

(1) The market administrator shall subtract from the pounds of milk described in paragraphs (c)(1) and (2) of this section the pounds of bulk milk transferred from the pool plant receiving the supplemental milk if milk was transferred to a nonpool plant on the same calendar day that the supplemental milk was received. For this purpose, the transferred milk shall be subtracted from the most distant load of supplemental milk received, and then in sequence with the next most distant load until all of the transfers have been offset.

(2) With respect to the pounds of milk described in paragraph (c)(1) of this section that remain after the computations described in paragraph (d)(1) of this section, the market administrator shall:

(i) Determine the shortest hard-surface highway distance between the shipping plant and the receiving plant;

(ii) Multiply the number of miles so determined by 0.35 cent;

(iii) Subtract the applicable Class I differential in §1000.52 for the county in which the shipping plant is located from the Class I differential applicable for the county in which the receiving plant is located;

(iv) Subtract any positive difference computed in paragraph (d)(2)(iii) of this section from the amount computed in paragraph (d)(2)(ii) of this section; and

(v) Multiply the remainder computed in paragraph (d)(2)(iv) of this section by the hundredweight of milk described in paragraph (d)(2) of this section.

(3) For the remaining milk described in paragraph (c)(2) of this section after computations described in paragraph (d)(1) of this section, the market administrator shall:

(i) Determine an origination point for each load of milk by locating the nearest city to the last producer's farm from which milk was picked up for delivery to the receiving pool plant;

(ii) Determine the shortest hard-surface highway distance between the receiving pool plant and the origination point;

(iii) Subtract 85 miles from the mileage so determined;

(iv) Multiply the remaining miles so computed by 0.35 cent;

(v) Subtract the Class I differential specified in §1000.52 applicable for the county in which the origination point is located from the Class I differential applicable at the receiving pool plant's location;

(vi) Subtract any positive difference computed in paragraph (d)(3)(v) of this section from the amount computed in paragraph (d)(3)(iv) of this section; and

(vii) Multiply the remainder computed in paragraph (d)(3)(vi) of this section by the hundredweight of milk described in paragraph (d)(3) of this section.
