

**Farm Service Agency, USDA**

**§ 736.52**

records shall at all times clearly show the location of all identity-preserved grain stored in the warehouse.

**§ 736.46 Sacked grain.**

Each warehouseman shall keep sacked grain stored in an orderly manner so as to permit easy access to all lots and to facilitate inspecting, sampling, counting, and identification of each lot.

**§ 736.47 Warehouses to be kept clean.**

Each warehouseman shall keep his warehouse reasonably clean at all times and free from straw, rubbish, or accumulations of materials that will increase the fire hazard or interfere with the handling of grain.

**§ 736.48 Delivery of fungible grain.**

Except as may be provided by law or the regulations in this part, each warehouseman: (a) Upon proper presentation of a receipt for any grain other than identity-stored grain, and which grain has not at the request of the depositor or lawful holder of the receipt covering such grain or otherwise as permitted by law or the regulations in this part, been dried or otherwise conditioned by such warehouseman, and upon payment or tender of all advances and legal charges, shall deliver to such depositor or lawful holder of such receipt grain of the grade and quantity named in such receipt; and (b) upon proper presentation of a receipt for any grain the identity of which was to have been preserved during the storage period, and upon payment or tender of all advances and legal charges, shall deliver to the person lawfully entitled thereto, the identical grain so stored in his warehouse.

**§ 736.49 Cleaning of grain.**

Each warehouseman whose warehouse is equipped with machinery suitable for the purpose, shall clean all bulk grain, received for storage in such warehouse, on which the inspector at the request of the depositor or lawful holder of the receipt covering such grain has set dockage for cleaning.

**§ 736.50 Grades; separate in storage.**

A warehouseman may not mix lots of different grades of grain stored or re-

ceived for storage except when the identity of the grain to be stored is to be preserved or when a depositor surrenders receipts covering two or more lots and requests the warehouseman to deliver the amount of grain represented by the canceled receipts in such a manner that they will become one lot. The balance, if any, of grain resulting from this operation, after weighing and inspecting, is to be stored with grain of like grade or its identity preserved.

**§ 736.51 Stocks to be in balance by grades.**

Warehousemen must keep stocks of grain in storage by grades in balance with the grades of grain represented by outstanding storage obligations for which receipts have been or are to be issued, except when the grain has unavoidably improved or deteriorated through natural causes. In case the grades of stored grain should get out of balance with grades represented by outstanding storage obligations for which receipts have been or are to be issued, the warehouseman shall effect proper adjustments.

**§ 736.52 Out-of-condition and damaged grain.**

(a) If the condition of any grain offered for storage is such that it probably will affect the condition of grain in the licensed warehouse, the warehouseman shall not receive such grain for storage or store such grain in his licensed warehouse, but, if the warehouse has separate bins or is equipped with proper conditioning apparatus, he may receive such grain for storage in such separate bins or he may condition it and then store it in such manner as will not lower the grade of other grain.

(b) In case the warehouseman or the Department shall find that storage of grain in direct contact with any part of the structure of the warehouse results, or is likely to result, in damage to the grain, the warehouseman shall not store grain in such part of the warehouse except in such manner and by the use of such material as will keep the grain in the same condition as when stored.
