

Pt. 40

(b) The height of the water closet should be 17 inches (430 mm) to 19 inches (485 mm) measured to the top of the toilet seat. Seats should not be sprung to return to a lifted position.

(c) A grab bar at least 24 inches (610 mm) long should be mounted behind the water closet, and a horizontal grab bar at least 40 inches (1015 mm) long should be mounted on at least one side wall, with one end not more than 12 inches (305 mm) from the back wall, at a height between 33 inches (840 mm) and 36 inches (915 mm) above the floor.

(d) Faucets and flush controls should be operable with one hand and should not require tight grasping, pinching, or twisting of the wrist. The force required to activate controls should be no greater than 5 lbs (22.2 N). Controls for flush valves should be mounted no more than 44 inches (1120 mm) above the floor.

(e) Doorways on the end of the enclosure, opposite the water closet, should have a minimum clear opening width of 32 inches (815 mm). Door latches and hardware should be operable with one hand and should not require tight grasping, pinching, or twisting of the wrist.

(2) Accessible restrooms should be in close proximity to at least one seating location for persons using mobility aids and should be connected to such a space by an unobstructed path having a minimum width of 32 inches (815 mm).

C. *Visibility Through a Window.* Care should be taken so that the lift does not obscure the vision of the person occupying the securement position.

PART 40—PROCEDURES FOR TRANSPORTATION WORKPLACE DRUG TESTING PROGRAMS

Subpart A—General

Sec.

40.1 Applicability.

40.3 Definitions.

40.5–40.19 [Reserved]

Subpart B—Drug Testing

40.21 The drugs.

40.23 Preparation for testing.

40.25 Specimen collection procedures.

40.27 Laboratory personnel.

40.29 Laboratory analysis procedures.

40.31 Quality assurance and quality control.

40.33 Reporting and review of results.

40.35 Protection of employee records.

40.37 Individual access to test and laboratory certification results.

40.39 Use of certified laboratories.

49 CFR Subtitle A (10–1–00 Edition)

Subpart C—Alcohol Testing

40.51 The breath alcohol technician.

40.53 Devices to be used for breath alcohol tests.

40.55 Quality assurance plans for EBTs.

40.57 Locations for breath alcohol testing.

40.59 The breath alcohol testing form.

40.61 Preparation for breath alcohol testing.

40.63 Procedures for screening tests.

40.65 Procedures for confirmation tests.

40.67 Refusals to test and uncompleted tests.

40.69 Inability to provide an adequate amount of breath.

40.71–40.77 [Reserved]

40.79 Invalid tests.

40.81 Availability and disclosure of alcohol testing information about individual employees.

40.83 Maintenance and disclosure of records concerning EBTs and BATs.

Subpart D—Non-Evidential Alcohol Screening Devices

40.91 Authorization for use of non-evidential alcohol screening devices.

40.93 The screening test technician.

40.95 Quality assurance plans for non-evidential screening devices.

40.97 Locations for non-evidential alcohol screening tests.

40.99 Testing forms.

40.101 Screening test procedure.

40.103 Refusals to test and uncompleted tests.

40.105 Inability to provide an adequate amount of breath or saliva.

40.107 Invalid tests.

40.109 Availability and disclosure of alcohol testing information about individual employees.

40.111 Maintenance and disclosure of records concerning non-evidential testing devices and STTs.

APPENDIX A TO PART 40—FEDERAL DRUG TESTING CUSTODY AND CONTROL FORM

APPENDIX B TO PART 40—THE BREATH ALCOHOL TESTING FORM

AUTHORITY: 49 U.S.C. 102, 301, 322, 5331, 20140, 31306, 45101–45106.

SOURCE: 54 FR 49866, Dec. 1, 1989, unless otherwise noted.

Subpart A—General

SOURCE: 59 FR 7354, Feb. 15, 1994, unless otherwise noted.

§ 40.1 Applicability.

This part applies, through regulations that reference it issued by agencies of the Department of Transportation, to transportation employers, including self-employed individuals, required to conduct drug and/or alcohol testing programs by DOT agency regulations and to such transportation employers' officers, employees, agents and contractors (including, but not limited to, consortia). Employers are responsible for the compliance of their officers, employees, agents, consortia and/or contractors with the requirements of this part.

§ 40.3 Definitions.

The following definitions apply to this part:

Air blank. A reading by an EBT of ambient air containing no alcohol. (In EBTs using gas chromatography technology, a reading of the device's internal standard.)

Alcohol. The intoxicating agent in beverage alcohol, ethyl alcohol or other low molecular weight alcohols including methyl or isopropyl alcohol.

Alcohol concentration. The alcohol in a volume of breath expressed in terms of grams of alcohol per 210 liters of breath as indicated by a breath test under this part.

Alcohol use. The consumption of any beverage, mixture or preparation, including any medication, containing alcohol.

Aliquot. A portion of a specimen used for testing.

Blind sample or blind performance test specimen. A urine specimen submitted to a laboratory for quality control testing purposes, with a fictitious identifier, so that the laboratory cannot distinguish it from employee specimens, and which is spiked with known quantities of specific drugs or which is blank, containing no drugs.

Breath Alcohol Technician (BAT). An individual who instructs and assists individuals in the alcohol testing process and operates an EBT.

Canceled or invalid test. In drug testing, a drug test that has been declared invalid by a Medical Review Officer. A canceled test is neither a positive nor a negative test. For purposes of this part, a sample that has been rejected

for testing by a laboratory is treated the same as a canceled test. In alcohol testing, a test that is deemed to be invalid under § 40.79. It is neither a positive nor a negative test.

Chain of custody. Procedures to account for the integrity of each urine or blood specimen by tracking its handling and storage from point of specimen collection to final disposition of the specimen. With respect to drug testing, these procedures shall require that an appropriate drug testing custody form (see § 40.23(a)) be used from time of collection to receipt by the laboratory and that upon receipt by the laboratory an appropriate laboratory chain of custody form(s) account(s) for the sample or sample aliquots within the laboratory.

Collection container. A container into which the employee urinates to provide the urine sample used for a drug test.

Collection site. A place designated by the employer where individuals present themselves for the purpose of providing a specimen of their urine to be analyzed for the presence of drugs.

Collection site person. A person who instructs and assists individuals at a collection site and who receives and makes a screening examination of the urine specimen provided by those individuals.

Confirmation (or confirmatory) test. In drug testing, a second analytical procedure to identify the presence of a specific drug or metabolite that is independent of the screening test and that uses a different technique and chemical principle from that of the screening test in order to ensure reliability and accuracy. (Gas chromatography/mass spectrometry (GC/MS) is the only authorized confirmation method for cocaine, marijuana, opiates, amphetamines, and phencyclidine.) In alcohol testing, a second test, following a screening test with a result of 0.02 or greater, that provides quantitative data of alcohol concentration.

DHHS. The Department of Health and Human Services or any designee of the Secretary, Department of Health and Human Services.

DOT agency. An agency of the United States Department of Transportation administering regulations related to drug or alcohol testing, including the

§§ 40.5–40.19

United States Coast Guard (for drug testing purposes only), the Federal Aviation Administration, the Federal Railroad Administration, the Federal Highway Administration, the Federal Transit Administration, the Research and Special Programs Administration, and the Office of the Secretary.

Employee. An individual designated in a DOT agency regulation as subject to drug testing and/or alcohol testing. As used in this part “employee” includes an applicant for employment. “Employee” and “individual” or “individual to be tested” have the same meaning for purposes of this part.

Employer. An entity employing one or more employees that is subject to DOT agency regulations requiring compliance with this part. As used in this part, *employer* includes an industry consortium or joint enterprise comprised of two or more employing entities.

EBT (or evidential breath testing device). An EBT approved by the National Highway Traffic Safety Administration (NHTSA) for the evidential testing of breath and placed on NHTSA’s “Conforming Products List of Evidential Breath Measurement Devices” (CPL), and identified on the CPL as conforming with the model specifications available from the National Highway Traffic Safety Administration, Office of Alcohol and State Programs.

Medical Review Officer (MRO). A licensed physician (medical doctor or doctor of osteopathy) responsible for receiving laboratory results generated by an employer’s drug testing program who has knowledge of substance abuse disorders and has appropriate medical training to interpret and evaluate an individual’s confirmed positive test result together with his or her medical history and any other relevant biomedical information.

Screening test (or initial test). In drug testing, an immunoassay screen to eliminate “negative” urine specimens from further analysis. In alcohol testing, an analytic procedure to determine whether an employee may have a prohibited concentration of alcohol in a breath specimen.

Secretary. The Secretary of Transportation or the Secretary’s designee.

49 CFR Subtitle A (10–1–00 Edition)

Shipping container. A container capable of being secured with a tamper-evident seal that is used for transfer of one or more urine specimen bottle(s) and associated documentation from the collection site to the laboratory.

Specimen bottle. The bottle that, after being labeled and sealed according to the procedures in this part, is used to transmit a urine sample to the laboratory.

Substance abuse professional. A licensed physician (Medical Doctor or Doctor of Osteopathy); or a licensed or certified psychologist, social worker, or employee assistance professional; or an addiction counselor (certified by the National Association of Alcoholism and Drug Abuse Counselors Certification Commission or by the International Certification Reciprocity Consortium/Alcohol & Other Drug Abuse). All must have knowledge of and clinical experience in the diagnosis and treatment of alcohol and controlled substances-related disorders.

[59 FR 7354, Feb. 15, 1994, as amended at 59 FR 43000, Aug. 19, 1994; 61 FR 37224, July 17, 1996]

§§ 40.5–40.19 [Reserved]

Subpart B—Drug Testing

§ 40.21 The drugs.

(a) DOT agency drug testing programs require that employers test for marijuana, cocaine, opiates, amphetamines and phencyclidine.

(b) An employer may include in its testing protocols other controlled substances or alcohol only pursuant to a DOT agency approval, if testing for those substances is authorized under agency regulations and if the DHHS has established an approved testing protocol and positive threshold for each such substance.

(c) Urine specimens collected under DOT agency regulations requiring compliance with this part may only be used to test for controlled substances designated or approved for testing as described in this section and shall not be used to conduct any other analysis or test unless otherwise specifically authorized by DOT agency regulations.
