

**Pt. 36, App.**

connection and (c) the average route kilometers of circuits involved.

*TWX Switching Plant Trunks*

Interexchange circuits, excluding remote access lines, which handle 100 word per minute TWX traffic only.

*Weighted Standard Work Second*

A measurement of traffic operating work which is used to express the relative time required to handle the various kinds of calls or work functions, and which is weighted to reflect appropriate degrees of waiting to serve time.

*Wide Area Telephone Service WATS*

A toll service offering for customer dial type telecommunications between a given customer station and stations within specified geographic rate areas employing a single access line between the customer location

**47 CFR Ch. I (10-1-00 Edition)**

and the serving central office. Each access line may be arranged for either outward (OUT-WATS) or inward (IN-WATS) service or both.

*Wideband Channel*

A communication channel of a bandwidth equivalent to twelve or more voice grade channels.

*Working Loop*

A revenue producing pair of wires, or its equivalent, between a customer's station and the central office from which the station is served.
