibition of Chemical Weapons (OPCW) to ensure that activities are consistent with obligations under the Convention. The Department of Commerce is responsible for leading, hosting and escorting inspections of all facilities subject to the provisions of this subchapter (see §710.2 of this subchapter).

(b) Declared facilities subject to initial and routine inspections. (i) Schedule 1 facilities. (ii) Your declared facility is subject to inspection if it produced in excess of 100 grams aggregate of Schedule 1 chemicals in the previous calendar year or anticipates producing in excess of 100 grams aggregate of Schedule 1 chemicals during the next calendar year.

(ii) If you are a new Schedule 1 production facility pursuant to §712.4 of this subchapter, your facility is subject to an initial inspection within 200 days of submitting an initial declaration.

(iii) If your declared facility submitted an annual declaration on past activities for calendar year 1997 or 1998, you are subject to an initial inspection.

NOTE TO PARAGRAPH (b)(1): All Schedule 1 facilities submitting a declaration are subject to inspection.

(2) Schedule 2 plant sites. (i) Your declared plant site is subject to inspection if at least one plant on your plant site produced, processed or consumed, in any of the three previous calendar years, or you anticipate that at least one plant on your plant site will produce, process or consume in the next calendar year, any Schedule 2 chemical in excess of the following:

(A) 10 kg of chemical BZ: 3-Quinuclidinyl benzilate (see Schedule 2, Part A, paragraph 3 in Supplement No. 1 to part 713 of this subchapter);

(B) 1 metric ton of chemical PFIB: 1,1,3,3,3-Pentafluoro-
§ 716.1 15 CFR Ch. VII (1–1–00 Edition)

2(trifluoromethyl)-1-propene or any chemical belonging to the Amiton family (see Schedule 2, Part A, paragraphs 1 and 2 in Supplement No. 1 to part 713 of this subchapter); or
(C) 10 metric tons of any chemical listed in Schedule 2, Part B (see Supplement No. 1 to part 713 of this subchapter).

(ii) If your declared plant site submitted an initial declaration for calendar years 1994, 1995 and 1996, and at least one plant on your plant site produced a Schedule 2 chemical during any one of those three years in excess of the applicable inspection threshold quantity set forth in paragraphs (b)(2)(i)(A) through (C) of this section, you are subject to an initial inspection.

NOTE TO PARAGRAPH (b)(2): The applicable inspection threshold quantity for Schedule 2 plant sites is ten times higher than the applicable declaration threshold quantity. Only declared plant sites, comprising at least one declared plant that exceeds the applicable inspection threshold quantity, are subject to inspection.

(3) Schedule 3 plant sites. (i) Your declared plant site is subject to inspection if the declared plants on your plant site produced during the previous calendar year, or you anticipate will produce in the next calendar year, in excess of 200 metric tons aggregate of any Schedule 3 chemical (see Supplement No. 1 to part 714 of this subchapter).

(ii) If your declared plant site submitted an initial declaration for calendar year 1996 and/or annual declaration on past activities for calendar year 1997 or 1998, and exceeded the inspection threshold set forth in paragraph (b)(4)(i) of this section, you are subject to a routine inspection.

NOTE 1 TO PARAGRAPH (b)(4): You must include amounts of unscheduled discrete organic chemicals containing phosphorus, sulfur or fluorine in the calculation of your plant site's aggregate production of unscheduled discrete organic chemicals.

NOTE 2 TO PARAGRAPH (b)(4): All UDOC plant sites that submit a declaration based on §715.1(a)(i) of this subchapter are subject to a routine inspection.

(c) Responsibilities of the Department of Commerce. As the host and escort for the international Inspection Team for all inspections of facilities subject to the provisions of this subchapter under this part, the Department of Commerce will:

lead on-site inspections;

provide Host Team notification to the facility of an impending inspection;

take appropriate action to obtain an administrative warrant in the event the facility does not consent to the inspection;

dispatch an advance team to the vicinity of the site to provide administrative and logistical support for the impending inspection and, upon request, to assist the facility with inspection preparation;

escort the Inspection Team on-site throughout the inspection process;

assist the Inspection Team with verification activities;

negotiate the development of a site-specific facility agreement, if appropriate, during an initial inspection of a facility (see §716.6); and ensure that an inspection adheres to the Convention, the Act and any warrant issued thereunder, and a site-specific facility agreement, if concluded.
§ 716.2 Purposes and types of inspections of declared facilities.

(a) Schedule 1 facilities. (1) Purposes of inspections. The aim of inspections of Schedule 1 facilities is to verify that:

(i) The facility is not used to produce any Schedule 1 chemical, except for the declared Schedule 1 chemicals;
(ii) The quantities of Schedule 1 chemicals produced, processed or consumed are correctly declared and consistent with needs for the declared purpose; and
(iii) The Schedule 1 chemical is not diverted or used for purposes other than those declared.

(2) Types of inspections. (i) Initial inspections. During initial inspections of declared Schedule 1 facilities, in addition to the verification activities listed in paragraph (a)(1) of this section, the Host Team and the Inspection Team will draft site-specific facility agreements (see §716.6) for the conduct of routine inspections.

(ii) Routine inspections. During routine inspections of declared Schedule 1 facilities, the verification activities listed in paragraph (a)(1) of this section will be carried out pursuant to site-specific facility agreements (§716.6) developed during the initial inspections and concluded between the U.S. Government and the OPCW pursuant to the Convention.

(b) Schedule 2 plant sites. (1) Purposes of inspections. (i) The general aim of inspections of declared Schedule 2 plant sites is to verify that activities are in accordance with obligations under the Convention and consistent with the information provided in declarations. Particular aims of inspections of declared Schedule 2 plant sites are to verify:

(A) The absence of any Schedule 1 chemical, especially its production, except if in accordance with the provisions of the Convention;
(B) Consistency with declarations of levels of production, processing or consumption of Schedule 2 chemicals; and
(C) That Schedule 2 chemicals are not diverted to activities prohibited under the Convention.

(ii) During initial inspections, inspectors shall collect information to determine the frequency and intensity of subsequent inspections by assessing the risk to the object and purpose of the Convention posed by the relevant chemicals, the characteristics of the plant site and the nature of the activities carried out there. The inspectors will take the following criteria into account, inter alia:

(A) The toxicity of the scheduled chemicals and of the end-products produced with them, if any;
(B) The quantity of the scheduled chemicals typically stored at the inspected site;
(C) The quantity of feedstock chemicals for the scheduled chemicals typically stored at the inspected site;
(D) The production capacity of the Schedule 2 plants; and
(E) The capability and convertibility for initiating production, storage and filling of toxic chemicals at the inspected site.

(2) Types of inspections. (i) Initial inspections. During initial inspections of declared Schedule 2 plant sites, in addition to the verification activities listed in paragraph (b)(1) of this section, the Host Team and the Inspection Team will generally draft site-specific facility agreements for the conduct of routine inspections (see §716.6).

(ii) Routine inspections. During routine inspections of declared Schedule 2 plant sites, the verification activities listed in paragraph (b)(1) of this section will be carried out pursuant to any appropriate site-specific facility agreements developed during the initial inspections (see §716.6), and concluded between the U.S. Government and the OPCW pursuant to the Convention and the Act.

(c) Schedule 3 plant sites. (1) Purposes of inspections. The general aim of inspections of declared Schedule 3 plant sites is to verify that activities are consistent with the information provided in declarations. The particular aim of inspections is to verify the absence of any Schedule 1 chemical, especially its production, except in accordance with the Convention.

(ii) Routine inspections. During routine inspections of declared Schedule 3 plant sites, in addition to the verification activities listed in paragraph (c)(1) of this section, the Host Team and the Inspection Team may draft site-specific facility agreements
§ 716.3 Consent to inspections; warrants for inspections.

(a) The owner, operator, occupant or agent in charge of a facility may consent to an initial or routine inspection. The individual giving consent on behalf of the facility represents that he or she has the authority to make this decision for the facility.

(b) In instances where consent is not provided by the owner, operator, occupant or agent in charge for an initial or routine inspection, the Department of Commerce intends to seek administrative warrants as provided by the Act.

§ 716.4 Scope and conduct of inspections.

(a) General. Each inspection shall be limited to the purposes described in §716.2 and shall be conducted in the least intrusive manner, consistent with the effective and timely accomplishment of its purpose as provided in the Convention.

(b) Scope. (1) Description of inspections. During inspections, inspectors will receive a pre-inspection briefing from facility representatives; visually inspect the facilities or plants producing scheduled chemicals or UDOCs, which may include storage areas, feed lines, reaction vessels and ancillary equipment, control equipment, associated laboratories, first aid or medical sections, and waste and effluent handling areas, as necessary to accomplish their inspection; examine relevant records; and may take samples as provided by the Convention, the Act and consistent with the requirements set forth by the Director of the United States National Authority (USNA) at 22 CFR part 103, and the facility agreement, if applicable.

(2) Routine inspections. During routine inspections of declared UDOC plant sites, in addition to the verification activities listed in paragraph (d)(1) of this section, the Host Team and the Inspection Team may develop draft site-specific facility agreements for the conduct of subsequent routine inspections (see §716.6). Although the Convention does not require facility agreements for declared Schedule 3 plant sites, the owner, operator, occupant or agent in charge of a plant site may request one. The Host Team will not seek a facility agreement if the owner, operator, occupant or agent in charge of the plant site does not request one. Subsequent routine inspections will be carried out pursuant to site-specific facility agreements, if applicable.
commencement of the inspection, facility representatives will provide to the Inspection Team and Host Team a pre-inspection briefing on the facility, the activities carried out there, safety measures, and administrative and logistical arrangements necessary for the inspection, which may be aided with the use of maps and other documentation as deemed appropriate by the facility. The time spent for the briefing will be limited to the minimum necessary and may not exceed three hours.

(1) The pre-inspection briefing will address:
   (i) Plant site safety and alarms;
   (ii) Activities, business and manufacturing operations;
   (iii) Physical layout;
   (iv) Delimitation of declared facility;
   (v) Scheduled chemicals/chemistries (declared and undeclared);
   (vi) Process flow;
   (vii) Units specific to declared operations; and
   (viii) Administrative and logistic information.

(2) The pre-inspection briefing may also address, inter alia:
   (i) Introduction of key facility personnel;
   (ii) Management, organization and history;
   (iii) Confidential business information concerns;
   (iv) Types and location of records/documents;
   (v) Data declaration updates/revisions;
   (vi) Draft facility agreement, if applicable; and
   (vii) Proposed inspection plan.

(d) Visual plant inspection. The Inspection Team may visually inspect the declared plant or facility and other areas of the plant site or facility as agreed by the Host Team Leader after consulting with the facility representative.

(e) Records review. The facility must have available for the Inspection Team to review, on the inspection site, access to all supporting materials and documentation used by the facility to prepare declarations and to comply with the CWCR (see §§721.1 and 721.2 of this subchapter). Such access may be to paper copies or via electronic remote access by computer during the inspection period or as otherwise agreed upon by the Inspection Team and Host Team Leader.

(f) Effect of facility agreements. Routine inspections at facilities for which the United States has concluded a facility agreement with the OPCW will be conducted in accordance with the facility agreement. The existence of a facility agreement does not in any way limit the right of the owner, operator, occupant, or agent in charge of the facility to withhold consent to an inspection request.

(g) Hours of inspections. Consistent with the provisions of the Convention, the Host Team will ensure, to the extent possible, that each inspection is commenced, conducted, and concluded during ordinary working hours, but no inspection shall be prohibited or otherwise disrupted from commencing, continuing or concluding during other hours.

(h) Health and safety regulations and requirements. In carrying out their activities, the Inspection Team and Host Team shall observe federal, state, and local health and safety regulations and health and safety requirements established at the inspection site, including those for the protection of controlled environments within a facility and for personal safety. Such health and safety regulations and requirements will be set forth in, but will not necessarily be limited to, the facility agreement, if applicable.

(i) Preliminary factual findings. Upon completion of an inspection, the Inspection Team will meet with the Host Team and facility personnel to review the written preliminary findings of the Inspection Team and to clarify ambiguities. The Host Team will discuss the preliminary findings with the facility, and the Host Team Leader will take into consideration the facility's input when providing official comment on the preliminary findings to the Inspection Team. This meeting will be completed not later than 24 hours after the completion of the inspection.

§ 716.5 Notification, duration and frequency of inspections.

(a) Notification. (1)(i) Content of notice. Inspections of facilities may be made
only upon issuance of written notice by the United States National Authority (USNA) to the owner and to the operator, occupant or agent in charge of the premises to be inspected. The Department of Commerce will also provide a separate Host Team notification to the inspection point of contact identified in declarations submitted by the facility. If the United States is unable to provide actual written notice to the owner, operator, or agent in charge, the Department of Commerce, or if the Department of Commerce is unable, the Federal Bureau of Investigation, may post notice prominently at the facility to be inspected. The notice shall include all appropriate information provided by the OPCW to the USNA concerning:

(A) The type of inspection;
(B) The basis for the selection of the facility or location for the type of inspection sought;
(C) The time and date that the inspection will begin and the period covered by the inspection; and
(D) The names and titles of the inspectors.

(ii) In addition to appropriate information provided by the OPCW in its notification to the USNA, the Department of Commerce's Host Team notification will request that the facility indicate whether it will consent to an inspection, and will state whether an advance team is available to assist the site in preparation for the inspection. If an advance team is available, facilities that request advance team assistance are not required to reimburse the U.S. Government for costs associated with these activities. If a facility does not agree to provide consent to an inspection within four hours of receipt of the Host Team notification, BXA intends to seek an administrative warrant.

(iii) The following table sets forth the notification procedures for inspection:

<table>
<thead>
<tr>
<th>Activity</th>
<th>Agency action</th>
<th>Facility action</th>
</tr>
</thead>
<tbody>
<tr>
<td>(A) OPCW notification of inspection.</td>
<td>(i) U.S. National Authority transmits actual written notice and inspection authorization to the owner and operator, occupant, or agent in charge via facsimile within 6 hours. (ii) Upon notification from the U.S. National Authority, BXA immediately transmits Host Team notification via facsimile to the inspection point of contact to ascertain whether the facility (1) grants consent and (2) requests assistance in preparing for the inspection. In absence of consent within four hours of transmission, BXA intends to seek an administrative warrant. (iii) If advance team support is provided, facility works with the advance team on inspection-related issues.</td>
<td>(i) Indicates whether it grants consent. (ii) May request advance team support. No requirement for reimbursement of U.S. Government’s services.</td>
</tr>
<tr>
<td>(B) Preparation for inspection</td>
<td>(i) BXA advance team arrives in the vicinity of the facility to be inspected 1-2 days after OPCW notification for logistical and administrative preparations.</td>
<td>(i) Acknowledge receipt of fax.</td>
</tr>
</tbody>
</table>

(2) Timing of notice. (i) Schedule 1 facilities. For declared Schedule 1 facilities, the Technical Secretariat will notify the USNA of an initial inspection not less than 72 hours prior to arrival of the inspection team in the United States, and will notify the USNA of a routine inspection not less than 24 hours prior to arrival of the Inspection Team in the United States. The USNA will provide written notice to the owner and to the operator, occupant or agent in charge of the premises within six hours of receiving notification from the OPCW Technical Secretariat or as soon as possible thereafter. The Department of Commerce will provide Host Team notice to the inspection point of contact of the facility as soon as possible after the OPCW notifies the USNA of the inspection.

(ii) Schedule 2 plant sites. For declared Schedule 2 plant sites, the Technical Secretariat will notify the USNA of an initial or routine inspection not less than 48 hours prior to arrival of the Inspection Team at the plant site to be inspected. The USNA will provide written notice to the owner and to the operator, occupant or agent in charge of

the premises within six hours of receiving notification from the OPCW Technical Secretariat or as soon as possible thereafter. The Department of Commerce will provide Host Team notice to the inspection point of contact at the plant site as soon as possible after the OPCW notifies the USNA of the inspection.

(iii) Schedule 3 and unscheduled discrete organic chemical plant sites. For declared Schedule 3 and unscheduled discrete organic chemical plant sites, the Technical Secretariat will notify the USNA of an initial or routine inspection not less than 120 hours prior to arrival of the Inspection Team at the plant site to be inspected. The USNA will provide written notice to the owner and to the operator, occupant or agent in charge of the premises within six hours of receiving notification from the OPCW Technical Secretariat or as soon as possible thereafter. The Department of Commerce will provide Host Team notice to the inspection point of contact of the plant site as soon as possible after the OPCW notifies the USNA of the inspection.

(b) Period of inspections. (1) Schedule 1 facilities. For a declared Schedule 1 facility, the Convention does not specify a maximum duration for an initial inspection. The estimated period of routine inspections will be as stated in the facility agreement, unless extended by agreement between the Inspection Team and the Host Team Leader. The Host Team Leader will consult with the inspected facility on any request for extension of an inspection prior to making an agreement with the Inspection Team. Activities involving the pre-inspection briefing and preliminary findings are in addition to inspection activities. See §716.4(c) and (i) for a description of these activities.

(2) Schedule 2 plant sites. For declared Schedule 2 plant sites, the maximum duration of initial and routine inspections shall be 96 hours, unless extended by agreement between the Inspection Team and the Host Team Leader. The Host Team Leader will consult with the inspected plant site on any request for extension of an inspection prior to making an agreement with the Inspection Team. Activities involving the pre-inspection briefing and preliminary findings are in addition to inspection activities. See §716.4(c) and (i) for a description of these activities.

(3) Schedule 3 and discrete organic chemical plant sites. For declared Schedule 3 or unscheduled discrete organic chemical plant sites, the maximum duration of initial and routine inspections shall be 24 hours, unless extended by agreement between the Inspection Team and the Host Team Leader. The Host Team Leader will consult with the inspected plant site on any request for extension of an inspection prior to making an agreement with the Inspection Team. Activities involving the pre-inspection briefing and preliminary findings are in addition to inspection activities. See §716.4(c) and (i) for a description of these activities.

(c) Frequency of inspections. The frequency of inspections is as follows:

(1) Schedule 1 facilities. As provided by the Convention, the frequency of inspections at declared Schedule 1 facilities is determined by the OPCW based on the risk to the object and purpose of the Convention posed by the quantities of chemicals produced, the characteristics of the facility and the nature of the activities carried out at the facility. The frequency of inspections will be stated in the facility agreement.

(2) Schedule 2 plant sites. As provided by the Convention and the Act, the maximum number of inspections at declared Schedule 2 plant sites is 2 per calendar year per plant site. The OPCW will determine the frequency of routine inspections for each declared Schedule 2 plant site based on the inspectors' assessment of the risk to the object and purpose of the Convention posed by the relevant chemicals, the characteristics of the plant site, and the nature of the activities carried out there. The frequency of inspections will be stated in the facility agreement, if applicable.

(3) Schedule 3 plant sites. As provided by the Convention, no declared Schedule 3 plant site may receive more than two inspections per calendar year and the combined number of inspections of Schedule 3 and unscheduled discrete organic chemical plant sites in the United States may not exceed 20 per calendar year.
§ 716.6 Facility agreements.

(a) Description and requirements. A facility agreement is a site-specific agreement between the U.S. Government and the OPCW. Its purpose is to define procedures for inspections of a specific declared facility that is subject to inspection because of the type or amount of chemicals it produces, processes or consumes.

(1) Schedule 1 facilities. The Convention requires that facility agreements be concluded between the United States and the OPCW for all declared Schedule 1 facilities.

(2) Schedule 2 plant sites. The USNA will ensure that such facility agreements are concluded with the OPCW unless the owner, operator, occupant or agent in charge of the plant site and the OPCW Technical Secretariat agree that such a facility agreement is not necessary.

(3) Schedule 3 and unscheduled discrete organic chemical plant sites. If the owner, operator, occupant or agent in charge of a declared Schedule 3 or unscheduled discrete organic chemical plant site requests a facility agreement, the USNA will ensure that a facility agreement for such a plant site is concluded with the OPCW.

(b) Notification; negotiation of draft and final facility agreements; and conclusion of facility agreements. Prior to the development of a facility agreement, the Department of Commerce shall notify the owner, operator, occupant, or agent in charge of the facility, and if the owner, operator, occupant or agent in charge so requests, the notified person may participate in preparations with Department of Commerce representatives for the negotiation of such an agreement. During the initial inspection of a declared facility, the Inspection Team and the Host Team will negotiate a draft facility agreement.

To the maximum extent practicable consistent with the Convention, the owner and the operator, occupant or agent in charge of the facility may observe facility agreement negotiations between the U.S. Government and OPCW. As a general rule, BXA will consult with the affected facility on the contents of the agreements and take facility comments into consideration during negotiations. The Department of Commerce will participate in the negotiation of, and approve, all final facility agreements with the OPCW. Facilities will be notified of and have the right to observe final facility agreement negotiations between the United States and OPCW to the maximum extent practicable, consistent with the Convention. Prior to the conclusion of a final facility agreement, the affected facility will have an opportunity to comment on the facility agreement. BXA will give consideration to such comments prior to approving final facility agreements with the OPCW.

The United States National Authority shall ensure that facility agreements for Schedule 1, Schedule 2, Schedule 3 and unscheduled discrete organic chemical facilities are concluded, as appropriate, with the OPCW in coordination with the Department of Commerce.

(c) Format and content. Schedule 1 and Schedule 2 model facility agreements are included in Supplement No. 2 and Supplement No. 3 to this part. These model facility agreements implement the general provisions of the Convention pertaining to inspections, including health and safety procedures, confidentiality of information, media and public relations, information about the facility, inspection equipment, pre-inspection activities, conduct of the inspection (including access to and inspection of areas, buildings and structures, access to and inspection of records and documentation, arrangements for interviews of facility personnel, photographs, sampling, and measurements), and logistical arrangements for the inspectors, such as communications and lodging. Attachments to the facility agreements will provide site-specific information such as working hours, special safety and health procedures, as well as site-specific agreements as to documents and...
Bureau of Export Administration, Commerce

§ 716.7 Samples.

The owner, operator, occupant or agent in charge of a facility must provide a sample as provided for in the Convention and consistent with requirements set forth by the Director of the United States National Authority in 22 CFR part 103.

§ 716.8 On-site monitoring of Schedule 1 facilities.

Declared Schedule 1 facilities are subject to verification by monitoring with on-site instruments as provided by the Convention. For facilities subject to the CWCR, however, such monitoring is not anticipated. The U.S. Government will ensure that any monitoring that may be requested by the OPCW is carried out pursuant to the Convention and U.S. law.

§ 716.9 Report of inspection-related costs.

Pursuant to section 309(b)(5) of the Act, any facility that has undergone any inspections pursuant to this subchapter during a given calendar year must report to BXA within 90 days of an inspection on its total costs related to that inspection. Although not required, such reports should identify categories of costs separately if possible, such as personnel costs (production-line, administrative, legal), costs of producing records, and costs associated with shutting down chemical production or processing during inspections, if applicable. This information should be reported to BXA on company letterhead at the address given in §716.6(d), with the following notation: “Attn: Report of inspection-related costs.”

SUPPLEMENT NO. 2 TO PART 716—MODEL FACILITY AGREEMENT

Draft Model Agreement specifying the general form and content for facility agreements to be concluded pursuant to Verification Annex, Part VI, paragraph 31 (other facilities). Facility Agreement between the Organization for the Prohibition of Chemical Weapons and the Government of the United States of America Regarding On-site Inspections at the ______ Facility Located at the ______.
The purpose of this Agreement is to facilitate the implementation of the provisions of the Convention in relation to inspections conducted at the facility pursuant to paragraph 3 of Article VI of the Convention and in accordance with the obligations of the inspected State Party and the Organization under the Convention.

2. Nothing in this Agreement shall be applied or interpreted in a way that is contradictory to the provisions of the Convention, including paragraph 1 of Article VII. In case of inconsistency between this Agreement and the Convention, the Convention shall prevail.

3. The Parties have agreed to apply for planning purposes the general factors contained in Attachment 1.

4. The frequency and intensity of inspections at the facility are given in Part B of Attachment 1 and reflect the risk assessment of the Organization conducted pursuant to paragraphs 29 or 30 of Part VI of the Verification Annex, whichever applies.

5. The inspection team shall consist of no more than five persons.

6. The language for communication between the inspection team and the inspected State Party during inspections shall be English.

7. In case of any development due to circumstances brought about by unforeseen events or acts of nature, which could affect inspection activities at the facility, the inspected State Party shall notify the Organization and the inspection team as soon as practically possible.

8. In case of need for the urgent departure, emergency evacuation or urgent travel of inspector(s) from the territory of the inspected State Party, the inspection team leader shall inform the inspected State Party of such a need. The inspected State Party shall arrange without undue delay such departure, evacuation or travel. In all cases, the inspected State Party shall determine the means of transportation and routes to be taken. The costs of such departure, evacuation or travel of inspectors shall be borne by the Organization.

9. Inspectors shall wear identification badges at all times when on the premises of the facility.

Section 2. Health and Safety

1. Health and safety matters during inspections are governed by the Convention, the Organization’s Health and Safety Policy and Regulations, and applicable national, local and facility safety and environmental regulations. The specific arrangements for implementing the relevant provisions of the Convention and the Organization’s Health and Safety Policy in relation to inspections at the facility are contained in Attachment 2.

2. Pursuant to paragraph 1 of this section, all applicable health and safety regulations relevant to the conduct of the inspection at the facility are listed in Attachment 2 and shall be made available for use by the inspection team at the facility.

3. In case of the need to modify any health- and safety-related arrangements at the facility contained in Attachment 2 to this Agreement bearing on the conduct of inspections, the inspected State Party shall notify the Organization. Any such modification shall apply provisionally until the inspected State Party and the Organization have reached agreement on this issue. In case no agreement has been reached by the time of the completion of the inspection, the relevant information may be included in the preliminary factual findings. Any agreed modification shall be recorded in Attachment 2 to this Agreement in accordance with paragraph 2 of Section 13 of this Agreement.

4. In the course of the pre-inspection briefing the inspection team shall be briefed by the representatives of the facility on all health and safety matters which, in the view of those representatives, are relevant to the conduct of the inspection at the facility, including:

(a) The health and safety measures at the Schedule 1 facilities to be inspected and the likely risks that may be encountered during the inspection;

(b) Any additional health and safety measures or regulations that need to be observed at the facility;

(c) Procedures to be followed in case of an accident or in case of other emergencies, including a briefing on emergency signals, routes and exits, and the location of emergency meeting points and medical facilities; and

(d) Specific inspection activities which must be limited within particular areas at
the facility, and in particular within those Schedule 1 facilities to be inspected under the inspection mandate, for reasons of health and safety.

Upon request, the inspection team shall certify receipt of any such information if it is provided in written form.

5. During the course of an inspection, the inspection team shall refrain from any action which by its nature could endanger the safety of the team, the facility, or its personnel or could cause harm to the environment. Should the inspection team refuse certain inspection activities, it may explain the circumstances and safety considerations involved, and shall provide alternative measures for accomplishing the inspection activities.

6. In the case of emergency situations or accidents involving inspection team members, or at the facility, the inspection team shall comply with the facility's emergency procedures and the inspected State Party shall to the extent possible provide medical and other assistance in a timely and effective manner with due regard to the rules of medical ethics if medical assistance is requested. Information on medical services and facilities to be used for this purpose is contained in Part D of Attachment 2. If the Organization undertakes other measures for medical support in regard to inspection team members involved in emergency situations or accidents, the inspected State Party will render assistance to such measures to the extent possible. The Organization will be responsible for the consequences of such measures.

7. The inspected State party shall, to the extent possible, assist the Organization in carrying out any inquiry into an accident or incident involving a member of the inspection team.

8. If, for health and safety reasons given by the inspected State Party, health and safety equipment of the inspected State Party is required to be used by the inspection team, the cost so incurred shall be borne by the inspected State Party.

9. The inspection team may use its own approved health and safety equipment. If the inspected State Party determines it to be necessary, the inspected State Party shall conduct a fit test on masks brought with the inspection team. If the inspected State Party so requests on the basis of confirmed contamination or hazardous waste requirements or regulations, any such piece of equipment involved in the inspection activities will be left at the facility at the end of the inspection. The inspection team reserves the right to destroy equipment left at the facility or witness its destruction by agreed procedures. The inspected State Party will reimburse the Organization for the loss of the inspection team's equipment.

10. In accordance with the Organization's Health and Safety Policy, the inspected State Party may provide available data based on detection and monitoring, to the agreed extent necessary to satisfy concerns that may exist regarding the health and safety of the inspection team.

Section 3. Confidentiality

1. Matters related to confidentiality are governed by the Convention, including its Confidentiality Annex and paragraph 1 of Article VII, and the Organization's Policy on Confidentiality. The specific arrangements for implementing the provisions of the Convention and the Organization's Policy on Confidentiality in relation to the protection of confidential information at the facility are contained in Attachment 3.

2. Upon request, the inspected State Party will procure a container placed under joint seal to maintain documents that the inspection team, inspected State Party, or the facility representative decides to keep as reference for future inspections. The inspected State Party shall be reimbursed by the Organization for the purchase of such container.

3. All documents, including photographs, provided to the inspection team will be controlled as follows:

(a) Information to be taken off-site. Information relevant to the finalization of the preliminary factual findings that the inspected State Party permits the inspection team to take off-site will be marked and numbered by the inspected State Party. In accordance with the inspected State Party's Procedures for Information Control, markings on the information will clearly state that the inspection team may take it off-site and will contain a classification pursuant to the Organization's Policy on Confidentiality at a level requested by the inspected State Party. The representative of the facility will acknowledge the release of such information in writing prior to disclosure to the inspection team.

(b) Information restricted for use on-site. Information that the inspected State Party permits the inspection team to use on-site during inspections but not take off-site will be marked and numbered by the inspected State Party. In accordance with the inspected State Party's Procedures for Information Control, markings on the information will clearly restrict its use on-site and will contain a classification pursuant to the Organization's Policy on Confidentiality at a level requested by the inspected State Party. The representative of the facility will acknowledge the release of such information in writing prior to disclosure to the inspection team. Upon conclusion of the inspection, the inspection team shall return the information to the inspected State Party, and the facility representative shall acknowledge receipt in...
writing. If so requested by the inspection team, the information can be placed in the joint sealed container for future reference.

(c) Information restricted for use on-site and requiring direct supervision. Information that the inspected State Party permits the inspection team to use on-site only under direct supervision of the inspected State Party or the representative of the inspected facility will be marked and numbered by the inspected State Party. In accordance with the inspected State Party’s Procedures for Information Control, markings on the information will clearly restrict its use on-site under direct supervision and will contain a classification pursuant to the Organization’s Policy on Media and Public Relations Policy. The representative of the facility will acknowledge receipt of such information in writing prior to disclosure to the inspection team. The inspection team shall return the information to the inspected State Party immediately upon completion of review and the facility representative shall acknowledge receipt in writing. If so requested by the inspection team, the information can be placed in the joint sealed container for future reference.

Section 4. Media and Public Relations

1. Inspection team media and public relations are governed by the Organization’s Media and Public Relations Policy. The specific arrangements for the inspection team’s contacts with the media or the public, if any, in relation to inspections of the facility are contained in Attachment 4.

Section 5. Inspection Equipment

1. As agreed between the inspected State Party and the Organization, the approved equipment listed in Part A of Attachment 5 and with which the inspected State Party has been given the opportunity to familiarize itself will, at the discretion of the Organization and on a routine basis, be used specifically for the Schedule I inspection. The equipment will be used in accordance with the Convention, the relevant decisions taken by the Conference of States Parties, and any agreed procedures contained in Attachment 5.

2. The provisions of paragraph 1 above are without prejudice to paragraphs 27 to 29 of Part II of the Verification Annex.

3. The items of equipment available on-site, not belonging to the Organization, which the inspected State Party has volunteered to provide to the inspection team upon its request for use on-site during the conduct of inspections, together with any procedures for the use of such equipment, if required, any requested support which can be provided, and conditions for the provision of equipment are listed in Part B of Attachment 5. Prior to any use of such equipment, the inspection team may confirm that the performance characteristics of such equipment are consistent with those for similar Organization-approved equipment, or, with respect to items of equipment which are not on the list of Organization-approved equipment, are consistent with the intended purpose for using such equipment.2

4. Requests from the inspection team for the inspected State Party during the inspection to provide equipment mentioned in paragraph 3 above shall be made in writing by an authorized member of the inspection team using the form contained in Attachment 5. The same procedure will also apply to other requests of the inspection team in accordance with paragraph 30 of Part II of the Verification Annex.

5. Agreed procedures for the decontamination of any equipment are contained in Part C of Attachment 5.

6. For the purpose of verification, the list of agreed-on-site monitoring instruments, if any, as well as agreed conditions, procedures for use, maintenance, repair, modification, replacement and provisions for the inspected State Party’s support, if required, installation points, and security measures to prevent tampering with such on-site monitoring instruments are contained in Part D of Attachment 5.

Section 6. Pre-Inspection Activities

1. The inspection team shall be given a pre-inspection briefing by the representatives of the facility in accordance with paragraph 37 of Part II of the Verification Annex. The pre-inspection briefing shall include:

(a) Information on the facility as described in Attachment 6;

(b) Health and safety specifications described in Section 2 above and detailed in Attachment 2;

(c) Any changes to the above-mentioned information since the last inspection; and

(d) Information on administrative and logistical arrangements additional to those contained in Attachment 10, if any, that shall apply during the inspection, as contained in Section 10.

2. Any information about the facility that the inspected State Party has volunteered to provide to the inspection team during the pre-inspection briefing with indications as to which information may be transferred off-site is referenced in Part B of Attachment 6.

2i.e. The inspection team may confirm that the performance characteristics of such equipment meet the technical requirements necessary to support the inspection task intended to be accomplished.
7.1 Standing Arrangements

1. The inspection period shall begin immediately upon completion of the pre-inspection briefing unless agreed otherwise. Upon completion of the pre-inspection briefing, the inspected State Party may, on a voluntary basis, provide a site tour at the request of the inspection team. Arrangements for the conduct of a site tour, if any, are contained in Attachment 7.

2. Upon conclusion of the pre-inspection briefing, the inspection team leader shall provide to the designated representative of the inspected State Party a preliminary inspection plan to facilitate the conduct of the inspection.

3. Before commencement of inspection activities, the inspection team leader shall inform the representative of the inspected State Party about the initial steps to be taken in implementing the inspection plan. The plan will be adjusted by the inspection team as circumstances warrant throughout the inspection process in consultation with the inspected State Party as to its implementability in regard to paragraph 40 of Part II of the Verification Annex.

4. The activities of the inspection team shall be so arranged as to ensure the timely and effective discharge of its functions and the least possible inconvenience to the inspected State Party and disturbance to the facility inspected. The inspection team shall avoid unnecessarily hampering or delaying the operation of a facility and avoid affecting safety. In particular, the inspection team shall not operate the facility. If the inspection team considers that, to fulfil the mandate, particular operations should be carried out in the facility, it shall request the designated representative of the facility to have them performed.

5. At the beginning of the inspection, the inspection team shall have the right to confirm the precise location of the facility utilizing visual and map reconnaissance, a site diagram, or other suitable techniques.

6. The inspection team shall, upon request of the inspected State Party, communicate with the personnel of the facility only in the presence of or through a representative of the inspected State Party.

7. The inspected State Party shall, upon request, provide a secure work space for the inspection team, including adequate space for the storage of equipment. The inspection team shall have the right to seal its work space. For ease of inspection, the inspected State Party will work with the facility representative to provide work space at the facility, if possible.

7.2 Access to the Declared Facility

1. The object of the inspection shall be the declared Schedule I facility as referenced in Attachment 6.

2. Pursuant to paragraph 45 of Part II of the Verification Annex, the inspection team shall have unimpeded access to the declared facility in accordance with the relevant Articles and Annexes of the Convention and Attachments 6, 8, and 9.

7.3 Access to and Inspection of Documentation and Records

1. The agreed list of the documentation and records to be routinely made available for inspection purposes to the inspection team by the inspected State Party during an inspection, as well as arrangements with regard to access to such records for the purpose of protecting confidential information, are contained in Attachment 8. Such documentation and records will be provided to the inspection team upon request.

2. Only those records placed in the custody of the inspection team that are attached to the preliminary factual findings in accordance with Section 3 may leave the premises. Those records placed in the custody of the inspection team that are not attached to the preliminary factual findings must be retained in the inspection team’s on-site container or returned to the inspected State Party.

7.4 Sampling and Analysis

1. Without prejudice to paragraphs 52 to 58 of Part II of the Verification Annex, procedures for sampling and analysis for verification purposes are contained in Attachment 9.

2. Sampling and analysis, for inspection purposes, may be carried out to fulfill the inspection mandate. Each such sample will be split into a minimum of four parts at the request of the inspection team in accordance with Part C of Attachment 9. One part shall be analyzed in a timely manner on-site. The second part of the split sample may be controlled by the inspection team for future reference and, if necessary, analysis off-site at laboratories designated by the Organization. That part of the sample may be destroyed at any time in the future upon the decision of the inspection team but in any case no later than 60 days after it was taken. The third part may be retained by the inspected State Party. The fourth part may be retained by the facility.

3. Pursuant to paragraph 52 of the Part II of the Verification Annex, representatives of the inspected State Party or facility shall take samples at the request of the inspection team.
team in the presence of inspectors. The inspected State Party will inform the inspection team of the authorized facility representative's determination of whether the sample shall be taken by representatives of the facility or the inspection team or other individuals present. If inspectors are granted the right to take samples themselves in accordance with paragraph 52 of Part II of the Verification Annex, the relevant advance agreement between the inspection team and the inspected State Party shall be in writing. The representatives of the inspected State Party or the inspected facility shall have the right to be present during sampling. Agreed conditions and procedures for such sample collection are contained in Part B of Attachment 9 to this Agreement.

4. Facility sampling equipment shall as a rule be used for taking samples required for the purposes of the inspection. This is without prejudice to the right of the inspection team pursuant to paragraph 27 of Part II of the Verification Annex to use its own approved sampling equipment in accordance with paragraph 1 of Section 5 and Parts A and B of Attachment 5 to this Agreement.

5. Should the inspection team request that a sample be taken and the inspected State Party be unable to accede or agree to the request, the inspected State Party will make every reasonable effort to satisfy the inspection team's concerns by other means to enable the inspection team to fulfil its mandate. The inspected State Party will provide a written explanation for its inability to accede or agree to the request. Any such response shall be supported by relevant document(s). The explanation of the inspected State Party shall be included in the preliminary factual findings.

6. In accordance with paragraph 53 of Part II of the Verification Annex, where possible, the analysis of samples shall be performed on-site and the inspection team shall have the right to perform on-site analysis of samples using approved equipment brought by it for the splitting, preparation, handling, analysis, integrity and transport of samples. The assistance that will be provided by the inspected State Party and the analysis procedures to be followed are contained in Part D of Attachment 9 to this Agreement.

7. The inspection team may request the inspected State Party to perform the analysis in the inspection team's presence. The inspection team shall have the right to be present during any sampling and analysis conducted by the inspected State Party.

8. The results of such analysis shall be reported in writing as soon as possible after the sample is taken.

9. The inspection team shall have the right to request repeat analysis or clarification in connection with ambiguities.

10. If at any time, and for any reason, on-site analysis is not possible, the inspection team has the right to have sample(s) analyzed off-site at Organization-designated laboratories. In selecting such designated laboratories for the off-site analysis, the Organization will give due regard to requirements of the inspected State Party.

11. Transportation of samples will be in accordance with the procedures outlined in Part E of Attachment 9.

12. If at any time, the inspected State Party or facility representative determines that inspection team on-site analysis activities are not in accordance with the facility agreement or agreed analysis procedures, or otherwise pose a threat to safety or environmental regulations or laws, the inspected State Party, in consultation with the facility representative, will cease these on-site activities pending resolution. If both parties cannot agree to proceed with the analysis, the inspection team will document this in its preliminary factual findings.

13. Conditions and procedures for the disposal of hazardous materials generated during sampling and on-site analysis during the inspection are contained in Part F of Attachment 9 to this Agreement.

7.5 Arrangements for Interviews

1. The inspection team shall have the right, subject to applicable United States legal protections for individuals, to interview any facility personnel in the presence of representatives of the inspected State Party with the purpose of establishing relevant facts in accordance with paragraph 46 of Part II of the Verification Annex and inspected State Party's policy and procedures. Agreed procedures for conducting interviews are contained in Attachment 11.

2. The inspection team will submit to the inspected State Party names and/or positions of those desired for interviews. The requested individual(s) will be made available to the inspection team no later than 24 hours after submission of the formal request, unless agreed otherwise. The inspection team may also be requested to submit questions in writing prior to conducting interviews. The specific timing and location of interviews will be determined with the facility in coordination with the inspected State Party and consistent with adequate notification of the interviewees, and minimizing the operation impacts on the facility and individuals to be interviewed.

3. The inspected State Party may recommend to the inspection team that interviews be conducted in either “panel” or individual formats. At a minimum, interviews
will be conducted with a member of the facility staff and an inspected State Party representative. Legal counsel may also be required to be present by the inspected State Party. The interview may be interrupted for consultation between the interviewee, the facility representative, the inspected State Party representative, and legal counsel.

4. The inspected State Party will have the right to restrict the content of interviews to information directly related to the mandate or purpose of the inspection.

5. Outside the inspection process and in discharging their functions, inspectors shall communicate with personnel of the facility only through the representative(s) of the inspected State Party.

7.6 Communications

1. In accordance with paragraph 44 of Part II of the Verification Annex, the inspection team shall have the right to communicate with the headquarters of the Technical Secretariat. For this purpose they may use their own, duly certified approved equipment, in accordance with paragraph 1 of Section 5. The representative of the inspected facility retains the right to control the use of communications equipment in specific areas, buildings, or structures if such use would be incompatible with applicable safety or fire regulations.

2. In case the inspection team and the inspected State Party agree to use any of the inspected State Party’s communications equipment, the list of such equipment and the provisions for its use are contained in Part B of Attachment 5 to this Agreement. If the objection is raised due to safety concerns, the inspected State Party shall provide a written explanation of its objection to the inspection team leader. The explanation, along with the inspection team leader's comments will be included in the inspection team's preliminary factual findings.

7.7 Photographs

1. In accordance with the provisions of paragraph 48 of Part II of the Verification Annex, the Confidentiality Annex and inspected State Party’s policy and procedures, the inspection team shall have the right to have photographs taken at their request by the representatives of the inspected State Party or the inspected facility. One camera of the instant development type furnished by the inspection team or the inspected State Party shall be used for taking identical photographs in sequence. Cameras furnished by the inspection team will remain either in their work space or equipment storage area except when carried by inspection team members for a specific inspection activity. Cameras will only be used for specified inspection purposes. Personal cameras are not allowed to be taken to the facility.

2. Pursuant to the Confidentiality Annex, the inspected State Party, in consultation with the facility representative, shall have the right to determine that contents of the photographs conform to the stated purpose of the photographs. The inspection team shall determine whether photographs conform to those requested and, if not, repeat photographs shall be taken. Photographs that do not meet the satisfaction of both sides will be destroyed by the inspected State Party in the presence of the inspection team. The inspection team, the inspected State Party and the facility, if so requested, shall each retain one copy of every photograph. The copies shall be signed, dated, and classified, in accordance with Section 3, and note the location and subject of the photograph and carry the same identification number. Agreed procedures for photography are contained in Attachment 12.

3. The representative of the inspected facility has the right to object to the use of photographic equipment in specific areas, buildings or structures if such use would be incompatible with safety or fire regulations. If the use of photographic equipment is not permissible at all in specific areas, buildings or structures for the reasons stated above, the inspected State Party shall provide a written explanation of its objection to the inspection team leader. The explanation, along with the inspection team leader’s comments will be included in the inspection team’s preliminary factual findings.

Section 8. Visits

1. This section applies to visits conducted pursuant to paragraphs 15 and 16 of Part III of the Verification Annex.

2. The size of a team on such a visit shall be kept to the minimum number of personnel necessary to perform the specific tasks for which the visit is being conducted and shall in any case not exceed the size of inspection team referenced in paragraph 5 of Section 1.

3. The duration of the visit pursuant to this Section shall be limited to the minimum time required to perform the specific tasks relating to monitoring systems for which the visit is being conducted and in any case shall not exceed the estimated period of inspection referenced in Part B of Attachment 1 of this Agreement.

4. Access provided to the monitoring systems during the visit shall be limited to that required to perform the specific tasks for which the visit is being conducted, unless otherwise agreed to with the inspected State Party.
Pt. 716, Supp. 2

5. General arrangements and notifications for a visit shall be the same as for the conduct of an inspection.

Section 9. Debriefing and Preliminary Findings

1. In accordance with paragraph 60 of Part II of the Verification Annex, upon completion of an inspection the inspection team shall meet with representatives of the inspected State Party and the personnel responsible for the inspection site to review the preliminary findings of the inspection team and to clarify any ambiguities. The inspection team shall provide to the representatives of the inspected State Party its preliminary findings in written form according to a standardized format, together with a list of any samples and copies of written information and data gathered and other material to be taken off-site. The document shall be signed by the head of the inspection team. In order to indicate that he has taken notice of the contents of the document, the representative of the inspected State Party shall countersign the document. The meeting shall be completed not later than 24 hours after the completion of the inspection.

2. The document on preliminary findings shall also include, inter alia, the list of results of analysis, if conducted on-site, records of seals, results of inventories, copies of photographs to be retained by the inspection team, and results of specified measurements. It will be prepared in accordance with the preliminary findings format referenced in Annex 5. Any substantive changes to this format will be made only after consultation with the inspected State Party.

3. Before the conclusion of the debriefing, the inspected State Party may provide comments and clarifications to the inspection team on any issue related to the conduct of the inspection. The inspection team shall provide to the representative of the inspected State Party its preliminary findings in written form sufficiently prior to the conclusion of the debriefing to permit the inspected State Party to prepare any comments and clarifications. The inspected State Party’s written comments and clarifications shall be attached to the document on preliminary findings.

4. The inspection team shall depart from the site upon the conclusion of the meeting on preliminary findings.

Section 10. Administrative Arrangements

1. The inspected State Party shall provide or arrange for the provision of the amenities listed in detail in Attachment 10 to the inspection team throughout the duration of the inspection. The inspected State Party shall be reimbursed by the Organization for such costs incurred by the inspection team, unless agreed otherwise.

2. Requests from the inspection team for the inspected State Party to provide or arrange amenities shall be made in writing by an authorized member of the inspection team using the form contained in Attachment 10. Requests shall be made as soon as the need for amenities has been identified. The provision of such requested amenities shall be certified in writing by the authorized member of the inspection team. Copies of all such certified requests shall be kept by both parties.

3. The inspection team has the right to refuse extra amenities that in its view are not needed for the conduct of the inspection.

Section 11. Liabilities

1. Any claim by the inspected State Party against the Organization or by the Organization against the inspected State Party in respect of any alleged damage or injury resulting from inspections at the facility in accordance with this Agreement, without prejudice to paragraph 22 of the Confidentiality Annex, shall be settled in accordance with international law and, as appropriate, with the provisions of Article XIV of the Convention.

Section 12. Status of Attachments

1. The Attachments form an integral part of this Agreement. Any reference to the Agreement includes the Attachments. However, in case of any inconsistency between this Agreement and any Attachment, the sections of the Agreement shall prevail.

Section 13. Amendments, Modifications and Updates

1. Amendments to the sections of this Agreement may be proposed by either Party and shall be agreed to and enter into force under the same conditions as provided for under paragraph 1 of Section 15.

2. Modifications to the Attachments of this Agreement, other than Attachment 1 and Part B of Attachment 5, may be agreed upon at any time between the representative of the Organization and the representative of the inspected State Party, each being specifically authorized to do so. The Director-General shall inform the Executive Council about any such modifications. Each Party to this Agreement may revoke its consent to a modification not later than four weeks after it had been agreed upon. After this time period the modification shall take effect.

3. The inspected State Party will update Part A of Attachment 1 and Part B of Attachment 5 and Attachment 6 as necessary for the effective conduct of inspections. The

4. The name of the authorized member(s) of the inspection team should be communicated to the inspected State Party no later than at the Point of Entry.
Organization will update Part B of Attachment 1 and Annex 5, subject to paragraph 2 of Section 9, as necessary for the effective conduct of inspections.

Section 14. Settlement of Disputes

1. Any dispute between the Parties that may arise out of the application or interpretation of this Agreement shall be settled in accordance with Article XIV of the Convention.

Section 15. Entry Into Force

1. This Agreement shall enter into force after approval by the Executive Council and signature by the two Parties. If the inspected State Party has additional internal requirements, it shall so notify the Organization in writing by the date of signature. In such cases, this Agreement shall enter into force on the date that the inspected State Party gives the Organization written notification that its internal requirements for entry into force have been met.

Section 16. Duration and Termination

1. This Agreement shall cease to be in force when, as determined by the Executive Council, the provisions of paragraphs 3 and 8 of Article VI and Part VI of the Verification Annex no longer apply to this facility.

Done at ___ in copies, in English, each being equally authentic.

ATTACHMENTS

The following attachments shall be completed where applicable:

Attachment 1: General Factors for the Conduct of Inspections
Attachment 2: Health and Safety Requirements and Procedures
Attachment 3: Specific Arrangements in Relation to the Protection of Confidential Information at the Facility
Attachment 4: Arrangements for the Inspection Team’s Contacts with the Media or the Public
Attachment 5: Inspection Equipment
Attachment 6: Information on the Facility Provided in Accordance with Section 6
Attachment 7: Arrangements for Site Tour
Attachment 8: Records Routinely Made Available to the Inspection Team at the Facility
Attachment 9: Sampling and Analysis for Verification Purposes
Attachment 10: Administrative Arrangements
Attachment 11: Agreed Procedures for Conducting Interviews

The language(s) to be chosen by the inspected State Party from the languages of the Convention shall be the same as the language(s) referred to in paragraph 6 of Section 1 of this Agreement.

Attachment 12: Agreed Procedures for Photography

ATTACHMENT 1—GENERAL FACTORS FOR THE CONDUCT OF INSPECTIONS

Part A. To Be Provided and Updated by the inspected State Party:

1. Schedule 1 facility(s) working hours, if applicable: ___ hrs to ___ hrs (local time) (days)
2. Working days:
3. Holidays or other non-working days:
4. Inspection activities which could not be supported during non-working hours with notation of times and activities:
5. Any other factors that could adversely affect the effective conduct of inspections:
   (a) inspection requests:
      Should the facility withhold consent to an inspection, the inspected State Party shall take all appropriate action under its law to obtain a search warrant from a United States magistrate judge. Upon receipt of a warrant, the inspected State Party will accede to the Organization’s request to conduct an inspection. Such inspection will be carried out in accordance with the terms and conditions of the warrant.
   (b) other:
6. Other notification procedures are contained in Annex 6.

Part B. To Be Provided and Updated by the Organization:

1. Inspection frequency:
2. Inspection intensity:
   (a) maximum estimated period of inspection (for planning purposes):
   (b) approximate inspection team size:
   (c) estimated volume and weight of equipment to be brought on-site:

ATTACHMENT 2

Health and Safety Requirements and Procedures

Part A. Basic Principles:

1. Applicable health and safety regulations of the Organization, with agreed variations from strict implementation, if any:

2. Health and safety regulations applicable at the facility:
   (a) federal regulations:
   (b) state regulations:

All references to time use a 24 hour clock.

Choose one option.
Pt. 716, Supp. 2

(c) local regulations:

(d) facility regulations:

3. Health and safety requirements and regulations agreed between the inspected State Party and the Organization:

Part B. Detection and Monitoring:
1. Applicable specific safety standards for workplace chemical exposure limits and/or concentrations which should be observed during the inspection, if any:

2. Procedures for detection and monitoring in accordance with the Organization's Health and Safety Policy, including data to be collected by, or provided to, the inspection team:

Part C. Protection:
1. Applicable specific safety standards for the inspected facility between inspections is listed representative of the inspected State Party.

2. Protective equipment to be provided by the inspected State Party, and agreed procedures and personnel for equipment certification and use, if required:

Part D. Medical Requirements:
1. Applicable medical standards of the inspected State Party and, in particular, the inspected facility:

2. Medical screening procedures for members of the inspection team:

3. Agreed medical assistance to be provided by the inspected State Party:

4. Emergency medical evacuation procedures:

5. Agreed additional medical measures to be taken by the inspection team:

6. Procedures for emergency response to chemical casualties of the inspection team:

Part E. Modification of Inspection Activities:
1. Modification of inspection activities due to health and safety reasons, and agreed alternatives to accomplish the inspection goals:

ATTACHMENT 3—SPECIFIC ARRANGEMENTS IN RELATION TO THE PROTECTION OF CONFIDENTIAL INFORMATION AT THE FACILITY

Part B. Specific Procedures for Access by the Inspection Team to Confidential Areas or Materials:

Procedures in Relation to the Certification by the Inspection Team of the Receipt of Any Documents Provided by the Inspected Facility:

Part C. Storage of Confidential Documents at the Inspected Facility:
1. Procedures in relation to the storage of confidential documents or use of a dual control container on-site, if applicable information under restrictions provided for in the Confidentiality Annex and as such to be kept in the dual control container under joint seal shall be available to the inspection team leader and/or an inspector designated by him from the beginning of the pre-inspection briefing until the end of the debriefing upon completion of the inspection. If copies of information under dual control are permitted to be attached to the preliminary factual findings by the inspected State Party, they shall be made by the inspected State Party and retained under dual control until the debriefing. Should the medium on which such information is recorded become unusable, it shall be replaced without delay by the representative of the inspected State Party.

2. The dual control container will be placed

3. Information meeting the strict requirements for restriction pursuant to the Confidentiality Annex, and to be maintained in the dual control container located at the inspected facility between inspections is listed below:

152
**Part D. Procedures for the Removal Off-Site of Any Written Information, Data, and Other Material Gathered by the Inspection Team:**

1. Unless specified otherwise, all facility information shall be returned to the inspected State Party at the completion of the inspection. No copies of facility information shall be made in any manner by the inspection team or the Organization.
2. Facility information shall not be released to the public, other States Parties, or the media without the specific permission of the inspected State Party, after consultation with the facility.
3. Facility information shall not be transmitted, copied or retained electronically without the specific permission of the inspected State Party after consultation with the facility. All transmissions of information off-site shall be done in the presence of the inspected State Party.
4. Information not relevant to the purpose of the inspection will be purged from documents, photographs, etc. prior to release to the inspection team.

Annex 2: Organization’s Health and Safety Policy and Regulations
Annex 3: Organization’s Policy on Confidentiality
Annex 4: Facility Declaration
Annex 5: Preliminary and Final Inspection Report Formats
Annex 6: Inspected State Party’s Procedures for Inspection Notification
Annex 7: Inspected State Party’s Procedures for Information Control

Supplement No. 3 to Part 716—Schedule 2 Model Facility Agreement

Draft Facility Agreement Between the Organization for the Prohibition of Chemical Weapons and the Government of the United States of America Regarding On-Site Inspections at the Plant Site Located at

The Organization for the Prohibition of Chemical Weapons, hereinafter referred to as “Organization,” and the Government of the United States of America, hereinafter referred to as “inspected State Party,” both constituting the Parties to this Agreement, have agreed on the following arrangements in relation to the conduct of inspections pursuant to paragraph 4 of Article VI of the Convention on the Prohibition of the Development, Production, Stockpiling and Use of Chemical Weapons and on their Destruction,
hereinafter referred to as “the Convention,” at (insert name of the plant site, its precise location, including the address), declared under paragraphs 7 and 8 of Article VI, hereinafter referred to as “plant site”:

Section 1. General Provisions
1. The purpose of this Agreement is to facilitate the implementation of the provisions of the Convention in relation to inspections conducted at the plant site pursuant to paragraph 4 of Article VI of the Convention, and in accordance with the obligations of the inspected State Party and the Organization under the Convention.

2. Nothing in this Agreement shall be applied or interpreted in a way that is contradictory to the provisions of the Convention, including paragraph 1 of Article VII. In case of inconsistency between this Agreement and the Convention, the Convention shall prevail.

3. The Parties have agreed to apply for planning purposes the general factors contained in Attachment 1.

4. The frequency and intensity of inspections at the plant site are given in Part B of Attachment 1 and reflect the risk assessment of the Organization conducted pursuant to paragraphs 18, 20 and 24 of Part VII of the Verification Annex.

5. The inspection team shall consist of no more than 10 persons.

6. The language for communication between the inspection team and the inspected State Party during inspections shall be English.

7. The period of inspection shall not last more than ninety-six (96) hours, unless an extension has been agreed to by the inspected State Party and the inspection team.

8. In case of any development due to circumstances brought about by unforeseen events or acts of nature, which could affect inspection activities at the plant site, the inspected State Party shall notify the Organization. Any such modification shall apply provisionally until the inspected State Party and the Organization have reached agreement on this issue. In case no agreement has been reached by the time of the completion of the inspection, the relevant information may be included in the preliminary factual findings. Any agreed modification shall be recorded in Attachment 2.

9. In the course of the pre-inspection briefing, the inspection team shall be briefed by the representatives of the plant site on all health and safety matters which, in the view of those representatives, are relevant to the conduct of the inspection at the plant site, including:

(a) the health and safety measures at the plant site; the likely risks that may be encountered during the inspection;
(b) any additional health and safety or regulations that need to be observed at the plant site;
(c) procedures to be followed in case of an accident or in case of other emergencies, including a briefing on emergency signals, routes and exits, and the location of emergency meeting points and medical facilities; and
(d) specific inspection activities which must be limited within particular areas at the plant site.

10. Inspectors shall wear identification badges at all times when on the premises of the plant site.

Section 2. Health and Safety
1. Health and safety matters during inspections are governed by the Convention, the Organization’s Health and Safety Policy and Regulations, and applicable national, local and plant site safety and environmental regulations. The specific arrangements for implementing the relevant provisions of the Convention and the Organization’s Health and Safety Policy in relation to inspections at the plant site are contained in Attachment 2.

2. Pursuant to paragraph 1 of this section, all applicable health and safety regulations relevant to the conduct of the inspection at the plant site are listed in Attachment 2 and shall be made available for use by the inspection team at the plant site.

3. In case of the need to modify any health and safety-related arrangements at the plant site contained in Attachment 2, the inspected State Party and the Organization shall apply provisionally until the inspected State Party and the Organization have reached agreement on this issue. In case no agreement has been reached by the time of the completion of the inspection, the relevant information may be included in the preliminary factual findings. Any agreed modification shall be recorded in Attachment 2 to this Agreement in accordance with paragraph 2 of Section 12 of this Agreement.

4. In the course of the pre-inspection briefing, the inspection team shall be briefed by the representatives of the plant site on all health and safety matters which, in the view of those representatives, are relevant to the conduct of the inspection at the plant site, including:

(a) the health and safety measures at the plant site; the likely risks that may be encountered during the inspection;
(b) any additional health and safety or regulations that need to be observed at the plant site;
(c) procedures to be followed in case of an accident or in case of other emergencies, including a briefing on emergency signals, routes and exits, and the location of emergency meeting points and medical facilities; and
(d) specific inspection activities which must be limited within particular areas at the plant site.

Upon request, the inspection team shall certify receipt of any such information if it is provided in written form.
5. During the course of an inspection, the inspection team shall refrain from any action which by its nature could endanger the safety of the team, the plant site, or its personnel or could cause harm to the environment. Should the inspected State Party refuse certain inspection activities, it may explain the circumstances and safety considerations involved, and shall provide alternative means for accomplishing the inspection activities.

6. In the case of emergency situations or accidents involving inspection team members while at the plant site, the inspection team shall comply with the plant site’s emergency procedures and the inspected State Party shall to the extent possible provide medical and other assistance in a timely and effective manner with due regard to the rules of medical ethics if medical assistance is requested. Information on medical services and facilities to be used for this purpose is contained in Part D of Attachment 2.

If the Organization undertakes other measures for medical support in regard to inspection team members involved in emergency situations or accidents, the inspected State Party will render assistance to such measures to the extent possible. The Organization will be responsible for the consequences of such measures.

7. The inspected State party shall, to the extent possible, assist the Organization in carrying out any inquiry into an accident or incident involving a member of the inspection team.

8. If, for health and safety reasons given by the inspected State Party, health and safety equipment of the inspected State Party is required to be used by the inspection team, the cost so incurred shall be borne by the inspected State Party.

9. The inspection team may use its own approved health and safety equipment. If the inspected State Party determines it to be necessary, the inspected State Party shall conduct a fit test on masks brought with the inspection team. If the inspected State Party so requests on the basis of confirmed contamination or hazardous waste requirements or regulations, any such piece of equipment involved in the inspection activities will be left at the plant site at the end of the inspection. The inspection team reserves the right to destroy equipment left at the plant site or witness its destruction by agreed procedures. The inspected State Party will reimburse the Organization for the loss of the inspection team’s equipment.

10. In accordance with the Organization’s Health and Safety Policy, the inspected State Party may provide available data based on detection and monitoring, to the extent necessary to satisfy concerns that may exist regarding the health and safety of the inspection team.
the inspected State Party permits the inspection team to use on-site only under direct supervision of the inspected State Party or the representative of the inspected plant site, and not belonging to the Organization which has given the opportunity to familiarize itself will, at the discretion of the Organization and on a routine basis, be used specifically for the Schedule 2 inspection. The items of equipment available on-site and not belonging to the Organization which the inspected State Party has volunteered to provide to the inspection team upon its request for use on-site during the conduct of inspections, together with any procedures for the use of such equipment, if required, any requested support which can be provided, and conditions for the provision of equipment are listed in Part A of Attachment 5. Prior to any use of such equipment, the inspection team may confirm that the performance characteristics of such equipment are consistent with those for similar Organization-approved equipment, or—with respect to items of equipment which are not on the list of Organization-approved equipment—are consistent with the intended purpose for using such equipment.2

4. Requests from the inspection team for the inspected State Party during the inspection to provide equipment mentioned in paragraph 3 above shall be made in writing by an authorized member of the inspection team using the form contained in Attachment 5. The same procedure will also apply to other requests of the inspection team in accordance with paragraph 30 of Part II of the Verification Annex.

5. Agreed procedures for the decontamination of any equipment are contained in Part C of Attachment 5.

Section 6. Pre-Inspection Activities

1. The inspection team shall be given a pre-inspection briefing by the representatives of the plant site in accordance with paragraph 37 of Part II of the Verification Annex. The pre-inspection briefing shall include:
   (a) information on the plant site as described in Attachment 6;
   (b) health and safety specifications described in Section 2 above and detailed in Attachment 2;
   (c) any changes to the above-mentioned information since the last inspection; and
   (d) information on administrative and logistical arrangements additional to those contained in Attachment 11, if any, that shall apply during the inspection, as contained in Section 9.

2. Any information about the plant site that the inspected State Party has volunteered to provide to the inspection team during the pre-inspection briefing with indications as to which information may be transferred off-site is referenced in Part B of Attachment 6.

Section 7. Conduct of the Inspection

7.1 Standing Arrangements

1. The inspection period shall begin immediately upon completion of the pre-inspection briefing unless agreed otherwise.

2. Upon conclusion of the pre-inspection briefing, the inspection team leader shall provide to the designated representative of the inspected State Party a preliminary inspection plan to facilitate the conduct of the inspection.

3. Arrangements for the conduct of a site tour, if any, are contained in Attachment 7 to this Agreement.

---

2I.e., the inspection team may confirm that the performance characteristics of such equipment meet the technical requirements necessary to support the inspection task intended to be accomplished.
4. Before commencement of inspection activities, the inspection team leader shall inform the representative of the inspected State Party about the initial steps to be taken in implementing the inspection plan. The plan will be adjusted by the inspection team as circumstances warrant throughout the inspection process in consultation with the inspected State Party as to its implementability in regard to paragraph 40 of Part II of the Verification Annex.\(^3\)

5. The inspection team leader shall inform the representative of the inspected State Party during the inspection in a timely manner about each subsequent step to be taken by the inspection team in implementing the inspection plan. Without prejudice to paragraph 40 of Part II of the Verification Annex, this shall be done in time to allow the inspected State Party to arrange for the necessary measures to be taken to provide access and support to the inspection team as appropriate without causing unnecessary delay in the conduct of inspection activities.

6. At the beginning of the inspection, the inspection team shall have the right to confirm the precise location of the plant site utilizing visual and map reconnaissance, a site diagram, or other suitable techniques.

7. The inspection team shall, upon request of the inspected State Party, communicate with the personnel of the plant site only in the presence of or through a representative of the inspected State Party.

8. The inspection team shall, upon request, provide a secure work space for the inspection team, including adequate space for the storage of equipment. The inspection team shall have the right to seal its work space. For ease of inspection, the inspected State Party will work with the plant site representative to provide work space at the plant site, if possible.

7.2 Access to and Inspection of Areas, Buildings and Structures

1. The focus of the inspection shall be the declared Schedule 2 plant(s) within the declared plant site as referenced in Attachment 8. If the inspection team requests access to other parts of the plant site, access to these areas shall be granted in accordance with the obligation to provide clarification pursuant to paragraph 51 of Part II and paragraph 25 of Part VII of the Verification Annex, and in accordance with Attachment 8.

2. Pursuant to paragraph 45 of Part II of the Verification Annex, the inspection team shall have unimpeded access to the declared Schedule 2 plant(s) in accordance with the relevant Articles and Annexes of the Convention and Attachments 8, 9, and 10. Areas of the declared plant(s) likely to be inspected are mentioned in paragraph 28 of Part VII of the Verification Annex. Pursuant to Section C of Part X of the Verification Annex, the inspection team shall have managed access to the other areas of the plant site. Procedures for access to these areas are contained in Attachment 8.

7.3 Access to and Inspection of Documentation and Records

1. The agreed list of the documentation and records to be routinely made available for inspection purposes, mentioned in paragraph 26 of Part VII of the Verification Annex, to the inspection team by the inspected State Party during an inspection, as well as arrangements with regard to access to such records for the purpose of protecting confidential information, are contained in Attachment 9. Such documentation and records will be provided upon request.

2. Only those records placed in the custody of the inspection team that are attached to the preliminary factual findings in accordance with Section 3 may leave the premises. Those records placed in the custody of the inspection team that are not attached to the preliminary factual findings must be retained in the on-site container or returned to the inspected State Party.

7.4 Sampling and Analysis

1. Without prejudice to paragraphs 52 to 58 of Part II of the Verification Annex, procedures for sampling and analysis for verification purposes as mentioned in paragraph 27 of Part VII of the Verification Annex are contained in Attachment 10 of this Agreement.

2. Sampling and analysis, for inspection purposes, may be carried out to check whether undeclared scheduled chemicals are detected. Each such sample will be split into a minimum of four parts at the request of the inspection team in accordance with Part C of Attachment 10. One part shall be analyzed in a timely manner on-site. The second part of the split sample may be controlled by the inspection team for future reference and, if necessary, analysis off-site at laboratories designated by the Organization. That part of the sample may be destroyed at any time in...
the future upon the decision of the inspection team but in no case no later than 60 days after it was taken. The third part may be retained by the inspected State Party. The fourth part may be retained by the plant site.

3. Pursuant to paragraph 52 of the Part II of the Verification Annex, representatives of the inspected State Party or plant site shall take samples at the request of the inspection team in the presence of inspectors. The inspected State Party will inform the inspection team of the authorized plant site representative’s determination of whether the sample shall be taken by representatives of the plant site or the inspection team or other individuals present. If inspectors are granted the right to take samples themselves in accordance with paragraph 52 of Part II of the Verification Annex, the relevant advance agreement between the inspection team and the inspected State Party shall be in writing. The representatives of the inspected State Party and the plant site shall have the right to be present during sampling. Agreed conditions and procedures for such sample collection are contained in Part B of Attachment 10 to this Agreement.

4. Plant site sampling equipment shall as a rule be used for taking samples required for the purposes of the inspection. This is without prejudice to the right of the inspection team pursuant to paragraph 27 of Part II of the Verification Annex to use its own approved sampling equipment in accordance with paragraph 1 of Section 5 and Parts A and B of Attachment 5 to this Agreement.

5. Should the inspection team request that a sample be taken and the inspected State Party be unable to accede or agree to the request, the inspected State Party will make every reasonable effort to satisfy the inspection team’s concerns by other means to enable the inspection team to fulfill its mandate. The inspected State Party will provide a written explanation for its inability to accede or agree to the request. Any such response shall be supported by relevant document(s). The explanation of the inspected State Party shall be included in the preliminary factual findings.

6. In accordance with paragraph 53 of Part II of the Verification Annex, where possible, the analysis of samples shall be performed on-site and the inspection team shall have the right to perform on-site analysis of samples using approved equipment brought by it for the splitting, preparation, handling, analysis, integrity and transport of samples. The assistance that will be provided by the inspected State Party and the analysis procedures to be followed are contained in Part D of Attachment 10 to this Agreement.

7. The inspection team may request the inspected State Party to perform the analysis in the inspection team’s presence. The inspection team shall have the right to be present during any sampling and analysis conducted by the inspected State Party.

8. The results of such analysis shall be reported in writing as soon as possible after the sample is taken.

9. The inspection team shall have the right to request repeat analysis or clarification in connection with ambiguities.

10. If at any time, and for any reason, on-site analysis is not possible, the inspection team has the right to have sample(s) analyzed off-site at Organization-designated laboratories. In selecting such designated laboratories for the off-site analysis, the Organization will give due regard to requirements of the inspected State Party.

11. Transportation of samples will be in accordance with the procedures outlined in Part E of Attachment 10.

12. If at any time, the inspected State Party or plant site representative determines that inspection team on-site analysis activities are not in accordance with the facility agreement or agreed analysis procedures, or otherwise pose a threat to safety or environmental regulations or laws, the inspected State Party, in consultation with the plant site representative, will cease these on-site analysis activities pending resolution. If both parties cannot agree to proceed with the analysis, the inspection team will document this in its preliminary factual findings.

13. Conditions and procedures for the disposal of hazardous materials generated during sampling and on-site analysis during the inspection are contained in Part F of Attachment 10 to this Agreement.

7.5 Arrangements for Interviews

1. The inspection team shall have the right, subject to applicable United States legal protections for individuals, to interview any plant site personnel in the presence of representatives of the inspected State Party with the purpose of establishing relevant facts in accordance with paragraph 46 of Part II of the Verification Annex and inspected State Party’s policy and procedures. Agreed procedures for conducting interviews are contained in Attachment 12.

2. The inspection team will submit to the inspected State Party names and/or positions of those desired for interviews. The requested individual(s) will be made available to the inspection team no later than 24 hours after submission of the formal request, unless agreed otherwise. The inspection team may also be requested to submit questions in writing prior to conducting interviews.
specific timing and location of interviews will be determined with the plant site in coordination with the inspected State Party and consistent with adequate notification of the interviewees, and minimizing the operation impacts on the plant site and individuals to be interviewed.

3. The inspected State Party may recommend to the inspection team that interviews be conducted in either "panel" or individual formats. At a minimum, interviews will be conducted with a member of the plant site staff and an inspected State Party representative. Legal counsel may also be required to be present by the inspected State Party. The interview may be interrupted for consultation between the interviewee, the plant site representative, the inspected State Party representative, and legal counsel.

4. The inspected State Party will have the right to request, and the inspected State Party shall provide to the representatives of the inspected State Party its preliminary findings of the inspection and to clarify any ambiguities. The inspection team shall meet with representatives of the inspected State Party and the personnel responsible for the inspection site to review the preliminary findings of the inspection team and to clarify any ambiguities. The inspection team shall provide to the representatives of the inspected State Party its preliminary findings in written form according to a standardized format, together with a

7.7 Photographs

1. In accordance with the provisions of paragraph 48 of Part II of the Verification Annex, the Confiden
tiality Annex and inspected State Party’s policy and procedures, the inspected State Party shall be used for taking identical photographs in sequence. Cameras furnished by the inspection team will remain either in their work space or equipment storage area except when carried by inspection team members for a specific inspection activity. Cameras will only be used for specified inspection purposes. Personal cameras are not allowed to be taken to the plant site.

2. Pursuant to the Confidentiality Annex, the inspected State Party, in consultation with the plant site representative, shall have the right to determine that contents of the photographs conform to the stated purpose of the photographs. The inspection team shall determine whether photographs conform to those requested and, if not, request photographs shall be taken. Photographs that do not meet the satisfaction of both sides will be destroyed by the inspected State Party in the presence of the inspection team. The inspection team, the inspected State Party, and the plant site, if so requested, shall each retain one copy of every photograph. The copies shall be signed, dated, and classified, in accordance with Section 3, and note the location and subject of the photograph and carry the same identification number. Agreed procedures for photography are contained in Attachment 13.

3. The representative of the inspected plant site has the right to object to the use of photographic equipment in specific areas, buildings or structures if such use would be incompatible with safety or fire regulations. If the use of photographic equipment in specific areas, buildings or structures if such use would be incompatible with safety or fire regulations given the characteristics of the chemicals stored in the area in question. Restrictions for use are contained in Parts A and/or B of Attachment 5 to this Agreement. If the objection is raised due to safety concerns, the inspected State Party will, if possible, furnish photographic equipment that meets the regulations. If the use of photographic equipment is not permissible at all in specific areas, buildings or structures for the reasons stated above, the inspected State Party shall provide a written explanation of its objection to the inspection team leader. The explanation, along with the inspection team leader’s comments will be included in the inspection team’s preliminary factual findings.

Section 8. Debriefing and Preliminary Findings

1. In accordance with paragraph 60 of Part II of the Verification Annex, upon completion of an inspection the inspection team shall meet with representatives of the inspected State Party and the personnel responsible for the inspection site to review the preliminary findings of the inspection team and to clarify any ambiguities. The inspection team shall provide to the representatives of the inspected State Party its preliminary findings in written form according to a standardized format, together with a
Section 9. Administrative Arrangements

1. The inspected State Party shall provide or arrange for the provision of the amenities listed in detail in Attachment 11 to the inspection team in a timely manner throughout the duration of the inspection. The inspected State Party shall be reimbursed by the Organization for such costs incurred by the inspection team, unless agreed otherwise.

2. Requests from the inspection team for the inspected State Party to provide or arrange amenities shall be made in writing by an authorized member of the inspection team using the form contained in Attachment 11. Requests shall be made at the earliest possible time, not later than 24 hours after the completion of the inspection. The document on preliminary findings shall include, inter alia, the list of results of analysis, if conducted on-site, records of seals, and copies of photographs to be retained by the inspection team. It will be prepared in accordance with Attachment 11 to the inspection team in a timely manner throughout the duration of the inspection. The inspection team shall provide to the inspected State Party its preliminary findings in written form sufficiently prior to the conclusion of the debriefing to permit the inspected State Party to prepare any comments and clarifications. The inspected State Party’s written comments and clarifications shall be attached to the document on preliminary findings.

3. The inspection team shall depart from the site upon the conclusion of the meeting on preliminary findings.

Section 10. Liabilities

1. Any claim by the inspected State Party against the Organization or by the Organization against the inspected State Party in respect of any alleged damage or injury resulting from inspections at the plant site in accordance with this Agreement, without prejudice to paragraph 22 of the Convention, shall be settled in accordance with international law and, as appropriate, with the provisions of Article XIV of the Convention.

Section 11. Status of Attachments

1. The Attachments form an integral part of this Agreement. Any reference to the Agreement includes the Attachments. However, in case of any inconsistency between this Agreement and any Attachment, the sections of the Agreement shall prevail.

Section 12. Amendments, Modifications and Updates

1. Amendments to the sections of this Agreement may be proposed by either Party and shall be agreed to and enter into force under the same conditions as provided for under paragraph 1 of Section 14.

2. Modifications to the Attachments of this Agreement, other than Attachment 1 and Part B of Attachment 5, may be agreed upon at any time between the representative of the Organization and the representative of the inspected State Party, each being specifically authorized to do so. The Director-General shall inform the Executive Council about any such modifications. Each Party to this Agreement may revoke its consent to a modification not later than four weeks after it had been agreed upon. After this time period, the modification shall take effect.

3. The inspected State Party will update Part A of Attachment 1 and Part B of Attachment 5, and Attachment 6 as necessary for the effective conduct of inspections. The Organization will update Part B of Attachment 1 and Annex 5, subject to paragraph 2 of Section 8, as necessary for the effective conduct of inspections.

Section 13. Settlement of Disputes

1. Any dispute between the Parties that may arise out of the application or interpretation of this Agreement shall be settled in accordance with Article XIV of the Convention.

Section 14. Entry into Force

1. This Agreement shall enter into force after approval by the Executive Council and signature by the two Parties. If the inspected State Party has additional internal

5The name of the authorized member(s) of the inspection team should be communicated to the inspected State Party no later than at the Point of Entry.
requirements, it shall so notify the Organization in writing by the date of signature. In such cases, this Agreement shall enter into force on the date that the inspected State Party gives the Organization written notification that its internal requirements for entry into force have been met.

Section 15. Duration and Termination.

1. This Agreement shall cease to be in force when the provisions of paragraph 12 of Part VII of the Verification Annex no longer apply to this plant site, except if the continuation of the Agreement is agreed by mutual consent of the Parties.

Done at ___ in ____ copies, in English, each being equally authentic.6

ATTACHMENTS

The following attachments shall be completed where applicable.

Attachment 1: General Factors for the Conduct of Inspections
Attachment 2: Health and Safety Requirements and Procedures
Attachment 3: Specific Arrangements in Relation to the Protection of Confidential Information at the Plant Site
Attachment 4: Arrangements for the Inspection Team's Contacts with the Media or the Public
Attachment 5: Inspection Equipment
Attachment 6: Information on the Plant Site Provided in Accordance with Section 6
Attachment 7: Arrangements for Site Tour
Attachment 8: Access to the Plant Site in Accordance with Section 7.2.
Attachment 9: Records Routinely Made Available to the Inspection Team at the Plant Site
Attachment 10: Sampling and Analysis for Verification Purposes
Attachment 11: Administrative Arrangements
Attachment 12: Agreed Procedures for Conducting Interviews
Attachment 13: Agreed Procedures for Photography

ATTACHMENT 1—GENERAL FACTORS FOR THE CONDUCT OF INSPECTIONS

Part A. To Be Provided and Updated by the inspected State Party:

1. Plant site:
   (a) working hours: ___ hrs to ___ hrs (local time) (days)
   (b) working days:
   (c) holidays or other non-working days:

2. Schedule 2 plant(s):
   (a) working hours, if applicable: ___ hrs to ___ hrs (days)
   (b) working days:
   (c) holidays or other non-working days:

3. Inspection activities which could not be supported during non-working hours with notation of times and activities:

4. Any other factors that could adversely affect the effective conduct of inspections:

   (a) inspection requests:
   Should the plant site withhold consent to an inspection, the inspected State Party will take all appropriate action under its law to obtain a search warrant from a United States magistrate judge. Upon receipt of a warrant, the inspected State Party will accede to the Organization's request to conduct an inspection. Such inspection will be carried out in accordance with the terms and conditions of the warrant.
   
   (b) other:

5. Other: Notification procedures are contained in Annex 6.

Part B. To Be Provided and Updated by the Organization:

1. Inspection frequency:

2. Inspection intensity:

   (a) maximum estimated period of inspection (for planning purposes): ___
   (b) approximate inspection team size:
   (c) estimated volume and weight of equipment to be brought on-site:

ATTACHMENT 2—HEALTH AND SAFETY REQUIREMENTS AND PROCEDURES

Part A. Basic Principles:

1. Applicable health and safety regulations of the Organization, with agreed variations from strict implementation, if any:

   (a) federal regulations:
   (b) state regulations:
   (c) local regulations:
   (d) plant site regulations:

2. Health and safety requirements applicable at the plant site:

   (a) federal regulations:
   (b) state regulations:
   (c) local regulations:
   (d) plant site regulations:

3. Health and safety requirements and regulations agreed between the inspected State Party and the Organization:

Part B. Detection and Monitoring:

6The language(s) to be chosen by the inspected State Party from the languages of the Convention shall be the same as the language(s) referred to in paragraph 6 of Section 1 of this Agreement.

7All references to time use a 24 hour clock.

Choose one option.

Any figure indicated is without prejudice to paragraph .29 of Part VII of the Verification Annex.
Pt. 716, Supp. 3  

1. Applicable specific safety standards for workplace chemical exposure limits and/or concentrations which should be observed during the inspection, if any:

2. Procedures, if any, for detection and monitoring in accordance with the Organization’s Health and Safety Policy, including data to be collected by, or provided to, the inspection team:

Part C. Protection:

1. Protective equipment to be provided by the Organization and agreed procedures for equipment certification and use, if required:

2. Protective equipment to be provided by the inspected State Party, and agreed procedures, personnel training, and personnel qualification tests and certification required; and agreed procedures for use of the equipment:

Part D. Medical Requirements:

1. Applicable medical standards of the inspected State Party and, in particular, the inspected plant site:

2. Medical screening procedures for members of the inspection team:

3. Agreed medical assistance to be provided by the inspected State Party:

4. Emergency medical evacuation procedures:

5. Agreed additional medical measures to be taken by the inspection team:

6. Procedures for emergency response to chemical casualties of the inspection team:

Part E. Modification of Inspection Activities:

1. Modification of inspection activities due to health and safety reasons, and agreed alternatives to accomplish the inspection goals:

<table>

Part F. Procedures for Providing the Representatives of the Inspected State Party with Copies of Written Information, Inspector’s Notebooks, Data and Other Material Gathered by the Inspection Team:

Part E. Procedures for the Removal Off-Site of Any Written Information, Data, and Other Materials Gathered by the Inspection Team:

ATTACHMENT 3—SPECIFIC ARRANGEMENTS IN RELATION TO THE PROTECTION OF CONFIDENTIAL INFORMATION AT THE PLANT SITE

Part A. Inspected State Party’s Procedures for Designating and Classifying Documents Provided to the Inspection Team:

Part B. Specific Procedures for Access by the Inspection Team to Confidential Areas or Materials:

1. Procedures in relation to the certification by the Inspection Team of the receipt of any documents provided by the Inspected Plant Site:

Part C. Procedures in Relation to the Certification by the Inspected State Party’s Procedures for Information Control.

Part E. Procedures for Providing the Representatives of the Inspected State Party with Copies of Written Information, Inspector’s Notebooks, Data and Other Material Gathered by the Inspection Team:

15 CFR Ch. VII (1–1–00 Edition)
Part G. Other Arrangements, If Any:

1. Unless specified otherwise, all plant site information shall be returned to the inspected State Party after consultation with the plant site. All transmissions of information off-site shall be done in the presence of the inspected State Party.

2. Plant site information shall not be released to the public, other States Parties, or the media without the specific permission of the inspected State Party, after consultation with the plant site.

3. Plant site information shall not be transmitted, copied or retained electronically without the specific permission of the inspected State Party.

ATTACHMENT 4.—ARRANGEMENTS FOR THE INSPECTION TEAM’S CONTACTS WITH THE MEDIA OR THE PUBLIC

ATTACHMENT 5.—INSPECTION EQUIPMENT

Part A: List of Equipment:

</table>

Part D. Means of Communication between Inspection Team Sub-Teams:

REQUEST FOR AND CERTIFICATION OF EQUIPMENT AVAILABLE ON SITE TO BE PROVIDED IN ACCORDANCE WITH PARAGRAPH 3 OF SECTION 5

Date:

Plant Site:

Inspection number:

Name of the authorized member of the inspection team:

Type and number of item(s) of equipment requested:

Approval of the request by inspected State Party:

Comments on the request by the inspected State Party:

Indication of the costs, if any, for the use of the equipment requested/volunteered:

Certification of the authorized member of the inspection team that the requested item(s) of equipment have been provided:

Comments, if any, by the authorized member of the inspection team in regard to the equipment provided:

Name and signature of the authorized member of the inspection team:

Name and signature of the representative of the inspected State Party:

ATTACHMENT 6.—INFORMATION ON THE PLANT SITE PROVIDED IN ACCORDANCE WITH SECTION 6

Part A. Topics of Information for the Pre-Inspection Briefing:
ATTACHMENT 7.—ARRANGEMENTS FOR SITE TOUR

The inspected State Party, in consultation with the plant site, may provide a site tour at the request of the inspection team. Such tour shall take no more than 2 hours. If a site tour is conducted, the inspected State Party may provide explanations to the inspection team during the site tour.

ATTACHMENT 8.—ACCESS TO THE PLANT SITE IN ACCORDANCE WITH SECTION 7.2

Part A. Areas of the Declared Plant Site to which Inspectors Are Granted Access (i.e., detail the areas, equipment, and computers):
1. Declared Plant: 10
2. Declared Plant Site: 12

10Plant means a relatively self-contained area, structure or building containing one or more units with auxiliary and associated infrastructure, such as:

11Areas to be inspected may include:
(a) small administrative section;
(b) storage/handling areas for feedstock and products;
(c) effluent/waste handling/treatment area;
(d) control/analytical laboratory;
(e) first aid service/related medical section;
(f) records associated with the movement into, around and from the site, of declared chemicals and their feedstock or product chemicals formed from them, as appropriate.

(a) areas where feed chemicals (reactants) are delivered or stored;
(b) areas where manipulative processes are performed upon the reactants prior to addition to the reaction vessels;
(c) feed lines as appropriate from the areas referred to in subparagraph (a) or subparagraph (b) to the reaction vessels together with any associated valves, flow meters, etc.;
(d) the external aspect of the reaction vessels and ancillary equipment;
(e) lines from the reaction vessels leading to long- or short-term storage or to equipment further processing the declared Schedule 2 chemicals;
(f) control equipment associated with any of the items under subparagraphs (a) to (e);
(g) equipment and areas for waste and effluent handling;
(h) equipment and areas for disposition of chemicals not up to specification.

12Plant Site means the local integration of one or more plants, with any intermediate administrative levels, which are under one operational control, and includes common infrastructure, such as:

Areas to be inspected may include:
(a) small administrative section;
(b) repair and maintenance shops;
(c) medical center;
(d) utilities;
(e) central analytical laboratory;
(f) research and development laboratories;
(g) central effluent and waste treatment area; and
(h) warehouse storage.

13List the areas, equipment, and computers, if any, that are not relevant to the inspection mandate or that contain confidential business information that does not need to be divulged in order to comply with the inspection mandate.

14Some illustrative examples of records and data to be detailed are given below. The actual list will be dependent on the specifics of the inspection site. Information about the format and language in which records are kept at the plant site should be mentioned. It is understood that confidential information not related to the implementation of the Convention, such as prices, will be excluded by the State Party from scrutiny.

(a) inventory and accountancy records in relation to the production, processing or consumption of the declared Schedule 2 chemicals and their storage or transportation on to or off the site;
(b) operational records for the unit(s) producing, processing or consuming Schedule 2 chemicals (units) (batch cards, log books);
(c) Schedule 2 plant(s) dispatch records within the plant site and off-site dispatches;
(d) Schedule 2 plant(s) maintenance schedule records;
(e) Schedule 2 plant(s) waste disposal records;
(f) Schedule 2 plant(s) (unit) calibration records;
(g) Schedule 2 plant(s) sales reports, as appropriate;
(h) sales or transfers, whether to another industry, trader, or other destination, and if possible, of final product types;
(i) data on direct exports/imports and to/from which States.
Bureau of Export Administration, Commerce

Part B. Procedures for Taking Samples:

Part C. Procedures for Sample Handling and Sample Splitting:

Part D. Procedures for Sample Analysis:

Part E. Procedures for Transporting Samples:

Part F. Arrangements in Regard to the Payment of Costs Associated with the Disposal or Removal by the inspected State Party of Hazardous Waste Generated during Sampling and On-Site Analysis during the Inspection:

ATTACHMENT 11—ADMINISTRATIVE ARRANGEMENTS

Part A. The Amenities Detailed Below Shall Be Provided to the Inspection Team by the inspected State Party, Subject to Payment as Indicated in Part B Below:

1. International and local official communication (telephone, fax), including calls/faxes between site and headquarters:

2. Vehicles:

3. Working room, including adequate space for the storage of equipment:

4. Lodging:

5. Meals:

6. Medical care:

7. Interpretation Services:
   (a) number of interpreters:
   (b) estimated interpretation time:
   (c) languages:

8. Other:

() other shipments, including specification of these other purposes; and (k) other.
ATTACHMENT 13.—AGREED PROCEDURES FOR PHOTOGRAPHY

ANNEXES

NOTE: These annexes, inter alia, can be attached if requested by the inspected State Party

Annex 1: Organization’s Media and Public Relations Policy
Annex 2: Organization’s Health and Safety Policy and Regulations
Annex 3: Organization’s Policy on Confidentiality
Annex 4: Plant Site Declaration
Annex 5: Preliminary and Final Inspection Report Formats
Annex 6: Inspected State Party’s Procedures for Inspection Notification
Annex 7: Inspected State Party’s Procedures for Information Control

PART 717—CLARIFICATION OF POSSIBLE NON-COMPLIANCE WITH THE CONVENTION; CHALLENGE INSPECTION PROCEDURES

§ 717.1 Clarification procedures; challenge inspection requests pursuant to Article IX of the Convention.

(a) Article IX of the Convention sets forth procedures for clarification, between States Parties, of issues about compliance with the Convention. If States Parties are unable to resolve such issues through consultation between themselves or through the Organization for the Prohibition of Chemical Weapons (OPCW), a State Party may request the OPCW to conduct an on-site challenge inspection of any facility or location in the territory or in any other place under the jurisdiction or control of any other State Party. Such an on-site challenge inspection request shall be for the sole purpose of clarifying and resolving any questions concerning possible non-compliance with the Convention.

(b) Any person or facility subject to the CWCR (parts 710 through 722 of this subchapter) must, within five working days, provide information required by the Department of Commerce pursuant to an Article IX clarification request from another State Party, or the OPCW, concerning possible non-compliance with the reporting, declaration, notification, or inspection requirements set forth in parts 712 through 716 of this subchapter.

§ 717.2 Challenge inspections.

Any person or facility subject to the CWCR (see § 710.2 of this subchapter), whether or not required to submit declarations or reports, may be subject to a challenge inspection by the OPCW concerning possible non-compliance with the requirements of the Convention. The Department of Commerce will host and escort the international Inspection Team for all challenge inspections of persons or facilities subject to the CWCR concerning possible non-compliance with the requirements set forth in parts 712 through 716 of this subchapter.

(a) Warrants. In instances where consent is not provided by the owner, operator, occupant or agent in charge of the facility or location, the Department of Justice will assist the Department of Commerce in seeking a criminal warrant as provided by the Act. The existence of a facility agreement does not in any way limit the right of the operator of the facility to withhold consent to a challenge inspection request.

(b) Notification of challenge inspection. Challenge inspections may be made only upon issuance of written notice by the United States National Authority (USNA) to the owner and to the operator, occupant or agent in charge of the premises. The Department of Commerce will provide Host Team notification to the inspection point of contact if such notification is deemed appropriate. If the United States is unable to provide actual written notice to the owner, operator, or agent in charge, the Department of Commerce, or if the Department of Commerce is unable, another appropriate agency, may post notice prominently at the plant, plant
site or other facility or location to be inspected.

(1) Timing. The OPCW will notify the USNA of a challenge inspection not less than 12 hours before the planned arrival of the Inspection Team at the U.S. point of entry. Written notice will be provided to the owner and to the operator, occupant, or agent in charge of the premises at any appropriate time determined by the USNA after receipt of notification from the OPCW Technical Secretariat.

(2)(i) Content of notice. The notice shall include all appropriate information provided by the OPCW to the United States National Authority concerning:

(A) The type of inspection;
(B) The basis for the selection of the facility or locations for the type of inspection sought;
(C) The time and date that the inspection will begin and the period covered by the inspection;
(D) The names and titles of the inspectors; and
(E) All appropriate evidence or reasons provided by the requesting State Party for seeking the inspection.

(ii) In addition to appropriate information provided by the OPCW in its notification to the USNA, the Department of Commerce's Host Team notification to the facility or plant site will state whether an advance team is available to assist the site in preparation for the inspection. If an advance team is available, facilities that request advance team assistance are not required to reimburse the U.S. Government for costs associated with these activities.

(c) Period of inspection. Challenge inspections will not exceed 84 hours, unless extended by agreement between the Inspection Team and the Host Team Leader.

(d) Scope and conduct of inspections. (1) General. Each inspection shall be limited to the purposes described in this section and conducted in the least intrusive manner, consistent with the effective and timely accomplishment of its purpose as provided in the Convention.

(2) Scope of inspections. If an owner, operator, occupant, or agent in charge of a facility or location consents to a challenge inspection, the inspection will be conducted in accordance with the provisions of Article IX and applicable provisions of the Verification Annex of the Convention. If consent is not granted, the inspection will be conducted in accordance with a criminal warrant, as provided by the Act, and in accordance with the provisions of Article IX and applicable provisions of the Verification Annex of the Convention. A challenge inspection will also be conducted in accordance with a facility agreement, if a facility agreement has been concluded for the subject facility, to the extent the terms of the facility agreement are relevant to the challenge inspection request.

(3) Hours of inspections. Consistent with the provisions of the Convention, the Host Team will ensure, to the extent possible, that each inspection is commenced, conducted, and concluded during ordinary working hours, but no inspection shall be prohibited or otherwise disrupted from commencing, continuing or concluding during other hours.

(4) Health and safety regulations and requirements. In carrying out their activities, the Inspection Team and Host Team shall observe federal, state, and local health and safety regulations and health and safety requirements established at the inspection site, including those for the protection of controlled environments within a facility and for personal safety.

§ 717.3 Samples.

The owner, operator, occupant or agent in charge of a facility or location must provide a sample, as provided for in the Convention and consistent with requirements set forth by the Director of the United States National Authority in 22 CFR part 103.

§ 717.4 Report of inspection-related costs.

Pursuant to section 309(b)(5) of the Act, any facility that has undergone any inspections pursuant to this subchapter during a given calendar year must report to BXA within 90 days of an inspection on its total costs related to that inspection. Although not required, such reports should identify
categories of costs separately if possible, such as personnel costs (production-line, administrative, legal), costs of producing records, and costs associated with shutting down chemical production or processing during inspections, if applicable. This information should be reported to BXA on company letterhead at the address given in §716.6(d) of this subchapter, with the following notation:

“ATTN: Report of Inspection-related Costs.”

PART 718—CONFIDENTIAL BUSINESS INFORMATION

Sec.
718.1 Definition.
718.2 Identification of confidential business information.
718.3 Disclosure of confidential business information.

SUPPLEMENT NO. 1 TO PART 718—CONFIDENTIAL BUSINESS INFORMATION DECLARED OR REPORTED

SOURCE: 64 FR 73802, Dec. 30, 1999, unless otherwise noted.

§718.1 Definition.

The Chemical Weapons Convention Implementation Act of 1998 (“the Act”) defines confidential business information as information included in categories specifically identified in sections 103(g)(1) and 304(e)(2) of the Act and other trade secrets as follows:

(a) Financial data;
(b) Sales and marketing data (other than shipment data);
(c) Pricing data;
(d) Personnel data;
(e) Research data;
(f) Patent data;
(g) Data maintained for compliance with environmental or occupational health and safety regulations;
(h) Data on personnel and vehicles entering and personnel passenger vehicles exiting the facility;
(i) Any chemical structure;
(j) Any plant design, process, technology or operating method;
(k) Any operating requirement, input, or result that identifies any type or quantity of chemicals used, processed or produced;

(l) Any commercial sale, shipment or use of a chemical; or

(m) Information that qualifies as a trade secret under 5 U.S.C. 552(b)(4) (Freedom of Information Act), provided such trade secret is obtained from a U.S. person or through the U.S. Government.

§718.2 Identification of confidential business information.

(a) General. Certain confidential business information submitted to BXA in declarations and reports does not need to be specifically identified and marked by the submitter, as described in paragraph (b) of this section. Other confidential business information submitted to BXA in declarations and reports and confidential business information provided to the Host Team during inspections must be identified by the inspected facility so that the Host Team can arrange appropriate marking and handling.

(b) Confidential business information contained in declarations and reports. (1) BXA has identified those data fields on the declaration and report forms that request “confidential business information” as defined by the Act. These data fields are identified in the table provided in Supplement No. 1 to this part. (2) You must specifically identify in a cover letter submitted with your declaration or report any additional information on a declaration or report form (i.e., information not provided in one of the data fields listed in the table included in Supplement No. 1 to this part), including information provided in attachments to Form A or Form B, that you believe is confidential business information, as defined by the Act, and must describe how disclosure would likely result in competitive harm.

Note to paragraph (b): BXA has also determined that descriptions of Schedule 1 facilities submitted with Initial Declarations as attachments to Form A contain confidential business information, as defined by the Act.

(c) Confidential business information contained in notifications. Information contained in advance notifications of exports and imports of Schedule 1
§ 718.3 Disclosure of confidential business information.

(a) General. Confidentiality of information will be maintained by BXA consistent with the non-disclosure provisions of the Act, the Export Administration Regulations (15 CFR parts 730 through 799), the International Traffic in Arms Regulations (22 CFR parts 120 through 130), and applicable exemptions under the Freedom of Information Act, as appropriate.

(b) Disclosure of confidential business information contained in notifications. Information contained in advance notifications of exports and imports of Schedule 1 chemicals is not subject to the confidential business information provisions of the Act. Disclosure of such information will be in accordance with the provisions of the relevant statutory and regulatory authorities as follows:

(1) Exports of Schedule 1 chemicals. Confidentiality of all information contained in these notifications will be maintained consistent with the non-disclosure provisions of the Export Administration Regulations (15 CFR parts 730 through 799), the International Traffic in Arms Regulations (22 CFR parts 120 through 130), and applicable exemptions under the Freedom of Information Act, as appropriate; and

(2) Imports of Schedule 1 chemicals. Confidentiality of information contained in these notifications will be maintained pursuant to applicable exemptions under the Freedom of Information Act.

(c) Disclosure of confidential business information pursuant to §404(b) of the Act. (1) Disclosure to the Organization for the Prohibition of Chemical Weapons (OPCW). (i) As provided by Section 404(b)(1) of the Act, the U.S. Government will disclose or otherwise provide confidential business information to the Technical Secretariat of the OPCW or to other States Parties to the Convention, in accordance with provisions of the Convention, particularly with the provisions of the Annex on the Protection of Confidential Information (Confidentiality Annex).

(ii) Convention provisions. (A) The Convention provides that States Parties may designate information submitted to the Technical Secretariat as confidential, and requires the OPCW to limit access to, and prevent disclosure of, information so designated, except that the OPCW may disclose certain confidential information submitted in declarations to other States Parties if requested. The OPCW has developed a classification system whereby States Parties may designate the information they submit in their declarations as confidential, and requires the OPCW to limit access to, and prevent disclosure of, information so designated, except that the OPCW may disclose certain confidential information submitted in declarations to other States Parties if requested. The OPCW has developed a classification system whereby States Parties may designate the information they submit in their declarations as

(b) Disclosure of confidential business information contained in notifications. Information contained in advance notifications of exports and imports of Schedule 1 chemicals is not subject to the confidential business information provisions of the Act. Disclosure of such information will be in accordance with the provisions of the relevant statutory and regulatory authorities as follows:

(1) Exports of Schedule 1 chemicals. Confidentiality of all information contained in these notifications will be maintained consistent with the non-disclosure provisions of the Export Administration Regulations (15 CFR parts 730 through 799), the International Traffic in Arms Regulations (22 CFR parts 120 through 130), and applicable exemptions under the Freedom of Information Act, as appropriate; and

(2) Imports of Schedule 1 chemicals. Confidentiality of information contained in these notifications will be maintained pursuant to applicable exemptions under the Freedom of Information Act.

(c) Disclosure of confidential business information pursuant to §404(b) of the Act. (1) Disclosure to the Organization for the Prohibition of Chemical Weapons (OPCW). (i) As provided by Section 404(b)(1) of the Act, the U.S. Government will disclose or otherwise provide confidential business information to the Technical Secretariat of the OPCW or to other States Parties to the Convention, in accordance with provisions of the Convention, particularly with the provisions of the Annex on the Protection of Confidential Information (Confidentiality Annex).

(ii) Convention provisions. (A) The Convention provides that States Parties may designate information submitted to the Technical Secretariat as confidential, and requires the OPCW to limit access to, and prevent disclosure of, information so designated, except that the OPCW may disclose certain confidential information submitted in declarations to other States Parties if requested. The OPCW has developed a classification system whereby States Parties may designate the information they submit in their declarations as confidential, and requires the OPCW to limit access to, and prevent disclosure of, information so designated, except that the OPCW may disclose certain confidential information submitted in declarations to other States Parties if requested. The OPCW has developed a classification system whereby States Parties may designate the information they submit in their declarations as
§ 718.3

"restricted," "protected," or "highly protected," depending on the sensitivity of the information. Other States Parties are obligated, under the Convention, to store and restrict access to information which they receive from the OPCW in accordance with the level of confidentiality established for that information.

(B) OPCW inspectors are prohibited, under the terms of their employment contracts and pursuant to the Confidentiality Annex of the Convention, from disclosing to any unauthorized persons, for five years after termination of their employment, any confidential information coming to their knowledge or into their possession in the performance of their official duties.

(iii) U.S. Government designation of information to the Technical Secretariat. It is the policy of the U.S. Government to designate all facility information it provides to the Technical Secretariat in declarations, reports and Schedule 1 notifications as "protected." It is the policy of the U.S. Government to designate confidential business information that it discloses to Inspection Teams during inspections as "protected" or "highly protected," depending on the sensitivity of the information. The Technical Secretariat is responsible for storing and limiting access to any confidential business information that it discloses to Inspection Teams, in accordance with procedures.

(2) Disclosure to Congress. Section 404(b)(2) of the Act provides that the U.S. Government must disclose confidential business information to any committee or subcommittee of Congress with appropriate jurisdiction upon the written request of the chairman or ranking minority member of such committee or subcommittee. No such committee or subcommittee, and no member and no staff member of such committee or subcommittee, may disclose such information or material except as otherwise required or authorized by law.

(3) Disclosure to other Federal agencies for law enforcement actions and disclosure in enforcement proceedings under the Act. Section 404(b)(3) of the Act provides that the U.S. Government must disclose confidential business information to other Federal agencies for enforcement of the Act or any other law, and must disclose such information when relevant in any proceeding under the Act. Disclosure will be made in such manner as to preserve confidentiality to the extent practicable without impairing the proceeding. Section 719.14(b) of this subchapter provides that all hearings will be closed, unless the Administrative Law Judge for good cause shown determines otherwise.

(4) Disclosure to the public; national interest determination. Section 404(c) of the Act provides that confidential business information, as defined by the Act, that is in the possession of the U.S. Government, is exempt from public disclosure in response to a Freedom of Information Act request, except when such disclosure is determined to be in the national interest.

(i) National interest determination. The United States National Authority (USNA), in coordination with the CWC interagency group, shall determine on a case-by-case basis if disclosure of confidential business information in response to a Freedom of Information Act request is in the national interest.

(ii) Notification of intent to disclose pursuant to a national interest determination. The Act provides for notification to the affected person of intent to disclose confidential business information based on the national interest, unless such notification of intent to disclose is contrary to national security or law enforcement needs. If, after coordination with the agencies that constitute the CWC interagency group, the USNA does not determine that such notification of intent to disclose is contrary to national security or law enforcement needs, the USNA will notify the person that submitted the information and the person to whom the information pertains of the intent to disclose the information.
§ 719.1 Scope and definitions.

(a) Scope. This part 719 describes the various sanctions that apply to violations of the Act and this subchapter. It also establishes detailed administrative procedures for certain violations of the Act. The three categories of violations are as follows:

(1) Violations of the Act subject to administrative and criminal enforcement proceedings. This CWCR sets forth in §719.2 violations for which the statutory basis is the Act. The Department of Commerce investigates these violations and, for administrative proceedings, prepares charges, provides legal representation to the U.S. Government, negotiates settlements, and makes recommendations to officials of the Department of State with respect to the initiation and resolution of proceedings. The administrative procedures applicable to these violations are found in §§ 719.5 through 719.22 of this part. The Department of State gives notice of initiation of administrative proceedings and issues orders imposing penalties pursuant to 22 CFR part 103, subpart C.

(2) Violations of the International Emergency Economic Powers Act (IEEPA) subject to judicial enforcement proceedings. Section 719.3 sets forth violations of the Chemical Weapons Convention for which the statutory basis is
§ 719.2 Violations of the Act subject to administrative and criminal enforcement proceedings.

(a) Violations. (1) Refusal to permit entry or inspection. No person may willfully fail or refuse to permit entry or inspection, or disrupt, delay or otherwise impede an inspection, authorized by the Act.

(2) Failure to establish or maintain records. No person may willfully fail or refuse:
   (i) To establish or maintain any record required by the Act or this subchapter; or
   (ii) To submit any report, notice, or other information to the United States Government in accordance with the Act or this subchapter; or
   (iii) To permit access to or copying of any record that is exempt from disclosure under the Act or this subchapter.

(b) Definitions. The following are definitions of terms as used only in parts 719 and 720. For definitions of terms applicable to parts 710 through 722 of this subchapter, see part 710 of this subchapter.

Assistant Secretary for Export Enforcement. The Assistant Secretary for Export Enforcement, Bureau of Export Administration, United States Department of Commerce.

Final decision. A decision or order assessing a civil penalty, or otherwise disposing of or dismissing a case, which is not subject to further administrative review, but which may be subject to collection proceedings or judicial review in an appropriate Federal court as authorized by law.

Office of Chief Counsel. The Office of Chief Counsel for Export Administration, United States Department of Commerce.

Report. For purposes of parts 719 and 720 of this subchapter, the term "report" means any declaration, report, or notification required under parts 712 through 715 of this subchapter.

Respondent. Any person named as the subject of a letter of intent to charge, or a Notice of Violation and Assessment (NOVA) and proposed order.

Under Secretary for Export Administration. The Under Secretary for Export Administration, Bureau of Export Administration, United States Department of Commerce.
(c) Criminal penalty. Any person that knowingly violates the Act by willfully failing or refusing to permit entry or inspection authorized by the Act; or by willfully disrupting, delaying or otherwise impeding an inspection authorized by the Act; or by willfully failing or refusing to establish or maintain any required record, or to submit any required report, notice, or other information; or by willfully failing or refusing to permit access to or copying of any record exempt from disclosure under the Act or CWCR, shall, in addition to or in lieu of any civil penalty that may be imposed, be fined under Title 18 of the United States Code, be imprisoned for not more than one year, or both.

(d) Denial of export privileges. Any person in the United States or any U.S. national may be subject to a denial of export privileges after notice and opportunity for hearing pursuant to part 720 of this subchapter if that person has been convicted under Title 18, section 229 of the United States Code.

§ 719.3 Violations of the IEEPA subject to judicial enforcement proceedings.

(a) Violations. (1) Import restrictions involving Schedule 1 chemicals. Except as otherwise provided in §712.1 of this subchapter, no person may import any Schedule 1 chemical (See Supplement No. 1 to part 712 of this subchapter) unless:

(i) The import is from a State Party;

(ii) The import is for research, medical, pharmaceutical, or protective purposes;

(iii) The import is in types and quantities strictly limited to those that can be justified for such purposes; and

(iv) The importing person has notified the Department of Commerce 45 calendar days prior to the import pursuant to §712.4 of this subchapter.

(2) Import restrictions involving Schedule 2 chemicals. Except as otherwise provided in §713.1 of this subchapter, no person may, on or after April 29, 2000, import any Schedule 2 chemical (see Supplement No. 1 to part 713 of this subchapter) from any destination other than a State Party.

(b) Civil penalty. A civil penalty not to exceed $11,000 may be imposed in accordance with this part on any person for each violation of this section.1

(c) Criminal penalty. Whoever willfully violates paragraph (a)(1) or (2) of this section shall, upon conviction, be fined not more than $50,000, or, if a natural person, imprisoned for not more than ten years, or both; and any officer, director, or agent of any corporation who knowingly participates in such violation may be punished by like fine, imprisonment, or both.2

§ 719.4 Violations and sanctions under the Act not subject to proceedings under this subchapter.

(a) Criminal penalties for development or use of a chemical weapon. Any person who violates 18 U.S.C. 229 shall be fined, or imprisoned for any term of years, or both. Any person who violates 18 U.S.C. 229 and by whose action the death of another person is the result shall be punished by death or imprisoned for life.

(b) Civil penalty for development or use of a chemical weapon. The Attorney General may bring a civil action in the appropriate United States district court against any person who violates 18 U.S.C. 229 and, upon proof of such violation by a preponderance of the evidence, such person shall be subject to pay a civil penalty in an amount not to exceed $100,000 for each such violation.

(c) Criminal forfeiture. (1) Any person convicted under section 229A(a) of Title 18 of the United States Code shall forfeit to the United States irrespective of any provision of State law:

(i) Any property, real or personal, owned, possessed, or used by a person involved in the offense;

1The maximum civil penalty allowed under the International Emergency Economic Powers Act is $11,000 for any violation committed on or after October 23, 1996 (15 CFR 6.4(a)(3)).

2Alternatively, sanctions may be imposed under 18 U.S.C. 3571, a criminal code provision that establishes a maximum criminal fine for a felony that is the greatest of: (1) the amount provided by the statute that was violated; (2) an amount not more than $250,000 for an individual, or not more than $500,000 for an organization; or (3) an amount based on gain or loss from the offense.
§ 719.5 Initiation of administrative proceedings.

(a) Request for Notice of Violation and Assessment (NOVA). The Director of the Office of Export Enforcement, Bureau of Export Administration, may request that the Secretary of State initiate an administrative enforcement proceeding under this § 719.5 and 22 CFR 103.7. If the request is in accordance with applicable law, the Secretary of State will initiate an administrative enforcement proceeding by issuing a NOVA. The Office of Chief Counsel shall serve the NOVA as directed by the Secretary of State.

(b) Letter of intent to charge. The Director of the Office of Export Enforcement, Bureau of Export Administration, may notify a respondent by letter of the intent to charge. This letter of intent to charge will advise a respondent that the Department of Commerce has conducted an investigation and intends to recommend that the Secretary of State issue a NOVA. The letter of intent to charge will be accompanied by a draft NOVA and proposed order, and will give the respondent a specified period of time to contact BXA to discuss settlement of the allegations set forth in the draft NOVA. An administrative enforcement proceeding is not initiated by a letter of intent to charge. If the respondent does not contact BXA within the specified time, or if the respondent requests it, BXA will make its request for initiation of an administrative enforcement proceeding to the Secretary of State in accordance with paragraph (a) of this section.

(c) Content of NOVA. The NOVA shall constitute a formal complaint, and will set forth the basis for the issuance of the proposed order. It will set forth the alleged violation(s) and the essential facts with respect to the alleged violation(s), reference the relevant statutory, regulatory or other provisions, and state the amount of the civil penalty to be assessed. The NOVA will inform the respondent of the right to request a hearing pursuant to § 719.6, inform the respondent that failure to request such a hearing shall result in the proposed order becoming final and unappealable on signature of the Secretary of State, and provide payment instructions. A copy of the regulations that govern the administrative proceedings will accompany the NOVA.

(d) Proposed order. A proposed order shall accompany every NOVA, letter of intent to charge, and draft NOVA. It will briefly set forth the substance of the alleged violation(s) and the statutory, regulatory or other provisions violated. It will state the amount of the civil penalty to be assessed.

(e) Notice. Notice of the intent to charge or of the initiation of formal proceedings shall be given to the respondent (or respondent’s agent for service of process, or attorney) by sending relevant documents, via first class mail, facsimile, or by personal delivery.

§ 719.6 Request for hearing and answer.

(a) Time to answer. If the respondent wishes to contest the NOVA and proposed order issued by the Secretary of State, the respondent must request a hearing in writing within 15 days from the date of the NOVA. If the respondent requests a hearing, the respondent
must answer the NOVA within 30 days from the date of the request for hearing. The request for hearing and answer must be filed with the Administrative Law Judge (ALJ), along with a copy of the NOVA and proposed order, and served on the Office of Chief Counsel, and any other address(es) specified in the NOVA, in accordance with §719.8.

(b) Content of answer. The respondent's answer must be responsive to the NOVA and proposed order, and must fully set forth the nature of the respondent's defense(s). The answer must specifically admit or deny each separate allegation in the NOVA; if the respondent is without knowledge, the answer will so state and will operate as a denial. Failure to deny or controvert a particular allegation will be deemed an admission of that allegation. The answer must also set forth any additional or new matter the respondent believes supports a defense or claim of mitigation. Any defense or partial defense not specifically set forth in the answer shall be deemed waived, and evidence thereon may be refused, except for good cause shown.

(c) English required. The request for hearing, answer, and all other papers and documentary evidence must be submitted in English.

(d) Waiver. The failure of the respondent to file a request for a hearing and an answer within the times provided constitutes a waiver of the respondent's right to appear and contest the allegations set forth in the NOVA and proposed order. If no hearing is requested and no answer is provided, the proposed order will be signed and become final and unappealable.

§719.7 Representation.

A respondent individual may appear and participate in person, a corporation by a duly authorized officer or employee, and a partnership by a partner. If a respondent is represented by counsel, counsel shall be a member in good standing of the bar of any State, Commonwealth or Territory of the United States, or of the District of Columbia, or be licensed to practice law in the country in which counsel resides, if not the United States. The U.S. Government will be represented by the Office of Chief Counsel. A respondent personally, or through counsel or other representative who has the power of attorney to represent the respondent, shall file a notice of appearance with the ALJ, or, in cases where settlement negotiations occur before any filing with the ALJ, with the Office of Chief Counsel.

§719.8 Filing and service of papers other than the NOVA.

(a) Filing. All papers to be filed with the ALJ shall be addressed to “CWC Administrative Enforcement Proceedings” at the address set forth in the NOVA, or such other place as the ALJ may designate. Filing by United States mail (first class postage prepaid), by express or equivalent parcel delivery service, via facsimile, or by hand delivery, is acceptable. Filing from a foreign country shall be by airmail or via facsimile. A copy of each paper filed shall be simultaneously served on all parties.

(b) Service. Service shall be made by United States mail (first class postage prepaid), by express or equivalent parcel delivery service, via facsimile, or by hand delivery of one copy of each paper to each party in the proceeding. The Department of State is a party to cases under this subchapter, but will be represented by the Office of Chief Counsel. Therefore, service on the government party in all proceedings shall be addressed to Office of Chief Counsel for Export Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Room H-3839, Washington, D.C. 20230, or faxed to (202) 482-0085. Service on a respondent shall be to the address to which the NOVA and proposed order was sent, or to such other address as the respondent may provide. When a party has appeared by counsel or other representative, service on counsel or other representative shall constitute service on that party.

(c) Date. The date of filing or service is the day when the papers are deposited in the mail or are delivered in person, by delivery service, or by facsimile. Refusal by the person to be served, or by the person's agent or attorney, of service of a document or other paper will be considered effective.
service of the document or other paper as of the date of such refusal.

(d) Certificate of service. A certificate of service signed by the party making service, stating the date and manner of service, shall accompany every paper, other than the NOVA and proposed order, filed and served on the parties.

(e) Computation of time. In computing any period of time prescribed or allowed by this part, the day of the act, event, or default from which the designated period of time begins to run is not to be included. The last day of the period so computed is to be included unless it is a Saturday, a Sunday, or a legal holiday (as defined in Rule 6(a) of the Federal Rules of Civil Procedure), in which case the period runs until the end of the next day which is neither a Saturday, a Sunday, nor a legal holiday. Intermediate Saturdays, Sundays, and legal holidays are excluded from the computation when the period of time prescribed or allowed is 7 days or less.

§ 719.9 Summary decision.

The ALJ may render a summary decision disposing of all or part of a proceeding on the motion of any party to the proceeding, provided that there is no genuine issue as to any material fact and the party is entitled to summary decision as a matter of law.

§ 719.10 Discovery.

(a) General. The parties are encouraged to engage in voluntary discovery regarding any matter, not privileged, which is relevant to the subject matter of the pending proceeding. The provisions of the Federal Rules of Civil Procedure relating to discovery apply to the extent consistent with this part and except as otherwise provided by the ALJ or by waiver or agreement of the parties. The ALJ may make any order which justice requires to protect a party or person from annoyance, embarrassment, oppression, or undue burden or expense. These orders may include limitations on the scope, method, time and place of discovery, and provisions for protecting the confidentiality of classified or otherwise sensitive information, including Confidential Business Information (CBI) as defined by the Act.

(b) Interrogatories and requests for admission or production of documents. A party may serve on any party interrogatories, requests for admission, or requests for production of documents for inspection and copying, and a party concerned may apply to the ALJ for such enforcement or protective order as that party deems warranted with respect to such discovery. The service of a discovery request shall be made at least 20 days before the scheduled date of the hearing unless the ALJ specifies a shorter time period. Copies of interrogatories, requests for admission and requests for production of documents and responses thereto shall be served on all parties and a copy of the certificate of service shall be filed with the ALJ. Matters of fact or law of which admission is requested shall be deemed admitted unless, within a period designated in the request (at least 10 days after service, or within such additional time as the ALJ may allow), the party to whom the request is directed serves upon the requesting party a sworn statement either denying specifically the matters of which admission is requested or setting forth in detail the reasons why the party to whom the request is directed cannot truthfully either admit or deny such matters.

(c) Depositions. Upon application of a party and for good cause shown, the ALJ may order the taking of the testimony of any person by deposition and the production of specified documents or materials by the person at the deposition. The application shall state the purpose of the deposition and set forth the facts sought to be established through the deposition.

(d) Enforcement. The ALJ may order a party to answer designated questions, to produce specified documents or things or to take any other action in response to a proper discovery request. If a party does not comply with such an order, the ALJ may make a determination or enter any order in the proceeding as the ALJ deems reasonable and appropriate. The ALJ may strike related charges or defenses in whole or in part or may take particular facts relating to the discovery request to which the party failed or refused to respond as being established for purposes of the proceeding in accordance with
the contentions of the party seeking discovery. In addition, enforcement by any district court of the United States in which venue is proper may be sought as appropriate.

§ 719.11 Subpoenas.

(a) Issuance. Upon the application of any party, supported by a satisfactory showing that there is substantial reason to believe that the evidence would not otherwise be available, the ALJ may issue subpoenas to any person requiring the attendance and testimony of witnesses and the production of such books, records or other documentary or physical evidence for the purpose of the hearing, as the ALJ deems relevant and material to the proceedings, and reasonable in scope. Witnesses shall be paid the same fees and mileage that are paid to witnesses in the courts of the United States. In case of contempt, challenge or refusal to obey a subpoena served upon any person pursuant to this paragraph, any district court of the United States, in which venue is proper, has jurisdiction to issue an order requiring any such person to comply with such subpoena. Any failure to obey such order of the court is punishable by the court as a contempt thereof.

(b) Service. Subpoenas issued by the ALJ may be served by any of the methods set forth in §719.8(b).

(c) Timing. Applications for subpoenas must be submitted at least 10 days before the scheduled hearing or deposition, unless the ALJ determines, for good cause shown, that extraordinary circumstances warrant a shorter time.

§ 719.12 Matters protected against disclosure.

(a) Protective measures. The ALJ may limit discovery or introduction of evidence or issue such protective or other orders as in the ALJ’s judgment may be needed to prevent undue disclosure of classified or sensitive documents or information, including Confidential Business Information as defined by the Act. Where the ALJ determines that documents containing classified or sensitive matter must be made available to a party in order to avoid prejudice, the ALJ may direct the other party to prepare an unclassified and nonsensitive summary or extract of the documents. The ALJ may compare the extract or summary with the original to ensure that it is supported by the source document and that it omits only so much as must remain undisclosed. The summary or extract may be admitted as evidence in the record.

(b) Arrangements for access. If the ALJ determines that the summary procedure outlined in paragraph (a) of this section is unsatisfactory, and that classified or otherwise sensitive matter must form part of the record in order to avoid prejudice to a party, the ALJ may provide the parties opportunity to make arrangements that permit a party or a representative to have access to such matter without compromising sensitive information. Such arrangements may include obtaining security clearances or giving counsel for a party access to sensitive information and documents subject to assurances against further disclosure, including a protective order, if necessary.

§ 719.13 Prehearing conference.

(a) On the ALJ’s own motion, or on request of a party, the ALJ may direct the parties to participate in a prehearing conference, either in person or by telephone, to consider:

(1) Simplification of issues;
(2) The necessity or desirability of amendments to pleadings;
(3) Obtaining stipulations of fact and of documents to avoid unnecessary proof; or
(4) Such other matters as may expedite the disposition of the proceedings.

(b) The ALJ may order the conference proceedings to be recorded electronically or taken by a reporter, transcribed and filed with the ALJ.

(c) If a prehearing conference is impracticable, the ALJ may direct the parties to correspond with the ALJ to achieve the purposes of such a conference.

(d) The ALJ will prepare a summary of any actions agreed on or taken pursuant to this section. The summary will include any written stipulations or agreements made by the parties.
§ 719.14 Hearings.

(a) Scheduling. Upon receipt of a written and dated request for a hearing, the ALJ shall, by agreement with all the parties or upon notice to all parties of at least 30 days, schedule a hearing. All hearings will be held in Washington, D.C., unless the ALJ determines, for good cause shown, that another location would better serve the interest of justice.

(b) Hearing procedure. Hearings will be conducted in a fair and impartial manner by the ALJ. All hearings will be closed, unless the ALJ for good cause shown determines otherwise. The rules of evidence prevailing in courts of law do not apply, and all evidentiary material deemed by the ALJ to be relevant and material to the proceeding and not unduly repetitious will be received and given appropriate weight, except that any evidence of settlement which would be excluded under Rule 408 of the Federal Rules of Evidence is not admissible. Witnesses will testify under oath or affirmation, and shall be subject to cross-examination.

(c) Testimony and record. (1) A verbatim record of the hearing and of any other oral proceedings will be taken by reporter or by electronic recording, and filed with the ALJ. If any party wishes to obtain a written copy of the transcript, that party shall pay the costs of transcription. The parties may share the costs if both wish a transcript.

(2) Upon such terms as the ALJ deems just, the ALJ may direct that the testimony of any person be taken by deposition and may admit an affidavit or declaration as evidence, provided that any affidavits or declarations have been filed and served on the parties sufficiently in advance of the hearing to permit a party to file and serve an objection thereto on the grounds that it is necessary that the affiant or declarant testify at the hearing and be subject to cross-examination.

(d) Failure to appear. If a party fails to appear in person or by counsel at a scheduled hearing, the hearing may nevertheless proceed. The party’s failure to appear will not affect the validity of the hearing or any proceeding or action taken thereafter.

§ 719.15 Procedural stipulations.

Unless otherwise ordered and subject to § 719.16, a written stipulation agreed to by all parties and filed with the ALJ will modify the procedures established by this part.

§ 719.16 Extension of time.

The parties may extend any applicable time limitation by stipulation filed with the ALJ before the time limitation expires, or the ALJ may, on the ALJ’s own initiative or upon application by any party, either before or after the expiration of any applicable time limitation, extend the time, except that the requirement that a hearing be demanded within 15 days, and the requirement that a final agency decision be made within 30 days, may not be modified.

§ 719.17 Post-hearing submissions.

All parties shall have the opportunity to file post-hearing submissions that may include findings of fact and conclusions of law, supporting evidence and legal arguments, exceptions to the ALJ’s rulings or to the admissibility of evidence, and proposed orders and settlements.

§ 719.18 Decisions.

(a) Initial decision. After considering the entire record in the case, the ALJ will issue an initial decision based on a preponderance of the evidence. The decision will include findings of fact, conclusions of law, and a decision based thereon as to whether the respondent has violated the Act. If the ALJ finds that the evidence of record is insufficient to sustain a finding that a violation has occurred with respect to one or more allegations, the ALJ shall order dismissal of the allegation(s) in whole or in part, as appropriate. If the ALJ finds that one or more violations have been committed, the ALJ shall issue an order imposing administrative sanctions.

(b) Factors considered in assessing penalties. In determining the amount of a civil penalty, the ALJ shall take into account the nature, circumstances, extent and gravity of the violation(s), and, with respect to the respondent,
the respondent's ability to pay the penalty, the effect of a civil penalty on the respondent's ability to continue to do business, the respondent's history of prior violations, the respondent's degree of culpability, the existence of an internal compliance program, and such other matters as justice may require.

(c) Certification of initial decision. The ALJ shall immediately certify the initial decision and order to the Executive Director of the Office of Legal Adviser, U.S. Department of State, 2201 C Street, N.W., Room 5513, Washington, D.C. 20520, to the Office of Chief Counsel at the address in §719.8, and to the respondent, by personal delivery or overnight mail.

(d) Review of initial decision. The initial decision shall become the final agency decision and order unless, within 30 days, the Secretary of State modifies or vacates it, with or without conditions, in accordance with 22 CFR 103.8.

§719.19 Settlement.

(a) Settlements before issuance of a NOVA. When the parties have agreed to a settlement of the case, the Director of the Office of Export Enforcement will recommend the settlement to the Secretary of State, forwarding a proposed settlement agreement and order, which, in accordance with 22 CFR 103.9(a), the Secretary of State will sign if the recommended settlement is in accordance with applicable law.

(b) Settlements following issuance of a NOVA. The parties may enter into settlement negotiations at any time during the time a case is pending before the ALJ. If necessary, the parties may extend applicable time limitations or otherwise request that the ALJ stay the proceedings while settlement negotiations continue. When the parties have agreed to a settlement of the case, the Office of Chief Counsel will recommend the settlement to the Secretary of State, forwarding a proposed settlement agreement and order, which, in accordance with 22 CFR 103.9(b), the Assistant Secretary will sign if the recommended settlement is in accordance with applicable law.

(c) Settlement scope. Any respondent who agrees to an order imposing any administrative sanction does so solely for the purpose of resolving the claims in the administrative enforcement proceeding brought under this part. This reflects the fact that the government officials involved have neither the authority nor the responsibility for initiating, conducting, settling, or otherwise disposing of criminal proceedings. That authority and responsibility are vested in the Attorney General and the Department of Justice.

(d) Finality. Cases that are settled may not be reopened or appealed.

§719.20 Record for decision.

(a) The record. The transcript of hearings, exhibits, rulings, orders, all papers and requests filed in the proceedings, and, for purposes of any appeal under §719.18 or under 22 CFR 103.8, the decision of the ALJ and such submissions as are provided for under §719.18 or 22 CFR 103.8 will constitute the record and the exclusive basis for decision. When a case is settled, the record will consist of any and all of the foregoing, as well as the NOVA or draft NOVA, settlement agreement, and order.

(b) Restricted access. On the ALJ's own motion, or on the motion of any party, the ALJ may direct that there be a restricted access portion of the record for any material in the record to which public access is restricted by law or by the terms of a protective order entered in the proceedings. A party seeking to restrict access to any portion of the record is responsible, prior to the close of the proceeding, for submitting a version of the document(s) proposed for public availability that reflects the requested deletion. The restricted access portion of the record will be placed in a separate file. The file will be clearly marked to avoid improper disclosure and to identify it as a portion of the official record in the proceedings. The ALJ may act at any time to permit material that becomes declassified or unrestricted through passage of time to be transferred to the unrestricted access portion of the record.

(c) Availability of documents. (1) Scope. All NOVAs and draft NOVAs, answers, settlement agreements, decisions and orders disposing of a case will be made available for public inspection in the
§ 719.21 Payment of final assessment.

(a) Time for payment. Full payment of the civil penalty must be made within 30 days of the date upon which the final order becomes effective, or within the time specified in the order. Payment shall be made in the manner specified in the NOVA.

(b) Enforcement of order. The government party may, through the Attorney General, file suit in an appropriate district court if necessary to enforce compliance with a final order issued under these CWCR (this subchapter). This suit will include a claim for interest at current prevailing rates from the date payment was due or ordered.

(c) Offsets. The amount of any civil penalty imposed by a final order may be deducted from any sum(s) owed by the United States to a respondent.

§ 720.1 Denial of export privileges for convictions under 18 U.S.C. 229.

Any person in the United States or any U.S. national may be denied export privileges after notice and opportunity for hearing if that person has been convicted under Title 18, Section 229 of the United States Code of knowingly:

(a) Developing, producing, otherwise acquiring, transferring directly or indirectly, receiving, stockpiling, retaining, owning, possessing, or using, or threatening to use, a chemical weapon; or

(b) Assisting or inducing, in any way, any person to violate paragraph (a) of this section, or attempting or conspiring to violate paragraph (a) of this section.

§ 720.2 Initiation of administrative action denying export privileges.

(a) Notice. BXA will notify any person convicted of Section 229, Title 18, United States Code, of BXA’s intent to deny that person’s export privileges. The notification letter shall reference the person’s conviction, specify the number of years for which BXA intends to deny export privileges, set forth the statutory and regulatory authority for the action, state whether the denial order will be standard or non-standard pursuant to Supplement No. 1 to Part 764 of the Export Administration Regulations (15 CFR parts 730 through 799), and provide that the person may request a hearing before the Administrative Law Judge within 30 days from the date of the notification letter.

(b) Waiver. The failure of the notified person to file a request for a hearing within the time provided constitutes a waiver of the person’s right to contest the denial of export privileges that BXA intends to impose.

(c) order of Assistant Secretary. If no hearing is requested, the Assistant Secretary for Export Enforcement will order that export privileges be denied as indicated in the notification letter.
§ 720.3 Final decision on administrative action denying export privileges.

(a) Hearing. Any hearing that is granted by the ALJ shall be conducted in accordance with the procedures set forth in § 719.14 of this subchapter.

(b) Initial decision and order. After considering the entire record in the proceeding, the ALJ will issue an initial decision and order based on the preponderance of the evidence. The ALJ may consider factors such as the seriousness of the criminal offense that is the basis for conviction, the nature and duration of the criminal sanctions imposed, and whether the person has undertaken any corrective measures. The ALJ may dismiss the proceeding if the evidence is insufficient to sustain a denial of export privileges, or may issue an order imposing a denial of export privileges for the length of time the ALJ deems appropriate. An order denying export privileges may be standard or non-standard, as provided in Supplement No. 1 to part 764 of the Export Administration Regulations (15 CFR parts 730 through 799). The initial decision and order will be served on each party, and will be published in the Federal Register as the final decision of the Department of Commerce 30 days after service, unless an appeal is filed in accordance with paragraph (c) of this section.

(c) Grounds for appeal. (1) A party may, within 30 days of the ALJ’s initial decision and order, petition the Under Secretary for Export Administration for review of the initial decision and order. A petition for review must be filed with the Office of Under Secretary for Export Administration, Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230, and shall be served on the Office of Chief Counsel for Export Administration or on the respondent. Petitions for review may be filed only on one or more of the following grounds:

(i) That a necessary finding of fact is omitted, erroneous or unsupported by substantial evidence of record;
(ii) That a necessary legal conclusion or finding is contrary to law;
(iii) That prejudicial procedural error occurred; or
(iv) That the decision or the extent of sanctions is arbitrary, capricious or an abuse of discretion.

(2) The appeal must specify the grounds on which the appeal is based and the provisions of the order from which the appeal was taken.

(d) Appeal procedure. The Under Secretary for Export Administration normally will not hold hearings or entertain oral arguments on appeals. A full written statement in support of the appeal must be filed with the appeal and be simultaneously served on all parties, who shall have 30 days from service to file a reply. At his/her discretion, the Under Secretary may accept new submissions, but will not ordinarily accept those submissions filed more than 30 days after the filing of the reply to the appellant’s first submission.

(e) Decisions. The Under Secretary’s decision will be in writing and will be accompanied by an order signed by the Under Secretary for Export Administration giving effect to the decision. The order may either dispose of the case by affirming, modifying or reversing the order of the ALJ, or may refer the case back to the ALJ for further proceedings. Any order that imposes a denial of export privileges will be published in the Federal Register.

§ 720.4 Effect of denial.

Any person denied export privileges pursuant to this part shall be considered a “person denied export privileges” for purposes of the Export Administration Regulations (15 CFR parts 730 through 799). The name and address of the denied person will be published on the Denied Persons List found in Supplement 2 to part 764 of the Export Administration Regulations (15 CFR parts 730 through 799).

PART 721—INSPECTION OF RECORDS AND RECORDKEEPING

Sec. 721.1 Inspection of records.
721.2 Recordkeeping.
721.3 Destruction or disposal of records.

Source: 64 FR 73810, Dec. 30, 1999, unless otherwise noted.
§ 721.1 Inspection of records.

Upon request by the Department of Commerce or any other agency of competent jurisdiction, you must permit access to and copying of any record relating to compliance with the requirements of this subchapter. This requires that you make available the equipment and, if necessary, knowledgeable personnel for locating, reading, and reproducing any record.

§ 721.2 Recordkeeping.

(a) General. Each facility required to submit a declaration, report or notification under parts 712 through 715 of this subchapter must retain all supporting materials and documentation used by a unit, plant, facility and plant site to prepare such declaration, report or notification to determine production, processing, consumption, export or import of chemicals.

(b) Five year retention period. All supporting materials and documentation required to be kept under paragraph (a) of this section must be retained for five years from the due date of the applicable declaration, report, or notification, or for five years from the date of submission of the applicable declaration, report or notification, whichever is later. Due dates for declarations, reports and notifications are provided in parts 712 through 715 of this subchapter.

(c) Location of records. If a facility is subject to inspection under part 716 of this subchapter, records retained under this section must be maintained at the facility or must be accessible electronically at the facility for purposes of inspection of the facility by Inspection Teams. If a facility is not subject to inspection under part 716 of this subchapter, records retained under this section may be maintained either at the facility subject to a declaration, report, or notification requirement, or at a remote location, but all records must be accessible to any authorized agent, official or employee of the U.S. Government under § 721.1.

(d) Reproduction of original records. (1) You may maintain reproductions instead of the original records provided all of the requirements of paragraph (b) of this section are met.

(2) If you must maintain records under this part, you may use any photostatic, miniature photographic, micrographic, automated archival storage, or other process that completely, accurately, legibly and durably reproduces the original records (whether on paper, microfilm, or through electronic digital storage techniques). The process must meet all of the following requirements, which are applicable to all systems:

(i) The system must be capable of reproducing all records on paper.

(ii) The system must record and be able to reproduce all marks, information, and other characteristics of the original record, including both obverse and reverse sides (unless blank) of paper documents in legible form.

(iii) When displayed on a viewer, monitor, or reproduced on paper, the records must exhibit a high degree of legibility and readability. For purposes of this section, legible and legibility mean the quality of a letter or numeral that enable the observer to identify it positively and quickly to the exclusion of all other letters or numerals. Readable and readability mean the quality of a group of letters or numerals being recognized as complete words or numbers.

(iv) The system must preserve the initial image (including both obverse and reverse sides, unless blank, of paper documents) and record all changes, who made them and when they were made. This information must be stored in such a manner that none of it may be altered once it is initially recorded.

(v) You must establish written procedures to identify the individuals who are responsible for the operation, use and maintenance of the system.

(vi) You must keep a record of where, when, by whom, and on what equipment the records and other information were entered into the system.

(3) Requirements applicable to a system based on digital images. For systems based on the storage of digital images, the system must provide accessibility to any digital image in the system. The system must be able to locate and reproduce all records according to the same criteria that would have been
used to organize the records had they been maintained in original form.

(4) Requirements applicable to a system based on photographic processes. For systems based on photographic, photo-static, or miniature photographic processes, the records must be maintained according to an index of all records in the system following the same criteria that would have been used to organize the records had they been maintained in original form.

§ 721.3 Destruction or disposal of records.

If the Department of Commerce or other authorized U.S. government agency makes a formal or informal request for a certain record or records, such record or records may not be destroyed or disposed of without the written authorization of the requesting entity.

PART 722—INTERPRETATIONS—[RESERVED]

NOTE: This part is reserved for interpretations of parts 710 through 721 and also for applicability of decisions by the Organization for the Prohibition of Chemical Weapons (OPCW).

SUPPLEMENT NO. 1 TO PART 730—INFORMATION COLLECTION REQUIREMENTS UNDER THE PAPERWORK REDUCTION ACT: OMB CONTROL NUMBERS

SUPPLEMENT NO. 2 TO PART 730—TECHNICAL ADVISORY COMMITTEES

SUPPLEMENT NO. 3 TO PART 730—OTHER U.S. GOVERNMENT DEPARTMENTS AND AGENCIES WITH EXPORT CONTROL RESPONSIBILITIES

Source: 61 FR 12734, Mar. 25, 1996, unless otherwise noted.

§ 730.1 What these regulations cover.

In this part, references to the Export Administration Regulations (EAR) are references to 15 CFR chapter VII, subchapter C. The EAR are issued by the United States Department of Commerce, Bureau of Export Administration (BXA) under laws relating to the control of certain exports, reexports, and activities. In addition, the EAR implement antiboycott law provisions requiring regulations to prohibit specified conduct by United States persons that has the effect of furthering or reporting boycotts fostered or imposed by a country against a country friendly to United States. Supplement No. 1 to part 730 lists the control numbers assigned to information collection requirements under the EAR by the Office of Management and Budget pursuant to the Paperwork Reduction Act of 1995.

§ 730.2 Statutory authority.

The EAR have been designed primarily to implement the Export Administration Act of 1979, as amended, 50 U.S.C. app. 2401-2420 (EAA). There are numerous other legal authorities underlying the EAR. These are listed in the FEDERAL REGISTER documents promulgating the EAR and at the beginning of each part of the EAR in the Code of Federal Regulations (CFR). From time to time, the President has exercised authority under the International Emergency Economic Powers Act with respect to the EAR (50 U.S.C. 1701-1706 (IEEPA)). The EAA is not permanent legislation, and when it has lapsed, Presidential executive orders under IEEPA have directed and authorized the continuation in force of the EAR.

§ 730.3 Dual use exports.

The convenient term dual use is sometimes used to distinguish the types of items covered by the EAR from those that are covered by the regulations of certain other U.S. government departments and agencies with export licensing responsibilities. In general, the term dual use serves to distinguish EAR-controlled items that can be used both in military and other strategic uses (e.g., nuclear) and commercial applications. In general, the term dual use serves to distinguish EAR-controlled items that can be used both in military and other strategic uses and in civil applications from those that are weapons and military...
related use or design and subject to the controls of the Department of State or subject to the nuclear related controls of the Department of Energy or the Nuclear Regulatory Commission. Note, however, that although the short-hand term dual use may be employed to refer to the entire scope of the EAR, the EAR also apply to some items that have solely civil uses.

§ 730.4 Other control agencies and departments.

In addition to the departments and agencies mentioned in § 730.3 of this part, other departments and agencies have jurisdiction over certain narrower classes of exports and reexports. These include the Department of Treasury’s Office of Foreign Assets Control (OFAC), which administers controls against certain countries that are the object of sanctions affecting not only exports and reexports, but also imports and financial dealings. For your convenience, Supplement No. 3 to part 730 identifies other departments and agencies with regulatory jurisdiction over certain types of exports and reexports. This is not a comprehensive list, and the brief descriptions are only generally indicative of the types of controls administered and/or enforced by each agency.

§ 730.5 Coverage of more than exports.

The core of the export control provisions of the EAR concerns exports from the United States. You will find, however, that some provisions give broad meaning to the term “export”, apply to transactions outside of the United States, or apply to activities other than exports.

(a) Reexports. Commodities, software, and technology that have been exported from the United States are generally subject to the EAR with respect to reexport. Many such reexports, however, may go to many destinations without a license or will qualify for an exception from licensing requirements.

(b) Foreign products. In some cases, authorization to export technology from the United States will be subject to assurances that items produced abroad that are the direct product of that technology will not be exported to certain destinations without authorization from BXA.

(c) Scope of “exports”. Certain actions that you might not regard as an “export” in other contexts do constitute an export subject to the EAR. The release of technology to a foreign national in the United States through such means as demonstration or oral briefing is deemed an export. Other examples of exports under the EAR include the return of foreign equipment to its country of origin after repair in the United States, shipments from a U.S. foreign trade zone, and the electronic transmission of non-public data that will be received abroad.

(d) U.S. person activities. To counter the proliferation of weapons of mass destruction, the EAR restrict the involvement of “United States persons” anywhere in the world in exports of foreign-origin items, or in providing services or support, that may contribute to such proliferation. The EAR also restrict technical assistance by U.S. persons with respect to encryption commodities or software.

§ 730.6 Control purposes.

The export control provisions of the EAR are intended to serve the national security, foreign policy, nonproliferation, and short supply interests of the United States and, in some cases, to carry out its international obligations. Some controls are designed to restrict access to dual use items by countries or persons that might apply such items to uses inimical to U.S. interests. These include controls designed to stem the proliferation of weapons of mass destruction and controls designed to limit the military and terrorism support capability of certain countries. The effectiveness of many of the controls under the EAR is enhanced by their being maintained as part of multilateral control arrangements. Multilateral export control cooperation is sought through arrangements such as the Nuclear Suppliers Group, the Australia Group, and the Missile Technology Control Regime. The EAR also include some export controls to protect...
§ 730.7 License requirements and exceptions.

A relatively small percentage of exports and reexports subject to the EAR require an application to BXA for a license. Many items are not on the Commerce Control List (CCL) (Supplement No. 1 to § 774.1 of the EAR), or, if on the CCL, require a license to only a limited number of countries. Other transactions may be covered by one or more of the License Exceptions in the EAR. In such cases no application need be made to BXA.

§ 730.8 How to proceed and where to get help.

(a) How the EAR are organized. The Export Administration Regulations (EAR) are structured in a logical manner. In dealing with the EAR you may find it helpful to be aware of the overall organization of these regulations. In order to determine what the rules are and what you need to do, review the titles and the introductory sections of the parts of the EAR.

(1) How do you go about determining your obligations under the EAR? Part 732 of the EAR provides steps you may follow to determine your obligations under the EAR. You will find guidance to enable you to tell whether or not your transaction is subject to the EAR and, if it is, whether it qualifies for a License Exception or must be authorized through issuance of a license.

(2) Are your items or activities subject to the EAR at all? Part 734 of the EAR defines the items and activities that are subject to the EAR. Note that the definition of “items subject to the EAR” includes, but is not limited to, items listed on the Commerce Control List in part 774 of the EAR.

(3) If subject to the EAR, what do the EAR require? Part 736 of the EAR lists all the prohibitions that are contained in the EAR. Note that certain prohibitions (General Prohibitions One through Ten) prohibit certain activities and apply to all items subject to the EAR unless otherwise indicated.

(4) Do you need a license for your item or activity? What policies will BXA apply if you do need to submit license application? The EAR have four principal ways of describing license requirements:

(i) The EAR may require a license to a country if your item is listed on the CCL and the Country Chart in part 738 of the EAR tells that a license is required to that country. Virtually all Export Control Classification Numbers (ECCN) on the CCL are covered by the Country Chart in part 738 of the EAR. That part identifies the limited number of entries that are not included on the Chart. These ECCNs will state the specific countries that require a license or refer you to a self-contained section, i.e., Short Supply in part 754 of the EAR, or Embargoes in part 746 of the EAR. If a license is required, you should consult part 740 of the EAR which describes the License Exception that may be available for items on the CCL. Part 742 of the EAR describes the licensing policies that BXA will apply in reviewing an application you file. Note that part 754 of the EAR on short supply controls and part 746 on embargoes are self-contained parts that include the available exceptions and licensing policy.

(ii) A license requirement may be based on the end-use or end-user in a transaction, primarily for proliferation reasons. Part 744 of the EAR describes such requirements and relevant licensing policies and includes both restrictions on items and restrictions on the activities of U.S. persons.

(iii) A license is required for virtually all exports to embargoed destinations, such as Cuba. Part 746 of the EAR describes all the licensing requirements, license review policies and License Exceptions that apply to such destinations. If your transaction involves one of these countries, you should first look at this part. This part also describes controls that may be maintained under the EAR to implement UN sanctions.

(iv) In addition, under §§ 736.2(b)(9) and (10) of the EAR, you may not engage in a transaction knowing a violation is about to occur or violate any orders, terms, and conditions under the
EAR. Part 764 of the EAR describes prohibited transactions with a person denied export privileges or activity that violates the terms or conditions of a denial order.

(5) How do you file a license application and what will happen to the application once you do file it? What if you need authorization for multiple transactions? Parts 748 and 750 of the EAR provide information on license submission and processing. Part 752 of the EAR provides for a Special Comprehensive License that authorizes multiple transactions. If your application is denied, part 756 of the EAR provides rules for filing appeals.

(6) How do you clear shipments with the U.S. Customs Service? Part 758 of the EAR describes the requirements for clearance of exports.

(7) Where do you find the rules on restrictive trade practices and boycotts? Part 760 of the EAR deals with restrictive trade practices and boycotts.

(8) Where are the rules on recordkeeping and enforcement? Part 762 of the EAR sets out your recordkeeping requirements, and parts 764 and 766 of the EAR deal with violations and enforcement proceedings.

(9) What is the effect of foreign availability? Part 768 of the EAR provides rules for determining foreign availability of items subject to controls.

(10) Do the EAR provide definitions and interpretations? Part 770 of the EAR contains interpretations and part 772 of the EAR lists definitions used.

(a) Export Administration. Export Administration implements and administers the export controls reflected in the CCL and to promote a “level playing field”. The detailed presentation of such elements as licensing and export clearance procedures enables you to find in one place what you need to know to comply with pertinent requirements. Of special importance is the detailed listing of License Exception criteria, as these will enable you to determine quickly, and with confidence, that you may proceed with a transaction without delay. Finally, some of the detail results from the need to draft the EAR with care in order to avoid loop-holes and to permit effective enforcement.

(c) Where to get help. Throughout the EAR you will find information on offices you can contact for various purposes and types of information. General information including: assistance in understanding the EAR, information on how to obtain forms, electronic services, publications, and information on training programs offered by BXA, is available from the Office of Exporter Services at the following locations:

Export Counselling Division, U.S. Department of Commerce, 14th and Pennsylvania Avenue, N.W., Room H1099D, Washington, D.C., 20230, Telephone number: (202) 482-4811, Facsimile number: (202) 482-3617 and

Western Regional Office, U.S. Department of Commerce, 3300 Irvine Avenue, Suite 345, Newport Beach, California 92660, Telephone number: (714) 660-0144, Facsimile number: (714) 660-9347 and

Santa Clara Branch Office, U.S. Department of Commerce, 5201 Great America Parkway, Suite 333, Santa Clara, California 95054, Telephone number: (408) 746-7450, Facsimile number: (408) 746-7470.

§ 730.9 How the Bureau of Export Administration is organized.

Functionally, the Bureau of Export Administration is divided into two branches, Export Administration and Export Enforcement. Also, BXA manages a number of Technical Advisory Committees consisting of industry and government representatives which advise and assist BXA and other agencies with respect to actions designed to implement the EAR.

(a) Export Administration. Export Administration implements and administers the export controls reflected in
§ 730.9  
15 CFR Ch. VII (1–1–00 Edition)

the EAR. Export Administration consists of five offices located in Washington D.C. and two field offices in California under the supervision of the Assistant Secretary for Export Administration:

(1) The Office of Nuclear and Missile Technology Controls is responsible for policy and technical issues and license applications related to the Nuclear Suppliers Group and the Missile Technology Control Regime. This office has responsibility for items associated with those regimes, and missile and nuclear related exports and reexports subject to the Enhanced Proliferation Control Initiative.

(2) The Office Chemical/Biological Controls and Treaty Compliance is responsible for implementing multilateral export controls under the Australia Group. This office has licensing responsibility for items associated with the Australia Group and related exports and reexports subject to the Enhanced Proliferation Control Initiative.

(3) The Office of Strategic Trade and Foreign Policy Controls is responsible for implementing multilateral export controls dealing with conventional arms and related dual use items. This office is also responsible for computer export control policies, and implements U.S. foreign policy controls (e.g., crime control, anti-terrorism, and regional stability). It also has licensing responsibility for items controlled for national security and foreign policy reasons.

(4) The Office of Exporter Services is responsible for the Special Comprehensive License, processing and routing all license applications, and preparing responses to requests for advisory opinions and commodity classifications. This office also provides counselling to exporters and reexporters, conducts educational seminars for the business community, maintains the Export Administration Regulations, and coordinates the operations of two field offices listed in § 730.8(c) of this part.

(5) The Office of Strategic Industries and Economic Security implements programs to ensure the continued health of the U.S. defense industrial base, facilitating diversification of U.S. defense related industries into civilian markets, and promoting the conversion of military enterprises. This office is also responsible for analyzing the economic impact of U.S. export controls on industrial competitiveness.

(b) Export Enforcement. Export Enforcement implements the enforcement provisions of the EAR, including part 760 of the EAR (Restrictive Trade Practices and Boycotts). This office also conducts outreach programs to assist members of the public in understanding their obligation under EAR. The Office of Export Enforcement is organized into three offices under the supervision of the Assistant Secretary for Export Enforcement.

(1) The Office of Export Enforcement (OEE) is comprised of an office in Washington, D.C. and eight field offices. OEE is staffed with criminal investigators and analysts. This office investigates allegations of violations and supports administrative and criminal enforcement proceedings. The addresses and telephone numbers of the eight field offices are listed in § 764.5(c)(7) of the EAR.

(2) The Office of Enforcement Support (OES) is located in Washington, D.C. OES supports BXA's preventive enforcement efforts, including conducting pre-license checks and post-shipment verifications. OES also provides administrative and analytical support for OEE.

(3) The Office of Antiboycott Compliance administers and enforces the provisions of part 760 of the EAR (Restrictive Trade Practices and Boycotts). It investigates and prepares cases on alleged violations of this part.

(c) Technical Advisory Committees. (1) The Technical Advisory Committees (TACs) provide advice and assistance to BXA from U.S. industry regarding the creation and implementation of export controls. For further information regarding establishment of TACs and other information, see Supplement No. 2 to part 730. Existing TACs include the following:

(i) The Information Systems TAC;
(ii) The Materials TAC;
(iii) The Materials Processing Equipment TAC;
(iv) The Regulations and Procedures TAC;
Supplement No. 1 to Part 730—Information Collection Requirements Under the Paperwork Reduction Act: OMB Control Numbers

This supplement lists the control numbers assigned to the information collection requirements for the Bureau of Export Administration by the Office of Management and Budget (OMB), pursuant to the Paperwork Reduction Act of 1995. This supplement complies with the requirements of section 3506(c)(1)(B)(i) of the Paperwork Reduction Act requiring agencies to display current control numbers assigned by the Director of OMB for each agency information collection requirement.

Current OMB control No. | 15 CFR part or section where collections of information are identified or described
--- | ---
0694–0013 | Part 774 of the EAR.
0694–0015 | § 773.3 of the EAR.

0697–0152 | §§ 754.2(h) and (i), 754.4(c), 758.1, §§ 758.2(m) and 758.3 of the EAR.

Supplement No. 2 to Part 730—Technical Advisory Committees

(a) Purpose. The purpose of this supplement is to describe the procedures and criteria for the establishment and operation of Technical Advisory Committees.

(b) Technical advisory committees. Any producer of articles, materials, or supplies, including technology, software, and other information, that are subject to export controls, or are being considered for such controls because of their significance to the national security of the United States, may request the Secretary of Commerce to establish a technical advisory committee, under the provisions of section 5(h) of the Export Administration Act of 1979, as amended (EAA) to advise and assist the Department of...
Commerce and other appropriate U.S. Government agencies or officials with respect to questions involving technical matters; worldwide availability and actual utilization of the items; and technology in relation to the total number of U.S. producers of such items; and

the establishment of a TAC for a particular grouping of commodities, software, or other information; and exports and reexports subject to all controls that the United States maintains including proposed revisions of any such controls. If producers of articles, materials, or supplies, including technology, software, or other information, that are subject to export controls because of their significance to the national security of the United States, wish a trade association or other representative to submit a written request on their behalf for the appointment to a TAC, such request shall be submitted in accordance with paragraph (b)(4) of this supplement.

The request shall include:

(i) A description of the articles, materials, or supplies including technology and software, in terms of a clear, cohesive grouping (citing the applicable Export Control Classification Numbers where practical);

(ii) A statement of the reasons for requesting the appointment of a TAC; and

(iii) Any information in support of any contention that may be made that the request meets the criteria described in paragraph (b)(2) of this supplement.

(2) Consideration of request for establishment of a TAC. The Department of Commerce will review all requests for the establishment of a TAC to determine if the following criteria are met:

(i) That a substantial segment of the industry producing the specified articles, materials, or supplies including technology desires such a committee; and

(ii) That the evaluation of such articles, materials, or supplies including technology and software for export control purposes is difficult because of questions involving technical matters, worldwide availability and actual utilization of production and software technology, or licensing procedures.

(3) Requests by a substantial segment of an industry. In determining whether or not a substantial segment of any industry has requested the appointment of a TAC, the Department of Commerce will consider:

(i) The number of persons or firms requesting the establishment of a TAC for a particular grouping of commodities, software and technology in relation to the total number of U.S. producers of such items; and

(ii) The volume of annual production by such persons or firms of each item in the grouping in relation to the total U.S. production. Generally, a substantial segment of an industry (for purposes of this supplement) shall consist of:

(A) Not less than 30 percent of the total number of U.S. producers of the items concerned; or

(B) Three or more U.S. producers who produce a combined total of not less than 30 percent of the total U.S. annual production, by dollar value of the items concerned; or

(C) Not less than 20 percent of the total number of U.S. producers of the items concerned, provided that the total of their annual production thereof is not less than 20 percent of the total U.S. annual production, by dollar value.

(iii) If it is determined that a substantial segment of the industry concerned has requested the establishment of a TAC concerning a specific grouping of items that the Department of Commerce determines difficult to evaluate for export control purposes, BXA will establish and use the TAC requested.

(4) Requests from trade associations or other representatives. Requests from trade associations or other representatives of U.S. producers for the establishment of a TAC must comply with the provisions of paragraphs (b)(1) through (3) of this supplement. In addition, in order to assist BXA in determining whether the criteria described in paragraph (b)(3) of this supplement have been met, a trade association or other representative submitting a request for the establishment of a TAC should include the following information:

(i) The total number of firms in the particular industry;

(ii) The total number of firms in the industry that have authorized the trade association or other representative to act in their behalf in this matter;

(iii) The approximate amount of total U.S. annual production by dollar value of the items concerned produced by those firms that have authorized the trade association or other representative to act in their behalf; and

(iv) A description of the method by which authorization to act on behalf of these producers was obtained.

(5) Nominations for membership on TACs. When the Department of Commerce determines that the establishment of a TAC is warranted, it will request nominations for membership on the committee among the producers of the items and from any other sources that may be able to suggest well-qualified nominees.

(6) Selection of industry members of committee. Industry members of a TAC will be selected by the Department of Commerce from a list of the nominees who have indicated
their availability for service on the committee. To the extent feasible, the Department of Commerce will select a committee balanced to represent all significant facets of the industry involved, taking into consideration such factors as the size of the firms, their geographical distribution, and their product lines. No industry representative shall serve on a TAC for more than four consecutive years. The membership of a member who is absent from four consecutive meetings shall be terminated.

(7) Government members. Government members of a TAC will be selected by the Department of Commerce from the agencies having an interest in the subject matter concerned. Each TAC shall contain the following information:

(i) The committee's official designation;
(ii) The committee's objectives and the scope of its activities;
(iii) The period of time necessary for the committee to carry out its purposes;
(iv) The agency or official to whom the committee reports;
(v) The agency responsible for providing the necessary support for the committee;
(vi) A description of the duties for which the committee is responsible, and, if such duties are not solely advisory, a specification of the authority for such functions;
(vii) The estimated annual operating costs in dollars and years for such committee;
(viii) The estimated number and frequency of committee meetings;
(ix) The committee's termination date, if less than two years from the date of the committee's establishment; and
(x) The date the charter is filed.

(d) Meetings. (1) Each TAC established under the provisions of the EAA and paragraph (b) of this supplement shall meet at least once every three months at the call of its Chair unless it is specifically determined by the Chair, in consultation with other members of the committee, that a particular meeting is not necessary.

(2) No TAC may meet except at the call of its Chair.

(3) Each meeting of a TAC shall be conducted in accordance with an agenda approved by a designated Federal government employee.

(4) No TAC shall conduct a meeting in the absence of a designated Federal government employee who shall be authorized to adjourn any advisory committee meeting, whenever the Federal government employee determines adjournment to be in the public interest.

(e) Public notice. Notice to the public of each meeting of a TAC will be issued at least 20 days in advance and will be published in the Federal Register. The notice will include the time and place of the meeting and the agenda.

(f) Public attendance and participation. (1) Any member of the public who wishes to do so may file a written statement with any TAC before or after any meeting of a committee.

(2) A request for an opportunity to deliver an oral statement relevant to matters on the agenda of a meeting of a TAC will be granted to the extent that the time available for the meeting permits. A committee may establish procedures requiring such persons to obtain advance approval for such participation.

(3) Attendance at meetings of TACs will be open to the public unless it is determined pursuant to section 10(d) of the Federal Advisory Committee Act to be necessary to close all, or some portion, of the meeting to the public. A determination that a meeting or portion thereof be closed to the public may be made if all or a specific portion of a meeting of a TAC is concerned with matters described in section 552(b) of Title 5, U.S.C.

(4) Participation by members of the public in open TAC meetings or questioning of committee members or other participants shall not be permitted except in accordance with procedures established by the committee.

(5) Every effort will be made to accommodate all members of the public who wish to attend.

(g) Minutes. (1) Detailed minutes of each meeting of each TAC will be kept and will contain a record of the persons present, a complete and accurate description of the matters discussed and conclusions reached, and copies of all reports received, issued, or approved by the TAC.

(2) The accuracy of all the minutes will be certified to by the TAC Chair.

(h) Records. (1) Subject to section 552 of Title 5, U.S.C. and Department of Commerce Administrative Order 205-12, “Public Information,” and “Public Information” regulations issued by the Department of Commerce that are contained in 15 CFR part 4, Subtitle A, the records, reports, transcripts, minutes, appendices, working papers, draft, studies, agenda, or other documents that were made available to or prepared for or by each TAC will be available for public inspection and copying.
(2) Each TAC will prepare once each year a report describing its membership, functions, activities, and such related matters as would be informative to the public consistent with the policy of section 552(b) of Title 5, U.S.C.

(ii) Rules concerning the use of the Records Inspection Facility are contained in 15 CFR part 4, Subtitle A, or may be obtained from this facility.

(i) Compensation. If the Department of Commerce deems it appropriate, a member of a TAC may be reimbursed for travel, subsistence, and other necessary expenses incurred in connection with the member's duties.

(j) Scope of advisory committee functions. All TACs are limited to the functions described in their charters.

(k) Duration of committees. Each TAC will terminate at the end of two years from the date the committee was established or two years from the effective date of its most recent extension, whichever is later. Committees may be continued only for successive two-year periods by appropriate action taken by the authorized officer of the Department of Commerce prior to the date on which such advisory committee would otherwise terminate. TACs may be extended or terminated only after consultation with the committee.

(Miscellaneous. (1) TACs established in accordance with paragraph (b) of this supplement must conform to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463), Office of Management and Budget Circular A-63 (Revision of March 1974), "Advisory Committee Management," Department of Commerce Administrative Order 205-12, "Public Information," the applicable provisions of the EAA, and any other applicable Department of Commerce regulations or procedures affecting the establishment or operation of advisory committees.

(2) Whenever the Department of Commerce desires the advice or assistance of a particular segment of an industry with respect to any export control problem for which the service of a TAC, as described in paragraph (b) of this supplement is either unavailable or impracticable, an advisory committee may be established pursuant to the provisions of section 9 of the Federal Advisory Committee Act. Such committees will be subject to the requirements of the Federal Advisory Committee Act, OMB Circular A-63 (Revision of March 1974), "Advisory Committee Management," Department of Commerce Administrative Order 205-12, "Public Information," and any other applicable Department of Commerce regulations or procedures affecting the establishment or operation of advisory committees.

(3) Nothing in the provisions of this supplement shall be construed to restrict the right of any person or firm to discuss any export control matter with the Department of Commerce or to offer advice or information on export control matters. Similarly, nothing in these provisions shall be construed to restrict the Department of Commerce in consulting any person or firm relative to any export control matter.

SUPPLEMENT NO. 3 TO PART 730—OTHER U.S. GOVERNMENT DEPARTMENTS AND AGENCIES WITH EXPORT CONTROL RESPONSIBILITIES

NOTE: The departments and agencies identified with an asterisk control exports for foreign policy or national security reasons and, in certain cases, such controls may overlap with the controls described in the EAR (see part 734 of the EAR).

§ 732.1 Steps overview.

(a)(1) Introduction. In this part, references to the EAR are references to 15 CFR chapter VII, subchapter C. This part is intended to help you determine your obligations under the EAR by listing logical steps in §732.2 through §732.5 of this part that you can take in reviewing these regulations. A flow chart describing these steps is contained in Supplement No. 1 to part 732. By cross-references to the relevant provisions of the EAR, this part describes the suggested steps for you to determine applicability of the following:

(i) The scope of the EAR (part 734 of the EAR);
(ii) Each of the general prohibitions (part 736 of the EAR);
(iii) The License Exceptions (part 740 of the EAR); and
(iv) Other requirements such as clearing your export with the U.S. Customs Service, keeping records, and completing and documenting license applications.

(2) These steps describe the organization of the EAR, the relationship among the provisions of the EAR, and the appropriate order for you to consider the various provisions of the EAR.

(b) Facts about your transaction. The following five types of facts determine your obligations under the EAR and will be of help to you in reviewing these steps:

(1) What is it? What an item is, for export control purposes, depends on its classification, which is its place on the Commerce Control List (see part 774 of the EAR).
§ 732.1

(2) Where is it going? The country of ultimate destination for an export or reexport also determines licensing requirements (see parts 738 and 774 of the EAR concerning the Country Chart and the Commerce Control List).

(3) Who will receive it? The ultimate end-user of your item cannot be a bad end-user. See General Prohibition Four (Denial Orders) in § 736.2(b)(4) and parts 744 and 764 of the EAR for a reference to the list of persons you may not deal with.

(4) What will they do with it? The ultimate end-use of your item cannot be a bad end-use. See General Prohibition Five (End-Use End-User) in § 736.2(b)(5) and part 744 of the EAR for general end-use and end-user restrictions.

(5) What else do they do? Conduct such as contracting, financing, and freight forwarding in support of a proliferation project (as described in § 744.6 of the EAR) may prevent you from dealing with someone.

(c) Are your items and activities subject to the EAR? You should first determine whether your commodity, software, or technology is subject to the EAR (see part 734 of the EAR concerning scope), and Steps 1 through 6 help you do that. For exports from the United States, only Steps 1 and 2 are relevant. If you already know that your item or activity is subject to the EAR, you should go on to consider the ten general prohibitions.

(d) Does your item or activity require a license under one or more of the ten general prohibitions? (1) Brief summary of the ten general prohibitions. The general prohibitions are found in part 736 of the EAR and referred to in these steps. They consist, very briefly, of the following:

(i) General Prohibition One (Exports and Reexports): Export and reexport of controlled items to listed countries.

(ii) General Prohibition Two (Parts and Components Reexports): Reexport and export from abroad of foreign-made items incorporating more than a de minimis amount of controlled U.S. content.

(iii) General Prohibition Three (Foreign-produced Direct Product Reexports): Reexport and export from abroad of the foreign-produced direct product of U.S. technology and software.

(iv) General Prohibition Four (Denial Orders): Engaging in actions prohibited by a denial order.

(v) General Prohibition Five (End-Use End-User): Export or reexport to prohibited end-user or end-users.

(vi) General Prohibition Six (Embargo): Export or reexport to embargoed destinations.

(vii) General Prohibition Seven (U.S. Person Proliferation Activity): Support of proliferation activities.

(viii) General Prohibition Eight (In-Transit): In-transit shipments and items to be unladen from vessels and aircraft.

(ix) General Prohibition Nine (Orders, Terms and Conditions): Violation of any orders, terms, or conditions.

(x) General Prohibition Ten (Knowledge Violation to Occur): Proceeding with transactions with knowledge that a violation has occurred or is about to occur.

(2) Controls on items on the Commerce Control List (CCL). If your item or activity is subject to the EAR, you should determine whether any one or more of the ten general prohibitions require a license for your export, reexport, or activity. Steps 7 through 11 refer to classification of your item on the Commerce Control List (CCL) (part 774 of the EAR) and how to use the Country Chart (Supplement No. 1 to part 738 of the EAR) to determine whether a license is required based upon the classification of your item. These steps refer to General Prohibitions One (Exports and Reexports), Two (Parts and Components Reexports), and Three (Foreign-Produced Direct Product Reexports) for all countries except: Cuba, Iran, Iraq, Libya, and North Korea. For these countries, you may skip Steps 7 through 11 and go directly to Step 12.

(3) Controls on activities. Steps 12 through 18 refer to General Prohibitions Four through Ten. Those general prohibitions apply to all items subject to the EAR, not merely those items listed on the CCL in part 774 of the
§ 732.2 Steps regarding scope of the EAR.

Steps 1 through 6 are designed to aid you in determining the scope of the EAR. A flow chart describing these steps is contained in Supplement No. 2 to part 732.

(a) Step 1: Items subject to the exclusive jurisdiction of another Federal agency. This step is relevant for both exports and reexports. Determine whether your item is subject to the exclusive jurisdiction of another Federal agency as provided in § 734.3 of the EAR.

(1) If your item is subject to the exclusive jurisdiction of another Federal agency, comply with the regulations of that agency. You need not comply with the EAR and may skip the remaining steps.

(2) If your item is not subject to the exclusive jurisdiction of another Federal agency, then proceed to Step 2 in paragraph (b) of this section.

(b) Step 2: Publicly available technology and software. This step is relevant for both exports and reexports. Determine if your technology or software is publicly available as defined and explained at part 734 of the EAR. Note that generally License Exceptions are not available to overcome General Prohibitions Four through Ten. However, selected License Exceptions for embargoed destinations are specified in part 746 of the EAR and License Exceptions for short supply controls are specified in part 754 of the EAR. If a License Exception is available and the export is from the United States, you should review Steps 26 through 28 concerning Shipper’s Export Declarations to be filed with the U.S. Customs Service, Destination Control Statements for export control documents, and recordkeeping requirements.

(c) Step 3: Publicly available encryption software. If your item is not subject to the exclusive jurisdiction of another Federal agency, then proceed to Step 2 in paragraph (b) of this section.

(d) Step 4: Publicly available encryption software. If your item is not subject to the exclusive jurisdiction of another Federal agency, then proceed to Step 2 in paragraph (b) of this section.

(e) Is a License Exception available to overcome the license requirement? If you decide by reviewing the CCL in combination with the Country Chart that a license is required for your destination, you should determine whether a License Exception will except you from that requirement. Steps 20 through 24 help you determine whether a License Exception is available. Note that generally License Exceptions are not available to overcome General Prohibitions Four through Ten. However, selected License Exceptions for embargoed destinations are specified in part 746 of the EAR and License Exceptions for short supply controls are specified in part 754 of the EAR. If a License Exception is available and the export is from the United States, you should review Steps 26 through 28 concerning Shipper’s Export Declarations to be filed with the U.S. Customs Service, Destination Control Statements for export control documents, and recordkeeping requirements. If a License Exception is not available, go on to Steps 25 through 29.

(f) How do you apply for a license? If you must file a license application, you should review the requirements of part 748 of the EAR as suggested by Step 26. If the requirements are not met, you should proceed to Step 27 through 29 concerning Shipper’s Export Declarations to be filed with the U.S. Customs Service, Destination Control Statements for export control documents, and recordkeeping requirements.

§ 732.2 15 CFR Ch. VII (1–1–00 Edition)

this part. If you are a U.S. person and General Prohibition Seven concerning proliferation activity of U.S. persons does not apply, then you may proceed with the export or reexport of your publicly available technology or software. Note that all U.S. persons are subject to the provisions of General Prohibition Seven.

(2) If your technology or software is not publicly available and you are exporting from the United States, skip to Step 7 in §732.3(b) of this part concerning the general prohibitions.

(3) If you are exporting items from a foreign country, you should then proceed to Step 3 in paragraph (c) of this section and the other steps concerning the scope of the EAR.

(c) Step 3: Reexport of U.S.-origin items. This step is appropriate only for reexporters. For an item in a foreign country, you should determine whether the item is of U.S. origin. If it is of U.S.-origin, skip to Step 7 in §732.3(b) of this part. If it is not of U.S. origin, then proceed to Step 4 in paragraph (d) of this section.

(d) Step 4: Foreign-made items incorporating less than the de minimis level of U.S. parts, components, and materials. This step is appropriate only for foreign-made items. For an item made in a foreign country, you should determine whether controlled U.S.-origin parts, components, or materials are incorporated as provided in §734.4 of the EAR. Also, determine the value of the U.S.-origin controlled content as provided in Supplement No. 2 to part 734 of the EAR.

(1) For an item made in a foreign country, you should determine whether controlled U.S.-origin parts, components, or materials are incorporated as provided in §734.4 of the EAR. Also, determine the value of the U.S.-origin controlled content as provided in Supplement No. 2 to part 734 of the EAR.

(2) To determine the value of the U.S.-origin controlled content, you should classify the U.S.-origin content on the CCL, determine those items that would require a license from BXA for reexport to the ultimate destination of the foreign-made product if such parts, components, or materials were reexported to that destination in the form received, and divide the total value of the controlled U.S. parts, components, and materials incorporated into the foreign-made item by the sale price of the foreign-made item.

(3) If no U.S. parts, components, or materials are incorporated or if the incorporated U.S. parts, components, and materials are below the de minimis level described in §734.4 of the EAR, then the foreign-made item is not subject to the EAR by reason of the parts and components rule, the classification of a foreign-made item is irrelevant in determining the scope of the EAR, and you should skip Step 4 and go on to consider Step 6 regarding the foreign-produced direct product rule.

(e) Step 5: Foreign-made items incorporating more than the de minimis level of U.S. parts, components, or materials. This step is appropriate only for foreign-made items incorporating certain U.S. parts. If the incorporated U.S. parts exceed the relevant de minimis level, then your export from abroad is subject to the EAR. You should then skip to Step 7 at §732.3 of this part and consider the steps regarding all other general prohibitions, License Exceptions, and other requirements.

(f) Step 6: Foreign-made items produced with certain U.S. technology for export to specified destinations. This step is appropriate for foreign-made items in foreign countries.

(1) If your foreign-produced item is described in an entry on the CCL and the Country Chart requires a license to your export or reexport destination for national security reasons, you should determine whether your item is subject to General Prohibition Three (Foreign-Produced Direct Product Reexports) (§736.2(b)(3) of the EAR). Your item is subject to the EAR if it is captured by General Prohibition Three (Foreign-Produced Direct Product Reexports), and that prohibition applies if your transaction meets each of the following conditions:
(i) Country scope of prohibition. Your export or reexport destination for the direct product is Cuba, North Korea, Libya, or a destination in Country Group D:1 (see Supplement No. 1 to part 740 of the EAR) (reexports of foreign-produced direct products exported to other destinations are not subject to General Prohibition Three); (ii) Scope of technology or software used to create direct products subject to the prohibition. Technology or software that was used to create the foreign-produced direct product, and such technology or software that was subject to the EAR and required a written assurance as a supporting document for a license or as a precondition for the use of License Exception TSR in §740.6 of the EAR (reexports of foreign-produced direct products created with other technology and software are not subject to General Prohibition Three); and (iii) Scope of direct products subject to the prohibition. The foreign-produced direct products are subject to national security controls as designated on the proper ECCN of the Commerce Control List in part 774 of the EAR (reexports of foreign-produced direct products not subject to national security controls are not subject to General Prohibition Three).}

(2) License Exceptions. Each License Exception described in part 740 of the EAR overcomes this General Prohibition Three if all terms and conditions of a given License Exception are met by the exporter or reexporter.

(3) Subject to the EAR. If your item is captured by the foreign-produced direct product control at General Prohibition Three, then your export from abroad is subject to the EAR. You should next consider the steps regarding all other general prohibitions, License Exceptions, and other requirements. If your item is not captured by General Prohibition Three, then your export from abroad is not subject to the EAR. You have completed the steps necessary to determine whether your transaction is subject to the EAR, and you may skip the remaining steps. Note that in summary, items in foreign countries are subject to the EAR when they are:

(i) U.S.-origin commodities, software and technology unless controlled for export exclusively by another Federal agency or unless publicly available;

(ii) Foreign-origin commodities, software, and technology that are within the scope of General Prohibition Two (Parts and Components Reexports), or General Prohibition Three (Foreign-Produced Direct Product Reexports). (However, such foreign-made items are also outside the scope of the EAR if they are controlled for export exclusively by another Federal agency or publicly available.)

§732.3 Steps regarding the ten general prohibitions.

(a) Introduction. If your item or activity is subject to the scope of the EAR, you should then consider each of the ten general prohibitions listed in part 736 of the EAR. General Prohibitions One ((Exports and Reexports), Two (Parts and Components Reexports), and Three (Foreign-Produced Direct Product Reexports) (§736.2(b) (1), (2), and (3) of the EAR) are product controls that are shaped and limited by parameters specified on the CCL and Country Chart. General Prohibitions Four through Ten are prohibitions on certain activities that are not allowed without authorization from BXA, and these prohibitions apply to all items subject to the EAR unless otherwise specified (§736.2(b) (4) through (10) of the EAR).

(b) Step 7: Classification. (1) You should classify your items in the relevant entry on the CCL, and you may do so on your own without the assistance of BXA. You are responsible for doing so correctly, and your failure to correctly classify your items does not relieve you of the obligation to obtain a license when one is required by the EAR.

(2) You have a right to request the applicable classification of your item from BXA, and BXA has a duty to provide that classification to you. For further information on how to obtain classification assistance from BXA, see part 748 of the EAR.
(3) For items subject to the EAR but not listed on the CCL, the proper classification is EAR 99. This number is a “basket” for items not specified under any CCL entry and appears at the end of each Category on the CCL.

(c) Step 8: Country of ultimate destination. You should determine the country of ultimate destination. The country of destination determines the applicability of several general prohibitions, License Exceptions, and other requirements. Note that part 754 of the EAR concerning short supply controls is self-contained and is the only location in the EAR that contains both the prohibitions and exceptions applicable to short supply controls.

(d) Step 9: Reason for control and the Country Chart. (1) Reason for control and column identifier within the Export Control Classification Number (ECCN). Once you have determined that your item is controlled by a specific ECCN, you must use information contained in the “License Requirements” section of that ECCN in combination with the Country Chart to decide whether a license is required under General Prohibitions One, Two, or Three to a particular destination. The CCL and the Country Chart are taken together to define these license requirements. The applicable ECCN will indicate the reason or reasons for control for items within that ECCN. For example, ECCN 6A007 is controlled for national security, missile technology, and anti-terrorism reasons.

(2) Reason for control within the Country Chart. With each of the applicable Country Chart column identifiers noted in the correct ECCN, turn to the Country Chart. Locate the correct Country Chart column identifier on the horizontal axis, and determine whether an “X” is marked in the cell next to the destination in question. Consult §738.4 of the EAR for comprehensive instructions on using the Country Chart and a detailed example.

(i) An “X” in the cell or cells for the relevant country and reason(s) for control column indicates that a license is required for General Prohibitions One (Exports and Reexports in the Form Received), Two (Parts and Components Reexports), and Three (Foreign-Produced Direct Product Reexports). (See §736.2 (b)(1), (b)(2), and (b)(3) of the EAR).

(ii) If one or more cells have an “X” in the relevant column, a license is required unless you qualify for a License Exception described in part 740 of the EAR. If a cell does not contain an “X” for your destination in one or more relevant columns, a license is not required under the CCL and the Country Chart.

(iii) Additional controls may apply to your export. You must go on to steps 12 through 18 described in paragraphs (g) to (m) of this section to determine whether additional limits described in General Prohibition Two (Parts and Components Reexports) and General Prohibition Three (Foreign-Produced Direct Product Reexports) apply to your proposed transaction. If you are exporting an item from the United States, you should skip Step 10 and Step 11. Proceed directly to Step 12 in paragraph (g) of this section.

(3) License requirements not on the Country Chart. There are two instances where the Country Chart cannot be used to determine if a license is required. Items controlled for short supply reasons are not governed by the Country Chart. Part 754 of the EAR contains license requirements and License Exceptions for items subject to short supply controls. A limited number of ECCNs contained on the CCL do not identify a Country Chart column identifier. In these instances, the ECCN states whether a license is required and for which destinations. See §738.3(a) of the EAR for a list of the ECCNs for which you do not need to consult the Country Chart to determine licensing requirements.

(4) Destinations subject to embargo provisions. The Country Chart does not apply to Cuba, Iran, Iraq, Libya, and North Korea; and for those countries you should review the embargo provisions at part 746 of the EAR and may skip this step concerning the Country Chart. For Angola, Bosnia-Herzegovina, Croatia, Rwanda, and Serbia and Montenegro the Country Chart provides for certain license requirements, and part 746 of the EAR provides additional requirements.

(5) Items subject to the EAR but not on the CCL. Items subject to the EAR that
are not on the CCL are properly classified EAR99. For such items, you may skip this step and proceed directly with Step 12 in paragraph (g) of this section.

(e) Step 10: Foreign-made items incorporating U.S.-origin items and the de minimis rule. (1) Parts and components rule. The following considerations are appropriate for items abroad and are the same steps necessary to determine whether a foreign-made item incorporating U.S. parts, components, or materials is subject to the EAR. If your foreign-made item is described in an entry on the CCL and the Country Chart requires a license to your export or reexport destination, you should determine whether the controlled U.S.-origin commodities, software, or technology incorporated into the foreign-made item exceeds the de minimis level applicable to the ultimate destination of the foreign-made item, as follows:

(i) A 10% de minimis level to embargoed and terrorist-supporting countries; or

(ii) A 25% de minimis level to all other countries.

(2) Guidance for calculations. For guidance on how to calculate the U.S.-controlled content, refer to Supplement No. 2 to part 734 of the EAR. Note that certain rules issued by the Office of Foreign Assets Control, certain exports from abroad by U.S.-owned or controlled entities may be prohibited notwithstanding the de minimis provisions of the EAR. In addition, the de minimis exclusions from the parts and components rule do not relieve U.S. persons of the obligation to refrain from supporting the proliferation of weapons of mass-destruction and missiles as provided in General Prohibition Seven (U.S. Person Proliferation Activity) described in §736.2(b)(7) of the EAR. Note that encryption items controlled for EI reasons under ECCNs 5A002, 5D002 or 5E002 on the Commerce Control List (refer to Supplement No. 1 to part 774 of the EAR) shall be subject to the EAR even if they incorporate less than the de minimis level of U.S. content. Accordingly, the provisions of the EAR concerning de minimis levels are not applicable to encryption items controlled for “EI” reasons under ECCN 5A002, E500 5D002, or E500 5E002.

(f) Step 11: Foreign-produced direct product. The following considerations are appropriate for items abroad and are the same considerations necessary to determine whether a foreign-produced direct product is subject to the EAR under Step 6 in §732.2(f) of this part.

(1) If your foreign-produced item is described in an entry on the CCL and the Country Chart requires a license to your export or reexport destination for national security reasons, you must determine whether your item is subject to General Prohibition Three (Foreign-Produced Direct Product Reexports) (§736.2(b)(3) of the EAR). Your item is subject to this general prohibition if your transaction meets each of the following conditions:

(i) Country scope of prohibition. Your export or reexport destination for the direct product is Cuba, Libya, North Korea, or a destination in Country Group D:1 (see Supplement No. 1 to part 740 of the EAR) (reexports of foreign-produced direct products exported to other destinations are not subject to General Prohibition Three described in §736.2(b)(3) of the EAR);

(ii) Scope of technology or software used to create direct products subject to the prohibition. Technology or software that was used to create the foreign-produced direct product, and such technology or software that was subject to the EAR and required a written assurance as a supporting document for a license or as a precondition for the use of License Exception TSR in §740.6 of the EAR (reexports of foreign-produced direct products created with other technology and software are not subject to General Prohibition Three); and

(iii) Scope of direct products subject to the prohibition. The foreign-produced direct products are controlled for national security reasons indicated in an ECCN on the CCL (reexports of foreign-produced direct products not subject to national security controls are not subject to General Prohibition Three).

(2) License Exceptions. Each License Exception described in part 740 of the EAR overcomes General Prohibition Three (Foreign-Produced Direct Product Reexports) if all terms and conditions of a given License Exception are met by the exporter or reexporter.
(g) Step 12: Persons denied export privileges. (1) Determine whether your transferee, ultimate end-user, any intermediate consignee, or any other party to a transaction is a person denied export privileges. (See part 764 of the EAR). While it is not a violation of General Prohibition Four (Denial Orders) (§736.2(b)(4) of the EAR) to fail to check the Denied Persons List prior to a transfer, it is nonetheless a violation of the EAR to engage in any activity that violates the terms or conditions of a denial order. General Prohibition Four (Denial Orders) applies to all items subject to the EAR, i.e., both items on the CCL and within EAR99. However, it is not a violation of General Prohibition Four (Denial Orders) to fail to check the Denied Persons List prior to a transfer, as long as you are not engaging in any activity that violates the terms or conditions of a denial order. General Prohibition Four (Denial Orders) applies to all items subject to the EAR, i.e., both items on the CCL and within EAR99.

(2) There are no License Exceptions to General Prohibition Four (Denial Orders). The prohibition concerning persons denied export privileges may be overcome only by a specific authorization from BXA, something that is rarely granted.

(h) STEP 13: Prohibited end-uses and end-users. (1) Review the end-uses and end-users prohibited under General Prohibition Five (End-Use and End-User) (§736.2(b)(5) of the EAR) described in part 744 of the EAR. Part 744 of the EAR contains all the end-use and end-user license requirements, and those are in addition to the license requirements under General Prohibitions One (Exports and Reexports), Two (Parts and Components Reexports), and Three (Foreign-produced Direct Product Reexports). Unless otherwise indicated, the license requirements of General Prohibition Five (End-Use and End-User) described in part 744 of the EAR apply to all items subject to the EAR, i.e., both items on the CCL and within EAR99. Moreover, the requirements of General Prohibition Five (End-Use and End-User) are in addition to various end-use and end-user limitations placed on certain License Exceptions.

(2) Under License Exception TSU (§740.13 of the EAR), operational technology and software (OTS), sales technology (STS), and software updates (SUD) overcome General Prohibition Five (End-Use and End-User) (§736.2(b)(5) of the EAR) if all terms and conditions of these provisions are met by the exporter or reexporter.

(i) Step 14: Embargoed countries and special destinations. If your destination for any item is Bosnia-Herzegovina, Croatia, Cuba, Iran, Iraq, Libya, North Korea, Rwanda, or Serbia and Montenegro, you must consider the requirements of part 746 of the EAR. Unless otherwise indicated, General Prohibition Six (Embargo) applies to all items subject to the EAR, i.e., both items on the CCL and within EAR99. You may not make an export or reexport contrary to the provisions of part 746 of the EAR without a license unless:

(1) You are exporting or reexporting only publicly available technology or software or other items outside the scope of the EAR, or

(2) You qualify for a License Exception referenced in part 746 of the EAR concerning embargoed destinations. You may not use a License Exception described in part 746 of the EAR to overcome General Prohibition Six (Embargo) (§736.2(b)(6) of the EAR) unless it is specifically authorized in part 746 of the EAR. Note that part 754 of the EAR concerning short supply controls is self-contained and is the only location in the EAR for both the prohibitions and exceptions applicable to short supply controls.

(j) Step 15: Proliferation activity of U.S. persons unrelated to exports and reexports. (1) Review the scope of activity prohibited by General Prohibition Seven (U.S. Person Proliferation Activity) (§736.2(b)(7) of the EAR) as that activity is described in §744.6 of the EAR. Keep in mind that such activity is not limited to exports and reexports and is not limited to items subject to General Prohibition One (Exports and Reexports), Two (Parts and Components Reexports), and Three (Foreign-produced Direct Product Reexports). Moreover, such activity extends to services and dealing in wholly foreign-origin items in support of the specified proliferation activity and is not limited to items listed on the CCL or included in EAR99.

(2) Review the definition of U.S. Person in part 744 of the EAR.

(k) Step 16: In-transit. Shippers and operators of vessels or aircraft should review General Prohibition Eight (In-Transit) to determine the countries in which you may not unload or ship certain items in-transit. General Prohibition Eight applies to all items subject...
to the EAR, i.e. both items on the CCL and within EAR 99.

(l) Step 17: Review orders, terms, and conditions. Review the orders, terms, and conditions applicable to your transaction. General Prohibition Nine (Orders, Terms, and Conditions) prohibits the violation of any orders, terms, and conditions imposed under the EAR. Terms and conditions are frequently contained in licenses. In addition, the ten general prohibitions (part 736 of the EAR) and the License Exceptions (part 740 of the EAR) impose terms and conditions or limitations on your proposed transactions and use of License Exceptions. A given license or License Exception may not be used unless each relevant term or condition is met.

(m) Step 18: Review the “Know Your Customer” Guidance and General Prohibition Ten (Knowledge Violation to Occur). License requirements under the EAR are determined solely by the classification, end-use, end-user, ultimate destination, and conduct of U.S. persons. Supplement No. 1 to part 732 of the EAR is intended to provide helpful guidance regarding the process for the evaluation of information about customers, end-uses, and end-users. General Prohibition Ten (Knowledge Violation to Occur) prohibits anyone from proceeding with a transaction with knowledge that a violation of the EAR has occurred or is about to occur. It also prohibits related shipping, financing, and other services. General Prohibition Ten applies to all items subject to the EAR, i.e. both items on the CCL and within EAR 99.

(n) Step 19: Complete the review of the general prohibitions. After completion of Steps described in this section and review of all ten general prohibitions in part 736 of the EAR, including cross-referenced regulations in the EAR, you will know which, if any, of the ten general prohibitions of the EAR apply to you and your contemplated transaction or activity.

(1) If none of the ten general prohibitions is applicable to your export from the United States, no license from BXA is required, you do not need to qualify for a License Exception under part 740 of the EAR. You should skip the steps in §732.4 of this part regarding License Exceptions and proceed directly to the Steps in §732.5 of this part regarding recordkeeping, clearing the U.S. Customs Service with the appropriate Shipper’s Export Declaration, and using the required Destination Control Statement.

(2) If none of the ten general prohibitions is applicable to your reexport or export from abroad, no license is required and you should skip all remaining steps.

(3) If one or more of the ten general prohibitions are applicable, continue with the remaining steps.

§732.4 Steps regarding License Exceptions.

(a) Introduction to Steps for License Exceptions. If your export or reexport is subject to the EAR and is subject to General Prohibitions One (Exports and Reexports), Two (Parts and Components Reexports), or Three (Foreign-Produced Direct Product Reexports), or General Prohibitions Five (End-Use End-User), consult part 744 of the EAR. If your export or reexport is subject to General Prohibitions Four (Denial Orders), Seven (U.S. Person Proliferation Activity), Eight (In-Transit), Nine (Orders, Terms, and Conditions), or Ten (Knowledge Violation to Occur), there are no License Exceptions available for your export or reexport. If your export is subject to General Prohibition Five (End-Use End-User), consult part 744 of the EAR. If your export or reexport is subject to General Prohibition Six (Embargo), consult part 746 of the EAR for applicable License Exceptions.

(b) Steps for License Exceptions. (1) Step 20: Applicability of General Prohibitions. Determine whether any one or more of the general prohibitions described in §736.2(b) of the EAR apply to your export or reexport. If no general prohibition applies to your export or reexport, then you may proceed with your export or reexport and need not review part 740 of the EAR regarding License Exceptions. You are reminded
of your recordkeeping obligations related to the clearance of the U.S. Customs Service provided in parts 762 and 758 of the EAR.

(2) Step 21: Applicability of restrictions on all License Exceptions. Determine whether any one or more of the restrictions in §740.2 of the EAR applies to your export or reexport. If any one or more of these restrictions apply, there are no License Exceptions available to you, and you must either obtain a license or refrain from the export or reexport.

(3) Step 22: Terms and conditions of the License Exceptions. (i) If none of the restrictions in §740.2 of the EAR applies, then review each of the License Exceptions to determine whether any one of them authorizes your export or reexport. Eligibility for License Exceptions is based on the item, the country of ultimate destination, the end-use, and the end-user, along with any special conditions imposed within a specific License Exception.

(ii) You may meet the conditions for more than one License Exception. Moreover, although you may not qualify for some License Exceptions you may qualify for others. Review the broadest License Exception first, and use any License Exception available to you. You are not required to use the most restrictive applicable License Exception. If you fail to qualify for the License Exception that you first consider, you may consider any other License Exception until you have determined that no License Exception is available.

(iii) License Exceptions TMP, RPL, BAG, AVS, GOV, and TSU authorize exports notwithstanding the provisions of the CCL. List-based License Exceptions (LVS, GBS, CIV, TSR, and CTP) are available only to the extent specified on the CCL. Part 740 of the EAR provides authorization for reexports only to the extent each License Exception expressly authorizes reexports. License Exception APR authorizes reexports only.

(iv) If you are exporting under License Exceptions GBS, CIV, LVS, CTP, TSR, or GOV, you should review §743.1 of the EAR to determine the applicability of certain reporting requirements.

(4) Step 23: Scope of License Exceptions. Some License Exceptions are limited by country or by type of item.

(i) Countries are arranged in country groups for ease of reference. For a listing of country groups, please refer to Supplement No. 1 to part 740 of the EAR. Unless otherwise indicated in a License Exception, License Exceptions do not apply to any exports or reexports to embargoed destinations. If your export or reexport is subject to General Prohibition Six (Embargo) for embargoed destinations, License Exceptions are only available to the extent specifically provided in part 746 of the EAR concerning embargoed destinations.

(ii) Special commodity controls apply to short supply items. No License Exceptions described in part 740 of the EAR may be used for items listed on the CCL as controlled for Short Supply reasons. License Exceptions for short supply items are found in part 754 of the EAR.

(5) Step 24: Compliance with all terms and conditions. If a License Exception is available, you may proceed with your export or reexport. However, you must meet all the terms and conditions required by the License Exception that you determined authorized your export or reexport. You must also consult part 758 and 762 of the EAR to determine your recordkeeping and documentation requirements.

(6) Step 25: License requirements. If no License Exception is available, then you must either obtain a license before proceeding with your export or reexport or you must refrain from the proposed export or reexport.

(7) Step 26: License applications. If you are going to file a license application with BXA, you should first review the requirements at part 748 of the EAR. Exporters, reexporters, and exporters from abroad should review the instructions concerning applications and required support documents prior to submitting an application for a license.
§ 732.5 Steps regarding Shipper's Export Declaration, Destination Control Statements, record keeping, license applications, and other requirements.

(a) Step 27—Shipper's Export Declaration. You should review § 758.3 of the EAR to determine what notations you must enter on the Shipper's Export Declaration (SED). These steps should be reviewed by exporters. Reexporters and firms exporting from abroad may skip Steps 27 through 29 and proceed directly to § 732.6 of this part.

(1) NLR. The term “NLR” represents exports of listed items when no license is required. Such exports do not require that you qualify for a License Exception. The symbol “NLR” is required on the SED under two circumstances. First, NLR is the correct symbol when exporting an item subject to the EAR not listed on the CCL. Such items are classified EAR99. Secondly, certain items are listed on the CCL but do not require a license to all destinations under General Prohibitions One (Exports and Reexports in the Form Received), Two (Parts and Components Reexports), or Three (Foreign-Produced Direct Product Reexports) (§ 736.2 (b)(1), (b)(2), or (b)(3) of the EAR). Such items do not have an “X” in the appropriate cell on the Country Chart. If General Prohibitions Four through Ten (§ 736.2 (b)(4) of the EAR) through (b)(10) of the EAR) also do not apply, you must clear exports of such items by entering the symbol “NLR” in the appropriate place on the SED.

(2) License Exception symbol. You must enter on any required SED the letter code (e.g., LVS, TMP) of the License Exceptions under which you are exporting. In the case of License Exceptions LVS, GBS, and CIV, the ECCN of the item being exported must also be entered when an SED is required. Please refer to § 758.3 of the EAR for detailed information on use of SEDs.

(3) License number. If you are exporting under a license, enter the license number on the SED as required by § 758.3 of the EAR.

(b) Step 28: Destination Control Statement. You are required to enter an appropriate Destination Control Statement (DCS) on commercial documents in accordance with the DCS requirements of § 758.6 of the EAR. Exporters should review § 758.6 of the EAR and use the DCS as required. Reexporters and exporters from abroad should review § 752.6 for DCS requirements when using a Special Comprehensive License. Otherwise, DCS requirements do not apply to reexports and exports from abroad.

(c) Step 29: Recordkeeping. Records of transactions involving exports under any license or License Exception must be maintained in accordance with the recordkeeping requirements of part 762 of the EAR.

§ 732.6 Steps for other requirements.

Sections 732.1 through 732.4 of this part are useful in determining the license requirements that apply to you. Other portions of the EAR impose other obligations and requirements. Some of them are:

(a) Requirements relating to the use of a license in § 758.2 of the EAR.

(b) Obligations of carriers, forwarders, exporters and others to take specific steps and prepare and deliver certain documents to assure that items subject to the EAR are delivered to the destination to which they are licensed or authorized by a License Exception or some other provision of the regulations in § 758.4 through § 758.6 of the EAR.

(c) Duty of carriers to return or unload shipments at the direction of U.S. Government officials (see § 758.8 of the EAR).

(d) Specific obligations imposed on parties to Special Comprehensive licenses in part 752 of the EAR.

(e) Recordkeeping requirements imposed in part 762 of the EAR.

(f) Requirements of part 764 of the EAR to disclose facts that may come to your attention after you file a license application or make other statements to the government concerning a transaction or proposed transaction that is subject to the EAR.

(g) Certain obligations imposed by part 760 of the EAR on parties who receive requests to take actions related to foreign boycotts and prohibits certain actions relating to those boycotts.

- Will I be reexporting a national security controlled foreign-produced direct product (of U.S. technology or software requiring written assurances, or produced by a plant located outside the U.S. that is a direct product of U.S.-origin technology or software) to Cuba, Libya, North Korea or a country listed in Country Group D.1?
  - Yes
    - Subject to the EAR
    - No
  - No

[62 F.R. 25455, May 9, 1997]
SUPPLEMENT NO. 3 TO PART 732—BXA’S “KNOW YOUR CUSTOMER” GUIDANCE AND RED FLAGS

“Know Your Customer” Guidance

Various requirements of the EAR are dependent upon a person’s knowledge of the end-use, end-user, ultimate destination, or other facts relating to a transaction or activity. These provisions include the non-proliferation-related “catch-all” sections and the prohibition against proceeding with a transaction with knowledge that a violation of the EAR has occurred or is about to occur.

(a) BXA provides the following guidance on how individuals and firms should act under this knowledge standard. This guidance does not change or interpret the EAR. (1) Decide whether there are “red flags.” Take into account any abnormal circumstances in a transaction that indicate that the export may be destined for an inappropriate end-use, end-user, or destination. Such circumstances are referred to as “red flags.” Included among examples of red flags are orders for items that are inconsistent with the needs of the purchaser, a customer declining installation and testing when normally requested, or requests for equipment configurations that are incompatible with the stated destination (e.g., 120 volts in a country with 220 volts). Commerce has developed lists of such red flags that are not all-inclusive but are intended to illustrate the types of circumstances that should cause reasonable suspicion that a transaction will violate the EAR.

(2) If there are “red flags”, inquire. If there are no “red flags” in the information that comes to your firm, you should be able to proceed with a transaction in reliance on the information you have received. That is, absent “red flags” (or an express requirement in the EAR), there is no affirmative duty upon exporters to inquire, verify, or otherwise “go behind” the customer’s representations. However, when “red flags” are raised in information that comes to your firm, you have a duty to check out the suspicious circumstances and inquire about the end-use, end-user, or ultimate country of destination. The duty to check out “red flags” is not confined to the use of License Exceptions affected by the “know” or “reason to know” language in the EAR. Applicants for licenses are required by part 740 of the EAR to obtain documentary evidence concerning the transaction, and misrepresentation or concealment of material facts is prohibited, both in the licensing process and in all export control documents. You can rely upon representations from your customer and repeat them in the documents you file unless red flags oblige you to take verification steps.

(3) Do not self-blind. Do not cut off the flow of information that comes to your firm in the normal course of business. For example, do not instruct the sales force to tell potential customers to refrain from discussing the actual end-use, end-user, and ultimate country of destination for the product your firm is seeking to sell. Do not put on blinders that prevent the learning of relevant information. An affirmative policy of steps to avoid “bad” information would not insulate a company from liability, and it would usually be considered an aggravating factor in an enforcement proceeding.

(4) Employees need to know how to handle “red flags.” Knowledge possessed by an employee of a company can be imputed to a firm so as to make it liable for a violation. This makes it important for firms to establish clear policies and effective compliance procedures to ensure that such knowledge about transactions can be evaluated by responsible senior officials. Failure to do so could be regarded as a form of self-binding.

(5) Reevaluate all the information after the inquiry. The purpose of this inquiry and reevaluation is to determine whether the “red flags” can be explained or justified. If they can, you may proceed with the transaction. If the “red flags” cannot be explained or justified and you proceed, you run the risk of having had “knowledge” that would make your action a violation of the EAR.

(6) Refrain from the transaction or advise BXA and wait. If you continue to have reasons for concern after your inquiry, then you should either refrain from the transaction or submit all the relevant information to BXA in the form of an application for a license or in such other form as BXA may specify.

(b) Industry has an important role to play in preventing exports and reexports contrary to the national security and foreign policy interests of the United States. BXA will continue to work in partnership with industry to make this front line of defense effective, while minimizing the regulatory burden on exporters. If you have any question about whether you have encountered a “red flag”, you may contact the Office of Export Enforcement at 1-800-424-2980 or the Office of Exporter Services at (202) 482-4532.

RED FLAGS

Possible indicators that an unlawful diversion might be planned by your customer include the following:

1. The customer or purchasing agent is reluctant to offer information about the end-use of a product.

2. The product’s capabilities do not fit the buyer’s line of business; for example, a small bakery places an order for several sophisticated lasers.

3. The product ordered is incompatible with the technical level of the country to
which the product is being shipped. For example, semiconductor manufacturing equip-
ment would be of little use in a country without an electronics industry.
4. The customer has little or no business background.
5. The customer is willing to pay cash for a very expensive item when the terms of the sale call for financing.
6. The customer is unfamiliar with the product’s performance characteristics but still wants the product.
7. Routine installation, training or maintenance services are declined by the customer.
8. Delivery dates are vague, or deliveries are planned for out-of-the-way destinations.
9. A freight forwarding firm is listed as the product’s final destination.
10. The shipping route is abnormal for the product and destination.
11. Packaging is inconsistent with the stated method of shipment or destination.
12. When questioned, the buyer is evasive or unclear about whether the purchased product is for domestic use, export or reexport.

§ 734.2 Important EAR terms and principles.

(a) Subject to the EAR—Definition. (1) “Subject to the EAR” is a term used in the EAR to describe those items and activities over which BXA exercises regulatory jurisdiction under the EAR.

§ 734.1 Introduction.

(a) In this part, references to the Export Administration Regulations (EAR) are references to 15 CFR chapter VII, subchapter C. This part describes the scope of the Export Administration Regulations (EAR) and explains certain key terms and principles used in the EAR. This part provides the rules you need to use to determine whether items and activities are subject to the EAR. This part is the first step in determining your obligations under the EAR. If your item or activity is not subject to the EAR, then you do not have any obligations under the EAR and you do not need to review other parts of the EAR. If you already know that your item or activity is subject to the EAR, you do not need to review this part and you can go on to review other parts of the EAR to determine your obligations. This part also describes certain key terms and principles used in the EAR. Specifically, it includes the following terms: “subject to the EAR,” “items subject to the EAR,” “export,” and “reexport.” These and other terms are also included in part 772 of the EAR, Definitions of Terms, and you should consult part 772 of the EAR for the meaning of terms used in the EAR. Finally, this part makes clear that compliance with the EAR does not relieve any obligations imposed under foreign laws.

(b) This part does not address any of the provisions set forth in part 760 of the EAR, Restrictive Trade Practices or Boycotts.

(c) This part does not define the scope of legal authority to regulate exports, including reexports, or activities found in the Export Administration Act and other statutes. What this part does is set forth the extent to which such legal authority has been exercised through the EAR.

§ 734.2 Important EAR terms and principles.

(a) Subject to the EAR—Definition. (1) “Subject to the EAR” is a term used in the EAR to describe those items and activities over which BXA exercises regulatory jurisdiction under the EAR.
Conversely, items and activities that are not subject to the EAR are outside the regulatory jurisdiction of the EAR and are not affected by these regulations. The items and activities subject to the EAR are described in § 734.2 through § 734.5 of this part. You should review the Commerce Control List (CCL) and any applicable parts of the EAR to determine whether an item or activity is subject to the EAR. However, if you need help in determining whether an item or activity is subject to the EAR, see §734.6 of this part. Publicly available technology and software not subject to the EAR are described in § 734.7 through § 734.11 and Supplement No. 1 to this part.

(2) Items and activities subject to the EAR may also be controlled under export-related programs administered by other agencies. Items and activities subject to the EAR are not necessarily exempted from the control programs of other agencies. Although BXA and other agencies that maintain controls for national security and foreign policy reasons try to minimize overlapping jurisdiction, you should be aware that in some instances you may have to comply with more than one regulatory program.

(3) The term “subject to the EAR” should not be confused with licensing or other requirements imposed in other parts of the EAR. Just because an item or activity is subject to the EAR does not mean that a license or other requirement automatically applies. A license or other requirement applies only in those cases where other parts of the EAR impose a licensing or other requirement on such items or activities.

(b) Export and reexport—(1) Definition of export. “Export” means an actual shipment or transmission of items subject to the EAR out of the United States, or release of technology or software subject to the EAR to a foreign national in the United States, as described in paragraph (b)(2)(ii) of this section. See paragraph (b)(9) of this section for the definition that applies to exports of encryption source code and object code software subject to the EAR.

(2) Export of technology or software. (See paragraph (b)(9) for provisions that apply to encryption source code and object code software.) “Export” of technology or software, excluding encryption software subject to “EI” controls, includes:

(i) Any release of technology or software subject to the EAR in a foreign country; or
(ii) Any release of technology or source code subject to the EAR to a foreign national. Such release is deemed to be an export to the home country or countries of the foreign national. This deemed export rule does not apply to persons lawfully admitted for permanent residence in the United States and does not apply to persons who are protected individuals under the Immigration and Naturalization Act (8 U.S.C. 1324b(a)(3)). Note that the release of any item to any party with knowledge a violation is about to occur is prohibited by §736.2(b)(10) of the EAR.

(3) Definition of “release” of technology or software. Technology or software is “released” for export through:

(i) Visual inspection by foreign nationals of U.S.-origin equipment and facilities;

(ii) Oral exchanges of information in the United States or abroad; or

(iii) The application to situations abroad of personal knowledge or technical experience acquired in the United States.

(4) Definition of reexport. “Reexport” means an actual shipment or transmission of items subject to the EAR from one foreign country to another foreign country; or release of technology or software subject to the EAR to a foreign national outside the United States, as described in paragraph (b)(5) of this section.

(5) Reexport of technology or software. Any release of technology or source code subject to the EAR to a foreign national of another country is a deemed reexport to the home country or countries of the foreign national. However, this deemed reexport definition does not apply to persons lawfully admitted for permanent residence. The term “release” is defined in paragraph (b)(3) of this section. Note that the release of any item to any party with
knowledge or reason to know a violation is about to occur is prohibited by §736.2(b)(10) of the EAR.

(6) For purposes of the EAR, the export or reexport of items subject to the EAR that will transit through a country or countries or be transshipped in a country or countries to a new country or are intended for reexport to the new country, are deemed to be exports to the new country.

(7) If a territory, possession, or department of a foreign country is not listed on the Country Chart in Supplement No. 1 to part 738 of the EAR, the export or reexport of items subject to the EAR to such destination is deemed under the EAR to be an export to the foreign country. For example, a shipment to the Cayman Islands, a dependent territory of the United Kingdom, is deemed to be a shipment to the United Kingdom.

(8) Export or reexport of items subject to the EAR does not include shipments among any of the states of the United States, the Commonwealth of Puerto Rico, or the Commonwealth of the Northern Mariana Islands or any territory, dependency, or possession of the United States. These destinations are listed in Schedules C & E, Classification of Country and Territory Designations for U.S. Export Statistics, issued by the Bureau of the Census.

(9) Export of encryption source code and object code software. (i) For purposes of the EAR, the export of encryption source code and object code software means:

(A) An actual shipment, transfer, or transmission out of the United States (see also paragraph (b)(9)(ii) of this section); or

(B) A transfer of such software in the United States to an embassy or affiliate of a foreign country.

(ii) The export of encryption source code and object code software controlled for E1 reasons under ECCN 5D002 on the Commerce Control List (see Supplement No. 1 to part 774 of the EAR) includes downloading, or causing the downloading of, such software to locations (including electronic bulletin boards, Internet file transfer protocol, and World Wide Web sites) outside the United States (except Canada), over wire, cable, radio, electromagnetic, photo optical, photoelectric or other comparable communications facilities accessible to persons outside the United States (except Canada), including transfers from electronic bulletin boards, Internet file transfer protocol and World Wide Web sites, unless the person making the software available takes precautions adequate to prevent unauthorized transfer of such code outside the United States or Canada. Such precautions shall include ensuring that the facility from which the software is available controls the access to and transfers of such software through such measures as:

(A) The access control system, either through automated means or human intervention, checks the address of every system requesting or receiving a transfer and verifies that such systems are located within the United States or Canada;

(B) The access control system provides every requesting or receiving party with notice that the transfer includes or would include cryptographic software subject to export controls under the Export Administration Regulations, and that anyone receiving such a transfer cannot export the software without a license; and

(C) Every party requesting or receiving a transfer of such software must acknowledge affirmatively that he or she understands that the cryptographic software is subject to export controls under the Export Administration Regulations and that anyone receiving the transfer cannot export the software without a license. BX A will consider acknowledgments in electronic form provided that they are adequate to assure legal undertakings similar to written acknowledgments.

§734.3 Items subject to the EAR.

(a) Except for items excluded in paragraph (b) of this section, the following items are subject to the EAR:

(1) All items in the United States, including in a U.S. Foreign Trade Zone or moving intransit through the United
§ 734.3
States from one foreign country to another;
(2) All U.S. origin items wherever located;
(3) U.S. origin parts, components, materials or other commodities incorporated abroad into foreign-made products, U.S. origin software commingled with foreign software, and U.S. origin technology commingled with foreign technology, in quantities exceeding de minimis levels as described in §734.4 and Supplement No. 2 of this part;
(4) Certain foreign-made direct products of U.S. origin technology or software, as described in §736.2(b)(3) of the EAR. The term "direct product" means the immediate product (including processes and services) produced directly by the use of technology or software; and
(5) Certain commodities produced by any plant or major component of a plant located outside the United States that is a direct product of U.S.-origin technology or software, as described in §736.2(b)(3) of the EAR.

(b) The following items are not subject to the EAR:
(1) Items that are exclusively controlled for export or reexport by the following departments and agencies of the U.S. Government which regulate exports or reexports for national security or foreign policy purposes:
(i) Department of State. The International Traffic in Arms Regulations (22 CFR part 121) administered by the Office of Defense Trade Controls relate to defense articles and defense services on the U.S. Munitions List. Section 38 of the Arms Export Control Act (22 U.S.C. 2778).
(ii) Treasury Department, Office of Foreign Assets Control (OFAC). Regulations administered by OFAC implement broad controls and embargo transactions with certain foreign countries. These regulations include controls on exports and reexports to certain countries (31 CFR chapter V). Trading with the Enemy Act (50 U.S.C. app. section 1 et seq.), and International Emergency Economic Powers Act (50 U.S.C. 1701 et seq.)
(iii) U.S. Nuclear Regulatory Commission (NRC). Regulations administered by NRC control the export and reexport of commodities related to nuclear reactor vessels (10 CFR part 110).
(v) Patent and Trademark Office (PTO). Regulations administered by PTO provide for the export to a foreign country of unclassified technology in the form of a patent application or an amendment, modification, or supplement thereto or division thereof (37 CFR part 5). BXA has delegated authority under the Export Administration Act to the PTO to approve exports and reexports of such technology which is subject to the EAR. Exports and reexports of such technology not approved under PTO regulations must comply with the EAR.
(2) Prerecorded phonograph records reproducing in whole or in part, the content of printed books, pamphlets, and miscellaneous publications, including newspapers and periodicals; printed books, pamphlets, and miscellaneous publications including bound newspapers and periodicals; children's picture and painting books; newspaper and periodicals, unbound, excluding waste; music books; sheet music; calendars and calendar blocks, paper; maps, hydrographical charts, atlases, gazetteers, globe covers, and globes (terrestrial and celestial); exposed and developed motion picture film and soundtrack; and advertising printed matter exclusively related thereto.
(3) Publicly available technology and software, except software controlled for EI reasons under ECCN 5D002 on the Commerce Control List, that:
(i) Are already published or will be published as described in §734.7 of this part;
(ii) Arise during, or result from, fundamental research, as described in §734.8 of this part;
(iii) Are educational, as described in §734.9 of this part;
(iv) Are included in certain patent applications, as described in §734.10 of this part.

NOTE TO PARAGRAPHS (b)(2) AND (b)(3) OF THIS SECTION: A printed book or other printed material setting forth encryption source code is not itself subject to the EAR (see §734.3(b)(2)). However, notwithstanding §734.3(b)(2), encryption source code in electronic form or media (e.g., computer diskette or CD ROM) remains subject to the EAR (see §734.3(b)(3)).

(4) Foreign made items that have greater than the de minimis U.S. content based on the principles described in §734.4 of this part.

(c) "Items subject to the EAR" consist of the items listed on the Commerce Control List (CCL) in part 774 of the EAR and all other items which meet the definition of that term. For ease of reference and classification purposes, items subject to the EAR which are not listed on the CCL are designated as "EAR99."

§734.4 De minimis U.S. content.

(a) There is no de minimis level for the export from a foreign country of a foreign-made computer exceeding 12,300 MTOPS containing U.S.-origin controlled semiconductors (other than memory circuits) classified under ECCN 3A001 or high speed interconnect devices (ECCN 4A003.g) to Computer Tier 3 and 4 countries described in §742.12 of the EAR.

(b) There is no de minimis level for the reexport of foreign-origin items that incorporate "Information security" systems and equipment, cryptographic devices, software and components specifically designed or modified therefor, and related technology controlled for "EI" reasons under ECCNs 5A002, 5D002, and 5E002. Certain mass market encryption software may become eligible for de minimis only after a one-time BXA review (refer to §742.15(b)(1)).

(c) Except as provided in paragraph (a) of this section for certain computers, the following reexports are not subject to the EAR when made to either an embargoed country listed in part 746 of the EAR or to a terrorist-supporting country as described in part 742 of the EAR:

(1) Reexports of a foreign-made commodity incorporating controlled U.S.-origin commodities valued at 10% or less of the total value of the foreign-made commodity;

(2) Reexports of foreign-made software incorporating controlled U.S.-origin software valued at 10% or less of the total value of the foreign-made software;

(3) Reexports of foreign technology commingled with or drawn from controlled U.S.-origin technology valued at 10% or less of the total value of the foreign technology.

(d) Except as provided in paragraph (a) of this section for certain computers, for all other countries not included in paragraph (b) of this section the following reexports are not subject to the EAR:

(1) Reexports of a foreign-made commodity incorporating controlled U.S.-origin commodities valued at 25% or less of the total value of the foreign-made commodity;

(2) Reexports of foreign-made software incorporating controlled U.S.-origin software valued at 25% or less of the total value of the foreign-made software;

(3) Reexports of foreign technology commingled with or drawn from controlled U.S.-origin technology valued at 25% or less of the total value of the foreign technology.

(e) For purposes of determining de minimis levels, technology and source code used to design or produce foreign-made commodities or software are not considered to be incorporated into such foreign-made commodities or software. Commodities subject only to short supply controls are not included in calculating U.S. content.

(f) You are responsible for making the necessary calculations to determine whether the de minimis provisions apply to your situation. See Supplement No. 2 to part 734 for guidance regarding calculation of U.S. controlled content.

(g) See §770.3 of the EAR for principles that apply to commingled U.S.-origin technology and software.

(h) Notwithstanding the provisions of paragraphs (c) and (d) of this section, U.S.-origin technology controlled by ECCN 9E003a.1 through a.12, and .f, and
§ 734.5 Activities of U.S. and foreign persons subject to the EAR.

The following kinds of activities are subject to the EAR:

(a) Certain activities of U.S. persons related to the proliferation of nuclear explosive devices, chemical or biological weapons, missile technology as described in § 744.6 of the EAR, and the proliferation of chemical weapons as described in part 745 of the EAR.

(b) Activities of U.S. or foreign persons prohibited by any order issued under the EAR, including a Denial Order issued pursuant to part 766 of the EAR, including a Denial Order issued pursuant to part 766 of the EAR.

(c) Technical assistance by U.S. persons with respect to encryption commodities or software as described in § 744.9 of the EAR.

§ 734.6 Assistance available from BXA for determining licensing and other requirements.

(a) If you are not sure whether a commodity, software, technology, or activity is subject to the EAR, or is subject to licensing or other requirements under the EAR, you may ask BXA for an advisory opinion, classification, or a determination whether a particular item or activity is subject to the EAR. In many instances, including those where the item is specially designed, developed, configured, adapted, or modified for military application, the item may fall under the licensing jurisdiction of the Department of State and may be subject to the controls of the International Traffic in Arms Regulations (22 CFR parts 120 through 130) (ITAR). In order to determine if the Department of State has licensing jurisdiction over an item, you should submit a request for a commodity jurisdiction determination to the Department of State, Office of Defense Trade Controls. Exporters should note that in a very limited number of cases, the categories of items may be subject to both the ITAR and the EAR. The relevant departments are working to eliminate any unnecessary overlaps that may exist.

(b) As the agency responsible for administering the EAR, BXA is the only agency that has the responsibility for determining whether an item or activity is subject to the EAR and, if so, what licensing or other requirements apply under the EAR. Such a determination only affects EAR requirements, and does not affect the applicability of any other regulatory programs.

(c) If you need help in determining BXA licensing or other requirements you may ask BXA for help by following the procedures described in § 748.3 of the EAR.

§ 734.7 Published information and software.

(a) Information is “published” when it becomes generally accessible to the interested public in any form, including:

(1) Publication in periodicals, books, print, electronic, or any other media available for general distribution to any member of the public or to a community of persons interested in the subject matter, such as those in a scientific or engineering discipline, either free or at a price that does not exceed the cost of reproduction and distribution (See Supplement No. 1 to this part, Questions A(1) through A(6));

(2) Ready availability at libraries open to the public or at university libraries (See Supplement No. 1 to this part, Question A(6));
§ 734.8 Information resulting from fundamental research.

(a) Fundamental research. Paragraphs (b) through (d) of this section and §734.11 of this part provide specific rules that will be used to determine whether research in particular institutional contexts qualifies as “fundamental research.” The intent behind these rules is to identify as “fundamental research” basic and applied research in science and engineering, where the resulting information is ordinarily published and shared broadly within the scientific community. Such research can be distinguished from proprietary research and from industrial development, design, production, and product utilization, the results of which ordinarily are restricted for proprietary reasons or specific national security reasons as defined in §734.11(b) of this part. (See Supplement No. 1 to this part, Question D(8)). Note that the provisions of this section do not apply to encryption software controlled under ECCN 5D002 for “EI” reasons on the Commerce Control List (refer to Supplement No. 1 to part 774 of the EAR).

(b) University based research. (1) Research conducted by scientists, engineers, or students at a university normally will be considered fundamental research, as described in paragraphs (b) (2) through (6) of this section. ("University" means any accredited institution of higher education located in the United States.)

(2) Prepublication review by a sponsor of university research solely to ensure that the publication would not inadvertently divulge proprietary information that the sponsor has furnished to the researchers does not change the status of the research as fundamental research. However, release of information from a corporate sponsor to university researchers where the research results are subject to prepublication review, is subject to the EAR. (See Supplement No. 1 to this part, Questions D(7), D(9), and D(10).)

(3) Prepublication review by a sponsor of university research solely to ensure that publication would not compromise patent rights does not change the status of fundamental research, so long as the review causes no more than
§ 734.9 Educational information.

“Educational information” referred to in §734.3(b)(3)(iii) of this part is not subject to the EAR if it is released by instruction in catalog courses and associated teaching laboratories of academic institutions. Dissertation research is discussed in §734.8(b) of this part. (Refer to Supplement No. 1 to this part, Question C(1) through C(6).) Note that the provisions of this section do not apply to encryption software controlled under ECCN 5D002 for “EI” reasons on the Commerce Control List (refer to Supplement No. 1 to part 774 of the EAR).

[61 FR 68579, Dec. 30, 1996]
§ 734.10 Patent applications.

The information referred to in § 734.3(b)(3)(iv) of this part is:
(a) Information contained in a patent application prepared wholly from foreign-origin technical data where the application is being sent to the foreign inventor to be executed and returned to the United States for subsequent filing in the U.S. Patent and Trademark Office;
(b) Information contained in a patent application, or an amendment, modification, supplement or division of an application, and authorized for filing in a foreign country in accordance with the regulations of the Patent and Trademark Office, 37 CFR part 5; or
(c) Information contained in a patent application when sent to a foreign country before or within six months after the filing of a United States patent application for the purpose of obtaining the signature of an inventor who was in the United States when the invention was made or who is a co-inventor with a person residing in the United States.

§ 734.11 Government-sponsored research covered by contract controls.

(a) If research is funded by the U.S. Government, and specific national security controls are agreed on to protect information resulting from the research, § 734.3(b)(3) of this part will not apply to any export or reexport of such information in violation of such controls. However, any export or reexport of information resulting from the research that is consistent with the specific controls may nonetheless be made under this provision.
(b) Examples of “specific national security controls” include requirements for prepublication review by the Government, with right to withhold permission for publication; restrictions on prepublication dissemination of information to non-U.S. citizens or other categories of persons; or restrictions on participation of non-U.S. citizens or other categories of persons in the research. A general reference to one or more export control laws or regulations or a general reminder that the Government retains the right to classify is not a “specific national security control”. (See Supplement No. 1 to this part, Questions E(1) and E(2).)

§ 734.12 Effect on foreign laws and regulations.

Any person who complies with any of the license or other requirements of the EAR is not relieved of the responsibility of complying with applicable foreign laws and regulations. Conversely, any person who complies with the license or other requirements of a foreign law or regulation is not relieved of the responsibility of complying with U.S. laws and regulations, including the EAR.

SUPPLEMENT NO. 1 TO PART 734—QUESTIONS AND ANSWERS—TECHNOLOGY AND SOFTWARE SUBJECT TO THE EAR

This Supplement No. 1 contains explanatory questions and answers relating to technology and software that is subject to the EAR. It is intended to give the public guidance in understanding how BXA interprets this part, but is only illustrative, not comprehensive. In addition, facts or circumstances that differ in any material way from those set forth in the questions or answers will be considered under the applicable provisions of the EAR. Exporters should note that the provisions of this supplement do not apply to encryption software (including source code) transferred from the U.S. Munitions List to the Commerce Control List consistent with E.O. 13026 of November 15, 1996 (61 FR 58767) and pursuant to the Presidential Memorandum of that date. See § 742.15 of the EAR. This supplement is divided into nine sections according to topic as follows:

Section A: Publication of technology and exports and reexports of technology that has been or will be published.
Section B: Release of technology at conferences.
Section C: Educational instruction.
Section D: Research, correspondence, and informal scientific exchanges.
Section E: Federal contract controls.
Section F: Commercial consulting.
Section G: Software.
Section H: Availability in a public library.
Section I: Miscellaneous.
Section A: Publication

Question A(1): I plan to publish in a foreign journal a scientific paper describing the results of my research, which is in an area listed in the EAR as requiring a license to all countries except Canada. Do I need a license to send a copy to my publisher abroad?

Answer: No. This export transaction is not subject to the EAR. The EAR do not cover technology that is already publicly available, as well as technology that is made public by the transaction in question (§§ 734.3 and 734.7 of this part). Your research results would be made public by the planned publication. You would not need a license.

Question A(2): Would the answer differ depending on where I work or where I performed the research?

Answer: No. Of course, the result would be different if your employer or another sponsor of your research imposed restrictions on its publication (§ 734.8 of this part).

Question A(3): Would I need a license to send the paper to the editors of a foreign journal for review to determine whether it will be accepted for publication?

Answer: No. This export transaction is not subject to the EAR because you are submitting the paper to the editors with the intention that the paper will be published if favorably received (§ 734.7(a)(4)(iii) of this part).

Question A(4): The research on which I will be reporting in my paper is supported by a grant from the Department of Energy (DOE). The grant requires prepublication clearance by DOE. Does that make any difference under the Export Administration Regulations?

Answer: No, the transaction is not subject to the EAR. But if you published in violation of any Department of Energy controls you have accepted in the grant, you may be subject to appropriate administrative, civil, or criminal sanctions under other laws.

Question A(5): We provide consulting services on the design, layout, and construction of integrated circuit plants and production lines. A major part of our business is the publication for sale to clients of detailed handbooks and reference manuals on key aspects of the design and manufacturing processes. A typical cost of publishing such a handbook and manual might be $500. Is the publication made available at a price that does not exceed the cost of production and distribution to the technical community? Even if priced above the cost of production and distribution, is the price above the cost of production and distribution (§ 734.7(a)(1) of this part). Thus, you would need to obtain a license or qualify for a License Exception before you could export or reexport any of these handbooks or manuals.

Question A(6): My Ph.D. thesis is on technology, listed in the EAR as requiring a license to all destinations except Canada, which has never been published for general distribution. However, the thesis is available at the institution from which I took the degree. Do I need a license to send another copy to a colleague overseas?

Answer: That may depend on where in the institution it is available. If it is not readily available in the university library (e.g., by filing in open stacks with a reference in the catalog), it is not "publicly available" and the export or reexport would be subject to the EAR on that ground. The export or reexport would not be subject to the EAR if your Ph.D. research qualified as "fundamental research" under §734.8 of this part. If not, however, you will need to obtain a license or qualify for a License Exception before you can send a copy out of the country.

Question A(7): We sell electronically recorded information, including software and databases, at wholesale and retail. Our products are available by mail order to any member of the public, though intended for specialists in various fields. They are priced to maximize sales to persons in those fields. Do we need a license to sell our products to foreign customers?

Answer: You would not need a license for otherwise controlled technology or software if the technology and software are made publicly available at a price that does not exceed the cost of production and distribution to the technical community. Even if priced at a higher level, the export or reexport of the technology or software source code in a library accessible to the public is not subject to the EAR (§734.7(a) of this part).

Section B: Conferences

Question B(1): I have been invited to give a paper at a prestigious international scientific conference on a subject listed as requiring a license under the EAR to all countries, except Canada. Scientists in the field are given an opportunity to submit applications to attend. Invitations are given to those judged to be the leading researchers in the field, and attendance is by invitation only. Attendees will be free to take notes, but not make electronic or verbatim recordings of the presentations or discussions. Some of the attendees will be foreigners. Do I need a license to give my paper?

Answer: No. Release of information at an open conference and information that has been released at an open conference is not subject to the EAR. The conference you describe fits the definition of an open conference (§734.7(a) of this part).

Question B(2): Would it make any difference if there were a prohibition on making any notes or other personal record of what transpires at the conference?

Answer: Yes. To qualify as an "open" conference, attendees must be permitted to take notes or otherwise make a personal record (although not necessarily a recording). If note taking or the making of personal...
records is altogether prohibited, the conference would not be considered "open.

Question B(3): Would it make any difference if there were also a registration fee?
Answer: That would depend on whether the fee is reasonably related to costs and reflects an intention that all interested and technically qualified persons should be able to attend the conference (§ 734.7(a)(4)(iii) of this part).

Question B(4): Would it make any difference if the conference were to take place in another country?
Answer: No.

Question B(5): Must I have a license to send the paper I propose to present at such a foreign conference to the conference organizer for review?
Answer: No. A license is not required under the EAR to submit papers to foreign organizers of open conferences or other open gatherings with the intention that the papers will be delivered at the conference, and so made publicly available, if favorably received. The submission of the papers is not subject to the EAR (§ 734.7(a)(4)(iii) of this part).

Question B(6): Would the answers to any of the foregoing questions be different if my work were supported by the Federal Government?
Answer: No. You may export and reexport the papers, even if the release of the paper violates any agreements you have made with your government sponsor. However, nothing in the EAR relieves you of responsibility for conforming to any controls you have agreed to in your Federal grant or contract.

Section C: Educational Instruction

Question C(1): I teach a university graduate course on design and manufacture of very high-speed integrated circuitry. Many of the students are foreigners. Do I need a license to teach this course?
Answer: No. Release of information by instructors in catalog courses and associated teaching laboratories of academic institutions is not subject to the EAR (§ 734.9 of this part).

Question C(2): Would it make any difference if some of the students were from countries to which export licenses are required?
Answer: No.

Question C(3): Would it make any difference if I talk about recent and as yet unpublished results from my laboratory research?
Answer: No.

Question C(4): Even if that research is funded by the Government?
Answer: Even then, but you would not be released from any separate obligations you have accepted in your grant or contract.

Question C(5): Would it make any difference if I were teaching at a foreign university?
Answer: Yes. That instruction would not qualify as "release of educational information" under § 734.9 of this part because your proprietary business does not qualify as an "academic institution" within the meaning of § 734.9 of this part. Conceivably, however, the instruction might qualify as "release at an open ** * seminar, *** or other open gathering" under § 734.7(a) of this part. The conditions for qualification of such a seminar or gathering as "open", including a fee "reasonably related to costs (of the conference, not of producing the data) and reflecting an intention that all interested and technically qualified persons be able to attend," would have to be satisfied.

Section D: Research, Correspondence, and Informal Scientific Exchanges

Question D(1): Do I need a license in order for a foreign graduate student to work in my laboratory?
Answer: No. You may export and reexport the papers, even if the release of the paper violates any agreements you have made with your government sponsor. However, nothing in the EAR relieves you of responsibility for conforming to any controls you have agreed to in your Federal grant or contract.

Question D(2): Our company has entered into a cooperative research arrangement with a research group at a university. One of the researchers in that group is a PRC national. We would like to share some of our proprietary information with the university research group. We have no way of guaranteeing that this information will not get into the hands of the PRC scientist. Do we need to obtain a license to protect against that possibility?
Answer: No. The EAR do not cover the disclosure of information to any scientists, engineers, or students at a U.S. university in the course of industry-university research collaboration under specific arrangements between the firm and the university, provided these arrangements do not permit the researcher to withhold from publication any of the information that he provides to the researchers. However, if your company and the researchers have agreed to a prohibition on publication, then you must obtain a license or qualify for a License Exception before transferring the information to the university. It is important that you as the corporate sponsor and the university get together to discuss whether foreign nationals will have access to the information, so that you may obtain any necessary authorization prior to transferring the information to the research team.

Question D(3): My university will host a prominent scientist from the PRC who is an expert on research in engineered ceramics
and composite materials. Do I require a license before telling our visitor about my latest, as yet unpublished, research results in those fields?

Answer: Probably not. If you performed your research at the university, and you were subject to no contract controls on release of the research, your research would qualify as "fundamental research." (§ 734.8(a) of this part). Information arising during or resulting from such research is not subject to the EAR. (§ 734.3(b)(3) of this part).

You probably do need a license, however, if you perform research at a corporate or government facility and are subject to contract controls or if you perform research at a corporate or government laboratory and the research is subject to contract controls.

Question D(4): Would it make any difference if I were proposing to talk with a PRC expert in China?

Answer: No, if the information in question arose during or resulted from the same "fundamental research."

Question D(5): Could I properly do some work with him in his research laboratory inside China?

Answer: Application abroad of personal knowledge or technical experience acquired in the United States constitutes an export of that knowledge and experience, and such an export may be subject to the EAR. If any of the knowledge or experience you export in this way requires a license under the EAR, you must obtain such a license or qualify for a License Exception.

Question D(6): I would like to correspond and share research results with an Iranian expert in my field, which deals with technology that requires a license to all destinations except Canada. Do I need a license to do so?

Answer: Not as long as we are still talking about information that arose during or resulted from research that qualifies as "fundamental" under the rules spelled out in § 734.8(a) of this part.

Question D(7): Suppose the research in question were funded by a corporate sponsor and I had agreed to prepublication review of any paper arising from the research?

Answer: Whether your research would still qualify as "fundamental" would depend on the nature and purpose of the prepublication review. If the review is intended solely to ensure that your publications will not compromise patent rights nor inadvertently divulge proprietary information that the sponsor has furnished to you, the research could still qualify as "fundamental." But if the sponsor will consider as part of its prepublication review whether it wants to hold your new research results as trade secrets or otherwise proprietary information (even if your voluntary cooperation would be needed for it to do so), your research would no longer qualify as "fundamental." As used in these regulations it is the actual and intended openness of research results that primarily determines whether the research counts as "fundamental" and so is not subject to the EAR.

Question D(8): In determining whether research is thus open and therefore counts as "fundamental," does it matter where or in what sort of institution the research is performed?

Answer: In principle, no. "Fundamental research" is performed in industry, Federal laboratories, or other types of institutions, as well as in universities. The regulations introduce some operational presumptions and procedures that can be used both by those subject to the regulations and by those who administer them to determine with some precision whether a particular research activity is covered. Recognizing that common and predictable norms operate in different types of institutions, the regulations use the institutional locus of the research as a starting point for these presumptions and procedures. Nonetheless, it remains the type of research, and particularly the intent and freedom to publish, that identifies "fundamental research," not the institutional locus (§ 734.8(a) of this part).

Question D(9): I am doing research on high-powered lasers in the central basic-research laboratory of an industrial corporation. I am required to submit the results of my research for prepublication review before I can publish them or otherwise make them public. I would like to compare research results with a scientific colleague from Vietnam and discuss the results of the research with her when she visits the United States. Do I need a license to do so?

Answer: You probably do need a license (§ 734.8(d) of this part). However, if the only restriction on your publishing any of that information is a prepublication review solely to ensure that publication would compromise no patent rights or proprietary information provided by the company to the researcher your research may be considered "fundamental research," in which case you may be able to share information because it is not subject to the EAR. Note that the information will be subject to the EAR if the prepublication review is intended to withhold the results of the research from publication.

Question D(10): Suppose I have already cleared my company's review process and am free to publish all the information I intend to share with my colleague, though I have not yet published?
Answer: If the clearance from your company means that you are free to make all the information publicly available without restriction or delay, the information is not subject to the EAR. (§ 734.8(d) of this part)

Question D(1): I work as a researcher at a Government-owned, contractor-operated research center. May I share the results of my unpublished research with foreign nationals without concern for export controls under the EAR? Answer: That is up to the sponsoring agency and the center’s management. If your research is designated “fundamental research” within any appropriate system devised by them to control release of information by scientists and engineers at the center, it will be treated as such by the Commerce Department, and the research will not be subject to the EAR. Otherwise, you would need to obtain a license or qualify for a License Exception, except to publish or otherwise make the information public (§ 734.8(c) of this part).

Section E: Federal Contract Controls

Question E(1): In a contract for performance of research entered into with the Department of Defense (DOD), we have agreed to certain national security controls. DOD is to have ninety days to review any papers we propose before they are published and must approve assignment of any foreign nationals to the project. The work in question would otherwise qualify as “fundamental research” under § 734.8 of this part. Is the information arising during or resulting from this sponsored research subject to the EAR? Answer: Under § 734.11 of this part, any export or reexport of information resulting from government-sponsored research that is inconsistent with contract controls you have agreed to will not qualify as “fundamental research” and any such export or reexport would be subject to the EAR. Any such export or reexport that is consistent with the controls will continue to be eligible for export and reexport under the “fundamental research” rule set forth in § 734.8(a) of this part. Thus, if you abide by the specific controls you have agreed to, you need not be concerned about violating the EAR. If you violate those controls and export or reexport information as “fundamental research” under § 734.8(a) of this part, you may subject yourself to the sanctions provided for under the EAR, including criminal sanctions, in addition to administrative and civil penalties for breach of contract under other law.

Question E(2): Do the Export Administration Regulations restrict my ability to publish the results of my research? Answer: The Export Administration Regulations are not the means for enforcing the national security controls you have agreed to. If such a publication violates the contract, you would be subject to administrative, civil, and possible criminal penalties under other law.

Section F: Commercial Consulting

Question F(1): I am a professor at a U.S. university, with expertise in design and creation of submicron devices. I have been asked to be a consultant for a “third-world” company that wishes to manufacture such devices. Do I need a license to do so? Answer: Quite possibly you do. Application abroad of personal knowledge or technical experience acquired in the United States constitutes an export of that knowledge and experience that is subject to the Export Administration Regulations. If any part of the knowledge or experience your export or reexport deals with technology that requires a license under the EAR, you will need to obtain a license or qualify for a License Exception.

Section G: Software

Question G(1): Is the export or reexport of software in machine readable code subject to the EAR when the source code for such software is publicly available? Answer: If the source code of a software program is publicly available, then the machine readable code compiled from the source code is software that is publicly available and therefore not subject to the EAR. Question G(2): Is the export or reexport of software sold at a price that does not exceed the cost of reproduction and distribution subject to the EAR? Answer: Software in machine readable code is publicly available if it is available to a community at a price that does not exceed the cost of reproduction and distribution. Such reproduction and distribution costs may include variable and fixed allocations of overhead and normal profit for the reproduction and distribution functions either in your company or in a third party distribution system. In your company, such costs may not include recovery for development, design, or acquisition. In this case, the provider of the software does not receive a fee for the inherent value of the software.

Question G(3): Is the export or reexport of software subject to the EAR if it is sold at a price BXA concludes in a classification letter to be sufficiently low so as not to subject it to the EAR? Answer: In response to classification requests, BXA may choose to classify certain software as not subject to the EAR even though it is sold at a price above the costs of reproduction and distribution as long as the...
price is nonetheless sufficiently low to qualify for such a classification in the judgment of BXA.

Section H: Available in a Public Library

Question H(1): Is the export or reexport of information subject to the EAR if it is available in a library and sold through an electronic or print service?

Answer: Electronic and print services for the distribution of information may be relatively expensive in the marketplace because of the value vendors add in retrieving and organizing information in a useful way. If such information is also available in a library—itself accessible to the public—or has been published in any way, that information is "publicly available" for those reasons, and the information itself continues to not be subject to the EAR even though you access the information through an electronic or print service for which you or your employer pay a substantial fee.

Question H(2): Is the export or reexport of information subject to the EAR if the information is available in an electronic form in a library at no charge to the library patron?

Answer: Information available in an electronic form at no charge to the library patron in a library accessible to the public is information publicly available even though the library pays a substantial subscription fee for the electronic retrieval service.

Question H(3): Is the export or reexport of information subject to the EAR if the information is available in a library and sold for more than the cost of reproduction and distribution?

Answer: Information from books, magazines, dissertations, papers, electronic databases, and other information available in a library that is accessible to the public is not subject to the EAR. This is true even if you purchase such a book at more than the cost of reproduction and distribution. In other words, such information is "publicly available" even though the author makes a profit on your particular purchase for the inherent value of the information.

Section I: Miscellaneous

Question I(1): The manufacturing plant that I work at is planning to begin admitting groups of the general public to tour the plant facilities. We are concerned that a license might be required if the tour groups include foreign nationals. Would such a tour constitute an export? If so, is the export subject to the EAR?

Answer: The EAR define exports and reexports of technology to include release through visual inspection by foreign nationals of U.S.-origin equipment and facilities. Such an export or reexport qualifies under the "publicly available" provision and would not be subject to the EAR so long as the tour is truly open to all members of the public, including your competitors, and you do not charge a fee that is not reasonably related to the cost of conducting the tours. Otherwise, you will have to obtain a license, or qualify for a License Exception, prior to permitting foreign nationals to tour your facilities (§734.7 of this part).

Question I(2): Is the export or reexport of information subject to the EAR if the information is not in a library or published, but sold at a price that does not exceed the cost of reproduction and distribution?

Answer: Information that is not in a library accessible to the public and that has not been published in any way, may nonetheless become "publicly available" if you make it both available to a community of persons and if you sell it at no more than the cost of reproduction and distribution. Such reproduction and distribution costs may include recovery for development, design, or acquisition costs of the technology or software. The reason for this conclusion is that the provider of the information receives nothing for the inherent value of the information.

Question I(3): Is the export or reexport of information contributed to an electronic bulletin board subject to the EAR?

Answer: Assume each of the following:

1. Information is uploaded to an electronic bulletin board by a person that is the owner or originator of the information;
2. That person does not charge a fee to the bulletin board administrator or the subscribers of the bulletin board; and
3. The bulletin board is available for subscription to any subscriber in a given community regardless of the cost of subscription.

Such information is "publicly available" and therefore not subject to the EAR even if it is not elsewhere published and is not in a library. The reason for this conclusion is that the bulletin board subscription charges or line charges are for distribution exclusively, and the provider of the information receives nothing for the inherent value of the information.

Question I(4): Is the export or reexport of patented information fully disclosed on the public record subject to the EAR?

Answer: Information to the extent it is disclosed on the patent record open to the public is not subject to the EAR even though you may use such information only after paying a fee in excess of the costs of reproduction and distribution. In this case the seller does receive a fee for the inherent
value of the technical data; however, the export or reexport of the information is nonetheless not subject to the EAR because any person can obtain the technology from the public sources. You may disclose or publish the information. For that reason, it is impossible to impose export controls that deny access to the information.

Supplement No. 2 to Part 734—Calculation of Values for De Minimis Rules

(a) Use the following guidelines in determining values for establishing exemptions or for submission of a request for authorization:

(1) U.S. content value.

(i) U.S. content value is the delivered cost to the foreign manufacturer of the U.S. origin parts, components, or materials. (When affiliated firms have special arrangements that result in lower than normal pricing, the cost should reflect “fair market” prices that would normally be charged to similar, unaffiliated customers.)

(ii) In calculating the U.S. content value, do not include parts, components, or materials that could be exported from the United States to the new country of destination without a license (designated as “NLR”) or under License Exception GBS (see part 740 of the EAR) or under NLR for items classified as EAR99.

(2) The foreign-made product value is the normal selling price f.o.b. factory (excluding value added taxes or excise taxes).

(3) To determine the value of the U.S.-origin controlled content, you should classify the U.S.-origin content on the Commerce Control List, determine those items that would require a license from BXA for reexport to the ultimate destination of the foreign-made product if such parts, components, or materials were reexported to that destination in the form received, and divide the total value of the controlled U.S. parts, components, and materials incorporated into the foreign-made item by the sale price of the foreign-made item.

(4) If no U.S. parts, components or materials are incorporated or if the incorporated U.S. parts, components, and materials are below the de minimis level, then the foreign-made item is not subject to the EAR by reason of § 734.4 of this part; the classification of a foreign-made item is irrelevant in determining the scope of the EAR, and you should skip Step 4 in § 732.2(f) of the EAR regarding the foreign-produced direct product rule.

Note to paragraph (a)—U.S. origin peripheral or accessory devices that are merely rack mounted with or cable connected into foreign equipment are not deemed to be incorporated components even though intended for use with products made abroad. Rather, such items are treated as U.S. items that retain their identity and remain subject to the EAR.

(b) One-time report prior to reliance upon the de minimis exclusion. Report requirement. Before you may rely upon the de minimis exclusion for foreign software and technology commingled with U.S. software or technology, you must file a one-time report for the foreign software or technology. The report must include the percentage of U.S.-content by value and a description of your calculations including relevant values, assumptions, and the basis or methodologies for making the percentage calculation. The three criteria important to BXA in its review of your report will be the export price of the U.S.-content, the assumption regarding future sales of software, and the choice of the scope of foreign technology. Your methodologies must be based upon the accounting standards used in the operation of your business, and you must specify that standard in your report. Regardless of the accounting systems, standard, or conventions you use in the operation of your business, you may not depreciate the fair market values reported or otherwise reduce the fair market values by other accounting conventions such as depreciation. You may rely upon the de minimis exclusion from the commingled rule only to the extent you have reported the relevant calculations, values, assumptions, and the basis or methodologies for the calculations. These values may be historic or projected. You may rely on projected values only to the extent that and for so long as they remain consistent with your report or future values reduce the U.S.-content under your reported assumptions, basis, and methodologies. You are not required to file the above report if you do not choose to take advantage of the de minimis exclusion from the commingled rule.

(2) Export price. The report must include a description of the U.S.-content including its classification on the Commerce Control List, its performance characteristics and features, and the method of calculating its fair market value. The fair market value shall be the arms-length transaction price, if it is available. If an arms-length transaction price is unavailable, then the report will describe the valuation method chosen to calculate or derive the fair market value. Such methods may include comparable market prices or costs of production and distribution. This rule does not require calculations based upon any one accounting system or U.S. accounting standards. However, you must specify the accepted accounting standards you have chosen, and cost-based methods of valuation must be based upon records you maintain in the normal course of business. You should
also indicate whether reported values are actual arms-length market prices or derived from comparable transactions or costs of production, overhead, and profit. For example, if you chose to make calculations under the transfer pricing rules of the United States Internal Revenue Code at section 482, your report should indicate that this is the source for your methodology, and you should also indicate which of the several methodologies in these transfer pricing rules you have chosen.

(3) Future software sales. For calculations of U.S.-content in foreign software, you shall include your historic and estimated future software sales in units and value along with the rationale and basis for those estimates in the report. Unlike parts incorporated into commodities, the cost of U.S. software code will be attributed or allocated to the future sales of foreign-made software incorporating the U.S. code, to determine the percentage of U.S. controlled content. In making this calculation for foreign-made software, you must make an estimate of future software sales of that foreign software if it is commingled with or incorporated with the U.S. code. The value of the U.S. code commingled with or incorporated into the foreign made software shall be divided by the total selling price of all foreign-made software units already sold, plus the total selling price of all foreign-made software units estimated for future sales.

(4) Foreign technology and software. For calculations of U.S.-content in foreign technology and software, you shall include in the report a description of the foreign technology or software and a description of its fair market value along with the rationale and basis for the selection and valuation of such foreign software or technology. The report does not require information regarding export clearance requirements. Also note that for short supply regarding export clearance requirements. Also note that for short supply

§ 736.2 General prohibitions and determination of applicability.

SUPPLEMENT NO. 1 TO PART 736—GENERAL ORDERS

§ 736.1 Introduction.

In this part, references to the EAR are references to 15 CFR chapter VII, subchapter C. A person may undertake transactions subject to the EAR without a license or other authorization, unless the regulations affirmatively state such a requirement. As such, if an export, reexport, or activity is subject to the EAR, the general prohibitions contained in this part and the License Exceptions specified in part 740 of the EAR must be reviewed to determine if a license is necessary. In the case of all exports from the United States, you must document your export as described in part 762 of the EAR regarding recordkeeping and clear your export through the U.S. Customs Service as described in part 758 of the EAR regarding export clearance requirements. Also note that for short supply controls all prohibitions and License Exceptions are in part 754 of the EAR.

(a) In this part we tell you:

(1) The facts that make your proposed export, reexport, or conduct subject to these general prohibitions, and

(2) The ten general prohibitions.

(b) Your obligations under the ten general prohibitions and under the EAR depend in large part upon the five types of information described in §736.2(a) of this part and upon the general prohibitions described in §736.2(b) of this part. The ten general prohibitions contain cross-references to other parts of the EAR that further define the breadth of the general prohibitions.
For that reason, this part is not free-standing. In part 732, we provide certain steps you may follow in proper order to help you understand the general prohibitions and their relationship to other parts of the EAR.

(c) If you violate any of these ten general prohibitions, or engage in other conduct contrary to the Export Administration Act, the EAR, or any order, license, License Exception, or authorization issued thereunder, as described in part 740 of the EAR regarding enforcement, you will be subject to the sanctions described in that part.

§ 736.2 General prohibitions and determination of applicability.

(a) Information or facts that determine the applicability of the general prohibitions. The following five types of facts determine your obligations under the ten general prohibitions and the EAR generally:

(1) Classification of the item. The classification of the item on the Commerce Control List (see part 774 of the EAR);

(2) Destination. The country of ultimate destination for an export or reexport (see parts 738 and 774 of the EAR concerning the Country Chart and the Commerce Control List);

(3) End-user. The ultimate end-user (see General Prohibition Four (paragraph (b)(4) of this section) and parts 744 and 764 of the EAR for a reference to the list of persons you may not deal with);

(4) End-use. The ultimate end-use (see General Prohibition Five (paragraph (b)(5) of this section) and part 744 of the EAR for general end-use restrictions); and

(5) Conduct. Conduct such as contracting, financing, and freight forwarding in support of a proliferation project as described in part 744 of the EAR.

(b) General prohibitions. The following ten general prohibitions describe certain exports, reexports, and other conduct, subject to the scope of the EAR, in which you may not engage unless you either have a license from the Bureau of Export Administration (BXA) or qualify under part 740 of the EAR for a License Exception from each applicable general prohibition in this paragraph. The License Exceptions at part 740 of the EAR apply only to General Prohibitions One (Exports and Reexports in the Form Received), Two (Parts and Components Reexports), and Three (Foreign-Produced Direct Product Reexports); however, selected License Exceptions are specifically referenced and authorized in part 746 of the EAR concerning embargo destinations and in § 744.2(c) of the EAR regarding nuclear end-uses.

(1) General Prohibition One—Export and reexport of controlled items to listed countries (Exports and Reexports). You may not, without a license or License Exception, export any item subject to the EAR to another country or reexport any item of U.S.-origin if each of the following is true:

(i) The item is controlled for a reason indicated in the applicable Export Control Classification Number (ECCN), and (ii) Export to the country of destination requires a license for the control reason as indicated on the Country Chart at part 738 of the EAR. (The scope of this prohibition is determined by the correct classification of your item and the ultimate destination as that combination is reflected on the Country Chart.)

Note that each License Exception described at part 740 of the EAR supersedes General Prohibition One if all terms and conditions of a given License Exception are met by the exporter or reexporter.

(2) General Prohibition Two—Reexport and export from abroad of foreign-made items incorporating more than a de minimis amount of controlled U.S. content (Parts and Components Reexports). You may not, without a license or License Exception, export, reexport or export from abroad any foreign-made commodity, software, or technology incorporating U.S.-origin commodities, software, or technology respectively that is controlled to the country of ultimate destination if the foreign-made item meets all three of the following conditions:

(A) It incorporates more than the de minimis amount of controlled U.S. content, as defined in § 734.4 of the EAR concerning the scope of the EAR;
(B) It is controlled for a reason indicated in the applicable ECCN; and
(C) Its export to the country of destination requires a license for that control reason as indicated on the Country Chart. (The scope of this prohibition is determined by the correct classification of your foreign-made item and the ultimate destination, as that combination is reflected on the Country Chart.)

(ii) Each License Exception described in part 740 of the EAR supersedes General Prohibition Two if all terms and conditions of a given License Exception are met by the exporter or reexporter.

(3) General Prohibition Three—Reexport and export from abroad of the foreign-produced direct product of U.S. technology and software (Foreign-Produced Direct Product Reexports). (i) Country scope of prohibition. You may not export, reexport, or export from abroad items subject to the scope of this General Prohibition Three to Cuba, North Korea, Libya, or a destination in Country Group D:1 (See Supplement No. 1 to part 740 of the EAR).

(ii) Product scope of foreign-made items subject to prohibition. This General Prohibition 3 applies if an item meets either the Conditions defining the direct product of technology or the Conditions defining the direct product of a plant in paragraph (b)(3)(ii)(A) of this section:

(A) Conditions defining direct product of technology. Foreign-made items are subject to this General Prohibition 3 if they meet both of the following conditions:

(1) They are the direct product of technology or software that requires a written assurance as a supporting document for a license, as defined in paragraph (o)(3)(i) of Supplement No. 2 to part 748 of the EAR, or as a precondition for the use of License Exception TSR at §740.6 of the EAR, and

(2) They are subject to national security controls as designated on the applicable ECCN of the Commerce Control List at part 774 of the EAR.

(B) Conditions defining direct product of a plant. Foreign-made items are also subject to this General Prohibition 3 if they are the direct product of a complete plant or any major component of a plant if both of the following conditions are met:

(1) Such plant or component is the direct product of technology that requires a written assurance as a supporting document for a license or as a precondition for the use of License Exception TSR in §740.6 of the EAR, and

(2) Such foreign-made direct products of the plant or component are subject to national security controls as designated on the applicable ECCN of the Commerce Control List at part 774 of the EAR.

(iii) License Exceptions. Each License Exception described at part 740 of the EAR supersedes this General Prohibition Three if all terms and conditions of a given exception are met by the exporter or reexporter.

(4) General Prohibition Four (Denial Orders)—Engaging in actions prohibited by a denial order. (i) You may not take any action that is prohibited by a denial order issued under part 766 of the EAR, Administrative Enforcement Proceedings. These orders prohibit many actions in addition to direct exports by the person denied export privileges, including some transfers within a single country either in the United States or abroad by other persons. You are responsible for ensuring that any of your transactions in which a person who is denied export privileges is involved do not violate the terms of the order. The names of persons denied export privileges are published in the FEDERAL REGISTER and are also included on the Denied Persons List, which is referenced in Supplement No. 2 to part 764 of the EAR, Enforcement. The terms of the standard denial order are set forth in Supplement No. 1 to part 764. You should note that some denial orders differ from the standard denial order. BXA may, on an exceptional basis, authorize activity otherwise prohibited by a denial order. See §764.3(a)(3) of the EAR.

(ii) There are no License Exceptions described in part 740 of the EAR that authorize conduct prohibited by this General Prohibition Four.

(5) General Prohibition Five—Export or reexport to prohibited end-uses or end-users (End-Use End-User). You may not, without a license, knowingly export or reexport any item subject to the EAR
(6) General Prohibition Six—Export or reexport to embargoed destinations (Embargo). (i) You may not, without a license or License Exception authorized under part 746, export or reexport any item subject to the EAR to a country that is embargoed by the United States or otherwise made subject to controls as both are described at part 746 of the EAR.

(ii) License Exceptions to General Prohibition Six are described in part 746 of the EAR, on Embargoes and Other Special Controls. Unless a License Exception or other authorization is authorized in part 746 of the EAR, the License Exceptions described in part 740 of the EAR are not available to overcome this general prohibition.

(7) General Prohibition Seven—Support of proliferation activities (U.S. person proliferation activity)—(i) Support of proliferation activities (U.S. person proliferation activity). (A) If you are a U.S. person as that term is defined in §744.6(c) of the EAR, you may not engage in any activities prohibited by §744.6(a) or (b) of the EAR, which prohibits the performance, without a license from BXA, of certain financing, contracting, service, support, transportation, freight forwarding, or employment that you know will assist in certain proliferation activities described further in part 744 of the EAR. There are no License Exceptions to this General Prohibition Seven in part 740 of the EAR unless specifically authorized in that part.

(B) If you are a U.S. person as that term is defined in §744.6(c) of the EAR, you may not export a Schedule 2 or Schedule 3 chemical listed in Supplement No. 1 to part 745 to a destination not listed in Supplement No. 2 to part 745 without first submitting to the Department of Commerce a copy of the End-Use Certificate as required in §745.2 of the EAR.

(C) If you are a U.S. person as that term is defined in §744.6(c) of the EAR, you may not export a Schedule 1 chemical listed in Supplement No. 1 to part 745 without first complying with the provisions of §§742.16 and 745.2 of the EAR.

(8) General Prohibition Eight—In transit shipments and items to be unladen from vessels or aircraft (Intransit).

(i) Unlanding and shipping in transit. You may not export or reexport an item through or transit through a country listed in paragraph (b)(8)(ii) of this section unless a License Exception or license authorizes such an export or reexport directly to such a country of transit.

(ii) Country scope. This General Prohibition Eight applies to Albania, Armenia, Azerbaijan, Belarus, Bulgaria, Cambodia, Cuba, Estonia, Georgia, Kazakhstan, Kyrgyzstan, Laos, Latvia, Lithuania, Mongolia, North Korea, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan, Vietnam.

(9) General Prohibition Nine—Violation of any order, terms, and conditions (Orders, Terms, and Conditions). You may not violate terms or conditions of a license or of a License Exception issued under or made a part of the EAR, and you may not violate any order issued under or made a part of the EAR. There are no License Exceptions to this General Prohibition Nine in part 740 of the EAR. Supplements Nos. 1 and 2 to this part provide for certain General Orders and Administrative Orders.

(10) General Prohibition Ten—Proceeding with transactions with knowledge that a violation has occurred or is about to occur (Knowledge Violation to Occur). You may not sell, transfer, export, reexport, finance, order, buy, remove, conceal, store, use, loan, dispose of, transfer, transport, forward, or otherwise service, in whole or in part, any item subject to the EAR and exported or to be exported with knowledge that a violation of the Export Administration Regulations, the Export Administration Act or any order, license, License Exception, or other authorization issued thereunder has occurred, is about to occur, or is intended to occur in connection with the item. Nor may you rely upon any license or License Exception after notice to you of the
suspension or revocation of that license or exception. There are no License Exceptions to this General Prohibition Ten in part 740 of the EAR.

SUPPLEMENT NO. 1 TO PART 736—GENERAL ORDERS

General Order No. 1 of September 16, 1998: Establishing a 24-month validity period on reexport authorizations issued without a validity period and revoking those exceeding that period.

(a) Reexport authorizations issued within 24-months of the General Order. All reexport authorizations issued with no validity period within the 24-months preceding September 16, 1998 shall be deemed to have an expiration date which shall be the date 24-months from the date of issuance of the reexport authorization or November 16, 1998, whichever is longer.

(b) Reexport authorizations issued before the 24-month period preceding the General Order. For reexport authorizations issued with no validity period before the 24-month period preceding September 16, 1998:

(1) Effective September 16, 1998, all such outstanding reexport authorizations for terrorist-supporting countries (see parts 742 and 746 of the EAR) are revoked.

(2) Effective November 16, 1998, all other such outstanding reexport authorizations are revoked.

(c) Extensions. If necessary, you may request extensions of such authorizations according to procedures set forth in §750.7(g) of the EAR.

(d) Specific Notice from BXA. If you have received, or should you receive, specific notice from BXA with regard to a reexport authorization covered by this General Order, informing you of a revocation, suspension, or revision (including validity period) of any such reexport authorization, then the terms of that specific notice will be controlling.

(e) Definition of “authorization”. The term “authorization” as used in this General Order encompasses the range of reexport authorizations granted by BXA, which includes licenses, individual letters, and other types of notifications.

[63 FR 40426, Sept. 16, 1998]

SUPPLEMENT NO. 2 TO PART 736—ADMINISTRATIVE ORDERS

Administrative Order One: Disclosure of License Issuance and Other Information. Consistent with section 12(c) of the Export Administration Act of 1979, as amended, information obtained by the U.S. Department of Commerce for the purpose of consideration of or concerning license applications, as well as related information, will not be publicly disclosed without the approval of the Secretary of Commerce. Shipper’s Export Declarations also are exempt from public disclosure, except with the approval of the Secretary of Commerce, in accordance with §301(g) of Title 13, United States Code.

Administrative Order Two: Conduct of Business and Practice in Connection with Export Control Matters.

(a) Conduct of business and practice in connection with export control matters.

(i) Exclusion of persons guilty of unethical conduct or not possessing required integrity and ethical standards.

(ii) Grounds for exclusion. Among the grounds for exclusion are the following:

(A) Inducing or attempting to induce by gifts, promises, bribes, or otherwise, any officer or employee of BXA or any customs or post office official, to take any action with respect to the issuance of licenses or any other aspect of the administration of the Export Administration Act, whether or not in violation of any regulation;

(B) Offering or making gifts or promises thereof to any such officer or employee for any other reason;

(C) Soliciting by advertisement or otherwise the handling of business before BXA on behalf of another, in connection with any export control matter, or both, as provided in part 764 of the EAR.

Who may be excluded.

Among the persons who may be excluded are those:

(A) Engaging in any unethical activity or who shall be found guilty of engaging in any unethical activity or who shall be demonstrated not to possess the required integrity and ethical standards, may be excluded from (denied) export privileges on his own behalf, or may be excluded from practice before BXA on behalf of another, in connection with any export control matter, or both, as provided in part 764 of the EAR.

(B) Offering or making gifts or promises thereof to any such officer or employee for any other reason;

(C) Soliciting by advertisement or otherwise the handling of business before BXA on behalf of another, in connection with any export control matter, or both, as provided in part 764 of the EAR.

(D) Charging, or proposing to charge, for any service performed in connection with the issuance of any license, any fee wholly contingent upon the granting of such license and the amount or value thereof. This provision will not be construed to prohibit the charge of any fee agreed to by the parties; provided that the out-of-pocket expenditures and the reasonable value of the services performed, whether or not the license is issued and regardless of the amount thereof, are fairly compensated; and

(E) Knowingly violating or participating in the violation of, or an attempt to violate, any regulation with respect to the export of commodities or technical data, including the making of or inducing another to make any false representations to facilitate any export in violation of the Export Administration Act of 1979, as amended.

[61 FR 20145, Apr. 6, 1996; 62 FR 25456, May 9, 1997; 64 FR 27141, May 18, 1999; 64 FR 47105, Aug. 30, 1999]
Bureau of Export Administration, Commerce § 738.2

Act or any order or regulation issued thereunder.

(iii) Definition. As used in this Administration Order, the terms "practice before BXA" and "appear before BXA" include:

(A) The submission on behalf of another of applications for export licenses or other documents required to be filed with BXA, or the execution of the same;

(B) Conferences or other communications on behalf of another with officers or employees of BXA for the purpose of soliciting or expediting approval by BXA of applications for export licenses or other documents, or with respect to quotas, allocations, requirements or other export control actions, pertaining to matters within the jurisdiction of BXA;

(C) Participating on behalf of another in any proceeding pending before BXA; and

(D) Submission to a customs official on behalf of another of a license or Shipper's Export Declaration or other export control document.

(iv) Proceedings. All proceedings under this Administrative Order shall be conducted in the same manner as provided in part 766 of the EAR.

(2) Employees and former employees. Persons who are or at any time have been employed on a full-time or part-time, compensated or uncompensated, basis by the U.S. Government are subject to the provisions of 18 U.S.C. 203, 205, and 207 (Pub. L. 87-849, 87th Congress) in connection with representing a private party or interest before the U.S. Department of Commerce in connection with any export control matter.

PART 738—COMMERCE CONTROL LIST OVERVIEW AND THE COUNTRY CHART

Sec. 738.1 Introduction.

738.2 Commerce Control List (CCL) structure.

738.3 Commerce Country Chart structure.

738.4 Determining whether a license is required.

Supplement No. 1 to Part 738—Commerce Country Chart

Source: 61 FR 12756, Mar. 25, 1996, unless otherwise noted.

§ 738.3 Commerce Control List (CCL) structure.

(a) Categories. The CCL is divided into 10 categories, numbered as follows:

0—Nuclear Materials, Facilities and Equipment and Miscellaneous

1—Materials, Chemicals, "Microorganisms," and Toxins

2—Materials Processing

3—Electronics

4—Computers

5—Telecommunications and Information Security

6—Lasers and Sensors

7—Navigation and Avionics

8—Marine

9—Propulsion Systems, Space Vehicles and Related Equipment

(b) Groups. Within each category, items are arranged by group. Each category contains the same five groups.
§ 738.2

Each Group is identified by the letters A through E, as follows:
A—Equipment, Assemblies and Components
B—Test, Inspection and Production Equipment
C—Materials
D—Software
E—Technology

(c) Order of review. In order to classify your item against the CCL, you should begin with a review of the general characteristics of your item. This will usually guide you to the appropriate category on the CCL. Once the appropriate category is identified, you should match the particular characteristics and functions of your item to a specific ECCN. If the ECCN contains a list under the “Items” heading, you should review the list to determine within which subparagraph(s) your items are identified.

(d) Entries. (1) Composition of an entry. Within each group, individual items are identified by an Export Control Classification Number (ECCN). Each number consists of a set of digits and a letter. The first digit identifies the general category within which the entry falls (e.g., 3A001). The letter immediately following this first digit identifies under which of the five groups the item is listed (e.g., 3A001).

(ii) The numbers in either the second or third digit (e.g., 3A001) serve to differentiate between multilateral and unilateral entries. An entry with the number “9” as the second digit, identifies the entire entry as controlled for a unilateral concern (e.g., 2A001 for anti-terrorism reasons). If the number “9” appears as the third digit, the item is controlled for unilateral purposes based on a proliferation concern (e.g., 2A292 is controlled for unilateral purposes based on nuclear nonproliferation concerns).

(iii) The last digit within each entry (e.g., 3A001) is used for the sequential numbering of ECCNs to differentiate between entries on the CCL.

(2) Reading an ECCN. A brief description is provided next to each ECCN. Following this description is the actual entry containing “License Requirements,” “License Exceptions,” and “List of Items Controlled” sections. A brief description of each section and its use follows:

(i) License Requirements. This section contains a separate line identifying all possible Reasons for Control in order of precedence, and two columns entitled “Control(s)” and “Country Chart”.

(A) The “Controls” header identifies all applicable Reasons for Control, in order of restrictiveness, and to what extent each applies (e.g., to the entire entry or only to certain subparagraphs). Those requiring licenses for a larger number of countries and/or items are listed first. As you read down the list the number of countries and/or items requiring a license declines. Since Reasons for Control are not mutually exclusive, items controlled within a particular ECCN may be controlled for more than one reason. The following is a list of all possible Reasons for Control:

AT Anti-Terrorism
CB Chemical & Biological Weapons
CC Crime Control
CW Chemical Weapons Convention
EI Encryption Items
FC Firearms Convention
MT Missile Technology
NS National Security
NP Nuclear Nonproliferation
RS Regional Stability
SS Short Supply
XP Computers
SI Significant Items
(B) The “Country Chart” header identifies, for each applicable Reason for Control, a column name and number (e.g., CB Column 1). These column identifiers are used to direct you from the CCL to the appropriate column identifying the countries requiring a license. Consult part 742 of the EAR for an in-depth discussion of the licensing requirements and policies applicable to each Country Chart column.

(ii) License Exceptions. This section provides a brief eligibility statement for each ECCN-driven License Exception that may be applicable to your transaction, and should be consulted only AFTER you have determined a license is required based on an analysis of the entry and the Country Chart. The brief eligibility statement in this section is provided to assist you in deciding which ECCN-driven License Exception related to your particular item and destination you should explore prior to submitting an application. The term “Yes” (followed in some instances by the scope of Yes) appears next to each available ECCN-driven License Exception. The term “N/A” will be noted for License Exceptions that are not available within a particular entry. If one or more License Exceptions appear to apply to your transaction, you must consult part 740 of the EAR to review the conditions and restrictions applicable to each available License Exception. The list of License Exceptions contained within each ECCN is not an all-exclusive list. Other License Exceptions, not based on particular ECCNs, may be available. Consult part 740 of the EAR to determine eligibility for non-ECCN-driven License Exceptions.

(iii) List of Items Controlled—(A) Units. The unit of measure applicable to each entry is identified in the “Units” header. Most measurements used in the CCL are expressed in metric units with an inch-pound conversion where appropriate. Note that in some ECCNs the inch-pound unit will be listed first. In instances where other units are in general usage or specified by law, these will be used instead of metric. Generally, when there is a difference between the metric and inch-pound figures, the metric standard will be used for classification and licensing purposes.

(B) Related definitions. This header identifies, where appropriate, definitions or parameters that apply to all items controlled by the entry. The information provided in this section is unique to the entry, and hence not listed in the definitions contained in part 772 of the EAR.

(C) Related controls. If another U.S. government agency or department has export licensing authority over items related to those controlled by an entry, a statement is included identifying the agency or department along with the applicable regulatory cite. An additional cross-reference may be included in instances where the scope of controls differs between a CCL entry and its corresponding entry on list maintained by the European Union. This information is provided to assist readers who use both lists.

(D) Items. This header contains a positive list of all items controlled by a particular entry and must be reviewed to determine whether your item is controlled by that entry. In some entries, the list is contained within the entry heading. In these entries a note is included to direct you to the entry heading.

§ 738.3 Commerce Country Chart structure.

(a) Scope. The Commerce Country Chart (Country Chart) allows you to determine, based on the Reason(s) for Control associated with your item, if you need a license to export or reexport your item to a particular destination. There are only two instances where the chart cannot be used for this purpose:

(1) Items controlled for short supply reasons. Due to the unique nature of these controls, entries controlled for Short Supply reasons will send you directly to part 754 of the EAR. Part 754 of the EAR is self-contained and includes information on licensing requirements, licensing policies, and all available License Exceptions, for items controlled for Short Supply reasons.
§ 738.4 Determining whether a license is required.

(a) Using the CCL and the Country Chart—(1) Overview. Once you have determined that your item is controlled by a specific ECCN, you must use information contained in the “License Requirements” section of that ECCN in combination with the Country Chart to decide whether a license is required.

(b) Countries. The first column of the Country Chart lists all countries in alphabetical order. There are a number of destinations that are not listed in the Country Chart contained in Supplement No. 1 to part 738. If your destination is not listed on the Country Chart and such destination is a territory, possession, or department of a country included on the Country Chart, the EAR accords your destination the same licensing treatment as the country of which it is a territory, possession, or department. For example, if your destination is the Cayman Islands, a dependent territory of the United Kingdom, consult the United Kingdom on the Country Chart for licensing requirements.

(c) Columns. Stretching out to the right are horizontal headers identifying the various Reasons for Control. Under each Reason for Control header are diagonal column identifiers capping individual columns. Each column identifier consists of the two letter Reason for Control and a column number. (e.g., CB Column 1). The column identifiers correspond to those listed in the “Country Chart” header within the “License Requirements” section of each ECCN.

(d) Cells. The symbol “X” is used to denote licensing requirements on the Country Chart. If an “X” appears in a particular cell, transactions subject to that particular Reason for Control/Destination combination require a license. There is a direct correlation between the number of “X”s applicable to your transaction and the number of licensing reviews your application will undergo.

§ 738.4 Determining whether a license is required.

(a) Using the CCL and the Country Chart—(1) Overview. Once you have determined that your item is controlled by a specific ECCN, you must use information contained in the “License Requirements” section of that ECCN in combination with the Country Chart to decide whether a license is required.

(2) License decision making process. The following decision making process must be followed in order to determine whether a license is required to export or reexport a particular item to a specific destination:

(i) Examine the appropriate ECCN in the CCL. Is the item you intend to export or reexport controlled for a single Reason for Control?

(A) If yes, identify the single Reason for Control and the relevant Country Chart column identifier (e.g., CB Column 1).

(B) If no, identify the Country Chart column identifier for each applicable Reason for Control (e.g., NS Column 1, NP Column 1, etc.).

(ii) Review the Country Chart. With each of the applicable Country Chart Column identifiers noted, turn to the Country Chart (Supplement No. 1 to part 738). Locate the correct Country Chart column identifier on the diagonal headings, and determine whether an “X” is marked in the cell next to the country in question for each Country Chart column identified in the applicable ECCN. If your item is subject to more than one reason for control, repeat this step using each unique Country Chart column identifier.

(A) If yes, a license application must be submitted based on the particular reason for control and destination, unless a License Exception applies. If “Yes” is noted next to any of the listed License Exceptions, you should consult part 740 of the EAR to determine whether you can use any of the available ECCN-driven License Exceptions to effect your shipment, rather than applying for a license. Each affirmative
license requirement must be overcome by a License Exception. If you are unable to qualify for a License Exception based on each license requirement noted on the Country Chart, you must apply for a license. Note that other License Exceptions, not related to the CCL, may also apply to your transaction (See part 740 of the EAR).

(B) If no, a license is not required based on the particular reason for control and destination. Provided General Prohibitions Four through Ten do not apply to your proposed transaction, you may effect your shipment using the symbol “NLR”. Proceed to parts 758 and 762 of the EAR for information on export clearance procedures and recordkeeping requirements. Note that although you may stop after determining a license is required based on the first Reason for Control, it is best to work through each applicable Reason for Control. A full analysis of every possible licensing requirement based on each applicable Reason for Control is required to determine the most advantageous License Exception available for your particular transaction and, if a license is required, ascertain the scope of review conducted by BXA on your license application.

(b) Sample analysis using the CCL and Country Chart—(1) Scope. The following sample entry and related analysis is provided to illustrate the type of thought process you must complete in order to determine whether a license is required to export or reexport a particular item to a specific destination using the CCL in combination with the Country Chart.

2A000: Entry heading.

LICENSE REQUIREMENTS
Reason for Control: NS, NP, AT

<table>
<thead>
<tr>
<th>Control(s)</th>
<th>Country Chart</th>
</tr>
</thead>
<tbody>
<tr>
<td>NS applies to entire entry</td>
<td>NS Column 2</td>
</tr>
<tr>
<td>NP applies to 2A000.b</td>
<td>NP Column 1</td>
</tr>
<tr>
<td>AT applies to entire entry</td>
<td>AT Column 1</td>
</tr>
</tbody>
</table>

LICENSE EXCEPTIONS
LVS: $5,000
GBS: Yes
CIV: N/A

LIST OF ITEMS CONTROLLED
Unit: Number
Related Definition: N/A
Related Controls: N/A
Items:
  a. Having x.
  b. Having z.

(3) Sample analysis. After consulting the CCL, I determine my item, valued at $10,000, is classified under ECCN 2A000.a. I read that the entire entry is controlled for national security, and anti-terrorism reasons. Since my item is classified under paragraph .a, and not .b, I understand that though nuclear nonproliferation controls apply to a portion the entry, they do not apply to my item. I note that the appropriate Country Chart column identifiers are NS Column 2 and AT Column 1. Turning to the Country Chart, I locate my specific destination, India, and see that an “X” appears in the NS Column 2 cell for India, but not in the AT Column 1 cell. I understand that a license is required, unless my transaction qualifies for a License Exception or Special Comprehensive License. From the License Exception LVS value listed in the entry, I know immediately that my proposed transaction exceeds the value limitation associated with LVS. Noting that License Exception GBS is “Yes” for this entry, I turn to part 740 of the EAR to review the provisions related to use of GBS.

1 This country is subject to United Nations Sanctions. See part 746 of the EAR for additional OFAC licensing requirements that may apply to your proposed transaction.

2 A license is required only for computers controlled by 4A001, 4A002, & 4A003 if the CTP is greater than 20,000 MTOPS. A license is NOT required for any other items subject to NS Column 2.

PART 740—LICENSE EXCEPTIONS

Sec.
740.1 Introduction.
740.2 Restrictions on all License Exceptions.
740.3 Shipments of limited value (LVS).
740.4 Shipments to Country Group B countries (GBS).
740.5 Civil end-users (CIV).
740.6 Technology and software under restriction (TSR).
740.7 Computers (CTP).
740.8 Key management infrastructure (KMI).

SUPPLEMENT NO. 1 TO PART 740—COUNTRY GROUPS

SUPPLEMENT NO. 2 TO PART 740—ITEMS THAT MAY BE DONATED TO MEET BASIC HUMAN NEEDS UNDER THE HUMANITARIAN LICENSE EXCEPTION

SUPPLEMENT NO. 3 TO PART 740—COUNTRIES ELIGIBLE TO RECEIVE GENERAL PURPOSE ENCRYPTION COMMODITIES AND SOFTWARE

SOURCE: 61 FR 12768, Mar. 25, 1996, unless otherwise noted.

§ 740.1 Introduction.

In this part, references to the EAR are references to 15 CFR chapter VII, subchapter C. 

(a) Scope. A “License Exception” is an authorization contained in this part that allows you to export or reexport under stated conditions, items subject to the Export Administration Regulations (EAR) that would otherwise require a license under General Prohibitions One, Two, or Three, as indicated under one or more of the Export Control Classification Numbers (ECCNs) in the Commerce Control List (CCL) in Supplement No. 1 to part 744 of the EAR. If your export or reexport is subject to General Prohibitions Six for embargoed destinations, refer to part 746 of the EAR to determine the availability of any License Exceptions. Special commodity controls apply to short supply items. License Exceptions for items listed on the CCL as controlled for Short Supply reasons are found in part 754 of the EAR. If your export or reexport is subject to General Prohibition Five, consult part 744 of the EAR. If your export or reexport is subject to General Prohibitions Four, Seven, Eight, Nine, or Ten, then no License Exceptions apply.

(b) Certification. By using any of the License Exceptions you are certifying that the terms, provisions, and conditions for the use of the License Exception described in the EAR have been met. Please refer to part 758 of the EAR for clearance of shipments and documenting the use of License Exceptions.

(c) License Exception symbols. Each License Exception bears a three letter symbol that will be used for export clearance purposes (see paragraph (d) of this section).

(d) Shipper’s Export Declaration—(1) Clearing exports under License Exceptions. You must enter on any required Shipper’s Export Declaration (SED) the letter code (e.g., LVS, TMP) of the License Exception(s) under which you are exporting. In the case of License Exceptions LVS, GBS, and CIV, the ECCN of the item being exported must also be entered. Please refer to § 758.3 of the EAR for the use of SEDs.

(2) Clearing exports when no license is required (NLR). Certain items are listed on the CCL but do not require a license (NLR). Certain items are listed on the CCL but do not require a license (NLR).
§ 740.2 Restrictions on all License Exceptions.

(a) You may not use any License Exception if any one or more of the following apply:

(1) Your authorization to use a License Exception has been suspended or revoked, or your intended export does not qualify for a License Exception.

(2) The export or reexport is subject to one of the ten General Prohibitions, is not eligible for a License Exception, and has not been authorized by BXA.

(3) The item is for surreptitious interception of wire or oral communications, controlled under ECCN 5A980, unless you are a U.S. Government agency (see §740.11(b)(2)(ii) of this part, Governments (GOV)).

(4) The commodity you are shipping is a specially designed crime control and detection instrument or equipment described in §742.7 of the EAR and you are not shipping to Iceland, New Zealand, or countries listed in Country Group A:1 (see Supplement No. 1 to part 740), unless the shipment is authorized under License Exception BAG, §740.14(e) of this part (shotguns and shotgun shells).

(5) The item is controlled for missile technology (MT) reasons, except that the items described in ECCNs 6A008, 7A001, 7A002, 7A004, 7A101, 7A102, 7A103, 7A104, 7B001, 7D001, 7D002, 7D003, 7D101, 7D102, 7E003, or 7E101, may be exported as part of a manned aircraft, land vehicle or marine vehicle or in quantities appropriate for replacement parts for such applications under §740.9(a)(2)(ii) (License Exception TMP for kits consisting of replacement parts), §740.10 (License Exception RPL), §740.13 (License Exception TSU), or §740.15(c) (License Exception AVS for equipment and spare parts for permanent use on a vessel or aircraft).

(b) All License Exceptions are subject to revision, suspension, or revocation, in whole or in part, without notice. It may be necessary for BXA to stop a shipment or an export transaction at any stage of its progress, e.g., in order to prevent an unauthorized export or reexport. If a shipment is already en route, it may be further necessary to order the return or unloading of the shipment at any port of call.

(BXA may by informing the exporter, suspend or revoke any License Exception in order to comply with U.S. Wassenaar obligations. In addition, BXA may inform an exporter, that before using any License Exception, a notice be submitted with BXA concerning the proposed export.

§ 740.3 Shipments of limited value (LVS).

(a) Scope. License Exception LVS authorizes the export and reexport in a single shipment of eligible commodities as identified by “LVS - $(value limit)” on the CCL.

(b) Eligible Destinations. This License Exception is available for all destinations in Country Group B (see Supplement No. 1 to part 740), provided that the net value of the commodities included in the same order and controlled under the same ECCN entry on the CCL does not exceed the amount specified in the LVS paragraph for that entry.

(c) Definitions—(1) Order. The term order as used in this §740.3 means a...
§ 740.3

communication from a person in a foreign country, or that person’s representative, expressing an intent to import commodities from the exporter. Although all of the details of the order need not be finally determined at the time of export, terms relating to the kinds and quantities of the commodities to be exported, as well as the selling prices of these commodities, must be finalized before the goods can be exported under License Exception LVS.

(2) Net value: for LVS shipments. The actual selling price of the commodities that are included in the same order and are controlled under the same entry on the CCL, less shipping charges, or the current market price of the commodities to the same type of purchaser in the United States, whichever is the larger. In determining the actual selling price or the current market price of the commodity, the value of containers in which the commodity is being exported may not be reduced by subtracting the value of any content that would not, if shipped separately, be subject to licensing. Where the total value of the containers and their contents must be shown on Shipper’s Export Declarations under one Schedule B Number, the exporter, in effecting a shipment under this License Exception, must indicate the “net value” of the contained commodity immediately below the description of the commodity.

(3) Single shipment. All commodities moving at the same time from one exporter to one consignee or intermediate consignee on the same exporting carrier even though these commodities will be forwarded to one or more ultimate consignees. Commodities being transported in this manner will be treated as a single shipment even if the commodities represent more than one order or are in separate containers.

(4) Additional eligibility requirements and restrictions—(1) Eligible orders. To be eligible for this License Exception, orders must meet the following criteria:

(i) orders must not exceed the applicable “LVS” dollar value limits. An order is eligible for shipment under LVS when the “net value” of the commodities controlled under the same entry on the CCL does not exceed the amount specified in the “LVS” paragraph for that entry. An LVS shipment may include more than one eligible order.

(ii) orders may not be split to meet the applicable LVS dollar limits. An order that exceeds the applicable LVS dollar value limit may not be misrepresented as two or more orders, or split among two or more shipments, to give the appearance of meeting the applicable LVS dollar value limit. However an order that meets all the LVS eligibility requirements, including the applicable LVS dollar value limit, may be split among two or more shipments.

(iii) orders must be legitimate. Exporters and consignees may not, either collectively or individually, structure or adjust orders to meet the applicable LVS dollar value limits.

(2) Restriction on annual value of LVS orders. The total value of exports per calendar year to the same ultimate or intermediate consignee of commodities classified under a single ECCN may not exceed 12 times the LVS value limit for that ECCN; however, there is no restriction on the number of shipments provided that value is not exceeded. This annual value limit applies to shipments to the same ultimate consignee even though the shipments are made through more than one intermediate consignee. There is no restriction on the number of orders that may be included in a shipment, except that the annual value limit per ECCN must not be exceeded.

(3) orders where two or more LVS dollar value limits apply. An order may include Commodities that are controlled under more than one entry on the CCL. In this case, the net value of the entire order may exceed the LVS dollar value for any single entry on the CCL. However, the net value of the commodities controlled under each ECCN entry shall not exceed the LVS dollar value limit specified for that entry.

Example to Paragraph (d)(3): An order includes commodities valued at $8,000. The order consists of commodities controlled under two ECCN entries, each having an LVS value limit of $5,000. Commodities in the order controlled under one ECCN are valued at $3,500 while those controlled under the other ECCN are valued at $4,500. Since the net value of the commodities controlled under each entry falls within the LVS dollar
value limits applicable to that entry, the order may be shipped under this License Exception.

(4) Prohibition against evasion of license requirements. Any activity involving the use of this License Exception to evade license requirements is prohibited. Such devices include, but are not limited to, the splitting or structuring of orders to meet applicable LVS dollar value limits, as prohibited by paragraphs (d)(1) (ii) and (iii) of this section.

(5) Exports of encryption items. For components or spare parts controlled for "EI" reasons under ECCN 5A002, exports under this License Exception must be destined to support an item previously authorized for export.

(e) Reexports. Commodities may be reexported under this License Exception, provided that they could be exported from the United States to the new country of destination under LVS.

(f) Reporting requirements. See § 743.1 of the EAR for reporting requirements for exports of certain commodities under License Exception LVS.

§ 740.5 Civil end-users (CIV).

License Exception CIV authorizes exports and reexports controlled to the ultimate destination for national security reasons only and identified by "CIV—Yes" on the CCL, provided that they are destined to civil end-users for civil end-uses in Country Group D:1. (See Supplement No. 1 to part 740.) CIV may not be used for exports and reexports to military end-users or to known military uses. Such exports and reexports will continue to require a license. In addition to conventional military activities, military uses include any proliferation activities described and prohibited by part 744 of the EAR. A license is also required for transfer to military end-users or end-uses in eligible countries of items exported under CIV. See §743.1 of the EAR for reporting requirements for exports of certain commodities under License Exception CIV.

§ 740.6 Technology and software under restriction (TSR).

(a) Scope. License Exception TSR permits exports and reexports of technology and software controlled to the ultimate destination for national security reasons only and identified by "TSR—Yes" in entries on the CCL, provided the software or technology is destined to Country Group B. (See Supplement No. 1 to part 740.) A written assurance is required from the consignee before exporting or reexporting under this License Exception.

(i) Required assurance for export of technology. You may not export or reexport technology under this License Exception until you have received from the importer a written assurance, without a BXA license or License Exception, the importer will not:

(ii) Export to Country Groups D:1 or E:2 the direct product of the technology, if such foreign produced direct product is subject to national security controls as identified on the CCL (See General Prohibition Three, § 736.2(b)(3) of the EAR); or

(iii) If the direct product of the technology is a complete plant or any major component of a plant, export to Country Groups D:1 or E:2 the direct product of the technology, if such foreign produced direct product is subject to national security controls as identified on the CCL or is subject to State Department controls under the U.S. Munitions List (22 CFR part 121).
(2) Required assurance for export of software. You may not export or reexport software under this License Exception until you have received from the importer a written assurance that, without a BXA license or License Exception, the importer will neither:

(i) Reexport or release the software or the source code for the software to a national of a country in Country Groups D:1 or E:2; nor

(ii) Export to Country Groups D:1 or E:2 the direct product of the software, if such foreign produced direct product is subject to national security controls as identified on the CCL. (See General Prohibition Three, §736.2(b)(3) of the EAR).

(3) Form of written assurance. The required assurance may be made in the form of a letter or any other written communication from the importer, including communications via facsimile, or the assurance may be incorporated into a licensing agreement that specifically includes the assurances. An assurance included in a licensing agreement is acceptable only if the agreement specifies that the assurance will be honored even after the expiration date of the licensing agreement. If such a written assurance is not received, License Exception TSR is not applicable and a license is required. The license application must include a statement explaining why assurances could not be obtained.

(4) Other License Exceptions. The requirements in this License Exception do not apply to the export of technology or software under other License Exceptions, or to the export of technology or software included in an application for the foreign filing of a patent, provided the filing is in accordance with the regulations of the U.S. Patent Office.

(b) Reporting requirements. See §743.1 of the EAR for reporting requirements for exports of certain items under License Exception TSR. Note that reports are not required for release of technology or source code subject to the EAR to foreign nationals in the U.S. under the provisions of License Exception TSR.

§ 740.7 Computers (CTP).

(a) Scope. License Exception CTP authorizes exports and reexports of digital computers and specially designed components therefor, exported or reexported separately or as part of a system for consumption in Computer Tier countries as provided by this section. (Related equipment controlled under 4A003.d, .f, and .g is authorized under this License Exception, only when exported or reexported with these computers as part of a system.) You may not use this License Exception to export or reexport items that you know will be used to enhance the CTP beyond the eligibility limit allowed to your country of destination. When evaluating your computer to determine License Exception CTP eligibility, use the CTP parameter to the exclusion of other technical parameters for computers classified under ECCN 4A003.a, .b, and .c, except for parameters specified as Missile Technology (MT) concerns or 4A003.e (equipment performing analog-to-digital conversions exceeding the limits in ECCN 3A001.a.5.a). This License Exception does not authorize the export or reexport of graphic accelerators or coprocessors, or computers controlled for MT reasons.

(b) Computer Tier 1—(1) Eligible countries. The countries that are eligible to receive exports and reexports under this License Exception are Australia, Austria, Belgium, Brazil, Czech Republic, Denmark, Finland, France, Germany, Greece, the Holy See, Hungary, Iceland, Ireland, Italy, Japan, Liechtenstein, Luxembourg, Mexico, Monaco, Netherlands, New Zealand, Norway, Poland, Portugal, San Marino, Spain, Sweden, Switzerland, Turkey, and the United Kingdom.

(2) Eligible computers. The computers eligible for License Exception CTP to Tier 1 destinations are those with a CTP greater than 2,000 Mtops.

(c) Computer Tier 2—(1) Eligible countries. The countries that are eligible to receive exports under this License Exception include Antigua and Barbuda, Argentina, Bahamas, Barbados, Bangladesh, Belize, Benin, Bhutan, Bolivia, Botswana, Brunei, Burkina Faso, Burma, Burundi, Cameroon, Cape Verde, Central Africa, Chad, Chile, Colombia, Congo, Costa Rica, Cote
Bureau of Export Administration, Commerce

§ 740.7

d’Ivoire, Cyprus, Dominica, Dominican Republic, Ecuador, El Salvador, Equatorial Guinea, Eritrea, Ethiopia, Fiji, Gabon, Gambia (The), Ghana, Grenada, Guatemala, Guinea, Guinea-Bissau, Guyana, Haiti, Honduras, Hong Kong, Indonesia, Jamaica, Kenya, Kiribati, Korea (Republic of), Lesotho, Liberia, Madagascar, Malawi, Malaysia, Maldives, Mali, Malta, Marshall Islands, Mauritius, Micronesia (Federated States of), Mozambique, Namibia, Nauru, Nepal, Nicaragua, Niger, Nigeria, Palau, Panama, Papua New Guinea, Paraguay, Peru, Philippines, Rwanda, St. Kitts & Nevis, St. Lucia, St. Vincent and Grenadines, Sao Tome & Principe, Senegal, Seychelles, Sierra Leone, Singapore, Slovak Republic, Slovenia, Solomon Islands, Somalia, South Africa, Sri Lanka, Surinam, Swaziland, Taiwan, Tanzania, Togo, Tonga, Thailand, Trinidad and Tobago, Tuvalu, Uganda, Uruguay, Venezuela, Western Sahara, Western Samoa, Zaire, Zambia, and Zimbabwe.

(2) Eligible computers. The computers eligible for License Exception CTP to Tier 2 destinations are those having a CTP greater than 2,000 MTOPS, but less than or equal to 20,000 MTOPS.

(d) Computer Tier 3—(1) Eligible countries. The countries that are eligible to receive exports and reexports under this License Exception are Afghanistan, Albania, Algeria, Andorra, Angola, Armenia, Azerbaijan, Belarus, Bosnia & Herzegovina, Bulgaria, Cambodia, China (People’s Republic of), Comoros, Croatia, Djibouti, Egypt, Estonia, Georgia, India, Israel, Jordan, Kazakhstan, Kosovo (Serbian province of), Kuwait, Kyrgyzstan, Laos, Latvia, Lebanon, Lithuania, Macau, Macedonia (The Former Yugoslav Republic of), Mauritania, Moldova, Mongolia, Montenegro, Morocco, Oman, Pakistan, Qatar, Romania, Russia, Saudi Arabia, Serbia, Tajikistan, Tunisia, Turkmenistan, Ukraine, United Arab Emirates, Uzbekistan, Vanuatu, Vietnam, and Yemen.

(2) Eligible computers. The computers eligible for License Exception CTP to Tier 3 destinations are those having a CTP greater than 2,000 MTOPS, but less than or equal to 12,300 MTOPS for civil end-users and end-uses. Beginning on January 23, 2000, computers having a CTP greater than 2,000 MTOPS but less than or equal to 6,500 MTOPS are eligible for License Exception CTP to military end-users and end-uses subject to the restrictions in paragraph (d)(3) of this section.

(3) Eligible exports. Only exports and reexports to permitted end-users and end-uses located in countries in Computer Tier 3. License Exception CTP does not authorize exports and reexports to Computer Tier 3 for nuclear, chemical, biological, or missile end-users and end-uses and military end-users and end-uses subject to license requirements under §744.2, §744.3, §744.4, §744.5, and §744.12 of the EAR. Such exports and reexports will continue to require a license and will be considered on a case-by-case basis. Re-transfers to defined proliferation end-users and end-uses in eligible countries is strictly prohibited without prior authorization.

(4) Supporting documentation. Exports of computers as described by paragraph (d)(2) of this section, regardless of value, to the People’s Republic of China must be supported by a PRC End-User Certificate. (See §748.10(c)(3) of the EAR for information on obtaining the PRC End-User Certificate.) Exporters are required to obtain a PRC End-User Certificate before exporting computers regardless of value to the People’s Republic of China. Exporters are also required to provide the PRC End-User Certificate Number to BXA as part of their post-shipment report (see paragraph (d)(5) of this section). When providing the PRC End-User Certificate Number to BXA, you must identify the transaction in the post shipment report to which that PRC End-User Certificate Number applies. The original PRC End-User Certificate shall be retained in the exporter’s files in accordance with the recordkeeping provisions of §762.2 of the EAR.

(5) NDAA notification—(i) General requirement. The National Defense Authorization Act (NDAA) of FY 98 enacted on November 18, 1997 requires advance notification of certain exports and reexports of computers to Country Tier 3 countries. Prior to January 23, 2000, advance notification is required for all exports and reexports of computers with a CTP between 2,000
§ 740.7 15 CFR Ch. VII (1–1–00 Edition)

and 12,300 MTOPS to Computer Tier 3 destinations. Beginning on January 23, 2000, advance notification is required for all exports and reexports of computers with a CTP between 6,500 and 12,300 MTOPS to Computer Tier 3 destinations. For each such transaction destined to Computer Tier 3, prior to using License Exception CTP, you must first notify BXA by submitting a completed Multipurpose Application Form (BXA–748P). The Multipurpose Application Form must be completed including all information required for a license application according to the instructions described in Supplement No. 1 to part 748 of the EAR, with two exceptions. You (the applicant as listed in Block 14) shall in Block 5 (Type of Application) mark the box “Other.” This designator will permit BXA to route the NDAA notice into a special processing procedure. (Blocks 6 and 7, regarding support documentation, may be left blank.) You must also provide a notice using this procedure prior to exporting or reexporting items that you know will be used to enhance beyond 2,000 MTOPS the CTP of a previously exported or reexported computer. Beginning on January 23, 2000, you must provide a notice using this procedure prior to exporting or reexporting items that you know will be used to enhance beyond 6,500 MTOPS the CTP of a previously exported or reexported computer. BXA will not initiate the registration of an NDAA notice unless all information on the Multipurpose Application form is complete.

(ii) Action by BXA. Within 24 hours of the registration of the NDAA notice, BXA will refer the notice for interagency review. Registration is defined as the point at which the notice is entered into BXA’s electronic system.

(iii) Review by other departments or agencies. The Departments of Defense, Energy, State, and the Arms Control and Disarmament Agency (ACDA) have the authority to review the NDAA notice. Objections by any department or agency must be received by the Secretary of Commerce within nine days of the referral. Unlike the provisions described in §750.4(b) of the EAR, there are no provisions for stopping the processing time of the NDAA notice. If, within 10 days after the date of registration, any reviewing agency provides a written objection to the export or reexport of a computer, License Exception CTP may not be used. In such cases, you will be notified that a license is required for the export or reexport. The NDAA notice will then be processed by BXA as a license application in accordance to the provisions described in §750.4 of the EAR, and the licensing policies set forth in the Export Administration Regulations. Its NDAA notice number will be changed to a license application number. BXA may at this time request additional information to properly review the license application. If BXA confirms that no objection has been raised within the 10-day period (as described in paragraph (d)(5)(iv) of this section), you may proceed with the transaction on the eleventh day following date of registration. (Note that the fact that you have been advised to proceed with the transaction does not exempt you from other licensing requirements under the EAR, such as those based on knowledge of a prohibited end-use or end-user as referenced in general prohibition five (part 736 of the EAR) and set forth in part 744 of the EAR.)

(iv) Status of pending advance notification requests. You must contact BXA’s System for Tracking Export License Applications (“STELA”) at (202) 482-2752. (See §750.5 of the EAR for procedures to access information on STELA.) STELA will provide the date of registration of the NDAA notice. If no departments or agencies raise objections within the 10-day period, STELA will provide you on the eleventh day following date of registration with confirmation that no objections have been raised and you may proceed with the transaction. BXA will subsequently issue written confirmation to you. If a license is required, STELA will notify you that an objection has been raised and a license is required. The NDAA notice will be processed as a license application. In addition, BXA may provide notice of an objection by telephone, fax, courier service, or other means.

(v) Post-shipment verification. This section outlines special post-shipment reporting requirements for exporters of computers with a CTP over 2,000
MTOPS to destinations in Computer Tier 3 under the NDAA. These reporting requirements also apply when you know that the items being exported will be used to enhance beyond 2,000 MTOPS the CTP of a previously exported or reexported computer. Such reports must be submitted in accordance with the provisions of this paragraph (d)(5)(v), and records of such exports subject to the post-shipment reporting requirements of this section, must be kept in accordance with part 762 of the EAR.

(e) Restrictions. (1) Computers eligible for License Exception CTP may not be accessed either physically or computationally by nationals of Cuba, Iran, Iraq, Libya, North Korea, Sudan or Syria, except commercial consignees described in Supplement No. 3 to part 742 of the EAR are prohibited only from giving such nationals user-accessible programmability.

(2) Computers eligible for License Exception CTP may not be reexported/retransferred without prior authorization from BXA i.e., a license, a permissive reexport, another License Exception, or “No License Required”. This restriction must be conveyed to the consignee, via the Destination Control Statement, see §758.6(a)(ii) of the EAR. Additionally, the end-use and end-user restrictions in paragraph (d)(3) of this section must be conveyed to any consignee in Computer Tier 3.

(f) Reporting requirements. In addition to the reporting requirements set forth in paragraph (d) of this section, see §743.1 of the EAR for additional reporting requirements of certain items under License Exception CTP.

§740.8 Key management infrastructure (KMI).

(a) Scope. License Exception KMI authorizes the export and reexport of certain encryption software and equipment.

(b) Eligible commodities and software.

(1) Recovery encryption commodities and software of any key length controlled under ECCNs 5A002 and 5D002 that have been classified after a technical review through a classification request. Key escrow and key recovery commodities and software must meet the criteria identified in Supplement No. 4 to part 742 of the EAR.

(2) For such classification requests, indicate “License Exception KMI” in block 9 on Form BXA-748P. Submit the original request to BXA in accordance
§ 740.9 Temporary imports, exports, and reexports (TMP).

This License Exception authorizes various temporary exports and reexports; exports and reexports of items temporarily in the United States; and exports and reexports of beta test software.

(a) Temporary exports and reexports—

(1) Scope. You may export and reexport commodities and software for temporary use abroad (including use in international waters) subject to the conditions and exclusions described in paragraph (a)(4) of this section. Commodities and software shipped as temporary exports or reexports under the provisions of this paragraph (a) must be returned to the country from which they were exported as soon as practicable but, except in circumstances described in this section, no later than one year from the date of export. This requirement does not apply if the commodities and software are consumed or destroyed in the normal course of authorized temporary use abroad or an extension or other disposition is permitted by the EAR or in writing by BXA.

(2) Eligible commodities and software. The following commodities and software are eligible to be shipped under this paragraph (a):

(i) Tools of trade. Usual and reasonable kinds and quantities of tools of trade (commodities and software) for use by the exporter or employees of the exporter in a lawful enterprise or undertaking of the exporter. Eligible tools of trade may include, but are not limited to, such equipment and software as is necessary to commission or service goods, provided that the equipment or software is appropriate for this purpose and that all goods to be commissioned or serviced are of foreign origin, or if subject to the EAR, have been legally exported or reexported. The tools of trade must remain under the effective control of the exporter or the exporter’s employee (see part 772 of the EAR for a definition of “effective control”). The shipment of tools of trade may accompany the individual departing from the United States or may be shipped unaccompanied within one month before the individual’s departure from the United States, or at any time after departure. No tools of the trade may be taken to Country Group E:2 (see Supplement No. 1 to part 740) or Sudan. For exports under this License Exception of laptop computers loaded with encryption software, refer to item interpretation 13 in §770.2 of the EAR.

(ii) Kits consisting of replacement parts. Kits consisting of replacement parts may be exported or reexported to all destinations, except Country Group E:2 (see Supplement No. 1 to part 740), provided that:

(A) The parts would qualify for shipment under paragraph (a)(2)(ii)(C) of this section if exported as one-for-one replacements;

(B) The kits remain under effective control of the exporter or an employee of the exporter; and

(C) All parts in the kit are returned, except that one-for-one replacements may be made in accordance with the requirements of License Exception RPL and the defective parts returned (see “parts”, §740.10(a) of this part).

(iii) Exhibition and demonstration in Country Group B. Commodities and software for exhibition or demonstration in Country Group B (see Supplement No. 1 to part 740) may be exported

(c) Eligible destinations. License Exception KMI is available for all destinations, except Cuba, Libya, North Korea, Iraq, Iran, Syria, and Sudan.
or reexported under this provision provided that the exporter maintains ownership of the commodities and software while they are abroad and provided that the exporter, an employee of the exporter, or the exporter’s designated sales representative retains effective control over the commodities and software while they are abroad. The commodities and software may not be used for their intended purpose while abroad, except to the minimum extent required for effective demonstration. The commodities and software may not be exhibited or demonstrated at any one site more than 120 days after installation and debugging, unless authorized by BXA. However, before or after an exhibition or demonstration, pending movement to another site, return to the United States or the foreign reexporter, or BXA approval for other disposition, the commodities and software may be placed in a bonded warehouse or a storage facility provided that the exporter retains effective control over their disposition. The export documentation for this type of transaction must show the U.S. exporter as ultimate consignee, in care of the person who will have control over the commodities and software abroad.

(iv) Inspection and calibration. Commodities to be inspected, tested, calibrated or repaired abroad may be exported or reexported to all destinations under this section, except Country Group E:2, Sudan or Syria.

(v) Containers. Containers for which another License Exception is not available and that are necessary for export of commodities. However, this “containers’” provision does not authorize the export of the container’s contents, which, if not exempt from licensing, must be separately authorized for export under either a License Exception or a license.

(vi) Broadcast material. (A) Video tape containing program material recorded in the country of export to be publicly broadcast in another country.

(B) Blank video tape (raw stock) for use in recording program material abroad.

(vii) Assembly in Mexico. Commodities to be exported to Mexico under Customs entries that require return to the United States after processing, assembly, or incorporation into end products by companies, factories, or facilities participating in Mexico’s in-bond industrialization program (Maquiladora), provided that all resulting end-products (or the commodities themselves) are returned to the United States.

(viii) News media. (A) Commodities necessary for news-gathering purposes (and software necessary to use such commodities) may accompany “accredited” news media personnel (i.e., persons with credentials from a news gathering or reporting firm) to Country Groups D:1 or E:2, or Sudan (see Supplement No. 1 to part 740) if the commodities:

(1) Are retained under “effective control” of the exporting news gathering firm;

(2) Remain in the physical possession of the news media personnel. The term physical possession for purposes of this paragraph (a)(2)(viii), news media, is defined as maintaining effective measures to prevent unauthorized access (e.g., securing equipment in locked facilities or hiring security guards to protect the equipment); and

(3) Are removed with the news media personnel at the end of the trip.

(B) When exporting under this paragraph (a)(2)(viii) from the United States, the exporter must send a copy of the packing list or similar identification of the exported commodities, to: U.S. Department of Commerce, Bureau of Export Administration, Office of Enforcement Support, Room H4069, 14th Street and Constitution Avenue, N.W., Washington, DC 20230, or any of its field offices, specifying the destination and estimated dates of departure and return. The Office of Export Enforcement (OEE) may spot check returns to assure that the temporary exports and reexports provisions of this License Exception are being used properly.

(C) Commodities or software necessary for news-gathering purposes that accompany news media personnel to all other destinations shall be exported or reexported under paragraph (a)(2)(i), tools of trade, of this section if owned by the news gathering firm, or if they are personal property of the individual news media personnel. Note that paragraphs (a)(2)(i), tools of trade and
§ 740.9 15 CFR Ch. VII (1–1–00 Edition)

(a)(2)(viii), news media, of this section
do not preclude independent “accred-
ited” contract personnel, who are
under control of news gathering firms
while on assignment, from utilizing
these provisions, provided that the
news gathering firm designate an em-
ployee of the contract firm to be re-

 sponsible for the equipment.)

(ix) Temporary exports to a U.S. sub-
sidiary, affiliate or facility in Country
Group B. (A) Components, parts, tools
or test equipment exported by a U.S.
person to its subsidiary, affiliate or fa-
cility in a country listed in Country
Group B (see Supplement No. 1 to this
part) that is owned or controlled by the
U.S. person, if the components, part,
tool or test equipment is to be used for
manufacture, assembly, testing, pro-
duction or modification, provided that
no components, parts, tools or test
equipment or the direct product of
such components, parts, tools or test
equipment are transferred or reex-
ported to a country other than the
United States from such subsidiary, af-
iliate or facility without prior author-
ization by BXA.

(B) For purposes of this paragraph
(a)(2)(ix), U.S. person is defined as fol-
lows: an individual who is a citizen of
the United States, an individual who is
a lawful permanent resident as defined
by 8 U.S.C. 1101(a)(2) or an individual
who is a protected individual as defined
by 8 U.S.C. 1324b(a)(3). U.S. person also
means any juridical person organized
under the laws of the United States, or
any jurisdiction within the United
States (e.g., corporation, business asso-
ciation, partnership, society, trust, or
any other entity, organization or group
that is incorporated to do business in
the United States).

(3) Special restrictions—(i) Destinations.
(A) No commodity or software may be
exported to Country Group E:2 (see
Supplement No. 1 to part 740) except as
permitted by paragraph (a)(2)(viii),
news media, of this section;

(B) No commodity or software may
be exported to Country Group D:1 (see
Supplement No. 1 to part 740) except:

(1) Commodities and software ex-
ported under paragraph (a)(2)(viii),
news media, of this section;

(2) Commodities and software ex-
ported under paragraph (a)(2)(i), tools
of trade, of this section; and

(3) Commodities exported as kits of
replacement parts, consistent with the
requirements of paragraph (a)(2)(ii) of
this section.

(C) These destination restrictions
apply to temporary exports to and for
use on any vessel, aircraft or territory
under ownership, control, lease, or
charter by any country in Country
Group D:1 or E:2, or any national there-
of. (See Supplement No. 1 to part 740.)

(ii) Ineligible commodities or software.
Commodities or software that will be
used outside of Country Group A:1 (see
Supplement No. 1 to part 740), Iceland,
or New Zealand, either directly or indi-
rectly in any sensitive nuclear activity
as described in §744.2 of the EAR may
not be exported or reexported to any
destination under the temporary ex-
ports and reexports provisions of this
License Exception.

(iii) Use or disposition. No commodity
or software may be exported or reex-
ported under this paragraph (a) if:

(A) An order to acquire the com-
modity or software has been received
before shipment;

(B) The exporter has prior knowledge
that the commodity or software will
stay abroad beyond the terms described
in this paragraph (a); or

(C) The commodity or software is for
lease or rental abroad.

(4) Return or disposal of commodities
and software. All commodities and soft-
ware exported or reexported under
developed in §744.2 of the EAR and that
are intended for use in a country from
which the commodities and software
were so exported, or shall be disposed of
in the following ways:

(i) Permanent export or reexport. If the
exporter or the reexporter wishes to
sell or otherwise dispose of the com-
munities or software abroad, except as
released to the United States or other
one year after the date of
export, the United States or other
country from which the
commodities and software
were so exported, or shall
be disposed of or retained in one of the
following ways:

1. Permanent export or reexport. If the
exporter or the reexporter wishes to
sell or otherwise dispose of the com-
munities or software abroad, except as
permitted by this or other applicable
License Exception, the exporter must
request authorization by submitting a
license application to BXA at the ad-

250
The provisions of this paragraph (b) describe the conditions for exporting foreign-origin items temporarily in the United States. The provisions include the export of items moving in transit through the United States, imported for display at a U.S. exhibition or trade fair, returned because unwanted, or returned because refused entry.

NOTE 1 to paragraph (b) of this section:
A commodity withdrawn from a bonded warehouse in the United States under a "withdrawal for export" customs entry is considered as "moving in transit". It is not considered as "moving in transit" if it is withdrawn from a bonded warehouse under any other type of customs entry or if its transit has been broken for a processing operation, regardless of the type of customs entry.

NOTE 2 to paragraph (b) of this section:
Items shipped on board a vessel or aircraft and passing through the United States from one foreign country to another may be exported without a license provided that (a) while passing in transit through the United States, they have not been unladen from the vessel or aircraft on which they entered, and (b) they are not originally manifested to the United States.

(1) Items moving in transit through the United States. Subject to the following conditions, the provisions of paragraph (b)(1) of this section authorize export of items moving in transit through the United States under a Transportation and Exportation (T.& E.) customs entry or an Immediate Exportation (I.E.) customs entry made at a U.S. Customs Office.

(i) Items controlled for national security, nuclear proliferation, missile technology, or chemical and biological weapons reasons may not be exported to Country Group D:1, 2, 3, or 4 (see Supplement No. 1 to part 740), respectively, under this paragraph (b)(1).

(ii) Items may not be exported to Country Group E:2 or Sudan under this section.

(iii) The following may not be exported to Country Group E:2 or Sudan under this section:
(A) Commodities shipped to the United States under an International Import Certificate, Form BXA-645P;
(B) Chemicals controlled under ECCN 1C350; or

(C) Horses for export by sea (refer to short supply controls in part 754 of the EAR).

(iv) The provisions of paragraph (b)(1) apply to all shipments from Canada moving in transit through the United States to any foreign destination, regardless of the nature of the commodities or software or their origin. For such shipments the customs office at the U.S. port of export will require a copy of Form B-13, Canadian Customs Entry, certified or stamped by Canadian customs authorities, except where the shipment is valued at less than $50.00. (In transit shipments originating in Canada that are exempt from U.S. licensing, or made under a U.S. license or other applicable U.S. License Exception do not require this form.) The commodity or software description, quantity, ultimate consignee, country of ultimate destination, and all other pertinent details of the shipment must be the same on a required Form B-13, as on Commerce Form 7513, or when Form 7513 is not required, must be the same as on Customs Form 7512. When there is a material difference, a corrected Form B-13 authorizing the shipment is required.

(2) Items imported for display at U.S. exhibitions or trade fairs. Subject to the following conditions, the provisions of this paragraph (b)(2) authorize the export of items that were imported into the United States for display at an exhibition or trade fair and were either entered under bond or permitted temporary free import under bond providing for their export and are being exported in accordance with the terms of that bond.

(i) Items may be exported to the country from which imported into the United States. However, items originally imported from Cuba or North Korea may not be exported unless the U.S. Government had licensed the import from that country.

(ii) Items may be exported to any destination other than the country from which imported except:

(A) Items imported into the United States under an International Import Certificate;

(B) Exports to Country Group E:2 or Sudan (see Supplement No. 1 to part 740); or

(C) Exports to Country Group D:1, 2, 3, or 4 (see Supplement No. 1 to part 740) of items controlled for national security, missile technology, chemical and biological weapons reasons, or nuclear proliferation, respectively.

(3) Return of unwanted shipments. A foreign-origin item may be returned to the country from which it was imported if its characteristics and capabilities have not been enhanced while in the United States. No foreign-origin items may be returned to Cuba, Libya, or North Korea.

(4) Return of shipments refused entry. Shipments of items refused entry by the U.S. Customs Service, the Food and Drug Administration, or other U.S. Government agency may be returned to the country of origin, except to:

(i) A destination in Cuba, Libya, or North Korea; or

(ii) A destination from which the shipment has been refused entry because of the Foreign Assets Control Regulations of the Treasury Department, unless such return is licensed or otherwise authorized by the Treasury Department, Office of Foreign Assets Control (31 CFR part 500).

(c) Exports of beta test software—(1) Scope. The provisions of paragraph (c) authorize exports and reexports to eligible countries of beta test software intended for distribution to the general public.

(2) Eligible countries. The countries that are eligible to receive exports and reexports are all countries except those in Country Group E:2.

(3) Exports of beta test software. All software that is controlled by the Commerce Control List (Supplement No. 1 to part 774 of the EAR), and under Commerce licensing jurisdiction, is eligible for export and reexport, subject to the restrictions of this paragraph, except encryption software controlled for EI reasons under ECCN 5D002. Certain encryption software may become eligible after a one-time BXA review (refer to §742.15(b)(1) of the EAR).

(4) Conditions for use. Any beta test software program may be exported or reexported to eligible countries if all of
the conditions under this section are met:

(i) The software producer intends to market the software to the general public after completion of the beta testing, as described in the General Software Note found in Supplement No. 2 to part 774 of the EAR;

(ii) The software producer provides the software to the testing consignee free-of-charge or at a price that does not exceed the cost of reproduction and distribution; and

(iii) The software is designed for installation by the end-user without further substantial support from the supplier.

(5) Importer Statement. Prior to shipping any eligible software, the exporter or reexporter must obtain the following statement from the testing consignee, which may be included in a contract, non-disclosure agreement, or other document that identifies the importer, the software to be exported, the country of destination, and the testing consignee.

We certify that this beta test software will only be used for beta testing purposes, and will not be rented, leased, sold, sublicensed, assigned, or otherwise transferred. Further, we certify that we will not transfer or export any product, process, or service that is the direct product of the beta test software.

(6) Use limitations. Only testing consignees that provide the importer statement required by paragraph (c)(5) of this section may execute any software received.

(7) Return or disposal of software. All beta test software exported must be destroyed abroad or returned to the exporter within 30 days of the end of the beta test period as defined by the software producer or, if the software producer does not define a test period, within 30 days of completion of the consignee's role in the test. Among other methods, this requirement may be satisfied by a software module that will destroy the software and all its copies at or before the end of the beta test period.

§ 740.10 Servicing and replacement of parts and equipment (RPL).

This License Exception authorizes exports and reexports associated with one-for-one replacement of parts or servicing and replacement of equipment.

(a) Parts—(1) Scope. The provisions of this paragraph (a) authorize the export and reexport of one-for-one replacement parts for previously exported equipment.

(2) One-for-one replacement of parts. (i) The term replacement parts as used in this section means parts needed for the immediate repair of equipment, including replacement of defective or worn parts. (It includes subassemblies but does not include test instruments or operating supplies). (The term subassembly means a number of components assembled to perform a specific function or functions within a commodity. One example would be printed circuit boards with components mounted thereon. This definition does not include major subsystems such as those composed of a number of subassemblies.) Items that improve or change the basic design characteristics, e.g., as to accuracy, capability, performance or productivity, of the equipment upon which they are installed, are not deemed to be replacement parts. For kits consisting of replacement parts, consult § 740.9(a)(2)(ii) of this part.

(ii) Parts may be exported only to replace, on a one-for-one basis, parts contained in commodities that were: legally exported from the United States; legally reexported; or made in a foreign country incorporating authorized U.S.-origin parts. The conditions of the original U.S. authorization must not have been violated. Accordingly, the export of replacement parts may be made only by the party who originally exported or reexported the commodity to be repaired, or by a party that has confirmed the appropriate authority for the original transaction.

(iii) The parts to be replaced must either be destroyed abroad or returned promptly to the person who supplied the replacement parts, or to a foreign firm that is under the effective control of that person.

(3) Exclusions. (i) No replacement parts may be exported to repair a commodity exported under a license if that license included a condition that any subsequent replacement parts must be exported only under a license.

(ii) No parts may be exported to be held abroad as spare parts or equipment for future use. Replacement parts may be exported to replace spare parts that were authorized to accompany the export of equipment, as those spare parts are utilized in the repair of the equipment. This will allow maintenance of the stock of spares at a consistent level as parts are used.

(iii) No parts may be exported to any destination except Iceland, New Zealand, or the countries listed in Country Group A:1 (see Supplement No. 1 to part 740) if the item is to be incorporated into or used in nuclear weapons, nuclear explosive devices, nuclear testing related to activities described in §744.2(a) of the EAR, the chemical processing of irradiated special nuclear or source material, the production of heavy water, the separation of isotopes of source and special nuclear materials, or the fabrication of nuclear reactor fuel containing plutonium, as described in §744.2(a) of the EAR.

(iv) No replacement parts may be exported to Cuba, Iran, Iraq, Sudan, Syria, Libya, or North Korea (countries designated by the Secretary of State as supporting acts of international terrorism) if the commodity to be repaired is an “aircraft” (as defined in part 772 of the EAR) or national security controlled commodity.

(v) The conditions described in this paragraph (a)(3) relating to replacement of parts do not apply to reexports to a foreign country of parts as replacements in foreign-origin products, if at the time the replacements are furnished, the foreign-origin product is eligible for export to such country under any of the License Exceptions in this part or the exceptions in §734.4 of the EAR.

(4) Reexports. Parts exported from the United States may be reexported to a new country of destination, provided that the restrictions described in paragraphs (a)(2) and (3) of this section are met. A party reexporting U.S.-origin one-for-one replacement parts shall ensure that the commodities being repaired were shipped to their present location in accordance with U.S. law and continue to be legally used, and that either before or promptly after reexport of the replacement parts, the replaced parts are either destroyed or returned to the United States, or to the foreign firm in Country Group B (see Supplement No. 1 to part 740) that shipped the replacement parts.

(b) Servicing and replacement—(1) Scope. The provisions of this paragraph (b) authorize the export and reexport of items that were returned to the United States for servicing and the replacement of defective or unacceptable U.S.-origin commodities and software.

(2) Commodities and software sent to a United States or foreign party for servicing.

(i) Definition. Servicing as used in this section means inspection, testing, calibration or repair, including overhaul and reconditioning. The servicing shall not have improved or changed the basic characteristics, e.g., as to accuracy, capability, performance, or productivity of the commodity or software as originally authorized for export or reexport.

(ii) Return of serviced commodities and software. When the serviced commodity or software is returned, it may include any replacement or rebuilt parts necessary to its repair and may be accompanied by any spare part, tool, accessory, or other item that was sent with it for servicing.

(iii) Commodities and software imported from Country Group D:1 except the PRC. Commodities and software legally exported or reexported to a consignee in Country Group D:1 (except the People’s Republic of China (PRC)) (see Supplement No. 1 to part 740) that are sent to the United States or a foreign party for servicing may be returned to the country from which it was sent, provided that both of the following conditions are met:

(A) The exporter making the shipment is the same person or firm to whom the original license was issued; and

(B) The end-use and the end-user of the serviced commodities or software and other particulars of the transaction, as set forth in the application and supporting documentation that
formed the basis for issuance of the license have not changed.

(iv) Cuba, Iran, Iraq, Libya, North Korea, Sudan, and Syria. No repaired commodity or software may be exported or reexported to Cuba, Iran, Iraq, Libya, North Korea, Sudan, or Syria.

(3) Replacements for defective or unacceptable U.S.-origin equipment. (i) Subject to the following conditions, commodities or software may be exported or reexported to replace defective or otherwise unusable (e.g., erroneously supplied) items:

(A) The commodity or software to be replaced must have been previously exported or reexported in its present form under a license or authorization granted by BXA.

(B) No commodity or software may be exported or reexported to replace equipment that is worn out from normal use, nor may any commodity or software be exported to be held in stock abroad as spare equipment for future use.

(C) The replacement item may not improve the basic characteristic, e.g., as to accuracy, capability, performance, or productivity, of the equipment as originally approved for export or reexport under a license issued by BXA.

(D) No shipment may be made to Cuba, Iran, Iraq, Libya, North Korea, Sudan, or Syria, or to any other destination to replace defective or otherwise unusable equipment owned or controlled by, or leased or chartered to, a national of any of those countries.

(ii) Special conditions applicable to exports to Country Group B and Country Group D:1. (See Supplement No. 1 to part 740.) In addition to the general conditions in paragraph (b)(3)(i) of this section, the following conditions apply to exports or reexports of replacements for defective or unacceptable U.S.-origin commodities or software to a destination in Country Group B or Country Group D:1:

(A) By making such an export or reexport, the exporter represents that all the requirements of this paragraph (b) have been met and undertakes to destroy or return the replaced parts as provided in paragraph (b)(3)(ii)(C) of this section.

(B) The defective or otherwise unusable equipment must be replaced free of charge, except for transportation and labor charges. If exporting to the countries listed in Country Group D:1 (except the PRC), the exporter shall replace the commodity or software within the warranty period or within 12 months of its shipment to the ultimate consignee in the country of destination, whichever is shorter.

(C) The commodity or software to be replaced must either be destroyed abroad or returned to the United States, or to a foreign firm in Country Group B that is under the effective control of the U.S. exporter, or to the foreign firm that is providing the replacement part or equipment. The destruction or return must be effected before, or promptly after, the replacement item is exported from the United States.

(D) A party reexporting replacements for defective or unacceptable U.S.-origin equipment must ensure that the commodities or software being replaced were shipped to their present location in accordance with U.S. law and continue to be legally used.

§ 740.11 Governments, international organizations, and international inspections under the Chemical Weapons Convention (GOV).

This License Exception authorizes exports and reexports for international nuclear safeguards; U.S. government agencies or personnel, and agencies of cooperating governments; and international inspections under the Chemical Weapons Convention.

(a) International safeguards—(1) Scope. You may export and reexport commodities or software to the International Atomic Energy Agency (IAEA) and the European Atomic Energy Community (Euratom), and reexports by IAEA and Euratom for official international safeguard use, as follows:

(i) Commodities or software consigned to the IAEA at its headquarters in Vienna, Austria, or field offices in Toronto, Ontario, Canada or Tokyo,
Japan for official international safeguards use. The IAEA is an international organization that establishes and administers safeguards designed to ensure that special nuclear materials and other related nuclear facilities, equipment, and material are not diverted from peaceful purposes to non-peaceful purposes.

(ii) Commodities or software consigned to the Euratom Safeguards Directorate in Luxembourg, Luxembourg for official international safeguards use. Euratom is an international organization of European countries with headquarters in Luxembourg. Euratom establishes and administers safeguards designed to ensure that special nuclear materials and other related nuclear facilities, equipment, and material are not diverted from peaceful purposes to non-peaceful purposes.

(iii) Commodities consigned to IAEA or Euratom may be reexported to any country for IAEA or Euratom international safeguards use provided that IAEA or Euratom maintains control of or otherwise safeguards the commodities and returns the commodities to the locations described in paragraphs (a)(1)(i) and (a)(1)(ii) of this section when they become obsolete, are no longer required, or are replaced.

(iv) Commodity or software shipments may be made by commercial companies under direct contract with IAEA or Euratom, or by Department of Energy National Laboratories as directed by the Department of State or the Department of Energy.

(v) The monitoring functions of IAEA and Euratom are not subject to the restrictions on prohibited safeguarded nuclear activities described in §744.2(a)(3) of the EAR.

(vi) When commodities or software originally consigned to IAEA or Euratom are no longer in IAEA or Euratom official safeguards use, such commodities may only be disposed of in accordance with the regulations in the EAR.

(2) The following items controlled for national security (NS) reasons under Export Control Classification Numbers (ECCNs) identified on the Commerce Control List may not be exported or reexported under this License Exception to destinations other than Austria, Belgium, Canada, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, Spain, Sweden, and the United Kingdom: 1C001, 1C012, 5A001.b.4, 6A001.a.2.a.1, 6A001.a.2.a.2, 6A001.a.2.a.7, 6A001.a.2.b, 6A001.a.2.e.1, 6A001.a.2.e.2, 6A002.a.1.c, 6A008.1.3, 6B008, 8A001.b., 8A001.d., 8A002.o.3.b., 9A011; and

(i) “Composite” structures or laminates controlled by 1A002.a., having an organic “matrix” and made from materials listed under 1C010.c. or 1C010.d.; and

(ii) “Digital” computers controlled by 4A003.b. and having a CTP exceeding 20,000 MTOPS; and

(iii) “Electronic assemblies” controlled by 4A003.c. and capable of enhancing performance by aggregation of “computing elements” so that the CTP of the aggregate exceeds 20,000 MTOPS; and

(iv) Processing equipment controlled by 6A001.a.2.c. and specially designed for real time application with acoustic hydrophone arrays; and

(v) Bottom or bay cable systems controlled by 6A001.a.2.e.3 and having processing equipment specially designed for real time application with bottom or bay cable systems; and

(vi) “Software”, as follows:

(A) Controlled by 4D001, specially designed for the “development” or “production” for items controlled by 4A003.b or .c, as defined by paragraphs (a)(2)(ii) and (iii) of this section; and

(B) Controlled by 5D001.a, specially designed for items controlled by 5A001.b.4; and

(C) Controlled by 6D001 for items controlled by 6A008.1.3 or 6B008; and

(D) Controlled by 6D003.a; and

(E) Controlled by 7D003.a or 7D003.b; and

(F) Controlled by 8D001, specially designed for the “development” or “production” of equipment controlled by 8A001.b, 8A001.d, or 8A002.o.3.b; and

(G) Controlled by 9D001, specially designed for the “development” of equipment or “technology” controlled by 9A011, 9E003.a.1, or by 9E003.a.3, for items controlled by 1A002.a, as described in paragraph (a)(2)(i) of this section; and
(H) Controlled by 9D002 for “software” specially designed for the “production” of equipment controlled by 9A011; and

(i) Controlled by 9D004.a or .c.

(3) No encryption items controlled for EI reasons under ECCNs 5A002, 5D002, or 5E002 may be exported under the provisions of this paragraph (a).

(b) Governments—(1) Scope. The provisions of paragraph (b) authorize exports and reexports of the items listed in paragraph (b)(2) of this section to personnel and agencies of the U.S. Government or agencies of cooperating governments.

(2) Eligibility—(i) Items for personal use by personnel and agencies of the U.S. Government. This provision is available for items in quantities sufficient only for the personal use of members of the U.S. Armed Forces or civilian personnel of the U.S. Government (including U.S. representatives to public international organizations), and their immediate families and servants. Items for personal use include household effects, food, beverages, and other daily necessities.

(ii) Items for official use by personnel and agencies of the U.S. Government. This provision is available for items consigned to and for the official use of any agency of the U.S. Government.

(iii) (A) Items for official use within national territory by agencies of cooperating governments. This License Exception is available for all items consigned to and for the official use of any agency of a cooperating government within the territory of any cooperating government, except items described in paragraph (a) to Supplement No. 1 of this section.

(B) Reporting requirements. See §743.1 of the EAR for reporting requirements for exports of certain items under this paragraph (b)(2)(i).

(3) Definitions. (i) Agency of the U.S. Government includes all civilian and military departments, branches, missions, government-owned corporations, and other agencies of the U.S. Government, but does not include such national agencies as the American Red Cross or international organizations in which the United States participates such as the Organization of American States. Therefore, shipments may not be made to these non-government national or international agencies, except as provided in paragraph (b)(2)(ii) of this section for U.S. representatives to these organizations.

(ii) Agency of a cooperating government includes all civilian and military departments, branches, missions, and other governmental agencies of a cooperating national government. Cooperating governments are the national governments of countries listed in Country Group A:1 (see Supplement No. 1 to part 740) and the national governments of Argentina, Austria, Finland, Hong Kong, Ireland, Korea (Republic of), New Zealand, Singapore, Sweden, Switzerland, and Taiwan.

(c) International inspections under the Chemical Weapons Convention (CWC or Convention).

(1) The provisions of this paragraph (c) authorize exports and reexports to the Organization for the Prohibition of Chemical Weapons (OPCW) and exports and reexports by the OPCW for official international inspection and verification use under the terms of the Convention. The OPCW is an international organization that establishes and administers an inspection and verification regime under the Convention designed to ensure that certain chemicals and related facilities are not diverted from peaceful purposes to non-peaceful purposes. These provisions authorize exports and reexports for official OPCW use of the following:

(i) Commodities and software consigned to the OPCW at its headquarters in The Hague for official international OPCW use for the monitoring and inspection functions set forth in the Convention, and technology relating to the
maintenance, repair, and operation of such commodities and software. The OPCW must maintain effective control of such commodities, software and technology.

(ii) Controlled technology relating to the training of the OPCW inspectorate.

(iii) Controlled technology relating to a CWC inspection site, including technology released as a result of:

(A) Visual inspection of U.S.-origin equipment or facilities by foreign nationals of the inspection team;

(B) Oral communication of controlled technology to foreign nationals of the inspection team in the U.S. or abroad; and

(C) The application to situations abroad of personal knowledge or technical experience acquired in the U.S.

(2) Exclusions. The following items may not be exported or reexported under the provisions of this paragraph (c):

(i) Computers with a Composite Theoretical Performance (CTP) greater than 20,000 MTOPS, except that no MTOPS limit applies to exports or re-exports to those countries in Computer Tier 1 (see §740.7(b)(1));

(ii) Inspection samples collected in the U.S. pursuant to the Convention; and

(iii) Commodities and software that are no longer in OPCW official use.

Such items must be disposed of in accordance with the EAR.

The U.S. must no longer in OPCW official use.

3) Confidentiality. The application of the provisions of this paragraph (c) is subject to the condition that the confidentiality of business information is strictly protected in accordance with applicable provisions of the EAR and other U.S. laws regarding the use and retransfer of U.S. goods and services.

Supplement No. 1 to §740.11—Additional Restrictions on Use of License Exception GOV

(a) Items for official use within national territory by agencies of the U.S. Government. License Exception GOV is available for all items consigned to and for the official use of any agency of a cooperating government within the territory of any cooperating government, except:

(i) Items identified on the Commerce Control List as controlled for national security (NS) reasons under Export Control Classification Numbers (ECCNs) as follows for export or reexport to destinations other than Austria, Belgium, Canada, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, Spain, Sweden, or the United Kingdom: 1C001, 1C012, 5A001.b.4, 6A001.a.2.a.1, 6A001.a.2.a.2, 6A001.a.2.a.7, 6A001.a.2.b, 6A001.a.2.e.1, 6A001.a.2.e.2, 6A002.a.1.c, 6A008.l.3, 6B008, 8A001.b, 8A001.d, 9A002.a.3.b, 9A002.a.4.b, 9A001; and

(ii) “Composite” structures or laminates controlled by 1A002.a, having an organic “matrix” and made from materials listed under 1C001.c or 1C001.d; and

(iii) “Digital” computers controlled by 4A003.b and having a CTP exceeding 20,000 MTOPS; and

(iv) “Electronic assemblies” controlled by 4A003.c and capable of enhancing performance by aggregation of “computing elements” so that the CTP of the aggregation exceeds 20,000 MTOPS; and

(v) Bottom or bay cable systems controlled by 6A001.a.2.e.3 and having processing equipment specially designed for real time application with towed acoustic hydrophone arrays; and

(vi) Bottom or bay cable systems controlled by 6A001.a.2.e.3 and having processing equipment specially designed for real time application with towed acoustic hydrophone arrays; and

(vii) “Software”, as follows:

(A) Controlled by 4D001, specially designed for the “development” or “production” for items controlled by 4A003.b or .c, as defined by paragraphs (a)(1)(i) and (iii) of this Supplement; and

(B) Controlled by 5D001.a, specially designed for items controlled by 5A001.b.4; and

(C) Controlled by 6D003 for items controlled by 6A008.l.3 or 6B008; and

(D) Controlled by 6D003.a and

(E) Controlled by 7D003.a or 7D003.b; and

(F) Controlled by 8D001, specially designed for the “development” or “production” of equipment controlled by 8A001.b, 8A001.d, or 8A002.o.3.b; and

(G) Controlled by 9D001, specially designed for the “development” of equipment or “technology” controlled by 9A001.9E003.a.1, or by 9E003.a.3, for items controlled by 1A002.a, as described in paragraph (a)(1)(i) of this Supplement; and

(H) Controlled by 9D002 for “software” specially designed for the “production” of equipment controlled by 9A001 and

(I) Controlled by 9D004 or .c; and

(viii) “Technology”, as follows:

(A) Controlled by 5E001.a for items controlled by 5A001.b.4 or 5D001.a; and

(B) Controlled by 1E001 for items controlled by 1A002.a, 1C001, or 1C012 as described by paragraph (a)(1)(i) of this Supplement; and

(C) Controlled by 6E001 for the “development” of equipment or “software” in 6A001.a.2.a.1, 6A001.a.2.a.2, 6A001.a.2.a.7, 6A001.a.2.b, 6A001.a.2.c, 6A001.a.2.d, or a.
6A002.a.1.c, 6A008.i.3, or 6B008, as described in paragraph (a)(1) of this Supplement; and
(D) Controlled by 6E002 for the “production” of equipment controlled by 6A001.a.2.a.1, 6A001.a.2.a.2, 6A001.a.2.a.7, 6A001.a.2.b, 6A001.a.2.c, 6A001.a.2.3, 6A002.a.1.c, 6A008.i.3, or 6B008, as described in paragraph (a)(2) of this Supplement; and
(E) Controlled by 9E001, as defined by paragraphs (b)(1)(ii) or (iii) of this Supplement; and
(F) Controlled by 9E001 for items controlled by 9A01, 9D001, or 9D002; and
(G) Controlled by 9E002 for items controlled by 9A01; and
(H) Controlled by 9E003.a.1; and
(i) Controlled by 9E003.a.3 for items controlled by 1A002.a as described in paragraph (a)(1) of this Supplement;
(ii) Items identified on the Commerce Control List as controlled for missile technology (MT), chemical and biological warfare (CB), or nuclear nonproliferation (NP) reasons;
(iii) Regional stability items controlled under Export Control Classification Numbers (ECCNs) 6A002, 6A003, 6E001, 6E002, 7D001, 7E001, 7E002, and 7E101 as described in §742.6(a)(1) of the EAR; or
(iv) Processing equipment controlled by 1A002.a, 1C001, or 1C102 as described by paragraph (b)(1)(i) of this Supplement; and
(v) Bottom or bay cable systems controlled by 6A001.a.2.e.3 and having processing equipment specially designed for real time application with bottom or bay cable systems; and
(vi) “Software”, as follows:
(A) Controlled by 4D001, specially designed for the “development” or “production” of equipment controlled by 4A003.b or c as defined by paragraphs (b)(1)(ii) or (iii) of this Supplement; and
(B) Controlled by 5D003.a, specially designated for export control reasons.
(C) Controlled by 6D001 for items controlled by 6A001.b, 6A001.d, or 6A002.a.3.b; and
(F) Controlled by 8D001, specially designed for the “development” or “production” of equipment controlled by 8A001.b, 8A001.d, or 8A002.a.3.b; and
(G) Controlled by 9D001, specially designated for the “development” or “production” of equipment controlled by 9A01, 9D001, or 9D002; and
(H) Controlled by 9D002 for “software” specially designated for the “production” of equipment controlled by 9A01; and
(i) Controlled by 9D004.a or c; and
(vii) “Technology”, as follows:
(A) Controlled by 5E001.a for items controlled by 5A001.b.4 or 5D001.a; and
(B) Controlled by 5E002 for items controlled by 1A002.a.1, 1C001, or 1C102 as described by paragraph (b)(1) of this Supplement; and
(C) Controlled by 6E001 for the “development” of equipment or “software” in 6A001.a.2.a, 6A001.a.2.a.2, 6A001.a.2.a.7, 6A001.a.2.b, 6A001.a.2.c, 6A001.a.2.3, 6A001.a.3, 6B008, 6A008.i.1, 6A008.i.3, 6B008, 6A008.i.3, 6B008, as described in paragraph (b)(1) of this Supplement; and
(D) Controlled by 6E002 for the “production” of equipment controlled by 6A001.a.2.a, 6A001.a.2.a.2, 6A001.a.2.a.7, 6A001.a.2.b, 6A001.a.2.c, 6A001.a.2.3, 6A001.a.3, 6B008.i.3, or 6B008, as described in paragraph (b)(1) of this Supplement; and
(E) Controlled by 9E001 for items controlled by 9A01, 9D001, or 9D002; and
(G) Controlled by 9E002 for items controlled by 9A01; and
(H) Controlled by 9E003.a.1; and
(i) Controlled by 9E003.a.3 for items controlled by 1A002.a as described in paragraph (b)(1)(i) of this Supplement; and
(ii) “Digital” computers controlled by 4A003.b and having a CTP exceeding 20,000 MTOPS; and
(iii) “Electronic assemblies” controlled by 4A003.c. and capable of enhancing performance by aggregation of “computing elements” so that the CTP of the aggregation exceeds 20,000 MTOPS; and
(iv) Processing equipment controlled by 6A001.a.2.c and specially designed for real time application with towed acoustic hydrophone arrays; and
§ 740.12 Gift parcels and humanitarian donations (GFT).

(a) Gift parcels—(1) Scope. The provisions of paragraph (a) authorize exports and reexports of gift parcels by an individual (donor) addressed to an individual, or a religious, charitable or educational organization (donee) located in any destination for the use of the donee or the donee’s immediate family (and not for resale). The gift parcel must be provided free of charge to the donee. However, payment by the donee of any handling charges or of any fees levied by the importing country (e.g., import duties, taxes, etc.) is not considered to be a cost to the donee for purposes of this definition of “gift parcel.”

NOTE TO PARAGRAPH (a) OF THIS SECTION: A gift parcel, within the context of this paragraph (a), does not include multiple parcels exported in a single shipment for delivery to individuals residing in a foreign country. Such multiple gift parcels, if subject to the General Prohibitions described in §742.1(b) of the EAR, must be licensed by BXA. (See Supplement No. 2 to part 748 of the EAR for licensing of multiple gift parcels).

(2) Commodity, value and other limitations—(i) Eligible commodities. The eligible commodities are as follows:
   (A) The commodity must not be controlled for chemical and biological weapons (CB), missile technology (MT), national security (NS), or nuclear proliferation (NP) (see Commerce Control List, part 774 of the EAR); and
   (B) The commodity must be of a type and in quantities normally given as gifts between individuals.

(1) For Cuba, the only commodities that may be included in a gift parcel are the following items: food, vitamins, seeds, medicines, medical supplies and devices, hospital supplies and equipment, equipment for the handicapped, clothing, personal hygiene items, veterinary medicines and supplies, fishing equipment and supplies, soap-making equipment, and in addition receive-only radio equipment for reception of commercial/civil AM/FM and short wave publicly available frequency bands, and batteries for such equipment.

(2) For all other destinations, eligible commodities include all items described in paragraph (a)(2)(i)(B) of this section as well as all other items normally sent as gifts. Gold bullion, gold taels, and gold bars are prohibited as are items intended for resale or reexport.

Example to paragraph (a) of this section. A watch or piece of jewelry is normally sent as a gift. However, multiple watches, either in one package or in subsequent shipments, would not qualify for such gift parcels because the quantity exceeds that normally given between individuals. Similarly, a sewing machine or bicycle, within the dollar limits of this License Exception, may be an appropriate gift. However, subsequent shipments of the same item to the same donee would not be a gift normally given between individuals.

(3) For purposes of paragraph (a)(2)(i)(B) of this section, clothing is appropriate, except that export of military wearing apparel to Country Group D-1 or E-2 under this License Exception is specifically prohibited, regardless of whether all distinctive U.S. military insignia, buttons, and other markings are removed.

(ii) Import requirements. The commodities must be acceptable in type and quantity by the recipient country for import as gifts. Commodities exceeding the import limits may not be included in gift parcels.

(iii) Frequency. Except for gift parcels of food to Cuba, not more than one gift parcel may be sent from the same donor to the same donee in any one calendar month. Parties seeking authorization to exceed this limit due to compelling humanitarian concerns (e.g., gifts of medicine to relatives) should submit a license application (BXA-748P) with complete justification.

(iv) Value. The combined total domestic retail value of all commodities included in a gift parcel may not exceed $400, except for gift parcels to}
Cuba where the value of non-food items may not exceed $200. There is no dollar value limit on food contained in a gift parcel to Cuba.

(3) How to export gift parcels. (i) A gift parcel must be sent directly to the donee by the individual donor, or for such donor by a commercial or other gift-forwarding service or organization. Each gift parcel must show, on the outside wrapper, the name and address of the donor, as well as the name and address of the donee, regardless of whether sent by the donor or by a forwarding service.

(ii) Each parcel must have the notation “GIFT—Export License Not Required” written on the addressee side of the package and the symbol “GFT” written on any required customs declaration.

(b) Humanitarian donations—(1) Scope. The provisions of paragraph (b) authorize exports or reexports by groups or organizations of donations to meet basic human needs when those groups or organizations have experience in maintaining a verifiable system of distribution that ensures delivery to the intended beneficiaries.

(2) Basic human needs. Basic human needs are defined as those requirements essential to individual well-being: health, food, clothing, shelter, and education. These needs are considered to extend beyond those of an emergency nature and those that meet direct needs for mere subsistence.

(3) Eligible donors. Eligible donors are U.S. charitable organizations that have an established record of involvement in donative programs and experience in maintaining and verifying a system of distribution to ensure delivery of commodities and software to the intended beneficiaries. Eligible distribution arrangements may consist of any one or more of the following:

(i) A permanent staff maintained in the recipient country to monitor the receipt and distribution of the donations to the intended beneficiaries;

(ii) Periodic spot-checks in the recipient country by members of the exporter’s staff; or

(iii) An agreement to utilize the services of a charitable organization that has a monitoring system in place.

(4) Donations. To qualify for export under the provisions of this paragraph (b), the items must be provided free of charge to the beneficiary. The payment by the beneficiary, however, of normal handling charges or fees levied by the importing country (e.g., import duties, taxes, etc.) is not considered to be a cost to the beneficiary for purposes of this paragraph (b).

(5) Ineligible commodities and software. The following commodities and software are not eligible:

(i) Commodities and software controlled for national security, chemical or biological weapons, and nuclear non-proliferation, missile technology or crime control reasons (see Supplement No. 1 to part 774 of the EAR);

(ii) Exports for large-scale projects of the kind associated with comprehensive economic growth, such as dams and hydroelectric plants; or

(iii) Exports to Cuba of medical items excluded by § 746.2(a)(3) of the EAR.

(6) Eligible items. Eligible commodities and software are those listed in Supplement No. 2 to part 740.

(7) Additional recordkeeping requirements. In addition to the recordkeeping requirements in part 762 of the EAR, donors must keep records containing the following information:

(i) The donor organization’s identity and past experience as an exporter of goods to meet basic human needs;

(ii) Past and current countries to which the donative programs have been and are being directed, with particular reference to donative programs in embargoed destinations;

(iii) Types of projects and commodities involved in the donative programs;

(iv) Specific class(es) of beneficiaries of particular donated goods intended to be exported under this License Exception; and

(v) Information concerning the source of funding for the donative programs and the projected annual value of exports of humanitarian donations.

§ 740.13 Technology and software—unrestricted (TSU).

This License Exception authorizes exports and reexports of operation technology and software; sales technology and software; software updates (bug fixes); and “mass market” software subject to the General Software Note.

(a) Operation technology and software—(1) Scope. The provisions of paragraph (a) permit exports and reexports of operation technology and software. “Operation technology” is the minimum technology necessary for the installation, operation, maintenance (checking), and repair of those products that are lawfully exported or reexported under a license, a License Exception, or NLR. The “minimum necessary” operation technology does not include technology for development or production and includes use technology only to the extent required to ensure safe and efficient use of the product. Individual entries in the software and technology subcategories of the CCL may further restrict the export or reexport of operation technology.

(2) Provisions and destinations—(i) Provisions. Operation software may be exported or reexported provided that both of the following conditions are met:

(A) The operation software is the minimum necessary to operate equipment authorized for export or reexport; and

(B) The operation software is in object code.

(ii) Destinations. Operation software and technology may be exported or reexported to any destination to which the equipment for which it is required has been or is being legally exported or reexported.

(b) Sales technology—(1) Scope. The provisions of paragraph (b) authorize exports and reexports of sales technology. “Sales technology” is data supporting a prospective or actual quotation, bid, or offer to sell, lease, or otherwise supply any item.

(2) Provisions and destinations—(i) Provisions. Sales technology may be exported or reexported provided that:

(A) The technology is a type customarily transmitted in connection with a prospective or actual quotation, bid, or offer in accordance with established business practice; and

(B) Neither the export nor the reexport will disclose the detailed design, production, or manufacture technology, or the means of reconstruction, of either the quoted item or its product. The purpose of this limitation is to prevent disclosure of technology so detailed that the consignee could reproduce the technology to production.

(ii) Destinations. Sales technology may be exported or reexported to any destination.

NOTE: Neither this section nor its use means that the U.S. Government intends, or is committed, to approve a license application for any commodity, plant, software, or technology that may be the subject of the transaction to which such quotation, bid, or offer relates. Exporters are advised to include in any quotations, bids, or offers, and in any contracts entered into pursuant to such quotations, bids, or offers, a provision relieving themselves of liability in the event that a license (when required) is not approved by the Bureau of Export Administration.

(c) Software updates. The provisions of paragraph (c) authorize exports and reexports of software updates that are intended for and are limited to correction of errors (“fixes” to “bugs”) in software lawfully exported or reexported (original software). Such software updates may be exported or reexported only to the same consignee to whom the original software was exported or reexported, and such software updates may not enhance the functional capacities of the original software. Such software updates may be exported or reexported to any destination to which the software for which they are required has been legally exported or reexported.

(d) General Software Note: “mass market” software—(1) Scope. The provisions of paragraph (d) authorize exports and reexports of “mass market” software subject to the General Software Note (see Supplement No. 2 to part 774 of the EAR; also referenced in this section).

(2) Software not eligible for this License Exception. This License Exception is not available for encryption software controlled for “EI” reasons under ECCN 5D002. (Refer to §§ 742.15(b)(1) and 748.3(b) of the EAR for information on item classifications regarding a one-
time BXA review for release from EI controls.)

(3) Provisions and destinations—
   (i) Destinations. “Mass market” software is available to all destinations except Cuba, Iran, Iraq, Libya, North Korea, Sudan, and Syria.

   (ii) Provisions. “Mass market” treatment is available for software that is generally available to the public by being:
   
   (A) Sold from stock at retail selling points, without restriction, by means of:
      (1) Over the counter transactions;
      (2) Mail order transactions; or
      (3) Telephone call transactions; and
   
   (B) Designed for installation by the user without further substantial support by the supplier.

§ 740.14 Baggage (BAG).

(a) Scope. This License Exception authorizes individuals leaving the United States either temporarily (i.e., traveling) or longer-term (i.e., moving) and crew members of exporting or reexporting carriers to take to any destination, as personal baggage, the classes of commodities and software described in this section.

(b) Eligibility. Individuals leaving the United States may export or reexport any of the following commodities or software for personal use of the individuals or members of their immediate families traveling with them to any destination or series of destinations.

   Individuals leaving the United States temporarily (i.e., traveling) must bring back items exported and reexported under this License Exception unless they consume the items abroad or are otherwise authorized to dispose of them under the EAR. Crew members may export or reexport only commodities and software described in paragraphs (b)(1) and (b)(2) of this section to any destination.

   (1) Personal effects. Usual and reasonable kinds and quantities for personal use of wearing apparel, articles of personal adornment, toilet articles, medicinal supplies, food, souvenirs, games, and similar personal effects, and their containers.

   (2) Household effects. Usual and reasonable kinds and quantities for personal use of furniture, household effects, household furnishings, and their containers.

   (3) Vehicles. Usual and reasonable kinds and quantities of vehicles, such as passenger cars, station wagons, trucks, trailers, motorcycles, bicycles, tricycles, perambulators, and their containers.

   (4) Tools of trade. Usual and reasonable kinds and quantities of tools, instruments, or equipment and their containers for use in the trade, occupation, employment, vocation, or hobby of the traveler or members of the household being moved. For special provisions regarding encryption items subject to EI controls, see paragraph (f) of this section.

   (c) Limits on eligibility. The export of any commodity or software is limited or prohibited, if the kind or quantity is in excess of the limits described in this section. In addition, the commodities or software must be:

   (1) Owned by the individuals (or by members of their immediate families) or by crew members of exporting carriers on the dates they depart from the United States;

   (2) Intended for and necessary and appropriate for the use of the individuals or members of their immediate families traveling with them, or by the crew members of exporting carriers;

   (3) Not intended for sale or other disposal; and

   (4) Not exported under a bill of lading as cargo if exported by crew members.

(d) Special provision: unaccompanied baggage. Individuals departing the United States may ship unaccompanied baggage, which is baggage sent from the United States on a carrier other than that on which an individual departs. Crew members of exporting carriers may not ship unaccompanied baggage. Unaccompanied shipments under this License Exception shall be clearly marked “BAGGAGE.” Shipments of unaccompanied baggage may be made at the time of, or within a reasonable time before or after departure of the consignee or owner from the United States. Personal baggage controlled for
chemical and biological weapons (CB), missile technology (MT), national security (NS) or nuclear nonproliferation (NP) must be shipped within 3 months before or after the month in which the consignee or owner departs the United States. However, commodities controlled for CB, MT, NS, or NP may not be exported under this License Exception to Country Groups D:1, D:2, D:3, D:4, E:2, or Sudan. (See Supplement No. 1 to part 740.) No items controlled for EI reasons may be exported or reexported as unaccompanied baggage.

(e) Special provisions: shotguns and shotgun shells. (1) A United States citizen or a permanent resident alien leaving the United States may export or reexport shotguns with a barrel length of 18 inches or over and shotgun shells under this License Exception, subject to the following limitations:
   (i) Not more than three shotguns may be taken on any one trip.
   (ii) The shotguns and shotgun shells must be with the person’s baggage but they may not be mailed.
   (iii) The shotguns and shotgun shells must be for the person’s exclusive use for legitimate hunting or lawful sporting purposes, scientific purposes, or personal protection, and not for resale or other transfer of ownership or control. Accordingly, except as provided in (e)(2) of this section, shotguns may not be exported permanently under this License Exception. All shotguns and unused shotgun shells must be returned to the United States. Note that since certain countries may require an Import Certificate or a U.S. export license before allowing the import of a shotgun, you should determine the import requirements of your country of destination in advance.
   (2) A nonresident alien leaving the United States may export or reexport under this License Exception only such shotguns and shotgun shells as he or she brought into the United States under the provisions of Department of Treasury Regulations (27 CFR 178.115(d)).

(f) Special provisions: encryption software subject to EI controls. (1) Only a U.S. citizen or permanent resident as defined by 8 U.S.C. 1101(a)(20) may permanently export or reexport encryption items controlled for EI reasons under this License Exception.
   (2) The U.S. citizen or permanent resident must maintain effective control of the encryption items controlled for EI reasons.
   (3) The encryption items controlled for EI reasons may not be exported or reexported to Country Group E:2, Iran, Iraq, Sudan, or Syria.

§ 740.15 Aircraft and vessels (AVS).
This License Exception authorizes departure from the United States of foreign registry civil aircraft on temporary sojourn in the United States and of U.S. civil aircraft for temporary sojourn abroad; the export of equipment and spare parts for permanent use on a vessel or aircraft; and exports to vessels or planes of U.S. or Canadian registry and U.S. or Canadian Airlines’ installations or agents. Generally, no License Exception symbol is necessary for export clearance purposes; however, when necessary, the symbol “AVS” may be used.

(a) Aircraft on temporary sojourn—(1) Foreign registered aircraft. An operating civil aircraft of foreign registry that has been in the United States on a temporary sojourn may depart from the United States under its own power for any destination, provided that:
   (i) No sale or transfer of operational control of the aircraft to nationals of Cuba, Iran, Iraq, Libya, North Korea, Sudan, or Syria has occurred while in the United States;
   (ii) The aircraft is not departing for the purpose of sale or transfer of operational control to nationals of Cuba, Iran, Iraq, Libya, North Korea, Sudan, or Syria; and
   (iii) It does not carry from the United States any item for which an export license is required and has not been granted by the U.S. Government.

(2) A nonresident alien leaving the United States may export or reexport under this License Exception only such shotguns and shotgun shells as he or she brought into the United States under the provisions of Department of Treasury Regulations (27 CFR 178.115(d)).

(f) Special provisions: encryption software subject to EI controls. (1) Only a U.S. citizen or permanent resident as defined by 8 U.S.C. 1101(a)(20) may permanently export or reexport encryption items controlled for EI reasons under this License Exception.
   (2) The U.S. citizen or permanent resident must maintain effective control of the encryption items controlled for EI reasons.
   (3) The encryption items controlled for EI reasons may not be exported or reexported to Country Group E:2, Iran, Iraq, Sudan, or Syria.
issued by the Federal Aviation Administration or conducting flights under operating specifications approved by the Federal Aviation Administration pursuant to 14 CFR part 129 of the regulations of the Federal Aviation Administration, may depart from the United States under its own power for any destination, provided that:

(A) The aircraft does not depart for the purpose of sale, lease or other disposition of operational control of the aircraft, or its equipment, parts, accessories, or components to a foreign country or any national thereof;

(B) The aircraft’s U.S. registration will not be changed while abroad;

(C) The aircraft is not to be used in any foreign military activity while abroad;

(D) The aircraft does not carry from the United States any item for which a license is required and has not been granted by the U.S. Government.

(ii) Any other operating civil aircraft of U.S. registry may depart from the United States under its own power for any destination, except to Cuba, Iran, Iraq, Libya, North Korea, Sudan, Syria, Sudan, Libya, and North Korea (flights to these destinations require a license), provided that:

(A) The aircraft does not depart for the purpose of sale, lease or other disposition of operational control of the aircraft, or its equipment, parts, accessories, or components to a foreign country or any national thereof;

(B) The aircraft’s U.S. registration will not be changed while abroad;

(C) The aircraft is not to be used in any foreign military activity while abroad;

(D) The aircraft does not carry from the United States any item for which a license is required and has not been granted by the U.S. Government.

(3) Criteria. The following nine criteria each must be met if the flight is to qualify as a temporary sojourn. To be considered a temporary sojourn, the flight must not be for the purpose of sale or transfer of operational control. An export is for the transfer of operational control unless the exporter retains each of the following indicia of control:

(i) Hiring of cockpit crew. Right to hire and fire the cockpit crew.

(ii) Dispatch of aircraft. Right to dispatch the aircraft.

(iii) Selection of routes. Right to determine the aircraft’s routes (except for contractual commitments entered into by the exporter for specifically designated routes).

(iv) Place of maintenance. Right to perform or obtain the principal maintenance on the aircraft, which principal maintenance is conducted outside Cuba, Iran, Iraq, Libya, North Korea, Sudan, or Syria, under the control of a party who is not a national of any of these countries. (The minimum necessary in-transit maintenance may be performed in any country).

(v) Location of spares. Spares are not located in Cuba, Iran, Iraq, Libya, North Korea, Sudan, or Syria.

(vi) Place of registration. The place of registration is not changed to Cuba, Iran, Iraq, Libya, North Korea, Sudan, or Syria.

(vii) No transfer of technology. No technology is transferred to a national of Cuba, Iran, Iraq, Libya, North Korea, Sudan, Syria, except the minimum necessary in transit maintenance to perform flight line servicing required to depart safely.

(viii) Color and logos. The aircraft does not bear the livery, colors, or logos of a national of Cuba, Iran, Iraq, Libya, North Korea, Sudan, or Syria.

(ix) Flight number. The aircraft does not fly under a flight number issued to a national of Cuba, Iran, Iraq, Libya, North Korea, Sudan, or Syria as such a number appears in the Official Airline Guide.

(4) Reexports. Civil aircraft legally exported from the United States may be reexported under this section, provided the restrictions described in this paragraph (a) are met.

(b) Equipment and spare parts for permanent use on a vessel or aircraft, and ship and plane stores—(1) Vessel. Equipment and spare parts for permanent use on a vessel, when necessary for the proper operation of such vessel, may be exported or reexported for use on board
§ 740.15

15 CFR Ch. VII (1–1–00 Edition)

a vessel of any registry, except a vessel registered in Country Group D:1 (see Supplement No. 1 to part 740), Cuba, or North Korea, or owned or controlled by, or under charter or lease to any of these countries or their nationals. In addition, other equipment and services for necessary repair to fishing and fishery support vessels of Country Group D:1 or North Korea may be exported for use on board such vessels when admitted into the United States under governing international fishery agreements.

(2) Aircraft. Equipment and spare parts for permanent use on an aircraft, when necessary for the proper operation of such aircraft, may be exported or reexported for use on board an aircraft of any registry, except an aircraft registered in, owned or controlled by, or under charter or lease to a country included in Country Group D:1, Cuba, Libya, or North Korea, or a national of any of these countries.

(3) Ship and plane stores. Usual and reasonable kinds and quantities of the following commodities may be exported for use or consumption on board an aircraft or vessel of any registry during the outgoing and immediate return flight or voyage. (Note that fuel and related commodities that qualify as ship or plane stores as described in this License Exception must be exported under the short supply License Exception SPR (see §754.2(h) of the EAR.)

(i) Deck, engine, and steward department stores, provisions, and supplies for both port and voyage requirements;
(ii) Medical and surgical supplies;
(iii) Food stores;
(iv) Slop chest articles;
(v) Saloon stores or supplies.
(c) Shipments to U.S. or Canadian vessels, planes and airline installations or agents—(1) Exports to vessels or planes of U.S. or Canadian registry. Export may be made of the commodities set forth in paragraph (c)(3) of this section, for use by or on a specific vessel or plane of U.S. or Canadian registry located at any seaport or airport outside the United States or Canada except a port in Cuba, North Korea or Country Group D:1 (excluding the PRC and Romania), (see Supplement No. 1 to part 740) provided that such commodities are all of the following:  
(i) Ordered by the person in command or the owner or agent of the vessel or plane to which they are consigned;
(ii) Intended to be used or consumed on board such vessel or plane and necessary for its proper operation;
(iii) In usual and reasonable kinds and quantities during times of extreme need; and
(iv) Shipped as cargo for which a Shipper’s Export Declaration (SED) is filed with the carrier, except that an SED is not required when any of the commodities, other than fuel, is exported by U.S. airlines to their own aircraft abroad for their use.

(2) Exports to U.S. or Canadian airline’s installation or agent. Exports of the commodities set forth in paragraph (c)(3) of this section, except fuel, may be made to a U.S. or Canadian airline’s installation or agent in any foreign destination except Cuba, North Korea, or Country Group D:1 (excluding the PRC and Romania), (see Supplement No. 1 to part 740) provided such commodities are all of the following:

(i) Ordered by a U.S. or Canadian airline and consigned to its own installation or agent abroad;
(ii) Intended for maintenance, repair, or operation of aircraft registered in either the United States or Canada, and necessary for the aircraft’s proper operation, except where such aircraft is located in, owned, operated or controlled by, or leased or chartered to, Cuba, North Korea or Country Group D:1 (excluding the PRC) (see Supplement No. 1 to part 740) or a national of such country;
(iii) In usual and reasonable kinds and quantities; and
(iv) Shipped as cargo for which a Shipper’s Export Declaration (SED) is filed with the carrier, except that an SED is not required when any of these commodities is exported by U.S. airlines to their own installations and agents abroad for use in their aircraft operations.

*Where a validated license is required, see §§748.2 and 748.4(g) of the EAR.
*See part 772 of the EAR for definitions of United States and Canadian airlines.
(3) Applicable commodities. This paragraph (c) applies to the following commodities, subject to the provisions in paragraph (c)(1) and (c)(2) of this section:

NOTE TO PARAGRAPH (C)(3) OF THIS SECTION: Fuel and related commodities for shipment to vessels or planes of U.S. or Canadian registry as described in this License Exception must be shipped under the short supply License Exception SPR (see §754.2(h) of the EAR);

(i) Deck, engine, and steward department stores, provisions, and supplies for both port and voyage requirements;
(ii) Medical and surgical supplies;
(iii) Food stores;
(iv) Slop chest articles;
(v) Saloon stores or supplies; and
(vi) Equipment and spare parts.

§ 740.16 Additional permissive reexports (APR).

This License Exception allows the following reexports:

(a) Reexports from Country Group A:1 and cooperating countries. Reexports may be made from Country Group A:1 or from cooperating countries, provided that:

(1) The reexport is made in accordance with the conditions of an export authorization from the government of the reexporting country;
(2) The commodities being reexported are not controlled for NP, CB, MT, SI, or CC reasons; and
(3) The reexport is destined to either:

(i) A country in Country Group B that is not also included in Country Group D:2, D:3, or D:4; Cambodia; or Laos; and the commodity being reexported is both controlled for national security reasons and not controlled for export to Country Group A:1; or
(ii) A country in Country Group D:1 (National Security) (see Supplement No. 1 to part 740), other than Cambodia or Laos, and the commodity being reexported is controlled for national security reasons.

(b) Reexports to and among Country Group A:1 and cooperating countries. Reexports may be made to and among Country Group A:1 and cooperating countries, provided that eligible commodities are for use or consumption within a Country Group A:1 (see Supplement No. 1 to part 740) or cooperating country, or for reexport from such country in accordance with other provisions of the EAR. All commodities except the following are eligible for reexport to and among Country Group A:1 and cooperating countries:

(1) Computers with a CTP greater than 10,000 MTOPS to Hong Kong and South Korea;
(2) Commodities controlled for nuclear nonproliferation or missile technology reasons.

(c) Reexports to a destination to which direct shipment from the United States is authorized under an unused outstanding license may be made under the terms of that license. Such reexports shall be recorded in the same manner as exports are recorded, regardless of whether the license is partially or wholly used for reexport purposes. (See part 762 of the EAR for recordkeeping requirements.)

(d) Reexports of any item from Canada that, at the time of reexport, may be exported directly from the United States to the new country of destination under any License Exception.

(e) Reexports (return) to the United States of any item. If the reexporting party requests written authorization because the government of the country from which the reexport will take place requires formal U.S. Government approval, such authorization will generally be given.

(f) Reexports from a foreign destination to Canada of any item if the item could be exported to Canada without a license.

(g) Reexports between Switzerland and Liechtenstein.

(h) Shipments of foreign-made products that incorporate U.S.-origin components may be accompanied by U.S.-origin controlled spare parts, provided that they do not exceed 10 percent of the value of the foreign-made product, subject to the restrictions in §734.4 of the EAR.

(i) Reexports to Sudan of items controlled by ECCNs 2A994; 3A992.a; 5A 991.f; 5A 992; 6A 991; 6A 998; 7A 994; 8A 992.d, .e, .f, and .g; and 9A 991.a and b; and 9A 991.d and .e. In addition, items
in these ECCNs are not counted as controlled U.S. content for purposes of determining license requirements for U.S. parts, components, and materials incorporated in foreign-made products. However, the export from the United States to any destination with knowledge that they will be reexported directly or indirectly, in whole or in part to Sudan is prohibited without a license.

(j) Reexports of items controlled by NP Column 1 (see Supplement No. 1 to part 774 of the EAR) to, among, and from countries described in Country Group A:4 (see Supplement No. 1 to part 740), except:

(1) Reexports from countries that are not identified in Country Group A:1 of items that are controlled for NS reasons to destinations in Country Group D:1; and

(2) Reexports to destinations in Country Group E:2 and Country Group D:2.

§ 740.17 Encryption commodities and software (ENC).

(a) Exports and reexports of encryption commodities and software to all destinations except Cuba, Iran, Iraq, Libya, North Korea, Sudan and Syria.

(1) Financial-specific encryption commodities and software of any key length.

(i) Scope. You may export and reexport financial-specific encryption commodities and software (which are not eligible under the provisions of License Exception TSU for mass market software such as SET or similar protocols) of any key length that are restricted by design (e.g., highly field-formatted with validation procedures, and not easily diverted to other end-uses) for financial applications to secure financial communications/transactions. Notwithstanding the provisions of paragraph (c)(2) of this section, financial-specific commodities and software that were made eligible for License Exception KMI after a technical review prior to December 31, 1998, are now eligible for export and reexport under License Exception ENC under the provisions of this paragraph (a)(1).

(ii) Eligible commodities and software. Encryption commodities and software of any key length classified under ECCNs 5A002 and 5D002 after a technical review (see paragraph (c) of this section). These commodities and software must be specifically designed and limited for use in the processing of electronic financial (commerce) transactions, which implements cryptography in specifically delineated fields such as merchant’s identification, the customer’s identification and address, the merchandise purchased and the payment mechanism. It does not allow for encryption of data, text or other media except as directly related to these elements of the electronic transaction to support financial communications/transactions. Notwithstanding the provisions of paragraph (c)(2) of this section, financial-specific commodities and software that were made eligible for License Exception KMI after a technical review prior to December 31, 1998, are now eligible for export and reexport under License Exception ENC under the provisions of this paragraph (a)(1).

(iii) Eligible destinations. Upon approval of your classification request, you may export and reexport under License Exception ENC financial-specific encryption commodities and software, as defined in this paragraph (a)(1), of any key length to all destinations except Cuba, Iran, Iraq, Libya, North Korea, Sudan and Syria.

(iv) Reporting requirements. There are no reporting requirements.

(2) Encryption commodities and software of any key length for U.S. subsidiaries.

(i) Scope. You may export and reexport encryption commodities and software of any key length (as defined in part 772 of the EAR) subject to the conditions of this paragraph (a)(2). Note that distributors, resellers or other entities that are not manufacturers of the encryption commodities and software are permitted to use License Exception ENC for U.S. subsidiaries only in instances where the export or reexport meets the terms and conditions of this paragraph (a)(2).

(ii) Eligible commodities and software. Encryption commodities, software and technology of any key length classified under ECCNs 5A002, 5D002 and 5E002 after a technical review (see paragraph (c) of this section). This includes encryption chips, integrated circuits, toolkits, executable or linkable modules, source code and technology to U.S. subsidiaries for internal company
proprietary use, including the development of new products.

(iii) Eligible destinations; retransfers. You may export and reexport under License Exception ENC encryption commodities, software and technology of any key length to U.S. subsidiaries for internal company proprietary use, including the development of new products, in all destinations except Cuba, Iran, Iraq, Libya, North Korea, Sudan and Syria. All items developed using U.S. encryption commodities, software and technology are subject to the EAR. For exports and reexports to strategic partners of U.S. companies (as defined in part 772) see §742.15(b)(8) of the EAR. Retransfers to other end-users or end-uses are prohibited without prior authorization.

(iv) Reporting requirements. There are no reporting requirements.

(3) Encryption commodities, including mass market and non-mass market, and non-mass market encryption software incorporating symmetric algorithms with key lengths up to and including 56-bits, such as DES or equivalent.

(i) Scope. You may export and reexport encryption commodities, including mass market and non-mass market commodities, and non-mass market software with key lengths up to and including 56-bits, such as DES or equivalent, under License Exception ENC subject to the conditions of this paragraph (a)(3). For information concerning the technical review of encryption mass market commodities and mass market software refer to §742.15(b)(1) of the EAR. Note that encryption mass market software remains eligible under License Exception TSU.

(ii) Eligible commodities and software. (A) Mass market and non-mass market encryption commodities and non-mass market software having symmetric algorithms with key lengths up to and including 56-bits, such as DES or equivalent (such as RC2, RC4, RC5, and CAST) which are classified as a result of a technical review (see paragraph (c) of this section). The commodity or software must not allow the alteration of the cryptographic functionality by the user or any other program. Encryption chips, integrated circuits, toolkits and executable or linkable modules are not authorized for export under the provisions of paragraph (a)(3).

(B)(1) For mass market and non-mass market encryption commodities and non-mass market encryption software, exporters of 40-bit or less encryption commodities and software which have been made eligible for License Exception KMI or License Exception TSU or have been licensed for export under an Encryption Licensing Arrangement or a license prior to December 31, 1998, will be permitted to export and reexport these commodities and software under license exception ENC with increased key lengths up to and including 56-bits for the confidentiality algorithm, with key exchange mechanisms including symmetric algorithms with the same or double key length authorized for the confidentiality algorithm, and asymmetric algorithms for key exchange with key space of 512, 768 or up to and including 1024 bits without an additional technical review, provided that there is no other change in cryptographic functionality. Exporters must certify to BXA that the only change to the encryption is the increase in the key length for the confidentiality algorithm, the asymmetric or symmetric key exchange algorithms and that there is no other change in cryptographic functionality. Such certifications must be in the form of a letter from senior corporate management and include the original authorization number issued by BXA, the date of issuance and the information identified in paragraphs (a)(2)(iii) through (v) of Supplement No. 6 to part 742 of the EAR. (If this information was submitted previously, then only identify the modifications.) BXA must receive such certification by March 31, 1999, and prior to any export of such upgraded product.

(2) The certification should be sent to:

Office of Strategic Trade and Foreign Policy Controls, Bureau of Export Administration, Department of Commerce, 14th Street and Pennsylvania Ave., NW., Room 2105, Washington, DC 20230. Attn: Encryption Upgrade

(3) A copy of the certification should be sent to:
§ 740.17

Attn: ENC Encryption Request Coordinator,
P.O. Box 246, Annapolis Junction, MD 20701-0246

(C) After March 31, 1999, any increase (upgrade) in the confidentiality algorithm and the key exchange algorithm must be reviewed by BXA through a classification request (see § 748.3 of the EAR). In Block 9 of form BXA-748P, indicate "Key Length Upgrade."

(iii) Eligible destinations. License Exception ENC is available for exports and reexports of encryption commodities and software with key length up to and including 56-bits, such as DES or equivalent to all destinations except Cuba, Iran, Iraq, Libya, North Korea, Sudan and Syria. End-use is limited to secure business financial communications or transactions and financial communications/transactions between the bank and/or financial institution and its customers. No customer to customer communications or transactions are allowed. Retransfers to other end-users or end-uses are prohibited without prior authorization.

(iv) Reporting requirements. There are no reporting requirements.

(b) Exports and reexports of certain encryption commodities and software to countries listed in Supplement No. 3 to part 740 of the EAR. (1) General purpose encryption commodities and software of any key length for use by banks/financial institutions. (i) Scope. You may export and reexport general purpose, non-voice encryption commodities and software of any key length to banks and financial institutions (as defined in part 772 of the EAR) in specified destinations, subject to the conditions of this paragraph (b)(1). Note that distributors, resellers or other entities who are not manufacturers of the encryption commodities and software are permitted to use License Exception ENC for banks and financial institutions only in instances where the export or reexport meets the terms and conditions of this paragraph (b)(1).

(ii) Eligible commodities and software. General purpose, non-voice encryption commodities and software of any key length classified under ECCNs 5A002 and 5D002 after a technical review (see paragraph (c) of this section). Note that software and commodities that have already been approved under an Encryption Licensing Arrangement to banks and financial institutions in specified countries may now be exported or reexported to other banks and financial institutions in those countries under the same Encryption Licensing Arrangement.

(iii) Eligible destinations; retransfers. Upon approval of your classification request, you may export and reexport under License Exception ENC general purpose, non-voice encryption commodities and software, as defined in this paragraph (b)(1), of any key length to banks and financial institutions in all destinations listed in Supplement No. 3 to this part and to branches of such banks and financial institutions wherever established, except Cuba, Iran, Iraq, Libya, North Korea, Sudan and Syria. End-use is limited to secure business financial communications or transactions and financial communications/transactions between the bank and/or financial institution and its customers. No customer to customer communications or transactions are allowed. Retransfers to other end-users or end-uses are prohibited without prior authorization.

(iv) Reporting requirements. There are no reporting requirements.

(2) Health and medical end-users. (i) Scope. You may export and reexport encryption commodities and software of any key length under License Exception ENC to health and medical end-users (as defined in part 772 of the EAR) in specified destinations, subject to the conditions of this paragraph (b)(2). Note that distributors, resellers or other entities who are not manufacturers of the encryption commodities and software are permitted to use License Exception ENC for health and medical end-users only in instances where the export or reexport meets the terms and conditions of this paragraph (b)(2).

(ii) Eligible commodities and software. Encryption commodities and software of any key length classified under ECCNs 5A002 and 5D002 after a technical review (see paragraph (c) of this section).

(iii) Eligible destinations; retransfers. You may export and reexport under License Exception ENC encryption commodities and software of any key length to health and medical end-users in all destinations listed in Supplement No. 3 to this part. Non-U.S. biochemical and pharmaceutical manufacturers, and non-U.S. military health and medical entities are not eligible to receive encryption commodities and
Bureau of Export Administration, Commerce

§ 740.17

software under License Exception ENC (see § 742.15 of the EAR for licensing information on these end-users, as well as additional countries). End-use is limited to securing health and medical transactions to health and medical end-users. No customer to customer communications or transactions are allowed. Retransfers to other end-users or end-uses are prohibited without prior authorization.

(iv) Reporting requirements. See paragraph (d) of this section for reporting requirements for exports under this License Exception.

(3) Encryption commodities and software of any key length for on-line merchants. (i) Scope. You may export and reexport encryption commodities and software of any key length under License Exception ENC to on-line merchants (as defined in part 772 of the EAR) in specified destinations, subject to the conditions of this paragraph (b)(3). End-use is limited to: the purchase or sale of goods and software; and services connected with the purchase or sale of goods and software including interactions between purchasers and sellers necessary for ordering, payment and delivery of goods and software. No other end-uses or customer to customer communications or transactions are allowed. Foreign on-line merchants or their separate business units (as defined in part 772 of the EAR) who are engaged in the manufacturing and distribution of items or services controlled on the U.S. Munitions List. Retransfers to other end-users or end-uses are prohibited without prior authorization.

(iv) Reporting requirements. See paragraph (d) of this section for reporting requirements for exports under this License Exception.

(c) Technical review to determine eligibility for License Exception ENC. (1) You may initiate a technical review required by paragraph (a) or (b) of this section by submitting a classification request for your product in accordance with the provisions of § 748.3(b) of the EAR. Indicate “License Exception ENC” in Block 9: Special purpose, on form BXA-748P. Submit the original request to BXA in accordance with § 748.3 of the EAR and send a copy of the request to:

Attn: ENC Encryption Request Coordinator,
P.O. Box 246, Annapolis Junction, MD 20701-0246

(2) Commodities and software that have been made eligible for License Exception TSU or KMI or which have been approved for export under an Encryption Licensing Arrangement or a license prior to December 31, 1998 are eligible for export and reexport under all paragraphs of License Exception
ENC, except paragraphs (a)(1) and (b)(3) of this section, without an additional technical review, provided that the export or reexport meets all the terms and conditions of this License Exception. For all other commodities and software, a technical review will determine eligibility for License Exception ENC by reviewing the confidentiality algorithm, key space, and key exchange mechanism.

(3) For export and reexport of encryption commodities and software under paragraph (a)(3) of this section, examples of eligible key exchange mechanisms include, but are not limited to, symmetric algorithms with the same or double the key length authorized for the confidentiality algorithm, asymmetric algorithms with key space of 512, 768 or up to and including 1024 bits, proprietary key exchange mechanisms, or others.

(4) For export and reexport of encryption commodities and software under paragraph (b)(3) of the License Exception ENC, exporters, in order to expedite review of the classification, should submit, as applicable, the following types of information to support the classification request:

(i) Information describing how the product is limited to a client-server application or application specially designed or tailored to the conditions outlined in the License Exception;
(ii) Information describing the end-user environment to which the application will be limited;
(iii) Information explaining how the product will not permit customer-to-customer communications or transactions above 56-bits;
(iv) Information on the process by which the merchant(s) or application will limit access to authorized users; or
(v) Details of the encryption system, including how it is limited to the application or cannot be diverted to other end-uses.

(d) Reporting requirements. (1) You must provide to BXA the names and addresses for exports to the following end-users:

(i) All military and government end-users for non-mass market commodities and non-mass market software exports authorized under paragraph (a)(3) of this section;
(ii) All health and medical end-users for exports authorized under paragraph (b)(2) of this section, and
(iii) All foreign on-line merchants for exports authorized under paragraph (b)(3) of this section.

(2) You must submit reports no later than February 1 and no later than August 1 of any given year. Specifically, the report must identify the end-user name and address and country of ultimate destination, as well as the classification or other authorization number. Send the report to the following address:

Office of Strategic Trade and Foreign Policy Controls, Bureau of Export Administration, Department of Commerce, 14th Street and Pennsylvania Ave., N.W., Room 2705, Washington, D.C. 20230, Attn: Encryption Reports

**Commercial entities headquartered in these countries and their branches wherever located (except Cuba, Iran, Iraq, Libya, North Korea, Sudan and Syria) are eligible to receive "recoverable" encryption commodities and software of any key length for internal company proprietary use. See §742.15(b)(7) of the EAR.

[63 FR 72162, Dec. 31, 1998]

PART 742—CONTROL POLICY—CCL BASED CONTROLS

Sec.
742.1 Introduction.
742.2 Proliferation of chemical and biological weapons.
742.3 Nuclear nonproliferation.
742.4 National security.
742.5 Missile technology.
742.6 Regional stability.
742.7 Crime control.
742.8 Anti-terrorism: Iran.
742.9 Anti-terrorism: Syria.
742.10 Anti-terrorism: Sudan.
742.11 Specially designed implements of torture.
742.12 High performance computers.
742.13 Communications intercepting devices.
742.14 Significant items: hot section technology for the development, production or overhaul of commercial aircraft engines, components, and systems.
742.15 Encryption items.
742.16 India and Pakistan sanctions.
742.17 Exports of firearms to OAS member countries.
742.18 Chemical Weapons Convention (CWC or Convention).

SUPPLEMENT NO. 1 TO PART 742—NONPROLIFERATION OF CHEMICAL AND BIOLOGICAL WEAPONS

SUPPLEMENT NO. 2 TO PART 742—ANTI-TERRORISM CONTROLS; IRAN, SYRIA, AND SUDAN CONTRACT SANCUTY DATES AND RELATED POLICIES

SUPPLEMENT NO. 3 TO PART 742—HIGH PERFORMANCE COMPUTERS; SAFEGUARD CONDITIONS AND RELATED INFORMATION

SUPPLEMENT NO. 4 TO PART 742—KEY ESCROW OR KEY RECOVERY PRODUCTS CRITERIA

SUPPLEMENT NO. 5 TO PART 742 [RESERVED]

SUPPLEMENT NO. 6 TO PART 742—GUIDELINES FOR SUBMITTING A CLASSIFICATION REQUEST FOR MASS MARKET ENCRYPTION COMMODITIES AND SOFTWARE

SUPPLEMENT NO. 7 TO PART 742 [RESERVED]

SOURCE: 61 FR 12786, Mar. 25, 1996, unless otherwise noted.

§ 742.1 Introduction.

In this part, references to the Export Administration Regulations (EAR) are references to 15 CFR chapter VII, subchapter C.

(a) Scope. This part describes all the reasons for control reflected in the Country Chart in Supplement No. 1 to part 738 of the EAR. In addition, it includes licensing requirements and licensing policies for the following items that are not reflected on the Country Chart: specially designed implements of torture, high performance computers, and communications intercepting devices. This part is organized so that it lists each reason for control in the order (reading left to right) in which the control appears on the Country Chart. In addition to describing the reasons for control and licensing requirements and policies, this part describes any applicable contract sanctity provisions that may apply to specific controls and includes a description of any multilateral regime under which specific controls are maintained.

(b) Reasons for control listed on the CCL not covered by this part. This part describes the license requirements and the licensing policies for all the "Reasons for Control" that are listed on the Commerce Control List (CCL) except "Short Supply" and "U.N. Sanctions," which do not appear on the Country Chart.

(1) Short Supply. ECCNs containing items subject to short supply controls ("SS") refer the exporter to part 754 of the EAR. These ECCNs are: 0A980 (Horses for export by sea); 1C980 (Certain inorganic chemicals); 1C981 (Crude petroleum, including reconstituted crude petroleum, tar sands, and crude shale oil); 1C982 (Certain other petroleum products); 1C983 (Natural gas liquids and other natural gas derivatives); 1C984 (Certain manufactured gas and synthetic natural gas (except when commingled with natural gas and thus subject to export authorization from
the Department of Energy; and 1C988
(Western red cedar (thuja plicata) logs and timber, and rough, dressed and worked lumber containing wane).

(2) U.N. Sanctions. The United Nations imposes sanctions, short of complete embargoes, against certain countries which may result in controls that supplement those otherwise maintained under the EAR for that particular country. This part does not address license requirements and licensing policies for controls implementing U.N. sanctions. CCL entries containing items subject to U.N. sanctions will refer the exporter to part 746 of the EAR, Embargoes and Other Special Controls, for any supplemental controls that may apply to exports and re-exports involving these countries.

(c) Exports and reexports involving Cuba, Libya, North Korea, Iraq, Iran, and the Bosnian Serb-controlled areas of Bosnia-Herzegovina. This part does not cover license requirements and licensing policies that apply to exports and reexports to embargoed destinations (Cuba, Libya, North Korea, Iraq, Iran and the Bosnian-Serb controlled areas of Bosnia-Herzegovina). These comprehensive embargoes cover a broader range of items than those reflected in the CCL. If you are exporting or reexporting to any of these destinations, you should first review part 746 of the EAR, Embargoes and Other Special Controls.

(d) Anti-terrorism Controls on Cuba, Libya, Iran, Iraq, North Korea, Sudan and Syria. Commerce maintains anti-terrorism controls on Iran, Syria and Sudan under section 6(a) of the Export Administration Act. Items controlled under section 6(a) to these three countries are described in Supplement No. 2 to part 742. Commerce also maintains controls under section 6(j) of the EAA to Cuba, Libya, Iraq, Iran, North Korea, Sudan and Syria. Items controlled to these seven countries under EAA section 6(j) are also described in Supplement 2 to part 742. The Secretaries of Commerce and State are required to notify appropriate Committees of the Congress 30 days before issuing a license for an item controlled under section 6(j) to Cuba, Libya, North Korea, Iran, Iraq, Sudan or Syria. As noted in paragraph (c) of this section, if you are exporting or reexporting to Cuba, Libya, Iran, Iraq and North Korea, you should review Part 746 of the EAR, Embargoes and Other Special Controls.

(e) End-user and end-use based controls. This part does not cover prohibitions and licensing requirements for exports of items not included on the CCL that are subject to end-use and end-user controls: certain nuclear end-uses; certain missile end-uses; certain chemical and biological weapons end-uses; certain naval nuclear propulsion end-uses; certain activities of U.S. persons; certain exports to and for the use of certain foreign vessels or aircraft; and certain exports to all countries for Libyan aircraft. Licensing requirements and policies for these exports are contained in part 744 of the EAR.

(f) Overlapping license policies. Many items on the CCL are subject to more than one type of control (e.g., national security (NS), missile technology (MT), nuclear nonproliferation (NP), regional stability (RS)). In addition, applications for all items on the CCL, other than those controlled for short supply reasons, may be reviewed for missile technology (see §742.5(b)(3) of this part), nuclear nonproliferation (see §742.3(b)(2) of this part), or chemical and biological weapons (see §742.2(b)(3) of this part), if the end-use or end-user may be involved in certain proliferation activities. Finally, many multilaterally controlled items are reviewed for anti-terrorism reasons if they are destined for a terrorism-supporting country (see paragraph (d) of this section). Your application for a license will be reviewed under all applicable licensing policies. A license will be issued only if an application can be approved under all applicable licensing policies.

§ 742.2 Proliferation of chemical and biological weapons.

(a) License requirements. The following controls are maintained in support of the U.S. foreign policy of opposing the proliferation and illegal use of chemical and biological weapons. (See also
§ 742.18 of this part for license requirements pursuant to the Chemical Weapons Convention).

(1) If CB Column 1 of the Country Chart (Supplement No. 1 to part 738 of the EAR) is indicated in the appropriate ECCN, a license is required to all destinations except Canada for the following:

(i) Human pathogens, zoonoses, toxins, animal pathogens, genetically modified microorganisms and plant pathogens identified in ECCNs 1C351, 1C352, 1C353, and 1C354; and
(ii) Technology (ECCNs 1E001 and 1E351) for the production and/or disposal of microbiological commodities described in paragraph (a)(1)(i) of this section.

(2) If CB Column 2 of the Country Chart (Supplement No. 1 to part 738 of the EAR) is indicated in the appropriate ECCN, a license is required to all destinations except countries in Country Group A:3 (see Supplement No. 1 to part 740 of the EAR) (Australia Group members) for the following:

(i) Chemicals identified in ECCN 1C350 (precursor and intermediate chemicals used in the production of chemical warfare agents).
(A) This licensing requirement includes chemical mixtures containing any chemicals identified in ECCN 1C350, except as specified in Note 2 to that ECCN.
(B) This licensing requirement does not include chemical compounds created with any chemicals identified in ECCN 1C350, unless those compounds are also identified in ECCN 1C350.
(ii) Software (ECCN 1D390) for process control that is specifically configured to control or initiate production of the chemical precursors controlled by ECCN 1C350.
(iii) Technology (ECCNs 1E001 and 1E351) for the production and/or disposal of chemical precursors described in ECCN 1C350, and technology (ECCNs 1E001 and 1E350) involving the following for facilities designed or intended to produce chemicals described in 1C350:
(A) Overall plant design;
(B) Design, specification, or procurement of equipment;
(C) Supervision of construction, installation, or operation of complete plant or components thereof;
(D) Training of personnel; or
(E) Consultation on specific problems involving such facilities.

(3) If CB Column 3 of the Country Chart (Supplement No. 1 to part 738 of the EAR) is indicated in the appropriate ECCN, a license is required to Country Group D:3 (see Supplement No. 1 to part 740 of the EAR) for the following:

(i) Equipment and materials identified in ECCNs 2B350 and 2B351 on the CCL, which can be used in the production of chemical weapons precursors or chemical warfare agents, and equipment and materials identified in ECCN 2B352, which can be used in the production of biological agents; and
(ii) Technology (ECCNs 2E001, 2E002, and 2E301) for development, production, or use of the commodities covered in ECCNs 2B350, 2B351, and 2B352.

(b) Licensing policy. (1) License applications for the items described in paragraph (a) of this section will be considered on a case-by-case basis to determine whether the export or reexport would make a material contribution to the design, development, production, stockpiling, or use of chemical or biological weapons. When an export or reexport is deemed to make such a contribution, the license will be denied.

(2) The following factors are among those that will be considered to determine what action should be taken on license applications:

(i) The specific nature of the end-use;
(ii) The significance of the export and reexport in terms of its contribution to the design, development, production, stockpiling, or use of chemical or biological weapons;
(iii) The nonproliferation credentials of the importing country;
(iv) The types of assurances or guarantees against design, development, production, stockpiling, or use of chemical or biological weapons that are given in a particular case; and
(v) The existence of a pre-existing contract.

(3) BXA will review license applications in accordance with the licensing policy described in paragraph (b)(2) of
§ 742.3 Nuclear nonproliferation.

(a) License requirements. Section 309(c) of the Nuclear Non-Proliferation Act of 1978 requires BXA to identify items subject to the EAR that could be of significance for nuclear explosive purposes if used for activities other than those authorized at the time of export or reexport. ECCNs on the CCL that include the symbol “NP 1” or “NP 2” in the “Country Chart” column of the “License Requirements” section identify items that could be of significance for nuclear explosive purposes and are therefore subject to licensing requirements under this part and under section 309(c) of the Nuclear Non-Proliferation Act of 1978. These items are referred to as “The Nuclear Referral List” and are subject to the following licensing requirements:

(1) If NP Column 1 of the Country Chart (Supplement No. 1 to part 738 of the EAR) is indicated in the appropriate ECCN, a license is required to all destinations except Nuclear Suppliers Group (NSG) member countries (Country Group A:4) (see Supplement No. 1 to part 740 of the EAR).

(2) If NP Column 2 of the Country Chart (Supplement No. 1 to part 738 of the EAR) is indicated in the applicable ECCN, a license is required to Country Group D:2 (see Supplement No. 1 to part 740 of the EAR).

(3) Other nuclear-related license requirements are described in §§744.2 and 744.5 of the EAR.

(b) Licensing policy. (1) To implement the controls in paragraph (a) of this section, the following factors are among those used to determine what action should be taken on individual applications:

(i) Whether the items to be transferred are appropriate for the stated end-use and whether that stated end-use is appropriate for the end-user;

(ii) The significance for nuclear purposes of the particular item;

(iii) Whether the items to be exported or reexported are to be used in research on, or for the development, design, manufacture, construction, operation, or maintenance of, any reprocessing or enrichment facility;

(iv) The types of assurances or guarantees given against use for nuclear explosive purposes or proliferation in the particular case;

(v) Whether any party to the transaction has been engaged in clandestine or illegal procurement activities;

(vi) Whether an application for a license to export or reexport to the end-user has previously been denied, or whether the end-user has previously diverted items received under a general license, a License Exception, or a validated license to unauthorized activities;

(vii) Whether the export or reexport would present an unacceptable risk of diversion to a nuclear explosive activity or unsafeguarded nuclear fuel-cycle activity described in §744.2(a) of the EAR; and

(viii) The nonproliferation credentials of the importing country, based
on consideration of the following factors:

(A) Whether the importing country is a party to the Nuclear Non-Proliferation Treaty (NPT) or to the Treaty for the Prohibition of Nuclear Weapons in Latin America (Treaty of Tlatelolco) or to a similar international legally-binding nuclear nonproliferation agreement;

(B) Whether the importing country has all of its nuclear activities, facilities, or installations that are operational, being designed, or under construction under International Atomic Energy Agency (IAEA) safeguards or equivalent full scope safeguards;

(C) Whether there is an agreement for cooperation in the civil uses of atomic energy between the U.S. and the importing country;

(D) Whether the actions, statements, and policies of the government of the importing country are in support of nuclear nonproliferation and whether that government is in compliance with its international obligations in the field of non-proliferation;

(E) The degree to which the government of the importing country cooperates in non-proliferation policy generally (e.g., willingness to consult on international nonproliferation issues); and

(F) Information on the importing country's nuclear intentions and activities.

(2) In addition, BXA will review license applications in accordance with the licensing policy described in paragraph (b) of this section for items not on the Nuclear Referral List that:

(i) Require a license on the CCL for reasons other than "short supply;" and

(ii) Are intended for a nuclear related end-use or end-user.

(3) For the People's Republic of China, the general licensing policy for applications for those items that would make a direct and significant contribution to nuclear weapons and their delivery systems is extended review or denial.

(c) Contract sanctity. Contract sanctity provisions are not available for license applications reviewed under this section.

(d) Nuclear Suppliers Group. Most items on the Nuclear Referral List that require a license under NP Column No. 1 on the Country Chart (see Supplement No. 1 to part 738 of the EAR) are contained in the Annex to the “Guidelines for Transfers of Nuclear-Related Dual-Use Equipment, Material, and Related Technology” (the Annex), as published by the International Atomic Energy Agency in INFCIRC/254/Revision 1/Part 2. The adherents to INFCIRC/254/Revision 1/Part 2, which includes the Nuclear Suppliers Guidelines, have agreed to establish export licensing procedures for the transfer of items identified in the Annex. Items that are listed as requiring a license under NP Column No. 2 on the Country Chart (see Supplement No. 1 to part 738 of the EAR) are not included in the Annex and are controlled only by the United States.

§ 742.4 National security.

(a) License requirements. It is the policy of the United States to restrict the export and reexport of items that would make a significant contribution to the military potential of any other country or combination of countries that would prove detrimental to the national security of the United States. Accordingly, a license is required for exports and reexports to all destinations, except Canada, for all items in ECCNs on the CCL that include NS Column 1 in the Country Chart column of the “License Requirements” section. A license is required to all destinations except Country Group A:1 and cooperating countries (see Supplement No. 1 to part 740) for all items in ECCNs on the CCL that include NS Column 2 in the Country Chart column of the “License Requirements” section. The purpose of the controls is to ensure that these items do not make a contribution to the military potential of countries in Country Group D:1 (see Supplement No. 1 to part 740 of the EAR) that would prove detrimental to the national security of the United States. License Exception GBS is available for the export and reexport of certain national security controlled items to Country Group B (see §740.4 and Supplement No. 1 to part 740 of the EAR).
(b) Licensing policy. (1) The policy for national security controlled items exported or reexported to any country except a country in Country Group D:1 (see Supplement No. 1 to part 740 of the EAR) is to approve applications unless there is a significant risk that the items will be diverted to a country in Country Group D:1.

(2) Except for those countries described in paragraphs (b)(5) through (b)(7) of this section, the general policy for exports and reexports of items to Country Group D:1 (see Supplement No. 1 to part 740 of the EAR) is to approve applications when BXA determines, on a case-by-case basis, that the items are for civilian use or would otherwise not make a significant contribution to the military potential of the country of destination that would prove detrimental to the national security of the United States.

(3) To permit such policy judgments to be made, each application is reviewed in the light of prevailing policies with full consideration of all aspects of the proposed transaction. The review generally includes:

(i) An analysis of the kinds and quantities of items to be shipped;

(ii) Their military or civilian uses;

(iii) The unrestricted availability abroad of the same or comparable items;

(iv) The country of destination;

(v) The ultimate end-users in the country of destination; and

(vi) The intended end-use.

(4) Although each proposed transaction is considered individually, items described in Advisory Notes on the Commerce Control List are more likely to be approved than others.

(5) In recognition of efforts made to adopt safeguard measures for exports and reexports, Bulgaria, Latvia, Kazakhstan, Lithuania, Mongolia, and Russia are accorded enhanced favorable consideration licensing treatment.

(6) The general policy for Cambodia and Laos is to approve license applications when BXA determines, on a case-by-case basis, that the items are for an authorized use in Cambodia or Laos and are not likely to be diverted to another country or use contrary to the national security or foreign policy controls of the United States.

(7) For the People’s Republic of China, the general licensing policy is to approve applications, except that those items that would make a direct and significant contribution to electronic and anti-submarine warfare, intelligence gathering, power projection, and air superiority receive extended review or denial. Each application will be considered individually. Items may be approved even though they may contribute to Chinese military development or the end-user or end-use is military. Note that the Advisory Notes in the CCL headed “Note for the People’s Republic of China” provide guidance on equipment likely to be approved more rapidly for China.

(c) Contract sanctity. Contract sanctity provisions are not available for license applications reviewed under this section.

(d) [Reserved]

§ 742.5 Missile technology.

(a) License requirements. (1) In support of U.S. foreign policy to limit the proliferation of missiles, a license is required to export and reexport items identified in ECCNs on the CCL as MT Column No. 1 in the Country Chart column of the “License Requirements” section. Licenses for these items are required to all destinations, except Canada, as indicated by MT Column 1 of the Country Chart (see Supplement No. 1 to part 738 of the EAR).

(2) The term “missiles” is defined as rocket systems (including ballistic missile systems, space launch vehicles, and sounding rockets) and unmanned air vehicle systems (including cruise missile systems, target drones, and reconnaissance drones) capable of delivering at least 500 kilograms (kg) payload to a range of at least 300 kilometers (km).

(b) Licensing policy. (1) Applications to export and reexport items identified in ECCNs on the CCL as MT Column No. 1 in the Country Chart column of the “License Requirements” section will be considered on a case-by-case basis to determine whether the export or reexport would make a material
contribution to the proliferation of missiles. Applications for exports and reexports of such items contained in Category 7A or described by ECCN 9A101 on the CCL will be considered more favorably if such exports or reexports are determined to be destined to a manned aircraft, satellite, land vehicle, or marine vessel, in quantities appropriate for replacement parts for such applications. When an export or reexport is deemed to make a material contribution to the proliferation of missiles, the license will be denied.

(2) The following factors are among those that will be considered in reviewing individual applications.

(i) The specific nature of the end-use;
(ii) The significance of the export and reexport in terms of its contribution to the design, development, production, or use of missiles;
(iii) The capabilities and objectives of the missile and space programs of the recipient country;
(iv) The nonproliferation credentials of the importing country;
(v) The types of assurances or guarantees against design, development, production, or use of missiles that are given in a particular case; and
(vi) The existence of a preexisting contract.

(3) Controls on other items. BXA will review license applications, in accordance with the licensing policy described in paragraph (b)(1) of this section, for items not described in paragraph (a) of this section that:

(i) Require a validated license for reasons other than short supply; and
(ii) Could be destined for the design, development, production, or use of missiles, or for a facility engaged in such activities.

(c) Contract sanctity. The following contract sanctity dates have been established:

(1) License applications for batch mixers specified in ECCN 1B115.a involving contracts that were entered into prior to January 19, 1990, will be considered on a case-by-case basis.

(2) License applications subject to ECCN 1B115.b or .c that involve a contract entered into prior to March 7, 1991, will be considered on a case-by-case basis.

(3) Applicants who wish that a preexisting contract be considered in reviewing their license applications must submit documentation sufficient to establish the existence of a contract.

(d) Missile Technology Control Regime. Missile Technology Control Regime (MTCR) members are listed in Country Group A:2 (see Supplement No. 1 to part 740 of the EAR). Controls on items identified in paragraph (a) of this section are consistent with the list agreed to in the MTCR and included in the MTCR Annex.

§ 742.6 Regional stability.

(a) License requirements. The following controls are maintained in support of U.S. foreign policy to maintain regional stability:

(1) As indicated in the CCL and in RS Column 1 of the Country Chart (see Supplement No. 1 to part 738 of the EAR), a license is required to all destinations, except Canada, for items described on the CCL under ECCNs 6A002.a.1, a.2, a.3, or .c; 6A003.b.3 and b.4; 6E001 (only technology for development of items in 6A002.a.1, a.2, a.3, and .c, or 6A003.b.3 and b.4); 6E002 (only technology for production of items in 6A002.a.1, a.2, a.3, or .c, or 6A003.b.3 or b.4); 7D001 (only software for development or production of items in 7A001, 7A002, or 7A003); 7E001 (only technology for the development of inertial navigation systems, inertial equipment, and specially designed components therefor for civil aircraft); 7E002 (only technology for the production of inertial navigation systems, inertial equipment, and specially designed components therefor for civil aircraft); 7E101 (only technology for the use of inertial navigation systems, inertial equipment, and specially designed components for civil aircraft)

(2) As indicated in the CCL and in RS Column 2 of the Country Chart (see Supplement No. 1 to part 738 of the EAR), a license is required to any destination except countries in Country Group A:1 (see Supplement No. 1 to part 740 of the EAR), Iceland and New Zealand for military vehicles and certain commodities (specially designed) used to manufacture military equipment, described on the CCL in ECCNs
§ 742.7 Crime control.

(a) License requirements. In support of U.S. foreign policy to promote the observance of human rights throughout the world, a license is required to export and reexport crime control and detection equipment, related technology and software as follows:

(1) Crime control and detection instruments and equipment and related technology and software identified in the appropriate ECCNs on the CCL under CC Column 1 in the Country Chart column of the "License Requirements" section. A license is required to countries listed in CC Column 1 (Supplement No. 1 to Part 738 of the EAR).

(2) Shotguns with a barrel length greater than or equal to 24 inches, identified in ECCN 0A984 on the CCL under CC Column 2 in the Country Chart column of the "License Requirements" section regardless of end-user to countries listed in CC Column 2 (Supplement No. 1 part 738 of the EAR).

(3) Shotguns with a barrel length greater than or equal to 24 inches, identified in ECCN 0A984 on the CCL under CC Column 3 in the Country Chart column of the "License Requirements" section only if for sale or resale to police or law enforcement entities in countries listed in CC Column 3 (Supplement No. 1 part 738 of the EAR).

(b) Licensing policy. Applications for items controlled under this section will generally be considered favorably on a case-by-case basis unless there is evidence that the government of the importing country may have violated internationally recognized human rights and that the judicious use of export controls would be helpful in deterring the development of a consistent pattern of such violations or in distancing the United States from such violations.

(c) Contract sanctity. Contract sanctity provisions are not available for license applications reviewed under this section.

(d) U.S. controls. Although the United States seeks cooperation from like-minded countries in maintaining regional stability controls, at this time these controls are maintained only by the United States.

§ 742.8 Anti-terrorism: Iran.

(a) License requirements. (1) If AT column 1 or AT column 2 of the Country Chart (Supplement No. 1 to Part 738 of the EAR) is indicated in the appropriate ECCN, a license is required for export to Iran for anti-terrorism purposes.

(2) Shotguns with a barrel length greater than or equal to 24 inches, identified in ECCN 0A984 on the CCL under CC Column 2 in the Country Chart column of the "License Requirements" section regardless of end-user to countries listed in CC Column 2 (Supplement No. 1 part 738 of the EAR).
(2) If AT column 1 or AT column 2 of the Commerce Country Chart (Supplement No. 1 to part 738 of the EAR) is indicated in the appropriate ECCN, a license is required for reexport to Iran for anti-terrorism purposes, except for ECCNs 2A994; 3A992.a; 5A991.f; 5A992; 6A993; 6A998; 7A994; 8A992.d, e, f, and g; 9A990.a and b, and 9A991.d and e. In addition, items in these ECCNs are not counted as controlled U.S. content for the purpose of determining license requirements for U.S. parts, components or materials incorporated into foreign made products. However, the export from the United States to any destination with knowledge that they will be reexported directly or indirectly, in whole or in part to Iran is prohibited without a license. See paragraph (a)(5) of this section for controls maintained by the Department of the Treasury.

(3) The Secretary of State has designated Iran as a country whose Government has repeatedly provided support for acts of international terrorism.

(4) In support of U.S. foreign policy on terrorism-supporting countries, BXA maintains two types of anti-terrorism controls. Items described in paragraphs (c)(1) through (c)(5) of Supplement No. 1 to part 742 of the EAR are controlled under section 6(j) of the Export Administration Act, as amended (EAA), if destined to military, police, intelligence or other sensitive end-users.

(i) Items described in paragraphs (c)(1) through (c)(5) of Supplement No. 2 to part 742 are controlled under section 6(j) of the Export Administration Act, as amended (EAA), if destined to military, police, intelligence or other sensitive end-users.

(ii) Items described in paragraphs (c)(1) through (c)(5) of Supplement No. 2 to part 742 destined to non-sensitive end-users, as well as items described in paragraphs (c)(6) through (c)(41) to all end-users, are controlled to Iran under section 6(a) of the EAA. (See Supplement No. 2 to part 742 for more information on items controlled under sections 6(a) and 6(j) of the EAA and § 750.6 of the EAR for procedures for processing license applications for items controlled under EAA section 6(j).)

(5) Exports and certain reexports to Iran are subject to a comprehensive embargo administered by the Department of the Treasury's Office of Foreign Assets Control (OFAC). If you wish to export or reexport to Iran, the Government of Iran or any entity owned or controlled by that Government, you should review part 746 of the EAR and consult with OFAC. Please note that authorization from OFAC constitutes authorization under the EAR and no separate license or authorization from BXA is required.

(b) Licensing policy.

(1) The Iran-Iraq Arms Non-Proliferation Act of October 23, 1992, requires BXA to deny licenses for items controlled to Iran for national security (section 5 of the 1979 EAA) or foreign policy reasons (section 6 of the 1979 EAA), absent contract sanctity or a Presidential waiver. License applications for which contract sanctity is established may be considered under policies in effect prior to the enactment of that Act. Otherwise, licenses for such items are subject to a general policy of denial.

(2) License applications for items controlled under section 6(a) of the EAA will also be reviewed to determine whether requirements of section 6(j) apply. Whenever the Secretary of State determines that an export or reexport could make a significant contribution to the military potential of Iran, including its military logistics capability, or could enhance Iran’s ability to support acts of international terrorism, the Secretaries of State and Commerce will notify the Congress 30 days prior to the issuance of a license.

(c) Contract sanctity. Contract sanctity dates and related policies for Iran are listed in Supplement No. 2 to part 742. Applicants who wish a pre-existing contract to be considered must submit sufficient evidence to establish the existence of a contract.

(d) U.S. controls. Although the United States seeks cooperation from like-minded countries in maintaining anti-terrorism controls, at this time these controls are maintained only by the United States.
§ 742.9 Anti-terrorism: Syria.

(a) License requirements. (1) If AT Column 1 of the Country Chart (Supplement No. 1 to part 738 of the EAR) is indicated in the appropriate ECCN, a license is required for export and reexport to Syria for anti-terrorism purposes.

(2) The Secretary of State has designated Syria as a country whose government has repeatedly provided support for acts of international terrorism.

(3) In support of U.S. foreign policy against terrorism, BXA maintains two types of anti-terrorism controls on the export and reexport to Syria of items described in Supplement No. 2 to part 742.

(i) Items described in paragraphs (c)(1) through (c)(5) of Supplement No. 2 to part 742, if destined to military, police, intelligence or other end-users in Syria, are controlled under section 6(j) of the Export Administration Act, as amended (EAA).

(ii) Items listed in paragraphs (c)(1) through (c)(5) of Supplement No. 2 to part 742 destined to other end-users in Syria, as well as items to all end-users listed in (c)(6) through (c)(8), (c)(10) through (c)(14), (c)(16) through (c)(19), and (c)(22) through (c)(41) of Supplement No. 2 to part 742, are controlled to Syria under section 6(a) of the EAA.

(b) Licensing policy. (1) Applications for export and reexport to all end-users in Syria of the following items will generally be denied:

(i) Items that are controlled for chemical and biological weapons proliferation reasons to any destination. These are items that contain CB Column 1 or CB Column 2 in the Country Chart column of the “License Requirements” section of an ECCN on the CCL.

(ii) Items that are controlled for chemical and biological weapons proliferation reasons to any destination. These are items that contain NS Column 1 in the Country Chart column of the “License Requirements” section of an ECCN on the CCL.

(iii) All aircraft (powered and unpowered), helicopters, engines, and related spare parts and components, except that parts and components intended to ensure the safety of civil aviation and the safe operation of commercial passenger aircraft will be reviewed on a case-by-case basis, with a presumption of approval. These are items controlled to any destination for national security and missile technology reasons and items controlled to Syria for anti-terrorism purposes. Such items contain an NS Column 1, NS Column 2, MT Column 1, or AT Column 1 in the Country Chart column of the “License Requirements” section of an ECCN on the CCL.

(iv) All aircraft-related items that require a license to Syria will be included as controlled U.S. content, except for ECCNs 6A998, 7A994, and 9A991.d, for purposes of such licensing requirements.

(v) Cryptographic, cryptoanalytic, and cryptologic items controlled to any destination for national security reasons. Such items contain an AT Column 1 and an NS Column 1 or NS Column 2 in the Country Chart column of the “License Requirements” section of an ECCN on the CCL.

(vi) Explosive device detectors controlled under ECCN 2A993.

(vii) Commercial charges and devices controlled under ECCN 1C992.

(2) Applications for export and reexport to Syria of all other items described in paragraph (a) of this section, and not described by paragraph (b)(1) of this section, will generally be denied if the export or reexport is destined to a military end-user or for military end-use. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(3) Notwithstanding the provisions of paragraphs (b)(1) and (b)(2) of this section, applications for Syria will be considered on a case-by-case basis if:

(i) The transaction involves the reexport to Syria of items where Syria was not the intended ultimate destination at the time of original export from the
§ 742.10 Anti-terrorism: Sudan.

(a) License requirements. (1) If AT column 1 or AT column 2 of the Country Chart (Supplement No. 1 to part 738 of the EAR) is indicated in the appropriate ECCN, a license is required for export to Sudan for anti-terrorism purposes.

(2) If AT column 1 or AT column 2 of the Commerce Country Chart (Supplement No. 1 to part 738 of the EAR) is indicated in the appropriate ECCN, a license is required for reexport to Sudan for anti-terrorism purposes, except for ECCNs 2A994; 3A992.a; 5A991.f; 5A992; 6A991; 6A998; 7A994; 8A992.d,.e,.f, and .g; 9A990.a and .b; and 9A993.d and.e. In addition, items in these ECCNs are not counted as controlled U.S. content for the purpose of determining license requirements for U.S. parts, components or materials incorporated into foreign made products. However, the export from the United States to any destination with knowledge that they will be reexported directly or indirectly, in whole or in part to Sudan is prohibited without a license.

(i) Items described in paragraph (c)(1) through (c)(5) of Supplement No. 2 to part 742 if destined to military, police, intelligence or other sensitive end-users in Sudan are controlled under section 6(j) of the Export Administration Act, as amended (EAA).

(ii) Items listed in paragraphs (c)(1) through (c)(5) of Supplement No. 2 to part 742 if destined to military, police, intelligence or other sensitive end-users in Sudan are controlled under section 6(j) of the Export Administration Act, as amended (EAA).

(iii) Items listed in paragraphs (c)(1) through (c)(5) of Supplement No. 2 to part 742 if destined to other end-users in Sudan, as well as items to all end-users listed in (c)(6) through (c)(14) and (c)(16) through (c)(41) of Supplement No. 2 to part 742 are controlled to Sudan under section 6(a) of the EAA.

Licensing policy. (1) Applications for export and reexport to all end-users in Sudan of the following items will generally be denied:
§ 742.10

(i) Items that are controlled for chemical and biological weapons proliferation reasons to any destination. These are items that contain CB Column 1, CB Column 2, or CB Column 3 in the Country Chart column of the “License Requirements” section of an ECCN on the CCL.

(ii) Military-related items controlled for national security reasons to any destination. These are items that contain NS Column 1 in the Country Chart column of the “License Requirements” section of an ECCN on the CCL and is controlled by equipment or material entries ending in the number “18.”

(iii) Items that are controlled for missile proliferation reasons to any destination. These are items that contain a MT Column 1 in the Country Chart column of the “License Requirements” section of an ECCN on the CCL.

(iv) All aircraft (powered and unpowered), helicopters, engines, and related spare parts and components. These are items controlled to any destination for national security reasons and items controlled to Sudan for anti-terrorism reasons. Such items contain an NS Column 1, NS Column 2, or AT Column 1 in the Country Chart column of an ECCN on the CCL. Note that, consistent with the general rule that applies to computing U.S. parts and components content incorporated in foreign made products, all aircraft-related items that require a license to Sudan will be included as controlled US content for purposes of such license requirements.

(v) Cryptographic, cryptoanalytic, and cryptologic items controlled to any destination. These are items that contain an NS Column 1, NS Column 2, AT Column 1 or AT Column 2 in the Country Chart column of the “License Requirements” section of an ECCN on the CCL.

(vi) Explosive device detectors controlled under ECCN 2A993.

(vii) Commercial charges and devices controlled under ECCN 1C992.

(2) Applications for the export and reexport of all other items described in paragraph (a) of this section, and not described in paragraph (b)(1) of this section, will be denied if the export or reexport is destined to a military end-user or for military end-use. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(3) Notwithstanding the provisions of paragraphs (b)(1) and (b)(2) of this section, applications for Sudan will be considered on a case-by-case basis if:

(i) The transaction involves the reexport to Sudan of items where Sudan was not the intended ultimate destination at the time of original export from the United States, provided that the exports from the U.S. occurred prior to the applicable contract sanctity date.

(ii) The U.S. content of foreign-produced commodities is 20% or less by value; or

(iii) The commodities are medical items.

NOTE TO PARAGRAPH (B) OF THIS SECTION: Applicants who wish any of the factors described in paragraph (b)(4) of this section to be considered in reviewing their license applications must submit adequate documentation demonstrating the value of the U.S. content, the specifications and medical use of the equipment, or the date of export from the United States.

(4) License applications for items reviewed under 6(a) controls will also be reviewed to determine the applicability of 6(j) controls to the transaction. When it is determined that an export or reexport could make a significant contribution to the military potential of Sudan, including its military logistics capability, or could enhance Sudan’s ability to support acts of international terrorism, the appropriate committees of the Congress will be notified 30 days before issuance of a license to export or reexport such items.

(c) Contract sanctity.

Contract sanctity dates and related licensing information for Sudan are set forth in Supplement No. 2 to part 742. Applicants who wish a pre-existing contract to be considered must submit sufficient documentation to establish the existence of a contract.

(d) U.S. controls. Although the United States seeks cooperation from like-minded countries in maintaining anti-terrorism controls, at this time these controls are maintained only by the United States.

§ 742.11 Specially designed implements of torture.

(a) License requirements. In support of U.S. foreign policy to promote the observance of human rights throughout the world, a license is required to export specially designed implements of torture controlled by OA983 to all destinations, including Canada.

(b) Licensing policy. Applications for such licenses will generally be denied to all destinations.

(c) Contract sanctity. The contract sanctity date is November 9, 1995. Contract sanctity will be a factor in considering only applications for export to the NATO countries, Japan, Australia, and New Zealand.

(d) U.S. controls. Although the United States seeks cooperation from like-minded countries in maintaining controls on implements of torture, at this time these controls are maintained only by the United States.

§ 742.12 High performance computers.

(a) License and recordkeeping requirements. This section contains special provisions for exports, reexports, and certain intra-country transfers of high performance computers, including software, and technology. This section affects the following ECCNs: 4A001L, 4A002, 4A003, 4D001, 4D002, and 4E001L. Licenses are required under this section for computers with a Composite Theoretical Performance (CTP) greater than 2000, stated in Million Theoretical Operations Per Second (MTOPS). Licenses are required under this section for ECCN's having an "XP" under "Reason for Control" when License Exception CTP is not available (see §740.7 of the EAR). License requirements reflected in this section are based on particular destinations, end-users, or end-uses. For the calculation of CTP, see the Technical Note that follows the Advisory Notes for Category 4 in the Commerce Control List. Note that License Exception CTP contains restrictions on access by nationals of certain countries, and on reexports and transfers of computers.

(b) Licensing policy. Licensing policies described in this section vary according to the country of destination, and the end-use or end-user involved in the transaction. Note that in addition, license applications for items covered by §742.12 will also be reviewed under the nuclear nonproliferation licensing policy in §742.3(b). In certain cases, licenses may be subject to safeguard conditions. The specific conditions that may be imposed by BXA will depend on the country of destination, and the end-use or end-user of the export. BXA may also require end-use certification which, in appropriate cases, is certified by the government of the importing country. The range of possible safeguard conditions and related information are provided in Supplement No. 3 to part 742.

(1) Computer Tier 1—(i) License requirement. No license is required under this §742.12 for exports or reexports of computers to and among countries listed in Computer Tier 1, for consumption in such countries or other disposition in accordance with the EAR.

(ii) Licensing policy. A license is not required under this §742.12.

(2) Computer Tier 2—(i) License requirement. A license is required to export or

specified in this section and on the CCL. These license requirements supplement requirements that apply for other control reasons, such as nuclear nonproliferation provided in §742.3 of the EAR. The license requirements described in this §742.12 are not reflected on the Country Chart (Supplement No. 1 to part 738 of the EAR). Four Computer Country Tiers have been established for the purposes of these controls. Countries included in Computer Tiers 1, 2, and 3 are listed in License Exception CTP in §740.7 of the EAR. Computer Tier 4 consists of Cuba, Iran, Iraq, Libya, North Korea, Sudan, and Syria.

(3) Exporters must keep accurate records of each export to countries not included in Country Group A:1 (see Supplement No. 1 to part 740 of the EAR) of a computer with a CTP greater than 4,000 MTOPS. These records must be submitted semiannually to BXA and must contain the information as described in §743.1 of the EAR.
reexport a computer having a Composite Theoretical Performance (CTP) greater than 20,000 Millions of Theoretical Operations Per Second (MTOPS) to a country in Computer Tier 2.

(ii) Licensing policy. License applications for a country in Computer Tier 2 will generally be approved.

(3) Computer Tier 3—(i) License requirement. (A) A license is required to export or reexport computers with a CTP greater than 2,000 MTOPS to countries in Computer Tier 3 to nuclear, chemical, biological, or missile end-users and end-uses and military end-users and end-uses subject to license requirements under §§ 744.2, 744.3, 744.4, 744.5, and § 744.12 of the EAR in Computer Tier 3 countries.

(B) A license is required to export or reexport computers with a CTP greater than 12,300 MTOPS for civilian end-users and end-uses in countries in Computer Tier 3. Prior to January 23, 2000, a license is required to export or reexport computers having a CTP greater than 2,000 MTOPS to military end-users and end-uses in Computer Tier 3. Beginning on January 23, 2000, a license is required to export or reexport computers having a CTP greater than 6,500 MTOPS to military end-users and end-uses in Computer Tier 3.

(C) Prior to January 23, 2000, a license may be required to export or reexport computers with a CTP greater than 2,000 MTOPS to countries in Computer Tier 3 pursuant to the NDAA (see § 740.7(d)(5) of the EAR). Beginning on January 23, 2000, a license may be required to export or reexport computers with a CTP greater than 6,500 MTOPS to countries in Computer Tier 3 pursuant to the NDAA (see §740.7(d)(5) of the EAR).

(ii) Licensing policy. License applications for exports and reexports to nuclear, chemical, biological, or missile end-users and end-uses and military end-users and end-uses subject to license requirements under §§ 744.2, 744.3, 744.4, 744.5, and § 744.12 of the EAR in countries in Computer Tier 3 will be reviewed on a case-by-case basis using the following criteria:

(A) The presence and activities of countries and end-users of national security and proliferation concern and the relationships that exist between the government of the importing country and such countries and end-users;

(B) The ultimate consignee's participation in, or support of, any of the following:

(1) Activities that involve national security concerns; or

(2) Nuclear, chemical, biological or missile proliferation activities described in part 744 of the EAR;

(C) The extent to which the importing country is involved in nuclear, chemical, biological, or missile proliferation activities described in part 744 of the EAR;

(D) The end-user, whether the end-use is single-purpose or multiple-purpose.

(iii) Licensing policy for other end-users and end-uses. License applications for exports and reexports to other end-uses and end-users located in Computer Tier 3 countries will generally be approved, except there is a presumption of denial for all applications for exports and reexports of computers having a CTP greater than 2,000 MTOPS destined to Indian and Pakistani entities determined to be involved in nuclear, missile, or military activities included in Supplement No. 4 to part 744 (Entity List). All license applications for exports and reexports to India and Pakistan not meeting these criteria for presumption of denial will be considered on a case-by-case basis under other licensing policies set forth in the EAR applicable to such computers.

(iv) Post-shipment verification. This section outlines special post-shipment reporting requirements for exporters of computers with a CTP in excess of 2,000 MTOPS to destinations in Computer Tier 3 under the NDAA. These reporting requirements also apply when you know that the items being exported will be used to enhance beyond 2,000 MTOPS the CTP of a previously exported or reexported computer. Such reports must be submitted in accordance with the provisions of this paragraph (b)(3)(iv), and records of such exports subject to the post-shipment reporting requirements of this section, must be kept in accordance with part 762 of the EAR.

(A) Information that must be included in each post-shipment report. No later
§ 742.13 Communications intercepting devices.

(a) License requirement. (1) As set forth in ECCN 5A980, a license is required for the export or reexport to any destination, including Canada, of any electronic, mechanical, or other device primarily useful for surreptitious interception of wire or oral communications. This control implements a provision of the Omnibus Crime Control and Safe Streets Act of 1968 (Public Law 90-361). This license requirement is not reflected on the Country Chart (Supplement No. 1 to part 738 of the EAR).

(2) Communications intercepting devices are electronic, mechanical, or other devices that can be used for interception of wire or oral communications if their design renders them primarily useful for surreptitious listening even though they may also have innocent uses. A device is not restricted merely because it is small or may be adapted to wiretapping or eavesdropping. Some examples of devices to which these restrictions apply are: the martini olive transmitter; the infinity transmitter; the spike mike; and the disguised microphone appearing as a wristwatch, cufflink, or cigarette pack; etc. The restrictions do not apply to devices such as the parabolic microphone or other directional microphones ordinarily used by broadcasters at sports events, since these devices are not primarily useful for surreptitious listening.

(b) Licensing policy. (1) License applications will generally be approved for:

(i) A provider of wire or electronic communication services or an officer, agent, or employee of, or person under contract with, such a provider in the United States and Japan partici-
§ 742.14 Significant items: hot section technology for the development, production or overhaul of commercial aircraft engines, components, and systems.

(a) License requirement. Licenses are required for all destinations, except Canada, for ECCNs having an “SI” under the “Reason for Control” paragraph. These items include hot section technology for the development, production or overhaul of commercial aircraft engines controlled under ECCN 9E003.a.1. through a.12., .f, and related controls.

(b) Licensing policy. Pursuant to section 6 of the Export Administration Act of 1979, as amended, foreign policy controls apply to technology required for the development, production or overhaul of commercial aircraft engines controlled under ECCN 9E003.a.1. through a.12., .f, and related controls. These controls supplement the national security controls that apply to these items. Applications for export and reexport to all destinations will be reviewed on a case-by-case basis to determine whether the export or reexport is consistent with U.S. national security and foreign policy interests. The following factors are among those that will be considered to determine what action will be taken on license applications:

1. The country of destination;
2. The ultimate end-user(s);
3. The country of reexport;
4. The specific nature of the end-use(s); and
5. The types of assurance against unauthorized use or diversion that are given in a particular case.

(c) Contract sanctity. Contract sanctity provisions are not available for license applications reviewed under this § 742.14.

(d) [Reserved]

§ 742.15 Encryption items.

Encryption items can be used to maintain the secrecy of information, and thereby may be used by persons abroad to harm national security, foreign policy and law enforcement interests. As the President indicated in E.O. 13026 and in his Memorandum of November 15, 1996, export of encryption software, like export of encryption hardware, is controlled because of this functional capacity to encrypt information on a computer system, and not because of any informational or theoretical value that such software may reflect, contain, or represent, or that its export may convey to others abroad. For this reason, export controls on encryption software are distinguished from controls on other software regulated under the EAR.

(a) Licenses are required for exports and reexports to all destinations, except Canada, for items controlled under ECCNs having an “EI” (for “encryption items”) under the “Control(s)” paragraph. Such items include: encryption commodities controlled under ECCN 5A002; encryption software controlled under ECCN 5D002; and encryption technology controlled under ECCN 5E002. (Refer to part 772 of the EAR for the definition of “encryption items”). For encryption items previously on the U.S. Munitions List and currently authorized for export or reexport under a State Department license, distribution arrangement or any other authority of the State Department, U.S. persons holding valid USML licenses and other approvals issued by the Department of State prior to December 30, 1996 may ship remaining balances authorized by such licenses or approvals under the authority of the EAR by filing Shippers Export Declarations (SEDs) with District Directors of Customs, citing...
the provisions of this section effective on December 30, 1996 and the State Department license number. Such shipments shall be in accordance with the terms and conditions, including the expiration date, existing at the time of issuance of the State license. Violations of such authorizations, terms and conditions constitute violations of the EAR. Any reports required for distribution and other types of agreements previously authorized by the Department of State, valid prior to December 30, 1996, should be henceforth submitted to BXA at the following address: Office of Strategic Trade and Foreign Policy Controls, Bureau of Export Administration, Department of Commerce, 14th Street and Pennsylvania Ave., N.W., Room 2705, Washington, D.C. 20230.

(b) Licensing policy. The following licensing policies apply to items identified in paragraph (a) of this section. This section refers you to Supplement No. 4 to this part 742. For purposes of these supplements, “products” refers to commodities and software. Except as otherwise noted, applications will be reviewed on a case-by-case basis by BXA, in conjunction with other agencies, to determine whether the export or reexport is consistent with U.S. national security and foreign policy interests.

(1) Certain mass-market encryption commodities and software.

(i) Consistent with E.O. 13026 of November 15, 1996 (61 FR 58767), certain encryption software that was transferred from the U.S. Munitions List to the Commerce Control List pursuant to the Presidential Memorandum of November 15, 1996, may be released from EI controls and thereby made eligible for mass market treatment after a technical review. Further, certain encryption commodities may be released from EI controls and thereby made eligible for mass market treatment after a technical review. To determine eligibility for mass market treatment, exporters must submit a classification request to BXA. 56-bit mass market encryption commodities and software using RC2, RC4, RC5, DES or CAST, and key exchange mechanisms including, but not limited to, symmetric algorithms with the same or double the key length authorized for the confidentiality algorithm, asymmetric algorithms with key space of 512, 768 or up to and including 1024 bits, proprietary key exchange mechanisms, or others, may be eligible for a 7-day review process, and company proprietary commodities and software implementations may be eligible for 15-day processing. Refer to Supplement No. 6 to part 742 and §748.3(b)(3) of the EAR for additional information. Note that the technical review is for a determination to release encryption commodities and software in object code only unless otherwise specifically requested. Exporters requesting release of the source code should refer to paragraph (b)(3)(v)(E) of Supplement No. 6 to part 742.

(ii) If, after a one-time technical review, BXA determines that the software is released from EI controls, such software is eligible for all provisions of the EAR applicable to other software, such as License Exception TSU for mass-market software. Furthermore, for such software released from EI controls, subsequent bundling, updates, or releases consisting of or incorporating this software may be exported and reexported without a separate one-time technical review, so long as the functional encryption capacity (e.g., algorithm, key modulus) of the originally reviewed mass-market encryption software has not been modified or enhanced. However, if BXA determines that the software is not released from EI controls, a license is required for export and reexport to all destinations, except Canada, and license applications will be considered on a case-by-case basis.

(iii) If after a technical review, BXA determines that the encryption commodity is released from EI controls, the commodity is eligible for export under License Exception ENC and all provisions of the EAR applicable to other commodities. However, if BXA determines that the commodity is not released from EI controls, and no License Exception applies, a license is required for export and reexport to all destinations, except Canada, and license applications will be considered on a case-by-case basis.

(iv) Mass-market encryption software that has already been classified after a
technical review and that has been released from EI controls under the provisions of this paragraph (b)(1) will be permitted for export and reexport under license exception TSU with increases of 56-bits for the confidentiality algorithm, the same or double the key length authorized for the confidentiality algorithm for symmetric algorithms for key exchange mechanisms and with key spaces of 512, 768 or up to and including 1024 bits for asymmetric algorithms for key exchange without an additional technical review, provided that there is no other change in the cryptographic functionality. Exporters must notify BXA in writing of the increase in the key length for the confidentiality algorithm, the asymmetric or symmetric key exchange algorithms, and include the original authorization number issued by BXA and the information identified in paragraphs (a)(2)(iii) through (v) of Supplement No. 6 to part 742 of the EAR (if this information was submitted previously, then only identify the modifications). BXA must receive such notification by March 31, 1999.

(A) The notification should be sent to:

Office of Strategic Trade and Foreign Policy Controls, Bureau of Export Administration, Department of Commerce, 14th Street and Pennsylvania Ave., N.W., Room 2705, Washington, D.C. 20230, Attn: Encryption Upgrade

(B) A copy of the certification should be sent to:

Attn: ENC Encryption Request Coordinator, P.O. Box 246, Annapolis Junction, MD 20701-0246

(2) Key escrow and key recovery encryption commodities and software. Certain recovery encryption commodities and software of any key length that are classified under ECCNs 5A002 and 5D002 after a technical review are eligible for export and reexport under License Exception KMI. See §740.8(b)(1) of the EAR for information on additional eligibility requirements.

(3) General purpose encryption commodities and software of any key length for use by banks and financial institutions.

(i) Commodities and software that were eligible for License Exception TSU or KMI or have been licensed for export or reexport under an Encryption Licensing Arrangement or a license prior to December 31, 1998, are now eligible for export and reexport under License Exception ENC under the provisions of §740.17(b)(1) of the EAR.

(ii) For exports and reexports not eligible under a License Exception, exports and reexports of general purpose non-voice encryption commodities and software classified under ECCNs 5A002 and 5D002 of any key length will generally be approved under an Encryption Licensing Arrangement for use by banks and financial institutions (as defined in part 772 of the EAR) in all destinations except Cuba, Iran, Iraq, Libya, North Korea, Sudan and Syria. Applications for such commodities and software will receive favorable consideration when the end-use is limited to secure business financial communications or transactions and financial communications/transactions between the bank and/or financial institution and its customers provided that there are no concerns about the country or end-user. No customer to customer communications or transactions are allowed.

(iii) Note that any country or end-user prohibited in the past from receiving encryption commodities and software under a specific Encryption Licensing Arrangement will be reviewed on a case-by-case basis, and may be considered by BXA for eligibility under future Encryption Licensing Arrangement requests.

(iv) Note that distributors, resellers or other entities who are not manufacturers of the encryption commodities and software are permitted to use an existing Encryption Licensing Arrangement for exports and reexports of these products only when Encryption Licensing Arrangement has been granted to the manufacturer and the export and reexport meets the terms and conditions of this paragraph (b)(3).

(v) There are no reporting requirements for exports to banks and financial institutions.

(4) Financial-specific encryption items of any key length. After a one-time technical review via a classification request, financial-specific encryption
(5) Encryption commodities and software of any key length for use by health and medical end-users. (i) Commodities and software that have been classified after a technical review through a classification request or have been licensed for export under an Encryption Licensing Arrangement or a license are eligible for export and reexport under License Exception ENC to health and medical end-users without an additional technical review, provided that the export or reexport meets all the terms and conditions of that License Exception. See §740.17 of the EAR. Commodities and software that were eligible for export to on-line merchants under an Encryption Licensing Arrangement prior to December 31, 1998, are now eligible for export and reexport under License Exception ENC under the provisions of §740.17(b)(2) of the EAR.

(ii) For exports and reexports that are not eligible under License Exception ENC, exports and reexports of encryption commodities and software classified under ECCNs 5A002 and 5D002 of any key length will generally be approved under an Encryption Licensing Arrangement for use by health and medical end-users (as defined in part 772 of the EAR) in all destinations except Cuba, Iran, Iraq, Libya, North Korea, Sudan and Syria except for non-U.S. biochemical and pharmaceutical manufacturers and non-U.S. military health and medical entities. No customer to customer communications or transactions are allowed.

(iii) Applications for Encryption Licensing Arrangements for on-line merchants will generally be approved, except for foreign on-line merchants or their separate business units (as defined in part 772 of the EAR) who are engaged in the manufacturing and distribution of items or services controlled on the U.S. Munitions List. Such end-users will be considered on a case-by-case basis.

(iv) Note that distributors, resellers or other entities who are not manufacturers of the encryption commodities and software are permitted to use an existing Encryption Licensing Arrangement for exports and reexports of these products only when Encryption Licensing Arrangement has been granted to the manufacturer and the export and reexport meets the terms and conditions of this paragraph (b)(5).

(v) You must submit to BXA the name and address of the end-user.

(6) Encryption commodities and software of any key length for on-line merchants. (i) Commodities and software that were eligible for export to on-line merchants under an Encryption Licensing Arrangement prior to December 31, 1998, are now eligible for export and reexport under License Exception ENC under the provisions of §740.17(b)(3).

(ii) Exports and reexports of encryption commodities and software classified under ECCNs 5A002 and 5D002 of any key length which are limited to client-server applications (e.g., Secure Socket Layer (SSL) based applications) or applications specially designed for on-line transactions for the purchase or sale of goods and software will be permitted under an Export Licensing Arrangement in all destinations except Cuba, Iran, Iraq, Libya, North Korea, Sudan and Syria for use by foreign on-line merchants as defined in part 772 of the EAR. End-use is limited to: the purchase or sale of goods and software; and services connected with the purchase or sale of goods and software, including interactions between purchasers and sellers necessary for ordering, payment and delivery of goods and software. No other end-uses or customer to customer communications or transactions are allowed.

(iii) Applications for Encryption Licensing Arrangements for on-line merchants will generally be approved, except for foreign on-line merchants or their separate business units (as defined in part 772 of the EAR) who are engaged in the manufacturing and distribution of items or services controlled on the U.S. Munitions List. Such end-users will be considered on a case-by-case basis.

(iv) Note that distributors, resellers or other entities who are not manufacturers of the encryption commodities and software are permitted to use an existing Encryption Licensing Arrangement for exports and reexports of these products only when Encryption Licensing Arrangement has been granted to the manufacturer and the export and reexport meets the terms and conditions of this paragraph (b)(5).

(v) You must submit to BXA the name and address of the end-user.
(iv) Note that any country or end-user prohibited in the past from receiving encryption commodities and software under a specific Encryption Licensing Arrangement will be reviewed on a case-by-case basis, and may be considered by BXA for eligibility under future Encryption Licensing Arrangement requests.

(v) Note that distributors, resellers or other entities who are not manufacturers of the encryption commodities and software are permitted to use an existing Encryption Licensing Arrangement for exports and reexports of these products only when Encryption Licensing Arrangement has been granted to the manufacturer and the export and reexport meets the terms and conditions of this paragraph (b)(6).

(vi) You must submit to BXA the name and address of the end-user.

(7) Recoverable encryption commodities and software of any key length for use by commercial entities. (i) Exports and reexports of recoverable encryption commodities and software (as defined in part 772 of the EAR) classified under ECCNs 5A002 and 5D002 of any key length will generally be approved under an Encryption Licensing Arrangement to destinations designated with a "*" or "**" in Supplement No. 3 to part 740 of the EAR to foreign commercial entities for internal company proprietary use. Such encryption commodities and software will generally be approved for export and reexport to foreign subsidiaries of commercial firms headquartered in countries designated with a "***" in Supplement No. 3 to part 740 of the EAR that are located in any destination except Cuba, Iran, Iraq, Libya, North Korea, Sudan and Syria. Exports and reexports to telecommunication and internet service providers is permitted under this policy for internal company proprietary use. Use by service providers to provide service to customers is excluded from this policy, but exports may be possible under a license or an Encryption Licensing Arrangement on a case-by-case basis. This policy of approval excludes those foreign commercial firms or their separate business units (as defined in part 772 of the EAR) engaged in the manufacturing and distribution of items or services controlled by the U.S. Munitions List.

(ii) Note that any country or end-user prohibited in the past from receiving encryption commodities and software under a specific Encryption Licensing Arrangement will be reviewed on a case-by-case basis, and may be considered by BXA for eligibility under future Encryption Licensing Arrangement requests.

(iii) Note that distributors, resellers or other entities who are not manufacturers of the encryption commodities and software are permitted to use an existing Encryption Licensing Arrangement for exports and reexports of these products only when Encryption Licensing Arrangement has been granted to the manufacturer and the export and reexport meets the terms and conditions of this paragraph (b)(7).

(iv) You must submit to BXA the name and address of the end-user.

(8) All other encryption items. (i) Encryption licensing arrangement. Applicants may submit license applications for exports and reexports of certain encryption commodities and software in unlimited quantities for all destinations except Cuba, Iran, Iraq, Libya, North Korea, Syria, and Sudan. Applications will be reviewed on a case-by-case basis. If approved, encryption licensing arrangements may be valid for extended periods as requested by the applicant in block #24 on Form BXA-748P. In addition, the applicant must specify the sales territory and class(es) of end-user(s). Such licenses may require the license holder to report to BXA certain information such as ECCN, item description, quantity, and end-user name and address.

(ii) Applications for encryption items not authorized under an encryption licensing arrangement. Applications for the export and reexport of all other encryption items will be considered on a case-by-case basis.

(iii) Exports and reexports of encryption commodities and software of any key length to "strategic partners" of U.S. companies will receive favorable consideration when the end-use is for the protection of U.S. company proprietary information.

(9) Applications for encryption technology. Applications for the export and
reexport of encryption technology will be considered on a case-by-case basis.

(c) Contract sanctity. Contract sanctity provisions are not available for license applications reviewed under this section.

(d) [Reserved]

§ 742.16 India and Pakistan Sanctions.

In accordance with section 102(b) of the Arms Export Control Act, President Clinton reported to the Congress on May 13th with regard to India and May 30th with regard to Pakistan his determinations that those non-nuclear weapon states had each detonated a nuclear explosive device. The President directed that the relevant agencies and instrumentalities of the United States take the necessary actions to impose the sanctions described in section 102(b)(2) of that Act. Consistent with the provisions of section 102(b)(2)(G) of the Arms Export Control Act, the following sanctions measures are imposed against India and Pakistan.

(a) License requirement. A license is required for all exports and reexports of items controlled for nuclear non-proliferation (NP) reasons to all end-users in India and Pakistan. In addition, a license is required for all exports and reexports of items controlled for missile technology (MT) reasons to all end-users in India and Pakistan, except items listed in §740.2(a)(5) of the EAR, which remain eligible for applicable License Exceptions when intended to ensure the safety of civil aviation and safe operation of commercial passenger aircraft.

(b) Licensing policy.

(1) Nuclear Nonproliferation. There is a policy of denial for all applications to export and reexport items controlled for nuclear non-proliferation (NP) reasons to all end-users in India and Pakistan, except high performance computers (see §742.12(b)(3)(ii) of this part for licensing policy regarding high performance computers).

(2) Missile Technology. There is a policy of denial for all applications to export and reexport items controlled for missile technology (MT) reasons to all end-users in India and Pakistan, except items intended to ensure the safety of civil aviation and safe operation of commercial passenger aircraft, which will be reviewed on a case-by-case basis.

[63 FR 64324, Nov. 19, 1998]

§ 742.17 Exports of firearms to OAS member countries.

(a) License requirements. BXA maintains a licensing system for the export of shotguns and related items to all OAS member countries. This action is based on the Organization of American States (OAS) Model Regulations for the Control of the International Movement of Firearms, their Parts and Components and Munitions (OAS Model Regulations) which were developed to assist OAS member countries to implement the Inter-American Convention Against the Illicit Manufacturing of and Trafficking in Firearms, Ammunition, Explosives, and Other Related Materials (Firearms Convention). Items subject to these controls are identified by “FC Column 1” in the “License Requirements” section of their Export Control Classification Number (ECCN) on the Commerce Control List (CCL). If “FC Column 1” of the Commerce Country Chart (Supplement No. 1 to part 738 of the EAR) is indicated for a particular country, a license is required for export to that destination. Licenses will generally be issued on an Import Certificate or equivalent official document, satisfactory to BXA, issued by the government of the importing country is also required for the export of such items to OAS member countries.

(b) Licensing policy. Applications supported by an Import Certificate or equivalent official document issued by the government of the importing country for such items will generally be approved, except there is a policy of denial for applications to export items linked to such activities as drug trafficking, terrorism, and transnational organized crime.

(c) Contract sanctity. Contract sanctity provisions are not available for license applications under this §742.17.

1Status of Convention as of April 13, 1999 had not entered into force.
§ 742.18 Chemical Weapons Convention (CWC or Convention).

States that are party to the Convention on the Prohibition of the Development, Production, Stockpiling, and Use of Chemical Weapons and on Their Destruction, also known as the Chemical Weapons Convention (CWC or Convention), undertake never to develop, produce, acquire, stockpile, transfer, or use chemical weapons. As a State Party to the Convention, the United States is subjecting certain toxic chemicals and their precursors listed in Schedules within the Convention to trade restrictions. Trade restrictions include a provision on the export of Schedule 1 chemicals to non-States Parties, license requirements for the export of Schedule 1 chemicals to all States Parties, End-Use Certificate requirements for exports of Schedule 2 and Schedule 3 chemicals to non-States Parties, and a prohibition on the export of Schedule 2 chemicals to non-States Parties on or after April 29, 2000.

(a) License requirements. (1) Schedule 1 chemicals identified in ECCNs 1C350 and 1C351. A license is required for CW reasons for exports and reexports of Schedule 1 chemicals identified under ECCN 1C350.a.20, a.24, and a.31 and ECCN 1C351.d.5 and d.6 to all destinations including Canada. Also see the advance notification procedures and annual reporting requirements described in § 745.1 of the EAR.

(2) Schedule 2 and Schedule 3 chemicals. (i) ECCN 1C350. For all chemicals included in ECCN 1C350, other than 1C350.a.20, a.24 and a.31, a license is required for CW reasons unless an End-Use Certificate is obtained as described in § 745.2 of the EAR for exports to destinations not listed in Supplement No. 2 to part 745 of the EAR.

(ii) ECCN 1C355. Chemicals controlled under ECCN 1C355 are controlled for CW reasons. The following license requirements apply:

(A) CWC States Parties. Neither a license nor an End-Use Certificate is required for exports to CWC States Parties (destinations listed in Supplement No. 2 to part 745 of the EAR) for CW reasons. Note that a license may be required for other reasons set forth in the EAR. See in particular the end-use/end-user restrictions of part 744 and the restrictions that apply to embargoed countries in part 746 of the EAR.

(B) CWC Non-States Parties. A license is required for exports to non-States Parties (destinations not listed in Supplement No. 2 to part 745 of the EAR) for CW reasons unless the exporter obtains an End-Use Certificate described by § 745.2 of the EAR. Note that a license may be required for other reasons set forth in the EAR. See in particular the end-use/end-user restrictions of part 744 and the restrictions...
Bureau of Export Administration, Commerce

Pt. 742, Supp. 1

that apply to embargoed countries in part 746 of the EAR.

(iii) Exports of Schedule 2 chemicals on or after April 29, 2000. A license is required for CW reasons for exports of Schedule 2 chemicals listed in 1C350 and 1C355 when exported to non-States Parties on or after April 29, 2000, regardless whether the exporter has obtained an End-Use Certificate described in §745.2 of the EAR.

(3) Technology controlled under ECCN 1E355. A license is required to non-States Parties (destinations not listed in Supplement No. 2 to part 745 of the EAR), except for Israel and Taiwan, for CW reasons.

(b) Licensing policy. (1) Schedule 1 chemicals. (i) Applications to export Schedule 1 chemicals to States Parties (destinations listed in Supplement No. 2 to part 745 of the EAR) will generally be approved, provided that all of the following conditions are met:

(A) The chemicals are destined for purposes not prohibited under the CWC (e.g., research, medical, pharmaceutical, or protective purposes);

(B) The types and quantities of chemicals are strictly limited to those that can be justified for those purposes;

(C) The aggregate amount of Schedule 1 chemicals in the country of destination at any given time for such purposes is equal to or less than one metric ton and receipt of the proposed export or reexport will not cause the limit to be exceeded.

(ii) Applications to export Schedule 1 chemicals to non-States Parties (destinations not listed in Supplement No. 2 to part 745 of the EAR) will generally be denied.

(iii) Applications to reexport Schedule 1 chemicals will generally be denied.

(2) Schedule 2 and Schedule 3 chemicals. (i) Applications to export Schedule 2 chemicals prior to April 29, 2000, and Schedule 3 chemicals controlled under ECCN 1C350 to CWC non-States parties will generally be denied.

(B) ECCN 1C355. Applications to export Schedule 2 and Schedule 3 chemicals controlled under ECCN 1C355 will generally be denied.

(c) Contract sanctity. Contract sanctity provisions are not available for license applications reviewed under this section.

[64 FR 27142, May 18, 1999; 64 FR 49381, Sept. 13, 1999]

SUPPLEMENT NO. 1 TO PART 742—NON-PROLIFERATION OF CHEMICAL AND BIOLOGICAL WEAPONS

NOTE: Exports and reexports of items in performance of contracts entered into before the applicable contract sanctity date(s) will be eligible for review on a case-by-case basis or other applicable licensing policies that were in effect prior to the contract sanctity date. The contract sanctity dates set forth in this supplement are for the guidance of exporters. Contract sanctity dates are established in the course of the imposition of foreign policy controls on specific items and are the relevant dates for the purpose of licensing determinations involving such items. If you believe that a specific contract sanctity date is applicable to your transaction, you should include all relevant information with your license application.

(1) The contract sanctity date for exports to Iran or Syria of dimethyl methylphosphonate, methyl phosphonyldifluoride, phosphorous oxychloride, thiodiglycol, dimethylamine hydrochloride, dimethylamine, ethylene chlorohydrin (2-chloroethanol), and potassium fluoride is April 28, 1986.

(2) The contract sanctity date for exports to Iran or Syria of dimethyl phosphite (dimethyl hydrogen phosphite), methyl phosphonyldichloride, 3-quinuclidinol, N,N-diisopropylamino-ethane-2-thiol, N,N-diisopropylaminoethyl-2-chloride, 3-hydroxy-1-methylpiperidine, trimethyl phosphite, phosphorous trichloride, and thionyl chloride is July 6, 1987.
Pt. 742, Supp. 2

(3) The contract sanctity date for exports to Iran or Syria of items in ECCNs 1C351, 1C352, 1C353 and 1C354 is February 22, 1989.

(4) The contract sanctity date for exports to Iran of dimethyl methylyphosphonate, methylphosphonyl difluoride, phosphorus oxychloride, and thiodiglycol is February 22, 1989.

(5) The contract sanctity date for exports to Iran, Libya or Syria of potassium hydrogen fluoride, ammonium hydrogen fluoride, sodium fluoride, sodium bifluoride, phosphorus pentasulfide, sodium cyanide, triethanolamine, disisopropylamine, sodium sulfide, and N,N-diethylethanolamine is December 12, 1989.

(6) The contract sanctity date for exports to all destinations (except Iran or Syria) of phosphorous trichloride, trimethyl phosphite, and thionyl chloride is December 12, 1989. For exports to Iran or Syria, paragraph (2) of this supplement applies.

(7) The contract sanctity date for exports to all destinations (except Iran, Libya or Syria) of 2-chloroethanol and triethanolamine is January 15, 1991. For exports of 2-chloroethanol to Iran or Syria, paragraph (1) of this supplement applies. For exports of triethanolamine to Iran, Libya or Syria, paragraph (5) of this supplement applies.

(8) The contract sanctity date for exports to all destinations (except Iran, Libya or Syria) of chemicals controlled by ECCN 1C350 is March 7, 1991, except for applications to export the following chemicals: 2-chloroethanol, dimethyl methylphosphonate, dimethyl phosphite, (dimethyl hydrogen phosphite), methylphosphonyl dichloride, methylphosphonyl difluoride, phosphorus oxychloride, phosphorus trichloride, thiodiglycol, thionyl chloride, triethanolamine, and trimethyl phosphite. (See also paragraphs (6) and (7) of this supplement.) For exports to Iran, Libya or Syria, see paragraphs (3) through (6) of this supplement.

(9) The contract sanctity date for exports and reexports of the following commodities and technical data is March 7, 1991:

(i) Equipment (for producing chemical weapon precursors and chemical warfare agents) described in ECCNs 2B350 and 2B351;

(ii) Equipment and materials (for producing biological agents) described in ECCNs 1C351, 1C352, 1C353, 1C354, and 2B352; and

(iii) Technology (for the development, production, and use of equipment described in ECCNs 1C351, 1C352, 1C353, 1C354, 2B350, 2B351, and 2B352) described in ECCNs 2E001, 2E002, and 2E301.

(10) The contract sanctity date for license applications subject to §742.2(b)(3) of this part is March 7, 1991.

(11) The contract sanctity date for reexports of chemicals controlled under ECCN 1C350 is March 7, 1991, except that the contract sanctity date for reexports of these chemicals to Iran, Libya or Syria is December 12, 1989.

(12) The contract sanctity date for reexports of human pathogens, zoonoses, toxins, and microorganisms and plant pathogens controlled by ECCNs 1C351, 1C352, 1C353 and 1C354 is March 7, 1991.

SUPPLEMENT NO. 2 TO PART 742—ANTI-TERRORISM CONTROLS; IRAN, SYRIA, AND SUDAN CONTRACT SANCTITY DATES AND RELATED POLICIES

NOTE: Exports and reexports of items in performance of contracts entered into before the applicable contract sanctity date(s) will be eligible for review on a case-by-case basis or other applicable licensing policies that were in effect prior to the contract sanctity date. The contract sanctity dates set forth in this supplement are for the guidance of exporters. Contract sanctity dates are established in the course of the imposition of foreign policy controls on specific items and are the relevant dates for the purpose of licensing determinations involving such items. If you believe that a specific contract sanctity date is applicable to your transaction, you should include all relevant information with your license application. BXA will determine any applicable contract sanctity date at the time an application with relevant supporting documents is submitted.

(a) Terrorist-supporting countries. The Secretary of State has designated Cuba, Iran, Iraq, Libya, North Korea, Sudan and Syria as countries whose governments have repeatedly provided support for acts of international terrorism under section 6(j) of the Export Administration Act (EAA).

(b) Items controlled under EAA sections 6(j) and 6(a). Whenever the Secretary of State determines that an export or reexport to any of these countries could make a significant contribution to the military potential of such country, including its military logistics capability, or could enhance the ability of such country to support acts of international terrorism, the item is subject to mandatory control under section EAA 6(j) and the Secretaries of Commerce and State are required to notify appropriate Committees of the Congress 30 days before a license for such an item may be issued.

(1) On December 28, 1993, the Secretary of State determined that the export to Cuba, Libya, Iran, Iraq, North Korea, Sudan or Syria of items described in paragraphs (c)(1) through (c)(5) of this supplement, if destined to military, police, intelligence or other sensitive end-users, are controlled under EAA section 6(j). Therefore, the 30-day advance
Congressional notification requirement applies to the export or reexport of these items to sensitive end-users in any of these countries.

(2) License applications for items controlled to designated terrorist-supporting countries under EAA section 6(a) will also be reviewed to determine whether the Congressional notification requirements of EAA section 6(j) apply.

(3) Items controlled for anti-terrorism reasons under section 6(a) to Iran, Sudan and Syria are:

(i) items described in paragraphs (c)(1) through (c)(5) to non-sensitive end-users, and

(ii) the following items to all end-users: for Iran, items in paragraphs (c)(6) through (c)(39) of this supplement; for Sudan, items in paragraphs (c)(6) through (c)(14) and (c)(16) through (c)(39) of this supplement; for Syria, items in paragraphs (c)(6) through (c)(8), (c)(10) through (c)(14), (c)(16) through (c)(19), and (c)(22) through (c)(39) of this supplement.

(c) The license requirements and licensing policies for items controlled for anti-terrorism reasons to Iran, Syria and Sudan are generally described in §§742.8, 742.9 and 742.10 of this part. This supplement provides guidance on licensing policies for Iran and Syria and Sudan and related contract sanctity dates that may be available for transactions benefiting from pre-existing contracts involving Iran, Syria and Sudan. This supplement also provides information on licensing policies and contract sanctity dates for Iran. Exporters are advised that the Treasury Department’s Office of Foreign Assets Control administers a comprehensive trade and investment embargo against Iran (See Executive Orders 12957 and 12999 of March 15, 1995 and May 6, 1995, respectively.) Exporters are further advised that exports and reexports to Iran of items that are listed on the CCL as requiring a license for national security or foreign policy reasons are subject to a policy of denial under the Iran-Iraq Arms Non-Proliferation Act of October 23, 1992 (50 U.S.C. 1701 note (1994)). Transactions involving Iran and benefiting from a contract that pre-dates October 23, 1992 may be considered under the applicable licensing policy in effect prior to that date.

(1) All items subject to national security controls—(i) Iran. Applications for all end-users in Iran will generally be denied.

(A) Contract sanctity date for military end-users or end-uses of items valued at $7 million or more: January 23, 1984.

(B) Contract sanctity date for military end-users or end-uses of all other national security controlled items: September 28, 1984.

(C) Contract sanctity date for non-military end-users or end-uses: August 28, 1991, unless otherwise specified in paragraphs (c)(2) through (c)(39) of this supplement.

(ii) Sudan. Applications for military end-users or military end-uses in Sudan will generally be denied. Applications for non-military end-users or end-uses will be considered on a case-by-case basis. Applications for all end-users in Sudan with a contract sanctity date is available.

(iii) Syria. Applications for military end-users or military end-uses in Syria will generally be denied. Applications for non-military end-users or end-uses will be considered on a case-by-case basis, unless otherwise specified in paragraphs (c)(2) through (c)(39) of this supplement. No contract sanctity date is available.

(3) Items controlled for anti-terrorism reasons to Iran, Sudan and Syria are:

(i) items described in paragraphs (c)(1) through (c)(5) to non-sensitive end-users, and

(ii) the following items to all end-users: for Iran, items in paragraphs (c)(6) through (c)(39) of this supplement; for Sudan, items in paragraphs (c)(6) through (c)(14) and (c)(16) through (c)(39) of this supplement; for Syria, items in paragraphs (c)(6) through (c)(14), (c)(16) through (c)(19), and (c)(22) through (c)(39) of this supplement.

(b) The license requirements and licensing policies for items controlled for anti-terrorism reasons to Iran, Syria and Sudan are generally described in §§742.8, 742.9 and 742.10 of this part. This supplement provides guidance on licensing policies for Iran and Syria and Sudan and related contract sanctity dates that may be available for transactions benefiting from pre-existing contracts involving Iran, Syria and Sudan. This supplement also provides information on licensing policies and contract sanctity dates for Iran. Exporters are advised that the Treasury Department’s Office of Foreign Assets Control administers a comprehensive trade and investment embargo against Iran (See Executive Orders 12957 and 12999 of March 15, 1995 and May 6, 1995, respectively.) Exporters are further advised that exports and reexports to Iran of items that are listed on the CCL as requiring a license for national security or foreign policy reasons are subject to a policy of denial under the Iran-Iraq Arms Non-Proliferation Act of October 23, 1992 (50 U.S.C. 1701 note (1994)). Transactions involving Iran and benefiting from a contract that pre-dates October 23, 1992 may be considered under the applicable licensing policy in effect prior to that date.

(1) All items subject to national security controls—(i) Iran. Applications for all end-users in Iran will generally be denied.

(A) Contract sanctity date for military end-users or end-uses of items valued at $7 million or more: January 23, 1984.

(B) Contract sanctity date for military end-users or end-uses of all other national security controlled items: September 28, 1984.

(C) Contract sanctity date for non-military end-users or end-uses: August 28, 1991, unless otherwise specified in paragraphs (c)(2) through (c)(39) of this supplement.

(ii) Sudan. Applications for military end-users or military end-uses in Sudan will generally be denied. Applications for non-military end-users or end-uses will be considered on a case-by-case basis. Applications for all end-users in Sudan with a contract sanctity date is available.

(iii) Syria. Applications for military end-users or military end-uses in Syria will generally be denied. Applications for non-military end-users or end-uses will be considered on a case-by-case basis, unless otherwise specified in paragraphs (c)(2) through (c)(39) of this supplement. No contract sanctity date is available.

(3) Items controlled for anti-terrorism reasons to Iran, Sudan and Syria are:

(i) items described in paragraphs (c)(1) through (c)(5) to non-sensitive end-users, and

(ii) the following items to all end-users: for Iran, items in paragraphs (c)(6) through (c)(39) of this supplement; for Sudan, items in paragraphs (c)(6) through (c)(14) and (c)(16) through (c)(39) of this supplement; for Syria, items in paragraphs (c)(6) through (c)(14), (c)(16) through (c)(19), and (c)(22) through (c)(39) of this supplement.

(b) The license requirements and licensing policies for items controlled for anti-terrorism reasons to Iran, Syria and Sudan are generally described in §§742.8, 742.9 and 742.10 of this part. This supplement provides guidance on licensing policies for Iran and Syria and Sudan and related contract sanctity dates that may be available for transactions benefiting from pre-existing contracts involving Iran, Syria and Sudan. This supplement also provides information on licensing policies and contract sanctity dates for Iran. Exporters are advised that the Treasury Department’s Office of Foreign Assets Control administers a comprehensive trade and investment embargo against Iran (See Executive Orders 12957 and 12999 of March 15, 1995 and May 6, 1995, respectively.) Exporters are further advised that exports and reexports to Iran of items that are listed on the CCL as requiring a license for national security or foreign policy reasons are subject to a policy of denial under the Iran-Iraq Arms Non-Proliferation Act of October 23, 1992 (50 U.S.C. 1701 note (1994)). Transactions involving Iran and benefiting from a contract that pre-dates October 23, 1992 may be considered under the applicable licensing policy in effect prior to that date.

(1) All items subject to national security controls—(i) Iran. Applications for all end-users in Iran will generally be denied.

(A) Contract sanctity date for military end-users or end-uses of items valued at $7 million or more: January 23, 1984.

(B) Contract sanctity date for military end-users or end-uses of all other national security controlled items: September 28, 1984.

(C) Contract sanctity date for non-military end-users or end-uses: August 28, 1991, unless otherwise specified in paragraphs (c)(2) through (c)(39) of this supplement.
date: see paragraph (c)(1)(i) of this supplement.

(ii) Syria. Applications for all end-users in Syria will generally be denied. Contract sanctity date: January 19, 1996, unless a prior contract sanctity date applies (e.g., items first controlled to Sudan for foreign policy reasons under EAA section 6(j) have a contract sanctity date of December 28, 1993).

(6) All aircraft (powered and unpowered), helicopters, engines, and related spare parts and components—(i) Iran. Applications for all end-users in Iran will generally be denied.

(A) Contract sanctity date for helicopters exceeding 10,000 lbs. empty weight or fixed wing aircraft valued at $3 million or more: January 23, 1984.

(B) Contract sanctity date for other helicopters and aircraft and gas turbine engines therefor: September 28, 1984.

(C) Contract sanctity date for helicopter or aircraft parts and components controlled by ECCN 9A 991.d: October 22, 1987.

(ii) Syria. Applications for all end-users in Syria will generally be denied.

(A) There is no contract sanctity for helicopters exceeding 10,000 lbs. empty weight or fixed wing aircraft valued at $3 million or more; except that passenger aircraft, regardless of value, have a contract sanctity date of December 16, 1986, if destined for a regularly scheduled airline with assurance against military use.

(B) Contract sanctity date for helicopters with 10,000 lbs. empty weight or less: April 28, 1986.

(C) Contract sanctity date for other aircraft and gas turbine engines therefor: December 16, 1986.

(iii) Sudan. Applications for all end-users in Sudan will generally be denied. Contract sanctity date: January 19, 1996.

(7) Heavy-duty, on-highway tractors—(i) Iran. Applications for all end-users in Iran will generally be denied. Contract sanctity date: August 28, 1991.

(ii) Syria. Applications for military end-users or for military end-uses in Syria will generally be denied. Applications for non-military end-users or for non-military end-uses in Syria will be considered on a case-by-case basis. Contract sanctity date: August 28, 1991.

(iii) Sudan. Applications for military end-users or for military end-uses in Sudan will generally be denied. Applications for non-military end-users or for non-military end-uses in Sudan will be considered on a case-by-case basis. Contract sanctity date: January 19, 1996.

(8) Off-highway wheel tractors of carriage capacity 9t (10 tons) or more—(i) Iran. Applications for all end-users in Iran will generally be denied. Contract sanctity date: October 22, 1987.

(ii) Syria. Applications for military end-users or for military end-uses in Syria will generally be denied. Applications for non-military end-users or for non-military end-uses in Syria will be considered on a case-by-case basis. Contract sanctity date: August 28, 1991.

(iii) Sudan. Applications for military end-users or for military end-uses in Sudan will generally be denied. Applications for non-military end-users or for non-military end-uses in Sudan will be considered on a case-by-case basis. Contract sanctity date: January 19, 1996.

(9) Large diesel engines (greater than 400 horsepower) and parts to power tank transporters—(i) Iran. Applications for all end-users in Iran will generally be denied. Contract sanctity date: October 22, 1987.

(ii) Syria. Applications for military end-users or for military end-uses in Syria will generally be denied. Applications for non-military end-users or for non-military end-uses in Syria will be considered on a case-by-case basis. Contract sanctity date: January 19, 1996.

(10) Cryptographic, cryptoanalytic, and cryptologic equipment—(i) Iran. Applications for all end-users in Iran will generally be denied.

(A) Contract sanctity date for military end-users or end-uses of cryptographic, cryptoanalytic, and cryptologic equipment that was subject to national security controls on October 22, 1987: see paragraph (c)(1)(i) of this supplement.

(B) Contract sanctity date for all other cryptographic, cryptoanalytic, and cryptologic equipment for all end-users in Iran: October 22, 1987.

(ii) Syria. A license is required for all national security-controlled cryptographic, cryptoanalytic, and cryptologic equipment to all end-users. Applications for all end-users in Syria will generally be denied. Contract sanctity date for cryptographic, cryptoanalytic, and cryptologic equipment that was subject to national security controls on August 28, 1991: see paragraph (c)(1)(iii) of this supplement.

(iii) Sudan. Applications for all end-users in Sudan of any such equipment will generally be denied. Contract sanctity date for Sudan: January 19, 1996, unless a prior contract sanctity date applies (e.g., items first controlled to Sudan for foreign policy reasons under EAA section 6(j) have a contract sanctity date of December 28, 1993).
Bureau of Export Administration, Commerce

(11) Navigation, direction finding, and radar equipment—(i) Iran. Applications for all end-users in Iran will generally be denied.
(A) Contract sanctity date for military end-users or for military end-uses in Iran will generally be denied. Applications for non-military end-users or for non-military end-uses in Iran will generally be denied.
(B) Contract sanctity date for all other navigation, direction finding, and radar equipment: August 28, 1991.

(ii) Sudan. Applications for military end-users or for military end-uses in Sudan will generally be denied. Applications for non-military end-users or for non-military end-uses in Sudan will be considered on a case-by-case basis. Contract sanctity date for Sudan: January 19, 1996, unless a prior contract sanctity date applies (e.g., items first controlled to Sudan for foreign policy reasons under EAA section 6(j) have a contract sanctity date of December 28, 1993).

(12) Electronic test equipment—(i) Iran. Applications for all end-users in Iran will generally be denied.
(A) Contract sanctity date for military end-users or for military end-uses in Iran will generally be denied. Applications for non-military end-users or for non-military end-uses in Iran will generally be denied.
(B) Contract sanctity date for all other electronic test equipment: October 22, 1987.

(ii) Syria. Applications for military end-users or for military end-uses in Syria will generally be denied. Applications for non-military end-users or for non-military end-uses in Syria will be considered on a case-by-case basis. Contract sanctity date for Syria: January 19, 1996, unless a prior contract sanctity date applies (e.g., items first controlled to Sudan for foreign policy reasons under EAA section 6(j) have a contract sanctity date of December 28, 1993).

(13) Mobile communications equipment—(i) Iran. Applications for all end-users in Iran of such equipment will generally be denied.
(A) Contract sanctity date for military end-users or for military end-uses of mobile communications equipment that was subject to national security controls on October 22, 1987: see paragraph (c)(1)(ii) of this supplement.
(B) Contract sanctity date for all other mobile communications equipment: October 22, 1987.

(ii) Syria. Applications for military end-users or for military end-uses in Syria of such equipment will generally be denied. Applications for non-military end-users or for non-military end-uses in Syria will be considered on a case-by-case basis. Contract sanctity date for Syria: January 19, 1996, unless a prior contract sanctity date applies (e.g., items first controlled to Sudan for foreign policy reasons under EAA section 6(j) have a contract sanctity date of December 28, 1993).

(14) Acoustic underwater detection equipment—(i) Iran. Applications for all end-users in Iran of such equipment will generally be denied.
(A) Contract sanctity date for military end-users or for military end-uses of acoustic underwater detection equipment that was subject to national security controls on October 22, 1987: see paragraph (c)(1)(i) of this supplement.
(B) Contract sanctity date for all other acoustic underwater detection equipment: October 22, 1987.

(ii) Syria. A license is required for acoustic underwater detection equipment that was subject to national security controls on August 28, 1991, to all end-users. Applications for military end-users or for military end-uses in Syria will generally be denied. Applications for non-military end-users or for non-military end-uses in Syria will be considered on a case-by-case basis. Contract sanctity date for acoustic underwater detection equipment that was subject to national security controls on August 28, 1991: see paragraph (c)(1)(iii) of this supplement.
(iii) Sudan. Applications for military end-users or for military end-uses to Sudan of such equipment will generally be denied. Applications for non-military end-users or for non-military end-uses in Sudan will be considered on a case-by-case basis. Contract sanctity date for Sudan: January 19, 1996, unless a prior contract sanctity date applies (e.g., items first controlled to Sudan for foreign policy reasons under EAA section 6(i)) have a contract sanctity date of December 28, 1993.

15 Portable electric power generators—(i) Iraq. Applications for all end-users in Iran of such equipment will generally be denied. Contract sanctity date: October 22, 1987.

(ii) [Reserved]

16 Vessels and boats, including inflatable boats—(i) Iran. Applications for all end-users in Iran of these items will generally be denied. (A) Contract sanctity date for military end-users or end-uses of vessels and boats that were subject to national security controls on October 22, 1987: see paragraph (c)(1)(i) of this supplement.

(B) Contract sanctity date for all other vessels and boats for all end-users: October 22, 1987.

(ii) Syria. A license is required for national security-controlled vessels and boats. Applications for military end-users or for military end-uses in Syria of these items will generally be denied. Applications for non-military end-users or for non-military end-uses in Syria will be considered on a case-by-case basis. Contract sanctity date for vessels and boats that were subject to national security controls on August 28, 1991: see paragraph (c)(1)(ii) of this supplement.

(A) Contract sanctity date for all other underwater photographic equipment for all end-users: October 22, 1987.

(ii) Syria. Applications for military end-users or for military end-uses in Syria of such equipment will generally be denied. Applications for non-military end-users or for non-military end-uses in Syria will be considered on a case-by-case basis. Contract sanctity date for all other underwater photographic equipment: August 28, 1991.

(iii) Sudan. Applications for military end-users or for military end-uses in Sudan of such equipment will generally be denied. Applications for non-military end-users or for non-military end-uses in Sudan will be considered on a case-by-case basis. Contract sanctity date for Sudan: January 19, 1996, unless a prior contract sanctity date applies (e.g., items first controlled to Sudan for foreign policy reasons under EAA section 6(i)) have a contract sanctity date of December 28, 1993.

17 Marine and submarine engines (outboard/inboard, regardless of horsepower)—(i) Iran. Applications for all end-users in Iran of these items will generally be denied. (A) Contract sanctity date for marine engines that were subject to national security controls on August 28, 1991: see paragraph (c)(1)(i) of this supplement.

(B) Contract sanctity date for outboard engines of 45 HP or more for all end-users: September 28, 1984.

(C) Contract sanctity date for all other marine and submarine engines for all end-users: October 22, 1987.

(ii) Syria. A license is required for all marine and submarine engines subject to national security controls to all end-users. Applications for military end-users or for military end-uses in Syria of these items will generally be denied. Applications for non-military end-users or for non-military end-uses in Syria will be considered on a case-by-case basis. Contract sanctity date for marine and submarine engines that were subject to national security controls on August 28, 1991: See paragraph (c)(1)(ii) of this supplement.

(iii) Sudan. Applications for military end-users or for military end-uses in Sudan of these items will generally be denied. Applications for non-military end-users or for non-military end-uses in Sudan will be considered on a case-by-case basis. Contract sanctity date for Sudan: January 19, 1996, unless a prior contract sanctity date applies (e.g., items first controlled to Sudan for foreign policy reasons under EAA section 6(i)) have a contract sanctity date of December 28, 1993.

18 Underwater photographic equipment—(i) Iran. Applications for all end-users in Iran of such equipment will generally be denied. (A) Contract sanctity date for military end-users or end-uses of underwater photographic equipment that was subject to national security controls on October 22, 1987: See paragraph (c)(1)(i) of this supplement.

(B) Contract sanctity date for all other underwater photographic equipment for all end-users: October 22, 1987.

(ii) Syria. Applications for military end-users or for military end-uses in Syria of such equipment will generally be denied. Applications for non-military end-users or for non-military end-uses in Syria will be considered on a case-by-case basis. (A) Contract sanctity date for underwater photographic equipment that was subject to national security controls on August 28, 1991: See paragraph (c)(1)(ii) of this supplement.

(B) Contract sanctity date for all other underwater photographic equipment: August 28, 1991.

(iii) Sudan. Applications for military end-users or for military end-uses in Sudan of such equipment will generally be denied. Applications for non-military end-users or for non-military end-uses in Sudan will be considered on a case-by-case basis. Contract sanctity date for Sudan: January 19, 1996, unless a prior contract sanctity date applies (e.g., items first controlled to Sudan for foreign policy reasons under EAA section 6(i)) have a contract sanctity date of December 28, 1993.

19 Submersible systems—(i) Iran. Applications for all end-users in Iran of such systems will generally be denied. (A) Contract sanctity date for military end-users or end-uses of submersible systems
that were subject to national security controls on October 22, 1987. See paragraph (c)(1)(i) of this supplement.

(ii) Contract sanctity date for all other submersible systems for all end-users: October 22, 1987.

(iii) Syria. Applications for military end-users or for military end-uses in Syria of such systems will generally be denied. Applications for non-military end-users or for non-military end-uses in Syria will be considered on a case-by-case basis.

(A) Contract sanctity date for submersible systems that were subject to national security controls on August 28, 1991: See paragraph (c)(1)(ii) of this supplement.

(B) Contract sanctity date for all other submersible systems: August 28, 1991.

(iii) Sudan. Applications for military end-users or for military end-uses in Sudan of such systems will generally be denied. Applications for non-military end-users or for non-military end-uses in Sudan will be considered on a case-by-case basis. Contract sanctity date for Sudan: January 19, 1996, unless a prior contract sanctity date applies (e.g., items first controlled to Sudan for foreign policy reasons under EAA section 6(j) have a contract sanctity date of December 28, 1993).

(A) Contract sanctity date for all other end-users in Iran of such equipment will generally be denied. No contract sanctity is available for such items to Iran.

(ii) Sudan. Applications for military end-users and end-uses in Sudan of such items will generally be denied. Applications for non-military end-users or for non-military end-uses in Sudan will be considered on a case-by-case basis. Contract sanctity date: January 19, 1996.

(B) Contract sanctity dates for all other vibration test equipment: August 28, 1991.

(i) Scuba gear and related equipment—(i) Iran. Applications for all end-users in Iran of such equipment will generally be denied. No contract sanctity is available for such items to Iran.

(ii) Syria. Applications for non-military end-uses of such equipment will generally be denied. Applications for non-military end-uses in Syria of such equipment will generally be denied. Applications for non-military end-uses or for non-military end-uses in Syria will be considered on a case-by-case basis. Contract sanctity date for Sudan: January 19, 1996, unless a prior contract sanctity date applies (e.g., items first controlled to Sudan for foreign policy reasons under EAA section 6(j) have a contract sanctity date of December 28, 1993).

(A) Contract sanctity date for vibration test equipment that was subject to national security controls on August 28, 1991: See paragraph (c)(1)(i) of this supplement.

(B) Contract sanctity date for all other vibration test equipment: August 28, 1991.

(ii) Syria. Applications for military end-users or for military end-uses in Syria of such equipment will generally be denied. Applications for non-military end-users or for non-military end-uses in Syria will be considered on a case-by-case basis. Contract sanctity date for Sudan: January 19, 1996, unless a prior contract sanctity date applies (e.g., items first controlled to Sudan for foreign policy reasons under EAA section 6(j) have a contract sanctity date of December 28, 1993).

(A) Contract sanctity date for vibration test equipment that was subject to national security controls on August 28, 1991: See paragraph (c)(1)(i) of this supplement.

(B) Contract sanctity date for all other vibration test equipment: August 28, 1991.

(iii) Syria. Applications for military end-users or for military end-uses in Syria of such items will generally be denied. Applications for non-military end-users or for non-military end-uses in Syria will be considered on a case-by-case basis. Contract sanctity date for Sudan: January 19, 1996, unless a prior contract sanctity date applies (e.g., items first controlled to Sudan for foreign policy reasons under EAA section 6(j) have a contract sanctity date of December 28, 1993).

(B) Contract sanctity date for computer numerically controlled machine tools: August 28, 1991.

(i) Digital computers with a CTP of 6 or above, assemblies, related equipment, equipment for development or production of magnetic and optical storage equipment, and materials for fabrication of head/disk assemblies—(i) Iran.
Applications for all end-users in Iran of these items will generally be denied.

(A) Contract sanctity dates for military end-users and end-uses of items that were subject to national security controls on August 28, 1991: See paragraph (c)(1)(i) of this supplement.

(B) Contract sanctity date for all other end-users and end-uses of semiconductor manufacturing equipment that was subject to national security controls on August 28, 1993: See paragraph (c)(1)(ii) of this supplement.

(C) "Telecommunications transmission systems" or equipment operating at a frequency equal to or greater than 19.7 GHz or "spectral efficiency" greater than 3 bit/s/Hz; "Telecommunications transmission systems" or equipment with a "digital transfer rate" at the highest multiplex level exceeding 45 Mbits/s.

(ii) Iran. Applications for all end-users in Iran of such equipment will generally be denied.

(A) Contract sanctity date for military end-users and end-uses of telecommunications equipment that was subject to national security controls on August 28, 1991: See paragraph (c)(1)(i) of this supplement.

(B) Contract sanctity dates for all other end-users and end-uses of microprocessors that were subject to national security controls on August 28, 1991: See paragraph (c)(1)(i) of this supplement.

(C) "Telecommunications transmission systems" or equipment that was subject to national security controls on August 28, 1991: See paragraph (c)(1)(ii) of this supplement.

(iv) Sudan. Applications for military end-users or for military end-uses in Sudan of such equipment will generally be denied. Applications for non-military end-users or for non-military end-uses in Sudan will be considered on a case-by-case basis.

(A) Contract sanctity dates for military end-users or for military end-uses in Sudan of such equipment will generally be denied. Applications for non-military end-users or for non-military end-uses in Sudan will be considered on a case-by-case basis. Contract sanctity date for Sudan: January 19, 1996, unless a prior contract sanctity date applies (e.g., items first controlled to Sudan for foreign policy reasons under EAA section 6(j) have a contract sanctity date of December 28, 1993).

(25) Telecommunications equipment—(i) A license is required for the following telecommunications equipment:

(A) Radio relay systems or equipment operating at a frequency equal to or greater than 19.7 GHz or "spectral efficiency" greater than 3 bit/s/Hz;

(B) Fiber optic systems or equipment operating at a wavelength greater than 1000 nm;

(C) "Telecommunications transmission systems" or equipment that was subject to national security controls on August 28, 1991: See paragraph (c)(1)(i) of this supplement.

(ii) Iran. Applications for all end-users in Iran of such equipment will generally be denied.

(A) Contract sanctity date for military end-users and end-uses of telecommunications equipment that was subject to national security controls on August 28, 1991: See paragraph (c)(1)(i) of this supplement.

(B) Contract sanctity dates for all other end-users and end-uses of microprocessors that were subject to national security controls on August 28, 1991: See paragraph (c)(1)(i) of this supplement.

(C) "Telecommunications transmission systems" or equipment that was subject to national security controls on August 28, 1991: See paragraph (c)(1)(ii) of this supplement.

(ii) Syria. Applications for military end-users or for military end-uses in Syria of such equipment will generally be denied. Applications for non-military end-users or for non-military end-uses in Syria will be considered on a case-by-case basis.

(A) Contract sanctity date for military end-users and end-uses of telecommunications equipment that was subject to national security controls on August 28, 1991: See paragraph (c)(1)(i) of this supplement.
(B) Contract sanctity dates for all other microprocessors for all end-users: August 28, 1991.

(ii) Syria. Applications for military end-users or for military end-uses in Syria of such equipment will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(A) Contract sanctity date for such semiconductor manufacturing equipment that was subject to national security controls on August 28, 1991: See paragraph (c)(3)(i) of this supplement.

(B) Contract sanctity date for all other semiconductor manufacturing equipment: August 28, 1991.

(iii) Sudan. Applications for military end-users or for military end-uses in Sudan of such equipment will generally be denied. Applications for non-military end-users or for non-military end-uses in Sudan will be considered on a case-by-case basis. Contract sanctity date for Sudan: January 19, 1996, unless a prior contract sanctity date applies (e.g., items first controlled to Sudan for foreign policy reasons under EAA section 6(j) have a contract sanctity date of January 19, 1996).

(28) Software specially designed for the computer-aided design and manufacture of integrated circuits—(i) Iran. Applications for all end-users in Iran of such software will generally be denied.

(A) Contract sanctity date for military end-users and end-uses of such software that was subject to national security controls on August 28, 1991: See paragraph (c)(1)(i) of this supplement.

(B) Contract sanctity dates for all other such software for all end-users: August 28, 1991.

(ii) Syria. Applications for military end-users or for military end-uses in Syria of such software will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(A) Contract sanctity date for such software that was subject to national security controls on August 28, 1991: See paragraph (c)(1)(ii) of this supplement.

(B) Contract sanctity dates for all other such software for all end-users: August 28, 1991.

(iii) Sudan. Applications for military end-users or for military end-uses in Sudan of such software will generally be denied. Applications for non-military end-users or for non-military end-uses in Sudan will be considered on a case-by-case basis. Contract sanctity date for Sudan: January 19, 1996, unless a prior contract sanctity date applies (e.g., items first controlled to Sudan for foreign policy reasons under EAA section 6(j) have a contract sanctity date of December 28, 1993).

(29) Packet switches. Equipment described in ECCNs 5A001.c and 5A991.c.1—(i) Iran. Applications for all end-users in Iran of such equipment will generally be denied.

(A) Contract sanctity date for military end-users and end-uses in Iran of packet switches that were subject to national security controls on August 28, 1991: See paragraph (c)(1)(i) of this supplement.

(B) Contract sanctity dates for all other packet switches for all end-users: August 28, 1991.

(ii) Syria. Applications for military end-users or for military end-uses in Syria of such equipment will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(A) Contract sanctity date for packet switches that were subject to national security controls on August 28, 1991: See paragraph (c)(1)(ii) of this supplement.

(B) Contract sanctity date for all other packet switches: August 28, 1991.

(iii) Sudan. Applications for military end-users or for military end-uses in Sudan of such equipment will generally be denied. Applications for non-military end-users or for non-military end-uses in Sudan will be considered on a case-by-case basis. Contract sanctity date for Sudan: January 19, 1996, unless a prior contract sanctity date applies (e.g., items first controlled to Sudan for foreign policy reasons under EAA section 6(j) have a contract sanctity date of December 28, 1993).

(30) Specially designed software for air traffic control applications that uses any digital signal processing techniques for automatic target tracking or that has a facility for electronic tracking—(i) Iran. Applications for all end-users in Iran of such software will generally be denied.

(A) Contract sanctity date for military end-users and end-uses of such software that was subject to national security controls on August 28, 1991: See paragraph (c)(1)(i) of this supplement.

(B) Contract sanctity dates for all other such software for all end-users: August 28, 1991.

(ii) Syria. Applications for military end-users or for military end-uses in Syria of such software will generally be denied. Applications for non-military end-users or for non-military end-uses in Syria will be considered on a case-by-case basis.

(A) Contract sanctity date for such software that was subject to national security controls on August 28, 1991: See paragraph (c)(1)(ii) of this supplement.

(B) Contract sanctity date for exports of such software: August 28, 1991.

(iii) Sudan. Applications for military end-users or for military end-uses in Sudan of such software will generally be denied. Applications for non-military end-users or for
non-military end-uses in Sudan will be considered on a case-by-case basis. Contract sanctity date for Sudan: January 19, 1996, unless a prior contract sanctity date applies (e.g., items first controlled to Sudan for foreign policy reasons under EAA section 6(j) have a contract sanctity date of December 28, 1993).

(31) Gravity meters having static accuracy of less (better) than 100 microgal, or gravity meters of the quartz element (worden) type—(i) Iran. Applications for all end-users in Iran of these items will generally be denied. (A) Contract sanctity date for military end-users and end-uses of gravity meters that were subject to national security controls on August 28, 1991: See paragraph (c)(1)(i) of this supplement. (B) Contract sanctity dates for all other such gravity meters for all end-users: August 28, 1991. (ii) Syria. Applications for military end-users or for military end-uses in Syria of such gravity meters for all end-users: August 28, 1991.

(iii) Sudan. Applications for military end-users or for military end-uses in Sudan of such gravity meters for all end-users: August 28, 1991.

(iv) Syria. Applications for military end-users or for military end-uses in Syria of such gravity meters for all end-users: August 28, 1991.

(v) Iran. Applications for military end-users or for military end-uses in Iran of such gravity meters for all end-users: August 28, 1991.

(vi) Iran. Applications for military end-users or for military end-uses in Iran of such gravity meters for all end-users: August 28, 1991.

(vii) Iran. Applications for military end-users or for military end-uses in Iran of such gravity meters for all end-users: August 28, 1991.

(viii) Iran. Applications for military end-users or for military end-uses in Iran of such gravity meters for all end-users: August 28, 1991.

(ix) Iran. Applications for military end-users or for military end-uses in Iran of such gravity meters for all end-users: August 28, 1991.

(x) Iran. Applications for military end-users or for military end-uses in Iran of such gravity meters for all end-users: August 28, 1991.

(xi) Iran. Applications for military end-users or for military end-uses in Iran of such gravity meters for all end-users: August 28, 1991.

(xii) Iran. Applications for military end-users or for military end-uses in Iran of such gravity meters for all end-users: August 28, 1991.

(xiii) Iran. Applications for military end-users or for military end-uses in Iran of such gravity meters for all end-users: August 28, 1991.

(xiv) Iran. Applications for military end-users or for military end-uses in Iran of such gravity meters for all end-users: August 28, 1991.

(xv) Iran. Applications for military end-users or for military end-uses in Iran of such gravity meters for all end-users: August 28, 1991.

(xvi) Iran. Applications for military end-users or for military end-uses in Iran of such gravity meters for all end-users: August 28, 1991.

(xvii) Iran. Applications for military end-users or for military end-uses in Iran of such gravity meters for all end-users: August 28, 1991.

(xviii) Iran. Applications for military end-users or for military end-uses in Iran of such gravity meters for all end-users: August 28, 1991.

(xix) Iran. Applications for military end-users or for military end-uses in Iran of such gravity meters for all end-users: August 28, 1991.

(xx) Iran. Applications for military end-users or for military end-uses in Iran of such gravity meters for all end-users: August 28, 1991.

(xxi) Iran. Applications for military end-users or for military end-uses in Iran of such gravity meters for all end-users: August 28, 1991.

(xxii) Iran. Applications for military end-users or for military end-uses in Iran of such gravity meters for all end-users: August 28, 1991.

(xxiii) Iran. Applications for military end-users or for military end-uses in Iran of such gravity meters for all end-users: August 28, 1991.

(xxiv) Iran. Applications for military end-users or for military end-uses in Iran of such gravity meters for all end-users: August 28, 1991.

(xxv) Iran. Applications for military end-users or for military end-uses in Iran of such gravity meters for all end-users: August 28, 1991.

(xxvi) Iran. Applications for military end-users or for military end-uses in Iran of such gravity meters for all end-users: August 28, 1991.

(xxvii) Iran. Applications for military end-users or for military end-uses in Iran of such gravity meters for all end-users: August 28, 1991.

(xxviii) Iran. Applications for military end-users or for military end-uses in Iran of such gravity meters for all end-users: August 28, 1991.

(xxix) Iran. Applications for military end-users or for military end-uses in Iran of such gravity meters for all end-users: August 28, 1991.
Bureau of Export Administration, Commerce

Plt. 742, Supp. 2

(ii) Syria. Applications for military end-users or for military end-uses in Syria of such fibers will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(A) Contract sanctity date for high strength organic and inorganic fibers (kevlar) described in ECCN 2B993 for cutting gears up to 1.25 meters in diameter—December 28, 1993. (See paragraph (c)(1)(i) of this supplement.

(B) Contract sanctity date for all other high strength organic and inorganic fibers (kevlar) described in ECCN 2B993 for cutting gears up to 1.25 meters in diameter—December 28, 1991. (See paragraph (c)(1)(i) of this supplement.

(iii) Sudan. Applications for military end-users or for military end-uses in Sudan of such fibers will generally be denied. Applications for non-military end-users or for non-military end-uses in Sudan will be considered on a case-by-case basis. Contract sanctity date for Sudan: January 19, 1996, unless a prior contract sanctity date applies (e.g., items first controlled to Sudan for foreign policy reasons under EAA section 6(j)) have a contract sanctity date of December 28, 1993.

(35) Machines described in ECCNs 2B003 and 2B993 for cutting gears up to 1.25 meters in diameter—(i) Iran. Applications for all end-users in Iran of these items will generally be denied.

(A) Contract sanctity date for aircraft skin and spar milling machines to national security controls on August 28, 1991: See paragraph (c)(1)(i) of this supplement.

(B) Contract sanctity date for all other aircraft skin and spar milling machines: August 28, 1991.

(iii) Sudan. Applications for military end-users or for military end-uses in Sudan of these items will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(A) Contract sanctity date for aircraft skin and spar milling machines that were subject to national security controls on August 28, 1991: See paragraph (c)(1)(i) of this supplement.

(B) Contract sanctity date for all other aircraft skin and spar milling machines: August 28, 1991.

(36) Aircraft skin and spar milling machines—(i) Iran. Applications for all end-users in Iran of these items will generally be denied.

(A) Contract sanctity date for military end-users and end-uses of aircraft skin and spar milling machines that were subject to national security controls on August 28, 1991: See paragraph (c)(1)(i) of this supplement.

(B) Contract sanctity dates for all other aircraft skin and spar milling machines to all end-users: August 28, 1991.

(ii) Syria. Applications for military end-users or for military end-uses in Syria of these items will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(A) Contract sanctity date for aircraft skin and spar milling machines that were subject to national security controls on August 28, 1991: See paragraph (c)(1)(i) of this supplement.

(B) Contract sanctity date for all other aircraft skin and spar milling machines: August 28, 1991.

(iii) Sudan. Applications for military end-users or for military end-uses in Sudan of these items will generally be denied. Applications for non-military end-users or for non-military end-uses in Sudan will be considered on a case-by-case basis.

(A) Contract sanctity date for aircraft skin and spar milling machines that were subject to national security controls on August 28, 1991: See paragraph (c)(1)(i) of this supplement.

(B) Contract sanctity date for all other aircraft skin and spar milling machines: August 28, 1991.

(37) Manual dimensional inspection machines described in ECCN 2B996. (i) Iran. Applications for all end-users in Iran of these items will generally be denied.

(A) Contract sanctity date for military end-users or end-uses of manual dimensional inspection machines that were subject to national security controls on August 28, 1991: See paragraph (c)(1)(i) of this supplement.

(B) Contract sanctity date for all other manual dimensional inspection machines: August, 1991.

(ii) Syria. Applications for military end-users or for military end-uses in Syria of these items will generally be denied. Applications for non-military end-users or for non-military end-uses in Syria will be considered on a case-by-case basis.

(A) Contract sanctity date for such manual dimensional inspection machines that were subject to national security controls on August 28, 1991: See paragraph (c)(1)(i) of this supplement.

(B) Contract sanctity date for all other such manual dimensional inspection machines: August, 1991.

(iii) Sudan. Applications for military end-users or for military end-uses in Sudan of these items will generally be denied. Applications for non-military end-users or for non-military end-uses in Sudan will be considered on a case-by-case basis.

(A) Contract sanctity date for aircraft skin and spar milling machines that were subject to national security controls on August 28, 1991: See paragraph (c)(1)(i) of this supplement.

(B) Contract sanctity date for all other aircraft skin and spar milling machines: August 28, 1991.

(ii) Syria. Applications for military end-users or for military end-uses in Syria of these items will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(A) Contract sanctity date for aircraft skin and spar milling machines that were subject to national security controls on August 28, 1991: See paragraph (c)(1)(i) of this supplement.

(B) Contract sanctity date for all other aircraft skin and spar milling machines: August 28, 1991.

(iii) Sudan. Applications for military end-users or for military end-uses in Sudan of these items will generally be denied. Applications for non-military end-users or for non-military end-uses in Sudan will be considered on a case-by-case basis.

(A) Contract sanctity date for aircraft skin and spar milling machines that were subject to national security controls on August 28, 1991: See paragraph (c)(1)(i) of this supplement.

(B) Contract sanctity date for all other aircraft skin and spar milling machines: August 28, 1991.

(ii) Syria. Applications for military end-users or for military end-uses in Syria of these items will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(A) Contract sanctity date for aircraft skin and spar milling machines that were subject to national security controls on August 28, 1991: See paragraph (c)(1)(i) of this supplement.

(B) Contract sanctity date for all other aircraft skin and spar milling machines: August 28, 1991.

(iii) Sudan. Applications for military end-users or for military end-uses in Sudan of these items will generally be denied. Applications for non-military end-users or for non-military end-uses in Sudan will be considered on a case-by-case basis.

(A) Contract sanctity date for aircraft skin and spar milling machines that were subject to national security controls on August 28, 1991: See paragraph (c)(1)(i) of this supplement.

(B) Contract sanctity date for all other aircraft skin and spar milling machines: August 28, 1991.

(ii) Syria. Applications for military end-users or for military end-uses in Syria of these items will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(A) Contract sanctity date for aircraft skin and spar milling machines that were subject to national security controls on August 28, 1991: See paragraph (c)(1)(i) of this supplement.

(B) Contract sanctity date for all other aircraft skin and spar milling machines: August 28, 1991.

(iii) Sudan. Applications for military end-users or for military end-uses in Sudan of these items will generally be denied. Applications for non-military end-users or for non-military end-uses in Sudan will be considered on a case-by-case basis.

(A) Contract sanctity date for aircraft skin and spar milling machines that were subject to national security controls on August 28, 1991: See paragraph (c)(1)(i) of this supplement.

(B) Contract sanctity date for all other aircraft skin and spar milling machines: August 28, 1991.

(ii) Syria. Applications for military end-users or for military end-uses in Syria of these items will generally be denied. Applications for non-military end-users or for non-military end-uses will be considered on a case-by-case basis.

(A) Contract sanctity date for aircraft skin and spar milling machines that were subject to national security controls on August 28, 1991: See paragraph (c)(1)(i) of this supplement.

(B) Contract sanctity date for all other aircraft skin and spar milling machines: August 28, 1991.

(iii) Sudan. Applications for military end-users or for military end-uses in Sudan of these items will generally be denied. Applications for non-military end-users or for non-military end-uses in Sudan will be considered on a case-by-case basis.
sanctity date for Sudan: January 19, 1996, unless a prior contract sanctity date applies (e.g., items first controlled to Sudan for foreign policy reasons under EAA section 6(j) have a contract sanctity date of December 28, 1993).

(38) Robots capable of employing feedback information in real time processing to generate or modify programs—(i) Iran. Applications for all end-users in Iran of these items will generally be denied. 

(A) Contract sanctity date for military end-users or end-uses of such robots that were subject to national security controls on August 28, 1991: See paragraph (c)(1)(ii) of this supplement.

(B) Contract sanctity date for all other such robots: August 28, 1991.

(ii) Syria. Applications for military end-users or for military end-uses in Syria of these items will generally be denied. Applications for non-military end-users or for non-military end-uses in Syria will be considered on a case-by-case basis.

(A) Contract sanctity date for such robots that were subject to national security controls on August 28, 1991: See paragraph (c)(1)(ii) of this supplement.

(B) Contract sanctity date for all other such robots: August 28, 1991.

(iii) Sudan. Applications for military end-users or for military end-uses in Sudan of these items will generally be denied. Applications for non-military end-users or for non-military end-uses in Sudan will be considered on a case-by-case basis.

Contract sanctity date for Sudan: January 19, 1996, unless a prior contract sanctity date applies (e.g., items first controlled to Sudan for foreign policy reasons under EAA section 6(j) have a contract sanctity date of December 28, 1993).

(39) Explosive device detectors—(i) Iran. Applications for all end-users in Iran of these items will generally be denied. Contract sanctity date: January 19, 1996.

(ii) Syria. Applications for all end-users in Syria of these items will generally be denied. Contract sanctity date: January 19, 1996.

(iii) Sudan. Applications for all end-users in Sudan of these items will generally be denied. Contract sanctity date: January 19, 1996.

(40) [Reserved]

(41) Production technology controlled under ECCN 1C355 on the CCL.

(i) Iran. Applications for all end-users in Iran of these items will generally be denied.

(ii) Syria. Applications for military end-users or for military end-uses in Syria of these items will generally be denied. Applications for non-military end-users or for non-military end-uses in Syria will be considered on a case-by-case basis.
(8) The security personnel will undertake the following measures under the guidance of the exporter's representatives:
   (i) The physical security of the computer using facility;
   (ii) The establishment of a system to ensure the round-the-clock supervision of computer security;
   (iii) The inspection, if necessary, of any program or software to be run on the computer system in order to ensure that all usage conforms to the conditions of the license;
   (iv) The suspension, if necessary, of any run in progress and the inspection of any output generated by the computer to determine whether the program runs or output conform with the conditions of the license;
   (v) The inspection of usage logs daily to ensure conformity with the conditions of the license and the retention of records of these logs for at least a year;
   (vi) The determination of the acceptability of computer users to ensure conformity with the conditions of the license;
   (vii) The immediate reporting of any security breaches or suspected security breaches to the government of the importing country and to the exporter's representatives;
   (viii) The execution of the following key tasks:
      (A) Establishment of new accounts;
      (B) Assignment of passwords;
      (C) Random sampling of data;
      (D) Generation of daily logs;
      (ix) The maintenance of the integrity and security of tapes and data files containing archived user files, log data, or system backups;
   (9) The exporter's representatives will be present when certain key functions are being carried out (e.g., the establishment of new accounts, the assignment of passwords, the random sampling of data, the generating of daily logs, the setting of limits to computer resources available to users in the development mode, the certification of programs for conformity to the approved end-uses before they are allowed to run in the production mode, and the modification of previously certified production programs);
   (10) The security personnel and the exporter's representatives will provide monthly reports on the usage of the computer system and on the implementation of the safeguards;
   (11) The computer system will be housed in one secure building and protected against theft and unauthorized entry at all times;
   (12) Restricted nationals, i.e., nationals of Computer Tier 4 countries, will not be allowed access to computers.

(c) No physical or computational access to computers may be granted to restricted nationals without prior written authorization from BXA, except that commercial consignees as described in this supplement are prohibited only from giving such nationals user-accessible programmability without prior written authorization;
   (i) No passwords or IDs may be issued to restricted nationals;
   (ii) No work may be performed on the computer on behalf of restricted nationals; and
   (iii) No conscious or direct ties may be established to networks (including their subscribers) operated by restricted nationals.

(13) Physical access to the computer, the operator consoles, and sensitive storage areas of the computer using facility will be controlled by the security personnel, under the guidance and monitoring of the exporter's representatives, and will be limited to the fewest number of people needed to maintain and run the computer system.

(14) The computer will be equipped with the necessary software to: Permit access to authorized persons only, detect attempts to gain unauthorized access, set and maintain limits on usage, establish accountability for usage, and generate logs and other records of usage. This software will also maintain the integrity of data and program files, the accounting and audit system, the password or computational access control system, and the operating system itself.

   (i) The operating system will be configured so that all jobs can be designated and tracked as either program development jobs or as production jobs.
   (ii) In the program development mode, users will be free, following verification that their application conforms to the agreed end-use, to create, edit, or modify programs, to use utilities such as editors, debuggers, or compilers and to verify program operation. Programs in the development mode will be subject to inspection as provided by paragraph (a)(8)(iii) of this supplement.
   (iii) In the production mode, users will have access to the full range of computer resources, but will be prohibited from modifying any program or using utilities that could modify any program. Before being allowed to run in the production mode, a program will have to be certified for conformity to approved end-uses by the security personnel and the exporter's representatives.
   (iv) Programs certified for execution in the production mode will be protected from unauthorized modification by appropriate software and physical security measures. Any modifications to previously certified production programs will be approved by the security personnel under the guidance and monitoring of the exporter's representatives.

   (v) The computer will be provided with accounting and audit software to ensure that detailed logs are maintained to record all computer usage. A separate log of security-related events will also be kept.
   (vi) For each job executed in the production mode, the operating system will record
execution characteristics in order to permit generation of a statistical profile of the program executed.

(15) The source code of the operating system will only be available to the exporter's representatives. Only those individuals will make changes in this source code.

(16) The security personnel, under the guidance of the exporter's representatives, will change passwords for individuals frequently and at unpredictable intervals.

(17) The security personnel, under the guidance of the exporter's representatives, will have the right to deny passwords to anyone. Passwords will be denied to anyone whose activity does not conform to the conditions of the license.

(18) Misuse of passwords by users will result in denial of further access to the computer.

(19) The exporter's representatives will install a strict password system and provide guidance on its implementation.

(20) Only the exporter's representatives will be trained in making changes in the password system and only they will make such changes.

(21) No computer will be networked to other computers outside the computer center without prior authorization by BXA.

(22) Generally, remote terminals will not be allowed outside the computer using facility without prior authorization by BXA. If remote terminals are specifically authorized by the license:

(i) The terminals will have physical security equivalent to the safeguards at the computer using facility;

(ii) The terminals will be constrained to minimal amounts of computer resources (CPU time, memory access, number of input-output operations, and other resources);

(iii) The terminals will not be allowed direct computational access to the computer (i.e., the security personnel, under the guidance of the exporter's representatives, will validate the password and identity of the user of any remote terminals before any such user is permitted to access the computer); all terminals will be connected to the computer system by a dedicated access line and a network access controller.

(23) There will be no direct input to the computer from remote terminals. Any data originating from outside the computer using facility, except for direct input from terminals within the same compound as the computer using facility, will first be processed by a separate processor or network access controller in order to permit examination of the data prior to its entry into the computer.

(24) The exporter will perform all maintenance of the computer system.

(25) Spare parts kept on site will be limited to the minimum amount. Spares will be kept in an area accessible only to the exporter's representatives. These representatives will maintain a strict audit system to account for all spare parts.

(26) No development or production technology on the computer system will be sent with the computer to the ultimate consignee.

(27) The end-user must immediately report any suspicions or facts concerning possible violations of the safeguards to the exporter and to the export control authorities of the importing country.

(28) The exporter must immediately report any information concerning possible violations of the safeguards to BXA. A violation of the safeguards might constitute grounds for suspension or termination of the license, preventing the shipment of unshipped spare parts, or the denial of additional licenses for spare parts, etc.

(29) The end-user will be audited quarterly by an independent consultant who has been approved by the export control authorities of the importing and exporting countries, but is employed at the expense of the end-user. The consultant will audit the computer usage and the implementation of the safeguards.

(30) The installation and operation of the computer will be coordinated and controlled by the following management structure:

(i) Steering Committee. The Steering Committee will comprise nationals of the importing country who will oversee the management and operation of the computer.

(ii) Security Staff. The Security Staff will be selected by the end-user or the government of the importing country to ensure that the required safeguards are implemented. This staff will be responsible for conducting an annual audit to evaluate physical security, administrative procedures, and technical controls.

(iii) Technical Consultative Committee. This committee will comprise technical experts from the importing country and the exporting company who will provide guidance in operating and maintaining the computer. At least one member of the committee will be an employee of the exporter. The committee will approve all accounts and maintain an accurate list of all users. In addition, the committee will advise the Steering Committee and the Security Staff concerning the security measures needed to ensure compliance with the safeguards required by the license.

(31) An ultimate consignee who is a multiple-purpose end-user, such as a university, will establish a peer review group comprising experts who represent each department or application area authorized for use on the computer under the conditions of the license. This group shall have the following responsibilities:

(i) Review all requests for computer usage and make recommendations concerning the acceptability of all projects and users;
(ii) Submit these recommendations to the Security Staff and Technical Consultative Committee for review and approval (see paragraph (a)(28) of this supplement);

(iii) Establish acceptable computer resource parameters for each project and review the results to verify their conformity with the authorized end-uses, restrictions, and parameters; and

(iv) Prepare monthly reports that would include a description of any runs exceeding the established parameters and submit them to the security staff.

(31) The end-user will also cooperate with any post-shipment inquiries or inspections by the Government of the importing country or the BXA officials to verify the disposition and/or use of the computer, including access to the following:

(i) Usage logs, which should include, at a minimum, computer users, dates, times of use, and amount of system time used;

(ii) Computer access authorization logs, which should include, at a minimum, computer users, project names, and purpose of projects.

(32) The end-user will also cooperate with the U.S. Government or exporting company officials concerning the physical inspection of the computer using facility, on short notice, at least once a year and will provide access to all data relevant to computer usage. This inspection will include:

(i) Analyzing any programs or software run on the computer to ensure that all usage complies with the authorized end-uses on the license. This will be done by examining user files (e.g., source codes, machine codes, input/output data) that are either on-line at the time of the inspection or that have been previously sampled and securely stored.

(ii) Checking current and archived usage logs for conformity with the authorized end-uses and the restrictions imposed by the license.

(iii) Verifying the acceptability of all computer users in conformity with the authorized end-uses and the restrictions imposed by the license.

(34) Usage requests that exceed the quantity of monthly CPU time specified on the license shall not be approved without prior written authorization from the BXA. Requests for computational access approval shall include a description of the intended purpose for which access is sought.

(35) In addition to, or in lieu of, the normal access by on-site exporting company staff or its representatives, the company, when required by the exporting government, will provide a separate remote electronic access capability to the computer for the purposes of maintenance, troubleshooting, inspection of work in progress, and auditing of all work performed on the computer. On-site and central exporting company hardware and software maintenance facilities, at the direction of the exporting company staff or its representatives, to gather information such as:

(i) Statistical profiles of production jobs;

(ii) Logs of jobs run in both production and development mode;

(iii) Logs and reports of security related events.

If such method is used, the remote maintenance facilities will be considered part of the operating system and protected accordingly, and will be available only to exporting company operational staff or its representatives. The maintenance hardware and software and associated communication links will be protected to ensure the integrity and authenticity of data and programs and to prevent tampering with hardware.

(36) The export company staff or its representatives will be required to provide personnel for a specified period of time at the computer facility for management, operation, and safeguarding of the computer.

(b) Certification by export control authorities of importing country. (1) The following importing government certification may be required under §742.12 of this part:

This is to certify that (name of ultimate consignee) has declared to (name of appropriate foreign government agency) that the computer (model name) will be used only for the purposes specified in the end-use statement and that the ultimate consignee will establish and adhere to all the safeguard conditions and perform all other undertakings described in the end-use statement.

The (name of appropriate foreign government agency) will advise the United States Government of any evidence that might reasonably indicate the existence of circumstances (e.g., transfer of ownership) that could affect the objectives of the security safeguard conditions.

(2) Other importing government assurances regarding prohibited activities may also be required on a case-by-case basis.

(c) Commercial consignees. Exports or reexports of computers that are solely dedicated to the following non-scientific and non-technical commercial business uses will usually be eligible for a reduced set of security safeguard conditions:

(1) Financial services (e.g., banking, securities and commodity exchanges);

(2) Insurance;

(3) Reservation systems;

(4) Point-of-sales systems;

(5) Mailing list maintenance for marketing purposes;

(6) Inventory control for retail/wholesale distribution.
SUPPLEMENT NO. 4 TO PART 742—KEY ESCROW OR KEY RECOVERY PRODUCTS CRITERIA

Key Recoverable Feature

(1) The key(s) or other material/information required to decrypt ciphertext shall be accessible through a key recoverable feature.
(2) The product’s cryptographic functions shall be inoperable until the key(s) or other material/information required to decrypt ciphertext is recoverable by government officials under proper legal authority and without the cooperation or knowledge of the user.
(3) The output of the product shall automatically include, in an accessible format and with a frequency of at least once every three hours, the identity of the key recovery agent(s) and information sufficient for the key recovery agent(s) to identify the key(s) or other material/information required to decrypt the ciphertext.
(4) The product’s key recoverable functions shall allow access to the key(s) or other material/information needed to decrypt the ciphertext regardless of whether the product generated or received the ciphertext.
(5) The product’s key recoverable functions shall allow for the recovery of all required decryption key(s) or other material/information required to decrypt ciphertext during a period of authorized access without requiring repeated presentations of access authorization to the key recovery agent(s).
(6) The product’s cryptographic functions may:
   (i) Interoperate with other key recoverable products that meet these criteria, and shall not interoperate with products whose key recovery feature has been altered, bypassed, disabled, or otherwise rendered inoperative;
   (ii) Send information to non-key recoverable products only when assured access is permitted to the key(s) or other material/information needed to decrypt ciphertext generated by the key recoverable product. Otherwise, key length is restricted to less than or equal to 56-bit DES or equivalent.
   (iii) Receive information from non-key recoverable products with a key length restricted to less than or equal to 56-bit DES or equivalent.

Interoperability Feature

(6) The product’s cryptographic functions may:
   (i) Interoperate with other key recoverable products that meet these criteria, and shall not interoperate with products whose key recovery feature has been altered, bypassed, disabled, or otherwise rendered inoperative;
   (ii) Send information to non-key recoverable products only when assured access is permitted to the key(s) or other material/information needed to decrypt ciphertext generated by the key recoverable product. Otherwise, key length is restricted to less than or equal to 56-bit DES or equivalent.
   (iii) Receive information from non-key recoverable products with a key length restricted to less than or equal to 56-bit DES or equivalent.

Design, Implementation and Operational Assurance

(7) The product shall be resistant to efforts to disable or circumvent the attributes described in criteria one through six.
(8) The product’s cryptographic function’s key(s) or other material/information required to decrypt ciphertext shall be accessible to government officials under proper legal authority.

SUPPLEMENT NO. 5 TO PART 742 [RESERVED]

SUPPLEMENT NO. 6 TO PART 742—GUIDELINES FOR SUBMITTING A CLASSIFICATION REQUEST FOR MASS MARKET ENCRYPTION COMMODITIES AND SOFTWARE

Classification requests for release of certain mass market encryption commodities and software from EI controls must be submitted on Form BXA-748P, in accordance with §748.3 of the EAR. To expedite review of the request, clearly mark the envelope ‘Attn.: Mass Market Encryption (Commodity) or (Software) Classification Request’. In Block 9 Special Purpose of the Form BXA-748P, you must insert the phrase ‘Mass Market Encryption (Commodity) or (Software). Failure to insert this phrase will delay processing. In addition, the Bureau of Export Administration recommends that such requests be delivered via courier service to: Bureau of Export Administration, Office of Export Services, Room 2705, 14th Street and Pennsylvania Ave., N.W., Washington, D.C. 20230. In addition, send a copy of the request and all supporting documents by Express Mail to: Attn: Mass Market Encryption Request Coordinator, P.O. Box 246, Annapolis Junction, MD 20701-0246.

(a) Requests for mass market encryption commodities and software that meet the criteria in paragraph (a)(2) of this Supplement will be processed in seven (7) working days from receipt of a properly completed request. Those requests for mass market encryption commodities and software that meet the criteria of paragraph (a)(1) of this Supplement only will be processed in fifteen (15) working days from receipt of a properly completed request. When additional information is requested, the request will be processed within 15 working days of the receipt of the requested information.

(i) A mass market product that meets the criteria established in this paragraph will be processed in fifteen (15) working days from receipt of the properly completed request:
(ii) The commodity or software must be mass market. Mass market commodities and software that are available to the public via sales from stock at retail selling points by means of over-the-counter transactions, mail order transactions, or telephone call transactions;
(iii) The commodity or software must be designed for installation by the user without further substantial support by the supplier.
Substantial support does not include telephone (voice only) help line services for installation or basic operation, or basic operation training provided by the supplier; and

(2) A mass market commodity or software product that meets all the criteria established in this paragraph will be processed in seven (7) working days from receipt of the properly completed request:

(i) The commodity or software meets all the criteria established in paragraph (a)(1)(i) through (iii) of this Supplement;

(ii) The confidentiality algorithm must be RC2, RC4, RC5, DES or CAST with a key space no longer than 56-bits. The RC2, RC4 and RC5 algorithms are proprietary to RSA Data Security, Inc. To ensure that the subject commodity or software is properly licensed and correctly implemented, contact RSA Data Security, (415) 595-8782. The CAST algorithm is proprietary to Entrust Technologies, Inc. To ensure that the subject software is properly licensed and correctly implemented, contact Entrust Technologies, Inc., (972) 994-9000;

(iii) If any combination of RC2, RC4, RC5, DES or CAST are used in the same commodity or software, their functionality must be separate. That is, no data can be operated sequentially on by both routines or multiply by either routine;

(iv) The commodity or software must not allow the alteration of the confidentiality mechanism and its associated key spaces by the user or any other program;

(v) The key exchange used in confidentiality must be:

(A) A public key algorithm with a key space less than or equal to a 512-bit, 768-bit or up to and including 1024 bit modulus and/or;

(B) A symmetric algorithm with a key space less than or equal to 112-bits; and

(vi) The commodity or software must not allow the alteration of the key management mechanism and its associated key space by the user or any other program.

(b)(1) To submit a classification request for a product that is eligible for the seven-day handling, you must provide the following information in a cover letter to the classification request. Send the original to the Bureau of Export Administration, Send a copy of the application and all supporting documentation by Express Mail to:

Attn.: Mass Market Encryption Request Coordinator, P.O. Box 246, Annapolis Junction, MD 20701-0246

(2) Instructions for the preparation and submission of a classification request that is eligible for seven day handling are as follows:

(3) If the commodity or software product meets the criteria in paragraph (a)(2) of this Supplement, you must call the Department of Commerce on (202) 482-0092 to obtain a test vector, or submit to BXA a copy of the encryption subsystem source code. The test vector or source code must be used in the classification process to confirm that the software has properly implemented the approved encryption algorithms.

(i) Clearly state at the top of the page "Mass Market Encryption (Commodity) (Software)—7 Day Expedited Review Request";

(ii) State that you have reviewed and determined that the commodity or software subject to the classification request meets the criteria of paragraph (a)(2) of this Supplement;

(iii) State the name of the single commodity or software product being submitted for review. A separate classification request is required for each product;

(iv) State how the commodity or software has been written to preclude user modification of the encryption algorithm, key management mechanism, and key space;

(v) Provide the following information for the commodity or software product:

(A) Whether the commodity or software uses the RC2, RC4, RC5, DES or CAST algorithm and how the algorithm(s) is used. If any combination of these algorithms are used in the same product, and also state how the functionality of each is separated to assure that no data is operated by more than one algorithm;

(B) Pre-processing information of plaintext data before encryption (e.g. the addition of clear text header information or compression of the data);

(C) Post-processing information of ciphertext data after encryption (e.g. the addition of clear text header information or packetization of the encrypted data);

(D) Whether a public key algorithm or a symmetric key algorithm is used to encrypt keys and the applicable key space;

(E) For classification requests regarding source code:

(1) Reference the applicable executable product that has already received a technical review;

(2) Include whether the source code has been modified by deleting the encryption algorithm, its associated key management
rutine(s), and all calls to the algorithm from the source code, or by providing the encryption algorithm and associated key management routine(s) in object code with all calls to the algorithm hidden. You must provide the technical details on how you have modified the source code;
(3) Include a copy of the sections of the source code that contain the encryption algorithm, key management routines, and their related calls; and
(F) Provide any additional information which you believe would assist in the review process.
(c) Instructions for the preparation and submission of a classification request that is eligible for 15-day handling are as follows:
(1) If the commodity or software product meets only the criteria in paragraph (a)(1) of this Supplement, you must prepare a classification request. Send the original to the Bureau of Export Administration. Send a copy of the application and all supporting documentation by Express Mail to:

Attn.: Mass Market Encryption Request Coordinator, P.O. Box 246, Annapolis Junction, MD 20701-0246

(2) You must provide the following information in a cover letter to the classification request:
(i) Clearly state at the top of the page "Mass Market Encryption (Commodity)(Software)—15 Day Expedited Review Requested";
(ii) State that you have reviewed and determined that the commodity or software subject of the classification request meets the criteria of paragraph (a)(1) of this Supplement;
(iii) State the name of the single commodity or software product being submitted for review. A separate classification request is required for each product;
(iv) State that a duplicate copy, in accordance with paragraph (c)(1) of this Supplement, has been sent to the 15-day Encryption Request Coordinator; and
(v) Ensure that the information provided includes brochures or other documentation or specifications relating to the commodity or software, as well as any additional information which you believe would assist in the review process.
(3) Contact the Bureau of Export Administration on (202) 482-0707 prior to submission of the classification to facilitate the submission of proper documentation.
[63 FR 72164, Dec. 31, 1998]
(ii) Category 2: 2B001.a or .b (certain items only; see Note to this paragraph) 2B001.d and .f, 2B003, 2D001, 2E001, and 2E002.

**NOTE TO PARAGRAPH (c)(3)(ii):** The following are not controlled for NP reasons: turning machines controlled by 2B001.a with a capacity equal to or less than 35 mm diameter; bar machines (Swissturn), limited to machining only bar feed through, if maximum bar diameter is equal to or less than 42 mm; or milling machines controlled by 2B001.b with x-axis travel greater than two meters and overall "positioning accuracy" on the x-axis more (worse) than 0.030 mm. Therefore, exports of such items under License Exception GOV are subject to reporting requirements.

(iii) Category 3: 3A002.g.2, 3B001.a.2, 3D001, and 3E001;

(iv) Category 4: 4A001.a.2 and .b, 4A003.b and .c (see paragraph (c)(2) of this section), 4D001, 4D003.c, and 4E001;

(v) Category 5: 5A001.b.8, 5B001 (items specially designed for 5A001.b.8), 5D001.a and .b, and 5E001.a;

(vi) Category 6: 6A001.a.1.b, .a.2.c, .a.2.d, and .a.2.e; 6A002.b, 6A004.c and d, 6A006.g and h, 6A008.d, .h, and .k; 6D001, 6D003.a, 6E001, and 6E002;

(vii) Category 8: 8A001.c; 8A002.b, .h, .j, .o.3.a, and .p; 8D001, 8D002, 8E001, and 8E002.a; and

(viii) Category 9: 9C001.b, 9D001, 9D002, 9D004.a and .c, 9E001, 9E002, 9E003.a.1, 9E003.a.2, .a.3, .a.4, .a.5, .a.8, and .a.9.

(2) Reports for "digital computers" and "electronic assemblies" controlled under ECCN 4A003.b and .c are required only for computers with a composite theoretical performance (CTP) exceeding 4,000 MTOPS or computer enhancements thereof such that the CTP exceeds 4,000 MTOPS. For the calculation of CTP, see the Technical Note for Category 4 in the Commerce Control List (Supplement No. 2 to part 774 of the EAR).

**NOTE TO PARAGRAPH (c)(2):** Exports of computers controlled under 4A003.b to destinations in Computer Tier 3 should not be included in the reports required under paragraph (c) of this section. Reporting for computers under 4A003.b to Computer Tier 3 destinations should be reported under the post-shipment verification reporting provisions of §742.12(b)(3)(iv) of the EAR.

(d) Country Exceptions. You must report each export subject to the provisions of this section, except for exports to Wassenaar member countries, as identified in Supplement No. 1 to part 743.

(e) Information that must be included in each report. (1) Each report submitted to BXA for items other than those identified in paragraph (e)(2) of this section must include the following information for each export during the time periods specified in paragraph (f) of this section:

(i) Export Control Classification Number and paragraph reference as identified on the Commerce Control List;

(ii) Number of units in the shipment; and

**NOTE TO PARAGRAPH (e)(1)(ii):** For exports of technology for which reports are required under §743.1(c) of this section, the number of units in the shipment should be reported as one (1) for the initial export of the technology to a single ultimate consignee. Additionally, exports of the technology must be reported only when the type or scope of technology changes or exports are made to other ultimate consignees. Additionally, do not report the release of technology or source code subject to the EAR to foreign nationals in the U.S.

(iii) Country of ultimate destination.

(2) Reports for “digital computers” and “electronic assemblies” controlled under ECCN 4A003.b and .c must include the following information:

(i) Date of shipment;

(ii) Name and address of the end-user and each intermediate consignee;

(iii) CTP of each computer or aggregation of computing elements in shipment;

(iv) Quantity shipped; and

(v) End-use.

(f) Frequency and timing of reports. You must submit reports subject to the provisions of this section semiannually. The reports must be labeled with the exporting company’s name and address at the top of each page and must include for each such export all the information specified in paragraph (e) of
§ 743.2

this section. The reports shall cover exports made during six month time periods spanning from January 1 through June 30 and July 1 through December 31.

(1) The first report must be submitted to and received by BXA no later than August 1, 1998 for the partial reporting period beginning January 15, 1998 and ending June 30, 1998. Thereafter, reports are due according to the provisions of paragraphs (f)(2) and (f)(3) of this section.

(2) Reports for the reporting period ending June 30 must be submitted to and received by BXA no later than August 1.

(3) Reports for the reporting period ending December 31 must be submitted to and received by BXA no later than February 1.

(g) Mailing address and facsimile number: (1) Two (2) copies of reports required under this section shall be delivered to one of the following addresses. BXA will not accept reports sent C.O.D.

(i) For deliveries by U.S. postal service:

Bureau of Export Administration, U.S. Department of Commerce, P.O. Box 273, Attn: "Wassenaar Reports", Washington, D.C. 20044

(ii) For courier deliveries:

(2) Reports may also be sent by facsimile to: (202) 482-3345, Attn: "Wassenaar Reports".

(h) Contacts. General information concerning the Wassenaar Arrangement and reporting obligations thereof is available from the Office of Strategic Trade and Foreign Policy Controls, Tel. (202) 482-0092, Fax: (202) 482-4094.

[63 FR 55020, Oct. 14, 1998]

PART 744—CONTROL POLICY: END-USER AND END-USE BASED

Sec. 744.1 General provisions.

744.2 Restrictions on certain nuclear end-uses.

744.3 Restrictions on certain missile end-uses.

744.4 Restrictions on certain chemical and biological weapons end-uses.

744.5 Restrictions on certain maritime nuclear propulsion end-uses.

744.6 Restrictions on certain activities of U.S. persons.

744.7 Restrictions on certain exports to and for the use of certain foreign vessels or aircraft.

744.8 Restrictions on certain exports to all countries for Libyan aircraft.
§ 744.2 Restrictions on certain nuclear end-uses.

(a) General prohibition. In addition to the license requirements for items specified on the CCL, you may not export or reexport to any destination, other than countries in the Supplement No. 3 to this part, any item subject to the EAR without a license to the extent specified in the supplement. No License Exceptions are available for exports or reexports to listed entities of specified items, except License Exceptions for items destined to listed Indian or Pakistani entities intended to ensure the safety of civil aviation and safe operation of commercial passenger aircraft (see § 744.11(b) and § 744.12(b) of this part).

§ 744.2

Indirectly in any one or more of the following activities described in paragraphs (a)(1), (a)(2), and (a)(3) of this section:

(1) Nuclear explosive activities. Nuclear explosive activities, including research on or development, design, manufacture, construction, testing or maintenance of any nuclear explosive device, or components or subsystems of such a device.23

(2) Unsafeguarded nuclear activities. Activities including research on, or development, design, manufacture, construction, operation, or maintenance of any nuclear reactor, critical facility, facility for the fabrication of nuclear fuel, facility for the conversion of nuclear material from one chemical form to another, or separate storage installation, where there is no obligation to accept International Atomic Energy Agency (IAEA) safeguards at the relevant facility or installation when it contains any source or special fissionable material (regardless of whether or not it contains such material at the time of export), or where any such obligation is not met.

(3) Safeguarded and unsafeguarded nuclear activities. Safeguarded and unsafeguarded nuclear fuel cycle activities, including research on or development, design, manufacture, construction, operation or maintenance of any of the following facilities, or components for such facilities:4

(i) Facilities for the chemical processing of irradiated special nuclear or source material;

(ii) Facilities for the production of heavy water;

(iii) Facilities for the separation of isotopes of source and special nuclear material, or

(iv) Facilities for the fabrication of nuclear reactor fuel containing plutonium.

(b) Additional prohibition on exporters or reexporters informed by BXA. BXA may inform an exporter or reexporter, either individually by specific notice or through amendment to the EAR, that a license is required for export or reexport of specified items to specified end-users, because BXA has determined that there is an unacceptable risk of use in, or diversion to, any of the activities described in paragraph (a) of this section. Specific notice is to be given only by, or at the direction of, the Deputy Assistant Secretary for Export Administration. When such notice is provided orally, it will be followed by a written notice within two working days signed by the Deputy Assistant Secretary for Export Administration. The absence of any such notification does not excuse the exporter or reexporter from compliance with the license requirements of paragraph (a) of this section.

(c) Exceptions. Despite the prohibitions described in paragraphs (a) and (b) of this section, you may export technology subject to the EAR under the operation technology and software or sales technology and software provisions of License Exception TSU (see §740.13(a) and (b)), but only to and for use in countries listed in Country Group A:1 (see Supplement No. 1 to part 740 of the EAR), Iceland and New Zealand. Notwithstanding the provisions of part 740 of the EAR, the provisions of §740.13(a) and (b) will only apply to those

4Such activities may also require a specific authorization from the Secretary of Energy pursuant to §57.b.(2) of the Atomic Energy Act of 1954, as amended, as implemented by the Department of Energy’s regulations published in 10 CFR 810.

“Know” and “reason to know”, encompasses more than positive knowledge. Thus, the use of “know” in this section in place of the former wording “know or have reason to know” does not lessen or otherwise change the responsibilities of persons subject to the EAR.

2Nuclear explosive devices and any article, material, equipment, or device specifically designed or specially modified for use in the design, development, or fabrication of nuclear weapons or nuclear explosive devices are subject to export licensing or other requirements of the Office of Defense Trade Controls, U.S. Department of State, or the licensing or other restrictions specified in the Atomic Energy Act of 1954, as amended. Similarly, items specifically designed or specifically modified for use in devising, carrying out, or evaluating nuclear weapons tests or nuclear explosions (except such items as are in normal commercial use for other purposes) are subject to the same requirements.

3Also see §§744.5 and 748.4 of the EAR for special provisions relating to technical data for maritime nuclear propulsion plants and other commodities.
overcome general prohibition five for countries listed in Country Group A:1, Iceland and New Zealand.

(d) License review standards. The following factors are among those used by the United States to determine whether to grant or deny license applications required under this section:

1. Whether the commodities, software, or technology to be transferred are appropriate for the stated end-use and whether that stated end-use is appropriate for the end-user;
2. The significance for nuclear purposes of the particular commodity, software, or technology;
3. Whether the commodities, software, or technology to be used in research on or for the development, design, manufacture, construction, operation, or maintenance of any reprocessing or enrichment facility;
4. The types of assurances or guarantees given against use for nuclear explosive purposes or proliferation in the particular case;
5. Whether the end-user has been engaged in clandestine or illegal procurement activities;
6. Whether an application for a license to export to the end-user has previously been denied, or whether the end-use has previously diverted items received under a license, License Exception, or NLR to unauthorized activities;
7. Whether the export would present an unacceptable risk of diversion to a nuclear explosive activity or unsafeguarded nuclear fuel-cycle activity described in §744.2 of this part; and
8. The nonproliferation credentials of the importing country, based on consideration of the following factors:
   i. Whether the importing country is a party to the Nuclear Non-Proliferation Treaty (NPT) or to the Treaty for the Prohibition of Nuclear Weapons in Latin America (Treaty of Tlatelolco) (see Supplement No. 2 to part 740 of the EAR); or to a similar international legally-binding nuclear nonproliferation agreement;
   ii. Whether the importing country has all of its nuclear activities, facilities or installations that are operational, being designed, or under construction, under international Atomic Energy Agency (IAEA) safeguards or equivalent full scope safeguards;
   iii. Whether there is an agreement for cooperation in the civil uses of atomic energy between the U.S. and the importing country;
   iv. Whether the actions, statements, and policies of the government of the importing country are in support of nuclear nonproliferation and whether that government is in compliance with its international obligations in the field of nonproliferation;
   v. The degree to which the government of the importing country cooperates in nonproliferation policy generally (e.g., willingness to consult on international nonproliferation issues);
   vi. Intelligence data on the importing country’s nuclear intentions and activities.

§744.3 Restrictions on certain missile end-uses.

(a) General prohibition. In addition to the license requirements for items specified on the CCL, you may not export or reexport an item subject to the EAR without a license if at the time of the export or reexport you know the item:

1. Is destined to or for a project listed in the footnote to Country Group D:4 (see Supplement No. 1 to part 740 of the EAR); or
2. Will be used in the design, development, production or use of missiles in or by a country listed in Country Group D:4, whether or not that use involves a listed project.

(b) Additional prohibition on exporters informed by BXA. BXA may inform the exporter or reexporter, either individually by specific notice or through amendment to the EAR, that a license is required for a specific export or reexport, or for exports or reexports of specified items to a certain end-user, because there is an unacceptable risk of use in or diversion to activities described in paragraph (a) of this section, anywhere in the world. Specific notice is to be given only by, or at the direction of, the Deputy Assistant Secretary for Export Administration. When such
§ 744.4 Restrictions on certain chemical and biological weapons end-uses.

(a) General prohibition. In addition to the license requirements for items specified on the CCL, you may not export or reexport an item subject to the EAR without a license if at the time of the export or reexport you know the item will be used in the design, development, production, stockpiling, or use of chemical or biological weapons or by a country listed in Country Group D:3 (see Supplement No. 1 to part 740 of the EAR).

(b) Additional prohibition on exporters informed by BXA. BXA may inform the exporter or reexporter, either individually by specific notice or through amendment to the EAR, that a license is required for a specific export or reexport, or for export or reexport of specified items to a certain end-user, because there is an unacceptable risk of use or diversion to such activities, anywhere in the world. Specific notice is to be given only by, or at the direction of, the Deputy Assistant Secretary for Export Administration. When such notice is provided orally, it will be followed by a written notice within two working days signed by the Deputy Assistant Secretary for Export Administration. However, the absence of any such notification does not excuse the exporter from compliance with the license requirements of paragraph (a) of this section.

(c) Exceptions. No License Exceptions apply to the prohibitions described in paragraph (a) and (b) of this section.

(d) License review standards. (1) Applications to export or reexport items subject to this section will be considered on a case-by-case basis to determine whether the export or reexport would make a material contribution to the proliferation of missiles. When an export is deemed to make a material contribution, the license will be denied.

(2) The following factors are among those that will be considered to determine what action should be taken on an application required under this section:

(i) The specific nature of the end-use;

(ii) The significance of the export in terms of its contribution to the design, development, production, or use of missiles;

(iii) The capabilities and objectives of the missile and space programs of the recipient country;

(iv) The non-proliferation credentials of the importing country;

(v) The types of assurances or guarantees against design, development, production or use for missiles delivery purposes that are given in a particular case; and

(vi) The existence of a pre-existing contract.

§ 744.5 Restrictions on certain maritime nuclear propulsion end-uses.

(a) General prohibition. In addition to the license requirements for items specified on the CCL, you may not export or reexport certain technology subject to the EAR without a license if at the time of the export or reexport you know the item is for use in connection with a foreign maritime nuclear propulsion project. This prohibition applies to any technology relating to maritime nuclear propulsion plants, their land prototypes, and special facilities for their construction, support, or maintenance, including any machinery, devices, components, or equipment specifically developed or designed for use in such plants or facilities.

(b) Exceptions. The exceptions provided in part 740 of the EAR do not apply to the prohibitions described in paragraph (a) of this section.

(c) License review standards. It is the policy of the United States Government not to participate in and not to authorize United States firms or individuals to participate in foreign naval nuclear propulsion plant projects, except under an Agreement for Cooperation on naval nuclear propulsion executed in accordance with §123(d) of the Atomic Energy Act of 1954. However, it is the policy of the United States Government to encourage United States firms and individuals to participate in maritime (civil) nuclear propulsion plant projects in friendly foreign countries provided that United States naval nuclear propulsion information is not disclosed.

§ 744.6 Restrictions on certain activities of U.S. persons.

(a) General prohibitions—(1) Activities related to exports. (i) No U.S. person as defined in paragraph (c) of this section may, without a license from BXA, export, reexport, or transfer to or in any country any item where that person knows that such items:

(A) Will be used in the design, development, production, or use of nuclear explosive devices in or by a country listed in Country Group D:2 (see Supplement No. 1 to part 740 of the EAR).

(B) Will be used in the design, development, production, or use of missiles in or by a country listed in Country Group D:4 (see Supplement No. 1 to part 740 of the EAR); or

(C) Will be used in the design, development, production, stockpiling, or use of chemical or biological weapons in or by a country listed in Country Group D:3 (see Supplement No. 1 to part 740 of the EAR).

(ii) No U.S. person shall, without a license from BXA, knowingly support an export, reexport, or transfer that does not have a license as required by this section. Support means any action, including financing, transportation, and freight forwarding, by which a person facilitates an export, reexport, or transfer without being the actual exporter or reexporter.

(2) Other activities unrelated to exports. No U.S. person shall, without a license from BXA:

(i) Perform any contract, service, or employment that the U.S. person knows will directly assist in the design, development, production, or use of missiles in or by a country listed in Country Group D:4 (see Supplement No. 1 to part 740 of the EAR); or

(ii) Perform any contract, service, or employment that the U.S. person knows will directly assist in the design, development, production, stockpiling, or use of chemical or biological weapons in or by a country listed in Country Group D:3 (see Supplement No. 1 to part 740 of the EAR).
§ 744.7 Restrictions on certain exports to and for the use of certain foreign vessels or aircraft.

(a) General end-use prohibition. In addition to the license requirements for items specified on the CCL, you may not export or reexport an item subject to the EAR, to, or for the use of, a foreign vessel or aircraft, whether an operating vessel or aircraft or one under construction, located in any port including a Canadian port, unless a License Exception or NLR permits the shipment to be made:

(1) To the country in which the vessel or aircraft is located, and

(2) To the country in which the vessel or aircraft is registered, or will be registered in the case of a vessel or aircraft under construction, and

(3) To the country, including a national thereof, which is currently controlling, leasing, or chartering the vessel or aircraft.

(b) Exception for U.S. and Canadian carriers. (1) Notwithstanding the general end-use prohibition in paragraph (a) of this section, export and reexport may be made of the commodities described in paragraph (b)(3) of this section, for use by or on a specific vessel or plane of U.S. or Canadian registry located at any seaport or airport outside the United States or Canada except a port in North Korea or Country Group D:1 (excluding the PRC and Romania), (see Supplement No. 1 to part 740) provided that such commodities are all of the following:

(i) Ordered by the person in command or the owner or agent of the vessel or plane to which they are consigned;

(ii) Intended to be used or consumed on board such vessel or plane and necessary for its proper operation;

(iii) In usual and reasonable kinds and quantities during times of extreme need, except that usual and reasonable quantities of ship's bunkers or aviation fuel are considered to be only that quantity necessary for a single onward voyage or flight; and

(iv) Shipped as cargo for which a Shipper's Export Declaration (SED) is filed with the carrier, except that an SED is not required when any of the

Where a license is required, see §§ 748.2 and 748.4(g) of the EAR.

(3) Whole plant requirement. No U.S. person shall, without a license from BXA, participate in the design, construction, export, or reexport of a whole plant to make chemical weapons precursors identified in ECCN 1C350, in countries other than those listed in Country Group A:3 (Australia Group) (See Supplement No. 1 to part 740 of the EAR).

(b) Additional prohibitions on U.S. persons informed by BXA. BXA may inform U.S. persons, either individually or through amendment to the EAR, that a license is required because an activity could involve the types of participation and support described in paragraph (a) of this section anywhere in the world.

Specific notice is to be given only by, or at the direction of, the Deputy Assistant Secretary for Export Administration. When such notice is provided orally, it will be followed by a written notice within two working days signed by the Deputy Assistant Secretary for Export Administration. However, the absence of any such notification does not excuse the exporter from compliance with the license requirements of paragraph (a) of this section.

(c) Definition of U.S. person. For purposes of this section, the term U.S. person includes:

(1) Any individual who is a citizen of the United States, a permanent resident alien of the United States, or a protected individual as defined by 8 U.S.C. 1324b(a)(3);

(2) Any juridical person organized under the laws of the United States or any jurisdiction within the United States, including foreign branches; and

(3) Any person in the United States.

(d) Exceptions. No License Exceptions apply to the prohibitions described in paragraphs (a) and (b) of this section.

(e) License review standards. Applications to engage in activities otherwise prohibited by this section will be denied if the activities would make a material contribution to the design, development, production, stockpiling, or use of nuclear explosive devices, chemical or biological weapons, or of missiles.

commodities, other than fuel, is exported by U.S. airlines to their own aircraft abroad for their use.

(2) Exports to U.S. or Canadian Airline’s Installation or Agent. Exports and reexports of the commodities described in paragraph (e) of this section, except fuel, may be made to a U.S. or Canadian airline’s installation or agent in any foreign destination except North Korea or Country Group D:1 (excluding the PRC and Romania), (see Supplement No. 1 to part 740) provided such commodities are all of the following:

(i) Ordered by a U.S. or Canadian airline and consigned to its own installation or agent abroad;

(ii) Intended for maintenance, repair, or operation of aircraft registered in either the United States or Canada, and necessary for the aircraft’s proper operation, except where such aircraft is located in, or owned, operated or controlled by, or leased or chartered to, North Korea or Country Group D:1 (excluding the PRC) (see Supplement No. 1 to part 740) or a national of such country;

(iii) In usual and reasonable kinds and quantities; and

(iv) Shipped as cargo for which a Shipper’s Export Declaration (SED) is filed with the carrier, except that an SED is not required when any of these commodities is exported by U.S. airlines to their own installations and agents abroad for use in their aircraft operations.

(3) Applicable commodities. This § 744.7 applies to the commodities listed subject to the provisions in paragraph (b) of this section:

(i) Fuel, except crude petroleum and blends of unrefined crude petroleum with petroleum products, which is of non-Naval Petroleum Reserves origin or derivation (refer to short supply controls in part 754 of the EAR);

(ii) Deck, engine, and steward department stores, provisions, and supplies for both port and voyage requirements, except crude petroleum, provided that any commodities which are listed in Supplement No. 2 to part 754 of the EAR are of non-Naval Petroleum Reserves origin or derivation (refer to short supply controls in part 754 of the EAR);

(iii) Medical and surgical supplies;

(iv) Food stores;

(v) Slop chest articles;

(vi) Saloon stores or supplies; and

(vii) Equipment and spare parts.

§ 744.8 Restrictions on certain exports to all countries for Libyan aircraft.

(a) General end-use prohibition for Libyan aircraft. In addition to the license requirements for items specified on the CCL, you may not export or reexport to any destination such parts and accessories specified in paragraph (b) of this section if intended for use in the manufacture, overhaul, or rehabilitation in any country of aircraft that will be exported or reexported to Libya or Libyan nationals.

(b) Scope of products subject to end-use prohibition for Libyan aircraft. The general end-use prohibition in paragraph (a) of this section applies to items controlled by ECCNs 6A008, 6A108, 6A998, 7A001, 7A002, 7A003, 7A004, 7A006, 7A101, 7A102, 7A103, 7A104, 7A994, 9A001, 9A003, 9A018.a, 9A101, and 9A991.

§ 744.9 Restrictions on technical assistance by U.S. persons with respect to encryption items.

(a) General prohibition. No U.S. person may, without a license from BXA, provide technical assistance (including training) to foreign persons with the intent to aid a foreign person in the development or manufacture outside the United States of encryption commodities and software that, if of United States origin, would be controlled for “EI” reasons under ECCN 5A002 or 5D002. Note that this prohibition does not apply if the U.S. person providing the assistance has a license or is otherwise entitled to export the encryption commodities and software in question to the foreign person(s) receiving the assistance. Note in addition that the mere teaching or discussion of information about cryptography, including, for example, in an academic setting, by itself would not establish the intent described in this section, even where foreign persons are present.

(b) Definition of U.S. person. For purposes of this section, the term U.S. person includes:

...
15 CFR Ch. VII (1–1–00 Edition) § 744.10

(1) Any individual who is a citizen or permanent resident alien of the United States;
(2) Any juridical person organized under the laws of the United States or any jurisdiction within the United States, including foreign branches; and
(3) Any person in the United States.

(c) License review standards. Applications involving activities described in this section will be reviewed on a case-by-case basis to determine whether the activity is consistent with U.S. national security and foreign policy interests.

[61 FR 68584, Dec. 30, 1996]

§ 744.10 Restrictions on certain entities in Russia.

(a) General prohibition. Certain entities in Russia are included in Supplement No. 4 to this part 744 (Entity List). (See also §744.1(c) of the EAR.) Exporters are hereby informed that these entities are ineligible to receive any items subject to the EAR without a license.

(b) Exceptions. No License Exceptions apply to the prohibition described in paragraph (a) of this section.

(c) License review standards. Applications to export or reexport items subject to the EAR to these entities will be reviewed with a presumption of denial.

[64 FR 14605, Mar. 26, 1999]

§ 744.11 Restrictions on certain government, parastatal, and private entities in Pakistan and India.

To supplement sanctions measures against India and Pakistan, set forth in § 742.16 of the EAR, a prohibition is imposed on exports and reexports to certain government, parastatal, and private entities in India and Pakistan determined to be involved in nuclear or missile activities. With respect to subordinates of listed entities in India and Pakistan, only those specifically listed in Supplement No. 4 to part 744, Entity List, are subject to the restrictions and policies set forth in this section. The addition of entities to Supplement No. 4 to part 744, Entity List, does not relieve you of your obligations under General Prohibition 5 in §736.2(b)(5) of the EAR: “you may not, without a license, knowingly export or reexport any item subject to the EAR to an end-user or end-use that is prohibited by part 744 of the EAR.” You are urged to use the guidance in Supplement No. 3 to part 732 of the EAR, “BXA’s ‘Know Your Customer’ Guidance and Red Flags” when exporting or reexporting to India and Pakistan.

(a) General restriction. Certain government, parastatal, and private entities in India and Pakistan determined to be involved in nuclear or missile activities are included in Supplement No. 4 to this part 744 (Entity List). (See also §744.1(c) of the EAR.) These entities are ineligible to receive exports or reexports of items subject to the EAR without a license. Exports and reexports of all items subject to the EAR to listed government, parastatal, and private entities require a license. A license is also required if you know that the ultimate consignee or end-user is a listed government, parastatal, or private Indian or Pakistani entity, and the item is subject to the EAR.

(b) Exceptions. No License Exceptions are available to the entities described in paragraph (a) of this section, except those applicable to items listed in §740.2(a)(5) of the EAR, which remain available to such entities when intended to ensure the safety of civil aviation and safe operation of commercial passenger aircraft.

(c) License review standards. (1) Government entities. Applications to export or reexport items controlled for NP or MT reasons to listed government entities will be denied, except items intended for the preservation of safety of civil aircraft, which will be reviewed on a case-by-case basis; and computers, which will be reviewed with a presumption of denial. All other items subject to the EAR to these listed entities will be reviewed with a presumption of denial.

(2) Parastatal and Private entities. Applications to export or reexport items controlled for NP or MT reasons to certain parastatal and private entities will be denied, except items intended to ensure the safety of civil aviation and safe operation of commercial passenger aircraft, which will be reviewed on a case-by-case basis; and computers,
which will be reviewed with a presumption of denial. All other items subject to the EAR to these listed entities will be reviewed with a presumption of denial. Except for items controlled for NP or MT reasons, exports or reexports to listed parastatals and private entities with whom you have a preexisting business arrangement will be considered on a case-by-case basis, with a presumption of approval in cases where neither the arrangement nor the specific transaction involves nuclear or missile activities and the exports or reexports are pursuant to that arrangement. The term “business arrangement” covers the full range of business agreements, including general contracts, general terms agreements (e.g., agreements whereby the seller delivers products under purchase orders to be issued by the buyer), general business agreements, offset agreements, letter agreements that are stand-alone contracts, and letter agreements that are amendments to existing contracts or other agreements. The terms of the preexisting business arrangement policy may also apply to the longstanding continued supply of a particular item or items from the exporter to the entity even when there is no current agreement between the firms. BXA, in conjunction with other agencies, will determine eligibility under the preexisting business arrangement policy. In order to be eligible under the policy, you must provide documentation to establish such an arrangement. The documentation should be provided at the time you submit a license application to export or reexport items to any listed parastatal or private entity.

§ 744.12 Restrictions on certain military entities in Pakistan and India.

(a) General restriction. Certain military entities in India and Pakistan are included in Supplement No. 4 to this part 744 (Entity List). These entities are ineligible to receive exports or reexports of all items subject to the EAR having a classification other than EAR99 without a license. Exports and reexports of all items subject to the EAR having a classification other than EAR99 to listed military entities require a license. A license is also required if you know that the ultimate consignee or end-user is a listed military Indian or Pakistani entity, and the item is subject to the EAR having a classification other than EAR99.

(b) Exceptions. No License Exceptions are available to the entities described in paragraph (a) of this section, except those applicable to items listed in § 740.2(a)(5) of the EAR, which remain available to such entities when intended to ensure the safety of civil aviation and safe operation of commercial passenger aircraft.

(c) License review policy. Applications to export or reexport items controlled for NP or MT reasons to listed military entities will be denied, except items intended to ensure the safety of civil aviation and safe operation of commercial passenger aircraft, which will be reviewed on a case-by-case basis; and computers, which will be reviewed with a presumption of denial. All other license applications will be reviewed with a presumption of denial.

§ 744.13 Restrictions on exports and certain reexports to specially designated terrorists.

Consistent with the purpose of Executive Order 12947 of January 23, 1995, BXA maintains restrictions on exports and certain reexports to Specially Designated Terrorists. Executive Order 12947 prohibits transactions by U.S. persons with terrorists who threaten to disrupt the Middle East peace process. Pursuant to the Executive Order, the Department of the Treasury, Office of Foreign Assets Control (OFAC), maintains 31 CFR part 595, the Terrorism Sanctions Regulations. In the Appendices to 31 CFR Chapter V, pursuant to 31 CFR part 595, these Specially Designated Terrorists are identified by the bracketed suffix initials [SDT]. The requirements set forth below further the objectives of Executive Order 12947.

(a) License requirement(s). (1) All exports and reexports to an SDT by a U.S. person of any item subject to the EAR; and

(2) A license requirement applies to all exports and reexports to an SDT by a U.S. person of any item subject to the EAR on the Commerce Control List (CCL).
§ 744.14 Restrictions on exports and certain reexports to designated foreign terrorist organizations.

Consistent with the objectives of sections 302 and 303 of the Anti-Terrorism Act and Effective Death Penalty Act (Anti-Terrorism Act) (Pub.L. 104-132, 110 Stat. 1214-1319), BXA maintains restrictions on exports and certain reexports to designated Foreign Terrorist Organizations. The Secretary of State has designated certain designated Foreign Terrorist Organizations pursuant to section 302 of the Anti-Terrorism Act. Also pursuant to section 302 of the Anti-Terrorism Act, the Department of the Treasury, Office of Foreign Assets Control, maintains 31 CFR part 597, the Foreign Terrorist Organizations Sanctions Regulations, requiring U.S. financial institutions to block all financial transactions involving assets of designated Foreign Terrorist Organizations within the possession or control of such U.S. financial institutions. Section 303 of the Anti-Terrorism Act prohibits persons within the United States or subject to U.S. jurisdiction from knowingly providing material support or resources to a designated Foreign Terrorist Organization and makes violations punishable by criminal penalties under title 18, United States Code. These designated Foreign Terrorist Organizations are listed in the Appendices to 31 CFR Chapter V and identified by the bracketed suffix initials [FTO]. The export control requirements set forth below further the objectives of the Anti-Terrorism Act.

(a) License requirement(s). A license requirement applies to:

1. All exports and reexports to an FTO of any item subject to the EAR on the Commerce Control List (CCL); and
2. All exports and reexports to an FTO by a U.S. person of any item subject to the EAR.

(b) Exceptions. No License Exceptions or other BXA authorization for items described by paragraph (a) of this section are available for exports or reexports to SDTs.

(c) Licensing policy. Applications for licenses required by paragraph (a) of this section generally will be denied. You should consult with OFAC concerning transactions subject to OFAC licensing requirements.

(d) Contract sanctity. Contract sanctity provisions are not available for license applications reviewed under this section.

NOTE TO § 744.14: This section does not implement, construe, or limit the scope of any criminal statute, including (but not limited to) 18 U.S.C. 2339A(b), and does not excuse any person from complying with
any criminal statute, including (but not limited to) 18 U.S.C. 2339B(a)(1) and 18 U.S.C. 2339A.

[64 FR 1122, Jan. 8, 1999]

Supplement No. 1 to Part 744
[Reserved]

Supplement No. 2 to Part 744
[Reserved]

Supplement No. 3 to Part 744—Countries Not Subject to Certain Nuclear End-Use Restrictions in §744.2(a)

Australia
Belgium

Canada

New Zealand
Norway
Portugal
Spain
Turkey
United Kingdom

This Supplement lists certain entities subject to license requirements for specified items under this part 744 of the EAR. License requirements for these entities includes exports and reexports, unless otherwise stated. This list of entities is revised and updated on a periodic basis in this Supplement by adding new or amended notifications and deleting notifications no longer in effect.

Meteorological Rocket Station, a.k.a. Interim Test Range (ITR), Indian Space Research Organization (ISRO), Department of Space, Balasore.

The Mineral Sand Separation Complex, a.k.a. Orissa Sands Complex (OSCOM), India Rare Earths, Ltd. (IREL), Department of Atomic Energy (DAE), Chhatapur in the Gajapati District of Orissa.

Minerals Recovery Plant, India Rare Earths, Ltd. (IREL), Chavara.

Mishra Dhatu Nigam, Ltd. (MIDHAN), Hyderabad. For all items subject to the EAR. See §744.11(c)(1) of this part. 63 FR 64322, 11/19/98.

The Missile Research and Development Complex, Defence Research and Development Laboratory (DRDL), Defence Research and Development Organization (DRDO), Imarat, Hyderabad. For all items subject to the EAR. See §744.11(c)(1) of this part. 63 FR 64322, 11/19/98.

Muradnagar Ordnance Factory, Kirkee High Explosives Factory, Ordnance Factory Board, Department of Defense Production and Supplies, Ministry of Defense. For all items subject to the EAR having a classification other than EAR99. See §744.12(c) of this part. 63 FR 64322, 11/19/98.

Nangal Heavy Water Production Facility, Heavy Water Board, Department of Atomic Energy (DAE), Nangal.

Narora Atomic Power Station (NAPS), The Nuclear Power Corporation of India, Ltd. (NPCIL), Bulandshahr in Uttar Pradesh. For all items subject to the EAR. See §744.11(c)(2) of this part. 63 FR 64322, 11/19/98.

Narwapahar Uranium Mine and Mill, Uranium Corporation of India, Ltd. (UCIL), Department of Atomic Energy (DAE), Narwapahar. For all items subject to the EAR. See §744.11(c)(2) of this part. 63 FR 64322, 11/19/98.

National Aerospace Laboratory, Bangalore. For all items subject to the EAR. See §744.11(c)(1) of this part. 63 FR 64322, 11/19/98.

National Test Range, Defence Research and Development Organization (DRDO), Bangalore. For all items subject to the EAR. See §744.11(c)(1) of this part. 63 FR 64322, 11/19/98.

National Trisonic Aerodynamic Facility, National Aerospace Laboratory, Bangalore. For all items subject to the EAR. See §744.11(c)(1) of this part. 63 FR 64322, 11/19/98.

Naval Chemical and Metallurgical Laboratory (NCP), Defence Research and Development Organization (DRDO), Mumbai (formerly Bombay). For all items subject to the EAR. See §744.11(c)(1) of this part. 63 FR 64322, 11/19/98.

Naval Physical and Oceanographic Laboratory (Nprevious), Defence Research and Development Organization (DRDO), Cochin. For all items subject to the EAR. See §744.11(c)(1) of this part. 63 FR 64322, 11/19/98.

Naval Science and Technological Laboratory (NSTL), Defence Research and Development Organization (DRDO), Vishakhapatnam. For all items subject to the EAR. See §744.11(c)(1) of this part. 63 FR 64322, 11/19/98.

New Zirconium Sponge Plant, Nuclear Fuel Complex (NFC), Department of Atomic Energy (DAE), Hyderabad. For all items subject to the EAR. See §744.11(c)(1) of this part. 63 FR 64322, 11/19/98.

The Nuclear Power Corporation of India, Ltd. (NPCIL), Mumbai (formerly Bombay). For all items subject to the EAR. See §744.11(c)(2) of this part. 63 FR 64322, 11/19/98.

PART 745—CHEMICAL WEAPONS CONVENTION REQUIREMENTS

Sec. 745.1 Advance notification and annual report of all exports of Schedule 1 chemicals to other States Parties.

745.2 End-Use Certificate reporting requirements under the Chemical Weapons Convention.

SUPPLEMENT NO. 1 TO PART 745—SCHEDULES OF CHEMICALS

SUPPLEMENT NO. 2 TO PART 745—STATES PARTIES TO THE CONVENTION ON THE PROHIBITION OF THE DEVELOPMENT, PRODUCTION, STOCKPILING, AND USE OF CHEMICAL WEAPONS AND ON THEIR DESTRUCTION

SUPPLEMENT NO. 3 TO PART 745—FOREIGN GOVERNMENT AGENCIES RESPONSIBLE FOR ISSUING END-USE CERTIFICATES PURSUANT TO §745.2

SOURCE: 64 FR 27143, May 18, 1999, unless otherwise noted.

§ 745.1 Advance notification and annual report of all exports of Schedule 1 chemicals to other States Parties.

Pursuant to the Convention, the United States is required to notify the Organization for the Prohibition of Chemical Weapons (OPCW) not less than 30 days in advance of every export of a Schedule 1 chemical, in any quantity, to another State Party. In addition, the United States is required to provide a report of all exports of Schedule 1 chemicals to other States Parties during each calendar year. If you plan to export any quantity of a Schedule 1 chemical controlled under the EAR and licensed by the Department of Commerce or controlled under the ITAR and licensed by the Department of State, you are required to notify the Department of Commerce or the Department of State in advance of this export. You are also required to provide an annual report of exports that actually occurred during the previous calendar year. The United States will transmit the advance notifications and an aggregate annual report to the OPCW of exports of Schedule 1 chemicals from the United States. Note that the notification and annual report requirements of this section do not relieve the exporter of any requirement to obtain a license from the Department of Commerce for the export of Schedule 1 chemicals subject to the EAR or from the Department of State for the export of Schedule 1 chemicals subject to the ITAR.

(a) Advance notification of exports. You must notify BXA at least 45 calendar days prior to exporting any quantity of a Schedule 1 chemical listed in Supplement No. 1 to this part to another State Party. This is in addition to the requirement to obtain an export license under the EAR for chemicals controlled by ECCN 1C350 or 1C351 for any reason for control, or from the Department of State for Schedule 1 chemicals controlled under the ITAR.

Note that such notifications may be sent to BXA prior to or after submission of a license application to BXA for Schedule 1 chemicals controlled subject to the EAR and under ECCNs 1C350 or 1C351 or to the Department of State for Schedule 1 chemicals controlled on the ITAR. Such notices must be submitted separately from license applications.

(1) Such notification should be on company letterhead or must clearly identify the reporting entity by name of company, complete address, name of contact person and telephone and fax numbers, along with the following information:

(i) Common Chemical Name;
(ii) Structural formula of the chemical;
(iii) Chemical Abstract Service (CAS) Registry Number;
(iv) Quantity involved in grams;
(v) Planned date of export;
(vi) Purpose (end-use) of export;
(vii) Name of recipient;
(viii) Complete street address of recipient;
(ix) Export license or control number, if known; and
(x) Company identification number, once assigned by BXA.

(2) Send the notification by fax to (703) 235-1481 or to the following address, for mail and courier deliveries: Information Technology Team, Department of Commerce, Bureau of Export Administration, 1555 Wilson Boulevard, Suite 710, Arlington, VA 22209. Attn:
§ 745.2 Advance Notification of Schedule 1 Chemical Export.

(3) Upon receipt of the notification, BXA will inform the exporter of the earliest date the shipment may occur under the notification procedure. To export the Schedule 1 chemical, the exporter must have applied for and been granted a license (see §§ 742.2 and 742.18 of the EAR, or the ITAR at 22 CFR part 121).

(b) Annual report of exports. (1) You must report all exports of any quantity of a Schedule 1 chemical to another State Party during the previous calendar year, starting with exports taking place during calendar year 1997. Reports for exports during calendar years 1997 and 1998 are due to the Department of Commerce August 16, 1999. Thereafter, annual reports of exports are due on February 13 of the following calendar year. The report should be on company letterhead or must clearly identify the reporting entity by name of company, complete address, name of contact person and telephone and fax numbers along with the following information for each export:

(i) Common Chemical Name;
(ii) Structural formula of the chemical;
(iii) CAS Registry Number;
(iv) Quantity involved in grams;
(v) Date of export;
(vi) Export license number;
(vii) Purpose (end-use) of export;
(viii) Name of recipient;
(ix) Complete address of recipient, including street address, city and country; and (x) Company identification number, once assigned by BXA.

(2) The report must be signed by a responsible party, certifying that the information provided in the annual report is, to the best of his/her knowledge and belief, true and complete.

(3) Send the report by fax to (703) 235-1481 or to the following address, for mail and courier deliveries: Information Technology Team, Department of Commerce, Bureau of Export Administration, 1555 Wilson Boulevard, Suite 710, Arlington, VA 22209. Attn: “Annual Report of Schedule 1 Chemical Export”.

§ 745.2 End-Use Certificate reporting requirements under the Chemical Weapons Convention.

NOTE: The End-Use Certificate requirement of this section does not relieve the exporter of any requirement to obtain a license from the Department of Commerce for the export of Schedule 2 or Schedule 3 chemicals subject to the Export Administration Regulations or from the Department of State for the export of Schedule 2 or Schedule 3 chemicals subject to the International Traffic in Arms Regulations.

(a)(1) No U.S. person, as defined in §744.6(c) of the EAR, may export from the United States any Schedule 2 or Schedule 3 chemical identified in Supplement No. 1 to this part to countries not party to the Chemical Weapons Convention (destinations not listed in Supplement No. 2 to this part) unless the U.S. person obtains from the consignee an End-Use Certificate issued by the government of the importing destination. This Certificate must be issued by the foreign government’s agency responsible for foreign affairs or any other agency or department designated by the importing government for this purpose. Supplement No. 3 to this part includes foreign authorized agencies responsible for issuing End-Use Certificates pursuant to this section. Additional foreign authorized agencies responsible for issuing End-Use Certificates will be included in Supplement No. 3 to this part when known. End-Use Certificates may be issued to cover aggregate quantities against which multiple shipments may be made to a single consignee. An End-Use Certificate covering multiple shipments may be used until the aggregate quantity is shipped. End-Use Certificates must be submitted separately from license applications.

(2) Submit a copy of the End-Use Certificate to the Department of Commerce by fax at (703) 235-1481 or to the following address no later than 7 days after the date of export, for mail and courier deliveries: Information Technology Team, Department of Commerce, Bureau of Export Administration, 1555 Wilson Boulevard, Suite 710, Arlington, VA 22209. Attn: CWC End-Use Certificate Report.

(b) The End-Use Certificate described in paragraph (a) of this section must state the following:
(1) That the chemicals will be used only for purposes not prohibited under the Chemical Weapons Convention;
(2) That the chemicals will not be transferred to other end-user(s) or end-use(s);
(3) The types and quantities of chemicals;
(4) Their specific end-use(s); and
(5) The name(s) and complete address(es) of the end-user(s).

[SCHEDULES OF CHEMICALS]

**Supplement No. 1 to Part 745—Schedules of Chemicals**

### A. Toxic chemicals:

#### (1) O-Alkyl (≤C₆H₄) alkyl (Me, Et, n-Pr or i-Pr)-phosphonofluoridates

1Two of the three offices (Export Processing Zone Administration and the Science-Based Industrial Park Administration) are in special economic zones and are responsible for the activity in their respective zones.
Two of the three offices (Export Processing Zone Administration and the Science-Based Industrial Park Administration) are in special economic zones and are responsible for the activity in their respective zones.
Bureau of Export Administration, Commerce

§ 746.2 Cuba.

(a) License requirements. As authorized by section 6 of the Export Administration Act of 1979, as amended (EAA) and by the Trading with the Enemy Act of 1917, as amended, you will need a license to export or reexport all items subject to the EAR (see part 734 of the EAR for the scope of items subject to the EAR) to Cuba, except as follows.

(i) Temporary exports and reexports (TMP) by the news media (see § 740.9(a)(2)(viii) of the EAR).

(ii) Operation technology and software (TSU) for legally exported commodities (see § 740.13(a) of the EAR).

(iii) Sales technology (TSU) (see § 740.13(b) of the EAR).

(iv) Software updates (TSU) for legally exported software (see § 740.13(c) of the EAR).
(v) Parts (RPL) for one-for-one replacement in certain legally exported commodities (see §740.10(a) of the EAR).

(vi) Baggage (BAG) (see §740.14 of the EAR).

(vii) Governments and international organizations (GOV) (see §740.11 of the EAR).

(viii) Gift parcels and humanitarian donations (GFT) (see §740.12 of the EAR).

(ix) Items in transit (TMP) from Canada through the U.S. (see §740.9(b)(1)(iv) of the EAR).

(x) Aircraft and vessels (AVS) for certain aircraft on temporary sojourn (see §740.15(a) of the EAR).

(xi) Permissive reexports of certain spare parts in foreign-made equipment (see §740.16(h) of the EAR).

(2) [Reserved]

(b) Licensing policy. Items requiring a license are subject to a general policy of denial, except as follows:

(1) Medicines, medical supplies, instruments and equipment. Applications to export medicines, medical supplies, instruments and equipment will generally be approved, except:

(i) To the extent restrictions would be permitted under section 5(m) of the Export Administration Act of 1979, as amended (EAA), or section 203(b)(2) of the International Emergency Economic Powers Act;

(ii) If there is a reasonable likelihood that the item to be exported will be used for purposes of torture or other human rights abuses;

(iii) If there is a reasonable likelihood that the item to be exported will be reexported;

(iv) If the item to be exported could be used in the production of any biotechnological product; or

(v) If it is determined that the United States government is unable to verify, by on-site inspection or other means, that the item to be exported will be used for the purpose for which it was intended and only for the use and benefit of the Cuban people, but this exception shall not apply to donations of medicines for humanitarian purposes to a nongovernmental organization in Cuba.

(2) Telecommunications commodities may be authorized on a case-by-case basis, provided the commodities are part of an FCC-approved project and are necessary to provide efficient and adequate telecommunications services between the United States and Cuba.

(3) Exports from third countries to Cuba of non-strategic foreign-made products that contain an insubstantial proportion of U.S.-origin materials, parts, or components will generally be considered favorably on a case-by-case basis, provided all of the following conditions are satisfied:

(i) The local law requires, or policy favors, trade with Cuba;

(ii) The U.S.-origin content does not exceed 20 percent of the value of the product to be exported from the third country. Requests where the U.S.-origin parts, components, or materials represent more than 20 percent by value of the foreign-made product will generally be denied. See Supplement No. 2 to part 734 of the EAR for instructions on how to calculate value; and

(iii) You are not a U.S.-owned or -controlled entity in a third country as defined by OFAC regulations, 31 CFR part 515, or you are a U.S.-owned or controlled entity in a third country and one or more of the following situations applies:

(A) You have a contract for the proposed export that was entered into prior to October 23, 1992.

(B) Your transaction involves the export of foreign-produced medicine, or medical supplies, instruments, or equipment incorporating U.S.-origin parts, components or materials, in which case the application will be reviewed according to the provisions of paragraph (b)(1) of this section.

(C) Your transaction is for the export of foreign-produced telecommunication commodities incorporating U.S.-origin parts, components and materials, in which case the application will be reviewed under the licensing policy set forth in paragraph (b)(2) of this section.

(D) Your transaction is for the export of donated food to individuals or nongovernmental organizations in Cuba and does not qualify for the humanitarian License Exception.

(4) Applications for licenses may be approved, on a case-by-case basis, for certain exports to Cuba intended to
provide support for the Cuban people, as follows:

(i) Applications for licenses for exports of certain commodities and software may be approved to human rights organizations, or to individuals and non-governmental organizations that promote independent activity intended to strengthen civil society in Cuba when such exports do not give rise to U.S. national security or counter-terrorism concerns. Examples of such commodities include fax machines, copiers, computers (e.g. 486-level CTP of 24.8 MTOPS or less), business/office software, document scanning equipment, printers, typewriters, and other office or office communications equipment. Applicants may donate or sell the commodities or software to be exported. Reexport to other end-users or end-uses is not authorized.

(ii) Commodities and software may be approved for export to U.S. news bureaus in Cuba whose primary purpose is the gathering and dissemination of news to the general public. In addition to the examples of commodities and software listed in paragraph (b)(4)(i) of this section, certain telecommunications equipment necessary for the operation of news organizations (e.g., 33M bit/s data signaling rate or less) may be approved for export to U.S. news bureaus.

(iii) Exports of food (both solids and liquids) and agricultural commodities may be approved, on case-by-case basis, for use by independent non-government entities in Cuba. Such entities may not be controlled, owned or operated by the Cuban government. Applicants must demonstrate on the license application in Block 24, Additional Information, that the prospective class or classes of end-users are independent from the Cuban government.

(A) Agricultural commodities that will be considered for approval include, but are not limited to, insecticides, herbicides, pesticides, seeds and fertilizer. Agricultural equipment is not eligible under this paragraph (b)(4)(iii) for sale to Cuba.

(B) For purposes of this paragraph (b), independent non-government entities include, but are not limited to, religious groups, private farmers, and private sector undertakings such as family restaurants.

(c) Cuba has been designated by the Secretary of State as a country whose government has repeatedly provided support for acts of international terrorism. For anti-terrorism controls, see Supplement 2 to part 742 of the EAR.

(d) Related controls. OFAC maintains controls on the activities of persons subject to U.S. jurisdiction, wherever located, involving transactions with Cuba or any specially designated Cuban national, as provided in 31 CFR part 515.

§ 746.3 Iraq.

(a) License requirements. OFAC administers an embargo against Iraq under the authority of the International Emergency Economic Powers Act of 1977, as amended, and the United Nations Participation Act of 1945, as amended, and in conformance with United Nations Security Council Resolutions. The applicable OFAC regulations, the Iraqi Sanctions Regulations, are found in 31 CFR part 575. You should consult with OFAC for authorization to export or reexport items subject to U.S. jurisdiction to Iraq, or to any entity owned or controlled by, or specially designated as acting for or on behalf of, the Government of Iraq. Under the EAR, you need a license to export or reexport to Iraq any item on the CCL containing a CB Column 1, CB Column 2, CB Column 3, NP Column 1, NP Column 2, NS Column 1, NS Column 2, MT Column 1, RS Column 1, RS Column 2, CC Column 1, CC Column 2, CC Column 3 in the Country Chart Column of the License Requirements section of an ECCN, or classified under ECCNs 1C980, 1C981, 1C982, 1C983, 1C984, 5A980, 0A980, and 0A983; however, to avoid duplication, an authorization from OFAC constitutes authorization under the EAR, and no separate BXA authorization is necessary. Except as noted in §746.3(a)(1) of this part, you may not use any BXA License Exception or other BXA authorization to export or reexport to Iraq.
§ 746.4 Libya.

(a) Introduction. The Department of the Treasury and the Department of Commerce maintain comprehensive controls on exports and reexports to Libya. OFAC maintains comprehensive controls on exports and transshipments to Libya under the Libyan Sanctions Regulations (31 CFR part 550). To avoid duplicate licensing procedures, OFAC and BXA have allocated licensing responsibility as follows: OFAC licenses direct exports and transshipments to Libya; BXA licenses reexports, exports of foreign-manufactured items containing U.S.-origin parts, components or materials, and exports of foreign-produced direct product of U.S. technology or software. Issuance of an OFAC license also constitutes authorization under the EAR, and no license from BXA is necessary. Exports and reexports subject to the EAR that are not subject to the Libyan Sanctions Regulations continue to require authorization from BXA.

(b) License requirements.

(1) Exports. OFAC and BXA both require a license for virtually all exports (including transshipments) to Libya. Except as noted in paragraph (b) of this section or specified in OFAC regulation, you may not use any BXA License Exception or other BXA authorization to export or transship to Libya. You will need a license from OFAC for all direct exports and transshipments to Libya except those eligible for the following BXA License Exceptions:

(i) Baggage (BAG) (see § 740.14 of the EAR).

(ii) Governments and international organizations (GOV) (see § 740.11 of the EAR).

(2) Reexports. You will need a license from BXA to reexport any U.S.-origin item from a third country to Libya, any foreign-manufactured item containing U.S.-origin parts, components or materials, as defined in § 734.2(b)(2) of the EAR, or any national security-controlled foreign-produced direct product of U.S. technology or software, as defined in § 734.2(b)(3) of the EAR, exported from the U.S. after March 12, 1982. You will need a license from BXA to reexport all items subject to the EAR (see part 734 of the EAR) to Libya, except:

(i) Food, medicines, medical supplies, and agricultural commodities;

(ii) Reexports eligible for the following License Exceptions (read each License Exception carefully, as the provisions available for embargoed countries are generally narrow): Federal Register Announcements (FED) (see § 740.9(a)(2)(viii) of the EAR).

(B) Operation technology and software (TSU) for legally exported commodities (see § 740.13(a) of the EAR).

(C) Sales technology (TSU) (see § 740.13(b) of the EAR).

(D) Software updates (TSU) for legally exported software (see § 740.13(c) of the EAR).

(E) Parts (RPL) for one-for-one replacement in certain legally exported commodities (§ 740.10(a) of the EAR).
(F) Baggage (BAG) (§ 740.14 of the EAR).

(G) Aircraft and vessels (AVS) for vessels only (see § 740.15 (c)(1) of the EAR), and temporary reexports of foreign registered aircraft (see § 740.15 (a)(4) of the EAR).

(H) Governments and international organizations (GOV) (see § 740.11 of the EAR).

(I) Gift parcels and humanitarian donations (GFT) (see § 740.12 of the EAR).

(I) Permissive reexports of certain spare parts in foreign-made equipment (see § 740.16(h) of the EAR).

(c) Licensing policy. (1) You should consult with OFAC regarding licensing policy for transactions subject to OFAC regulation.

(2) The licensing policy for BXA controls is as follows. Licenses will generally be denied for:

(i) Items controlled for national security purposes and related technology and software, including controlled foreign produced products of U.S. technology and software exported from the United States after March 12, 1982; and

(ii) Oil and gas equipment and technology and software, if listed in paragraph (c)(2)(vii) of this section, or if determined by BXA not to be readily available from sources outside the United States; and

(iii) Commodities, software, and technology destined for the petrochemical processing complex at Ras Lanuf, if listed in paragraph (c)(2)(vii) of this section, or where such items would contribute directly to the development or construction of that complex (items destined for the township at Ras Lanuf, or for the public utilities or harbor facilities associated with that township, generally will not be regarded as making such a contribution where their functions will be primarily related to the township, utilities or harbor);

(iv) Aircraft (including helicopters) or aircraft parts, components, or accessories to Libya or the provision of engineering and maintenance servicing of Libyan aircraft or aircraft components;

(v) Arms and related material of all types, including the sale or transfer of weapons and ammunition, military vehicles, equipment, paramilitary police equipment, spare parts for the aforementioned, and equipment or supplies for the manufacture or maintenance of the aforementioned.

(vi) Materials destined for the construction, improvement or maintenance of Libyan civilian or military airfields and associated facilities and equipment or any engineering or other services or components destined for the maintenance of any Libyan civil or military airfields or associated facilities and equipment, except emergency equipment and equipment and services directly related to civilian air traffic control; and

(vii) Items listed in paragraphs (c)(2)(vii) (A) through (E) and equipment and supplies for the manufacture or maintenance of such items:

(A) Pumps of medium or large capacity (equal to or larger than 3500 cubic meters per hour) and drivers (gas turbines and electric motors) designed for use in the transportation of crude oil and natural gas.

(B) Equipment designed for use in crude oil export terminals, as follows:

(1) Loading buoys or single point moorings;

(2) Flexible hoses for connection between underwater manifolds (plem) and single point mooring and floating loading hoses of large sizes (from 12-16 inches); or

(3) Anchor chains.

(C) Equipment not specially designed for use in crude oil export terminals, but which because of its large capacity can be used for this purpose, as follows:

(1) Loading pumps of large capacity (4000 m³/h) and small head (10 bars);

(2) Boosting pumps within the same range of flow rates;

(3) Inline pipe line inspection tools and cleaning devices (i.e., pigging tools) (16 inches and above); or

(4) Metering equipment of large capacity (1000 m³/h and above).

(D) Refinery equipment, as follows:

(1) Boilers meeting American Society of Mechanical Engineers 1 standards;

(2) Furnaces meeting American Society of Mechanical Engineers 8 standards;

(3) Fractionation columns meeting American Society of Mechanical Engineers 8 standards;

(4) Pumps meeting American Petroleum Institute 610 standards;
§ 746.5

(5) Catalytic reactors meeting American Society of Mechanical Engineers 8 standards; or

(6) Prepared catalysts, including catalysts containing platinum and catalysts containing molybdenum.

(E) Spare parts for any of the items described in paragraph (c)(2)(vii) of this section.

(3) Notwithstanding the presumptions of denial in paragraphs (c)(2)(i) through (iii) of this section, licenses will generally be issued for items not included in paragraphs (c)(2)(iv) through (vii) of this section when the transaction involves:

(i) The export or reexport of commodities or technology and software under a contract in effect prior to March 12, 1982, where failure to obtain a license would not excuse performance under the contract;

(ii) Reexport of items not controlled for national security purposes that had been exported from the United States prior to March 12, 1982 or exports of foreign products incorporating such items as components; or

(iii) Incorporation of U.S.-origin parts, components, or materials in foreign-manufactured products destined for Libya, where the U.S. content is 20 percent or less by value.

(4) Notwithstanding the presumption of denial in paragraph (c)(2)(iv) through (vii), applications for reexports under a contract pre-dating January 18, 1994, will be reviewed under the licensing policy in effect prior to that date.

(5) Licenses will generally be considered favorably on a case-by-case basis when the transaction involves the following items, provided such items are not included in paragraph (c)(2)(iv) through (vii):

(i) Reexports of items subject to national security controls that were exported prior to March 12, 1982 and exports of foreign products incorporating such items, provided such items are not included in paragraphs (c)(2)(iv) through (vii);

(ii) Items destined for use in the development or construction of the petrochemical processing complex at Ras Lanuf, where the transaction could be approved but for the general policy of denial set out in paragraph (c)(2)(iii), and where either:

(A) The transaction involves a contract in effect before December 20, 1983 that requires export or reexport of the items in question; or

(B) The items had been exported from the U.S. before that date.

(iii) Other unusual situations such as transactions involving firms with contractual commitments in effect before March 12, 1982.

(6) Licenses will generally be considered favorably on a case-by-case basis for the reexport of reasonable quantities for civil use of off-highway wheel tractors of carriage capacity of 9 t (10 tons) or more, as defined in ECCN 9A990.b, provided such tractors are not for uses described in paragraph (c)(2)(iv) through (vii) of this section.

(7) All other reexports not covered by United Nations resolutions will generally be approved, subject to any other licensing policies applicable to a particular transaction.

(d) Libya has been designated by the Secretary of State as a country whose government has repeatedly provided support for acts of international terrorism. For anti-terrorism controls, see Supplement 2 to part 742 of the EAR.

(e) Related controls. OFAC administers broad economic sanctions on Libya, and restricts participation by U.S. persons in transactions with Libya or specially designated Libyan nationals. The applicable OFAC regulations, the Libyan Sanctions Regulations, are found in 31 CFR part 550.

§ 746.5 North Korea.

(a) License requirements. As authorized by section 6 of the Export Administration Act of 1979, as amended (EAA) and by the Trading with the Enemy Act of 1917, as amended, you will need a license to export or reexport items subject to the EAR (see part 734 of the EAR) to North Korea, except as follows:

(1) License Exceptions. You may export without a license if your transaction meets all the applicable terms
Export of U.S. aircraft on temporary sojourn or vessels is prohibited, 44 CFR Ch. IV, Part 403 “Shipping restrictions: North Korea (T-2).”

1 Export of U.S. aircraft on temporary sojourn or vessels is prohibited, 44 CFR Ch. IV, Part 403 “Shipping restrictions: North Korea (T-2).”

Bureau of Export Administration, Commerce

§ 746.7

and conditions of any of the License Exceptions specified in this paragraph. To determine scope and eligibility requirements, you will need to turn to the sections or specific paragraphs of part 740 of the EAR (License Exceptions). Read each License Exception carefully, as the provisions available for embargoed countries are generally narrow.

(i) Temporary exports and reexports (TMP) by the news media (see § 740.9(a)(2)(viii) of the EAR).
(ii) Operation technology and software (TSU) for legally exported commodities (see § 740.13(a) of the EAR).
(iii) Sales technology (TSU) (see § 740.13(b) of the EAR).
(iv) Software updates (TSU) for legally exported software (see § 740.13(c) of the EAR).
(v) Parts (RPL) for one-for-one replacement in certain legally exported commodities (§ 740.10(a) of the EAR).
(vi) Baggage (BAG) (§ 740.14 of the EAR).
(vii) Aircraft and vessels (AVS) for fishing vessels under governing international fishery agreements and foreign-registered aircraft on temporary sojourn in the U.S.1 (see § 740.15(a) and (b)(1) of the EAR).
(viii) Governments and international organizations (GOV) (see § 740.11 of the EAR).
(ix) Gift parcels and humanitarian donations (GFT) (see § 740.12 of the EAR).
(x) Permissive reexports of certain spare parts in foreign-made equipment (see § 740.16(h) of the EAR).

§ 746.6 [Reserved]

§ 746.7 Iran.

The Treasury Department’s Office of Foreign Assets Control (OFAC) administers a comprehensive trade and investment embargo against Iran under the authority of the International Emergency Economic Powers Act of 1977, as amended, section 505 of the International Security and Development Cooperation Act of 1985, and Executive Orders 12957 and 12959 of March 15, 1995 and May 6, 1995, respectively. This embargo includes prohibitions on export and certain reexport transactions involving Iran, including transactions dealing with items subject to the EAR. (See OFAC’s Iranian Transactions Regulations, 31 CFR part 560.) BXA continues to maintain licensing requirements on exports and reexports to Iran under the EAR as described in paragraph (a)(2) of this section. No person may export or reexport items subject to both the EAR and OFAC’s Iranian Transactions Regulations without prior OFAC authorization.

(a) License requirements—(1) OFAC administered embargo. You should consult with OFAC if:
(i) You seek authorization to export from the United States; or

(2) BXA will review on a case-by-case basis applications for commercial sales of human-needs items. Such applications must be for items listed in Supplement No. 2 to part 740 of the EAR, but are not limited solely to small scale projects at the local level.

(c) North Korea has been designated by the Secretary of State as a country whose government has repeatedly provided support for acts of international terrorism. For anti-terrorism controls, see Supplement 2 to part 742 of the EAR.

(d) Related controls. OFAC maintains controls on the activities of persons subject to U.S. jurisdiction, wherever located, involving transactions with North Korea or any specially designated North Korean national.

§ 746.8  Rwanda.

(a) Introduction. In addition to the controls on Rwanda reflected on the Country Chart in Supplement 1 to part 738 of the EAR, there are special controls on items that fall within the scope of a United Nations Security Council arms embargo.

(b) License requirements. (1) Under Executive Order 12918 of May 26, 1994, and in conformity with United Nations Security Council (UNSC) Resolution 918 of May 17, 1994, an embargo applies to the sale or supply to Rwanda of arms and related materiel of all types and regardless of origin, including weapons and ammunition, military vehicles and equipment, paramilitary police equipment, and spare parts for such items. You will therefore need a license for the sale, supply or export to Rwanda of embargoed items, as listed in paragraph (b)(1)(i) and (ii) of this section, from the territory of the United States to any designated country with knowledge that they will be reexported, in whole or in part, to Iran, is prohibited without a license; or

(ii) To reexport to Iran any of the items identified in paragraph (a)(2)(i) of this section, except for ECCNs 2A994; 3A992.a; 5A 991.f; 5A 992; 6A 991; 6A 996; 7A 994; 8A 992.d; .e, .f, and .g; 9A 990.a and .b; and 9A 991.d and .e. However, the export of these items from the United States to any destination with knowledge that they will be reexported, in whole or in part, to Iran, is prohibited without a license; or

(iii) To export or reexport items subject to the general prohibitions, including proliferation end-use prohibitions (see part 736 of the EAR),

(2) BXA authorization. To avoid duplication, exporters or reexporters are not required to seek separate authorization from BXA for an export or reexport subject both to the EAR and to OFAC’s Iranian Transactions Regulations. Therefore, if OFAC authorizes an export or reexport, no separate authorization from BXA is necessary.

(3) Definitions. For purposes of this section, the term “United States person” means any United States citizen, permanent resident alien, entity organized under the laws of the United States (including foreign branches), or any person in the United States; the term “foreign person” means those not defined as United States persons.

(b) Iran has been designated by the Secretary of State as a country that has repeatedly provided support for acts of international terrorism. For anti-terrorism controls, see §742.8 of the EAR and Supplement 2 to part 742.

(3) Definitions. For the purposes of this section, the term:

(i) Person means a natural person as well as a corporation, business association, partnership, society, trust, or any other entity, organization or group, including governmental entities; and

(ii) United States person means any citizen or national of the United States, any lawful permanent resident of the United States, or any corporation, business association, partnership, society, trust, or any other entity, organization or group, including governmental entities, organized under the laws of the United States (including foreign branches).

(c) Licensing policy. Applications for export or reexport of all items listed in paragraphs (b)(1)(i) and (ii) of this section are subject to a general policy of denial. Consistent with United Nations Security Council Resolution 918 and the United Nations Participation Act, this embargo is effective notwithstanding the existence of any rights or obligations conferred or imposed by any international agreement or any contract entered into or any license or permit granted prior to that date, except to the extent provided in regulations, orders, directives or licenses that may be issued in the future under Executive Order 12918 or under the EAR.

(d) Related controls. The Department of State, Office of Defense Trade Controls, maintains controls on arms and military equipment under the International Traffic in Arms Regulations (22 CFR parts 120 through 130).

§ 746.9 Serbia, Kosovo, and Montenegro.

The Department of Commerce maintains a comprehensive embargo on exports and reexports to Serbia, excluding the Serbian province of Kosovo ("Kosovo"). For purposes of the EAR, Serbia (excluding Kosovo), Kosovo, and Montenegro are separate destinations under the EAR. Additionally, a United Nations mandated arms embargo applies to certain items destined to Serbia, Kosovo, and Montenegro.

(a) Serbia. (1) License requirements. You will need a license to export or re-export all items subject to the EAR to Serbia, except as specified in paragraph (a)(3) of this section. This requirement does not apply to Kosovo or Montenegro; controls set forth in other parts of the EAR (e.g., the Commerce Country Chart) remain in effect for items destined to Kosovo or Montenegro.

(b) Serbia, Kosovo, and Montenegro. (1) License requirements. Under Executive Order 12918 of May 26, 1994 (59 FR 28205, 3 CFR, 1994 Comp., p. 899) (which authorizes the Secretary of State and the Secretary of Commerce, under section 5 of the United Nations Participation Act and other authorities available to the respective Secretaries, to take all actions necessary to implement any arms embargo mandated by resolution of the United Nations Security Council), and in conformity with United Nations Security Council (UNSC) Resolution 1160 of March 31, 1998, an embargo applies to the sale or supply to Serbia, Kosovo, or Montenegro of arms and related matériel of all types and regardless of origin, such as weapons and ammunition, military vehicles and equipment, and spare parts for such items. You will therefore need a license for the sale, supply or export to Serbia, Kosovo, or Montenegro from the United States of embargoed items, as
listed in paragraphs (b)(1)(i) and (ii) of this section. You will also need a license for the sale, supply, export or reexport to Serbia, Kosovo, or Montenegro of such items by any United States person in any foreign country or other location. (Reexport controls imposed under this paragraph (b)(1) apply only to reexports by U.S. persons. Reexport controls on U.S.-origin items to Serbia, Kosovo, or Montenegro set forth in other parts of the EAR remain in effect.) You will also need a license for the use of any U.S.-registered aircraft or vessel to supply or transport to Serbia, Kosovo, or Montenegro any such items. These requirements apply to embargoed items specified in paragraphs (b)(1)(i) and (b)(1)(ii) of this section, regardless of origin.

(i) Crime Control and Detection Equipment as identified on the CCL under CC Columns No. 1, 2 or 3 in the Country Chart column of the “License Requirements” section of the applicable ECCN.

(ii) Items described by ECCNs ending in “018”; and 0A982, 0A983, 0A984, 0A985, 0A986, 0A987, 0A988, 0A989, 1A005, 1A984, 1C988, 2A993, 3A980, 3A981, 3D980, 3E980, 6A002, 6A003, 6A004, 6B002, 9A980, and 9A991.a.

(2) Date of embargo. The licensing requirements in paragraph (b) of this section were effective on July 14, 1998.

(3) License policy. Applications for export or reexport of all items listed in paragraphs (b)(1)(i) and (ii) of this section are subject to a general policy of denial. Consistent with United Nations Security Council Resolution 1160, this embargo is effective notwithstanding the existence of any rights or obligations conferred or imposed by any international agreement or any contract entered into or any license or permit granted prior to July 14, 1998, except to the extent provided in regulations, orders, directives or licenses that may be issued in the future under Executive Order 12918 or under the EAR.

(c) Related controls. The Department of State, Office of Defense Trade Controls, maintains related controls on arms and military equipment under the International Traffic in Arms Regulations (22 CFR parts 120 through 130). You should also contact the Department of the Treasury’s Office of Foreign Assets Control concerning any restrictions which might apply to U.S. persons involving financial transactions with Serbia, Kosovo, or Montenegro, including those transactions related to the export or reexport of services and non-U.S.-origin items.

[64 FR 60341, Nov. 5, 1999]

SUPPLEMENT 1 TO PART 746—SPECIAL SANCTIONS ON ANGOLA ADMINISTERED BY THE OFFICE OF FOREIGN ASSETS CONTROL

(a) Angola. BXA maintains controls on Angola as reflected on the Country Chart in Supplement 1 to part 738 of the EAR. (See also §746.7 of this part.) In addition, OFAC administers sanctions against the National Union for the Total Independence of Angola (UNITA). Under Executive Order 12965 of September 26, 1993, and consistent with United Nations Security Council Resolution 864 of September 15, 1993, OFAC administers an embargo on the sale or supply of arms and related materiel of all types, including weapons and ammunition, military vehicles and equipment and spare parts, and petroleum and petroleum products to:

(1) UNITA; or

(2) The territory of Angola, other than through points of entry designated by the Secretary of the Treasury, in the following schedule:

(i) Airports:
(A) Luanda; or
(B) Katumbela, Benguela Province.

(ii) Ports:
(A) Luanda;
(B) Lobito, Benguela Province; or
(C) Namibe, Namibe Province.

(iii) Entry Points:
(A) Malongo, Cabinda.

(B) [Reserved]

(b) Exporters should apply to OFAC for authorization to export embargoed items to UNITA or to points of entry not designated by the Secretary of the Treasury. Exports of embargoed items that are also controlled on the CCL to end-users other than UNITA and to points of entry designated by the Secretary of the Treasury continue to require a license from BXA. In addition, all other items controlled on the CCL to Angola continue to require a license from BXA.
Bureau of Export Administration, Commerce § 748.1

SUPPLEMENT 2 TO PART 746—UNITED NATIONS ARMS EMBARGOES ADMINISTERED BY THE DEPARTMENT OF STATE: LIBERIA, SOMALIA, AND COUNTRIES OF THE FORMER YUGOSLAVIA (BOSNIA-HERZEGOVINA, CROATIA, FORMER YUGOSLAV REPUBLIC OF MACEDONIA, SERBIA AND MONTENEGRO, SLOVENIA)

(a) Former Socialist Federal Republic of Yugoslavia (Bosnia-Herzegovina, Croatia, the Former Yugoslav Republic of Macedonia, Serbia and Montenegro, and Slovenia). The Department of State administers an embargo on all weapons and military equipment, consistent with United Nations Security Council Resolution 713 of September 25, 1991, to the countries of the former Socialist Federal Republic of Yugoslavia (Bosnia-Herzegovina, Croatia, the Former Yugoslav Republic of Macedonia, Serbia and Montenegro, and Slovenia). Exporters are advised to consult with the Department of State, Office of Defense Trade Controls (22 CFR parts 120 through 130), regarding exports of weapons and military equipment to these destinations.

(b) Liberia. The Department of State administers an embargo on all weapons and military equipment to Liberia, consistent with United Nations Security Council Resolution 788 of November 19, 1992. Exporters are advised to consult with the Department of State, Office of Defense Trade Controls (22 CFR parts 120 through 130), regarding exports of weapons and military equipment.

(c) Somalia. The Department of State administers an embargo on all weapons and military equipment to Somalia, consistent with United Nations Security Council Resolution 733 of February 23, 1992. Exporters are advised to consult with the Department of State, Office of Defense Trade Controls (22 CFR parts 120 through 130), regarding exports of weapons and military equipment.

SUPPLEMENT NO. 3 TO PART 746 [RESERVED]

PART 748—APPLICATIONS (CLASSIFICATION, ADVISORY, AND LICENSE) AND DOCUMENTATION

§ 748.1 General provisions.

(a) Scope. In this part, references to the EAR are references to 15 CFR chapter VII, subchapter C. The provisions of this part involve applications, whether submitted in writing or electronically, for classifications, advisory opinions or licenses subject to the Export Administration Regulations (EAR). All terms, conditions, provisions, and instructions, including the applicant and consignee certifications, contained in such form(s) are incorporated as part of the EAR. For the purposes of this part, the term "application" refers to the Form BXA–748P: Multipurpose Application or its electronic equivalent. If a provision contained in this part relates solely to a license application the term "license application" will appear.

(b) BXA responses. BXA will give a formal classification, advisory opinion
or licensing decision only through the review of a properly completed application supported by all relevant facts and required documentation submitted in writing or electronically to BXA.

(c) Confidentiality. Consistent with section 12(c) of the Export Administration Act, as amended, information obtained for the purposes of considering license applications, and other information obtained by the U.S. Department of Commerce concerning license applications, will not be made available to the public without the approval of the Secretary of Commerce.

§ 748.2 Obtaining forms; mailing addresses.

(a) You may obtain the forms required by the EAR from any U.S. Department of Commerce District Office; or in person or by telephone or facsimile from the following BXA offices:

Export Counseling Division

Western Regional Offices:
3300 Irvine Avenue, Ste. 345, Newport Beach, CA 92660, Telephone Number: (714) 660-0144, Facsimile Number: (714) 660-9347,
5201 Great America Pkwy, Ste. 226, Santa Clara, CA 95054, Telephone Number: (408) 748-7450, Facsimile Number: (408) 748-7470.

(b) For the convenience of foreign consignees and other foreign parties, certain BXA forms may be obtained at U.S. Embassies and Consulates throughout the world.

(c) All applications should be mailed to the following address, unless otherwise specified: Bureau of Export Administration, U.S. Department of Commerce, P.O. Box 273, Washington, D.C. 20044. If you wish to submit your application using an overnight courier, use the following address: Bureau of Export Administration, U.S. Department of Commerce, 14th Street and Pennsylvania Avenue N.W., Room 2705, Washington, D.C. 20044, Attn: “Application Enclosed”. BXA will not accept applications sent C.O.D.

§ 748.3 Classification and Advisory Opinions.

(a) Introduction. In light of your responsibility to classify your item, you may ask BXA to provide you with the correct Export Control Classification Number (ECCN) to the paragraph (or subparagraph if appropriate). BXA will advise you whether or not your item is subject to the EAR and, if applicable, the appropriate ECCN. This type of request is commonly referred to as a “Classification Request”. If requested, for a given end-use, end-user, and/or destination, BXA will advise you whether a license is required, or likely to be granted, for a particular transaction. Note that these responses do not bind BXA to issuing a license in the future. This type of request, along with requests for guidance regarding other interpretations of the EAR are commonly referred to as “Advisory Opinions”.

(b) Classification requests. You must submit your Classification Request using Form BXA-748P or its electronic equivalent. See the instructions contained in Supplement No. 1 to part 748 to complete the Blocks identified for this type of request. Classification Requests must be sent to BXA at one of the addresses listed in § 748.2(c) of this part or submitted electronically. Be certain that your request is complete and does not omit any essential information.

(1) Each Classification Request must be limited to six items. Exceptions may be granted by BXA on a case-by-case basis for several related items if the relationship between the items is satisfactorily substantiated in the request. Classification requests must be supported by any descriptive literature, brochures, precise technical specifications or papers that describe the items in sufficient technical detail to enable classification by BXA.

(2) When submitting a Classification Request, you must complete Blocks 1 through 5, 14, 22 (a), (b), (c), (d), and (i), 24, and 25 on Form BXA-748P. You must provide a recommended classification in Block 22(a) and explain the basis for your recommendation based on the technical parameters specified in the appropriate ECCN in Block 24.
§ 748.4 Basic guidance related to applying for a license.

(a) Disclosure and substantiation of facts on license applications. You, as the applicant, are required to make the complete disclosure of all parties in interest to the transaction so that BXA may decide on the license application with the fullest knowledge of all relevant facts. If the license application is filed for an account other than that of the applicant, the agent, as applicant must disclose the name of the agent’s principal. Where there is any doubt as to which of several persons should be named as a party to the license, you must disclose the names of all such persons and the functions to be performed by each in Block 24 on your application or an attachment to your license application.

(b) Applications for the export of items from the United States. A license application to export items from the United States may be made only by a person subject to the jurisdiction of the United States who is in fact the exporter, or by the applicant’s duly authorized agent. This limitation does not apply to applications for the reexport of items previously exported. An application may be made on behalf of a person not subject to the jurisdiction of the United States by an authorized agent in the United States, who then becomes the applicant.

(c) Prohibited from applying for a license. No person convicted of a violation of any statute specified in section 11(h) of the Export Administration Act, as amended, at the discretion of the Secretary of Commerce, may apply for any license for a period up to 10 years from the date of the conviction. See §766.25 of the EAR.

(d) Prior action on a shipment. If you have obtained a license without disclosure of the facts described in this section, the license will be deemed to have been obtained without disclosure of all facts material to the granting of the license and the license so obtained will be deemed void. See part 764 of the
EAR for other sanctions that may result in the event a violation occurs.

(1) Licenses for items subject to detention or seizure. If you submit a license application for items that you know have been detained or seized by the Office of Export Enforcement or by the U.S. Customs Service, you must disclose this fact to BXA when you submit your license application.

(2) Licenses for items previously exported. You may not submit a license application to BXA covering a shipment that is already laden aboard the exporting carrier, exported or reexported. If such export or reexport should not have been made without first securing a license authorizing the shipment, you must send a letter of explanation to the Office of Export Enforcement, U.S. Department of Commerce, 14th and Pennsylvania Avenue, N.W., H4520, Washington, D.C., 20230. The letter must state why a license was not obtained and disclose all facts concerning the shipment that would normally have been disclosed on the license application. You will be informed of any action and furnished any instructions by the Office of Export Enforcement.

(e) Multiple shipments. Your license application need not be limited to a single shipment, but may represent a reasonable estimate of items to be shipped throughout the validity of the license. Do not wait until the license you are using expires before submitting a new application. You may submit a new application prior to the expiration of your current license in order to ensure uninterrupted shipping.

(f) Second application. You may not submit a second license application covering the same proposed transaction while the first is pending action by BXA.

(g) Resubmission. If a license application is returned without action to you by BXA or your application represents a transaction previously denied by BXA, and you want to resubmit the license application, a new license application must be completed in accordance with the instructions contained in Supplement No. 1 to part 748. Cite the Application Control Number on your original application in Block 24 on the new license application.

(h) Emergency processing. If you believe an emergency situation beyond your control necessitates expedited processing of your license application, you should contact BXA’s Exporter Counseling Division of the Office of Exporter Services. This office may be reached by telephone on (202) 482-4811 or by facsimile on (202) 482-3617. These procedures do not apply to emergency handling of Special Comprehensive License applications.

(1) How to request emergency handling. If your license application is already pending with BXA, contact the Exporter Counseling Division directly on either number listed in paragraph (h) of this section. If you have not yet submitted your license application, include a written letter with the title “Emergency Handling Request” with your license application. The letter must include:

(i) A justification for the request, supported, where appropriate, with copies of orders, communications, or other documentation to substantiate that your request constitutes a valid emergency. You may be specifically requested to supply other documents not included with your submission.

(ii) An acknowledgement by you that any license issued under these emergency procedures will have a limited validity period as described in § 750.7(g) of the EAR, and that it generally will not be extended.

(2) Prompt delivery of emergency handling requests. You are responsible for prompt delivery of your request and license application to BXA. You may hand-carry your request and license application or use the services of an overnight courier to ensure prompt delivery. If you desire to hand-carry your request and license application, you may hand deliver it to the Exporter Counseling Division at the address stated in § 748.2(a) of this part. The envelope containing your license application should be labeled “Attn: Exporter Counseling Division, Emergency Handling Request Enclosed”.

(3) Review of emergency handling requests. BXA views an emergency as an unforeseeable situation over which you
have no control. On the day of receipt, BXA will evaluate your license application and decide whether emergency handling is warranted. Frequent emergency request will be given particularly close scrutiny. This procedure is not designed to become a substitute for timely filing of license applications.

(4) Action on license applications processed under emergency procedures. If you have submitted an emergency request, you will be contacted by the Exporter Counseling Division informing you of whether or not your request for emergency processing has been granted. If your license is approved under emergency handling procedures, you will be notified by BXA of the approval by telephone or in person. You will be given the license number and verbal authorization to effect shipment immediately, without waiting for the actual license. Any license approved under these emergency handling procedures will have a limited validity period as described in §750.7(g) of the EAR.

§ 748.5 Parties to the transaction on a license application.

(a) Applicant. (1) The “applicant” is defined as the person who, as the principal party in interest in the transaction, has the power and responsibility for determining and controlling the exporting or reexporting of the items. BXA is primarily concerned with the identity of the applicant and the applicant’s role in the transaction, and not the terms of sale.

(2) Ordinarily, a seller who delivers items in the United States to a foreign buyer, or to the latter’s forwarder or other agent, would not be in a position to assume responsibility for the export and would not be a proper applicant. This would normally be the situation where sale is made f.o.b. factory, although such terms of sale may relate only to price and are not necessarily inconsistent with the assumption by the seller of full responsibility for effecting the export or reexport. The seller can still be liable if the seller knows that the importer or its agent will not obtain the required license.

(b) Order party. The order party is that person in the United States who conducted the direct negotiations or correspondence with the foreign purchaser or ultimate consignee and who, as a result of these negotiations, received the order from the foreign purchaser or ultimate consignee.

(c) Purchaser. The purchaser is that person abroad who has entered into the transaction with the applicant to purchase an item for delivery to the ultimate consignee. A bank, freight forwarder, forwarding agent, or other intermediary is not the purchaser. The purchaser and ultimate consignee may be the same entity.

(d) Intermediate consignee. The intermediate consignee is the bank, forwarding agent, or other intermediary (if any) who acts in a foreign country as an agent for the exporter or reexporter, the purchaser, or the ultimate consignee, for the purpose of effecting delivery of the export or reexport to the ultimate consignee.

(e) Ultimate consignee. The ultimate consignee is the person located abroad who is the true party in interest in actually receiving the export for the designated end-use. A bank, freight forwarder, forwarding agent, or other party, when acting as an intermediary, is not acceptable as the ultimate consignee.

§ 748.6 General instructions for license applications.

(a) Form and instructions. An application for license, whether to export or reexport, must be submitted on Form BXA-748P, Multipurpose Application (revised June 15, 1996 or later), and Form BXA-748P-A, Item Appendix, and Form BXA-748P-B, End-User Appendix. Facsimiles or copies of these forms are
§ 748.7 Applying electronically for a license or Classification request.

(a) Authorization. You may apply electronically once you have been authorized to do so by BXA. An authorization to submit applications electronically may be limited or withdrawn by BXA at any time. There are no prerequisites for obtaining permission to submit electronically or limitations in terms of country eligibility. However, BXA may direct for any reason that any electronic application be resubmitted in writing, in whole or in part.

(1) Requesting approval to submit applications electronically. To submit applications electronically, your company must submit a written request to BXA at one of the addresses identified in §748.2(c) of this part. Both the envelope and letter must be marked “Attn: Electronic Submission Request”. Your letter must contain your company’s name, and the address, telephone number, and name of the principal contact person in your company. Before approving your request, BXA will provide you with language for a number of required certifications. Once you have completed the necessary certifications, you may be approved by BXA to submit applications electronically.

(2) Assignment and use of company and personal identification numbers. (i) Each company granted permission to submit
applications electronically will be assigned a company identification number. Each person approved by BXA to submit applications electronically for the company will be assigned a personal identification number ("PIN") telephonically by BXA. A PIN will be assigned to you only if your company has certified to BXA that you are authorized to act for it in making electronic submissions under the EAR.

(ii) Your company may reveal the assigned company identification number only to the PIN holders, their supervisors, employees, or agents of the company with a commercial justification for knowing the company identification number.

(iii) An individual PIN holder may not:
(A) Disclose the PIN to anyone;
(B) Record the PIN either in writing or electronically;
(C) Authorize another person to use the PIN; or
(D) Use the PIN following termination by BXA or your company of your authorization or approval for PIN use.

(iv) To prevent misuse of the PIN:
(A) If a PIN is lost, stolen or otherwise compromised, the company and the PIN holder must report the loss, theft or compromise of the PIN immediately by telephoning BXA at (202) 482-0436. You must confirm this notification in writing within two business days to BXA at the address provided in §748.2(c) of this part.

(B) Your company is responsible for immediately notifying BXA whenever a PIN holder leaves the employ of the company or otherwise ceases to be authorized by the company to submit applications electronically on its behalf.

(v) No person may use, copy, steal or otherwise compromise a PIN assigned to another person; and no person may use, copy, steal or otherwise compromise the company identification number where the company has not authorized such person to have access to the number.

(b) Electronic submission of applications. (1) All applications. Upon submission of the required certifications and approval of the company's request to use electronic submission, BXA will provide instructions both on the method to transmit applications electronically and the process for submitting required supporting documents and technical specifications. These instructions may be modified by BXA from time to time.

(2) License Applications. The electronic submission of an application for license will constitute an export control document. Such submissions must provide the same information as written applications and are subject to the recordkeeping provisions of part 762 of the EAR. The applicant company and PIN holder submitting the application will be deemed to make all representations and certifications as if the submission were made in writing by the company and signed by the submitting PIN holder. Electronic submission of a license application will be considered complete upon the transmittal of the application to BXA or to an entity under contract to receive such applications for BXA.

(c) Maintenance of a log. Your company must maintain a log, either manually or electronically, specifying the date and time of each electronic submission, the ECCNs of items on each electronic submission, and the name of the employee or agent submitting the license application. This log may not be altered. Written corrections must be made in a manner that does not erase or cover original entries. If the log is maintained electronically, corrections may only be made as notations.

(d) Updating. An applicant company must promptly notify BXA of any change in its name or address. If your company wishes to have an individual added as a PIN holder, your company must advise BXA and follow the instructions provided by BXA. Your company should conduct periodic reviews to ensure that PINs are held only by individuals whose current responsibilities make it necessary and appropriate that they act for the company in this capacity.

§748.8 Unique license application requirements.

In addition to the instructions contained in Supplement No. 1 to this part 748, you must also ensure that the additional requirements for certain items
or types of transactions described in this section are addressed in your license application. See Supplement No. 2 to this part 748 if your application involves:

(a) Chemicals, medicinals, and pharmaceuticals.

(b) Communications intercepting devices.

(c) Digital computers, telecommunications, and related equipment.

(d) Gift parcels; consolidated in a single shipment.

(e) Intransit shipments through the United States.

(f) Intransit shipments outside of the United States.

(g) Nuclear Nonproliferation items and end-uses.

(h) Numerical control devices, motion control boards, numerically controlled machine tools, dimensional inspection machines, direct numerical control systems, specially designed assemblies and specially designed software.

(i) Parts, components, and materials incorporated abroad into foreign-made products.

(j) Ship stores, plane stores, supplies, and equipment.

(k) Regional stability controlled items.

(l) Exemptions. If you plan to submit a license application involving one of the following situations and your item is not a firearms item destined for an OAS member country, no support documentation is required. Simply submit the license application. If your item is a firearms item (Reason for Control identified as “FC” on the Commerce Control List, Supplement No. 1 to part 774 of the EAR) destined for an OAS member country, proceed to §748.14 of this part.

(1) All exports and reexports involving ultimate consignees located in any of the following destinations:

- Bahamas
- Barbados
- Belize
- Bermuda
- Bolivia
- Brazil
- Canada
- Chile
- Colombia
- Costa Rica
- Dominican Republic
- Ecuador
- El Salvador
- French Guiana
- Greenland
- Guatemala
- Guyana

- Haiti
- Honduras
- Jamaica
- Leeward and Windward Islands
- Mexico
- Miquelon and St. Pierre islands
- Netherlands Antilles
- Nicaragua
- Panama
- Paraguay
- Peru
- Surinam
- Trinidad and Tobago
- Uruguay
- Venezuela

(2) The ultimate consignee or purchaser is a foreign government(s) or foreign government agency(ies). To determine whether the parties to your transaction meet the definition of “government agency” refer to the definition contained in part 772 of the EAR. Remember, if either the ultimate consignee or purchaser is not a foreign government or foreign government agency, a statement is required from the nongovernmental party. However, support documents are required from governments of the People's Republic of China, India, Bulgaria, Czech Republic, Hungary, Poland, Romania, and Slovakia.

(3) The license application is filed by, or on behalf of, a relief agency registered with the Advisory Committee on Voluntary Foreign Aid, U.S. Agency for International Development, for export to a member agency in the foreign country.

(4) The license application is submitted to export or reexport items for temporary exhibit, demonstration, or testing purposes.

(5) The license application is submitted for items controlled for short supply reasons (see part 754 of the EAR).

(6) The license application is submitted under the Special Comprehensive License procedure described in part 752 of the EAR.
(7) The license application is submitted to export or reexport software or technology.
(8) The license application is submitted to export or reexport encryption items controlled under ECCNs 5A002, 5B002, 5D002 and 5E002.

(b) Support document requirements. License applications not exempt under paragraph (a) of this section generally must be supported by documents designed to elicit information concerning the disposition of the items intended for export or reexport. These support documents must be either submitted at the time the license application is filed or retained in the applicant's files in accordance with the recordkeeping provisions of part 762 of the EAR. The type of support documentation required is dependent on the item involved and the country of ultimate destination. To determine which type of support documentation is required, answer the following questions:

(1) Does your transaction involve items controlled for national security reasons?
   (i) If yes, continue with question number 2 in paragraph (b)(2) of this section.
   (ii) If no, your transaction may require a Statement by Ultimate Consignee and Purchaser. Read the remainder of this section beginning with paragraph (c) of this section, then proceed to §748.11 of the EAR.

(2) Does your transaction involve items controlled for national security reasons destined for one of the following countries? (This applies only to those overseas destinations specifically listed.)

(i) If yes, your transaction may require an Import or End-User Certificate. Note that if the destination is the People's Republic of China, a Statement of Ultimate Consignee and Purchaser may be substituted for a PRC End-User Certificate under the following conditions:
   (A) The item to be exported (i.e., replacement parts and sub-assemblies) is for servicing previously exported items and is valued at $75,000 or less; or
   (B) The End-User is not a Chinese entity.

(ii) If no, your transaction may require a Statement by Ultimate Consignee and Purchaser. Read the remainder of this section beginning with paragraph (c) of this section, then proceed to §748.11 of the EAR.

(c) License applications requiring support documents. License applications requiring support by either a Statement by the Ultimate Consignee and Purchaser or an Import or End-User Certificate must indicate the type of support document obtained in Block 6 or 7 on your application with an "X" in the appropriate box. If the support document is an Import or End User Certificate, you must also identify the originating country and number of the Certificate in Block 13 on your application. If a license application is submitted without either the correct Block or Box marked on the application or the required support document, the license application will be immediately returned without action unless the satisfactory reasons for failing to obtain the document are supplied in Block 24 or in an attachment to your license application.

(1) License applications supported by an Import or End User Certificate. If submission of the original certificate is not required by §748.10(g) of this part, you may submit your license application upon receipt of a facsimile or other legible copy of the Import or End User Certificate provided that no shipment is made against any license issued based on the Import or End User Certificate prior to receipt and retention of the original statement by the applicant. If §748.10(g) of this part requires submission of the original certificate
374

§ 748.9  15 CFR Ch. VII (1–1–00 Edition)

with your license application, you must submit the original. Copies will not be accepted.

(2) License applications supported by Ultimate Consignee and Purchaser statements. These types of license applications may be submitted upon receipt of a facsimile or other legible copy of the original statement provided that the applicant receives the manually-signed original within 60 days from the date the original is signed by the ultimate consignee.

(d) Exceptions to obtaining the required support document. BXA will consider the granting of an exception to the requirement for supporting document where the requirements cannot be met due to circumstances beyond your control. An exception will not be granted contrary to the objectives of the U.S. export control laws and regulations. Refer to §748.12(d) of this part for specific instructions on procedures for requesting an exception.

(e) Validity period. (1) When an Import or End-User Certificate or a Statement by Ultimate Consignee and Purchaser is required to support one or more license applications, you must submit the first license application within the validity period shown on the Certificate, or 6 months from the date the Certificate was issued or Statement signed, whichever is shorter.

(2) All subsequent license applications supported by the same Import or End-Use Certificate must be submitted to BXA within one year from the date that the first license application supported by the same Import or End-Use Certificate was submitted to BXA.

(3) All subsequent license applications supported by the same Statement by Ultimate Consignee and Purchaser must be submitted within two years of the first application if the statement was completed as a single transaction statement. If the statement was completed as a multiple transaction statement, all applications must be submitted within two years of signature by the consignee or purchaser, whichever was last.

(f) English translation requirements. All abbreviations, coded terms, or other expressions on support documents having special significance in the trade or to the parties to the transaction must be explained on an attachment to the document. Documents in a language other than English must be accompanied by an attachment giving an accurate English translation, either made by a translating service or certified by you to be correct. Explanations or translations should be provided on a separate piece of paper, and not entered on the support documents themselves.

(g) Responsibility for full disclosure. (1) Information contained in a support document cannot be construed as extending or modifying the specific information supplied in a license application or license issued by BXA. The license application covering the transaction discloses all facts pertaining to the transaction. The authorizations contained in the resulting license are not extended by information contained in an Import Certificate, End-User Certificate or Statement by Ultimate Consignee and Purchaser regarding reexport from the country of destination or any other facts relative to the transaction that are not reported on the license application.

(2) Misrepresentations, either through failure to disclose facts, concealing a material fact, or furnishing false information, will subject responsible parties to administrative action by BXA. Administrative action may include suspension, revocation, or denial of licensing privileges and denial of other participation in exports from the United States.

(3) In obtaining the required support document, you as the applicant are not relieved of the responsibility for full disclosure of any other information concerning the ultimate destination and end-use, end-user of which you know, even if inconsistent with the representations made in the Import Certificate, End-User Certificate, or Statement by Ultimate Consignee and Purchaser. You are responsible for promptly notifying BXA of any change in the facts contained in the support document that comes to your attention.

(h) Effect on license application review. BXA reserves the right in all respects to determine to what extent any license will be issued covering items for
which an Import or End-User Certificate has been issued by a foreign government. BXA will not seek or undertake to give consideration to recommendations from the foreign government as to the action to be taken on a license application. A supporting document issued by a foreign government will be only one of the factors upon which BXA will base its licensing action, since end-uses and other considerations are important factors in the decision making process.

(i) Request for return of support documents submitted to BXA. If an applicant is requested by a foreign importer to return an unused or partially used Import or End-User Certificate submitted to BXA in support of a license application, the procedure provided in this paragraph (i) should be followed:

1. The applicant must send a letter request for return of an Import or End-User Certificate to the address stated in §748.2(c) of this part, “Attn: Import/End-User Certificate Request”.

2. The letter request must include the name and address of the importer, the Application Control Number under which the original Import or End-User Certificate was submitted, the Application Control Numbers for any subsequent license applications supported by the same certificate, and one of the following statements, if applicable:
   (i) If the certificate covers a quantity greater than the total quantity identified on the license application(s) submitted against it, a statement that the certificate will not be used in connection with another license application.
   (ii) If you do not intend to make any additional shipments under a license covered by the certificate, or are in possession of an expired license covered by the certificate, a statement to this effect, indicating the unshipped items.
   (j) Recordkeeping requirements for returning certificates retained by the applicant. (1) Though the recordkeeping provisions of the EAR require that all original support documents be retained for a period of five years, an unused or partially used certificate may be returned at the request of a foreign importer provided that you submit the original certificate, accompanied by a letter of explanation, a copy of each license covered by the certificate, and a list of all shipments made against each license to BXA at the address listed in §748.2(c). BXA will notify you in writing whether your request has been granted. The following information must be contained in your letter of explanation:
      (i) A statement citing the foreign importer’s request for return of the certificate;
      (ii) The license number(s) that have been issued against the certificate (including both outstanding and expired licenses); and
      (iii) If the certificate covers a quantity greater that the total quantity stated on the license(s), you must include a statement that the certificate will not be used in connection with another license application.

(2) If your request is granted, BXA will return the certificate to you. You must make a copy of the certificate before you return the original to the importer. This copy must show all the information contained on the original certificate including any notation made on the certificate by BXA. The copies must be retained on file along with your correspondence in accordance with the recordkeeping provisions in part 702 of the EAR.

obtained, unless your transaction meets one of the exemptions stated in §748.9(a) of this part, if:

(1) Any commodities on your license application are controlled for national security (NS) reasons, except for items controlled under ECCN 5A002 or 5B002;

(2) The ultimate destination is a country listed in §748.9(b)(2) of this part.

(3) Your transaction involves an export of a computer with a Composite Theoretical Performance (CTP) greater than 2,000 Million Operations Per Second (MTOPS) under either a license application or under License Exception CTP to the People's Republic of China, you must obtain a PRC End-User Certificate, regardless of dollar value.

(4) Your license application involves the export of commodities and software classified in a single entry on the CCL, the total value of which exceeds $5,000. Note that this $5,000 threshold, does not apply to exports of computers with a CTP exceeding 2,000 MTOPS to the People's Republic of China.

(i) Your license application may list several separate CCL entries. If any entry controlled for national security reasons exceeds $5,000, then an Import or End-User Certificate must be obtained covering all items controlled for national security reasons on your license application;

(ii) If your license application involves a lesser transaction that is part of a larger order for items controlled for national security reasons in a single ECCN exceeding $5,000, an Import or End-User Certificate must be obtained.

(iii) You may be specifically requested by BXA to obtain an Import Certificate for a transaction valued under $5,000.

(c) How to obtain an Import or End-User Certificate. (1) Applicants must request that the importer (e.g., ultimate consignee or purchaser) obtain the Import or End-User Certificate, and that it be issued covering only those items that are controlled for national security reasons. Importers should not be requested to obtain an Import or End-User Certificate for items that are controlled for reasons other than national security. Upon receipt, the importer must transmit the original document to the applicant.

(2) The applicant's name must appear on the Import or End-User Certificate submitted to BXA as either the applicant, supplier, or order party. The Import Certificate may be made out to either the ultimate consignee or the purchaser, even though they are different parties, as long as both are located in the same country.

NOTE TO PARAGRAPH (c) OF THIS SECTION: You should furnish the consignee with the item description contained in the CCL to be used in applying for the Import or End-User Certificate. It is also advisable to furnish a manufacturer's catalog, brochure, or technical specifications if the item is new.

(3) If your transaction requires support of a PRC End-User Certificate, you must ensure the following information is included on the PRC End-User Certificate signed by an official of the Department of Science and Technology of the Ministry of Foreign Trade and Economic Cooperation (MOFTEC) with MOFTEC’s seal affixed to it:

(i) Title of contract and contract number (optional);

(ii) Names of importer and exporter;

(iii) End-User and end-use;

(iv) Description of the item, quantity and dollar value; and

(v) Signature of the importer and date.

(d) Where to obtain Import and End-User Certificates. See Supplement No. 4 to this part for a list of the authorities administering the Import Certificate/Delivery Verification and End-User Certificate Systems in other countries.

(e) Triangular symbol on International Import Certificates. (1) In accordance with international practice, the issuing government may stamp a triangular symbol on the International Import Certificate (IIC). This symbol is notification that the importer does not intend to import or retain the items in the country issuing the certificate, but that, in any case, the items will not be delivered to any destination except in accordance with the export regulations of the issuing country.

(2) If you receive an IIC bearing a triangular symbol, you must identify all parties to the transaction on the license application, including those located outside the country issuing the
IIC. If the importer declines to provide you with this information, you may advise the importer to provide the information directly to BXA, through a U.S. Foreign Commercial Service office, or in a sealed envelope to you marked “To be opened by BXA only”.

(f) Multiple license applications supported by one certificate. An Import or End-User Certificate may cover more than one purchase order and more than one item. Where the certificate includes items for which more than one license application will be submitted, you must include in Block 24 on your application, or in an attachment to each license application submitted against the certificate, the following certification:

I (We) certify that the quantities of items shown on this license application, based on the Certificate identified in Block 13 of this license application, when added to the quantities shown on all other license applications submitted to BXA based on the same Certificate, do not total more than the total quantities shown on the above cited Certificate.

(g) Submission of Import and End-User Certificates. If a PRC End-User Certificate is required for your proposed transaction, you must submit the original certificate with your license application. Copies will not be accepted. All other certificates must be retained on file by the applicant in accordance with the recordkeeping provisions of part 762 of the EAR, and not submitted with the license application.

(h) Alterations. After an Import or End-User Certificate is issued by a foreign government, no corrections, additions, or alterations may be made on the Certificate by any person. If you desire to explain any information contained on the Certificate, you may attach a signed statement to the Certificate.

(i) Request for Delivery Verification. BXA will, on a selective basis, require Delivery Verification documents for shipments supported by Import Certificates. You will be notified if Delivery Verification is required at the time of issuance of the license. Please refer to §748.13 of this part for detailed information on these procedures.

(j) Retention procedures. You must retain on file the original copy of any certificate issued in support of a license application submitted to BXA, unless the original is submitted with the license application. All recordkeeping provisions contained in part 762 of the EAR apply to this requirement, except that reproductions may not be substituted for the officially authenticated original in this instance.

§748.11 Statement by Ultimate Consignee and Purchaser.

(a) Exceptions to completing a Statement by Ultimate Consignee and Purchaser. A Statement by the Ultimate Consignee and/or Purchaser involved in a transaction must be completed unless:

1. An International Import Certificate, a People's Republic of China End-User Certificate, an Indian Import Certificate, or a Bulgarian, Czech, Hungarian, Polish, Romanian or Slovak Import Certificate is required in support of the application;

2. The applicant is the same person as the ultimate consignee, provided the required statements are contained in Block 24 on the license application. This exemption does not apply where the applicant and consignee are separate entities, such as parent and subsidiary, or affiliated or associated firms;

3. The application is valued at $5000 or less, and is not part of a larger transaction; or

4. The transaction meets one of the exemptions stated in §748.9(a) of this part.

(b) Submission of the Statement by Ultimate Consignee and Purchaser. A copy of the statement must be submitted with your license application if the country of ultimate destination is listed in either Country Group D:2, D:3, or D:4 (See Supplement No. 1 to part 740 of the EAR). The copy submitted by the applicant must be of sufficient quality to ensure all assertions made on the statement are legible and that the signatures are sufficiently legible to permit identification of the signature as that of the signers. The applicant must receive the manually-signed original.
§ 748.11

within 60 days from the date the original is signed by the ultimate consignee. The applicant must, upon receipt, retain the manually-signed original, and both the ultimate consignee and purchaser should retain a copy of the statement in accordance with the recordkeeping provisions contained in part 762 of the EAR.

(c) Form or letter. The ultimate consignee and purchaser must complete either a statement on company letterhead in accordance with paragraph (e) of this section or Form BXA–711, Statement by Ultimate Consignee and Purchaser. If the consignee and purchaser elect to complete the statement on letterhead and both the ultimate consignee and purchaser are the same entity, only one statement is necessary. If the ultimate consignee and purchaser are separate entities, separate statements must be prepared and signed. If the ultimate consignee and purchaser elects to complete Form BXA–711, only one Form BXA–711 (containing the signatures of the ultimate consignee and purchaser) need be completed. Whether your ultimate consignee and purchaser sign a written statement or complete Form BXA–711, the following constraints apply:

(1) Responsible officials representing the ultimate consignee and purchaser must sign the statement. “Responsible official” is defined as someone with personal knowledge of the information included in the statement, and authority to bind the ultimate consignee or purchaser for whom they sign, and who has the power and authority to control the use and disposition of the licensed items.

(2) The authority to sign the statement may not be delegated to any person (agent, employee, or other) whose authority to sign is not inherent in his or her official position with the ultimate consignee or purchaser for whom he or she signs. The signing official may be located in the U.S. or in a foreign country. The official title of the person signing the statement must also be included.

(3) The consignee and/or purchaser must submit information that is true and correct to the best of their knowledge and must promptly send a new statement to the applicant if changes in the facts or intentions contained in their statement(s) occur after the statement(s) have been forwarded to the applicant. Once a statement has been signed, no corrections, additions, or alterations may be made. If a signed statement is incomplete or incorrect in any respect, a new statement must be prepared, signed and forwarded to the applicant.

(d) Instructions for completing Form BXA–711. Instructions on completing Form BXA–711 are contained in Supplement No. 3 to this part. The ultimate consignee and purchaser may sign a legible copy of Form BXA–711. It is not necessary to require your ultimate consignee and purchaser sign an original Form BXA–711, provided all information contained on the copy is legible.

(e) Instructions for completing the statement on letterhead. Information in response to each of the following criteria must be included in the statement. If any information is unknown, that fact should be disclosed in the statement. Preprinted information supplied on the statement, including the name, address, or nature of business of the ultimate consignee or purchaser appearing on the letterhead or order form is acceptable but will not constitute evidence of either the signer’s identity, the country of ultimate destination, or end-use of the items described in the license application.

(1) Paragraph 1. One of the following certifications must be included depending on whether the statement is proffered in support of a single license application or multiple license applications:

(i) Single. This statement is to be considered part of a license application submitted by [name and address of applicant].

(ii) Multiple. This statement is to be considered a part of every license application submitted by [name and address of applicant] until two years from the date this statement is signed.

(2) Paragraph 2. One or more of the following certifications must be included. Note that if any of the facts related to the following statements are unknown, this must be clearly stated.
(i) The items for which a license application will be filed by [name of applicant] will be used by us as capital equipment in the form in which received in a manufacturing process in [name of country] and will not be reexported or incorporated into an end product.

(ii) The items for which a license application will be filed by [name of applicant] will be processed or incorporated by us into the following product(s) [list products] to be manufactured in [name of country] for distribution in [list name of country or countries].

(iii) The items for which a license application will be filed by [name of applicant] will be resold by us in the form in which received for use or consumption in [name of country].

(iv) The items for which a license application will be filed by [name of applicant] will be reexported by us in the form in which received to [name of country or countries].

(v) The items received from [name of applicant] will be [describe use of the items fully].

(3) Paragraph 3. The following two certifications must be included:

(i) The nature of our business is [possible choices include; broker, distributor, fabricator, manufacturer, wholesaler, retailer, value added reseller, original equipment manufacturer, etc.].

(ii) Our business relationship with [name of applicant] is [possible choices include; contractual, franchise, distributor, wholesaler, continuing and regular individual business, etc.] and we have had this business relationship for [number of years].

(4) Paragraph 4. The final paragraph must include all of the following certifications:

(i) We certify that all of the facts contained in this statement are true and correct to the best of our knowledge and we do not know of any additional facts that are inconsistent with the above statements. We shall promptly send a replacement statement to [name of the applicant] disclosing any material change of facts or intentions described in this statement that occur after this statement has been prepared and forwarded to [name of applicant]. We acknowledge that the making of any false statement or concealment of any material fact in connection with this statement may result in imprisonment or fine, or both, and denial, in whole or in part, of participation in U.S. exports or reexports.

(ii) Except as specifically authorized by the U.S. Export Administration Regulations, or by written approval from the Bureau of Export Administration, we will not reexport, resell, or otherwise dispose of any items approved on a license supported by this statement:

(1) To any country not approved for export as brought to our attention by the U.S. exporter; or

(2) To any person if there is reason to believe that it will result directly or indirectly in disposition of the items contrary to the representations made in this statement or contrary to the U.S. Export Administration Regulations.

(iii) We understand that acceptance of this statement as a support document cannot be construed as an authorization by BXA to reexport the items in the form in which received even though we may have indicated the intention to reexport, and that authorization to reexport is not granted in an export license on the basis of information provided in the statement, but as a result of a specific request in a license application.

§ 748.12 Special provisions for support documents.

(a) Grace periods. Whenever the requirement for an Import or End-User Certificate or Statement by Ultimate Consignee or Purchaser is imposed or extended by a change in the regulations, the license application need not conform to the new support documentation requirements for a period of 45 days after the effective date of the regulatory change published in the Federal Register.

(1) Requirements are usually imposed or extended by virtue of one of the following:

(i) Addition or removal of national security controls over a particular item; or
§ 748.12

(ii) Development of an Import Certificate/Delivery Verification or End-User Certificate program by a foreign country; or

(iii) Removal of an item from eligibility under the Special Comprehensive License described in part 752 of the EAR, when you hold such a special license and have been exporting the item under that license.

(2) License applications filed during the 45 day grace period must be accompanied by any evidence available to you that will support representations concerning the ultimate consignee, ultimate destination, and end use, such as copies of the order, letters of credit, correspondence between you and ultimate consignee, or other documents received from the ultimate consignee. You must also identify the regulatory change (including its effective date) that justifies exercise of the 45 day grace period. Note that an Import or End-User Certificate will not be accepted, after the stated grace period, for license applications involving items that are no longer controlled for national security reasons. If an item is removed from national security controls, you must obtain a Statement by Ultimate Consignee and Purchaser as described in § 748.11 of this part. Likewise, any item newly controlled for national security purposes requires support of an Import or End-User Certificate as described in § 748.10 of this part after expiration of the stated grace period.

(b) Reexports. If a support document would be required for an export from the United States, the same document would be required for reexport to Country Group D:1 and E:2 (see Supplement No. 1 to part 740 of the EAR).

(c) Granting of exceptions to the support documentation requirement. An exception to obtaining the required support documentation will be considered by BXA, however, an exception will not be granted contrary to the objectives of the U.S. export control program. A request for exception may involve either a single transaction, or where the reason necessitating the request is continuing in nature, multiple transactions. If satisfied by the evidence presented, BXA may waive the support document requirement and accept the license application for processing. Favorable consideration of a request for exception generally will be given in instances where the support document requirement:

(1) Imposes an undue hardship on you and/or ultimate consignee (e.g., refusal by the foreign government to issue an Import or End-User Certificate and such refusal constitutes discrimination against you); or

(2) Cannot be complied with (e.g., the items will be held in a foreign trade zone or bonded warehouse for subsequent distribution in one or more countries); or

(3) Is not applicable to the transaction (e.g., the items will not be imported for consumption into the named country of destination).

(d) Procedures for requesting an exception. (1) Requests for exception must be submitted with the license application to which the request relates. Where the request relates to more than one license application it should be submitted with the first license application and referred to in Block 24 on any subsequent license application. The request for exception must be submitted in writing on the applicant's letterhead.

(2) In instances where you are requesting exception from obtaining an Import or End-User Certificate, the request must be accompanied by a manually-signed original Statement by Ultimate Consignee and Purchaser as described in § 748.11 of this part.

(3) At a minimum, the letter request must include:

(i) Name and address of ultimate consignee;

(ii) Name and address of purchaser, if different from ultimate consignee;

(iii) Location of foreign trade zone or bonded warehouse if the items will be exported to a foreign trade zone or bonded warehouse;

(iv) Type of request, i.e., whether for a single transaction or multiple transactions;

(v) Full explanation of the reason(s) for requesting the exception;

(vi) Nature and duration of the business relationship between you and ultimate consignee and purchaser shown on the license application;
(vii) Whether you have previously obtained and/or submitted to BXA an Import or End-User Certificate issued in the name of the ultimate consignee and/or purchaser, and a list of the Application Control Number(s) to which the certificate(s) applied; and

(viii) Any other facts to justify granting an exception.

(4) Action by BXA. (i) Single transaction request. Where a single transaction is involved, BXA will act on the request for exception at the same time as the license application with which the request is submitted. In those instances where the related license application is approved, the issuance of the license will serve as an automatic notice to the applicant that the exception was approved. If any restrictions are placed on granting of the exception, these will appear on the approval. If the request for exception is not approved, BXA will advise you by letter.

(ii) Multiple transactions request. Where multiple transactions are involved, BXA will advise you by letter of the action taken on the exception request. The letter will contain any conditions or restrictions that BXA finds necessary to impose (including an exception termination date if appropriate). In addition, a written acceptance of these conditions or restrictions may be required from the parties to the transaction.

(e) Availability of original. The original certificate or statement must be kept on file, and made available for inspection in accordance with the provisions of part 762 of the EAR. To ensure compliance with this recordkeeping requirement, BXA will require applicants, on a random basis, to submit specific original certificates and statements that have been retained on file. Applicants will be notified in writing of any such request.

§ 748.13 Delivery Verification (DV).

(a) Scope. (1) BXA may request the licensee to obtain verifications of delivery on a selective basis. A Delivery Verification Certificate (DV) is a document issued by the government of the country of ultimate destination after the export has taken place and the items have either entered the jurisdiction of the recipient country or are otherwise accounted for by the importer to the issuing government. Governments that issue DVs are listed in Supplement No. 4 to this part.

(2) If BXA decides to request verification of delivery, the request will appear as a condition on the face of the license. If the license is sent directly to a party other than the applicant authorized to receive the license (e.g., agent, forwarder, broker, etc.), such party is responsible for notifying the licensee immediately in writing that a DV is required.

(b) Exception to obtaining Delivery Verification. The DV requirement for a particular transaction is automatically canceled if, subsequent to the issuance of a license, the item is no longer controlled for national security reasons. In this instance, the licensee must send a letter to BXA at the address listed in § 748.2(c) of this part, stating that the items on the license are no longer controlled for national security reasons, and accordingly, the request for DV will not be fulfilled by the licensee.

(c) Procedure for obtaining Delivery Verification. When notified that a DV is required by BXA, the licensee must transmit to the importer a written request for a DV at the time of making each shipment under the license (whenever possible, this request should be submitted together with the related bill of lading or air waybill). The request must include the number of the Import or End-User Certificate for the transaction referred to on the license, and notify the importer that this same Import or End-User Certificate number should be shown on the DV.

(1) The importer must obtain the DV from the appropriate government ministry identified in Supplement No. 4 to this part, and forward the completed DV to the licensee. The DV must cover the items described on the license that have been shipped. Note that BXA must be able to relate the description provided in the DV to the approved license. In order to ensure the same terminology is used, the licensee should provide the importer with the description as it appears on the license.

(2) The original copy of the DV must be sent to BXA within 90 days after the
(a) Scope. Consistent with the OAS Model Regulations, BXA requires from all OAS member countries an Import Certificate issued by the government of the importing country for items classified as ECCNs 0A984, 0A986, or 0A987. For those OAS member countries that have not yet established or implemented an Import Certificate procedure, BXA will accept an equivalent official document (e.g., import license or letter of authorization) issued by the government of the importing country as supporting documentation for the export of firearms. This section describes the requirements for Import Certificates or official equivalents in support of license applications submitted to BXA for firearms items that are identified by “FC Column 1” in the “License Requirements” section of the Commerce Control List.

(b) Import Certificate Procedure. An Import Certificate or equivalent official document must be obtained from the government of the importing OAS member country for firearms items classified as ECCNs 0A984, 0A986, or 0A987. Except as provided by §748.9(a) of the EAR, the applicant must obtain and retain on file either the original or certified copy of the Import Certificate, or an original or certified copy of equivalent official document issued by the government of the importing country in support of any license application for export of firearms items classified as 0A984, 0A986, or 0A987. All the recordkeeping provisions of §762.2 of the EAR apply to this requirement. The applicant must clearly note the number and date of the Import Certificate or equivalent official document on all export license applications (BXA Form 748P, Multipurpose Application Form, Block 13) supported by that Certificate or equivalent official document. The applicant must also indicate in Block 7 of the application that the Certificate or equivalent official document has been received and will be retained on file. However, the applicant may submit an application before obtaining the original or certified copy of the Import Certificate, or the official original or certified copy of the equivalent document, provided that:

(1) The applicant has received a facsimile of the Import Certificate or equivalent official document at the time the license application is filed; and

(2) The applicant states on the application that a facsimile of the Import Certificate or equivalent official document has been received and that no shipment will be made against the license prior to obtaining the original or certified copy of the Import Certificate or the original or certified copy of the equivalent official document issued by
the importing country and retaining it on file. Generally, BXA will not consider any license application for the export of firearms items if the application is not supported by an Import Certificate or its official equivalent. If the government of the importing country will not issue an Import Certificate or its official equivalent, the applicant must supply the information described in paragraphs (g)(2)(i) and (g)(2)(vi) through (viii) of this section on company letterhead.

(c) Countries to which firearms controls apply. The firearms controls apply to all OAS member countries: Antigua and Barbuda, Argentina, the Bahamas, Barbados, Belize, Bolivia, Brazil, Canada, Chile, Colombia, Costa Rica, Dominican Republic, Ecuador, El Salvador, Grenada, Guatemala, Guyana, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Panama, Paraguay, Peru, St. Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Suriname, Trinidad and Tobago, the United States, Uruguay, and Venezuela.

(d) Items/Commodities. An Import Certificate or equivalent official document is required for items controlled under Export Control Classification Numbers (ECCNs) 0A984, 0A986, or 0A987.

(e) Use of the Import Certificate. An Import Certificate or equivalent official document can only be used to support one BXA Form-748P, Multipurpose Application. The BXA Form-748P, Multipurpose Application, must include the same items as those listed on the Import Certificate or the equivalent official document.

(f) Validity period. Import Certificates or equivalent official documents issued by an OAS member country will be valid for a period of one year or less. Although licenses generally are valid for two years, your ability to ship may be affected by the validity of the Import Certificate or equivalent official document.

(g) How to obtain an Import Certificate for firearms items destined to OAS member countries. (1) Applicants must request that the importer (e.g., ultimate consignee or purchaser) obtain the Import Certificate or an equivalent official document from the government of the importing country, and that it be issued covering the quantities and types of items that the applicant intends to export. Upon receipt of the Import Certificate or its official equivalent, the importer must provide the original or a certified copy of the Import Certificate or the original or a certified copy of the equivalent official document to the applicant. The applicant shall obtain the required documents prior to submitting a license application, except as provided in paragraphs (b)(1) and (b)(2) of this section.

(2) The Import Certificate or its official equivalent must contain the following information:

(i) Applicant’s name and address. The applicant may be either the exporter, supplier, or order party.

(ii) Import Certificate Identifier/Number.

(iii) Name of the country issuing the certificate or unique country code.

(iv) Date the Import Certificate was issued, in international date format (e.g., 24/12/98 (24 December 1998), or 3/1/99 (3 January 1999)).

(v) Name of the agency issuing the certificate, address, telephone and facsimile numbers, signing officer name, and signature.

(vi) Name of the importer, address, telephone and facsimile numbers, country of residence, representative’s name if commercial or government body, citizenship, and signature.

(vii) Name of the end-user(s), if known and different from the importer, address, telephone and facsimile numbers, country of residence, representative’s name if commercial (authorized distributor or reseller) or government body, citizenship, and signature. Note that BXA does not require the identification of each end-user when the firearms items will be resold by a distributor or reseller if unknown at the time of export.

(viii) Description of the items approved for import including a technical description and total quantity of firearms, parts and components, ammunition and parts.

NOTE TO PARAGRAPH (g)(2)(viii): You must furnish the consignee with a detailed technical description of each item to be given to the government for its use in issuing the Import Certificate. For example, for shotguns, provide the type, barrel length, overall length, number of shots, the manufacturer’s name, the country of manufacture, and the
serial number for each shotgun. For ammunition, provide the caliber, velocity and force, type of bullet, manufacturer’s name and country of manufacture.

(ix) Expiration date of the Import Certificate in international date format (e.g., 24/12/98) or the date the items must be imported, whichever is earlier.

(x) Name of the country of export (i.e., United States).

(xi) Additional information. Certain countries may require the tariff classification number, by class, under the Brussels Convention (Harmonized Tariff Code) or the specific technical description of an item. For example, shotguns may need to be described in barrel length, overall length, number of shots, manufacturer’s name and country of manufacture. The technical description is not the Export Control Classification Number (ECCN).

(h) Where to obtain Import Certificates. See Supplement No. 6 to this part for a list of the OAS member countries’ authorities administering the Import Certificate System.

(i) Alterations. After an Import Certificate or official equivalent document is used to support the issuance of a license, no corrections, additions, or alterations may be made on the Certificate by any person. If you desire to explain any information contained on the Import Certificate or official equivalent document, you may attach a signed statement to the Import Certificate or official equivalent. Some authorities may require a statement to be signed by a legal representative of the exporter.

(j) Request for return of Import Certificates. A U.S. exporter may be requested by a foreign importer to return an unused Import Certificate. Refer to §748.9(j) of this part for procedures and recordkeeping requirements for returning an Import Certificate retained by the applicant.

Supplement No. 1 to Part 748—BXA-748P, BXA-748P-A; Item Appendix, and BXA-748P-B; End-User Appendix; Multipurpose Application Instructions

All information must be legibly typed within the lines for each Block or Box, except where a signature is required. Enter only one typed line of text per Block or line. Where there is a choice of entering telephone numbers or facsimile numbers, and you wish to provide a facsimile number instead of a telephone number, identify the facsimile number with the letter “F” after the number (e.g., 022-358-0-123456F). If you are completing this form to request classification of your item, you must complete Blocks 1 through 5, 14, 22 (a), (b), (c), (d), and (i), 24, and 25 only.

Block 1: Contact Person. Enter the name of the person who can answer questions concerning the application.

Block 2: Telephone. Enter the telephone number of the person who can answer questions concerning the application.

Block 3: Facsimile. Enter the facsimile number, if available, of the person who can answer questions concerning the application.

Block 4: Date of Application. Enter the current date.

Block 5: Type of Application. Export. If the items are located within the United States, and you wish to export those items, mark the Box labeled “Export” with an (X). Reexport. If the items are located outside the United States, mark the Box labeled “Reexport” with an (X). Classification. If you are requesting BXA to classify your item against the Commerce Control List (CCL), mark the Box labeled “Classification Request” with an (X).

Block 6: Documents submitted with Application. Review the documentation you are required to submit with your application in accordance with the provisions of part 748 of the EAR, and mark all applicable Boxes with an (X).

Mark the Box “Foreign Availability” with an (X) if you are submitting an assertion of foreign availability with your license application. See part 768 of the EAR for instructions on foreign availability submissions.

Mark the “Tech. Specs.” box with an (X) if you are submitting descriptive literature, brochures, technical specifications, etc. with your application.

Block 7: Documents on File with Applicant. Certify that you have retained on file all applicable documents as required by the provisions of part 748 by placing an (X) in the appropriate Box(es).

Block 8: Special Comprehensive License. Complete this Block only if you are submitting an application for a Special Comprehensive License in accordance with part 752 of the EAR.

Block 9: Special Purpose. Complete this block for certain items or types of transactions only if specifically required in Supplement No. 2 to this part.

Block 10: Resubmission Application Control Number. If your original application was returned without action (RWA), provide the
Application Control Number. This does not apply to applications returned without being registered.

Block 11: Replacement License Number. If you are applying for a license to identical items to the same ultimate consignee, but would like to make a modification that is not excepted in §750.7(c) of the EAR, to the license, mark "Replacement License Number" in Block 11. Enter the original license number and complete Blocks 12 through 25, where applicable. Include a statement in Block 24 regarding what changes you wish to make to the original license.

Block 12: Items Previously Exported. This Block should be completed only if you have marked the "Reexport" box in Block 5. Enter the license number, License Exception symbol (for exports under General Licenses, enter the appropriate General License symbol), or other authorization under which the items were originally exported, if known.

Block 13: Import/End-User Certificate. Enter the name of the country and number of the Import or End User Certificate obtained in accordance with provisions of this part.

Block 14: Applicant. Enter the applicant's name, street address, city, state/country, and postal code. Provide a complete street address. P.O. Boxes are not acceptable. Refer to §748.5(a) of this part for a definition of "applicant". If you have marked "Export" in Block 5, you must include your company's Employer Identification Number unless you are filing as an individual or as an agent on behalf of the exporter. The Employee Identification Number is assigned by the Internal Revenue Service for tax identification purposes. Accordingly, you should consult your company's financial officer or accounting division to obtain this number.

Block 15: Other Party Authorized to Receive License. If you would like BXA to transmit the approved license to another party designated by you, complete all information in this block, including name, street address, city, country, postal code and telephone number. Leave this space blank if the license is to be sent to the applicant. Designation of another party to receive the license does not alter the responsibilities of the applicant.

Block 16: Purchaser. Enter the purchaser's complete name, street address, city, country, postal code, and telephone or facsimile number. Refer to §748.5(c) of this part for a definition of "purchaser". If the purchaser is also the ultimate consignee, enter the complete name and address. If your proposed transaction does not involve a separate purchaser, leave Block 16 blank.

Block 17: Intermediate consignee. Enter the intermediate consignee's complete name, street address, city, country, postal code, and telephone or facsimile number. Provide a complete street address, P.O. Boxes are not acceptable. Refer to §748.5(d) of this part for a definition of "intermediate consignee". If this party is identical to that listed in Block 16, enter the complete name and address. If your proposed transaction does not involve use of an intermediate consignee, enter "None". If your proposed transaction involves more than one intermediate consignee, provide the same information in Block 24 for each additional intermediate consignee.

Block 18: Ultimate Consignee. This Block must be completed if you are submitting a license application. Enter the ultimate consignee's complete name, street address, city, country, postal code, and telephone or facsimile number. Provide a complete street address, P.O. Boxes are not acceptable. The ultimate consignee is the party who will actually receive the item for the end-use designated in Block 21. Refer to §748.5(e) of this part for a definition of "ultimate consignee". A bank, freight forwarder, forwarding agent, or other intermediary may not be identified as the ultimate consignee. Government purchasing organizations are the sole exception to this requirement. This type of entity may be identified as the government entity that is the actual end-user, provided the actual end-user and end-use is clearly identified in Block 21 or in the additional documentation attached to the application.

If your application is for the reexport of items previously exported, enter the new ultimate consignee's complete name, street address, city, country, postal code and telephone number. Refer to §748.5(c) of this part for a definition of "ultimate consignee". If the application involves the reexport of items previously exported, enter the new ultimate consignee's complete name, street address, city, country, postal code and telephone number. Provide a complete street address, P.O. Boxes are not acceptable. If your application involves a temporary export or reexport, the applicant should be shown as the ultimate consignee in care of a person or entity who will have control over the items abroad.

Block 19: End-User. Complete this Block only if the ultimate consignee identified in Block 18 is not the actual end-user. If there will be more than one end-user, use Form BXA-748P-B to identify each additional end-user. Enter each end-user's complete name, street address, city, country, postal code, and telephone or facsimile number. Provide a complete street address, P.O. Boxes are not acceptable.

Block 20: Original Ultimate Consignee. If your application involves the reexport of items previously exported, enter the original ultimate consignee's complete name, street address, city, country, postal code, and telephone or facsimile number. Provide a complete street address, P.O. Boxes are not acceptable. The original ultimate consignee is the entity identified in the original application for export as the ultimate consignee.
the party currently in possession of the items.

Block 21. Specific End-Use: This Block must be completed if you are submitting a license application. Provide a complete and detailed description of the end-use intended by the ultimate consignee and/or end-user(s). If you are requesting approval of a reexport, provide a complete and detailed description of the end-use intended by the new ultimate consignee and/or end-user(s) and indicate any other countries for which resale or reexport is requested. If additional space is necessary, use Block 21 on Form BXA-748P-A or B. Be specific—vague descriptions such as “research,” “manufacturing,” or “scientific uses” are not acceptable.

Block 22: For a license application, you must complete each of the sub-blocks contained in this Block. If you are submitting a classification request, you need not complete Blocks (e), (f), (g), and (h). If you wish to export, reexport, or have BXA classify more than one item, use Form BXA-748P-A for additional items.

(a) ECCN. Enter the Export Control Classification Number (ECCN) that corresponds to the item you wish to export or reexport. If you are asking BXA to classify your item, provide a recommended classification for the item in this Block.

(b) CTP. You must complete this Block only if your application involves a digital computer or equipment containing a digital computer as described in Supplement No. 2 to this part. Instructions on calculating the CTP are contained in a Technical Note at the end of Category 4 in the CCL.

(c) Model Number. Enter the correct model number for the item.

(d) CCATS Number. If you have received a classification for this item from BXA, provide the CCATS number shown on the classification issued by BXA.

(e) Quantity. Identify the quantity to be exported or reexported, in terms of the “Unit” identified for the ECCN entered in Block 22(a). If the “Unit” for an item is “$ value”, enter the quantity in units commonly used in the trade.

(f) Units. The “Unit” paragraph within each ECCN will list a specific “Unit” for those items controlled by the entry. The “Unit” must be entered on all license applications submitted to BXA. If an item is licensed in terms of “$ value”, the unit of quantity commonly used in the trade must also be shown on the license application. This Block may be left blank on license applications only if the “Unit” for the ECCN entered in Block 22(a) is shown as “N/A” on the CCL.

(g) Unit Price. Provide the fair market value of the items you wish to export or reexport. Round all prices to the nearest whole dollar amount. Give the exact unit price only if the value is less than $0.50. If normal trade practices make it impractical to establish a firm contract price, state in Block 24 the precise terms upon which the price is to be ascertained and from which the contract price may be objectively determined.

(h) Total Price. Provide the total price of the item(s) described in Block 22(j).

(i) Manufacturer. Provide the name only of the manufacturer, if known, for each of the items you wish to export, reexport, or have BXA classify, if different from the applicant.

(j) Technical Description. Provide a description of the item(s) you wish to export, reexport, or have BXA classify. Provide details when necessary to identify the specific item(s), include all characteristics or parameters shown in the applicable ECCN using measurements identified in the ECCN (e.g., basic ingredients, composition, electrical parameters, size, gauge, grade, horsepower, etc.). These characteristics must be identified for the items in the proposed transaction when they are different than the characteristics described in promotional brochures.

Block 23: Total Application Dollar Value. Enter the total value of all items contained on the application in U.S. Dollars. The use of other currencies is not acceptable.

Block 24: Additional Information. Enter additional data pertinent to the application as required in the EAR. Include special certifications, names of parties of interest not disclosed elsewhere, explanation of documents attached, etc. Do not include information concerning Block 22 in this space.

If your application represents a previously denied application, you must provide the Application Control Number from the original application.

If you are requesting BXA to classify your product, use this space to explain why you believe the ECCN entered in Block 22(a) is appropriate. This explanation must contain an analysis of the item in terms of the technical control parameters specified in the appropriate ECCN. If you have not identified a recommended classification in Block 22(a), you must state the reason you cannot determine the appropriate classification, identifying anything in the regulations that you believe precluded you from determining the correct classification.

If additional space is necessary, use Block 24 on Form BXA-748P-A or B.

Block 25: You, as the applicant or duly authorized agent of the applicant, must manually sign in this Block. Rubber-stamped or electronic signatures are not acceptable. If you are an agent of the applicant, in addition to providing your name and title in this Block, you must enter your company’s name in Block 24. Type both your name and title in the space provided.

In addition to the instructions contained in Supplement No. 1 to part 748, you must also ensure that the additional requirements for certain items or types of transactions described in this supplement are addressed in your license application. All other blocks not specifically identified in this supplement must be completed in accordance with the instructions contained in Supplement No. 1 to part 748. The term "Block" used in this supplement relates to Form BXA-748B, unless otherwise noted.

(a) Chemicals, medicinals, and pharmaceuticals. If you are submitting a license application for the export or reexport of chemicals, medicinals, and/or pharmaceuticals, the following information must be provided in Block 22.

(1) Facts relating to the grade, form, concentration, mixture(s), or ingredients as may be necessary to identify the item accurately, and;

(2) The Chemical Abstract Service Registry (C.A.S.) numbers, if they exist, must be identified.

(b) Communications intercepting devices. If you are required to submit a license application under §742.13 of this part, you must enter the words "Communications Intercepting Device(s)" in Block 9. The item you are requesting to export or reexport must be specified by name in Block 22(j).

(c) Digital computers, telecommunications, and related equipment. If your license application involves items controlled by both Category 4 and Category 5, your license application must be submitted according to the principal function of the equipment. License applications involving computers controlled by Category 4 must identify a Composite Theoretical Performance (CTP) in Block 22(b). If the principal function is telecommunications, a CTP is not required. Computers, related equipment, or software performing telecommunication or local area network functions will be evaluated against the telecommunications performance characteristics of Category 5, while cryptographic, cryptoanalytic, certifiable multi-level security or certifiable user isolation functions, or systems that limit electromagnetic compatibility (EMC) will be evaluated against the information security performance characteristics of Category 5.

(d) Gift parcels: consolidated in a single shipment. If you are submitting a license application to export multiple gift parcels for delivery to individuals residing in a foreign country, you must include the following information in your license application.

Note: Each gift parcel must meet the terms and conditions described for gift parcels in License Exception GFT (see §740.12(a) of the EAR).

(1) In Block 16, enter the word "None";
(2) In Block 18, enter the word "Various" instead of the name and address of a single ultimate consignee;
(3) In Block 21, enter the phrase "For personal use by recipients";
(4) In Block 22(e), indicate a reasonable estimate of the number of parcels to be shipped during the validity of the license;
(5) In Block 22(j), enter the phrase "Gift Parcels";
(6) In Block 23, indicate a reasonable value approximation proportionate to the quantity of gift parcels identified in Block 22(e); and
(7) In Block 24, enter the name and address of the foreign consignor who shipped the CTP in Block 22(b) the following information:

(i) A configuration diagram of the entire system must be submitted if the equipment exceeds the limits of the Advisory Notes that indicate a likelihood of approval for Country Group D:1 for the appropriate ECCN in the Commerce Control List (CCL); and
(ii) Technical specifications and product brochures to corroborate the data supplied in your license application.

(2) Additional requirements. License applications to export or reexport computers or related equipment that are described in Advisory Note 4 to Category 4, or that exceed any of the limits specified in Advisory Notes 3 or 4 to Category 4, must include:

(i) A signed statement by a responsible representative of the end-user or the importing agency describing the end-use and certifying that the "digital" computers or related equipment:

(A) Will be used only for civil applications; and
(B) Will not be reexported or otherwise disposed of without prior written authorization from BXA;

(ii) A full description of the equipment and its intended application and workload; and
(iii) A complete identification of all end-users and their activities.

(2) Requirements for license applications involving digital computers. If you are submitting a license application to export or reexport "digital computers" or equipment containing digital computers to destinations in Country Group D:1 (See Supplement No. 1 to part 740 of the EAR), or to upgrade existing "digital computer" installations in those countries, you must include in addition to the CTP in Block 22(b) the following information:

(i) A configuration diagram of the entire system must be submitted if the equipment exceeds the limits of the Advisory Notes that indicate a likelihood of approval for Country Group D:1 for the appropriate ECCN in the Commerce Control List (CCL); and
(ii) Technical specifications and product brochures to corroborate the data supplied in your license application.

(2) Additional requirements. License applications to export or reexport computers or related equipment that are described in Advisory Note 4 to Category 4, or that exceed any of the limits specified in Advisory Notes 3 or 4 to Category 4, must include:

(i) A signed statement by a responsible representative of the end-user or the importing agency describing the end-use and certifying that the "digital" computers or related equipment:

(A) Will be used only for civil applications; and
(B) Will not be reexported or otherwise disposed of without prior written authorization from BXA;

(ii) A full description of the equipment and its intended application and workload; and
(iii) A complete identification of all end-users and their activities.
items to the United States and state the origin of the shipment;

(3) Any available evidence showing the approval or acquiescence of the exporting country (for the country of which the exporter is a resident) for shipments to the proposed ultimate destination. Such evidence may be in the form of a Transit Authorization Certificate; and

(4) Any support documentation required by §748.9 of this part for the country of ultimate destination.

(f) Intransit outside of the United States. If you are submitting a license application based on General Prohibition No. 8 stated in §734.2(b)(8) of the EAR and identification of the intermediate consignee in the country of unloading or transit is unknown at the time the license application is submitted, the country of unloading or transit must be shown in Block 17.

(g) Nuclear Nonproliferation items and end-uses—(1) Statement requirement. If a license is required to export or reexport items described in §742.3 of the EAR, or any other item (except those controlled for short supply reasons) where the item is intended for a nuclear end-use, prior to submitting a license application, you must obtain a signed written statement from the end-user certifying the following:

(i) The items to be exported or replicas thereof ("replicas" refers to items produced abroad based on physical examination of the item originally exported, matching it in all critical design and performance parameters), will not be used in any of the activities described in §744.2 of the EAR; and

(ii) Written authorization will be obtained from the BXa prior to reexporting the items, unless they are destined to Canada or would be eligible for export from the United States to the new country of destination under NLR based on Country Chart NP Column 1.

(2) License application requirements. Along with the required certification, you must include the following information in your license application:

(i) In Block 7, place an (X) in the box titled "Nuclear Certification";

(ii) In Block 9, enter the phrase "NUCLEAR CONTROLS";

(iii) In Block 21, provide, if known, the specific geographic locations of any installations, establishments, or sites at which the items will be used;

(iv) In Block 22(j), if applicable, include a description of any specific features of design or specific modifications that make the item capable of nuclear explosive activities, or of safeguarded or unsafeguarded nuclear activities as described in §744.2(a)(3) of the EAR; and

(v) In Block 24, if your license application is being submitted because you know that your transaction involves a nuclear end-use described in §744.2 of the EAR, you must fully explain the basis for your knowledge that the items are intended for the purpose(s) described §744.2 of the EAR. Indicate, if possible, the specific end-use(s) the items will have in designing, developing, fabricating, or testing nuclear weapons or nuclear explosive devices or in designing, constructing, fabricating, or operating the facilities described in §744.2(a)(3) of the EAR.

(h) Numerical control devices, motion control boards, numerically controlled machine tools, dimensional inspection machines, direct numerical control systems, specially designed assemblies and specially designed software. (3) If you are submitting a license application to export, reexport, or request BXa to classify numerical control devices, motion control boards, numerically controlled machine tools, dimensional inspection machines, and specially designed software you must include the following information in your license application:

(i) For numerical control devices and motion control boards:

(A) Make and model number of the control unit;

(B) Description and internal configuration of numerical control device. If the device is a computer with motion control board(s), then include the make and model number of the computer;

(C) Description of the manner in which a computer will be connected to the CNC unit for on-line processing of CAD data. Specify the make and model of the computer;

(D) Number of axes the control unit is capable of simultaneously controlling in a coordinated contouring mode, and type of interpolation (linear, circular, and other);

(E) Minimum programmable increment;

(F) A description and an itemized list of all software/firmware to be supplied with the control device or motion control board, including software/firmware for axis interpolation function and for any programmable control unit or device to be supplied with the control unit;

(G) Description of capabilities related to "real time processing" and receiving computer aided-design;

(H) A description of capability to accept additional boards or software that would permit an upgrade of the electronic device or motion control board above the control levels specified in ECCN 2B000; and

(i) Specify if the electronic device has been downgraded, and if so can it be upgraded in future.

(ii) For numerically controlled machine tools and dimensional inspection machines:

(A) Name and model number of machine tool or dimensional inspection machine;

(B) Type of equipment, e.g., horizontal boring machine, machining center, dimensional inspection machine, turning center, water jet, etc;
(C) Description of the linear and rotary axes capable of being simultaneously controlled in a coordinated contouring mode, regardless of the fact that the coordinated movement of the machine axis may be limited by the numerical control unit supplied by the machine tool;

(D) Maximum workpiece diameter for cylindrical grinding machines;

(E) Motion (camming) of the spindle axis measured in the axial direction in one revolution of the spindle, and a description of the method of measurement for turning machine tools only;

(F) Motion (run out) of the spindle axis measured in the radial direction in one revolution of the spindle, and a description of the method of measurement;

(G) Overall positioning accuracy in each axis, and a description of the method for measurement;

(H) Slide motion test results.

(i) Parts, components, and materials incorporated abroad into foreign-made products. BX A will consider license applications to export or reexport to multiple consignees or multiple countries when an application is required for foreign produced direct product containing parts and components subject to the EAR in §732.4(b) of the EAR and to General Prohibition Two stated in §734.2(b)(2) of the EAR. Such requests will not be approved for countries listed in Country Group E:2 (See Supplement No. 1 to part 740 of the EAR), and may be approved only in limited circumstances for countries listed in Country Group D:1.

(1) License applications for the export of parts and components. If you are submitting a license application for the export of parts, components, or materials to be incorporated abroad into products that will then be sent to designated third countries, you must enter in Block 21, a description of end-use including a general description of the commodities to be manufactured, their typical end-use, and the countries where those commodities will be marketed. The countries may be listed specifically or may be identified by Country Groups, geographic areas, etc.

(2) License applications for the reexport of incorporated parts and components. If you are submitting a license application for the reexport of parts, components, or materials incorporated abroad into products that will be sent to designated third countries you must include the following information in your license application:

(i) In Block 9, enter the phrase “Parts and Components”;

(ii) In Block 18, enter the name, street address, city and country of the foreign party who will be receiving the foreign-made product. If you are requesting approval for multiple countries or consignees enter “Various” in Block 18, and list the specific countries, Country Groups, or geographic areas in Block 24;

(iii) In Block 20, enter the name, street address, city, and country of the foreign party who will be exporting the foreign-made product incorporating U.S. origin parts, components or materials;

(iv) In Block 21, describe the activity of the ultimate consignee identified in Block 18 and the end-use of the foreign-made product. Indicate the final configuration if the product is intended to be incorporated in a larger system. If the end-use is unknown, state “unknown” and describe the general activities of the end-user;

(v) In Block 22(e), specify the quantity for each foreign-made product. If this information is unknown, enter “Unknown” in Block 22(e);

(vi) In Block 22(h), enter the digit “0” for each foreign-made product;

(vii) In Block 22(j), describe the foreign-made product that will be exported, specifying type and model or part number. Attach brochures or specifications, if available. Show as part of the description the unit value, in U.S. dollars, of the foreign-made product (if more than one foreign-made product is listed on the license application, specify the unit value for each type/model/part number). Also include a description of the U.S. content (including the applicable Export Control Classification Number(s)) and its value in U.S. dollars. If more than one foreign-made product is identified on the license application, describe the U.S. content and specify the U.S. content value for each foreign-made product. Also, provide sufficient supporting information to explain the basis for the stated values. To the extent possible, explain how much of the value of the foreign-made product represents foreign origin parts, components, or materials, as opposed to labor, overhead, etc. When the U.S. content varies and cannot be specified in advance, provide a range of percentage and value that would indicate the minimum and maximum U.S. content;

(viii) Include separately in Block 22(j) a description of any U.S. origin spare parts to be reexported with the foreign-made product, if they exceed the amount allowed by §740.10 of the EAR. Enter the quantity, if appropriate, in Block 22(h). Enter the ECCN for the spare parts in Block 22(a) and enter the value of the spare parts in Block 22(h);

(ix) In Block 22, enter the digit “0”;

(x) If the foreign-made product is the direct product of U.S. origin technology that was exported or reexported subject to written assurance, a request for waiver of that assurance, if necessary, may be made in Block 24. If U.S. origin technology will accompany a shipment to a country listed in Country Group D:1 or E:2 (see Supplement No. 1 to part 740 of the EAR) describe in
Block 24 the type of technology and how it will be used.

(i) Ship stores, plane stores, supplies, and equipment—(1) Vessels under construction. If you are submitting a license application for the export or reexport of items, including ship stores, supplies, and equipment, to a vessel under construction you must include the following information in your license application:

   (i) In Block 18, enter the name, street address, city, and country of the shipyard where vessel is being constructed;
   (ii) In Block 22(j), state the length of the vessel for a vessel under 12 m (40 ft) in length. For a vessel 12 m (40 ft) in length or over, provide the following information (if this information is unknown, enter “Unknown” in this Block):
      (A) Hull number and name of vessel;
      (B) Type of vessel;
      (C) Name and business address of prospective owner, and the prospective owner’s nationality; and
      (D) Country of registry or intended country of registry.

(2) Aircraft under construction. If you are submitting a license application for the export or reexport of items, including plane stores, supplies, and equipment, to an aircraft under construction you must include the following information in your license application:

   (i) In Block 18, enter the name and address of the plant where the aircraft is being constructed;
   (ii) In Block 22(j), enter the following information (if this information is unknown, enter “Unknown” in this Block):
      (A) Type of aircraft and model number;
      (B) Name and business address of prospective owner and his nationality; and
      (C) Country of registry or intended country of registry.

(3) Operating vessels and aircraft. If you are submitting a license application for the export or reexport of items, including ship or plane stores, supplies, and equipment to an operating vessel or aircraft, whether in operation or being repaired, you must include the following information in your license application:

   (i) In Block 18, enter the name of the owner, the name of the vessel, if applicable, and port or point where the items will be taken aboard;
   (ii) In Block 18, enter the following statement if, at the time of filing the license application, it is uncertain where the vessel or aircraft will take on the items, but it is known that the items will not be shipped to a country listed in Country Group D:1 or E:2 (see Supplement No. 1 to part 740 of the EAR): Uncertain; however, shipment(s) will not be made to Country Groups D:1 or E:2.

   (iii) Provide information as described in paragraph (j)(1)(ii) of this supplement for vessels or information contained in paragraph (j)(2)(iii) of this supplement for aircraft.

(4) Regional stability controlled items. If you know that an item that requires a license to be exported from the United States to a certain foreign destination will be reexported to a third destination also requiring approval, such a request must be included on the license application. The license application must specify the country to which the reexport will be made in Block 24. If the export does not require a license but the reexport does, you may apply for a license for the reexport, or you may export without a license and notify the consignee of the requirement to seek a license to reexport.

(5) Robots. If you are submitting a license application for the export or reexport of items controlled by ECCNs 2B007 or 2D001 (including robots, robot controllers, end-effectors, or related software) the following information must be provided in Block 24:

   (1) Specify if the robot is equipped with a vision system and its make, type, and model number;
   (2) Specify if the robot is specially designed to comply with national safety standards for explosive munitions environments;
   (3) Specify if the robot is specially designed for outdoor applications and if it meets military specifications for those applications;
   (4) Specify if the robot is specially designed for operating in an electro-magnetic pulse (EMP) environment;
   (5) Specify if the robot is specially designed or rated as radiation-hardened beyond that necessary to withstand normal industrial (i.e., non-nuclear industry) ionizing radiation, and its rating in grays (Silicon);
   (6) Describe the robot's capability of using sensors, image processing or scene analysis to generate or to modify robot program instructions or data;
   (7) Describe the manner in which the robot may be used in nuclear industry manufacturing; and
   (8) Specify if the robot controllers, end-effectors, or software are specially designed for robots controlled by ECCN 2B007, and why.

(n) Short Supply controlled items. If you are submitting a license application for the export of items controlled for short supply reasons, you must consult part 754 of the EAR for instructions on preparing your license application.
(o) Technology—(i) License application instructions. If you are submitting a license application for the export or reexport of technology you must check the box labeled “Letter of Explanation” in Block 6, enter the word “Technology” in Block 9, leave Blocks 22(e) and (i) blank, and include a general statement that specifies the technology (e.g., blueprints, manuals, etc.) in Block 22(j).

(2) Letter of explanation. Each license application to export or reexport technology must be supported by a comprehensive letter of explanation. This letter must describe all the facts for a complete disclosure of the transaction including, if applicable, the following information:
   (i) The identities of all parties to the transaction;
   (ii) The exact project location where the technology will be used;
   (iii) The type of technology to be exported or reexported;
   (iv) The form in which the export or reexport will be made;
   (v) The uses for which the data will be employed;
   (vi) An explanation of the process, product, size, and output capacity of all items to be produced with the technology, if applicable, or other description that delineates, defines, and limits the data to be transmitted (the "technical scope"); and
   (vii) The availability abroad of comparable foreign technology.

(3) Special provisions—(i) Technology controlled for national security reasons. If you are submitting a license application to export technology controlled for national security reasons to a country not listed in Country Group D:1 or E:2 (see Supplement No. 1 to part 740 of the EAR), upon request, you must provide BXA a copy of the written letter from the ultimate consignee assuring that, unless prior authorization is obtained from BXA, the consignee will not knowingly reexport the technology to any destination, or export the direct product of the technology, directly or indirectly, to a country listed in Country Group D:1 or E:2 (see Supplement No. 2 to part 740 of the EAR). If you are unable to obtain this letter of assurance from your consignee, you must state in your license application why the assurances could not be obtained.

(ii) Maritime nuclear propulsion plants and related items. If you are submitting a license application to export or reexport technology relating to maritime nuclear propulsion plants and related items including maritime (civil) nuclear propulsion plants, their land prototypes, and special facilities for their construction, support, or maintenance, including any machinery, device, component, or equipment specifically developed or designed for use in such plants or facilities you must include the following information in your license application:
   (A) A description of the foreign project for which the technology will be furnished;
   (B) A description of the scope of the proposed services to be offered by the applicant, his consultant(s), and her subcontractor(s) including all the design data that will be disclosed;
   (C) The names, addresses and titles of all personnel of the applicant, the applicant’s consultant(s) and subcontractor(s) who will discuss or disclose the technology or be involved in the design or development of the technology;
   (D) The beginning and termination dates of the period of time during which the technology will be discussed or disclosed and a proposed schedule of the reports the applicant will submit to BXA, detailing the technology discussed or disclosed during the period of the license;
   (E) The following certification:
      (1) [We] certify that if this license application is approved, [we] and any consultants, subcontractors, or other persons employed or retained by us in connection with the project licensed will not discuss with or disclose to others, directly or indirectly, any technology relating to U.S. naval nuclear propulsion plants; and
      (2) [We] further certify that [we] will furnish to the Bureau of Export Administration all reports and information it may require concerning specific transmittals or disclosures of technology under any license granted as a result of this license application;
   (F) A statement of the steps that you will take to assure that personnel of the applicant, the applicant's consultant(s) and subcontractor(s) will not discuss or disclose to others technology relating to U.S. naval nuclear propulsion plants; and
   (G) A written statement of assurance from the foreign importer as described in paragraph (o)(3)(i) of this supplement.

(p) Temporary exports or reexports. If you are submitting a license application for the temporary export or reexport of an item (not eligible for the temporary exports and reexports licenses under License Exception TMP (see §740.9(a) of the EAR)) you must include the following certification in Block 24.

Temporary exports and reexports are to be temporarily exported (or reexported) for (state the purpose e.g., demonstration, testing, exhibition, etc.), used solely for the purpose authorized, and returned to the United States (or originating country) as soon as the temporary purpose has ended, but in no case later than one year of the date of export (or reexport), unless other disposition has been authorized in writing by the Bureau of Export Administration.

(q) Chemicals controlled for CW reasons under ECCN 1C350. In addition to any supporting documentation required by part 748, you must also obtain from your consignee an
End-Use Certificate for the export of chemicals controlled for CW reasons by ECCN 1C350 (except 1C350.a.20., a.24, and a.31) to non-States Parties (destinations not listed in Supplement No. 2 to part 745 of the EAR). See §745.2 of the EAR. In addition to the End-Use Certificate, you may still be required to obtain a Statement by Ultimate Consignee and Purchaser (Form BXA-711P) as support documentation. Consult §§748.9 and 748.11 of the EAR.

SUPPLEMENT NO. 3 TO PART 748—BXA-711, STATEMENT BY ULTIMATE CONSIGNEE AND PURCHASER INSTRUCTIONS

All information must be typed or legibly printed in each appropriate Block or Box.

Block 1: Ultimate Consignee. The Ultimate Consignee must be the person abroad who is actually to receive the material for the disposition stated in Block 2. A bank, freight forwarder, forwarding agent, or other intermediary is not acceptable as the Ultimate Consignee.

Block 2: Disposition or Use of Items by Ultimate Consignee named in Block 1. Place an (X) in “A.,” “B.,” “C.,” “D.,” and “E.,” as appropriate, and fill in the required information.

Block 3: Nature of Business of Ultimate Consignee named in Block 1. Complete both “A” and “B.” Possible choices for “A” include: broker, distributor, fabricator, manufacturer, wholesaler, retailer, value added reseller, original equipment manufacturer, etc.

Possible choices for “B” include: contractual, franchise, distributor, wholesaler, continuing and regular individual business, etc.

Block 4: Additional Information. Provide any other information not appearing elsewhere on the form such as other parties to the transaction, and any other material facts that may be of value in considering license applications supported by this statement.

Block 5: Assistance in Preparing Statement. Name all persons, other than employees of the ultimate consignee or purchaser, who assisted in the preparation of this form.

Block 6: Ultimate Consignee. Enter the requested information and sign the statement in ink. (For a definition of ultimate consignee, see §748.5(e) of this part.)

Block 7: Purchaser. This form must be signed in ink by the Purchaser, if the Purchaser is not the same as the Ultimate Consignee identified in Block 1. (For a definition of purchaser, see §748.5(c) of this part.)

Block 8: Certification for U.S. Exporter. This Block must be completed to certify that no correction, addition, or alteration on this form was made subsequent to the signing by the Ultimate Consignee in Block 6 and Purchaser in Block 7.

The United States participates in an Import Certificate/Delivery Verification procedure. Under this procedure, U.S. importers are sometimes required to provide their foreign suppliers with an U.S. International Import Certificate that is validated by the U.S. Government. This certificate tells the government of the exporter’s country that the items covered by the certificate will be imported into the U.S. economy and will not be reexported except as authorized by U.S. export control regulations. In addition, in some cases, the exporter’s government may require a delivery verification. Under this procedure, the U.S. Customs Service validates a certificate confirming that the items have entered the U.S. economy. The U.S. importer must return this certificate to the foreign exporter.

This supplement establishes the procedures and requirements of BXA with respect to both of these programs. Paragraph (a) of this supplement contains the requirements and procedures of the U.S. International Import Certificate procedure. Paragraph (b) of this supplement contains the requirements and procedures of the Delivery Verification procedure.

(a) U.S. International Import Certificates. If you are a U.S. importer, a foreign supplier may request you to obtain a U.S. import certificate. The reason for this request is that the exporter’s government requires a U.S. import certificate as a condition to issuing an export license. To obtain such a certificate you will have to fill in and execute the U.S. International Import Certificate Form (Form BXA-645P/ATF-4522/DSP-53) and submit it to the U.S. government agency that has jurisdiction over the items you are importing. In doing so, you will be making a representation to the United States Government that you will import the items described in the certificate into the United States or if not so imported, you will not divert, transship or reexport them to another destination with the explicit approval of the U.S. government agency that has jurisdiction over those items. (Representations that items will be entered into the U.S. do not preclude the temporary unloading of items in a foreign trade zone for subsequent entry into the economy of the U.S.) If the items described in the certificate are subject to U.S. Department of Commerce jurisdiction, the Department will validate the certificate and return it to you. You may then send the certificate to your foreign supplier. In this way the government of the exporting country is assured that the items will become subject to the export control laws of the United States.

(b) Delivery Verification Procedure, The United States participates in an International Import Certificate/Delivery Verification procedure. Under this procedure, U.S. importers are sometimes required to provide their foreign suppliers with an U.S. International Import Certificate that is validated by the U.S. Government. This certificate tells the government of the exporter’s country that the items covered by the certificate will be imported into the U.S. economy and will not be reexported except as authorized by U.S. export control regulations. In addition, in some cases, the exporter’s government may require a delivery verification. Under this procedure, the U.S. Customs Service validates a certificate confirming that the items have entered the U.S. economy. The U.S. importer must return this certificate to the foreign exporter.

This supplement establishes the procedures and requirements of BXA with respect to both of these programs. Paragraph (a) of this supplement contains the requirements and procedures of the U.S. International Import Certificate procedure. Paragraph (b) of this supplement contains the requirements and procedures of the Delivery Verification procedure.

(a) U.S. International Import Certificates. If you are a U.S. importer, a foreign supplier may request you to obtain a U.S. import certificate. The reason for this request is that the exporter’s government requires a U.S. import certificate as a condition to issuing an export license. The U.S. importer must return this certificate to the foreign exporter.

This supplement establishes the procedures and requirements of BXA with respect to both of these programs. Paragraph (a) of this supplement contains the requirements and procedures of the U.S. International Import Certificate procedure. Paragraph (b) of this supplement contains the requirements and procedures of the Delivery Verification procedure.

(a) U.S. International Import Certificates. If you are a U.S. importer, a foreign supplier may request you to obtain a U.S. import certificate. The reason for this request is that the exporter’s government requires a U.S. import certificate as a condition to issuing an export license. To obtain such a certificate you will have to fill in and execute the U.S. International Import Certificate Form (Form BXA-645P/ATF-4522/DSP-53) and submit it to the U.S. government agency that has jurisdiction over the items you are importing. In doing so, you will be making a representation to the United States Government that you will import the items described in the certificate into the United States or if not so imported, you will not divert, transship or reexport them to another destination with the explicit approval of the U.S. government agency that has jurisdiction over those items. (Representations that items will be entered into the U.S. do not preclude the temporary unloading of items in a foreign trade zone for subsequent entry into the economy of the U.S.) If the items described in the certificate are subject to U.S. Department of Commerce jurisdiction, the Department will validate the certificate and return it to you. You may then send the certificate to your foreign supplier. In this way the government of the exporting country is assured that the items will become subject to the export control laws of the United States.
(i) By mail to the Bureau of Export Administration, P.O. Box 273, Washington D.C. 20044, Attn: Import Certificate Request; or
(ii) In person or by mail at one of the following Department of Commerce U.S. and Foreign Commercial Service District Offices:

Boston, MA  New Orleans, LO
Buffalo, NY  New York, NY
Chicago, IL  Philadelphia, PA
Cincinnati, OH  Phoenix, AZ
Cleveland, OH  Pittsburgh, PA
Dallas, TX  Portland, OR
Detroit, MI  St. Louis, MO
Houston, TX  San Francisco, CA
Kansas City, MO  Savannah, GA
Los Angeles, CA  Seattle, WA
Miami, FL  Trenton, NJ

(3) U.S. International Import Certificate. The U.S. International Import Certificate must be submitted to the foreign government within six months from the date of certification by the U.S. Department of Commerce. The expiration of this six-month period in no way affects the responsibility of the importer to fulfill the commitments made in obtaining the certificate. If the certificate is not presented to the government of the exporting country before the expiration of its validity period, the exporter must apply for a new certificate. The original unused U.S. International Import Certificate must be returned to BXA at the address specified in paragraph (a)(2)(i) of this supplement.

(4) Statements on the certificate or amendment are representations to the U.S. Government which continue in effect.

(i) All statements and representations made in a U.S. International Import Certificate or an amendment thereto, will be deemed to be continuing in nature until the transaction described in the certificate is completed and the items are delivered into the economy of the importing country.

(ii) Any change of fact or intention in regard to the transaction described in the certificate shall be promptly disclosed to BXA by the U.S. importer by presentation of an amended certificate. The amended certificate must describe all of the changes and be accompanied by the original certificate bearing the certification of BXA. If the original certificate has been transferred to the foreign exporter, you must, where possible, attempt to obtain the original certificate prior to applying for an amendment. If the original certificate is unobtainable because the foreign exporter has submitted it to the appropriate foreign government, or for any other reason, then you must submit a written statement with your amendment giving the reasons for your failure to submit the original certificate.

(5) Certificates for Triangular transaction (items will not enter the U.S. or applicant is not sure that they will enter the United States).

(i) In accordance with international practice, BXA will, upon request, stamp the certificate with a triangular symbol as notification of the transaction to the government of the exporting country that the U.S. importer is uncertain whether the items will be imported into the U.S. or knows that the items will be imported into the U.S., but that, in any case, the items will not be delivered to any other destination except in accordance with the EAR.

(ii) The triangular symbol on a certificate U.S. International Import Certificate is not, in and of itself, an approval by BXA to transfer or sell items to a foreign consignee. Note that a triangular Certificate will not be issued covering foreign excess property sold abroad by the U.S. Department of Defense.

(6) Approval to export items to a foreign consignee prior to delivery under a U.S. International Import Certificate. The written approval of BXA is required before items covered by a U.S. International Import Certificate (whether or not bearing a triangular symbol) may be shipped to a destination other than the U.S. or Canada or sold to a foreign purchaser, and before title to or possession of such items may be transferred to a foreign transferee. This requirement does not apply after the items have been delivered in accordance with the undertaking set forth in the Certificate or if at the time of such shipment, sale, passage of possession or passage of title, a License Exception or a NLR provision of the EAR would authorize the transaction.

(i) If prior approval is required, a letter requesting authorization to release the shipment shall be submitted to BXA at the address listed in paragraph (a)(2)(i) of this supplement.

(ii) The letter must contain the certificate number; date issued; location of the issuing office; names, addresses, and identities of all parties to the complete transaction; and the quantity, dollar value, and description of the items. The letter must be accompanied by the U.S. International Import Certificate, and all other documentation required by the EAR for the item and country of ultimate destination, as identified in part 748 of the EAR. If requirements stated in part 748 of the EAR do not apply to your transaction, you must identify the intended end-use of the items in your letter.

(iii) Where the letter request is approved and is supported by a foreign import certificate, no further approval from BXA is required for the purchaser or transferee to resell or again transfer the items. However, where BXA approves a request that was not supported by a foreign import certificate, the person to whom approval is granted is required to inform the purchaser or transferee in writing, that the items are to be shipped...
to the approved destination only and that no other disposition of the items is permitted without the approval of BXA.

(iv) If the transaction is approved, a validated letter of approval will be sent to the U.S. purchaser for retention in his records. Where a DV or other official government confirmation of delivery is required, the letter will so indicate.

(v) If the items covered by a certificate have been imported into a destination other than the U.S. and the foreign exporter of the items requests a Delivery Verification, the person who obtained the certificate must obtain a DV from the person to whom the items were delivered in the actual importing country. (If a DV is unobtainable, other official government confirmation of delivery must be obtained.) The DV or other official government confirmation of delivery must be submitted to BXA together with an explanatory letter giving the U.S. International Import Certificate number, date issued, and location of issuing office. BXA will then issue Form ITA-6008, Delivery Compliance Notice, in two copies, the original of which must be forwarded to the country of origin in order to serve as evidence to the exporting country that the requirements of the U.S. Government have been satisfied with respect to delivery of the items.

(vi) Delivery, sale, or transfer of items to another U.S. purchaser.

(A) Items covered by a U.S. International Import Certificate may not be sold, and title to or possession of such items may not be transferred, to another U.S. purchaser or transferee before the items are delivered to the U.S. (or to an approved foreign destination, as provided by paragraph (a)(5) of this supplement), except in accordance with the provisions described in paragraph (a)(6) of this supplement. The provisions of this paragraph do not apply after the items have been delivered in accordance with the undertaking set forth in the certificate.

(B) Resale or transfer to another U.S. purchaser or transferee requires the prior approval of BXA only in cases where the buyer or transferee is listed in Supplement No. 1 to part 766 of the EAR. However, you, as the person who obtained the certificate, are required to notify BXA of any change in facts or intentions relating to the transaction, and in all cases you will be held responsible for the delivery of the items in accordance with the EAR. You are required in all cases to secure, prior to sale or transfer, and to retain in your files in accordance with the recordkeeping provisions contained in part 762 of the EAR, written acceptance by the purchaser or transferee of:

(I) All obligations undertaken by, and imposed under the EAR, upon the holder of the certificate; and

(2) An undertaking that all subsequent sales or transfers will be made subject to the same conditions.

(iii) The responsibility of the certificate holder for obtaining an approval to those cases where the items are resold to a U.S. purchaser (See paragraph (b)(1) of this supplement).

(vii) Reexport or transshipment of items after delivery to U.S. Items imported into the U.S. under the provisions of a U.S. International Import Certificate may not be reexported to any destination under the intransit provisions of License Exception TMP (see §740.9(b)(1) of the EAR). However, all other provisions of the EAR applicable to items of domestic origin shall apply to the reexport of items of foreign origin shipped to the U.S. under a U.S. International Import Certificate.

(viii) Lost or destroyed U.S. International Import Certificates. If a U.S. International Import Certificate is lost or destroyed, a duplicate copy may be obtained by the person in the U.S. who executed the original U.S. International Import Certificate by submitting to any of the offices listed in paragraph (a)(2)(i) of this supplement new Form BXA-645P/ATF-4522/DSP-53 in the same way as an original request, except that the forms shall be accompanied by a letter detailing the circumstances under which the original certificate was lost or destroyed and certifying:

(A) That the original U.S. International Import Certificate No. , dated , issued to (name and address of U.S. importer) for import from (foreign exporter's name and address) has been lost or destroyed; and

(B) That if the original U.S. International Import Certificate is found, the applicant agrees to return the original or duplicate of the certificate to the Bureau of Export Administration.

(ix) Unused U.S. International Import Certificates. If the transaction will not be completed and the U.S. International Import Certificate will not be used, return the certificate for cancellation to BXA at the address listed in paragraph (a)(2)(i) of this supplement.

(b) Delivery Verification Certificate. U.S. importers may be required by their foreign suppliers to furnish them with a certified Form BXA-647P, Delivery Verification Certificate, covering items imported into the U.S. These requests are made by foreign governments to assure that strategic items shipped to the U.S. are not diverted from their intended destination. In these instances, the issuance of an export license by the foreign country is conditioned upon the subsequent receipt of a Delivery Verification Certificate from the U.S. importer. Accordingly, your compliance with your foreign exporter's request for a Delivery Verification is necessary to ensure your foreign exporter
fulfills its government obligations and is able to participate in future transactions with you. Failure to comply may subject your exporter to penalties that may prevent future trade.

(2) The responsibility of a person or firm executing a U.S. International Import Certificate for providing the foreign exporter with confirmation of delivery of the items includes instances where the items are resold or transferred to another U.S. person or firm prior to actual delivery to the U.S. or to an approved foreign destination. The person who executed the U.S. International Import Certificate shall secure in writing from the U.S. purchaser or transferee the U.S. International Import Certificate in your files in accordance with the recordkeeping provisions stated in part 762 of the EAR.

(1) Acceptance of the obligation to provide the purchaser or transferee with either the Delivery Verification (or other official government confirmation of delivery if a Delivery Verification is unobtainable) or assurance that this document was submitted to BXA; and

(ii) An undertaking that each succeeding U.S. transferee or purchaser will assume the same obligation or assurance. In each case the seller or transferor must transmit to the U.S. purchaser or transferee the U.S. International Import Certificate number covering the export from the foreign country and request that they pass it on to any other U.S. purchasers or transferees.

(2) Completion and certification of Delivery Verification Certificates. If you are requested by your foreign exporter to provide a Delivery Verification, you must obtain Form BXA-647P from a U.S. customs office or one of the offices listed in paragraph (a)(2) of this supplement and complete all blocks (except those below the line titled “To be completed by U.S. Customs Service”) on the form. The language used in the block titled “Description of Goods” must describe the items in the same terms as those shown on the applicable U.S. International Import Certificate. Upon completion Form BXA-647P must be presented, in duplicate, to a U.S. customs office. The U.S. customs office will certify Form BXA-647P only where the import is made under a warehouse or consumption entry.

(3) Disposition of certified Delivery Verification Certificates. The importer must send the original certified Delivery Verification Certificate to the foreign exporter or otherwise dispose of it in accordance with the instructions of the exporting country. The duplicate copy will be retained by the U.S. customs office.

(4)(i) Issuance of a U.S. Delivery Compliance Notice in lieu of a Delivery Verification Certificate. If you are requested to provide a Delivery Verification Certificate but do not wish to disclose the name of your customer to the foreign exporter (e.g., in the event that the items are resold or transferred to another person or firm before the items enter the U.S.), you may submit an originally completed Form BXA-647P together with an explanatory letter requesting a Delivery Compliance Notice, to BXA at the address listed in (a)(2)(i) of this supplement.

(D) The number and date of the related U.S. International Import Certificate.

(ii) BXA will, in applicable cases, notify the exporting government that a Delivery Verification Certificate has been issued.

(c) Penalties and sanctions for violations. The enforcement provisions of part 764 and Supplement No. 2 to part 764 of the EAR apply to transactions involving imports into the U.S. covered by this supplement and to both foreign and U.S. parties involved in a violation of this supplement. Any provisions of part 764 and Supplement No. 2 to part 764 of the EAR which, by their terms, relate to “exports” or “exports from the U.S.” are also deemed to apply and extend to imports into the U.S., applications for U.S. International Import Certificates (Forms BXA-645P presented to U.S. Department of Commerce for certification), U.S. International Import Certificates, and Delivery Verification Certificates, described in this supplement. (Applications the documents described in this supplement, are included within the definition of export control documents provided in part 772 of the EAR.) Refer to §764.3 of the EAR for more information.

§ 750.1 Scope.

In this part, references to the EAR are references to 15 CFR chapter VII, subchapter C. This part describes the Bureau of Export Administration’s (BXA) process for reviewing your application for a license and the applicable processing times for various types of applications. Information related to the issuance, denial, revocation, or suspension of a license or license application is provided along with the procedures on obtaining a duplicate or replacement license, the transfer of a license and shipping tolerances available on licenses. This part also contains instructions on obtaining the status of any pending application.

[62 FR 25463, May 9, 1997]
§ 750.4 Procedures for processing license applications.

(a) Overview. (1) All license applications will be resolved or referred to the President no later than 90 calendar days from the date of BXA’s registration of the license application. Processing times for the purposes of this section are defined in calendar days. The procedures and time limits described in this part apply to all license applications registered on or after February 4, 1996. The procedures and time limits in effect prior to December 6, 1995 will apply to license applications registered prior to February 4, 1996.

(2) Properly completed license applications will be registered promptly upon receipt by BXA. Registration is defined as the point at which the application is entered into BXA’s electronic license processing system. If your application contains deficiencies that prevent BXA from registering your application, BXA will attempt to contact you to correct the deficiencies, however, if BXA is unable to contact you, the license application will be returned without being registered. The specific deficiencies requiring return will be enumerated in a notice accompanying the returned license application. If a license application is registered, but BXA is unable to correct deficiencies crucial to processing the license application, it will be returned without action. The notice will identify the deficiencies and the action necessary to correct the deficiencies. If you decide to resubmit the license application, it will be treated as a new license application when calculating license processing time frames.

(b) Actions not included in processing time calculations. The following actions will not be counted in the time period calculations described in paragraph (a)(1) of this section for the processing of license applications:

(1) Agreement by the applicant to the delay. BXA may request applicants to provide additional information in support of their license application, respond to questions arising during processing, or accept proposed conditions or riders on their license application. If BXA has provided the applicant with an intent to deny letter described in § 750.6 of this part, processing times may be suspended in order to negotiate modifications to a license application and obtain agreement to such modifications from the foreign parties to the license application.

(2) Pre-license checks. If a pre-license check, to establish the identity and reliability of the recipient of the controlled items, is conducted through government channels, provided that:

(i) The need for such a pre-license check is established by the Secretary, or by another agency, if the request for a pre-license check is made by such agency and the request is made in accordance with the following time frames;

(A) The pre-license check is requested within 5 days of the determination that it is necessary; and
(B) The analysis resulting from the pre-license check is completed within 5 days.

(3) Government-to-Government assurances. Requests for government-to-government assurances of suitable end-use of items approved for export or reexport which failure to obtain such assurances would result in rejection of the license application, provided that:

(i) The request for such assurances is sent to the Secretary of State within five days of the determination that the assurances are required;

(ii) The Secretary of State initiates the request of the relevant government within 10 days of receipt of the request for such assurances; and

(iii) The license is issued within 5 days of the Secretary's receipt of the requested assurances.

(4) Consultations. Consultation with other governments, if such consultation is provided for by a relevant bilateral arrangement or multilateral regime as a precondition for approving a license.

(5) Multilateral reviews. Multilateral review of a license application if such review is required by the relevant multilateral regime.

(6) Congressional notification. Under Section 6(j) of the Export Administration Act, as amended (EAA), the Secretaries of Commerce and State are required to notify appropriate Committees of the Congress 30 days prior to issuing a license to any country designated by the Secretary of State as being terrorist-supporting for any items that could make a significant contribution to the military potential of such country, including its military logistics capability, or could enhance the ability of such country to support acts of international terrorism.

(c) Initial processing. Within 9 days of license application registration, BXA will, as appropriate:

(1) Contact the applicant if additional information is required, if the license application is improperly completed, or required support documents are missing, to request additional or corrected information;

(2) Assure the stated classification on the license application is correct;

(3) Return the license application if a license is not required with a statement notifying the applicant that a license is not required;

(4) Approve the license application or notify the applicant of the intent to deny the license application; or

(5) Refer the license application electronically along with all necessary recommendations and analysis concurrently to all agencies unless the application is subject to a Delegation of Authority. Any relevant information not contained in the electronic file will be simultaneously forwarded in paper copy.
(d) Review by other agencies and/or interagency groups. (1) Within 10 days of receipt of a referral the reviewing agency must advise BXA of any information not contained in the referral as described in paragraph (c)(5) of this section. BXA will promptly request such information from the applicant. The time that elapses between the date the information is requested by the reviewing agency and the date the information is received by the reviewing agency will not be counted in processing time frames.

(2) Within 30 days of receipt of the initial referral, the reviewing agency will provide BXA with a recommendation either to approve (with or without conditions or riders) or deny the license application. As appropriate, such a recommendation may be made with the benefit of consultation and/or discussions in interagency groups established to provide expertise and coordinate interagency consultation. These interagency groups consist of:

(i) The Missile Technology Export Control Group (MTEC). The MTEC, chaired by the Department of State, reviews license applications involving items controlled for missile technology reasons. The MTEC also reviews license applications involving items not controlled for missile technology (MT) reasons, but destined for a country and/or end-use/end-user of MT concern.

(ii) The SubGroup on Nuclear Export Coordination (SNEC). The SNEC, chaired by the Department of State, reviews license applications involving items controlled for nuclear non-proliferation reasons. The SNEC also reviews license applications involving items not controlled for nuclear non-proliferation (NP) reasons, but destined for a country and/or end-use/end-user of NP concern.

(iii) The Shield. The Shield, chaired by the Department of State, reviews license applications involving items controlled for chemical and biological weapons reasons. The Shield also reviews license applications involving items not controlled for chemical and biological weapons (CBW) reasons, but destined for a country and/or end-use/end-user of CBW concern.

(e) Recommendations by reviewing agencies. Reviewing agencies recommending denial of a license application must provide a statement of reasons, consistent with the provisions of the EAA or EAR, and cite both the statutory and the regulatory basis for the recommendation to deny. A reviewing agency that fails to provide a recommendation within 30 days with a statement of reasons supported by the statutory and regulatory basis shall be deemed to have no objection to the final decision of BXA.

(f) Interagency dispute resolution and escalation procedures—(1) Escalation to the Operating Committee (OC). (i) In any instance where the reviewing agencies are not in agreement on final disposition of a license application, it will be escalated to the OC for resolution. The Chair of the OC will consider the recommendations of the reviewing agencies and any information provided by the applicant in person during an open OC session. Each agency will be informed of the Chair’s decision on the license application within 14 days after the deadline for receiving agency recommendations.

(ii) If any agency disagrees with the OC Chair’s decision, the agency may escalate the decision by appealing to the Chair of the Advisory Committee on Export Policy for resolution. If such a request for escalation is not made within 5 days of the decision of the OC Chair, the Chair’s decision will be final.

(2) Escalation to the Advisory Committee on Export Policy (ACEP). Requests for escalation to the ACEP must be in writing from an official appointed by the President with the advice and consent of the Senate, or a person properly acting in such capacity, and cite both the statutory and the regulatory basis for the appeal. The ACEP will review all relevant information and recommendations. The Chair of the ACEP will inform the reviewing agencies of the majority vote decision of the ACEP within 11 days from the date of receipt of the escalation request. Within 5 days of the decision, any dissenting agency may appeal in writing the ACEP’s decision to the Secretary of Commerce in the Secretary’s capacity as the Chair of the Export Administration Review Board. The written request must be made by the head of the
agency requesting escalation and cite both the statutory and the regulatory basis for the appeal. Within the same period of time, the Secretary may initiate a meeting on his or her own initiative to consider a license application. In the absence of a timely appeal, the decision of the ACEP will be final.

(3) Escalation to the Export Administration Review Board (EARB). The EARB will review all relevant information and recommendations, and such other export control matters as may be appropriate. The Secretary of Commerce will inform the reviewing agencies of the majority vote decision of the EARB within 11 days from the date of receipt of the appeal. Within 5 days of the decision, any agency dissenting from the decision of the EARB may appeal the decision to the President. The appeal must be in writing from the head of the dissenting agency. In the absence of a timely appeal, the decision of the EARB will be final.

§ 750.5 Status of pending applications and other requests.

(a) Information available. You may contact BXA for status of your pending Classification Request, Advisory Opinion, or license application. For Advisory Opinion requests, telephone (202) 482-4905 or send a fax to (202) 219-9179.

For license applications and Classification Requests, telephone BXA’s System for Tracking Export License Applications (“STELA”) at (202) 482-2752. STELA is an automated voice response system, that upon request via any standard touch-tone telephone, will provide you with up to the minute status on any application pending at BXA. Press “0” on your keypad for online instructions or “9” for the letter “Z”. Requests for status may be made only by the applicant or the applicant’s agent.

(b) STELA’s hours. STELA is operational Monday through Friday from 7:15am to 11:15pm and on Saturday from 8:00am to 4:00pm, Eastern Time. If you have any difficulty accessing STELA, contact during normal business hours, one of BXA’s offices listed in §748.2(a) of the EAR.

(c) Procedures to access information on STELA. Once you dial STELA you will be instructed to enter your Application Control Number using your push button telephone keys. After you enter the Application Control Number, STELA will provide you with the current status of your license application or Classification request.

§ 750.6 Denial of license applications.

(a) Intent to deny notification. If BXA intends to deny your license application, BXA will notify you in writing within 5 days of the decision. The notification will include:

(1) The intent to deny decision;

(2) The statutory and regulatory basis for the denial;

(3) To the extent consistent with the national security and foreign policy of the United States, the specific considerations that led to the decision to deny the license application;

(4) What, if any, modifications or restrictions to the license application would allow BXA to reconsider the license application;

(5) The name of the BXA representative in a position to discuss the issues with the applicant; and

(6) The availability of appeal procedures.

(b) Response to intent to deny notification. You will be allowed 20 days from the date of the notification to respond to the decision before the license application is denied. If you respond to the notification, BXA will advise you if, as a result of your response, the decision to deny has been changed. Unless you are so advised by the 45th day after the date of the notification, the denial will become final, without further notice. You will then have 45 days from the date of final denial to exercise the right to appeal under part 756 of the EAR.

§ 750.7 Issuance of licenses.

(a) Scope. A license authorizes only a specific transaction, or series of transactions, as described in the license application and any supporting documents. A license application may be approved in whole or in part or further
limited by conditions or other restrictions appearing on the license itself or in the EAR. When a license application is approved by BXA, a license is issued as described in paragraph (b) of this section.

(b) Issuance of a license. After a license application is approved, a computer generated license is issued by the Department of Commerce bearing the license number and a validation date. Where appropriate, the license will also show an expiration date. Where necessary, attachments to a license will also be validated with the Department of Commerce seal and the date of validation. Exporters must use the complete license number when preparing a Shipper's Export Declaration (SED) and other export control documents, and in communicating with the Department of Commerce concerning the license.

(c) Changes to the license. (1) The following non-material changes do not require submission of a “Replacement” license or any other notification to BXA. (If you wish to make any change not identified in this paragraph, you will need to submit a “Replacement” license in accordance with the instructions contained in Supplement No. 1 to part 740 of the EAR, Block 11):

(i) Decrease in unit price or total value;
(ii) Increase in price or quantity if permitted under the shipping tolerances in §750.11 of this part;
(iii) Increase in price that can be justified on the basis of changes in point of delivery, port of export, or as a result of transportation cost, drayage, port charges, warehousing, currency fluctuations, etc.;
(iv) Establishment of unit or total price in conformance with a “price statement” on a license that permits price to be based on the market price at a specified date plus an exporter's mark-up, or like basis;
(v) Change in intermediate consignee if the new intermediate consignee is located in the country of ultimate destination as shown on the license, except a change in, or addition of, an intermediate consignee involving a consolidated shipment;
(vi) Change in continuity of shipment by unloading from carrier at a country listed in Country Group B (see Supplement No. 1 to part 740 of the EAR) port not in the country of ultimate destination, without the designation of an intermediate consignee on the shipping documents and license, provided:
(A) The purpose is to transfer the shipment to another vessel, barge, or vehicle, solely for forwarding to the country of destination shown on the shipping documents and the license;
(B) The shipment is moving on a through bill of lading;
(C) The carrier is not registered in, owned or controlled by, or under charter or lease to a country in Country Group D:1 or E:2 (see Supplement No. 1 to part 740 of the EAR), or a national of any of these countries;
(D) The carrier retains custody of the shipment until it is delivered to the ultimate consignee; and
(E) The original bill of lading or air waybill first issued at the port of export is delivered with the shipment to the ultimate consignee;
(vii) Change in address of purchaser or ultimate consignee if the new address is located within the same country shown on the license; or
(viii) Change in ECCN, unit of quantity, unit price, or wording of the item description (where necessary only for the purpose of conforming to an official revision in the CCL). This does not cover an actual change in the item to be shipped, or an increase in the price or quantity.

(2)(i) For Encryption Licensing Arrangements issued by BXA for exports and reexports of items controlled under ECCN 5A002, 5B002, and 5D002, and for encryption commodities and software previously on the U.S. Munitions List and currently authorized for export or reexport under a State Department license, distribution arrangement or any other authority of the State Department, you must by letter to BXA a request for approval of any additional country of destination.
(ii) Letters requesting changes pursuant to paragraph (c)(2)(i) of this section should be made by the license holder on company letterhead, clearly identifying the original license number and the requested change. In addition, requests for changes to State licenses or
other authorizations must be accompanied by a copy of the original State license or authorization. The requested changes may not take effect until approved in writing by BXA. Send requests for changes to the following address: Office of Strategic Trade, Bureau of Export Administration, U.S. Department of Commerce, Room 2705, 14th Street and Pennsylvania Ave., NW, Washington, DC 20230, Attn: Encryption Division.

(d) Responsibility of the licensee. If a license is issued to you, you become the licensee. The licensee will be held accountable for use of the license, whether as a principal (exporting for your own account) or as an agent (including an agent acting for the account of a foreign principal who is not subject to the jurisdiction of the United States). You, as the licensee, assume responsibility for effecting the export or reexport, for proper use of the license, and for due performance of all of the license's terms and conditions. The obligations arising under the provisions of the EAA and the EAR are the same whether the license application is submitted and issued in writing or electronically.

(e) Prohibited use of a license. No person convicted of a violation of any statute specified in section 11(h) of the EAA, at the discretion of the Secretary of Commerce, may apply for any license for a period up to 10 years from the date of the conviction. See §748.4(h) of the EAR.

(f) Quantity of commodities authorized. Unlike software and technology, commodities will be approved with a quantity or dollar value limit. The "Unit" paragraph within each CCL commodity entry will list a specific "Unit" for those commodities controlled by that entry. Any license resulting from a license application to export or reexport commodities will be licensed in terms of the specified "Unit". If a commodity is licensed in terms of "$ value", the unit of quantity commonly used in trade may also be shown on the license. Though this unit may be shown on the approved license, the quantity of commodities authorized is limited entirely by the total dollar value shown on the approved license.

(g) License validity period. Licenses involving the export or reexport of items will generally have a 24-month validity period, unless a different validity period has been requested and specifically approved by BXA. Exceptions from the 24-month validity period include license applications reviewed and approved as an "emergency" (see §748.4(h) of the EAR), license applications for items controlled for short supply reasons, and Special Comprehensive Licenses.

Emergency licenses will expire no later than the last day of the calendar month following the month in which the emergency license is issued. Licenses for items controlled for short supply reasons will be limited to a 12-month validity period. The expiration date will be clearly stated on the face of the license. If the expiration date falls on a legal holiday (Federal or State), the validity period is automatically extended to midnight of the first day of business following the expiration date. (See part 752 of the EAR for validity periods for Special Comprehensive Licenses.)

(1) Extended validity period. Validity periods in excess of 24 months generally will not be granted. BXA will consider granting a validity period exceeding 24 months when extenuating circumstances warrant such an extension, however, no changes will be approved related to any other particular on the license (e.g., parties to the transaction, countries of ultimate destination, etc.). For example, an extended validity period will generally be granted where the transaction is related to a multi-year project, when production lead time will not permit an export or reexport during the original validity period of the license, when an unforeseen emergency prevents shipment within the 24-month validity of the license, or for other similar circumstances. A continuing requirement to supply spare or replacement parts will not normally justify an extended validity period. Licenses issued in accordance with the emergency clearance provisions contained in §748.4(h) of the EAR will not be extended. See §752.9 of the EAR for information relating to the extension of a Special Comprehensive License.
(2) Request for extension. (i) The applicant must submit a letter in writing to request an extension in the validity period of a previously approved license. The subject of the letter must be titled: "Request for Validity Period Extension" and contain the following information:

(A) The name, address, and telephone number of the requestor;
(B) A copy of the original license, with the license number, validation date, and current expiration date legible; and
(C) Justification for the extension; 
(ii) It is the responsibility of the applicant to ensure that all applicable support documents remain valid and are in the possession of the applicant. If the request for extension is approved, BXA will provide the applicant with a written response.

(h) Specific types of licenses—(1) Licenses for temporary exports or reexports. If you have been granted a license for the temporary export or reexport of items and you decide not to return the items to the United States, you must submit a license application requesting authorization to dispose of the items. Except when the items are to be used on a temporary basis at a new destination (and returned to the United States after such use), you must ensure that your license application is accompanied by all documents that would be required if you had requested a license to export or reexport the same item directly to the new destination.

(2) Intransit within the United States. If you have been issued a license authorizing an intransit shipment (that does not qualify for the intransit provisions of License Exception TMP) through the United States, your license will be valid only for the export of the intransit shipment wholly of foreign origin and for which a Transportation and Exportation customs entry or an Immediate Exportation customs entry is outstanding.

(3) Intransit outside the United States. If you have been issued a license authorizing unloading or transit through a country listed in the General Prohibition Eight contained in § 736.2(b)(8) of the EAR, and you did not know the identity of the intermediate consignee at the time of the original license application, you must notify BXA in writing once you have ascertained the identity of the intermediate consignee. Your notification must contain the original license number, and the complete name, address, and telephone number of the intermediate consignee. The written request must be submitted to BXA at the address listed in § 748.2(c) of the EAR.

(4) Replacement license. If you have been issued a "replacement" license (for changes to your original license that were not covered in paragraph (c) of this section), you must attach the "replacement" license to the original, and retain both.

(i) Terminating license conditions. Exporters or reexporters who have shipped under licenses with conditions that would not apply to an export under a License Exception or if no license was required, and foreign consignees who have agreed to such conditions, are no longer bound by these conditions when the licensed items become eligible for a License Exception or can be exported or reexported without a license. Items that become eligible for a License Exception are subject to the terms and conditions of the applicable License Exception and to the restrictions in § 740.2 of the EAR. Items that become eligible for export without a license remain subject to the EAR and any export, reexport, or disposition of such items may only be made in accordance with the requirements of the EAR. Termination of license conditions does not relieve an exporter or reexporter of its responsibility for violations that occurred prior to the availability of a License Exception or prior to the removal of license requirements.

(j) Records. If you have been issued a license you must retain the license, and maintain complete records in accordance with part 762 of the EAR including any licenses (whether used or unused, valid or expired) and all supporting documents and shipping records. 

§ 750.8 Revocation or suspension of licenses.

(a) Revocation. All licenses for exports or reexports are subject to revocation, suspension, or revocation, in whole or in part, without notice whenever it is known that the EAR have been violated or that a violation is about to occur. BXA’s Office of Exporter Services may revoke any license in which a person who has been convicted of one of the statutes specified in section 11(h) of the EAA, at the discretion of the Secretary of Commerce, has an interest in the license at the time of the conviction. It may be necessary for BXA to stop a shipment or an export or reexport transaction at any stage in the process (e.g., in order to prevent an unauthorized export or reexport). If a shipment is already en route, it may be further necessary for BXA to order the return or unloading of such shipment at any port of call in accordance with the provisions of the EAA.

(b) Return of revoked or suspended licenses. If BXA revokes or suspends a license, the licensee shall return the license immediately upon notification that the license has been suspended or revoked. The license must be returned to BXA at the address listed in §748.2(c) of the EAR, Attention: “Return of Revoked/Suspended License”. All applicable supporting documents and records of shipments must be retained by the licensee in accordance with the recordkeeping provisions of part 762 of the EAR. If the licensee fails to return a license immediately upon notification that it has been suspended or revoked, BXA may impose sanctions provided for in part 764 of the EAR.

§ 750.9 Duplicate licenses.

(a) Lost, stolen or destroyed. If a license is lost, stolen or destroyed, you, as the licensee, may obtain a duplicate of the license by submitting a letter to the BXA at the address listed in §748.2(c) of the EAR, Attention: “Duplicate License Request”’. You must certify in your letter:

(i) That the original license ([number] issued to [name and address of licensee]) has been lost, stolen or destroyed;

(ii) The circumstances under which it was lost, stolen or destroyed; and

(iii) If the original license is found, the licensee will return either the original or duplicate license to the BXA. Note that if shipment was made against the original license, those shipments must be counted against the duplicate license. If you are issued a duplicate license you must retain the duplicate license in accordance with the recordkeeping provisions of part 762 of the EAR.

(b) Hong Kong Trade Department. BXA will automatically issue a duplicate license whenever the license lists a party in Hong Kong as the intermediate consignee, or when Hong Kong is identified as the country from which the reexport will take place. The duplicate license will be labeled “Duplicate for Hong Kong Trade Department”. This duplicate must be forwarded to the reexporter or intermediate consignee for submission to the Hong Kong Trade Department. The original license must be retained on file by the licensee in accordance with the recordkeeping provisions contained in part 762 of the EAR.

§ 750.10 Transfers of licenses for exports.

(a) Authorization. As the licensee, you may not transfer a license issued for the export of items from the United States to any other party, except with the prior written approval of BXA. BXA may authorize a transfer of a license for export to a transferee who is subject to the jurisdiction of the United States, is a principal party in interest, and will assume all powers and responsibilities under the license for the control of the shipment of the items out of the United States. BXA will approve only one transfer of the same license and only transfers of licenses to export items.

(b) How to request the transfer of licenses—(1) Letter from licensee. You, as the licensee, must submit a letter in writing to request a transfer of a license or licenses. The letter must contain the following information:

(i) The reasons for the requested transfer;

(ii) Either a list of the outstanding license numbers or a statement that all
outstanding licenses in the name of the licensee are to be transferred, and the total number of such outstanding licenses;

(iii) A list of all license applications for export to be transferred that are pending with BXA, identifying the Application Control Number for each, or other information that will assist in identifying the pending license applications;

(iv) Name and address of the person you intend to transfer the licenses and license applications to;

(v) The facts necessitating transfer;

(vi) A statement as to whether or not any consideration has been, or will be, paid for the transfer; and

(vii) Identification by name of the legal document (certificate, agreement, etc.) or other authority by which the new firm name is legally established, the new corporation or firm created, or the assets transferred and showing the effective date of such document and the state where filed or recorded.

(2) Information from transferee. The person to whom you wish to transfer your license(s) must provide you a signed letter, that must be submitted with your request, containing the following:

(i) That the transferee is a principal party in interest in the transaction covered by the license, or is acting as agent for a principal party in interest;

(ii) That the transferee is subject to the jurisdiction of the United States;

(iii) That the transferee assumes all powers and responsibilities under the license for the control of the shipment of the items out of the United States;

(iv) Whether any consideration has been, has not been, or will be paid for the transfer;

(v) The name and address of the foreign principal in instances where the transferee will make the export as an agent on behalf of a foreign principal; and

(vi) If the license is to be transferred to a subsidiary or firm, or if you transfer to the transferee all, or a substantial portion, of your assets or business, the transferee must certify that the legal authority changing the exporter imposes on the transferee the responsibility to accept and fulfill the obligations of the transferor under the transactions covered by the license; and

(vii) The following certification:

The undersigned hereby certifies that, if license number(s) ___________ is (are) transferred in accordance with my (our) request, any and all documents evidencing the order covered by this (these) license(s) will be retained and made available upon request in compliance with the recordkeeping provisions contained in Part 762 of the Export Administration Regulations. The undersigned further certifies compliance with all requirements of the Export Administration Regulations regarding these licenses.

(c) Notification of transfer and recordkeeping. Unless instructed otherwise by BXA, you must retain the license(s) pending notification by BXA of the action taken. If the request is approved, you must forward the license(s) to the transferee and the validated letter received from BXA authorizing the transfer. If the transfer request is not approved, the license(s) must either be returned to BXA or used by you if you so choose and have retained the legal and operational capacity fully to meet the responsibilities imposed by the license(s). If your initial request is returned by BXA for additional information, after obtaining the necessary information you may resubmit your request.

§ 750.11 Shipping tolerances.

(a) Applicability and use of shipping tolerances. Under some circumstances, you may use a license issued for the export of items from the United States to export more than the quantity or value shown on that license. This additional amount is called a shipping tolerance. This section tells you, as the licensee, when you may take advantage of a shipping tolerance and the amount of shipping tolerance you are permitted to use.

(1) If you have already shipped the full amount approved on your license, you may not use this shipping tolerance provision. No further shipment may be made under the license.

(2) The amount of shipping tolerance you are permitted is based on the "Unit" specified for the item you want to export in the applicable ECCN on the CCL (see Supplement No. 1 to part
§ 750.11
15 CFR Ch. VII (1–1–00 Edition)

774 of the EAR). You must calculate shipping tolerance based on the applicable “Unit” whether that be Number, Dollar Value, or Area, Weight, or other Measure. You may not use any other unit that may appear on your license.

(b) Calculating shipping tolerances. There are three basic rules, one for items licensed by “Dollar Value”, one for items licensed by “Number”, and another for items licensed by “Area, Weight or other Measure”.

(1) Items licensed by “Dollar Value”. If the “Unit” paragraph in the ECCN applicable to your item reads “$value” or “in $value”, there is no shipping tolerance. You may not ship more than the total dollar value stated on your license.

(2) Items licensed by “Number”. If the “Unit” paragraph in the ECCN applicable to your item reads “Number” or “in Number”, there is no shipping tolerance with respect to the number of units. However, the value of all of your shipments under one license may exceed the total dollar value stated on that license by up to 25%.

(3) Items licensed by “Area, Weight or Measure”. If the “Unit” paragraph in the ECCN applicable to your item reads “kilograms” or “square meters” or some other unit of area, weight or measure, your shipment may exceed the unshipped balance of the area, weight or other measure listed on your license by up to 10% and the total dollar value shown on your license by up to 25%, unless:

(i) Your license stipulates a specific shipping tolerance; or

(ii) Your item is controlled for short supply reasons and a smaller tolerance has been established. (See part 754 of the EAR).

(c) Examples of shipping tolerances.—

(1) A license authorizes the export of 100,000 kilograms of an item controlled by an ECCN where the “Unit” is stated as “kilograms”, the total cost of which is $1,000,000.

(i) One shipment. If one shipment is made, the quantity that may be exported may not exceed 110,000 kg (10% tolerance on the unshipped Area, Weight, or Measure balance), and the total cost of that one shipment may not exceed $1,250,000:

$1,000,000 (the total value shown on the license)

+250,000 (25% of the total value shown on the license)

$1,250,000

(ii) Two shipments. If the first shipment is for 40,000 kg (valued at $400,000), the second shipment may not exceed 66,000 kg (10% of the unshipped balance of $60,000,000 (6,000 kg) plus the unshipped balance), and the total cost of the second shipment shall not exceed $625,000:

$600,000 (the value of the unshipped balance of 6,000 kg) +250,000 (25% of the original total value shown on the license)

$650,000

(iii) Three shipments. If the first shipment is for 40,000 kg (valued at $400,000) the second shipment is for 20,000 kg (valued at $200,000), the third shipment may not exceed 44,000 kg (10% of the unshipped balance of 40,000 kg (4,000 kg) plus the unshipped balance), and the total cost of the third shipment can not exceed $665,000:

$400,000 (the value of the unshipped balance of 4,000 kg) +250,000 (25% of the original total value on the license)

$650,000

(2) A license authorizes the export of an item controlled by an ECCN where the “Unit” is stated as “$ value”, the total cost of which is $5,000,000. There is no shipping tolerance on this license because the items are controlled by an ECCN where “$ value” is the stated “Unit”.

(3) A license authorizes the export of 10 pieces of equipment controlled by an ECCN where the “Unit” is stated as “Number”, with a total value of $10,000,000 and the export of parts and accessories covered by that same entry valued at $1,000,000:

(i)(A) If one shipment is made, the quantity of equipment that may be exported may not exceed 10 pieces of equipment because there is no shipping tolerance on the “number” of units.

(i) One shipment. If one shipment is made, the quantity that may be exported may not exceed 110,000 kg (10% tolerance on the unshipped Area, Weight, or Measure balance), and the total cost of that one shipment may not exceed $1,250,000:

$1,000,000 (the total value shown on the license)

+250,000 (25% of the total value shown on the license)

$1,250,000
§ 752.1 Scope.

(a)(1) Introduction. In this part, references to the EAR are references to 15 CFR chapter VII, subchapter C. This part describes the provisions of the Special Comprehensive License (SCL). You may apply for an SCL, when appropriate, in lieu of a license described in part 748 of the EAR, or a License Exception described in part 740 of the EAR, for multiple exports and reexports of items subject to the EAR. The SCL provides authorization to make specified exports and reexports that are otherwise prohibited by General Prohibitions One, Two, and Three described in part 736 of the EAR. The existence of an SCL does not supersede an exporter’s obligation to request a separate license as may be required by part 744 of the EAR. Because the Bureau of Export Administration (BXA) does not review each individual transaction authorized by an SCL, parties to the SCL must have the mechanisms in place to ensure that each export and reexport made under an SCL meets all the terms and conditions of the license and are in accordance with all applicable provisions of the EAR. It is through the design and effective implementation of
§ 752.2 Eligible activities.

(a) Possible authorizations. Under the SCL, BXA may authorize you to perform any number of activities, which can be grouped under the general categories of “service”, “end-user”, “distribution” and “other” activities. Examples of the general categories include:

(1) Service activities. Exporting items subject to the EAR as spare and replacement parts for servicing or stocking.

(2) End-user activities. Exporting and reexporting items subject to the EAR for use as capital equipment.

(3) Distribution activities. Exporting and reexporting items subject to the EAR for the purpose of resale and reexport by consignees.

(4) Other activities. Other activities not included in paragraphs (a)(1) through (a)(3) of this section may be authorized by BXA under the SCL on a case-by-case basis.

(b) Prohibited activities. The general prohibitions described in § 736.2(b)(4) through (10) of the EAR apply to all exports and reexports by, and conduct of, all parties approved on your SCL, unless you are specifically authorized under the SCL to perform such activities, or the particular activity otherwise qualifies for a License Exception described in part 740 of the EAR.

§ 752.3 Eligible items.

(a) All items subject to the EAR, including items eligible for License Exceptions described in part 740 of the EAR, are eligible for export and reexport under the SCL, except:

(1) Items controlled for missile technology reasons that are identified by the letters MT in the applicable “Reason for Control” paragraph on the Commerce Control List (CCL) (see Supplement No. 1 to part 774 of the EAR);

(2) Items controlled by ECCNs 1C351, 1C352, 1C353, 1C354, 1C991, 1E001, 1E350, 1E351, 2B352, 2E001, 2E002, and 2E301 on the CCL that are controlled for CB reasons;

(3) Items controlled by ECCNs 1C350, 1C995, 1D390, 2B350, and 2B351 on the CCL that can be used in the production of chemical weapons precursors and chemical warfare agents, to destinations listed in Country Group D:3 (see Supplement No. 1 to part 744 of the EAR);

(4) Items controlled for short supply reasons that are identified by the letters “SS” in the applicable “Reason for Control” paragraph on the CCL;

(5) Items controlled for EI reasons on the CCL;

(6) Maritime (civil) nuclear propulsion systems or associated design or production software and technology identified in § 744.5 of the EAR;

(7) Communications intercepting devices controlled by ECCN 5A980 on the CCL;

(8) Hot section technology for the development, production or overhaul of commercial aircraft engines controlled...
§ 752.5 Steps you must follow to apply for an SCL.

(a) Step One: Establish applicant reliability—(1) Pre-application consultation. To apply for an SCL, BXA must determine your reliability as a potential SCL holder. BXA usually does this through consultation with company officials and a review of the criteria identified in paragraph (a)(2) of this section. To determine whether your company requires a consultation before you apply for an SCL, contact BXA at the address, phone, or telefacsimile numbers included in § 752.17 of this part.

(2) Criteria for determining eligibility. BXA will review the following criteria to help determine SCL holder eligibility:

(i) Evidence of past licensing history and projected, continuous large volume exports;
(ii) Reliability of all parties relative to their compliance with the EAR;
(iii) Commitment of all parties of the necessary resources to implement and maintain an adequate ICP; and
(iv) Evidence of all parties knowledge of all provisions of the EAR.

(b) Step Two: Establish consignee reliability—(1) Requirements. You must make an initial determination of the reliability of all consignees that are listed on your application for an SCL, based upon the criteria described in paragraph (b)(2) of this section.

(2) Determining reliability. The criteria that you should take into consideration include, but are not limited to, the following:

(i) Criteria. (A) The proposed consignee has a satisfactory record established through BXA pre-license checks, or extensive experience as a consignee under any license issued by BXA;
(B) The proposed consignee is a wholly-owned subsidiary or a controlled-in-fact affiliate of the applicant or of a consignee that is already approved on an SCL. See part 772 of the EAR for a definition of controlled-in-fact; or
(C) You have evidence of an established, on-going business relationship with the proposed consignee.

(ii) Exception. The provisions of paragraph (b)(2)(i) of this section do not preclude the authority of BXA to determine the reliability and eligibility of a proposed consignee. BXA may, based upon any negative information on the proposed consignees, deny a proposed consignee.

(c) Step Three: Prepare your documentation. Complete Form BXA-748P, Multipurpose Application, Form BXA-748P-A, Item Appendix, Form BXA-748P-B, End-User Appendix, an ICP, a comprehensive narrative statement, Form BXA-752, Statement by Consignee in Support of Special Comprehensive License, Form BXA-752-A, Reexport Territories, and all applicable certifications. Submit this documentation to BXA at one of the addresses included in § 752.17 of this part.

(1) Form BXA-748P, Multipurpose Application, and Form BXA-748P-A, Item Appendix. You must complete Form
BXA-748P and Form 748P-A according to the instructions found in Supplement Nos. 1 and 2 of this part.

(2) Form BXA-748P-B, End-User Appendix. You must identify end-users on Form BXA-748P-B if you are requesting approval to export or reexport items controlled for non-proliferation or chemical and biological control reasons.

(3) ICP. You must provide a copy of your proposed ICP as required by §752.11 of this part. You must indicate whether any of the elements of the ICP will not be implemented and explain why these elements were deemed inapplicable. Existence of a properly constructed ICP will not relieve you of your responsibility to comply with requirements of all applicable regulations pertaining to your SCL;

(4) Comprehensive narrative statement. Prepare a comprehensive narrative statement on your company letterhead that includes the following information:

(i) An overview of the total business activity that will be performed by you and all other parties who will receive items under the authority of your SCL, including consignees, subcontractors, and vessels;

(ii) A description of the nature and anticipated volume of regular and repetitive transactions proposed by consignees under the license;

(iii) An explanation of the relationship between the parties to the application, such as affiliate, subsidiary, or parent, etc;

(iv) A certification that you will implement, upon approval of the application by BXA, an ICP that incorporates all applicable elements listed in §752.11 of this part and any additional elements as required by BXA upon approval of your SCL. If certain elements of an ICP will not be included, state the reasons for that determination;

(v) Information on whether proposed consignees are end-users or will reexport the items received under your SCL. You must describe the proposed consignee's activities completely to determine the appropriate ICP elements that you and your consignees must implement.

(5) Form BXA-752, Statement of Consignee in Support of Special Comprehensive License. This Form is completed by each consignee. You must submit one completed, signed, original Form BXA-752 for each proposed consignee on your SCL application. See Supplement No. 3 to this part for instructions on completing Form BXA-752. Form BXA-752 is not required if the proposed consignee is both an end-user and a "foreign government agency" as defined in part 772 of the EAR.

(6) Form BXA-752-A, Reexport Territories. You must complete Form BXA-752-A, and attach it to the appropriate Form BXA-752, whenever Blocks 8B, 8C, 8E, and/or 8F are selected on Form BXA-752. See the instruction found in Supplement No. 3 to this part. Form BXA-752-A is not required if the proposed consignee is both an end-user and a foreign government agency (see part 772 of the EAR for a definition of foreign government agency).

(7) Consignee certifications. Each consignee must provide certain certifications on company letterhead that is signed by the consignee. Attach certifications to the appropriate Form BXA-752. Each consignee must certify that:

(i) They will implement, upon approval of the SCL by BXA, an ICP that incorporates all applicable elements listed in §752.11 of this part and any additional elements as required by BXA upon approval of your SCL. If certain elements of an ICP will not be included, state the reasons for that determination;

(ii) They will comply with all provisions of the EAR, including the record-keeping provisions of part 762 of the EAR, all applicable system review requirements of §752.14 of this part, and the reexport restrictions of §752.6 of this part; and

(iii) They will make available for inspection, upon request by BXA, all records required by §752.12 of this part and part 762 of the EAR.

(8) Additional certifications. (i) Temporary exports. Proposed consignees that plan to exhibit or demonstrate items in countries other than those in which they are located or are authorized under an SCL, an approved Form BXA-752, or a License Exception provision described in §740.8(a)(2)(iii) of the EAR may obtain permission to do so by including the following additional certification on company letterhead, and attaching it to Form BXA-752.
I (We) request authorization to reexport temporarily, for exhibit or demonstration in countries eligible to receive items under the Special Comprehensive License. The items exported will be retained under my (our) ownership and control, and will be returned by me (us) to (name destination) promptly after their exhibit or demonstration abroad, and in no case later than one year after the date of reexport, unless other disposition is authorized in writing by the Bureau of Export Administration.

(ii) Chemicals and chemical equipment certification. If you are requesting authority to export chemicals or chemical equipment eligible for the SCL, you must obtain a signed written statement on company letterhead from the proposed consignee(s) and end-user(s) (except those located in Country Group A:3) (see Supplement No. 1 to part 740 of the EAR) certifying the following:

No chemicals or chemical equipment received under this Special Comprehensive License will be transferred, resold, or reexported to a destination that requires a license, unless the new end-user has been approved by the Bureau of Export Administration, and in no case will the items be retransferred, resold, or reexported to a party who is not the end-user.

(iii) Nuclear nonproliferation certification. If you are requesting the export or reexport under the EAR of items controlled for nuclear nonproliferation reasons described in §744.2(a) of the EAR, prior to submitting an SCL application, you must obtain a signed written statement on company letterhead from the proposed consignee(s) and end-user(s) certifying the following:

(A) The items to be exported or replicas thereof ("replicas" refer to items produced abroad based on physical examination of the items originally exported, matching it in all critical design and performance parameters), will not be used in any of the activities described in §744.2 of the EAR; and

(B) Written authorization will be obtained from BXA prior to transferring or reexporting the items, unless they are destined to Canada or would not require a license to the new country of destination.

§752.6 Reexports.

(a) Authorized reexports. All consignees may reexport items without approval from BXA under any one of the following circumstances, unless otherwise specifically excluded by the provisions of the EAR or by a condition placed on your SCL.

(1) Reexports that qualify for a License Exception authorized by part 740 of the EAR;

(2) Reexports to destinations approved by BXA through validation of Form BXA-752 and/or Form BXA-752-A according to the terms stated on the Form BXA-752 or BXA-752-A;

(3) Reexports of items approved under an SCL to and among other consignees approved on the same SCL, provided that the items are eligible to the new destination in accordance with your approved SCL and §752.3 of this part.

(b) Prohibitions. You are prohibited from the following activities without specific authorization from BXA:

(1) Transferring, reselling, or reexporting under your SCL any chemicals or chemical equipment identified with the letters "CB" in the applicable "Reason for Control" paragraph on the CCL (see Supplement No. 1 to part 740 of the EAR); and

(2) Reexporting under your SCL items identified by the letters NP in the applicable "Reason for Control" paragraph on the CCL to destinations not listed in country group A:4 (see Supplement No. 1 to part 740).

(c) Sourcing. Consignees who obtain U.S.-origin items abroad that are eligible for the SCL but that are subject to General Prohibitions One, Two, or Three (see part 734 of the EAR) may reexport them under the authority of your SCL, provided that they are reexported in accordance with the ICP required by §752.11 of this part, and any other applicable conditions or reexport restriction placed on your SCL by BXA. Either the SCL holder or the consignee through the SCL holder must submit the sourcing request for reexport of items on Form BXA-752.

§ 752.7 Direct shipment to customers.

(a) General authorization. (1) Upon request by a consignee, an SCL holder or another consignee approved under the same SCL is authorized to deliver products directly to the requesting consignee's customer in either:
   (i) The requesting consignee's country; or
   (ii) Another country authorized to receive items under the requesting consignee's validated Form BXA-752-A.

(2) The SCL holder or consignee making direct shipments authorized by this section must implement an ICP containing procedures governing such shipments.

(3) SCL holders and consignees using the direct shipment provision may invoice the shipments directly to the requesting consignee's customers if copies of applicable invoices are maintained by both the shipping party and requesting consignee.

(b) Procedures—(1) Exports by an SCL holder. The SCL holder may make a direct shipment by entering on the Shipper's Export Declaration the name and address of the customer as ultimate consignee and adding the notation “by order of (name and address of consignee requesting the direct shipment)”. The notation must appear below the item description and must cite the SCL number followed by the three digit number of the consignee requesting the “by order of” shipment.

(2) Reexports by a consignee. An approved consignee may make a direct reexport shipment to a customer of another approved consignee on the same SCL by showing on the commercial invoice the name and address of the customer as ultimate consignee and adding the notation “by order of (name and address of consignee requesting the direct shipment).”

§ 752.8 SCL application review process.

(a) Scope. Under an SCL, you are authorized to make multiple exports and reexports without review and approval of each individual transaction by BXA. To approve an SCL, BXA must be satisfied that the persons benefiting from this license will adhere to the conditions of the license and the EAR, and that approval of the application will not be detrimental to U.S. national security, nonproliferation, or foreign policy interests. In reviewing and approving a specific SCL request, BXA retains the right to limit the eligibility of items or to prohibit the export, reexport, or transfer of items under the SCL to specific firms, individuals, or countries.

(b) Elements of review. To permit BXA to make such judgments, BXA will thoroughly analyze your past export and reexport transactions, inspect your export and reexport documents, and interview company officials of both the applicant and the consignees, as necessary. If BXA cannot verify that an appropriate ICP will be implemented upon approval of the SCL by BXA, or establish the reliability of the proposed parties to the application, it may deny the application, or modify it by eliminating certain consignees, items, countries, or activities.

(c) Order requirement. You do not need to have in your possession an order from the proposed consignee at the time you apply for an SCL. However, evidence of a consignee's firm intention to place orders on a continuing basis is required.

(d) Criteria for review. BXA will consider the following factors during the processing of your SCL application:

(1) The specific nature of proposed end-use and end-uses;
(2) The significance of the export in terms of its contribution to the design, development, production, stockpiling, or use of nuclear or chemical or biological weapons, or missiles;
(3) The types of assurances against design, development, production, stockpiling, or use of nuclear or chemical and biological weapons, or missiles that are included in the ICP;
(4) The nonproliferation credentials of the importing country;
(5) Corporate commitment of the resources necessary to implement and maintain an adequate ICP;
(6) Evidence of past licensing history of the applicant and consignees, and projected, continuous large volume exports and/or reexports;
(7) Reliability of all parties;
(8) Information on all parties' compliance with the provisions of the EAR; and
§ 752.9 Action on SCL applications.

(a) Approval of SCL applications—(1) Validity period. SCLs are valid for four years from the date of approval.

(2) Extension of validity period. You may request an extension of your valid SCL for an additional four years, but such requests must be received by BXA at least 30 days prior to the expiration of your SCL. If approved, Form BXA-748P and your letter requesting an extension will be validated and returned to you, extending the validity period for four years. No further extensions will be approved. A new application and support documentation is required at the end of that eight-year period. To apply for an extension, complete Form BXA-748P by completing Blocks 1, 2, 3, and 4. In addition, mark “Special Comprehensive License” in Block 5, place an “x” in “Letter of Explanation” in Block 6, and mark “other” in Block 8. Include your SCL number in Block 9, and indicate in Block 24 that you are requesting an extension to your SCL. Submit the completed Form BXA-748P and a statement on your company letterhead indicating:

(i) That you continue to abide by the provisions and conditions of the SCL; and

(ii) Any changes to the original SCL that you are requesting (see §752.10 of this part for procedures on changed circumstances).

(3) Support documentation—(i) General information. BXA will validate all approved support documentation with the Department of Commerce seal and date of validation.

(ii) Form BXA-752, Form BXA-752-A, and Form BXA-748P-B. With the approved SCL, you will receive two validated copies of each approved Form BXA-752, Statement by Consignee in Support of Special Comprehensive License and, if applicable, Form BXA-752-A, Reexport Territories, and Form BXA-748P-B, End-User Appendix. You must retain one copy, and send one copy to the approved consignee. You must also attach a letter to each approved Form BXA-752 that includes each of the following elements:

(A) A description of all recordkeeping requirements of the EAR applicable to the activities of the consignee;

(B) Information on any applicable re-export restrictions on items received by the consignee under the SCL;

(C) A description or copy of §752.16 of this part, listing administrative actions that may be taken for improper use of, or failure to comply with, the SCL and its required procedures;

(D) A description of any special conditions or restrictions on the license applicable to the consignee, including approved lists of customers, countries, and items, when required;

(E) A description of the elements of the SCL holder’s ICP relevant to the SCL consignee;

(F) A copy of the high risk customer profile contained in §752.11(c)(13)(i) of this part, when required;

(G) A copy of the Denied Persons List currently in effect and notification that you will send the consignee regular updates to this list;

(H) A notice that the consignee, in addition to other requirements, may not sell or otherwise dispose of any U.S. origin items when it knows that the items will be used in the activities prohibited by part 744 of the EAR;

(I) A requirement that the consignee acknowledge, in writing, receipt of this letter of transmittal outlining their obligations under the SCL, and certify that it will comply with all of the requirements, including implementation of an ICP if required by §752.11 of this part; and

(J) A description of any special documentation requirements for consignees reexporting items to destinations having such requirements.

(4) Special license conditions. BXA may place special conditions on your SCL, such as restrictions on eligible items, countries, end-uses, end-users or activities, or a requirement that certain
§ 752.10 Changes to the SCL.

(a) General information. Certain changed circumstances regarding the SCL require prior approval from BXA before you make such changes, while others require only notification to BXA. Changes and notifications of license holder information must be initiated by submitting Form BXA-748P. Changes and notifications of consignee information must be initiated by submitting Form BXA-752.

(b) Changes requiring prior written approval from BXA. The following circumstances require prior written approval by BXA. Such requests must be submitted by the SCL holder, and changes are not effective until BXA approves the request. Upon approval of a change described in this paragraph, BXA will return to the SCL holder a validated copy of the request, indicating any changes that may have been made to your request, or any special conditions that may have been imposed.

(1) Change of SCL holder company name. You must submit to BXA Form BXA-748P, Multipurpose Application, for any change in the name of the SCL holder company. Complete Blocks 1, 2, 3, and 4. Mark “Special Comprehensive License” in Block 5, and “other” in Block 8. In Block 9, include your SCL number. Briefly indicate the purpose of the change in Block 24 (i.e., a change in company name). Enter the new information in the relevant Blocks, and complete Block 25. The SCL holder must send a copy of the validated Form BXA-748P to each approved consignee, and advise them to attach the copy of the validated form to their validated Form BXA-752.

(2) Change in consignee name or address. You must submit to BXA Form BXA-752, Statement by Consignee in Support of Special Comprehensive License, when requesting a change in consignee name, or if the consignee moves out of the country. The consignee must complete Block 3, mark “change an existing consignee” and provide the new consignee information in Block 4. In Block 9, explain change of address from “Address A” to “Address B”. Also, complete Block 10 and the SCL holder signature Block information.

(3) Addition of new consignee. You must submit to BXA Form BXA-752 for requests to add consignees to an SCL. Complete Form BXA-752 in accordance with the instruction in Supplement No. 3 to this part, marking “Add a New Consignee” in Block 3. Use Block 9 to describe the proposed consignee’s role in the activities authorized by the SCL. Form BXA-752 is not required if the proposed new consignee is a foreign government agency and the items will not be reexported. If Form BXA-752 is
§ 752.10

not required, the SCL holder may submit the request to add the foreign government agency to the SCL on company letterhead. You must include the proposed consignee’s complete street address.

(4) Change in reexport territories. You must submit to BXA Form BXA–752 and Form BXA–752–A to add a country to a consignee’s approved reexport territory. Upon approval of change in reexport territory, BXA will return to the SCL holder two validated copies of Forms BXA–752 and BXA–752–A. Reexport Territories, along with any special conditions that may have been imposed.

(i) Form BXA–752. Complete Block 3 by marking “Change an Existing Consignee”. In Block 4, enter the consignee name and consignee number. In Block 5, enter the SCL number. In Block 9, enter “to add a country to the reexport territory”. Complete Block 10 and the SCL holder signature block information.

(ii) Form BXA–752–A. Complete Blocks 2 and 3. Mark each country that you are adding to your reexport territory.

(5) Adding items to your SCL. The following procedures apply to requests to add items to your SCL. Upon approval, BXA will send you a validated Form BXA–748P and, if applicable, Form BXA–748P–A. The SCL holder must send a copy of each validated form to all applicable consignees and attach a copy to their Form BXA–752.

(i) Adding one item. You must submit to BXA Form BXA–748P to request the addition of a single item to your SCL. Complete Blocks 1, 2, 3, and 4. Mark an “x” in the “Special Comprehensive License” box in Block 5, and “other” in Block 8. Include your SCL number in Block 9. In Block 24, enter “add ECCN”. Complete items (a) and (j) in Block 22 and in Block 25.

(ii) More than one item. You must submit to BXA Form BXA–748P and Form BXA–748P–A to request to add more than one item to your SCL. Complete Form BXA–748P according to the instructions in paragraph (b)(5)(i) of this section. In Block 24, insert the phrase “add ECCNs on attached From BXA 748P–A”. Complete Block 1 on Form BXA–748P–A by including the “Application Control Number” (found on Form BXA–748P). Complete Block 21 and 24, if needed, to describe any special circumstances (i.e., the new item will only be exported to specific consignees and will not be reexported).

(6) Changes to add end-users. You must submit to BXA Form BXA–752 and Form BXA–748P–B to add or change end-users to consignee authorizations. When you request multiple “types of requests” (i.e., additions or changes) on a single Form BXA–752, you must specify in Block 9, the type of request for each end-user. Example: end-user XXX is to be “added” and end-user AAA is to be “changed” from “end-user AAA” to “end-user ABA”.

(i) Form BXA–752. On Form BXA–752, complete Block 3.B, “change an existing consignee”. Include the consignee number in Block 4. Include the SCL number in Block 5. In Block 9 insert the phrase “To add an end-user” or the phrase “To change an end-user”. Complete Block 10 and include the SCL holder signature block information.

(ii) Form BXA–748P–B. On Form BXA–748P–B, complete Blocks 1 and 19. In Block 21, cite the end-user requirement or condition (i.e., end-user XXX is requested in compliance with §752.5(c)(8)(ii) of this part, which requires prior authorization to reexport chemicals under the SCL). Also, list the items (by ECCN and by description) that each end-user will receive and for what purpose, if approved by BXA.

(c) Changes that do not require prior approval from BXA. The following changes regarding your SCL do not require prior approval from BXA, however, such changes must be submitted on the appropriate forms no later than 30 days after the change has occurred. BXA will validate the forms, and return one copy to you for your records.

(1) Change of SCL holder address, export contact information, or total value of license. You must submit to BXA Form BXA–748P, Multipurpose Application, for any change in the SCL holder’s address, export contact information, or total value of the license. Complete Blocks 1, 2, 3, and 4. Mark “Special Comprehensive License” in Block 5, and “other” in Block 8. In Block 9, include your SCL number. Briefly indicate the purpose of the change in Block
24. Enter the new information in the relevant Blocks. Complete Block 25. The SCL holder must send a copy of the validated Form BXA-748P to each approved consignee, and advise each approved consignee to attach the copy of the validated form to their validated Form BXA-752.

(2) Deletion of consignees. You must submit to BXA Form BXA-752 if you remove a consignee from your SCL. Complete Block 3.C. Indicate your consignee number in Block 4 and your SCL case number in Block 5. Explain the reason for the action in Block 9. Complete Block 10 and the SCL holder signature information. You must notify all remaining consignees if any consignee is no longer eligible to receive items under the SCL.

(3) Changes in ownership or control of the SCL holder or consignee. (i) SCL holder. You must notify BXA of changes in ownership or control by submitting to BXA Form BXA-748P. Complete Blocks 1, 2, 3 and 4, mark “Special Comprehensive License” in Block 5. Mark “x” in “other” in Block 8 and indicate the SCL number in Block 9. Include the SCL holder information number in Block 14, and describe the change in Block 24, indicating the circumstances necessitating the change (i.e., mergers), and changes in persons who have official signing authority. Also complete Block 25.

(ii) Consignee. You must notify BXA of changes in ownership or control of the consignee company by submitting to BXA Form BXA-752. Complete Block 1. Mark “x” in “change an existing consignee” in Block 3.B, and complete Blocks 4 and 5. In Block 9, describe the change, indicating the circumstances necessitating the change (i.e., mergers), and changes in persons who have official signing authority. Complete Block 10 and the SCL holder signature block information.

(iii) Transfers and SCLs after control changes. Note that under §750.10(a) of the EAR you may not transfer a license—including a Special Comprehensive License—except with the prior written approval of BXA. In addition, BXA reserves the right to modify, revoke, or suspend an SCL in the event of a change in control of the previously approved SCL holder or consignee(s). In reviewing requests to transfer an SCL or consignee authority under an SCL and in reviewing changes in control of an SCL holder or approved consignee, BXA will consider the reliability of the new parties.

(4) Remove reexport territories. If you remove a country from a consignee's approved reexport territory, you must submit to BXA Form BXA-752 and Form BXA-752-A. You cannot add and delete countries on the same forms. Upon review of the change in reexport territory, BXA will return to the SCL holder two validated copies of Form BXA-752 and Form BXA-752-A.

(i) Form BXA-752. Complete Block 1. Complete Block 3 by marking “change an existing consignee”. In Block 4, enter the consignee name and consignee number. In Block 5, enter the SCL number. Complete Block 10 and the SCL holder signature block information.

(ii) Form BXA-752-A. Complete Blocks 1, 2, 3, and 5. Mark each country that you are removing from the reexport territory with an “x”. Mark an “x” in “other” and insert “delete”.

(5) Remove items from your SCL. The following procedures apply if you remove an item from your SCL. After review of the change by BXA, BXA will send you a validated Form BXA-748P and Form BXA-748P-A, if applicable. The SCL holder must send a copy of each validated form to all applicable consignees and attach a copy to their BXA-752.

(i) Removing one item. You must submit to BXA Form BXA-748P if you remove a single item from your SCL. Complete Blocks 1, 2, 3 and 5. Mark “Special Comprehensive License” in Block 5 and mark “other” in Block 8. Include your SCL number in Block 9. State “delete ECCN” in Block 24. Complete items (a) and (j) in Block 22 and Block 25.

(ii) Removing more than one item. You must submit to BXA Form BXA-748P and Form BXA-748P-A if you remove more than one item from your SCL. Complete Form BXA-748P according to the instructions in paragraph (a)(5)(i) of this section, except in Block 24, state “delete ECCNs on attached BXA-748P-A”. Complete Form BXA-748P-A
by including the “application control number” (found on Form BXA-748P) in Block 1. Complete items (a) and (j) in Block 22 for each item you are removing from your SCL.

(6) Remove end-users from your SCL. You must submit to BXA Form BXA-752 if you remove end-users from consignee authorizations. (Use Form BXA-748P-B, if additional space is needed.) After review by BXA, BXA will return to the SCL holder two validated copies of Form BXA-752 and Form BXA-748P-B, which will include any special instructions that may be necessary. You must send one copy of Forms BXA-752 and BXA-748P to the relevant consignee.

(i) Form BXA-752. On Form BXA-752, complete Block 1 and 3.B, “change an existing consignee”. Include the consignee number in Block 4. Include the SCL case number in Block 5. In Block 9, include the phrase “to remove an end-user(s)” followed by the name/address information. Complete Block 10 and the SCL holder signature Block information.

(ii) Form BXA-748P-B. If there was not enough space on Form BXA-752, Block 9, you may continue the information on Form BXA-748P-B, in Block 24. Complete the information in Block 1. Do not complete Block 19. Block 19 is only used to add end-users.

(d) Changes made by BXA. If BXA revises or adds an ECCN to the CCL, or a country’s eligibility already covered by the SCL changes, BXA will publish the change in the FEDERAL REGISTER. The SCL holder is responsible for immediately complying with any changes to the scope of the SCL.

[62 FR 25464, May 9, 1997]

§ 752.11 Internal Control Programs.

(a) Scope—(1) Introduction. It is through Internal Control Programs (ICPs) that the SCL holder and the consignee assure that exports and reexports are not made contrary to the EAR. The elements of your ICP will reflect the complexity of the activities authorized under the SCL, the countries and items involved, and the relationship between the SCL holder and the approved consignees.

(2) General requirements. Prior to making any exports and reexports under an SCL, you and your consignees, when required, must implement an ICP that is designed to ensure compliance with the SCL and the EAR. This section provides an overview of the elements that comprise an ICP. You may obtain from BXA at the address found in §752.17 of this part guidelines to assist you in developing an adequate ICP. You must submit with your application for an SCL a copy of your proposed ICP, along with any consignee ICPs, when required, incorporating the elements described in this section, as appropriate. BXA may require you to modify your ICP depending upon the activities, items, and destinations requested on your application for an SCL.

(b) Requirements. You may not make any shipments under an SCL until you and your consignees, when appropriate, implement all the elements of the required ICP. If there are elements that you consider inapplicable, you must explain the reasons for this determination at the time of application for an SCL. Existence of a properly constructed ICP will not relieve the SCL holder of liability for improper use or failure to comply with the requirements of the EAR.

(c) Elements of an ICP. Following is a list of ICP elements. The specific elements that should be included in your ICP depend upon the complexity of the activities authorized under your SCL, the countries and items involved, and the relationship between the SCL holder and the approved consignees.

(1) A clear statement of corporate policy communicated to all levels of the firm involved in exports and reexports, traffic, and related functions, emphasizing the importance of SCL compliance;

(2) Identification of positions (and maintenance of current list of individuals occupying the positions) in the SCL holder firm and consignee firms responsible for compliance with the requirements of the SCL procedure;

(3) A system for timely distribution to consignees and verification of receipt by consignees of the Denied Persons List (Supplement No. 2 to part 744 of the EAR) and other regulatory materials necessary to ensure compliance;
(4) A system for screening items, training and servicing transactions against Denied Persons List (Supplement No. 2 to part 764 of the EAR) and any relevant updates to the Denied Persons List;

(5) A system for assuring compliance with items and destination restrictions, including controls over reexports by consignees and direct exports to consignee customers;

(6) A compliance review program covering the SCL holder and extending to all consignees;

(7) A system for assuring compliance with controls on exports and reexports of nuclear items and to nuclear end-uses described in §§ 742.3 and 744.2 of the EAR;

(8) An ongoing program for informing and educating employees responsible for processing transactions involving items received under the SCL about applicable regulations, limits, and restrictions of the SCL;

(9) A program for recordkeeping as required by the EAR;

(10) An order processing system that documents employee clearance of transactions in accordance with applicable elements of the company ICP;

(11) A system for monitoring in-transit shipments and shipments to bonded warehouses and free trade zones;

(12) A system for notifying BXA promptly if the SCL holder knows that a consignee is not in compliance with terms of the SCL;

(13) A system to screen against customers who are known to have, or are suspected of having, unauthorized dealings with specially designated regions and countries for which nonproliferation controls apply;

(i) The signs of potential diversion that you should take into consideration include, but are not limited to, the following:

(A) The customer or purchasing agent is reluctant to offer information about the end-use (or end-user) of a product.

(B) The product’s capabilities do not fit the buyer’s line of business; for example, a small bakery places an order for several sophisticated lasers.

(C) The product ordered is incompatible with the technical level of the country to which the product is being shipped. For example, semiconductor manufacturing equipment would be of little use in a country without an electronics industry.

(D) The customer has little or no business background. For example, financial information unavailable from normal commercial sources and corporate principals unknown by trade sources.

(E) The customer is willing to pay cash for a very expensive item when the terms of the sale call for financing.

(F) The customer is unfamiliar with the product’s performance characteristics but still wants the product.

(G) Routine installation, training or maintenance services are declined by the customer.

(H) Delivery dates are vague, or deliveries are planned for out-of-the-way destinations.

(i) A freight forwarding firm is listed as the product’s final destination.

(j) The shipping route is abnormal for the product and destination.

(K) Packaging is inconsistent with the stated method of shipment or destination.

(L) When questioned, the buyer is evasive or unclear about whether the purchased product is for domestic use, export, or reexport.

(M) Customer uses only a “P.O. Box” address or has facilities that appear inappropriate for the items ordered.

(N) Customer’s order is for parts known to be inappropriate, or for which the customer appears to have no legitimate need (e.g., there is no indication of prior authorized shipment of system for which the parts are sought).

(O) Customer is known to have, or is suspected of having unauthorized dealings with parties and/or destinations in ineligible countries.

(ii) When any of the above characteristics have been identified, but through follow-up inquiries or investigation have not been satisfactorily resolved, the consignee should not transact any business with the customer under the SCL. Apply for a license according to part 748 of the EAR. You should explain the basis for the concern regarding the proposed customer, and state that you are an SCL consignee. Also, cite the SCL number, and your consignee number.
(14) A system for assuring compliance with controls over exports and reexports for missile-related end-uses and end-users described in §744.3 of the EAR;

(15) A system for assuring compliance with control over exports and reexports of chemical precursors and biological agents and related items and end-uses described in §§742.2 and 744.4 of the EAR;

§ 752.12 Recordkeeping requirements.

(a) SCL holder and consignees. In addition to the recordkeeping requirements of part 762 of the EAR, the SCL holder and each consignee must maintain copies of manuals, guidelines, policy statements, internal audit procedures, reports, and other documents making up the ICP of each party included under an SCL. Also, all parties must maintain copies of the most current Denied Persons List (see Supplement No. 2 to part 764 of the EAR) as well as all updates, and all other regulatory materials necessary to ensure compliance with the SCL, such as relevant changes to the EAR, product classification, additions, deletions, or other administrative changes to the SCL, transmittal letters and consignee’s confirmations of receipt of these materials.

(b) Consignees. All consignees must retain all records of the types of activities identified in §752.2(a)(3) of this part. Records on such sales or reexports must include the following:

(1) Full name and address of individual or firm to whom sale or reexport was made;

(2) Full description of each item sold or reexported;

(3) Units of quantity and value of each item sold or reexported; and

(4) Date of sale or reexport.

§ 752.13 Inspection of records.

(a) Availability of records. You and all consignees must make available all of the records required by §752.12 of this part and §762.2 of the EAR for inspection, upon request, by BXA or by any other representative of the U.S. Government, in accordance with part 762 of the EAR.

(b) Relationship of foreign laws. Foreign law may prohibit inspection of records by a U.S. Government representative in the foreign country where the records are located. In that event, the consignee must submit with the required copies of Form BXA-752 an alternative arrangement for BXA to review consignee activities and determine whether or not the consignee has complied with U.S. export control laws and regulations, which must be approved by BXA.

(c) Failure to comply. Parties failing to comply with requests to inspect documents may be subject to orders denying export privileges described in part 764 of the EAR or to the administrative actions described in part 766 of the EAR.

§ 752.14 System reviews.

(a) Post-license system reviews. BXA may conduct system reviews of the SCL holder as well as any consignee. Generally, BXA will give reasonable notice to SCL holders and consignees in advance of a system review. The review will involve interviews with company officials, the inspection of records, and the review of the SCL. BXA may conduct special unannounced system reviews if BXA has reason to believe an SCL holder or consignee has improperly used or has failed to comply with the SCL.

(b) Other reviews. BXA may require an SCL holder or consignee to submit to its office a list of all sales made under the SCL during a specified timeframe. Also, BXA may request from any consignee a list of transactions during a specified period involving direct shipments of items received under SCLs to customers of other consignees and sales to customers in reexport territories authorized by BXA on the consignee’s validated Form BXA-752.

§ 752.15 Export clearance.

(a) Shipper’s Export Declaration (SED). The SED covering an export made under an SCL must be prepared in accordance with standard instructions described in §758.3 of the EAR. If the SCL holder has implemented the Bureau of Census Monthly Reporting System, the SCL holder must comply with the Census requirements.
§ 752.16 Administrative actions.

(a)(1) If BXA is not satisfied that you or other parties to the SCL are complying with all conditions and requirements of the SCL, or that ICPs employed by parties to such licenses are not adequate, BXA may, in addition to any enforcement action pursuant to part 764 of the EAR, take any licensing action it deems appropriate, including the following:

(i) Suspend the privileges under the SCL in whole or in part, or impose other restrictions;

(ii) Revoke the SCL in whole or in part;

(iii) Prohibit consignees from receiving items authorized under the SCL, or otherwise restrict their activities under the SCL;

(iv) Restrict items that may be shipped under the SCL;

(v) Require that certain exports, transfers or reexports be individually authorized by BXA;

(vi) Restrict parties to whom consignees may sell under the SCL; and

(vii) Require that an SCL holder provide an audit report to BXA of selected consignees or overseas operations.

(2) Whenever necessary to protect the national interest of the U.S., BXA may take any licensing action it deems appropriate, without regard to contracts or agreements entered into before such administrative action, including those described in paragraphs (a)(1)(i) through (vii) of this section.

(b) Appeals. Actions taken pursuant to paragraph (a) of this section may be appealed under the provisions of part 756 of the EAR.

§ 752.17 BXA mailing addresses.

You should use the following addresses when submitting to BXA applications, reports, documentation, or other requests required in this part 752: Bureau of Export Administration, U.S. Department of Commerce, P.O. Box 273, Washington, D.C. 20044, “Attn: Special Licensing and Compliance Division”. If you wish to send the required material via overnight courier, use the following address: Bureau of Export Administration, U.S. Department of Commerce, 14th and Pennsylvania Avenue, N.W., Room 2705, Washington D.C. 20230 “Attn: Special Licensing and Compliance Division”. You may also reach the Special Licensing and Compliance Division by phone (202)482-0062, or telefacsimile on (202)501-6750.

SUPPLEMENT NO. 1 TO PART 752—INSTRUCTIONS FOR COMPLETING FORM BXA-748P, MULTIPURPOSE APPLICATION FOR REQUESTS FOR SPECIAL COMPREHENSIVE LICENSES

All information must be legibly typed within the lines for each Block or box, except where a signature is required. Where there is a choice of entering a telephone or telefacsimile number, and you chose a telefacsimile number, identify the number with the letter “F” immediately following the number.
Complete Blocks 1, 2, 3 and 4 according to the instructions in Supplement No. 1 to part 748 of the EAR.

**Block 5: Type of Application.** Enter an “x” in the Special Comprehensive License box.

**Block 6: Documents Submitted with Application.** Enter an “x” in the appropriate boxes to indicate which forms are attached.

**Block 7: Documents on File with Applicant.** Leave blank.

**Block 8: Special Comprehensive License.** Complete by entering an “x” in the appropriate boxes to indicate which forms are attached.

**Block 9: Special Purpose.** This block should only be completed when requesting changes to an approved SCL.

**Block 10: Resubmission Application Control Number.** Leave blank.

**Block 11: Replacement License Number.** This block should be completed by previous special license holders. If you have had a special license in the past, enter that license number (i.e., V #, SS #, DL #, or SF #). A new SCL number will be assigned upon approval of your SCL application.

**Block 12: Items Previously Exported.** Leave blank.

**Block 13: Import/End-User Certificate.** Leave blank.

**Block 14: Applicant.** Complete according to the instructions in Supplement No. 1 to part 748 of the EAR.

**Block 15: Other Party Authorized to Receive License.** Complete, if applicable, according to the instructions in Supplement No. 1 to part 748 of the EAR.

**Block 16: Purchaser.** Leave blank.

**Block 17: Intermediate Consignee.** Leave blank.

**Block 18: Ultimate Consignee.** Leave blank.

**Block 19: End-User.** Leave blank.

**Block 20: Original Ultimate Consignee.** Leave blank.

**Block 21: Specific End-Use.** Leave blank.

**Block 22: For one item, complete subblocks (a) through (j). For multiple items, complete Form BXA 748P-A.**

**Block 23: Total Application Dollar Value.** Enter the projected total dollar value of all transactions you anticipate making throughout the entire validity period of the SCL.

**Block 24: Additional Information.** Enter all additional data pertinent to the transaction.

**Block 25: Signature.** Complete according to the instructions in Supplement No. 1 to part 748 of the EAR.

---

**SUPPORT NO. 2 TO PART 752—INSTRUCTIONS FOR COMPLETING FORM BXA-748P-A, “ITEM ANNEX”**

All information must be legibly typed within the lines for each block or box.

**Block 1: Application Control No.** Enter the application control number found on Form BXA-748P.

**Block 2: Subtotal.** Leave blank.

**Block 21: Continuation of Specific End-Use Information.** Complete as necessary to fully describe the transaction(s).

**Block 22: ECCN.** Enter the Export Control Classification Number that corresponds to the item you wish to export or reexport under the SCL.

**Block 23: CTP.** You must complete this block if you intend to export or reexport a digital computer. Instructions on calculating the CTP are contained in a Technical Note at the end of Category 4 in the CCL.

**Block 24: Continuation of Additional Information.** Enter any identifying information that defines the scope of items you are requesting to export or reexport under the SCL. For example, “4A004 except items controlled for MT reasons”.

**Block 25: Signature.** Complete by entering an “x” in the appropriate boxes to indicate which forms are attached.

**Block 26: Applicant.** Leave blank.

**Block 27: Consignee ID Number.** Leave blank.

**Block 3: Type of Request.** For new applications, leave blank.

**Block 4: Consignee Information.** Enter the complete address where the consignee is located. A Post Office (P.O.) Box alone is NOT acceptable, but may be included in this Block 4 for mailing purposes, along with a complete address. If records required by §752.12 of this part and part 762 of the EAR are maintained/stored at a separate address, indicate the address in Block 9. In the absence of a complete address, Form BXA-752 will be returned without action.

**Block 5: U.S. Exporter Information.** Enter the complete address of the U.S. exporter. Leave the SCL Case No. box blank for new
applications and enter the SCL Case No. for "change" actions.

Block 6: Description of Items. Provide a summary description of the items proposed for import and reexport under the SCL. Firms that will not receive the entire range of items under a particular ECCN identified on Form BXA—748P—A should describe only the items they will receive under the SCL. In some instances, consignee approval will be contingent on the nature of the item requested.

Block 7: Consignee’s Business and Relationships.
(i) Item (a): Identify the nature of your company’s principal business as it affects the disposition of items to be imported and reexported under this license by including the appropriate letter choice(s) from the following: (a) manufacturer, (b) distributor, (c) assembler, (d) sales agent, (e) warehouse, (f) service facility, or (g) other. For other, provide an explanation in Block 9.
(ii) Item (b): Indicate the relationship between your company and the applicant’s company by providing the appropriate letter choice(s) from the following: (a) wholly-owned subsidiary, (b) independent company, (c) joint venture company, (d) controlled-in-fact affiliate, (e) contractor/subcontractor, or (f) other. For other, provide an explanation in Block 9.
(iii) Item (c): Enter the number of years of relationship between your company and the applicant company.
(iv) Item (d): Enter the estimated dollar volume of sales or other transactions with the SCL holder during the last twelve month period before submission of the application for an SCL.
(v) Item (e): Enter an estimated dollar volume proposed under this application for the validity period of the SCL.
Block 8: Disposition or Use of Items.
(i) Item (a): Complete this Block if your company is requesting involvement in end-user activities that involves importing items for the company’s own use (e.g., as capital equipment).
(ii) Item (b): Complete this Block if your company is requesting involvement in end-user activities that incorporates items received under the SCL into a new end-product that results in a change of identity of the U.S.-origin item (e.g., U.S.-origin semiconductor devices are included in a foreign-origin test instrument). Under Block 9, Additional Information, describe the new end-product more specifically and state how and to what extent the U.S.-origin items will be used.
Complete and attach Form BXA—752—A, Reexport Territories.
(iii) Item (c): Complete this Block if your company is requesting authorization to reexport items for service and/or repair. Complete and attach Form BXA—752—A. If you plan to reexport to end-users that require prior approval by BXA, also complete and attach Form BXA—748P—B, End-User Appendix.
(iv) Item (d): Complete this Block if your company plans to retransfer/resell within the country of import. State the end-use of your customers. If you plan to retransfer to end-users that require prior approval by BXA, complete and attach Form BXA—748P—B, End-User Appendix.
(v) Item (e): Complete this Block if your company plans to reexport. Complete and attach Form BXA—752—A. If you plan to reexport to end-users that require prior approval by BXA, complete and attach Form BXA—748P—B, End-User Appendix.
(vi) Item (f): This item should be completed for "other" activities that are not defined in Block 8 paragraphs (a) through (e). Describe the proposed activities fully in Block 9 or in a letter submitted with this Form, and complete and submit Form BXA—752—A, indicating the countries to which the products derived from these activities will be exported.
Block 9: Additional Information. In addition to any information that supports other Blocks, indicate whether your company is an active consignee under any other license issued by BXA. Indicate the license and consignee numbers.
Block 10: Signature of Official of Ultimate Consignee. Include an original signature. The authority to sign Form BXA—752 may not be delegated to any person whose authority to sign is not inherent in his/her official position with the company. The signing official must include their official title with their signature. All copies must be co-signed by the applicant in the SCL holder signature block and submitted with the application to BXA.

[62 FR 25466, May 9, 1997]

Supplement No. 4 to Part 752—Instructions for Completing Form BXA—752—A, Reexport Territories

All information must be legibly typed within the lines for each Block or Box.
Block 1: Application Control No. Insert the application control No. from the relevant Form BXA—748P.
Block 2: SCL License No. Leave blank for new SCL applications. For changes to existing SCLs, include the original SCL number.
Block 3: Consignee No. Leave blank for new SCL applications. For changes to existing SCLs, include the consignee number that was provided on the original license.
Block 4: Continuation of BXA—752 Question No. Mark an "x" in the box next to each country you wish to select. See §752.4 of this part for countries that are not eligible for the SCL. You may request a country that is not included on Form BXA—752—A by marking
§ 754.1 Introduction.

(a) Scope. In this part, references to the Export Administration Regulations (EAR) are references to 15 CFR chapter VII, subchapter C. This part implements the provisions of section 7, "Short Supply Controls," of the Export Administration Act (EAA) and similar provisions in other laws that are not based on national security and foreign policy grounds.

(b) Contents. Specifically, this part deals with the following:

(1) It sets forth the license requirements and licensing policies for commodities that contain the symbol "SS" in the "Reason for Control" part of "License Requirements" section of the applicable Export Control Classification Number (ECCN) identified on the Commerce Control List (Supplement No. 1 to part 774 of the EAR). In appropriate cases, it also provides for License Exceptions from the short supply licensing requirements described in this part. The license requirements and policies that are described in this part cover the following:

(i) Crude oil described by ECCN 1C981 (Crude petroleum, including reconstituted crude petroleum, tar sands, and crude shale oil listed in Supplement No. 1 to this part). For specific licensing requirements for these items, see § 754.2 of this part.

(ii) Petroleum products other than crude oil listed in Supplement No. 1 to this part, that were produced or derived from the Naval Petroleum Reserves (NPR) or became available for export as a result of an exchange of any NPR-produced or -derived commodities described by the following ECCNs. For specific licensing requirements for these items, see § 754.3 of this part.

(A) ECCN 1C980 (Inorganic chemicals);

(B) ECCN 1C982 (Other petroleum products);

(C) ECCN 1C983 (Natural gas liquids and other natural gas derivatives); and

(D) ECCN 1C984 (Manufactured gas and synthetic natural gas (except when commingled with natural gas and thus...
subject to export authorization from the Department of Energy).

(iii) Unprocessed western red cedar described by ECCN 1C988 (Western red cedar (thuja plicata) logs and timber, and rough, dressed and worked lumber containing wane listed in Supplement No. 2 to this part). For specific licensing requirements for these items, see §754.4 of this part.

(iv) Horses exported by sea for slaughter covered by ECCN 0A980 (Horses for export by sea). For specific licensing requirements, see §754.5 of this part.

(2) It incorporates statutory provisions for the registration of U.S. agricultural commodities for exemption from short supply limitations on export (see §754.6 of this part); and

(3) It incorporates statutory provisions for the filing and review of petitions seeking the imposition of monitoring or controls on recyclable metallic materials and procedures for related public hearings (see §754.7 of this part).

(c) Reexports. Reexports of items controlled by this part require a license only if such a requirement is specifically set forth in this part or is set forth on the license authorizing the export from the United States.

(d) Additional requirements for embargoed destinations. For exports involving embargoed destinations, you must satisfy the requirements of this part and also of part 746 of the EAR (Embargoes and Other Special Controls).

§754.2 Crude oil.

(a) License requirement. As indicated by the SS notation in the “License Requirements” section of ECCN 1C981 on the CCL (Supplement No. 1 to part 774 of the EAR), a license is required for the export of crude oil to all destinations, including Canada. See paragraph (h) of this section for a License Exception permitting the export of certain oil from the Strategic Petroleum Reserve, paragraph (i) of this section for a License Exception for certain shipments of samples, and paragraph (j) of this section for a License Exception for exports of oil transported by pipeline over right-of-way granted pursuant to section 203 of the Trans-Alaska Pipeline Authorization Act (43 U.S.C. 1652).

“Crude oil” is defined as a mixture of hydrocarbons that existed in liquid phase in underground reservoirs and remains liquid at atmospheric pressure after passing through surface separating facilities and which has not been processed through a crude oil distillation tower. Included are reconstituted crude petroleum, and lease condensate and liquid hydrocarbons produced from tar sands, gilsonite, and oil shale. Drip gases are also included, but topped crude oil, residual oil, and other finished and unfinished oils are excluded.

(b) License policy. (1) BXA will approve applications to export crude oil for the following kinds of transactions if BXA determines that the export is consistent with the specific requirements pertinent to that export:

(i) Exports from Alaska’s Cook Inlet (see paragraph (d) of this section);

(ii) Exports to Canada for consumption or use therein (see paragraph (e) of this section);

(iii) Exports in connection with refining or exchange of strategic petroleum reserve oil (see paragraph (f) of this section);

(iv) Exports of heavy California crude oil up to an average volume not to exceed 25 MB/D (see paragraph (g) of this section);

(v) Exports that are consistent with international agreements as described in the statutes listed in paragraph (c) of this section;

(vi) Exports that are consistent with findings made by the President under an applicable statute, including the statutes described in paragraph (c) of this section; and

(vii) Exports of foreign origin crude oil where, based on written documentation satisfactory to BXA, the exporter can demonstrate that the oil is not of U.S. origin and has not been commingled with oil of U.S. origin. See paragraph (h) of this section for the provisions of License Exception SPR permitting exports of certain crude oil from the Strategic Petroleum Reserve.

(2) BXA will review other applications to export crude oil on a case-by-case basis and, except as provided in paragraph (c) of this section, generally will approve such applications if BXA determines that the proposed export is consistent with the national interest and the purposes of the Energy Policy.
On November 6, 1985, the Secretary of Commerce determined that the export of crude oil derived from State waters in Alaska's Cook Inlet is consistent with the national interest and the purposes of the Energy Policy and Conservation Act. (EPCA). Although BXA will consider all applications for approval, generally, the following kinds of transactions will be among those that BXA will determine to be in the national interest and consistent with the purposes of EPCA.

(i) The export is part of an overall transaction:
   (A) That will result directly in the importation into the United States of an equal or greater quantity and an equal or better quality of crude oil or of a quantity and quality of petroleum products listed in Supplement No. 1 to this part that is not less than the quantity and quality of commodities that would be derived from the refining of the crude oil for which an export license is sought;
   (B) That will take place only under contracts that may be terminated if the petroleum supplies of the United States are interrupted or seriously threatened; and
   (C) In which the applicant can demonstrate that, for compelling economic or technological reasons that are beyond the control of the applicant, the crude oil cannot reasonably be marketed in the United States.

(ii) Exports involving temporary exports or exchanges that are consistent with the exceptions from the restrictions of the statutes listed in paragraph (c) of this section.

(c) Additional statutory controls. (1) The following statutes provide controls on the export of domestically produced crude oil based on its place of origin or mode of transport. If such other statutory controls apply, an export may only be approved if the President makes the findings required by the applicable law.
   (ii) The Mineral Leasing Act of 1920 restricts the export of crude oil produced from the outer Continental Shelf (29 U.S.C. 1354) ("OCSLA").
   (iii) The Outer Continental Shelf Lands Act restricts exports of crude oil produced from the outer Continental Shelf (29 U.S.C. 1354) ("OCSLA").
   (iv) Section 201 of Public Law 104-58, entitled "Exports of Alaskan North Slope Oil," provides for exports of domestic crude oil transported by pipeline over rights-of-way granted pursuant to section 28(u) of that Act (30 U.S.C. 125(u)) ("MLA").

(2) Supplement No. 3 to this part describes the relevant statutory provisions. In cases where a particular statute applies, a Presidential finding is necessary before the export can be authorized. You should note that in certain cases it is possible that more than one statute could apply to a particular export of crude oil.

(d) Exports from Alaska's Cook Inlet. The licensing policy is to approve applications for exports of crude oil that was derived from the state-owned submerged lands of Alaska's Cook Inlet and has not been, or will not be, transported by a pipeline over a federal right-of-way subject to the MLA or the Trans-Alaska Pipeline Authorization Act.

(e) Exports to Canada for consumption or use therein. (1) Except for TAPS crude oil, the licensing policy is to approve applications for exports of crude oil to Canada for consumption or use therein.
   (2) The licensing policy for TAPS crude oil is to approve applications for an average of no more than 50,000 barrels of oil per day for consumption or use in Canada, subject to the following procedures and conditions:
   (i) Any ocean transportation of the commodity will be made by vessels documented for United States coastwise trade under 46 U.S.C. 12106. Only barge voyages between the State of Washington and Vancouver, British Columbia, and comparable barge movements across waters between the U.S. and Canada may be excluded from this
requirement. The Bureau of Export Administration will determine, in consultation with the Maritime Administration, whether such transportation is "ocean" transportation; and

(ii) Authorization to export TAPS crude oil will be granted on a quarterly basis. Applications will be accepted by BXA no earlier than two months prior to the beginning of the calendar quarter in question, but must be received no later than the 25th day of the second month preceding the calendar quarter. For example, for the calendar quarter beginning April 1 and ending June 30, applications will be accepted beginning February 1, but must be received no later than February 25.

(iii) The quantity stated on each application must be the total number of barrels for the quarter, not a per-day rate. This quantity must not exceed 50,000 barrels times the number of calendar days in the quarter.

(iv) Each application must include support documents providing evidence that the applicant has either:

(A) Title to the quantity of barrels stated in the application; or

(B) A contract to purchase the quantity of barrels stated in the application.

(v) The quantity of barrels authorized on each license for export during the calendar quarter will be determined by the BXA as a prorated amount based on:

(A) The quantity requested on each license application; and

(B) The total number of barrels that may be exported by all license holders during the quarter (50,000 barrels per day multiplied by the number of calendar days during the quarter).

(vi) Applicants may combine their licensed quantities for as many as four consecutive calendar quarters into one or more shipments, provided that the validity period of none of the affected licenses has expired.

(vii) BXA will carry forward any portion of the 50,000 barrels per day quota that has not been allocated during a calendar quarter, except that no un-allocated portions will be carried over to a new calendar year. The un-allocated volume for a calendar quarter will be added, until expended, to the quotas available for each quarter through the end of the calendar year.

(f) Refining or exchange of Strategic Petroleum Reserve Oil. (1) Exports of crude oil withdrawn from the Strategic Petroleum Reserve (SPR) will be approved if BXA, in consultation with the Department of Energy, determines that such exports will directly result in the importation into the United States of refined petroleum products that are needed in the United States and that otherwise would not be available for importation without the export of the crude oil from the SPR.

(2) Licenses may be granted to export, for refining or exchange outside of the United States, SPR crude oil that will be sold and delivered, pursuant to a drawdown and distribution of the SPR, in connection with an arrangement for importing refined petroleum products into the United States.

(3) BXA will approve license applications subject to the following conditions:

(i) You must provide BXA evidence of the following:

(A) A title to the quantity of barrels of SPR crude stated in the application; or

(B) A contract to purchase, for importation into the United States the quantity of barrels of SPR crude stated in the application.

(ii) The following documentation must be submitted to BXA no later than fourteen days following the date that the refined petroleum products are imported into the United States:

(A) Evidence that the exporter of the SPR crude has title to or a contract to purchase refined petroleum product;

(B) A copy of the shipping manifest that identifies the refined petroleum products; and

(C) A copy of the entry documentation required by the U.S. Customs Service that show the refined petroleum products were imported into the United States, or a copy of the delivery receipt when the refined petroleum products are for delivery to the U.S. military outside of the United States.

(4) You must complete both the export of the SPR crude and the import of the refined petroleum products no later than 30 days following the...
issuance of the export license, except in the case of delivery to the U.S. military outside of the United States, in which case the delivery of the refined petroleum products must be completed no later than the end of the term of the contract with the Department of Defense.

(g) Exports of certain California crude oil. The export of California heavy crude oil having a gravity of 20.0 degrees API or lower, at an average volume not to exceed 25 MB/D, will be authorized as follows:

(1) Applicants must submit their applications on Form BXA-748 to the following address: Office of Exporter Services, ATTN: Short Supply Program—Petroleum, Bureau of Export Administration, U.S. Department of Commerce, P.O. Box 273, Washington, DC 20044.

(2) The quantity stated on each application must be the total number of barrels proposed to be exported under the license—not a per-day rate. This quantity must not exceed 25 percent of the annual authorized export quota. Potential applicants may inquire of BXA as to the amount of the annual authorized export quota available.

(3) Each application shall be accompanied by a certification by the applicant that the California heavy crude oil:

(i) Has a gravity of 20.0 degrees API or lower;
(ii) Was produced within the state of California, including its submerged state lands;
(iii) Was not produced or derived from a U.S. Naval Petroleum Reserve; and
(iv) Was not produced from submerged lands of the U.S. Outer Continental Shelf.

(4) Each license application must be based on an order, and be accompanied by documentary evidence of such an order (e.g., a letter of intent).

(5) BXA will adhere to the following procedures for licensing exports of California heavy crude oil:

(i) BXA will issue licenses for approved applications in the order in which the applications are received (date-time stamped upon receipt by BXA), with the total quantity authorized for any one license not to exceed 25 percent of the annual authorized volume of California heavy crude oil.

(ii) BXA will approve only one application per month for each company and its affiliates.

(iii) BXA will consider the following factors (among others) when determining what action should be taken on individual license applications:

(A) The number of licenses to export California heavy crude oil that have been issued to the applicant or its affiliates during the then-current calendar year;

(B) The number of applications pending in BXA that have been submitted by applicants who have not previously been issued licenses under this section to export California heavy crude oil during the then-current calendar year; and

(C) The percentage of the total amount of California heavy crude oil authorized under other export licenses previously issued to the applicant pursuant to this section that has actually been exported by the applicant.

(iv) BXA will approve applications contingent upon the licensee providing documentation meeting the requirements of both paragraphs(g)(5)(iv)(A) and (B) of this section prior to any export under the license:

(A) Documentation showing that the applicant has or will acquire title to the quantity of barrels stated in the application. Such documentation shall be either:

(1) An accepted contract or bill of sale for the quantity of barrels stated in the application; or

(2) A contract to purchase the quantity of barrels stated in the application, which may be contingent upon issuance of an export license to the applicant.

(B) Documentation showing that the applicant has a contract to export the quantity of barrels stated in the application, which may be contingent upon issuance of the export license to the applicant.

(v) BXA will carry forward any portion of the 25 MB/D quota that has not been licensed, except that no unallocated portions will be carried forward more than 90 days into a new calendar year. Applications to export against any carry-forward must be
§ 754.2

15 CFR Ch. VII (1–1–00 Edition)

filed with BXA by January 15 of the carry-forward year.

(vi) BXA will return to the available authorized export quota any portion of the 25 MB/D per day quota that has been licensed, but not shipped, during the 90-day validity period of the license.

(vii) BXA will not carry over to the next calendar year pending applications from the previous year.

(6) License holders:

(i) Have 90 calendar days from the date the license was issued to export the quantity of California heavy crude oil authorized on the license. Within 30 days of any export under the license, the exporter must provide BXA with a certified statement confirming the date and quantity of California heavy crude oil exported.

(ii) Must submit to BXA, prior to any export under the license, the documentation required by paragraph (g)(5)(iv) of this section.

(iii) May combine authorized quantities into one or more shipments, provided that the validity period of none of the affected licenses has expired.

(iv) Are prohibited from transferring the license to another party without prior written authorization from BXA.

(7) BXA will allow a 10 percent tolerance on the unshipped balance based upon the volume of barrels it has authorized. BXA will allow a 25 percent shipping tolerance on the total dollar value of the license. See §750.11 of the EAR for an explanation of shipping tolerances.

(h) License Exception for certain shipments from the Strategic Petroleum Reserves (SPR). Subject to the requirements set forth in this paragraph, License Exception SPR may be used to export oil that was imported for storage in the SPR and the Department of Energy certifies this fact to BXA.

(1) The requirements and restrictions described in §§740.1 and 740.2 of the EAR that apply to all License Exceptions also apply to the use of License Exception SPR.

(2) A person exporting crude oil pursuant to this License Exception must enter on any required Shipper’s Export Declaration (SED) the letter code “SS-SPR.”

(i) License Exception for certain sample shipments. Subject to the requirements set forth in this paragraph, License Exception SS-SAMPLE may be used to export crude oil for analytic and testing purposes.

(3) An exporter may ship up to 100 barrels of crude oil to any one end-user annually, up to an annual cumulative limit of 100 barrels per exporter.

(2) The requirements and restrictions described in §§740.1 and 740.2 of the EAR that apply to all License Exceptions also apply to the use of License Exception SPR.

(3) A person exporting crude oil pursuant to this License Exception must enter on any required Shipper’s Export Declaration (SED) the letter code “SS-SAMPLE.”

(j) License Exception for exports of TAPS Crude Oil. (1) License Exception TAPS may be used to export oil transported over right-of-way granted pursuant to section 203 of the Trans-Alaska Pipeline Authorization Act (TAPS), provided the following conditions are met:

(i) The TAPS oil is transported by a vessel documented under the laws of the United States and owned by a citizen of the United States (in accordance with section 2 of the Shipping Act, 1916 (46 U.S.C. app. 802));

(ii) All tankers involved in the TAPS export trade use the same route that they do for shipments to Hawaii until they reach a point 300 miles due south of Cape Hinchinbrook Light and then turn toward Asian destinations. After reaching that point, tankers in the TAPS oil export trade must remain outside of the 200 nautical mile Exclusive Economic Zone, as defined in 16 U.S.C. 1802(6). Tankers returning from foreign ports to Valdez, Alaska must
abide by the same restrictions, in reverse, on their return route. This condition shall not be construed to limit any statutory, treaty or Common Law rights and duties imposed upon and enjoyed by tankers in the TAPS oil export trade, including, but not limited to, force majeure and maritime search and rescue rules; and

(iii) The owner or operator of a tanker exporting TAPS oil shall:

(A) Adopt a mandatory program of deep water ballast exchange (i.e., at least 2,000 meters water depth). Exceptions can be made at the discretion of the captain only in order to ensure the safety of the vessel and crew. Records must be maintained in accordance with paragraph (j)(3) of this section.

(B) Be equipped with satellite-based communications systems that will enable the Coast Guard independently to determine the tanker's location; and

(C) Maintain a Critical Area Inspection Plan for each tanker in the TAPS oil export trade in accordance with the U.S. Coast Guard's Navigation and Inspection Circular No. 15-91 as amended, which shall include an annual internal survey of the vessel's cargo block tanks.

(2) Shipper's Export Declaration. In addition to the requirements of paragraph (j)(1) of this section, for each export under License Exceptions TAPS, the exporter must file with BXA a Shipper's Export Declaration (SED) covering the export not later than 21 days after the export has occurred. The SED shall be sent to the following address: Manager, Short Supply Program, Department of Commerce, Office of Chemical and Biological Controls and Treaty Compliance, Bureau of Export Administration, Room 2075, Washington, D.C. 20230.

(3) Recordkeeping requirements for deep water ballast exchange. (i) As required by paragraph (j)(3)(ii)(A) of this section, the master of each vessel carrying TAPS oil under the provisions of this section shall keep records that include the following information, and provide such information to the Captain of the Port (COTP), U.S. Coast Guard, upon request:

(A) The vessel's name, port of registry, and official number or call sign;

(B) The name of the vessel's owner(s);

(C) Whether ballast water is being carried;

(D) The original location and salinity, if known, of ballast water taken on, before an exchange;

(E) The location, date, and time of any ballast water exchange; and

(F) The signature of the master attesting to the accuracy of the information provided and certifying compliance with the requirements of this paragraph.

(ii) The COTP or other appropriate federal agency representatives may take samples of ballast water to assess the compliance with, and the effectiveness of, the requirements of paragraph (j)(3)(i) of this section.

§ 754.3 Petroleum products not including crude oil.

(a) License requirement. As indicated by the letters “SS” in the “Reason for Control” paragraph in the “License Requirements” section of ECCNs 1C980, 1C982, 1C983, and 1C984 on the CCL (Supplement No. 1 to part 774 of the EAR), a license is required to all destinations, including Canada, for the export of petroleum products, excluding crude oil, listed in Supplement No. 1 to this part, that were produced or derived from the Naval Petroleum Reserves (NPR) or became available for export as a result of an exchange for a Naval Petroleum Reserves produced or derived commodity, other than crude oil, will be denied, unless the President makes a finding required by the Naval Petroleum Reserves Production Act (10 U.S.C. 7430).

(b) License policy. (1) Applications for the export of petroleum products listed in Supplement No. 1 to this part that were produced or derived from the Naval Petroleum Reserves, or that became available for export as a result of an exchange for a Naval Petroleum Reserves produced or derived commodity, other than crude oil, will be denied, unless the President makes a finding required by the Naval Petroleum Reserves Production Act (10 U.S.C. 7430).

(2) Applications that involve temporary exports or exchanges excepted from that Act will be approved.

§ 754.4 Unprocessed western red cedar.

(a) License requirement. As indicated by the letters “SS” in the “Reason for
Control” paragraph in the “License Requirements” section of ECCN 1C988 on the CCL (Supplement No. 1 to part 774 of the EAR), a license is required to all destinations, including Canada, for the export of unprocessed western red cedar covered by ECCN 1C988 (Western red cedar (thuja plicata) logs and timber, and rough, dressed and worked lumber containing wane listed in Supplement No. 2 to this part). See paragraph (c) of this section for License Exceptions for timber harvested from public lands in the State of Alaska, private lands, or Indian lands, and see paragraph (d) of this section for relevant definitions.

(b) Licensing policy. (1) BXA will generally deny applications for licenses to export unprocessed western red cedar harvested from Federal or State lands under harvest contracts entered into after September 30, 1979.

(2) BXA will consider, on a case-by-case basis, applications for licenses to export unprocessed western red cedar harvested from Federal or State lands under harvest contracts entered into prior to October 1, 1979.

(3) BXA will approve license applications for unprocessed western red cedar timber harvested from public lands in Alaska, private lands, and Indian lands. Applications must be submitted in accordance with the procedures set forth in paragraph (a) of this section. See paragraph (c) of this section for the availability of a License Exception.

(c) License Exception for western red cedar (WRC). (1) Subject to the requirements described in paragraph (c) of this section, License Exception WRC may be used to export without a license unprocessed western red cedar timber harvested from Federal, State and other public lands in Alaska, all private lands, and lands held in trust for recognized Indian tribes by Federal or State agencies.

(2) Exporters who use License Exception WRC must obtain and retain on file the following documents:

(i) A statement by the exporter (or other appropriate documentation) indicating that the unprocessed western red cedar timber exported under this License Exception was not harvested from State or Federal lands outside the State of Alaska, and did not become available for export through substitution of commodities so harvested or produced. If the exporter did not harvest or produce the timber, the records or statement must identify the harvester or producer and must be accompanied by an identical statement from the harvester or producer. If any intermediate party or parties held title to the timber between harvesting and purchase, the exporter must also obtain such a statement, or equivalent documentation, from the intermediate party or parties and retain it on file.

(ii) A certificate of inspection issued by a third party log scaling and grading organization, approved by the United States Forest Service, that:

(A) Specifies the quantity in cubic meters or board feet, scribner rule, of unprocessed western red cedar timber to be exported; and

(B) Lists each type of brand, tag, and/or paint marking that appears on any log or unprocessed lumber in the export shipment or, alternatively, on the logs from which the unprocessed timber was produced.

(3) The requirements and restrictions described in §§740.1 and 740.2 of the EAR that apply to all License Exceptions also apply to the use of License Exception WRC.

(4) A person exporting any item pursuant to this License Exception must enter on any required Shipper’s Export Declaration (SED) the letter code “SS-WRC”.

(d) License Applications. (1) Applicants requesting to export unprocessed western red cedar must submit a properly completed Form BXA-748P, Multipurpose License Form, other documents as may be required by BXA, and a signed statement from an authorized representative of the exporter, reading as follows:

I, (Name) (Title) of (Exporter) HEREBY CERTIFY that to the best of my knowledge and belief the (Quantity) (cubic meters or board feet, scribner) of unprocessed western red cedar timber that (Exporter) proposes to export was not harvested from State or Federal lands under contracts entered into after October 1, 1979,

(Signature)

(Date)
(2) For Items [16] and [18] on Form BXA-748P, “Various” may be entered when there is more than one purchaser or ultimate consignee.

(3) For each Form BXA-748P submitted, and for each export shipment made under a license, the exporter must assemble and retain for the period described in part 762 of the EAR, and produce or make available for inspection, the following:

(i) A signed statement(s) by the harvester or producer, and each subsequent party having held title to the commodities, that the commodities in question were harvested under a contract to harvest unprocessed western red cedar from State or Federal lands, entered into before October 1, 1979; and

(ii) A copy of the Shipper’s Export Declaration.

(4) A shipping tolerance of 5 percent in cubic feet or board feet scribner is allowed on the un-shipped balance of a commodity listed on a license. This tolerance applies only to the final quantity remaining un-shipped on a license against which more than one shipment is made and not to the original quantity authorized by such license. See § 750.11 of the EAR for an explanation of shipping tolerances.

(e) Definitions. When used in this section, the following terms have the meaning indicated:

(1) Unprocessed western red cedar means western red cedar (thuja plicata) timber, logs, cants, flitches, and processed lumber containing wane on one or more sides, as defined in ECCN 1C988, that has not been processed into:

(i) Lumber of American Lumber Standards Grades of Number 3 dimension or better, or Pacific Lumber Inspection Bureau Export R-List Grades of Number 3 common or better grades, with a maximum cross section of 2,000 square centimeters (310 square inches) for any individual piece of processed western red cedar (WRC) being exported, regardless of grade;

(ii) Chips, pulp, and pulp products;

(iii) Veneer and plywood;

(iv) Poles, posts, or pilings cut or treated with preservative for use as such and not intended to be further processed; and

(v) Shakes and shingles.

(2) Federal and State lands means Federal and State lands, excluding lands in the State of Alaska and lands held in trust by any Federal or State official or agency for a recognized Indian tribe or for any member of such tribe.

(3) Contract harvester means any person who, on October 1, 1979, had an outstanding contractual commitment to harvest western red cedar timber from State and Federal lands and who can show by previous business practice or other means that the contractual commitment was made with the intent of exporting or selling for export in unprocessed form all or part of the commodities to be harvested.

(4) Producer means any person engaged in a process that transforms an unprocessed western red cedar commodity (e.g., western red cedar timber) into another unprocessed western red cedar commodity (e.g., cants) primarily through a sawmill.

§ 754.5 Horses for export by sea.

(a) License requirement. As indicated by the letters “SS” in the “Reason for Control” paragraph of the “License Requirements” section of ECCN 9A980 on the CCL (Supplement No. 1 to part 774 of the EAR) a license is required for the export of horses exported by sea to all destinations, including Canada.

(b) License policy. (1) License applications for the export of horses by sea for the purposes of slaughter will be denied.

(2) Other license applications will be approved if BXA, in consultation with the Department of Agriculture, determines that the horses are not intended for slaughter. You must provide a statement in the additional information section of the Form BXA-748P, certifying that no horse under consignment is being exported for the purpose of slaughter.

(3) Each application for export may cover only one consignment of horses.

§ 754.6 Registration of U.S. agricultural commodities for exemption from short supply limitations on export.

(a) Scope. Under the provisions of section 7(g) of the Export Administration Act of 1979 (EAA), agricultural commodities of U.S. origin purchased by or
§ 754.7 Petitions for the imposition of monitoring or controls on recyclable metallic materials; Public hearings.

(a) Scope. Section 7(c) of the Export Administration Act of 1979 (EAA) provides for the filing and review of petitions seeking the imposition of monitoring or controls on recyclable metallic materials.

(b) Eligibility for filing petitions. Any entity, including a trade association, firm, or certified or recognized union or group of workers, which is representative of an industry or a substantial segment of an industry which processes metallic materials capable of being recycled with respect to which an increase in domestic prices or a domestic shortage, either of which results from increased exports, has or may have a significant adverse effect on the national economy or any sector thereof, may submit a written petition to BXA requesting the monitoring of exports, or the imposition of export controls, or both, with respect to such materials.

(c) Public hearings. The petitioner may also request a public hearing. Public hearings may also be requested by an entity, including a trade association, firm, or certified or recognized union or group of workers, which is representative of an industry or a substantial segment of an industry which processes, produces or exports the metallic materials which are the subject of a petition.

(d) Mailing address. Submit petitions pursuant to section 7(c) of the EAA to: Bureau of Export Administration, U.S. Department of Commerce, P.O. Box 273, Washington, D.C. 20044.

SUPPLEMENT NO. 1 TO PART 754—PETROLEUM AND PETROLEUM PRODUCTS

This supplement provides relevant Schedule B numbers and a commodity description of the items controlled by ECCNs 1C990, 1C991, 1C992, 1C993, and 1C994.

Supplement No. 3 to Part 754—Statutory Provisions Dealing With Exports of Crude Oil

The statutory material published in this supplement is for the information of the reader only. See the U.S. Code for the official text of this material.

Public Law 104-58

Sec. 20L. Exports of Alaskan North Slope Oil.

Section 28 of the Mineral Leasing Act (30 U.S.C. 185(s)) is amended by amending subsection(s) to read as follows:

“Exports of Alaskan North Slope Oil

(1) Subject to paragraphs (2) through (6) of this subsection and notwithstanding any other provision of this Act or any other provision of laws (including any regulation) applicable to the export of oil transported by pipeline over right-of-way granted pursuant to section 203 of the Trans-Alaska Pipeline Authorization Act (43 U.S.C. 1652), such oil may be exported unless the President finds that exportation of this oil is not in the national interest. The President shall make his national interest determination within five months of the date of enactment of this subsection. In evaluating whether exports of
this oil are in the national interest, the President shall at a minimum consider—

(A) whether exports of this oil would diminish the total quantity or quality of petroleum available to the United States;

(B) the results of an appropriate environmental review, including consideration of appropriate measures to mitigate any potential adverse effects of exports of this oil on the environment, which shall be completed within four months of the date of the enactment of this subsection; and

(C) whether exports of this oil are likely to cause sustained material oil supply shortages or sustained oil prices significantly above world market levels that would cause sustained material adverse employment effects in the United States or that would cause substantial harm to consumers, including noncontiguous States and Pacific territories.

If the President determines that exports of this oil are in the national interest, he may impose such terms and conditions (other than a volume limitation) as are necessary or appropriate to ensure that such exports are consistent with the national interest.

(2) Except in the case of oil exported to a country with which the United States entered into a bilateral international oil supply agreement before November 26, 1979, or to a country pursuant to the International Emergency Oil Sharing Plan of the International Energy Agency, any oil transported by pipeline over rights-of-way granted pursuant to section 203 of the Trans-Alaska Pipeline Authorization Act (43 U.S.C. 1652) shall, when exported, be transported by a vessel documented under the laws of the United States and owned by a citizen of the United States (as determined in accordance with section 2 of the Shipping Act, 1916 (46 U.S.C. App. 820)).

(4) The Secretary of Commerce shall issue any rules necessary for implementation of the President’s national interest determination, including any licensing requirements and conditions, within 30 days of the date of such determination by the President. The Secretary of Commerce shall consult with the Secretary of Energy in administering the provisions of this subsection.

(5) If the Secretary of Commerce finds that exporting oil under authority of this subsection has caused sustained material oil supply shortages or sustained oil prices significantly above world market levels and further finds that these supply shortages or price increases have caused or are likely to cause sustained material adverse employment effects in the United States, the Secretary of Commerce, in consultation with the Secretary of Energy, shall recommend, and the President may take, appropriate action concerning exports of this oil, which may include modifying or revoking authority to export such oil.

(6) Administrative action under this subsection is not subject to sections 551 and 553 through 559 of title 5, United States Code.

MInERAL LANDS LEASING ACT

30 U.S.C. 185(u)

LIMITATIONS ON EXPORT

Any domestically produced crude oil transported by pipeline over rights-of-way granted pursuant to this section, except such crude oil which is either exchanged in similar quantity for convenience or increased efficiency of transportation with persons or the government of an adjacent foreign state, or which is temporarily exported for convenience or increased efficiency of transportation across parts of an adjacent foreign state and reenters the United States, shall be subject to all of the limitations and licensing requirements of the Export Administration Act of 1979 (50 U.S.C. App. 2401 and following) and, in addition, before any crude oil subject this section may be exported under the limitations and licensing requirements and penalty and enforcement provisions of the Export Administration Act of 1979 the President must make and publish an express finding that such exports will not diminish the total quantity or quality of petroleum available to the United States, and are in the national interest and are in accord with the provisions of the Export Administration Act of 1979. Provided, That the President shall submit reports to the Congress containing findings made under this section, and after the date of receipt of such report Congress shall have a period of sixty calendar days, thirty days of which Congress must have been in session, to consider whether exports under the terms of this section are in the national interest. If the Congress within this time period passes a concurrent resolution of disapproval stating disagreement with the President’s finding concerning the national interest, further exports made pursuant to the aforementioned Presidential finding shall cease.

NAVAL PETROLEUM RESERVES PRODUCTION ACT

10 § 7430(e)

Any petroleum produced from the naval petroleum reserves, except such petroleum which is either exchanged in similar quantities for convenience or increased efficiency
of transportation with persons or the government of an adjacent foreign state, or which is temporarily exported for convenience or increased efficiency of transportation across parts of an adjacent foreign state and reenters the United States, shall be subject to all of the limitations and licensing requirements of the Export Administration Act of 1969, the Exchange or temporary exportation of oil and gas which is exchanged or exported pursuant to an existing international agreement.

The provisions of this section shall not apply to any oil or gas which is either exchanged in similar quantity for convenience or increased efficiency of transportation across parts of an adjacent foreign state and reenter the United States, or which is temporarily exported for convenience or increased efficiency of transportation across parts of an adjacent foreign state and reenter the United States, or which is exchanged or exported pursuant to an existing international agreement.

PART 756—APPEALS

(a) Scope. This part 756 describes the procedures applicable to appeals from administrative actions taken under the Export Administration Act (EAA) or the Export Administration Regulations (EAR). (In this part, references to the EAR are references to 15 CFR chapter VII, subchapter C). Any person directly and adversely affected by an administrative action taken by the Bureau of Export Administration (BXA) may appeal to the Under Secretary for reconsideration of that administrative action. The following types of administrative actions are not subject to the appeals procedures described in this part 756:

(1) Issuance, amendment, revocation, or appeal of a regulation. (These requests may be submitted to BXA at any time.)

(2) Denial or probation orders, civil penalties, sanctions, or other actions under parts 764 and 766 of the EAR.

(b) Definitions. (Reserved)

[61 FR 12851, Mar. 25, 1996, unless otherwise noted]
appeal. In addition, the Under Secretary may designate any BXA official to be an appeals coordinator to assist in the review and processing of an appeal under this part. The responsibilities of an appeals coordinator may include presiding over informal hearings.

(b) Appeal procedures—(1) Filing. An appeal under this part must be received by the Under Secretary for Export Administration, Bureau of Export Administration, U.S. Department of Commerce, Room H–3886C, 14th Street and Pennsylvania Avenue, N.W., Washington, DC 20230, not later than 45 days after the date appearing on the written notice of administrative action.

(2) Content of appeal. The appeal must include a full written statement in support of appellant's position. The appeal must include a precise statement of why the appellant believes the administrative action has a direct and adverse effect and should be reversed or modified. The Under Secretary may request additional information that would be helpful in resolving the appeal, and may accept additional submissions. The Under Secretary will not ordinarily accept any submission filed more than 30 days after the filing of the appeal or of any requested submission.

(3) Request for informal hearing. In addition to the written statement submitted in support of an appeal, an appellant may request, in writing, at the time an appeal is filed, an opportunity for an informal hearing. The Under Secretary may grant or deny a request for an informal hearing. Any hearings will be held in the District of Columbia unless the Under Secretary determines, based upon good cause shown, that another location would be better.

(4) Informal hearing procedures—(i) Presentations. The Under Secretary shall provide an opportunity for the appellant to make an oral presentation based on the materials previously submitted by the appellant or made available by the Department in connection with the administrative action. The Under Secretary may require that any facts in controversy be covered by an affidavit or testimony given under oath or affirmation.

(ii) Evidence. The rules of evidence prevailing in courts of law do not apply, and all evidentiary material deemed by the Under Secretary to be relevant and material to the proceeding, and not unduly repetitious, will be received and considered.

(iii) Procedural questions. The Under Secretary has the authority to limit the number of people attending the hearing, to impose any time or other limitations deemed reasonable, and to determine all procedural questions.

(iv) Transcript. A transcript of an informal hearing shall not be made, unless the Under Secretary determines that the national interest or other good cause warrants it, or the appellant requests a transcript. If the appellant requests a transcript, the appellant will be responsible for paying all expenses related to production of the transcript.

(v) Report. When the Under Secretary designates another BXA official to conduct an informal hearing, that official will submit a written report containing a summary of the hearing and recommended action to the Under Secretary.

(c) Decisions—(1) Determination of appeals. In addition to the documents specifically submitted in connection with the appeal, the Under Secretary shall consider any recommendations, reports, or relevant documents available to BXA in determining the appeal, but shall not be bound by any such recommendation, nor prevented from considering any other information, or consulting with any other person or groups, in making a determination. The Under Secretary may adopt any other procedures deemed necessary and reasonable for considering an appeal. The Under Secretary shall decide an appeal within a reasonable time after receipt of the appeal. The decision shall be issued to the appellant in writing and contain a statement of the reasons for the action.

(2) Effect of the determination. The decision of the Under Secretary shall be final.

(d) Effect of appeal. Acceptance and consideration of an appeal shall not affect any administrative action, pending or in effect, unless the Under Secretary, upon request by the appellant...
Bureau of Export Administration, Commerce

§ 758.1 Export clearance requirements.

In this part, references to the EAR are references to 15 CFR chapter VII, subchapter C.

(a) Responsibility of licensee, exporter and agent. (1) If you are issued a BXA license, or you rely on a License Exception described in part 740 of the EAR, you are responsible for the proper use of that license or License Exception and for the performance of all of its terms and conditions.

(2) If you export without either a license issued by BXA or a License Exception, you are responsible for determining that the transaction is outside the scope of the EAR or the export is designated as “No License Required” as described in paragraph (a)(3) of this section.

(3)(i) “No License Required”. Items that are listed on the Commerce Control List (CCL) (Supplement No. 1 to part 774 of the EAR) but that do not require a license by reason of the Country Chart contained in Supplement 1 to part 738 of the EAR, and items designated EAR99 (See §734.3(c) of the EAR entitled “Scope of the EAR”) must be designated as “NLR”, or “no license required”, on your shipping documents in accordance with the provisions of this part.

(ii) NLR notation. Entering the symbol NLR is a representation to the U.S. Government that the items being exported are listed on the CCL but do not require a license by reason of the Country Chart or that they are within the scope of EAR99 (See §734.3(c) of the EAR entitled “Scope of the EAR”); that they do not require a license under General Prohibitions One (Exports and Reexports), Two (Parts and Components Reexports), or Three (Foreign-produced Direct Product Reexports); that General Prohibitions Four through Ten do not apply to the given export, reexport, or other activity; and that the items are subject to the EAR.

(4) License Exception symbol. Entering a License Exception symbol on an export control document is a representation to the U.S. Government that the transaction meets all of the terms and conditions of the License Exception cited. (See part 740 of the EAR for details regarding License Exceptions.)

(5) Software and technology not subject to the EAR. If you are exporting software or technology that is outside the scope of the EAR as described in §§734.7 through 734.11 of the EAR, you may use the symbol TSPA. Use of this symbol is optional; however, if you enter it on an export control document, you are making a representation to the U.S. Government that the technology or software is outside the scope of the EAR.

(b) Forwarding agent—(1) Authorizing a forwarding agent. A forwarding agent is a person the exporter authorizes to perform services that facilitate the export described on the Shipper’s Export Declaration (SED). The agent must be authorized to act on behalf of the exporter either for the specific transaction for which the agent is submitting the SED or under a general power of attorney. The Foreign Trade Statistics Regulations of the Bureau of the Census (15 CFR part 30) provide the specific requirements for obtaining authorization as a forwarding agent.

(2) Forwarding agent as licensee. If the forwarding agent is appointed at the suggestion of a foreign buyer, the seller...
may insist that the agent apply for the export license. See § 748.5(a)(1) of the EAR which defines parties to a transaction.

(3) Record and proof of agent’s authority. The power-of-attorney or other authorization from the exporter must be retained in a forwarding agent’s office while the authorization is in force and for a period of five years after the last action taken by the forwarding agent under the authority. During this retention period, the forwarding agent must make its delegation of authority from the exporter available for inspection on demand, in accordance with the provisions of § 762.6 of the EAR. This recordkeeping and inspection requirement also applies to any redelegation of the forwarding agent’s authority and to any person to whom the forwarding agent redelegates its authority. (For further recordkeeping requirements see part 762 of the EAR).

(c) Responsibility for compliance. Acting through a forwarding agent, or other agent or delegation or redelegation of authority, does not relieve anyone of responsibility for compliance with the EAR. Forwarding agents, carriers and others who participate in transactions that are subject to the EAR are also responsible for complying with the EAR.

(d) Exports by U.S. Mail—(1) Exports made under a license issued by BXA. Before making an export by U.S. Mail that is authorized by a license issued by BXA, you must enter the license number on the address side of the parcel and submit a properly executed SED to the post office at the place of mailing, when required by the regulations in this part and/or the Foreign Trade Statistics Regulations of the U.S. Bureau of the Census.¹

(2) Shipments without a license. The requirements of this paragraph apply whenever you export items that do not require a license under the EAR. These requirements apply regardless of whether your transaction does not require a license because the item you are going to ship is encompassed with EAR 99 (See § 734.3(c) of the EAR entitled “Scope of the EAR”), because the item, although on the list, does not require a license to be exported to the destination to which you intend to ship or because the transaction qualifies for a License Exception as described in part 740 of the EAR.

(i) Shipments to Canada for consumption therein. An SED is not required for exports of items to Canada if the items are for consumption in Canada and the export transaction does not require a license from BXA. Note that if the item you are exporting to Canada is controlled by another government agency, the regulations of that agency may require you to file a SED.

(ii) Shipments to Puerto Rico or U.S. territories or possessions. Exports of items to Puerto Rico or the U.S. territories or possessions do not require a license issued by BXA. However, the regulations of the Census Bureau (15 CFR part 30) may still require you to file a SED.

(iii) Shipments valued over $500. When mailing an item from one business concern to another where the total value of the items being shipped exceeds $500, you must present an executed SED to the post office at the place of mailing unless the EAR or the Bureau of the Census Foreign Trade Statistics Regulations specifically provide an exception to this requirement. If either the exporter or recipient is not a business concern, no SED is required.

(iv) Designation on SED and/or parcel. If you are exporting an item that is encompassed within EAR 99 (See § 734.3(c) of the EAR entitled “Scope of the EAR”), or one that is listed on the CCL but no license is required to the destination to which you are shipping, or you are exporting pursuant to a License Exception, as described in part

¹The Shipper’s Export Declaration (U.S. Department of Commerce form 7525-V) may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or it may be privately printed. Form 7525-V-alt (Intermodal), must be privately printed. Privately printed forms must strictly conform to the official form in all respects. Samples of these forms may be obtained from the Bureau of the Census, Washington, DC 20233, local Custom offices, and the U.S. Department of Commerce District Offices.
740 of the EAR, you must enter the appropriate symbol indicating the absence of a license requirement either NLR, meaning “No License Required” or the applicable License Exception symbol, on the SED and on the address side of the parcel along with the phrase “Export License Not Required.” If your transaction is one for which you are not required to file a SED, you must enter the appropriate symbol NLR, meaning no license required or of the applicable License Exception on the address side of the parcel along with the phrase “Export License Not Required.” If you are exporting technology or software that is outside the scope of the EAR as described in §734.7 through 734.11 you may enter the symbol TSPA.

(A) By entering the symbol NLR you are representing to the U.S. Government that the items you are exporting are listed on the CCL (See Supplement No. 1 to part 774 of the EAR) but do not require a license by reason of the Country Chart (Supplement No. 1 to part 738 of the EAR) or because they are encompassed within the EAR99 (See §734.3(c) of the EAR entitled “Scope of the EAR”); that they do not require a license under General Prohibitions One (Exports and Reexports of Controlled Items to Listed Countries), Two (Parts and Components Reexports), or Three (Foreign Produced Direct Product Reexports); that General Prohibitions Four through Ten do not apply to the given export, reexport, or other activity; and that the item is subject to the EAR.

(B) By entering a License Exception symbol, you are representing to the U.S. Government that your transaction meets all of the terms and conditions of the License Exception you are using. (See part 740 of the EAR for details regarding License Exceptions). (C) By entering the symbol TSPA you are representing to the U.S. Government that the technology or software you are exporting is outside the scope of the EAR.

(v) Gift parcels. If you are sending a gift parcel pursuant to the requirements of §746.16 of the EAR, you must enter the phrase “Gift—export license not required” on any customs declaration documents and on the address side of the parcel.

(vi) Software and technology. If you are exporting software or technology, the export of which is authorized under the License Exceptions in §740.6 or §740.13 of the EAR, you do not need to make any notation on the package. If you are exporting software or technology that is outside the scope of the EAR, check to see if any other agency’s regulations require specific markings on the package.

(3) When you enter any of the symbols or phrases referred to in paragraph (d) of this section on the documents or packages, you are certifying to the post office and to BXA that you are exporting the package in compliance with all of the terms and provisions of an applicable License Exception or other authority to export.

(e) Exports by means other than U.S. Mail. (1) When SEDs are required to be submitted, the exporter or the exporter’s agent must present a duly executed SED to the exporting carrier before the vessel, aircraft, or overland transport depart.

(i) Exemptions to SED. A SED is not required for:

(A) Any shipment, other than a shipment made under a license issued by BXA or shipments to Cuba, Iran, Iraq, Libya, North Korea, Sudan or Syria if the shipment is valued at $2,500 or less per Schedule B Number. The Schedule B number of an item is shown in the current edition of the Schedule B, Statistical Classification of Domestic and Foreign Commodities Exported from the United States. As used in this paragraph (e), “shipment” means all items classified under a single Schedule B number (or Harmonized Tariff Schedule number if the Schedule B number is not available), shipped on the same carrier, from one exporter to one importer. The Foreign Trade Statistics Regulations of the Bureau of the Census (15 CFR part 30) shall govern the valuation of items when determining whether a shipment meets the $2,500 threshold of this paragraph.

(B) Any shipment reported under the provisions of the Monthly Reporting Procedure (§758.3(o) of this part); or
(C) Any shipment made under any other exception to the SED requirements found in Subpart B of the Bureau of the Census’ Foreign Trade Statistics Regulations.

(D) Exports of tools of trade under License Exception TMP or BAG.

(ii) Exceptions from SED requirements.

(A) Statement on shipping documents. If you are exempt by paragraph (e)(1) of this section from the requirement of filing a SED, the Bureau of the Census’ Foreign Trade Statistics Regulations (FTSR) (15 CFR 30.50), require you to make a statement on the bill of lading, air waybill, or other loading document describing the basis for the exemption and referencing the specific section of the FTSR where the exemption is provided, unless the exemption is based on value and destination. If the exemption is based on the value and destination of your shipment, you must state the basis for the exemption, but you do not have to cite a reference to the specific section of the FTSR containing the exemption.

(B) Monthly reporting procedures. (1) All forwarders or brokers who use the monthly reporting procedures described in FTSR § 30.39 (15 CFR 30.39) on behalf of exporters who are not themselves exempt from the individual filing requirement must also include on the bill of lading, air waybill, or other loading document either the number of and expiration date of an export license issued by BXA, or the appropriate symbol indicating the inapplicability of an export license requirement (either NLR, meaning “No License Required” or of the applicable License Exception, from part 740 of the EAR).

(2) The notation required by paragraph (e)(1)(ii)(B)(1) of this section applies to any bill of lading or other loading document, including one issued by a consolidator (indirect carrier) for an export included in a consolidated shipment. However, this requirement does not apply to a “master” bill of lading or other loading document issued by a carrier to cover a consolidated shipment. The bill of lading or other loading document must be available for inspection along with the goods or data prior to lading on the carrier.

(2) Export carrier SED information. The exporting carrier, or if none is utilized, the exporter or agent is responsible for the accuracy of the following items of information (where required) on the SED:

(i) Name of carrier (including flag of vessel),

(ii) U.S. Customs port of export,

(iii) Method of transportation,

(iv) Foreign port of unloading,

(v) Bill of lading or air waybill number, and

(vi) Whether or not containerized.

(3) Exports not requiring a license. Even if your shipment does not require a license from BXA, it may still require a SED. Before shipping, check the Bureau of the Census Foreign Trade Statistics Regulations for the complete SED requirements.

(f) Shipments transiting Canada en route to other countries—(1) Shipments moving under individual SED. When an export to a foreign country is made in transit through Canada, and the shipment is one for which an individual SED is required by this part 758, the U.S. exporter must submit to the Canadian Customs authorities at the Canadian port of entry a copy of the U.S. SED, Form 7525-V, certified by the exporter as “A True Copy” of the original SED.

(2) Shipments for which individual SED are not required. When an export to a foreign country is made in transit through Canada, and the shipment is one for which an individual SED is not required because:

(i) The forwarder or broker is authorized to report export information to Census by means other than an individual SED; or

(ii) The shipment qualifies for a specific exemption (listed in Subpart D of the Census’ Foreign Trade Statistics Regulations), the forwarder or broker must include the number of and expiration date of the license issued by BXA, or the appropriate symbol indicating the inapplicability of an export license requirement (either NLR, meaning “No License Required” or the applicable License Exception from part 740 of the EAR) on the bill of lading or other loading document as directed in paragraph (e)(2) of this section). The
bill of lading or other loading document properly annotated with respect to the FTSR SED exemption or exception, along with the license authorization, when required, must be displayed to the Canadian Customs authorities at the Canadian port of entry and a copy provided, if requested by the Canadian authorities.

§ 758.2 Use of export license.

(a) License valid for shipment from any port. A license issued by BXA authorizes exports from the United States from any U.S. port of export unless the license notes otherwise. Items that leave the United States at one port, cross adjacent foreign territory, and reenter the United States at another port before final export to a foreign country will be treated as an export from the last U.S. port of export.

(b) Shipments against expiring license.

(1) Any item that has not departed from the last U.S. port of export by midnight of the expiration date of the license may not be exported under that license unless the shipment meets the requirements of paragraph (b)(1)(i) or (ii) of this section:

(i) BXA grants an extension; or

(ii) Prior to midnight of the expiration date of the license, the items:

(A) Were laden aboard the vessel; or

(B) Were located on a pier ready for loading and not for storage, and were booked for a vessel that was at the pier ready for loading;

(2) When the vessel is expected to be available at the pier for loading before the license expires, but exceptional and unforeseen circumstances delay it, the items may be exported without an extension of the license, if in the judgment of the U.S. Customs Service or BXA, undue hardship would otherwise result.

(c) Reshipment of undelivered items. If the consignee does not receive an export made under a license because the carrier failed to deliver it, the exporter may reship the same or an identical item subject to the same limitations as to quantity or value as described on the license to the same consignee and destination under the same license. Before reshipping, the exporter must submit to the BXA satisfactory evidence of the original export and of the delivery failure, together with a satisfactory explanation of the delivery failure. If an item is to be reshipped to any person other than the original consignee, the shipment is deemed to be a new export and is subject to all current EAR regarding the specific item and destination.

§ 758.3 Shipper’s Export Declaration (SED).

(a) SED presentation requirement. Both the Foreign Trade Statistics Regulations of the Census Bureau (15 CFR part 30) and these Export Administration Regulations require that SED’s be submitted to the U.S. Government. There are a few exceptions to this rule, but if you are required to submit a SED you must prepare it in accordance with the rules of the Foreign Trade Statistics Regulations (FTSR) and present the number of copies specified in the FTSR at the port of export.

(b) SED is a statement to the U.S. Government. Your SED is a statement to the U.S. Government in which you assert that all of the information shown on the SED is true. You may execute and submit the SED only if you are the exporter or the duly authorized forwarding agent of an exporter.

(c) Limitation on time when SED may be used. No one may use a SED to export, or facilitate or effect an export, after the expiration of the applicable license or after the termination of the applicable License Exception or provisions of the EAR that authorize export without a license, except as provided in §750.7(f) (License validity period) of the EAR and §758.2(b) (Shipments against expiring license) of this part.

(d) Additional copies of the SED. You are required to submit additional copies of the SED when:

(1) BXA or one of its component offices asks you to send it copies of the SED for exports:

(i) Authorized by a license (see paragraph (i) of this section);
§ 758.3  15 CFR Ch. VII (1–1–00 Edition)

(ii) Authorized by a Special Comprehensive License (see § 752.16(a)(5) of the EAR; or
(iii) The items are controlled for short supply reasons (see part 754 of the EAR); or
(iv) Required by § 758.1(f) (shipments transiting Canada) of this part.

(2) You are required under the provisions of § 754.2(j)(2) of the EAR.

(e) Statements on SED. Whenever a SED is presented to a carrier, a customs office, or a postmaster, the exporter represents that:

(1) All statements and information on the SED have been furnished by the exporter or on the exporter’s behalf to effect an export under the provisions of the EAR;
(2) Export of the items described on the SED is authorized under the “No License Required” provisions of the EAR as described in § 758.1(a) of this part, a License Exception described in part 740 of the EAR or the license identified on the SED;
(3) Statements contained on the SED are consistent with the contents of the license or the terms, provisions, and conditions of the applicable License Exception or of the applicable “No License Required” provisions of the EAR as described in § 758.1(a) of this part; and
(4) All other terms, provisions, and conditions of the EAR applicable to the export have been met.

(f) Items that may be listed on the same SED—(1) General. Except as described in paragraph (f)(2) of this section, more than one item may be listed on the same SED provided they are contained in one shipment on board a single carrier and are going from the same exporter to the same consignee. Even if some of the items are being shipped under authority of a license and others under a License Exception or the “No License Required” (NLR) provisions of the EAR as described in § 758.1(a) of this part, they may still be shown on one SED. For the second and subsequent authorizations used, the applicable license number and expiration date, License Exception symbol, or the symbol NLR must be shown along with the descriptions (including quantity, if required, Schedule B number or Harmonized Tariff Schedule number, and value) to which each authorization applies must be shown under each of the properly aligned line item descriptions. The following apply for notations made on the SED:

(1) Entering the license number and expiration date is a representation to the U.S. Government that the transaction is authorized by the license cited.
(2) Entering a License Exception symbol, or “NLR” is a representation to the U.S. Government that the shipment meets one of the applicable provisions of paragraph (a)(3) of § 758.1 of this part.

(2) Exception. Separate SED’s must be prepared and presented for each vehicle when more than one vehicle is used to make the shipment. Customs Directors may waive this requirement if a shipment is made under a single bill of lading or other loading document and all the items listed on the SED are cleared simultaneously.

(g) Schedule B number and item description. (1) Schedule B number. You must enter the Schedule B number (or Harmonized Tariff Schedule number), as shown in the current edition of Schedule B, Statistical Classification of Domestic and Foreign Commodities Exported from the United States, in the designated column of the SED or other number acceptable to the Foreign Trade Division, Bureau of the Census regardless of whether the shipment is being exported under authority of a license issued by BXA, a License Exception described in part 740 of the EAR, or the “No License Required” (NLR) provisions of the EAR as described in § 758.1(a) of this part.

(2) Item description for exports under a license—(i) General. If your export is being made under the authority of a license issued by BXA, you must enter the item description shown on the license on the SED. However, if part of the description on the license is underlined, you need place only the underlined portions on the SED. The item description on the license will be stated in CCL terms, which may be inadequate to meet Census Bureau requirements. In this event, the item description you place on the SED must be given enough additional detail to permit verification of the Schedule B
number (or Harmonized Tariff Schedule number) (e.g., size, material, or degree of fabrication).

(ii) Distinguishing characteristics or specifications. If a commodity classification in Schedule B (or Harmonized Tariff Schedule number) has instructions such as “specify by name”, “state species”, etc., you must furnish that information in the column of the SED provided for the commodity description. When a single SED covers more than one item classifiable under a single classification carrying the “specify by name” or similar requirement, you must enter each item separately in this column. However, if more than five items are involved, all classifiable under one Schedule B number (or Harmonized Tariff Schedule number) only the five items of greatest value in the classification need be shown separately. Separate quantities, values, and shipping weights for individual items are not required in either case.

(3) Item description for License Exception shipments or shipments for which no license is required. For items that may be exported under authority of a License Exception, or under the NLR provisions of the EAR (as described in § 758.1(a) of this part), you must enter a description in sufficient detail to permit review by the U.S. Government and verification of the Schedule B number or (Harmonized Tariff Schedule number) entered on the SED.

(h) License number or other authorization designation—(1) Exports under the authority of a license issued by BXA. You must show the license number and expiration date, the Export Control Classification Number (ECCN) and the item description, in the designated spaces of a SED covering an export under a license issued by BXA (the space for the item description on the SED form may be headed “commodity description”). If you intend to include other items on the SED that may be exported under a License Exception or under the “No License Required” (NLR) provisions of the EAR (as described in §758.1(a) of this part) you must show the License Exception or NLR symbol, along with the specific description (quantity, Schedule B number or Harmonized Tariff Schedule number, value) of the item(s) to which the authorization applies in the designated spaces on the SED continuation sheet.

(2) Exports not needing a license. In addition to the item description, the appropriate License Exception symbol, or the “No License Required” symbol (NLR) must be shown in the appropriate column of each SED or SED continuation sheet covering a shipment under authority of a License Exception (see part 740 of the EAR), or “No License Required” provisions of the EAR (as described in § 758.1(a) of this part). If several authorizations are to be listed on one SED, the SED and continuation sheets must be completed as described in paragraph (f)(1) of this section. If the item(s) will be exported under the provisions of License Exceptions GBS, CIV, or LVS, or under the “NLR” provisions of the EAR (as described in §758.1(a) of this part) the item(s) are covered by entries on the Commerce Control List that are controlled for “CW” reasons or that have the column identifier “NS Column 2” controlled for “NS” reasons, the ECCN must also be shown in the designated space on the SED or SED continuation sheet. The following apply for notations made on SED:

(i) Entering the license number and expiration date is a representation to the U.S. Government that the transaction is authorized by the license cited.

(ii) Entering a License Exception symbol, or “NLR” is a representation to the U.S. Government that the shipment meets one of the applicable provisions of paragraphs (a)(3) through (a)(4) of §758.1 of this part.

(3) If you are exporting technology or software that is outside the scope of the EAR as described in §§734.7 through 734.11 of the EAR, you may enter the symbol TSPA on the SED. Use of this symbol is optional, however, if you enter it, you are representing to the U.S. Government that the software or technology you are exporting is outside the scope of the EAR.

(i) Optional ports of unlading—(1) Applicability. If, prior to the departure of the exporting carrier, the exporter does not know at what port the shipment will be unloaded, the exporter may designate optional ports of unlading on
§ 758.3  

15 CFR Ch. VII (1–1–00 Edition)

the SED and bill of lading or air way-bill in accordance with the provisions of this paragraph. There are restrictions on the countries in which these optional ports may be located. The restrictions depend on whether the export is authorized under the "No license Required" provisions of the EAR (as described in §758.1(a) of this part), the License Exceptions described in part 740 of the EAR, or a license (See paragraph (j)(3) of this section).

(2) Exemptions. You may never designate an optional port of unlading for a shipment destined directly or indirectly to Country Group D:1 in Supplement No. 1 to part 740 of the EAR (except for the People's Republic of China), Libya, Cuba, or North Korea.

(3) Shipments for which no license is required or which are authorized by a License Exception. (i) For exports under the authority of the "No License Required" provisions of the EAR (as described in §758.1(a) of this part), if the exporter does not know which of several countries in Country Group B or the People's Republic of China is the country of ultimate destination, the exporter may name optional ports of unlading in one or more of these countries.

(ii) When an export under any License Exception is shipped in transit through a country other than the country of ultimate destination, the exporter may designate optional ports of unlading in one or more countries, together with the name and address of the intermediate consignee in each country designated.

(4) Restrictions on optional ports of unlading. The optional ports of unlading, which the exporter designates on the SED, pursuant to paragraph (i)(3)(i) of this section, must be in a country to which the item being unloaded may be exported directly from the United States under the same or another applicable "No License Required" provision of the EAR (described in §758.1(a) of this part), or License Exception contained in the EAR.

(5) Shipments under a license issued by BXA. For exports under a license, optional ports of unlading are restricted to the country of ultimate destination, unless either the transaction complies with the provisions of §750.7 of the EAR dealing with continuity of shipments, or the license designates intermediate consignees in other countries. In the latter case, the optional ports of unlading must be designated as optional intransit points on the SED, or if there is no SED, on the Shipper's Letter of Instructions, or, if there is neither, the optional port of unlading must appear on another document containing instructions that the exporter conveys (either directly or through an agent) to the carrier, and on the bill of lading or air waybill.

(6) Correcting the SED. As soon as the exporter, or the exporter's forwarding agent or carrier determines at which port the shipment is to be unloaded (whether in the country of ultimate destination or in a country of transit), that person must correct the SED to show the specific port of unloading and the name and address of the intermediate consignee to whom delivery is to be made. An intermediate consignee must be shown if the port of unloading is located in a country other than the country of destination. If the export is unloaded at more than one port, the quantity and value unloaded at each port and the name and address of each intermediate consignee must be given. The procedures for correcting and filing SEDs may be found in paragraph (n) of this section.

(j) Signature on SED. The exporter or the exporter's authorized forwarding agent, or an authorized employee of either, may sign the SED. In general, the requisite authority rests with employees who, by their official titles, are apparently vested with power to deal with exports, such as export managers or such corporate officers as the president, vice president, treasurer, and secretary of a corporation, any partner of a partnership, and any responsible head of any other form of private or quasi-governmental organization, and assistant officers. The signature of such person, whether that of the exporter or authorized agent or employee, constitutes a representation by the exporter that all statements and information in the SED are true and correct. In addition, if the signature is that of the forwarding agent, or the
(k) Attachment to SED. (1) If you need additional space for any information on the SED, you may use additional copies of the SED or copies of the continuation sheet. In such cases, only one SED need be signed. You must number the additional sheets in sequence and securely attach them to the executed SED. You must insert the following statement on the last line of the description line of the SED form itself:

This SED consists of this sheet and continuation sheets.

(2) No portion of any form attached as a continuation sheet may be torn off or removed.

(i) Special requirements for additional information and documents. (1) A license may bear on its face a requirement to submit a SED or other documents (or information) to the Office of Export Enforcement in addition to that furnished when the application was filed. The exporter and the person submitting the documents represent that the documents are complete, truthful and accurate. The Export Administration Regulations prohibit the making of false representations to the U.S. Government in any export control matter (see §764.2(g) of the EAR). The licensee must furnish the documents to: Office of Export Enforcement, Room H-4500, U.S. Department of Commerce, 14th Street and Constitution Ave., NW., Washington, DC 20230.

(2) When required, the licensee must:

(i) Prepare one copy of the SED in addition to the number of copies otherwise required;

(ii) Enter the additional information called for by the license in the space between the column provided for marks and numbers of the shipment and the column provided for its value on all copies of the SED; and

(iii) Unless otherwise specified on the license, attach the required documents (either original or certified copy) to the extra copy of the SED.

(m) SED for shipments moving in-transit. (1) Applicability. Use the SED for In-transit Goods, Commerce Form 7513, for the following types of transactions:

(i) Items departing the United States by vessel, which transited through, or transshipped in, ports of the United States, destined from one foreign country to another.

(ii) Foreign merchandise exported from a General Order Warehouse and the export of foreign-origin merchandise that was rejected after government inspection or examination. Shipments in bond transiting the United States being exported by means of any carrier other than a vessel may be cleared for export without presenting a Form 7513, unless a license is required for the export.

(2) Exports from Foreign Trade Zones. You may not use Form 7513 for any exports from Foreign Trade Zones. Such shipments require the filing of the SED (Form 7525-V), unless otherwise exempted, with the applicable zone number reported on the Document.

(3) Additional information. The following additional information must be entered on a SED for In-transit Goods:

(i) The name and address of the intermediate consignee in a foreign destination, if any, must be shown below the description of the items.

(ii) Underneath the name and address of the intermediate consignee, one of the following statements, whichever is appropriate, must be entered:

(A) For intransit shipments of foreign-origin merchandise (see part 772 of the EAR for a definition of “foreign-origin”), enter the following statement:

The merchandise described herein is of foreign-origin.

(B) For intransit shipments of domestic (U.S.) merchandise, enter the following statement:

The merchandise described herein is of the growth, production, or manufacture of the United States.

(C) For intransit shipments of items of U.S.-origin eligible for the intransit provisions of License Exception TMP (see §740.9(b) of the EAR), enter the following statement:

Form 7513 may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, the local customs offices, or may be privately printed.
§ 758.3

15 CFR Ch. VII (1–1–00 Edition)

The merchandise described herein is of the growth, production, or manufacture of the United States, but has been so altered by further processing, manufacture, or assembly in a foreign country that it has either been substantially enhanced in value, or has lost its original identity with respect to form.

(iii) The items must be described in terms of Schedule B, including the appropriate Schedule B number or "other number acceptable to the Foreign Trade Division, Bureau of the Census".

(4) See § 30.8 of the Foreign Trade Statistics Regulations (15 CFR 30.8) for additional requirements concerning the information that must be placed on a SED for In-transit Goods.

(n) Correction, change, alteration, or amendment of SED—(1) Methods of changing SED's. The exporter or the exporter's agent must report corrections, cancellations, additions or amendments to information reported on SEDs to the Customs Director at the port of exportation (or, in the case of mail shipments, to the Postmaster at the post office where the shipment was mailed) as soon as the need for such changes is determined. See the Foreign Trade Statistics Regulations (15 CFR part 30) for additional information about how to correct SEDs and file the corrections. If you are required by paragraph (l) of this section to file a copy of the original SED with the Office of Export Enforcement (OEE), a copy of the changed SED should be sent to OEE at the address shown in paragraph (l) of this section with the words "Correction Copy" conspicuously shown in the upper right portion of the form.

(2) Responsibility. Nothing in this section relieves you or any person or firm making changes on the SED from responsibility for any such changes. Acceptance of a changed SED by the Customs office does not imply approval of any act involved in the shipment or acceptance of the truth or accuracy of the information provided.

(o) Summary monthly reports in lieu of individual SED's—(1) Scope. This paragraph contains only basic information about the monthly filing procedures for the SED. Details of the procedure may be found in § 30.39 of the Foreign Trade Statistics Regulations (FTSR) of the Bureau of the Census (15 CFR 30.39).

Exporters interested in the procedure should consult § 30.39 of the FTSR to ascertain qualifications, how to apply for the privilege of participating, how to file electronically after approval is given, and other pertinent facts.

(2) Applicability. Approved parties may file monthly SEDs with the Bureau of the Census for export to destinations in Country Groups B and D (see Supplement No. 1 to part 740 of the EAR).

(3) How to request monthly reporting privileges—(i) Addresses. (A) A request for the privilege of participating in monthly reporting procedures should be forwarded to: Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233.

(B) A copy of all requests must be sent to: Office of Export Enforcement, Room H–4616, U.S. Department of Commerce, 14th St. and Constitution Ave., NW., Washington, DC 20230.

(ii) Certification requirements. The request must include the following certification by the applicant:

I (We) certify that I (we) have established adequate internal procedures and safeguards to assure compliance with the requirements set forth in the U.S. Department of Commerce Export Administration Regulations and Foreign Trade Statistics Regulations. Among other things, these procedures and safeguards assure:

(1) A proper determination as to whether a license is required for a particular export;

(2) Actual receipt of the export license, if required, before the shipment is exported;

(3) Compliance with all the terms of the license, License Exception, or NLR provisions of the EAR as applicable;

(4) Return of licenses to BXA in accordance with § 750.8(b) of the Export Administration Regulations, if requested;

(5) Compliance with the destination control statement provisions of §§ 758.5 and 758.6 of the Export Administration Regulations;

(6) Compliance with the prohibition against export transactions that involve persons who have been denied U.S. export privileges; and

(7) Compliance with the recordkeeping requirements of part 762 of the EAR and, in addition, I (we) agree that my (our) office records will be made available for inspection by the Bureau of the Census, BXA or the U.S. Customs Service, upon request, to verify that a given shipment was properly included in a particular monthly report.

(4) Exporter’s agent. If the exporter intends to authorize a forwarding agent
to file electronically on the exporter's behalf, the exporter's request must include the name and address of each such forwarding agent.

(5) Authorization by Census to use monthly reporting procedure. Any authorization to file summary monthly reports in lieu of individual SEDs may be granted only by the Bureau of the Census with the concurrence of BXA.

(6) Export clearance. (i) Destination control statement. In addition to the exporter's responsibility for assuring that the proper destination control statement is placed on the commercial invoice as required by §758.6 of this part, the exporter or the exporter's forwarding agent is responsible for assuring that the carrier places the proper destination control statement on the related bill of lading or air waybill.

(ii) Detention and examination. Shipments being reported under the summary filing procedure described in this paragraph are subject to inspection, examination and detention, as provided in §758.7 of this part, whenever an official of BXA, a customs officer, or a postmaster deems such action necessary to assure compliance with the EAR.

(7) Revocation of authorization. An authorization to file summary monthly reports in lieu of individual SED's, granted under the provisions of §30.39 of the Foreign Trade Statistics Regulations (15 CFR 30.39) and this paragraph, may be revoked, suspended, or revised at any time.

(8) Effect of other provisions. Insofar as consistent with the provisions of this paragraph that relate specifically to filing electronically in lieu of individual SED's, the other provisions of this part §758 apply to exports reported under this procedure.

§ 758.4 Conformity of documents for shipments under export licenses.

(a) Applicability. The rules of conformity in this section apply to shipping documents used in connection with any shipment under the authority of a license issued by BXA except "master" air waybills issued by consolidators. These rules apply to any individual air waybill issued by a consolidator (indirect carrier) for an export included in a consolidated shipment and to any air waybill issued by anyone in connection with an export not included in a consolidated shipment.

(b) Compliance. You may not issue, prepare, or procure a bill of lading that is contrary to the provisions of this section. Officials of BXA and the U.S. Customs Service are authorized to require any document or to use any other appropriate methods to ensure compliance with the rules of conformity in this section.

(c) Rules of conformity—(1) General. The following documents must be consistent with each other:

(i) The license issued by BXA;

(ii) One of the following applicable documents:

(A) The SED;

(B) If there is no SED, the Shipper's Letter of Instructions; or

(C) If there is neither, another document containing instructions that the exporter conveys (either directly or through an agent) to the carrier; and

(iii) The outbound bill of lading (including a railroad through bill of lading) covering a particular export shipment must be consistent with one another.

(2) Signs of inconsistent documents. The bill of lading, whether in negotiable or nonnegotiable form, is not consistent with those other documents if:

(i) It does not provide for delivery of the shipment (cargo) at a port located in the country of either the ultimate or intermediate consignee named in the documents described in paragraph (c)(1)(ii) of this section;

(ii) It contains any indication that the shipment is in transit to a country of ultimate destination different from that named in the appropriate one of the documents described in paragraph (c)(1)(ii) of this section; or that the shipment is not for consumption in such country of ultimate destination. For example, it would be inconsistent to consign a shipment to the ultimate destination with a qualifying phrase indicating the shipment is “in transit” at that destination, or to consign the shipment to a free zone or free port;
§ 758.5 General destination control requirements.

(a) Scope. This section sets forth some actions the parties to a transaction authorized by a license issued by BXA are prohibited from taking. The purpose of these prohibitions is to prevent items licensed for export from being diverted while in transit or thereafter. It also sets forth the duties of the parties when the goods are unloaded in a country other than that of the ultimate consignee or intermediate consignee as stated on the export license.

(b) Destination on bill of lading or air waybill—(1) Requirements to prevent diversions—(i) Statements on bill of lading or air waybill. (A) A carrier (or any other person on behalf of any carrier) may not issue a bill of lading or air waybill providing for delivery of cargo at any foreign port located outside the country of the ultimate consignee, or

(iii) It names as shipper any person other than the licensee (the person to whom a license is issued) or the licensee’s duly authorized forwarding agent. Where shipments from more than one licensee are consolidated on a single bill of lading, the shipper named on the bill of lading must also appear as the authorized forwarding agent for each exporter on each document described in paragraph (c)(1)(ii) of this section.

(iv) The name and address of the ultimate consignee are not shown either in the space provided for “consignee” or in the body of the bill of lading under the caption “ultimate consignee and notify party” or, in the case of the air waybill, under the caption “also notify.” However, where shipments to more than one ultimate consignee are consolidated on one bill of lading and not all are shown in the body of the bill of lading, the name of the intermediate consignee (customs broker or consolidator’s agent in the foreign country) who will receive and distribute the items to the ultimate consignees must appear on the bill of lading, the export license(s), and documents listed in paragraph (c)(1)(ii) of this section.

(3) Additional rules for negotiable bills of lading. A negotiable bill of lading (an “order” bill of lading) is deemed consistent with the appropriate one of the documents described in paragraph (c)(1)(ii) of this section only if the consignee or order party named on the bill of lading is also named in the SED, the Shipper’s Letter of Instructions or the other document.

(i) Sometimes “order” bills of lading consign the items they cover to the order of the shipper, to the order of an intermediate consignee such as a bank, foreign freight forwarder, or other intermediary, or to the order of a purchaser who is not the same person as the ultimate consignee. An “order” bill of lading issued in any of these forms constitutes a representation by the shipper that:

(A) The items covered by the appropriate one of the documents described in paragraph (c)(1)(ii) of this section and bill of lading are ultimately destined to the ultimate consignee stated on the license;

(B) The “order” bill of lading has not been used for the purpose of evading the terms and conditions of the license; and

(C) Pursuant to the contract of carriage, the items will be delivered at a port located in the country of the ultimate consignee or of the intermediate consignee named on the appropriate one of the documents described in paragraph (c)(1)(ii) of this section.

(ii) [Reserved]

(4) Item description. On the bill of lading the items may be described in terms of the freight tariff classification or other type of classification, but may not be inconsistent with the description shown on the appropriate one of the documents described in paragraph (c)(1)(ii). These documents must include the same item description as shown on the related license, and, in addition, it must include more detailed information where required by the Bureau of the Census.

(5) Carrier’s manifest. If the carrier’s outward foreign manifest filed with the U.S. customs office contains the names of shippers or consignees, these names must not be inconsistent with the names shown on the bill of lading and the appropriate one of the documents described in paragraph (c)(1)(ii) of this section.

§ 758.5 General destination control requirements.

(a) Scope. This section sets forth some actions the parties to a transaction authorized by a license issued by BXA are prohibited from taking. The purpose of these prohibitions is to prevent items licensed for export from being diverted while in transit or thereafter. It also sets forth the duties of the parties when the goods are unloaded in a country other than that of the ultimate consignee or intermediate consignee as stated on the export license.

(b) Destination on bill of lading or air waybill—(1) Requirements to prevent diversions—(i) Statements on bill of lading or air waybill. (A) A carrier (or any other person on behalf of any carrier) may not issue a bill of lading or air waybill providing for delivery of cargo at any foreign port located outside the country of the ultimate consignee, or
the intermediate consignee, named on the appropriate one of the documents described in §758.4(c)(1)(ii) of this part.

(B) Optional ports on bill of lading or air waybill. No carrier may issue a bill of lading or air waybill providing for delivery of cargo at optional ports to the ultimate consignee named on one of the appropriate documents described in §758.4(c)(1) (i) and (ii) of this part where one of such optional ports is not in the country of ultimate destination named on the license or SED, or if there is no SED, the Shipper's Letter of Instructions, or if there is neither, another document containing instructions that the exporter conveys (either directly or through an agent) to the carrier, without prior written authorization from BXA. However, where the appropriate document described in §758.4(c)(1) (i) and (ii) of this part provide for delivery of cargo to optional intermediate consignees located in ports in different countries, the carrier may issue a bill of lading or air waybill providing for delivery at such optional ports.

(ii) [Reserved]

(2) Delivery of cargo. No carrier may deliver cargo to any country other than the country of the ultimate consignee, or the intermediate consignee, named on the appropriate one of the documents described in §758.4(c)(1)(ii) of this part at the request or option of the shipper, consignor, exporter, purchaser, or ultimate consignee, or their agents, or any other person having custody or control of the shipment, without prior written authorization from BXA to the carrier or its agent.

(c) Duties when items are unloaded in a unauthorized country. If the items are unloaded in a country other than that of the intermediate or ultimate consignee as stated on the appropriate one of the documents described in §758.4(c)(1)(ii) of this part, the procedures described in this paragraph must be followed.

(1) Reasons beyond carrier's control. Nothing contained in the EAR shall be deemed to prohibit a carrier from unloading cargo at a port outside the country of intermediate or ultimate destination shown on the appropriate one of the documents described in §758.4(c)(1)(ii) of this part, where for reasons beyond the control of the carrier (as set forth in the standard provisions of the carrier's bill of lading or air waybill, such as acts of God, perils of the sea, damage to the carrier, strikes, war, political disturbances, or insurrections), it is not feasible to deliver the cargo at the licensed port of destination.

(2) Required actions for unscheduled unloading. (i) If the item is unloaded in a country to which that item may be exported without a license issued by BXA, no one is required to notify BXA of the unloading. The exporter may dispose of the items in that country without approval of BXA. When making such a disposition you must still comply with any conditions or requirements of the License Exception or other provisions of the EAR that would authorize the export of the item being unloaded to the country in which you are disposing of it, and any regulations of other government agencies that apply to the transaction. This paragraph does not authorize anyone to take any action with knowledge that a violation of the Export Administration Act, the EAR, or any order, license or authorization issued thereunder, has occurred, is about to occur or is intended to occur, or to deliver to a denied party or to take any other action prohibited by the EAR.

(ii) If a license issued by BXA would be required to export the item to the country in which it is unloaded:

(A) No person may take any steps to effect delivery or entry of the items into the commerce of the country where unloaded without prior approval of BXA;

(B) The carrier must take steps to assure that the items are placed in custody under bond or other guaranty not to enter the commerce of such country or any country other than the countries of the ultimate and intermediate consignees shown on the appropriate one of the documents described in §758.4(c)(1)(ii) of this part, without prior approval of BXA;

(iii) The carrier, the carrier's agent located in the United States, and the
§ 758.6 Destination control statement.

(a) Requirement for destination control statement. (1) The destination control statement shown in paragraph (b) of this section must be entered on all copies of the bill of lading, the air waybill and the commercial invoice covering any export from the United States if:

(i) the export is made under authority of a license, including the Special Comprehensive License;

(ii) the export is made under the authority of the following License Exceptions: LVS, GBS, CIV, CTP, TMP, or RPL; or

(iii) the export is made under the “No License Required” provisions of the EAR (as described in §758.1(a) of this part) if the reason for control of the item as stated in the entry on the CCL is NS or NP.

(2) An exporter or the exporter’s agent may enter a destination control statement on the shipping documents for exports for which no destination control statement is required.

(b) Text of destination control statement.

These commodities, technology or software were exported from the United States in accordance with the Export Administration Regulations. Diversion contrary to U.S. law prohibited.

(c) Additional destination information. In addition to the destination control statement, an exporter or exporter’s agent may supply additional information on the shipping documents, including the country(ies) to which export or reexport is authorized.

(d) Permissive reexports. If reexport or diversion from the original transaction is contemplated and the change from the original transaction is consistent with the license, License Exception, the NLR provisions of the EAR or other authorization and with all other requirements of the EAR, the exporter may so advise its foreign importer without obtaining further authorization from BXA.

(e) Responsibility for assuring that the destination control statement is used—(1) Exporters. The exporter is responsible for assuring entry of the destination control statement on the commercial invoice, regardless of whether the exporter actually prepares this document. The exporter has this responsibility even if the invoice is prepared by an order party or the exporter acts through an agent.

(2) Agents of exporters (forwarding agents). Agents of exporters are also responsible for assuring entry of the destination control statement on the commercial invoice.

(i) If the agent receives from the exporter a copy of a commercial invoice without the correct destination control statement, the agent must:

(A) Notify the exporter in writing;

(B) Request written assurance from the exporter that:

(1) the destination control statement has been properly entered on all other copies of the commercial invoice; and

(2) any person who received the invoice without the statement has been informed in writing of the restrictions in the statement;

(ii) And either:

(A) Enter the appropriate statement on the agent’s copy of the invoice; or

(B) Return it to the exporter for completion; and

(iii) Keep and make available for inspection, in accordance with part 762 of the EAR, a copy of that person’s notification to the exporter and the original
of the exporter's assurance required by paragraph (e)(2)(i) of this section. (For further recordkeeping requirements, see part 762 of the EAR.)

(iv) If the agent prepares the invoice, the agent's responsibilities are governed by paragraph (e)(3) of this section.

(3) Forwarders, carriers and other parties who prepare invoices. If a forwarder, a carrier acting as a forwarder, or any other party prepares, presents, and/or executes the invoice, the forwarder, carrier, or other party is also responsible for assuring that an appropriate statement is entered on the invoice.

(iv) If the agent prepares the invoice, the agent's responsibilities are governed by paragraph (e)(3) of this section.

(4) Carriers and other parties who issue bills of lading or air waybills. The carrier, or any other party that issues the bill of lading or air waybill, is responsible for assuring that the destination control statement appearing on the corresponding invoice also appears on the bill of lading or air waybill.

(f) Responsibility for distributing copies of the invoice. The exporter or other person issuing any invoice containing a destination control statement must send copies in a manner which assures their arrival either with or prior to arrival of the items being exported to:

(1) The ultimate consignee and the purchaser named in the SED;

(2) The intermediate consignee; and

(3) Any other persons named in the invoice who are located in a foreign country. Nothing contained in this part shall be construed to limit the persons or classes of persons to whom such invoices, bills of lading or air waybills are usually and customarily sent in the course of export trade. The shipper or other person issuing the commercial invoice may comply with the requirements of this section even if the copy of the invoice sent to any of the persons listed in paragraphs (f)(1) or (2) of this section omits all reference to price or sales commission provided such invoice otherwise adequately identifies the shipment. As an alternative in lieu of a copy of the commercial invoice, such person may send a copy of the bill of lading or air waybill containing the destination control statement.

(h) Requirements for the commercial invoice. No licensee, shipper, consignor, exporter, agent, or any other person may prepare or issue a commercial invoice for a shipment for which a destination control statement is required under the provisions of paragraph (a) of this section, unless all copies of the invoice(s) contain the statement in clearly legible form.

(i) Carrier's responsibility before releasing cargo. No carrier may release custody of a shipment covered by the provisions of this section to any party without surrender by that party, to the carrier, of a copy of the bill of lading or air waybill bearing on its face the applicable destination control statement, unless either:

(1) Simultaneously with the release, the carrier delivers to such party a written copy of the destination control statement, contained in the carrier's copy of the bill of lading or air waybill for the shipment. The written copy must identify the shipment by bill of lading or air waybill number, name of carrier, voyage or flight number, date, and port of arrival. The carrier must also secure either a signed receipted copy of the written statement or other equivalent written evidence that the statement has been delivered by the carrier; or,

(2) The regulations of the importing country require the carrier to deliver the items directly into the physical possession and control of customs or
other government agency for delivery to the consignee or the consignee’s agent. In this case, the carrier need not give to, or receive from, the customs or other government agency, or the consignee or the consignee’s agent, any document bearing the destination control statement.

§ 758.7 Authority of the Office of Export Enforcement, the Bureau of Export Administration, Customs offices and Postmasters in clearing shipments

(a) Actions to assure compliance with the EAR. Officials of BXA, the Office of Export Enforcement, the U.S. Customs Service and postmasters, including post office officials, are authorized and directed to take appropriate action to assure compliance with the EAR. This includes assuring that:

(1) Exports without a license issued by BXA are either outside the scope of the license requirements of the Export Administration Regulations or authorized by a License Exception; and

(2) Exports purporting to be authorized by licenses issued by BXA are, in fact, so authorized and the transaction complies with the terms of the license.

(b) Types of actions. The officials designated in paragraph (a) of this section are authorized to take the following types of actions:

(1) Inspection of items—(i) Purpose of inspection. All items declared for export are subject to inspection for the purpose of verifying the items specified in the SED, or if there is no SED, the bill of lading or other loading document covering the items about to be exported, and the value and quantity thereof, and to assure observance of the other provisions of the Export Administration Regulations. This authority applies to all exports within the scope of the Export Administration Act or Export Administration Regulations whether or not such exports require a license issued by BXA. The inspection may include, but is not limited to, item identification, technical appraisal (analysis), or both.

(ii) Place of inspection. Inspection shall be made at the place of lading or where officials authorized to make those inspections are stationed for that purpose.

(iii) Technical identification. Where, in the judgment of the official making the inspection, the item cannot be properly identified, a sample may be taken for more detailed examination or for laboratory analysis.

(A) Obtaining samples. The sample will be obtained by the official making the inspection in accordance with the provisions for sampling imported merchandise. The size of the sample will be the minimum representative amount necessary for identification or analysis. This will depend on such factors as the physical condition of the material (whether solid, liquid, or gas) and the size and shape of the container.

(B) Notification to exporter and consignee. When a sample is taken, the exporter (or the exporter’s agent) and the ultimate consignee will be notified by letter from one of the official designated in paragraph (a) of this section, showing the port of export, date of sampling, export license number (if any) or other authorization, invoice number, quantity of sample taken, description of item, marks and packing case numbers, and manufacturer’s number for the item. The original letter will be sent to the exporter or the exporter’s agent, the duplicate will be placed in the container that had been opened, and the triplicate will be retained by the inspecting office.

(C) Disposal of samples. Samples will be disposed of in accordance with the U.S. Customs Service procedure for imported commodities.

(2) Inspection of documents—(i) General. Officials designated in paragraph (a) of this section are authorized to require exporters or their agents, and owners and operators of exporting carriers or their agents, to produce for inspection or copying: invoices, orders, letters of credit, inspection reports, packing lists, shipping documents and instructions, correspondence, and any other relevant documents, as well as furnish other information bearing upon a particular shipment being exported or intended to be exported.

(ii) Cartridge and shell case scrap. When cartridge or shell cases are being exported as scrap (whether or not they
§ 758.8 Return or unloading of cargo at direction of BXA, the Office of Export Enforcement or Customs Service.

(a) Exporting carrier. As used in this section, the term “exporting carrier” includes a connecting or on-forwarding carrier, as well as the owner, charterer, agent, master, or any other person in charge of the vessel, aircraft, or other kind of carrier, whether such person is located in the United States or in a foreign country.
§ 758.9 Other applicable laws and regulations.

The provisions of this part 758 apply only to exports regulated by BXA. Nothing contained in this part 758 shall relieve any person from complying with any other law of the United States or rules and regulations issued thereunder, including those governing SEDs and manifests, or any applicable rules and regulations of the U.S. Customs Service.

§ 760.1 Definitions.

In this part, references to the EAR are references to 15 CFR chapter VII, subchapter C.

(a) Definition of Person. For purposes of this part, the term person means any
individual, or any association or organization, public or private, which is organized, permanently established, resident, or registered to do business, in the United States or any foreign country. This definition of person includes both the singular and plural and, in addition, includes:

1. Any partnership, corporation, company, branch, or other form of association or organization, whether organized for profit or non-profit purposes;
2. Any government, or any department, agency, or commission of any government;
3. Any trade association, chamber of commerce, or labor union;
4. Any charitable or fraternal organization; and
5. Any other association or organization not specifically listed in paragraphs (a)(1) through (4) of this section.

(b) Definition of “United States Person”:
1. This part applies to United States persons. For purposes of this part, the term United States person means any person who is a United States resident or national, including individuals, domestic concerns, and “controlled in fact” foreign subsidiaries, affiliates, or other permanent foreign establishments of domestic concerns. This definition of United States person includes both the singular and plural and, in addition, includes:
   i. The government of the United States or any department, agency, or commission thereof;
   ii. The government of any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, any territory or possession of the United States, or any subdivision, department, agency, or commission of any such government;
   iii. Any partnership, corporation, company, association, or other entity organized under the laws of paragraph (b)(1)(i) or (ii) of this section;
   iv. Any foreign concern’s subsidiary, partnership, affiliate, branch, office, or other permanent establishment in any state of the United States, the District of Columbia, the Commonwealth of Puerto Rico, or any territory or possession of the United States; and
   v. Any domestic concern’s foreign subsidiary, partnership, affiliate, branch, office, or other permanent foreign establishment which is controlled in fact by such domestic concern. (See paragraph (c) of this section on “Definition of ‘Controlled in Fact.’”)
2. The term domestic concern means any partnership, corporation, company, association, or other entity of, or organized under the laws of, any jurisdiction named in paragraph (b)(1)(i) or (ii) of this section, or any permanent domestic establishment of a foreign concern.
3. The term foreign concern means any partnership, corporation, company, association, or other entity of, or organized under the laws of, any jurisdiction other than those named in paragraph (b)(1)(i) or (ii) of this section.
4. The term United States person does not include an individual United States national who is resident outside the United States and who is either employed permanently or temporarily by a non-United States person or assigned to work as an employee for, and under the direction and control of, a non-United States person.

Examples of “United States Person”

The following examples are intended to give guidance in determining whether a person is a “United States person.” They are illustrative, not comprehensive.

1. U.S. bank A has a branch office in foreign country P. Such branch office is a United States person, because it is a permanent foreign establishment of a domestic concern.
2. Ten foreign nationals establish a manufacturing plant, A, in the United States, incorporating the plant under New York law. A is a United States person, because it is a corporation organized under the laws of one of the states of the United States.
3. A foreign corporation, opens an office in the United States for purposes of soliciting U.S. orders. The office is not separately incorporated. A’s U.S. office is a United States person, because it is a permanent establishment, in the United States, of a foreign concern.
4. A U.S. individual, owns stock in foreign corporation B. A is a United States person. However, A is not a “domestic concern,” because the term “domestic concern” does not include individuals.
(v) A, a foreign national resident in the United States, is employed by B, a foreign corporation.

A is a United States person, because he is resident in the United States.

(vi) A, a foreign national, who is resident in a foreign country and is employed by a foreign corporation, makes occasional visits to the United States, for purposes of exploring business opportunities.

A is not a United States person, because he is not a United States resident or national.

(vii) A is an association of U.S. firms organized under the laws of Pennsylvania for the purpose of expanding trade.

A is a United States person, because it is an association organized under the laws of one of the states of the United States.

(viii) At the request of country Y, A, an individual employed by U.S. company B, is transferred to company C as an employee. C is a foreign company owned and controlled by country Y, a U.S. national who will reside in Y, has agreed to the transfer provided he is able to retain his insurance, pension, and other benefits. Accordingly, company B has agreed to keep A as an employee in order to protect his employee benefits, and company C has agreed to pay for A’s salary. At all times while he works for C, A will be under C’s direction and control.

A is not a United States person while under C’s direction and control, because he will be resident outside the United States and assigned as an employee to a non-United States person. The arrangement designed to protect A’s insurance, pension, and other benefits does not destroy his status as an employee of C so long as he is under the direction and control of C.

(ix) A, a U.S. citizen, has resided in Europe for three years, where he is a self-employed consultant for United States and foreign companies in the communications industry.

A is a United States person, because he is a U.S. national and because he is not a resident outside the United States who is employed by other than a United States person.

(c) Definition of “Controlled in Fact”.

(1) This part applies to any domestic concern’s foreign subsidiary, partnership, affiliate, branch, office, or other permanent foreign establishment which is controlled in fact by such domestic concern. Control in fact consists of the authority or ability of a domestic concern to establish the general policies or to control day-to-day operations of its foreign subsidiary, partnership, affiliate, branch, office, or other permanent foreign establishment.

(2) A foreign subsidiary or affiliate of a domestic concern will be presumed to be controlled in fact by that domestic concern, subject to rebuttal by competent evidence, when:

(i) The domestic concern beneficially owns or controls (whether directly or indirectly) more than 50 percent of the outstanding voting securities of the foreign subsidiary or affiliate;

(ii) The domestic concern beneficially owns or controls (whether directly or indirectly) 25 percent or more of the voting securities of the foreign subsidiary or affiliate, if no other person owns or controls (whether directly or indirectly) an equal or larger percentage;

(iii) The foreign subsidiary or affiliate is operated by the domestic concern pursuant to the provisions of an exclusive management contract;

(iv) A majority of the members of the board of directors of the foreign subsidiary or affiliate are also members of the comparable governing body of the domestic concern;

(v) The domestic concern has authority to appoint the majority of the members of the board of directors of the foreign subsidiary or affiliate; or

(vi) The domestic concern has authority to appoint the chief operating officer of the foreign subsidiary or affiliate.

(3) A brokerage firm or other person which holds simple record ownership of securities for the convenience of clients will not be deemed to control the securities.

(4) A domestic concern which owns, directly or indirectly, securities that are immediately convertible at the option of the holder or owner into voting securities is presumed to own or control those voting securities.

(5) A domestic concern’s foreign branch office or other unincorporated permanent foreign establishment is deemed to be controlled in fact by such domestic concern under all circumstances.

EXCEPTIONS OF “CONTROLLED IN FACT”

The following examples are intended to give guidance in determining the circumstances in which a foreign subsidiary, affiliate, or other permanent foreign establishment of a domestic concern is “controlled in fact.” They are illustrative, not comprehensive.
(i) Company A is incorporated in a foreign country. Fifty-one percent of the voting stock of A is owned by U.S. company B. A is presumed to be controlled in fact by B. This presumption may be rebutted by competent evidence showing that control does not, in fact, lie with B.

(ii) Company A is incorporated in a foreign country. Ten percent of the voting stock of A is owned by U.S. company B. A has an exclusive management contract with B pursuant to which A is operated by B. As long as such contract is in effect, A is presumed to be controlled in fact by B. This presumption may be rebutted by competent evidence showing that control does not, in fact, lie with B.

(iii) Company A is incorporated in a foreign country. Ten percent of the voting stock of A is owned by U.S. company B. A has 10 persons on its board of directors. Six of those persons are also members of the board of directors of U.S. company B. A is presumed to be controlled in fact by B. This presumption may be rebutted by competent evidence showing that control does not, in fact, lie with B.

(iv) Company A is incorporated in a foreign country. Thirty percent of the voting securities of A is owned by U.S. company B and no other person owns or controls an equal or larger share. A is presumed to be controlled in fact by B. This presumption may be rebutted by competent evidence showing that control does not, in fact, lie with B.

(v) Company A is incorporated in a foreign country. In A’s articles of incorporation, U.S. company B has been given authority to appoint A’s board of directors. A is presumed to be controlled in fact by B. This presumption may be rebutted by competent evidence showing that control does not, in fact, lie with B.

(vi) Company A is a joint venture established in a foreign country, with equal participation by U.S. company B and foreign company C. U.S. Company B has authority to appoint A’s chief operating officer. A is presumed to be controlled in fact by B. This presumption may be rebutted by competent evidence showing that control does not, in fact, lie with B.

(vii) Same as (vi), except that B has no authority to appoint A’s chief operating officer. B is not presumed to control A, absent other facts giving rise to a presumption of control.

(viii) Company A is incorporated in a foreign country. U.S. companies B, C, and D each own 20 percent of A’s voting securities and regularly cast their votes in concert. A is presumed to be controlled in fact by B, C, and D, because these companies are acting in concert to control A.

(ix) U.S. bank B located in the United States has a branch office, A, in a foreign country. A is not separately incorporated. A is deemed to be controlled in fact by B, because A is a branch office of a domestic concern.

(x) Company A is incorporated in a foreign country. Fifty-one percent of the voting stock of A is owned by company B, which is incorporated in another foreign country. Fifty-one percent of the voting stock of B is owned by C, a U.S. company.

Both A and B are presumed to be controlled in fact by C. The presumption of C’s control over B may be rebutted by competent evidence showing that control over B does not, in fact, lie with C. The presumption of B’s control over A (and thus C’s control over A) may be rebutted by competent evidence showing that control over A does not, in fact, lie with B.

(xi) B, a U.S. individual, owns 51 percent of the voting securities of A, a manufacturing company incorporated and located in a foreign country.

A is not “controlled in fact” under this part, because it is not controlled by a “domestic concern.”

(d) Definition of “Activities in the Interstate or Foreign Commerce of the United States”. Activities involving United States persons located in the United States.

(1) For purposes of this part, the activities of a United States person located in the United States are in the interstate or foreign commerce of the United States if they involve the sale, purchase, or transfer of goods or services (including information) between:

(i) Two or more of the several States (including the District of Columbia); or

(ii) Any State (including the District of Columbia) and any territory or possession of the United States; or

(iii) Two or more of the territories or possessions of the United States; or

(iv) A State (including the District of Columbia), territory or possession of the United States and any foreign country.

(2) For purposes of this part, the export of goods or services from the United States and the import of goods or services into the United States are activities in United States commerce. In addition, the action of a domestic concern in specifically directing the
activities of its controlled in fact foreign subsidiary, affiliate, or other permanent foreign establishment is an activity in United States commerce.

(3) Activities of a United States person located in the United States may be in United States commerce even if they are part of or ancillary to activities outside United States commerce. However, the fact that an ancillary activity is in United States commerce does not, in and of itself, mean that the underlying or related activity is in United States commerce.

(4) Hence, the action of a United States bank located in the United States in providing financing from the United States for a foreign transaction that is not in United States commerce is nonetheless itself in United States commerce. However, the fact that the financing is in United States commerce does not, in and of itself, make the underlying foreign transaction an activity in United States commerce, even if the underlying transaction involves a foreign company that is a United States person within the meaning of this part.

(5) Similarly, the action of a United States person located in the United States in providing financial, accounting, legal, transportation, or other ancillary services to its controlled in fact foreign subsidiary, affiliate, or other permanent foreign establishment in connection with a foreign transaction is in United States commerce. But the provision of such ancillary services will not, in and of itself, bring the foreign transaction of such subsidiary, affiliate, or permanent foreign establishment into United States commerce.

ACTIVITIES OF CONTROLLED IN FACT FOREIGN SUBSIDIARIES, AFFILIATES, AND OTHER PERMANENT FOREIGN ESTABLISHMENTS

(6) Any transaction between a controlled in fact foreign subsidiary, affiliate, or other permanent foreign establishment of a domestic concern and a person located outside the United States is an activity in United States commerce.

(7) Whether a transaction between such a foreign subsidiary, affiliate, or other permanent foreign establishment and a person located outside the United States is an activity in United States commerce is governed by the following rules.

ACTIVITIES IN UNITED STATES COMMERCE

(8) A transaction between a domestic concern’s controlled in fact foreign subsidiary, affiliate, or other permanent foreign establishment and a person outside the United States, involving goods or services (including information but not including ancillary services) acquired from a person in the United States is in United States commerce under any of the following circumstances—

(i) If the goods or services were acquired for the purpose of filling an order from a person outside the United States;

(ii) If the goods or services were acquired for incorporation into, refining into, reprocessing into, or manufacture of another product for the purpose of filling an order from a person outside the United States;

(iii) If the goods or services were acquired for the purpose of fulfilling or engaging in any other transaction with a person outside the United States;

(iv) If the goods were acquired and are ultimately used, without substantial alteration or modification, in filling an order from, or fulfilling or engaging in any other transaction with, a person outside the United States (whether or not the goods were originally acquired for that purpose). If the goods are indistinguishable as to origin from similar foreign-trade goods with which they have been mingled in a stockpile or inventory, the subsequent transaction involving the goods is presumed to be in United States commerce unless, at the time of filling the order, the foreign-origin inventory on hand was sufficient to fill the order.

(9) For purposes of this section, goods or services are considered to be acquired for the purpose of filling an order from or engaging in any other transaction with a person outside the United States where:

(i) They are purchased by the foreign subsidiary, affiliate, or other permanent foreign establishment upon the receipt of an order from or on behalf of a customer with the intention that the

460
goods or services are to go to the customer;
(ii) They are purchased by the foreign subsidiary, affiliate, or other permanent foreign establishment to meet the needs of specified customers pursuant to understandings with those customers, although not for immediate delivery; or
(iii) They are purchased by the foreign subsidiary, affiliate, or other permanent foreign establishment based on the anticipated needs of specified customers.

(10) If any non-ancillary part of a transaction between a domestic concern’s controlled foreign subsidiary, affiliate, or other permanent foreign establishment and a person outside the United States is in United States commerce, the entire transaction is in United States commerce. For example, if such a foreign subsidiary is engaged in filling an order from a non-United States customer both with goods acquired from the United States and with goods acquired elsewhere, the entire transaction with that customer is in United States commerce.

**Activities Outside United States Commerce**

(11) A transaction between a domestic concern’s controlled foreign subsidiary, affiliate, or other permanent foreign establishment and a person outside the United States, not involving the purchase, sale, or transfer of goods or services (including information) to or from a person in the United States, is not an activity in United States commerce.

(12) The activities of a domestic concern’s controlled foreign subsidiary, affiliate, or other permanent foreign establishment with respect to goods acquired from a person in the United States are not in United States commerce where:
(i) They were acquired without reference to a specific order from or transaction with a person outside the United States; and
(ii) They were further manufactured, incorporated into, refined into, or reprocessed into another product.

(13) The activities of a domestic concern’s controlled foreign subsidiary, affiliate, or other permanent foreign establishment with respect to services acquired from a person in the United States are not in United States commerce where:
(i) They were acquired without reference to a specific order from or transaction with a person outside the United States; or
(ii) They are ancillary to the transaction with the person outside the United States.

(14) For purposes of this section, services are ancillary services if they are provided to a controlled foreign subsidiary, affiliate, or other permanent foreign establishment primarily for its own use rather than for the use of a third person. These typically include financial, accounting, legal, transportation, and other services, whether provided by a domestic concern or an unrelated entity.

(15) Thus, the provision of the project financing by a United States bank located in the United States to a controlled foreign subsidiary unrelated to the bank is an ancillary service which will not cause the underlying transaction to be in United States commerce. By contrast, where a domestic concern, on behalf of its controlled foreign subsidiary, gives a guaranty of performance to a foreign country customer, that is a service provided to the customer and, as such, brings that subsidiary’s transaction with the customer into United States commerce. Similarly, architectural or engineering services provided by a domestic concern in connection with its controlled foreign subsidiary’s construction project in a third country are services passed through to the subsidiary’s customer and, as such, bring the subsidiary’s foreign transaction into United States commerce.

**General**

(16) Regardless of whether the subsequent disposition of goods or services from the United States is in United States commerce, the original acquisition of goods or services from a person in the United States is an activity in United States commerce subject to this part. Thus, if a domestic concern’s controlled foreign subsidiary engages in a prohibited refusal to do business in stocking its inventory with goods from
the United States, that action is subject to this part whether or not subsequent sales from that inventory are.

(17) In all the above, goods and services will be considered to have been acquired from a person in the United States whether they were acquired directly or indirectly through a third party, where the person acquiring the goods or services knows or expects, at the time he places the order, that they will be delivered from the United States.

LETTERS OF CREDIT

(18) Implementation of a letter of credit in the United States by a United States person located in the United States, including a permanent United States establishment of a foreign concern, is an activity in United States commerce.

(19) Implementation of a letter of credit outside the United States by a United States person located outside the United States is in United States commerce where the letter of credit (a) specifies a United States address for the beneficiary, (b) calls for documents indicating shipment from the United States, or (c) calls for documents indicating that the goods are of United States origin.

(20) See §760.2(f) of this part on “Letters of Credit” to determine the circumstances in which paying, honoring, confirming, or otherwise implementing a letter of credit is covered by this part.

EXAMPLES OF ACTIVITIES IN THE INTERSTATE OR FOREIGN COMMERCE OF THE UNITED STATES

The following examples are intended to give guidance in determining the circumstances in which an activity is in the interstate or foreign commerce of the United States. They are illustrative, not comprehensive.

UNITED STATES PERSON LOCATED IN THE UNITED STATES

(i) U.S. company A exports goods from the United States to a foreign country. A's activity is in U.S. commerce, because A is exporting goods from the United States.

(ii) U.S. company A imports goods into the United States from a foreign country. A's activity is in U.S. commerce, because A is importing goods into the United States.

(iii) U.S. engineering company A supplies consulting services to its controlled foreign subsidiary. B. A's activity is in U.S. commerce, because A is exporting services from the United States.

(iv) U.S. company A supplies consulting services to foreign company B. B is unrelated to A or any other U.S. person. A's activity is in U.S. commerce even though B, a foreign-owned company located outside the United States, is not subject to this part, because A is exporting services from the United States.

(v) Same as (iv), except A is a bank located in the United States and provides a construction loan to B. A's activity is in U.S. commerce even though B is not subject to this part, because A is exporting financial services from the United States.

FOREIGN SUBSIDIARIES, AFFILIATES, AND OTHER PERMANENT FOREIGN ESTABLISHMENTS OF DOMESTIC CONCERNS

(i) A, a controlled foreign subsidiary of U.S. company B, purchases goods from the United States. A's purchase of goods from the United States is in U.S. commerce, because A is importing goods from the United States. Whether A's subsequent disposition of these goods is in U.S. commerce is irrelevant. Similarly, the fact that A purchased goods from the United States does not, in and of itself, make any subsequent disposition of those goods an activity in U.S. commerce.

(ii) A, a controlled foreign subsidiary of U.S. company B, receives an order from boycotting country Y for construction materials. A places an order with U.S. company B for the materials. A's transaction with Y is an activity in U.S. commerce, because the materials are purchased from the United States for the purpose of filling the order from Y.

(iii) A, a controlled foreign subsidiary of U.S. company B, receives an order from boycotting country Y for construction materials. A places an order with U.S. company C for some of the materials, and with U.S. company C, an unrelated company, for the rest of the materials. A's transaction with Y is an activity in U.S. commerce, because the materials are purchased from the United States for the purpose of filling the order from Y. It makes no difference whether the materials are ordered from B or C.

(iv) A, a controlled foreign subsidiary of U.S. company B, is in the wholesale and retail appliance sales business. A purchases finished air conditioning units from the
United States from time to time in order to stock its inventory. A's inventory is also stocked with air conditioning units purchased outside the United States. A receives an order from Y, a boycotting country. The order is filled with U.S.-origin units from A's inventory.

A's transaction with Y is in U.S. commerce, because its U.S.-origin goods are resold without substantial alteration.

(v) Same as (iv), except that A is in the chemicals distribution business. Its U.S.-origin goods are mingled in inventory with foreign-origin goods.

A's sale to Y of unaltered goods from its general inventory is presumed to be in U.S. commerce unless A can show that at the time of the sale the foreign-origin inventory on hand was sufficient to cover the shipment to Y.

(vi) A, a foreign subsidiary of U.S. company B, receives an order from boycotting country Y for computers. A places an order with U.S. company C, an unrelated company, for some of the components; with U.S. company C, an unrelated company, for other components; and with foreign company D for the rest of the components. A then assembles the computers and ships them to Y.

A's transaction with Y is an activity in U.S. commerce, because some of the components are acquired from the United States for purposes of filling an order from Y.

(vii) Same as (vi), except A purchases all the components from non-U.S. sources.

A's transaction with Y is not an activity in U.S. commerce, because it involves no export of goods from the United States. It makes no difference whether the technology A uses to manufacture computers was originally acquired from its U.S. parent.

(viii) A, a controlled foreign subsidiary of U.S. company B, manufactures computers. A stocks its general inventory with purchases made at times from the United States and at times from foreign sources. A receives an order from Y, a boycotting country, for computers. A fills that order by manufacturing the computers using materials from its general inventory.

A's transaction with Y is not in U.S. commerce, because the U.S.-origin components are not acquired for the purpose of meeting the anticipated needs of specified customers in Y. It is irrelevant that A's operations may be based on U.S.-origin technology.

(ix) Same as (viii), except that in anticipation of the order from Y, A orders and receives the necessary materials from the United States.

A's transaction with Y is in U.S. commerce, because the U.S.-origin goods were acquired for the purpose of filling an anticipated order from Y.

(x) A, a controlled foreign subsidiary of U.S. company B, manufactures typewriters. It buys typewriter components both from the United States and from foreign sources. A sells its output in various places throughout the world, including boycotting country Y. Its sales to Y vary from year to year, but have averaged approximately 20 percent of sales for the past five years. A expects that its sales to Y will remain at approximately that level in the years ahead although it has no contracts or orders from Y on hand.

A's sales of typewriters to Y are not in U.S. commerce, because the U.S. components are not acquired for the purpose of filling an order from Y. A general expectancy of future sales is not an "order" within the meaning of this section.

(xi) U.S. company A's corporate counsel provides legal advice to B, its controlled foreign subsidiary, on the applicability of this Part to B's transactions.

While provision of this legal advice is itself an activity in U.S. commerce, it does not, in and of itself, bring B's activities into U.S. commerce.

(xii) A, a controlled foreign subsidiary of U.S. company B, is in the general construction business. A enters into a contract with boycotting country Y to construct a power plant in Y. In preparing engineering drawings and specifications, A uses the advice and assistance of B.

A's transaction with Y is in U.S. commerce, because B's services are used for purposes of fulfilling the contract with Y. B's services are not ancillary services, because the engineering services in connection with construction of the power plant are part of the services ultimately provided to Y by A.

(xiii) Same as (xii), except that A gets no engineering advice or assistance from B. However, B's corporate counsel provides legal advice to A regarding the structure of the transaction. In addition, B's corporate counsel draws up the contract documents.

A's transaction with Y is not in U.S. commerce. The legal services provided to A are ancillary services, because they are not part of the services provided to Y by A in fulfillment of its contract with Y.

(xiv) A, a controlled foreign subsidiary of U.S. company B, enters into a contract to construct an apartment complex in boycotting country Y. A will fulfill its contract completely with goods and services from outside the United States. Pursuant to a provision in the contract, B guarantees A's performance of the contract.

A's transaction with Y is in U.S. commerce, because B's guaranty of A's performance involves the acquisition of services from the United States for purposes of fulfilling the transaction with Y, and those services are part of the services ultimately provided to Y.

(xv) Same as (xiv), except that the guaranty of A's performance is supplied by C, a non-U.S. person located outside the United States. However, unrelated to any particular
§ 760.1  15 CFR Ch. VII (1–1–00 Edition)

transaction, B from time to time provides general financial, legal, and technical services to A.

A's transaction with Y is not in U.S. commerce, because the services acquired from the United States are not acquired for purposes of fulfilling the contract with Y.

(xvi) A, a foreign subsidiary of U.S. company B, has a contract with boycotting country Y to conduct oil drilling operations in that country. In conducting these operations, A from time to time seeks certain technical advice from B regarding the operation of the drilling rigs.

A's contract with Y is in U.S. commerce, because B's services are sought for purposes of fulfilling the contract with Y and are part of the services ultimately provided to Y.

(xvii) A, a controlled foreign subsidiary of U.S. company B, enters into a contract to sell typewriters to boycotting country Y. A is located in non-boycotting country P. None of the components are acquired from the United States. A engages C, a U.S. shipping company, to transport the typewriters from P to Y.

A's sales to Y are not in U.S. commerce, because in carrying A's goods, C is furnishing an ancillary service to A and not a service to Y.

(xviii) Same as (xvii), except that A's contract with Y calls for title to pass to Y in P. In addition, the contract calls for A to engage a carrier to make delivery to Y.

A's sales to Y are in U.S. commerce, because in carrying Y's goods, C is providing a service to A which is ultimately provided to Y.

(xix) A, a controlled foreign subsidiary of U.S. company B, has general product liability insurance with U.S. company C. Foreign-origin goods sold from time to time by A to boycotting country Y are covered by the insurance policy.

A's sales to Y are not in U.S. commerce, because the insurance provided by C is an ancillary service provided to A which is ultimately provided to Y.

(xx) A, a controlled foreign subsidiary of U.S. company B, manufactures automobiles abroad under a license agreement with B. From time to time, A sells such goods to boycotting country Y.

A's sales to Y are not in U.S. commerce, because the rights conveyed by the license are not acquired for the specific purpose of engaging in transactions with Y.

(e) "Intent". (1) This part prohibits a United States person from taking or knowingly agreeing to take certain specified actions with intent to comply with, further, or support an unsanctioned foreign boycott.

(2) A United States person has the intent to comply with, further, or support an unsanctioned foreign boycott when such a boycott is at least one of the reasons for that person's decision whether to take a particular prohibited action. So long as that is at least one of the reasons for that person's action, a violation occurs regardless of whether the prohibited action is also taken for non-boycott reasons. Stated differently, the fact that such action was taken for legitimate business reasons does not remove that action from the scope of this part if compliance with an unsanctioned foreign boycott was also a reason for the action.

(3) Intent is a necessary element of any violation of this part. It is not sufficient that one take action that is specifically prohibited by this part. It is essential that one take such action with intent to comply with, further, or support an unsanctioned foreign boycott. Accordingly, a person who inadvertently, without boycott intent, takes a prohibited action, does not commit any violation of this part.

(4) Intent in this context means the reason or purpose for one's behavior. It does not mean that one has to agree with the boycott in question or desire that it succeed or that it be furthered or supported. But it does mean that the reason why a particular prohibited action was taken must be established.

(5) Reason or purpose can be proved by circumstantial evidence. For example, if a person receives a request to supply certain boycott information, the furnishing of which is prohibited by this part, and he knowingly supplies that information in response, he clearly intends to comply with that boycott request. It is irrelevant that he may disagree with or object to the boycott itself. Information will be deemed to be furnished with the requisite intent if the person furnishing the information knows that it was sought for boycott purposes. On the other hand, if a person refuses to do business with someone who happens to be blacklisted, but the reason is because that person produces an inferior product, the requisite intent does not exist.

(6) Actions will be deemed to be taken with intent to comply with an unsanctioned foreign boycott if the person taking such action knew that such action was required or requested...
for boycott reasons. On the other hand, the mere absence of a business relationship with a blacklisted person or with or in a boycotted country does not indicate the existence of the requisite intent.

(7) In seeking to determine whether the requisite intent exists, all available evidence will be examined.

**Examples of “Intent”**

The following examples are intended to illustrate the factors which will be considered in determining whether the required intent exists. They are illustrative, not comprehensive.

(i) U.S. person A does business in boycotting country Y. In selecting firms to supply goods for shipment to Y, A chooses supplier B because B’s products are less expensive and of higher quality than the comparable products of supplier C. A knows that C is blacklisted, but that is not a reason for A’s selection of B. A’s choice of B rather than C is not action with intent to comply with Y’s boycott, because C’s blacklist status is not a reason for A’s action.

(ii) Same as (i), except that A chooses B rather than C in part because C is blacklisted by Y. Since C’s blacklist status is a reason for A’s choice, A’s action is taken with intent to comply with Y’s boycott.

(iii) U.S. person A bids on a tender issued by boycotting country Y. A inadvertently fails to notice a prohibited certification which appears in the tender document. A’s bid is accepted.

A’s action in bidding was not taken with intent to comply with Y’s boycott, because the boycott was not a reason for A’s action.

(iv) U.S. bank A engages in letter of credit transactions, in favor of U.S. beneficiaries, involving the shipments of U.S. goods to boycotting country Y. As A knows, such letters of credit routinely contain conditions requiring prohibited certifications. A fails to take reasonable steps to prevent the implementation of such letters of credit. A receives for implementation a letter of credit which in fact contains a prohibited condition but does not examine the letter of credit to determine whether it contains such a condition.

Although Y’s boycott may not be a specific reason for A’s action in implementing the letter of credit with a prohibited condition, all available evidence shows that A’s action was taken with intent to comply with the boycott, because A knows or should know that its procedures result in compliance with the boycott.

(v) U.S. bank A engages in letter of credit transactions, in favor of U.S. beneficiaries, involving the shipment of U.S. goods to boycotting country Y. As A knows, the documentation accompanying such letters of credit sometimes contains prohibited certifications. In accordance with standard banking practices applicable to A, it does not examine such accompanying documentation. A receives a letter of credit in favor of a U.S. beneficiary, The letter of credit contains no prohibited conditions. However, the accompanying documentation, which A does not examine, does contain such a condition.

All available evidence shows that A’s action in implementing the letter of credit was not taken with intent to comply with the boycott, because A has no affirmative obligation to go beyond applicable standard banking practices in implementing letters of credit.

(vi) A, a U.S. company, is considering opening a manufacturing facility in boycotting country Y. A already has such a facility in boycotting country Y. After exploring the possibilities in X, A concludes that the market does not justify the move. A is aware that if it did open a plant in X, Y might object because of Y’s boycott of X. However, Y’s possible objection is not a reason for A’s decision not to open a plant in X.

A’s decision not to proceed with the plant in X is not action with intent to comply with Y’s boycott, because Y’s boycott of X is not a reason for A’s decision.

(vii) Same as (vi), except that after exploring the business possibilities in X, A concludes that the market does justify the move to X. However, A does not open the plant because of Y’s possible objections due to Y’s boycott of X.

A’s decision not to proceed with the plant in X is action taken with intent to comply with Y’s boycott, because Y’s boycott is a reason for A’s decision.

(viii) A, a U.S. chemical manufacturer, receives a “boycott questionnaire” from boycotting country Y asking, among other things, whether A has any plants located in boycotted country X. A, which has never supported Y’s boycott of X, responds to Y’s questionnaire, indicating affirmatively that it does have plants in X and that it intends to continue to have plants in X.

A’s responding to Y’s questionnaire is deemed to be action with intent to comply with Y’s boycott because A knows that the questionnaire is boycott-related. It is irrelevant that A does not also wish to support Y’s boycott.

(ix) U.S. company A is on boycotting country Y’s blacklist. In an attempt to secure its removal from the blacklist, A wishes to supply to Y information which demonstrates that A does at least as much business in Y and other countries engaged in a boycott of X as it does in X. A intends to continue its business in X undiminished and in fact is exploring and intends to continue exploring an
expansion of its activities in X without regard to Y's boycott.

A may furnish the information, because in doing so it has no intent to comply with, further, or support Y's boycott.

(x) U.S. company A has a manufacturing facility in boycotted country X. A receives an invitation to bid on a construction project in boycotting country Y. The invitation states that all bidders must complete a boycott questionnaire and send it in with the bid. The questionnaire asks for information about A's business relationships with X. Regardless of whether A's bid is successful, A intends to continue its business in X undiminished and in fact is exploring and intends to continue exploring an expansion of its activities in X without regard to Y's boycott.

A may not answer the questionnaire, because, despite A's intentions with regard to its business operations in X, Y's request for completion of the questionnaire is for boycott purposes and by responding, A's action would be taken with intent to comply with Y's boycott.

(Note: Example (ix) is distinguishable from (x), because in (ix) A is not responding to any boycott request or requirement. Instead, on its own initiative, it is supplying information to demonstrate non-discriminatory conduct as between X and Y without any intent to comply with, further, or support Y's boycott.)

§ 760.2 Prohibitions.

(a) Refusals to do business.

Prohibition Against Refusals To Do Business

(1) No United States person may: refuse, knowingly agree to refuse, require any other person to refuse, or knowingly agree to require any other person to refuse, to do business with or in a boycotted country, with any business concern organized under the laws of a boycotted country, with any national or resident of a boycotted country, or with any other person, when such refusal is pursuant to an agreement with the boycotting country, or a requirement of the boycotting country, or a request from or on behalf of the boycotting country.

(2) Generally, a refusal to do business under this section consists of action that excludes a person or country from a transaction for boycott reasons. This includes a situation in which a United States person chooses or selects one person over another on a boycott basis or takes action to carry out another person's boycott-based selection when he knows or has reason to know that the other person's selection is boycott-based.

(3) Refusals to do business which are prohibited by this section include not only specific refusals, but also refusals implied by a course or pattern of conduct. There need not be a specific offer and refusal to constitute a refusal to do business; a refusal may occur when a United States person has a financial or commercial opportunity and declines for boycott reasons to consider or accept it.

(4) A United States person's use of either a boycott-based list of persons with whom he will not deal (a so-called "blacklist") or a boycott-based list of persons with whom he will deal (a so-called "whitelist") constitutes a refusal to do business.

(5) An agreement by a United States person to comply generally with the laws of the boycotting country with which it is doing business or an agreement that local laws of the boycotting country shall apply or govern is not, in and of itself, a refusal to do business. Nor, in and of itself, is use of a contractual clause explicitly requiring a person to assume the risk of loss of non-delivery of his products a refusal to do business with any person who will not or cannot comply with such a clause. (But see § 760.4 of this part on “Evasion.”)

(6) If, for boycott reasons, a United States general manager chooses one supplier over another, or enters into a contract with one supplier over another, or advises its client to do so, then the general manager's actions constitute a refusal to do business under this section. However, it is not a refusal to do business under this section for a United States person to provide management, procurement, or other pre-award services for another person so long as the provision of such pre-award services is customary for that firm (or industry of which the firm is a part), without regard to the boycotting or non-boycotting character of the countries in which they are performed, and the United States person, in providing such services, does not act to exclude a person or country.
from the transaction for boycott reasons, or otherwise take actions that are boycott-based. For example, a United States person under contract to provide general management services in connection with a construction project in a boycotting country may compile lists of qualified bidders for the client if that service is a customary one and if persons who are qualified are not excluded from that list because they are blacklisted.

(7) With respect to post-award services, if a client makes a boycott-based selection, actions taken by the United States general manager or contractor to carry out the client's choice are themselves refusals to do business if the United States contractor knows or has reason to know that the client's choice was boycott-based. (It is irrelevant whether the United States contractor also provided pre-award services.) Such actions include entering into a contract with the selected supplier, notifying the supplier of the client's choice, executing a contract on behalf of the client, arranging for inspection and shipment of the supplier's goods, or taking any other action to effect the client's choice. (But see §760.3(c) of this part on "Compliance with Unilateral Selection" as it may apply to post-award services.)

(8) An agreement is not a prerequisite to a violation of this section since the prohibition extends to actions taken pursuant not only to agreements but also to requirements of, and requests from or on behalf of, a boycotting country.

(9) Agreements under this section may be either express or implied by a course or pattern of conduct. There need not be a direct request from a boycotting country for action by a United States person to have been taken pursuant to an agreement with a boycotting country.

(10) This prohibition, like all others, applies only with respect to a United States person's activities in the interstate or foreign commerce of the United States and only when such activities are undertaken with intent to comply with, further, or support an unsanctioned foreign boycott. The mere absence of a business relationship with or in the boycotted country, with any business concern organized under the laws of the boycotted country, with national(s) or resident(s) of the boycotted country, or with any other person does not indicate the existence of the required intent.

**Examples of Refusals and Agreements To Refuse To Do Business**

The following examples are intended to give guidance in determining the circumstances in which, in a boycott situation, a refusal to do business or an agreement to refuse to do business is prohibited. They are illustrative, not comprehensive.

**Refusals To Do Business**

(i) A, a U.S. manufacturer, receives an order for its products from boycotting country Y. To fill that order, A solicits bids from U.S. companies B and C, manufacturers of components used in A's products. A does not, however, solicit bids from U.S. companies D or E, which also manufacture such components, because it knows that D and E are restricted from doing business in Y and that their products are, therefore, not importable into that country.

Company A may not refuse to solicit bids from D and E for boycott reasons, because to do so would constitute a refusal to do business with those persons.

(ii) A, a U.S. exporter, uses company B, a U.S. insurer, to insure the shipment of its goods to all its overseas customers. For the first time, A receives an order for its products from a boycotting country Y. Knowing that B is on the blacklist of Y, A arranges with company C, a non-blacklisted U.S. insurer, to insure the shipment of its goods to Y.

A's action constitutes a refusal to do business with B.

(iii) A, a U.S. exporter, purchases all its liability insurance from company B, a U.S. company that does business in boycotted country X. A wishes to expand its operations into country Y, the boycotting country. Before doing so, A decides to switch from insurer B to insurer C in anticipation of a request from Y that A sever its relations with B as a condition of doing business in Y.

A may not switch insurers for this reason, because doing so would constitute a refusal to do business with B.

(iv) U.S. company A exports goods to boycotting country Y. In selecting vessels to transport the goods to Y, A chooses only from among carriers which call at ports in Y. A's action is not a refusal to do business with carriers which do not call at ports in Y.

(v) A, a U.S. bank with a branch office in boycotting country Y, sends representatives to boycotted country X to discuss plans for
opening a branch office in X. Upon learning of these discussions, an official of the local boycotter advises A's local branch manager that if A opens an office in X it will no longer be allowed to do business in Y. As a result of this notification, A decides to abandon its plans to open a branch in X.

Bank A may not abandon its plans to open a branch in X as a result of Y's notification, because doing so would constitute a refusal to do business in boycotting country X.

(iv) A, a U.S. company that manufactures office equipment, has been restricted from doing business in boycotting country Y because of its business dealings with boycotted country X. In an effort to have itself removed from Y's blacklist, A ceases its business in X.

A's action constitutes a refusal to do business in boycotted country X.

(vii) A, a U.S. computer company, does business in boycotting country Y. A decides to explore business opportunities in boycotted country X. After careful analysis of possible business opportunities in X, A decides, solely for business reasons, not to market its products in X.

A's decision not to proceed is not a refusal to do business, because it is not based on boycott considerations. A has no affirmative obligation to do business in X.

(viii) A, a U.S. oil company with operations in boycotting country Y, has regularly purchased equipment from U.S. petroleum equipment suppliers B, C, and D, none of whom is on the blacklist of Y. Because of its satisfactory relationship with B, C, and D, A has not dealt with other suppliers, including supplier E, who is blacklisted by Y.

A's failure affirmatively to seek or secure business with blacklisted supplier E is not a refusal to do business with E.

(ix) Same as (viii), except U.S. petroleum equipment supplier E, a company on boycotting country Y's blacklist, offers to supply U.S. oil company A with goods comparable to those provided by U.S. suppliers B, C, and D. A, because it has satisfactorily established relationships with suppliers B, C, and D, does not accept supplier E's offer.

A's refusal of supplier E's offer is not a refusal to do business, because it is based solely on non-boycott considerations. A has no affirmative obligation to do business with E.

(x) A, a U.S. construction company, enters into a contract to build an office complex in boycotting country Y. A receives bids from B and C, U.S. companies that are equally qualified suppliers of electrical cable for the project. A knows that B is blacklisted by Y and that C is not. A accepts C's bid, in part because C is as qualified as the other potential supplier and in part because C is not blacklisted.

A's decision to select supplier C instead of blacklisted supplier B is a refusal to do business, because the boycott was one of the reasons for A's decision.

(xi) A, a U.S. general contractor, has been retained to construct a highway in boycotting country Y. A circulates an invitation to bid to U.S. manufacturers of road-building equipment. One of the conditions listed in the invitation to bid is that, in order for A to obtain prompt service, suppliers will be required to maintain a supply of spare parts and a service facility in Y. A includes this condition solely for commercial reasons unrelated to the boycott. Because of this condition, however, those suppliers on Y's blacklist do not bid, since they would be unable to satisfy the parts and services requirements.

A's action is not a refusal to do business, because the contractual condition was included solely for legitimate business reasons and was not boycott-based.

(xii) Company A, a U.S. oil company, purchases drill bits from U.S. suppliers for export to boycotting country Y. In its purchase orders, A includes a provision requiring the supplier to make delivery in Y and providing that title to the goods does not pass until delivery has been made. A is customary under such an arrangement, the supplier bears all risks of loss, including loss from fire, theft, perils of the sea, and inability to clear customs, until title passes.

Insistence on such an arrangement does not constitute a refusal to do business, because this requirement is imposed on all suppliers whether they are blacklisted or not. (But see § 760.4 of this part on "Evasion").

(xiii) A, a U.S. engineering and construction company, contracts with a government agency in boycotting country Y to perform a variety of services in connection with the construction of a large industrial facility in Y. Pursuant to this contract, A analyzes the market of prospective suppliers, compiles a suggested bidders list, analyzes the bids received, and makes recommendations to the client. The client independently selects and awards the contract to supplier C for boycott reasons. All of A's services are performed without regard to Y's blacklist or any other boycott considerations, and are the type of services A provides clients in both boycotting and non-boycotting countries.

A's actions do not constitute a refusal to do business, because, in the provision of preaward services, A has not excluded the other bidders and because A customarily provides such services to its clients.

(xiv) Same as (xiii), except that in compiling a list of prospective suppliers, A deletes suppliers he knows his client will refuse to select because they are blacklisted. A knows that including the names of blacklisted suppliers will neither enhance their chances of being selected nor provide his client with a useful service, the function for which he has been retained.
A's actions, which amount to furnishing a so-called “whitelist”, constitute refusals to do business, because A's pre-award services have not been furnished without regard to boycott considerations.

(xv) A, a U.S. construction firm, provides its boycotting country client with a permissible list of prospective suppliers, B, C, D, and E. The client independently selects and awards the contract to C, for boycott reasons, and then requests A to advise C of his selection, negotiate the contract with C, arrange for the shipment, and inspect the goods upon arrival. A knows that C was chosen by the client for boycott reasons.

A's action in complying with his client's direction is a refusal to do business, because A's post-award actions carry out his client's boycott-based decision. (Note: Whether A's action comes within the unilateral selection exception depends upon factors discussed in §760.3(d) of this part).

(xvi) Same as (xv), except that A is building the project on a turnkey basis and will retain title until completion. The client instructs A to contract only with C.

A's action in contracting with C constitutes a refusal to do business, because it is an action that excludes blacklisted persons from the transaction for boycott reasons. (Note: Whether A's action comes within the unilateral selection exception depends upon factors discussed in §760.3(d) of this part).

(xvii) A, a U.S. exporter of machine tools, receives an order for drill presses from boycotting country Y. The cover letter from Y's procurement official states that A was selected over other U.S. manufacturers in part because A is not on Y's blacklist.

A's action in filling this order is not a refusal to do business, because A has not excluded anyone from the transaction.

(xviii) A, a U.S. engineering firm under contract to construct a dam in boycotting country Y, compiles, on a non-boycott basis, a list of potential heavy equipment suppliers, including information on their qualifications and prior experience. A then solicits bids from the top three firms on its list-B, C, and D-because they are the best qualified.

None of them happens to be blacklisted. A does not solicit bids from E, F, or G, the next three firms on the list, one of whom is on Y's blacklist.

A's decision to solicit bids from only B, C, and D, is not a refusal to do business with anyone, because the solicited bidders were not selected for boycott reasons.

(xix) U.S. bank A receives a letter of credit in favor of U.S. beneficiary B. The letter of credit requires B to certify that he is not blacklisted. B seeks payment from A and meets all other conditions of the letter of credit but refuses or is unable to provide the certification from the steamship line about the vessel's blacklist status. A refuses to pay B on the letter of credit solely because B cannot or will not provide the certification.

A has refused to do business with another person pursuant to a boycott requirement or request.

(xx) U.S. bank A receives a letter of credit in favor of U.S. beneficiary B. The letter of credit requires B to provide a certification from the steamship line that the vessel carrying the goods is not blacklisted. B seeks payment from A and meets all other conditions of the letter of credit but refuses or is unable to provide the certification from the steamship line about the vessel's blacklist status. A refuses to pay B on the letter of credit solely because B cannot or will not provide the certification.

A has required another person to refuse to do business pursuant to a boycott requirement or request by insisting that B obtain such a certificate. (Either A or B may request an amendment to the letter of credit substituting a certificate of vessel eligibility, however. See Example (xxi) below).

(xxi) U.S. bank A receives a letter of credit from a bank in boycotting country Y in favor of U.S. beneficiary B. The letter of credit requires B to provide a certification from the steamship line that the vessel carrying the goods is eligible to enter the ports in Y. B seeks payment from A and meets all other conditions of the letter of credit. A refuses to pay B solely because B cannot or will not provide the certification.

A has neither refused, nor required another person to refuse, to do business with another person pursuant to a boycott requirement or request because the vessel eligibility certificate is a common requirement for non-boycott purposes.

(xxii) U.S. bank A confirms a letter of credit in favor of U.S. beneficiary B. The letter of credit contains a requirement that B certify that he is not blacklisted. B presents the letter of credit to U.S. bank C, a correspondent of bank A. B does not present the certificate of blacklist status to bank C, but, in accordance with these rules, bank C pays B, and then presents the letter of credit and documentation to bank A for reimbursement. Bank A refuses to reimburse bank C because the blacklist certification of B is not included in the documentation.

A has required another person to refuse to do business with a person pursuant to a boycott requirement or request by insisting that C obtain the certificate from B.

(xxiii) U.S. bank A receives a letter of credit in favor of U.S. beneficiary B. The letter of credit requires B to certify that he is not blacklisted. B refuses to pay A on the letter of credit solely because B refuses to certify as to his blacklist status.
§ 760.2

of credit, however, if B states that B will not provide such a certificate.

(ii) A, a U.S. manufacturer of commercial refrigerators and freezers, receives an invitation to bid from boycotting country Y. The tender states that the bidder must agree not to deal with companies on Y’s blacklist. A does not know which companies are on the blacklist, and A’s bid makes no commitment regarding not dealing with certain companies. A’s bid in response to the tender is accepted.

At the point when A’s bid is accepted, A has agreed to refuse to do business with blacklisted persons, because the terms of Y’s tender are part of the contract between Y and A.

(iii) A, a U.S. construction firm, is offered a contract to perform engineering and construction services in connection with a project located in boycotting country Y. The contract contains a clause stating that, in the event of a contract dispute, the laws of Y will apply.

A may enter into the contract. Agreement that the laws of boycotting country Y will control in resolving a contract dispute is not an agreement to refuse to do business.

(iv) Same as (iii), except that the contract contains a clause that A and its employees will comply with the laws of boycotting country Y. A knows that Y has a number of boycott laws.

Such an agreement is not, in and of itself, an agreement to refuse to do business. If, however, A subsequently refuses to do business with someone because of the laws of Y, A’s action would be a refusal to do business.

(v) Same as (iv), except that the contract contains a clause that A and its employees will comply with the laws of boycotting country Y, “including boycott laws”.

A’s agreeing, without qualification, to comply with local boycott laws constitutes an agreement to refuse to do business.

(vi) Same as (v), except that A inserts a proviso “except insofar as Y’s laws conflict with U.S. laws”; or words to that effect.

Such an agreement is not an agreement to refuse to do business.

(vii) A, a U.S. general contractor, is retained to construct a pipeline in boycotting country Y. A provision in the proposed contract stipulates that in purchasing equipment, supplies, and services A must give preference to companies located in host country Y.

A may agree to this contract provision. Agreeing to a “buy local” contract provision is not an agreement to refuse to do business, because A’s agreement is not made for boycott reasons.

(viii) A, a U.S. exporter planning to sell retail goods to customers in boycotting country Y, enters into a contract to purchase goods wholesale from B, a U.S. appliance manufacturer. A’s contract with B includes a provision stipulating that B may not use components or services of blacklisted companies in the manufacture of its appliances.

A’s agreement constitutes a refusal to do business, because it would require another person, B, to refuse to do business with other persons for boycott reasons.

(ix) Same as (viii), except that A and B reach an implicit understanding that B will not use components or services of blacklisted companies in the manufacture of goods to be exported to Y. In its manufacture of appliances to be sold to A for export to non-boycotting countries, B uses components manufactured by blacklisted companies.

The actions of both A and B constitute agreement to refuse to do business. The agreement is implied by their pattern of conduct.

(x) Boycotting country Y orders goods from U.S. company B. Y opens a letter of credit with foreign bank C in favor of B. The letter of credit specifies that negotiation of the letter of credit with a bank that appears on the country X boycott blacklist is prohibited. U.S. bank A, C’s correspondent bank, advises B of the letter of credit. B presents
documentation to bank A seeking to be paid on the letter of credit, without amending or otherwise taking exception to the boycott condition.

B has agreed to refuse to do business with blacklisted banks because, by presenting the letter of credit for payment, B has accepted all of its terms and conditions.

(b) Discriminatory actions.

**Prohibition Against Taking Discriminatory Actions**

(1) No United States person may:

(i) Refuse to employ or otherwise discriminate against any individual who is a United States person on the basis of race, religion, sex, or national origin;

(ii) Discriminate against any corporation or other organization which is a United States person on the basis of the race, religion, sex, or national origin of any owner, officer, director, or employee of such corporation or organization;

(iii) Knowingly agree to take any of the actions described in paragraph (b)(1)(i) and (ii) of this section; or

(iv) Require or knowingly agree to require any other person to take any of the actions described in paragraph (b)(1)(i) and (ii) of this section.

(2) This prohibition shall apply whether the discriminatory action is taken by a United States person on its own or in response to an agreement with, request from, or requirement of a boycotting country. This prohibition, like all others, applies only with respect to a United States person's activities in the interstate or foreign commerce of the United States and only when such activities are undertaken with intent to comply with, further, or support an unsanctioned foreign boycott.

(3) The section does not supersede or limit the operation of the civil rights laws of the United States.

**Examples of Discriminatory Actions**

The following examples are intended to give guidance in determining the circumstances in which the taking of particular discriminatory actions is prohibited. They are illustrative, not comprehensive.

(i) U.S. construction company A is awarded a contract to build an office complex in boycotting country Y. A, believing that employees of a particular religion will not be permitted to work in Y because of Y's boycott against country X, excludes U.S. persons of that religion from consideration for employment on the project.

A's refusal to consider qualified U.S. persons of a particular religion for work on the project in Y constitutes a prohibited boycott-based discriminatory action against U.S. persons on the basis of religion.

(ii) Same as (i), except that a clause in the contract provides that "no persons of country X origin are to work on this project."

A's agreement constitutes a prohibited boycott-based agreement to discriminate against U.S. persons, among others, on the basis of national origin.

(iii) Same as (i), except that a clause in the contract provides that "no persons who are citizens, residents, or nationals of country X are to work on this project."

A's agreement does not constitute a boycott-based agreement to discriminate against U.S. persons on the basis of race, religion, sex, or national origin, because the restriction is based on its boycott of country Y. Y's representative orally tells A that no persons of country X origin are to work on the project.

A may not comply, because to do so would constitute discrimination on the basis of national origin.

It makes no difference that A learned of Y's requirement orally. It makes no difference how A learns about Y's discriminatory requirement.

(iv) Boycotting country Y tenders an invitation to bid on a construction project in Y. The tender requires that the successful bidder's personnel will be interviewed only that persons of a particular religious faith will not be permitted to work on the project. Y's requirement is based on its boycott of country X, the majority of whose citizens are of that particular faith.

Agreement to this provision in the tender document by a U.S. person would constitute a prohibited agreement to engage in boycott-based discrimination against U.S. persons of a particular religion.

(v) Same as (iv), except that the tender specifies that "women will not be allowed to work on this project."

Agreement to this provision in the tender by a U.S. person does not constitute a prohibited agreement to engage in boycott-based discrimination, because the restriction against employment of women is not boycott-based. Such an agreement may, however, constitute a violation of U.S. civil rights laws.

(vi) A and B sign a subcontract to build a school in boycotting country Y. A is required to exclude
investment banks owned by persons of a particular faith from participation in the underwriting. Y’s requirement is based on its boycott of country X, the majority of whose citizens are of that particular faith.

A’s agreement to such a provision constitutes a prohibited agreement to engage in boycott-based discrimination against U.S. persons on the basis of religion. Further, if A requires others to agree to such a condition, A would be acting to require another person to engage in such discrimination.

(iii) U.S. company A believes that boycotting country Y will select A’s bid over those of other bidders if A volunteers that it has no shareholders, officers, or directors of a particular national origin. A’s belief is based on its knowledge that Y generally refuses, as part of its boycott against country X, to do business with companies owned, controlled, or managed by persons of this particular national origin.

EXAMPLES OF THE PROHIBITION AGAINST FURNISHING DISCRIMINATORY INFORMATION

The following examples are intended to give guidance in determining the circumstances in which the furnishing of discriminatory information is prohibited. They are illustrative, not comprehensive.

(i) U.S. company A receives a boycott questionnaire from boycotting country Y asking whether it is owned or controlled by persons of a particular faith, whether it has any persons on its board of directors who are of that faith, and what the national origin of its president is. The information is sought for purposes of enforcing Y’s boycott against country X, and A knows or has reason to know that the information is sought for that reason.

A may not answer the questionnaire, because A would be furnishing information about the religion and national origin of U.S. persons for purposes of complying with or supporting Y’s boycott against country X.

(ii) U.S. company A, located in the United States, is asked by boycotting country Y to certify that A has no persons of a particular national origin on its board of directors. A knows that Y’s purpose in asking for the certification is to enforce its boycott against country X.

A may not make such a certification, because A would be furnishing information about the national origin of U.S. persons for purposes of complying with or supporting Y’s boycott against X.

(iii) U.S. company A believes that boycotting country Y will select A’s bid over those of other bidders if A volunteers that it has no shareholders, officers, or directors of a particular national origin. A’s belief is based on its knowledge that Y generally refuses, as part of its boycott against country X, to do business with companies owned, controlled, or managed by persons of this particular national origin.
Bureau of Export Administration, Commerce

§ 760.2

A may not volunteer this information, because it would be furnishing information about the national origin of U.S. persons for purposes of complying with or supporting Y's boycott against X.

(iv) U.S. company A has a contract to construct an airport in boycotting country Y. Before A begins work, A is asked by Y to identify the national origin of its employees who will work on the site. A knows or has reason to know that Y is seeking this information in order to enforce its boycott against X.

A may not furnish this information, because A would be providing information about the national origin of U.S. persons for purposes of complying with or supporting Y's boycott against X.

(v) Same as (iv), except that in order to assemble its workforce on site in Y, A sends visa forms to its employees and asks that the forms be returned to A for transmittal to Y's consulate or embassy. A, itself, furnishes no information about its employees, but merely transmits the visa forms back and forth.

In performing the ministerial function of transmitting visa forms, A is not furnishing information about any U.S. person's race, religion, sex, or national origin.

(vi) Same as (iv), except that A is asked by Y to certify that none of its employees in Y will be women, because Y's laws prohibit women from working.

Such a certification does not constitute a prohibited furnishing of information about any U.S. person's sex, since the reason the information is sought has nothing to do with Y's boycott of X.

(vii) U.S. company A is considering establishing an office in boycotting country Y. In order to register to do business in Y, A is asked to furnish information concerning the nationalities of its corporate officers and board of directors.

A may furnish the information about the nationalities of its officers and directors, because in so doing A would not be furnishing information about the race, religion, sex, or national origin of any U.S. person.

(d) Furnishing information about business relationships with boycotted countries or blacklisted persons.

PROHIBITION AGAINST FURNISHING INFORMATION ABOUT BUSINESS RELATIONSHIPS WITH BOYCOTTED COUNTRIES OR BLACKLISTED PERSONS

(1) No United States person may furnish or knowingly agree to furnish information concerning his or any other person's past, present or proposed business relationships:

(i) With or in a boycotted country;

(ii) With any business concern organized under the laws of a boycotted country;

(iii) With any national or resident of a boycotted country;

(iv) With any other person who is known or believed to be restricted from having any business relationship with or in a boycotting country.

(2) This prohibition shall apply:

(i) Whether the information pertains to a business relationship involving a sale, purchase, or supply transaction; legal or commercial representation; shipping or other transportation transaction; insurance; investment; or any other type of business transaction or relationship; and

(ii) Whether the information is directly or indirectly requested or is furnished on the initiative of the United States person.

(3) This prohibition does not apply to the furnishing of normal business information in a commercial context. Normal business information may relate to factors such as financial fitness, technical competence, or professional experience, and may be found in documents normally available to the public such as annual reports, disclosure statements concerning securities, catalogs, promotional brochures, and trade and business handbooks. Such information may also appear in specifications or statements of experience and qualifications.

(4) Normal business information furnished in a commercial context does not cease to be such simply because the party soliciting the information may be a boycotting country or a national or resident thereof. If the information is of a type which is generally sought for a legitimate business purpose (such as determining financial fitness, technical competence, or professional experience), the information may be furnished even if the information could be used, or without the knowledge of the person supplying the information, in a boycott context. However, no information about business relationships with blacklisted persons or boycotted countries, their residents or nationals, may be furnished in response to a boycott request, even if the information is publicly available. Requests for such information from a
§ 760.2 Furnishing of information concerning boycott-based relationships

(5) This prohibition, like all others, applies only with respect to a United States person's activities in the interstate or foreign commerce of the United States and only when such activities are undertaken with intent to comply with, further, or support an unsanctioned foreign boycott.

EXAMPLES CONCERNING FURNISHING OF INFORMATION

The following examples are intended to give guidance in determining the circumstances in which the furnishing of information is prohibited. They are illustrative, not comprehensive.

(i) U.S. contractor A is considering bidding for a contract to build a dam in boycotting country Y. The invitation to bid, which appears in a trade journal, specifies that each bidder must state that he does not have any offices in boycotted country X. A knows or has reason to know that the requirement is boycott-based. A may not make this statement, because it constitutes information about A’s business relationships with X.

(ii) U.S. contractor A is considering bidding for a contract to construct a school in boycotting country Y. Each bidder is required to submit copies of its annual report with its bid. Since A’s annual report describes A’s worldwide operations, including the countries in which it does business, it necessarily discloses whether A has business relations with boycotted country X. A has no reason to know that its report is being sought for boycott purposes. A, in furnishing its annual report, is supplying ordinary business information in a commercial context.

(iii) Same as (ii), except that accompanying the invitation to bid is a questionnaire from country Y’s boycott office asking each bidder to supply a copy of its annual report. A may not furnish the annual report despite its public availability, because it would be furnishing information in response to a questionnaire from a boycott office.

(iv) U.S. company A is on boycotting country Y’s blacklist. For reasons unrelated to the boycott, A terminates its business relationships with boycotted country X. In exploring other marketing areas, A determines that boycotting country Y offers great potential. A is requested to complete a questionnaire from a central boycott office which inquires about A’s business relations with X. A may not furnish the information, because it is information about A’s business relationships with a boycotted country.

(v) U.S. exporter A is seeking to sell its products to boycotting country Y. A is informed by Y that, as a condition of sale, A must certify that it has no salesmen in boycotted country X. A knows or has reason to know that the condition is boycott-based.

A may not furnish the certification, because it is information about A’s business relationships in a boycotted country.

(vi) U.S. engineering company A receives an invitation to bid on the construction of a dam in boycotting country Y. As a condition of the bid, A is asked to certify that it does not have any offices in boycotted country X. A is also asked to furnish plans for other dams it has designed.

A may not certify that it has no office in X, because this is information about its business relationships in a boycotted country. A may submit plans for other dams it has designed, because this is furnishing normal business information, in a commercial context, relating to A’s technical competence and professional experience.

(vii) U.S. company A, in seeking to expand its exports to boycotting country Y, sends a sales representative to Y for a one week trip. During a meeting in Y with trade association representatives, A’s representative desires to explain that neither A nor any companies with which A deals has any business relations with boycotted country X. The purpose of supplying such information is to ensure that A does not get blacklisted.

A’s representative may not volunteer this information even though A, for reasons unrelated to the boycott, does not deal with X, because A’s representative would be volunteering information about A’s business relationships with boycotted country X. The prohibition applies only with respect to a United States person’s activities in the interstate or foreign commerce of the United States.

(viii) U.S. company A is asked by boycotting country Y to furnish information concerning its business relationships with boycotted country X. A, knowing that Y is seeking the information for boycott purposes, refuses to furnish the information asked for directly, but proposes to respond by supplying a copy of its annual report which lists the countries with which A is presently doing business. A does not happen to be doing business with X.

A may not respond to Y’s request by supplying its annual report, because A knows that it would be responding to a boycott-based request for information about its business relationships with X.

(ix) U.S. company A receives a letter from a central boycott office asking A to “clarify” A’s operations in boycotted country X. A intends to continue its operations in X, but fears that not responding to the request will result in its being placed on boycotting country Y’s blacklist. A knows or has reason to know that the information is sought for boycott reasons.
A may not respond to this request, because the information concerns its business relationships with a boycotted country.

(x) U.S. company A, in the course of negotiating to sell goods to a buyer in boycotting country Y, is asked to certify that its supplier is not on Y’s blacklist.

A may not furnish the information about its supplier’s blacklist status, because this is information about A’s business relationships with another person who is believed to be restricted from having any business relationship with or in a boycotting country.

(xi) U.S. company A has a manufacturing plant in boycotting country X and is on boycotting country Y’s blacklist. A is seeking to establish operations in Y, while expanding its operations in X. A applies to Y to be removed from Y’s blacklist. A is asked, in response, to indicate whether it has manufacturing facilities in X.

A may not supply the requested information, because A would be furnishing information about its business relationships in a boycotting country.

(xii) U.S. bank A plans to open a branch office in boycotting country Y. In order to do so, A is required to furnish certain information about its business operations, including the location of its other branch offices. Such information is normally sought in other countries where A has opened a branch office, and A does not have reason to know that Y is seeking the information for boycott reasons.

A may furnish this information, even though in furnishing it A would disclose information about its business relationships in a boycotting country, because it is being furnished in a normal business context and A does not have reason to know that it is sought for boycott reasons.

(xiii) U.S. architectural firm A responds to an invitation to submit designs for an office complex in boycotting country Y. The invitation states that all bidders must include information concerning similar types of buildings they have designed. A has not designed such buildings in boycotting country X. Clients frequently seek information of this type before engaging an architect.

A may furnish this information, because this is furnishing normal business information, in a commercial context, relating to A’s technical competence and professional experience.

(xiv) U.S. oil company A distributes to potential customers promotional brochures and catalogs which give background information on A’s past projects. A does not have business dealings with boycotted country X. The brochures, which are identical to those which A uses throughout the world, list those countries in which A does or has done business. In soliciting potential customers in boycotting country Y, A desires to distribute copies of its brochures.

A may do so, because this is furnishing normal business information, in a commercial context, relating to professional experience.

(xv) U.S. company A is interested in doing business with boycotting country Y. A wants to ask Y’s Ministry of Trade whether, and if so why, A is on Y’s blacklist or is otherwise restricted for boycott reasons from doing business with Y.

A may make this limited inquiry, because it does not constitute furnishing information.

(xvi) U.S. company A is asked by boycotting country Y to certify that it is not owned by subjects or nationals of boycotted country X and that it is not resident in boycotting country X.

A may not furnish the certification, because it is information about A’s business relationships with or in a boycotting country, or with nationals of a boycotted country.

(xvii) U.S. company A, a manufacturer of certain patented products, desires to register its patents in boycotting country Y. A receives a power of attorney form required to register its patents. The form contains a question regarding A’s business relationships with or in boycotting country X. A has no business relationships with X and knows or has reason to know that the information is sought for boycott reasons.

A may not answer the question, because A would be furnishing information about its business relationships with or in a boycotting country.

(xviii) U.S. company A is asked by boycotting country Y to certify that it is not the mother company, sister company, subsidiary, or branch of any blacklisted company, and that it is not in any way affiliated with any blacklisted company.

A may not furnish the certification, because it is information about whether A has a business relationship with another person who is known or believed to be restricted from having any business relationship with or in a boycotting country. This interpretation became effective on June 22, 1978.

(e) Information concerning association with charitable and fraternal organizations.

Prohibition Against Furnishing Information About Associations With Charitable and Fraternal Organizations

(1) No United States person may furnish or knowingly agree to furnish information about whether any person is a member of, has made contributions to, or is otherwise associated with or
involved in the activities of any charitable or fraternal organization which supports a boycotted country.

(2) This prohibition shall apply whether:

(i) The information concerns association with or involvement in any charitable or fraternal organization which (a) has, as one of its stated purposes, the support of a boycotted country through financial contributions or other means, or (b) undertakes, as a major organizational activity, to offer financial or other support to a boycotted country;

(ii) The information is directly or indirectly requested or is furnished on the initiative of the United States person; or

(iii) The information requested or volunteered concerns membership in, financial contributions to, or any other type of association with or involvement in the activities of such charitable or fraternal organization.

(3) This prohibition does not prohibit the furnishing of normal business information in a commercial context as defined in paragraph (d) of this section.

(4) This prohibition, like all others, applies only with respect to a United States person's activities in the interstate or foreign commerce of the United States and only when such activities are undertaken with intent to comply with, further, or support an unsanctioned foreign boycott.

EXAMPLES OF PROHIBITION AGAINST FURNISHING INFORMATION ABOUT ASSOCIATIONS WITH CHARITABLE OR FRATERNAL ORGANIZATIONS

The following examples are intended to give guidance in determining the circumstances in which the furnishing of information concerning associations with charitable or fraternal organizations is prohibited. They are illustrative, not comprehensive.

(i) U.S. engineering firm A receives an invitation to bid from boycotting country Y. The invitation includes a request to supply information concerning any association which A's officers have with charitable organization B, an organization which is known by A to contribute financial support to boycotted country X. A knows or has reason to know that the information is sought for boycott reasons.

A may not furnish the information.

(ii) U.S. construction company A, in an effort to establish business dealings with boycotting country Y, proposes to furnish information to Y showing that no members of its board of directors are in any way associated with charitable organizations which support boycotted country X. A's purpose is to avoid any possibility of its being blacklisted by Y.

A may not furnish the information, because A's purpose in doing so is boycott-based. It makes no difference that no specific request for the information has been made by Y.

(iii) A, a citizen of the United States, is applying for a teaching position in a school in boycotting country Y. In connection with his application, A furnishes a resume which happens to disclose his affiliation with charitable organizations. A does so completely without reference to Y's boycott and without knowledge of any boycott requirement of Y that pertains to A's application for employment.

The furnishing of a resume by A is not a boycott-related furnishing of information about his association with charitable organizations which support boycotted country X.

(f) Letters of credit.

PROHIBITION AGAINST IMPLEMENTING LETTERS OF CREDIT CONTAINING PROHIBITED CONDITIONS OR REQUIREMENTS

(1) No United States person may pay, honor, confirm, or otherwise implement a letter of credit which contains a condition or requirement compliance with which is prohibited by this part, nor shall any United States person, as a result of the application of this section, be obligated to pay, honor or otherwise implement such a letter of credit.

(2) For purposes of this section, “implementing” a letter of credit includes:

(i) Issuing or opening a letter of credit at the request of a customer;

(ii) Honoring, by accepting as being a valid instrument of credit, any letter of credit;

(iii) Paying, under a letter of credit, a draft or other demand for payment by the beneficiary;

(iv) Confirming a letter of credit by agreeing to be responsible for payment to the beneficiary in response to a request by the issuer;

(v) Negotiating a letter of credit by voluntarily purchasing a draft from a beneficiary and presenting such draft for reimbursement to the issuer or the confirmer of the letter of credit; and

(vi) Taking any other action to implement a letter of credit.
(3) In the standard international letter of credit transaction facilitating payment for the export of goods from the United States, a bank in a foreign country may be requested by its customer to issue a revocable or irrevocable letter of credit in favor of the United States exporter. The customer usually requires, and the letter of credit provides, that the issuing (or a confirming) bank will make payment to the beneficiary against the bank’s receipt of the documentation specified in the letter of credit. Such documentation usually includes commercial and consular invoices, a bill of lading, and evidence of insurance, but it may also include other required certifications or documentary assurances such as the origin of the goods and information relating to the carrier or insurer of the shipment.

Banks usually will not accept drafts for payment unless the documents submitted therewith comply with the terms and conditions of the letter of credit.

(4) A United States person is not prohibited under this section from advising a beneficiary of the existence of a letter of credit in his favor, or from taking ministerial actions to dispose of a letter of credit which it is prohibited from implementing.

(5) Compliance with this section shall provide an absolute defense in any action brought to compel payment of, honoring of, or other implementation of a letter of credit, or for damages resulting from failure to pay or otherwise honor or implement the letter of credit. This section shall not otherwise relieve any person from any obligations or other liabilities he may incur under other laws or regulations, except as may be explicitly provided in this section.

**LETTERS OF CREDIT TO WHICH THIS SECTION APPLIES**

(6) This prohibition, like all others, applies only with respect to a United States person’s activities taken with intent to comply with, further, or support an unsanctioned foreign boycott. In addition, it applies only when the transaction to which the letter of credit applies is in United States commerce and the beneficiary is a United States person.

**IMPLEMENTATION OF LETTERS OF CREDIT IN THE UNITED STATES**

(7) A letter of credit implemented in the United States by a United States person located in the United States, including a permanent United States establishment of a foreign bank, will be presumed to apply to a transaction in United States commerce and to be in favor of a United States beneficiary where the letter of credit specifies a United States address for the beneficiary. These presumptions may be rebutted by facts which could reasonably lead the bank to conclude that the beneficiary is not a United States person or that the underlying transaction is not in United States commerce.

(8) Where a letter of credit implemented in the United States by a United States person located in the United States does not specify a United States address for the beneficiary, the beneficiary will be presumed to be other than a United States person. This presumption may be rebutted by facts which could reasonably lead the bank to conclude that the beneficiary is a United States person despite the foreign address.

**IMPLEMENTATION OF LETTERS OF CREDIT OUTSIDE THE UNITED STATES**

(9) A letter of credit implemented outside the United States by a United States person located outside the United States will be presumed to apply to a transaction in United States commerce and to be in favor of a United States beneficiary where the letter of credit specifies a United States address for the beneficiary and calls for documents indicating shipment from the United States or otherwise indicating that the goods are of United States origin. These presumptions may be rebutted by facts which could reasonably lead the bank to conclude that the beneficiary is not a United States person or that the underlying transaction is not in United States commerce.

(10) Where a letter of credit implemented outside the United States by a United States person located outside the United States does not specify a
§ 760.2

United States address for the beneficiary, the beneficiary will be presumed to be other than a United States person. In addition, where such a letter of credit does not call for documents indicating shipment from the United States or otherwise indicating that the goods are of United States origin, the transaction to which it applies will be presumed to be outside United States commerce. The presumption that the beneficiary is other than a United States person may be rebutted by facts which could reasonably lead the bank to conclude that the beneficiary is a United States person. The presumption that the transaction to which the letter of credit applies is outside United States commerce may be rebutted by facts which could reasonably lead the bank to conclude that the underlying transaction is in United States commerce.

EXAMPLES OF THE PROHIBITION AGAINST IMPLEMENTING LETTERS OF CREDIT

The following examples are intended to give guidance in determining the circumstances in which this section applies to the implementation of a letter of credit and in which such implementation is prohibited. They are illustrative, not comprehensive.

IMPLEMENTATION OF LETTERS OF CREDIT IN UNITED STATES COMMERCE

(i) A, a U.S. bank located in the United States, opens a letter of credit in the United States in favor of B, a foreign company located outside the United States. The letter of credit specifies a non-U.S. address for the beneficiary.

The beneficiary is presumed to be other than a U.S. person, because it does not have a U.S. address. The presumption may be rebutted by facts showing that A could reasonably conclude that the beneficiary is a U.S. person despite the foreign address.

(ii) A, a branch of a foreign bank located in the United States, opens a letter of credit in favor of B, a foreign company located outside the United States. The letter of credit specifies a non-U.S. address for the beneficiary.

The beneficiary is presumed to be other than a U.S. person, because it does not have a U.S. address. The presumption may be rebutted by facts showing that A could reasonably conclude that the beneficiary is a U.S. person despite the foreign address.

(iii) A, a U.S. bank branch located outside the United States, opens a letter of credit in favor of B, a person with a U.S. address. The letter of credit calls for documents indicating shipment of goods from the United States.

The letter of credit is presumed to apply to a transaction in U.S. commerce and to be in favor of a U.S. beneficiary because the letter of credit specifies a U.S. address for the beneficiary and calls for documents indicating that the goods will be shipped from the United States. These presumptions may be rebutted by facts showing that A could reasonably conclude that the beneficiary is not a U.S. person or that the underlying transaction is not in U.S. commerce.

(iv) A, a U.S. bank branch located outside the United States, opens a letter of credit which specifies a beneficiary, B, with an address outside the United States and calls for documents indicating that the goods are of U.S.-origin. A knows or has reason to know that although B has an address outside the United States, B is a U.S. person.

The letter of credit is presumed to apply to a transaction in U.S. commerce, because the letter of credit calls for shipment of U.S.-origin goods. In addition, the letter of credit is presumed to be in favor of a beneficiary who is a U.S. person, because A knows or has reason to know that the beneficiary is a U.S. person despite the foreign address.

(v) A, a U.S. bank branch located outside the United States, opens a letter of credit which specifies a beneficiary with a U.S. address. The letter of credit calls for documents indicating shipment of foreign-origin goods.

The letter of credit is presumed to be in favor of a U.S. beneficiary but to apply to a transaction outside U.S. commerce, because it calls for documents indicating shipment of foreign-origin goods. The presumption of non-U.S. commerce may be rebutted by facts showing that A could reasonably conclude that the underlying transaction involves shipment of U.S.-origin goods or goods from the U.S.

PROHIBITION AGAINST IMPLEMENTING LETTERS OF CREDIT

(i) Boycotting country Y orders goods from U.S. company B. Y opens a letter of credit with foreign bank C in favor of B. The letter of credit specifies as a condition of payment that B certify that it does not do business with boycotted country X. Foreign bank C forwards the letter of credit it has opened to U.S. bank A for confirmation.

A may not confirm or otherwise implement this letter of credit, because it contains a condition with which a U.S. person may not comply.

(ii) Same as (i), except U.S. bank A desires to advise the beneficiary, U.S. company B, of the letter of credit.

A may do so, because advising the beneficiary of the letter of credit (including the term which prevents A from implementing
A may accept negative certificates of origin in fulfillment of the terms of the letter of credit through December 31, 1978, because the underlying contract is entitled to a grace period through that date. (See § 760.8 of this part on “Grace Period.”)

(viii) B is a foreign bank located outside the United States. B maintains an account with U.S. bank A, located in the United States. A letter of credit issued by B in favor of a U.S. beneficiary provides that any negotiating bank may obtain reimbursement from A by certifying that all the terms and conditions of the letter of credit have been met and then drawing against B’s account. B notifies A by cable of the issuance of a letter of credit and the existence of reimbursement authorization; A does not receive a copy of the letter of credit.

A may reimburse any negotiating bank, even when the underlying letter of credit contains a prohibited boycott condition, because A does not know or have reason to know that the letter of credit contains a prohibited boycott condition.

(ix) Same as (viii), except that foreign bank B forwards a copy of the letter of credit to U.S. bank A, which then becomes aware of the prohibited boycott clause.

A may not thereafter reimburse a negotiating bank, or in any way further implement the letter of credit, because it knows of the prohibited boycott condition.

(x) Boycotting country Y orders goods from U.S. exporter B and requests a foreign bank in Y to open a letter of credit in favor of B to cover the cost. The letter of credit contains a prohibited boycott clause. The foreign bank asks U.S. bank A to advise and confirm the letter of credit. Through inadvertence, A does not notice the prohibited clause and confirms the letter of credit. A thereafter notices the clause and then refuses to honor B’s draft against the letter of credit. B sues bank A for payment.

A has an absolute defense against the obligation to make payment under this letter of credit. (Note that paragraph (ix) of this section does not alter any other obligations or liabilities of the parties under appropriate law.)

(xi) [Reserved]

(xii) Boycotting country Y orders goods from U.S. company B. A letter of credit which contains a prohibited boycott clause is opened in favor of B by a foreign bank in Y. The foreign bank asks U.S. bank A to advise and confirm the letter of credit, which it forwards to A.

A may advise B that it has received the letter of credit (including the boycott term), but may not confirm the letter of credit with the prohibited clause.

(xiii) Same as (xii), except U.S. bank A fails to tell B that it cannot process the letter of credit. B requests payment.
§ 760.3  Exceptions to prohibitions.

(a) Import requirements of a boycotting country.

Compliance With Import Requirements of a Boycotting Country

(1) A United States person, in supplying goods or services to a boycotting country, or to a national or resident of a boycotting country, may comply or agree to comply with requirements of such boycotting country which prohibit the import of:

(i) Goods or services from the boycotted country;

(ii) Goods produced or services provided by any business concern organized under the laws of the boycotted country; or

(iii) Goods produced or services provided by nationals or residents of the boycotted country.

(2) A United States person may comply or agree to comply with such import requirements whether or not he has received a specific request to comply. By its terms, this exception applies only to transactions involving imports into a boycotting country. A United States person may not, under this exception, refuse on an across-the-board basis to do business with a boycotted country or a national or resident of a boycotted country.

(3) In taking action within the scope of this exception, a United States person is limited in the types of boycott-related information he can supply. (See § 760.2 (d) of this part on “Furnishing Information About Business Relationships with Boycotted Countries or Blacklisted Persons” and paragraph (c) of this section on “Import and Shipping Document Requirements.”)

Examples of Compliance With Import Requirements of a Boycotting Country

The following examples are intended to give guidance in determining the circumstances in which compliance with the import requirements of a boycotting country is permissible. They are illustrative, not comprehensive.

(i) A, a U.S. manufacturer, receives an order from boycotting country Y for its products, country X is boycotted by country Y, and the import laws of Y prohibit the importation of goods produced or manufactured in X. In filling this type of order, A would usually include some component parts produced in X.

For the purpose of filling this order, A may substitute comparable component parts in place of parts produced in X, because the import laws of Y prohibit the importation of goods manufactured in X.

(ii) Same as (i), except that A's contract with Y expressly provides that in fulfilling the contract A 'may not include parts or components produced or manufactured in boycotted country X.'

A may agree to and comply with this contract provision, because Y prohibits the importation of goods from X. (NOTE: After June 21, 1978, A may not furnish negative
certifications regarding the origin of components in response to import and shipping document requirements.)

(iii) A, a U.S. building contractor, is awarded a contract to construct a plant in boycotting country Y. A accepts bids on goods required under the contract, and the lowest bid is made by B, a business concern organized under the laws of X, a country boycotted by Y. Y prohibits the import of goods produced by companies organized under the laws of X.

For purposes of this contract, A may reject B’s bid and accept another, because B’s goods would be refused entry into Y because of Y’s boycott against X.

(iv) Same as (iii), except that A also rejects the low bid by B for work on a construction project in country M, a country not boycotted by Y.

This exception does not apply, because A’s action is not taken in order to comply with Y’s requirements prohibiting the import of products from boycotted country X.

(v) A, a U.S. management consulting firm, contracts to provide services to boycotting country Y. Y requests that A not employ residents or nationals of boycotted country X to provide those services.

A may agree, as a condition of the contract, not to have services furnished by nationals or residents of X, because importation of such services is prohibited by Y.

(vi) A, a U.S. company, is negotiating a contract to supply machine tools to boycotting country Y. Y insists that the contract contain a provision whereby A agrees that none of the machine tools will be produced by any business concern owned by nationals of boycotted country X, even if the business concern is organized under the laws of a non-boycotted country.

A may not agree to this provision, because it is a restriction on the import of goods produced by business concerns owned by nationals of a boycotted country even if the business concerns themselves are organized under the laws of a non-boycotted country.

(b) Shipment of goods to a boycotting country

Compliance With Requirements Regarding the Shipment of Goods to a Boycotting Country

(1) A United States person, in shipping goods to a boycotting country, may comply or agree to comply with requirements of that country which prohibit the shipment of goods:

(i) On a carrier of the boycotted country; or

(ii) By a route other than that prescribed by the boycotting country or the recipient of the shipment.

(2) A specific request that a United States person comply or agree to comply with requirements concerning the use of carriers of a boycotting country is not necessary if the United States person knows, or has reason to know, that the use of such carriers for shipping goods to the boycotting country is prohibited by requirements of the boycotting country. This exception applies whether a boycotting country or the purchaser of the shipment:

(i) Explicitly states that the shipment should not pass through a port of the boycotted country; or

(ii) Affirmatively describes a route of shipment that does not include a port in the boycotting country.

(3) For purposes of this exception, the term carrier of a boycotting country means a carrier which flies the flag of a boycotting country or which is owned, chartered, leased, or operated by a boycotted country or by nationals or residents of a boycotted country.

Examples of Compliance With the Shipping Requirements of a Boycotting Country

The following examples are intended to give guidance in determining the circumstances in which compliance with import and shipping document requirements of a boycotting country is permissible. They are illustrative, not comprehensive.

(i) A is a U.S. exporter from whom boycotting country Y is importing goods. Y directs that the goods not pass through a port of boycotting country X.

A may comply with Y’s shipping instructions, because they pertain to the route of shipment of goods being shipped to Y.

(ii) A, a U.S. fertilizer manufacturer, receives an order from boycotting country Y for fertilizer. Y specifies in the order that A may not ship the fertilizer on a carrier of boycotted country X.

A may comply with this request, because it pertains to the carrier of a boycotted country.

(iii) B, a resident of boycotting country Y, orders textile goods from A, a U.S. distributor, specifying that the shipment must not be made on a carrier owned or leased by nationals of boycotted country X and that the carrier must not pass through a port of country X enroute to Y.

A may comply or agree to comply with these requests, because they pertain to the shipment of goods to Y on a carrier of a boycotted country and the route such shipment will take.

(iv) Boycotting country Y orders goods from A, a U.S. retail merchant. The order
§ 760.3

specifies that the goods shipped by A "may not be shipped on a carrier registered in or owned by boycotted country X."

A may agree to this contract provision, because it pertains to the carrier of a boycotted country.

(v) Boycotting country Y orders goods from A, a U.S. pharmaceutical company, and requires that the shipment not pass through a port of country P, which is not a country boycotted by Y.

This exception does not apply in a non-boycotting situation. A may comply with the shipping instructions of Y, because in doing so he would not violate any prohibition of this part.

(c) Import and shipping document requirements.

Compliance With Import and Shipping Document Requirements of a Boycotting Country

(1) A United States person, in shipping goods to a boycotting country, may comply or agree to comply with import and shipping document requirements of that country, with respect to:

(i) The country or origin of the goods;

(ii) The name of the carrier;

(iii) The route of the shipment;

(iv) The name of the supplier of the shipment; and

(v) The name of the provider of other services.

(2) After June 21, 1978, all such information must be stated in positive, non-blacklisting, non-exclusionary terms except for information with respect to the names of carriers or routes of shipment, which may continue to be stated in negative terms in conjunction with shipments to a boycotting country, in order to comply with precautionary requirements protecting against war risks or confiscation. The purpose of this delayed effective date, which is provided by section 4A(a)(2)(B) of the Export Administration Act of 1969, as amended, is to allow time for persons to adjust their practices to the use of import and shipping documentation stated in positive rather than negative terms.

Examples of Compliance With Import and Shipping Document Requirements

The following examples are intended to give guidance in determining the circumstances in which compliance with the import requirements of a boycotting country is permissible. They are illustrative, not comprehensive.

(i) Boycotting country Y contracts with A, a U.S. petroleum equipment manufacturer, for certain equipment. Y requires that the goods being imported into Y must be accompanied by a certification that the goods being supplied did not originate in boycotted country X. Until June 21, 1978, A may comply with such import requirements in the terms requested. After June 21, 1978, A may not supply such a certification in negative terms but may identify instead the country of origin of the goods in positive terms only.

(ii) Same as (i), except that Y requires that the shipping documentation accompanying the goods specify the country of origin of the goods. A may furnish the information.

(iii) On February 1, 1978, A, a U.S. distributor, enters into a two-year contract with boycotting country Y to make monthly shipments of goods to Y. A clause in the contract requires that all shipments into the country must be accompanied by a certification that the goods did not originate in X, a country boycotted by Y.

A may supply such a negative certification until June 21, 1978. After that date, A may state the origin of the goods on the shipping or import documents in positive terms only.

(iv) A, a U.S. apparel manufacturer, has contracted to sell certain of its products to B, a national of boycotting country Y. The form that must be submitted to customs officials of Y requires the shipper to certify that the goods contained in the shipment have not been supplied by "blacklisted" persons. Until June 21, 1978, A may furnish the information required in the terms requested. After June 21, 1978, A may not furnish the information in negative terms but may certify, in positive terms only, the name of the supplier of the goods.

(v) Same as (iv), except the customs form requires certification that the insurer and freight forwarder used are not "blacklisted."

Until June 21, 1978, A may furnish the information required in the terms requested. After June 21, 1978, A may not comply with the request but may supply a certification stating, in positive terms only, the names of the insurer and freight forwarder.

(vi) A, a U.S. petrochemical manufacturer, executes a sales contract with B, a resident of boycotting country Y. A provision of A's contract with B requires that the bill of lading and other shipping documents contain certifications that the goods have not been shipped on a "blacklisted" carrier. Until June 21, 1978, A may furnish the information required in the terms requested. After June 21, 1978, A may not agree to supply a certification that the carrier is not "blacklisted" but may certify the name of the carrier in positive terms only.
(vii) Same as (vi), except that the contract requires certification that the goods will not be shipped on a carrier which flies the flag of, or is owned, chartered, leased, or operated by boycotted country X, or by nationals or residents of X.

Such a certification, which is a reasonable requirement to protect against war risks or confiscation, may be furnished at any time.

(viii) Same as (vi), except that the contract requires that the shipping documents certify the name of the carrier being used.

A may, at any time, supply or agree to supply the requested documentation regarding the name of the carrier, either in negative or positive terms.

(ix) Same as (vi), except that the contract requires a certification that the carrier will not call at a port in boycotted country X before making delivery in Y.

Such a certification, which is a reasonable requirement to protect against war risks or confiscation, may be furnished at any time.

(x) Same as (vi), except that the contract requires that the shipping documents indicate the name of the insurer and freight forwarder.

A may comply at any time, because the statement is not required to be made in negative or blacklisting terms.

(xi) A, a U.S. exporter, is negotiating a contract to sell bicycles to boycotting country Y. Y insists that A agree to certify that the goods will not be shipped on a vessel which has ever called at a port in boycotted country X.

As distinguished from a certification that goods will not be shipped on a vessel which will call en route at a port of boycotted country X, such a certification is not a reasonable requirement to protect against war risks or confiscation, and, hence, may not be supplied.

(xii) A, a U.S. exporter, sells some of its products to boycotting country Y. A foreign bank located in Y opens a letter of credit to pay for the goods. The letter of credit requires that A supply documentation certifying that "the goods are not manufactured in boycotted country X."

A may make the required certification until June 21, 1978, because import and shipping document requirements of a boycotting country may be reflected in letters of credit.

(d) Compliance with unilateral selection.

Compliance With Unilateral and Specific Selection

(1) A United States person may comply or agree to comply in the normal course of business with the unilateral and specific selection by a boycotting country, a national of a boycotting country, or a resident of a boycotting country (including a United States person who is a bona fide resident of a boycotting country) of carriers, insurers, suppliers of services to be performed within the boycotting country, or specific goods, provided that with respect to services, it is necessary and customary that an insignificant part of the services be performed within the boycotting country, and with respect to goods, the items, in the normal course of business, are identifiable as to their source or origin at the time of their entry into the boycotting country by uniqueness of design or appearance or trademark, trade name, or other identification normally on the items themselves, including their packaging.

(2) This exception pertains to what is permissible for a United States person who is the recipient of a unilateral and specific selection of goods or services to be furnished by a third person. It does not pertain to whether the act of making such a selection is permitted; that question is covered, with respect to United States persons, in paragraph (g) of this section on "Compliance with Local Law." Nor does it pertain to the United States person who is the recipient of an order to supply its own goods or services. Nothing in this part prohibits or restricts a United States person from filling an order himself, even if he is selected by the buyer on a boycott basis (e.g., because he is not blacklisted), so long as he does not himself take any action prohibited by this part.

Unilateral and Specific Character of the Selection

(3) In order for this exception to apply, the selection with which a United States person wishes to comply must be unilateral and specific.

(4) A "specific" selection is one which is stated in the affirmative and
which specifies a particular supplier of goods or services.

(5) A “unilateral” selection is one in which the discretion in making the selection is exercised by the boycotting country buyer. If the United States person who receives a unilateral selection has provided the buyer with any boycott-based assistance (including information for purposes of helping the buyer select someone on a boycott basis), then the buyer’s selection is not unilateral, and compliance with that selection by a United States person does not come within this exception.

(6) The provision of so-called “pre-selection” or “pre-award” services, such as providing lists of qualified suppliers, subcontractors, or bidders, does not, in and of itself, destroy the unilateral character of a selection, provided such services are not boycott-based. Lists of qualified suppliers, for example, must not exclude anyone because he is blacklisted. Moreover, such services must be of the type customarily provided in similar transactions by the firm (or industry of which the firm is a part) as measured by the practice in non-boycotting as well as boycotting countries. If such services are not customarily provided in similar transactions or such services are provided in such a way as to exclude blacklisted persons from participating in a transaction or diminish their opportunity for such participation, then the services may not be provided without destroying the unilateral character of any subsequent selection.

Selection To Be Made by Boycotting Country Resident

(7) In order for this exception to be available, the unilateral and specific selection must have been made by a boycotting country, or by a national or resident of a boycotting country. Such a resident may be a United States person. For purposes of this exception, a United States person will be considered a resident of a boycotting country only if he is a bona fide resident. A United States person may be a bona fide resident of a boycotting country even if such person’s residency is temporary.

(8) Factors that will be considered in determining whether a United States person is a bona fide resident of a boycotting country include:

(i) Physical presence in the country;
(ii) Whether residence is needed for legitimate business reasons;
(iii) Continuity of the residency;
(iv) Intent to maintain the residency;
(v) Prior residence in the country;
(vi) Size and nature of presence in the country;
(vii) Whether the person is registered to do business or incorporated in the country;
(viii) Whether the person has a valid work visa; and
(ix) Whether the person has a similar presence in both boycotting and non-boycotting foreign countries in connection with similar business activities.

NOTE TO PARAGRAPH (D)(8) OF THIS SECTION:
No one of the factors is dispositive. All the circumstances will be examined closely to ascertain whether there is, in fact, a bona fide residency. Residency established solely for purposes of avoidance of the application of this part, unrelated to legitimate business needs, does not constitute bona fide residency.

(9) The boycotting country resident must be the one actually making the selection. If a selection is made by a non-resident agent, parent, subsidiary, affiliate, home office or branch office of a boycotting country resident, it is not a selection by a resident within the meaning of this exception.

(10) A selection made solely by a bona fide resident and merely transmitted by another person to a United States person for execution is a selection by a bona fide resident within the meaning of this exception.

Duty of Inquiry

(11) If a United States person receives, from another person located in the United States, what may be a unilateral selection by a boycotting country customer, and knows or has reason to know that the selection is made for boycott reasons, he has a duty to inquire of the transmitting person to determine who actually made the selection. If he knows or has reason to know that the selection was made by other than a boycotting country, or a national or resident of a boycotting country, he may not comply. A course or pattern of conduct which a United
Bureau of Export Administration, Commerce

§ 760.3

States person recognizes or should recognize as consistent with boycott restrictions will create a duty to inquire.

(12) If the United States person does not know or have reason to know that the selection it receives is boycott-based, its compliance with such a selection does not offend any prohibition and this exception is not needed.

Selection of Services

(13) This exception applies only to compliance with selections of certain types of suppliers of services-carriers, insurers, and suppliers of services to be performed “within the boycotting country.” Services to be performed wholly within the United States or wholly within any country other than the boycotting country are not covered.

(14) For purposes of this part, services are to be performed “within the boycotting country” only if they are of a type which would customarily be performed by suppliers of those services within the country of the recipient of those services, and if the part of the services performed within the boycotting country is a necessary and not insignificant part of the total services performed.

(15) What is “customary and necessary” for these purposes depends on the usual practice of the supplier of the services (or the industry of which he is a part) as measured by the practice in non-boycotting as well as boycotting countries, except where such practices are instituted to accommodate this part.

Selection of Goods

(16) This exception applies only to compliance with selections of certain types of goods—goods that, in the normal course of business, are identifiable as to their source or origin at the time of their entry into the boycotting country. The definition of “specifically identifiable goods” is the same under this section as it is in paragraph (g) of this section on “Compliance with Local Law.”

(17) Goods “specifically identifiable” in the normal course of business are those items which at the time of their entry into a boycotting country are identifiable as to source or origin by uniqueness of design or appearance; or trademark, trade name, or other identification normally on the items themselves, including their packaging. Goods are “specifically identifiable” in the normal course of business if their source or origin is ascertainable by inspection of the items themselves, including their packaging, regardless of whether inspection takes place. Goods are not considered to be “specifically identifiable” in the normal course of business if a trademark, trade name, or other form of identification not normally present is added to the items themselves, including their packaging, to accommodate this part.

General

(18) If a unilateral selection meets the conditions described in paragraph (d) of this section, the United States person receiving the unilateral selection may comply or agree to comply, even if he knows or has reason to know that the selection was boycott-based. However, no United States person may comply or agree to comply with any unilateral selection if he knows or has reason to know that the purpose of the selection is to effect discrimination against any United States person on the basis of race, religion, sex, or national origin.

Examples of Compliance with a Unilateral Selection

The following examples are intended to give guidance in determining what constitutes a unilateral selection and the circumstances in which compliance with such a selection is permissible. They are illustrative, not comprehensive.

Specific and Unilateral Selection

(i) A, a U.S. manufacturer of road-grading equipment, is asked by boycotting country Y to ship goods to Y on U.S. vessel B, a carrier which is not blacklisted by Y. A knows or has reason to know that Y’s selection of B is boycott-based.

A may comply with Y’s request, or may agree to comply as a condition of the contract, because the selection is specific and unilateral.

(ii) A, a U.S. contractor building an industrial facility in boycotting country Y is asked by B, a resident of Y, to use C as the supplier of air conditioning equipment to be used in the facility. C is not blacklisted by country Y. A knows or has reason to know that B’s request is boycott-based.
§ 760.3  15 CFR Ch. VII (1–1–00 Edition)

A may comply with B's request, or may agree to comply as a condition of the contract, because the selection of C is specific and unilateral.

(i) A, a U.S. manufacturer of automotive equipment, is asked by boycotting country Y not to ship its goods to Y on U.S. carriers, B, C, or D. Carriers B, C, and D are blacklisted by boycotting country Y. A knows or has reason to know that Y's request is boycott-based.

A may not comply or agree to comply with Y's request, because no specific selection of any particular carrier has been made.

(ii) A, a U.S. exporter shipping goods ordered by boycotting country Y, is provided with a list of eligible U.S. insurers from which A may choose in insuring the shipment of its goods. A knows or has reason to know that the list was compiled on a boycott basis.

A may not comply or agree to comply with Y's request that A choose from among the eligible insurers, because no specific selection of any particular insurer has been made.

(iii) A, a U.S. aircraft manufacturer, is negotiating to sell aircraft to boycotting country Y. During the negotiations, Y asks A to identify the company which normally manufactures the engines for the aircraft. A responds that they are normally manufactured by U.S. engine manufacturer B. B is blacklisted by Y. In making the purchase, Y specifies that the engines for the aircraft should be supplied by U.S. engine manufacturer C. A may comply or agree to comply with Y's selection of C, because Y's selection is unilateral and specific.

(iv) A, a U.S. construction firm, is retained by an agency of boycotting country Y to build a pipeline. Y requests A to suggest qualified engineering firms to be used on-site in the construction of the pipeline. It is customary for A, regardless of where it conducts its operations, to identify qualified engineering firms to its customers so that its customers may make their own selection of the firm to be engaged. Choice of engineering firm is customarily a prerogative of the customer. A provides a list of five engineering firms, B-F, excluding no firm because it may be blacklisted, and then confers with and gives its recommendations to Y. A recommends C, because C is the best qualified. Y then selects B, because C is blacklisted.

A may comply with Y's selection of B, because the boycott-based decision is made by Y and is unilateral and specific. Since A's pre-award services are of the kind customarily provided in these situations, and since they are provided without reference to the boycott, they do not destroy the unilateral character of Y's selection.

(v) A, a U.S. aircraft manufacturer, has an order to supply a certain number of planes to boycotting country Y. In connection with the order, Y asks A to supply it with a list of qualified aircraft tire manufacturers so that Y can select the tires to be placed on the planes. This is a highly unusual request, since, in A's worldwide business operations, choice of tires is customarily made by the manufacturer, not the customer. Nonetheless, A supplies a list of tire manufacturers, B, C, D, and E. Y chooses tire manufacturer B because B is not blacklisted. Had A, as is customary, selected the tires, company C would have been chosen. C happens to be blacklisted, and A knows that C's blacklist status was the reason for Y's selection of B.

A's provision of a list of tire manufacturers for Y to choose from destroys the unilateral character of Y's selection, because such a pre-selection service is not customary in A's worldwide business operations.

(vi) A, a U.S. aircraft manufacturer, receives an order from U.S. company C, which is located in the United States, for the sale of aircraft to company D, a U.S. affiliate of C. D is a bona fide resident of boycotting country Y. C instructs A that "in order to avoid boycott problems," A must use engines that are manufactured by company B, a company that is not blacklisted by Y. Engines built by B are unique in design and also bear B's trade name.

Since A has reason to know that the selection is boycott-based, he must inquire of C whether the selection was in fact made by D. If C informs A that the selection was made by D, A may comply.

(vii) A, a U.S. aircraft manufacturer, is advising boycotting country Y on the selection of a contracting firm to construct a plant for the manufacture of agricultural chemicals. As is customary in its business, A compiles a list of potential contractors on the basis of its evaluation of the capabilities of the respective candidates to perform the job. A has knowledge that company B is blacklisted, but provides Y with the names of companies B, C, D, and E, listing them in order of their qualifications. Y instructs A to negotiate with C.

A may comply with Y's instruction, because Y's selection is unilateral and specific.
(xii) A, a U.S. exporter, is asked by boycotting country Y to ship goods on carriers B, C, or D, which are owned by nationals of and are registered in country P, a country not boycotted by Y.

A may comply or agree to comply with Y's request even though the selection is not specific, because A does not know or have reason to know that the request is boycott-based.

(NOTE: In example (xii), A has violated no prohibition, because it does not know or have reason to know that Y's instruction is boycott-based. Therefore, A could not act with the requisite intent to comply with the boycott.)

(xiii) A, a U.S. construction company, receives a contract to construct a hotel in boycotting country Y. As part of the contract, A is required to furnish Y with lists of qualified suppliers of various specifically identifiable items. A compiles lists of various qualified suppliers wholly without reference to the boycott, and thereafter Y instructs A to negotiate with, enter into contracts with, and arrange for delivery from each of the suppliers which Y designates. A knows that Y's choices are made on a boycott basis.

A may comply with Y's selections and carry out the post-award services for Y, because Y's selections were unilateral and specific and A's pre-award services were provided without reference to Y's boycott.

EXAMPLES OF BOYCOTTING COUNTRY BUYER

(The factors in determining whether a United States person is a "bona fide resident" of a boycotting country are the same as in paragraph (g) of this section on "Compliance with Local Law." See also the examples in that section.)

(i) A, a U.S. exporter, is asked by B, a U.S. person who is a bona fide resident of boycotting country Y, to ship goods on U.S. carrier C. C is not blacklisted by Y, and A knows that B has chosen on a boycott basis in order to comply with Y's boycott laws.

A may comply or agree to comply with B's request, because B is a bona fide resident of Y.

(ii) A is a U.S. computer company whose subsidiary, B, is a bona fide resident of boycotting country Y. A receives an order from B for specific, identifiable products manufactured by company C in connection with a computer which B is installing in Y.

A may comply or agree to comply with B's unilateral and specific selection, so long as the discretion was in fact exercised by B, not A.

(NOTE: Unilateral selection transactions involving related United States persons will be scrutinized carefully to ensure that the selection was in fact made by the bona fide resident of the boycotting country.)

(iii) A, a U.S. engineering firm, has chief engineer B as its resident engineer on a dam construction site in boycotting country Y. B's presence at the site is necessary in order to ensure proper supervision of the project. In order to comply with local law, B selects equipment supplier C rather than D, who is blacklisted, and directs A to purchase certain specific equipment from C for use in the project.

A may comply with this unilateral selection, because the decision was made by a bona fide resident of Y.

(As noted above, unilateral selections involving related United States persons will be scrutinized carefully to ensure that the selection was in fact made by the bona fide resident of the boycotting country.)

(iv) B, a branch of U.S. bank A, is located in boycotting country Y. B is in need of office supplies and asks the home office in New York to make the necessary purchases. A contacts C, a U.S. company in the office supply business, and instructs C to purchase various items from certain specific companies and ship them directly to B. In order to avoid any difficulties for B with respect to Y's boycott laws, A is careful to specify only non-blacklisted companies or suppliers.

C knows that that was A's purpose. C may not comply with A's instruction, because the selection of suppliers was not made by a resident of a boycotting country.

(v) Same as (iv), except that A has given standing instructions to B that whenever it needs office supplies, it should specify certain suppliers designated by A. To avoid running afoul of Y's boycott laws, A's designations consist exclusively of non-blacklisted firms. A receives an order from B with the suppliers designated in accordance with A's instructions.

A may not comply with B's selection, because the selection was not in fact made by a bona fide resident of the boycotting country, but by a person located in the United States.

EXAMPLES OF SUPPLIERS OF SERVICES

(i) A, a U.S. manufacturer, is asked by boycotting country Y to ship goods to Y on U.S. vessel B, a carrier which is not blacklisted by Y.

A may comply or agree to comply with Y's request, because compliance with the unilateral and specific selection of carriers is expressly permitted under this exception.

(ii) A, a U.S. exporter shipping goods ordered by C, a national of boycotting country Y, is asked by C to insure the shipment through U.S. insurer B.

A may comply or agree to comply with C's request, because compliance with the unilateral and specific selection of an insurer is expressly permitted under this exception.

487
Such visits are necessary from B’s point of view because they make it possible for Y to discuss possible design changes should deficiencies be detected. A may not comply with Y’s selection of B, because the services which B would perform in Y are an insignificant part of the total services to be performed by B.

**Examples of Specifically Identifiable Goods**

(The test of what constitutes “specifically identifiable goods” under this exception also applies to the term “specifically identifiable goods” as used in paragraph (g) of this section on “Compliance with Local Law.”)

(i) A, a U.S. contractor, is constructing an apartment complex, on a turnkey basis, for boycotting country Y. Y instructs A to use only kitchen appliances manufactured by U.S. company B in completing the project. The appliances normally bear the manufacturer’s name and trademark.

(ii) Same as (i), except that Y directs A to purchase road graders only from manufacturer C because other road grader manufacturers which A might use are blacklisted. C’s road graders normally bear C’s insignia.

(iii) B, a U.S. contractor who is a bona fide resident of boycotting country Y, is engaged in building roads. B retains the services of A, a U.S. engineering firm, to assist it in procuring construction equipment. B directs A to purchase road graders only from manufacturer C because other road grader manufacturers which A might use are blacklisted. C’s road graders normally bear C’s insignia.

(iv) A, a U.S. company, manufactures computer-operated machine tools. The computers are mounted on a separate bracket on the side of the equipment and are readily identifiable by brand name imprinted on the equipment. There are five or six U.S. manufacturers of such computers which will function interchangeably to operate the machine tools manufactured by A. B, a resident of boycotting country Y, contracts to buy the machine tools manufactured by A on the condition that A incorporate, as the computer drive, a computer manufactured by
A may comply with B's selection, because the goods selected are identifiable as to their source or origin in the normal course of business at the time of their entry into Y. A may not comply or agree to comply with B's designation of C, because the goods selected are identifiable as to source or origin in the normal course of business at the time of their entry into Y.

(1) A United States person may comply or agree to comply with the export requirements of a boycotting country with respect to shipments or transshipments of exports to:

(i) A boycotted country;

(ii) Any business concern of a boycotted country;

(iii) Any business concern organized under the laws of a boycotted country; or

(iv) Any national or resident of a boycotted country.

(2) This exception permits compliance with restrictions which a boycotting country may place on direct exports to a boycotting country; on indirect exports to a boycotting country (i.e., those that pass via third parties); and on exports to residents, nationals, or business concerns of, or organized under the laws of, a boycotted country, including those located in third countries.

(3) This exception also permits compliance with restrictions which a boycotting country may place on the route of export shipments when the restrictions are reasonably related to preventing the export shipments from coming into contact with or under the jurisdiction of the boycotted country.

U.S. company C. B’s designation of C is made to avoid boycott problems which could be caused if computers manufactured by some other company were used.

B may comply with B’s selection ofsteel beams, because the goods are not identifiable as to source or origin by trade name, trademark, uniqueness or packaging at the time of their entry into Y.

(4) This exception also permits compliance with restrictions which a boycotting country may place on the route of export shipments when the restrictions are reasonably related to preventing the export shipments from coming into contact with or under the jurisdiction of the boycotted country.

(5) A, a U.S. wholesaler of electronic equipment, receives an order from B, a U.S. manufacturer of radio equipment, who is a bona fide resident of boycotting country Y. B orders a variety of electrical components and specifies that all transistors must be purchased from company C, which is not blacklisted by Y. The transistors requested by B do not normally bear the name of the manufacturer; however, they are typically shipped in cartons, and C’s name and logo appear on the cartons.

A may comply with B’s selection, because the goods selected by B are identifiable as to their source or origin in the normal course of business at the time of their entry into Y by virtue of the container or packaging used.

(6) A, a U.S. computer manufacturer, receives an order for a computer from B, a university in boycotting country Y. B specifies that certain integrated circuits incorporated in the computer must be supplied by U.S. electronics company C. These circuits are incorporated into the computer and are not visible without disassembling the computer.

A may not comply or agree to comply with B’s specific selection of these components, because they are not identifiable as to their source or origin in the normal course of business at the time of their entry into Y.

(7) A, a U.S. clothing manufacturer, receives an order for shirts from B, a retailer resident in boycotting country Y. B specifies that the shirts are to be manufactured from cotton produced by U.S. farming cooperative C. Such shirts will not identify C or the source of the cotton.

A may not comply or agree to comply with B’s designation, because the cotton is not identifiable as to source or origin in the normal course of business at the time of entry into Y.

(8) A, a U.S. contractor, is retained by B, a construction firm located in and wholly-owned by boycotting country Y, to assist B in procuring construction materials. B directs A to purchase a range of materials, including hardware, tools, and trucks, all of which bear the name of the manufacturer stamped on the item. In addition, B directs A to purchase steel beams manufactured by U.S. company C. The name of manufacturer C normally does not appear on the steel itself or on its export packaging.

A may comply with B’s selection of the hardware, tools, and trucks, because they are identifiable as to source or origin in the normal course of business at the time of entry into Y. A may not comply with B’s selection of steel beams, because the goods are not identifiable as to source or origin by trade name, trademark, uniqueness or packaging at the time of their entry into Y.

EXAMPLES OF DISCRIMINATION ON BASIS OF RACE, RELIGION, SEX, OR NATIONAL ORIGIN

(i) A, a U.S. paper manufacturer, is asked by boycotting country Y to ship goods to Y on U.S. vessel B. Y states that the reason for its choice of B is that, unlike U.S. vessel C, B is not owned by persons of a particular faith.

A may not comply or agree to comply with Y’s request, because A has reason to know that the purpose of the selection is to effect religious discrimination against a United States person.

(e) Shipment and transshipment of exports pursuant to a boycotting country’s requirements.

COMPLIANCE WITH A BOYCOTTING COUNTRY’S REQUIREMENTS REGARDING SHIPMENT AND TRANSSHIPMENT OF EXPORTS

(1) A United States person may comply or agree to comply with the export requirements of a boycotting country with respect to shipments or transshipments of exports to:

(i) A boycotted country;

(ii) Any business concern of a boycotted country;

(iii) Any business concern organized under the laws of a boycotted country; or

(iv) Any national or resident of a boycotted country.
§ 760.3

This exception applies whether a boycotting country or the vendor of the shipment:

(i) Explicitly states that the shipment should not pass through the boycotted country enroute to its final destination; or

(ii) Affirmatively describes a route of shipment that does not include the boycotted country.

(4) A United States person may not, under this exception, refuse on an across-the-board basis to do business with a boycotted country or a national or resident of a boycotted country.

Examples of Compliance With a Boycotting Country’s Requirements Regarding Shipment or Transshipment of Exports

The following examples are intended to give guidance in determining the circumstances in which compliance with the export requirements of a boycotting country is permissible. They are illustrative, not comprehensive.

(i) A, a U.S. petroleum company, exports petroleum products to 20 countries, including the United States, from boycotting country Y. Country Y’s export regulations require that products not be exported from Y to boycotted country X.

A may agree to and comply with Y’s regulations with respect to the export of goods from Y to X.

(ii) Same as (i), except that Y’s export regulations require that goods not be exported from boycotting country Y to any business concern organized under the laws of boycotted country X.

A may agree to and comply with Y’s regulations with respect to the export of goods from Y to a business concern organized under the laws of X, even if such concern is located in a country not involved in Y’s boycott of X.

(iii) B, the operator of a storage facility in country M, contracts with A, a U.S. carrier, for the shipment of certain goods manufactured in boycotting country Y. A’s contract with B contains a provision stating that the goods to be transported may not be shipped or transshipped to boycotted country X. B informs A that this provision is a requirement of C, the manufacturer of goods who is a resident of boycotting country Y. Country M is not boycotted by Y.

A may agree to and comply with this provision, because such a provision is required by the export regulations of boycotting country Y in order to prevent shipment of Y-origin goods to a country boycotted by Y.

(iv) A, a U.S. petroleum refiner located in the United States, purchases crude oil from boycotting country Y. A has a branch operation in boycotted country X. Y requires, as a condition of sale, that A agree not to ship or transship the crude oil or products refined in Y to A’s branch in X.

A may agree to and comply with these requirements, because they are export requirements of Y designed to prevent Y-origin products from being shipped to a boycotted country.

(v) A, a U.S. company, has a petrochemical plant in boycotting country Y. As a condition of securing an export license from Y, A must agree that it will not ship or permit transshipment of any of its output from the plant in Y to any companies which Y lists as being owned by nationals of boycotted country X.

A may agree to this condition, because it is a restriction designed to prevent Y-origin products from being exported to a business concern of boycotted country X or to nationals of boycotted country X.

(vi) Same as (v), except that the condition imposed on A is that Y-origin goods may not be shipped or permitted to be transshipped to any companies which Y lists as being owned by persons whose national origin is X.

A may not agree to this condition, because it is a restriction designed to prevent Y-origin goods from being exported to persons of a particular national origin rather than to residents or nationals of a particular boycotted country.

(vii) A, a U.S. petroleum company, exports petroleum products to 20 countries, including the United States, from boycotting country Y. Y requires, as a condition of sale, that A not ship the products to be exported from Y to or through boycotted country X.

A may agree to and comply with this requirement because it is an export requirement of Y designed to prevent Y-origin products from coming into contact with or under the jurisdiction of a boycotted country.

(viii) Same as (vii), except that boycotting country Y’s export regulations require that products to be exported from Y not pass through a port of boycotted country X.

A may agree to and comply with Y’s regulations prohibiting Y-origin exports from passing through a port at boycotted country X, because they are export requirements of Y designed to prevent Y-origin products from coming into contact with or under the jurisdiction of a boycotted country.

(ix) Same as (vii), except that Y’s export regulations require that A not transship the exported products “in or at” boycotted country X.

A may agree to and comply with Y’s regulations with respect to the transshipment of goods “in or at” X, because they are export requirements of Y designed to prevent Y-origin products from coming into contact with or under the jurisdiction of a boycotted country.
(f) Immigration, passport, visa, or employment requirements of a boycotting country.

**Compliance With Immigration, Passport, Visa, or Employment Requirements of a Boycotting Country**

(1) A United States individual may comply or agree to comply with the immigration, passport, visa, or employment requirements of a boycotting country, and with requests for information from a boycotting country made to ascertain whether such individual meets requirements for employment within the boycotting country, provided that he furnishes information only about himself or a member of his family, and not about any other United States individual, including his employees, employers, or co-workers.

(2) For purposes of this section, a United States individual means a person who is a resident or national of the United States. Family means immediate family members, including parents, siblings, spouse, children, and other dependents living in the individual’s home.

(3) A United States person may not furnish information about its employees or executives, but may allow any individual to respond on his own to any request for information relating to immigration, passport, visa, or employment requirements. A United States person may also perform any ministerial acts to expedite processing of applications by individuals. These include informing employees of boycotting country visa requirements at an appropriate time; typing, translation, messenger and similar services; and assisting or arranging for the expeditious processing of applications. All such actions must be undertaken on a non-discriminatory basis.

(4) A United States person may proceed with a project in a boycotting country even if certain of its employees or other prospective participants in a transaction are denied entry for boycott reasons. But no employees or other participants may be selected in advance in a manner designed to comply with a boycott.

**Examples of Compliance With Immigration, Passport, Visa, or Employment Requirements of a Boycotting Country**

The following examples are intended to give guidance in determining the circumstances in which compliance with immigration, passport, visa, or employment requirements is permissible. They are illustrative, not comprehensive.

(i) A, a U.S. individual employed by B, a U.S. manufacturer of sporting goods with a plant in boycotting country Y, wishes to obtain a work visa so that he may transfer to the plant in Y. Country Y’s immigration laws specify that anyone wishing to enter the country or obtain a visa to work in the country must supply information about his religion. This information is required for boycott purposes.

A may furnish such information, because it is required by Y’s immigration laws.

(ii) Same as (i), except that A is asked to supply such information about other employees of B.

A may not supply this information, because it is not information about himself or his family.

(iii) A, a U.S. building contractor, has been awarded a construction contract to be performed in boycotting country Y. Y’s immigration laws require that individuals applying for visas must indicate race, religion, and place of birth. The information is sought for boycott purposes. To avoid repeated rejections of applications for work visas by A’s employees, A desires to furnish to country Y a list of its prospective and current employees and required information about each so that Y can make an initial screening.

A may not furnish such a list, because A would be furnishing information about the race, religion, and national origin of its employees.

(iv) Same as (iii), except that A selects for work on the project those of its current employees whom it believes will be granted work visas from boycotting country Y.

A may not make a selection from among its employees in a manner designed to comply with the boycott-based visa requirements of Y, but must allow all eligible employees to apply for visas. A may later substitute an employee who obtains the necessary visa for one who has had his application rejected.

(v) Same as (iii), except that A selects employees for the project and then allows each employee individually to apply for his own visa. Two employees’ applications are rejected, and A then substitutes two other employees who, in turn, submit their own visa applications.

A may take such action, because in so doing A is not acting in contravention of any prohibition of this part.

(vi) Same as (v), except that A arranges for the translation, typing and processing of its
employees' applications, and transmits all the applications to the consulate of boycotting country Y.

A may take such ministerial actions, because in so doing A is not itself furnishing information with respect to race, religion, sex, or national origin, but is merely transmitting information furnished by its individual employees.

(vii) A, a U.S. contractor, selects U.S. subcontractor B to perform certain engineering services in connection with A's project in boycotting country Y. The work visa application submitted by the employee B has proposed as chief engineer of this project is rejected by Y because his national origin is of boycotted country X. Subcontractor B thereupon withdraws.

A may continue with the project and select another subcontractor, because A is not acting in contravention of any prohibition of this part.

(g) Compliance with local law. (1) This exception contains two parts. The first covers compliance with local law with respect to a United States person's activities exclusively within a foreign country; the second covers compliance with local import laws by United States persons resident in a foreign country. Under both parts of this exception, local laws are laws of the host country, whether derived from statutes, regulations, decrees, or other official sources having the effect of law in the host country. This exception is not available for compliance with presumed policies or understandings of policies unless those policies are reflected in official sources having the effect of law.

(2) Both parts of this exception apply only to United States persons resident in a foreign country. For purposes of this exception, a United States person will be considered to be a resident of a foreign country only if he is a bona fide resident. A United States person may be a bona fide resident of a foreign country even if such person's residency is temporary.

(3)(i) Factors that will be considered in determining whether a United States person is a bona fide resident of a foreign country include:

(A) Physical presence in the country;
(B) Whether residence is needed for legitimate business reasons;
(C) Continuity of the residency;
(D) Intent to maintain the residency;
(E) Prior residence in the country;
(F) Size and nature of presence in the country;
(G) Whether the person is registered to do business or incorporated in the country;
(H) Whether the person has a valid work visa; and
(I) Whether the person has a similar presence in both boycotting and non-boycotting foreign countries in connection with similar business activities.

(ii) No one of the factors in paragraph (g)(3) of this section is dispositive. All the circumstances involved will be closely examined to ascertain whether there is, in fact, bona fide residency. Residency established solely for purposes of avoidance of the application of this part, unrelated to legitimate business needs, does not constitute bona fide residency.

EXAMPLES OF BONA FIDE RESIDENCY
The following examples are intended to give guidance in determining the circumstances in which a United States person may be a bona fide resident of a foreign country. For purposes of illustration, each example discusses only one or two factors, instead of all relevant factors. They are illustrative, not comprehensive.

(i) A, a U.S. radio manufacturer located in the United States, receives a tender to bid on a contract to supply radios for a hotel to be built in boycotting country Y. After examining the proposal, A sends a bid from its New York office to Y.

A is not a resident of Y, because it is not physically present in Y.

(ii) Same as (i), except that after receiving the tender, A sends its sales representative to Y. A does not usually have sales representatives in countries when it bids from the United States, and this particular person’s presence in Y is not necessary to enable A to make the bid.

A is not a bona fide resident of Y, because it has no legitimate business reasons for having its sales representative in Y.

(iii) A, a U.S. bank, wishes to establish a permanent branch office in Y. In pursuit of that objective, A’s personnel visit Y to make the necessary arrangements. A intends to establish a permanent branch office in Y after the necessary arrangements are made.

A’s personnel in Y are not bona fide residents of Y, because A does not yet have a permanent business operation in Y.

(iv) Same as (iii), except A’s personnel are required by Y’s laws to furnish certain nondiscriminatory boycott information in order to establish a branch in Y.
Bureau of Export Administration, Commerce

§ 760.3

In these limited circumstances, A’s personnel may furnish the non-discriminatory boycott information necessary to establish residency to the same extent a U.S. person who is a bona fide resident in that country could. If this information could not be furnished in such limited circumstances, the exception would be available only to firms residing in a boycotting country before the effective date of this part.

(v) A, a U.S. construction company, receives an invitation to build a power plant in boycotting country Y. After receipt of the invitation, A’s personnel visit Y in order to survey the site and make necessary analyses in preparation for submitting a bid. The invitation requires that otherwise prohibited boycott information be furnished with the bid.

A’s personnel in Y are not bona fide residents of Y, because A has no permanent business operation in Y. Therefore, A’s personnel may not furnish the prohibited information.

(vi) Same as (v), except that A is considering establishing an office in boycotting country Y. A’s personnel visit Y in order to register A to do business in that country. A intends to establish ongoing construction operations in Y. A’s personnel are required by Y’s laws to furnish certain non-discriminatory boycott information in order to register A to do business or incorporate a subsidiary in Y.

In these limited circumstances, A’s personnel may furnish non-discriminatory boycott information necessary to establish residency to the same extent a U.S. person who is a bona fide resident in that country could. If this information could not be furnished in such limited circumstances, the exception would be available only to firms resident in a boycotting country before the effective date of this part.

(vii) A, a subsidiary of U.S. oil company B, is located in boycotting country Y. A has been engaged in oil explorations in Y for a number of years. A is a bona fide resident of Y, because of its pre-existing continuous presence in Y for legitimate business reasons.

(viii) Same as (vii), except that A has just been established in Y and has not yet begun operations.

A is a bona fide resident of Y, because it is present in Y for legitimate business reasons and it intends to reside continuously.

(ix) U.S. company A is a manufacturer of prefabricated homes. A builds a plant in boycotting country Y for purposes of assembling components made by A in the United States and shipped to Y.

A’s personnel in Y are bona fide residents of Y, because A’s plant in Y is established for legitimate business reasons, and it intends to reside continuously.

(x) U.S. company A has its principal place of business in the United States. A’s sales agent visits boycotting country Y from time to time for purposes of soliciting orders.

A’s sales agent is not a bona fide resident of Y, because such periodic visits to Y are insufficient to establish residency.

(xi) A, a branch office of U.S. construction company B, is located in boycotting country Y. The branch office has been in existence for a number of years and has been performing various management services in connection with B’s construction operations in Y.

A is a bona fide resident of Y, because of its longstanding presence in Y and its conduct of ongoing operations in Y.

(xii) U.S. construction company A has never done any business in boycotting country Y. It is awarded a contract to construct a hospital in Y, and preparatory to beginning construction, sends its personnel to Y to set up operations.

A’s personnel are bona fide residents of Y, because they are present in Y for the purposes of carrying out A’s legitimate business purposes; they intend to reside continuously; and residency is necessary to conduct their business.

(xiii) U.S. company A manufactures furniture. All its sales in foreign countries are conducted from its offices in the United States. From time to time A has considered opening sales offices abroad, but it has concluded that it is more efficient to conduct sales operations from the United States.

Shortly after the effective date of this part, A sends a sales representative to boycotting country Y to open an office in and solicit orders from Y. It is more costly to conduct operations from that office than to sell directly from the United States, but A believes that if it establishes a residence in Y, it will be in a better position to avoid conflicts with U.S. law in its sales to Y.

A’s sales representative is not a bona fide resident of Y, because the residency was established to avoid the application of this part and not for legitimate business reasons.

(xiv) Same as (xiii), except that it is in fact more efficient to have a sales office in Y. In fact, without a sales office in Y, A would find it difficult to exploit business opportunities in Y. A is aware, however, that residency in Y would permit its sales representative to comply with Y’s boycott laws.

A’s sales representative is a bona fide resident of Y, because A has a legitimate business reason for establishing a sales office in Y.

(xv) U.S. company B is a computer manufacturer. B sells computers and related programming services tailored to the needs of individual clients. Because of the complex nature of the product, B must have sales representatives in any country where sales are made. B has a sales representative, A, in boycotting country Y. A spends two months of the year in Y, and the rest of the year in...
other countries. B has a permanent sales office from which A operates while in Y, and the sales office is stocked with brochures and other sales materials. 

A is a bona fide resident of Y, because his presence in Y is necessary to carry out B’s legitimate business purposes; B maintains a permanent office in Y; and B intends to continue doing business in Y in the future.

(xvi) A, a U.S. construction engineering company, is engaged by B, a U.S. general contracting company, to provide services in connection with B’s contract to construct a hospital complex in boycotting country Y. In order to perform those services, A’s engineers set up a temporary office in a trailer on the construction site in Y. A’s work is expected to be completed within six months.

A’s personnel in Y are bona fide residents of Y, because A’s on-site office is necessary to the performance of its services for B, and because A’s personnel are continuously there.

(xvii) A, a U.S. company, sends one of its representatives to boycotting country Y to explore new sales possibilities for its line of transistor radios. After spending several weeks in Y, A’s representative rents a post office box in Y, to which all persons interested in A’s products are directed to make inquiry.

A is not a bona fide resident of Y, because rental of a post office box is not a sufficient presence in Y to constitute residency.

(xviii) A, a U.S. computer company, has a patent and trademark registered in the United States. In order to obtain registration of its patent and trademark in boycotting country Y, A is required to furnish certain non-discriminatory boycott information.

A may not furnish the information, because A is not a bona fide resident of Y.

(h) Activities exclusively within a foreign country. (1) Any United States person who is a bona fide resident of a foreign country, including a boycotting country, may comply or agree to comply with the laws of that country with respect to his activities exclusively within that country. These activities include:

(i) Entering into contracts which provide that local law applies or governs, or that the parties will comply with such laws;

(ii) Employing residents of the host country;

(iii) Retaining local contractors to perform work within the host country;

(iv) Purchasing or selling goods or services from or to residents of the host country; and

(v) Furnishing information within the host country.

(2) Activities exclusively within the country do not include importing goods or services from outside the host country, and, therefore, this part of the exception does not apply to compliance with import laws in connection with importing goods or services.

Examples of Permissible Compliance With Local Law With Respect to Activities Exclusively Within a Foreign Country

The following examples are intended to give guidance in determining the circumstances in which compliance with local law is permissible. They are illustrative, not comprehensive.

Activities Exclusively Within a Foreign Country

(i) U.S. construction company A, a bona fide resident of boycotting country Y, has a contract to build a school complex in Y. Pursuant to Y’s boycott laws, the contract requires A to refuse to purchase supplies from certain local merchants. While Y permits such merchants to operate within Y, their freedom of action in Y is constrained because of their relationship with boycotted country X.

A may enter into the contract, because dealings with local merchants are activities exclusively within Y.

(ii) A, a banking subsidiary of U.S. bank B, is a bona fide resident of boycotting country Y. From time to time, A purchases office supplies from the United States.

A’s purchase of office supplies is not an activity exclusively within Y, because it involves the import of goods from abroad.

(iii) A, a branch of U.S. bank B, is a bona fide resident of boycotting country Y. Under Y’s boycott laws, A is required to supply information about whether A has any dealings with boycotted country X. A compiles and furnishes the information within Y and does so of its own knowledge.

A may comply with that requirement, because in compiling and furnishing the information within Y, based on its own knowledge, A is engaging in an activity exclusively within Y.

(iv) Same as (iii), except that A is required to supply information about B’s dealings with X. From its own knowledge and without making any inquiry of B, A compiles and furnishes the information.

A may comply with that requirement, because in compiling and furnishing the information within Y, based on its own knowledge, A is engaging in an activity exclusively within Y.
(v) Same as (iv), except that in making its responses, A asks B to compile some of the information.
A may not comply, because the gathering of the necessary information takes place partially outside Y.
(vi) U.S. company A has applied for a license to establish a permanent manufacturing facility in boycotting country Y. Under Y’s boycott law, A must agree, as a condition of the license, that it will not sell any of its output to blacklisted foreign firms.
A may not comply, because the agreement would govern activities of A which are not exclusively within Y.

DISCRIMINATION AGAINST UNITED STATES PERSONS

(i) A, a subsidiary of U.S. company B, is a bona fide resident of boycotting country Y. A manufactures air conditioners in its plant in Y. Under Y’s boycott laws, A must agree not to hire nationals of boycotted country X. A may agree to the restriction and may abide by it with respect to its recruitment of individuals within Y, because the recruitment of such individuals is an activity exclusively within Y. However, A cannot abide by this restriction with respect to its recruitment of individuals outside Y, because this is not an activity exclusively within Y.
(ii) Same as (i), except that pursuant to Y’s boycott laws, A must agree not to hire anyone who is of a designated religion.
A may not agree to this restriction, because the agreement calls for discrimination against U.S. persons on the basis of religion. It makes no difference whether the recruitment of the U.S. persons occurs within or without Y.
(NOTE: The exception for compliance with local law does not apply to boycott-based refusals to employ U.S. persons on the basis of race, religion, sex, or national origin even if the activity is exclusively within the boycotting country.)

(i) Compliance with local import law.
(1) Any United States person who is a bona fide resident of a foreign country, including a boycotting country, may, in importing goods, materials or components into that country, comply or agree to comply with the import laws of that country, provided that:
(i) The items are for his own use or for his use in performing contractual services within that country; and
(ii) In the normal course of business, the items are identifiable as to their source or origin at the time of their entry into the foreign country by:
(a) Uniqueness of design or appearance; or
(b) Trademark, trade name, or other identification normally on the items themselves, including their packaging.
(2) The factors that will be considered in determining whether a United States person is a bona fide resident of a foreign country are those set forth in paragraph (g) of this section. Bona fide residence of a United States company’s subsidiary, affiliate, or other permanent establishment in a foreign country does not confer such residence on such United States company. Likewise, bona fide residence of a United States company’s employee in a foreign country does not confer such residence on the entire company.
(3) A United States person who is a bona fide resident of a foreign country may take action under this exception through an agent outside the country, but the agent must act at the direction of the resident and not exercise his own discretion. Therefore, if a United States person resident in a boycotting country takes action to comply with a boycotting country’s import law with respect to the importation of qualified goods, he may direct his agent in the United States on the action to be taken, but the United States agent himself may not exercise any discretion.

(4) For purposes of this exception, the test that governs whether goods or components of goods are specifically identifiable is identical to the test applied in paragraph (c) of this section on “Compliance With Unilateral Selection” to determine whether they are identifiable as to their source or origin in the normal course of business.

(5) The availability of this exception for the import of goods depends on whether the goods are intended for the United States person’s own use at the time they are imported. It does not depend upon who has title to the goods at the time of importation into a foreign country.
(6) Goods are for the United States person’s own use (including the performance of contractual services within the foreign country) if:
(i) They are to be consumed by the United States person;
(ii) They are to remain in the United States person’s possession and to be used by that person;
§ 760.3

(iii) They are to be used by the United States person in performing contractual services for another;

(iv) They are to be further manufactured, incorporated into, refined into, or reprocessed into another product to be manufactured for another; or

(v) They are to be incorporated into, or permanently affixed as a functional part of, a project to be constructed for another.

(7) Goods acquired to fill an order for such goods from another are not for the United States person's own use. Goods procured for another are not for one's own use, even if the furnishing of procurement services is the business in which the United States person is customarily engaged. Nor are goods obtained for simple resale acquired for one's own use, even if the United States person is engaged in the retail business. Likewise, goods obtained for inclusion in a turnkey project are not for one's own use if they are not customarily incorporated into, or do not customarily become permanently affixed as a functional part of the project.

(8) This part of the local law exception does not apply to the import of services, even when the United States person importing such services is a bona fide resident of a boycotting country and is engaged in the retail business. Likewise, goods obtained for inclusion in a turnkey project are not for one's own use if they are not customarily incorporated into, or do not customarily become permanently affixed as a functional part of the project.

(9) Use of this exception will be monitored and continually reviewed to determine whether its continued availability is consistent with the national interest. Its availability may be limited or withdrawn as appropriate. In reviewing the continued availability of this exception, the effect that the inability to comply with local import laws would have on the economic and other relations of the United States with boycotting countries will be considered.

(10) A United States person who is a bona fide resident of a foreign country may comply or agree to comply with the host country's import laws even if he knows or has reason to know that particular laws are boycott-related. However, no United States person may comply or agree to comply with any host country law which would require him to discriminate against any United States person on the basis of race, religion, sex, or national origin, or to supply information about any United States person's race, religion, sex, or national origin.

Examples of Permissible Compliance With Local Import Law

The following examples are intended to give guidance in determining the circumstances in which compliance with local import law is permissible. They are illustrative, not comprehensive.

Compliance by a Bona Fide Resident

(i) A, a subsidiary of U.S. company B, is a bona fide resident of boycotting country Y and is engaged in oil drilling operations in Y. In acquiring certain large, specifically identifiable products for carrying out its operations in Y, A chooses only from non-blacklisted firms because Y's import laws prohibit the importation of goods from blacklisted firms. However, with respect to smaller items, B makes the selection on behalf of A and sends them to A in Y. A may choose from non-blacklisted firms, because it is a U.S. person who is a bona fide resident in Y. However, because B is not resident in Y, B cannot make boycott-based selections to conform with Y's import laws prohibiting the importation of goods from blacklisted firms.

(ii) Same as (i), except that after making its choices on the larger items, A directs B to carry out its instructions by entering into appropriate contracts and making necessary shipping arrangements.

B may carry out A's instructions provided that A, a bona fide resident of Y, has in fact made the choice and B is exercising no discretion, but is acting only as A's agent.

(Note: Such transactions between related companies will be scrutinized carefully. A must in fact exercise the discretion and make the selections. If the discretion is exercised by B, B would be in violation of this part.)

(iii) U.S. construction company A has a contract to build a school in boycotting country Y. A's employees set up operations in Y for purposes of commencing construction. A's employees in Y advise A's headquarters in the United States that Y's import laws prohibit importation of goods manufactured by blacklisted firms. A's headquarters then issues invitations to bid only to non-blacklisted firms for certain specifically identifiable goods.
A's headquarters’ choice of non-blacklisted suppliers is not a choice made by a U.S. person who is a bona fide resident of Y, because the discretion in issuing the bids was exercised in the United States, not in Y.

(iv) Same as (iii), except that A’s employees in Y actually make the decision regarding to whom the bids should be issued.

Imports of items listed in the project that A’s employees are choices made by U.S. persons who are bona fide residents of Y, because the discretion in choosing was exercised solely in Y.

(NOTE: Choices purportedly made by employees of U.S. companies who are resident in boycotting countries will be carefully scrutinized to ensure that the discretion was exercised entirely in the boycotting country.)

SPECIFICALLY IDENTIFIABLE GOODS

The test and examples as to what constitutes specifically identifiable goods are identical to those applicable under paragraph (d) of this section on “Compliance With Unilateral Selection.”

IMPORTS FOR U.S. PERSON’S OWN USE

(i) A, a subsidiary of U.S. company B, is a bona fide resident of boycotting country Y. A plans to import computer operated machine tools to be installed in its automobile plant in boycotting country Y. The computers are mounted on a separate bracket on the side of the equipment and are readily identifiable by brand name. A orders the tools from U.S. supplier C and specifies that C must incorporate computers manufactured by D, a non-blacklisted company. A would have chosen computers manufactured by E, except that E is blacklisted, and Y’s import laws prohibit the importation of goods manufactured by blacklisted firms.

A may refuse to purchase E’s computers, because A is importing the computers for its own use in its manufacturing operations in Y.

(ii) A, a subsidiary of U.S. company B, is a bona fide resident of boycotting country Y. To meet the needs of its employees in Y, A imports certain specifically identifiable commissary items for sale, such as cosmetics; and canteen items, such as candy. In selecting such items for importation into Y, A chooses items made only by non-blacklisted firms, because Y’s import laws prohibit importation of goods from blacklisted firms.

A may import these items only from non-blacklisted firms, because the importation of goods for consumption by A’s employees is an importation for A’s own use.

(iii) A, a U.S. construction company which is a bona fide resident of boycotting country Y, has a contract to build a hospital complex for the Ministry of Health in Y. Under the contract, A will be general manager of the project with discretion to choose all subcontractors and suppliers. The complex is to be built on a turnkey basis, with A retaining title to the property and bearing all financial risk until the complex is conveyed to Y.

In choosing specifically identifiable goods for import, such as central air conditioning units and plate glass, A excludes blacklisted suppliers in order to comply with Y’s import laws. These goods are customarily incorporated into, or permanently affixed as a functional part of, the project.

A may refuse to deal with blacklisted suppliers of specifically identifiable goods, because importation of goods by a general contractor to be incorporated into a construction project in Y is an importation of goods for A’s own use.

(iv) Same as (iii), except that, in addition, in choosing U.S. architects and engineers to work on the project, A excludes blacklisted firms, because Y’s import laws prohibit the use of services rendered by blacklisted persons.

A may not refuse to deal with blacklisted architectural or engineering firms, because this exception does not apply to the import of services. It is irrelevant that, at some stage, the architectural or engineering drawings or plans may be brought to the site in Y. This factor is insufficient to transform such services into “goods” for purposes of this exception.

(v) Same as (iii), except that the project is to be completed on a “cost plus” basis, with Y making progress payments to A at various stages of completion.

A may refuse to deal with blacklisted suppliers of specifically identifiable goods, because the importation of goods by A to be incorporated in a project A is under contract to complete is an importation of goods for its own use. The terms of payment are irrelevant.

(vi) A, a U.S. construction company which is a bona fide resident of boycotting country Y, has a contract for the construction of an office building in Y on a turnkey basis. In choosing goods to be used or included in the office complex, A orders wallboard, office partitions, and lighting fixtures from non-blacklisted manufacturers. A likewise orders desks, office chairs, typewriters, and office supplies from non-blacklisted manufacturers.

Because they are customarily incorporated into or permanently affixed as a functional part of an office building, the wallboard, office partitions, and lighting fixtures are for A’s own use, and A may select non-blacklisted suppliers of these goods in order to comply with Y’s import laws. Because they are not customarily incorporated into or permanently affixed to the project, the desks, office chairs, typewriters, and office supplies are not for A’s own use, and A may
§ 760.4 Evasion.

(a) No United States person may engage in any transaction or take any other action, either independently or through any other person, with intent to evade the provisions of this part. Nor may any United States person assist another United States person to violate or evade the provisions of this part.

(b) The exceptions set forth in § 760.3(a) through (g) of this part do not permit activities or agreements (express or implied by a course of conduct, including a pattern of responses) which are otherwise prohibited by this part and which are not within the intent of such exceptions. However, activities within the coverage and intent of the exceptions set forth in this part do not constitute evasion regardless of how often such exceptions are utilized.

(c) Use of any device, scheme or artifice which is intended to place a person at a commercial disadvantage or impose on him special burdens because he is blacklisted or otherwise restricted for boycott reasons from having a business relationship with or in a boycotting country will be regarded as evasion for purposes of this part.

(d) Unless permitted under one of the exceptions, use of risk of loss provisions that expressly impose a financial risk on another because of the import laws of a boycotting country may constitute evasion. If they are introduced after January 21, 1978, their use will be presumed to constitute evasion. This presumption may be rebutted by a showing that such a provision is in customary usage without distinction between boycotting and non-boycotting countries and that there is a legitimate non-boycott reason for its use. On the other hand, use of such a provision by a United States person subsequent to

§ 760.4 Evasion.

(a) No United States person may engage in any transaction or take any other action, either independently or through any other person, with intent to evade the provisions of this part. Nor may any United States person assist another United States person to violate or evade the provisions of this part.

(b) The exceptions set forth in § 760.3(a) through (g) of this part do not permit activities or agreements (express or implied by a course of conduct, including a pattern of responses) which are otherwise prohibited by this part and which are not within the intent of such exceptions. However, activities within the coverage and intent of the exceptions set forth in this part do not constitute evasion regardless of how often such exceptions are utilized.

(c) Use of any device, scheme or artifice which is intended to place a person at a commercial disadvantage or impose on him special burdens because he is blacklisted or otherwise restricted for boycott reasons from having a business relationship with or in a boycotting country will be regarded as evasion for purposes of this part.

(d) Unless permitted under one of the exceptions, use of risk of loss provisions that expressly impose a financial risk on another because of the import laws of a boycotting country may constitute evasion. If they are introduced after January 21, 1978, their use will be presumed to constitute evasion. This presumption may be rebutted by a showing that such a provision is in customary usage without distinction between boycotting and non-boycotting countries and that there is a legitimate non-boycott reason for its use. On the other hand, use of such a provision by a United States person subsequent to
January 21, 1978 is presumed not to constitute evasion if the provision had been customarily used by that person prior to January 21, 1978.

(e) Use of dummy corporations or other devices to mask prohibited activity will also be regarded as evasion. Similarly, it is evasion under this part to divert specific boycotting country orders from a United States parent to a foreign subsidiary for purposes of complying with prohibited boycott requirements. However, alteration of a person's structure or method of doing business will not constitute evasion so long as the alteration is based on legitimate business considerations and is not undertaken solely to avoid the application of the prohibitions of this part. The facts and circumstances of an arrangement or transaction will be carefully scrutinized to see whether appearances conform to reality.

Examples

The following examples are intended to give guidance to persons in determining circumstances in which this section will apply. They are illustrative, not comprehensive.

(i) A, a U.S. insurance company, receives a request from boycotting country Y asking whether it does business in boycotted country X. Because furnishing such information is prohibited, A declines to answer and as a result is placed on Y's blacklist. The following year, A's annual report contains new information about A's worldwide operations, including a list of all countries in which A does business. A then mails a copy of its annual report, which has never before contained such information, to officials of the government of country Y.

Absent some business justification unconnected with the boycott for changing the annual report in this fashion, A's action constitutes evasion of this part.

(ii) A, a U.S. construction firm resident in a controlled foreign subsidiary of U.S. company B, is located in non-boycotting country M. A and B both make machine tools for sale in their respective marketing regions. B's marketing region includes boycotting country Y. After assessing the requirements for bona fide residency. Therefore, A's office in Y takes a number of actions permitted under the compliance with local law exception.

A's actions do not constitute evasion, because A's facility in Y was established for legitimate business reasons.

(vii) A, a controlled foreign subsidiary of U.S. company B, is located in non-boycotting country M. A and B both make machine tools for sale in their respective marketing regions. B's marketing region includes boycotting country Y. After assessing the requirements of this part, B decides that it can no longer make machines for sale in Y. Instead, A decides to expand its facilities in M in order to service the Y market.

A's action constitutes evasion of this part, because A knows B will continue to honor, runs to the purchaser in Y. A's warranty, which it will continue to make necessary certifications.

A's action constitutes evasion, because the diverting of orders to B is a device to mask prohibited activity carried out on A's behalf.

(iv) A, a U.S. company, has been selling hand calculators to boycotting country Y for a number of years and routinely supplies negative certificates of origin. A is aware that the furnishing of such negative certificates will be prohibited after June 21, 1978. A, thereafter ceases all direct sales to Y, and instead arranges to make all future sales to distributor B in a third country. A knows B will step in and make the sales to Y which A would otherwise have made directly. B will make the necessary negative certifications. A's warranty, which it will continue to make necessary certifications.
§ 760.4 15 CFR Ch. VII (1–1–00 Edition)

The actions of A and B do not constitute evasion, because there is a legitimate business reason for their actions. It is irrelevant that the effect may be to place sales which would otherwise be subject to this part beyond the reach of this part.

(viii) A, a U.S. manufacturer, from time to time receives purchase orders from boycotting country Y which A fills from its plant in the United States. A knows that it is about to receive an order from Y which contains a request for a certification which A is prohibited from furnishing under this part. In order to permit the certification to be made, A diverts the purchase order to its foreign subsidiary.

A’s diversion of the purchase order constitutes evasion of this part, because it is a device to mask prohibited activity carried out on A’s behalf.

(ix) A, a U.S. company, is engaged in assembling drilling rigs for shipment to boycotting country Y. Because of potential difficulties in securing entry into Y of materials supplied by blacklisted firms, A insists that blacklisted firms take a 15 percent discount on all materials which they supply to A. As a result, no blacklisted firms are willing to transact with A.

A’s insistence on the discount for materials supplied by blacklisted firms constitutes evasion of this part, because it is a device or scheme which is intended to place a special burden on blacklisted firms because of Y’s boycott.

(x) Same as (ix), except that shortly after the effective date of this part, A insists that its suppliers sign contracts which provide that even after title passes from the supplier to A, the supplier will bear the risk of loss and indemnify A if goods which the supplier has furnished are denied entry into Y for boycott reasons.

A’s action constitutes evasion of this part, because it is a device or scheme which is intended to place a special burden on blacklisted persons because of Y’s boycott.

(xi) Same as (x), except that A customarily insisted on such an arrangement with its supplier prior to the effective date of this part.

A’s action is presumed not to constitute evasion, because use of this contractual arrangement was customary for A prior to the effective date of this part.

(xii) A, a U.S. company, has a contract to supply automobile sub-assembly units to boycotting country Y. Shortly after the effective date of this part, A insists that its suppliers sign contracts which provide that even after title passes to A, the supplier will bear the risk of loss and indemnify A if goods which the supplier has furnished are denied entry into boycotting country Y for whatever reason.

A’s insistence on this arrangement is presumed to constitute evasion, because it is a device which is intended to place a special burden on blacklisted firms because of Y’s boycott. The presumption may be rebutted by competent evidence showing that use of such an arrangement is customary without regard to the boycotting or non-boycotting character of the country to which it relates and that there is a legitimate non-boycott business reason for its use.

(xiii) Same as (vii), except that A requires that all suppliers make in-country delivery.

A’s action does not constitute evasion, because it is an ordinary commercial practice to require in-country delivery of goods.

(xiv) Same as (xii), except that A requires that title remain with the supplier until delivery in Y has been made.

A’s action does not constitute evasion, because it is an ordinary commercial practice to require that title remain with the supplier until delivery has been made. This example is distinguishable from example (xii), because in example (xii) A had insisted on an extraordinary arrangement designed to require that the risk of loss remain with the supplier even after title had passed to A.

(xv) U.S. bank A is contacted by U.S. company B to finance B’s transaction with boycotting country Y. Payment will be effected through a letter of credit. A knows that the letter of credit will contain restrictive boycott conditions which would bar its implementation by A if the beneficiary were a U.S. person. A suggests to B that the beneficiary should be changed to C, a shell corporation in non-boycotting country M. The beneficiary is changed accordingly.

A’s action constitutes evasion of this part, because the arrangement is a device to mask prohibited activity on A’s part.

(xvi) Same as (xv), except that U.S. company B, the beneficiary of the letter of credit, arranges to change the beneficiary to B’s foreign subsidiary so that A can implement the letter of credit. A knows that this has been done.

A’s implementation of the letter of credit in the face of its knowledge of B’s action constitutes evasion of this part, because its action is part of a device to mask prohibited activity on A’s part.

(xvii) U.S. bank A, located in the United States, is contacted by foreign company B to finance B’s transaction with boycotting country Y. B is a controlled subsidiary of a U.S. company. The transaction which is to be financed with a letter of credit payable to B at its foreign address, requires B to certify that none of its board members are of a particular religious faith. Since B cannot legally furnish the certificate, it asks A to convey the necessary information to Y through A’s bank branch in Y. Such information would be furnished wholly outside the letter of credit transaction.
A's action constitutes evasion of this part, because it is undertaken to assist B's violation of this part.

(xviii) U.S. bank A is asked by foreign corporation B to implement a letter of credit in favor of B so that B might perform under its long-term contract with boycotting country Y. Under the terms of the letter of credit, B is required to certify that none of its suppliers is blacklisted. A knows that it cannot implement a letter of credit with this condition, so it tells B to negotiate the elimination of this requirement from the letter of credit and instead supply the certification to Y directly.

A's suggestion to B that it provide the negative certification to Y directly constitutes evasion of this part, because A is taking an action through another person to mask prohibited activity on A's part.

§ 760.5 Reporting requirements.

(a) Scope of reporting requirements. (1) A United States person who receives a request to take any action which has the effect of furthering or supporting a restrictive trade practice or boycott fostered or imposed by a foreign country against a country friendly to the United States or against any United States person must report such request to the Department of Commerce in accordance with the requirements of this section. Such a request may be either written or oral and may include a request to furnish information or enter into or implement an agreement. It may also include a solicitation, directive, legend or instruction that asks for information or that asks that a United States person take or refrain from taking a particular action. Such a request shall be reported regardless of whether the action requested is prohibited or permissible under this part, except as otherwise provided by this section.

(ii) A request received by a United States person located outside the United States (that is, a foreign subsidiary, partnership, affiliate, branch, office, or other permanent foreign establishment which is controlled in fact by any domestic concern, as determined under § 760.1(c) of this part) is reportable if it is received in connection with a transaction or activity in the interstate or foreign commerce of the United States, as determined under § 760.1(d)(6) through (17) and (19) of this part.

(iii) A request such as a boycott questionnaire, unrelated to a particular transaction or activity, received by any United States person is reportable when such person has or anticipates a business relationship with or in a boycotting country involving the sale, purchase or transfer of goods or services (including information) in the interstate or foreign commerce of the United States, as determined under § 760.1(d) of this part.

(3) These reporting requirements apply to all United States persons. They apply whether the United States person receiving the request is an exporter, bank or other financial institution, insurer, freight forwarder, manufacturer, or any other United States person subject to this part.

(4) The acquisition of information about a boycotting country's boycott requirements through the receipt or review of books, pamphlets, legal texts, exporters' guidebooks and other similar publications does not constitute receipt of a reportable request for purposes of this section. In addition, a United States person who receives an unsolicited invitation to bid, or similar proposal, containing a boycott request has not received a reportable request for purposes of this section where he does not respond to the invitation to bid or other proposal.

(5) Because of the use of certain terms for boycott and non-boycott purposes; because of Congressional mandates to provide clear and precise
§ 760.5 Guidelines in areas of inherent uncertainty; and because of the Department's commitment to minimize paperwork and reduce the cost of reporting where it will not impair the Department's ability to continue to monitor foreign boycotts, the following specific requests are non-reportable:

(i) A request to refrain from shipping goods on a carrier which flies the flag of a particular country or which is owned, chartered, leased or operated by a particular country or by nationals or residents of a particular country, or a request to certify to that effect.

(ii) A request to ship goods via a prescribed route, or a request to refrain from shipping goods via a proscribed route, or a request to certify to either effect.

(iii) A request to supply an affirmative statement or certification regarding the country of origin of goods.

(iv) A request to supply an affirmative statement or certification regarding the name of the supplier or manufacturer of the goods shipped or the name of the provider of services.

(v) A request to comply with the laws of another country except where the request expressly requires compliance with that country's boycott laws.

(vi) A request to an individual to supply information about himself or a member of his family for immigration, passport, visa, or employment purposes.

(vii) A request to supply a certificate by the owner, master, charterer, or any employee thereof, that a vessel, aircraft, truck or any other mode of transportation is eligible, otherwise eligible, permitted, or allowed to enter, or not restricted from entering, a particular port, country, or group of countries pursuant to the laws, rules, or regulations of that port, country, or group of countries.

(ix) A request to supply a certificate from an insurance company stating that the insurance company has a duly authorized agent or representative within a boycotting country and/or the name and address of such agent.

(x) A request to comply with a term or condition of a transaction that provides that the vendor bear the risk of loss and indemnify the purchaser if the vendor's goods are denied entry into a country for any reason ("risk of loss clause") if such clause was in use by the purchaser prior to January 18, 1978.

(6) No United States person may engage in any transaction or take any other action, either independently or through any other person, with intent to evade the provisions of this part.

(7) From time to time the Department will survey domestic concerns for purposes of determining the worldwide scope of boycott requests received by their controlled foreign subsidiaries and affiliates with respect to their activities outside United States commerce. This pertains to requests which would be reportable under this section but for the fact that the activities to which the requests relate are outside United States commerce. The information requested will include the number and nature of non-reportable boycott requests received, the action(s) requested, the actions(s) taken in response and the countries in which the requests originate. The results of such surveys, including the names of those surveyed, will be made public.

(b) Manner of reporting. (1) Each reportable request must be reported. However, if more than one document (such as an invitation to bid, purchase order, or letter of credit) containing the same boycott request is received as part of the same transaction, only the first such request need be reported. Individual shipments against the same purchase order or letter of credit are to be treated as part of the same transaction. Each different boycott request associated with a given transaction must be reported, regardless of how or when the request is received.

(2) Each United States person actually receiving a reportable request must report that request. However, such person may designate someone else to report on his behalf. For example, a United States company, if authorized, may report on behalf of its controlled foreign subsidiary or affiliates; a freight forwarder, if authorized,
may report on behalf of the exporter; and a bank, if authorized, may report on behalf of the beneficiary of a letter of credit. If a person designated to report a request received by another receives an identical request directed to him in connection with the same transaction, he may file one report on behalf of himself and the other person.

(3) Where a person is designated to report on behalf of another, the person receiving the request remains liable for any failure to report or for any representations made on his behalf. Further, anyone reporting on behalf of another is not relieved of his own responsibility for reporting any boycott request which he receives, even if it is an identical request in connection with the same transaction.

(4) Reports must be submitted in duplicate to: Report Processing Staff, Office of Antiboycott Compliance, U.S. Department of Commerce, Room 6099C, Washington, D.C. 20230. Each submission must be made in accordance with the following requirements:

(i) Where the person receiving the request is a United States person located in the United States, each report of requests received through June 30, 1979, must be postmarked by the last day of the month following the month in which the request was received. Thereafter, each submission must be postmarked by the last day of the month following the calendar quarter in which the request was received (e.g., April 30 for the quarter consisting of January, February, and March).

(ii) Where the person receiving the request is a United States person located outside the United States, each report of requests received through June 30, 1979, must be postmarked by the last day of the second month following the month in which the request was received. Thereafter, each submission must be postmarked by the last day of the second month following the calendar quarter in which the request was received (e.g., May 31 for the quarter consisting of January, February, and March).

(5) At the reporting person’s option, reports may be submitted on either a single transaction form (Form BXA–621P, Report of Restrictive Trade Practice or Boycott Request Single Transaction (revised 10–89)) or on a multiple transaction form (Form BXA–6051P, Report of Request for Restrictive Trade Practice or Boycott Multiple Transactions (revised 10–89)). Use of the multiple transaction form permits the reporting person to provide on one form all required information relating to as many as 75 reportable requests received within any single reporting period.

(6) Reports, whether submitted on the single transaction form or on the multiple transaction form, must contain entries for every applicable item on the form, including whether the reporting person intends to take or has taken the action requested. If the reporting person has not decided what action he will take by the time the report is required to be filed, he must later report the action he decides to take within 10 business days after deciding. In addition, anyone filing a report on behalf of another must so indicate and identify that other person.

(7) Each report of a boycott request must be accompanied by two copies of the relevant page(s) of any document(s) in which the request appears. Reports may also be accompanied by any additional information relating to the request as the reporting person desires to provide concerning his response to the request.

(8) Records containing information relating to a reportable boycott request, including a copy of any document(s) in which the request appears, must be maintained by the recipient for a five-year period after receipt of the request. The Department may require that these materials be submitted to it or that it have access to them at any time within that period. (See part 762 of the EAR for additional recordkeeping requirements.)

(c) Disclosure of information. (1) Reports of requests received on or after October 7, 1976, as well as any accompanying documents filed with the reports, have been and will continue to be made available for public inspection and copying, except for certain proprietary information. With respect to reports of requests received on or after August 1, 1978, if the person making the report certifies that a United States person to whom the report relates
§ 760.5 15 CFR Ch. VII (1–1–00 Edition)

would be placed at a competitive disadvantage because of the disclosure of information regarding the quantity, description, or value of any articles, materials, and supplies, including related technical data and other information, whether contained in a report or in any accompanying document(s), such information will not be publicly disclosed except upon failure by the reporting entity to edit the public inspection copy of the accompanying document(s) as provided by paragraph (c)(2) of this section, unless the Secretary of Commerce determines that the disclosure would not place the United States person involved at a competitive disadvantage or that it would be contrary to the national interest to withhold the information. In the event the Secretary of Commerce considers making such a determination concerning competitive disadvantage, appropriate notice and an opportunity for comment will be given before any such proprietary information is publicly disclosed. In no event will requests of reporting persons to withhold any information contained in the report other than that specified in this paragraph be honored.

(2) Because a copy of any document(s) accompanying the report will be made available for public inspection and copying, one copy must be submitted intact and another copy must be edited by the reporting entity to delete the same information which it certified in the report would place a United States person at a competitive disadvantage if disclosed. In addition, the reporting entity may delete from this copy information that is considered confidential and that is not required to be contained in the report (e.g., information related to foreign consignee). This copy should be conspicuously marked with the legend "Public Inspection Copy." With respect to documents accompanying reports received by the Department on or after July 1, 1979, the public inspection copy will be made available as submitted whether or not it has been appropriately edited by the reporting entity as provided by this paragraph.

(3) Reports and accompanying documents which are available to the public for inspection and copying are located in the BXA Freedom of Information Records Inspection Facility, Room 4525, Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230. Requests to inspect such documents should be addressed to that facility.

(4) The Secretary of Commerce will periodically transmit summaries of the information contained in the reports to the Secretary of State for such action as the Secretary of State, in consultation with the Secretary of Commerce, may deem appropriate for carrying out the policies in section 8(b)(2) of the Export Administration Act of 1979.

Examples

The following examples are intended to give guidance in determining what is reportable. They are illustrative, not comprehensive.

(i) A, a U.S. manufacturer, is shipping goods to boycotting country Y and is asked by Y to certify that it is not blacklisted by Y’s boycott office.

The request to A is reportable, because it is a request to A to comply with Y’s boycott requirements.

(ii) A, a U.S. manufacturing company, receives an order for tractors from boycotting country Y. Y’s order specifies that the tires on the tractors be made by B, another U.S. company. A believes Y has specified B as the tire supplier because otherwise A would have used tires made by C, a blacklisted company, and Y will not take shipment of tractors containing tires made by blacklisted companies.

A must report Y’s request for tires made by B, because A has reason to know that B was chosen for boycott reasons.

(iii) Same as (ii), except A knows that Y’s request has nothing to do with the boycott but simply reflects Y’s preference for tires made by B.

Y’s request is not reportable, because it is unrelated to Y’s boycott.

(iv) Same as (ii), except A neither knows nor has reason to know why Y has chosen B.

Y’s request is not reportable, because A neither knows nor has reason to know that Y’s request is based on Y’s boycott.

(v) A, a controlled foreign subsidiary of U.S. company B, is a resident of boycotting country Y. A is a general contractor. After being supplied by B with a list of competent subcontractors, A’s customer instructs A to use subcontractor C on the project. A believes that C was chosen because, among other things, the other listed subcontractors are blacklisted.
The instruction to A by its customer that C be used on the project is reportable, because it is a request to comply with Y’s boycott requirements.

(vi) A, a controlled foreign subsidiary of U.S. company B, is located in non-boycotting country P. A receives an order for washing machines from boycotting country Y. Y instructs A that a negative certificate of origin must accompany the shipment. The washing machines are made wholly in P, without U.S. components. Y’s instruction to A regarding the negative certificate of origin is not reportable, because the transaction to which it relates is not in U.S. commerce.

(vii) Same as (vi), except that A obtains components from the United States for the purpose of filling the order from Y. Y’s instruction to A regarding the negative certificate of origin is reportable, because the transaction to which it relates is in U.S. commerce.

(viii) A, a U.S. construction company, receives in the mail an unsolicited invitation to bid on a construction project in boycotting country Y. The invitation to bid requires those who respond to certify that they do not have any plants or branch offices in boycotted country X. A does not respond.

A’s receipt of the unsolicited invitation to bid is not reportable, because the request does not relate to any present or anticipated business of A with or in Y.

(ix) Same as (viii), except that A receives a boycott questionnaire from a central boycott office. A does not do business in any of the boycotting countries involved, and does not anticipate doing any business in those countries. A does not respond.

A’s receipt of the boycott questionnaire is not reportable, because it does not relate to any present or anticipated business of A with or in Y.

(x) A, a U.S. manufacturer, is seeking markets in which to expand its exports. A sends a representative to boycotting country Y to explore Y’s potential as a market for A’s products. A’s representative discusses its products but does not enter into any contracts on that trip. A does, however, hope that sales will materialize in the future. Subsequently, A receives a boycott questionnaire from Y.

A’s receipt of the boycott questionnaire is reportable, because the request relates to A’s anticipated business with or in a boycotting country. For purposes of determining whether a report is required, it makes no difference whether A responds to the questionnaire, and it makes no difference that actual sales contracts are not in existence or do not materialize.

(xi) Same as (x), except that A’s representative enters into a contract to sell A’s products to a buyer in boycotting country Y. Subsequently, A receives a boycott questionnaire from Y.

A’s receipt of the boycott questionnaire is reportable, because it relates to A’s present business with or in a boycotting country. For purposes of determining whether a report is required, it makes no difference whether A responds to the questionnaire.

(xii) A, a U.S. freight forwarder, purchases an exporter’s guidebook which includes the import requirements of boycotting country Y. The guidebook contains descriptions of actions which U.S. exporters must take in order to make delivery of goods to Y.

A’s acquisition of the guidebook is not reportable, because he has not received a request from anyone.

(xiii) A, a U.S. freight forwarder, is arranging for the shipment of goods to boycotting country Y at the request of B, a U.S. exporter. B asks A to assume responsibility to assure that the documentation accompanying the shipment is in compliance with Y’s import requirements. A examines an exporter’s guidebook, determines that Y’s import regulations require a certification that the insurer of the goods is not blacklisted and asks U.S. insurer C for such a certification.

B’s request to A is reportable by A, because it constitutes a request to comply with Y’s boycott as of the time A takes action to comply with Y’s boycott requirements in response to the request. A’s request to C is reportable by C.

(xiv) A, a U.S. freight forwarder, is arranging for the shipment of goods to boycotting country Y. The manufacturer supplies A with all the necessary documentation to accompany the shipment. Among the documents supplied by the manufacturer is his certificate that he himself is not blacklisted. A transmits the documentation supplied by the manufacturer.

A’s action in merely transmitting documents received from the manufacturer is not reportable, because A has received no request to comply with Y’s boycott.

(xv) Same as (xiv), except that A is asked by U.S. exporter B to assume the responsibility to assure that the necessary documentation accompanies the shipment whatever documentation might be. B forwards to A a letter of credit which requires that a negative certificate of origin accompany the bill of lading. A supplies a positive certificate of origin.

Both A and B must report receipt of the letter of credit, because it contains a request to both of them to comply with Y’s boycott.

(xvi) Same as (xiv), except that the manufacturer fails to supply a required negative certificate of origin, and A is subsequently asked by a consular official of Y to see to it that the certificate is supplied. A supplies a positive certificate of origin.
§ 760.5  15 CFR Ch. VII (1–1–00 Edition)

The consular official’s request to A is reportable by A, because A was asked to comply with Y’s boycott requirements by supplying the negative certificate of origin.

(xvii) A, a U.S. manufacturer, is shipping goods to boycotting country Y. Arrangements have been made for freight forwarder B to handle the shipment and secure all necessary shipping certifications. B notes that the letter of credit requires that the manufacturer supply a negative certificate of origin and B asks A to do so. A supplies a positive certificate of origin.

B’s request to A is reportable by A, because A is asked to comply with Y’s boycott requirements by providing the negative certificate.

(xviii) A, a controlled foreign subsidiary of U.S. company B, is a resident of boycotting country Y. A is engaged in oil exploration and drilling operations in Y. In placing orders for drilling equipment to be shipped from the United States, A, in compliance with Y’s laws, selects only those suppliers who are not blacklisted.

A’s action in choosing non-blacklisted suppliers is not reportable, because A has not received a request to comply with Y’s boycott in making these selections.

(xix) A, a controlled foreign subsidiary of U.S. company B, is seeking permission to do business in boycotting country Y. Before being granted such permission, A is asked to sign an agreement to comply with Y’s boycott laws.

The request to A is reportable, because it is a request that expressly requires compliance with Y’s boycott law and is received in connection with A’s anticipated business in Y.

(xx) A, a U.S. bank, is asked by a firm in boycotting country Y to confirm a letter of credit in favor of B, a U.S. company. The letter of credit calls for a certificate from B that the goods to be supplied are not produced by a firm blacklisted by Y. A informs B of the letter of credit, including its certification condition, and sends B a copy.

B must report the certification request contained in the letter of credit, and A must report the request to confirm the letter of credit containing the boycott condition, because both are being asked to comply with Y’s boycott.

(xxi) Same as (xx), except that the letter of credit calls for a certificate from the beneficiary that the goods will not be shipped on a vessel that will call at a port in boycotted country X before making delivery in Y.

The request is not reportable, because it is a request of a type deemed by this section to be in common use for non-boycott purposes.

(xxii) A, a U.S. company, receives a letter of credit from boycotting country Y stating that on no condition may a bank blacklisted by Y be permitted to negotiate the credit.

A’s receipt of the letter of credit is reportable, because it contains a request to A to comply with Y’s boycott requirements.

(xxiii) A, a U.S. bank, receives a demand draft from B, a U.S. company, in connection with B’s shipment of goods to boycotting country Y. The draft contains a directive that it is valid in all countries except boycotted country X.

A’s receipt of the demand draft is reportable, because it contains a request to A to comply with Y’s boycott requirements.

(xxiv) A, a U.S. exporter, receives an order from boycotting country Y. On the order is a legend that A’s goods, invoices, and packaging must not bear a six-pointed star or other symbol of boycotted country X.

A’s receipt of the order is reportable, because it contains a request to comply with Y’s boycott requirements.

(xxv) Same as (xxiv), except the order contains a statement that goods exported must not represent part of war reparations to boycotted country X.

A’s receipt of the order is reportable, because it contains a request to A to comply with Y’s boycott requirements.

(xxvi) A, a U.S. contractor, is negotiating with boycotting country Y to build a school in Y. During the course of the negotiations, Y suggests that one of the terms of the construction contract be that A agree not to import materials produced in boycotted country X. It is A’s company policy not to agree to such a contractual clause, and A suggests that instead it agree that all of the necessary materials will be obtained from U.S. suppliers. Y agrees to A’s suggestion and a contract is executed.

A has received a reportable request, but, for purposes of reporting, the request is deemed to be received when the contract is executed.

(xxvii) Same as (xxvi), except Y does not accept A’s suggested alternative clause and negotiations break off. A’s receipt of Y’s request is reportable. For purposes of reporting, it makes no difference that A was not successful in the negotiations. The request is deemed to be received at the time the negotiations break off.

(xxviii) A, a U.S. insurance company, is insuring the shipment of drilling equipment to boycotting country Y. The transaction is being financed by a letter of credit which requires that A certify that it is not blacklisted by Y. Freight forwarder B asks A to supply the certification in order to satisfy the requirements of the letter of credit.

The request to A is reportable by A, because it is a request to comply with Y’s boycott requirements.

(xxix) A, a U.S. manufacturer, is engaged from time-to-time in supplying drilling rigs to company B in boycotting country Y. B insists that its suppliers sign contracts which provide that, even after title passes from the
Bureau of Export Administration, Commerce

Pt. 760, Supp. 1

supplier to B, the supplier will bear the risk of loss and indemnify B if goods which the
supplier has furnished are denied entry into
Y for whatever reason. A knows or has reason
why B has been using the provision since
1977. A receives an order from B which con-
tains such a clause.

B’s request is not reportable by A, because
the request is deemed to be not reportable by
these regulations if the provision was in use
by B prior to the effective date of the regula-

(xxx) Same as (xxix), except that A does
not know when B began using the provision.

Unless A receives information from B that
B introduced the term prior to the effective
date of the regulations, January 18, 1978. A
must report receipt of the request.

(xxxi) A, a U.S. citizen, is a shipping clerk
for B, a U.S. manufacturing company. In the
course of his employment, A receives an
order for goods from boycotting country Y.
The order specifies that none of the compo-
nents of the goods is to be furnished by
blacklisted firms.

B must report the request received by its
employee, A, acting in the scope of his em-
ployment. Although A is a U.S. person, such
an individual does not have a separate obli-
gation to report requests received by him in
his capacity as an employee of B.

(xxxii) U.S. exporter A is negotiating a
transaction with boycotting country Y. A
knows that at the conclusion of the negotia-
tions he will be asked by Y to supply certain
boycotting-related information and that such
a request is reportable. In an effort to forestall
the request and thereby avoid having to file
a report, A supplies the information in ad-
avance.

A is deemed to have received a reportable
request.

(xxxiii) A, a controlled foreign affiliate of
U.S. company B, receives an order for com-
ponents from boycotting country Y and ob-
tains components from the United States for
the purpose of filling the order. Y instructs
A that a negative certificate of origin must
accompany the shipment.

Y’s instruction to A regarding the negative
certificate of origin is reportable by A. More-
over, A may designate B or any other person
to report on its behalf. However, A remains
liable for any failure to report or for any rep-
resentations made on its behalf.

(xxxiv) U.S. exporter A, in shipping goods
to boycotting country Y, receives a request
from the customer in Y to state on the bill
of lading that the vessel is allowed to enter
Y’s ports. The request further states that a
certificate from the owner or master of the
vessel that effect is acceptable.

The request A received from his customer
in Y is not reportable if it was received after
January 21, 1978, because it is a request of a
type deemed to be not reportable by these
regulations. (A may not make such a state-
ment on the bill of lading himself, if he
knows or has reason to know it is requested
for a boycott purpose.

(xxxv) U.S. exporter A, in shipping goods
to boycotting country Y, receives a request
from the customer in Y to furnish a certifi-
cate from the owner of the vessel that the
vessel is permitted to call at Y’s ports.

The request A received from his customer
in Y is not reportable if it was received after
the effective date of these rules, because it is
a request of a type deemed to be not report-
able by these regulations.

(xxxvi) U.S. exporter A, in shipping goods
to boycotting country Y, receives a request
from the customer in Y to furnish a certifi-
cate from the insurance company indicating
that the company has a duly authorized re-
presentative in country Y and giving the
name of that representative.

The request A received from his customer
in Y is not reportable if it was received after
the effective date of these rules, because it is
a request of a type deemed to be not report-
able by these regulations.

SUPPLEMENT NO. 1 TO PART 760—
INTERPRETATIONS

It has come to the Department’s attention
that some U.S. persons are being or may be
asked to comply with new boycotting coun-
try requirements with respect to shipping
and insurance certifications and certificates
of origin. It has also come to the Depart-
ment’s attention that some U.S. persons are
being or may be asked to agree to new con-
tractual provisions in connection with cer-
tain foreign government or foreign govern-
ment agency contracts. In order to maximize
its guidance with respect to section 8 of the
Export Administration Act of 1979, as
amended (50 U.S.C. app. 2407) and part 760 of
the EAR, the Department hereby sets forth
its views on these certifications and contrac-
tual clauses.\(^1\)

I. CERTIFICATIONS

§ 760.2(d) of this part prohibits a U.S. per-
son from furnishing or knowingly agreeing
to furnish:

``Information concerning his or any other
person’s past, present or proposed business
relationships:"

(i) With or in a boycotting country:

\(^1\) The Department originally issued this in-
terpretation pursuant to the Export Admin-
istration Amendments Act of 1979 (Public
Law 95-52) and the regulations on restrictive
trade practices and boycotts (15 CFR part
369) published on January 25, 1978 (43 FR
3508) and contained in the 15 CFR edition
revised as of January 1, 1979.
Pt. 760, Supp. 1

(ii) With any business concern organized under the laws of a boycotted country;
(iii) With any national or resident of a boycotted country; or
(iv) With any other person who is known or believed to be restricted from having any business relationship with or in a boycotting country.

This prohibition, like all others under part 760, applies only with respect to a U.S. person’s activities in the interstate or foreign commerce of the United States and only when such activities are undertaken with intent to comply with, further, or support an unsanctioned foreign boycott. (§ 760.2(d)(5) of this part.)

This prohibition does not apply to the furnishing of normal business information in a commercial context. (§ 760.2(d)(3) of this part.) Normal business information furnished in a commercial context does not cease to be so simply because the party soliciting the information may be a boycotting country or a national or resident thereof. If the information is of a type which is generally sought for a legitimate business purpose (such as determining financial fitness, technical competence, or professional experience), the information may be furnished even if the information could be used, or without the knowledge of the person supplying the information is intended to be used, for boycott purposes. (§ 760.2(d)(4) of this part.)

The new certification requirements and the Department’s interpretation of the applicability of part 760 thereto are as follows:

A. Certificate of origin. A certificate of origin is to be issued by the supplier or exporting company and authenticated by the exporting country, attesting that the goods exported to the boycotting country are of purely indigenous origin, and stating the name of the factory or the manufacturing company. To the extent that the goods as described on the certificate of origin are not solely and exclusively products of their country of origin indicated therein, a declaration must be appended to the certificate of origin giving the name of the supplier or manufacturer and declaring: "The undersigned, , does hereby declare on behalf of the above-named supplier or manufacturer, that certain parts or components of the goods described in the attached certificate of origin are the products of such country or countries, other than the country named therein as specifically indicated hereunder:

Country of Origin and Percentage of Value of Parts or Components Relative to Total Shipment

1. 
2. 
3. 

Dated: ____________________________
Signature ____________________________

INTERPRETATION

It is the Department’s position that furnishing a positive certificate of origin, such as the one set out above, falls within the exception contained in § 760.3(c) of this part for compliance with the import and shipping document requirements of a boycotting country. See § 760.3(c) of this part and examples (i) and (ii) thereunder.

B. Shipping certificate. A certificate must be appended to the bill of lading stating: (1) Name of vessel; (2) Nationality of vessel; and (3) Owner of vessel, and declaring: "The undersigned does hereby declare on behalf of the owner, master, or agent of the above-named vessel that said vessel is not registered in the boycotted country or owned by nationals or residents of the boycotted country and will not call at or pass through any boycotted country port enroute to its boycotting country destination.

"The undersigned further declares that said vessel is otherwise eligible to enter into the ports of the boycotting country in conformity with its laws and regulations.

Sworn to before me, this __________ day of __________, 19 . Notary Seal."
other than the vessel’s owner, charterer, or master furnishes such a statement, that is tantamount to his furnishing a statement that he is not doing business with a blacklisted person or is doing business only with nonblacklisted persons. Therefore, it is the Department’s position that furnishing such a statement (which does not reflect customary international commercial practice) by anyone other than the owner, charterer, or master of a vessel would fall within the prohibition set forth in § 760.2(d) of this part unless it is clear from all the facts and circumstances that the certification is not required for a boycott reason. See § 760.4(d)(3) and (4) of this part. However, in accordance with the exception contained in § 760.3(c) of this part for compliance with the import and shipping document requirements of a boycotting country, such a United States person may furnish such a certification until June 21, 1978.

C. Insurance certificate. A certificate must be appended to the insurance policy stating:

(1) Name of insurance company; (2) Address of its principal office; and (3) Country of its incorporation, and declaring:

“The undersigned, , does hereby certify on behalf of the above-named insurance company that the said company has a duly qualified and appointed agent or representative in the boycotting country whose name and address appear below:

Name of agent/representative and address in the boycotting country.

Sworn to before me this day of , 19 . Notary Seal.”

INTERPRETATION

It is the Department’s position that furnishing the name of the insurance company falls within the exception contained in § 760.3(c) of this part for compliance with the import and shipping document requirements of a boycotting country. See § 760.3(c)(1)(v) of this part and examples (v) and (x) thereunder. In addition, it is the Department’s position that furnishing a certificate, such as the one set out above, stating the address of the insurance company’s principal office and its country of incorporation offends no prohibition under part 760 unless the U.S. person furnishing the certificate knows or has reason to know that the information is sought for the purpose of determining that the insurance company is neither headquartered nor incorporated in a boycotting country. See § 760.2(d)(1)(i) of this part.

It is also the Department’s position that the insurer, himself, may certify that he has a duly qualified and appointed agent or representative in the boycotting country and may furnish the name and address of his agent or representative. Furnishing such a statement pertaining to one’s own status offends no prohibition under part 760. See § 760.2(f) of this part, example (xiv).

On the other hand, where a boycott is in force, a declaration that an insurer “has a duly qualified and appointed agent or representative” in the boycotting country necessarily conveys the information that the insurer is not blacklisted or otherwise restricted from having a business relationship with the boycotting country. See § 760.3(c) of this part, example (v). Therefore, it is the Department’s position that furnishing such a certification by anyone other than the insurer would fall within the prohibition set forth in § 760.2(d) of this part unless it is clear from all the facts and circumstances that the certification is not required for a boycott reason. See § 760.2(d)(3) and (4) of this part. However, in accordance with the exception contained in § 760.3(c) of this part for compliance with the import and shipping document requirements of a boycotting country, such a U.S. person may furnish such a certification until June 21, 1978.

II. CONTRACTUAL CLAUSES

The new contractual requirements and the Department’s interpretation of the applicability of part 760 there to are as follows:

A. Contractual clause regarding import laws of boycotting country. “In connection with the performance of this contract the Contractor/Supplier specifically acknowledges that the import and customs laws and regulations of the boycotting country shall apply to the furnishing and shipment of any products or components thereof to the boycotting country. The Contractor/Supplier specifically acknowledges that the aforementioned import and customs laws and regulations of the boycotting country prohibit, among other things, the importation into the boycotting country of products or components thereof: (1) Originating in the boycotted country; (2) Manufactured, produced, or furnished by companies organized under the laws of the boycotting country; and (3) Manufactured, produced, or furnished by nationals or residents of the boycotted country.”

INTERPRETATION

It is the Department’s position that an agreement, such as the one set out in the first sentence above, that the import and customs requirements of a boycotting country shall apply to the performance of a contract does not, in and of itself, offend any prohibition under Part 760. See § 760.2(a)(5) of this part and example (iii) under “Examples of Agreements To Refuse To Do Business.” It is also the Department’s position that an agreement to comply generally with the import and customs requirements of a boycotting country does not, in and of itself, offend any prohibition under part 760 of this
part. See §760.2(a)(5) of this part and examples (iv) and (v) under “Examples of Agreements To Refuse To Do Business.” In addition, it is the Department’s position that an agreement is unlawful when it restricts the owner, charterer or master of a vessel from furnishing such a certificate pertaining to the boycotting country’s import and customs requirements prohibiting the importation of goods or their components: (1) Originating in the boycotted country; (2) Manufactured, produced, or furnished by companies organized under the laws of the boycotted country; or (3) Manufactured, produced, or furnished by nationals or residents of the boycotted country.

The Department notes that, after June 21, 1978, a United States person may not furnish a negative certification regarding the origin of goods or their components even though the certification is furnished in response to the import and shipping documentation requirements of the boycotting country. See §760.3(c) of this part and examples (i), (ii), and (iii) thereunder, and §760.3(a) of this part and example (ii) thereunder.

B. Contractual clause regarding unilateral and specific selection. “The Government of the boycotting country (or the First Party), in its exclusive power, reserves its right to make the final unilateral and specific selection. The Government of the boycotting country (or the First Party) may furnish the name and address of his or representative in the boycotting country, or of specific goods to be furnished in accordance with the terms and conditions of this contract.”

INTERPRETATION

It is the Department’s position that an agreement, such as the one set out above, falls within the exception contained in §760.3(d) of this part for compliance with unilateral selections. However, the Department notes that whether a U.S. person may subsequently comply or agree to comply with any particular selection depends upon whether that selection meets all the requirements contained in §760.3(d) of this part for compliance with unilateral selections. For example, the particular selection must be unilateral and specific. Particular goods must be specifically identifiable as to their source or origin at the time of their entry into the boycotting country, and all other requirements contained in §760.3(d) of this part must be observed.

Supplement No. 2 to Part 760—Interpretation

The Department hereby sets forth its views on whether the furnishing of certain shipping and insurance certificates in compliance with boycotting country requirements violates the provisions of section 8 of the Export Administration Act of 1979, as amended (50 U.S.C. app. 2407) and part 760 of the EAR, as follows:

(i) “The owner, charterer or master of a vessel may certify that the vessel is ‘eligible’ or ‘otherwise eligible’ to enter into the ports of a boycotting country in conformity with its laws and regulations.”

(ii) “The insurer, himself, may certify that he has a duly qualified and appointed agent or representative in the boycotting country and may furnish the name and address of his agent or representative.”

Furnishing such certifications by anyone other than:

(i) The owner, charterer or master of a vessel, or

(ii) The insurer who would fall within the prohibition set forth in §760.2(d) of this part, “unless it is clear from all the facts and circumstances that these certifications are not required for a boycott reason.” See §760.2(d) (3) and (4) of this part.

The Department has received from the Kingdom of Saudi Arabia a clarification that the shipping and insurance certifications are required by Saudi Arabia in order to:

(i) Demonstrate that there are no applicable restrictions under Saudi laws or regulations pertaining to maritime matters such as the age of the ship, the condition of the ship, and similar matters that would bar entry of the vessel into Saudi ports; and

(ii) Facilitate dealings with insurers by Saudi Arabian insurers whose ability to secure expeditious payments in the event of damage to insured goods may be adversely affected by the absence of a qualified agent or representative of the insurer in Saudi Arabia. In the Department’s judgment, this clarification constitutes sufficient facts and circumstances to demonstrate that the certifications are not required by Saudi Arabia for boycott reasons.

On the basis of this clarification, it is the Department’s position that any United States person may furnish such shipping and insurance certificates required by Saudi Arabia without violating §760.2(d) of this part. Moreover, under these circumstances, receipt of requests for such shipping and insurance certificates from Saudi Arabia is not reportable.

It is still the Department’s position that furnishing such a certificate pertaining to...
one's own eligibility offends no prohibition under part 760. See §760.2(f) of this part, example (xiv). However, absent facts and circumstances clearly indicating that the certification is required by ordinary commercial reasons as demonstrated by the Saudi clarification, furnishing certifications about the eligibility or blacklist status of any person would not be presumed boycott-related. U.S. persons are reminded that requests that are on their face boycott-related or that are for action obviously in furtherance of or support of an unsanctioned foreign boycott are subject to the Regulations, irrespective of the country or origin. For example, requests containing references to "blacklisted companies", "Israel boycott list", "non-Israeli goods" or other phrases or words indicating boycott purpose would be subject to the appropriate provisions of the Department's antiboycott regulations.

**SUPPLEMENT NO. 4 TO PART 760—INTERPRETATION**

The question has arisen how the definition of U.S. commerce in the antiboycott regulations (15 CFR part 760) applies to a shipment of foreign-made goods when U.S.-origin spare parts are included in the shipment. Specifically, if the shipment of foreign goods falls outside the definition of U.S. commerce, will the inclusion of U.S.-origin spare parts bring the entire transaction into U.S. commerce? Section 760.1(d)(12) of this part provides the general guidelines for determining when U.S.-origin goods shipped from a controlled in fact foreign subsidiary are outside U.S. commerce. The two key tests of that provision are that the goods were (1) acquired without reference to a specific order, and (2) further manufactured, incorporated or reprocessed into another product. Because the application of these two tests to spare parts does not conclusively answer the U.S. commerce question, the Department is presenting this clarification.

In the cases brought to the Department's attention, an order for foreign-origin goods was placed with a controlled in fact foreign subsidiary of a United States company. The foreign goods contained components manufactured in the United States and in other countries, and the order included a request for extras of the U.S. manufactured components (spare parts) to allow the customer to repair the item. Both the foreign manufactured product and the U.S. spare parts were to be shipped from the general inventory of the foreign subsidiary. Since the spare parts, if shipped by themselves, would be in U.S. commerce as that term is defined in the Regulations, the question was whether including them with the foreign manufactured item would bring the entire shipment into U.S. commerce. The Department has decided that it will not and presents the following specific guidance.
As used above, the term “spare parts” refers to parts of the quantities and types normally and customarily ordered with a product and kept on hand in the event they are needed to assure prompt repair of the product. Parts, components or accessories that improve or change the basic operations or design characteristics, for example, as to accuracy, capability or productivity, are not spare parts under this definition.

Inclusion of U.S.-origin spare parts in a shipment of products which is otherwise outside U.S. commerce will bring the transaction into U.S. commerce if the following conditions are met:

(I) The parts included in the shipment are acquired from the United States by the controlling foreign subsidiary without reference to a specific order from or transaction with a person outside the United States;

(II) The parts are identical to the corresponding United States-origin parts which have been manufactured, incorporated into or reprocessed into the completed product;

(III) The parts are of the quantity and type normally and customarily ordered with the completed product and kept on hand by the firm or industry of which the firm is a part to assure prompt repair of the product; and

(iv) The parts are covered by the same order as the completed product and are shipped with or at the same time as the original product.

The Department emphasizes that unless each of the above conditions is met, the inclusion of United States-origin spare parts in an order for a foreign-manufactured or assembled product will bring the entire transaction into the interstate or foreign commerce of the United States for purposes of part 760.

Supplement No. 5 to Part 760—Interpretation

A. Permissible Furnishing of Information

The information outlined below may be furnished in response to boycott-related requests from boycotting countries or others. This information is, in the view of the Department, not prohibited by the Regulations. Thus, a person does not have to qualify under any of the exceptions to be able to make the following statements. Such statements can be made, however, only by the person indicated and under the circumstances described. These statements should not be used as a point of departure or analogy for determining the permissibility of other types of statements. The Department’s view that these statements are not contrary to the prohibitions contained in antiboycott provisions of the Regulations is limited to the specific statement in the specific context indicated.

1. A U.S. person may always provide its own name, address, place of incorporation (“nationality”), and nature of business.

2. A U.S. person may state that it is not on a blacklist, or restricted from doing business in a boycotting country. A company may not make that statement about its subsidiaries or affiliates—only about itself. A U.S. person may not say that there is no reason for it to be blacklisted. To make that statement would provide directly or by implication information that may not be provided. A U.S. person may inquire about the reasons it is blacklisted if it learns that it is on a blacklist (see §760.2d of this part example (xvi)).

3. A U.S. person may describe in detail its past dealings with boycotting countries; may state in which boycotting countries its trademarks are registered; and may specify in which boycotting countries it is registered or qualified to do business. In general, a U.S. person is free to furnish any information it wishes about the nature and extent of its commercial dealings with boycotting countries.

4. A U.S. person may state that many U.S. firms or individuals have similar names and that it believes that it may be confused with a similarly named entity. A U.S. person may not state that it does or does not have an affiliation or relationship with such similarly named entity.

5. A U.S. person may state that the information requested is a matter of public record in the United States. However, the person may not direct the inquirer to the location of that information, nor may the U.S. person provide or cause to be provided such information.

B. Availability of the Compliance With Local Law Exception to Establish a Foreign Branch

Section 760.3(f) of this part, the Compliance With Local Law exception, permits U.S. persons, who are bona fide residents of a boycotting country, to take certain limited, but otherwise prohibited, actions, if they are required to do so in order to comply with local law.

Among these actions is the furnishing of non-discriminatory information. Examples (iv) through (vi) under “Examples of Bona Fide Residency” indicate that a company seeking to become a bona fide resident in a boycotting country may take advantage of the exception for the limited purpose of furnishing information required by local law to obtain resident status. Exactly when and how this exception is available has been the subject of a number of inquiries. It is the Department’s view that the following conditions must be met for a non-resident company to be permitted to furnish otherwise prohibited information for the limited purpose of seeking to become a bona fide resident:
1. The company must have a legitimate business reason for seeking to establish a branch or other resident operation in the boycotting country. (Removal from the blacklist does not constitute such a reason.)

2. The local operation it seeks to establish must be similar or comparable in nature and operation to ones the company operates in other parts of the world, unless local law or custom dictates a significantly different form.

3. The person who visits the boycotting country to furnish the information must be the official whose responsibility ordinarily includes the creation and registration of foreign operations (i.e., the chief of the board cannot be flown in to answer boycott questions unless the chairman of the board is the corporate official who ordinarily goes into a country to handle foreign registrations).

4. The information provided must be that which is ordinarily known to the person establishing the foreign branch. Obviously, at the time of establishment, the foreign branch will have no information of its own knowledge. Rather, the information should be that which the responsible person has of his own knowledge, or that he would have with him as incidental and necessary to the registration and establishment process. As a general rule, such information would not include such things as copies of agreements with boycotted country concerns or detailed information about the person’s dealings with blacklisted concerns.

5. It is not necessary that documents prepared in compliance with this exception be drafted or executed within the boycotting country. The restrictions on the type of information which may be provided and on who may provide it apply regardless of where the papers are prepared or signed.

SUPPLEMENT NO. 6 TO PART 760—INTERPRETATION

The antiboycott regulations prohibit knowing agreements to comply with certain prohibited requests and requirements of boycotting countries, regardless of how these terms are stated. Similarly, the reporting rules require that a boycott related “solicitation, directive, legend or instruction that asks for information or that asks that a United States person take or refrain from taking a particular action” be reported. Questions have frequently arisen about how particular requirements in the form of directive or instructions are viewed under the antiboycott regulations, and we believe that it will add clarity to the regulations to provide a written interpretation of how three of these terms are treated under the law. The terms in question appear frequently in letters of credit, but may also be found on purchase orders or other shipping or sale documents. They have been brought to the attention of the Department by numerous persons. The terms are, or are similar to, the following: (1) Goods of boycotted country origin are prohibited; (2) No symbols may be used on the goods, packing or cases; (3) Neither goods nor packing shall bear any symbols prohibited in the boycotting country.

(a) Goods of boycotted country origin prohibited. This term is very common in letters of credit from Kuwait and may also appear from time-to-time in invitations to bid, contracts, or other trade documents. It imposes a condition or requirement compliance with which is prohibited, but permitted by an exception under the Regulations (see §760.2(a) and §760.3(b) of this part). It is reportable by those parties to the letter of credit or other transaction that are required to take or refrain from taking some boycott related action by the request. Thus the bank must report the request because it is a term or condition of the letter of credit that it is handling, and the exporter-beneficiary must report the request because the exporter determines the origin of the goods. The freight forwarder does not have to report this request because the forwarder has no role or obligation in this part of the transaction. See §760.5, examples (xiii)-(xv) of this part.

(b) No six-pointed stars may be used on the goods, packing or cases. This term appears from time-to-time on documents from a variety of countries. The Department has taken the position that the six-pointed star is a religious symbol. See §760.2(b), example (viii) of this part. Agreeing to this term is prohibited by the Regulations and not excepted because it constitutes an agreement to furnish information about the religion of a U.S. person. See §760.2(c) of this part. If a person proceeds with a transaction in which this is a condition at any stage of the transaction, that person has agreed to the condition in violation of the Regulations. It is not enough to ignore the condition. Exception must affirmatively be taken to this term or it must be stricken from the documents of the transaction. It is reportable by all parties to the transaction that are restricted by it. For example, unlike the situation described in (a) above, the freight forwarder would have to report this request because his role in the transaction would involve preparation of the packing and cases. The bank and exporter would both have to report, of course, if it were a term in a letter of credit. Each party would be obligated affirmatively to seek an amendment or deletion of the term.

(c) Neither goods nor packaging shall bear any symbols prohibited in the boycotting country. This term appears from time-to-time in letters of credit and shipping documents from Saudi Arabia. In our view, it is neither prohibited, nor reportable because it is not boycott-related. There is a wide range of
symbols that are prohibited in Saudi Arabia for a variety of reasons, many having to do with that nation's cultural and religious beliefs. On this basis, we do not interpret the term to be boycott related. See § 760.2(a)(5) and § 760.5(a)(5)(v) of this part.

SUPPLEMENT NO. 7 TO PART 760—INTERPRETATION

Prohibited Refusal To Do Business

When a boycotting country rejects for boycott-related reasons a shipment of goods sold by a United States person, the United States person selling the goods may return them to its inventory or may re-ship them to other markets (the United States person may not return them to the original supplier and demand restitution). The U.S. person may then make a non-boycott based selection of another supplier and provide the goods necessary to meet its obligations to the boycotting customer in that particular transaction without violating § 760.2(a) of this part. If the United States person receives another order from the same boycotting country for similar goods, the Department has determined that a boycott-based refusal by a United States person to ship goods from the supplier whose goods were previously rejected would constitute a prohibited refusal to do business under § 760.2(a) of this part. The Department will presume that filling such an order with alternative goods is evidence of the person's refusal to deal with the original supplier.

The Department recognizes the limitations this places on future transactions with a boycotting country once a shipment of goods has been rejected. Because of this, the Department wishes to point out that, when faced with a boycotting country's refusal to permit entry of the particular goods, a United States person may state its obligation to abide by the requirements of United States law and indicate its readiness to comply with the unilateral and specific selection of goods by the boycotting country in accordance with § 760.3(c) of this part. That section provides, in pertinent part, as follows:

A United States person may comply or agree to comply in the normal course of business with the unilateral and specific selection by a boycotting country of specific goods, provided that with respect to goods, the items, in the normal course of business, are identifiable as to their source or origin at the time of their entry into the boycotting country by (a) uniqueness of design or appearance or (b) trademark, trade name, or other identification normally on the items themselves, including their packaging.

The United States person may also provide certain services in advance of the unilateral selection by the boycotting country, such as the compilation of lists of qualified suppliers, so long as such services are customary to the type of business the United States person is engaged in, and the services rendered are completely non-exclusionary in character (i.e., the list of qualified suppliers would have to include the supplier whose goods had previously been rejected by the boycotting country, if they were fully qualified). See § 760.2(a)(6) of this part for a discussion of the requirements for the provision of these services.

The Department wishes to emphasize that the unilateral selection exception in § 760.3(d) of this part will be construed narrowly, and that all its requirements and conditions must be met, including the following:

—Discretion for the selection must be exercised by a boycotting country; or by a national or resident of a boycotting country;
—The selection must be stated in the affirmative specifying a particular supplier of goods;
—While a permissible selection may be boycott based, if the United States person knows or has reason to know that the purpose of the selection is to effect discrimination against any United States person on the basis of race, religion, sex, or national origin, the person may not comply under any circumstances.

The Department cautions United States persons confronted with the problem or concern over the boycott-based rejection of goods shipped to a boycotting country that the adoption of devices such as "risk of loss" clauses, or conditions that make the supplier financially liable if his or her goods are rejected by the boycotting country for boycott reasons are presumed by the Department to be evasion of the statute and regulations, and as such are prohibited by § 760.4 of this part, unless adopted prior to January 18, 1978. See § 760.4(d) of this part.

SUPPLEMENT NO. 8 TO PART 760—INTERPRETATION

Definition of Interstate or Foreign Commerce of the United States

When United States persons (as defined by the antiboycott regulations) located within the United States purchase or sell goods or services located outside the United States, they have engaged in an activity within the foreign commerce of the United States. Although the goods or services may never physically come within the geographic boundaries of the several states or territories of the United States, legal ownership or title is transferred from a foreign nation to the United States person who is located in the United States. In the case of a purchase, subsequent resale would also be within United States commerce.
The activity of ‘furnishing information’ consists of two parts, the acquisition of the information and its subsequent transmittal. Under the terms of this exception, the information may not be acquired outside the country for the purpose of responding to the requirement for information imposed by the boycotting country. Thus, if an American company which is a bona fide resident of a boycotting country is required to provide information about its dealings with other U.S. firms, the company may not ask its parent corporation in the United States for that information, or make any other inquiry outside the boundaries of the boycotting country. The information must be provided to the boycotting country authorities based on information or knowledge available to the company and its personnel located within the boycotting country at the time the inquiry is received. See § 760.3 (h) of this part, examples (ii), (iv), and (v). Much of the information in the company’s possession (transaction and corporate records) may have actually originated outside the boycotting country, and much of the information known to the employees may have been acquired outside the boycotting country. This will not cause the information to fall outside the coverage of this exception, if the information was sent to the boycotting country or acquired by the individuals in normal commercial context prior to and unrelated to a boycott inquiry or purpose. It should be noted that if prohibited information (about business relations with a boycotted country, for example) has been forwarded to the affiliate in the boycotting country in anticipation of a possible boycott inquiry from the boycotting country government, the Department will not regard this as information within the knowledge of the bona fide resident under the terms of the exception. However, if the bona fide resident possesses the information prior to receipt of a boycott-related inquiry and obtained it in a normal commercial context, the information can be provided pursuant to this exception notwithstanding the fact that, at some point, the information came into the boycotting country from the outside.

The second part of the analysis of ‘furnishing information’ deals with the limitation on the transmittal of the information. It can only be provided within the boundaries of the boycotting country. The bona fide resident may only provide the information to the party that the boycotting country law requires (directly or through an agent or representative within the country) so long as that party is located within the boycotting country. This application of the exception is somewhat easier, since it is relatively simple to determine if the information is to be given to somebody within the country.
Note that in discussing what constitutes furnishing information “exclusively within” the boycotting country, the Department does not address the nature of the transaction that the information relates to. It is the Department’s position that the nature of the transaction, including the inception or completion of the transaction, is not material in analyzing the availability of this exception.

For example, if a shipment of goods imported into a boycotting country is held up at the time of entry, and information from the bona fide resident within that country is legally required to free those goods, the fact that the information may relate to a transaction that began outside the boycotting country is not material. The availability of the exception will be judged based on the activity of the bona fide resident within the country. If the resident provides that information of his or her own knowledge, and provides it to appropriate parties located exclusively within the country, the exception permits the information to be furnished. Factual variations may raise questions about the application of this exception and the effect of this interpretation. In an effort to anticipate some of these, the Department has set forth below a number of questions and answers. They are incorporated as a part of this interpretation.

1. Q. Under this exception, can a company which is a U.S. person and a bona fide resident of a boycotting country provide information to the local boycott office?
   A. Yes, if local law requires the company to provide this information to the boycott office and all the other requirements are met.

2. Q. If the company knows that the local boycott office will forward the information to the Central Boycott Office, may it still provide the information to the local boycott office?
   A. Yes, if it is required by local law to furnish the information to the local boycott office and all the other requirements are met. The company has no control over what happens to the information after it is provided to the proper authorities. (There is obvious potential for evasion here, and the Department will examine such occurrences closely.)

3. Q. Can a U.S. person who is a bona fide resident of Syria furnish information to the Central Boycott Office in Damascus?
   A. No, unless the law in Syria specifically requires it. The Department will not apply. Syria has a local boycott office responsible for enforcing the boycott in that country.

4. Q. If a company which is a U.S. person and a bona fide resident of a boycotting country has an import shipment held up in customs of the boycotting country, and is required to provide information about the shipment to get it out of customs, may the company do so?
   A. Yes, assuming all other requirements are met. The act of furnishing the information is the activity taking place exclusively within the boycotting country. The fact that the information is provided corollary to a transaction that originates or terminates outside the boycotting country is not material.

5. Q. If the U.S. person and bona fide resident of the boycotting country is shipping goods out of the boycotting country, and is required to certify to customs officials of the country at the time of export that the goods are not of Israeli origin, may he do so even though the certification relates to an export transaction?
   A. Yes, assuming all other requirements are met. See number 4 above.
Egypt, they do not recognize Egyptian embassy actions. The absence of diplomatic relations is the reason for the requirement. In the Department’s view this does not constitute an unsanctioned foreign boycott or embargo against Egypt under the terms of the Export Administration Act. Thus the term is not prohibited, and a request to comply with the statement is not reportable.

**Supplement No. 11 to Part 760—Interpretation**

**Definition of Unsolicited Invitation to Bid**

§ 760.5(a)(4) of this part states in part:

In addition, a United States person who receives an unsolicited invitation to bid, or similar proposal, containing a boycott request has not received a reportable request for purposes of this section where he does not respond to the invitation to bid or other proposal.

The Regulations do not define “unsolicited” in this context. Based on review of numerous situations, the Department has developed certain criteria that it applies in determining if an invitation to bid or other proposal received by a U.S. person is in fact unsolicited.

The invitation is not unsolicited if, during a commercially reasonable period of time preceding the issuance of the invitation, a representative of the U.S. person contacted the company or agency involved for the purpose of promoting business on behalf of the company.

The invitation is not unsolicited if the U.S. person has advertised the product or line of products that are the subject of the invitation in periodicals or publications that ordinarily circulate to the country issuing the invitation during a commercially reasonable period of time preceding the issuance of the invitation.

The invitation is not unsolicited if the U.S. person has sold the same or similar products to the company or agency issuing the invitation within a commercially reasonable period of time before the issuance of the current invitation.

The invitation is not unsolicited if the U.S. person has participated in a trade mission to or trade fair in the country issuing the invitation within a commercially reasonable period of time before the issuance of the invitation.

Under § 760.5(a)(4) of this part, the invitation is regarded as not reportable if the U.S. person receiving it does not respond. The Department has determined that a simple acknowledgment of the invitation does not constitute a response for purposes of this rule. However, an acknowledgment that requests inclusion for future invitations will be considered a response, and a report is required.

Where the person in receipt of an invitation containing a boycott term or condition is undecided about a response by the time a report would be required to be filed under the regulations, it is the Department’s view that the person must file a report as called for in the Regulations. The person filing the report may indicate at the time of filing that he has not made a decision on the boycott request but must file a supplemental report as called for in the regulations at the time a decision is made (§ 760.5(a)(6) of this part).

**Supplement No. 12 to Part 760—Interpretation**

The Department has taken the position that a U.S. person as defined by § 760.1(b) of this part may not make use of an agent to furnish information that the U.S. person is prohibited from furnishing pursuant to § 760.2(d) of this part.

Example (v) under § 760.4 of this part (Evade) provides:

A, a U.S. company, is negotiating a long-term contract with boycotting country Y to meet all of Y’s medical supply needs. Y informs A that before such a contract can be concluded, A must complete Y’s boycott questionnaire. A knows that it is prohibited from answering the questionnaire so it arranges for a local agent in Y to supply the necessary information.

A’s action constitutes evasion of this part, because it is a device to mask prohibited activity carried out on A’s behalf.

This interpretation deals with the application of the Regulations to a commercial agent registration requirement recently imposed by the government of Saudi Arabia. The requirement provides that nationals of Saudi Arabia seeking to register in Saudi Arabia as commercial agents or representatives of foreign concerns must furnish certain boycott-related information about the foreign concern prior to obtaining approval of the registration.

The requirement has been imposed by the Ministry of Commerce of Saudi Arabia, which is the government agency responsible for regulation of commercial agents and foreign commercial registrations. The Ministry requires the agent or representative to state the following:

Declaration: I, the undersigned, hereby declare, in my capacity as (blank) that (name and address of foreign principal) is not presently on the blacklist of the Office for the Boycott of Israel and that it and all its branches, if any, are bound by the decisions issued by the Boycott Office and do not (1) participate in the capital of, (2) license the manufacture of any products or grant trademark or tradeware license to, (3) give experience or technical advice to, or (4) have any other relationship with other companies which are prohibited to be dealt with by the
Boycott Office. Signed (name of commercial agent/representative/distributor).

It is the Department's view that under the circumstances specifically outlined in this interpretation relating to the nature of the requirement, a U.S. person will not be held responsible for a violation of this part when such statements are provided by its commercial agent or representative, even when such statements are made with the full knowledge of the U.S. person.

Nature of the requirement. For a boycott-related registration requirement to fall within the coverage of this interpretation it must have the following characteristics:

1. The requirement for information imposed by the boycotting country applies to a national or other subject of the boycotting country qualified under the local laws of that country to function as a commercial representative within that country;

2. The registration requirement relates to the registration of the commercial agent's or representative's authority to sell or distribute goods within the boycotting country acquired from the foreign concern;

3. The requirement is a routine part of the registration process and is not applied selectively based on boycott-related criteria;

4. The requirement applies only to a commercial agent or representative in the boycotting country and does not apply to the foreign concern itself; and

5. The requirement is imposed by the agency of the boycotting country responsible for regulating commercial agencies.

The U.S. person whose agent is complying with the registration requirement continues to be subject to all the terms of the Regulations, and may not provide or prohibit information to the agent for purposes of the agent's compliance with the requirement.

In addition, the authority granted to the commercial agent or representative by the U.S. person must be consistent with standard commercial practices and not involve any grants of authority beyond those incidental to the commercial sales and distributorship responsibilities of the agent.

Because the requirement does not apply to the U.S. person, no reporting obligation under §760.5 of this part would arise.

This interpretation, like all others issued by the Department discussing applications of the antiboycott provisions of the Export Administration Regulations, should be read narrowly. Circumstances that differ in any material way from those discussed in this notice will be considered under the applicable provisions of the Regulations. Persons are particularly advised not to seek to apply this interpretation to circumstances in which U.S. principals seek to use agents to deal with boycott-related or potential blacklisting situations.

SUPPLEMENT NO. 13 TO PART 760—INTERPRETATION

SUMMARY

This interpretation considers boycott-based contractual language dealing with the selection of suppliers and subcontractors. While this language borrows terms from the "unilateral and specific selection" exception contained in §760.3(c) of this part, it fails to meet the requirements of that exception. Compliance with the requirements of the language constitutes a violation of the regulatory prohibition of boycott-based refusals to do business.

REGULATORY BACKGROUND

Section 760.2(a) of this part prohibits U.S. persons from refusing or knowingly agreeing to refuse to do business with other persons when such refusal is pursuant to an agreement with, requirement of, or request of a boycotting country. That prohibition does not extend to the performance of management, procurement or other pre-award services, however, notwithstanding knowledge that the ultimate selection may be boycott-based. To be permissible such services: (1) Must be customary for the firm or industry involved and (2) must not exclude others from the transaction or involve other actions based on the boycott. See §760.2(a)(6) of this part, "Refusals to Do Business", and example (xiii).

A specific exception is also made in the Regulations for compliance (and agreements to comply) with a unilateral and specific selection of suppliers or subcontractors by a boycotting country buyer. See §760.3(d) of this part. In Supplement No. 1 to part 760, the following form of contractual language was said to fall within that exception for compliance with unilateral and specific selection:

The Government of the boycotting country (or the First Party), in its exclusive power, reserves its right to make the final unilateral and specific selection of any proposed carriers, insurers, suppliers of services to be performed within the boycotting country, or of specific goods to be furnished in accordance with the terms and conditions of this contract.

The Department noted that the actual steps necessary to comply with any selection made under this agreement would also have to meet the requirements of §760.3(c) of this part to claim the benefit of that exception. In other words, the discretion in selecting would have to be exercised exclusively by the boycotting country customer and the selection would have to be stated in the affirmative, naming a particular supplier. See §760.3(d)(4) and (5) of this part.
ANALYSIS OF THE NEW CONTRACTUAL LANGUAGE

The Office of Antiboycott Compliance has learned of the introduction of a new contractual clause into tender documents issued by boycotting country governments. This clause is, in many respects, similar to that dealt with in Supplement No. 1 to part 760, but several critical differences exist.

The clause states:

BOYCOTTING OF BOYCOTTED COUNTRY

In connection with the performance of this Agreement, Contractor acknowledges that the import and customs laws and regulations of boycotting country apply to the furnishing and shipment of any products or components thereof to boycotting country. The Contractor specifically acknowledges that the aforementioned import and customs laws and regulations of boycotting country prohibit, among other things, the importation into boycotting country of products or components thereof: (A) Originating in boycotted country; (B) Manufactured, produced and furnished by companies organized under the laws of boycotted country; and (C) Manufactured, produced or furnished by Nationals or Residents of boycotted country.

The Government, in its exclusive power, reserves its right to make the final unilateral and specific selection of any proposed Carriers, Insurers, Suppliers of Services to be performed within boycotting country or of specific goods to be furnished in accordance with the terms and conditions of this Contract.

To assist the Government in exercising its right under the preceding paragraph, Contractor further agrees to provide a complete list of names and addresses of all his Subcontractors, Suppliers, Vendors and Consultants and any other suppliers of the service for the project.

The title of this clause makes clear that its provisions are intended to be boycott-related. The first paragraph acknowledges the applicability of certain boycott-related requirements of the boycotting country’s laws in language reviewed in part 760, Supplement No. 1, Part II.B. and found to constitute a permissible agreement under the exception contained in § 760.3(a) of this part for compliance with the import requirements of a boycotting country. The second and third paragraphs together deal with the procedure for selecting subcontractors and suppliers of services and goods and, in the context of the clause as a whole, must be regarded as motivated by boycott considerations and intended to enable the boycotting country government to make boycott-based selections, including the elimination of blacklisted subcontractors and suppliers.

The question is whether the incorporation into these paragraphs of some language from the “unilateral and specific selection” clause approved in Supplement No. 1 to part 760 suffices to take the language outside §760.2(a) of this part’s prohibition on boycott-based agreements to refuse to do business. While the first sentence of this clause is consistent with the language discussed in Supplement No. 1 to part 760, the second sentence significantly alters the effect of this clause. The effect is to draw the contractor into the decision-making process, thereby destroying the unilateral character of the selection by the buyer. By agreeing to submit the names of the suppliers it plans to use, the contractor is agreeing to give the boycotting country buyer, who has retained the right of final selection, the ability to reject, for boycott-related reasons, any supplier the contractor has already chosen. Because the requirement appears in the contractual provision dealing with the boycott, the buyer’s rejection of any supplier whose name is given to the buyer pursuant to this provision would be presumed to be boycott-based. By signing the contract, and thereby agreeing to comply with all of its provisions, the contractor must either accept the buyer’s rejection of any supplier, which is presumed to be boycott-based because of the context of this provision, or breach the contract.

In these circumstances, the contractor’s method of choosing its subcontractors and suppliers, in anticipation of the buyer’s boycott-based review, cannot be considered a permissible pre-award service because of the presumed intrusion of boycott-based criteria into the selection process. Thus, assuming all other jurisdictional requirements necessary to establish a violation of part 760 are met, the signing of the contract by the contractor constitutes a violation of §760.2(a) of this part because he is agreeing to refuse to do business for boycott reasons.

The apparent attempt to bring this language within the exception for compliance with unilateral and specific selections is ineffective. The language does not place the discretion to choose suppliers in the hands of the boycotting country buyer but divides this discretion between the buyer and his principal contractor. Knowing that the buyer will not accept a boycotted company as supplier or subcontractor, the contractor is asked to use his discretion in selecting a single supplier or subcontractor for each element of the contract. The boycotting country buyer exercises discretion only through accepting or rejecting the selected supplier or contractor as its boycott policies require. In these circumstances it cannot be said that the buyer is exercising right of unilateral and specific selection which meets the criteria of §760.3(c) of this part. For this reason, agreement to the contractual language discussed here would constitute an agreement.
Pt. 760, Supp. 14

15 CFR Ch. VII (1–1–00 Edition)

to refuse to do business with anyone rejecting the buyer and would violate §760.2(a) of this part.

SUPPLEMENT NO. 14 TO PART 760—INTERPRETATION

(a) Contractual clause concerning import, customs and boycott laws of a boycotting country.
The following language has appeared in tender documents issued by a boycotting country:
Supplier declares his knowledge of the fact that the import, Customs and boycott laws, rules and regulations of [name of boycotting country] apply in importing to [name of boycotting country].
Supplier declares his knowledge of the fact that under these laws, rules and regulations, it is prohibited to import into [name of the boycotting country] any products or parts thereof that originated in [name of boycotting country]; were manufactured, produced or imported by companies formed under the laws of [name of boycotting country]; or were manufactured, produced or imported by nationals or residents of [name of boycotting country].
Agreeing to the above contractual language is a prohibited agreement to refuse to do business, under §760.2(a) of this part. The first paragraph requires broad acknowledgment of the application of the boycotting country’s boycott laws, rules and regulations. Unless this language is qualified to apply only to boycott restrictions with which U.S. persons may comply, agreement to it is prohibited. See §760.2(a) of this part, examples (v) and (vi) under “Agreement to Refuse to Do Business.”
The second paragraph does not limit the scope of the boycott restrictions referenced in the first paragraph. It states that the boycott laws include restrictions on goods originating in the boycotting country; manufactured, produced or supplied by companies organized under the laws of the boycotting country; or manufactured, produced or supplied by nationals or residents of the boycotting country. Each of these restrictions is within the exception for compliance with the import requirements of the boycotting country (§760.3(a) of this part). However, the second paragraph’s list of restrictions is not exclusive. Since the boycott laws generally include more than what is listed and permissible under the antiboycott law, U.S. persons may not agree to the quoted clause. For example, a country’s boycott laws may prohibit imports of goods manufactured by blacklisted firms. Except as provided by §760.3(g) of this part, agreement to and compliance with this boycott restriction would be prohibited under the antiboycott law.
The above contractual language is distinguished from the contract clause determined to be permissible in supplement 1, part II, A, by its acknowledgment that the boycott requirements of the boycotting country apply. Although the first sentence of the Supplement 1 clause does not exclude the possible application of boycott laws, it refers only to the import and customs laws of the boycotting country without mentioning the boycott laws as well. As discussed fully in Supplement No. 1 to part 760, compliance with or agreement to the clause quoted there is, therefore, permissible.
The contract clause quoted above, as well as the clause dealt with in Supplement No. 1 to part 760, part II, A, is reportable under §760.6(a)(1) of this part.

(b) Letter of credit terms removing blacklist certificate requirement if specified vessels used.
The following terms frequently appear on letters of credit covering shipment to Iraq:
Shipment to be effected by Iraqi State Enterprise for Maritime Transport Vessels or by United Arab Shipping Company (SAB) vessels, if available.
If shipment is effected by any of the above company’s [sic] vessels, blacklist certificate or evidence to that effect is not required.
These terms are not reportable and compliance with them is permissible.
The first sentence, a directive to use Iraqi State Enterprise for Maritime Transport or United Arab Shipping vessels, is neither reportable nor prohibited because it is not considered by the Department to be boycott-related. The apparent reason for the directive is Iraq’s preference to have cargo shipped on its own vessels (or, in the case of United Arab Shipping, on vessels owned by a company in part established and owned by the Iraqi government). Such “cargo preference” requirements, calling for the use of importing or exporting country’s own ships, are common throughout the world and are imposed for non-boycott reasons. (See §760.2(a) of this part, example (vii) AGREEMENTS TO REFUSE TO DO BUSINESS.)
In contrast, if the letter of credit contains a list of vessels or carriers that appears to constitute a boycott-related whitelist, a directive to select a vessel from that list would be both reportable and prohibited. When such a directive appears in conjunction with a term removing the blacklist certificate requirement if these vessels are used, the Department will presume that beneficiaries, banks and any other U.S. person receiving the letter of credit know that there is a boycott-related purpose for the directive.
The second sentence of the letter of credit language quoted above does not, by itself, call for a blacklist certificate and is not therefore, reportable. If a term elsewhere on the letter of credit imposes a blacklist certificate requirement, then that other term would be reportable.
(c) Information not related to a particular transaction in U.S. commerce.
Under § 760.2 (c), (d) and (e), of this part U.S. persons are prohibited, with respect to their activities in U.S. commerce, from furnishing certain information. It is the Department's position that the required nexus with U.S. commerce is established when the furnishing of information itself occurs in U.S. commerce. Even when the furnishing of information is not itself in U.S. commerce, however, the necessary relationship to U.S. commerce will be established if the furnishing of information relates to particular transactions in U.S. commerce or to anticipated transactions in U.S. commerce. See, e.g. §760.2(d), examples (vii), (ix) and (xii) of this part.

The simplest situation occurs where a U.S. person located in the United States furnishes information to a boycotting country. The transfer of information from the United States to a foreign country is itself an activity in U.S. commerce. See §760.1(d)(1)(iv) of this part. In some circumstances, the furnishing of information by a U.S. person located outside the United States may also be an activity in U.S. commerce. For example, the controlled foreign subsidiary of a domestic concern might furnish to a boycotting country information the subsidiary obtained from the U.S.-located parent for that purpose. The subsidiary's furnishing would, in these circumstances, constitute an activity in U.S. commerce. See §760.1(d)(8) of this part.

Where the furnishing of information is not itself in U.S. commerce, the U.S. commerce requirement may be satisfied by the fact that the furnishing is related to an activity in U.S. foreign or domestic commerce. For example, if a shipment of goods by a controlled-in-fact foreign subsidiary of a U.S. company to a boycotting country gives rise to an inquiry from the boycotting country concerning the subsidiary's relationship with another firm, the Department regards any responsive furnishing of information by the subsidiary as related to the shipment giving rise to the inquiry. If the shipment is in U.S. foreign or domestic commerce, as defined by the regulations, then the Department regards the furnishing to be related to an activity in U.S. commerce and subject to the antiboycott regulations, whether or not the furnishing itself is in U.S. commerce.

In some circumstances, the Department may regard a furnishing of information as related to a broader category of present and prospective transactions. For example, if a controlled-in-fact foreign subsidiary of a U.S. company is requested to furnish information about its commercial dealings and it appears that failure to respond will result in its blacklisting, any responsive furnishing of information will be regarded by the Department as relating to all of the subsidiary's present and anticipated business activities with the inquiring boycotting country. Accordingly, if any of these present or anticipated business activities are in U.S. commerce, the Department will regard the furnishing as related to an activity in U.S. commerce and subject to the antiboycott regulations.

In deciding whether anticipated business activities will be in U.S. commerce, the Department will consider all of the surrounding circumstances. Particular attention will be given to the history of the U.S. person's business activities with the boycotting country and others, the nature of any activities occurring after a furnishing of information occurs and any relevant economic or commercial factors which may affect these activities.

For example, if a U.S. person has no activities with the boycotting country at present but all of its other international activities are in U.S. commerce, as defined by the Regulations, then the Department is likely to regard any furnishing of information by that person for the purpose of securing entry into the boycotting country's market as relating to anticipated activities in U.S. commerce and subject to the antiboycott regulations. Similarly, if subsequent to the furnishing of information to the boycotting country for the purpose of securing entry into its markets, the U.S. person engages in transactions with that country which are in U.S. commerce, the Department is likely to regard the furnishing as related to an activity in U.S. commerce and subject to the antiboycott regulations.

Supplement No. 15 to Part 760 —
INTERPRETATION

Section 760.2 (c), (d), and (e) of this part prohibits United States persons from furnishing certain types of information with intent to comply with, further, or support an unsanctioned foreign boycott against a country friendly to the United States. The Department has been asked whether prohibited information may be transmitted—that is, passed to others by a United States person who has not directly or indirectly authored the information—without such transmission constituting a furnishing of information in violation of §760.2 (c), (d), and (e) of this part. Throughout this interpretation, “transmission” is defined as the passing on by one person of information initially authored by another. The Department believes that there is no distinction in the EAR between transmitting (as defined above) and furnishing prohibited information under the EAR and that the transmission of prohibited information with the requisite boycott intent is a furnishing of information violative of the EAR. At the same time, however, the circumstances relating to the transmitting
party’s involvement will be carefully considered in determining whether that party intended to comply with, further, or support an unsanctioned foreign boycott.

The EAR does not deal specifically with the relationship between transmitting and furnishing. However, the restrictions in the EAR on responses to boycott-related conditions, both by primary parties and intermediaries, indicate that U.S. persons who simply transmit prohibited information are to be treated the same under the EAR as those who both author and furnish prohibited information. This has been the Department’s position in enforcement actions it has brought.

The few references in the EAR to the transmission of information by third parties are consistent with this position. Two examples, both relating to the prohibition against furnishing of information about U.S. persons’ race, religion, sex, or national origin (§760.2(c) of this part), deal explicitly with transmitting information. These examples (§760.2(c) of this part, example (v), and §760.3(f) of this part, example (vi)) show that, in certain cases, when furnishing certain information is permissible, either because it is not within a prohibition or is excepted from a prohibition, transmitting it is also permissible. These examples concern information that may be furnished by individuals about themselves or their families. The examples show that employees may transmit to a boycotting country visa applications or forms containing information about an employee’s race, religion, sex, or national origin if that employee is the source of the information and authorizes its transmission. In other words, within the limits of ministerial action set forth in these examples, employees’ actions in transmitting information are protected by the exception available to the employee. The distinction between permissible and prohibited behavior rests not on the definitional distinction between furnishing and transmitting, but on the expected nature of the information furnished by the employee. The information originating from the employee does not lose its excepted character because it is transmitted by the employer.

The Department’s position regarding the furnishing and transmission of certificates of one’s own blacklist status rests on a similar basis and does not support the contention that third parties may transmit prohibited information authored by another. Such self-certifications do not violate any prohibitions in the EAR (see Supplement Nos. 1(I)(B), 2, and 5(A)(2); §760.2(f), example (xiv)). It is the Department’s position that it is not prohibited for U.S. persons to transmit such self-certifications completed by others. Once again, because furnishing the self-certification is not prohibited, third parties who transmit the self-certifications offend no prohibition. On the other hand, if a third party authored information about another’s blacklist status, the act of transmitting that information would be prohibited.

A third example in the EAR (§760.5, example (xiv) of this part), which also concerns a permissible transmission of boycott-related information, does not support the theory that one may transmit information authored by another. This example deals with the reporting requirements in §760.5 of this part—not the prohibitions—and merely illustrates that a person who receives and transmits a self-certification has not received a reportable request.

It is also the Department’s position that a U.S. person violates the prohibitions against furnishing information by transmitting prohibited information even if that person has received no reportable request in the transaction. For example, where documents accompanying a letter of credit contain prohibited information, a negotiating bank that transmits the documents, with the requisite boycott intent, to an issuing bank has not received a reportable request, but has furnished prohibited information. While the Department does not regard the suggested distinction between transmitting and furnishing information as meaningful, the facts relating to the third party’s involvement may be important in determining whether that party furnished information with the required intent to comply with, further, or support an unsanctioned foreign boycott. For example, if it is a standard business practice for one participant in a transaction to obtain and pass on, without examination, documents prepared by another party, it might be difficult to maintain that the first participant intended to comply with a boycott by passing on information contained in the unexamined documents. Resolution of such intent questions, however, depends upon an analysis of the individual facts and circumstances of the transaction and the Department will continue to engage in such analysis on a case-by-case basis.

This interpretation, like all others issued by the Department discussing applications of the antiboycott provisions of the EAR, should be read narrowly. Circumstances that differ in any material way from those discussed in this interpretation will be considered under the applicable provisions of the Regulations.

Supplement No. 16 to Part 760—Interpretation

Pursuant to Articles 5, 7, and 26 of the Treaty of Peace between the State of Israel and the Hashemite Kingdom of Jordan and implementing legislation enacted by Jordan, Jordan’s participation in the Arab economic boycott of Israel was formally terminated on August 16, 1995.
On the basis of this action, it is the Department's position that certain requests for information, action or agreement from Jordan which were considered boycott-related by implication now cannot be presumed boycott-related and thus would not be prohibited or reportable under the regulations. For example, a request that an exporter certify that the vessel on which it is shipping its goods is eligible to enter Hashemite Kingdom of Jordan ports has been considered a boycott-related request that the exporter could not comply with because Jordan has had a boycott in force against Israel. Such a request from Jordan after August 16, 1995 would not be presumed boycott-related because the underlying boycott requirement/basis for the certification has been eliminated. Similarly, a U.S. company would not be prohibited from complying with a request received from Jordanian government officials to furnish the place of birth of employees the company is seeking to take to Jordan because there is no underlying boycott law or policy that would give rise to a presumption that the request was boycott-related.

U.S. persons are reminded that requests that are on their face boycott-related or that are for action obviously in furtherance or support of an unsanctioned foreign boycott are subject to the regulations, irrespective of the country of origin. For example, requests containing references to "blacklisted companies", "Israel boycott list", "non-Israeli goods" or other phrases or words indicating boycott purpose would be subject to the appropriate provisions of the Department’s antiboycott regulations.

## PART 762—RECORDKEEPING

### § 762.1 Scope.

Transactions subject to this part apply to the following transactions:

1. Transactions involving restrictive trade practices or boycotts described in part 760 of the EAR;
2. Exports of commodities, software, or technology from the United States and any known reexports, transportation, or diversions of items exported from the United States;
3. Exports to Canada, if, at any stage in the transaction, it appears that a person in a country other than the United States or Canada has an interest therein, or that the item involved is to be reexported, transported, or diverted from Canada to another foreign country;
4. Any other transactions subject to the EAR, including, but not limited to, the prohibitions against servicing, forwarding and other actions for or on behalf of end-users of proliferation concern contained in §§ 734.2(b)(7) and 744.6 of the EAR. This part also applies to all negotiations connected with those transactions, except that for export control matters a mere preliminary inquiry or offer to do business and negative response thereto shall not constitute negotiations, unless the inquiry or offer to do business proposes a transaction that a reasonably prudent exporter would believe likely to lead to a violation of the EAA, the EAR or any order, license or authorization issued thereunder.

### § 762.2 Records to be retained.

In this part, references to the EAR are references to 15 CFR chapter VII, subchapter C.

(a) Transactions subject to this part. The recordkeeping provisions of this part apply to the following transactions:

1. Transactions involving restrictive trade practices or boycotts described in part 760 of the EAR;
2. Exports of commodities, software, or technology from the United States and any known reexports, transportation, or diversions of items exported from the United States;
3. Exports to Canada, if, at any stage in the transaction, it appears that a person in a country other than the United States or Canada has an interest therein, or that the item involved is to be reexported, transported, or diverted from Canada to another foreign country;
4. Any other transactions subject to the EAR, including, but not limited to, the prohibitions against servicing, forwarding and other actions for or on behalf of end-users of proliferation concern contained in §§ 734.2(b)(7) and 744.6 of the EAR. This part also applies to all negotiations connected with those transactions, except that for export control matters a mere preliminary inquiry or offer to do business and negative response thereto shall not constitute negotiations, unless the inquiry or offer to do business proposes a transaction that a reasonably prudent exporter would believe likely to lead to a violation of the EAA, the EAR or any order, license or authorization issued thereunder.

(b) Persons subject to this part. Any person subject to the jurisdiction of the United States who, as principal or agent (including a forwarding agent), participates in any transaction described in paragraph (a) of this section, and any person in the United States or abroad who is required to make and maintain records under any provision of the EAR, shall keep and maintain all records described in §762.2 of this part that are made or obtained by that person and shall produce them in a manner provided by §762.6 of this part.

### § 762.2 Records to be retained.

(a) Records required to be retained. The records required to be retained under this part 762 include the following:

1. Export control documents, as defined in part 772 of the EAR;
2. Memoranda;
§ 762.3

(a) The following types of records have been determined to be exempt from the recordkeeping requirement procedures:

1. Export information page;
2. Special export file list;
3. Vessel log from freight forwarder;
4. Inspection certificate;
5. Warranty certificate;
6. Guarantee certificate;
7. Packing material certificate;
8. Goods quality certificate;
9. Notification to customer of advance meeting;
10. Letter of indemnity;
11. Financial release form;
12. Financial hold form;
13. Export parts shipping problem form;
14. Draft number log;
15. Expense invoice mailing log;
16. Financial status report;
17. Bank release of guarantees;
18. Cash sheet;
19. Commission payment back-up;
20. Commissions payable worksheet;
§ 762.5 Reproduction of original records.

(a) The regulated person may maintain reproductions instead of the original records provided all of the requirements of paragraph (b) of this section are met.

(b) In order to maintain the records required by § 762.2 of this part, the regulated persons defined in § 762.1 of this part may use any photographic, photostatic, miniature photographic, micrographic, automated archival storage, or other process that completely, accurately, legibly and durably reproduces the original records (whether on paper, microfilm, or through electronic digital storage techniques). The process must meet all of the following requirements, which are applicable to all systems:

1. The system must be capable of reproducing all records on paper.
2. The system must record and be able to reproduce all marks, information, and other characteristics of the original record, including both obverse and reverse sides of paper documents in legible form.
3. When displayed on a viewer, monitor, or reproduced on paper, the records must exhibit a high degree of legibility and readability. (For purposes of this section, legible and legibility mean the quality of a letter or numeral that enable the observer to identify it positively and quickly to the exclusion of all other letters or numerals. Readable and readability mean the quality of a group of letters or numerals being recognized as complete words or numbers.)
4. The system must preserve the initial image (including both obverse and reverse sides of paper documents) and record all changes, who made them and when they were made. This information must be stored in such a manner that none of it may be altered once it is initially recorded.
5. The regulated person must establish written procedures to identify the individuals who are responsible for the operation, use and maintenance of the system.
6. The regulated person must establish written procedures for inspection and quality assurance of records in the system and document the implementation of those procedures.
7. The system must be complete and contain all records required to be kept by this part and the regulated person must provide a method for correlating, identifying and locating records relating to the same transaction(s) that are kept in other record keeping systems.
8. The regulated person must keep a record of where, when, by whom, and on what equipment the records and other information were entered into the system.
9. Upon request by the Office of Export Enforcement, the Office of Antiboycott Compliance, or any other agency of competent jurisdiction, the regulated person must furnish, at the
§ 762.6 Period of retention.

(a) Five year retention period. All records required to be kept by the EAR must be retained for five years from the latest of the following times:

(1) The export from the United States of the item involved in the transaction to which the records pertain or the provision of financing, transporting or other service for or on behalf of end-users of proliferation concern as described in §§736.2(b)(7) and 744.6 of the EAR;

(2) Any known reexport, transshipment, or diversion of such item;

(3) Any other termination of the transaction, whether formally in writing or by any other means; or

(4) In the case of records pertaining to transactions involving restrictive trade practices or boycotts described in part 760 of the EAR, the date the regulated person receives the boycott-related request or requirement.

(b) Destruction or disposal of records. If the Bureau of Export Administration or any other government agency makes a formal or informal request for a certain record or records, such record or records may not be destroyed or disposed of without the written authorization of the agency concerned. This prohibition applies to records pertaining to voluntary disclosures made to BXA in accordance with §765.5(c)(4)(ii) and other records even if such records have been retained for a period of time exceeding that required by paragraph (a) of this section.

§ 762.7 Producing and inspecting records.

(a) Persons located in the United States. Persons located in the United States may be asked to produce records that are required to be kept by any provision of the EAR, or any license, order, or authorization issued thereunder and to make them available for inspection and copying by any authorized agent, official, or employee of the Bureau of Export Administration, the U.S. Customs Service, or any other agency of the U.S. Government, without any charge or expense to such agent, official, or employee. The Office of Export Enforcement and the Office of Antiboycott Compliance encourage voluntary cooperation with such requests. When voluntary cooperation is not forthcoming, the Office of Export Enforcement and the Office of Antiboycott Compliance are authorized to issue subpoenas for books, records, and other writings. In instances where a person does not comply with a subpoena, the Department of Commerce may petition a district court to have a subpoena enforced.

(b) Persons located outside of the United States. Persons located outside of the United States that are required to keep records by any provision of the EAR or by any license, order, or authorization issued thereunder shall produce all records or reproductions of records required to be kept, and make them available for inspection and copying upon request by an authorized agent, official, or employee of the Bureau of Export Administration, the U.S. Customs Service, or a Foreign
PART 764—ENFORCEMENT AND PROTECTIVE MEASURES

Sec.
764.1 Introduction.
764.2 Violations.
764.3 Sanctions.
764.4 Reporting of violations.
764.5 Voluntary self-disclosure.

SUPPLEMENT NO. 1 TO PART 764—STANDARD TERMS OF ORDERS DENYING EXPORT PRIVILEGES

SUPPLEMENT NO. 2 TO PART 764—DENIED PERSONS LIST

SOURCE: 61 FR 12902, Mar. 25, 1996, unless otherwise noted.

§ 764.1 Introduction.

In this part, references to the EAR are references to 15 CFR chapter VII, subchapter C. This part specifies conduct that constitutes a violation of the Export Administration Act (EAA) and/or the Export Administration Regulations (EAR) and the sanctions that may be imposed for such violations. Antiboycott violations are described in part 760 of the EAR, and the violations and sanctions specified in part 764 also apply to conduct relating to part 760, unless otherwise stated. This part describes administrative sanctions that may be imposed by the Bureau of Export Administration (BXA). This part also describes criminal sanctions that may be imposed by a United States court and other sanctions that are neither administrative nor criminal. Information is provided on how to report and disclose violations. Finally, this part identifies protective administrative measures that BXA may take in the exercise of its regulatory authority.

§ 764.2 Violations.

(a) Engaging in prohibited conduct. No person may engage in any conduct prohibited by, the EAA, the EAR, or any order, license or authorization issued thereunder.

(b) Causing, aiding, or abetting a violation. No person may cause or aid, abet, counsel, command, induce, procure, or permit the doing of any act prohibited, or the omission of any act required, by the EAA, the EAR, or any order, license or authorization issued thereunder.

(c) Solicitation and attempt. No person may solicit or attempt a violation of the EAA, the EAR, or any order, license or authorization issued thereunder.

(d) Conspiracy. No person may conspire or act in concert with one or more persons in any manner or for any purpose to bring about or to do any act that constitutes a violation of the EAA, the EAR, or any order, license or authorization issued thereunder.

(e) Acting with knowledge of a violation. No person may order, buy, remove, conceal, store, use, sell, loan, dispose of, transfer, transport, finance, forward, or otherwise service, in whole or in part, any item exported or to be exported from the United States, or that is otherwise subject to the EAR, with knowledge that a violation of the EAA, the EAR, or any order, license or authorization issued thereunder, has occurred, is about to occur, or is intended to occur in connection with the item.

(f) Possession with intent to export illegally. No person may possess any item controlled for national security or foreign policy reasons under sections 5 or 6 of the EAA:

(1) With intent to export or reexport such item in violation of the EAA, the EAR, or any order, license or authorization issued thereunder; or

(2) With knowledge or reason to believe that the item would be so exported or reexported.

(g) Misrepresentation and concealment of facts. (1) No person may make any false or misleading representation, statement, or certification, or falsify or conceal any material fact, either directly to BXA, the United States Customs Service, or an official of any other United States agency, or indirectly through any other person:
§ 764.3 Sanctions.

(a) Administrative. Violations of the EAR, the EAA, or any order, license or authorization issued thereunder are subject to the administrative sanctions described in this section and to any other liability, sanction, or penalty available under law. The protective administrative measures that are described in § 764.6 of this part are distinct from administrative sanctions.

(b) Civil penalty. (i) A civil penalty not to exceed $10,000 may be imposed for each violation, except that a civil penalty not to exceed $100,000 may be imposed for each violation involving national security controls imposed under section 5 of the EAA.

(ii) The payment of any civil penalty may be made a condition, for a period not exceeding one year after the imposition of such penalty, to the granting, restoration, or continuing validity of any export license, License Exception, permission, or privilege granted or to be granted to the person upon whom such penalty is imposed.

(iii) The payment of any civil penalty may be deferred or suspended in whole or in part during any probation period that may be imposed. Such deferral or suspension shall not bar the collection of the penalty if the conditions of the deferral, suspension, or probation are not fulfilled.

(2) Denial of export privileges. An order may be issued that restricts the ability of the named persons to engage in export and reexport transactions involving items subject to the EAR, or that restricts access by named persons to items subject to the EAR. An order denying export privileges may be imposed either as a sanction for a violation specified in this part or as a protective administrative measure described in § 764.6(c) or (d) of this part. An order denying export privileges may suspend or revoke any or all outstanding licenses issued under the EAR to a person named in the denial order or in which such person has an interest, may deny or restrict exports and reexports by or to such person of any item subject to the EAR, and may restrict dealings in which that person

1 In the event that any part of the EAR is not under the authority of the EAA, sanctions shall be limited to those provided for by such other authority, but the provisions of this part and of part 766 of the EAR shall apply insofar as not inconsistent with that other authority.
may benefit from any export or reexport of such items. The standard terms of a denial order are set forth in Supplement No. 1 to this part. A non-standard denial order, narrower in scope, may be issued. Authorization to engage in actions otherwise prohibited by a denial order may be given by the Office of Exporter Services, in consultation with the Office of Export Enforcement, following application by a person named in the denial order or by a person seeking permission to deal with a named person.

(3) Exclusion from practice. Any person acting as an attorney, accountant, consultant, freight forwarder, or in any other representative capacity for any license application or other matter before BXA may be excluded by order from any or all such activities before BXA.

(b) Criminal. (1) General. Except as provided in paragraph (b)(2) of this section, whoever knowingly violates or conspires to or attempts to violate the EAA, EAR, or any order or license issued thereunder, shall be fined not more than five times the value of the exports or reexports involved or $50,000, whichever is greater, or imprisoned not more than five years, or both.

(2) Willful violations. (i) Whoever willfully violates or conspires to or attempts to violate any provision of the EAA, the EAR, or any order or license issued thereunder, with knowledge that the exports involved will be used for the benefit of, or that the destination or intended destination of items involved in, any controlled country or any country to which exports or reexports are controlled for foreign policy purposes, except in the case of an individual, shall be fined not more than five times the value of the export or reexport involved or $1,000,000, whichever is greater; and, in the case of an individual, shall be fined not more than $250,000, or imprisoned not more than 10 years, or both.

(ii) Any person who is issued a license under the EAA or the EAR for the export or reexport of any items to a controlled country and who, with knowledge that such export or reexport is being used by such controlled country for military or intelligence gathering purposes contrary to the conditions under which the license was issued, willfully fails to report such use to the Secretary of Defense, except in the case of an individual, shall be fined not more than five times the value of the exports or reexports involved or $1,000,000, whichever is greater; and, in the case of an individual, shall be fined not more than $250,000, or imprisoned not more than five years or both.

(iii) Any person who possesses any item with the intent to export or reexport such item in violation of an export control imposed under section 5 of the EAA (or the EAR, or any order or license issued thereunder with respect to such control), be subject to the penalties set forth in paragraph (b)(2)(i) of this section and shall in the case of a violation of an export control imposed under section 6 of the EAA (or the EAR, or any order or license issued thereunder with respect to such control), be subject to the penalties set forth in paragraph (b)(1) of this section.

(iv) Any person who takes any action with intent to evade the provisions of the EAA, the EAR, or any order or license issued thereunder with respect to such control, shall be subject to the penalties set forth in paragraph (b)(1) of this section, except that in the case of an evasion of an export control imposed under sections 5 or 6 of the EAA (or the EAR, or any order or license issued thereunder with respect to such control), such person shall be subject to the penalties set forth in paragraph (b)(2)(i) of this section.

(3) Other criminal sanctions. Conduct that constitutes a violation of the

---

2In the event that any part of the EAR is not under the authority of the EAA, sanctions shall be limited to those provided for by such other authority or by 18 U.S.C. 3571, a criminal code provision that establishes a maximum criminal fine for a felony that is the greater of the amount provided by the statute that was violated, or an amount not more than $500,000 for an organization. The Federal Sentencing Guidelines found in §2M5.1 of Appendix A to Title 18 of the United States Code apply, to the extent followed by the court, to sentencing for convictions for violating the EAA.
§764.4 Reporting of violations.

(a) Where to report. If a person learns that an export control violation of the EAR has occurred or may occur, that person may notify:

Office of Export Enforcement, Bureau of Export Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Room H-4520, Washington, D.C. 20230, Tel: (202) 482-1208, Facsimile: (202) 482-0964

or, for violations of part 760 of the EAR:

(b) Failure to report violations. Failure to report potential violations may result in the unwarranted issuance of licenses or exports without the required licenses to the detriment of the interests of the United States.

(c) Reporting requirement distinguished. The reporting provisions in paragraph (a) of this section are not “reporting requirements” within the meaning of §764.2(i) of this part.

§764.5 Voluntary self-disclosure.

(a) General policy. BXA strongly encourages disclosure to OEE if you believe that you may have violated the EAR, or any order, license or authorization issued thereunder. Voluntary self-disclosure is a mitigating factor in determining what administrative sanctions, if any, will be sought by OEE.

(b) Limitations. (1) The provisions of this section do not apply to disclosures of violations relating to part 760 of the EAR.

(2) The provisions of this section apply only when information is provided to OEE for its review in determining whether to take administrative action under part 766 of the EAR for violations of the export control provisions of the EAR.
§ 764.5

(3) The provisions of this section apply only when information is received by OEE for review prior to the time that OEE, or any other agency of the United States Government, has learned the same or substantially similar information from another source and has commenced an investigation or inquiry in connection with that information.

(4) While voluntary self-disclosure is a mitigating factor in determining what administrative sanctions, if any, will be sought by OEE, it is a factor that is considered together with all other factors in a case. The weight given to voluntary self-disclosure is solely within the discretion of OEE, and the mitigating effect of voluntary self-disclosure may be outweighed by aggravating factors. Voluntary self-disclosure does not prevent transactions from being referred to the Department of Justice for criminal prosecution. In such situations, OEE should be contacted promptly at one of the offices listed in §764.5(c)(7) of this part.

(5) A firm will not be deemed to have made a disclosure under this section unless the individual making the disclosure did so with the full knowledge and authorization of the firm’s senior management.

(6) The provisions of this section do not, nor should they be relied on to, create, confer, or grant any rights, benefits, privileges, or protection enforceable at law or in equity by any person, business, or entity in any civil, criminal, administrative, or other matter.

(c) Information to be provided. (1) General. Any person wanting to disclose information that constitutes a voluntary self-disclosure should, in the manner outlined below, initially notify OEE as soon as possible after violations are discovered, and then conduct a thorough review of all export-related transactions where violations are suspected.

(2) Initial notification. (i) The initial notification should be in writing and be sent to one of the addresses in §764.5(c)(7) of this part. The notification should include the name of the person making the disclosure and a brief description of the suspected violations. The notification should describe the general nature and extent of the violations. If the person making the disclosure subsequently completes the narrative account required by §764.5(c)(3) of this part, the disclosure will be deemed to have been made on the date of the initial notification for purposes of §764.5(b)(3) of this part.

(ii) OEE recognizes that there may be situations where it will not be practical to make an initial notification in writing. For example, written notification may not be practical if a shipment leaves the United States without the required license, yet there is still an opportunity to prevent acquisition of the items by unauthorized persons. In such situations, OEE should be contacted promptly at one of the offices listed in §764.5(c)(7) of this part.

(3) Narrative account. After the initial notification, a thorough review should be conducted of all export-related transactions where possible violations are suspected. OEE recommends that the review cover a period of five years prior to the date of the initial notification. If your review goes back less than five years, you risk failing to discover violations that may later become the subject of an investigation. Any violations not voluntarily disclosed do not receive consideration under this section. However, the failure to make such disclosures will not be treated as a separate violation unless some other section of the EAR or other provision of law requires disclosure. Upon completion of the review, OEE should be furnished with a narrative account that sufficiently describes the suspected violations so that their nature and gravity can be assessed. The narrative account should also describe the nature of the review conducted and measures that may have been taken to minimize the likelihood that violations will occur in the future. The narrative account should include:

(i) The kind of violation involved, for example, a shipment without the required license or dealing with a party denied export privileges;

(ii) An explanation of when and how the violations occurred;
§ 764.5

(iii) The complete identities and addresses of all individuals and organizations, whether foreign or domestic, involved in the activities giving rise to the violations;

(iv) License numbers;

(v) The description, quantity, value in U.S. dollars and ECCN or other classification of the items involved; and

(vi) A description of any mitigating circumstances.

(4) Supporting documentation. (i) The narrative account should be accompanied by copies of documents that explain and support it, including:

(A) Licensing documents such as licenses, license applications, import certificates and end-user statements;

(B) Shipping documents such as Shipper’s Export Declarations, air waybills and bills of lading; and

(C) Other documents such as letters, facsimiles, telexes and other evidence of written or oral communications, internal memoranda, purchase orders, invoices, letters of credit and brochures.

(ii) Any relevant documents not attached to the narrative account must be retained by the person making the disclosure until OEE requests them, or until a final decision on the disclosed information has been made. After a final decision, the documents should be maintained in accordance with the recordkeeping rules in part 762 of the EAR.

(5) Certification. A certification must be submitted stating that all of the representations made in connection with the voluntary self-disclosure are true and correct to the best of that person’s knowledge and belief. Certifications made by a corporation or other organization should be signed by an official of the corporation or other organization with the authority to do so. Section 764.2(g) of this part, relating to false or misleading representations, applies in connection with the disclosure of information under this section.

(6) Oral presentations. OEE believes that oral presentations are generally not necessary to augment the written narrative account and supporting documentation. If the person making the disclosure believes otherwise, a request for a meeting should be included with the disclosure.

(7) Where to make voluntary self-disclosures. The information constituting a voluntary self-disclosure or any other correspondence pertaining to a voluntary self-disclosure may be submitted to:

Office of Export Enforcement, Director, Intelligence Division, U.S. Department of Commerce, P.O. Box 70, Washington, D.C. 20044

Office of Export Enforcement, Director, Intelligence Division, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Room H-4520, Washington, D.C. 20230, Tel: (202) 482-1208, Facsimile: (202) 482-0964, or to any of the following field offices:

Special Agent in Charge, Boston Field Office, Office of Export Enforcement, New Boston Federal Building, 10 Causeway Street, Room 350, Boston, Massachusetts 02222, Tel: (617) 965-6030, Facsimile: (617) 965-6039

Special Agent in Charge, Chicago Field Office, Office of Export Enforcement, 2400 East Devon, Suite 300, Des Plaines, Illinois 60018, Tel: (312) 353-6640, Facsimile: (312) 353-8008

Special Agent in Charge, Dallas Field Office, Office of Export Enforcement, 525 Griffin Street, Room 622, Dallas, Texas 75202, Tel: (214) 767-9294, Facsimile: (214) 767-9299

Special Agent in Charge, Los Angeles Field Office, Office of Export Enforcement, 2601 Main Street, Suite 310, Irvine, California 92714-6299, Tel: (714) 251-9001, Facsimile: (714) 251-9103

Special Agent in Charge, Miami Field Office, Office of Export Enforcement, 200 East Las Olas Boulevard, Suite 1200, Fort Lauderdale, Florida 33301, Tel: (954) 356-7540, Facsimile: (954) 356-7549

Special Agent in Charge, New York Field Office, Office of Export Enforcement, Teleport II, 2 Teleport Drive, Staten Island, New York 10311-1001, Tel: (718) 370-0217, Facsimile: (718) 370-0826

Special Agent in Charge, San Jose Field Office, Office of Export Enforcement, 96 North 3rd Street, Suite 250, San Jose, California 95112-5572, Tel: (408) 291-4204, Facsimile: (408) 291-4320

Special Agent in Charge, Washington, D.C. Field Office, Office of Export Enforcement, 8001 Forbes Place, Room 201, Springfield, Virginia 22151-0638, Tel: (703) 487-6950, Facsimile: (703) 487-4995.

(d) Action by the Office of Export Enforcement. After OEE has been provided with the required narrative and supporting documentation, it will acknowledge the disclosure by letter, provide the person making the disclosure with a point of contact, and take
whatever additional action, including further investigation, it deems appropriate. As quickly as the facts and circumstances of a given case permit, OEE may take any of the following actions:

1. Inform the person making the disclosure that, based on the facts disclosed, it plans to take no action;
2. Issue a warning letter;
3. Issue a proposed charging letter pursuant to §766.18 of the EAR and attempt to settle the matter;
4. Issue a charging letter pursuant to §766.3 of the EAR if a settlement is not reached; and/or
5. Refer the matter to the Department of Justice for criminal prosecution.

(e) Criteria. For purposes of determining what administrative action to take and what sanctions, if any, to seek, the fact that a voluntary self-disclosure has been made will be a mitigating factor. OEE will take that factor into account along with other mitigating and aggravating factors when determining what, if any, administrative sanctions should be imposed. The factors that OEE will consider are in its sole discretion, but may include:

1. The extent to which the purpose of the control is undermined by the transaction;
2. Whether the transaction would have been authorized had proper application been made;
3. The quantity and value of the items involved;
4. Why the violations occurred. For example, OEE may consider whether the violations were intentional or inadvertent; the degree to which the person responsible for the violation making the disclosure was familiar with the EAR; and whether the violator has been the subject of prior administrative or criminal action under the EAA or the EAR;
5. Whether, as a result of the information provided, OEE is able to prevent any items exported illegally from reaching unauthorized persons or destinations;
6. The degree of cooperation with the ensuing investigation;
7. Whether the person has instituted or improved an internal compliance program to reduce the likelihood of future violations.
8. Treatment of unlawfully exported items after voluntary self-disclosure. (1) Any person taking certain actions with knowledge that a violation of the EAA or the EAR has occurred has violated §764.2(e) of this part. Any person who has made a voluntary self-disclosure knows that a violation may have occurred. Therefore, at the time that a voluntary self-disclosure is made, the person making the disclosure may request permission from BXA to engage in the activities described in §764.2(e) of this part that would otherwise be prohibited. If the request is granted by the Office of Exporter Services in consultation with OEE, future activities with respect to those items that would otherwise violate §764.2(e) of this part will not constitute violations. However, even if permission is granted, the person making the voluntary self-disclosure is not absolved from liability for any violations disclosed nor relieved of the obligation to obtain any required reexport authorizations.

(2) A license to reexport items that are the subject of a voluntary self-disclosure, and that have been exported contrary to the provisions of the EAA or the EAR, may be requested from BXA in accordance with the provisions of part 748 of the EAR. If the applicant for reexport authorization knows that the items are the subject of a voluntary self-disclosure, the request should state that a voluntary self-disclosure was made in connection with the export of the commodities for which reexport authorization is sought.

§764.6 Protective administrative measures.

(a) License Exception limitation. As provided in §740.2(b) of the EAR, all License Exceptions are subject to revision, suspension, or revocation.

(b) Revocation or suspension of licenses. As provided in §750.8 of the EAR, all licenses are subject to revision, suspension, or revocation.

(c) Temporary denial orders. BXA may, in accordance with §766.24 of the EAR, issue an order temporarily denying export privileges when such an order is
necessary in the public interest to prevent the occurrence of an imminent violation.

(d) Denial based on criminal conviction. BXA may, in accordance with §766.25 of the EAR, issue an order denying the export privileges of any person who has been convicted of an offense specified in §11(h) of the EAA.

Supplement No. 1 to Part 764—Standard Terms of Orders Denying Export Privileges

(a) General. Orders denying export privileges may be “standard” or “non-standard.” This supplement specifies terms of the standard order denying export privileges. All denial orders are published in the FEDERAL REGISTER. The failure by any person to comply with any denial order is a violation of the Export Administration Regulations (EAR). (See General Prohibition Four at §736.2(b)(4) of the EAR; §764.2(k) of this part.) All persons whose export privileges are denied by any form of denial order are identified on the Denied Persons List (Supplement No. 2 to this part), with an indication of whether an order is standard or non-standard denoted in the “Terms of order” column. The Denied Persons List also tells you where any denial order, including any non-standard denial order, was published. Denial orders issued prior to March 25, 1996, are to be construed, insofar as possible, as having the same scope and effect as the standard denial order.

The introduction to each denial order shall be specific to that order, and shall include:

(1) The name and address of any denied persons and any related persons subject to the denial order; (2) the basis for the denial order, such as final decision following charges of violation, settlement agreement, §11(h) of the EAA, or temporary denial order request; (3) the period of denial, the effective date of the order, whether and for how long any portion of the denial of export privileges is suspended, and any conditions of probation; and (4) whether any or all outstanding licenses issued under the EAR to the person(s) named in the denial order or in which such person(s) has an interest, are suspended or revoked.

(b) Standard text. The standard denial order shall provide:

"It is therefore ordered:

First, that [the denied person(s)] may not, directly or indirectly, participate in any way in any transaction involving any commodity, software or technology (hereinafter collectively referred to as “item”) exported or to be exported from the United States that is subject to the Export Administration Regulations (EAR), or in any other activity subject to the EAR, including, but not limited to:

A. Applying for, obtaining, or using any license, License Exception, or export control document;

B. Carrying on negotiations concerning, or ordering, buying, receiving, using, selling, delivering, storing, disposing of, forwarding, transporting, financing, or otherwise servicing in any way, any transaction involving any item exported or to be exported from the United States that is subject to the EAR, or in any other activity subject to the EAR; or

C. Benefiting in any way from any transaction involving any item exported or to be exported from the United States that is subject to the EAR, or in any other activity subject to the EAR.

Second, that no person may, directly or indirectly, do any of the following:

A. Export or reexport to or on behalf of the denied person any item subject to the EAR;

B. Take any action that facilitates the acquisition or attempted acquisition by a denied person of the ownership, possession, or control of any item subject to the EAR that has been or will be exported from the United States, including financing or other support activities related to a transaction whereby a denied person acquires or attempts to acquire such ownership, possession or control;

C. Take any action to acquire from or to facilitate the acquisition or attempted acquisition from the denied person of any item subject to the EAR that has been exported from the United States;

D. Obtain from the denied person in the United States any item subject to the EAR with knowledge or reason to know that the item will be, or is intended to be, exported from the United States; or

E. Engage in any transaction to service any item subject to the EAR that has been or will be exported from the United States and which is owned, possessed or controlled by a denied person, or service any item, of whatever origin, that is owned, possessed or controlled by a denied person if such service involves the use of any item subject to the EAR that has been or will be exported from the United States. For purposes of this paragraph, servicing means installation, maintenance, repair, modification or testing.

Third, that, after notice and opportunity for comment as provided in §766.23 of the EAR, any person, firm, corporation, or business organization related to the denied person by affiliation, ownership, control, or position of responsibility in the conduct of trade or related services may also be made subject to the provisions of this order.

Fourth, that this order does not prohibit any export, reexport, or other transaction..."
subject to the EAR where the only items involved that are subject to the EAR are the foreign-produced direct product of U.S.-origin technology. This order, which constitutes the final agency action in this matter, is effective immediately."

SUPPLEMENT NO. 2 TO PART 764—DENIED PERSONS LIST

(a) General. (1) The Denied Persons List identifies those persons denied export privileges by the Bureau of Export Administration (BXA) pursuant to the terms of an order. Part A of the Denied Persons List lists all denied persons in alphabetical order and provides supplementary information, while Part B lists all denied persons by geographic area. Part A of the Denied Persons List is organized into five columns, including the name and address of the denied person, the effective and expiration dates of the order, a brief description of the terms of the order, and a citation to the FEDERAL REGISTER where the terms of the order can be located. Reference should always be made to the text of a denial order when using the Denied Persons List.

(2) Denial orders issued subsequent to March 25, 1996, shall be identified in part A as being standard or non-standard, and denial orders issued prior to March 25, 1996, shall be construed, insofar as possible, as having the same scope and effect as the standard denial order. Non-standard orders are denoted by the phrase "non-standard" in the "Terms of order" column in part A, standard orders are denoted by the word "standard," and orders issued prior to March 25, 1996, are denoted by the same brief description entered at the time of issuance. Standard orders denying export privileges contain the standard terms set forth in Supplement No. 1 to part 764.

(3) You are responsible for ensuring that you take no action involving items subject to the Export Administration Regulations (EAR) that is contrary to the terms of a denial order.

(b) Related persons. Related persons who are denied export privileges subsequent to the effective date of the interim EAR shall appear in part A of the Denied Persons List with a note identifying the denied persons to whom they are related in the column entitled "Terms of order."

(c) Publication. New and amended denial orders are published in the FEDERAL REGISTER as they are issued. This publication constitutes official notice to the public.

(d) Updates and availability. (1) As a convenience for the public, issuance of denial orders is announced in Export Administration Bulletins. Part A of the Denied Persons List is also available electronically on two bulletin boards of Department of Commerce agencies, Fedworld (National Technical Information Service) and the Economic Bulletin Board (Economics and Statistics Administration). (2) [Reserved]

PART 766—ADMINISTRATIVE ENFORCEMENT PROCEEDINGS

§ 766.1 Scope.

61 FR 12907, Mar. 25, 1996, unless otherwise noted.

§ 766.1 Scope.

In this part, references to the EAR are references to 15 CFR chapter VII, subchapter C. This part describes the procedures for imposing administrative sanctions for violations of the Export Administration Act of 1979, as amended (the EAA), the Export Administration Regulations (EAR), or any order, license or authorization issued thereunder. Parts 760 and 764 of the EAR specify those actions that constitute violations, and part 764 describes the sanctions that apply. In addition to describing the procedures for imposing
§ 766.2 Definitions.

As used in this part, the following definitions apply:

Administrative law judge. The person authorized to conduct hearings in administrative enforcement proceedings brought under the EAA or to hear appeals from the imposition of temporary denial orders. The term “judge” may be used for brevity when it is clear that the reference is to the administrative law judge.

Assistant Secretary. The Assistant Secretary for Export Enforcement, Bureau of Export Administration.

Bureau of Export Administration (BXA). Bureau of Export Administration, United States Department of Commerce, and all of its component units, including, in particular for purposes of this part, the Office of Antiboycott Compliance, the Office of Export Enforcement, and the Office of Exporter Services.

Final decision. A decision or order assessing a civil penalty, denial of export privileges or other sanction, or otherwise disposing of or dismissing a case, which is not subject to further review under this part, but which is subject to collection proceedings or judicial review in an appropriate Federal district court as authorized by law.

Initial decision. A decision of the administrative law judge in proceedings involving violations relating to part 760 of the EAR, which is subject to appellate review by the Under Secretary for Export Administration, but which becomes the final decision in the absence of such an appeal.

Party. BXA and any person named as a respondent under this part.

Recommended decision. A decision of the administrative law judge in proceedings involving violations other than those relating to part 760 of the EAR, which is subject to review by the Under Secretary of Commerce for Export Administration, who issues a written order affirming, modifying or vacating the recommended decision.

Respondent. Any person named as the subject of a charging letter, proposed charging letter, temporary denial order, or other order proposed or issued under this part.

Under Secretary. The Under Secretary for Export Administration, United States Department of Commerce.

§ 766.3 Institution of administrative enforcement proceedings.

(a) Charging letters. The Director of the Office of Export Enforcement or the Director of the Office of Antiboycott Compliance, as appropriate, may begin administrative enforcement proceedings under this part by issuing a charging letter in the name of BXA. The charging letter shall constitute the formal complaint and will state that there is reason to believe that a violation of the EAA, the EAR, or any order, license or authorization issued thereunder, has occurred. It will set forth the essential facts about the alleged violation, refer to the specific regulatory or other provisions involved, and give notice of the sanctions available under part 764 of the EAR. The charging letter will inform the respondent that failure to answer the charges as provided in § 766.6 of this part will be treated as a default.

1By agreement with the Director of the Office of Strategic Industries and Economic Resource Administration, the Director of the Office of Export Enforcement enforces short supply controls imposed under section 7 of the EAA.
under §766.7 of this part, that the respondent is entitled to a hearing if a written demand for one is requested with the answer, and that the respondent may be represented by counsel, or by other authorized representative who has a power of attorney to represent the respondent. A copy of the charging letter shall be filed with the administrative law judge, which filing shall toll the running of the applicable statute of limitations. Charging letters may be amended or supplemented at any time before an answer is filed, or, with permission of the administrative law judge, afterwards. BXA may unilaterally withdraw charging letters at any time, by notifying the respondent and the administrative law judge.

(b) Notice of issuance of charging letter instituting administrative enforcement proceeding. A respondent shall be notified of the issuance of a charging letter, or any amendment or supplement thereto:

(1) By mailing a copy by registered or certified mail addressed to the respondent at the respondent’s last known address;

(2) By leaving a copy with the respondent or with an officer, a managing or general agent, or any other agent authorized by appointment or by law to receive service of process for the respondent; or

(3) By leaving a copy with a person of suitable age and discretion who resides at the respondent’s last known dwelling.

(4) Delivery of a copy of the charging letter, if made in the manner described in paragraph (b)(2) or (3) of this section, shall be evidenced by a certificate of service signed by the person making such service, stating the method of service and the identity of the person with whom the charging letter was left. The certificate of service shall be filed with the administrative law judge.

(c) Date. The date of service of notice of the issuance of a charging letter instituting an administrative enforcement proceeding, or service of notice of the issuance of a supplement or amendment to a charging letter, is the date of its delivery, or of its attempted delivery if delivery is refused.

§ 766.4 Representation.

A respondent individual may appear and participate in person, a corporation by a duly authorized officer or employee, and a partnership by a partner. If a respondent is represented by counsel, counsel shall be a member in good standing of the bar of any State, Commonwealth or Territory of the United States, or of the District of Columbia, or be licensed to practice law in the country in which counsel resides if not the United States. A respondent personally, or through counsel or other representative, shall file a notice of appearance with the administrative law judge. BXA will be represented by the Office of Chief Counsel for Export Administration, U.S. Department of Commerce.

§ 766.5 Filing and service of papers other than charging letter.

(a) Filing. All papers to be filed shall be addressed to “EAR Administrative Enforcement Proceedings,” U.S. Department of Commerce, Room H–6716, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230, or such other place as the administrative law judge may designate. Filing by United States mail, first class postage prepaid, by express or equivalent parcel delivery service, or by hand delivery, is acceptable. Filing by mail from a foreign country shall be by airmail. In addition, the administrative law judge may authorize filing of papers by facsimile or other electronic means, provided that a hard copy of any such paper is subsequently filed. A copy of each paper filed shall be simultaneously served on each party.

(b) Service. Service shall be made by personal delivery or by mailing one copy of each paper to each party in the proceeding. Service by delivery service or facsimile, in the manner set forth in paragraph (a) of this section, is acceptable. Service on BXA shall be addressed to the Chief Counsel for Export Administration, Room H–3839, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230. Service on a respondent shall be to the address to which the charging letter was sent or to such other address as respondent

537
§ 766.6 Answer and demand for hearing.

(a) When to answer. The respondent must answer the charging letter within 30 days after being served with notice of the issuance of a charging letter instituting an administrative enforcement proceeding, or within 30 days of notice of any supplement or amendment to a charging letter, unless time is extended under §766.16 of this part.

(b) Contents of answer. The answer must be responsive to the charging letter and must fully set forth the nature of the respondent’s defense or defenses. The answer must admit or deny specifically each separate allegation of the charging letter; if the respondent is without knowledge, the answer must so state and will operate as a denial. Failure to deny or controvert a particular allegation will be deemed an admission of that allegation. The answer must also set forth any additional or new matter the respondent believes supports a defense or claim of mitigation. Any defense or partial defense not specifically set forth in the answer shall be deemed waived, and evidence thereon may be refused, except for good cause shown.

(c) Demand for hearing. If the respondent desires a hearing, a written demand for one must be submitted with the answer. Any demand by BXA for a hearing must be filed with the administrative law judge within 30 days after service of the answer. Failure to make a timely written demand for a hearing shall be deemed a waiver of the party’s right to a hearing, except for good cause shown. If no party demands a hearing, the matter will go forward in accordance with the procedures set forth in §766.15 of this part.

(d) English language required. The answer, all other papers, and all documentary evidence must be submitted in English, or translations into English must be filed and served at the same time.

§ 766.7 Default.

(a) General. Failure of the respondent to file an answer within the time provided constitutes a waiver of the respondent’s right to appear and contest the allegations in the charging letter. In such event, the administrative law judge, on BXA’s motion and without further notice to the respondent, shall find the facts to be as alleged in the charging letter and render an initial or recommended decision containing findings of fact and appropriate conclusions of law and issue or recommend an order imposing appropriate sanctions. The decision and order shall be subject to review by the Under Secretary in accordance with the applicable procedures set forth in §766.21 or §766.22 of this part.

(b) Petition to set aside default—(1) Procedure. Upon petition filed by a respondent against whom a default order has been issued, which petition is accompanied by an answer meeting the requirements of §766.6(b) of this part, the Under Secretary may, after giving all parties an opportunity to comment, and for good cause shown, set aside the
default and vacate the order entered thereon and remand the matter to the administrative law judge for further proceedings.

(2) Time limits. A petition under this section must be made within one year of the date of entry of the order which the petition seeks to have vacated.

§ 766.8 Summary decision.

At any time after a proceeding has been initiated, a party may move for a summary decision disposing of some or all of the issues. The administrative law judge may render an initial or recommended decision and issue or recommend an order if the entire record shows, as to the issue(s) under consideration:

(a) That there is no genuine issue as to any material fact; and
(b) That the moving party is entitled to a summary decision as a matter of law.

§ 766.9 Discovery.

(a) General. The parties are encouraged to engage in voluntary discovery regarding any matter, not privileged, which is relevant to the subject matter of the pending proceeding. The provisions of the Federal Rules of Civil Procedure relating to discovery apply to the extent consistent with this part and except as otherwise provided by the administrative law judge or by waiver or agreement of the parties. The administrative law judge may make any order which justice requires to protect a party or person from annoyance, embarrassment, oppression, or undue burden or expense. These orders may include limitations on the scope, method, time and place of discovery, and provisions for protecting the confidentiality of classified or otherwise sensitive information.

(b) Interrogatories and requests for admission or production of documents. A party may serve on any party interrogatories, requests for admission, or requests for production of documents for inspection and copying, and a party concerned may apply to the administrative law judge for such enforcement or protective order as that party deems warranted with respect to such discovery. The service of a discovery request shall be made at least 20 days before the scheduled date of the hearing unless the administrative law judge specifies a shorter time period. Copies of interrogatories, requests for admission and requests for production of documents and responses thereto shall be served on all parties, and a copy of the certificate of service shall be filed with the administrative law judge. Matters of fact or law of which admission is requested shall be deemed admitted unless, within a period designated in the request (at least 10 days after service, or within such additional time as the administrative law judge may allow), the party to whom the request is directed serves upon the requesting party a sworn statement either denying specifically the matters of which admission is requested or setting forth in detail the reasons why the party to whom the request is directed cannot truthfully either admit or deny such matters.

(c) Depositions. Upon application of a party and for good cause shown, the administrative law judge may order the taking of the testimony of any person by deposition and the production of specified documents or materials by the person at the deposition. The application shall state the purpose of the deposition and set forth the facts sought to be established through the deposition.

(d) Enforcement. The administrative law judge may order a party to answer designated questions, to produce specified documents or things or to take any other action in response to a proper discovery request. If a party does not comply with such an order, the administrative law judge may make a determination or enter any order in the proceeding as the judge deems reasonable and appropriate. The judge may strike related charges or defenses in whole or in part or may take particular facts relating to the discovery request to which the party failed or refused to respond as being established for purposes of the proceeding in accordance with the contentions of the party seeking discovery. In addition, enforcement by a district court of the United States may be sought under section 12(a) of the EAA.
§ 766.10 Subpoenas.

(a) Issuance. Upon the application of any party, supported by a satisfactory showing that there is substantial reason to believe that the evidence would not otherwise be available, the administrative law judge will issue subpoenas requiring the attendance and testimony of witnesses and the production of such books, records or other documentary or physical evidence for the purpose of the hearing, as the judge deems relevant and material to the proceedings, and reasonable in scope.

(b) Service. Subpoenas issued by the administrative law judge may be served in any of the methods set forth in § 766.5(b) of this part.

(c) Timing. Applications for subpoenas must be submitted at least 10 days before the scheduled hearing or deposition, unless the administrative law judge determines, for good cause shown, that extraordinary circumstances warrant a shorter time.

§ 766.11 Matter protected against disclosure.

(a) Protective measures. It is often necessary for BXA to receive and consider information and documents that are sensitive from the standpoint of national security, foreign policy, business confidentiality, or investigative concern, and that are to be protected against disclosure. Accordingly, and without limiting the discretion of the administrative law judge to give effect to any other applicable privilege, it is proper for the administrative law judge to limit discovery or introduction of evidence or to issue such protective or other orders as in the judge's judgment may be consistent with the objective of preventing undue disclosure of the sensitive documents or information. Where the administrative law judge determines that documents containing the sensitive matter need to be made available to a respondent to avoid prejudice, the judge may direct BXA to prepare an unclassified and nonsensitive summary or extract of the documents. The administrative law judge may compare the extract or summary with the original to ensure that it is supported by the source document and that it omits only so much as must remain classified or undisclosed. The summary or extract may be admitted as evidence in the record.

(b) Arrangements for access. If the administrative law judge determines that this procedure is unsatisfactory and that classified or otherwise sensitive matter must form part of the record in order to avoid prejudice to a party, the judge may provide the parties opportunity to make arrangements that permit a party or a representative to have access to such matter without compromising sensitive information. Such arrangements may include obtaining security clearances, obtaining a national interest determination under section 12(c) of the EAA, or giving counsel for a party access to sensitive information and documents subject to assurances against further disclosure, including a protective order, if necessary.

§ 766.12 Prehearing conference.

(a) The administrative law judge, on the judge's own motion or on request of a party, may direct the parties to participate in a prehearing conference, either in person or by telephone, to consider:

(1) Simplification of issues;
(2) The necessity or desirability of amendments to pleadings;
(3) Obtaining stipulations of fact and of documents to avoid unnecessary proof; or
(4) Such other matters as may expedite the disposition of the proceedings.

(b) The administrative law judge may order the conference proceedings to be recorded electronically or taken by a reporter, transcribed and filed with the judge.

(c) If a prehearing conference is impracticable, the administrative law judge may direct the parties to correspond with the judge to achieve the purposes of such a conference.

(d) The administrative law judge will prepare a summary of any actions agreed on or taken pursuant to this section. The summary will include any written stipulations or agreements made by the parties.

§ 766.13 Hearings.

(a) Scheduling. The administrative law judge, by agreement with the parties or upon notice to all parties of not
§ 766.17 Decision of the administrative law judge.

(a) Predecisional matters. Except for default proceedings under §766.1 of this part, the administrative law judge will give the parties reasonable opportunity
§ 766.17  

(b) Decision and order. After considering the entire record in the proceeding, the administrative law judge will issue a written decision.

(1) Initial decision. For proceedings charging violations relating to part 760 of the EAR, the decision rendered shall be an initial decision. The decision will include findings of fact, conclusions of law, and findings as to whether there has been a violation of the EAA, the EAR, or any order, license or authorization issued thereunder. If the administrative law judge finds that the evidence of record is insufficient to sustain a finding that a violation has occurred with respect to one or more charges, the judge shall order dismissal of the charges in whole or in part, as appropriate. If the administrative law judge finds that one or more violations have been committed, the judge may issue an order imposing administrative sanctions, as provided in part 764 of the EAR. The decision and order shall be served on each party, and shall become effective as the final decision of the Department 30 days after service, unless an appeal is filed in accordance with § 766.21 of this part.

(2) Recommended decision. For proceedings not involving violations relating to part 760 of the EAR, the decision rendered shall be a recommended decision. The decision will include recommended findings of fact, conclusions of law, and findings as to whether there has been a violation of the EAA, the EAR or any order, license or authorization issued thereunder. If the administrative law judge finds that the evidence of record is insufficient to sustain a recommended finding that a violation has occurred with respect to one or more charges, the judge shall recommend dismissal of any such charge. If the administrative law judge finds that one or more violations have been committed, the judge shall recommend an order imposing administrative sanctions, as provided in part 764 of the EAR, or such other action as the judge deems appropriate. The administrative law judge shall immediately certify the record, including the original copy of the recommended decision and order, to the Under Secretary for review in accordance with § 766.22 of this part. The administrative law judge shall also immediately serve the recommended decision on all parties. Because of the time limits established in the EAA for review by the Under Secretary, service upon parties shall be by personal delivery, express mail or other overnight carrier.

(c) Suspension of sanctions. Any order imposing administrative sanctions may provide for the suspension of the sanction imposed, in whole or in part and on such terms of probation or other conditions as the administrative law judge or the Under Secretary may specify. Any suspension order may be modified or revoked by the signing official upon application of BXA showing a violation of the probationary terms or other conditions, after service on the respondent of notice of the application in accordance with the service provisions of § 766.3 of this part, and with such opportunity for response as the responsible signing official in his/her discretion may allow. A copy of any order modifying or revoking the suspension shall also be served on the respondent in accordance with the provisions of § 766.3 of this part.

(d) Time for decision. Administrative enforcement proceedings not involving violations relating to part 760 of the EAR shall be concluded, including review by the Under Secretary under § 766.22 of this part, within one year of the submission of a charging letter, unless the administrative law judge, for good cause shown, extends such period. The charging letter will be deemed to have been submitted to the administrative law judge on the date the respondent files an answer or on the date BXA files a motion for a default order pursuant to § 766.7(a) of this part, whichever occurs first.
§ 766.18 Settlement.

(a) Cases may be settled before service of a charging letter. In cases in which settlement is reached before service of a charging letter, a proposed charging letter will be prepared, and a settlement proposal consisting of a settlement agreement and order will be submitted to the Assistant Secretary for approval and signature. If the Assistant Secretary does not approve the proposal, he/she will notify the parties and the case will proceed as though no settlement proposal had been made. If the Assistant Secretary approves the proposal, he/she will issue an appropriate order, and no action will be required by the administrative law judge.

(b) Cases may also be settled after service of a charging letter. (1) If the case is pending before the administrative law judge, the judge shall stay the proceedings for a reasonable period of time, usually not to exceed 30 days, upon notification by the parties that they have entered into good faith settlement negotiations. The administrative law judge may, in his/her discretion, grant additional stays. If settlement is reached, a proposal will be submitted to the Assistant Secretary for approval and signature. If the Assistant Secretary approves the proposal, he/she will issue an appropriate order, and notify the administrative law judge that the case is withdrawn from adjudication. If the Assistant Secretary does not approve the proposal, he/she will notify the parties and the case will proceed to adjudication by the administrative law judge as though no settlement proposal had been made.

(2) If the case is pending before the Under Secretary under § 766.21 or § 766.22 of this part, the parties may submit a settlement proposal to the Under Secretary for approval and signature. If the Under Secretary approves the proposal, he/she will issue an appropriate order. If the Under Secretary does not approve the proposal, the case will proceed to final decision in accordance with § 766.21 or § 766.22 of this part, as appropriate.

§ 766.19 Reopening.

The respondent may petition the administrative law judge within one year of the date of the final decision, except where the decision arises from a default judgment or from a settlement, to reopen an administrative enforcement proceeding to receive any relevant and material evidence which was unknown or unobtainable at the time the proceeding was held. The petition must include a summary of such evidence, the reasons why it is deemed relevant and material, and the reasons why it could not have been presented at the time the proceedings were held. The administrative law judge will grant or deny the petition after providing other parties reasonable opportunity to comment. If the proceeding is reopened, the administrative law judge may make such arrangements as the judge deems appropriate for receiving the new evidence and completing the record. The administrative law judge will then issue a new initial or recommended decision and order, and the case will proceed to final decision and order in accordance with § 766.21 or § 766.22 of this part, as appropriate.

§ 766.20 Record for decision and availability of documents.

(a) General. The transcript of hearings, exhibits, rulings, orders, all papers and requests filed in the proceedings and, for purposes of any appeal under § 766.21 of this part or review under § 766.22 of this part, the decision may specify. Any such suspension may be modified or revoked by the signing official, in accordance with the procedures set forth in § 766.17(c) of this part.

(d) Any respondent who agrees to an order imposing any administrative sanction does so solely for the purpose of resolving the claims in the administrative enforcement proceeding brought under this part. This reflects the fact that BXA has neither the authority nor the responsibility for instituting, conducting, settling, or otherwise disposing of criminal proceedings. That authority and responsibility are vested in the Attorney General and the Department of Justice.

(e) Cases that are settled may not be reopened or appealed.
§ 766.21

Appeals.

(a) Grounds. For proceedings charging violations relating to part 760 of the EAR, a party may appeal to the Under Secretary from an order disposing of a proceeding or an order denying a petition to set aside a default or a petition for reopening, on the grounds:

(1) That a necessary finding of fact is omitted, erroneous or unsupported by substantial evidence of record;

(2) That a necessary legal conclusion or finding is contrary to law;

(3) That prejudicial procedural error occurred, or

(4) That the decision or the extent of sanctions is arbitrary, capricious or an abuse of discretion. The appeal must specify the grounds on which the appeal is based and the provisions of the order from which the appeal is taken.

(b) Filing of appeal. An appeal from an order must be filed with the Office of the Under Secretary for Export Administration, Bureau of Export Administration, U.S. Department of Commerce, Room H–3898, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230, within 30 days after service of

VerDate 20<MAR>2000 12:47 Mar 21, 2000 Jkt 190045 PO 00000 Frm 00544 Fmt 8010 Sfmt 8010 Y:\SGML\190045T.XXX pfrm07 PsN: 190045T
the order appealed from. If the Under Secretary cannot act on an appeal for any reason, the Under Secretary will designate another Department of Commerce official to receive and act on the appeal.

(c) Effect of appeal. The filing of an appeal shall not stay the operation of any order, unless the order by its express terms so provides or unless the Under Secretary, upon application by a party and with opportunity for response, grants a stay.

(d) Appeal procedure. The Under Secretary normally will not hold hearings or entertain oral argument on appeals. A full written statement in support of the appeal must be filed with the appeal and be simultaneously served on all parties, who shall have 30 days from service to file a reply. At his/her discretion, the Under Secretary may accept new submissions, but will not ordinarily accept those submissions filed more than 30 days after the filing of the reply to the appellant’s first submission.

(e) Decisions. The decision will be in writing and will be accompanied by an order signed by the Under Secretary giving effect to the decision. The order may either dispose of the case by affirming, modifying or reversing the order of the administrative law judge or may refer the case back to the administrative law judge for further proceedings. Because of the time limits, the Under Secretary’s review will ordinarily be limited to the written record for decision, including the transcript of any hearing, and any submissions by the parties concerning the recommended decision.

(d) Delivery. The final decision and implementing order shall be served on the parties and will be publicly available in accordance with §766.20 of this part.

(e) Appeals. The charged party may appeal the Under Secretary’s written order within 15 days to the United States Court of Appeals for the District of Columbia pursuant to 50 U.S.C. app. §2412(c)(3).

§ 766.23 Related persons.

(a) General. In order to prevent evasion, certain types of orders under this part may be made applicable not only to the respondent, but also to other persons then or thereafter related to the respondent by ownership, control, position of responsibility, affiliation, or other connection in the conduct of trade or business. Orders that may be made applicable to related persons include those that deny or affect export privileges, including temporary denial orders, and those that exclude a respondent from practice before BXA.

(b) Procedures. If BXA has reason to believe that a person is related to the respondent and that an order that is being sought or that has been issued
§ 766.24 Temporary denials.

(a) General. The procedures in this section apply to temporary denial orders issued on or after July 12, 1985. For temporary denial orders issued on or before July 11, 1985, the proceedings will be governed by the applicable regulations in effect at the time the temporary denial orders were issued. Without limiting any other action BXA may take under the EAR with respect to any application, order, license or authorization issued under the EAA, BXA may ask the Assistant Secretary to issue a temporary denial order on an ex parte basis to prevent an imminent violation, as defined in this section, of the EAA, the EAR, or any order, license or authorization issued thereunder.

(b) Issuance. (1) The Assistant Secretary may issue an order temporarily denying to a person any or all of the export privileges described in part 764 of the EAR upon a showing by BXA that the order is necessary in the public interest to prevent an imminent violation of the EAA, the EAR, or any order, license or authorization issued thereunder.

(2) The temporary denial order shall define the imminent violation and state why it was issued without a hearing. Because all denial orders are public, the description of the imminent violation and the reasons for proceeding on an ex parte basis set forth therein shall be stated in a manner that is consistent with national security, foreign policy, business confidentiality, and investigative concerns.

(c) Related persons. A temporary denial order may be made applicable to related persons in accordance with § 766.23 of this part.

(d) Renewal. (1) If, no later than 20 days before the expiration date of a temporary denial order, BXA believes that renewal of the denial order is necessary in the public interest to prevent
an imminent violation, BXA may file a written request setting forth the basis for its belief, including any additional or changed circumstances, asking that the Assistant Secretary renew the temporary denial order, with modifications, if any are appropriate, for an additional period not exceeding 180 days. BXA's request shall be delivered to the respondent, or any agent designated for this purpose, in accordance with §766.5(b) of this part, which will constitute notice of the renewal application.

(2) Non-resident respondents. To facilitate timely notice of renewal requests, a respondent not a resident of the United States may designate a local agent for this purpose and provide written notification of such designation to BXA in the manner set forth in §766.5(b) of this part.

(3) Hearing. (i) A respondent may oppose renewal of a temporary denial order by filing with the Assistant Secretary a written submission, supported by appropriate evidence, to be received not later than seven days before the expiration date of such order. For good cause shown, the Assistant Secretary may consider submissions received not later than five days before the expiration date. The Assistant Secretary ordinarily will not allow discovery; however, for good cause shown in respondent's submission, he/she may allow the parties to take limited discovery, consisting of a request for production of documents. If requested by the respondent in the written submission, the Assistant Secretary shall hold a hearing on the renewal application. The hearing shall be on the record and ordinarily will consist only of oral argument. The only issue to be considered on BXA's request for renewal is whether the temporary denial order should be continued to prevent an imminent violation as defined herein.

(ii) Any person designated as a related person may not oppose issuance or renewal of the temporary denial order, but may file an appeal in accordance with §766.2(3)(c) of this part.

(iii) If no written opposition to BXA's renewal request is received within the specified time, the Assistant Secretary may issue the order renewing the temporary denial order without a hearing.

(4) A temporary denial order may be renewed more than once.

(e) Appeals—(1) Filing. (i) A respondent may, at any time, file an appeal of the initial or renewed temporary denial order with the administrative law judge.

(ii) The filing of an appeal shall stay neither the effectiveness of the temporary denial order nor any application for renewal, nor will it operate to bar the Assistant Secretary's consideration of any renewal application.

(2) Grounds. A respondent may appeal on the grounds that the finding that the order is necessary in the public interest to prevent an imminent violation is unsupported.

(3) Appeal procedure. A full written statement in support of the appeal must be filed with the appeal together with appropriate evidence, and be simultaneously served on BXA, which shall have seven days from receipt to file a reply. Service on the administrative law judge shall be addressed to the Office of the Administrative Law Judge, U.S. Department of Commerce, Room H-6716, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230. Service on BXA shall be as set forth in §766.5(b) of this part. The administrative law judge normally will not hold hearings or entertain oral argument on appeals.

(4) Recommended Decision. Within 10 working days after an appeal is filed, the administrative law judge shall submit a recommended decision to the Under Secretary, and serve copies on the parties, recommending whether the issuance or the renewal of the temporary denial order should be affirmed, modified or vacated.

(5) Final decision. Within five working days after receipt of the recommended decision, the Under Secretary shall issue a written order accepting, rejecting or modifying the recommended decision. Because of the time constraints, the Under Secretary's review will ordinarily be limited to the written record for decision, including the transcript of any hearing. The issuance or renewal of the temporary denial order shall be affirmed only if there is reason to believe that the temporary denial order is required in the public interest to prevent an imminent violation of the
§ 766.25 Administrative action denying permission to apply for or use export licenses.

(a) General. The Director of the Office of Exporter Services, in consultation with the Director of the Office of Export Enforcement, may deny permission to apply for or use any license, including any License Exception, to any person who has been convicted of a violation of the EAA, the EAR, or any order, license or authorization issued thereunder; any regulation, license or order issued under the International Emergency Economic Powers Act (50 U.S.C. 1701-1706); 18 U.S.C. 793, 794 or 798; section 4(b) of the Internal Security Act of 1950 (50 U.S.C. 783(b)), or section 38 of the Arms Export Control Act (22 U.S.C. 2778).

(b) Procedure. Upon notification that a person has been convicted of a violation of one or more of the provisions specified in paragraph (a) of this section, the Director of the Office of Exporter Services, in consultation with the Director of the Office of Export Enforcement, will determine whether to deny permission to apply for or use any export license, including any License Exception, to any such person. The Director of the Office of Exporter Services will notify each person denied under this section by letter stating that permission to apply for or use export licenses has been denied.

(c) Criteria. In determining whether and for how long to deny U.S. export privileges to a person previously convicted of one or more of the statutes set forth in paragraph (a) of this section, the Director of the Office of Exporter Services may take into consideration any relevant information, including, but not limited to, the seriousness of the offense involved in the criminal prosecution, the nature and duration of the criminal sanctions imposed, and whether the person has undertaken any corrective measures.

(d) Duration. Any denial of permission to apply for or use export licenses, including any License Exception, under this section shall not exceed 10 years from the date of the conviction of the person who is subject to the denial.

(e) Effect. Any person denied permission to apply for and use licenses under this section will be considered a “person denied export privileges” for purposes of § 736.2(b)(4) (General Prohibition 4—Engage in actions prohibited by a denial order) and § 764.2(k) of the EAR.

(f) Publication. The name and address(es) of any person denied permission to apply for or use export licenses under this section will be published as described in Supplement No. 2 to part 764 of the EAR, noting that such action was taken pursuant to this section and section 11(h) of the EAA.

(g) Appeal. An appeal of an action under this section will be pursuant to part 756 of the EAR.

(h) Applicability to related person. The Director of the Office of Exporter Services, in consultation with the Director of the Office of Export Enforcement, may take action in accordance with § 766.23 of this part to make applicable to related persons an order that is being sought or that has been issued under this section.

PART 768—FOREIGN AVAILABILITY DETERMINATION PROCEDURES AND CRITERIA

Sec.
768.1 Introduction.
768.2 Foreign availability described.
768.3 Foreign availability assessment.
768.4 Initiation of an assessment.
In this part, references to the Export Administration Regulations (EAR) are references to 15 CFR chapter VII, subchapter C.

(a) Authority. Pursuant to sections 5(f) and 5(h) of the Export Administration Act (EAA), the Under Secretary of Commerce for Export Administration directs the Bureau of Export Administration (BXA) in gathering and analyzing all the evidence necessary for the Secretary to determine foreign availability.

(b) Scope. This part applies only to the extent that items are controlled for national security purposes. This part does not apply to encryption items that were formerly controlled on the U.S. Munitions List and that were transferred to the Commerce Control List consistent with E.O. 13026 of November 15, 1996 (61 FR 58767) and pursuant to the Presidential Memorandum of that date, which shall not be subject to any mandatory foreign availability review procedures.

(c) Types of programs. There are two general programs of foreign availability:

(1) Foreign availability to controlled countries. In this category are denied license assessments, decontrol assessments, and evaluations of eligibility for expedited licensing (see §768.4 of this part).

(2) Foreign availability to non-controlled countries. In this category are denied license assessments, decontrol assessments, and evaluations of eligibility for expedited licensing (see §768.4 of this part).

(d) Definitions. The following are definitions of terms used in this part 768:

Allegation. See foreign availability submission.

Assessment. An evidentiary analysis that BXA conducts concerning the foreign availability of a given item based on the assessment criteria, data gathered by BXA, and the data and recommendations submitted by the Departments of Defense and State and other relevant departments and agencies, TAC committees, and industry.

Assessment criteria. Statutorily established criteria that must be assessed for the Secretary to make a determination with respect to foreign availability. They are, available-in-fact, from a non-U.S. source, in sufficient quantity so as to render the control ineffective, and of comparable quality. (See §768.6 of this part).

Available-in-fact. An item is available-in-fact to a country if it is produced within the country or if it may be obtained by that country from a third country. Ordinarily, items will not be considered available-in-fact to non-controlled countries if the items are available only under a validated national security license or a comparable authorization from a country that maintains export controls on such items cooperatively with the United States.

Claimant. Any party who makes a foreign availability submission, excluding TACs.

Comparable quality. An item is of comparable quality to an item controlled under the EAR if it possesses the characteristics specified in the Commerce Control List (CCL) for that item and is alike in key characteristics that include, but are not limited to: (1) Function; (2) technological approach; (3) performance thresholds; (4) maintainability and service life; and (5) any other attribute relevant to the purpose for which the control was placed on the item.
§ 768.1 Controlled countries. Albania, Armenia, Azerbaijan, Belarus, Bulgaria, Cambodia, Cuba, Estonia, Georgia, Kazakhstan, Kyrgyzstan, Laos, Latvia, Lithuania, Moldova, Mongolia, North Korea, Romania, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan, Vietnam and the People’s Republic of China.

Decontrol. Removal of license requirements under the EAR.

Decontrol assessment. An assessment of the foreign availability of an item to a country or countries for purposes of determining whether decontrol is warranted. Such assessments may be conducted after BXA receives a foreign availability submission or a TAC certification, or by the Secretary’s own initiative.

Denied license assessment. A foreign availability assessment conducted as a result of a claimant’s allegation of foreign availability for an item (or items) that BXA has denied or has issued a letter of intent to deny a license. If the Secretary determines that foreign availability exists, BXA’s approval of a license will be limited to the items, countries, and quantities in the allegation.

Determination. The Secretary’s decision that foreign availability within the meaning of the EAA does or does not exist. (See § 768.7 of this part).

Expedited licensing procedure eligibility evaluation. An evaluation that BXA initiates for the purpose of determining whether an item is eligible for the expedited licensing procedure. (See § 768.8 of this part).

Expedited licensing procedures. Under expedited licensing procedures, BXA reviews and processes a license application for the export of an eligible item to a non-controlled country within statutory time limits. Licenses are deemed approved unless BXA denies within the statutory time limits (See § 768.8 of this part).

Foreign availability submission (FAS). An allegation of foreign availability a claimant makes, supported by reasonable evidence, and submits to BXA. (See § 768.5 of this part).

Item. Any commodity, software, or technology.

Items eligible for non-controlled country expedited licensing procedures. The items described in Supplement No. 2 to this part 768 are eligible for the expedited license procedures (See § 768.8 of this part).

National Security Override (NSO). A Presidential decision to maintain export controls on an item notwithstanding its foreign availability as determined under the EAA. The President’s decision is based on his/her determination that the absence of the controls would prove detrimental to the national security of the United States. Once the President makes such a decision, the President must actively pursue negotiations to eliminate foreign availability with the governments of the sources of foreign availability. (See § 768.7 of this part).

Non-controlled countries. Any country not defined as a controlled country by this section.

Non-U.S. source/foreign source. A person located outside the jurisdiction of the United States (as defined in part 772 of the EAR).

Reasonable evidence. Relevant information that is credible.

Reliable evidence. Relevant information that is credible and dependable.

Secretary. As used in this part, the Secretary refers to the Secretary of Commerce or his/her designee.

Similar quality. An item is of similar quality to an item that is controlled under the EAR if it is substantially alike in key characteristics that may include, but are not limited to: (1) Function; (2) technological approach; (3) performance thresholds; (4) maintainability and service life; and (5) any other attribute relevant to the purpose for which the control was placed on the item.

Sufficient quantity. The amount of an item that would render the U.S. export control, or the denial of the license in question, ineffective in achieving its purpose. For a controlled country, it is the quantity that meets the military needs of that country so that U.S. exports of the item to that country would not make a significant contribution to its military potential.

Technical Advisory Committee (TAC). A Committee created under section 5(h) of the EAA that advises and assists the Secretary of Commerce, the Secretary of Defense, and any other department,
agency, or official of the Government of the United States to which the President delegates authority under the EAA on export control matters related to specific areas of controlled items.

TAC certification. A statement that a TAC submits to BXA, supported by reasonable evidence, documented as in a FAS, that foreign availability to a controlled country exists for an item that falls within the TAC's area of technical expertise.

§ 768.2 Foreign availability described.

(a) Foreign availability. Foreign availability exists when the Secretary determines that an item is comparable in quality to an item subject to U.S. national security export controls, and is available-in-fact to a country, from a non-U.S. source, in sufficient quantities to render the U.S. export control of that item or the denial of a license ineffective. For a controlled country, such control or denial is “ineffective” when maintaining such control or denying a specific license would not restrict the availability of items that would make a significant contribution to the military potential of the controlled country or combination of countries detrimental to the national security of the United States (see sections 5(a) and 3(2)(A) of the EAA.)

(b) Types of foreign availability. There are two types of foreign availability:

(1) Foreign availability to a controlled country; and

(2) Foreign availability to a non-controlled country.

(NOTE TO PARAGRAPH (B) OF THIS SECTION:
See §768.7 of this part for delineation of the foreign availability assessment procedures, and §768.6 of this part for the criteria used in determining foreign availability)

§ 768.3 Foreign availability assessment.

(a) Foreign availability assessment. A foreign availability assessment is an evidentiary analysis that BXA conducts to assess the foreign availability of a given item according to the assessment criteria, based on data submitted by a claimant, the data gathered by BXA, and the data and recommendations submitted by the Departments of Defense and State and other relevant departments and agencies, TAC committees, and industry. BXA uses the results of the analysis in formulating its recommendation to the Secretary on whether foreign availability exists for a given item. If the Secretary determines that foreign availability exists, the Secretary will decontrol the item for national security reasons or approve the license in question if there is no foreign policy reason to deny the license, unless the President exercises a National Security Override (see §768.7 of this part). The effect of any such determination on the effectiveness of foreign policy controls may be considered independent of this part.

(b) Types of assessments. There are two types of foreign availability assessments:

(1) Denied license assessment; and

(2) Decontrol assessment.

(c) Expedited licensing procedures. See §768.8 of this part for the evaluation of eligibility of an item for the expedited licensing procedures.

§ 768.4 Initiation of an assessment.

(a) Assessment request. To initiate an assessment, each claimant or TAC must submit a FAS or a TAC Certification to BXA. TACs are authorized to certify foreign availability only to controlled countries. Claimants can allege foreign availability for either controlled or non-controlled countries.

(b) Denied license assessment. A claimant whose license application BXA has denied, or for which it has issued a letter of intent to deny on national security grounds, may request that BXA initiate a denied license assessment by submitting a Foreign Availability Submission (FAS) within 90 days after denial of the license. As part of its submission, the claimant must request that the specified license application be approved on the grounds of foreign availability. The evidence must relate to the particular export as described on the license application and to the alleged comparable item. If foreign availability is found, the Secretary will approve the license for the specific items,
§ 768.5 Contents of foreign availability submissions and Technical Advisory Committee certifications.

(a) All foreign availability submissions must contain, in addition to information on product or technology alleged to be available from foreign sources, at least:

1. The name of the claimant;
2. The claimant's mailing and business address;
3. The claimant's telephone number; and
4. A contact point and telephone number.

(b) Foreign availability submissions and TAC certifications should contain as much evidence as is available to support the claim, including, but not limited to:

1. Product names and model designations of the items alleged to be comparable;
2. Extent to which the alleged comparable item is based on U.S. technology;
3. Names and locations of the non-U.S. sources and the basis for claiming that the item is a non-U.S. source item;
4. Key performance elements, attributes, and characteristics of the items on which a qualitative comparison may be made;
5. Non-U.S. source's production quantities and/or sales of the alleged comparable items and marketing efforts;
6. Estimated market demand and the economic impact of the control;
7. Product names, model designations, and value of U.S. controlled parts and components incorporated in the items alleged to be comparable; and
8. The basis for the claim that the item is available-in-fact to the country or countries for which foreign availability is alleged.

(c) Supporting evidence of foreign availability may include, but is not limited to, the following:

1. Foreign manufacturers' catalogs, brochures, operation or maintenance manuals;
2. Articles from reputable trade and technical publications;
3. Photographs;
4. Depositions based on eyewitness accounts; and
5. Other credible evidence.

NOTE TO PARAGRAPH (C) OF THIS SECTION: See Supplement No. 1 to part 768 for additional examples of supporting evidence.

(d) Upon receipt of a FAS or TAC certification, BXA will review it to determine whether there is sufficient evidence to support the belief that foreign availability may exist. If BXA determines the FAS or TAC certification is lacking in supporting evidence, BXA will seek additional evidence from appropriate sources, including the claimant or TAC. BXA will initiate the assessment when it determines that it has sufficient evidence that foreign availability may exist. Claimant and TAC certified assessments will be
deemed to be initiated as of the date of such determination.

(e) Claimants and TACs are advised to review the foreign availability assessment criteria described in §768.6 of this part and the examples of evidence described in Supplement No. 1 to part 768 when assembling supporting evidence for inclusion in the FAS or TAC certification.

§ 768.6 Criteria.
BXA will evaluate the evidence contained in a FAS or TAC certification and all other evidence gathered in the assessment process in accordance with certain criteria that must be met before BXA can recommend a positive determination to the Secretary. The criteria are defined in §768.1(d) of this part. In order to initiate an assessment, each FAS and TAC certification should address each of these criteria. The criteria are statutorily prescribed and are:
(a) Available-in-fact;
(b) Non-U.S. source;
(c) Sufficient quantity; and
(d) Comparable quality.

§ 768.7 Procedures.
(a) Initiation of an assessment. (1) Once BXA accepts a FAS or TAC certification of foreign availability, BXA will notify the claimant or TAC that it is initiating the assessment.
(2) BXA will publish a Federal Register notice of the initiation of any assessment.
(3) BXA will notify the Departments of Defense and State, the intelligence community, and any other departments, agencies and their contractors that may have information concerning the item on which BXA has initiated an assessment. Each such department, agency, and contractor shall provide BXA all relevant information concerning the item. BXA will invite interested departments and agencies to participate in the assessment process (See paragraph (e) of this section).
(b) Data gathering. BXA will seek and consider all available information that bears upon the presence or absence of foreign availability, including but not limited to that evidence described in §768.5(b) and (c) of this part. As soon as BXA initiates the assessment, it will seek evidence relevant to the assessment, including an analysis of the military needs of a selected country or countries, technical analysis, and intelligence information from the Departments of Defense and State, and other U.S. agencies. Evidence is particularly sought from industry sources worldwide; other U.S. organizations; foreign governments; commercial, academic and classified data bases; scientific and engineering research and development organizations; and international trade fairs.
(c) Analysis. BXA will conduct its analysis by evaluating whether the reasonable and reliable evidence that is relevant to each of the foreign availability criteria provides a sufficient basis to recommend a determination that foreign availability does or does not exist.
(d) Recommendation and determination. (1) Upon completion of each assessment, BXA, on the basis of its analysis, will recommend that the Secretary make a determination either that there is or that there is not foreign availability, whichever the evidence supports. The assessment upon which BXA bases its recommendation will accompany the recommendation to the Secretary.
(2) BXA will recommend on the basis of its analysis that the Secretary determine that foreign availability exists to a country when the available evidence demonstrates that an item of comparable quality is available-in-fact to the country, from non-U.S. sources, in sufficient quantity so that continuation of the existing national security export control, or denial of the license application in question on national security grounds, would be ineffective in achieving its purpose. For a controlled country, such control or denial is “ineffective” when comparable items are available-in-fact from foreign sources in sufficient quantities so that maintaining such control or denying a license would not be effective in restricting the availability of items that would make a significant contribution to the military potential of any country or combination of countries detrimental to the national security of the United States.
(3) The Secretary will make the determination of foreign availability on the basis of the BXA assessment and recommendation; the Secretary’s determination will take into account the evidence provided to BXA, the recommendations of the Secretaries of Defense and State and any other interested agencies, and any other information that the Secretary considers relevant.

(4) For all decontrol and denied license assessments (under section 5(f)(3) of the EAA) initiated by a FAS, the Secretary will make a determination within 4 months of the initiation of the assessment and will notify the claimant. The Secretary will submit positive determinations for review to the appropriate departments and agencies.

(5) The deadlines for determinations based on self-initiated and TAC-initiated assessments are different from the deadlines for claimant-initiated assessments (see paragraphs (f)(2) and (f)(3) of this section).

(e) Interagency review. BXA will notify all appropriate U.S. agencies and Departments upon the initiation of an assessment and will invite their participation in the assessment process. BXA will provide all interested agencies and departments an opportunity to review source material, draft analyses and draft assessments immediately upon their receipt or production. For claimant-initiated assessments, BXA will provide a copy of all positive recommendations and assessments to interested agencies and departments for their review following the Secretary’s determination of foreign availability. For self-initiated and TAC-initiated assessments, BXA will provide all interested agencies an opportunity to review and comment on the assessment.

(f) Notification. (1) No later than 5 months after the initiation of an assessment based on a FAS (claimant assessments), the Secretary will inform the claimant in writing and will submit for publication in the Federal Register a notice that:

(i) Foreign availability exists, and

(A) The requirement of a license has been removed or the license application in question has been approved; or

(B) The President has determined that for national security purposes the export controls must be maintained or the license application must be denied, notwithstanding foreign availability, and that appropriate steps to eliminate the foreign availability are being initiated; or

(C) In the case of an item controlled multilaterally under the former COCOM regime, the U.S. Government will conduct any necessary consultations concerning the proposed decontrol or approval of the license with the former COCOM regime for a period of up to 4 months from the date of the publication of the determination in the Federal Register (the U.S. Government may remove the license requirement for exports to non-controlled countries pending completion of the former COCOM regime review process); or

(ii) Foreign availability does not exist.

(2) For all TAC certification assessments, the Secretary will make a foreign availability determination within 90 days following initiation of the assessment. BXA will prepare and submit a report to the TAC and to the Congress stating that:

(i) The Secretary has found foreign availability and has removed the license requirement; or

(ii) The Secretary has found foreign availability, but has recommended to the President that negotiations be undertaken to eliminate the foreign availability; or

(iii) The Secretary has not found foreign availability.

(3) There is no statutory deadline for assessments self-initiated by the Secretary or for the resulting determination. However, BXA will make every effort to complete such assessments and determinations promptly.

(g) Foreign availability to controlled countries. When the Secretary determines that an item controlled for national security reasons is available to a controlled country and the President does not issue a National Security Override (NSO), BXA will submit the determination to the Department of State, along with a draft proposal for the multilateral decontrol of the item or for the former COCOM regime approval of the license. The Department of State will submit the proposal or the
Bureau of Export Administration, Commerce § 768.7

license for former COCOM regime review. The former COCOM regime will have up to 4 months for review of the proposal.

(h) Foreign availability to non-controlled countries. If the Secretary determines that foreign availability to non-controlled countries exists, the Secretary will decontrol the item for export to all non-controlled countries where it is found to be available, or approve the license in question, unless the President exercises a National Security Override.

(i) Negotiations to eliminate foreign availability. (1) The President may determine that an export control must be maintained notwithstanding the existence of foreign availability. Such a determination is called a National Security Override (NSO) and is based on the President's decision that the absence of the control would prove detrimental to the United States national security. Unless extended (as described in paragraph (i)(7) of this section), an NSO is effective for 6 months. Where the President invokes an NSO, the U.S. Government will actively pursue negotiations with the government of any source country during the 6 month period to eliminate the availability.

(2) There are two types of National Security Overrides:

(i) An NSO of a determination of foreign availability resulting from an assessment initiated pursuant to section 5(f) of the EAA (claimant and self-initiated assessments); and

(ii) An NSO of a determination of foreign availability resulting from an assessment initiated pursuant to section 5(h) of the EAA (TAC-certification assessments).

(3) For an NSO resulting from an assessment initiated under section 5(f) of the EAA, the Secretary of any agency may recommend that the President exercise the authority under the EAA to retain the controls or deny the license notwithstanding the finding of foreign availability.

(4) For an NSO resulting from an assessment initiated under section 5(h) of the EAA, the Secretary of Commerce may recommend that the President exercise the authority under the EAA to retain the controls notwithstanding the finding of foreign availability.

(5) Under an NSO resulting from an assessment initiated under section 5(f) of the EAA, the Committee on Banking, Housing, and Urban Affairs of the Senate and the Committee on International Relations of the House of Representatives will be notified of the initiation of the required negotiations. The notice will include an explanation of the national security interest that necessitates the retention of controls.

(6) Under an NSO resulting from an assessment initiated under section 5(f) of the EAA, BXA will publish notices in the Federal Register consisting of:

(i) The Secretary's determination of foreign availability;

(ii) The President's decision to exercise the NSO;

(iii) A concise statement of the basis for the President's decision; and

(iv) An estimate of the economic impact of the decision.

(7) The 6 month effective period for an NSO may be extended up to an additional 12 months if, prior to the end of the 6 months, the President certifies to Congress that the negotiations are progressing, and determines that the absence of the controls would continue to be detrimental to the United States national security.

(8) After the conclusion of negotiations, BXA will retain the control only to the extent that foreign availability is eliminated. If foreign availability is not eliminated, BXA will decontrol the item by removing the requirement for a license for the export of the item to the destinations covered by the assessment. To the extent that the negotiations are successful and the foreign availability is eliminated, BXA will remove the license requirement for the export of the item to any country that has agreed to eliminate foreign availability.

(j) Changes in foreign availability. If BXA becomes aware of conditions, including new evidence, that affect a previous determination that foreign availability exists or does not exist, BXA may review the conditions. If BXA finds that the foreign availability previously determined no longer exists, or that foreign availability not earlier found now does exist, BXA will make a recommendation to the Secretary of Commerce for the appropriate changes.
§ 768.8

Eligibility of expedited licensing procedures for non-controlled countries.

(a) BXA determines the eligibility of an item for expedited licensing procedures on the basis of an evaluation of the foreign availability of the item. Eligibility is specific to the items and the countries to which they are found to be available.

(b) BXA will initiate an eligibility evaluation:
   (1) On its own initiative;
   (2) On receipt of a FAS; or
   (3) On receipt of a TAC certification.

(c) Upon initiation of an eligibility evaluation following receipt of either a FAS or TAC certification, BXA will notify the claimant or TAC of the receipt and initiation of an evaluation and publish a Federal Register notice of the initiation of the evaluation.

(d) The criteria for determining eligibility for expedited licensing procedures are:
   (1) The item must be available-in-fact to the specified non-controlled country from a foreign source;
   (2) The item must be of a quality similar to that of the U.S.-controlled item; and
   (3) The item must be available-in-fact to the specified non-controlled country without effective restrictions.

(e) Within 30 days of initiation of the evaluation, the Secretary of Commerce will make a determination of foreign availability on the basis of the BXA evaluation and recommendation, taking into consideration the evidence the Secretaries of Defense, State, and other interested agencies provide to BXA and any other information that the Secretary considers relevant.

(f) Within 30 days of the receipt of the FAS or TAC certification, BXA will publish the Secretary’s determination in the Federal Register, that the item will or will not be eligible for expedited licensing procedures to the stated countries and, where appropriate, amend Supplement No. 2 to part 768.

(g) Following completion of a self-initiated evaluation, BXA will notify the Secretary of the determination and, where appropriate, Supplement No. 2 to part 768 will be amended.

(h) Foreign availability submissions and TAC certifications to initiate an expedited licensing procedure evaluation must be clearly designated on their face as a request for expedited licensing procedure and must specify the items, quantities and countries alleged eligible. Submissions and certifications should be sent to: Department of Commerce, Bureau of Export Administration, 14th Street and Pennsylvania Avenue, NW., Room 3877, Washington, DC 20230.

§ 768.9

Appeals of negative foreign availability determinations.

Appeals of negative determinations will be conducted according to the standards and procedures described in part 756 of the EAR. A Presidential decision (NSO) to deny a license or continue controls notwithstanding a determination of foreign availability is not subject to appeal.

§ 768.10

Removal of controls on less sophisticated items.

Where the Secretary has removed national security controls on an item for foreign availability reasons, the Secretary will also remove controls on similar items that are controlled for national security reasons and whose functions, technological approach, performance thresholds, and other attributes that form the basis for national security export controls do not exceed the technical parameters of the item that BXA has decontrolled for foreign availability reasons.

Supplement No. 1 to Part 768—
Evidence of Foreign Availability

This supplement provides a list of examples of evidence that the Bureau of Export Administration (BXA) has found to be useful in conducting assessments of foreign availability. A claimant submitting evidence supporting a claim of foreign availability should review this list for suggestions as evidence is collected. Acceptable evidence indicating possible foreign availability is not limited to these examples, nor is any one of these examples, usually, in and of itself, necessarily...
sufficient to meet a foreign availability criterion. A combination of several types of evidence for each criterion usually is required. A Foreign Availability Submission (FAS) should include as much evidence as possible on all four of the criteria listed below. BXA combines the submitted evidence with the evidence that it collects from other sources. BXA evaluates all evidence, taking into account factors that may include, but are not limited to: Information concerning the source of the evidence, corroborative or contradictory indications, and experience concerning the reliability or reasonableness of such evidence. BXA will assess all relevant evidence to determine whether each of the four criteria has been met. Where possible, all information should be in writing. If information is based on third party documentation, the submitter should provide such documentation to BXA. If information is based on oral statements a third party made, the submitter should provide a memorandum of the conversation to BXA if the submitter cannot obtain a written memorandum from the source. BXA will amend this informational list as it identifies new examples of evidence:

(a) Examples of evidence of foreign availability:

The following are intended as examples of evidence that BXA will consider in evaluating foreign availability. BXA will evaluate all evidence according to the provisions in §768.7(c) of this part in order for it to be used in support of a foreign availability determination. This list is illustrative only.

(1) Available-in-fact:

(i) Evidence of marketing of an item in a foreign country (e.g., an advertisement in the media of the foreign country that the item is for sale there);

(ii) Copies of sales receipts demonstrating sales to foreign countries;

(iii) The terms of a contract under which the item has been or is being sold to a foreign country;

(iv) Information, preferably in writing, from an appropriate foreign government official that the government will not deny the sale of an item it produces to a foreign country;

(v) Information, preferably in writing, from a named company official that the company legally can and would sell an item to foreign countries;

(vi) Evidence of actual shipments of the item to foreign countries (e.g., shipping documents, photographs, news reports);

(vii) An eyewitness report of such an item in operation in a foreign country, providing as much information as available, including where possible the make and model of the item and its observed operating characteristics;

(viii) Evidence of the presence of sales personnel or technical service personnel in a foreign country;

(ix) Evidence of production within a foreign country;

(x) Evidence of the item being exhibited at a trade fair in a foreign country, particularly for the purpose of inducing sales of the item to the foreign country;

(xi) A copy of the export control laws or regulations of the source country, showing that the item is not controlled; or

(xii) A catalog or brochure indicating the item is for sale in a specific country.

(2) Foreign (non-U.S.) source:

(i) Names of foreign manufacturers of the item including, if possible, addresses and telephone numbers;

(ii) A report from a reputable source of information on commercial relationships that a foreign manufacturer is not linked financially or administratively with a U.S. company;

(iii) A list of the components in the U.S. item and foreign item indicating model numbers and their sources;

(iv) A schematic of the foreign item identifying its components and their sources;

(v) Evidence that the item is a direct product of foreign technology (e.g., a patent law suit lost by a U.S. producer, a foreign patent);

(vi) Evidence of indigenous technology, production facilities, and the capabilities at those facilities;

(vii) Evidence that the parts and components of the item are of foreign origin or are exempt from U.S. licensing requirements by the parts and components provision §732.4 of the EAR.

(3) Sufficient quantity:

(i) Evidence that foreign sources have the item in serial production;

(ii) Evidence that the item or its product is used in civilian applications in foreign countries;

(iii) Evidence that a foreign country is marketing in the specific country an item of its indigenous manufacture;

(iv) Evidence of foreign inventories of the item;

(v) Evidence of excess capacity in a foreign country’s production facility;

(vi) Evidence that foreign countries have not targeted the item or are not seeking to purchase it in the West;

(vii) An estimate by a knowledgeable source of the foreign country’s needs; or

(viii) An authoritative analysis of the worldwide market (i.e., demand, production rate for the item for various manufacturers, plant capacities, installed tooling, monthly production rates, orders, sales and cumulative sales over 5-6 years).

(4) Comparable quality:

(i) A sample of the foreign item;
(ii) Operation or maintenance manuals of the U.S. and foreign items;
(iii) Records or a statement from a user of the foreign item;
(iv) A comparative evaluation, preferably in writing, of the U.S. and foreign items by, for example, a western producer or purchaser of the item, a recognized expert, a reputable trade publication, or independent laboratory;
(v) A comparative list identifying, by manufacturers and model numbers, the key performance components and the materials used in the item that qualitatively affect the performance of the U.S. and foreign items;
(vi) Evidence of the interchangeability of U.S. and foreign items;
(vii) Patent descriptions for the U.S. and foreign items;
(viii) Evidence that the U.S. and foreign items meet a published industry, national, or international standard;
(ix) A report or eyewitness account, by deposition or otherwise, of the foreign item's operation;
(x) Evidence concerning the foreign manufacturer's corporate reputation;
(xi) Comparison of the U.S. and foreign end item(s) made from a specific commodity, tool(s), device(s), or technical data; or
(xii) Evidence of the reputation of the foreign item including, if possible, information on maintenance, repair, performance, and other pertinent factors.

§ 770.2 Item interpretations.
(a) Interpretation 1: Anti-friction bearing or bearing systems and specially designed parts. (1) Anti-friction bearings or bearing systems shipped as spares or replacements are classified under Export Control Classification Numbers (ECCNs) 2A001, 2A002, 2A003, 2A004, 2A005, and 2A006 (ball, roller, or needle-roller bearings and parts). This applies to separate shipments of anti-friction bearings or bearing systems and anti-friction bearings or bearing systems shipped with machinery or equipment for which they are intended to be used as spares or replacement parts.

(2) An anti-friction bearing or bearing system physically incorporated in a segment of a machine or in a complete machine prior to shipment loses its identity as a bearing. In this scenario, the machine or segment of machinery containing the bearing is the item subject to export control requirements.

(3) An anti-friction bearing or bearing system not incorporated in a segment of a machine prior to shipment, but shipped as a component of a complete unassembled (knocked-down) machine, is considered a component of a machine. In this scenario, the complete machine is the item subject to export license requirements.

(b) Interpretation 2: Classification of "parts" of machinery, equipment, or other items—(1) An assembled machine or unit of equipment is being exported. In instances where one or more assembled machines or units of equipment are being exported, the individual component parts that are physically incorporated into the machine or equipment do not require a license. The license or general exception under which the complete machine or unit of equipment is exported will also cover its component parts, provided that the parts are normal and usual components of the machine or equipment being exported, or that the physical incorporation is not used as a device to evade the requirement for a license.

(2) Parts are exported as spares, replacements, for resale, or for stock. In instances where parts are exported as spares, replacements, for resale, or for
stock, a license is required only if the appropriate entry for the part specifies that a license is required for the intended destination.

(c) Interpretation 3: Wire or cable cut to length. (1) Wire or cable may be included as a component of a system or piece of equipment, whether or not the wire or cable is cut to length and whether or not it is fitted with connectors at one or both ends, so long as it is in normal quantity necessary to make the original installation of the equipment and is necessary to its operation.

(2) Wire or cable exported as replacement or spares, or for further manufacture is controlled under the applicable wire or cable ECCN only. This includes wire or cable, whether or not cut to length or fitted with connectors at one or both ends.

d) Interpretation 4: Telecommunications equipment and systems. Control equipment for paging systems (broadcast radio or selectively signalled receiving systems) is defined as circuit switching equipment in Category 5 of the CCL.

e) Interpretation 5: Numerical control systems—(1) Classification of “Numerical Control” Units. “Numerical control” units for machine tools, regardless of their configurations or architectures, are controlled by their functional characteristics as described in ECCN 2B001.a. “Numerical control” units include computers with add-on “motion control boards”. A computer with add-on “motion control boards” for machine tools may be controlled under ECCN 2B001.a even when the computer alone without “motion control boards” is not subject to licensing requirements under Category 4 and the “motion control boards” are not controlled under ECCN 2B001.b.

(2) Export documentation requirement. (i) When preparing a license application for a numerical control system, the machine tool and the control unit are classified separately. If either the machine tool or the control unit requires a license, then the entire unit requires a license. If either a machine tool or a control unit is exported separately from the system, the exported component is classified on the license application without regard to the other parts of a possible system.

(ii) When preparing the Shipper’s Export Declaration (SED), a system being shipped complete (i.e., machine and control unit), should be reported under the Schedule B number for each machine. When either a control unit or a machine is shipped separately, it should be reported under the Schedule B number appropriate for the individual item being exported.

(f) Interpretation 6: Parts, accessories, and equipment exported as scrap. Parts, accessories, or equipment that are being shipped as scrap should be described on the SED in sufficient detail to be identified under the proper ECCN. When commodities declared as parts, accessories, or equipment are shipped in bulk, or are otherwise not packaged, packed, or sorted in accordance with normal trade practices, the Customs Officer may require evidence that the shipment is not scrap. Such evidence may include, but is not limited to, bills of sale, orders and correspondence indicating whether the commodities are scrap or are being exported for use as parts, accessories, or equipment.

g) Interpretation 7: Scrap arms, ammunition, and implements of war. Arms, ammunition, and implements of war, as defined in the U.S. Munitions List, and are under the jurisdiction of the U.S. Department of State (22 CFR parts 120 through 130), except for the following, which are under the jurisdiction of the Department of Commerce:

(1) Cartridge and shell cases that have been rendered useless beyond the possibility of restoration to their original identity by means of excessive heating, flame treatment, mangling, crushing, cutting, or by any other method are “scrap”.

(2) Cartridge and shell cases that have been sold by the armed services as “scrap”, whether or not they have been heated, flame-treated, mangled, crushed, cut, or reduced to scrap by any other method.

(3) Other commodities that may have been on the U.S. Munitions List are “scrap”, and therefore under the jurisdiction of the Department of Commerce, if they have been rendered useless beyond the possibility of restoration to their original identity only by
§ 770.2

means of mangling, crushing, or cutting. When in doubt as to whether a commodity covered by the Munitions List has been rendered useless, exporters should consult the Office of Defense Trade Controls, U.S. Department of State, Washington, DC 20520, or the Exporter Counseling Division, Office of Exporter Services, Room 1099A, U.S. Department of Commerce, Washington, DC 20230, before reporting a shipment as metal scrap.

(h) Interpretation 8: Military automotive vehicles and parts for such vehicles—(1) Military automotive vehicles. (i) For purposes of U.S. export controls, military automotive vehicles “possessing or built to current military specifications differing materially from normal commercial specifications” may include, but are not limited to, the following characteristics:

(A) Special fittings for mounting ordnance or military equipment;
(B) Bullet-proof glass;
(C) Armor plate;
(D) Fungus preventive treatment;
(E) Twenty-four volt electrical systems;
(F) Shielded electrical system (electronic emission suppression); or
(G) Puncture-proof or run-flat tires.

(ii) Automotive vehicles fall into two categories.

(A) Military automotive vehicles on the Munitions List, new and used. Automotive vehicles in this category are primarily combat (fighting) vehicles, with or without armor and/or armament, “designed for specific fighting function.” These automotive vehicles are licensed for export by the U.S. Department of State (22 CFR parts 120 through 130).

(B) Military automotive vehicles not on the U.S. Munitions List, new and used. Automotive vehicles in this category are primarily transport vehicles designed for non-combat military purposes (transporting cargo, personnel and/or equipment, and/or for to wing other vehicles and equipment over land and roads in close support of fighting vehicles and troops). These automotive vehicles are licensed for export by the U.S. Department of Commerce.

(iii) Parts for military automotive vehicles. Functional parts are defined as those parts making up the power train of the vehicles, including the electrical system, the cooling system, the fuel system, and the control system (brake and steering mechanism), the front and rear axle assemblies including the wheels, the chassis frame, springs and shock absorbers. Parts specifically designed for military automotive vehicles on the Munitions List are licensed for export by the U.S. Department of State (22 CFR parts 120 through 130).

(iv) General instructions. Manufacturers of non-Munitions List automotive vehicles and/or parts will know whether their products meet the conditions described in this paragraph (h). Merchant exporters and other parties who are not sure whether their products (automotive vehicles and/or parts) meet these conditions should check with their suppliers for the required information before making a shipment under general exception or submitting an application to BXA for a license.

(2) [Reserved]
(ii) Trainers, bearing a "T" designation and using piston engines;
(iii) Utility, bearing a "U" designation and using piston engines;
(iv) Liaison, bearing an "L" designation; and
(v) Observation, bearing an "O" designation and using piston engines.
(3) All reciprocating engines.
(4) Other aircraft engines not specifically designed or modified for military aircraft.
(5) Parts, accessories, and components (including propellers), designed exclusively for aircraft and engines described in paragraphs (i)(1), (i)(2), (i)(3), and (i)(4) of this section.
(6) General purpose parts, accessories, and components usable interchangeably on either military or civil aircraft.

(j) Interpretation 10: Civil aircraft inertial navigation equipment.
(1) The Department of Commerce has licensing jurisdiction over exports and reexports to all destinations of inertial navigation systems, inertial navigation equipment, and specially designed components therefor for "civil aircraft".
(2) The Department of State retains jurisdiction over all software and technology for inertial navigation systems and navigation equipment, and specially designed components thereof for "civil aircraft".

(k) Interpretation 11: Precursor chemicals. The following chemicals are controlled by ECCN 1C350. The appropriate Chemical Abstract Service Registry (C.A.S.) number and synonyms, (i.e., alternative names) are included to help you determine whether your chemicals are controlled by this entry. These chemicals require a license to all countries except Argentina, Australia, Austria, Belgium, Canada, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Japan, Korea (South), Luxembourg, the Netherlands, New Zealand, Norway, Poland, Portugal, Romania, Slovakia, Spain, Sweden, Switzerland, and the United Kingdom.

1. (C.A.S. #1341-49-7) Ammonium difluoride
   Ammonium hydrofluoride
   Ammonium hydrogen bifluoride
   Ammonium hydrogen difluoride
   Ammonium monohydrogen difluoride

2. (C.A.S. #7784-34-1) Arsenic trichloride
   Arsenic (III) chloride
   Arsenous chloride
   Fuming liquid arsenic
   Trichloroarsine

3. (C.A.S. #76-93-7) Benzilic acid
   alpha,alpha-Diphenyl-alpha-hydroxyacetic acid
   Diphénylglycolic acid
   alpha,alpha-Diphenylglycolic acid
   Diphénylhydroxyacetic acid
   alpha-Hydroxy-2,2-diphénylacetic acid
   2-Hydroxy-2,2-diphénylacetic acid
   alpha-Hydroxy-alpha-phenylbenzeneacetic acid
   Hydroxydiphénylacetic acid

4. (C.A.S. #107-07-3) 2-Chloroethanol
   Chloroethanol
   Chloroethene
   Ethene chlorohydrin
   Ethylchlorohydrin
   Ethylene chlorohydrin
   Glycol chlorohydrin
   Glycol monochlorohydrin
   2-Hydroxyethyl chloride

5. (C.A.S. #78-38-6) Diethyl ethylphosphonate
   Ethylphosphonic acid diethyl ester

6. (C.A.S. #15715-41-0) Diethyl methylphosphonite
   Diethoxymethylphosphate
   Diethyl methanephosphonate
   0,0-Diethyl methylphosphonite
   Methylidioxyphosphine
   Methylphosphonous acid diethyl ester

7. (C.A.S. #2404-03-7) Diethyl-N, N-Dimethylphosphoro-amidate
   N,N-Dimethyl-O,O'-diethyl phosphoramidate
   Diethyl dimethylphosphoramide

8. (C.A.S. #762-04-9) Diethyl phosphite
   Diethoxyphosphine oxide
   Diethyl acid phosphite
   Diethyl hydrogen phosphate
   Diethyo phosphonate
   Hydrogen diethyl phosphate

9. (C.A.S. #100-37-8) N, N-Diethylethanolamine
N,N-Diethyl-2-aminoethanol
Diethyl (2-hydroxyethyl) amine
N,N-Diethyl-2-[(beta.-hydroxyethyl)]
amine
N,N-Diethyl-2-hydroxyethylamine
Diethylaminooctanol
2-(Diethylaminoo) ethanol
N,N-Diethylmonoethanolamine
(2-Hydroxyethyl) diethylamine
2-Hydroxytriethylamine

(10) (C.A.S. #5842-07-9) N,N-Diisopropyl-
.2-aminoethyl thiol
2-(Diisopropylamino) ethanethiol
Diisopropylaminoethanethiol
.2-aminoethyl thiol
2-(1-Methylethyl)amino) ethanethiol

(11) (C.A.S. #4261-68-1) N,N-
Diisopropyl-2-aminoethyl chloride
hydrochloride

(12) (C.A.S. #96-80-0) N,N-Diisopropyl-
.2-aminoethanol
N,N-Diisopropyl-2-aminoethanol
2-(Diisopropylamino) ethanol
(N,N-Diisopropylamino) ethanol
2-(Diisopropylamino) ethyl alcohol
N,N-Diisopropylethanolamine

(13) (C.A.S. #96-79-7) N,N-Diisopropyl-
.2-aminoethyl chloride
1-Chloro-N,N-
diisopropylaminoethane
2-Chloro-N,N-diisopropylethanamine
1-Chloro-N,N-
diisopropylationethane
2-Chloro-N,N-diisopropylethylamine
N-(2-Chloroethyl)-N-(1-methylethyl)-
2-propanamine
N-(2-Chloroethyl) diisopropylamine
N,N-Diisopropyl-2-chloroethanol
1-(Diisopropylamino)-2-chloroethane
2-(Diisopropylamino)ethanol chloride
Diisopropylaminoethyl chloride
.2-(1-Methylethyl)amino) ethanethiol

(14) (C.A.S. #108-18-9) Diisopropylamine
N,N-Diisopropylamine
N-(1-Methylethyl)-2-propanamine

(15) (C.A.S. #6163-75-3) Dimethyl
ethylphosphonate
Dimethyl ethanephosphonate
Ethylphosphonic acid dimethyl ester

(16) (C.A.S. #756-79-6) Dimethyl
methylphosphonate
Dimethoxyethyl phosphine oxide
Dimethyl methanephosphonate
Methanephosphonic acid dimethyl
ester
Methylphosphonic acid dimethyl
ester

(17) (C.A.S. #868-85-9) Dimethyl
phosphate
Dimethoxyphosphine oxide
Dimethyl acid phosphite
Dimethyl hydrogen phosphite
Dimethyl phosphonate

(18) (C.A.S. #124-40-3) Dimethylamine
N-Methyl methanamine
(19) (C.A.S. #506-59-2) Dimethylamine
hydrochloride
Dimethylammonium chloride
N-Methyl methanamine hydro-
chloride

(20) (C.A.S. #57856-11-8) O-Ethyl-2-
diisopropylaminoethoxy methylphosphonite (QL)
Methylphosphonous acid 2-(1-
methylethyl)amino)ethyl ethyl ester

(21) (C.A.S. #1498-40-4) Ethylphosphonous dichloride
Dichloroethylphosphine
Ethyl phosphinous dichloride
Ethylchlorophosphine

(22) (C.A.S. #430-78-4) Ethylphosphonous
difluoride
Ethyl difluorophosphine

(23) (C.A.S. #1066-50-8) Ethylphosphonyl
dichloride
Dichloroethylphosphine oxide
Ethane phosphonyl chloride
Ethylphosphonic dichloride
Ethylphosphonic dichloride

(24) (C.A.S. #753-98-0) Ethylphosphonyl
difluoride
Ethyl difluorophosphine
Ethyl difluorophosphine oxide
Ethylphosphonic difluoride

(25) (C.A.S. #7664-39-3) Hydrogen fluo-
ride
Anhydrous hydrofluoric acid
Fluorhydric acid
Fluorine monohydrate
Hydrofluoric acid gas

(26) (C.A.S. #3554-74-3) 3-Hydroxyl-1-
methylpiperidine
3-Hydroxy-N-methylpiperidine
1-Methyl-3-hydroxypiperidine
1-Methyl-3-piperidinol
N-Methyl-3-piperidinol

(27) (C.A.S. #76-89-1) Methyl benzilate
Benzilic acid methyl ester
.alpha.-Hydroxy-.alpha.-phenylbenzeneacetic acid methyl
ester
Methyl .alpha.-phenylmandelate
Methyl diphenylglycolate

(1) Interpretation 12: Computers. (1) Digital computers or computer systems classified under ECCN 4A003.a, b, or .c, that qualify for “No License Required” (NLR) must be evaluated on the basis of CTP alone, to the exclusion of all other technical parameters. Computers controlled in this entry for MT reasons are not eligible for License Exception CTP regardless of the CTP of the computer. Digital computers or computer systems classified under ECCN 4A003.a, b, or .c that qualify for License Exception CTP must be evaluated on the basis of CTP, to the exclusion of all other technical parameters, except for parameters of Missile Technology concern, or ECCN 4A003.e (equipment performing analog-to-digital conversions exceeding the limits in ECCN 3A001a.5a). This License Exception does not authorize the export or reexport of computers controlled for MT purposes regardless of the CTP. Assemblies performing analog-to-digital conversions are evaluated under Category 3—Electronics, ECCN 3A001a.5a.

(2) Related equipment classified under ECCN 4A003.d, .e, .f, or .g may be exported or reexported under License Exceptions GBS or CIV. When related equipment is exported or reexported as part of a computer system, NLR or License Exception CTP is available for the computer system and the related equipment, as appropriate.

(m) Interpretation 13: Encryption software controlled for EI reasons. Encryption software controlled for EI reasons under ECCN 5D002 may be preloaded on a laptop and exported under the tools of trade provision of License Exception TMP or the personal use exemption under License Exception BAG, subject to the terms and conditions of such License Exceptions. This provision replaces the personal use exemption of the International Traffic and Arms Regulations (ITAR) that existed for such software prior to December 30, 1996. Neither License Exception TMP nor License Exception BAG contains a reporting requirement.

§ 770.3 Interpretations related to exports of technology and software to destinations in Country Group D:1.

(a) Introduction. This section is intended to provide you additional guidance on how to determine whether your technology or software would be eligible for a License Exception, may be exported under NLR, or require a license, for export to Country Group D:1.

(b) Scope of licenses. The export of technology and software under a license is authorized only to the extent specifically indicated on the face of the license. The only technology and software related to equipment exports that may be exported without a license is technology described in §§ 734.7 through 734.11 of the EAR; operating technology and software described in § 740.1(a) of the EAR; sales technology described in § 740.8(b) of the EAR; and software updates described in § 740.8(c) of the EAR.

(c) Commingled technology and software. (1) U.S.-origin technology does not lose its U.S.-origin when it is redrawn, used, consulted, or otherwise commingled abroad in any respect with
other technology of any other origin. Therefore, any subsequent or similar technical data prepared or engineered abroad for the design, construction, operation, or maintenance of any plant or equipment, or part thereof, which is based on or utilizes any U.S.-origin technology, is subject to the EAR in the same manner as the original U.S.-origin technology, including license requirements, unless the commingled technology is not subject to the EAR by reason of the de minimis exclusions described in §734.4 of the EAR.

(2) U.S.-origin software that is incorporated into or commingled with foreign-origin software does not lose its U.S.-origin. Such commingled software is subject to the EAR the same manner as the original U.S.-origin software, including license requirements, unless the commingled software is not subject to the EAR by reason of the de minimis exclusions described in §734.4 of the EAR.

(d) Certain License Exception. The following questions and answers are intended to further clarify the scope of technology and software eligible for a License Exception.

(1)(i) Question 1. (A) Our engineers, in installing or repairing equipment, use techniques (experience as well as proprietary knowledge of the internal componentry or specifications of the equipment) that exceed what is provided in the standard manuals or instructions (including training) given to the customer. In some cases, it is also a condition of the license that such information provided to the customer be constrained to the minimum necessary for normal installation, maintenance and operation situations.

(B) Can we send an engineer (with knowledge and experience) to the customer site to perform the installation or repair, under the provisions of License Exception TSU for operation technology and software described in §740.13(a), of the EAR, if it is understood that he is restricted by our normal business practices to performing the work without imparting the knowledge or technology to the customer personnel?

(ii) Answer 1. Export of technology includes release of U.S.-origin data in a foreign country, and “release” includes “application to situations abroad of personal knowledge or technical experience acquired in the United States.” As the release of technology in the circumstances described here would exceed that permitted under the License Exception TSU for operation technology and software described in §740.13(a) of the EAR, a license would be required even though the technician could apply the data without disclosing it to the customer.

(2)(i) Question 2. We plan, according to our normal business practices, to train customer engineers to maintain equipment that we have exported under a license, License Exception, or NLR. The training is contractual in nature, provided for a fee, and is scheduled to take place in part in the customer’s facility and in part in the U.S. Can we now proceed with this training at both locations under a License Exception?

(ii) Answer 2. (A) Provided that this is your normal training, and involves technology contained in your manuals and standard instructions for the exported equipment, and meets the other requirements of License Exception TSU for operation technology and software described in §740.13(a), the training may be provided within the limits of those provisions of License Exception TSU. The location of the training is not significant, as the export occurs at the time and place of the actual transfer or imparting of the technology to the customer’s engineers.

(B) Any training beyond that covered under the provisions of License Exception TSU for operation technology and software described in §740.13(a), but specifically represented in your license application as required for this customer installation, and in fact authorized on the face of the license or a separate technology license, may not be undertaken while the license is suspended or revoked.
The following are definitions of terms as used in the Export Administration Regulations (EAR). In this part, references to the EAR are references to 15 CFR chapter VII, subchapter C. Those terms in quotation marks refer to terms used on the Commerce Control List (CCL) (Supplement No. 1 to part 774 of the EAR). Parenthetical references following the terms in quotation marks (i.e., (Cat 5)) refer to the CCL category in which that term is found.

``ATM.''

See “Asynchronous Transfer Mode.”

``Accuracy.''

Accurately measured in terms of inaccurancy. It is defined as the maximum deviation, positive or negative, of an indicated value from an accepted standard or true value.

``Active flight control systems.''

Function to prevent undesirable "aircraft" and "missile" motions or structural loads by autonomously processing outputs from multiple sensors and then providing necessary preventive commands to effect automatic control.

``Active pixel.''

A maximum (single) element of the solid state array that has a photoelectric transfer function when exposed to light (electromagnetic) radiation. (Cat 6 and 8)

``Angular position deviation.''

The maximum difference between angular position and the actual, very accurately measured angular position after the workpiece mount of the table has been turned out of its initial position. (Reference: VDI/VDE 2617, Draft: ‘‘Rotary tables on coordinate measuring machines’’).

``Assembly.''

A number of electronic components (i.e., ‘‘circuit elements’’, ‘‘discrete components’’, integrated circuits, etc.) connected together to perform a specific function(s), replaceable as an entity and normally capable of being disassembled.

``Asynchronous transfer mode.''

A transfer mode in which the
information is organized into cells; it is asynchronous in the sense that the recurrence of cells depends on the required or instantaneous bit rate. (CCITT Recommendation L.113)

Australia Group. The members belonging to this group have agreed to adopt controls on dual-use chemicals, i.e., weapons precursors, equipment, and biological microorganisms and related equipment in order to prevent the proliferation of chemical and biological weapons. Member countries as of October 1996 include: Argentina, Australia, Austria, Belgium, Canada, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Japan, Korea (South), Luxembourg, the Netherlands, New Zealand, Norway, Poland, Portugal, Romania, Slovak Republic, Spain, Sweden, Switzerland, the United Kingdom, and the United States. See also §742.2 of the EAR.

“Automatic target tracking.” (Cat 6)—A processing technique that automatically determines and provides as output an extrapolated value of the most probable position of the target in real time.

“Bandwidth of one voice channel.” (Cat 5)—In the case of data communication equipment designed to operate in one voice channel of 3,100 Hz, as defined in CCITT Recommendation G.151.

Bank. Means any of the following:
(a) Bank, savings association, credit union, bank holding company, bank or savings association service corporation, Edge Act corporation, Agreement corporation, or any insured depository institution, which is organized under the laws of the United States or any State and regulated or supervised by a Federal banking agency or a State bank supervisor; or
(b) A company organized under the laws of a foreign country and regulated or supervised by a foreign bank regulatory or supervisory authority which engages in the business of banking, including without limitation, foreign commercial banks, foreign merchant banks and other foreign institutions that engage in banking activities usual in connection with the business of banking in the countries where such foreign institutions are organized or operating; or
(c) An entity engaged in the business of providing clearing or settlement services, that is, or whose members are, regulated or supervised by a Federal banking agency, a State bank supervisor, or a foreign bank regulatory or supervisory authority; or
(d) A branch or affiliate of any of the entities listed in paragraphs (a), (b), (c) of this definition, regulated or supervised by a Federal banking agency, a State bank supervisor or a foreign bank regulatory or supervisory authority; or
(e) An affiliate of any of the entities listed in paragraph (a), (b), (c), or (d) of this definition, engaged solely in the business of providing data processing services to a bank or financial institution, or a branch of such an affiliate.

“Basic gate propagation delay time.” (Cat 3)—The propagation delay time value corresponding to the basic gate utilized within a “family” of “monolithic integrated circuits”. This may be specified, for a given “family”, either as the propagation delay time per typical gate or as the typical propagation delay time per gate.

NOTE: “Basic gate propagation delay time” is not to be confused with input/output delay time of a complex “monolithic integrated circuit”.

“Basic Scientific Research.” (GTN)—Experimental or theoretical work undertaken principally to acquire new knowledge of the fundamental principles of phenomena or observable facts, not primarily directed towards a specific practical aim or objective.

“Beat length.” (Cat 6)—The distance over which two orthogonally polarized signals, initially in phase, must pass in order to achieve a 2 Pi radian(s) phase difference.

“Bias.” (accelerometer) (Cat 7)—An accelerometer output when no acceleration is applied.

Bill of Lading. The contract of carriage and receipt for items, issued by the carrier. It includes an air waybill, but does not include an inland bill of lading or a domestic air waybill covering movement to port only.

Business Unit. As applied to encryption items, means a unit of a business which, whether or not separately incorporated, has:
(a) A distinct organizational structure which does not overlap with other business units of the same business;
(b) A distinct set of accounts; and
(c) Separate facilities for purchase, sale, delivery, and production of goods and services.

CCL. See Commerce Control List.

CCL Group. The Commerce Control List (CCL) is divided into 10 categories. Each category is subdivided into five groups, designated by the letters A through E: (A) Equipment, assemblies and components; (B) Test, inspection and production equipment; (C) Materials; (D) Software; and (E) Technology. See § 738.2(b) of the EAR.

“CE.”—See “Computing Element.”

“CTP.”—See “Composite theoretical performance.” This term may also appear without quotation marks.

“Camming.” (axial displacement) (Cat 2)—Axial displacement in one revolution of the main spindle measured in a plane perpendicular to the spindle faceplate, at a point next to the circumference of the spindle faceplate (Ref.: ISO 230 Part 1-1986, paragraph 5.63).

Canadian airline. Any citizen of Canada who is authorized by the Canadian Government to engage in business as an airline. For purposes of this definition, a Canadian citizen is:
(a) A natural person who is a citizen of Canada; or
(b) A partnership of which each member is such an individual; or
(c) A Canadian firm incorporated or otherwise organized under the laws of Canada or any Canadian province, having a total foreign stock interest not greater than 40 percent and having the Chairman or Acting Chairman and at least two-thirds of the Directors thereof Canadian citizens.

“Capable of:” (MTCR context)—See “usable in”.

Category. The Commerce Control List (CCL) is divided into ten categories: (0) Nuclear Materials, Facilities and Equipment, and Miscellaneous; (1) Materials, Chemicals, “Microorganisms”, and Toxins; (2) Materials Processing; (3) Electronics Design, Development and Production; (4) Computers; (5) Telecommunications and Information Security; (6) Sensors; (7) Navigation and Avionics; (8) Marine; (9) Propulsion Systems, Space Vehicles, and Related Equipment. See § 738.2(a) of the EAR.

“Chemical laser.” (Cat 6)—A “laser” in which the excited species is produced by the output energy from a chemical reaction.

“Circulation.” (controlled, anti-torque direction control systems) (Cat 7)—Use air blown over aerodynamic surfaces to increase or control the forces generated by the surfaces.

“Civil aircraft.” (Cat 7 and 9)—Only those “aircraft” listed by designation in published airworthiness certification lists by the civil aviation authorities to fly commercial civil internal and external routes or for legitimate civil, private or business use. (See also “aircraft”)

COCOM (Coordinating Committee on Multilateral Export Controls). A multilateral organization that cooperated in restricting strategic exports to controlled countries. COCOM was officially disbanded on March 31, 1994. COCOM members included the NATO countries, except Iceland, plus Japan and Australia.

Commerce Control List (CCL). A list of items under the export control jurisdiction of the Bureau of Export Administration, U.S. Department of Commerce. Note that certain additional items described in part 732 of the EAR are also subject to the EAR. The CCL is found in Supplement No. 1 to part 774 of the EAR.

“Commingled.” (Cat 1)—Filament blending of thermoplastic fibers and reinforcement fibers in order to produce a fiber reinforcement/matrix mix in total fiber form.

“Comminution.” (Cat 1)—A process to reduce a material to particles by crushing or grinding.

Commodity. Any article, material, or supply except technology and software. Note that the provisions of the EAR applicable to the control of software (e.g. publicly available provisions) are not applicable to encryption software. Encryption software is controlled because, like the items controlled under
ECCN 5A002, it has a functional capacity to encrypt information on a computer system, and not because of any informational or theoretical value that such software may reflect, contain or represent, or that its export may convey to others abroad.

"Common channel signalling." (Cat 5)—A signalling method in which a single channel between exchanges conveys, by means of labelled messages, signalling information relating to a multiplicity of circuits or calls and other information such as that used for network management.

"Communications channel controller." (Cat 5)—The physical interface that controls the flow of synchronous or asynchronous digital information. It is an assembly that can be integrated into computer or telecommunications equipment to provide communications access.

"Composite." (Cat 1, 6, 8, and 9)—A "matrix" and an additional phase or additional phases consisting of particles, whiskers, fibers or any combination thereof, present for a specific purpose or purposes.

"Composite theoretical performance." (CTP) (Cat 4)—A measure of computational performance given in millions of theoretical operations per second (Mtops), calculated using the aggregation of "computing elements (CE)". (See Category 4, Technical Note.) This term may also appear without quotation marks. The formula to calculate the CTP is contained in a technical note titled "Information on How to Calculate "Composite Theoretical Performance" at the end of Category 4 of the CCL.

"Compound rotary table." (Cat 2)—A table allowing the workpiece to rotate and tilt about two non-parallel axis that can be coordinated simultaneously for "contouring control".

"Computer using facility." (Cat 4)—The end-user's contiguous and accessible facilities:

(a) Housing the "computer operating area" and those end-user functions that are being supported by the stated application of the electronic computer and its related equipment; and

(b) Not extending beyond 1,500 meters in any direction from the center of the "computer operating area".

NOTE: "Computer operating area": the immediate contiguous and accessible area around the electronic computer, where the normal operating, support and service functions take place.

"Computing element." (CE) (Cat 4)—The smallest computational unit that produces an arithmetic logic result.

"Contouring control." (Cat 2)—Two or more numerically controlled motions operating in accordance with instructions that specify the next required position and the required feed rates to that position. These feed rates are varied in relation to each other so that a desired contour is generated (Ref. ISO/ DIS 2806—1980).

Controlled country. A list of countries designated controlled for national security purposes found in Country Group D:1 (see Supplement No. 1 to part 740 of the EAR). This list was established under authority delegated to the Secretary of Commerce by Executive Order 12214 of May 2, 1980 pursuant to section 5(b) of the EAA, and including: Albania, Armenia, Azerbaijan, Belarus, Bulgaria, Cambodia, the People's Republic of China, Estonia, Georgia, Kazakhstan, Kyrgyzstan, Laos, Latvia, Lithuania, Moldova, Mongolia, Romania, Russia, Tajikistan, Turkmenistan, Ukraine, Laos, Latvia, Lithuania, Moldova, Mongolia, Romania, Russia, Tajikistan, Turkmenistan, Ukraine, and Vietnam. Cuba and North Korea are controlled countries, but they are listed in Country Group E:2 (unilateral embargoes) rather than Country Group D:1. This definition does not apply to part 768 of the EAR (Foreign Availability), which provides a dedicated definition.

Controlled in fact. For purposes of the Special Comprehensive License (part 752 of the EAR), controlled in fact is defined as it is under the Restrictive Trade Practices or Boycotts (§760.1(c) of the EAR).

Cooperating country. A country that cooperated with the former COCOM member countries in restricting strategic exports in accordance with COCOM standards. The "Cooperating Countries" are: Austria, Finland, Hong Kong, Ireland, Korea (Republic of), New Zealand, Sweden, and Switzerland.

Countries supporting international terrorism. In accordance with section 6(j) of the Export Administration Act of 1979, as amended (EAA), the Secretary
of State has determined that the following countries’ governments have repeatedly provided support for acts of international terrorism: Cuba, Iran, Iraq, Libya, North Korea, Sudan, and Syria.

Country Chart. A chart, found in Supplement No. 1 to part 738 of the EAR, that contains certain licensing requirements based on destination and reason for control. In combination with the CCL, the Country Chart indicates when a license is required for any item on the CCL to any country in the world under General Prohibition One (Exports and Reexports in the Form Received), General Prohibition Two (Parts and Components Reexports), and General Prohibition Three (Foreign Produced Direct Product Reexports). See part 736 of the EAR.

Countries are separated into five country groups designated by the symbols A, B, C, D, and E. (See Supplement No. 1 to part 740 of the EAR for a list of countries in each Country Group.)

``Critical temperature." (Cat 1, 3, and 6)—The "critical temperature" (sometimes referred to as the transition temperature) of a specific "superconductive" material is the temperature at which the material loses all resistance to the flow of direct electrical current.

``Cryptanalysis." (Cat 5)—The analysis of a cryptographic system or its inputs and outputs to derive confidential variables or sensitive data including clear text. (ISO 7498-2-1988(E), paragraph 3.3.18)

``Cryptography." (Cat 5)—The discipline that embodies principles, means and methods for the transformation of data in order to hide its information content, prevent its undetected modification or prevent its unauthorized use. "Cryptography" is limited to the transformation of information using one or more "secret parameters" (e.g., crypto variables) and/or associated key management.

NOTE: "Secret parameter": a constant or key kept from the knowledge of others or shared only within a group.

Customs officer. The Customs officers in the U.S. Customs Service and postmasters unless the context indicates otherwise.

``Data signalling rate." (Cat 5)—The rate, as defined in ITU Recommendation 53-36, taking into account that, for non-binary modulation, baud and bit per second are not equal. Bits for coding, checking and synchronization functions are to be included.

NOTES: 1. When determining the "data signalling rate", servicing and administrative channels shall be excluded.
2. It is the maximum one-way rate, i.e., the maximum rate in either transmission or reception.

(a) Mirrors:
(1) Mirrors having a single continuous optical reflecting surface that is dynamically deformed by the application of individual torques or forces to compensate for distortions in the optical waveform incident upon the mirror; or
(2) Mirrors having multiple optical reflecting elements that can be individually and dynamically repositioned by the application of torques or forces to compensate for distortions in the optical waveform incident upon the mirror.

(b) Deformable mirrors are also known as adaptive optic mirrors.

``Datagram." (Cat 4 and 5)—A self-contained, independent entity of data carrying sufficient information to be routed from the source to the destination data terminal equipment without reliance on earlier exchanges between this source and destination data terminal equipment and the transporting network.

Defense Trade Control (DTC). The office at the Department of State, formerly known as the Office of Munitions Control, responsible for reviewing applications to export and reexport items on the U.S. Munitions List. (See 22 CFR parts 120 through 130.)

Denied Persons List. A list, referenced in Supplement No. 2 to part 764 of the EAR, of specific persons that have been denied export privileges, in whole or in part. The full text of each order denying export privileges is published in the FEDERAL REGISTER.

``Designed or modified." (MTCR context)—Equipment, parts, components, or "software" that, as a result of "development", or modification, have specified properties that make them fit for a particular application. "Designed or modified" equipment, parts, components or "software" can be used for
other applications. For example, a titanium coated pump designed for a “missile” may be used with corrosive fluids other than propellants.

“Development.” (General Technology Note)—“Development” is related to all stages prior to serial production, such as: design, design research, design analyses, design concepts, assembly and testing of prototypes, pilot production schemes, design data, process of transforming design data into a product, configuration design, integration design, layouts.

“Diffusion bonding.” (Cat 1, 2, and 9)—A solid-state molecular joining of at least two separate metals into a single piece with a joint strength equivalent to that of the weakest material.

“Digital computer.” (Cat 4 and 5)—Equipment that can, in the form of one or more discrete variables:
(a) Accept data;
(b) Store data or instructions in fixed or alterable (writable) storage devices;
(c) Process data by means of a stored sequence of instructions that is modifiable; and
(d) Provide output of data.

NOTE: Modifications of a stored sequence of instructions include replacement of fixed storage devices, but not a physical change in wiring or interconnections.

“Digital transfer rate.” (Cat 5)—The total bit rate of the information that is directly transferred on any type of medium.

“Direct-acting hydraulic pressing.” (Cat 2)—A deformation process that uses a fluid-filled flexible bladder in direct contact with the workpiece.

“Drift rate.” (gyro) (Cat 7)—The time rate of output deviation from the desired output. It consists of random and systematic components and is expressed as an equivalent input angular displacement per unit time with respect to inertial space.

Dual use. Items that have both commercial and military or proliferation applications. While this term is used informally to describe items that are subject to the EAR, purely commercial items are also subject to the EAR (see §734.2(a) of the EAR).

“Dynamic adaptive routing.” (Cat 5)—Automatic rerouting of traffic based on sensing and analysis of current actual network conditions.

NOTE: This does not include cases of routing decisions taken on predefined information.

“Dynamic signal analyzers.” (Cat 3)—“Signal analyzers” that use digital sampling and transformation techniques to form a Fourier spectrum display of the given waveform including amplitude and phase information.

Effective control. You maintain effective control over an item when you either retain physical possession of the item, or secure the item in such an environment as a hotel safe, a bonded warehouse, or a locked or guarded exhibition facility. Retention of effective control over an item is a condition of certain temporary exports and reexports.

“Electronic steerable phased array antenna.” (Cat 6)—An antenna that forms a beam by means of phase coupling, i.e., the beam direction is controlled by the complex excitation coefficients of the radiating elements and the direction of that beam can be varied in azimuth or in elevation, or both, by application, both in transmission and reception, of an electrical signal.

Encryption items. The phrase encryption items includes all encryption commodities, software, and technology that contain encryption features and are subject to the EAR. This does not include encryption items specifically designed, developed, configured, adapted or modified for military applications (including command, control and intelligence applications) which are controlled by the Department of State on the U.S. Munitions List.

Encryption licensing arrangement. A license that allows the export of specified products to specified destinations in unlimited quantities. In certain cases, exports are limited to specified end-users for specified end-uses. Generally, reporting of all sales of the specified products is required at six month intervals. This includes sales made under distribution arrangements and distribution and warehousing agreements that were previously issued by the Department of State for encryption items.

Encryption object code. Computer programs containing an encryption source code that has been compiled into a
form of code that can be directly executed by a computer to perform an encryption function.

Encryption software. Computer programs that provide capability of encryption functions or confidentiality of information or information systems. Such software includes source code, object code, applications software, or system software.

Encryption source code. A precise set of operating instructions to a computer that, when compiled, allows for the execution of an encryption function on a computer.

"End-effectors." (Cat 2)—"End-effectors" include grippers, "active tooling units" and any other tooling that is attached to the baseplate on the end of a "robot" manipulator arm.

NOTE: "Active tooling unit": a device for applying motive power, process energy or sensing to the workpiece.

"Equivalent Density." (Cat 6)—The mass of an optic per unit optical area projected onto the optical surface.

"Expert systems." (Cat 4)—Systems providing results by application of rules to data that are stored independently of the "program" and capable of any of the following:

(a) Modifying automatically the "source code" introduced by the user;

(b) Providing knowledge linked to a class of problems in quasi-natural language or

(c) Acquiring the knowledge required for their development (symbolic training).

Export. Export means an actual shipment or transmission of items out of the United States. (See §734.2(b) of the EAR.)

Export Administration Review Board (EARB). EARB voting members are the Secretary of Commerce, the Secretary of State, the Secretary of Defense, the Secretary of Energy, the Attorney General (for encryption exports), and the Director of the Arms Control and Disarmament Agency. The Chairman of the Joint Chiefs of Staff and the Director of Central Intelligence are non-voting members. The Secretary of Commerce is the Chair of the EARB. No alternate EARB members may be designated, but the acting head or deputy head of any agency or department may serve in lieu of the head of the concerned agency or department. The EARB may invite the heads of other Government agencies or departments (other than those identified in this definition) to participate in the activities of the EARB when matters of interest to such agencies or departments are under consideration. Decisions are made by majority vote.

Export Control Classification Number (ECCN). The numbers used in Supplement No. 1 to part 774 of the EAR and throughout the EAR. The Export Control Classification Number consists of a set of digits and a letter. Reference §738.2(c) of the EAR for a complete description of each ECCN's composition.

Export control document. A license; application for license; any and all documents submitted in accordance with the requirements of the EAR in support of, or in relation to, a license application; application for International Import Certificate; Delivery Verification Certificate or similar evidence of delivery; Shipper’s Export Declaration (SED) presented in connection with shipments to any country; a Dock Receipt or bill of lading issued by any carrier in connection with any export subject to the EAR and any and all documents prepared and submitted by exporters and agents pursuant to the export clearance requirements of part 758 of the EAR; a U.S. exporter’s report of request received for information, certification, or other action indicating a restrictive trade practice or boycott imposed by a foreign country against a country friendly to the United States, submitted to the U.S. Department of Commerce in accordance with the provisions of part 760 of the EAR; Customs Form 7512, Transportation Entry and Manifest of Goods, Subject to Customs Inspection and Permit, when used for Transportation and Exportation (T. & E.) or Immediate Exportation (I.E.); and any other document issued by a U.S. Government agency as evidence of the existence of a license for the purpose of loading onto an exporting carrier or otherwise...
facilitating or effecting an export from the United States or any reexport of any item requiring a license.

Exporter. See U.S. exporter.

Exporting carrier. Any instrumentality of water, land, or air transportation by which an export is effected, including any domestic air carrier on which any cargo for export is laden or carried.

“FMU.”—See “flexible manufacturing unit.”

“Family.” (Cat 3)—Consists of microprocessor or microcomputer microcircuits that have:
(a) The same architecture;
(b) The same basic instruction set; and
(c) The same basic technology (e.g., only NMOS or only CMOS).

“Fast select.” (Cat 4 and 5)—A facility applicable to virtual calls that allows data terminal equipment to expand the possibility to transmit data in call set-up and clearing “packets” beyond the basic capabilities of a virtual call.

NOTE: “Packet”: a group of binary digits including data and call control signals that is switched as a composite whole. The data, call control signals, and possible error control information are arranged in a specified format.

“Fault tolerance.” (Cat 4)—The capability of a computer system, after any malfunction of any of its hardware or “software” components, to continue to operate without human intervention, at a given level of service that provides: continuity of operation, data integrity, and recovery of service within a given time.

“Fibrous or filamentary materials.” (Cat 1 and 8)—The term “fibrous and filamentary materials” includes:
(a) Continuous monofilaments;
(b) Continuous yarns and rovings;
(c) Tapes, fabrics, random mats and braids;
(d) Chopped fibers, staple fibers and coherent fiber blankets;
(e) Whiskers, either monocristalline or polycristalline, of any length;
(f) Aromatic polyimide pulp.

“Film type integrated circuit.” (Cat 3)—An array of “circuit elements” and metallic interconnections formed by deposition of a thick or thin film on an insulating “substrate”.

NOTE: “Circuit element”: a single active or passive functional part of an electronic circuit, such as one diode, one transistor, one resistor, one capacitor, etc.

Financial Institution. As applied to encryption items, means any of the following:
(a) A broker, dealer, government securities broker or dealer, self-regulatory organization, investment company or investment adviser, which is regulated or supervised by the Securities and Exchange Commission or a self-regulatory organization that is registered with the Securities and Exchange Commission; or
(b) A broker, dealer, government securities broker or dealer, investment company, investment adviser, or entity that engages in securities activities that, if conducted in the United States, would be described by the definition of the term “self-regulatory organization” in the Securities Exchange Act of 1934, which is organized under the laws of a foreign country and regulated or supervised by a foreign securities authority; or
(c) A U.S. board of trade that is designated as a contract market by the Commodity Futures Trading Commission or a futures commission merchant that is regulated or supervised by the Commodity Futures Trading Commission; or
(d) A U.S. entity engaged primarily in the business of issuing a general purpose charge, debit, or stored value card, or a branch of, or affiliate controlled by, such an entity; or
(e) A branch or affiliate of any of the entities listed in paragraphs (a), (b), or (c) of this definition regulated or supervised by the Securities and Exchange Commission, the Commodity Futures Trading Commission, or a foreign securities authority; or
(f) An affiliate of any of the entities listed in paragraph (a), (b), (c), or (e), of this definition engaged solely in the business of providing data processing services to one or more bank or financial institutions, or a branch of such an affiliate; or
(g) A company organized and regulated under the laws of any of the United States and its branches and affiliates whose primary and predominant business activity is the writing of insurance or the reinsuring of risks; or a company organized and regulated.
under the laws of a foreign country and its branches and affiliates whose primary and predominant business activity is the writing of insurance or the reinsuring of risks.

Firm. A corporation, partnership, limited partnership, association, company, trust, or any other kind of organization or body corporate, situated, residing, or doing business in the United States or any foreign country, including any government or agency thereof.

“Fixed.” (Cat 5)—The coding or compression algorithm cannot accept externally supplied parameters (e.g., cryptographic or key variables) and cannot be modified by the user.

“Flexible manufacturing unit.” (FMU), sometimes also referred to as ‘flexible manufacturing system’ (FMS) or ‘flexible manufacturing cell’ (FMC) (Cat 2)—An entity that includes a combination of at least:

(a) A “digital computer” including its own “main storage” and its own “related equipment”; and
(b) Two or more of the following:
   (1) A machine tool described in 2B001.c;
   (2) A dimensional inspection machine described in Category 2, or another digitally controlled measuring machine controlled by an entry in Category 2;
   (3) A “robot” controlled by an entry in Category 2 or 8;
   (4) Digitally controlled equipment controlled by 1B003, 2B003, or 9B001;
   (5) “Stored program controlled” equipment controlled by 3B001;
   (6) Digitally controlled electronic equipment controlled by 1B001;
   (7) Digitally controlled electronic equipment controlled by 3A002.

“Fluoride fibers.” (Cat 6)—Fibers manufactured from bulk fluoride compounds.

“Focal plane array.” (Cat 6)—A linear or two-dimensional planar layer, or combination of planar layers, of individual detector elements, with or without readout electronics, that work in the focal plane.

N.B. This definition does not include a stack of single detector elements or any two, three, or four element detectors provided time delay and integration is not performed within the element.

Foreign government agency. For the purposes of exemption from support documentation (see §748.9 of the EAR), a foreign government agency is defined as follows:

(a) National governmental departments operated by government-paid personnel performing governmental administrative functions; e.g. Finance Ministry, Ministry of Defense, Ministry of Health, etc. (municipal or other local government entities must submit required support documentation); or
(b) National government-owned public service entities; e.g., nationally owned railway, postal, telephone, telegraph, broadcasting, and power systems, etc. The term “foreign government agency” does not include government corporations, quasi-government agencies, and state enterprises engaged in commercial, industrial, and manufacturing activities, such as petroleum refineries, mines, steel mills, retail stores, automobile manufacturing plants, airlines, or steamship lines that operate between two or more countries, etc.

Foreign policy control. A control imposed under the EAR for any and all of the following reasons: chemical and biological weapons, nuclear nonproliferation, missile technology, regional stability, crime control, anti-terrorism, United Nations sanctions, and any other reason for control implemented under section 6 of the EAA or other similar authority.

Foreign Terrorist Organizations (FTO). Any organization that is determined by the Secretary of the Treasury to be a foreign terrorist organization under notices or regulations issued by the Office of Foreign Assets Control (see 31 CFR chapter V).

Forwarding agent. The person authorized by an exporter to perform for that exporter services to facilitate the export of items. The forwarding agent need not be a person regularly engaged in the freight forwarding business. The forwarding agent must be designated by the exporter in writing in the power-of-attorney set forth on the Shippers’ Export Declaration or in a general power-of-attorney, or other written form, subscribed and sworn to by a duly authorized officer or employee of the exporter.
“Frequency agility.” (frequency hopping) (Cat 5)—A form of “spread spectrum” in which the transmission frequency of a single communication channel is made to change by discrete steps.

“Frequency agility.” (radar) (Cat 6)—(see “Radar frequency agility”)

“Frequency switching time.” (Cat 3 and 5)—The maximum time (i.e., delay), taken by a signal, when switched from one selected output frequency to another selected output frequency, to reach:
(a) A frequency within 100 Hz of the final frequency; or
(b) An output level within 1 dB of the final output level.

“Frequency synthesizer.” (Cat 3)—Any kind of frequency source or signal generator, regardless of the actual technique used, providing a multiplicity of simultaneous or alternative output frequencies, from one or more outputs, controlled by, derived from or disciplined by a lesser number of standard (or master) frequencies.

“Gas Atomization.” (Cat 1)—A process to reduce a molten stream of metal alloy to droplets of 500-micrometer diameter or less by a high-pressure gas stream.

“Gateway.” (Cat 5)—The function, realized by any combination of equipment and “software”, to carry out the conversion of conventions for representing, processing or communicating information used on one system into the corresponding, but different conventions used in another system.

General prohibitions. The 10 prohibitions found in part 734 of the EAR that prohibit certain exports, reexports, and other conduct, subject to the EAR, absent a license, License Exception, or determination that no license is required (“NLR”).

“Generic software.” (Cat 5)—A set of instructions for a “stored program controlled” switching system that is the same for all switches using that type of switching system.

Note: The data base portion is not considered to be a part of the generic “software”. “Geographically dispersed.” (Cat 6)—Sensors are considered geographically dispersed when each location is distant from any other more than 1,500 m in any direction. Mobile sensors are always considered geographically dispersed.

“Global interrupt latency time.” (Cat 4)—The time taken by the computer system to recognize an interrupt due to the event, service the interrupt and perform a context switch to an alternate memory-resident task waiting on the interrupt.

Health/medical end-user. As applied to encryption items, means any entity, including civilian government agencies, the primary purpose of which is the provision of medical or other health services. The term medical or other health services includes the following items or services:
(a) Physicians’ services and supplies furnished as an incident to a physician’s professional service (such as laboratory services), of kinds which are commonly furnished in physicians’ offices; services provided by a physician assistant or by a nurse practitioner; including services which would be physicians’ services if furnished by a physician and which are performed by a physician assistant under the supervision of a physician, or services which would be physicians’ services if furnished by a physician and which are performed by a nurse practitioner or clinical nurse specialist in collaboration with a physician; certified nurse-midwife services or services of a certified registered nurse anesthetist;
(b) Hospital services incident to physicians services rendered to outpatients and hospitalization services incident to such services; ambulance services;
(c) Psychologist services or clinical social worker services; or
(d) Health cost reimbursers (e.g., health insurers, HMOs).

Hold Without Action (HWA). License applications may be held without action only in the limited circumstances described in § 750.4(c) of the EAR.

“Hot isostatic densification.” (Cat 2)—A process of pressurizing a casting at temperatures exceeding 375 K (102 °C) in a closed cavity through various media (gas, liquid, solid particles, etc.) to create equal force in all directions to reduce or eliminate internal voids in the casting.

“Hybrid computer.” (Cat 4)—Equipment that can:
(a) Accept data;
(b) Process data, in both analog and digital representation; and
(c) Provide output of data.

"Hybrid integrated circuit." (Cat 3)—Any combination of integrated circuit(s), or integrated circuit with "circuit elements" or "discrete components" connected together to perform (a) specific function(s), and having all of the following criteria:
(a) Containing at least one unencapsulated device;
(b) Connected together using typical IC-production methods;
(c) Replaceable as an entity; and
(d) Not normally capable of being disassembled.

NOTES: 1. "Circuit element": a single active or passive functional part of an electronic circuit, such as one diode, one transistor, one resistor, one capacitor, etc.
2. "Discrete component": a separately packaged "circuit element" with its own external connections.

"ISDN."—See "Integrated Services Digital Network".

"Image enhancement." (Cat 4)—The processing of externally derived information-bearing images by algorithms such as time compression, filtering, extraction, selection, correlation, convolution or transformations between domains (e.g., fast Fourier transform or Walsh transform). This does not include algorithms using only linear or rotational transformation of a single image, such as translation, feature extraction, registration or false coloration.

"Information security." (Cat 5)—All the means and functions ensuring the accessibility, confidentiality or integrity of information or communications, excluding the means and functions intended to safeguard against malfunctions. This includes "cryptography," "cryptanalysis," protection against compromising emanations and computer security.

N.B. "Cryptanalysis": the analysis of a cryptographic system or its inputs and outputs to derive confidential variables or sensitive data, including clear text. (ISO 7498-2:1988 (E), paragraph 3.3.18)

"Instantaneous bandwidth." (Cat 3)—The bandwidth over which output power remains constant within 3 dB without adjustment of other operating parameters.

"Instrumented range." (Cat 6)—The specified unambiguous display range of a radar.

"Integrated Services Digital Network." (ISDN) (Cat 5)—A unified end-to-end digital network, in which data originating from all types of communication (e.g., voice, text, data, still and moving pictures) are transmitted from one port (terminal) in the exchange (switch) over one access line to and from the subscriber.

"Intent to Deny (ITD) letter." A letter informing the applicant:
(a) Of the reason for BXA's decision to deny a license application; and
(b) That the application will be denied 45 days from the date of the ITD letter, unless the applicant provides, and BXA accepts, a reason why the application should not be denied for the stated reason. See § 750.6 of the EAR.

"Interconnected radar sensors." (Cat 6)—Two or more radar sensors are interconnected when they mutually exchange data in real time.

"Intermediate consignee." The intermediate consignee is the bank, forwarding agent, or other intermediary (if any) who acts in a foreign country as an agent for the exporter, the purchaser, or the ultimate consignee, for the purpose of effecting delivery of the items to the ultimate consignee.

"Intrinsic Magnetic Gradiometer." (Cat 6)—A single magnetic field gradient sensing element and associated electronics the output of which is a measure of magnetic field gradient. (See also "Magnetic Gradiometer")

"Isostatic presses." (Cat 2)—Equipment capable of pressurizing a closed cavity through various media (gas, liquid, solid particles, etc.) to create equal pressure in all directions within the cavity upon a workpiece or material.

"Item." "Item" means "commodities, software, and technology." When the EAR intend to refer specifically to commodities, software, or technology, the text will use the specific reference. Know. See "knowledge." Knowledge. Knowledge of a circumstance (the term may be a variant, such as "know," "reason to know," or "reason to believe") includes not only positive knowledge that the circumstance exists or is substantially
certain to occur, but also an awareness of a high probability of its existence or future occurrence. Such awareness is inferred from evidence of the conscious disregard of facts known to a person and is also inferred from a person’s willful avoidance of facts. This definition does not apply to part 760 of the EAR (Restrictive Trade Practices or Boycotts).

“Laser.” (Cat 2, 3, 5, 6, and 9)—An assembly of components that produce both spatially and temporally coherent light that is amplified by stimulated emission of radiation. See also: “Chemical laser”; “Q-switched laser”; “Super High Power Laser”; and “Transfer laser”.

Law or regulation relating to export control. Any statute, proclamation, executive order, regulation, rule, license, or order applicable to any conduct involving an export transaction shall be deemed to be a “law or regulation relating to export control.”

Legible or legibility. Legible and legibility mean the quality of a letter or numeral that enables the observer to identify it positively and quickly to the exclusion of all other letters or numerals.

License. Authority issued by the Bureau of Export Administration authorizing an export, reexport, or other regulated activity. The term “license” does not include authority represented by a “License Exception.”

License application; application for license. License application and similar wording mean an application to BXA requesting the issuance of a license to the applicant.

License Exception. An authorization described in part 740 of the EAR that allows you to export or reexport, under stated conditions, items subject to the EAR that otherwise would require a license. Unless otherwise indicated, these License Exceptions are not applicable to exports under the licensing jurisdiction of agencies other than the Department of Commerce.

Licensee. The person to whom a license has been issued by BXA. See §750.7(c) of the EAR for a complete definition and identification of a licensee’s responsibilities.

“Linearity” (Cat 2)—“Linearity” (usually measured in terms of non-linearity) is the maximum deviation of the actual characteristic (average of upscale and downside readings), positive or negative, from a straight line so positioned as to equalize and minimize the maximum deviations.

“Local area network.” (Cat 4)—A data communication system that:
(a) Allows an arbitrary number of independent “data devices” to communicate directly with each other; and
(b) Is confined to a geographical area of moderate size (e.g., office building, plant, campus, warehouse).

NOTE: “Data device”: equipment capable of transmitting or receiving sequences of digital information.

“MBTR”.—See “maximum bit transfer rate”.

MTCR. See Missile Technology Control Regime.

MTEC. See Missile Technology Export Control Group.

“Magnetic Gradiometers.” (Cat 6)—Are designed to detect the spatial variation of magnetic fields from sources external to the instrument. They consist of multiple “magnetometers” and associated electronics the output of which is a measure of magnetic field gradient. (See also “Intrinsic Magnetic Gradiometer”.)

“Magnetometers.” (Cat 6)—Are designed to detect magnetic fields from sources external to the instrument. They consist of a single magnetic field sensing element and associated electronics the output of which is a measure of the magnetic field.

“Main storage.” (Cat 4)—The primary storage for data or instructions for rapid access by a central processing unit. It consists of the internal storage of a “digital computer” and any hierarchical extension thereof, such as cache storage or non-sequentially accessed extended storage.

“Matrix.” (Cat 1, 2, 8, and 9)—A substantially continuous phase that fills the space between particles, whiskers or fibers.

“Maximum bit transfer rate.” (MBTR) (Cat 4)—Of solid state storage equipment: the number of data bits per second transferred between the equipment and its controller. Of a disk drive: the internal data transfer rate calculated as follows:
“MBTR” (bits per second) = \( B \times R \times T \), where:
- \( B \) = Maximum number of data bits per track available to read or write in a single revolution;
- \( R \) = Revolutions per second;
- \( T \) = Number of tracks that can be used or written simultaneously.

“Measurement uncertainty.” (Cat 2)—The characteristic parameter that specifies in what range around the output value the correct value of the measurable variable lies with a confidence level of 95%. It includes the uncorrected systematic deviations, the uncorrected backlash, and the random deviations (Ref.: VDI/VDE 2617).

“Mechanical alloying.” (Cat 1)—An alloying process resulting from the bonding, fracturing and rebonding of elemental and master alloy powders by mechanical impact. Non-metallic particles may be incorporated in the alloy by addition of the appropriate powders.

“Media access unit.” (Cat 5)—Equipment that contains one or more communication interfaces (“network access controller”, “communications channel controller”, modem or computer bus) to connect terminal equipment to a network.

“Melt Extraction.” (Cat 1)—A process to “solidify rapidly” and extract a ribbon-like alloy product by the insertion of a short segment of a rotating chilled block into a bath of a molten metal alloy.

Note: “Solidify rapidly”: solidification of molten material at cooling rates exceeding 1,000 K/sec.

“Melt Spinning.” (Cat 1)—A process to “solidify rapidly” a molten metal stream impinging upon a rotating chilled block, forming a flake, ribbon or rod-like product.

Note: “Solidify rapidly”: solidification of molten material at cooling rates exceeding 1,000 K/sec.

“Microprocessor microcircuit.” (Cat 3)—A “monolithic integrated circuit” or “multichip integrated circuit” containing an arithmetic logic unit (ALU) capable of executing a series of general purpose instructions from an external storage.

N.B. 1: The “microprocessor microcircuit” normally does not contain integral user-accessible storage, although storage present on the chip may be used in performing its logic function.

N.B. 2: This definition includes chip sets that are designed to operate together to provide the function of a “microprocessor microcircuit.”

“Microprogram.” (Cat 4 and 5)—A sequence of elementary instructions, maintained in a special storage, the execution of which is initiated by the introduction of its reference instruction into an instruction register.

Missile Technology Control Regime (MTCR). The United States and other nations in this multilateral control regime have agreed to guidelines for restricting the export and reexport of dual-use items that may contribute to the development of missiles. The MTCR Annex lists missile-related equipment and technology controlled either by the Department of Commerce or by the Department of State’s Office of Defense Trade Controls (22 CFR parts 120 through 130).

Missile Technology Export Control Group (MTEC). Chaired by the Department of State, the MTEC primarily reviews applications involving items controlled for Missile Technology (MT) reasons. The MTEC also reviews applications involving items not controlled for MT reasons, but destined for a country and/or end-use/end-user of concern.

“Missiles.” (All)—Rocket systems (including ballistic missile systems, space launch vehicles, and sounding rockets) and unmanned air vehicle systems (including cruise missile systems, target drones, and reconnaissance drones) capable of delivering at least 500 kilograms payload to a range of at least 300 kilometers.

“Monolithic integrated circuit.” (Cat 3)—A combination of passive or active “circuit elements” or both that:
- (a) Are formed by means of diffusion processes, implantation processes or deposition processes in or on a single semiconducting piece of material, a so-called ‘chip’;
- (b) Can be considered as indivisibly associated; and
- (c) Perform the function(s) of a circuit.

Note: “Circuit element”: a single active or passive functional part of an electronic circuit, such as one diode, one transistor, one resistor, one capacitor, etc.

“Most immediate storage.” (Cat 4)—The portion of the “main storage”
most directly accessible by the central processing unit:
(a) For single level “main storage”, the internal storage; or
(b) For hierarchical “main storage”:
1. The cache storage;
2. The instruction stack; or
3. The data stack.

“Motion control board.” (Cat 2)—An electronic “assembly” specially designed to provide a computer system with the capability to coordinate simultaneously the motion of axes of machine tools for “contouring control”.

“Multichip integrated circuit.” (Cat 3)—Two or more “monolithic integrated circuits” bonded to a common “substrate”.

“Multidata-stream processing.” (Cat 4)—The “microprogram” or equipment architecture technique that permits simultaneous processing of two or more data sequences under the control of one or more instruction sequences by means such as:
(a) Single Instruction Multiple Data (SIMD) architectures such as vector or array processors;
(b) Multiple Single Instruction Multiple Data (MSIMD) architectures;
(c) Multiple Instruction Multiple Data (MIMD) architectures, including those that are tightly coupled, closely coupled or loosely coupled;
(d) Structured arrays of processing elements, including systolic arrays.

“Multilevel security.” (Cat 5)—A class of system containing information with different sensitivities that simultaneously permits access by users with different security clearances and need-to-know, but prevents users from obtaining access to information for which they lack authorization.

NOTE: “Multilevel security” is computer security and not computer reliability that deals with equipment fault prevention or human error prevention in general.

“Multispectral Imaging Sensors.” (Cat 6)—Are capable of simultaneous or serial acquisition of imaging data from two or more discrete spectral bands. Sensors having more than twenty discrete spectral bands are sometimes referred to as hyperspectral imaging sensors.

“N.E.S.” N.E.S or n.e.s. is an abbreviation meaning “not elsewhere specified”.

NLR. NLR (“no license required”) is a symbol entered on the Shipper’s Export Declaration, certifying that no license is required.

NSG. See Nuclear Suppliers Group.

NATO (North Atlantic Treaty Organization). A strategic defensive organization that consists of the following member nations: Belgium, Canada, Denmark, France, Germany, Greece, Iceland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain, Turkey, the United Kingdom, and the United States.

Net value. The actual selling price, less shipping charges or current market price, whichever is the larger, to the same type of purchaser in the United States.

“Network access controller.” (Cat 4 and 5)—A physical interface to a distributed switching network. It uses a common medium that operates throughout at the same “digital transfer rate” using arbitration (e.g., token or carrier sense) for transmission. Independently from any other, it selects data packets or data groups (e.g., IEEE 802) addressed to it. It is an assembly that can be integrated into computer or telecommunications equipment to provide communications access.

“Neural computer.” (Cat 4)—A computational device designed or modified to mimic the behavior of a neuron or a collection of neurons (i.e., a computational device that is distinguished by its hardware capability to modulate the weights and numbers of the interconnections of a multiplicity of computational components based on previous data).

“Noise level.” (Cat 6)—An electrical signal given in terms of power spectral density. The relation between “noise level” expressed in peak-to-peak is given by \[ S_{pp} = N_s(f_1-f_2) \], where \( S_{pp} \) is the peak-to-peak value of the signal (e.g., nanoteslas), \( N_s \) is the power spectral density (e.g., (nanotesla)²/Hz) and \( (f_1-f_2) \) defines the bandwidth of interest.

Nuclear Suppliers Group (NSG). The United States and other nations in this multilateral control regime have agreed to guidelines for restricting the export or reexport of items with nuclear applications. As of February 1, 1996, members include: Argentina, Australia, Austria, Belgium, Bulgaria,
Canada, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Japan, Luxembourg, the Netherlands, New Zealand, Norway, Poland, Portugal, Republic of Korea, Romania, Russia, Slovak Republic, Spain, South Africa, Sweden, Switzerland, the United Kingdom, and the United States. See also §742.3 of the EAR.

“Numerical control.” (Cat 2)—The automatic control of a process performed by a device that makes use of numeric data usually introduced as the operation is in progress (Ref. ISO 2382).

“Object code.” (or object language) (Cat 4)—An equipment executable form of a convenient expression of one or more processes (“source code” (or source language)) that has been converted by a programming system. (See also “source code”)

Office of Foreign Assets Control (OFAC) or (OFAC). The office at the Department of the Treasury responsible for blocking assets of foreign countries subject to economic sanctions, controlling participation by U.S. persons, including foreign subsidiaries, in transactions with specific countries or nationals of such countries, and administering embargoes on certain countries or areas of countries. (See 31 CFR parts 500 through 590.)

On-line merchant. As applied to encryption items, means an entity regularly engaged in lawful commerce that uses means of electronic communications (e.g., the Internet) to conduct commercial transactions.

“Operate autonomously.” (Cat 8)—Fully submerged, without snorkel, all systems working and cruising at minimum speed at which the submersible can safely control its depth dynamically by using its depth planes only, with no need for a support vessel or support base on the surface, sea-bed or shore, and containing a propulsion system for submerged or surface use.

Operating Committee (OC). The OC voting members include representatives of appropriate agencies in the Departments of Commerce, State, Defense, Justice (for encryption exports), and Energy and the Arms Control and Disarmament Agency. The appropriate representatives of the Joint Chiefs of Staff and the Director of the Non-proliferation Center of the Central Intelligence Agency are non-voting members. The Department of Commerce representative, appointed by the Secretary, is the Chair of the OC and serves as the Executive Secretary of the Advisory Committee on Export Policy. The OC may invite representatives of other Government agencies or departments (other than those identified in this definition) to participate in the activities of the OC when matters of interest to such agencies or departments are under consideration.

“Optical amplification.” (Cat 5)—In optical communications, an amplification technique that introduces a gain of optical signals that have been generated by a separate optical source, without conversion to electrical signals, i.e., using semiconductor optical amplifiers, optical fiber luminescent amplifiers.

“Optical computer.” (Cat 4)—A computer designed or modified to use light to represent data and whose computational logic elements are based on directly coupled optical devices.

“Optical fiber preforms.” (Cat 5 and 6)—Bars, ingots, or rods of glass, plastic or other materials that have been specially processed for use in fabricating optical fibers. The characteristics of the preform determine the basic parameters of the resultant drawn optical fibers.

“Optical integrated circuit.” (Cat 3)—A “monolithic integrated circuit” or a “hybrid integrated circuit”, containing one or more parts designed to function as photosensor or photoemitter or to perform (an) optical or (an) electro-optical function(s).

“Optical switching.” (Cat 5)—The routing of or switching of signals in optical form without conversion to electrical signals.

“Overall current density.” (Cat 3)—The total number of amperes-turns in the coil (i.e., the sum of the number of turns multiplied by the maximum current carried by each turn) divided by
the total cross-section of the coil (comprising the superconducting filaments, the metallic matrix in which the superconducting filaments are embedded, the encapsulating material, any cooling channels, etc.).

"PABX." (Cat. 5)—(See "Private automatic branch exchange").

"Part program." (Cat. 2)—An ordered set of instructions that is in a language and in a format required to cause operations to be effected under automatic control and that is either written in the form of a machine program on an input medium or prepared as input data for processing in a computer to obtain a machine program (Ref. ISO 2806-1980).

"Peak power." (Cat. 6)—Energy per pulse in Joule divided by the pulse duration in seconds.

Person. A natural person, including a citizen or national of the United States or of any foreign country; any firm; any government, government agency, government department, or government commission; any labor union; any fraternal or social organization; and any other association or organization whether or not organized for profit. This definition does not apply to part 760 of the EAR (Restrictive Trade Practices or Boycotts).

"Personalized smart card." (Cat. 5)—A smart card containing a microcircuit, in accordance with ISO/IEC 7816, that has been programmed by the issuer and cannot be changed by the user.

Port of export. The port where the cargo to be shipped abroad is laden aboard the exporting carrier. It includes, in the case of an export by mail, the place of mailing.

"Positioning accuracy." (Cat. 2)—The positioning accuracy of "numerically controlled" machine tools is to be determined and presented in accordance with ISO/DIS 230, paragraph 2.13, in conjunction with the following requirements:

(a) Test conditions:
(1) For 12 hours before and during measurements, the machine tool and accuracy measuring equipment will be kept at the same ambient temperature. During the pre-measurement time the slides of the machine will be continuously cycled in the same manner that the accuracy measurements will be taken;
(2) The machine shall be equipped with any mechanical, electronic, or software compensation to be exported with the machine;
(3) Accuracy of measuring equipment for the measurements shall be at least four times more accurate than the expected machine tool accuracy;
(4) Power supply for slide drives shall be as follows:
   (i) Line voltage variation shall exceed ±10% of nominal rated voltage;
   (ii) Frequency variation shall not exceed ±2 Hz of normal frequency;
   (iii) Lineouts or interrupted service are not permitted.

(b) Test programs:
(1) Feed rate (velocity of slides) during measurement shall be the rapid traverse rate;
   NOTE: In case of machine tools that generate optical quality surfaces, the feedrate shall be equal to or less than 50 mm per minute.
(2) Measurements shall be made in an incremental manner from one limit of the axis travel to the other without returning to the starting position for each move to the target position;
(3) Axes not being measured shall be retained at mid travel during the test of an axis.

(c) Presentation of test results: The results of the measurement must include:
   (1) Position accuracy (A); and
   (2) The mean reversal error (B).

"Power management." (Cat. 7)—Changing the transmitted power of the altimeter signal so that received power at the “aircraft” altitude is always at the minimum necessary to determine the altitude.

"Principal element." (Cat. 4)—An element is a “principal element” when its replacement value is more than 35% of the total value of the system of which it is an element. Element value is the price paid for the element by the manufacturer of the system, or by the system integrator. Total value is the normal international selling price to unrelated parties at the point of manufacture or consolidation of shipment.

"Private automatic branch exchange." (PABX) (Cat. 5)—An automatic telephone exchange, typically incorporating a position for an attendant,
designed to provide access to the public network and serving extensions in an institution such as a business, government, public service or similar organization.

"Production." (General Technology Note) (Cat. 1 and 7)—Means all production stages, such as: product engineering, manufacture, integration, assembly (mounting), inspection, testing, quality assurance.

"Production equipment." (MTCR context)—Tooling, templates, jigs, mandrels, moulds, dies, fixtures, alignment mechanisms, test equipment, other machinery and components thereof, limited to those specially designed or modified for "development" or for one or more phases of "production".

"Production." (General Technology Note)—Means all production stages, such as: product engineering, manufacture, integration, assembly (mounting), inspection, testing, quality assurance.

Production facility. As defined by 10 CFR 110.2 of the Nuclear Regulatory Commission Regulations, production facility means any nuclear reactor or plant specially designed or used to produce special nuclear material through the irradiation of source material or special nuclear material, the separation of isotopes or the chemical reprocessing or irradiated source or special nuclear material.

"Program." (Cat 2, 4, and 5)—A sequence of instructions to carry out a process in, or convertible into, a form executable by an electronic computer.

"Proof test." (Cat 5)—On-line or off-line production screen testing that dynamically applies a prescribed tensile stress over a 0.5 to 3 m length of fiber at a running rate of 2 to 5 m/s while passing between capstans approximately 150 mm in diameter. The ambient temperature is a nominal 293 K (20 °C) and relative humidity 40%.

Note: Equivalent national standards for executing the "proof test" may be used.

Readable or readability. Readable and readability mean the quality of a group of letters or numerals being recognized as complete words or numbers.

Real-time bandwidth." (Cat 3)—For "dynamic signal analyzers", the widest frequency range that the analyzer can output to display or mass storage without causing any discontinuity in the analysis of the input data. For analyzers with more than one channel, the channel configuration yielding the widest "real-time bandwidth" shall be used to make the calculation.

Real-time Processing." (Cat 2 and 4)—The processing of data by a computer system providing a required level of...
Bureau of Export Administration, Commerce  
Pt. 772

service, as a function of available resources, within a guaranteed response time, regardless of the load of the system, when stimulated by an external event.

Reasons for Control. Reasons for Control are: Anti-Terrorism (AT), Chemical & Biological Weapons (CB), Crime Control (CC), High Performance Computer (XP), Missile Technology (MT), National Security (NS), Nuclear Nonproliferation (NP), Regional Stability (RS), Short Supply (SS), and United Nations sanctions (UN). Items controlled within a particular ECCN may be controlled for more than one reason.

Recoverable commodities and software. As applied to encryption items, means any of the following:

(a) A stored data product containing a recovery feature that, when activated, allows recovery of the plaintext of encrypted data without the assistance of the end-user; or

(b) A product or system designed such that a network administrator or other authorized persons who are removed from the end-user can provide law enforcement access to plaintext without the knowledge or assistance of the end-user. This includes, for example, products or systems where plaintext exists and is accessible at intermediate points in a network or infrastructure system, enterprise-controlled recovery systems, and products which permit recovery of plaintext at the server where a system administrator controls or can provide recovery of plaintext across an enterprise.

NOTE TO THIS DEFINITION: "Plaintext" indicates that data that is initially received by or presented to the recoverable product before encryption takes place.

Reexpor. "Reexport" means an actual shipment or transmission of items subject to the EAR from one foreign country to another foreign country.

For purposes of the EAR, the export or reexport of items subject to the EAR that will transit through a country or countries, or be transshipped in a country or countries to a new country, or are intended for reexport to the new country, are deemed to be exports to the new country. (See §734.2(b) of the EAR.) In addition, for purposes of satellites controlled by the Department of Commerce, the term "reexport" also includes the transfer of registration of a satellite or operational control over a satellite from a party resident in one country to a party resident in another country.

Replacement license. An authorization by the Bureau of Export Administration revising the information, conditions, or riders stated on a license issued by BXA. See §750.7 of the EAR.

"Required". As applied to "technology" or "software", refers to only that portion of "technology" or "software" which is peculiarly responsible for achieving or extending the controlled performance levels, characteristics or functions. Such "required" "technology" or "software" may be shared by different products. For example, assume product "X" is controlled if it operates at or above 400 MHz and is not controlled if it operates below 400 MHz. If production technologies "A", "B", and "C" allow production at no more than 399 MHz, then technologies "A", "B", and "C" are not "required" to produce the controlled product "X". If technologies "A", "B", "C", "D", and "E" are used together, a manufacturer can produce product "X" that does not operate at or above 400 MHz. In this example, technologies "D" and "E" are "required" to make the controlled product and are themselves controlled under the General Technology Note. (See the General Technology Note.)

"Resolution." (Cat 2)—The least increment of a measuring device; on digital instruments, the least significant bit (Ref.: ANSI B-89.1.12).

Return Without Action (RWA). An application may be RWA'd for one of the following reasons:

(a) The applicant has requested the application be returned;

(b) A License Exception applies;

(c) The items are not under Department of Commerce jurisdiction;

(d) Required documentation has not been submitted with the application; or

(e) The applicant cannot be reached after several attempts to request additional information necessary for processing of the application.

"Robot." (Cat 2 and 8)—A manipulation mechanism, which may be of the continuous path or of the point-to-
point variety, may use "sensors", and has all the following characteristics:
(a) Is multifunctional;
(b) Is capable of positioning or orienting material, parts, tools or special devices through variable movements in a three dimensional space;
(c) Incorporates three or more closed or open loop servo-devices that may include stepping motors; and
(d) Has "user-accessible programmability" by means of teach/playback method or by means of an electronic computer that may be a programmable logic controller, i.e., without mechanical intervention.

NOTE: This definition does not include the following devices:
(a) Manipulation mechanisms that are only manually/teleoperator controllable;
(b) Fixed sequence manipulation mechanisms that are automated moving devices, operating according to mechanically fixed programmed motions. The program is mechanically limited by fixed stops, such as pins or cams. The sequence of motions and the selection of paths or angles are variable or changeable by mechanical, electronic or electrical means;
(c) Mechanically controlled variable sequence manipulation mechanisms that are automated moving devices, operating according to mechanically fixed programmed motions. The program is mechanically limited by fixed, but adjustable stops, such as pins or cams. The sequence of motions and the selection of paths or angles are variable within the fixed program pattern. Variations or modifications of the program pattern (e.g., changes of pins or exchanges of cams) in one or more motion axes are accomplished only through mechanical operations;
(d) Non-servo-controlled variable sequence manipulation mechanisms that are automated moving devices, operating according to mechanically fixed programmed motions. The program is variable, but the sequence proceeds only by the binary signal from mechanically fixed electrical binary devices or adjustable stops;
(e) Stacker cranes defined as Cartesian coordinate manipulator systems manufactured as an integral part of a vertical array of storage bins and designed to access the contents of those bins for storage or retrieval.

"Rotary Atomization." (Cat 1)—A process to reduce a stream or pool of molten metal to droplets to a diameter of 500 micrometer or less by centrifugal force.

"Run-out." (out-of-true running) (Cat 2)—Radial displacement in one revolution of the main spindle measured in a plane perpendicular to the spindle axis at a point on the external or internal revolving surface to be tested (Ref.: ISO 230 Part 1-1986, paragraph 5.61.

"SDH."—See “synchronous digital hierarchy” Sensors (Cat. 6)—Detectors of a physical phenomenon, the output of which (after conversion into a signal that can be interpreted by a controller) is able to generate "programs" or modify programmed instructions or numerical program data. This includes "sensors" with machine vision, infrared imaging, acoustical imaging, tactile feel, inertial position measuring, optical or acoustic ranging or force or torque measuring capabilities.

SNEC. See Subgroup on Nuclear Export Coordination.

"SONET."—See "synchronous optical network".

"Scale factor." (gyro or accelerometer) (Cat 7)—The ratio of change in output to a change in the input intended to be measured. Scale factor is generally evaluated as the slope of the straight line that can be fitted by the method of least squares to input-output data obtained by varying the input cyclically over the input range.

Schedule B numbers. The commodity numbers appearing in the current edition of the Bureau of the Census publication, Schedule B Statistical Classification of Domestic and Foreign Commodities Exported from the United States. (See part 758 of the EAR for information on use of Schedule B numbers.)

"Settling time." (Cat 3)—The time required for the output to come within one-half bit of the final value when switching between any two levels of the converter.

Shield. Chaired by the Department of State, the Shield primarily reviews applications involving items controlled for Chemical and Biological Weapons (CBW) reasons. The Shield also reviews applications involving items not controlled for CBW reasons, but destined for a country and/or end-user of concern. See §750.4 of the EAR.

"Signal analyzers." (Cat 3)—Apparatus capable of measuring and displaying basic properties of the single-frequency components of multi-frequency signals.

"Signal analyzers." (dynamic) (Cat 3)—(See “Dynamic signal analyzers”.)
Signal processing.” (Cat 3, 4 and 5)—The processing of externally derived information-bearing signals by algorithms such as time compression, filtering, extraction, selection, correlation, convolution or transformations between domains (e.g., fast Fourier transform or Walsh transform).

“Simple educational devices.” (Cat 3)—Devices designed for use in teaching basic scientific principles and demonstrating the operation of those principles in educational institutions.

Single shipment: All items moving at the same time from one exporter to one consignee or intermediate consignee on the same exporting carrier, even if these items will be forwarded to one or more ultimate consignees. Items being transported in this manner shall be treated as a single shipment even if the items represent more than one order or are in separate containers.

“Software.” (Cat: all)—A collection of one or more ‘‘programs’’ or ‘‘microprograms’’ fixed in any tangible medium of expression.

“Source code.” (or source language) (Cat 4)—A convenient expression of one or more processes that may be turned by a programming system into equipment executable form (‘‘object code’’ or ‘‘object language’’).

“Spacecraft.” (Cat 7 and 9)—Active and passive satellites and space probes.

“Space qualified.” (Cat 3 and 6)—Products designed, manufactured and tested to meet the special electrical, mechanical or environmental requirements for use in the launch and deployment of satellites or high-altitude flight systems operating at altitudes of 100 km or higher.

Specially Designated National (SDN). Any person who is determined by the Secretary of the Treasury to be a specially designated national for any reason under regulations issued by the Office of Foreign Assets Control (see 31 CFR parts 500 through 590).

Specially Designated Terrorist (SDT). Any person who is determined by the Secretary of the Treasury to be a specially designated terrorist under notices or regulations issued by the Office of Foreign Assets Control (see 31 CFR chapter V).

“Specially designed.” (MTCR context)—Equipment, parts, components or “software” that, as a result of “development”, have unique properties that distinguish them for certain predetermined purposes. For example, a piece of equipment that is “specially designed” for use in a “missile” will only be considered so if it has no other function or use. Similarly, a piece of manufacturing equipment that is “specially designed” to produce a certain type of component will only be considered such if it is not capable of producing other types of components.

“Specific modulus.” (Cat 1)—Young’s modulus in pascals, equivalent to N/m² divided by specific weight in N/m³, measured at a temperature of (296 ± 2) K ((23 ± 2) °C) and a relative humidity of (50 ± 5)%.

“Specific tensile strength.” (Cat 1)—Ultimate tensile strength in pascals, equivalent to N/m² divided by specific weight in N/m³, measured at a temperature of (296 ± 2) K ((23 ± 2) °C) and relative humidity of (50 ± 5)%.

“Spectral efficiency.” (Cat 5)—A figure of merit parametrized to characterize the efficiency of transmission system that uses complex modulation schemes such as QAM (quadrature amplitude modulation), Trellis coding, QSPK (Q-phased shift key), etc. It is defined as follows:

\[
\text{Spectral efficiency} = \frac{''\text{Digital transfer rate}'' \ (\text{bits/second})}{6\ \text{dB spectrum bandwidth (Hz)}}.
\]

“Splat Quenching.” (Cat 1)—A process to “solidify rapidly” a molten metal stream impinging upon a chilled block, forming a flake-like product.

NOTE: “Solidify rapidly”: solidification of molten material at cooling rates exceeding 1,000 K/sec.

“Spread spectrum.” (Cat 5)—The technique whereby energy in a relatively
narrow-band communication channel is spread over a much wider energy spectrum.

“Spread spectrum radar.” (Cat 6)—(see “Radar spread spectrum”)

“Sputtering.” (Cat 4)—An overlay coating process wherein positively charged ions are accelerated by an electric field towards the surface of a target (coating material). The kinetic energy of the impacting ions is sufficient to cause target surface atoms to be released and deposited on the substrate.

NOTE: Triode, magnetron or radio frequency sputtering to increase adhesion of coating and rate of deposition are ordinary modifications of the process.

“Stability.” (Cat 7)—Standard deviation (1 sigma) of the variation of a particular parameter from its calibrated value measured under stable temperature conditions. This can be expressed as a function of time.

“Stored program controlled.” (Cat 2, 3, and 5)—A control using instructions stored in an electronic storage that a processor can execute in order to direct the performance of predetermined functions.

NOTE: Equipment may be “stored program controlled” whether the electronic storage is internal or external to the equipment.

Strategic partner (of a U.S. company). As applied to encryption items, means a foreign-based entity that:
(a) Has a business need to share the proprietary information with one or more U.S. companies; and
(b) Is contractually bound to the U.S. company (e.g., has an established pattern of continuing or recurring contractual relations).

Subgroup on Nuclear Export Coordination (SNEC). Chaired by the Department of State, the SNEC primarily reviews applications involving items controlled for nuclear nonproliferation (NP) reasons. The SNEC also reviews applications involving items not controlled for NP reasons, but destined for a country and/or end-user of NP concern.

Subject to the EAR. A term used in the EAR to describe those commodities, software, technology, and activities over which the Bureau of Export Administration (BXA) exercises regulatory jurisdiction under the EAR (See §734.2(a) of the EAR).

“Substrate.” (Cat 3)—A sheet of base material with or without an interconnection pattern and on which or within which “discrete components” or integrated circuits or both can be located.

NOTE: “Discrete component”: a separately packaged “circuit element” with its own external connections.

“Substrate blanks.” (Cat 6)—Monolithic compounds with dimensions suitable for the production of optical elements such as mirrors or optical windows.

“Superalloys.” (Cat 2 and 9)—Nickel-, cobalt-, or iron-base alloys having strengths superior to any alloys in the AISI 300 series at temperatures over 922 K (694 degrees C) under severe environmental and operating conditions.

“Superconductive.” (Cat 1, 3, 6, and 8)—Materials, i.e., metals, alloys, or compounds that can lose all electrical resistance, i.e., that can attain infinite electrical conductivity and carry very large electrical currents without Joule heating.

NOTE: The “superconductive” state of a material is individually characterized by a “critical temperature”, a critical magnetic field that is a function of temperature, and a critical current density that is a function of both magnetic field and temperature

“Super High Power Laser.” (SHPL) (Cat 6)—A “laser” capable of delivering (the total or any portion of) the output energy exceeding 1 kJ within 50 ms or having an average or CW power exceeding 20 kW.

“Superplastic forming.” (Cat 1 and 2)—A deformation process using heat for metals that are normally characterized by low elongation (less than 20%) at the breaking point as determined at room temperature by conventional tensile strength testing, in order to achieve elongations during processing that are at least 2 times those values.

“Swept frequency network analyzers.” (Cat 3)—Involve the automatic measurement of equivalent circuit parameters over a range of frequencies, involving swept frequency measurement techniques, but not continuous wave point-to-point measurements.

“Switch fabric.” (Cat 5)—That hardware and associated “software” that
provides the physical or virtual connection path for in-transit message traffic being switched.

"Synchronous digital hierarchy." (SDH) (Cat 5)—A digital hierarchy providing a means to manage, multiplex, and access various forms of digital traffic using a synchronous transmission format on different types of media. The format is based on the Synchronous Transport Module (STM) that is defined by CCITT Recommendation G.705, G.707, G.708, G.709 and others yet to be published. The first level rate of "SDH" is 155.52 Mbits/s.

"Synchronous optical network." (SONET) (Cat 5)—A network providing a means to manage, multiplex and access various forms of digital traffic using a synchronous transmission format on fiber optics. The format is the North America version of "SDH" and also uses the Synchronous Transport Module (STM). However, it uses the Synchronous Transport Signal (STS) as the basic transport module with a first level rate of 51.81 Mbits/s. The SONET standards are being integrated into those of "SDH".

"Systems tracks." (Cat 6)—Processed, correlated (fusion of radar target data to flight plan position) and updated aircraft flight position report available to the Air Traffic Control center controllers.

"Systolic array computer." (Cat 4)—A computer where the flow and modification of the data is dynamically controllable at the logic gate level by the user.

"Technology." (General Technology Note)—Specific information necessary for the "development", "production", or "use" of a product. The information takes the form of "technical data" or "technical assistance". Controlled "technology" is defined in the General Technology Note and in the Commerce Control List (Supplement No. 1 to part 774 of the EAR).

N.B.: Technical assistance—May take forms such as instruction, skills training, working knowledge, consulting services. Note: "Technical assistance" may involve transfer of "technical data".

"Technical data."—May take forms such as blueprints, plans, diagrams, models, formulae, tables, engineering designs and specifications, manuals and instructions written or recorded on other media or devices such as disk, tape, read-only memories.

"Telecommunication transmission equipment." (Cat 5)—
(a) Categorized as follows, or combinations thereof:
1. Radio equipment (e.g., transmitters, receivers and transceivers);
2. Line terminating equipment;
3. Intermediate amplifier equipment;
4. Repeater equipment;
5. Regenerator equipment;
6. Translation encoders (transcoders);
7. Multiplex equipment (statistical multiplex included);
8. Modulators/demodulators (modems);
9. Transmultiplex equipment (see CCITT Rec. G.701);
10. "Stored program controlled" digital crossconnection equipment;
11. "Gateways" and bridges;
12. "Media" access units; and
(b) Designed for use in single or multi-channel communication via:
1. Wire (line);
2. Coaxial cable;
3. Optical fiber cable;

"Terminal interface equipment." (Cat 4)—Equipment at which information enters or leaves the telecommunication systems, e.g., telephone, data device, computer, facsimile device.

"Three dimensional Vector Rate." (Cat 4)—The number of vectors generated per second that have 10 pixel poly line vectors, clip tested, randomly oriented, with either integer or floating point X-Y-Z coordinate values (whichever produces the maximum rate).

"Tilting spindle." (Cat 2)—A tool-handling spindle that alters, during the machining process, the angular position of its center line with respect to any other axis.

"Time constant." (Cat 6)—The time taken from the application of a light stimulus for the current increment to reach a value of 1-1/e times the final value (i.e., 63% of the final value).

"Total digital transfer rate." (Cat 5)—The number of bits, including line coding, overhead and so forth per unit time passing between corresponding equipment in a digital transmission
system. (See also “digital transfer rate”.)

Transfer. A transfer to any person of items subject to the EAR either within the United States or outside of the United States with the knowledge or intent that the items will be shipped, transferred, or transmitted to an unauthorized recipient.

“Transfer laser.” (Cat 6)—A “laser” in which the lasting species is excited through the transfer of energy by collision of a non-lasing atom or molecule with a lasing atom or molecule species.

“Tunable.” (Cat 6)—The ability of a “laser” to produce a continuous output at all wavelengths over a range of several “laser” transitions. A line selectable “laser” produces discrete wavelengths within one “laser” transition and is not considered “tunable”.

“Two dimensional Vector Rate.” (Cat 4)—The number vectors generated per second that have 10 pixel polyline vectors, clip tested, randomly oriented, with either integer or floating point X-Y coordinate values (whichever produces the maximum rate).

U.S. exporter. That person who, as the principal party in interest in the export transaction, has the power and responsibility for determining and controlling the sending of the items out of the United States. (See also “applicant”.)

U.S. person. (a) For purposes of §§ 744.6, 744.10, and 744.11 of the EAR, the term U.S. person includes:

(1) Any individual who is a citizen of the United States, a permanent resident alien of the United States, or a protected individual as defined by 8 U.S.C. 1324b(a)(3);

(2) Any juridical person organized under the laws of the United States or any jurisdiction within the United States, including foreign branches; and

(3) Any person in the United States.

(b) See also §§ 740.9 and 740.14, and parts 746 and 760 of the EAR for definitions of “U.S. person” that are specific to those parts.

U.S. subsidiary. As applied to encryption items, means

(a) A foreign branch of a U.S. company; or

(b) A foreign subsidiary or entity of a U.S. entity in which:

(1) The U.S. entity beneficially owns or controls (whether directly or indirectly) 25 percent or more of the voting securities of the foreign subsidiary or entity, if no other persons owns or controls (whether directly or indirectly) an equal or larger percentage; or

(2) The foreign entity is operated by the U.S. entity pursuant to the provisions of an exclusive management contract; or

(3) A majority of the members of the board of directors of the foreign subsidiary or entity also are members of the comparable governing body of the U.S. entity; or

(4) The U.S. entity has the authority to appoint the majority of the members of the board of directors of the foreign subsidiary or entity; or

(5) The U.S. entity has the authority to appoint the chief operating officer of the foreign subsidiary or entity.

Ultimate consignee. The person located abroad who is the true party in interest in actually receiving the export or re-export for the designated end-use. (See § 748.5(e) of the EAR.)

United States. Unless otherwise stated, the 50 States, including offshore areas within their jurisdiction pursuant to section 3 of the Submerged Lands Act (43 U.S.C. 1331), the District of Columbia, Puerto Rico, and all territories, dependencies, and possessions of the United States, including foreign trade zones established pursuant to 19 U.S.C. 81A-81U, and also including the outer continental shelf, as defined in section 2(a) of the Outer Continental Shelf Lands Act (43 U.S.C. 1331(a)).

United States airline. Any citizen of the United States who is authorized by the U.S. Government to engage in business as an airline. For purposes of this definition, a U.S. citizen is:

(a) An individual who is a citizen of the United States or one of its possessions; or

(b) A partnership of which each member is such an individual; or

(c) A corporation or association created or organized under the laws of the United States, or of any State, Territory, or possession of the United States, of which the president and two-thirds of the board of directors and other managing officers thereof are such individuals and in which at least
Bureau of Export Administration, Commerce

§ 774.1 Introduction.

In this part, references to the EAR are references to 15 CFR chapter VII, subchapter C. The Bureau of Export Administration (BXA) maintains the Commerce Control List (CCL) that includes items (commodities, software, and technology) subject to the authority of BXA. The CCL does not include those items exclusively controlled for export by another department or agency of the U.S. Government. In instances where other agencies administer controls over related items, entries in the CCL will contain a reference to these controls. Those items subject to the EAR but not specified on

75 percent of the voting interest is owned or controlled by persons who are citizens of the United States or of one of its possessions.

"Usable in or Capable of." (MTCR context)—Equipment, parts, components or "software" that are suitable for a particular purpose. There is no need for the equipment, parts, components or "software" to have been configured, modified or specified for the particular purpose. For example, any military specification memory circuit would be "capable of" operation in a guidance system.

"Use." (General Technology Note)—Operation, installation (including on-site installation), maintenance (checking), repair, overhaul and refurbishing.

"User-accessible programmability." (Cat 4, 5, and 6)—The facility allowing a user to insert, modify, or replace "programs" by means other than:

(a) A physical change in wiring or interconnections; or

(b) The setting of function controls including entry of parameters.

Utilization facility. (a) As defined by 10 CFR 110.2 of the Nuclear Regulatory Commission Regulations, utilization facility means a nuclear reactor, other than one that is a production facility, any of the following major components of a nuclear reactor: Pressure vessels designed to contain the core of a nuclear reactor, other than one that is a production facility, and the following major components of a nuclear reactor:

(1) Primary coolant pumps;

(2) Fuel charging or discharging machines; and

(3) Control rods.

(b) Utilization facility does not include the steam turbine generator portion of a nuclear power plant.

"Vacuum Atomization." (Cat 1)—A process to reduce a molten stream of metal to droplets of a diameter of 500 micrometer or less by the rapid evolution of a dissolved gas upon exposure to a vacuum.

"Variable geometry airfoils." (Cat 7)—Use trailing edge flaps or tabs, or leading edge slats or pivoted nose droop, the position of which can be controlled in flight.

"Vector Rate." (Cat 4)—See: "Two dimensional Vector Rate"; "Three dimensional Vector Rate".

You. Any person, including a natural person, including a citizen of the United States or any foreign country; any firm; any government, government agency, government department, or government commission; any labor union; any fraternal or social organization; and any other association or organization whether or not organized for profit.

PART 774—THE COMMERCE CONTROL LIST

Sec. 774.1 Introduction. 774.2 [Reserved]

SUPPLEMENT NO. 1 TO PART 774—THE COMMERCE CONTROL LIST

SUPPLEMENT NO. 2 TO PART 774—GENERAL TECHNOLOGY AND SOFTWARE NOTES

SUPPLEMENT NO. 3 TO PART 774—CROSS-REFERENCE LIST

SOURCE: 61 FR 12937, Mar. 25, 1996, unless otherwise noted.

§ 774.1 Introduction.

In this part, references to the EAR are references to 15 CFR chapter VII, subchapter C. The Bureau of Export Administration (BXA) maintains the Commerce Control List (CCL) that includes items (commodities, software, and technology) subject to the authority of BXA. The CCL does not include those items exclusively controlled for export by another department or agency of the U.S. Government. In instances where other agencies administer controls over related items, entries in the CCL will contain a reference to these controls. Those items subject to the EAR but not specified on
§ 774.2

The CCL are identified by the designator “EAR99.” See §734.2(a) of the EAR for items that are “subject to the EAR”. You should consult part 738 of the EAR for an explanation of the organization of the CCL and its relationship to the Country Chart.

The CCL is contained in Supplement No. 1 to this part, and Supplement No. 2 to this part contains the General Technology and Software Notes relevant to entries contained in the CCL.

§ 774.2 [Reserved]

Supplement No. 1 to Part 774—The Commerce Control List

Category 0—Nuclear Materials, Facilities, and Equipment [And Miscellaneous Items]

A. Systems, Equipment and Components

0A001 “Nuclear reactors”, i.e., reactors capable of operation so as to maintain a controlled, self-sustaining fission chain reaction, and equipment and components specially designed or prepared for use in connection with a “nuclear reactor”, including (see List of Items Controlled).

License Requirements

Reason for Control: Control(s): Items described in 0A001 are subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110)

License Exceptions

LVS: N/A
GBS: N/A
CIV: N/A

List of Items Controlled

Unit: N/A.

Related Controls: N/A

Related Definitions: N/A

Items:

a. Pressure vessels, i.e. metal vessels as complete units or X parts therefor, which are specially designed or prepared to contain the core of a “nuclear reactor” and are capable of withstanding the operating pressure of the primary coolant, including the top plate for a reactor pressure vessel;

b. Fuel element handling equipment, including reactor fuel charging and discharging machines;

c. Control rods specially designed or prepared for the control of the reaction rate in a “nuclear reactor”, including the neutron absorbing part and the support or suspension structures therefore, and control rod guide tubes;

d. Electronic controls for controlling the power levels in “nuclear reactors”, including reactor control rod drive mechanisms and radiation detection and measuring instruments to determine neutron flux levels;

e. Pressure tubes specially designed or prepared to contain fuel elements and the primary coolant in a “nuclear reactor” at an operating pressure in excess of 5.1 MPa;

f. Tubes or assemblies of tubes, made from zirconium metal or alloy in which the ratio of hafnium to zirconium is less than 1:500 parts by weight, specially designed or prepared for use in a “nuclear reactor”;

g. Coolant pumps specially designed or prepared for circulating the primary coolant of “nuclear reactors”;

h. Internal components specially designed or prepared for the operation of a “nuclear reactor”, including core support structures, thermal shields, baffles, core grid plates and diffuser plates;

i. Heat exchangers.

0A002 Power generating or propulsion equipment specially designed for use with space, marine or mobile “nuclear reactors”. (These items are subject to the export licensing authority of the U.S. Department of State, Office of Defense Trade Controls. See 22 CFR part 121.)

0A018 Items on the International Munitions List.

List of Items Controlled

Unit: 0A018.a, .b, .c in $ value; 0A018.d, .e, and .f in number.

Related Controls: N/A

Related Definitions: N/A

Items:

a. Power controlled searchlights and control units therefor, designed for military use, and equipment mounting such units; and specially designed parts and accessories thereof;

b. Construction equipment built to military specifications, specially designed for
airborne transport; and specially designed parts and accessories therefor;

b. Specially designed components and parts for ammunition, except cartridge cases, powder bags, bullets, jackets, cores, shells, projectiles, boosters, fuses and components, primers, and other detonating devices and ammunition belting and linking machines (all of which are subject to the export licensing authority of the U.S. Department of State, Office of Defense Trade Controls. (See 22 CFR parts 120 through 130.)

c. Specially designed components and parts for ammunition, except cartridge cases, powder bags, bullets, jackets, cores, shells, projectiles, boosters, fuses and components, primers, and other detonating devices and ammunition belting and linking machines (all of which are subject to the export licensing authority of the U.S. Department of State, Office of Defense Trade Controls. (See 22 CFR parts 120 through 130.)

d. Bayonets;

e. Muzzle-loading (black powder) firearms;

NOTE: Antique small arms dating prior to 1890 and their reproductions are not controlled by this ECCN 0A018.

f. Military helmets, except:

f.1. Conventional steel helmets other than those described by 0A018.f.2 of this entry.

f.2. Helmets, made of any material, equipped with communications hardware, optional sights, slewing devices or mechanisms to protect against thermal flash or lasers.

NOTE: Helmets described in 0A018.f.1 are controlled by 0A988. Helmets described in 0A018.f.2 are controlled by the U.S. Department of State, Office of Defense Trade Controls (See 22 CFR part 121, Category X).

0A980 Horses by sea.

LICENSE REQUIREMENTS
Reason for Control: SS
Control(s): SS applies to entire entry. For licensing requirements (and possible License Exceptions) proceed directly to part 754 of the EAR. The Commerce Country Chart is not designed to determine licensing requirements for items controlled for SS reasons.

LIST OF ITEMS CONTROLLED
Unit: N/A
Related Controls: N/A
Related Definitions: N/A
Items: a. Plant specially designed for separating isotopes of “natural uranium” and “depleted uranium”, “special fissile materials” and “other fissile materials”, as follows:
   a.1. Gaseous diffusion separation plant;
   a.2. Gas centrifuge separation plant;
   a.3. Aerodynamic separation plant;
   a.4. Chemical exchange separation plant;
   a.5. Ion-exchange separation plant;
   a.6. Atomic vapor “laser” isotopic separation plant;
   a.7. Molecular “laser” isotopic separation plant;
   a.8. Plasma separation plant;
   a.9. Electro magnetic separation plant;
   b. Equipment and components, specially designed or prepared for gaseous diffusion separation process, as follows:
   b.1. Bellow valves made of or protected by materials resistant to UF₆ (e.g., aluminum, aluminum alloys, nickel or alloy containing 60 weight percent or more nickel), with a diameter of 40 mm to 1200 mm;
   b.2a. Compressors (positive displacement, centrifugal and axial flow types) or gas blowers with a suction volume capacity of 1 m³/min or more of UF₆, and discharge pressure up to 666.7 kPa, made of or protected by materials resistant to UF₆ (e.g., aluminum, aluminum alloys, nickel or alloy containing 60 weight percent or more nickel);
   b.2b. Rotary shaft seals for compressors or blowers specified in 0B001b.2a. and designed for a buffer gas in-leakage rate of less than 1,000 cm³/min;
   b.3. Gaseous diffusion barriers made of porous metallic, polymer or ceramic materials resistant to corrosion by UF₆ with a pore size of 0.1 to 100 nm, a thickness of 5 mm or less, and, for tubular forms, a diameter of 25 mm or less;
   b.4. Gaseous diffuser housing made of or protected by materials resistant to corrosion by UF₆;
   b.5. Heat exchangers made of aluminum, copper, nickel, or alloys containing more than 60 weight percent nickel, or combinations of these metals as clad tubes, designed to operate at sub-atmospheric pressure with a leak rate that limits the pressure rise to less than 10 Pa per hour under a pressure differential of 100 kPa;
   c. Equipment and components, specially designed or prepared for gas centrifuge separation process, as follows:
   c.1. Gas centrifuges;
   c.2. Complete rotor assemblies consisting of one or more rotor tube cylinders;
   c.3. Rotor tube cylinders with a thickness of 12 mm or less, a diameter of between 75 mm and 400 mm, made from any of the following high strength-to-density ratio materials:
      c.3a. Maraging steel capable of an ultimate tensile strength of 2,050 MPa or more;
      c.3b. Aluminum alloys capable of an ultimate tensile strength of 460 MPa or more;
      c.3c. “Fibrous or filamentary materials” with a “specific modulus” of more than 3.18 × 10⁸ m²/nm² greater than 76.2 × 10³ m²/nm²;
   c.4. Magnetic suspension bearings consisting of an annular magnet suspended within a housing made of UF₆ resistant materials (e.g. aluminum, aluminum alloys, nickel or alloy containing 60 weight percent or more nickel) containing a damping medium and having the magnet coupling with a pole piece or second magnet fitted to the top cap of the rotor;
   c.5. Specially prepared bearings comprising a pivot-cup assembly mounted on a damper;
   c.6. Rings or bellows with a wall thickness of 3 mm or less and a diameter of between 75 mm and 400 mm and designed to give local support to a rotor tube or to join a number together, made from any of the following high strength-to-density ratio materials:
      c.6a. Maraging steel capable of an ultimate tensile strength of 2,050 MPa or more;
      c.6b. Aluminum alloys capable of an ultimate tensile strength of 460 MPa or more;
      c.6c. “Fibrous or filamentary materials” with a “specific modulus” of more than 3.18 × 10⁸ m²/nm² and a “specific tensile strength” greater than 76.2 × 10³ m²/nm²;
   c.7. Baffles of between 75 mm and 400 mm diameter for mounting inside a rotor tube, made from any of the following high strength-to-density ratio materials:
      c.7a. Maraging steel capable of an ultimate tensile strength of 2,050 MPa or more;
c.7.b. Aluminum alloys capable of an ultimate tensile strength of 460 MPa or more; or
c.7.c. "Fibrous or filamentary materials" with a "specific modulus" of more than 3.18 x 10^6 m and a "specific tensile strength" greater than 76.2 x 10^6 m.
c.8. Top and bottom caps of between 75 mm and 400 mm diameter to fit the ends of a rotor tube, made from any of the following high strength-to-density ratio materials:
c.8.a. Maraging steel capable of an ultimate tensile strength of 2050 MPa or more; or

c.8.b. Aluminum alloys capable of an ultimate tensile strength of 460 MPa or more;
c.8.c. "Fibrous or filamentary materials" with a "specific modulus" of more than 3.18 x 10^6 m and a "specific tensile strength" greater than 76.2 x 10^6 m.
c.9. Molecular pumps comprised of cylinders having internally machined or extruded helical grooves and internally machined bores;
c.10. Ring-shaped motor stators for multiphase AC hysterisis (or reluctance) motors for synchronous operation within a vacuum in the frequency range of 600 to 2,000 Hz and a power range of 50 to 1,000 Volt-Amps;
c.11. Frequency changers (converters or inverters) specially designed or prepared to supply motor stators for gas centrifuge enrichment, having all of the following characteristics, and specially designed components therefor:
c.11.a. Multiphase output of 600 to 2,000 Hz;
c.11.b. Frequency control better than 0.1%;
c.11.c. Harmonic distortion of less than 2%; and

c.11.d. An efficiency greater than 80%;
c.12. Centrifuge housing/recipients to contain the rotor tube assembly of a gas centrifuge, consisting of a rigid cylinder of wall thickness up to 30 mm with precision machined ends and made of or protected by UF₆-resistant materials;
c.13. Scoops consisting of tubes of up to 12 mm internal diameter for the extraction of UF₆ gas from within a centrifuge rotor tube by a Pitot tube action, made of or protected by UF₆-resistant materials;

d. Equipment and components, specially designed or prepared for aerodynamic separation process, as follows:
d.1. Separation nozzles consisting of slit-shaped, curved channels having a radius of curvature less than 1 mm and having a knife-edge contained within the nozzle which separates the gas flowing through the nozzle into two streams;
d.2. Tangential inlet flow-driven cylindrical or conical tubes (vortex tubes), made of or protected by UF₆-resistant materials with a diameter of between 0.5 cm and 4 cm and a length to diameter ratio of 20:1 or less and with one or more tangential inlets;
d.3. Compressors (positive displacement, centrifugal and axial flow types) or gas blowers with a suction volume capacity of 2 m³/min, made of or protected by materials resistant to UF₆ (e.g., aluminum, aluminum alloys, nickel or alloy containing 60 weight percent or more nickel), and rotary shaft seals therefor;
d.4. Aerodynamic separation element housings, made of or protected by materials resistant to UF₆ to contain vortex tubes or separation nozzles;
d.5. Heat exchangers made of aluminum, copper, nickel, or alloy containing more than 60 weight percent nickel, or combinations of these metals as clad tubes, designed to operate at pressures of 600 kPa or less;
d.6. Bellows valves made of or protected by UF₆-resistant materials with a diameter of 40 to 1500 mm;
d.7. Process systems for separating UF₆ from carrier gas (hydrogen or helium) to 1 ppm UF₆ content or less, including:
d.7.a. Cryogenic heat exchangers and cryoseparators capable of temperatures of −120 °C or less;
d.7.b. Cryogenic refrigeration units capable of temperatures of −120 °C or less;
d.7.c. Separation nozzle or vortex tube units for the separation of UF₆ from carrier gas;
d.7.d. UF₆ cold traps capable of temperatures of −20 °C or less;

e. Equipment and components, specially designed or prepared for chemical exchange separation process, as follows:
e.1. Fast-exchange liquid-liquid centrifugal contactors with stage residence time of 30 seconds or less and resistant to concentrated hydrochloric acid (e.g., made of or lined with suitable plastic materials such as fluorocarbon polymers or lined with glass);
e.2. Fast-exchange liquid-liquid pulse columns with stage residence time of 30 seconds or less and resistant to concentrated hydrochloric acid (e.g., made of or lined with suitable plastic materials such as fluorocarbon polymers or lined with glass); and

e.3. Electrochemical reduction cells designed to reduce uranium from one valence state to another;
e.4. Electrochemical reduction cells feed equipment to take U⁴⁺ from the organic stream and, for those parts in contact with the process stream, made of or protected by suitable materials (e.g., glass, fluorocarbon polymers, polyethylene sulfone and resin-impregnated graphite);
e.5. Feed preparation systems for producing high purity uranium chloride solution consisting of dissolution, solvent extraction and/or ion exchange equipment for purification and electrolytic cells for reducing the uranium U⁶⁺ to U⁴⁺;
e.6. Uranium oxidation systems for oxidation of U⁴⁺ to U⁶⁺;
f. Equipment and components, specially designed or prepared for ion-exchange separation process, as follows:
f.1. Fast reacting ion-exchange resins, pellicular or porous macro-reticulated resins in which the active chemical exchange groups are limited to a coating on the surface of an inactive porous support structure, and other composite structures in any suitable form, including particles or fibers, with diameters of 0.2 mm or less, resistant to concentrated hydrochloric acid (e.g., titanium or fluorocarbon plastics) and capable of operating at temperatures in the range of 100° C to 200° C;

f.2. Ion exchange columns (cylindrical) with a diameter greater than 1000 mm, made of or protected by materials resistant to concentrated hydrochloric acid (e.g., tantalum, yttria-coated graphite, graphite coated with other rare earth oxides or mixtures thereof); N.B.: See also 2A225.

g. Equipment and components, specially designed or prepared for atomic vapor "laser" isotopic separation process, as follows:

  g.1. High power electron beam guns with total power of more than 50 kW and strip or scanning electron beam guns with a delivered power of more than 2.5 kW/cm for use in uranium vaporization systems;

  g.2. Trough shaped crucibles and cooling equipment made of or protected by materials resistant to heat and corrosion of molten uranium or uranium alloy’s (e.g., tantalum, yttria-coated graphite, graphite coated with other rare earth oxides or mixtures thereof); N.B.: See also 6A005 and 6A205.

  g.3. Product and tails collector systems made of or lined with materials resistant to the heat and corrosion of uranium vapor such as yttria-coated graphite or tantalum;

  g.4. Separator module housings (cylindrical or rectangular vessels) for containing the uranium metal vapor source, the electron beam gun and the product and tails collectors;

  g.5. "Lasers" or "laser" systems for the separation of uranium isotopes with a spectrum frequency stabilizer for operation over extended periods of time; N.B.: See also 2A225.

  g.6. Separator module housings (cylindrical) for containing the uranium plasma source, radio-frequency drive coil and the product and tails collectors and made of a suitable non-magnetic material (e.g. stainless steel);

  g.7. Equipment and components, specially designed or prepared for molecular "laser" isotopic separation process, as follows:

    h.1. Supersonic expansion nozzles for cooling mixtures of UF₆ and carrier gas to 150 K or less and made from UF₆ resistant materials;

    h.2. Uranium fluoride (UF₆) product collectors consisting of filter, impact, or cyclone-type collectors or combinations thereof, and made of UF₆ resistant materials (e.g., aluminum, aluminum alloys, nickel or alloys containing 60 weight percent of nickel and UF₆ resistant fully fluorinated hydrocarbon polymers);

    h.3. Equipment for fluorinating UF₆ to UF₆;

    h.4. Compressors made of or protected by materials resistant to UF₆ (e.g., aluminum, aluminum alloys, nickel or alloy containing 60 weight percent or more nickel), and rotary shaft seals therefor;

    h.5. Cryogenic heat exchangers and cryoseparators capable of temperatures of −120° C or less;

    h.5.c. UF₆ cold traps capable of temperatures of −120° C or less;

    h.6. "Lasers" or “laser” systems for the separation of uranium isotopes with a spectrum frequency stabilizer for operation over extended periods of time; N.B.: See also 6A005.

i. Equipment and components, specially designed or prepared for plasma separation process, as follows:

  i.1. Product and tails collectors made of or protected by materials resistant to the heat and corrosion of uranium vapor such as yttria-coated graphite or tantalum;

  i.2. Radio frequency ion excitation coils for frequencies of more than 100 kHz and capable of handling more than 40 kW mean power;

  i.3. Microwave power sources and antennae for producing or accelerating ions, with an output frequency greater than 30 GHz and mean power output greater than 50 kW;

  i.4. Cryogenic plasma generation systems;

  i.5. Liquid uranium metal handling systems consisting of crucibles, made of or protected by suitable corrosion and heat resistant materials (e.g., graphite, graphite coated with other rare earth oxides or mixtures thereof), and cooling equipment for the crucibles; N.B.: See also 2A225.

  i.6. Separator module housings (cylindrical) for containing the uranium plasma source, radio-frequency drive coil and the product and tails collectors and made of a suitable non-magnetic material (e.g. stainless steel);

j. Equipment and components, specially designed or prepared for electromagnetic separation process, as follows:

  j.1. Ion sources, single or multiple, consisting of a vapor source, ionizer, and beam accelerator made of suitable materials (e.g., graphite, stainless steel, or copper) and capable of providing a total ion beam current of 50 mA or greater;

  j.2. Ion collector plates for collection of enriched or depleted uranium ion beams, consisting of two or more slits and pockets and made of suitable non-magnetic materials (e.g., graphite or stainless steel);
Pt. 774, Supp. 1

15 CFR Ch. VII (1-1-00 Edition)

j.3. Vacuum housings for uranium electromagnet separators made of non-magnetic materials (e.g. graphite or stainless steel) and designed to operate at pressures of 0.1 Pa or lower;

j.4. Magnet pole pieces with a diameter greater than 2 m;

j.5. High voltage power supplies for ion sources, having all of the following characteristics:
   j.5.a. Capable of continuous operation;
   j.5.b. Output voltage of 20,000 V or greater;
   j.5.c. Output current of 1 A or greater;
   j.5.d. Voltage regulation of better than 0.01% over a period of 8 hours;
N.B.: See also 3A227.

j.6. Magnet power supplies (high power, direct current) having all of the following characteristics:
   j.6.a. Capable of continuous operation with a current output of 500 A or greater at a voltage of 100 V or greater;
   j.6.b. Current or voltage regulation better than 0.01% over a period of 8 hours.
N.B.: See also 3A226.

0B002 Specially designed or prepared auxiliary systems, equipment and components, as follows, (see List of Items Controlled) for isotope separation plant specified in 0B001, made of or protected by UF₆ resistant materials.

LICENSE REQUIREMENTS
Reason for Control: Country Chart
Control(s): Items described in 0B002 are subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110)

Items:

a. Feed autoclaves, ovens or systems used for passing UF₆ to the enrichment process;

b. Desublimers or cold traps, used to remove UF₆ from the enrichment process for subsequent transfer upon heating;

c. Product and tails stations for transferring UF₆ into containers;

d. Liquefaction or solidification stations used to remove UF₆ from the enrichment process by compressing and converting UF₆ to a liquid or solid form;

e. Piping systems and header systems specially designed for handling UF₆ within gaseous diffusion, centrifuge aerodynamic cascades made of or protected by UF₆ resistant materials;

f.1. Vacuum manifolds or vacuum headers having a suction capacity of 5 m³/minute or more; or

f.2. Vacuum pumps specially designed for use in UF₆ bearing atmospheres;

g. UF₆ mass spectrometers/ion sources specially designed or prepared for taking on-line samples of feed, product or tails from UF₆ gas streams and having all of the following characteristics:
   g.1. Unit resolution for mass of more than 320 amu;
   g.2. Ion sources constructed of or lined with nichrome or monel, or nickel plated;
   g.3. Electron bombardment ionization sources; and
   g.4. Collector system suitable for isotopic analysis.

0B003 Plant for the production of uranium hexafluoride (UF₆) and specially designed or prepared equipment and components therefor, as follows (see List of Items Controlled).

Items:

a. Plant for the production of heavy water, deuterium or deuterium compounds, as follows:

a.1. Hydrogen sulphide-water exchange plants;

a.2. Ammonia-hydrogen exchange plants;

a.3. Hydrogen distillation plants;

b. Equipment and components, as follows, designed for:

b.1. Hydrogen sulphide-water exchange process:

b.1.a. Tray exchange towers;

b.1.b. Hydrogen sulphide gas compressors;

b.2. Ammonia-hydrogen exchange process:

b.2.a. High-pressure ammonia-hydrogen exchange towers;

b.2.b. High-efficiency stage contactors;

b.2.c. Submersible stage recirculation pumps;

b.2.d. Ammonia crackers designed for pressures of more than 3 MPa;

b.3. Hydrogen distillation process:

b.3.a. Hydrogen cryogenic distillation towers and cold boxes designed for operation below 35 K (−238 °C);

b.3.b. Turboexpanders or turboexpander-compressor sets designed for operation below 35 K (−238 °C);

b.4. Heavy water concentration process to reactor grade level (99.75 weight percent deuterium oxide):

b.4.a. Water distillation towers containing specially designed packings;

b.4.b. Ammonia distillation towers containing specially designed packings;

b.4.c. Catalytic burners for conversion of fully enriched deuterium to heavy water;

b.4.d. Infrared absorption analyzers capable of on-line hydrogen-deuterium ratio analysis where deuterium concentrations are equal to or more than 90 weight percent.

0B005 Plant specially designed for the fabrication of "nuclear reactor" fuel elements and specially designed equipment therefor.

License Requirements

Items:

a. Fuel element chopping or shredding machines, i.e. remotely operated equipment to cut, chop, shred or shear irradiated "nuclear reactor" fuel assemblies, bundles or rods;

b. Dissolvers, critically safe tanks (e.g. small diameter, annular or slab tanks) specially designed or prepared for the dissolution of irradiated "nuclear reactor" fuel, which are capable of withstanding hot, highly corrosive liquids, and which can be remotely loaded and maintained;

c. Counter-current solvent extractors and ion-exchange processing equipment specially designed or prepared for use in a plant for the reprocessing of irradiated "natural uranium", "depleted uranium" or "special fissile materials" and "other fissile materials";

d. Process control instrumentation specially designed or prepared for monitoring or controlling the reprocessing of irradiated "natural uranium", "depleted uranium" or "special fissile materials" and "other fissile materials";

e. Holding or storage vessels specially designed to be critically safe and resistant to the corrosive effects of nitric acid;

Note: Critically safe tanks may have the following features:

1. Walls or internal structures with a boron equivalent of at least two percent;
Pt. 774, Supp. 1

2. A maximum diameter or 175 mm for cylindrical vessels; or
3. A maximum width of 75 mm for either a slab or annular vessel.

f. Complete systems specially designed or prepared for the conversion of plutonium nitrate to plutonium oxide;

g. Complete systems specially designed or prepared for the production of plutonium metal.

NOTE: Plant for the reprocessing of irradiated “nuclear reactor” fuel elements includes equipment and components which normally come into direct contact with and directly control the irradiated fuel and the major nuclear material and fission product processing streams.

0B008 Equipment for “nuclear reactors”.

Related Definitions: N/A

Items:

a. Seals, gaskets, sealants or fuel bladders specially designed for "aircraft" or aerospace use made from more than 50% by weight of any of the materials controlled by 1C009.b or 1C009.c;

b. Piezoelectric polymers and copolymers made from vinylidene fluoride materials controlled by 1C009.a:
   b.1. In sheet or film form; and
   b.2. With a thickness exceeding 200 µm;

c. Seals, gaskets, valve seats, bladders or diaphragms made from fluoroelastomers containing at least one vinyl ether monomer, specially designed for "aircraft", aerospace or missile use.

1A002 "Composite" structures or laminates, having any of the following (see List of Items Controlled).

LICENSE REQUIREMENTS
Reason for Control: NS, NP, AT

Control(s)          Country Chart  
NS applies to entire entry except finished or semi-finished items specially designed for purely civilian applications as follows: sporting goods, automotive industry, machine tool industry, and medical applications.  
NP applies to 1A002.b.1 in the form of tubes with an inside diameter between 75 mm and 400 mm.  
AT applies to entire entry ....... AT Column 1  

LICENSE REQUIREMENT NOTES: See §743.1 of the EAR for reporting requirements for exports under License Exceptions.

LICENSE EXCEPTIONS
LVS: $1500; N/A for "composite" structures or laminates controlled by 1A002.a, having an organic "matrix" and made from materials controlled by 1C010.c or 1C010.d  
GBS: N/A  
CIV: N/A  

LIST OF ITEMS CONTROLLED

Unit: Kilograms
Related Controls: (1) See also 1A202, 9A010, and 9A110. (2) Composite structures that are specially designed for missile application (including specially designed subsystems and components) are controlled by 9A1102. (3) This entry does not control "composite" structures or laminates made from epoxy resin impregnated carbon "fibrous or filamentary materials" for the repair of aircraft structures of laminates, provided that the size does not exceed one square meter (1 m²).

Relation Definitions: N/A

Items:

a. An organic "matrix" and made from materials controlled by 1C010.c, 1C010.d or 1C010.e; or

b. A metal or carbon "matrix" and made from:
   b.1. Carbon "fibrous or filamentary materials" with:
      b.1.a. A "specific modulus" exceeding 10.15 x 10⁶ m; and
      b.1.b. A "specific tensile strength" exceeding 17.7 x 10⁴ m; or
   b.2. Materials controlled by 1C010.c.

TECHNICAL NOTES: (1) Specific modulus: Young’s modulus in pascals, equivalent to N/m² divided by specific weight in N/m³, measured at a temperature of (296±2) K ((23±2) °C) and a relative humidity of (50±5)%.

(2) Specific tensile strength: ultimate tensile strength in pascals, equivalent to N/m² divided by specific weight in N/m³, measured at a temperature of (296±2) K ((23±2) °C) and a relative humidity of (50±5)%.

1A003 Manufactures of non-fluorinated polymeric substances controlled by
1C008.a.3 in film, sheet, tape or ribbon form with either of the following characteristics (see List of Items Controlled).

LIST OF ITEMS CONTROLLED
Unit: $ value
Related Controls: See also 1B101 and 1B201; and for accelerators and systems containing accelerators see 3A101
Related Definitions: N/A
Items:

- a. Filament winding machines of which the motions for positioning, wrapping and winding fibers are coordinated and programmed in three or more axes, specially designed for the manufacture of “composite” structures or laminates from “fibrous or filamentary materials”;
- b. Tape-laying or tow-placement machines of which the motions for positioning and laying tape, tows or sheets are coordinated and programmed in two or more axes, specially designed for the manufacture of “composite” airframe or “missile” structures;
- c. Multidirectional, multidimensional weaving machines or interlacing machines, including adapters and modification kits, for weaving, interlacing or braiding fibers to manufacture “composite” structures;
- d. Equipment specially designed or adapted for the production of reinforcement fibers, as follows:
  - d.1. Equipment for converting polymeric fibers (such as polyacrylonitrile, rayon, pitch or polycarbosilane) into carbon fibers or silicon carbide fibers, including special equipment to strain the fiber during heating;
  - d.2. Equipment for the chemical vapor deposition of elements or compounds on heated filamentary substrates to manufacture silicon carbide fibers;
- d.3. Equipment for the wet-spinning of refractory ceramics (such as aluminum oxide);
- d.4. Equipment for converting aluminum containing precursor fibers into alumina fibers by heat treatment;
- e. Equipment for producing prepregs controlled by 1C010.e by the hot melt method;
- f. Non-destructive inspection equipment capable of inspecting defects three dimensionally, using ultrasonic or X-ray tomography and specially designed for “composite” materials.

1B002 Systems and components therefor, specially designed to avoid contamination and specially designed for producing metal alloys, metal alloy powder or alloyed materials controlled by 1C002.a.2, 1C002.b or 1C002.e.

   b. Equipment for the separation of lithium isotopes, as follows:
      b.1. Packed liquid-liquid exchange columns specially designed for lithium amalgams;
      b.2. Mercury and/or lithium amalgam pumps;
      b.3. Lithium amalgam electrolysis cells;
      b.4. Evaporators for concentrated lithium hydroxide solution.

C. MATERIALS

TECHNICAL NOTE: Metals and alloys: Unless provision to the contrary is made, the words "metals" and "alloys" in 1C001 to 1C012 cover crude and semi-fabricated forms, as follows:

Crude forms: Anodes, balls, bars (including notched bars and wire bars), billets, blocks, blooms, bricks, cakes, cathodes, crystals, cubes, dice, grains, granules, ingots, lumps, pellets, pigs, powder, rondelles, shot, slabs, slugs, sponge, sticks;

Semi-fabricated forms (whether or not coated, plated, drilled or punched):
   a. Wrought or worked materials fabricated by rolling, drawing, extruding, forging, impact extruding, pressing, graining, atomizing, and grinding, i.e.: angles, channels, circles, discs, dust, flakes, foils and leaf, forging, plate, powder, pressings and stampings, ribbons, rings, rods (including bare welding rods, wire rods, and rolled wire), sections, shapes, sheets, strip, pipe and tubes (including tube rounds, squares, and hollows), drawn or extruded wire;
   b. Cast material produced by casting in sand, die, metal, plaster or other types of molds, including high pressure castings, sintered forms, and forms made by powder metallurgy.

The object of the control should not be defeated by the export of non-listed forms alleged to be finished products but representing in reality crude forms or semi-fabricated forms.

1C001 Materials specially designed for use as absorbers of electromagnetic waves, or intrinsically conductive polymers, as follows (see List of Items Controlled).

LIST OF ITEMS CONTROLLED

Unit: Kilograms

Related Controls: See also 1C202. This entry does not control metal alloys, metal alloy powder or alloyed materials for coating substrates.

Related Definition: N/A

Items: a. Metal alloys, as follows:

a.1. Nickel or titanium-based alloys in the form of aluminides, as follows, in crude or semi-fabricated forms.

a.1.a. Nickel aluminides containing a minimum of 15 weight percent aluminum, a maximum of 38 weight percent aluminum and at least one additional alloying element;

a.1.b. Titanium aluminides containing 10 weight percent or more aluminum and at least one additional alloying element;

a.2. Metal alloys, as follows, made from metal alloy powder or particulate material controlled by 1C002.b:

a.2.a. Nickel alloys with:

- a.2.a.1. A stress-rupture life of 10,000 hours or longer at 923 K (650 °C) at a stress of 676 MPa; or
- a.2.a.2. A low cycle fatigue life of 10,000 cycles or more at 823 K (550 °C) at a maximum stress of 1,095 MPa;

a.2.b. Niobium alloys with:

- a.2.b.1. A stress-rupture life of 10,000 hours or longer at 1,073 K (800 °C) at a stress of 1,095 MPa; or
- a.2.b.2. A low cycle fatigue life of 10,000 cycles or more at 973 K (700 °C) at a maximum stress of 700 MPa;

a.2.c. Titanium alloys with:

- a.2.c.1. A stress-rupture life of 10,000 hours or longer at 723 K (450 °C) at a stress of 200 MPa; or
- a.2.c.2. A low cycle fatigue life of 10,000 cycles or more at 723 K (450 °C) at a maximum stress of 400 MPa;

a.2.d. Aluminum alloys with a tensile strength of:

- a.2.d.1. 240 MPa or more at 473 K (200 °C); or
- a.2.d.2. 415 MPa or more at 298 K (25 °C);

a.2.e. Magnesium alloys with a tensile strength of 345 MPa or more and a corrosion rate of less than 1 mm/year in 3% sodium chloride aqueous solution measured in accordance with ASTM standard G-31 or national equivalents;

TECHNICAL NOTE 1: The metal alloys in 1C002.a are those containing a higher percentage by weight of the stated metal than any other element.

TECHNICAL NOTE 2: Stress-rupture life should be measured in accordance with ASTM standard E-139 or national equivalents.

TECHNICAL NOTE 3: Low cycle fatigue life should be measured in accordance with
ASTM Standard E-606 “Recommended Practice for Constant-Amplitude Low-Cycle Fatigue Testing” or national equivalents. Testing should be axial with an average stress ratio equal to 1 and a stress-concentration factor \(K_t\) equal to 1. The average stress is defined as maximum stress minus minimum stress divided by maximum stress.

b. Metal alloy powder or particulate material for materials controlled by 1C002.a, as follows:

b.1. Made from any of the following composition systems:

b.1.a. Nickel alloys (Ni-Al-X, Ni-X-Al) qualified for turbine engine parts or components, i.e. with less than 3 non-metallic particles (introduced during the manufacturing process) larger than 100 \(\mu\)m in 10^9 alloy particles;

b.1.b. Niobium alloys (Nb-Al-X or Nb-X-Al, Nb-Si-X or Nb-X-Si, Nb-Ti-X or Nb-X-Ti);

b.1.c. Titanium alloys (Ti-Al-X or Ti-X-Al);

b.1.d. Aluminum alloys (Al-Mg-X or Al-X-Mg, Al-Zn-X or Al-X-Zn, Al-Fe-X or Al-X-Fe); or

b.1.e. Magnesium alloys (Mg-Al-X or Mg-X-Al); and

b.2. Made in a controlled environment by any of the following processes:

b.2.a. “Vacuum atomization”; b.2.b. “Gas atomization”; b.2.c. “Rotary atomization”; b.2.d. “Splat quenching”; b.2.e. “Melt spinning” and “comminution”; b.2.f. “Melt extraction” and “comminution”; or

b.2.g. “Mechanical alloying”; c. Alloyed materials, in the form of uncomminuted flakes, ribbons or thin rods produced in a controlled environment by “splat quenching”, “melt spinning” or “melt extraction”, used in the manufacture of metal alloy powder or particulate material controlled by 1C002.b.

**1C003 Magnetic metals, of all types and of whatever form, having any of the characteristics (see List of Items Controlled).**

Items: a. Initial relative permeability of 120,000 or more and a thickness of 0.05 mm or less;

**TECHNICAL NOTE:** Measurement of initial permeability must be performed on fully annealed materials.

b. Magnetostrictive alloys, having any of the following characteristics:

b.1. A saturation magnetostriction of more than 5 \(\times 10^{-4}\); or

b.2. A magnetoelastic coupling factor \((k)\) of more than 0.8; or

c. Amorphous or nanocrystalline alloy strips, having all of the following characteristics:

- c.1. A composition having a minimum of 75 weight percent of iron, cobalt or nickel;
- c.2. A saturation magnetic induction \((B_s)\) of 1.6 T or more; and
- c.3. Any of the following:

  - c.3.a. A strip thickness of 0.02 mm or less; or
  - c.3.b. An electrical resistivity of \(2 \times 10^{-4}\) ohm cm or more.

**TECHNICAL NOTE:** Nanocrystalline materials in 1C003.c are those materials having a crystal grain size of 50 nm or less, as determined by X-ray diffraction.

**1C004 Uranium titanium alloys or tungsten alloys with a “matrix” based on iron, nickel or copper, having all of the characteristics (see List of Items Controlled).**

LIST OF ITEMS CONTROLLED

Unit: Kilograms
Related Controls: N/A
Related Definitions: N/A

Items:

a. Multifilamentary "super-conductive" "composite" conductors containing one or more niobium-titanium filaments:
   a.1. Embedded in a "matrix" other than a copper or copper-based mixed "matrix"; or
   a.2. Having a cross-section area less than 0.28 × 10⁻⁶ mm² (6 µm in diameter for circular filaments);

b. "Super-conductive" "composite" conductors consisting of one or more "super-conductive" filaments other than niobium-titanium, having all of the following:
   b.1. A "critical temperature" at zero magnetic induction exceeding 9.85 K (−263.31°C) but less than 24 K (−249.16°C);
   b.2. A cross-section area less than 0.28 × 10⁻⁶ mm²; and
   b.3. Remaining in the "super-conductive" state at a temperature of 4.2 K (−268.96°C) when exposed to a magnetic field corresponding to a magnetic induction of 12 T.

a.2. Chlorofluorocarbons, having all of the following:

   NOTE: For the purpose of 1C006.a.2, chlorofluorocarbons contain exclusively carbon, fluorine and chlorine.
   a.2.a. No flash point;
   a.2.b. An autogenous ignition temperature exceeding 977 K (704°C);
   a.2.c. A pour point at 219 K (−54°C) or less;
   a.2.d. A viscosity index of 80 or more; and
   a.2.e. A boiling point at 473 K (200°C) or higher;

b. Lubricating materials containing, as their principal ingredients, any of the following compounds or materials:
   b.1. Phenylene or alkylphenylene ethers or thio-ethers, or their mixtures, containing more than two ether or thio-ether functions or mixtures thereof; or
   b.2. Fluorinated silicone fluids with a kinematic viscosity of less than 5,000 mm²/s (5,000 centistokes) measured at 298 K (25°C) and made from at least 85% of any of the following compounds or materials:
      c.1. Dibromotetrafluoroethane;
      c.2. Polychlorotrifluoroethylene (oily and waxy modifications only); or
      c.3. Polybromotrifluoroethylene;
   d. Fluorocarbon electronic cooling fluids, having all of the following characteristics:
      d.1. Containing 85% by weight or more of any of the following, or mixtures thereof:
         d.1.a. Monomeric forms of perfluoropolyalkyl ether-triazines or perfluoroaliphatic-ethers;
         d.1.b. Perfluoroalkylamines;
         d.1.c. Perfluorocycloalkanes;
         d.1.d. Perfluoroalkanes;
      d.2. Density at 298 K (25°C) of 1.5 g/ml or more;
      d.3. In a liquid state at 273 K (0°C); and
      d.4. Containing 60% or more by weight of fluoroine.

   TECHNICAL NOTE: For the purpose of 1C006:
   a. Flash point is determined using the Cleveland Open Cup Method described in ASTM D-92 or national equivalents;
   b. Pour point is determined using the method described in ASTM D-97 or national equivalents;
   c. Viscosity index is determined using the method describe in ASTM D-2270 or national equivalents;
   d. Thermal stability is determined by the following test procedure or national equivalents:
      Twenty ml of the fluid under test is placed in a 46 ml type 317 stainless steel chamber containing one each of 12.5 mm (nominal) diameter balls of M-10 tool steel, 52100 steel and naval bronze (60% Cu, 39% Zn, 0.75% Sn);
The chamber is purged with nitrogen, sealed at atmospheric pressure and the temperature raised to and maintained at 644 ± 6 K (371 ± 6°C) for six hours;

The specimen will be considered thermally stable if, on completion of the above procedure, all of the following conditions are met:

1. The loss in weight of each ball is less than 10 mg/mm² of ball surface;

2. The change in original viscosity as determined at 311 K (38°C) is less than 25%; and

3. The total acid or base number is less than 0.40;

e. Autogenous ignition temperature is determined using the method described in ASTM E-659 or national equivalents.

a. Si-O-N; having a “specific tensile strength” exceeding 12.7 × 10³ m;

b. Ceramic-ceramic “composite” materials, with or without a continuous metallic phase, incorporating particles, whiskers or fibers, where carbides or nitrides of silicon, zirconium or boron form the “matrix”;

c. Precursor materials (i.e., special purpose polymeric or metallo-organic materials) for producing any phase or phases of the materials controlled by 1C007.c, as follows:

d. Aromatic polyamide-imides;

e. Aromatic polyimides;

f. Aromatic polyetherimides having a glass transition temperature (Tg) exceeding 513 K (240°C) determined using the dry method described in ASTM D 3418;

b. Polydiorganosilanes (for producing silicon carbide);

e. Polysilazanes (for producing silicon nitride);

e. Polycarbosilazanes (for producing ceramics with silicon, carbon and nitrogen components);

f. Ceramic-ceramic “composite” materials with an oxide or glass “matrix” reinforced with continuous fibers from any of the following systems:

g. Ceramic-ceramic “composite” materials, with or without a continuous metallic phase, incorporating particles, whiskers or fibers, where carbides or nitrides of silicon, zirconium or boron form the “matrix”;

c.1. Si–N;

c.2. Si–C;

c.3. Si–Al–O–N; or

c.4. Si–O–N; having a “specific tensile strength” exceeding 12.7 × 10³ m;
d. Ceramic-ceramic “composite” materials, with or without a continuous metallic phase, incorporating particles, whiskers or fibers, where carbides or nitrides of silicon, zirconium or boron form the “matrix”;
e. Precursor materials (i.e., special purpose polymeric or metallo-organic materials) for producing any phase or phases of the materials controlled by 1C007.c, as follows:
e.1. Polydiorganosilanes (for producing silicon carbide);
e.2. Polysilazanes (for producing silicon nitride);
e.3. Polycarbosilazanes (for producing ceramics with silicon, carbon and nitrogen components);
f. Ceramic-ceramic “composite” materials with an oxide or glass “matrix” reinforced with continuous fibers from any of the following systems:
f.1. Al₂O₃; or
f.2. Si–C–N.

NOTE: 1C007.f does not control “composites” containing fibers from these systems with a fiber tensile strength of less than 700 MPa at 1,273 K (1,000°C) or fiber tensile creep resistance of more than 1% creep strain at 100 MPa load and 1,273 K (1,000°C) for 100 hours.

1C008 Non-fluorinated polymeric substances, as follows (see List of Items Controlled).

Items: a. Non-fluorinated polymeric substances, as follows:
a.1. Bis maleimides;
a.2. Aromatic polyamide-imides;
a.3. Aromatic polyimides;
a.4. Aromatic polyetherimides having a glass transition temperature (Tg) exceeding 513 K (240°C) determined using the dry method described in ASTM D 3418;

NOTE: 1C008.a does not control non-fusible compression molding powders or molded forms.

b. Thermoplastic liquid crystal copolymers having a heat distortion temperature exceeding 513 K (240°C) measured according to
ASTM D-648, method A, or national equivalents, with a load of 1.82 N/mm² and composed of:
- b.1. Any of the following:
  - b.1.a. Phenylene, biphenylene or naphthalene; or
  - b.1.b. Methyl, tertiary-butyl or phenyl substituted phenylene, biphenylene or naphthalene; and
- b.2. Any of the following acids:
  - b.2.a. Terephthalic acid;
  - b.2.b. 6-hydroxy-2 naphthoic acid; or
  - b.2.c. 4-hydroxybenzoic acid;
- c. Polyarylene ether ketones, as follows:
  - c.1. Polyether ether ketone (PEEK);
  - c.2. Polyether ketone ketone (PEKK);
  - c.3. Polyether ketone (PEK);
  - c.4. Polyether ketone ether ketone ketone (PEKEKK);
- d. Polyarylene ketones;
- e. Polyarylene sulphides, where the arylene group is biphenylene, triphenylene or combinations thereof;
- f. Polybiphenylenethersulphone.

TECHNICAL NOTE: The glass transition temperature (T_g) for 1C008 materials is determined using the method described in ASTM D 3418 using the dry method.

1C009 Unprocessed fluorinated compounds, as follows (see List of Items Controlled).

LIST OF ITEMS CONTROLLED
Unit: Kilograms
Related Controls: 1C990, 1C210, 9A110 and 9A110
Related Definitions:
(1) Specific modulus: Young's modulus in pascals, equivalent to N/m² divided by specific weight in N/m³, measured at a temperature of (296±2) K ((23±2) °C) and a relative humidity of (50±5)%.
(2) Specific tensile strength: ultimate tensile strength in pascals, equivalent to N/m² divided by specific weight in N/m³, measured at a temperature of (296±2) K ((23±2) °C) and a relative humidity of (50±5)%.

Items:
- a. Organic “fibrous or filamentary materials”, having all of the following:
  - a.1. A specific modulus exceeding 12.7×10⁶ m; and
  - a.2. A specific tensile strength exceeding 23.5×10⁴ m;

TECHNICAL NOTE: Properties for materials described in 1C010.b should be determined using SACMA recommended methods SRM 12 to 17, or national equivalent tow tests, such as Japanese Industrial Standard JIS-R-7601, Paragraph 6.6.2, and based on lot average.

NOTE: 1C010.b does not control polyethylene.

b. Carbon “fibrous or filamentary materials”, having all of the following:
  - b.1. A specific modulus exceeding 12.7×10⁶ m; and
  - b.2. A specific tensile strength exceeding 23.5×10⁴ m;

TECHNICAL NOTE: Properties for materials described in 1C010.b should be determined using SACMA recommended methods SRM 12 to 17, or national equivalent tow tests, such as Japanese Industrial Standard JIS-R-7601, Paragraph 6.6.2, and based on lot average.

NOTE: 1C010.b does not control fabric made from “fibrous or filamentary materials” for the repair of aircraft structures or laminates, in which the size of individual sheets does not exceed 50 cm × 90 cm.

- c. Inorganic “fibrous or filamentary materials”, having all of the following:
  - c.1. A specific modulus exceeding 2.54×10⁶ m; and
c.2. A melting, softening, decomposition or sublimation point exceeding 1,902 K (1,640 °C) in an inert environment;

NOTE: 1C010.c does not control:
1. Discontinuous, multiphase, polycrystalline alumina fibers in chopped fiber or random mat form, containing 3 weight percent or more silica, with a specific modulus of less than 10×10^6 m;
2. Molybdenum and molybdenum alloy fibers;
3. Boron fibers;
4. Discontinuous ceramic fibers with a melting, softening, decomposition or sublimation point lower than 2,043 K (1,770 °C) in an inert environment.
5. Fibrous or filamentary materials:";
   d.1. Composed of any of the following:
       d.1.a. Polyetherimides controlled by 1C008.a; or
       d.1.b. Materials controlled by 1C008.b to 1C008.f;
   d.2. Composed of materials controlled by 1C010.d.1.a or 1C010.d.1.b and “commingled” with other fibers controlled by 1C010.a, 1C010.b or 1C010.c;
   e. Resin-impregnated or pitch-impregnated fibers (prepregs), metal or carbon-coated fibers (preforms) or “carbon fiber preforms”, as follows:
       e.1. Made from “fibrous or filamentary materials”) controlled by 1C010.a, 1C010.b or 1C010.c;
       e.2. Made from organic or carbon “fibrous or filamentary materials”;
       e.2.a. With a “specific tensile strength” exceeding 17.7×10^6 m;
       e.2.b. With a “specific modulus” exceeding 10.15×10^6 m;
       e.2.c. Not controlled by 1C010.a or 1C010.b; and
   e.2.d. When impregnated with materials controlled by 1C008 or 1C009.b, having a glass transition temperature (T_g) exceeding 383 K (110 °C) or with phenolic or epoxy resins, having a glass transition temperature (T_g) equal to or exceeding 438 K (145 °C).

NOTES: 1C010.e does not control:
1. Epoxy resin “matrix” impregnated carbon “fibrous or filamentary materials” (prepregs) for the repair of aircraft structures or laminates, in which the size of individual sheets of prepreg does not exceed 50 cm × 90 cm;
2. Prepregs when impregnated with phenolic or epoxy resins having a glass transition temperature (T_g) less than 433 K (160 °C) and a cure temperature lower than the glass transition temperature.

TECHNICAL NOTE: The glass transition temperature (T_g) for 1C010.e materials is determined using the method described in ASTM D 3418 using the dry method. The glass transition temperature for phenolic and epoxy resins is determined using the method described in ASTM D 4065 at a frequency of 1 Hz and a heating rate of 2 K per minute using the dry method.

**LIST OF ITEMS CONTROLLED**

Unit: Number. Related Controls: (1) Explosive devices or charges that utilize USML controlled energetic materials (See 22 CFR 121.1, Category V) are subject to the licensing authority of the U.S. Department of State, Office of Defense Trade Controls if they have been specifically designed, developed, configured, adapted, or modified for a military application. (2) With the exception of slurries, cutters and severing tools, if the USML controlled materials utilized in devices and charges controlled by this entry can be easily extracted without destroying the device or charge, then they are subject to the export licensing authority of the U.S. Department of State, Office of Defense Trade Controls. (3) Commercial prefabricated slurries and emulsions containing greater than 35% of USML controlled energetic materials are subject to the export licensing authority of the U.S. Department of State, Office of Defense Trade Control. (4) The individual USML controlled energetic materials, even when compounded with other materials, remain subject to the export licensing authority of the Department of State when not incorporated into explosive devices or charges controlled by this entry or 1C992. (5) See also ECCNs 1C011, 1C111, 1C239 and 22 CFR 121.1, Category V. (2) For purposes of this entry, the term “controlled materials” means controlled energetic materials (see ECCNs 1C011, 1C111, 1C239 and 22 CFR 121.1, Category V).

**Related Definitions:** (1) For purposes of this entry, the term “controlled materials” means controlled energetic materials (see ECCNs 1C011, 1C111, 1C239 and 22 CFR 121.1, Category V). (2) For purposes of this entry, the mass of aluminum powder, potassium perchlorate, and any of the substances listed in the note to the USML (see 22 CFR Part 121.12) (such as ammonium picrate, black powder, etc.) contained in commercial explosive devices and in the charges are omitted when determining the total mass of controlled material.

**COMMENTS**

- a. Shaped charges specially designed for oil well operations, utilizing one charge functioning along a single axis, that upon detonation produce a hole; and
  - a.1. Contain any controlled materials;
  - a.2. Have a uniform shaped conical liner with an included angle of 90 degrees or less;
  - a.3. Have more than 0.090 kg but not more than 2.0 kg of controlled materials; and
  - a.4. Have a diameter not exceeding 4.5 inches.
- b. Detonating cord or shock tubes containing greater than 0.064 kg per meter (300 grains per foot), but not more than 0.1 kg per meter (400 grains per foot) of controlled materials;
- c. Cartridge power devices containing greater than 0.70 kg, but not more than 1.0 kg of controlled materials;
- d. Detonators (electric or nonelectric) and assemblies thereof containing greater than 0.01 kg, but not more than 0.1 kg of controlled materials;
- e. Igniters containing greater than 0.01 kg, but not more than 0.1 kg of controlled materials;
- f. Oil well cartridges containing greater than 0.015 kg, but not more than 0.1 kg of controlled materials;
- g. Commercial cast or pressed boosters containing greater than 1.0 kg, but not more than 5.0 kg of controlled materials;
- h. Commercial prefabricated slurries and emulsions containing greater than 10 kg and less than or equal to thirty-five percent by weight of USML controlled materials;
- i. Cutters and severing tools containing greater than 3.5 kg, but not more than 10 kg of controlled materials;
- j. Pyrotechnic devices when designed exclusively for commercial purposes (e.g., theatrical stages, motion picture special effects, and fireworks displays), and containing greater than 3.0 kg, but not more than 5.0 kg of controlled materials; or
- k. Other commercial explosive devices and charges, not controlled by 1C018a through g.
Bureau of Export Administration, Commerce

above, when used for commercial applications and containing greater than 1.0 kg but not more than 5.0 kg of controlled materials.

LIST OF ITEMS CONTROLLED
Unit: Kilograms
Related Controls: (1) The following materials, whether or not encapsulated in aluminum, beryllium, magnesium, or zirconium are subject to the export licensing authority of the U.S. Department of State, Office of Defense Trade Controls: (See 22 CFR part 121): (a) Spherical aluminum powder with particles of uniform diameter 60 x 10^-6 m (60 micrometers) or less and an aluminum content of 99 percent or greater; (b) Zirconium, beryllium, boron, magnesium and alloys of these, in particle sizes of less than 60 x 10^-6 m (60 micrometers), whether spherical, atomized, spheroidal, flaked or ground, consisting 99% or more by weight of any of the above mentioned metals; (c) iron powder with average particle size of 3 x 10^-6 m (3 microns) or less produced by hydrogen reduction of iron oxide. (2) For propellants and constituent chemicals for propellants not controlled by 1C111, see the U.S. Munitions List.
Related Definitions: N/A.
Items: a. Propulsive substances: a.1 Spherical aluminum powder, other than that specified on the U.S. Munitions List, with particles of uniform diameter of less than 500 micrometer and an aluminum content of 97% by weight or greater; a.2 Zirconium, beryllium, boron, magnesium and alloys of these, in particle sizes of less than 500 x 10^-6 m (500 micrometers), whether spherical, atomized, spheroidal, flaked or ground, consisting 97% or more by weight of any of the above mentioned metals. a.3 Liquid oxidizers, as follows: a.3a. Dinitrogen trioxide; a.3b. Nitrogen dioxide/dinitrogen tetroxide; a.3c. Dinitrogen pentoxide; b. Polymeric substances: b.1 Carboxy-terminated polybutadiene (CTPB);

**LIST OF ITEMS CONTROLLED**

**Unit:** Kilograms

**Related Controls:** See 9A.110 for fiber prepregs.

**Related Definitions:** For the purpose of this entry, the term “fibrous or filamentary materials” is restricted to continuous “monofilaments”, “yarns”, “rovings”, “tows” or “tapes”.

**Definitions for other terms used in this entry:**
- Filament or Monofilament: the smallest increment of fiber, usually several µm in diameter.
- Strand: a bundle of filaments (typically over 200) arranged approximately parallel.
- Tape: a material constructed of interlaced or unidirectional filaments, strands, rovings, tows or yarns, etc., usually preimpregnated with resin. See 9A.110 for fiber prepregs.

**Technical Note:** The resin forms the matrix of the composite.

**1C216** Maraging steel, other than that controlled by 1C116, capable of an ultimate tensile strength of 2050 MPa or more, at 293 K (20°C), except forms in which no linear dimension exceeds 75 mm.

**License Requirement Notes:**

1. **Sample Shipments:** Certain sample shipments of chemicals controlled under ECCN 1C350 may be made without a license, as provided by the following:

   a. **Chemicals Not Eligible:** The following CW Schedule 1 chemicals are not eligible for sample shipments: 0-Ethyl-2-diisopropylaminoethyl methylphosphonite (QL) (C.A.S. #57856-11-0), Ethylphosphonyl difluoride (C.A.S. #753-98-0), and Methylphosphonyl difluoride (C.A.S. #676-99-3).

   b. **Countries Not Eligible:** The following countries are not eligible to receive any sample shipments: Cuba, Iran, Iraq, Libya, North Korea, Sudan, Syria.

   c. **Sample Shipments:** A license is not required for sample shipments when the cumulative total of these shipments does not exceed a 55-gallon container or 200 kg of each chemical to any one consignee per calendar year. Multiple sample shipments, in any quantity, not exceeding the totals indicated in this paragraph may be exported without a license, in accordance with the provisions of this Note 1. A consignee that receives a sample shipment under this exclusion may not resell, transfer, or reexport the sample shipment, but may use the sample shipment for any other legal purpose unrelated to chemical weapons. However, a sample shipment exported and received under this exclusion remains subject to all General Prohibitions including the end-use restriction described in §744.4 of the EAR. Sample shipments of chemicals controlled for CW reasons to non-States Parties (destinations not listed in Supplement No. 2 to part 745 of the EAR) may not be made without first obtaining an End-Use Certificate, as described in §745.2 of the EAR. If no End-Use Certificate is obtained pursuant to §745.2 of the EAR, a license is required for sample shipments of chemicals controlled under ECCN 1C350 for CW reasons.

   d. The exporter is required to submit a quarterly written report for shipments of samples made under this Note 1. The report must be on company letterhead stationery (titled “Report of Sample Shipments of Chemical Precursors” at the top of the first page) and identify the chemical(s), Chemical Abstract Service Registry (C.A.S.) number(s), quantity(ies), the ultimate consignee’s name and address, and the date exported. The report must be sent to the U.S. Department of Commerce, Bureau of Export Administration, P.O. Box 273, Washington, DC 20044, Attn: “Report of Sample Shipments of Chemical Precursors”.

2. **Mixtures:** Mixtures controlled by this entry that contain certain concentrations of precursor and intermediate chemicals are subject to the following licensing requirements:

   a. A license is required, regardless of the concentrations in the mixture, for the following chemicals: 0-Ethyl-2-diisopropylaminoethyl methylphosphonite (QL) (C.A.S. #57856-11-0), Ethylphosphonyl difluoride (C.A.S. #753-98-0), and Methylphosphonyl difluoride (C.A.S. #676-99-3);

   b. A license is required when at least one of the following chemicals constitutes more than 10 percent of the weight of the mixture: Arsenic trichloride (C.A.S. #7784-34-3), Benzenic acid (C.A.S. #76-93-7), Diethyl ethylphosphonate (C.A.S. #78-38-6), Diethyl methylphosphonite (C.A.S. #15715-41-0), Diethyl-N,N-diethylphosphoramidate (C.A.S. #2604-03-7), N,N-Diisopropyl-beta-aminoethane thiol (C.A.S. #5842-07-9), N,N-Diisopropyl-2-aminoethoxy chloride hydrochloride (C.A.S. #406-68-1), N,N-Diisopropyl-beta-aminoethanol (C.A.S. #96-80-0), N-N-

Related Controls: All vaccines and "immunotoxins" are excluded from the scope of this entry. Certain medical products that contain biological toxins controlled under paragraph (d) of this entry, with the exception of d.5 and d.6, are excluded from the scope of this entry. Vaccines, "immunotoxins", and certain medical products excluded from the scope of this entry are controlled under ECCN 1C991.

Related Definition: 1.) For the purposes of this entry "immunotoxin" is defined as an antibody-toxin conjugate intended to destroy specific target cells (e.g., tumor cells) that bear antigens homologous to the antibody. 2.) For the purposes of this entry "subunit" is defined as a portion of the "toxin".

Items:

a. Viruses, as follows:

- Chikungunya virus;
- Congo-Crimean haemorrhagic fever virus;
- Dengue fever virus;
- Eastern equine encephalitis virus;

Items:
a. Bacteria, as follows:
   a.1. Xanthomonas abilinieans;
   a.2. Xanthomonas campestris pv. citri including strains referred to as Xanthomonas campestris pv. citri types A,B,C,D,E or otherwise classified as Xanthomonas citri, Xanthomonas campestris pv. aurantifolia or Xanthomonas campestris pv. citrulino;
   b. Fungi, as follows:
      b.1. Colletotrichum coffeum var. virulans (Colletotrichum kahawae);
      b.2. Cochliobolus miyabeanus (Helminthosporium oryzae);
      b.3. Microcystus ulei (syn. Dothileda ulei);
      b.4. Puccinia graminis (syn. Puccinia graminis f. sp. tritici);
b.5. Puccinia striiformis (syn. Puccinia graminis)

b.6. Magnaporthe grisea (pyricularia grisea/pyricularia oryzae)

1C355 Chemical Weapons Convention (CWC)
Schedule 2 and 3 chemicals and families of chemicals, not controlled by ECCN 1C350 or by the Department of State under the ITAR.

License Requirements
Reason for Control: CW

Controls: CW applies to entire entry. A license is required for CW reasons only to CWC non-States Parties (destinations not listed in Supplement No. 2 to part 745), unless an End-Use Certificate is obtained by the exporter (see § 742.18 of the EAR). See § 745.2 of the EAR for End-Use Certificate requirements, and the License Requirements Notes of this entry. Also note the export clearance requirements of § 758.3 of the EAR. The Commerce Country Chart is not designed to determine licensing requirements for items controlled for CW reasons.

License Requirements Notes
1. Chemicals listed in this entry may be shipped NLR when destined to most CWC States Parties (countries listed in Supplement No. 2 to part 745). Also see License Requirement Note 3.
2. Chemicals listed in this entry may be shipped NLR when destined to non-States Parties (destinations not listed in Supplement No. 2 to part 745) if supported by an End-Use Certificate described by § 745.2 of the EAR and if the ECCN is indicated on the Shipper’s Export Declaration in the appropriate space as provided in § 758.3 of the EAR. Chemicals listed in this entry require a license when exported to non-States Parties if the export is not supported by an End-Use Certificate described by § 745.2 of the EAR.
3. Chemicals listed in this entry may not be shipped NLR if restrictions of other sections of the EAR apply (e.g., see the end-use and end-user restrictions of part 744 of the EAR and the restrictions that apply to embargoed countries in part 746 of the EAR).
4. Mixtures: Mixtures controlled by this entry that contain certain concentrations of precursor and intermediate chemicals are subject to the following requirements:
   a. Mixtures are controlled under this entry when containing at least one of the chemicals controlled under 1C355.a when the chemical constitutes more than 10 percent of the weight of the mixture.
   b. Mixtures are controlled under this entry when containing at least one of the chemicals controlled under 1C355.b when the chemical constitutes more than 25 percent of the weight of the mixture.
   c. Mixtures containing chemicals identified in this entry are not controlled by ECCN 1C355 when the controlled chemical is a normal ingredient in consumer goods packaged for retail sale for personal use. Such consumer goods are classified as EAR99.

Note to Mixtures: Calculation of concentrations.

a. Exclusion. No chemical may be added to the mixture (solution) for the sole purpose of circumventing the Export Administration Regulations.

b. Absolute Weight Calculation. When calculating the percentage, by weight, of components in a chemical mixture, include all components of the mixture, including those that act as solvents; e.g.,

Example:

11% chemical listed in 1C355.a
39% chemical not listed in 1C355.a
50% Solvent
100% Mixture
11/100 = 11% chemical listed in 1C355.a

In this example, the mixture is controlled under this entry because a chemical listed in 1C355.a constitutes more than 10 percent of the weight of the mixture.

5. Compounds. Compounds created with any chemicals identified in this ECCN 1C355 may be shipped NLR, unless those compounds are also identified in this entry.

Technical Notes: For purposes of this entry, a "mixture" is defined as a solid, liquid or gaseous product made up of two or more components that do not react together under normal storage conditions.

License Exceptions
LVS: N/A.
GBS: N/A.
CIV: N/A.

List of Items Controlled
Unit: Liters or kilograms, as appropriate.
Related Controls: See also ECCNs 1C350 and 1C351. See §§ 742.18 and 745.2 of the EAR for End-Use Certification requirements. See 22 CFR part 121, Category XIV and §121.7 for chloropicrin (trichloronitromethane)(76-06-2) (Schedule 3). Mixture containing chloropicrin (trichloronitromethane) that have been transferred to the Department of Commerce from the Department of State through a commodity jurisdiction determination are controlled under this entry unless exempt by paragraph 4.b. of Licensing Requirements Notes.

Related Definitions: N/A.

Items:
1. CWC Schedule 2 chemicals:
   a. Toxic chemicals:
      a.1.a. PFIB: 1,1,3,3,3-Pentafluoro-2-(trifluoromethyl)-1-propene (382-21-8);
   a.1.b. [Reserved]
   a.2. Precursors:
      a.2.a. FAMILY: Chemicals except for those listed in Schedule 1, containing a phosphorus atom to which is bonded one methyl, ethyl, or propyl (normal or iso) group with no additional carbon atoms in the structure.
NOTE: 1C355.a.2.a does not control Fonofos: O-Ethyl S-phenyl ethylphosphonothiolothionate (944–22–9).

a.2.b. FAMILY: N,N-Dialkyl (Me, Et, n-Pr or i-Pr) phosphoramidic dihalides;

a.2.c. FAMILY: Dialkyl (Me, Et, n-Pr or i-Pr) N,N-dialkyl (Me, Et, n-Pr, or i-Pr)-phosphoramidates;

a.2.d. FAMILY: N,N-Dialkyl (Me, Et, n-Pr or i-Pr) aminoethyl-2-chlorides and corresponding protonated salts;

NOTE: 1C355.a.2.e. does not control N,N-Dimethylaminoethanol and corresponding protonated salts (108–01–0) or N,N-Diethylaminoethanol and corresponding protonated salts (100–37–8).

a.2.e. FAMILY: N,N-Dialkyl (Me, Et, n-Pr or i-Pr) aminoethane-2-ols and corresponding protonated salts;

b. CWC Schedule 3 chemicals:

b.1. Toxic chemicals:

b.1.a. Phosgene: Carbonyl dichloride (75–44–5);

b.1.b. Cyanogen chloride (506–77–4);

b.1.c. Hydrogen cyanide (74–90–8).

b.2. Precursors:

b.2.a. Ethyldiethanolamine (139–87–7);

b.2.b. Methylidethanolamine (105–59–9).

b.3. Mixtures containing chloropicrin (trichloronitromethane) (76–06–2) transferred from the Department of State (see Related Controls).

1C980 Inorganic chemicals listed in Supplement No. 1 to part 754 of the EAR that were produced or derived from the Naval Petroleum Reserves (NPR) or became available for export as a result of an exchange of any NPR produced or derived commodities.

**LIST OF ITEMS CONTROLLED**

**Unit:** $ value.

**Related Controls:** Commercial charges and devices containing USML controlled energetic materials that exceed the quantities noted or that are not covered by this entry are controlled under 1C018.
Related Definitions: (1) Items controlled by this entry 1C992 are those materials not subject to the licensing authority of the U.S. Department of State, Office of Defense Trade Controls (see 22 CFR part 121) or controlled by ECCN 1C018. (2) For purposes of this entry, the term “controlled materials” means controlled energetic materials (see ECCNs 1C011, 1C111, 1C199 and 22 CFR 121.1, Category V). (3) The individual USML controlled energetic materials, even when compounded with other materials, remain subject to the export licensing authority of the Department of State when not incorporated into explosive devices or charges controlled by this entry. (4) Commercial prefabricated slurries and emulsions containing greater than 35% of USML controlled energetic materials are subject to the export licensing authority of the U.S. Department of State, Office of Defense Trade Control. (5) For purposes of this entry, the mass of aluminum powder, potassium perchlorate, and any of the substances listed in the note to the USML (see 22 CFR 121.1) (such as ammonium picrate, black powder, etc.) contained in commercial explosive devices and in the charges are omitted when determining the total mass of controlled material.

Items:

a. Shaped charges specially designed for oil well operations, utilizing one charge functioning along a single axis, that upon detonation produce a hole, and
   a.1. Contain any formulation of controlled materials;
   a.2. Have only a uniform shaped conical liner with an included angle of 90 degrees or less;
   a.3. Contain more than 0.010 kg but less than or equal to 0.090 kg of controlled materials; and
   a.4. Have a diameter not exceeding 4.5 inches;

b. Shaped charges specially designed for oil well operations containing less than or equal to 0.010 kg of controlled materials;

c. Detonation cord or shock tubes containing less than or equal to 0.004 kg per meter (300 grains per foot) of controlled materials;

d. Cartridge power devices, that contain less than or equal to 0.70 kg of controlled materials in the deflagration material;

e. Detonators (electric or nonelectric) and assemblies thereof, that contain less than or equal to 0.01 kg of controlled materials;

f. Igniters, that contain less than or equal to 0.01 kg of controlled materials;

g. Oil well cartridges, that contain less than or equal to 0.015 kg of controlled energetic materials;

h. Commercial cast or pressed boosters containing less than or equal to 1.0 kg of controlled materials;

i. Commercial prefabricated slurries and emulsions containing less than or equal to 10.0 kg and less than or equal to thirty-five percent by weight of USML controlled materials;

j. Cutters and severing tools containing less than or equal to 3.5 kg of controlled materials;

k. Pyrotechnic devices when designed exclusively for commercial purposes (e.g., theatrical stages, motion picture special effects, and fireworks displays) and containing less than or equal to 3.0 kg of controlled materials; or

l. Other commercial explosive devices and charges not controlled by 1C992.a through .k containing less than or equal to 1.0 kg of controlled materials.

NOTE: 1C992.i includes automotive safety devices; extinguishing systems; cartridges for riveting guns; explosive charges for agricultural, oil and gas operations, sporting goods, commercial mining, or public works purposes; and delay tubes used in the assembly of commercial explosive devices.

1C995 Mixtures containing precursor and intermediate chemicals used in the “production” of chemical warfare agents that are not controlled by ECCN 1C350.

1. Items controlled for MT reasons; or
2. Exports and reexports to destinations outside of Austria, Belgium, Canada, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Japan, Luxembourg, the Netherlands, Portugal, Spain, Sweden, or the United Kingdom of “technology” for the “development” or “production” of the following:

   a. Items controlled by 1A002.a which are composite structures or laminates having an organic “matrix” and being made from materials listed under 1C010.c or 1C010.d.

**LIST OF ITEMS CONTROLLED**

**Unit:** N/A

**Related Controls:** See also 1E102, 1E202, and 1E101 for “technology” related to 1E002.e

**Related Definitions:** N/A

**Items:**

- a. “Technology” for the “development” or “production” of polybenzothiazoles or polybenzoxazoles;
- b. “Technology” for the “development” or “production” of fluoroelastomer compounds containing at least one vinyl ether monomer;
- c. “Technology” for the design or “production” of the following base materials or non-“composite” ceramic materials:
  - c.1. Base materials having all of the following characteristics:
    - c.1.a. Any of the following compositions:
      - c.1.a.1. Single or complex oxides of zirconium and complex oxides of silicon or aluminum;
      - c.1.a.2. Single nitrates of boron (cubic crystalline forms);
      - c.1.a.3. Single or complex carbides of silicon or boron; or
      - c.1.a.4. Single or complex nitrates of silicon;
    - c.1.b. Total metallic impurities, excluding intentional additions, of less than:
      - c.1.b.1. 1,000 ppm for single oxides or carbides; or
      - c.1.b.2. 5,000 ppm for complex compounds or single nitrates; and
    - c.1.c. Having any of the following:
      - c.1.c.1. Average particle size equal to or less than 5 µm and no more than 10% of the particles larger than 10 µm; or
      - c.1.c.2. Having all of the following:
        - c.1.c.2.a. Platelets with a length to thickness ratio exceeding 5;
        - c.1.c.2.b. Whiskers with a length to diameter ratio exceeding 10 for diameters less than 2 µm; and
        - c.1.c.2.c. Continuous or chopped fibers less than 10 µm in diameter;
    - c.2. Non-“composite” ceramic materials composed of the materials described in 1E002.c.1;

**NOTE:** 1E002.c.2 does not control technology for the design or production of abrasives.

- d. “Technology” for the “production” of aromatic polyamide fibers;
- e. “Technology” for the installation, maintenance or repair of materials controlled by 1C001;
- f. “Technology” for the repair of “composite” structures, laminates or materials controlled by 1A002, 1C007.c or 1C007.d.

**NOTE:** 1E002.f does not control “technology” for the repair of “civil aircraft” structures using carbon “fibrous or filamentary materials” and epoxy resins, contained in aircraft manufacturers’ manuals.

(2) Quiet running bearings are subject to the export licensing authority of the Department of State, Office of Defense Trade Controls. (See 22 CFR part 121)
Related Definitions: (1) (a) DN is the product of the bearing bore diameter in mm and the bearing rotational velocity in rpm. (b) Operating temperatures include those temperatures obtained when a gas turbine engine has stopped after operation. (2) Annular Bearing Engineers Committee (ABEC); American National Standards Institute (ANSI); Anti-Friction Bearing Manufacturers Association (AFBMA)
Items: a. Ball bearings or Solid ball bearings (except tapered roller bearings), having tolerances specified by the manufacturer in accordance with ABEC 7, ABEC 7P, or ABEC 7T or ISO Standard Class 4 or better (or equivalents) and having any of the following characteristics.
   a.1. Manufactured for use at operating temperatures above 573 K (300°C) either by using special materials or by special heat treatment; or
   a.2. With lubricating elements or component modifications that, according to the manufacturer's specifications, are specially designed to enable the bearings to operate at speeds exceeding 2.3 million DN;
   b. Solid tapered roller bearings, having tolerances specified by the manufacturer in accordance with ANSI/AFBMA Class 00 (inch) or Class A (metric) or better (or equivalents) and having either of the following characteristics.
   b.1. With lubricating elements or component modifications that, according to the manufacturer's specifications, are specially designed to enable the bearings to operate at speeds exceeding 2.3 million DN; or
   b.2. Manufactured for use at operating temperatures below 219 K (−54°C) or above 423 K (150°C).
   c. Gas-lubricated foil bearing manufactured for use at operating temperatures of 561 K (288°C) or higher and a unit load capacity exceeding 1 MPa.
   d. Active magnetic bearing systems.
   e. Fabric-lined self-aligning or fabric-lined journal sliding bearings manufactured for use at operating temperatures below 219 K (−54°C) or above 423 K (150°C).

2A993 Explosive detection systems, consisting of an automated device, or combination of devices, with the ability to detect the presence of different types of explosives, in passenger checked baggage, without need for human skill, vigilance, or judgment.

Related Controls: (1) See also 2B290 and 2B991; (2) See also 1B101.d for cutting equipment designed or modified for removing prepregs and preforms controlled by 9A110.  
Related Definitions: N/A

**Items:**

a. Machine tools for turning, having all of the following characteristics:
   a.1. Positioning accuracy with “all compensations available” of less (better) than 6 µm along any linear axis; and  
   a.2. Two or more axes which can be coordinated simultaneously for “contouring control”;

b. Machine tools for milling, having any of the following characteristics:
   b.1a. Positioning accuracy with “all compensations available” of less (better) than 6 µm along any linear axis; and  
   b.1b. Three linear axes plus one rotary axis which can be coordinated simultaneously for “contouring control”; or  
   b.2. Five or more axes which can be coordinated simultaneously for “contouring control”; or  
   b.3. A positioning accuracy for jigs boring machines, with “all compensations available”, of less (better) than 4 µm along any linear axis;  
   c. Machine tools for grinding, having any of the following characteristics:

**LICENSE REQUIREMENTS**

Reason for Control: NS, NP, AT

Control(s) Country Chart

NP applies to 2B001.a,b,c, and d, EXCEPT: (3) turning machines under 2B001.a with a capacity equal to or less than 35 mm diameter; (2) bar machines (Swissturn), limited to machining only bar feed through, if maximum bar diameter is equal to or less than 42 mm and there is no capability of mounting chucks. (Machines may have drilling and/or milling capabilities for machining parts with diameters less than 42 mm); or (3) milling machines under 2B001.b with x-axis travel greater than two meters and overall “positioning accuracy” on the x-axis more (worse) than 0.030 mm.

AT applies to entire entry .......... AT Column 1

**LICENSE REQUIREMENT NOTES:** See §743.1 of the EAR for reporting requirements for exports under License Exceptions.

**LICENSE EXCEPTIONS**

LVS: N/A  
GBS: N/A  
CIV: N/A

**NOTES FOR CATEGORY 2B:**

1. Secondary parallel contouring axes (e.g., the w-axis on horizontal boring mills or a secondary rotary axis the center line of which is parallel to the primary rotary axis) are not counted in the total number of contouring axes.  
2. A rotary axis can be driven by a linear device (e.g., a screw or a rack-and-pinion).

N.B. Rotary axes need not rotate over 360°.

3. Axis nomenclature shall be in accordance with International Standard ISO 841, “Numerical Control Machines—Axis and Motion Nomenclature”.

4. Guaranteed positioning accuracy levels instead of individual test protocols may be used for each machine tool model using the agreed ISO test procedure.

5. The positioning accuracy of “numerically controlled” machine tools is to be determined and presented in accordance with ISO 230/2.

**2B001 Machine tools (see List of Items Controlled) and any combination thereof, for removing (or cutting) metals, ceramics or “composites”, which, according to the manufacturer’s technical specification, can be equipped with electronic devices for “numerical control”:**

2B003 “Numerically controlled” or manual machine tools, and specially designed components, controllers and accessories thereof, specially designed for the shaving, finishing, grinding or honing of hardened (Rc ≥ 40 or more) spur, helical and double-helical gears with a pitch diameter exceeding 1,250 mm and a face width of 15% of pitch diameter or larger finished to a quality of AGMA 14 or better (equivalent to ISO 1326 class 3).

LICENSE REQUIREMENTS

Reason for Control: NS, AT

Notes: 2B001.c does not control grinding machines, as follows:

1. Cylindrical external, internal, and external-internal grinding machines having all the following characteristics:
   a. Limited to cylindrical grinding; and
   b. Limited to a maximum workpiece capacity of 150 mm outside diameter or length.
2. Machines designed specifically as jig grinders having any of following characteristics:
   a. The c-axis is used to maintain the grinding wheel normal to the work surface; or
   b. The a-axis is configured to grind barrel cams.
3. Tool or cutter grinding machines limited to the production of tools or cutters.
4. Crank shaft or cam shaft grinding machines.
5. Surface grinders.
6. Electrical discharge machines (EDM) of the non-wire type which have two or more rotary axes which can be coordinated simultaneously for “contouring control”;
7. Machine tools for removing metals, ceramics or “composites”:
   a. By means of:
      i. Water or other liquid jets, including those employing abrasive additives;
      ii. Electron beam; or
      iii. “Laser” beam; and
   b. Having two or more rotary axes which:
      i. Can be coordinated simultaneously for “contouring control”; and
      ii. Have a positioning accuracy of less (better) than 0.003°;
8. Deep-hole-drilling machines and turning machines modified for deep-hole-drilling, having a maximum depth-of-bore capability exceeding 5,000 mm and specially designed components therefor.

2B001.c.a. Positioning accuracy with “all compensations available” of less (better) than 4 um along any linear axis; and
2B001.c.b. Three or more axes which can be coordinated simultaneously for “contouring control”; or
2B001.c.2. Five or more axes which can be coordinated simultaneously for “contouring control”;

NOTES: 2B001.c does not control grinding machines, as follows:

1. Cylindrical external, internal, and external-internal grinding machines having all the following characteristics:
   a. Limited to cylindrical grinding; and
   b. Limited to a maximum workpiece capacity of 150 mm outside diameter or length.
2. Machines designed specifically as jig grinders having any of following characteristics:
   a. The c-axis is used to maintain the grinding wheel normal to the work surface; or
   b. The a-axis is configured to grind barrel cams.
3. Tool or cutter grinding machines limited to the production of tools or cutters.
4. Crank shaft or cam shaft grinding machines.
5. Surface grinders.
6. Electrical discharge machines (EDM) of the non-wire type which have two or more rotary axes which can be coordinated simultaneously for “contouring control”;
TECHNICAL NOTE: The inside chamber dimension is that of the chamber in which both the working temperature and the working pressure are achieved and does not include fixtures. That dimension will be the smaller of either the inside diameter of the pressure chamber or the inside diameter of the insulated furnace chamber, depending on which of the two chambers is located inside the other.

2B005 Equipment specially designed for the deposition, processing and in-process control of inorganic overlays, coatings and surface modifications, as follows, for non-electronic substrates, by processes shown in the Table and associated Notes following 2E003, and specially designed automated handling, positioning, manipulation and control components therefor.

    - a.1b. Controlled nucleation thermal deposition (CNTD); or
    - a.1c. Plasma enhanced or plasma assisted CVD; and
  - a.2. Any of the following:
    - a.2a. Incorporating high vacuum (equal to or less than 0.01 Pa) rotating seals; or
    - a.2b. Incorporating in situ coating thickness control;
  - b. "Stored program controlled" ion implantation production equipment having beam currents of 5 mA or more;
  - c. "Stored program controlled" electron beam physical vapor (EB-PVD) production equipment incorporating power systems rated for over 80 kW, having any of the following:
    - c.1. A liquid pool level "laser" control system which regulates precisely the ingots feed rate; or
    - c.2. A computer controlled rate monitor operating on the principle of photo-luminescence of the ionized atoms in the evaporant stream to control the deposition rate of a coating containing two or more elements;
  - d. "Stored program controlled" plasma spraying production equipment having any of the following characteristics:
    - d.1. Operating at reduced pressure controlled atmosphere (equal or less than 10 kPa measured above and within 300 mm of the gun nozzle exit) in a vacuum chamber capable of evacuation down to 0.01 Pa prior to the spraying process; or
    - 2. Incorporating in situ coating thickness control;
  - e. "Stored program controlled" sputter deposition production equipment capable of current densities of 0.1 mA/mm² or higher at a deposition rate 15 µm/h or more;
  - f. "Stored program controlled" cathodic arc deposition equipment incorporating a grid of electromagnets for steering control of the arc spot on the cathode;
  - g. "Stored program controlled" ion plating production equipment having any of the following:
    - g.1. Coating thickness on the substrate and rate control; or
    - g.2 Optical characteristics.
three dimensional length (volumetric) "measurement uncertainty" equal to or less (better) than \((1.7 + L/1,000) \mu m\) \(L\) is the measured length in mm) tested according to ISO 10360-2;

b. Linear and angular displacement measuring instruments, as follows:

b.1. Linear measuring instruments having any of the following:

b.1.a. Non-contact type measuring systems with a "resolution" equal to or less (better) than 0.2 \(\mu m\) within a measuring range up to 0.2 mm;

b.1.b. Linear voltage differential transformer systems having all of the following characteristics:

b.1.b.1. "Linearity" equal to or less (better) than 0.1% within a measuring range up to 5 mm;

b.1.b.2. Drift equal to or less (better) than 0.1% per day at a standard ambient test room temperature \(\pm 1 K\);

b.1.c. Measuring systems having all of the following:

b.1.c.1. Containing a "laser"; and

b.1.c.2. Maintaining, for at least 12 hours, over a temperature range of \(\pm 1 K\) around a standard temperature and at a standard pressure, all of the following:

b.1.c.2.a. A "resolution" over their full scale of 0.1 \(\mu m\) or less (better); and

b.1.c.2.b. A "measurement uncertainty" equal to or less (better) than \((0.2 + L/2,000) \mu m\) \(L\) is the measured length in mm);  

Note: 2B006.b.1 does not control measuring interferometer systems, without closed or open loop feedback, containing a "laser" to measure slide movement errors of machine-tools, dimensional inspection machines or similar equipment.

b.2. Angular measuring instruments having an "angular position deviation" equal to or less (better) than 0.00025 \(°\)

Note: 2B006.b.2 does not control optical instruments, such as autocollimators, using collimated light to detect angular displacement of a mirror.

c. Equipment for measuring surface irregularities, by measuring optical scatter as a function of angle, with a sensitivity of 0.5 nm or less (better).

2B007 "Robots" having any of the following characteristics described in the List of Items Controlled and specially designed controllers and "end-effectors" therefor.

License Requirements

Reason for Control: NS, AT

Control(s) Country Chart

NS applies to entire entry ........ NS Column 2
NOTE: For "laser" systems see also Note to 2B006.b.1.

b. Rotary position feedback units (e.g., inductive type devices, scales, infrared systems or "laser" systems) having an "accuracy" less (better) than 0.00025°;

NOTE: For "laser" systems see also Note to 2B006.b.1.

c. "Compound rotary tables" and "tilting spindles", capable of upgrading, according to the manufacturer’s specifications, machine tools to or above the levels controlled by 2B001 to 2B009.

2B009 Spin-forming machines and flow-forming machines, which, according to the manufacturer’s technical specifications, can be equipped with "numerical control" units or a computer control and having all the characteristics (see List of Items Controlled).

LICENSE REQUIREMENTS

LIST OF ITEMS CONTROLLED

Unit: Equipment in number; parts and accessories in $ value

Related Controls: See also 2B109 for additional flow-forming machines for MT and NP reasons. See also 2B209 for additional flow-forming machines controlled for NP reasons.

Related Definitions: Machines combining the function of spin-forming and flow-forming are for the purpose of 2B009 regarded as flow-forming machines.

Items:
1. Two or more controlled axes of which at least two can be coordinated simultaneously for "contouring control"; and
2. A roller force more than 60 kN.

2B018 Equipment on the International Munitions List.

LICENSE REQUIREMENTS

Reason for Control: NS, MT, RS, AT, UN

Control(s) Country Chart
NS applies to entire entry ........ NS Column 1
MT applies to specialized machinery, equipment, and gear for producing rocket systems (including ballistic missile systems, space launch vehicles, and sounding rockets) and unmanned aerial vehicle systems (including cruise missile systems, target drones, and reconnaissance drones) usable in systems that are controlled for MT reasons including their propulsion systems and components, and pyrolytic deposition and densification equipment.
RS applies to entire entry ........ RS Column 2
AT applies to entire entry ........ AT Column 1
UN applies to entire entry ........ UN Column 2

LICENSE EXCEPTIONS

LVS: $3000, except N/A for Rwanda and the Federal Republic of Yugoslavia (Serbia and Montenegro).
GBS: Yes for Advisory Note in this entry to 2B018, except N/A for Rwanda and the Federal Republic of Yugoslavia (Serbia and Montenegro).
CIV: N/A

LIST OF ITEMS CONTROLLED

Unit: Equipment in number; parts and accessories in $ value

Related Controls: N/A
Related Definitions: N/A

Items: Specialized machinery, equipment, gear, and specially designed parts and accessories therefor, including but not limited to the following, that are specially designed for the examination, manufacture, testing, and checking of arms, appliances, machines, and implements of war: a. Armor plate drilling machines, other than radial drilling machines;
b. Armor plate planing machines;
c. Armor plate quenching presses;
d. Centrifugal casting machines capable of casting tubes 6 feet (183 cm) or more in length, with a wall thickness of 2 inches (5 cm) and over;
e. Gun barrel rifling and broaching machines, and tools therefor;
f. Gun barrel rifling machines;
g. Gun barrel trepanning machines;
h. Gun boring and turning machines;
i. Gun honing machines of 6 feet (183 cm) stroke or more;
j. Gun jump screw lathes;
k. Gun rifling machines;
l. Gun straightening presses;
m. Induction hardening machines for tank turret rings and sprockets;
Pt. 774, Supp. 1

n. Jigs and fixtures and other metal-working implements or accessories of the kinds exclusively designed for use in the manufacture of firearms, ordnance, and other stores and appliances for land, sea, or aerial warfare;
o. Small arms chambering machines;
p. Small arms deep hole drilling machines and drills therefor;
q. Small arms rifling machines;
r. Small arms spill boring machines;
s. Tank turret bearing grinding machines.

ADVISORY NOTE: Licenses are likely to be approved, as administrative exceptions, for export and reexport to Country Group D:1 of equipment used to determine the safety data of explosives, as required by the International Convention on the Transport of Dangerous Goods (C.I.M.) articles 3 and 4 in Annex 1 RID, provided that such equipment will be used only by the railway authorities of current C.I.M. members, or by the Government-accredited testing facilities in those countries, for the testing of explosives to transport safety standards, of the following description:
a. Equipment for determining the ignition and deflagration temperatures;
b. Equipment for steel-shell tests;
c. Drophammers not exceeding 20 kg in weight for determining the sensitivity of explosives to shock;
d. Equipment for determining the friction sensitivity of explosives when exposed to charges not exceeding 36 kg in weight.

2B104 Equipment and process controls designed or modified for densification and pyrolysis of structural composite rocket nozzles and reentry vehicle nose tips.

LIST OF ITEMS CONTROLLED

Unit: $ value

Related Definitions: (1) The term “digital control” refers to equipment, the functions of which are, partly or entirely, automatically controlled by stored and digitally coded electrical signals. (2) The term “bare table” means a flat table, or surface, with no fixture or fitting.

Items: a. Vibration test systems employing feedback or closed loop techniques and incorporating a digital controller, capable of vibrating a system at 10 g RMS or more over the entire range 20 Hz to 2,000 Hz and imparting forces of 50 kN (11,250 lbs.), measured “bare table”, or greater;

b. Digital controllers, combined with specially designed vibration test “software”, with a real-time bandwidth greater than 5 kHz and designed for use with vibration test systems described in 2B116.a;

c. Vibration thrusters (shaker units), with or without associated amplifiers, capable of imparting a force of 50 kN (11,250 lbs.), measured “bare table”, or greater, and usable in vibration test systems described in 2B116.a;

d. Test piece support structures and electronic units designed to combine multiple shaker units into a complete shaker system capable of providing an effective combined force of 50 kN, measured “bare table”, or greater, and usable in vibration test systems described in 2B116.a.

2B201 Machine tools, other than those controlled by 2B001 for removing or cutting metals, ceramics or “composites”, which, according to manufacturer’s technical specification, can be equipped with electronic for simultaneous “contouring control” in two or more axes.

LIST OF ITEMS CONTROLLED

Unit: Equipment in number; parts and accessories in $ value

Related Controls: See also 2B200, 2B991, and 2B202; “Numerical control” units are controlled by their associated “software”.

Related Definition: N/A

Items: a. Machine tools for milling, having any of the following characteristics:

a.1. “Positioning accuracies” with all compensations available less (better) than 0.006 mm along any linear axis (positioning); or

a.2. Two or more contouring rotary axes.

Note: 2B201.a. does not control milling having the following characteristics:

a. X-axis travel greater than 2 m;

b. Overall “positioning accuracy” on the x-axis more (worse) than 0.030 mm.

c. Machine tools for grinding, having any of the following characteristics:

b.1. “Positioning accuracies” with all compensations available less (better) than 0.004 mm along any linear axis (positioning); or

b.2. Two or more contouring rotary axes.

Note: 2B201.b does not control the following grinding machines:

a. Cylindrical external, internal, and external-internal grinding machines having all of the following characteristics:

1. Limited to cylindrical grinding;

2. A maximum workpiece outside diameter or length of 150 mm;

3. Not more than two axes that can be simultaneously for “contouring control”; and

4. No contouring c axis;

b. Jig grinders with axes limited to x, y, c and where c-axis is used to maintain the grinding wheel normal to the work surface, and the a axis is configured to grind barrel cams;

c. Tool or cutter grinding machines with “software” specially designed for the production of tools or cutters;

d. Crankshaft or camshaft grinding machines;

e. Machines for turning, that have “positioning accuracies” with all compensations available less (better) than 0.006 mm along any linear axis (overall positioning) for machines capable of machining diameters greater than 35 mm.

Note: Bar machines (Swissturn), limited to machining only bar feed thru, are excluded if maximum bar diameter is equal to or less than 42 mm and there is no capability of mounting chucks. Machines may have drilling and/or milling capabilities for machining parts with diameters less than 42 mm.

2B204 “Isostatic presses,” not controlled by 2B004 or 2B104, capable of achieving a maximum working pressure of 69 Mpa (10,000 psi) or greater and having a chamber cavity with an inside diameter in excess of 152 mm (6 inches) and specially designed dies, molds, and controls thereof.

Related Definition: (1) Machine tools that can be used as measuring machines are controlled if they meet or exceed the criteria specified for the machine function or the measuring machine function. (2) A machine controlled by 2B206 is controlled if it exceeds the control threshold anywhere within its operating range. (3) The probe used in determining the measurement uncertainty of a dimensional inspection system shall be described in VDI/VDE 2617 parts 2, 3 and 4.

Items: a. Computer controlled or numerically controlled dimensional inspection machines having both of the following characteristics:
   a.1. Two or more axes; and
   a.2. A one-dimensional length “measurement uncertainty” equal to or less (better) than (1.25 + L/1000) µm tested with a probe of “accuracy” of less (better) than 0.2 µm (L is the measured length millimeters) (Ref.: VDI/VDE 2617 Parts 1 and 2);
   b. Systems for simultaneously linear-angular inspection of hemishells having both of the following characteristics:
      b.1. “Measurement uncertainty” along any linear axis equal to less (better) than 3.5 µm per 5 mm; and
      b.2. “Angular position deviation” equal to or less than 0.02°.

2B207 “Robots” or “end-effectors”, other than those controlled by 2B007, specially designed to comply with national safety standards applicable to handling high explosives (for example, meeting code ratings for high explosives) and specially designed controllers therefor.

Items: a. Rotor assembly equipment for assembly of gas centrifuge rotor sections, baffles and end caps, including associated precision mandrels, clamps and shrink fit machines; or
b. Rotor straightening equipment for alignment of gas centrifuge rotor sections to a common axis.

TECHNICAL NOTE: Normally such equipment will consist of precision measuring probes linked to a computer that subsequently controls the action of, for example, pneumatic
rams used for aligning the rotor tube sections.

c. Bellows-forming mandrels and dies for producing single-convolution bellows (bellows made of high-strength aluminum alloys, maraging steel or high strength filamentary materials). The bellows have all of the following dimensions:
c.1. 75 mm to 400 mm inside diameter;
c.2. 12.7 mm or more in length; and

c.3. Single convolution depth more than 2 mm.

2B229 Centrifugal multiplane balancing machines, fixed or portable, horizontal or vertical, as follows (see List of Items Controlled).

a. Centrifugal balancing machines designed for balancing flexible rotors having a length of 600 mm or more and having all of the following characteristics:
a.1. A swing or journal diameter of 75 mm or more;
a.2. Mass capability of from 0.9 to 23 kg; and
a.3. Capable of balancing speed of revolution more than 5000 r.p.m.;

b. Centrifugal balancing machines designed for balancing hollow cylindrical rotor components and having all of the following characteristics:
b.1. A journal diameter of 75 mm or more;
b.2. Mass capability of from 0.9 to 23 kg;
b.3. Capable of balancing to a residual imbalance of 0.01 kg mm/kg per plane or better; and
b.4. Belt drive type.

2B230 “Pressure transducers” which are capable of measuring absolute pressure at any point in the range 0 to 13 kPa, with pressure sensing elements made of or protected by nickel, nickel alloys with more than 60% nickel by weight, aluminum or aluminum alloys, having any of the characteristics (see List of Items Controlled).

**Unit:** Equipment in number.

**Related Controls:** The controls in this entry do not apply to equipment that is: (a) specially designed for use in civil applications (e.g., food processing, pulp and paper processing, or water purification); and (b) inappropriate, by the nature of its design, for use in storing, processing, producing or conducting and controlling the flow of chemical weapons precursors controlled by 1C350.

**Related Definitions:** For purposes of this entry the term “chemical warfare agents” are those agents subject to the export licensing authority of the U.S. Department of State, Office of Defense Trade Controls. (See 22 CFR part 121)

**Items:**

- a. Reaction vessels or reactors, with or without agitators, with total internal (geometric) volume greater than 0.1 m³ (100 liters) and less than 20 m³ (20,000 liters), where all surfaces that come in direct contact with the chemical(s) being processed or contained are made from any of the following materials:
  - 1. Alloys with more than 25% nickel and 20% chromium by weight;
  - 2. Fluoropolymers;
  - 3. Glass (including vitrified or enamelled coating or glass lining);
  - 4. Nickel or alloys with more than 40% nickel by weight;
  - 5. Tantalum or tantalum alloys;
  - 6. Titanium or titanium alloys; or
  - 7. Zirconium or zirconium alloys;
- b. Agitators for use in reaction vessels or reactors where all surfaces of the agitator that come in direct contact with the chemical(s) being processed or contained are made from any of the following materials:
  - 1. Alloys with more than 25% nickel and 20% chromium by weight;
  - 2. Fluoropolymers;
  - 3. Glass (including vitrified or enamelled coatings or glass lining);
  - 4. Nickel or alloys with more than 40% nickel by weight;
  - 5. Tantalum or tantalum alloys;
  - 6. Titanium or titanium alloys; or
  - 7. Zirconium or zirconium alloys;
- c. Storage tanks, containers or receivers with a total internal (geometric) volume greater than 0.1 m³ (100 liters) where all surfaces that come in direct contact with the chemical(s) being processed or contained are made from any of the following materials:
  - 1. Alloys with more than 25% nickel and 20% chromium by weight;
  - 2. Fluoropolymers;
  - 3. Glass (including vitrified or enamelled coatings or glass lining);
  - 4. Nickel or alloys with more than 40% nickel by weight;
  - 5. Tantalum or tantalum alloys;
  - 6. Titanium or titanium alloys; or
  - 7. Zirconium or zirconium alloys;
- d. Heat exchangers or condensers with a heat transfer surface area of less than 20 m², where all surfaces that come in direct contact with the chemical(s) being processed are made from any of the following materials:
  - 1. Alloys with more than 25% nickel and 20% chromium by weight;
  - 2. Fluoropolymers;
  - 3. Glass (including vitrified or enamelled coatings or glass lining);
d.4 Graphite;
d.5 Nickel or alloys with more than 40% nickel by weight;
d.6 Tantalum or tantalum alloys;
d.7 Titanium or titanium alloys; or
d.8 Zirconium or zirconium alloys;
e. Distillation or absorption columns of internal diameter greater than 0.1 m, where all surfaces that come in direct contact with the chemical(s) being processed are made from any of the following materials:
e.1 Alloys with more than 25% nickel and 20% chromium by weight;
e.2 Fluoropolymers;
e.3 Glass (including vitrified or enamelled coatings or glass lining);
e.4 Graphite;
e.5 Nickel or alloys with more than 40% nickel by weight;
e.6 Tantalum or tantalum alloys;
e.7 Titanium or titanium alloys; or

e.8 Zirconium or zirconium alloys;
f. Remotely operated filling equipment in which all surfaces that come in direct contact with the chemical(s) being processed are made from any of the following materials:
f.1 Alloys with more than 25% nickels and 20% chromium by weight, or
f.2 Nickel or alloys with more than 40% nickel by weight;
g. Multiple seal valves incorporating a leak detection port, bellows-seal valves, non-return (check) valves or diaphragm valves, in which all surfaces that come into direct contact with the chemical(s) being processed or contained are made from any of the following materials:
g.1 Alloys with more than 25% nickel and 20% chromium by weight;
g.2 Fluoropolymers;
g.3 Glass (including vitrified or enamelled coatings or glass lining);
g.4 Nickel or alloys with more than 40% nickel by weight;
g.5 Tantalum or tantalum alloys;
g.6 Titanium or titanium alloys; or
g.7 Zirconium or zirconium alloys;
h. Multi-walled piping incorporating a leak detection port, in which all surfaces that come in direct contact with the chemical(s) being processed or contained are made from any of the following materials:
h.1 Alloys with more than 25% nickel and 20% chromium by weight;
h.2 Fluoropolymers;
h.3 Glass (including vitrified or enamelled coatings or glass lining);
h.4 Graphite;
h.5 Nickel or alloys with more than 40% nickel by weight;
h.6 Tantalum or tantalum alloys;
h.7 Titanium or titanium alloys; or
h.8 Zirconium or zirconium alloys;
i. Multiple seal, canned drive, magnetic drive, bellows or diaphragm pumps, with manufacturer’s specified maximum flow-rate greater than 5 \(\text{m}^3/\text{h}\) or vacuum pumps with manufacturer’s specified maximum flow-rate greater than 5 \(\text{m}^3/\text{h}\) (under standard temperature (273 K (0°C)) and pressure (101.3 kPa) conditions), in which all surfaces that come into direct contact with the chemical(s) being processed are made from any of the following materials:
i.1 Alloys with more than 25% nickel and 20% chromium by weight;
i.2 Ceramics;
i.3 Ferrosilicon;
i.4 Fluoropolymers;
i.5 Glass (including vitrified or enamelled coatings or glass lining);
i.6 Graphite;
i.7 Nickel or alloys with more than 40% nickel by weight;
i.8 Tantalum or tantalum alloys;
i.9 Titanium or titanium alloys;
i.10 Zirconium or zirconium alloys;

2B351 Toxic gas monitoring systems and dedicated detectors therefor.

List of Items Controlled
Unit: Equipment in number.
Related Controls: N/A.
Related Definitions: N/A.
Items: a. Designed for continuous operation and usable for the detection of chemical warfare agents or chemicals controlled by 1C350 at concentrations of less than 0.3 mg/m³
b. Designed for the detection of cholinesterase-inhibiting activity.

Technical Note: Toxic Gas Monitoring Systems, controlled under 2B351a, include those with detection capability for chemicals containing phosphorus, sulfur, fluorine.
or chlorine, other than those specified in 1C350.

2B352 Equipment capable of use in handling biological materials, as follows (see List of Items Controlled).

LIST OF ITEMS CONTROLLED
Unit: Equipment in number
Related Controls: N/A
Related Definitions: For purposes of this entry, isolators include flexible isolators, dry boxes, anaerobic chambers and glove boxes.

Items: a. Complete containment facilities at P3 or P4 containment level;

TECHNICAL NOTE: P3 or P4 (BL3, BL4, L3, L4) containment levels are as specified in the WHO Laboratory Biosafety Manual (Geneva, 1983).

b. Fermenters capable of cultivation of pathogenic microorganisms, viruses, or for toxin production, without the propagation of aerosols, having a capacity equal to or greater than 100 liters.

TECHNICAL NOTE: Fermenters include bio-reactors, chemostats, and continuous-flow systems.

c. Centrifugal separators capable of the continuous separation of pathogenic microorganisms, without the propagation of aerosols, and having all of the following characteristics:

c.1. A flow rate greater than 100 liters per hour;

c.2. Components of polished stainless steel or titanium;

c.3. Double or multiple sealing joints within the steam containment area; and

c.4. Capable of in situ steam sterilization in a closed state.

TECHNICAL NOTE: Centrifugal separators include decanters.

d. Cross-flow filtration equipment capable of continuous separation of pathogenic microorganisms, viruses, toxins, and cell cultures without the propagation of aerosols, having all of the following characteristics:

d.1. Equal to or greater than 5 square meters;

d.2. Capable of in situ sterilization.

e. Steam sterilizable freeze-drying equipment with a condenser capacity greater than 50 kgs of ice in 24 hours but less than 1,000 kgs;

f. Equipment that incorporates or is contained in P3 or P4 containment housing, as follows:

f.1. Independently ventilated protective full or half suits;

f.2. Class III biological safety cabinets or isolators with similar performance standards;

f.3. Chambers designed for aerosol challenge testing with microorganisms, viruses, or toxins and having a capacity of 1 m$^3$ or greater.

2B991 Numerical control units for machine tools and “numerically controlled” machine tools, n.e.s.

LIST OF ITEMS CONTROLLED
Unit: Equipment in number
Related Controls: N/A
Related Definitions: N/A

Items:

a. “Numerical control” units for machine tools:

a.1. Having four interpolating axes that can be coordinated simultaneously for “contouring control”;

a.2. Having two or more axes that can be coordinated simultaneously for “contouring control” and a minimum programmable increment better (less) than 0.001 mm;

a.3. “Numerical control” units for machine tools having two, three or four interpolating axes that can be coordinated simultaneously for “contouring control”, and capable of receiving directly (on-line) and processing computer-aided-design (CAD) data for internal preparation of machine instructions;

b. “Motion control boards” specially designed for machine tools and having any of the following characteristics:

b.1. Interpolation in more than four axes;

b.2. Capable of “real time processing” of data to modify tool path, feed rate and spindle data, during the machining operation, by any of the following:

b.2.a. Automatic calculation and modification of part program data for machining in two or more axes by means of measuring cycles and access to source data; or

b.2.b. “Adaptive control” with more than one physical variable measured and processed by means of a computing model (strategy) to change one or more machining instructions to optimize the process.
b.3. Capable of receiving and processing CAD data for internal preparation of machine instructions; or
c. “Numerically controlled” machine tools that, according to the manufacturer's technical specifications, can be equipped with electronic devices for simultaneous “contouring control” in two or more axes and that have both of the following characteristics:
c.1. Two or more axes that can be coordinated simultaneously for contouring control; and
c.2. “Positioning accuracies”, with all compensations available:
c.2.a. Better than 0.020 mm along any linear axis (overall positioning) for grinding machines;
c.2.b. Better than 0.020 mm along any linear axis (overall positioning) for milling machines;
c.2.c. Better than 0.020 mm along any linear axis (overall positioning) for turning machines; or
d. Machine tools, as follows, for removing or cutting metals, ceramics or composites, that, according to the manufacturer's technical specifications, can be equipped with electronic devices for simultaneous “contouring control” in two or more axes:
d.1. Machine tools for turning, grinding, milling or any combination thereof, having two or more axes that can be coordinated simultaneously for “contouring control” and having any of the following characteristics:
d.1.a. One or more contouring “tilting spindles”; 
NOTE: 2B991.d.1.a. applies to machine tools for grinding or milling only.
d.1.b. “Camming” (axial displacement) in one revolution of the spindle less (better) than 0.0006 mm total indicator reading (TIR); 
NOTE: 2B991.d.1.b. applies to machine tools for turning only.
d.1.c. “Run out” (out-of-round) in one revolution of the spindle less (better) than 0.0006 mm total indicator reading (TIR); 
d.1.d. The “positioning accuracies”, with all compensations available, are less (better) than 0.001° on any rotary axis;
d.2. Electrical discharge machines (EDM) of the wire feed type that have five or more axes that can be coordinated simultaneously for “contouring control”.

2B993 Gearmaking and/or finishing machinery not controlled by 2B003 capable of producing gears to a quality level of better than AGMA 11.

LIST OF ITEMS CONTROLLED
Unit: Equipment in number
Related Controls: N/A
Related Definitions: N/A

Items:
a. Turning machines using a single point cutting tool and having all of the following characteristics:
a.1. Slide positioning accuracy less (better) than 0.0005 mm per 300 mm of travel;
a.2. Bidirectional slide positioning repeatability less (better) than 0.0005 mm per 300 mm of travel;
a.3. Spindle “run out” and “camming” less (better) than 0.0004 mm total indicator reading (TIR);
a.4. Angular deviation of the slide movement (yaw, pitch and roll) less (better) than 2 seconds of arc, TIR, over full travel; and
a.5. Slide perpendicularity less (better) than 0.001 mm per 300 mm of travel;

TECHNICAL NOTE: The bidirectional slide positioning repeatability (R) of an axis is the maximum value of the repeatability of positioning at any position along or around the axis determined using the procedure and under the conditions specified in part 2.11 of ISO 230-2: 1998.
b. Fly cutting machines having all of the following characteristics:
b.1. Spindle “run out” and “camming” less (better) than 0.0004 mm TIR; and
b.2. Angular deviation of slide movement (yaw, pitch and roll) less (better) than 2 seconds of arc, TIR, over full travel.

NP applies to "technology" for NP Column 1
CB applies to "technology" for CB Column 3

LICENSE EXCEPTIONS

CIV: N/A
TSR: Yes, except N/A for MT

LIST OF ITEMS CONTROLLED

Unit: N/A
Related Controls: N/A
Related Definitions: N/A

Items: The list of items controlled is contained in the ECCN heading.

2E002 "Technology" according to the General Technology Note for the "production" of equipment controlled by 2A (except 2A991, 2A993, or 2A994), 2B (except 2B991, 2B993, 2B996, 2B997, or 2B998).

LICENSE REQUIREMENTS

Reason for Control: NS, MT, NP, CB, AT
b.1. "Technology" for the design of tools, dies or fixtures specially designed for any of the following processes:

b.1.a. "Superplastic forming";
b.1.b. "Diffusion bonding"; or
b.1.c. "Direct-acting hydraulic pressing";

b.2. Technical data consisting of process methods or parameters as listed below used to control:

b.2.a. "Superplastic forming" of aluminum alloys, titanium alloys or "superalloys":
   b.2.a.1. Surface preparation;
   b.2.a.2. Strain rate;
   b.2.a.3. Temperature;
   b.2.a.4. Pressure;

b.2.b. "Diffusion bonding" of "superalloys" or titanium alloys:
   b.2.b.1. Surface preparation;
   b.2.b.2. Temperature;
   b.2.b.3. Pressure;

b.2.c. "Direct-acting hydraulic pressing" of aluminum alloys or titanium alloys:
   b.2.c.1. Pressure;
   b.2.c.2. Cycle time;

b.2.d. "Hot isostatic densification" of titanium alloys, aluminum alloys or "superalloys":
   b.2.d.1. Temperature;
   b.2.d.2. Pressure;
   b.2.d.3. Cycle time;

b.3. "Technology" for the "development" or "production" of hydraulic stretch-forming machines and dies therefor, for the manufacture of airframe structures;

b.4. "Technology" for the "development" of generators of machine tool instructions (e.g., part programs) from design data residing inside "numerical control" units;

d. "Technology" for the "development" of "technology" for the "development" of integrations "software" for incorporation of expert systems for advanced decision support of shop floor operations into "numerical control" units;

e. "Technology" for the "application" of inorganic overlay coatings or inorganic surface modification coatings (specified in column 3 of the following table) to non-electronic substrates (specified in column 2 of the following table), by processes specified in column 1 of the following table and defined in the Technical Note.

N.B. This table should be read to control the technology of a particular "Coating Process" only when the "Resultant Coating" in column 3 is in a paragraph directly across from the relevant "Substrate" under column 2. For example, Chemical Vapor Deposition (CVD) coating process technical data are controlled for the application of "silicides" to "alloys", but are not controlled for the application of "silicides" to "Cemented tungsten carbide (16), Silicon carbide (18)" substrates. In the second case, the "Resultant Coating" is not listed in the paragraph under column 3 directly across from the paragraph under column 2 listing "Cemented tungsten carbide (16), Silicon carbide (18)".

1 The numbers in parenthesis refer to the Notes following this Table.
NOTES TO TABLE ON DEPOSITION TECHNIQUES

1. The term 'coating process' includes coating repair and refurbishing as well as original coating.
2. The term 'alloyed aluminide coating' includes single or multiple-step coatings in which an element or elements are deposited prior to or during application of the aluminide coating, even if these elements are deposited by another coating process. It does not, however, include the multiple use of single-step pack cementation processes to achieve alloyed aluminides.
3. The term 'noble metal modified aluminide' coating includes multiple-step coatings in which the noble metal or noble metals are laid down by some other coating process prior to application of the aluminide coating.
4. The term 'mixtures thereof' includes infiltrated material, graded compositions, codeposits and multilayer deposits and are obtained by one or more of the coating processes specified in the Table.
5. MCrAlX refers to a coating alloy where M equals cobalt, iron, nickel or combinations thereof and X equals hafnium, yttrium, silicon, tantalum in any amount or other intentional additions over 0.01 weight percent in various proportions and combinations, except:
   a. CoCrAlY coatings which contain less than 22 weight percent of chromium, less than 7 weight percent of aluminum and less than 2 weight percent of yttrium;
   b. CoCrAlY coatings which contain 22 to 24 weight percent of chromium, 10 to 12 weight percent of aluminum and 0.5 to 0.7 weight percent of yttrium; or
   c. NiCrAlY coatings which contain 21 to 23 weight percent of chromium, 10 to 12 weight percent of aluminum and 0.9 to 1.1 weight percent of yttrium.
6. The term 'aluminum alloys' refers to alloys having an ultimate tensile strength of 100 MPa or more measured at 293 K (20°C).
7. The term 'corrosion resistant steel' refers to AISI (American Iron and Steel Institute) 300 series or equivalent national standard steels.
8. 'Refractory metals and alloys' include the following metals and their alloys: niobium (columbium), molybdenum, tungsten and tantalum.
9. 'Sensor window materials', as follows: alumina, silicon, germanium, zinc sulphide, zinc selenide, gallium arsenide, diamond, gallium phosphide, sapphire and the following metal halides: sensor window materials of more than 40 mm diameter for zirconium fluoride and hafnium fluoride.
10. 'Technology' for single-step pack cementation of solid airfoils is not controlled by this Category.
11. 'Polymers', as follows: polyimide, polyester, polysulfide, polycarbonate and polyurethanes.
12. 'Modified zirconia' refers to additions of other metal oxides, (e.g., calcia, magnesia, yttria, hafnia, rare earth oxides) to zirconia in order to stabilize certain crystallographic phases and phase compositions. Thermal barrier coatings made of zirconia, modified with calcia or magnesia by mixing or fusion, are not controlled.
13. 'Titanium alloys' refers only to aerospace alloys having an ultimate tensile strength of 900 MPa or more measured at 293 K (20°C).
14. 'Low-expansion glasses' refers to glasses which have a coefficient of thermal expansion of $1 \times 10^{-7} \text{K}^{-1}$ or less measured at 293 K (20°C).
15. 'Dielectric layers' coatings constructed of multi-layers of insulator materials in which the interference properties of a design composed of materials of various refractive indices are used to reflect, transmit or absorb various wavelength bands. Dielectric layers refers to more than four dielectric layers or dielectric/metal 'composite' layers.
16. 'Cemented tungsten carbide' does not include cutting and forming tool materials consisting of tungsten carbide(cobalt, nickel), titanium carbide(cobalt, nickel), chromium carbide(hydrogen)chromium carbide(nickel).
17. 'Technology' specially designed to deposit diamond-like carbon on any of the following is not controlled: magnetic disk drives and heads, polycarbonate eyeglasses, equipment for the manufacture of disposals, bakery equipment, valves for faucets, acoustic diaphragms for speakers, engine parts for automobiles, cutting tools, punching Pressing dies, high quality lenses designed for cameras or telescopes, office automation equipment, microphones or medical devices.
18. 'Silicon carbide' does not include cutting and forming tool materials.
19. Ceramic substrates, as used in this entry, does not include ceramic materials containing 5% by weight, or greater, clay or cement content, either as separate constituents or in combination.

TECHNICAL NOTE TO TABLE ON DEPOSITION TECHNIQUES: Processes specified in Column 1 of the Table are defined as follows:

a. Chemical Vapor Deposition (CVD) is an overlay coating or surface modification coating process wherein a metal, alloy, 'composite', dielectric or ceramic is deposited upon a heated substrate. Gaseous reactants are decomposed or combined in the vicinity of a substrate resulting in the deposition of the desired elemental, alloy or compound material on the substrate. Energy for this decomposition or chemical reaction process

660
may be provided by the heat of the substrate, a glow discharge plasma, or "laser" irradiation.

**NOTE 1:** CVD includes the following processes: directed gas flow out-of-pack deposition, pulsating CVD, controlled nucleation thermal decomposition (CNTD), plasma enhanced or plasma assisted CVD processes.

**NOTE 2:** Pack denotes a substrate immersed in a powder mixture.

**NOTE 3:** The gaseous reactants used in the out-of-pack process are produced using the same basic reactions and parameters as the pack cementation process, except that the substrate to be coated is not in contact with the powder mixture.

b. Thermal Evaporation-Physical Vapor Deposition (TE-PVD) is an overlay coating process conducted in a vacuum with a pressure less than 0.1 Pa wherein a source of thermal energy is used to vaporize the coating material. This process results in the condensation, or deposition, of the evaporated species onto appropriately positioned substrates. The addition of gases to the vacuum chamber during the coating process to synthesize compound coatings is an ordinary modification of the process. The use of ion or electron beams, or plasma, to activate or assist the coating's deposition is also a common modification in this technique. The use of monitors to provide in-process measurement of optical characteristics and thicknesses of coatings can be a feature of these processes. Specific TE-PVD processes are as follows:

1. **Electron Beam PVD** uses an electron beam to heat and evaporate the material which forms the coating;
2. **Ion Assisted Resistive Heating PVD** employs electrically resistive heating sources in combination with impinging ion beam(s) to produce a controlled and uniform flux of evaporated coating species;
3. **"Laser" Vaporization** uses either pulsed or continuous wave "laser" beams to vaporize the material which forms the coating;
4. **Cathodic Arc Deposition** employs a consumable cathode of the material which forms the coating and has an arc discharge established on the surface by a momentary contact of a ground trigger. Controlled motion of arcing erodes the cathode surface creating a highly ionized plasma. The anode can be either a cone attached to the periphery of the cathode, through an insulator, or the chamber. Substrate biasing is used for non-line-of-sight deposition.

**NOTE:** This definition does not include random cathodic arc deposition with non-biased substrates.

5. **Ion Plating** is a special modification of a general TE-PVD process in which a plasma or an ion source is used to ionize the species to be deposited, and a negative bias is applied to the substrate in order to facilitate the extraction of the species from the plasma. The introduction of reactive species, evaporation of solids within the process chamber, and the use of monitors to provide in-process measurement of optical characteristics and thicknesses of coatings are ordinary modifications of the process.

**c. Pack Cementation** is a surface modification coating or overlay coating process wherein a substrate is immersed in a powder mixture (a pack), that consists of:

- 1. The metallic powders that are to be deposited (usually aluminum, chromium, silicon or combinations thereof);
- 2. An activator (normally a halide salt);
- 3. An inert powder, most frequently alumina.

**NOTE:** The substrate and powder mixture is contained within a retort which is heated to between 1,030 K (757 °C) to 1,375 K (1,102 °C) for sufficient time to deposit the coating.

d. **Plasma Spraying** is an overlay coating process wherein a gun (spray torch) which produces and controls a plasma accepts powder or wire coating materials, melts them and propels them towards a substrate, wherein an integrally bonded coating is formed. Plasma spraying constitutes either low pressure plasma spraying or high velocity plasma spraying.

**NOTE 1:** Low pressure means less than ambient atmospheric pressure.

**NOTE 2:** High velocity refers to nozzle-exit gas velocity exceeding 750 m/s calculated at 293 K (20 °C) at 0.1 MPa.

e. **Slurry Deposition** is a surface modification coating or overlay coating process wherein a metallic or ceramic powder with an organic binder is suspended in a liquid and is applied to a substrate by either spraying, dipping or painting, subsequent air or oven drying, and heat treatment to obtain the desired coating.

f. **Sputter Deposition** is an overlay coating process based on a momentum transfer phenomenon, wherein positive ions are accelerated by an electric field towards the surface of a target (coating material). The kinetic energy of the impacting ions is sufficient to cause target surface atoms to be released and deposited on an appropriately positioned substrate.

**NOTE:** The Table refers only to triode, magnetron or reactive sputter deposition which is used to increase adhesion of the coating and rate of deposition and to radio frequency (RF) augmented sputter deposition used to permit vaporization of non-metallic coating materials.

**NOTE 2:** Low-energy ion beams (less than 5 keV) can be used to activate the deposition.

g. **Ion Implantation** is a surface modification coating process in which the element to be alloyed is ionized, accelerated through a
potential gradient and implanted into the surface region of the substrate. This includes processes in which ion implantation is performed simultaneously with electron beam physical vapor deposition or sputter deposition.

ACCOMPANYING TECHNICAL INFORMATION TO TABLE ON DEPOSITION TECHNIQUES:
1. “Technology” for pretreatments of the substrates listed in the Table, as follows:
   a. Chemical stripping and cleaning bath cycle parameters, as follows:
      1. Bath composition;
      2. For the removal of old or defective coatings corrosion product or foreign deposits;
      3. For preparation of virgin substrates;
      4. Time in bath;
      5. Temperature of bath;
   b. Visual and macroscopic criteria for acceptance of the cleaned part;
   c. Heat treatment cycle parameters, as follows:
      1. Atmosphere parameters, as follows:
         a. Composition of the atmosphere;
         b. Pressure of the atmosphere;
         c. Temperature for heat treatment;
         d. Time of heat treatment;
      2. Substrate surface preparation parameters, as follows:
         a. Grit blasting parameters, as follows:
            1. Grit composition;
            2. Grit size and shape;
            3. Grit velocity;
         b. Time and sequence of cleaning cycle after grit blast;
         c. Surface finish parameters;
         d. Application of binders to promote adhesion;
         e. Masking technique parameters, as follows:
            1. Material of mask;
            2. Location of mask;
   2. “Technology” for in situ quality assurance techniques for evaluation of the coating processes listed in the Table, as follows:
      a. Atmosphere parameters, as follows:
         1. Composition of the atmosphere;
         2. Pressure of the atmosphere;
         3. Temperature parameters;
      b. Thickness parameters;
      c. Index of refraction parameters;
      d. Control of composition;
      3. “Technology” for post deposition treatments of the coated substrates listed in the Table, as follows:
         a. Shot peening parameters, as follows:
            1. Shot composition;
            2. Shot size;
            3. Shot velocity;
         b. Post shot peening cleaning parameters;
         c. Heat treatment cycle parameters, as follows:
            1. Atmosphere parameters, as follows:
               a. Composition of the atmosphere;
               b. Pressure of the atmosphere;
               c. Time-temperature cycles;
               d. Post heat treatment visual and macroscopic criteria for acceptance of the coated substrates;
               e. "Technology" for quality assurance techniques for the evaluation of the coated substrates listed in the Table, as follows:
                  a. Statistical sampling criteria;
                  b. Microscopic criteria for:
                     1. Magnification;
                     2. Coating thickness, uniformity;
                     3. Coating integrity;
                     4. Coating composition;
                     5. Coating and substrates bonding;
                     6. Microstructural uniformity.
                  c. Criteria for optical properties assessment (measured as a function of wavelength):
                     1. Reflectance;
                     2. Transmission;
                     3. Absorption;
                     4. Scatter;
                  5. "Technology" and parameters related to specific coating and surface modification processes listed in the Table, as follows:
                     a. For Chemical Vapor Deposition (CVD):
                        1. Coating source composition and formulation;
                        2. Carrier gas composition;
                        3. Substrate temperature;
                        4. Time-temperature-pressure cycles;
                        5. Gas control and part manipulation;
                     b. For Thermal Evaporation-Physical Vapor Deposition (PVD):
                        1. Ingot or coating material source composition;
                        2. Substrate temperature;
                        3. Reactive gas composition;
                        4. Ingot feed rate or material vaporization rate;
                        5. Time-temperature-pressure cycles;
                        6. Beam and part manipulation;
                        7. "Laser" parameters, as follows:
                           a. Wave length;
                           b. Power density;
                           c. Pulse length;
                           d. Repetition ratio;
                           e. Source;
                     c. For Pack Cementation:
                        1. Pack composition and formulation;
                        2. Carrier gas composition;
                        3. Substrate temperature;
                        4. Time-temperature-pressure cycles;
                        5. Gas control and part manipulation;
                     d. For Plasma Spraying:
                        1. Powder composition, preparation and size distributions;
                        2. Feed gas composition and parameters;
                        3. Substrate temperature;
                        4. Gun power parameters;
                        5. Spray distance;
                        6. Spray angle;
                        7. Cover gas composition, pressure and flow rates;
                        8. Gun control and part manipulation;
                     e. For Sputter Deposition:

A. SYSTEMS, EQUIPMENT AND COMPONENTS

Note 1: The control status of equipment and components described in 3A001 or 3A002, other than those described in 3A001.a.3 to 3A001.a.10 or 3A001.a.12, which are specially designed for or which have the same functional characteristics as other equipment is determined by the control status of the other equipment.

Note 2: The control status of integrated circuits described in 3A001.a.3 to 3A001.a.9 or 3A001.a.12 that are unalterably programmed or designed for a specific function for other equipment is determined by the control status of the other equipment.

N.B.: When the manufacturer or applicant cannot determine the control status of the other equipment, the control status of the integrated circuits is determined in 3A001.a.3 to 3A001.a.9 and 3A001.a.12. If the integrated circuit is a silicon-based “microcomputer microcircuit” or microcontroller microcircuit described in 3A001.a.3 having an operating (data) word length of 8 bit or less, the control status of the integrated circuit is determined in 3A001.a.3.

3A001 Electronic components, as follows (see List of Items Controlled).

LICENSE REQUIREMENTS
Reason for Control: NS, MT, AT
NS applies to entire entry ........ NS Column 2
MT applies to 3A001.a.1a .......... MT Column 1
AT applies to entire entry ........ AT Column 1

LICENSE EXCEPTIONS
LVS: N/A for MT
$1500: 3A001.c
$3000: 3A001.a.1, b.1, b.2, b.3, b.4, and .c to .f
$5000: 3A001.a, and b.4 to b.7
GBS: Yes, except 3A001.a.1, a.2, a.3a (for processors with a cycle time greater than 3500 Mips), a.5, a.6, a.9, a.10, and a.12, .b, .c, .d, .e, and .f
CIV: Yes, except 3A001.a.1, a.2, a.3a

LIST OF ITEMS CONTROLLED
Unit: Number
Related Controls: See also 3A101, 3A201, and 3A991
Related Definitions: For the purposes of integrated circuits in 3A001.a.1, 5 x 10^9 Gy(Si) = 5 x 10^9 Rads (Si); 5 x 10^8 Gy (Si) = 5 x 10^8 Rads (Si). Items:

a. General purpose integrated circuits, as follows:
Bureau of Export Administration, Commerce

**NOTE 1:** The control status of wafers (finished or unfinished), in which the function has been determined, is to be evaluated against the parameters of 3A.001.a.

**NOTE 2:** Integrated circuits include the following types:
- "Monolithic integrated circuits";
- "Hybrid integrated circuits";
- "Multichip integrated circuits";
- "Film type integrated circuits", including silicon-on-sapphire integrated circuits;
- "Optical integrated circuits".

a. Integrated circuits, designed or rated as radiation hardened to withstand any of the following:
   - a.1. A total dose of 5 x 10^9 Gy (Si), or higher; or
   - a.1.b. A dose rate upset of 5 x 10^9 Gy (Si)/s, or higher;
   - a.2. Integrated circuits described in 3A.001.a.3 to 3A.001.a.10 or 3A.001.a.12, electrical erasable programmable read-only memories (EEPROMs), flash memories and static random-access memories (SRAMs), having any of the following:
     - a.2.a. Rated for operation at an ambient temperature above 398 K (125 °C);
     - a.2.b. Rated for operation at an ambient temperature below 218 K (−55 °C); or
     - a.2.c. Rated for operation over the entire ambient temperature range from 218 K (−55 °C) to 398 K (125 °C);

**NOTE:** 3A.001a.2 does not apply to integrated circuits for civil automobiles or railway train applications.

a.3. "Microprocessor microcircuits", "micro-computer microcircuits" and microcontroller microcircuits, having any of the following characteristics:

**NOTE:** 3A.001.a.3 includes digital signal processors, digital array processors and digital coprocessors.

a.3.a. A "composite theoretical performance" ("CTP") of 260 million theoretical operations per second (Mtops) or more and an arithmetic logic unit with an access width of 32 bit or more;

a.3.b. Manufactured from a compound semiconductor and operating at a clock frequency exceeding 40 MHz; or

a.3.c. More than one data or instruction bus or serial communication port for external interconnection in a parallel processor with a transfer rate exceeding 2.5 Mbytes;

a.4. Storage integrated circuits manufactured from a compound semiconductor;

a.5. Analog-to-digital and digital-to-analog converter integrated circuits, as follows:

a.5.a. Analog-to-digital converters having any of the following:
   - a.5.a.1. A resolution of 8 bit or more, but less than 12 bit, with a total conversion time to maximum resolution of less than 10 ns;
   - a.5.a.2. A resolution of 12 bit with a total conversion time to maximum resolution of less than 200 ns; or
   - a.5.a.3. A resolution of more than 12 bit with a total conversion time to maximum resolution of less than 2 μs;

a.5.b. Digital-to-analog converters with a resolution of 12 bit or more, and a "settling time" of less than 10 ns;

a.6. Electro-optical and "optical integrated circuits" designed for "signal processing" having any of the following:

a.6.a. One or more than one internal "laser" diode;

a.6.b. One or more than one internal light detecting element; and

a.6.c. Optical waveguides;

a.7. Field programmable gate arrays having any of the following:

a.7.a. An equivalent usable gate count of more than 30,000 (2 input gates); or

a.7.b. A typical "basic gate propagation delay time" of less than 0.4 ns;

a.8. Field programmable logic arrays having any of the following:

a.8.a. An equivalent usable gate count of more than 30,000 (2 input gates); or

a.8.b. A toggle frequency exceeding 133 MHz;

a.9. Neural network integrated circuits;

a.10. Custom integrated circuits for which the function is unknown, or the control status of the equipment in which the integrated circuits will be used is unknown to the manufacturer, having any of the following:

a.10.a. More than 208 terminals; or

a.10.b. A typical "basic gate propagation delay time" of less than 0.35 ns; or

a.10.c. An operating frequency exceeding 3 GHz;

a.11. Digital integrated circuits, other than those described in 3A.001.a.3 to 3A.001.a.10 and 3A.001.a.12, based upon any compound semiconductor and having any of the following:

a.11.a. An equivalent gate count of more than 3,000 (2 input gates); or

a.11.b. A toggle frequency exceeding 1.2 GHz;

a.12. Fast Fourier Transform (FFT) processors having any of the following:

a.12.a. A rated execution time for a 1,024 point complex FFT of less than 1 ms; or

a.12.b. A rated execution time for an N-point complex FFT of other than 1,024 points of less than N log 2 N /10,240 ms, where N is the number of points; or

a.12.c. A butterfly throughput of more than 5.12 MHz;

b. Microwave or millimeter wave components, as follows:

b.1. Electronic vacuum tubes and cathodes, as follows:

**NOTE:** 3A.001.b.1 does not control tubes designed or rated to operate in the ITU allocated bands at frequencies not exceeding 31 GHz.
Pt. 774, Supp. 1

b.1.a. Traveling wave tubes, pulsed or continuous wave, as follows:
   b.1.a.1. Operating at frequencies higher than 31 GHz;
   b.1.a.2. Having a cathode heater element with a turn on time to rated RF power of less than 3 seconds;
   b.1.a.3. Coupled cavity tubes, or derivatives thereof, with an “instantaneous bandwidth” of more than 7% or a peak power exceeding 2.5 kW;
   b.1.a.4. Helix tubes, or derivatives thereof, with any of the following characteristics:
      b.1.a.4.a. An “instantaneous bandwidth” of more than one octave, and average power (expressed in kW) times frequency (expressed in GHz) of more than 0.5;
      b.1.a.4.b. An “instantaneous bandwidth” of one octave or less, and average power (expressed in kW) times frequency (expressed in GHz) of more than 1; or
   b.1.a.4.c. Being “space qualified”;
   b.1.b. Crossed-field amplifier tubes with a gain of more than 17 dB;
   b.1.c. Impregnated cathodes designed for electronic tubes, with any of the following:
      b.1.c.1. A turn on time to rated emission of less than 3 seconds; or
      b.1.c.2. Producing a continuous emission current density at rated operating conditions exceeding 5 A/cm²;
   b.2. Microwave integrated circuits or modules having all of the following:
      b.2.a. Containing “monolithic integrated circuits”; and
      b.2.b. Operating at frequencies above 3 GHz;

NOTE: 3A001.b.2 does not control circuits or modules for equipment designed or rated to operate in the ITU allocated bands at frequencies not exceeding 31 GHz.

b.3. Microwave transistors rated for operation at frequencies exceeding 31 GHz;

b.4. Microwave solid state amplifiers, having any of the following:
   b.4.a. Operating frequencies exceeding 10.5 GHz and an “instantaneous bandwidth” of more than half an octave; or
   b.4.b. Operating frequencies exceeding 31 GHz;

b.5. Electronically or magnetically tunable band-pass or band-stop filters having more than 5 tunable resonators capable of tuning across a 1.5:1 frequency band \( F_{\text{max}}/F_{\text{min}} \) in less than 10 µs having any of the following:
   b.5.a. A band-pass bandwidth of more than 0.9% of center frequency; or
   b.5.b. A band-stop bandwidth of less than 0.9% of center frequency;

b.6. Microwave “assemblies” capable of operating at frequencies exceeding 31 GHz;

b.7. Mixers and converters designed to extend the frequency range of equipment described in 3A002.c, 3A002.e or 3A002.f beyond the limits stated therein;

b.8. Microwave power amplifiers containing tubes controlled by 3A000.b and having all of the following:
   b.8.a. Operating frequencies above 3 GHz;
   b.8.b. An average output power density exceeding 80 W/kg; and
   b.8.c. A volume of less than 400 cm³;

NOTE: 3A001.b.8 does not control equipment designed or rated for operation in an ITU allocated band.

c. Acoustic wave devices, as follows, and specially designed components therefor:

   c.1. Surface acoustic wave and surface skimming (shallow bulk) acoustic wave devices (i.e., “signal processing” devices employing elastic waves in materials), having any of the following:
      c.1.a. A carrier frequency exceeding 2.5 GHz;
      c.1.b. A carrier frequency exceeding 1 GHz, but not exceeding 2.5 GHz, and having any of the following:
         c.1.b.1. A frequency side-lobe rejection exceeded 55 dB;
         c.1.b.2. A product of the maximum delay time and the bandwidth (time in µs and bandwidth in MHz) of more than 100;
         c.1.b.3. A bandwidth greater than 250 MHz; or
         c.1.b.4. A dispersive delay of more than 10 µs; or
      c.1.c. A carrier frequency of 1 GHz or less, having any of the following:
         c.1.c.1. A product of the maximum delay time and the bandwidth (time in µs and bandwidth in MHz) of more than 100;
         c.1.c.2. A dispersive delay of more than 10 µs; or
         c.1.c.3. A frequency side-lobe rejection exceeding 55 dB and a bandwidth greater than 50 MHz;

   c.2. Bulk (volume) acoustic wave devices (i.e., “signal processing” devices employing elastic waves) that permit the direct processing of signals at frequencies exceeding 1 GHz;

   c.3. Acoustic-optic “signal processing” devices employing interaction between acoustic waves (bulk wave or surface wave) and light waves that permit the direct processing of signals or images, including spectral analysis, correlation or convolution;

   d. Electronic devices and circuits containing components, manufactured from “superconductive” materials specially designed for operation at temperatures below the “critical temperature” of at least one of the “superconductive” constituents, with any of the following:
      d.1. Electromagnetic amplification:
         d.1.a. At frequencies equal to or less than 31 GHz with a noise figure of less than 0.5 dB; or
         d.1.b. At frequencies exceeding 31 GHz;
d. Current switching for digital circuits using 'superconductive' gates with a product of delay time per gate (in seconds) and power dissipation per gate (in watts) of less than 10⁻¹⁴ W·s; or

d.3 Frequency selection at all frequencies using resonant circuits with Q-values exceeding 10,000;

e. High energy devices, as follows:

e.1 Batteries and photovoltaic arrays, as follows:

NOTE: 3A001.e.1 does not control batteries with volumes equal to or less than 27 cm³ (e.g., standard C-cells or R 14 batteries).

e.1.a. Primary cells and batteries having an energy density exceeding 480 Wh/kg and rated for operation in the temperature range from below 243 K (−30°C) to above 343 K (70°C);

Technical Note: Energy density is obtained by multiplying the average power in watts (average voltage in volts times average current in amperes) by the duration of the discharge in hours to 75% of the open circuit voltage divided by the total mass of the cell (or battery) in kg.

e.1.c. “Space qualified” and radiation hardened photovoltaic arrays with a specific power exceeding 160 W/m² at an operating temperature of 303 K (28°C) under a tungsten illumination of 1 kW/m² at 2,800 K (2,527°C);

e.2 High energy storage capacitors, as follows:

NOTE: 3A001.e.3 does not control ‘superconductive’ electromagnets or solenoids specially designed for Magnetic Resonance Imaging (MRI) medical equipment.

N.B.: See also 3A201.b.

Reason for Control:

List of Items Controlled

LVS: $3000: 3A002.a, e, f, g; $5000: 3A002.b to .d

GBS: Yes for 3A002.a.1.; 3A002.b (synthesized output frequency of 2.6 GHz or less and a “frequency switching time” of 0.3 ms or more); and 3A002.d (synthesized output frequency of 2.6 GHz or less and a “frequency switching time” of 0.3 ms or more)

CIV: Yes for 3A002.a.1 (provided all of the following conditions are met: (1) Bandwidths do not exceed: 4 MHz per track and have up to 28 tracks or 2 MHz per track and have up to 42 tracks; (2) Tape speed does not exceed 6.1 m/s; (3) They are not designed for underwater use; (4) They are not ruggedized for military use; and (5) Recording density does not exceed 653.2 magnetic flux sine waves per mm); 3A002.b (synthesized output frequency of 2.6 GHz or less; and a “frequency switching time” of 0.3 ms or more), 3A002.d (synthesized output frequency of 2.6 GHz or less; and a “frequency switching time” of 0.3 ms or more).

List of Items Controlled

Unit: Number

Related Controls: See also 3A002 and 3A992

Related Definitions: N/A

Items:

a. Recording equipment, as follows, and specially designed test tape therefor:

a.1 Analog instrumentation magnetic tape recorders, including those permitting the recording of digital signals (e.g., using a high
density digital recording (HDDR) module, having any of the following:

a.1.a. A bandwidth exceeding 4 MHz per electronic channel or track;

a.1.b. A bandwidth exceeding 2 MHz per electronic channel or track and having more than 42 tracks; or

a.1.c. A time displacement (base) error, measured in accordance with applicable IRIG or EIA documents, of less than ±0.1 µs;

NOTE: Analog magnetic tape recorders specially designed for civilian video purposes are not considered to be instrumentation tape recorders.

a.2. Digital video magnetic tape recorders having a maximum digital interface transfer rate exceeding 360 Mbit/s;

NOTE: 3A002.a.2 does not control digital video magnetic tape recorders specially designed for television recording using a signal format, which may include a compressed signal format, standardized or recommended by the ITU, the IEC, the SMPTE, the EBU or the IEEE for civil television applications.

a.3. Digital instrumentation magnetic tape data recorders employing helical scan techniques or fixed head techniques, having any of the following:

a.3.a. A maximum digital interface transfer rate exceeding 175 Mbit/s; or

a.3.b. Being "space qualified";

NOTE: 3A002.a.3 does not control analog magnetic tape recorders equipped with HDDR conversion electronics and configured to record only digital data.

a.4. Equipment, having a maximum digital interface transfer rate exceeding 175 Mbit/s, designed to convert digital video magnetic tape recorders for use as digital instrumentation data recorders;

a.5. Waveform digitizers and transient recorders having all of the following:

N.B.: See also 3A 202.

a.5.a. Digitizing rates equal to or more than 200 million samples per second and a resolution of 10 bits or more; and

a.5.b. A continuous throughput of 2 Gbit/s or more;

TECHNICAL NOTE: For those instruments with a parallel bus architecture, the continuous throughput rate is the highest word rate multiplied by the number of bits in a word. Continuous throughput is the fastest data rate the instrument can output to mass storage without the loss of any information while sustaining the sampling rate and analog-to-digital conversion.

b. "Frequency synthesizers" having a "frequency switching time" from one selected frequency to another of less than 1 ms;

c. "Signal analyzers", as follows:

c.1. "Signal analyzers" capable of analyzing frequencies exceeding 31 GHz;

c.2. "Dynamic signal analyzers" having a "real-time bandwidth" exceeding 25.6 kHz;

NOTE: 3A002.c.2 does not control those "dynamic signal analyzers" using only constant percentage bandwidth filters (also known as octave or fractional octave filters).

TECHNICAL NOTE: Constant percentage bandwidth filters are also known as octave or fractional octave filters.

d. Frequency synthesized signal generators producing output frequencies, the accuracy and short term and long term stability of which are controlled, derived from or disciplined by the internal master frequency, and having any of the following:

d.1. A maximum synthesized frequency exceeding 31 GHz;

d.2. A "frequency switching time" from one selected frequency to another of less than 1 ms; or

d.3. A single sideband (SSB) phase noise better than \(-((126 + 20 \log_{10} f) - 20 \log_{10} f)\) in dBc/Hz, where \(F\) is the offset from the operating frequency in Hz and \(f\) is the operating frequency in MHz;

NOTE: 3A002.d does not control equipment in which the output frequency is either produced by the addition or subtraction of two or more crystal oscillator frequencies, or by an addition or subtraction followed by a multiplication of the result.

e. Network analyzers with a maximum operating frequency exceeding 40 GHz;

f. Microwave test receivers having all of the following:

f.1. A maximum operating frequency exceeding 40 GHz; and

f.2. Being capable of measuring amplitude and phase simultaneously;

g. Atomic frequency standards having any of the following:

g.1. Long-term stability (aging) less (better) than \(1 \times 10^{-9}\) month; or

g.2. Being "space qualified".

NOTE: 3A002.g.1 does not control non-"space qualified" rubidium standards.

3A101 Electronic equipment, devices and components, other than those controlled by 3A001, as follows (see List of Items Controlled).

LVS: N/A
GBS: N/A
CIV: N/A

LIST OF ITEMS CONTROLLED
Unit: Number

Related Controls: This entry does not control magnets that are specially designed for and exported as parts of medical nuclear magnetic resonance (NMR) imaging systems. Such parts may be exported in separate shipments from different sources, provided that the related export control documents clearly specify that the parts are for medical NMR imaging systems that are being exported.

Related Definition: N/A

Items: a. Capacitors with the following characteristics:
   a.1. Voltage rating greater than 1.4 kV, energy storage greater than 10 J, capacitance greater than 0.5 μF and series inductance less than 50 mH; or
   a.2. Voltage rating greater than 750 V, capacitance greater than 0.25 μF and series inductance less than 10 nH;
   b. Superconducting solenoidal electromagnets with all of the following characteristics:
   b.1. Capable of creating magnetic fields of more than 2 teslas (20 kilogauss);
   b.2. With an L/D ratio (length divided by inner diameter) greater than 2;
   b.3. With an inner diameter of more than 300 mm; and
   b.4. With a magnetic field uniform to better than 1% over the central 50% of the inner volume;

NOTE: 3A201.b does not specify magnets specially designed for and exported as parts of medical nuclear magnetic resonance (NMR) imaging systems. The phrase "as part of" does not necessarily mean physical part in the same shipment; separate shipments from different sources are allowed, provided the related export documents clearly specify that the shipments are dispatched "as part of" the imaging systems.

b. Flash X-ray generators or pulsed electron accelerators with peak energy of 500 keV or greater, as follows, except accelerators that are component parts of devices designed for purposes other than electron beam or X-ray radiation (electron microscopy, for example) and those designed for medical purposes:
   c.1. Having an accelerator peak electron energy of 500 keV or greater but less than 25 MeV and with a figure of merit (K) of 0.25 or greater, where K is defined as:
   \[ K = 1.7 \times 10^3 V_0^2 Q_0 / 2.65Q \]
   where \( V_0 \) is the peak electron energy in million electron volts and \( Q \) is the total accelerated charge in coulombs if the accelerator beam pulse duration is less than or equal to 1 microsecond; if the accelerator beam pulse duration is greater than 1 microsecond, \( Q \) is the maximum accelerated charge in 1 microsecond (\( Q \) equals the integral of \( i \) with respect to \( t \), over the lesser of 1 microsecond or the time duration of the beam pulse \( Q = \int i \, dt \)), where \( i \) is beam current in amperes and \( t \) is time in seconds); or
   c.2. Having an accelerator peak electron energy of 25 MeV or greater and a peak power greater than 50 MW. (Peak power = (peak potential in volts) × (peak beam current in amperes)).

TECHNICAL NOTES: a. Time duration of the beam pulse—in machines, based on microwave accelerating cavities, the time duration of the beam pulse is the lesser of 1 microsecond or the duration of the bunched beam packet resulting from one microwave modulator pulse.
   b. Peak beam current—in machines based on microwave accelerating cavities, the peak beam current is the average current in the time duration of a bunched beam packet.

3A225 Frequency changers (also known as converters or inverters) or generators, other than those controlled by 0B001.e.11, having all of the characteristics (see List of Items Controlled).

- a. Explosive detonator firing sets designed to drive multiple controlled detonators controlled by 3A232;
- b. Modular electrical pulse generators (pulsers) designed for portable, mobile or ruggedized use (including xenon flash-lamp drivers) having all the following characteristics:
  - b.1. Capable of delivering their energy in less than 15 microseconds;
  - b.2. Having an output greater than 100 A;
  - b.3. Having a rise time of less than 10 microseconds into loads of less than 40 ohms (rise time is the time interval from 10% to 90% current amplitude when driving a resistive load);
  - b.4. Enclosed in a dust-tight enclosure;
  - b.5. No dimension greater than 254 mm;
  - b.6. Weight less than 25 kg; and
  - b.7. Specified for use over an extended temperature range 223 K (−50°C) to 373 K (100°C) or specified as suitable for aerospace use.

3A230 High-speed pulse generators with output voltages greater than 6 volts into a load less than 55 ohms resistive load, and with pulse transition times less than 500 picoseconds.

**LIST OF ITEMS CONTROLLED**

**Unit:** Number

**Related Controls:** This entry does not control detonators using only primary explosives, such as lead azide.

**Related Definition:** The detonators of concern all utilize a small electrical conductor (bridge, bridge wire or foil) that explosively vaporizes when a fast, high-current electrical pulse is passed through it. In nonslapper types, the exploding conductor starts a chemical detonation in a contacting high-explosive material such as PETN (Pentaerythritoltetranitrate). In slapper detonators, the explosive vaporization of the electrical conductor drives a flyer or slapper across a gap and the impact of the slapper on an explosive starts a chemical detonation. The slapper in some designs is driven by a magnetic force.

3A231 Neutron generator systems, including tubes, designed for operation without an external vacuum system and utilizing electrostatic acceleration to induce a tritium-deuterium nuclear reaction.

term exploding foil detonator may refer to either an EB or a slapper-type detonator. Also, the word initiator is sometimes used in place of the word detonator.

Items: a. Electrically driven explosive detonators, the following:
   a.1. Exploding bridge (EB);
   a.2. Exploding bridge wire (EBW);
   a.3. Slapper;
   a.4. Exploding foil initiators (EFI);
   b. Arrangements using single or multiple detonators designed to nearly simultaneously initiate an explosive surface (over greater than 5000 mm²) from a single firing signal (with an initiation timing spread over the surface of less than 2.5 microseconds).

3A233 Mass spectrometers, other than those controlled by 0B002,g, capable of measuring ions of 230 atomic mass units or greater and having a resolution of better than 2 parts in 230, and ion sources therefor.

Related Controls: Specially designed or prepared magnetic or quadruple mass spectrometers that have the following characteristics and are capable of taking on-line samples of feed, product, or tails from UF₆ gas streams are subject to the export licensing authority of the Nuclear Regulatory Commission. (See 10 CFR part 110):
   (a) Unit resolution for mass greater than 320; (b) Ion sources that are constructed of or lined with nichrome or that are monel or nickel-plated; (c) Electron bombardment ionization sources; (d) Having a collector system suitable for isotopic analysis.

Related Definitions: N/A

Items: a. Inductively coupled plasma mass spectrometers (ICP/MS);
   b. Glow discharge mass spectrometers (GDMS);
   c. Thermal ionization mass spectrometers (TIMS);
   d. Electron bombardment mass spectrometers that have a source chamber constructed from, lined with or plated with materials resistant to UF₆;
   e. Molecular beam mass spectrometers as follows:
      e.1. Having a source chamber constructed from, lined with or plated with stainless steel or molybdenum and have a cold trap capable of cooling to 193 K (~80 °C) or less; or
      e.2. Having a source chamber constructed from, lined with or plated with materials resistant to UF₆; or
      f. Mass spectrometers equipped with a microfluorination ion source designed for use with actinides or actinide fluorides.

3A292 Oscilloscopes and transient recorders other than those controlled by 3A002.a.5, and specially designed components therefor.

Related Definitions: "Bandwidth" is defined as the band of frequencies over which the deflection on the cathode ray tube does not fall below 70.7% of that at the maximum point measured with a constant input voltage to the oscilloscope amplifier.

Items: a. Non-modular analog oscilloscopes having a bandwidth of 1 GHz or greater;
   b. Modular analog oscilloscope systems having either of the following characteristics:
      b.1. A mainframe with a bandwidth of 1 GHz or greater; or
      b.2. Plug-in modules with an individual bandwidth of 4 GHz or greater;
   c. Analog sampling oscilloscopes for the analysis of recurring phenomena with an effective bandwidth greater than 4 GHz;
   d. Digital oscilloscopes and transient recorders, using analog-to-digital conversion techniques, capable of storing transients by sequentially sampling single-shot inputs at successive intervals of less than 1 ns (greater than 1 giga-sample per second), digitizing to 8 bits or greater resolution and storing 256 or more samples.

NOTE: Specially designed components controlled by this item are the following, for analog oscilloscopes:
   1. Plug-in units;
   2. External amplifiers;
   3. Pre-amplifiers;
   4. Sampling devices;
   5. Cathode ray tubes.

Items:

a. "Microprocessor microcircuits", "microcomputer microcircuits", and microcontroller microcircuits having a clock frequency exceeding 25 MHz;

b. Storage integrated circuits, as follows:
   b.1 Electrical erasable programmable read-only memories (EEPROMs) with a storage capacity;
      b.1.a Exceeding 16 Mbits per package for flash memory types; or
      b.1.b Exceeding either of the following limits for all other EEPROM types:
         b.1.b.1 Exceeding 1 Mbit per package; or
         b.1.b.2 Exceeding 256 kbit per package and a maximum access time of less than 80 ns;
      b.2 Static random access memories (SRAMs) with a storage capacity;
         b.2.a Exceeding 1 Mbit per package; or
         b.2.b Exceeding 256 kbit per package and a maximum access time of less than 25 ns;

c. Field programmable logic arrays having either of the following:
   c.1 An equivalent gate count of more than 5000 (2 input gates); or
   c.2 A toggle frequency exceeding 100 MHz;

d. Custom integrated circuits for which either the function is unknown, or the control status of the equipment in which the integrated circuits will be used is unknown to the manufacturer, having any of the following:
   d.1 More than 144 terminals; or
   d.2 A typical "basic propagation delay time" of less than 0.4 ns.

   Travelling wave tubes, pulsed or continuous wave, as follows:
   e.1 Coupled cavity tubes, or derivatives thereof;
   e.2 Helix tubes, or derivatives thereof, with any of the following:
      e.2.a.1 An "instantaneous bandwidth" of half an octave or more; and
      e.2.a.2 The product of the rated average output power (expressed in kW) and the maximum operating frequency (expressed in GHz) of more than 0.2;
      e.2.b.1 An "instantaneous bandwidth" of less than half an octave; and
      e.2.b.2 The product of the rated average output power (expressed in kW) and the maximum operating frequency (expressed in GHz) of more than 0.4;

   Flexible waveguides designed for use at frequencies exceeding 40 GHz;

   Surface acoustic wave and surface skimming (shallow bulk) acoustic wave devices (i.e., "signal processing" devices employing elastic waves in materials), having either of the following:
      g.1 A carrier frequency exceeding 1 GHz; or
      g.2 A carrier frequency of 1 GHz or less; and
      g.2.a A frequency side-lobe rejection exceeding 55 dB;

CIV: Yes for equipment controlled by 3B001.a.1

LIST OF ITEMS CONTROLLED

Unit: Number
Related Controls: See also 3B.991
Related Definitions: N/A

Items:

a. “Stored program controlled” equipment designed for epitaxial growth, as follows:
   a.1. Equipment capable of producing a layer thickness uniform to less than ±2.5% across a distance of 75 mm or more;
   a.2. Metal organic chemical vapor deposition (MOCVD) reactors specially designed for compound semiconductor crystal growth by the chemical reaction between materials controlled by 3C003 or 3C004;
   a.3. Molecular beam epitaxial growth equipment using gas or solid sources;

b. “Stored program controlled” equipment designed for ion implantation, having any of the following:
   b.1. A beam energy (accelerating voltage) exceeding 1MeV;
   b.2. Being specially designed and optimized to operate at a beam energy (accelerating voltage of less than 2 keV);
   b.3. Direct write capability; or
   b.4. Being capable of high energy oxygen implant into a heated semiconductor material “substrate”;

“Stored program controlled” anisotropic plasma dry etching equipment, as follows:
   c.1. Equipment with cassette-to-cassette operation and load-locks, and having any of the following:
      c.1.a. Magnetic confinement; or
      c.1.b. Electron cyclotron resonance (ECR);
   c.2. Equipment specially designed for equipment controlled by 3B001.e and having any of the following:
      c.2.a. Magnetic confinement; or
      c.2.b. ECR;

“Stored program controlled” plasma enhanced CVD equipment, as follows:
   d.1. Equipment with cassette-to-cassette operation and load-locks, and having any of the following:
      d.1.a. Magnetic confinement; or
      d.1.b. ECR;
   d.2. Equipment specially designed for equipment controlled by 3B001.e and having any of the following:
      d.2.a. Magnetic confinement; or
      d.2.b. ECR;

“Stored program controlled” automatic loading multi-chamber central wafer handling systems, having all of the following:
   e.1. Interfaces for wafer input and output, to which more than two pieces of semiconductor processing equipment are to be connected; and
   e.2. Designed to form an integrated system in a vacuum environment for sequential multiple wafer processing.

NOTE: 3B001.e does not control automatic robotic wafer handling systems not designed to operate in a vacuum environment.

f. “Stored program controlled” lithography equipment, as follows:
   f.1. Align and expose step and repeat (direct step on wafer) or step and scan (scanner) equipment for wafer processing using photolithographic or X-ray methods, having any of the following:
      f.1.a. A light source wavelength shorter than 350 nm; or
      f.1.b. Capable of producing a pattern with a feature size of less than 1 µm;
   f.2. Equipment specially designed for mask making or semiconductor device processing using deflected focused electron beam, ion beam or “laser” beam, having any of the following:
      f.2.a. A spot size smaller than 0.2 µm;
      f.2.b. Being capable of producing a pattern with a feature size of less than 1 µm; or
      f.2.c. An overlay accuracy of better than ±0.20 µm (3 sigma);

   g. Masks and reticles designed for integrated circuits controlled by 3A001;
   h. Multi-layer masks with a phase shift layer.

3B002 “Stored program controlled” test equipment, specially designed for testing finished or unfinished semiconductor devices and specially designed components and accessories thereof.

LICENSE REQUIREMENTS

Reason for Control: NS, AT

MRF = -----------------------------

numerical aperture

Where the K factor = 0.7.

MRF = minimum resolvable feature size.

f.2. Equipment specially designed for mask making or semiconductor device processing using deflected focused electron beam, ion beam or “laser” beam, having any of the following:
   f.2.a. A spot size smaller than 0.2 µm;
   f.2.b. Being capable of producing a pattern with a feature size of less than 1 µm; or
   f.2.c. An overlay accuracy of better than ±0.20 µm (3 sigma);
LIST OF ITEMS CONTROLLED

Unit: Equipment in number
Related Controls: N/A
Items:

a. Equipment specially designed for the
   manufacture of electron tubes, optical ele-
   ments and specially designed components
   therefor controlled by 3A001 or 3A991;

b. Equipment specially designed for the
   manufacture of semiconductor devices,
   integrated circuits and “assemblies”, as follows,
   and systems incorporating or having the
   characteristics of such equipment:
   NOTE: 3B991.b also controls equipment used
   or modified for use in the manufacture of
   other devices, such as imaging devices,
   electro-optical devices, acoustic-wave de-
   vices.

b.1. Equipment for the processing of mate-
    rials for the manufacture of devices and
    components as specified in the heading of
    3B991.b, as follows:
   NOTE: 3B991.b also controls equipment used
   or modified for use in the manufacture of
   other devices, such as imaging devices,
   electro-optical devices, acoustic-wave de-
   vices.

b.1.a. Equipment for producing
   polycrystalline silicon and materials con-
   trolled by 3C001;

b.1.b. Equipment specially designed for pu-
    rifying or processing III/V and II/VI semicon-
    ductor materials controlled by 3C001, 3C002,
    3C003, or 3C004, except crystal pullers, for
    which see 3B991.b.1.c below;

b.1.c. Crystal pullers and furnaces, as fol-
    lows:
   NOTE: 3B991.b.1.c does not control diffusion
   and oxidation furnaces.
   b.1.c.1. Annealing or recrystallizing equip-
      ment other than constant temperature fur-
      naces employing high rates of energy trans-
      fer capable of processing wafers at a rate ex-
      ceeding 0.005 m² per minute;

b.1.c.2. “Stored program controlled” crys-
      tal pullers having any of the following char-
      acteristics:
   b.1.c.2.a. Rechargeable without replacing
      the crucible container;

b.1.c.2.b. Capable of operation at pressures
      above 2.5 x 10⁶ Pa; or

b.1.c.2.c. Capable of pulling crystals of a di-
      ameter exceeding 100 mm;

b.1.d. “Stored program controlled” equip-
      ment for epitaxial growth having any of the
      following characteristics:
   b.1.d.1. Capable of producing a layer thick-
      ness uniformity across the wafer of equal to
      or better than ±3.5%;

b.1.d.2. Rotation of individual wafers dur-
      ing processing; or

b.1.e. Molecular beam epitaxial growth
   equipment;
b.1.f. Magnetically enhanced “sputtering” equipment with specially designed integral load locks capable of transferring wafers in an isolated vacuum environment;
b.1.g. Equipment specially designed for ion implantation, ion-enhanced or photo-enhanced diffusion, having any of the following characteristics:
  b.1.g.1. Patterning capability;
  b.1.g.2. Beam energy (accelerating voltage) exceeding 200 keV;
  b.1.g.3. Optimized to operate at a beam energy (accelerating voltage) of less than 10 keV; or
  b.1.g.4. Capable of high energy oxygen implant into a heated “substrate”;

b.1.h. “ Stored program controlled” equipment for the selective removal (etching) by means of anisotropic dry methods (e.g., plasma), as follows:
  b.1.h.1. Batch types having either of the following:
    b.1.h.1.a. End-point detection, other than optical emission spectroscopy types; or
    b.1.h.1.b. Reactor operational (etching) pressure of 26.66 Pa or less;
  b.1.h.2. Single wafer types having any of the following:
    b.1.h.2.a. End-point detection, other than optical emission spectroscopy types;
    b.1.h.2.b. Reactor operational (etching) pressure of 26.66 Pa or less; or
    b.1.h.2.c. Cassette-to-cassette and load locks wafer handling;

NOTES: 1. “Batch types” refers to machines not specially designed for production processing of single wafers. Such machines can process two or more wafers simultaneously with common process parameters, e.g., RF power, temperature, etch gas species, flow rates.

2. “Single wafer types” refers to machines specially designed for production processing of single wafers. These machines may use automatic wafer handling techniques to load a single wafer into the equipment for processing. The definition includes equipment that can load and process several wafers but where the etching parameters, e.g., RF power or end point, can be independently determined for each individual wafer.

b.1.i. “Chemical vapor deposition” (CVD) equipment, e.g., plasma-enhanced CVD (PECVD) or photo-enhanced CVD, for semiconductor device manufacturing, having either of the following capabilities, for deposition of oxides, nitrides, metals or polysilicon:
  b.1.i.1. “Chemical vapor deposition” equipment operating below 10^4 Pa; or
  b.1.i.2. PECVD equipment operating either below 60 Pa (450 millitorr) or having automatic cassette-to-cassette and load lock wafer handling;

b.1.j. Electron beam systems specially designed or modified for mask making or semiconductor device processing having any of the following characteristics:
  b.1.j.1. Electrostatic beam deflection;
  b.1.j.2. Shaped, non-Gaussian beam profile;
  b.1.j.3. Digital-to-analog conversion rate exceeding 3 MHz;
  b.1.j.4. Digital-to-analog conversion accuracy exceeding 12 bit; or
  b.1.j.5. Target-to-beam position feedback control precision of 1 micrometer or finer;

NOTE: 3B991.b.1.j does not control electron beam deposition systems or general purpose scanning electron microscopes.

b.1.k. Surface finishing equipment for the processing of semiconductor wafers as follows:
  b.1.k.1. Specially designed equipment for backside processing of wafers thinner than 100 micrometer and the subsequent separation thereof; or
  b.1.k.2. Specially designed equipment for achieving a surface roughness of the active surface of a processed wafer with a two-sigma value of 2 micrometer or less, total indicator reading (TIR);

NOTE: 3B991.b.1.k does not control single-side lapping and polishing equipment for wafer surface finishing.

b.1.l. Interconnection equipment which includes common single or multiple vacuum chambers specially designed to permit the integration of any equipment controlled by 3B991 into a complete system.

b.1.m. “Stored program controlled” equipment using “lasers” for the repair or trimming of “monolithic integrated circuits” with either of the following characteristics:
  b.1.m.1. Positioning accuracy less than ±1 micrometer; or
  b.1.m.2. Spot size (kerf width) less than 3 micrometer.

b.2. Masks, mask “substrates”, mask-making equipment and image transfer equipment for the manufacture of devices and components as specified in the heading of 3B991, as follows:

NOTE: The term “masks” refers to those used in electron beam lithography, X-ray lithography, and ultraviolet lithography, as well as the usual ultraviolet and visible photo-lithography.

b.2.a. Finished masks, reticles and designs therefor, except:
  b.2.a.1. Finished masks or reticles for the production of unembargoed integrated circuits; or
  b.2.a.2. Masks or reticles, having both of the following characteristics:
    b.2.a.2.a. Their design is based on geometries of 2.5 micrometer or more; and
b.2.a.2.b. The design does not include special features to alter the intended use by means of production equipment or "software";

b.2.b. Mask "substrates" as follows:

b.2.b.1. Hard surface (e.g., chromium, silicon, molybdenum) coated "substrates" (e.g., glass, quartz, sapphire) for the preparation of masks having dimensions exceeding 125 mm × 125 mm; or

b.2.b.2. "Substrates" specially designed for X-ray masks;

b.2.c. Equipment, other than general purpose computers, specially designed for computer aided design (CAD) of semiconductor devices or integrated circuits;

b.2.d. Equipment or machines, as follows, for mask or reticle fabrication:

b.2.d.1. Photo-optical step and repeat cameras capable of producing arrays larger than 100 mm × 100 mm, or capable of producing a single exposure larger than 6 mm × 6 mm in the image (i.e., focal) plane, or capable of producing line widths of less than 2.5 micrometer in the photoresist on the "substrate";

b.2.d.2. Mask or reticle fabrication equipment using ion or "laser" beam lithography capable of producing line widths of less than 2.5 micrometer; or

b.2.d.3. Equipment or holders for altering masks or reticles or adding pellicles to remove defects;

NOTE: 3B991.b.2.d.1 and b.2.d.2 do not control mask fabrication equipment using photo-optical methods which was either commercially available before the 1st January, 1980, or has a performance no better than such equipment;

b.2.e. "Stored program controlled" equipment for the inspection of masks, reticles or pellicles with:

b.2.e.1. A resolution of 0.25 micrometer or finer; and

b.2.e.2. A precision of 0.75 micrometer or finer over a distance in one or two coordinates of 63.5 mm or more;

NOTE: 3B991.b.2.e does not control general purpose scanning electron microscopes except when specially designed and instrumented for automatic pattern inspection.

b.2.f. Align and expose equipment for wafer production using photo-optical or X-ray methods, including both projection image transfer equipment and step and repeat (direct step on wafer) or step and scan (scanner) equipment, capable of performing any of the following functions:

NOTE: 3B991.b.2.f does not control photo-optical contact and proximity mask align and expose equipment or contact image transfer equipment.

b.2.f.1. Production of a pattern size of less than 2.5 micrometer;

b.2.f.2. Alignment with a precision finer than ± 0.25 micrometer (3 sigma);

b.2.f.3. Machine-to-machine overlay no better than ± 0.3 micrometer;

b.2.f.4. A light source wavelength shorter than 400 nm; or

b.2.f.5. Capable of producing a pattern with a minimum resolvable feature size of 0.7 microns or less.

b.2.g. Electron beam, ion beam or X-ray equipment for projection image transfer capable of producing patterns less than 2.5 micrometer;

NOTE: For focussed, deflected-beam systems (direct write systems), see 3B991.b.1.j or 3B991.b.10.

b.2.h. Equipment using "lasers" for direct write on wafers capable of producing patterns less than 2.5 micrometer.

b.3. Equipment for the assembly of integrated circuits, as follows:

b.3.a. "Stored program controlled" die bonder having all of the following characteristics:

b.3.a.1. Specially designed for "hybrid integrated circuits";

b.3.a.2. X-Y stage positioning travel exceeding 37.5 x 37.5 mm; and

b.3.a.3. Placement accuracy in the X-Y plane of finer than ± 10 micrometer;

b.3.b. "Stored program controlled" equipment for producing multiple bonds in a single operation (e.g., beam lead bonders, chip carrier bonders, tape bonders);

b.3.c. Semi-automatic or automatic hot cap sealers, in which the cap is heated locally to a higher temperature than the body of the package, specially designed for ceramic microcircuit packages controlled by 3A001 and that have a throughput equal to or more than one package per minute.

NOTE: 3B991.b.3 does not control general purpose resistance type spot welders.

b.4. Filters for clean rooms capable of providing an air environment of 10 or less particles of 0.3 micrometer or smaller per 0.0832 m³ and filter materials therefor;

3B992 Equipment not controlled by 3B002 for the inspection or testing of electronic components and materials, and specially designed components and accessories therefor;

LIST OF ITEMS CONTROLLED

Unit: Equipment in number
Related Controls: N/A
Related Definitions: N/A

Items: a. Equipment specially designed for the inspection or testing of electron tubes, optical elements and specially designed components therefor controlled by 3A001 or 3A991;

b. Equipment specially designed for the inspection or testing of semiconductor devices, integrated circuits and "assemblies", as follows, and systems incorporating or having the characteristics of such equipment:

NOTE: 3B992.b also controls equipment used or modified for use in the inspection or testing of other devices, such as imaging devices, electro-optical devices, acoustic-wave devices.

b.1. "Stored program controlled" inspection equipment for the automatic detection of defects, errors or contaminants of 0.6 micrometer or less in or on processed wafers, "substrates", other than printed circuit boards or chips, using optical image acquisition techniques for pattern comparison;

NOTE: 3B992.b.1 does not control general purpose scanning electron microscopes, except when specially designed and instrumented for automatic pattern inspection.

b.2. Specially designed "stored program controlled" measuring and analysis equipment, as follows:

b.2.a. Specially designed for the measurement of oxygen or carbon content in semiconductor materials;

b.2.b. Equipment for line width measurement with a resolution of 1 micrometer or finer;

b.2.c. Specially designed flatness measurement instruments capable of measuring deviations from flatness of 10 micrometer or less with a resolution of 1 micrometer or finer.

b.3. "Stored program controlled" wafer probing equipment having any of the following characteristics:

b.3.a. Positioning accuracy finer than 3.5 micrometer;

b.3.b. Capable of testing devices having more than 68 terminals; or

b.3.c. Capable of testing at a frequency exceeding 1 GHz.

b.4. Test equipment as follows:

b.4.a. "Stored program controlled" equipment specially designed for testing discrete semiconductor devices and unencapsulated dice, capable of testing at frequencies exceeding 18 GHz;

TECHNICAL NOTE: Discrete semiconductor devices include photocells and solar cells.

b.4.b. "Stored program controlled" equipment specially designed for testing integrated circuits and "assemblies" thereof, capable of functional testing:

b.4.b.1. At a pattern rate exceeding 20 MHz but not exceeding 20 MHz and capable of testing packages of more than 68 terminals; 

NOTE: 3B992.b.4.b does not control equipment specially designed for testing integrated circuits not controlled by 3A001 or 3A991.

NOTES: 1. 3B992.b.4.b does not control test equipment specially designed for testing "assemblies" or a class of "assemblies" for home and entertainment applications.

2. 3B992.b.4.b does not control test equipment specially designed for testing electronic components, "assemblies" and integrated circuits not controlled by 3A001 or 3A991 provided such test equipment does not incorporate computing facilities with "user accessible programmability".

b.4.c. Equipment specially designed for determining the performance of focal-plane arrays at wavelengths of more than 1,200 nm, using "stored program controlled" measurements or computer aided evaluation and having any of the following characteristics:

b.4.c.1. Using scanning light spot diameters of less than 0.12 mm;

b.4.c.2. Designed for measuring photosensitive performance parameters and for evaluating frequency response, modulation transfer function, uniformity of responsivity or noise; or

b.4.c.3. Designed for evaluating arrays capable of creating images with more than 32 x 32 line elements;

b.5. Electron beam test systems, capable of operating at or below 3,000 eV, for non-contactive probing of powered-up semiconductor devices having any of the following:

b.5.a. Stroboscopic capability with either beam blanking or detector strobing;

b.5.b. An electron spectrometer for voltage measurements with a resolution of less than 0.5 V; or

b.5.c. Electrical tests fixtures for performance analysis of integrated circuits;

NOTE: 3B992.b.5 does not control scanning electron microscopes, except when specially designed and instrumented for non-contactive probing of a powered-up semiconductor device.

b.6. "Stored program controlled" multifunctional focused ion beam systems specially designed for manufacturing, repairing, physical layout analysis and testing of masks or semiconductor devices and having either of the following characteristics:

b.6.a. Target-to-beam position feedback control precision of 1 micrometer or finer; or

b.6.b. Digital-to-analog conversion accuracy exceeding 12 bit;

b.7. Particle measuring systems employing "lasers" designed for measuring particle size and concentration in air having both of the following characteristics:
b.7.a. Capable of measuring particle sizes of 0.2 micrometer or less at a flow rate of 0.02832 m³ per minute or more; and
b.7.b. Capable of characterizing Class 10 clean air or better.

C. MATERIALS

3C001 Hetero-epitaxial materials consisting of a "substrate" having stacked epitaxially grown multiple layers of any of the following (see List of Items Controlled).

EAR99 Items subject to the EAR that are not elsewhere specified in this CCL Category or in any other category in the CCL are designated by the number EAR99.

Category 4—Computers

NOTE 1: Computers, related equipment and “software” performing telecommunications or “local area network” functions must also be evaluated against the performance characteristics of Category 5, Part 1 (Telecommunications).

N.B. 1: Control units that directly interconnect the buses or channels of central processing units, “main storage” or disk controllers are not regarded as telecommunications equipment described in Category 5, Part 1 (Telecommunications).

N.B. 2: For the control status of “software” specially designed for packet switching, see ECCN 5D001 (Telecommunications).

NOTE 2: Computers, related equipment and “software” performing cryptographic, cryptoanalytic, certifiable multi-level security or certifiable user isolation functions, or that limit electromagnetic compatibility (EMC), must also be evaluated against the performance characteristics in Category 5, Part 2 (“Information Security”).

A. SYSTEMS, EQUIPMENT AND COMPONENTS

4A001 Electronic computers and related equipment, and “electronic assemblies” and specially designed components therefor.

LICENSE REQUIREMENTS
Reason for Control: NS, MT, AT, NP, XP

Control(s) Country Chart
NS applies to entire entry ........ NS Column 2
MT applies to items in 4A001.a MT Column 1 when the parameters in 4A101 are met or exceeded.
AT applies to entire entry ........ AT Column 1
NP applies to electronic computers with a CTP greater than 2,000 Mtops, unless a License Exception is available. See §742.3(b) of the EAR for information on applicable licensing review policies.
XP applies to electronic computers with a CTP greater than 2,000 Mtops, unless a License Exception is available. XP controls vary according to destination and end-user and end-use. See §742.12 of the EAR for additional information.

LICENSE REQUIREMENT NOTES: See §743.1 of the EAR for reporting requirements for exports under License Exceptions.

LICENSE EXCEPTIONS
LVS: $5000 for 4A001.a; N/A for MT and 4A001.b
GBS: N/A
CIV: N/A

LIST OF ITEMS CONTROLLED
Unit: Equipment in number; parts and accessories in $ value
Related Controls: See also 4A101 and 4A994.
Related Definitions: See also 4A101.

Items: a. Specially designed to have either of the following characteristics:
   a.1. Rated for operation at an ambient temperature below 228 K (−45 °C) or above 358 K (85 °C);
   NOTE: 4A001.a.1. does not apply to computers specially designed for civil automobile or railway train applications.
   a.2. Radiation hardened to exceed any of the following specifications:
   a.2.a. A total dose of $5 \times 10^3$ Gy (Si); or
   a.2.b. A dose rate upset of $5 \times 10^6$ Gy (Si)/s;
   a.2.c. Single Event Upset of $1 \times 10^{-7}$ Error/bit/day;
   b. Having characteristics or performing functions exceeding the limits in Category 5, Part 2 (“Information Security”).

4A002 “Hybrid computers” and “electronic assemblies” and specially designed components therefor.
Bureau of Export Administration, Commerce

Control(s) Country Chart

NS applies to entire entry .......... NS Column 2
MT applies to hybrid computers combined with specially designed "software", for modeling, simulation, or design integration of complete rocket systems and unmanned air vehicle systems that are usable in systems controlled for MT reasons.

AT applies to entire entry .......... AT Column 1

NP applies to hybrid computers with a CTP greater than 2,000 Mtops, unless a License Exception is available. See §742.3(b) of the EAR for information on applicable licensing review policies.

XP applies to digital computers with a CTP greater than 2,000 Mtops, unless a License Exception is available. XP controls vary according to destination and end-user and end-use. See §742.12 of the EAR for additional information.

NOTE: For all destinations, except Cuba, Iran, Iraq, Libya, North Korea, Sudan, and Syria, no license is required (NLR) for computers with a CTP of 2,000 Mtops, and for assemblies described in 4A003.c that are not capable of exceeding a CTP of 2,000 Mtops in aggregation. Computers controlled in this entry for MT reasons are not eligible for NLR.

License Requirement Notes: See §743.1 of the EAR for reporting requirements for exports under License Exceptions.

LICENSE EXCEPTIONS
LVS: $5000; N/A for MT and "digital" computers controlled by 4A003.b and having a CTP exceeding 10,000 MTOPS; or "electronic assemblies" controlled by 4A003.c and capable of enhancing performance by aggregation of "computing elements" so that the CTP of the aggregation exceeds 10,000 MTOPS.

GBS: Yes, for 4A003.d, e, and g and specially designed components thereof, exported separately or as part of a system.

CTP: Yes, for computers controlled by 4A003.a, b and c, to the exclusion of other technical parameters, with the exception of parameters specified as controlled for Missile Technology (MT) concerns and 4A003.e (equipment performing analog-to-digital or digital-to-analog conversions exceeding the limits of 3A001.a.5.a). See §740.7 of the EAR.

CIV: Yes, for 4A003.d (having a 3-D vector rate less than 75 M vectors/sec), e, and g.

LIST OF ITEMS CONTROLLED

Unit: Equipment in number; parts and accessories in $ value

Related Controls: See also 4A102 and 4A994

Related Definitions: N/A

Licenses are available for items as described in 4A003.a, b, c, d, e, and g.

4A003 "Digital computers", "electronic assemblies", and related equipment therefor, and specially designed components therefor.

LICENSE REQUIREMENTS

Reason for Control: NS, MT, CC, AT, NP, XP

Control(s) Country Chart

NS applies to 4A003.b and c ..... NS Column 1
NS applies to 4A003.a, d, e, and p. NS Column 2
MT applies to digital computers used as ancillary equipment for test facilities and equipment that are controlled by 9B005 or 9B006.

CC applies to digital computers for computerized fingerprint equipment.

NP applies to entire entry AT Column 1

(see 4A994 for controls on digital computers with a CTP ≥ 6 but ≤ 2,000 Mtops).

NP applies to digital computers with a CTP greater than 2,000 Mtops, unless a License Exception is available. See §742.3(b) of the EAR for information on applicable licensing review policies.

XP applies to digital computers with a CTP greater than 2,000 Mtops, unless a License Exception is available. XP controls vary according to destination and end-user and end-use. See §742.12 of the EAR for additional information.

NOTE: For all destinations, except Cuba, Iran, Iraq, Libya, North Korea, Sudan, and Syria, no license is required (NLR) for computers with a CTP of 2,000 Mtops, and for assemblies described in 4A003.c that are not capable of exceeding a CTP of 2,000 Mtops in aggregation. Computers controlled in this entry for MT reasons are not eligible for NLR.

License Requirement Notes: See §743.1 of the EAR for reporting requirements for exports under License Exceptions.

LICENSE EXCEPTIONS
LVS: $5000; N/A for MT and "digital" computers controlled by 4A003.b and having a CTP exceeding 10,000 MTOPS; or "electronic assemblies" controlled by 4A003.c and capable of enhancing performance by aggregation of "computing elements" so that the CTP of the aggregation exceeds 10,000 MTOPS.

GBS: Yes, for 4A003.d, e, and g and specially designed components thereof, exported separately or as part of a system.

CTP: Yes, for computers controlled by 4A003.a, b and c, to the exclusion of other technical parameters, with the exception of parameters specified as controlled for Missile Technology (MT) concerns and 4A003.e (equipment performing analog-to-digital or digital-to-analog conversions exceeding the limits of 3A001.a.5.a). See §740.7 of the EAR.

CIV: Yes, for 4A003.d (having a 3-D vector rate less than 75 M vectors/sec), e, and g.

LIST OF ITEMS CONTROLLED

Unit: Equipment in number; parts and accessories in $ value

Related Controls: See also 4A994

Related Definitions: N/A

Items:

NOTE 1: 4A003 includes the following:

a. Vector processors;
b. Array processors;
c. Digital signal processors;
d. Logic processors;
e. Equipment designed for "image enhancement";
f. Equipment designed for "signal processing".

NOTE 2: The control status of the "digital computers" and related equipment described in 4A003 is determined by the control status of other equipment or systems provided.
a. The "digital computers" or related equipment are essential for the operation of the other equipment or systems;
b. The "digital computers" or related equipment are not a "principal element" of the other equipment or systems; and

N.B. 1: The control status of "signal processing" or "image enhancement" equipment specially designed for other equipment with functions limited to those required for the other equipment is determined by the control status of the other equipment even if it exceeds the "principal element" criterion.

N.B. 2: For the control status of "digital computers" or related equipment for telecommunications equipment, see Category 5, Part 1 (Telecommunications).

c. The "technology" for the "digital computers" and related equipment is determined by 4E.

a. Designed or modified for "fault tolerance";

NOTE: For the purposes of 4A003.a., "digital computers" and related equipment are not considered to be designed or modified for "fault tolerance" if they utilize any of the following:

1. Error detection or correction algorithms in "main storage";
2. The interconnection of two "digital computers" so that, if the active central processing unit fails, an idling but mirroring central processing unit can continue the system's functioning;
3. The interconnection of two central processing units by data channels or by use of shared storage to permit one central processing unit to perform other work until the second central processing unit fails, at which time the first central processing unit takes over in order to continue the system's functioning; or
4. The synchronization of two central processing units by "software" so that one central processing unit recognizes when the other central processing unit fails and recovers tasks from the failing unit.

b. "Digital computers" having a "composite theoretical performance" ("CTP") exceeding 2,000 million theoretical operations per second (Mtops);

c. "Electronic assemblies" specially designed or modified to be capable of enhancing performance by aggregation of "computing elements" ("CEs") so that the "CTP" of the aggregation exceeds the limit in 4A003.b;

NOTE 1: 4A003.c does not control "electronic assemblies" specially designed for a product or family of products whose maximum configuration does not exceed the limit of 4A003.b.

d. Graphics accelerators and graphics co-processors exceeding a "three dimensional Vector Rate" of 3,000,000;

e. Equipment performing analog-to-digital conversions exceeding the limits in 3A001.a.5;

f. Reserved.

g. Equipment specially designed to provide external interconnection of "digital computers" or associated equipment that allows communications at data rates exceeding 80 Mb/te/s.

NOTE: 4A003.g does not control internal interconnection equipment (e.g., backplanes, buses) passive interconnection equipment, "network access controllers" or "communication channel controllers".

4A004 Computers, as follows (see List of Items Controlled) and specially designed related equipment, "electronic assemblies" and components therefor.

a. Electronic computers and related equipment, and 'electronic assemblies' and specially designed components therefor, rated for operation at an ambient temperature above 343 K (70°C);
b. "Digital computers" having a "composite theoretical performance" ("CTP") equal to or greater than 6 million theoretical operations per second (Mtops);
c. "Assemblies" not controlled by 4A003 that are specially designed or modified to enhance performance by aggregation of "computing elements" ("Ces"), as follows:
   c.1. Designed to be capable of aggregation in configurations of 16 or more "computing elements" ("Ces"); or
   c.2. Having a sum of maximum data rates on all channels available for connection to associated processors exceeding 40 million Bytes/s;

   NOTE 1: 4A.994.c applies only to "electronic assemblies" and programmable interconnections with a "CTP" not exceeding the limits in 4A.994.b, when shipped as unintegrated "electronic assemblies". It does not apply to "electronic assemblies" inherently limited by nature of their design for use as related equipment controlled by 4A.994.

   NOTE 2: 4A.994.c does not control any "electronic assembly" specially designed for a product or family of products whose maximum configuration does not exceed the limits of 4A.994.b.

d. Disk drives and solid state storage equipment:
   d.1. Magnetic, erasable optical or magneto-optical disk drives with a "maximum bit transfer rate" exceeding 25 million bits/s;
   d.2. Solid state storage equipment, other than "main storage" (also known as solid state disks or RAM disks), with a "maximum bit transfer rate" exceeding 36 million bits/s;

   NOTE 1: 4A.994.c apply only to "electronic assemblies" and programmable interconnections with a "CTP" not exceeding the limits in 4A.994.b, when shipped as unintegrated "electronic assemblies". It does not apply to "electronic assemblies" inherently limited by nature of their design for use as related equipment controlled by 4A.994.

   NOTE 2: 4A.994.c does not control any "electronic assembly" specially designed for a product or family of products whose maximum configuration does not exceed the limits of 4A.994.b.

e. Input/output control units designed for use with equipment controlled by 4A.994.d;

   f. Equipment for "signal processing" or "image enhancement", not controlled by 4A.994, having a "composite theoretical performance" ("CTP") exceeding 8.5 million theoretical operations per second (Mtops);

   g. Graphics accelerators or graphics coprocessors, not controlled by 4A.994, that exceed a "3-D vector rate" of 400,000 or, if supported by 2-D vectors only, a "2-D vector rate" of 600,000;

   h. Color displays or monitors having more than 120 resolvable elements per cm in the direction of the maximum pixel density;

   NOTE 1: 4A.994.h does not control displays or monitors not specially designed for electronic computers.

   NOTE 2: Displays specially designed for air traffic control (ATC) systems are treated as specially designed components for ATC systems under Category 6.

   i. Equipment containing "terminal interface equipment" exceeding the limits in 5A.991.
Pt. 774, Supp. 1

Information on How to Calculate “Composite Theoretical Performance ("CTP")

Abbreviations used in this Technical Note
“CE” “computing element” (typically an arithmetic logical unit)
FP floating point
XP fixed point
t execution time
XOR exclusive OR
CPU central processing unit
TP theoretical performance (of a single “CE”)
“CTP” “composite theoretical performance” (multiple “CES”)
R effective calculating rate
WL word length
L word length adjustment
* multiply

Execution time t is expressed in microseconds, TP and “CTP” are expressed in millions of theoretical operations per second (Mtops) and WL is expressed in bits.

Outline of “CTP” calculation method

“CTP” is a measure of computational performance given in Mtops. In calculating the “CTP” of an aggregation of “CES” the following three steps are required:
1. Calculate the effective calculating rate R for each “CE”;
2. Apply the word length adjustment (L) to the effective calculating rate (R), resulting in a Theoretical Performance (TP) for each “CE”;
3. If there is more than one “CE”, combine the TPs, resulting in a “CTP” for the aggregation.

Details for these steps are given in the following sections.

NOTE 1: For aggregations of multiple “CES” that have both shared and unshared memory subsystems, the calculation of “CTP” is completed hierarchically, in two steps: first, aggregate the groups of “CES” sharing memory; second, calculate the “CTP” of the groups using the calculation method for multiple “CES” not sharing memory.

NOTE 2: “CES” that are limited to input/output and peripheral functions (e.g., disk
drive, communication and video display controllers) are not aggregated into the "CTP" calculation.

The following table shows the method of calculating the Effective Calculating Rate \( R \) for each "CE":

Step 1. The effective calculating rate \( R \)
<table>

</tr>
</tbody>
</table>
NOTE W: For a pipelined "CE" capable of executing up to one arithmetic or logic operation every clock cycle after the pipeline is full, a pipelined rate can be established. The effective calculating rate (R) for such a "CE" is the faster of the pipelined rate or non-pipelined execution rate.

\[
R = \min\left(3 \cdot t_{\log}, R' \cdot \frac{WL}{64}\right)
\]

Where \( t_{\log} \) is the execute time of the XOR, or for logic hardware not implementing the XOR, the fastest simple logic operation.
See Notes X & Z.

NOTE X: For a "CE" that performs multiple operations of a specific type in a single cycle (e.g., two additions per cycle or two identical logic operations per cycle), the execution time \( t \) is given by:

\[
t = \frac{1}{R - R' \cdot \frac{WL}{64}}
\]

where \( R' \) is the number of results per second, \( WL \) is the number of bits upon which the logic operation occurs, and 64 is a factor to normalize to a 64 bit operation.

The number of identical operations per machine cycle

"CEs" that perform different types of arithmetic or logic operations in a single machine cycle are to be treated as multiple separate "CEs" performing simultaneously (e.g., a "CE" performing an addition and a multiplication in one cycle is to be treated as two "CEs", the first performing an addition in one cycle and the second performing a multiplication in one cycle). If a single "CE" has both scalar function and vector function, use the shorter execution time value.

NOTE Y: For the "CE" that does not implement FP add or FP multiply, but that performs FP divide:
If the "CE" implements FP reciprocal but not FP add, FP multiply or FP divide, then

\[ R_{fp} = \frac{1}{t_{fdivide}} \]

\[ R_{fp} = \frac{1}{t_{freciprocal}} \]

If none of the specified instructions is implemented, the effective FP rate is 0.

**NOTE Z:** In simple logic operations, a single instruction performs a single logic manipulation of no more than two operands of given lengths. In complex logic operations, a single instruction performs multiple logic manipulations to produce one or more results from two or more operands.

Rates should be calculated for all supported operand lengths considering both pipelined operations (if supported), and non-pipelined operations using the fastest executing instruction for each operand length based on:

1. Pipelined or register-to-register operations. Exclude extraordinarily short execution times generated for operations on a predetermined operand or operands (for example, multiplication by 0 or 1). If no register-to-register operations are implemented, continue with (2).

2. The faster of register-to-memory or memory-to-register operations; if these also do not exist, then continue with (3).

3. Memory-to-memory.

In each case above, use the shortest execution time certified by the manufacturer.

Step 2: TP for each supported operand length WL

Adjust the effective rate R (or R) by the word length adjustment L as follows:

\[ P = R \times L, \text{ where } L = \left(\frac{1}{3} + \frac{WL}{96}\right) \]

**NOTE:** The word length WL used in these calculations is the operand length in bits. (If an operation uses operands of different lengths, select the largest word length.) The combination of a mantissa ALU and an exponent ALU of a floating point processor or unit is considered to be one "CE" with a Word Length (WL) equal to the number of bits in the data representation (typically 32 or 64) for purposes of the "CTP" calculation.

This adjustment is not applied to specialized logic processors that do not use XOR instructions. In this case TP = R.

Select the maximum resulting value of TP for:

- Each XP-only "CE" (R\_xp);
- Each FP-only "CE" (R\_fp);
- Each combined FP and XP "CE" (R);
- Each simple logic processor not implementing any of the specified arithmetic operations; and
- Each special logic processor not using any of the specified arithmetic or logic operations.

Step 3: "CTP" for aggregations of "CEs", including CPUs.

For a CPU with a single "CE", "CTP" = TP (for "CEs" performing both fixed and floating point operations TP = max (TP\_xp, TP\_fp))

"CTP" for aggregations of multiple "CEs" operating simultaneously is calculated as follows:

**Note 1:** For aggregations that do not allow all of the "CEs" to run simultaneously, the possible combination of "CEs" that provides the largest "CTP" should be used. The TP of each contributing "CE" is to be calculated at its maximum value theoretically possible before the "CTP" of the combination is derived.

**N.B.:** To determine the possible combinations of simultaneously operating "CEs",
generate an instruction sequence that initiates operations in multiple "CEs", beginning with the slowest "CE" (the one needing the largest number of cycles to complete its operation) and ending with the fastest "CE". At each cycle of the sequence, the combination of "CEs" that are in operation during that cycle is a possible combination. The instruction sequence must take into account all hardware and/or architectural constraints on overlapping operations.

NOTE 2: A single integrated circuit chip or board assembly may contain multiple "CEs".

NOTE 3: Simultaneous operations are assumed to exist when the computer manufacturer claims concurrent, parallel or simultaneous operation or execution in a manual or brochure for the computer.

NOTE 4: "CTP" values are not to be aggregated for "CE" combinations (inter)connected by "Local Area Networks", Wide Area Networks, I/O shared connections/devices, I/O controllers and any communication interconnection implemented by "software".

NOTE 5: "CTP" values must be aggregated for multiple "CEs" specially designed to enhance performance by aggregation, operating simultaneously and sharing memory, or multiple memory/"CE"-combinations operating simultaneously utilizing specially designed hardware.

This aggregation does not apply to "electronic assemblies" described by 4A003.c.

"CTP" = TP_1 + C_2 * TP_2 + ... + C_n * TP_n

Where the TPs are ordered by value, with TP_1 being the highest, TP_2 being the second highest, ..., and TP_n being the lowest. C_i is a coefficient determined by the strength of the interconnection between "CEs", as follows:

For multiple "CEs" operating simultaneously and sharing memory:

C_{i+1} = C_i = 0.75

NOTE 1: When the "CTP" calculated by the above method does not exceed 194 Mtops, the following formula may be used to calculate C_i:

\[ C_i = \frac{0.75}{\sqrt{m}} \]

Where m=the number of "CEs" or groups of "CEs" sharing access.

provided:

1. The TP_i of each "CE" or group of "CEs" does not exceed 30 Mtops;
2. The "CEs" or groups of "CEs" share access to main memory (excluding cache memory) over a single channel; and
3. Only one "CE" or group of "CEs" can have use of the channel at any given time.

N.B.: This does not apply to items controlled under Category 3.

NOTE 2: "CEs" share memory if they access a common segment of solid state memory. This memory may include cache memory, main memory or other internal memory. Peripheral memory devices such as disk drives, tape drives or RAM disks are not included.

For Multiple "CEs" or groups of "CEs" not sharing memory, interconnected by one or more data channels:

- C_i = 0.75 \times k_i, (i = 2, ..., 32) (see Note below)
- C_i = 0.60 \times k_i, (i = 33, ..., 64)
- C_i = 0.45 \times k_i, (i = 65, ..., 256)
- C_i = 0.30 \times k_i, (i > 256)

The value of C_i is based on the number of "CE"s, not the number of nodes.

- Where k_i = min (S_i / K_r, 1), and
- S_i = normalizing factor of 20 MByte/s.
- K_r = sum of the maximum data rates (in units of MByte/s) for all data channels connected to the i^{th} "CE" or group of "CEs" sharing memory.

When calculating a C_i for a group of "CEs", the number of the first "CE" in a group determines the proper limit for C_i. For example, in an aggregation of groups consisting of 3 "CEs" each, the 22nd group will contain "CTP" of the 22nd "CE". The proper limit for C_i for this group is 0.60.

Aggregation (of "CEs" or groups of "CEs") should be from the fastest-to-slowest; i.e., TP_1 >= TP_2 >= ... >= TP_n, and in the case of TP_n, from the smallest to largest; i.e., C_n = C_{n+1}.

NOTE: The k_i factor is not to be applied to "CEs" 2 to 12 if the TP of the "CE" or group of "CEs" is more than 50 Mtops; i.e., C_i for "CEs" 2 to 12 is 0.75.
Category 5—Telecommunications and "Information Security"

I. TELECOMMUNICATIONS

Notes: 1. The control status of components, "lasers", test and "production" equipment and "software" therefor which are specially designed for telecommunications equipment or systems is determined in Category 5, Part I.

2. "Digital computers", related equipment or "software", when essential for the operation and support of telecommunications equipment described in this Category, are regarded as specially designed components, provided they are the standard models customarily supplied by the manufacturer. This includes operation, administration, maintenance, engineering or billing computer systems.

a. Any type of telecommunications equipment having any of the following characteristics, functions, or features:
   a.1. Specially designed to withstand transitory electronic effects or electromagnetic pulse effects, both arising from a nuclear explosion;
   a.2. Specially hardened to withstand gamma, neutron or ion radiation; or
   a.3. Specially designed to operate outside the temperature range from 218 K (−55°C) to 397 K (124°C).

   NOTE: 5A001.a.3 applies only to electronic equipment.

   NOTE: 5A001.a.2 and 5A001.a.3 do not apply to equipment on board satellites.

b. Telecommunication transmission equipment and systems, and specially designed components and accessories therefor, having any of the following characteristics, functions, or features:
   b.1 Being underwater communications systems having any of the following characteristics:
       b.1.a. An acoustic carrier frequency outside the range from 20 kHz to 60 kHz;
       b.1.b. Using an electromagnetic carrier frequency below 30 kHz;
       b.1.c. Using electronic beam steering techniques;
       b.1.d. Incorporating adaptive techniques providing more than 15 dB suppression of an interfering signal;
       b.1.e. Having all of the following:
       b.1.e.1. Automatically predicting and selecting frequencies and "total digital transfer rates" per channel to optimize the transmission; and
       b.1.e.2. Incorporating a linear power amplifier configuration having a capability to support multiple signals simultaneously at an output power of 1 kW or more in the 1.5 MHz to 30 MHz frequency range or 250 W or more in the 30 MHz to 87.5 MHz frequency range, over an "instantaneous bandwidth" of one octave or more and with an output harmonic and distortion content of better than −80 dB;
       b.1.f. Being radio equipment employing "spread spectrum" or "frequency agility" (frequency hopping) techniques having any of the following characteristics:
   b.1.f.1. User programmable spreading codes; or
   b.1.f.2. A total transmitted bandwidth which is 100 or more times the bandwidth of any one information channel and in excess of 50 kHz.

   NOTE: 5A001 b.3.b does not control cellular radio equipment operating in civil bands.

   NOTE: 5A001 b.3.b does not control equipment operating at an output power of 1.0 Watt or less.

   b.4. Being digitally controlled radio receivers having all of the following:
       b.4.a. More than 1,000 channels;
       b.4.b. A "frequency switching time" of less than 1 ms;
       b.4.c. Automatic searching or scanning of a part of the electromagnetic spectrum;
       b.4.d. Identification of the received signals or the type of transmitter;

   NOTE: 5A001.b.4 does not control cellular radio equipment operating in civil bands.

   b.5. Employing functions of digital "signal processing" to provide voice coding at rates of less than 2,400 bit/s.

   c. Optical fiber communication cables, optical fibers and accessories, as follows:
   c.1. Optical fibers of more than 500 m in length specified by the manufacturer as
being capable of withstanding a proof test tensile stress of $2 \times 10^9 \text{ N/m}^2$ or more;

Technical Note: Proof Test: on-line or off-line production screen testing that dynamically applies a prescribed tensile stress over a 0.5 to 3 m length of fiber at a running rate of 2 to 5 m/s while passing between capstans approximately 150 mm in diameter. The ambient temperature is a nominal 293 K (20°C) and relative humidity 40%.

N.B.: Equivalent national standards may be used for executing the proof test.

c.2. Optical fiber cables and accessories designed for underwater use.

Note: 5A002.c.2 does not control standard civil telecommunication cables and accessories.

N.B. 1: For underwater umbilical cables, and connectors thereof, see 8A002.a.3.

N.B. 2: For fiber-optic hull penetrators or connectors, see 8A002.c.

d. “Electronically steerable phased array antennae” operating above 31 GHz.

Note: 5A001.d does not control “electronically steerable phased array antennae” for landing systems with instruments meeting ICAO standards covering microwave landing systems (MLS).

5A101 Telemetering and telecontrol equipment usable for “missiles”.

LIST OF ITEMS CONTROLLED

Unit: $ value
Related Controls: N/A
Related Definitions: N/A
Items: The list of items controlled is contained in the ECCN heading.

a. Any type of telecommunications equipment, not controlled by 5A001.a, specially designed to operate outside the temperature range from 219 K (−54°C) to 397 K (124°C).

b. Telecommunication transmission equipment and systems, and specially designed components and accessories therefor, having any of the following characteristics, functions or features:

Note: Telecommunication transmission equipment:

a. Categorized as follows, or combinations thereof:
1. Radio equipment (e.g., transmitters, receivers and transceivers);
2. Line terminating equipment;
3. Intermediate amplifier equipment;
4. Repeater equipment;
5. Regenerator equipment;
6. Translation encoders (transcoders);
7. Multiplexer equipment (statistical multiplex included);
8. Modulators/demodulators (modems);
9. Transmultiplexer equipment (see CCITT Rec. G.701);
10. “Stored program controlled” digital crossconnection equipment;
11. “Gateways” and bridges;
12. “Media access units”;

b. Designed for use in single or multi-channel communication via any of the following:
1. Wire (line);
2. Coaxial cable;
3. Optical fiber cable;  
4. Electromagnetic radiation; or  
5. Underwater acoustic wave propagation.

b.1. Employing digital techniques, including digital processing of analog signals, and designed to operate at a "digital transfer rate" at the highest multiplex level exceeding 45 Mbit/s or a "total digital transfer rate" exceeding 90 Mbit/s;  

NOTE: SA 991.b.1 does not control equipment specially designed to be integrated and operated in any satellite system for civil use.

b.2. Modems using the "bandwidth of one voice channel" with a "data signalling rate" exceeding 9,600 bits per second;  

b.3. Being "stored program controlled" digital cross connect equipment with "digital transfer rate" exceeding 8.5 Mbit/s per port;  

b.4. Being equipment containing any of the following:  

b.4.a. "Network access controllers" and their related common medium having a "digital transfer rate" exceeding 33 Mbit/s; or  

b.4.b. "Communication channel controllers" with a digital output having a "data signalling rate" exceeding 64,000 bits per channel;  

NOTE: If any uncontrolled equipment contains a "network access controller", it cannot have any type of telecommunications interface, except those described in, but not controlled by SA 991.b.4.

b.5. Employing a "laser" and having any of the following characteristics:  

b.5.a. A transmission wavelength exceeding 1,000 nm; or  

b.5.b. Employing analog techniques and having a bandwidth exceeding 45 MHz;  

NOTE: SA 991.b.5.b does not control commercial TV systems.

b.5.c. Employing coherent optical transmission or coherent optical detection techniques (also called optical heterodyne or homodyne techniques);  

b.5.d. Employing wavelength division multiplexing techniques; or  

b.5.e. Performing "optical amplification";  

b.6. Radio equipment operating at input or output frequencies exceeding:  

b.6.1. 31 GHz for satellite-earth station applications; or  

b.6.2. 26.5 GHz for other applications;  

NOTE: SA 991.b.6 does not control equipment for civil use when conforming with an International Telecommunications Union (ITU) allocated band between 26.5 GHz and 31 GHz.

b.7. Being radio equipment employing any of the following:  

b.7.a. Quadrature-amplitude-modulation (QAM) techniques above level 4 if the "total digital transfer rate" exceeds 8.5 Mbit/s;  

b.7.b. QAM techniques above level 16 if the "total digital transfer rate" is equal to or less than 8.5 Mbit/s; or  

b.7.c. Other digital modulation techniques and having a "spectral efficiency" exceeding 3 bit/sec/Hz;  

NOTE: 1. SA 001.b.7 does not control equipment specially designed to be integrated and operated in any satellite system for civil use.  

2. SA 001.b.7 does not control radio relay equipment for operation in an ITU allocated band:  

a. Having any of the following:  

a.1. Not exceeding 900 MHz; or  

a.2. With a "total digital transfer rate" not exceeding 8.5 Mbit/s; and  

b. Having a "spectral efficiency" not exceeding 4 bit/sec/Hz.  

b.8. Providing functions of digital "signal processing" as follows:  

b.8.a. Voice coding at rates less than 2,400 bits;  

b.8.b. Employing circuitry that incorporates "user-accessible programmability" of digital "signal processing" circuits exceeding the limits of 4A003.b.  

c. "Stored program controlled" switching equipment and related signalling systems, having any of the following characteristics, functions or features, and specially designed components and accessories therefrom:  

NOTE: Statistical multiplexers with digital input and digital output which provide switching are treated as "stored program controlled" switches.

c.1. "Data (message) switching" equipment or systems designed for "packet-mode operation" and assemblies and components thereof, n.e.s.

c.2. Containing "Integrated Services Digital Network" (ISDN) functions and having any of the following:  

b.2.a. Switch-terminal (e.g., subscriber line) interfaces with a "digital transfer rate" at the highest multiplex level exceeding 192,000 bits, including the associated signalling channel (e.g., 2B+D); or  

b.2.b. The capability that a signalling message received by a switch on a given channel that is related to a communication on another channel may be passed through to another switch.  

NOTE: SA 991.c. does not preclude the evaluation and appropriate actions taken by the receiving switch or unrelated user message traffic on a D channel of ISDN.

c.3. Routing or switching of "datagram" packets;  

c.4. Routing or switching of "fast select" packets;  

NOTE: The restrictions in SA 991.c.3 and c.4 do not apply to networks restricted to using only "network access controllers" or to "network access controllers" themselves.

c.5. Multi-level priority and pre-emption for circuit switching.
NOTE: 5A991.c.5 does not control single-level call preemption.

c.6. Designed for automatic hand-off of cellular radio calls to other cellular switches or automatic connection to a centralized subscriber database common to more than one switch;

c.7. Containing "stored program controlled" digital crossconnect equipment with "digital transfer rate" exceeding 8.5 Mbit/s per port;

c.8. "Common channel signalling" operating in either non-associated or quasi-associated mode of operation;

c.9. "Dynamic adaptive routing";

NOTE: 5A991.c.10 does not control packet switches or routers with ports or lines not exceeding the limits in 5A001.c.10.

c.10. Being packet switches, circuit switches and routers with ports or lines exceeding any of the following:

c.10.a. A "data signalling rate" of 64,000 bit/s per channel for a "communications channel controller";

or

NOTE: 5A991.c.10.a does not control multiplex composite links composed only of communication channels not individually controlled by 5A991.b.1.

c.10.b. A "digital transfer rate" of 33 Mbit/s for a "network access controller" and related common media;

c.10.c. "Optical switching";

c.10.d. Employing "Asynchronous Transfer Mode" ("ATM") techniques.

d. Optical fibers and optical fiber cables of more than 50 m in length designed for single mode operation:

e. Centralized network control having all of the following characteristics:

1. Receives data from the nodes; and

2. Process these data in order to provide control of traffic not requiring operator decisions, and thereby performing "dynamic adaptive routing";

NOTE: 5A991.e does not preclude control of traffic as a function of predictable statistical traffic conditions.

f. Phased array antennae, operating above 10.5 GHz, containing active elements and distributed components, and designed to permit electronic control of beam shaping and pointing, except for landing systems with instruments meeting International Civil Aviation Organization (ICAO) standards (micro-wave landing systems (MLS));

g. Mobile communications equipment, n.e.s., and assemblies and components therefor;

h. Radio relay communications equipment designed for use at frequencies equal to or exceeding 19.7 GHz and assemblies and components therefor, n.e.s.

B. TEST, INSPECTION AND PRODUCTION EQUIPMENT

5B001 Telecommunication test, inspection and production equipment, as follows (See List of Items Controlled). LICENSE REQUIREMENTS Reason for Control: NS, AT

Control(s) Country Chart

NS applies to entire entry ........ NS Column 2

GBS: Yes

CIV: Yes

LIST OF ITEMS CONTROLLED

Unit: Equipment in number; parts and accessories in $ value

Related Controls: See also 5B991.

Related Definition: N/A

Items:

a. Equipment and specially designed components or accessories therefor, specially designed for the "development", "production" or "use" of equipment, functions or features controlled by 5A001, 5D001 or 5E001.

NOTE: 5B001.a does not control optical fiber characterization equipment not using semiconductor "lasers".

b. Equipment and specially designed components or accessories therefor, specially designed for the "development" of any of the following telecommunication transmission or "stored program controlled" switching equipment:

b.1. Equipment employing digital techniques, including "Asynchronous Transfer Mode" ("ATM"), designed to operate at a "total digital transfer rate" exceeding 1.5 Gbit/s;

b.2. Equipment employing a "laser" and having any of the following:

b.2.a. A transmission wavelength exceeding 1750 nm;

b.2.b. Performing "optical amplification";

b.2.c. Employing coherent transmission or coherent optical detection techniques (also called optical heterodyne or homodyne techniques); or

b.2.d. Employing analogue techniques and having a bandwidth exceeding 2.5 GHz;

NOTE: 5B001.b.2.d does not include equipment specially designed for the "development" of commercial TV systems.

b.3. Equipment employing "optical switching";

b.4. Radio equipment having any of the following:

b.4.a. Quadrature-amplitude-modulation (QAM) techniques above level 128; or
b.4b. Operating at input or output frequencies exceeding 31 GHz; or

**NOTE:** 5B001.b.4b does not include equipment specially designed for the "development" of equipment designed or modified for operation in any ITU allocated band.

b.5. Equipment employing "common channel signalling" operating in either the non-associated mode of operation.

5C991 Preforms of glass or of any other material optimized for the manufacture of optical fibers controlled by 5A991.

LVS: Yes: $500 for components and spare parts only. N/A for equipment.
GBS: N/A
CIV: N/A

LIST OF ITEMS CONTROLLED
Unit: $ value
Related Controls: See also 5A992. This entry does not control: (a) “Personalized smart cards” or specially designed components therefor, with any of the following characteristics: (1) Not capable of message traffic encryption or encryption of user-supplied data or related key management functions therefor; or (2) When restricted for use in equipment or systems excluded from control under the note to 5A002.c, or under paragraphs (b) through (h) of this note. (b) Equipment containing “fixed” data compression or coding techniques; (c) Receiving equipment for radio broadcast, pay television or similar restricted audience television of the consumer type, without digital encryption and where digital decryption is limited to the video, audio or management functions; (d) Portable or mobile radiotelephones for civil use (e.g., for use with commercial civil cellular radiocommunications systems) that are not capable of end-to-end encryption; (e) Encryption functions specially designed to
allow the execution of copy-protected "software", provided the decryption functions are not user-accessible; (f) Access control equipment, such as automatic teller machines, self-service statement printers or point of sale terminals, that protects password or personal identification numbers (PIN) or similar data to prevent unauthorized access to facilities but does not allow for encryption of files or text, except as directly related to the password or PIN protection; (g) Data authentication equipment that calculates a Message Authentication Code (MAC) or similar result to ensure no alteration of text has taken place, or to authenticate users, but does not allow for encryption of data, text or other media other than that needed for the authentication; (h) Cryptographic equipment specially designed, developed or modified for use in machines for banking or money transactions, and restricted to use only in such transactions. Machines for banking or money transactions include automatic teller machines, self-service statement printers, point of sale terminals, or equipment for the encryption of interbanking transactions.

Related Definitions: For the control of global navigation satellite systems receiving equipment containing or employing decryption (i.e. GPS or GLONASS), see 7A005.

Items:

a. Systems, equipment, application specific "assemblies", modules or integrated circuits for "information security", and specially designed components therefor:
   a.1. Designed or modified to use "cryptography" employing digital techniques to ensure "information security";
   a.2. Designed or modified to perform cryptoanalytic functions;
   a.3. Designed or modified to use "cryptography" employing analog techniques to ensure "information security";

NOTE: 5A002.a.3 does not control the following:

1. Equipment using "fixed" band scrambling not exceeding 8 bands and in which the transpositions change not more frequently than once every second;
2. Equipment using "fixed" band scrambling exceeding 8 bands and in which the transpositions change not more frequently than once every ten seconds;
3. Equipment using "fixed" frequency inversion and in which the transpositions change not more frequently than once every second;
4. Facsimile equipment;
5. Restricted audience broadcast equipment; and 6 Civil television equipment;
   a.4. Designed or modified to suppress the compromising emanations of information-bearing signals;

NOTE: 5A002.a.4 does not control equipment specially designed to suppress emanations for reasons of health and safety.

a.5. Designed or modified to use cryptographic techniques to generate the spreading code for "spread spectrum" or the hopping code for "frequency agility" systems;

a.6. Designed or modified to provide certified or certifiable "multilevel security" or user isolation at a level exceeding Class B2 of the Trusted Computer System Evaluation Criteria (TCSEC) or equivalent;

a.7. Communications cable systems designed or modified using mechanical, electrical or electronic means to detect surreptitious intrusion.

PART 2—INFORMATION SECURITY

5A992 Equipment not controlled by 5A002.

Control(s) Country Chart
NS applies to entire entry ........ NS Column 1.
AT applies to entire entry ........ AT Column 1.

EI applies to encryption items transferred from the U.S. Munitions List to the Commerce Control List consistent with E.O. 13026 of November 15, 1996 (61 FR 58767) and pursuant to the Presidential Memorandum of that date. Refer to § 742.15 of the EAR.

NOTE: Encryption software is controlled because of its functional capacity, and not because of any informational value of such software; such software is not accorded the same treatment under the EAR as other “software”; and for export licensing purposes, encryption software is treated under the EAR in the same manner as a commodity included in ECCN 5A002. License Exceptions for commodities are not applicable.

NOTE: Encryption software controlled for EI reasons under this entry remains subject to the EAR even when made publicly available in accordance with part 734 of the EAR, and it is not eligible for the General Software Note (“mass market” treatment under License Exception TSU for mass market software). After a technical review, certain encryption software may be released from EI controls and made eligible for the General Software Note treatment as well as other provisions of the EAR applicable to software. Refer to § 742.15(b)(1) of the EAR, and Supplement No. 6 to part 742 of the EAR.

LICENSE REQUIREMENTS: See § 743.1 of the EAR for reporting requirements for exports of software controlled under 5D002 and exported under License Exception GOV.

LICENSE EXCEPTIONS
CIV: N/A

LIST OF ITEMS CONTROLLED
Unit: N/A
Related Controls: See also 5E992
Related Definitions: N/A
Items: a. Marine acoustic systems, equipment and specially designed components therefor, as follows:

a.1. Active (transmitting or transmitting-and-receiving) systems, equipment and specially designed components therefor, as follows:

a.1.a. Wide-swath bathymetric survey systems designed for sea bed topographic mapping, having all of the following:

a.1.a.1. Being designed to take measurements at an angle exceeding 20° from the vertical;

a.1.a.2. Being designed to measure depths exceeding 600 m below the water surface; and

a.1.a.3. Being designed to provide any of the following:

a.1.a.3.a. Incorporation of multiple beams any of which is less than 1.9°; or
a.1.a.3.b. Data accuracies of better than 0.3% of water depth across the swath averaged over the individual measurements when measuring the position of surface vessels or underwater vehicles;

a.1.b. Object detection or location systems having any of the following:

a.1.b.1. A transmitting frequency below 10 Khz;

a.1.b.2. Sound pressure level exceeding 224 Db (reference 1 µPa at 1 m) for equipment with an operating frequency in the band from 10 Khz to 24 Khz inclusive;

a.1.b.3. Sound pressure level exceeding 235 Db (reference 1 µPa at 1 m) for equipment with an operating frequency in the band between 24 Khz and 30 Khz;

a.1.b.4. Forming beams of less than 1° on any axis and having an operating frequency of less than 100 Khz;

a.1.b.5. Designed to operate with an unambiguous display range exceeding 5,120 m; or

a.1.b.6. Designed to withstand pressure during normal operation at depths exceeding 1,000 m and having transducers with any of the following:

a.1.b.6.a. Dynamic compensation for pressure; or

a.1.b.6.b. Incorporating other than lead zirconate titanate as the transduction element;

a.1.c. Acoustic projectors, including transducers, incorporating piezoelectric, magnetostrictive, electrostrictive, electrodynamic or hydraulic elements operating individually or in a designed combination, having any of the following:

Notes: 1. The control status of acoustic projectors, including transducers, specially designed for other equipment is determined by the control status of the other equipment.

2. 6A001.a.1.c does not control electronic sources that direct the sound vertically only, or mechanical (e.g., air gun or vapor-shock gun) or chemical (e.g., explosive) sources.

a.1.c.1. An instantaneous radiated acoustic power density exceeding 0.01 mW/mm²/Hz for devices operating at frequencies below 10 Khz;

a.1.c.2. A continuously radiated acoustic power density exceeding 0.001 mW/mm²/Hz for devices operating at frequencies below 10 Khz;

Technical Note: Acoustic power density is obtained by dividing the output acoustic power by the product of the area of the radiating surface and the frequency of operation.

a.1.c.3. Designed to withstand pressure during normal operation at depths exceeding 1,000 m; or

a.1.c.4. Side-lobe suppression exceeding 22 Db;

a.1.d. Acoustic systems, equipment and specially designed components for determining the position of surface vessels or underwater vehicles having any of the following:

Note: 6A001.a.1.d includes:

a. Equipment using coherent "signal processing" between two or more beacons and the hydrophone unit carried by the surface vessel or underwater vehicle;

b. Equipment capable of automatically correcting speed-of-sound propagation errors for calculation of a point.

a.1.d.1. Designed to operate at a range exceeding 1,000 m with a positioning accuracy of less than 10 m rms (root mean square) when measured at a range of 1,000 m; or

a.1.d.2. Designed to withstand pressure at depths exceeding 1,000 m; a.2. Passive (receiving, whether or not related in normal application to separate active equipment) systems, equipment and specially designed components therefor, as follows:

a.2.a. Hydrophones (transducers) having any of the following characteristics:

a.2.a.1. Incorporating continuous flexible sensors or assemblies of discrete sensor elements with either a diameter or length less than 20 mm and with a separation between elements of less than 20 mm;

a.2.a.2. Having any of the following sensing elements:

a.2.a.2.a. Optical fibers;

a.2.a.2.b. Piezoelectric polymers;

a.2.a.2.c. Flexible piezoelectric ceramic materials;

a.2.a.3. A hydrophone sensitivity better than –136 Db at any depth with no acceleration compensation;

a.2.a.4. When designed to operate at depths not exceeding 35 m, a hydrophone sensitivity better than –136 Db with acceleration compensation;

a.2.a.5. When designed for normal operation at depths exceeding 35 m, a hydrophone sensitivity better than –132 Db with acceleration compensation;

a.2.a.6. When designed for normal operation at depths exceeding 100 m, a hydrophone sensitivity better than –204 Db;

a.2.a.7. Designed for operation at depths exceeding 1,000 m;

Technical Note: Hydrophone sensitivity is defined as twenty times the logarithm to the base 10 of the ratio of rms output voltage to a 1 V rms reference, when the hydrophone sensor, without a pre-amplifier, is placed in a plane wave acoustic field with an rms pressure of 1 µPa. For example, a hydrophone of –180 Db (reference 1 V per µPa) would yield an output voltage of 10⁻¹⁸ V in such a field, while one of –180 Db sensitivity would yield only 10⁻¹⁹ V output. Thus, –160 Db is better than –180 Db.

a.2.b. Towed acoustic hydrophone arrays having any of the following:

a.2.b.1. Hydrophone group spacing of less than 12.5 m;

a.2.b.2. Hydrophone group spacing of 12.5 m to less than 25 m and designed or able to be modified to operate at depths exceeding 35 m;

**Related Definitions:**

1. “Image intensifiers” defined in 6A002.a.2 and “focal plane arrays” defined in 6A002.a.3 specially designed, modified, or configured for military use and not part of civil equipment are subject to the export licensing authority of U.S. Department of State, Office of Defense Trade Controls (22 CFR part 121).
2. “Space qualified” “monospectral imaging sensors”, and “multispectral imaging sensors” defined in 6A002.b, and “space-qualified” “focal plane arrays” defined in 6A002.e, specially designed or modified for items on the U.S. Munitions List are subject to the export licensing authority of the Department of State, Office of Defense Trade Controls (22 CFR part 121).

**Items:**

- a. Optical detectors, as follows:
  - a.1. “Space-qualified” solid-state detectors, as follows:
    - a.1.a. “Space-qualified” solid-state detectors, having all of the following:

**NOTE:** 6A002.a does not control germanium or silicon photodevices.

<table>
<thead>
<tr>
<th>15 CFR Ch. VII (1–1–00 Edition)</th>
</tr>
</thead>
</table>

**TECHNICAL NOTE:** “Able to be modified” in 6A001.a.2.b.2 means having provisions to allow a change of the wiring or interconnections to alter hydrophone group spacing or operate at different depth limits. These provisions are: spare wiring exceeding 10% of the number of wires, hydrophone group spacing adjustment blocks or internal depth limiting devices that are adjustable or that control more than one hydrophone group.

- a.2.b.3. Hydrophone group spacing of 25 m or more and designed to operate at depths exceeding 100 m;
- a.2.b.4. Heading sensors controlled by 6A001.a.2.d;
- a.2.b.5. Longitudinally reinforced array hoses;
- a.2.b.6. An assembled array of less than 40 mm in diameter;
- a.2.b.7. Multiplexed hydrophone group signals designed to operate at depths exceeding 35 m or having an adjustable or removable depth sensing device in order to operate at depths exceeding 35 m; or
- a.2.b.8. Hydrophone characteristics controlled by 6A001.a.2.a;
- a.2.c. Processing equipment, specially designed for towed acoustic hydrophone arrays, having “user accessible programmability” and time or frequency domain processing and correlation, including spectral analysis, digital filtering and beamforming using Fast Fourier or other transforms or processes;
- a.2.d. Heading sensors having all of the following:
  - a.2.d.1. An accuracy of better than ± 0.5°; and
  - a.2.d.2. Any of the following:
    - a.2.d.2.a. Designed to be incorporated without the array hosing and to operate at depths exceeding 35 m or having an adjustable or removable depth sensing device in order to operate at depths exceeding 35 m; or
    - a.2.d.2.b. Designed to be mounted external to the array hosing and having a sensor unit capable of operating with 360° roll at depths exceeding 35 m;
- a.2.e. Bottom or bay cable systems having any of the following:
  - a.2.e.1. Incorporating hydrophones controlled by 6A001.a.2.a;
  - a.2.e.2. Incorporating multiplexed hydrophone group signals designed to operate at depths exceeding 35 m or having an adjustable or removable depth sensing device in order to operate at depths exceeding 35 m; or
  - a.2.f. Processing equipment, specially designed for bottom or bay cable systems, having “user accessible programmability” and time or frequency domain processing and correlation, including spectral analysis, digital filtering and beamforming using Fast Fourier or other transforms or processes;
- b. Correlation-velocity sonar log equipment designed to measure the horizontal speed of the equipment carrier relative to the sea bed at distances between the carrier and the sea bed exceeding 500 m.

**LIST OF ITEMS CONTROLLED**

<table>
<thead>
<tr>
<th>15 CFR Ch. VII (1–1–00 Edition)</th>
</tr>
</thead>
</table>

**LICENSE REQUIREMENT NOTES:** See §743.1 of the EAR for reporting requirements for exports under License Exceptions.
a.1.a.1. A peak response in the wavelength range exceeding 10 nm but not exceeding 300 nm; and
a.1.a.2. A response of less than 0.1% relative to the peak response at a wavelength exceeding 400 nm;
a.1.b. "Space-qualified" solid-state detectors, having all of the following:
a.1.b.1. A peak response in the wavelength range exceeding 900 nm but not exceeding 1,200 nm; and
a.1.b.2. A response "time constant" of 95 ns or less;
a.1.c. "Space-qualified" solid-state detectors having a peak response in the wavelength range exceeding 1,200 nm but not exceeding 30,000 nm;
a.2. Image intensifier tubes and specially designed components therefor, as follows:
a.2.a. Image intensifier tubes having all of the following:
a.2.a.1. A peak response in the wavelength range exceeding 400 nm but not exceeding 1,050 nm;
a.2.a.2. A microchannel plate for electron image amplification with a hole pitch (center-to-center spacing) of 15 \( \mu \text{m} \) or less; and
a.2.a.3. Photocathodes, as follows:
a.2.a.3.a. S±20, S±25 or multialkali photocathodes with a luminous sensitivity exceeding 240 \( \mu \text{A}/\text{lm} \);
a.2.a.3.b. GaAs or GaInAs photocathodes; or
a.2.a.3.c. Other III–V compound semiconductor photocathodes;
NOTE: 6A002.a.2.a.3c does not control compound semiconductor photocathodes with a maximum radiant sensitivity of 10 mA/W or less.
a.2.b. Specially designed components, as follows:
a.2.b.1. Microchannel plates having a hole pitch (center-to-center spacing) of 15 \( \mu \text{m} \) or less;
a.2.b.2. GaAs or GaInAs photocathodes;
a.2.b.3. Other III–V compound semiconductor photocathodes;
NOTE: 6A002.a.2.b.3 does not control compound semiconductor photocathodes with a maximum radiant sensitivity of 10 mA/W or less.
a.3. Non-"space-qualified" "focal plane arrays", as follows:
TECHNICAL NOTE: Linear or two-dimensional multi-element detector arrays are referred to as "focal plane arrays".
NOTES: 1. 6A002.a.3 includes photoconductive arrays and photovoltaic arrays.
2. 6A002.a.3 does not control silicon "focal plane arrays", multi-element (not to exceed 16 elements) encapsulated photoconductive cells or pyroelectric detectors using any of the following:
a. Lead sulphide;
b. Triglycine sulphate and variants;
c. Lead-lanthanum-zirconium titanate and variants;
d. Lithium tantalate;
e. Polyvinylidene fluoride and variants;
f. Strontium barium niobate and variants;
or
1. Non-"space-qualified" "focal plane arrays", having all of the following:
a.3.a.1. Individual elements with a peak response within the wavelength range exceeding 900 nm but not exceeding 1,050 nm; and
a.3.a.2. A response "time constant" of less than 0.5 ns;
a.3.b. Non-"space-qualified" "focal plane arrays", having all of the following:
a.3.b.1. Individual elements with a peak response in the wavelength range exceeding 1,050 nm but not exceeding 1,200 nm; and
a.3.b.2. A response "time constant" of 95 ns or less;
a.3.c. Non-"space-qualified" "focal plane arrays", having individual elements with a peak response in the wavelength range exceeding 1,200 nm but not exceeding 30,000 nm. b. "Monospectral imaging sensors" and "multispectral imaging sensors" designed for remote sensing applications, having any of the following:
b.1. An Instantaneous-Field-Of-View (IFOV) of less than 200 \( \mu \text{r} \) (microradians); or
b.2. Being specified for operation in the wavelength range exceeding 400 nm but not exceeding 30,000 nm and having all the following:
b.2.a. Providing output imaging data in digital format; and
b.2.b. Being any of the following:
b.2.b.1. "Space-qualified"; or
b.2.b.2. Designed for airborne operation, using other than silicon detectors, and having an IFOV of less than 2.5 \( \mu \text{r} \) (milliradians);
c. Direct view imaging equipment operating in the visible or infrared spectrum, incorporating any of the following:
c.1. Image intensifier tubes having the characteristics listed in 6A002.a.2.a; or
c.2. "Focal plane arrays" having the characteristics listed in 6A002.a.3.
TECHNICAL NOTE: "Direct view" refers to imaging equipment, operating in the visible or infrared spectrum, that presents a visual image to a human observer without converting the image into an electronic signal for television display, and that cannot record or store the image photographically, electronically or by any other means.
NOTE: 6A002.c does not control the following equipment incorporating other than GaAs or GaInAs photocathodes:
a. Industrial or civilian intrusion alarm, traffic or industrial movement control or counting systems;
b. Medical equipment;
c. Industrial equipment used for inspection, sorting or analysis of the properties of materials;

d. Flame detectors for industrial furnaces;

e. Equipment specially designed for laboratory use.

Special support components for optical sensors, as follows:

d.1. “Space-qualified” cryocoolers;

d.2. Non-“space-qualified” cryocoolers, having a cooling source temperature below 215 K (-50°C), as follows:

d.2.a. Closed cycle type with a specified Mean-Time-To-Failure (MTTF), or Mean-Time-Between-Failures (MTBF), exceeding 2,500 hours;

d.2.b. Joule-Thomson (JT) self-regulating minicoolers having bore (outside) diameters of less than 8 mm;

d.3. Optical sensing fibers specially fabricated either compositionally or structurally, or modified by coating, to be acoustically, thermally, inertially, electromagnetically or nuclear radiation sensitive.

d.4. “Space qualified” “focal plane arrays” having more than 2,048 elements per array and having a peak response in the wavelength range exceeding 300 nm but not exceeding 900 nm.

d.5. “Space qualified” “focal plane arrays” with twelve elements or fewer, not employing time-delay-and integration with the element, designed for any of the following:

b. Imaging cameras, as follows:

b.1. Video cameras incorporating solid state sensors, having any of the following:

b.1.a. More than 4 x 10^6 “active pixels” per solid state array for monochrome (black and white) cameras;

b.1.b. More than 4 x 10^6 “active pixels” per solid state array for color cameras incorporating three solid state arrays; or

b.1.c. More than 12 x 10^6 “active pixels” for solid state array color cameras incorporating one solid state array;

b.2. Scanning cameras and scanning camera systems, having all of the following:

b.2.a. Line detector arrays with more than 8,192 elements per array; and

b.2.b. Mechanical scanning in one direction;

b.3. Imaging cameras incorporating image intensifier tubes having the characteristics listed in 6A002.a.2.a;

b.4. Imaging cameras incorporating “focal plane arrays” having the characteristics listed in 6A002.a.3.

Note: 6A003.a.1 does not control imaging cameras designed for civil purposes.

a.2. Mechanical high speed cameras, in which the film does not move, capable of recording at rates exceeding 1,000,000 frames/s for the full framing height of 35 mm film, or at proportionately higher rates for lesser frame heights, or at proportionately lower rates for greater frame heights.

a.3. Mechanical or electronic streak cameras having writing speeds exceeding 10 mm/µs;

a.4. Electronic framing cameras having a speed exceeding 1,000,000 frames/s;

a.5. Electronic cameras, having all of the following:

a.5.a. An electronic shutter speed (gating capability) of less than 1 µs per full frame; and

a.5.b. A read out time allowing a framing rate of more than 125 frames per second.

b. Imaging cameras, as follows:

b.1. Video cameras incorporating solid state sensors, having any of the following:

b.1.a. More than 4 x 10^6 “active pixels” per solid state array for monochrome (black and white) cameras;

b.1.b. More than 4 x 10^6 “active pixels” per solid state array for color cameras incorporating three solid state arrays; or

b.1.c. More than 12 x 10^6 “active pixels” for solid state array color cameras incorporating one solid state array;

b.2. Scanning cameras and scanning camera systems, having all of the following:

b.2.a. Linear detector arrays with more than 8,192 elements per array; and

b.2.b. Mechanical scanning in one direction;

b.3. Imaging cameras incorporating image intensifier tubes having the characteristics listed in 6A002.a.2.a;

b.4. Imaging cameras incorporating “focal plane arrays” having the characteristics listed in 6A002.a.3.

Note: 6A003.b.4 does not control imaging cameras designed for civil purposes.

a. Mechanical high speed cameras, in which the film does not move, capable of recording at rates exceeding 1,000,000 frames/s for the full framing height of 35 mm film, or at proportionately higher rates for lesser frame heights, or at proportionately lower rates for greater frame heights.

THERMAL SYSTEMS

d. Flame detectors for industrial furnaces;

e. Equipment specially designed for laboratory use.

Equipment specially designed for laboratory use; or

e. Medical equipment.

Related Definitions: N/A

Items: a. Optical mirrors (reflectors), as follows:
   a.1. “Deformable mirrors” having either continuous or multi-element surfaces, and specially designed components therefor, capable of dynamically repositioning portions of the surface of the mirror at rates exceeding 100 Hz;
   a.2. Lightweight monolithic mirrors having an average “equivalent density” of less than 30 kg/m³ and a total mass exceeding 10 kg;
   a.3. Lightweight “composite” or foam mirror structures having an average “equivalent density” of less than 30 kg/m³ and a total mass exceeding 2 kg;
   a.4. Beam steering mirrors more than 100 mm in diameter or length of major axis, that maintain a flatness of lambda/2 or better (lambda is equal to 633 nm) having a control bandwidth exceeding 100 Hz;
   b. Optical components made from zinc selenide (ZnSe) or zinc sulphide (ZnS) with transmission in the wavelength range exceeding 3,000 nm but not exceeding 25,000 nm and having any of the following:
      b.1. Exceeding 100 cm² in volume; or
      b.2. Exceeding 80 mm in diameter or length of major axis and 20 mm in thickness (depth);
   c. “Space-qualified” components for optical systems, as follows:
      c.1. Lightweighted to less than 20% “equivalent density” compared with a solid blank of the same aperture and thickness;
      c.2. Substrates, substrates having surface coatings (single-layer or multi-layer, metallic or dielectric, conducting, semiconducting or insulating) or having protective films;
      c.3. Segments or assemblies of mirrors designed to be assembled in space into an optical system with a collecting aperture equivalent to or larger than a single optic 1 m in diameter;
      c.4. Manufactured from “composite” materials having a coefficient of linear thermal expansion equal to or less than 5 x 10⁻⁶ in any coordinate direction.
   d. Optical control equipment, as follows:
      d.1. Specially designed to maintain the surface figure or orientation of the “space-qualified” components controlled by 6A004.c.1 or 6A004.c.3;
      d.2. Having steering, tracking, stabilization or resonator alignment bandwidths equal to or more than 100 Hz and an accuracy of 10 µ (microradians) or less;
      d.3. Gimbals having all of the following:
         d.3.a. A maximum slew exceeding 5°;
         d.3.b. A bandwidth of 100 Hz or more;
         d.3.c. Angular pointing errors of 200 µ (microradians) or less; and
      d.3.d. Having any of the following:
         d.3.d.1. Exceeding 0.15 m but not exceeding 1 m in diameter or major axis length and capable of angular accelerations exceeding 2 r (radians)/s²; or
         d.3.d.2. Exceeding 1 m in diameter or major axis length and capable of angular accelerations exceeding 0.5 r (radians)/s²;
   d.4. Specially designed to maintain the alignment of phased array or phased segment mirror systems consisting of mirrors with a segment diameter or major axis length of 1 m or more.

6A005 “Lasers”, components and optical equipment, as follows (see List of Items Controlled).

Reason for Control: NS, NP, AT

Control(s) Country Chart
NS applies to entire entry .......... NS Column 2
NP applies to 6A005.a.1.c, a.2.a NP Column 1
   (with an output power >40W), a.4.c, a.6, (argon ion lasers only), c.1b (with an output power >30W), c.2.c.2.a (with an output power >40W), c.2.c.2.b (with an output power >40W), and d.2.c.
   AT applies to entire entry .......... AT Column 1

LICENSE EXCEPTIONS
LVS: N/A for NP items
$3000 for all other items

GBS: Yes, for 6A005.d (except d.2.c), CO₂ or CO/CO₂ “lasers” having an output wavelength in the range from 9,000 to 11,000 nm and having a pulsed output not exceeding 2 J per pulse and a maximum rated average single or multimode output power not exceeding 5 Kw; CO “lasers” having a CW maximum rated single or multimode output power not exceeding 10 Kw; CO₂ “lasers” controlled by 6A005.a.4 that operate in CW multi-transverse mode; and having a CW output power not exceeding 15 Kw; Neodymium-doped (other than glass),

pulse-excited, “Q-switched lasers” controlled by 6A005.c.2.b.2 having a pulse duration equal to or more than 1 ns; and a multiple-transverse mode output with a “peak power” not exceeding 400 MW; Neodymium-doped (other than glass) “lasers” controlled by 6A005.c.2.b.3 or 6A005.c.2.b.4 having an output wavelength exceeding 1,000 nm, but not exceeding 1,100 nm; and an average or CW output power not exceeding 2 KW; and operate in a pulse-excited, non-“Q-switched” multiple-transverse mode; or in a continuously excited, multiple-transverse mode; and 6A005.g.1.

CIV: Yes, for 6A005.d (except d.2c), CO2, or CO/CO2 “lasers” having an output wavelength in the range from 9,000 to 11,000 nm and having a pulsed output not exceeding 2 J per pulse and a maximum rated average single or multimode output power not exceeding 5 Kw; CO2 “lasers” having a CW maximum rated single or multimode output power not exceeding 10 Kw; CO2 “lasers” controlled by 6A005.a.4 that operate in CW multiple-transverse mode; and having a CW output power not exceeding 15 Kw; Neodymium-doped (other than glass), pulse-excited, “Q-switched lasers” controlled by 6A005.c.2.b.2 having a pulse duration equal to or more than 1 ns; and a multiple-transverse mode output with a “peak power” not exceeding 400 MW; Neodymium-doped (other than glass) “lasers” controlled by 6A005.a.4 or 6A005.c.2.b.4 having an output wavelength exceeding 1,000 nm, but not exceeding 1,100 nm; and an average or CW output power not exceeding 2 KW; and operate in a pulse-excited, non-“Q-switched” multiple-transverse mode; or in a continuously excited, multiple-transverse mode; and 6A005.g.1.

List of Items Controlled

Unit: Equipment in number; parts and accessories in $ value

Related Controls: (1) See also 6A205, 6A995, 8B001.g.5 and 8B001.b.6. (2) For excimer “lasers” specially designed for lithography equipment, see 3B001. (3) Shared aperture optical elements, capable of operating in “super-high power laser” applications are subject to the export licensing authority of the U.S. Department of State, Office of Defense Trade Controls. (See 22 CFR part 121.)

Related Definitions: (1) Pulsed “lasers” include those that run in a continuous wave (CW) mode with pulses superimposed. (2) Pulse-excited “lasers” include those that run in a continuously excited mode with pulse excitation superimposed. (3) The control status of Raman “lasers” is determined by the parameters of the pumping source “lasers”. The pumping source “lasers” can be any of the “lasers” described as follows:

Items:

- a. Gas “lasers”, as follows:
  - a.1. Excimer “lasers”, having any of the following:
    - a.1.a. An output wavelength not exceeding 150 nm and having any of the following:
      - a.1.a.1. An output energy exceeding 50 mJ per pulse; or
      - a.1.a.2. An average or CW output power exceeding 1 W; or
      - a.1.b. An output wavelength exceeding 150 nm but not exceeding 190 nm and having any of the following:
        - a.1.b.1. An output energy exceeding 1.5 J per pulse; or
        - a.1.b.2. An average or CW output power exceeding 120 W; or
        - a.1.d. An output wavelength exceeding 360 nm and having any of the following:
          - a.1.d.1. An output energy exceeding 1.5 J per pulse; or
          - a.1.d.2. An average or CW output power exceeding 30 W; or
          - a.1.d.2. An average or CW output power exceeding 500 W; or
          - a.1.d.2. An average or CW output power exceeding 150 Kw; or
          - a.1.d.2. An average or CW output power exceeding 5 Kw; or
          - a.1.d.2. An average or CW output power exceeding 5 Kw; or
          - a.2. Metal vapor “lasers”, as follows:
            - a.2.a. Copper (Cu) “lasers” having an average or CW output power exceeding 20 W; or
            - a.2.b. Gold (Au) “lasers” having an average or CW output power exceeding 5 W; or
            - a.2.c. Sodium (Na) “lasers” having an output power exceeding 5 W; or
            - a.2.d. Barium (Ba) “lasers” having an average or CW output power exceeding 2 W; or
            - a.3. Carbon monoxide (CO) “lasers” having any of the following:
              - a.3.a. An output energy exceeding 2 J per pulse and a pulsed “peak power” exceeding 5 KJ; or
              - a.3.b. An average or CW output power exceeding 5 KJ; or
              - a.4. Carbon dioxide (CO2) “lasers” having any of the following:
                - a.4.a. A CW output power exceeding 15 Kw; or
                - a.4.b. A pulsed output having a “pulse duration” exceeding 10 µS and having any of the following:
                  - a.4.b.1. An average output power exceeding 10 KJ; or
                  - a.4.b.2. A pulsed “peak power” exceeding 100 KJ; or
                  - a.4.c. A pulsed output having a “pulse duration” equal to or less than 10 µS; and having any of the following:
                    - a.4.c.1. A pulse energy exceeding 5 J; or
                    - a.4.c.2. An average output power exceeding 2.5 KJ;
                    - a.5. “Chemical lasers”, as follows:
                      - a.5.a. Hydrogen Fluoride (HF) “lasers”;
                      - a.5.b. Deuterium Fluoride (DF) “lasers”; or
                      - a.5.c. “Transfer lasers”, as follows:
                        - a.5.c.1. Oxygen Iodine (O2-I) “lasers”;

Pt. 774, Supp. 1

15 CFR Ch. VII (1–1–00 Edition)
a. 5.c.2. Deuterium Fluoride-Carbon dioxide (DF-CO_2) "lasers";
   a. 6. Krypton ion or argon ion "lasers" having any of the following:
      a. 6.a. An output energy exceeding 1.5 J per pulse and a pulsed "peak power" exceeding 50 W; or
      a. 6.b. An average or CW output power exceeding 50 W;
   a. 7. Other gas "lasers", having any of the following:
      NOTE: 6A005.a.7 does not control nitrogen "lasers":
   a. 7.a. An output wavelength not exceeding 150 nm and having any of the following:
      a. 7.a.1. An output energy exceeding 50 mj per pulse and a pulsed "peak power" exceeding 1 W; or
      a. 7.a.2. An average or CW output power exceeding 1 W.
   a. 7.b. An output wavelength exceeding 150 nm but not exceeding 800 nm and having any of the following:
      a. 7.b.1. An output energy exceeding 1.5 j per pulse and a pulsed "peak power" exceeding 30 W; or
      a. 7.b.2. An average or CW output power exceeding 30 W;
   a. 7.c. An output wavelength exceeding 800 nm but not exceeding 1,400 nm and having any of the following:
      a. 7.c.1. An output energy exceeding 0.25 j per pulse and a pulsed "peak power" exceeding 10 W; or
      a. 7.c.2. An average or CW output power exceeding 10 W;
   a. 7.d. An output wavelength exceeding 1,400 nm and an average or CW output power exceeding 1 W.
   b. Semiconductor "lasers", having a wavelength of less than 950 nm or more than 2000 nm, as follows:
      b. 1. Individual single-transverse mode semiconductor "lasers" having an average or CW output power exceeding 100 mW;
      b. 2. Individual, multiple-transverse mode semiconductor "lasers" and arrays of individual semiconductor "lasers", having any of the following:
      b. 2.a. An output energy exceeding 500 μj per pulse and a pulsed "peak power" exceeding 10 W; or
      b. 2.b. An average or CW output power exceeding 10 W.
   b. Semiconductor "lasers", having a wavelength of less than 950 nm or more than 2000 nm, as follows:
      b. 1. Individual single-transverse mode semiconductor "lasers" having an average or CW output power exceeding 100 mW;
      b. 2. Individual, multiple-transverse mode semiconductor "lasers" and arrays of individual semiconductor "lasers", having any of the following:
      b. 2.a. An output energy exceeding 500 μj per pulse and a pulsed "peak power" exceeding 10 W; or
      b. 2.b. An average or CW output power exceeding 10 W.

   TECHNICAL NOTE: Semiconductor "lasers" are commonly called "laser" diodes.

NOTE 1: 6A005.b includes semiconductor "lasers" having optical output connectors (e.g. fiber optic pigtails).

NOTE 2: The control status of semiconductor "lasers" specially designed for other equipment is determined by the control status of the other equipment.

c. Solid state "lasers", as follows:
   c. 1. "Tunable" "lasers", having any of the following:
      c. 1.a. An output wavelength less than 600 nm and having any of the following:
      c. 1.a.1. An output energy exceeding 50 mj per pulse and a pulsed "peak power" exceeding 1 W; or
      c. 1.a.2. An average or CW output power exceeding 1 W;
      c. 1.b. An output wavelength of 600 nm or more but not exceeding 1,400 nm and having any of the following:
      c. 1.b.1. An output energy exceeding 1 j per pulse and a pulsed "peak power" exceeding 20 W; or
      c. 1.b.2. An average or CW output power exceeding 20 W;
      c. 1.c. An output wavelength exceeding 1,400 nm and having any of the following:
      c. 1.c.1. An output energy exceeding 50 mj per pulse and a pulsed "peak power" exceeding 1 W; or
      c. 1.c.2. An average or CW output power exceeding 1 W.
   c. 2. Non-"tunable" "lasers", as follows:
      NOTE: 6A005.c.2 includes atomic transition solid state "lasers":
   c. 2.a. Neodymium glass "lasers", as follows:
      c. 2.a.1. "Q-switched lasers" having any of the following:
      c. 2.a.1.a. An output energy exceeding 20 j but not exceeding 50 j per pulse and an average output power exceeding 10 W; or
      c. 2.a.1.b. An output energy exceeding 50 j per pulse;
      c. 2.a.2. Non-"Q-switched lasers" having any of the following:
      c. 2.a.2.a. An output energy exceeding 50 j but not exceeding 100 j per pulse and an average output power exceeding 20 W; or
      c. 2.a.2.b. An output energy exceeding 100 j per pulse;
      c. 2.b. Neodymium-doped (other than glass) "lasers", having an output wavelength exceeding 1,000 nm but not exceeding 1,100 nm, as follows:
      N.B.: For neodymium-doped (other than glass) "lasers" having an output wavelength not exceeding 1,000 nm or exceeding 1,100 nm, see 6A005.c.2.c.
      c. 2.b.1. Pulse-excited, mode-locked, "Q-switched lasers" having a "pulse duration" of less than 1 ns and having any of the following:
      c. 2.b.1.a. A "peak power" exceeding 5 GW;
      c. 2.b.1.b. An average output power exceeding 10 W; or
      c. 2.b.1.c. A pulsed energy exceeding 0.1 J;
      c. 2.b.2. Pulse-excited, "Q-switched lasers" having a pulse duration equal to or more than 1 ns, and having any of the following:
c.2.b.2.a. A single-transverse mode output having:
  c.2.b.2.a.1. A “peak power” exceeding 100 MW;
  c.2.b.2.a.2. An average output power exceeding 20 W;
or
  c.2.b.2.a.3. A pulsed energy exceeding 2 J;
or
  c.2.b.2.b. A multiple-transverse mode output having:
  c.2.b.2.b.1. A “peak power” exceeding 400 MW;
  c.2.b.2.b.2. An average output power exceeding 2 kW;
or
  c.2.b.2.b.3. Pulse-excited, non-“Q-switched lasers” having:
    c.2.b.2.b.3.a. A single-transverse mode output having:
      c.2.b.2.b.3.a.1. A “peak power” exceeding 500 kW;
or
    c.2.b.2.b.3.a.2. An average output power exceeding 150 W;
or
    c.2.b.2.b.3.b. An average or CW output power exceeding 2 kW;
or
    c.2.b.2.b.4. Continuously excited “lasers” having:
      c.2.b.2.b.4.a. A single-transverse mode output having:
        c.2.b.2.b.4.a.1. A “peak power” exceeding 50 kW;
or
        c.2.b.2.b.4.a.2. An average output power exceeding 50 W;
or
      c.2.b.2.b.4.b. A multiple-transverse mode output having:
        c.2.b.2.b.4.b.1. A “peak power” exceeding 1 MW;
or
        c.2.b.2.b.4.b.2. An average output power exceeding 2 kW;
or
      c.2.b.2.b.4.c. Other non-“tunable” “lasers” having:
        c.2.b.2.b.4.c.1. A wavelength less than 150 nm and having any of the following:
          c.2.b.2.b.4.c.1.a. An output energy exceeding 50 mJ per pulse and a pulsed “peak power” exceeding 1 W;
or
          c.2.b.2.b.4.c.1.b. An average or CW output power exceeding 1 W;
or
        c.2.b.2.b.4.c.2. A wavelength exceeding 800 nm but not exceeding 1,400 nm and having any of the following:
          c.2.b.2.b.4.c.2.a. An output energy exceeding 100 mJ per pulse and a pulsed “peak power” exceeding 1 W;
or
          c.2.b.2.b.4.c.2.b. An average or CW output power exceeding 10 W;
or
      c.2.b.2.b.4.d. A wavelength exceeding 1,400 nm and having any of the following:
        c.2.b.2.b.4.d.1. A “Q-switched lasers” having:
          c.2.b.2.b.4.d.1.a. An output energy exceeding 50 mJ per pulse and a pulsed “peak power” exceeding 50 W;
or
          c.2.b.2.b.4.d.1.b. An average output power exceeding 0.5 J per pulse and a pulsed “peak power” exceeding 10 W;
or
    c.2.b.2.b.4.e. Components, as follows:
      e.1. Mirrors cooled either by active cooling or by heat pipe cooling;
    TECHNICAL NOTE: Active cooling is a cooling technique for optical components using flowing fluids within the subsurface (nominally less than 1 mm below the optical surface) of the optical component to remove heat from the optic.
      e.2. Optical mirrors or transmissive or partially transmissive optical or electro-optical components specially designed for use with controlled “lasers”;
    f. Optical equipment, as follows:
(For shared aperture optical elements, capable of operating in "Super-High Power Laser" ("SHPL") applications, see the U.S. Munitions List.)

f.1. Dynamic wavefront (phase) measuring equipment capable of mapping at least 50 positions on a beam wavefront having any of the following:

f.1.a. Frame rates equal to or more than 100 Hz and phase discrimination of at least 5% of the beam’s wavelength; or

f.1.b. Frame rates equal to or more than 1,000 Hz and phase discrimination of at least 20% of the beam’s wavelength;

f.2. "Laser" diagnostic equipment capable of measuring "SHPL" system angular beam steering errors of equal to or less than 10 µrad;

f.3. Optical equipment and components specially designed for a phased-array "SHPL" system for coherent beam combination to an accuracy of lambda/10 at the designed wavelength, or 0.1 µm, whichever is the smaller;

f.4. Projection telescopes specially designed for use with "SHPL" systems.

6A006 “Magnetometers”, “magnetic gradiometers”, “intrinsic magnetic gradiometers” and compensation systems, and specially designed components therefor, as follows (see List of Items Controlled).

LIST OF ITEMS CONTROLLED
Unit: $ value
Related Controls: See also 6A.996. This entry does not control instruments specially designed for biomagnetic measurements for medical diagnostics.
Related Definitions: N/A

Items:

a. “Magnetometers” using “superconductive”, optically pumped or nuclear precession (proton/Overhauser) “technology” having a “noise level” (sensitivity) lower (better) than 0.05 nT rms per square root Hz;

b. Induction coil “magnetometers” having a “noise level” (sensitivity) lower (better) than any of the following:

b.1. 0.05 nT rms/square root Hz at frequencies of less than 1 Hz;

b.2. 1 × 10⁻¹⁰ nT rms/square root Hz at frequencies of 1 Hz or more but not exceeding 10 Hz;

b.3. 1 × 10⁻¹⁰ nT rms/square root Hz at frequencies exceeding 10 Hz;

c. Fiber optic "magnetometers" having a "noise level" (sensitivity) lower (better) than 1 nT rms per square root Hz;

d. “Magnetic gradiometers” using multiple "magnetometers" controlled by 6A.006.a, 6A.006.b or 6A.006.c;

e. Fiber optic “intrinsic magnetic gradiometers” having a magnetic gradient field “noise level” (sensitivity) lower (better) than 0.3 nT/m rms per square root Hz;

f. “Intrinsic magnetic gradiometers”, using “technology” other than fiber-optic “technology”, having a magnetic gradient field “noise level” (sensitivity) lower (better) than 0.015 nT/m rms per square root Hz;

g. Magnetic compensation systems for magnetic sensors designed for operation on mobile platforms;

h. “Superconductive” electromagnetic sensors, components manufactured from “superconductive” materials:

h.1. Designed for operation at temperatures below the “critical temperature” of at least one of their “superconductive” constituents (including Josephson effect devices or “superconductive” quantum interference devices (SQUIDS));

h.2. Designed for sensing electromagnetic field variations at frequencies of 1 KHz or less;

h.3. Having any of the following characteristics:

h.3.a. Incorporating thin-film SQUIDS with a minimum feature size of less than 2 µm and with associated input and output coupling circuits;

h.3.b. Designed to operate with a magnetic field slew rate exceeding 1 × 10⁶ magnetic flux quanta per second;

h.3.c. Designed to function without magnetic shielding in the earth’s ambient magnetic field; or

h.3.d. Having a temperature coefficient less (smaller) than 0.1 magnetic flux quantum/K.

6A007 Gravity meters (gravimeters) and gravity gradiometers, as follows (see List of Items Controlled).

Related Definitions: N/A

Items:

a. Operating at frequencies from 40 GHz to 230 GHz and having an average output power exceeding 100 mW;

b. Having a tunable bandwidth exceeding ±6.25% of the center operating frequency;

TECHNICAL NOTE: The center operating frequency equals one half of the sum of the highest plus the lowest specified operating frequencies.

c. Capable of operating simultaneously on more than two carrier frequencies;

d. Capable of operating in synthetic aperture (SAR), inverse synthetic aperture (ISAR) radar mode, or side-looking airborne (SLAR) radar mode;

e. Incorporating “electronically steerable phased array antennae”;

f. Capable of heightfinding non-cooperative targets;

NOTE: 6A008.f does not control precision approach radar (PAR) equipment conforming to ICAO standards.

g. Specially designed for airborne (balloon or airframe mounted) operation and having Doppler “signal processing” for the detection of moving targets;

h. Employing processing of radar signals using any of the following:
   h.1. “Radar spread spectrum” techniques; or
   h.2. “Radar frequency agility” techniques;

i. Providing ground-based operation with a maximum “instrumented range” exceeding 185 km;

NOTE: 6A008.i does not control:
   a. Fishing ground surveillance radar;
   b. Ground radar equipment specially designed for enroute air traffic control, provided that all the following conditions are met:
      1. It has a maximum “instrumented range” of 500 km or less;
      2. It is configured so that radar target data can be transmitted only one way from the radar site to one or more civil ATC centers;
      3. It contains no provisions for remote control of the radar scan rate from the enroute ATC center; and
      4. It is to be permanently installed;
   c. Weather balloon tracking radars.

j. Being “laser” radar or Light Detection and Ranging (LIDAR) equipment, having any of the following:
   j.1. “Space-qualified”; or
   j.2. Employing coherent heterodyne or homodyne detection techniques and having an angular resolution of less (better) than 20 µr (microradians);

NOTE: 6A008.j does not control LIDAR equipment specially designed for surveying or for meteorological observation.

k. Having “signal processing” sub-systems using “pulse compression”, with any of the following:
   k.1. A “pulse compression” ratio exceeding 150; or
   k.2. A pulse width of less than 200 ns; or

l. Having data processing sub-systems with any of the following:
1.1. “Automatic target tracking” providing, at any antenna rotation, the predicted target position beyond the time of the next antenna beam passage;

NOTE: 6A008.1.1 does not control conflict alert capability in ATC systems, or marine or harbor radar.

1.2. Calculation of target velocity from primary radar having non-periodic (variable) scanning rates;

1.3. Processing for automatic pattern recognition (feature extraction) and comparison with target characteristic data bases (waveforms or imagery) to identify or classify targets;

1.4. Superposition and correlation, or fusion, of target data from two or more “geographically dispersed” and “interconnected radar sensors” to enhance and discriminate targets.

NOTE: 6A008.1.4 does not control systems, equipment and assemblies designed for marine traffic control.

6A018 Magnetic, pressure, and acoustic underwater detection devices specially designed for military purposes and controls and components therefor.

Pt. 774, Supp. 1

15 CFR Ch. VII (1–1–00 Edition)

Unit: $ value

Related Controls: (1) This entry does not control airborne civil weather radar conforming to international standards for civil weather radars provided that they do not incorporate any of the following: (a) Phased array antennas; (b) Frequency agility; (c) Spread spectrum; or (d) Signal processing specially designed for the tracking of vehicles. (2) Items in 6A108.a that are specially designed or modified for “missiles” or for items on the U.S. Munitions List are subject to the export licensing authority of the U.S. Department of State, Defense Trade Controls (see 22 CFR part 121).

Related Definitions: Laser radar systems are defined as those that embody specialized transmission, scanning, receiving and signal processing techniques for utilization of lasers for echo ranging, direction finding and discrimination of targets by location, radial speed and body reflection characteristics.

Items:

a. Radar and laser radar systems designed or modified for use in “missiles”;

b. Precision tracking systems, usable for “missiles”, as follows:

b.1. Tracking systems that use a code translator in conjunction with either surface or airborne references or navigation satellite systems to provide real-time measurements of in-flight position and velocity;

b.2. Range instrumentation radars including associated optical/infrared trackers with all of the following capabilities:

b.2.a. Angular resolution better than 3 milliradians (0.5 mils);

b.2.b. Range of 30 km or greater with a range resolution better than 10 m rms;

b.2.c. Velocity resolution better than 3 m/s.

6A202 Photomultiplier tubes with a photocathode area of greater than 20 cm² having an anode pulse rise time of less than 1 ns.

Items:

a. Mechanical rotating mirror cameras, as follows, and specially designed components therefor:

a.1. Framing cameras with recording rates greater than 225,000 frames per second; or

a.2. Streak cameras with writing speeds greater than 0.5 mm per microsecond;

NOTE: Components of such cameras include their synchronizing electronic units and rotor assemblies consisting of turbines, mirrors and bearings.

b. Electronic streak and framing cameras and tubes, as follows:

b.1. Electronic streak cameras capable of 50 ns or less time resolution and streak tubes therefor;

b.2. Electronic (or electronically shuttered) framing cameras capable of 50 ns or less frame exposure time;

b.3. Framing tubes and solid-state imaging devices for use with cameras controlled by 6A203.b.2, as follows:

b.3.a. Proximity focused image intensifier tubes having the photocathode deposited on a transparent conductive coating to decrease photocathode sheet resistance;

b.3.b. Gate silicon intensifier target (SIT) videcon tubes, where a fast system allows gating the photoelectrons from the photocathode before they impinge on the SIT plate;

b.3.c. Kerr or pocket cell electro-optical shuttering;

b.3.d. Other framing tubes and solid-state imaging devices having a fast-image gating time of less than 50 ns specially designed for cameras controlled by 6A203.b.2;

c. Radiation-hardened TV cameras, or lenses therefor, specially designed or rated as radiation hardened to withstand greater than 50 × 10⁶ grays (silicon) (5 × 10⁶ rad (silicon)) without operational degradation.

6A203 Cameras and components, other than those controlled by 6A003, as follows (see List of Items Controlled).

      h.2. "Software" for the design or "production" of radomes which:
         h.2.a. Are specially designed to protect the "electronically steerable phased array antennas" controlled by 6A008.e.; and
         h.2.b. Result in an antenna pattern having an "average side lobe level" more than 40 dB below the peak of the main beam level.
   TECHNICAL NOTE: "Average side lobe level" in 6D003.h.2.b is measured over the entire array excluding the angular extent of the main beam and the first two side lobes on either side of the main beam.
6D102 “Software” specially designed for the “use” of goods controlled by 6A108.

LIST OF ITEMS CONTROLLED
Unit: $ value
Related Controls: See also 7A102 and 7A994. Inertial navigation systems and inertial equipment, and specially designed components therefor specifically designed, modified or configured for military use are subject to the export licensing authority of the U.S. Department of State, Office of Defense Trade Controls. (See 22 CFR part 121.) Related Definitions: N/A
Items: a. Navigation error (free inertial) subsequent to normal alignment of 0.8 nautical mile per hour (50% Circular Error Probable (CEP)) or less (better); or b. Specified to function at linear acceleration levels exceeding 10 g.

NOTE: The parameters of 7A003.a are applicable with any of the following environmental conditions:
1. Input random vibration with an overall magnitude of 7.7 g rms in the first half hour and a total test duration of one and one half hour per axis in each of the three perpendicular axes, when the random vibration meets the following:
   a. A constant power spectral density (PSD) value of 0.04 g^2/Hz over a frequency interval of 15 to 1,000 Hz; and
   b. The PSD attenuates with frequency from 0.04 g^2/Hz to 0.01 g^2/Hz over a frequency interval from 1,000 to 2,000 Hz; or
2. A roll and yaw rate of equal to or more than +2.62 radian/s (150 deg/s); or
3. According to national standards equivalent to 1. or 2. of this note.

NOTE: 7A003 does not control inertial navigation systems that are certified for use on "civil aircraft" by civil authorities of a "participating state" in Country Group A.1.

7A004 Gyro-astro compasses, and other devices which derive position or orientation by means of automatically tracking celestial bodies or satellites, with an azimuth accuracy of equal to or less (better) than 5 seconds of arc.

LIST OF ITEMS CONTROLLED
Unit: $ value

Related Controls: (1) See also 7B102 and 7B994. (2) This entry does not control test, calibration or alignment equipment for Maintenance Level I.

Related Definition: (1) Maintenance Level I: The failure of an inertial navigation unit is detected on the aircraft by indications from the Control and Display Unit (CDU) or by the status message from the corresponding sub-system. By following the manufacturer’s manual, the cause of the failure may be localized at the level of the malfunctioning line replaceable unit (LRU). The operator then removes the LRU and replaces it with a spare. (2) Maintenance Level II: The defective LRU is sent to the maintenance workshop (the manufacturer’s or that of the operator responsible for level II maintenance). At the maintenance workshop, the malfunctioning LRU is tested by various appropriate means to verify and localize the defective shop replaceable assembly (SRA) module responsible for the failure. This SRA is removed and replaced by an operative spare. The defective SRA (or possibly the complete LRU) is then shipped to the manufacturer. Maintenance Level II does not include the removal of controlled accelerometers or gyro sensors from the SRA.

Items: The list of items controlled is contained in the ECCN heading.

7B002 Equipment, as follows (see List of Items Controlled), specially designed to characterize mirrors for ring “laser” gyroes.

LIST OF ITEMS CONTROLLED
Unit: $ value.
Related Controls: (1) See also 7B101 and 7B994.
Related Definitions: (1) 7B104.a. does not control balancing machines designed or modified for dental or other medical equipment. (2) 7B104.c. and 7B104.d. do not control rotary tables designed or modified for machine tools or for medical equipment. (3) Rate tables not controlled by 7B104.c. and providing the characteristics of a positioning table are to be evaluated according to 7B104.d. (4) Equipment that has the characteristics specified in 7B104.d. which also meets the characteristics of 7B104.c. will be treated as equipment specified in 7B104.c.
Items: a. Balancing machines having all the following characteristics:
   a.1 Not capable of balancing rotors/assemblies having a mass greater than 3 Kgm;a.2 Capable of balancing rotors/assemblies at speeds greater than 12,500 rpm; a.3 Capable of correcting unbalance in two planes or more; and a.4 Capable of balancing to a residual specific unbalance of 0.2 gram-mm per kg of rotor mass; b. Indicator heads (sometimes known as balancing instrumentation) designed or modified for use with machines specified in 7B104.a. c. Motion simulators/rate tables (equipment capable of simulating motion) having all of the following characteristics:
   c.1 Two axes or more; c.2 Slip rings capable of transmitting electrical power and/or signal information; and c.3 Having any of the following characteristics:
   c.3a For any single axis:
   c.3a.1 Capable of rates of rotation of 400 degrees/sec or more, or 30 degrees/sec or less, and

**LIST OF ITEMS CONTROLLED**

**Related Controls:** See also 7D103 and 7D994

**Related Definitions:** N/A

**Items:**

- **a.** "Software" specially designed or modified to improve the operational performance or reduce the navigational error of systems to the levels controlled by 7A003 or 7A004;
- **b.** "Source code" for hybrid integrated systems that improves the operational performance or reduces the navigational error of systems to the level controlled by 7A003 by continuously combining inertial data with any of the following navigation data:
  - b.1. Doppler radar velocity;
  - b.2. Global navigation satellite systems (i.e., GPS or GLONASS) reference data;
  - b.3. Terrain data from data bases;
- **c.** "Source code" for integrated avionics or mission systems that combine sensor data and employ "expert systems";
- **d.** "Source code" for the "development" of any of the following:
  - d.1. Digital flight management systems for "total control of flight";
  - d.2. Integrated propulsion and flight control systems;
  - d.3. Fly-by-wire or fly-by-light control systems;
  - d.4. Fault-tolerant or self-reconfiguring "active flight control systems";
  - d.5. Airborne automatic direction finding equipment;
  - d.6. Air data systems based on surface static data; or
  - d.7. Raster-type head-up displays or three dimensional displays;
- **e.** Computer-aided-design (CAD) "software" specially designed for the "development" of "active flight control systems", helicopter multi-axis fly-by-wire or fly-by-light controllers or helicopter "circulation controlled anti-torque or circulation-controlled direction control systems" whose "technology" is controlled by 7E004.b, 7E004.c.1 or 7E004.c.2.

Items: a. “Technology” for the “development” or “production” of:
a. Airborne automatic direction finding equipment operating at frequencies exceeding 5 MHz;

b. Air data systems based on surface static data only, i.e., that dispense with conventional air data probes;

c. Raster-type head-up displays or three dimensional displays for “aircraft”;

d. Inertial navigation systems or gyro-astro compasses containing accelerometers or gyros controlled by 7A001 or 7A002;

e. Electric actuators (i.e., electromechanical, electrohydrostatic and integrated actuator package) specially designed for “primary flight control”;

f. “Flight control optical sensor array” specially designed for implementing “active flight control systems”;

NOTE: 7E004.b.3 does not control “technology” for the design of physical redundancy.

b. Flight controls that permit inflight reconfiguration of force and moment controls for real time autonomous air vehicle control;

c. Integration of digital flight control, navigation and propulsion control data into a digital flight management system for “total control of flight”;

NOTE: 7E004.b.5 does not control:

1. “Development” “technology” for integration of digital flight control, navigation and propulsion control data into a digital flight management system for “flight path optimization”;

2. “Development” “technology” for “aircraft” flight instrument systems integrated solely for VOR, DME, ILS or MLS navigation or approaches.

b. Full authority digital flight control or multisensor mission management systems employing “expert systems”;

N.B.: For “technology” for Full Authority Digital Engine Control (“FADEC”), see 9E003.a.9.

c. “Technology” for the “development” of helicopter systems, as follows:

b.2. Control law compensation for sensor location or dynamic airframe loads, i.e., compensation for sensor vibration environment or for variation of sensor location from the center of gravity;

b.3. Electronic management of data redundancy or systems redundancy for fault detection, fault tolerance, fault isolation or reconfiguration;

NOTE: 7E004.b.3 does not control “technology” for the design of physical redundancy.

b.4. Flight controls that permit inflight reconfiguration of force and moment controls for real time autonomous air vehicle control;

b.5. Integration of digital flight control, navigation and propulsion control data into a digital flight management system for “total control of flight”;

NOTE: 7E004.b.5 does not control:

1. “Development” “technology” for integration of digital flight control, navigation and propulsion control data into a digital flight management system for “flight path optimization”;

2. “Development” “technology” for “aircraft” flight instrument systems integrated solely for VOR, DME, ILS or MLS navigation or approaches.

b.6. Full authority digital flight control or multisensor mission management systems employing “expert systems”;

N.B.: For “technology” for Full Authority Digital Engine Control (“FADEC”), see 9E003.a.9.

c. “Technology” for the “development” of helicopter systems, as follows:

b.2. Control law compensation for sensor location or dynamic airframe loads, i.e., compensation for sensor vibration environment or for variation of sensor location from the center of gravity;

b.3. Electronic management of data redundancy or systems redundancy for fault detection, fault tolerance, fault isolation or reconfiguration;

NOTE: 7E004.b.3 does not control “technology” for the design of physical redundancy.

b.4. Flight controls that permit inflight reconfiguration of force and moment controls for real time autonomous air vehicle control;

b.5. Integration of digital flight control, navigation and propulsion control data into a digital flight management system for “total control of flight”;

NOTE: 7E004.b.5 does not control:

1. “Development” “technology” for integration of digital flight control, navigation and propulsion control data into a digital flight management system for “flight path optimization”;

2. “Development” “technology” for “aircraft” flight instrument systems integrated solely for VOR, DME, ILS or MLS navigation or approaches.

b.6. Full authority digital flight control or multisensor mission management systems employing “expert systems”;

N.B.: For “technology” for Full Authority Digital Engine Control (“FADEC”), see 9E003.a.9.

c. “Technology” for the “development” of helicopter systems, as follows:

b.2. Control law compensation for sensor location or dynamic airframe loads, i.e., compensation for sensor vibration environment or for variation of sensor location from the center of gravity;

b.3. Electronic management of data redundancy or systems redundancy for fault detection, fault tolerance, fault isolation or reconfiguration;

NOTE: 7E004.b.3 does not control “technology” for the design of physical redundancy.

b.4. Flight controls that permit inflight reconfiguration of force and moment controls for real time autonomous air vehicle control;

b.5. Integration of digital flight control, navigation and propulsion control data into a digital flight management system for “total control of flight”;

LIST OF ITEMS CONTROLLED
Unit: Equipment in number; parts and accessories in $ value
Related Controls: For the control status of equipment for submersible vehicles, see: Category 5, Part 2 “Information Security” for encrypted communication equipment; Category 6 for sensors; Categories 7 and 8 for navigation equipment; Category 8A for underwater equipment.
Related Definitions: N/A

Items:

a. Manned, tethered submersible vehicles designed to operate at depths exceeding 1,000 m;

b. Manned, untethered submersible vehicles, having any of the following:

b.1. Designed to operate autonomously and having a lifting capacity of all the following:

b.1.a. 10% or more of their weight in air;

b.1.b. 15 kN or more;

b.2. Designed to operate at depths exceeding 1,000 m; or

b.3. Having all of the following:

b.3.a. Designed to carry a crew of 4 or more;

b.3.b. Designed to operate autonomously for 10 hours or more;

b.3.c. Having a range of 25 nautical miles or more; and

b.3.d. Having a length of 21 m or less;

TECHNICAL NOTES: 1. For the purposes of 8A001.b, “operate autonomously” means fully submerged, without snorkel, all systems working and cruising at minimum speed at which the submersible can safely control its depth dynamically by using its depth planes only, with no need for a support vessel or support base on the surface, sea-bed or shore, and containing a propulsion system for submerged or surface use.

2. For the purposes of 8A001.b, “range” means half the maximum distance a submersible vehicle can cover.

c. Unmanned, tethered submersible vehicles designed to operate at depths exceeding 1,000 m, having any of the following:

c.1. Designed for self-propelled manoeuvre using propulsion motors or thrusters controlled by 8A002.a; or

c.2. Having a fiber optic data link;

d. Unmanned, untethered submersible vehicles, having any of the following:

d.1. Designed for deciding a course relative to any geographical reference without real-time human assistance;

d.2. Having an acoustic data or command link; or
Bureau of Export Administration, Commerce

Page 774, Supp. 1

d.3. Having a fiber optic data or command link exceeding 1,000 m;

e. Ocean salvage systems with a lifting capacity exceeding 5 MN for salvaging objects from depths exceeding 250 m and having any of the following:

e.1. Dynamic positioning systems capable of position keeping within 20 m of a given point provided by the navigation system; or

e.2. Seafloor navigation and navigation integration systems for depths exceeding 1,000 m with positioning accuracies to within 10 m of a predetermined point;

f. Surface-effect vehicles (fully skirted variety) having all of the following characteristics:

f.1. A maximum design speed, fully loaded, exceeding 30 knots in a significant wave height of 1.25 m (Sea State 3) or more;

f.2. A cushion pressure exceeding 3,830 Pa; and

f.3. A light-ship-to-full-load displacement ratio of less than 0.70;

g. Surface-effect vehicles (rigid sidewalls) with a maximum design speed, fully loaded, exceeding 40 knots in a significant wave height of 3.25 m (Sea State 5) or more;

h. Hydrofoil vessels with active systems for automatically controlling foil systems, with a maximum design speed, fully loaded, of 40 knots or more in a significant wave height of 3.25 m (Sea State 5) or more;

i. Small waterplane area vessels having any of the following:

i.1. A full load displacement exceeding 500 tons with a maximum design speed, fully loaded, exceeding 35 knots in a significant wave height of 3.25 m (Sea State 5) or more; or

i.2. A full load displacement exceeding 1,500 tons with a maximum design speed, fully loaded, exceeding 25 knots in a significant wave height of 4 m (Sea State 6) or more.

**TECHNICAL NOTE:** A small waterplane area vessel is defined by the following formula: waterplane area at an operational design draught less than \( \frac{2}{3} \) (displaced volume at m with positioning accuracies to within 10 m of a predetermined point).

**SA002** Systems and equipment, as follows (see List of Items Controlled).

**LIST OF ITEMS CONTROLLED**

**Unit:** Equipment in number

**Related Controls:** See also 8A002 and for underwater communications systems, see Category 5, Part I—Telecommunications.

**Related Definitions:** N/A

**Items:** a. Systems and equipment, specially designed or modified for submersible vehicles, designed to operate at depths exceeding 1,000 m, as follows:

a.1. Pressure housings or pressure hulls with a maximum inside chamber diameter exceeding 1.5 m;

a.2. Direct current propulsion motors or thrusters;

a.3. Umbilical cables, and connectors therefor, using optical fiber and having synthetic strength members;

b. Systems specially designed or modified for the automated control of the motion of submersible vehicles controlled by 8A001 using navigation data and having closed loop servo-controls:

b.1. Enabling a vehicle to move within 10 m of a predetermined point in the water column;

b.2. Maintaining the position of the vehicle within 10 m of a predetermined point in the water column; or

b.3. Maintaining the position of the vehicle within 10 m while following a cable on or under the seabed;

c. Fiber optic hull penetrators or connectors;

d. Underwater vision systems, as follows:

d.1. Television systems and television cameras, as follows:

d.1.a. Television systems (comprising camera, monitoring and signal transmission equipment) having a limiting resolution when measured in air of more than 800 lines and specially designed or modified for remote operation with a submersible vehicle;

d.1.b. Underwater television cameras having a limiting resolution when measured in air of more than 1,100 lines;

d.1.c. Low light level television cameras specially designed or modified for underwater use containing all of the following:

d.1.c.1. Image intensifier tubes controlled by 6A002.a.2.a; and

d.1.c.2. More than 150,000 “active pixels” per solid state area array;

**TECHNICAL NOTE:** Limiting resolution in television is a measure of horizontal resolution usually expressed in terms of the maximum number of lines per picture height discriminated on a test chart, using IEEE Standard 298/1960 or any equivalent standard.
d.2. Systems, specially designed or modified for remote operation with an underwater vehicle, employing techniques to minimize the effects of back scatter, including range-gated illuminators or "laser" systems;
e. Photographic still cameras specially designed or modified for underwater use below 150 m having a film format of 35 mm or larger, and having any of the following:
   e.1. Annotation of the film with data provided by a source external to the camera;
   e.2. Automatic back focal distance correction;
or
   e.3. Automatic compensation control specially designed to permit an underwater camera housing to be usable at depths exceeding 1,000 m;

f. Electronic imaging systems, specially designed or modified for underwater use, capable of storing digitally more than 50 exposed images;

g. Light systems, as follows, specially designed or modified for underwater use:
   g.1. Stroboscopic light systems capable of a light output energy of more than 300 J per flash and a flash rate of more than 5 flashes per second;
   g.2. Argon arc light systems specially designed for use below 1,000 m;
   h. "Robots" specially designed for underwater use, controlled by using a dedicated "stored program controlled" computer, having any of the following:
      h.1. Systems that control the "robot" using information from sensors which measure force or torque applied to an external object, distance to an external object, or tactile sense between the "robot" and an external object; or
      h.2. The ability to exert a force of 250 N or more or a torque of 250 Nm or more and using titanium based alloys or "fibrous or filamentary" "composite" materials in their structural members;
      i. Remotely controlled articulated manipulators specially designed or modified for use with submersible vehicles, having any of the following:
         i.1. Systems which control the manipulator using the information from sensors which measure the torque or force applied to an external object or tactile sense between the manipulator and an external object; or
         i.2. Controlled by proportional master-slave techniques or by using a dedicated "stored program controlled" computer, and having 5 degrees of freedom of movement or more;

NOTE: Only functions having proportional control using positional feedback or by using a dedicated "stored program controlled" computer are counted when determining the number of degrees of freedom of movement.

j. Air independent power systems, specially designed for underwater use, as follows:

j.1. Brayton or Rankine cycle engine air independent power systems having any of the following:
   j.1.a. Chemical scrubber or absorber systems specially designed to remove carbon dioxide, carbon monoxide and particulates from recirculated engine exhaust;
   j.1.b. Systems specially designed to use a monoatomic gas;
   j.1.c. Devices or enclosures specially designed for underwater noise reduction in frequencies below 10 kHz, or special mounting devices for shock mitigation; or
   j.1.d. Systems specially designed:
      j.1.d.1. To pressurize the products of reaction or for fuel reformation;
      j.1.d.2. To store the products of the reaction;
      j.1.d.3. To discharge the products of the reaction against a pressure of 100 kPa or more;
   j.1.e. Diesel cycle engine air independent systems, having all of the following:
      j.1.e.1. Designed for cushion pressures of 3,830 Pa or more, operating in a significant wave height of 1.25 m (Sea State 3) or more and specially designed for surface effect vehicles (fully skirted variety) controlled by 8A003f; or
      j.1.e.2. Designed for cushion pressures of 150 Pa or more, employing techniques to minimize the effects of back scatter, including range-gated illuminators or "laser" systems;
      j.1.e.3. Designed for cushion pressures of 3,830 Pa or more, employing techniques to minimize the effects of back scatter, including range-gated illuminators or "laser" systems;
   j.1.f. Stirling cycle engine air independent power systems having any of the following:
      j.1.f.1. To pressurize the products of reaction or for fuel reformation;
      j.1.f.2. To store the products of the reaction;
      j.1.f.3. To discharge the products of the reaction against a pressure of 100 kPa or more;
   j.1.g. Chemical absorber systems specially designed to remove carbon dioxide, carbon monoxide and particulates from recirculated engine exhaust;
   j.1.h. Chemical absorber systems specially designed for underwater noise reduction in frequencies below 10 kHz or special mounting devices for shock mitigation; and
   j.1.i. Chemical absorber systems specially designed:
      j.1.i.1. To pressurize the products of reaction or for fuel reformation;
      j.1.i.2. To store the products of the reaction;
      j.1.i.3. To discharge the products of the reaction against a pressure of 100 kPa or more;
   j.1.j. Chemical absorber systems specially designed for underwater noise reduction in frequencies below 10 kHz or special mounting devices for shock mitigation; and
   j.1.k. Chemical absorber systems specially designed:
      j.1.k.1. To pressurize the products of reaction or for fuel reformation;
      j.1.k.2. To store the products of the reaction;
      j.1.k.3. To discharge the products of the reaction against a pressure of 100 kPa or more;
   j.1.m. Chemical absorber systems specially designed for underwater noise reduction in frequencies below 10 kHz or special mounting devices for shock mitigation; and
   j.1.n. Chemical absorber systems specially designed:
      j.1.n.1. To pressurize the products of reaction or for fuel reformation;
      j.1.n.2. To store the products of the reaction;
      j.1.n.3. To discharge the products of the reaction against a pressure of 100 kPa or more;
   j.1.o. Chemical absorber systems specially designed for underwater noise reduction in frequencies below 10 kHz or special mounting devices for shock mitigation; and
   j.1.p. Chemical absorber systems specially designed:
      j.1.p.1. To pressurize the products of reaction or for fuel reformation;
      j.1.p.2. To store the products of the reaction;
      j.1.p.3. To discharge the products of the reaction against a pressure of 100 kPa or more;
   j.1.q. Chemical absorber systems specially designed for underwater noise reduction in frequencies below 10 kHz or special mounting devices for shock mitigation; and
   j.1.r. Chemical absorber systems specially designed:
      j.1.r.1. To pressurize the products of reaction or for fuel reformation;
      j.1.r.2. To store the products of the reaction;
      j.1.r.3. To discharge the products of the reaction against a pressure of 100 kPa or more;
   j.1.s. Chemical absorber systems specially designed for underwater noise reduction in frequencies below 10 kHz or special mounting devices for shock mitigation; and
   j.1.t. Chemical absorber systems specially designed:
      j.1.t.1. To pressurize the products of reaction or for fuel reformation;
      j.1.t.2. To store the products of the reaction;
      j.1.t.3. To discharge the products of the reaction against a pressure of 100 kPa or more;
Bureau of Export Administration, Commerce

Pt. 774, Supp. 1

k.2. Designed for cushion pressures of 6,224 Pa or more, operating in a significant wave height of 3.25 m (Sea State 5) or more and specially designed for surface effect vehicles (rigid sidewalls) controlled by 8A003.g:

l. Lift fans rated at more than 400 kW specially designed for surface effect vehicles controlled by 8A001.l or 8A 001.g;

m. Fully submerged subcavitating or supercavitating hydrofoils specially designed for vessels controlled by 8A 001.h;

n. Active systems specially designed or modified to control automatically the sea-induced motion of vehicles or vessels controlled by 8A 001.f, 8A 001.g, 8A 001.h or 8A 001.i;

o. Propellers, power transmission systems, power generation systems and noise reduction systems, as follows:

- o.1. Water-screw propeller or power transmission systems, as follows, specially designed for surface effect vehicles (fully skirted or rigid sidewall variety), hydrofoils or small waterplane area vessels controlled by 8A 001.f, 8A 001.g, 8A 001.h or 8A 001.i:
  o.1.a. Supercavitating, super-ventilated, partially-submerged or surface piercing propellers rated at more than 7.5 MW;
  o.1.b. Contrarotating propeller systems rated at more than 15 MW;
  o.1.c. Systems employing pre-swirl or post-swirl techniques for smoothing the flow into a propeller;
  o.1.d. Light-weight, high capacity (K factor exceeding 300) reduction gearing;
  o.1.e. Power transmission shaft systems, incorporating “composite” material components, capable of transmitting more than 1 MW;
  o.2. Water-screw propeller, power generation systems or transmission systems designed for use on vessels, as follows:
  o.2.a. Controllable-pitch propellers and hub assemblies rated at more than 30 MW;
  o.2.b. Internally liquid-cooled electric propulsion engines with a power output exceeding 25 MW;
  o.2.c. “Superconductive” propulsion engines, or permanent magnet electric propulsion engines, with a power output exceeding 0.1 MW;
  o.2.d. Power transmission shaft systems, incorporating “composite” material components, capable of transmitting more than 2 MW;
  o.2.e. Ventilated or base-ventilated propeller systems rated at more than 2.5 MW;
  o.3. Noise reduction systems designed for use on vessels of 1,000 tons displacement or more, as follows:
  o.3.a. Systems that attenuate underwater noise at frequencies below 500 Hz and consist of compound acoustic mounts for the acoustic isolation of diesel engines, diesel generator sets, gas turbines, gas turbine generator sets, propulsion motors or propulsion reduction gears, specially designed for sound or vibration isolation, having an intermediate mass exceeding 30% of the equipment to be mounted;
  o.3.b. Active noise reduction or cancellation systems, or magnetic bearings, specially designed for power transmission systems, and incorporating electronic control systems capable of actively reducing equipment vibration by the generation of anti-noise or anti-vibration signals directly to the source;
  o.3.c. Pumpjet propulsion systems having a power output exceeding 2.5 MW using divergent nozzle and flow conditioning vane techniques to improve propulsive efficiency or reduce power output generated underwater-radiated noise;

8A018 Items on the International Munitions List.

Related Definitions: N/A

Items:

- a. Closed and semi-closed circuit (rebreathing) apparatus for diving and underwater swimming, and specially designed components for use in the conversion of open-circuit apparatus to military use;
- b. Naval equipment, as follows:
  - b.1. Diesel engines of 1,500 hp and over with rotary speed of 700 rpm or over specially designed for submarines;
  - b.2. Electric motors specially designed for submarines, i.e., over 1,000 hp, quick reversing type, liquid cooled, and totally enclosed;
  - b.3. Nonmagnetic diesel engines, 50 hp and over, specially designed for military purposes. (An engine shall be presumed to be specially designed for military purposes if it has nonmagnetic parts other than crankcase, block, head, pistons, covers, end plates, valve facings, gaskets, and fuel, lubrication and other supply lines, or its nonmagnetic content exceeds 75 percent of total weight.);
  - b.4. Marine boilers designed to have any of the following characteristics:
    - b.4.a. Heat release rate (at maximum rating) equal to or in excess of 100,000 BTU per hour per cubic foot of furnace volume; or

741
Pt. 774, Supp. 1

b.4.b. Ratio of steam generated in pounds per hour (at maximum rating) to the dry weight of the boiler in pounds equal to or in excess of 0.83;
b.5. Submarine and torpedo nets; and
b.6. Components, parts, accessories, and attachments for the above.

8A992 Underwater systems or equipment, not controlled by 8A002, and specially designed parts therefor.

Items:

a. Underwater vision systems, as follows:
   a.1. Television systems (comprising camera, lights, monitoring and signal transmission equipment) having a limiting resolution when measured in air of more than 500 lines and specially designed or modified for remote operation with a submersible vehicle; or
   a.2. Underwater television cameras having a limiting resolution when measured in air of more than 700 lines;

TECHNICAL NOTE: Limiting resolution in television is a measure of horizontal resolution usually expressed in terms of the maximum number of lines per picture height discriminated on a test chart, using IEEE Standard 208/1960 or any equivalent standard.
b. Photographic still cameras specially designed or modified for underwater use, having a film format of 35 mm or larger, and having autofocus or remote focusing specially designed for underwater use;
c. Stroboscopic light systems, specially designed or modified for underwater use, capable of a light output energy of more than 300 J per flash;
d. Other underwater camera equipment, n.e.s.;
e. Other submersible systems, n.e.s.;
f. Boats, n.e.s., including inflatable boats, and specially designed components therefor, n.e.s.;
g. Marine engines (both inboard and outboard) and submarine engines, n.e.s.; and specially designed parts therefor, n.e.s.;
h. Other self-contained underwater breathing apparatus (scuba gear) and related equipment, n.e.s.;
i. Life jackets, inflation cartridges, compasses, wetsuits, masks, fins, weight belts, and dive computers;
j. Underwater lights and propulsion equipment;
k. Air compressors and filtration systems specially designed for filling air cylinders.

B. TEST, INSPECTION AND PRODUCTION EQUIPMENT

8B001 Water tunnels, having a background noise of less than 100 dB (reference 1 µPa, 1 Hz) in the frequency range from 0 to 500 Hz, designed for measuring acoustic fields generated by a hydro-flow around propulsion system models.

List of Items Controlled

Unit: Equipment in number. Components, parts and accessories in $ value. Related Controls: (1.) See also 9A104. (2.) Space launch vehicles are under the jurisdiction of the Department of State. (3.) Effective March 15, 1999, all satellites, including commercial communications satellites, are subject to the ITAR. Effective March 15, 1999, all license applications for the export of commercial communications satellites will be processed by the State Department, Office of Defense Trade Controls. Retransfer of jurisdiction for commercial communications satellites and related items shall not affect the validity of any export license issued by the Department of Commerce prior to March 15, 1999, or of any export license application filed under the Export Administration Regulations on or before March 14, 1999, and subsequently issued by the Department of Commerce. (4.) All other "spacecraft" not controlled under 9A004, whether the item is physically located in the United States or abroad. (5.) Exporters requesting a license from the Department of Commerce for "spacecraft" and their associated parts and components, other than the international space station, must provide a statement from the Department of State, Office of Defense Trade Controls, verifying that the item intended for export is under the licensing jurisdiction of the Department of Commerce. A specially designed or modified components, parts, accessories, attachments, and associated equipment for "spacecraft" that have been determined by the Department of State through the commodity jurisdiction determination process to be under the licensing jurisdiction of the Department of Commerce and that are not controlled by another ECCN on the Commerce Control List will be assigned a classification under this ECCN 9A004. (6.) Technical data required for the detailed design, development, manufacturing, or production of the international space station (to include specifically designed parts and components) remains under the jurisdiction of the Department of Commerce. This control by the ITAR of detailed design development, manufacturing or production technology for NASA's international space station does not include that level of technical data necessary and reasonable for assurance that a U.S.-built item intended to operate on NASA's international space station has been designed, manufactured, and tested in performance with specified requirements (e.g., operational performance, reliability, lifetime, product quality, or delivery expectations). All technical data and all defense services, including all technical assistance, for launch of the international space station, including launch vehicle compatibility, integration, or processing data, are controlled and subject to the jurisdiction of the Department of State, in accordance with 22 CFR parts 120 through 130.

Items:

- a. The international space station being developed, launched and operated under the supervision of the U.S. National Aeronautics and Space Administration. Hardware specific to the international space station transferred to the Department of
Pt. 774, Supp. 1

Commerce by commodity jurisdiction action is also included.

b. Specific items as may be determined to be not subject to the ITAR through the commodity jurisdiction procedure administered by the Department of State after March 15, 1999.

9A005 Liquid rocket propulsion systems containing any of the systems or components controlled by 9A006. (These items are subject to the export licensing authority of the U.S. Department of State, Office of Defense Trade Controls. See 22 CFR part 121.)

9A006 Systems and components specially designed for liquid rocket propulsion systems. (These items are subject to the export licensing authority of the U.S. Department of State, Office of Defense Trade Controls. See 22 CFR part 121.)

9A007 Solid rocket propulsion systems. (These items are subject to the export licensing authority of the U.S. Department of State, Office of Defense Trade Controls. See 22 CFR part 121.)

9A008 Components specially designed for solid rocket propulsion systems. (These items are subject to the export licensing authority of the U.S. Department of State, Office of Defense Trade Controls. See 22 CFR part 121.)

9A009 Hybrid rocket propulsion systems. (These items are subject to the export licensing authority of the U.S. Department of State, Office of Defense Trade Controls. See 22 CFR part 121.)

9A010 Specially designed components, systems and structures for launch vehicles, launch vehicle propulsion systems or "spacecraft". (These items are subject to the export licensing authority of the U.S. Department of State, Office of Defense Trade Controls. See 22 CFR part 121.)

9A011 Ramjet, scramjet or combined cycle engines and specially designed components thereof. (These items are subject to the export licensing authority of the U.S. Department of State, Office of Defense Trade Controls. See 22 CFR part 121.)

LIST OF ITEMS CONTROLLED
Unit: Equipment in number; parts and accessories in $ value

Related Controls: (a) Parachute systems designed for use in dropping military equipment, braking military aircraft, slowing spacecraft descent, or retarding weapons delivery; AND (b) Instrument flight trainers for combat simulation are subject to the export licensing authority of the U.S. Department of State, Office of Defense Trade Controls. (See 22 CFR part 121, Category VIII.)

Related Definition: This entry controls parachute systems designed for use in dropping personnel only.

Items: a. Military trainer aircraft bearing "T" designations:
   a.1 Using reciprocating engines; or
   a.2 Turbo prop engines with less than 600 horsepower (h.p.);
   a.3 T-37 model jet trainer aircraft; and
   a.4 Specially designed component parts.

b. Vehicles specially designed or modified for military purposes. (See § 770, Interpretation 8)

   c. Pressure refuelers, pressure refueling equipment, and equipment specially designed to facilitate operations in confined areas; and ground equipment, n.e.s, developed specially for military aircraft and helicopters, and specially designed parts and accessories, n.e.s.;
   d. Pressurized breathing equipment specially designed for use in military aircraft and helicopters;
   e. Military parachutes and complete canopies, harnesses, and platforms and electronic release mechanisms therefor, except such types as are in normal sporting use;
   f. Military instrument flight trainers, except for combat simulation; and components, parts, attachments and accessories specially designed for such equipment.

9A101 Lightweight turbojet and turbofan engines (including turbocompound engines) usable in "missiles", other than those controlled by 9A001, as follows (see List of Items Controlled).

E. TECHNOLOGY

NOTE: “Development” or “production” “technology” controlled by 9E001 to 9E003 for gas turbine engines remains controlled when used as “use” “technology” for repair, rebuild and overhaul. Excluded from control are: technical data, drawings or documentation for maintenance activities directly associated with calibration, removal or replacement of damaged or unserviceable line replaceable units, including replacement of whole engines or engine modules.

9E001 “Technology” according to the General Technology Note for the “development” of equipment or “software” controlled by 9A001.c, 9A004 to 9A011, 9B (except 9B990 or 9B991), or 9D (except 9D990 or 9D991).

LICENSE REQUIREMENTS
Reason for Control: NS, MT, AT

Control(s) Country Chart
NS applies to “technology” for items controlled by 9A001.c, 9A004 to 9A011, 9B (except 9B990 or 9B991), or 9D (except 9D990 or 9D991).
MT applies to “technology” for items controlled by 9A001.c, 9A004 to 9A011, 9B (except 9B990 or 9B991), or 9D (except 9D990 or 9D991).
AT applies to entire entry ........ AT Column 1

**List of Items Controlled**

- **Unit:** N/A

**Related Controls:**

1. Gas turbine blades, vanes or tip shrouds made from directionally solidified (DS) or single crystal (SC) alloys having (in the 001 Miller Index Direction) a stress-rupture life exceeding 400 hours at 1,273 K (1,000 °C) at a stress of 200 MPa, based on the average property values;
2. Multiple domed combustors operating at average burner outlet temperatures exceeding 1,643 K (1,370 °C) or combustors incorporating thermally decoupled combustion liners, non-metallic liners or non-metallic shells;
3. Components manufactured from organic “composite” materials designed to operate above 585 K (315 °C), or from metal “matrix” “composite”, ceramic “matrix”, intermetallic or intermetallic reinforced materials controlled by 1A002 or 1C007;
4. Uncooled turbine blades, vanes, tip-shrouds or other components designed to operate at gas path temperatures of 1,323 K (1,050 °C) or more;
5. Cooled turbine blades, vanes or tip-shrouds, other than those described in 9E003.a.1, exposed to gas path temperatures of 1,643 K (1,370°C) or more;
6. Airfoil-to-disk blade combinations using solid state joining;
7. Gas turbine engine components using “diffusion bonding” “technology” controlled by 2E003.b.
a.8. Damage tolerant gas turbine engine rotat-
ing components using powder metallurgy mate-
rials controlled by 1C002.b;  
a.9. Full authority digital electronic en-
(gine control (FADEC) for gas turbine and com-
combined cycle engines and their related di-
gnostic components, sensors and specially de-
dsigned components;  
a.10. Adjustable flow path geometry and asso-
ciated control systems for:  
a.10.a. Gas generator turbines;  
a.10.b. Fan or power turbines;  
a.10.c. Propelling nozzles;  
NOTES: 1. Adjustable flow path geometry  
and associated control systems do not in-
clude inlet guide vanes, variable pitch fans, 
variable stators or bleed valves for compres-
sors. 
2. 9E003.a.10 does not control “develop-
ment” or “production” “technology” for ad-
justable flow path geometry for reverse 
thrust.  
a.11. Rotor blade tip clearance control sys-
tems employing active compensating casing  
“technology” limited to a design and devel-
opment data base; or  
a.12 Gas bearing for gas turbine engine  
rotor assemblies;  
a.13. Wide chord hollow fan blades without  
part-span support;  
b. “Technology” “required” for the “devel-
opment” or “production” of any of the fol-
lowing:  
b.1. Wind tunnel aero-models equipped with  
non-intrusive sensors capable of transmit-
ting data from the sensors to the data acqui-
sition system; or  
b.2. “Composite” propeller blades or  
propfans capable of absorbing more than  
2,000 kW at flight speeds exceeding Mach 0.55;  
c. “Technology” “required” for the “devel-
opment” or “production” of gas turbine en-
gine components using “laser”, water jet,  
ECM or EDM hole drilling processes to  
manufacture gas turbine engine compo-
nents, including exhaust ports, turbocharg-
ers, valve assemblies or insulated fuel 
injectors;  
T ECHNICAL NOTE: Box volume: the product  
of three perpendicular dimensions measured  
in the following way:  
Length: The length of the crankshaft from  
front flange to flywheel face;  
Width: The widest of the following:  
a. The outside dimension from valve cover 
to valve cover;  
b. The dimensions of the outside edges of 
the cylinder heads; or  
c. The diameter of the flywheel housing;  
Height: The largest of the following:  
a. The length of the crankshaft center-
line to the top plane of the valve cover (or  
cylinder head) plus twice the stroke; or  
b. The diameter of the flywheel housing.  
e.2. “Technology” “required” for the “pro-
duction” of gas turbine engine parts, as 
follows, for high output diesel engines:  
e.2.a. One or more other components (in-
cluding exhaust ports, turbochargers, valve  
guides, valve assemblies or insulated fuel  
injectors);  
e.2.b. “Technology” “required” for the “pro-
duction” of gas turbine engine parts, with 
single-stage compressors having all of the  
following:  
e.2.b.1. Operating at pressure ratios of 4:1  
or higher;  
e.2.b.2. A mass flow in the range from 30 to 
130 kg per minute; and  
e.2.b.3. Variable flow area capability with-
in the compressor or turbine sections;  
e.2.c. “Technology” “required” for the “pro-
duction” of fuel injection systems with  
specially designed multifuel (e.g., diesel or  
jet fuel) capability covering a viscosity  
range from diesel fuel (2.5 cSt at 310.8 K  
(37.8°C)) down to gasoline fuel (0.5 cSt at 310.8  
K (37.8°C)), having both of the following:  
e.2.c.1. Injection amount in excess of 290  
mm³ per injection per cylinder; and  
e.2.c.2. Specially designed electronic con-
(Continued)
property to provide the same torque characteristics by using the appropriate sensors; e.3. “Technology” “required” for the “development” or “production” of high output diesel engines for solid, gas phase or liquid film (or combinations thereof) cylinder wall lubrication, permitting operation to temperatures exceeding 723 K (450°C), measured on the cylinder wall at the top limit of travel of the top ring of the piston.

f. “Technology” not otherwise controlled in 9E003.a.1 through a.12 and currently used in the “development”, “production”, or overhaul of hot section parts and components of civil derivatives of military engines controlled on the U.S. Munitions List.

9E018 “Technology” for the “development”, “production”, or “use” of equipment controlled by 9A018.

EAR99 Items subject to the EAR that are not elsewhere specified in this CCL Category or in any other category in the CCL are designated by the number EAR99.

SUPPLEMENT NO. 2 TO PART 774—GENERAL TECHNOLOGY AND SOFTWARE NOTES

1. General Technology Note. The export of “technology” that is “required” for the “development”, “production”, or “use” of items on the Commerce Control List is controlled according to the provisions in each Category. “Technology” “required” for the “development”, “production”, or “use” of a controlled product remains controlled even when applicable to a product controlled at a lower level.

License Exception TSU is available for “technology” that is the minimum necessary for the installation, operation, maintenance (checking), and repair of those products that are eligible for License Exceptions or that are exported under a license.

N.B.: This does not allow release under a License Exception of the repair “technology” controlled by 1E002.a, 1E002.e, 7E003, or 8E002.a.

N.B.: The minimum necessary excludes “development” or “production” technology and permits “use” technology only to the extent “required” to ensure safe and efficient use of the product. Individual ECCNs may further restrict export of “minimum necessary” information.

II. General Software Note. License Exception TSU (“mass market” software) is available to all destinations, except Cuba, Iran, Iraq, Libya, North Korea, Sudan, and Syria, for release of software that is generally available to the public by being:

1. Sold from stock at retail selling points, without restriction, by means of:
   a. Over the counter transactions;
   b. Mail order transactions; or
   c. Telephone call transactions; and

   2. Telephone call transactions; or

   3. Telephone call transactions; and

   b. Designed for installation by the user without further substantial support by the supplier.

NOTE: License Exception TSU for mass market software does not apply to encryption software controlled for EI reasons under ECCN 5D002. Encryption software may become eligible after a one-time BXA review according to the provision of § 742.15(b)(1) of the EAR.

Redesignation Table
List of CFR Sections Affected

All changes in this volume of the Code of Federal Regulations which were made by documents published in the Federal Register since January 1, 1986, are enumerated in the following list. Entries indicate the nature of the changes effected. Page numbers refer to Federal Register pages. The user should consult the entries for chapters and parts as well as sections for revisions.
