

§ 661.47

truck ADT should take precedence over those which have lower truck ADT. Other items of note should be whether school buses use the bridge and the types of trucks that may cross the bridge and the loads imposed.

§ 661.47 In the event of project cost over runs, how would they be funded?

(a) Because of the critical nature of this program, BIA area road engineer (ARE) approved costs in excess of the project estimate could be funded out of this program depending on the availability of funds and subject to BIADOT/FLH project approval procedures. The ARE would request additional IRRBP funding for a specific bridge project and submit a request with appropriate justification along with an explanation as to why this additional IRRBP funding is necessary.

(b) In addition, project cost over runs may be funded out of regular IRR program funds.

§ 661.49 Could regular IRR funds be used to fund a bridge project?

Yes. Regular IRR construction funds can be used to fund a bridge project with the concurrence of the FHWA, BIADOT and the BIA ARE.

§ 661.51 Could bridge maintenance be performed with these funds?

No. Bridge maintenance repairs would not be within the scope of funding, e.g., guard rail repair, deck repairs, repair of traffic control devices, striping, cleaning scuppers, deck sweeping, snow and debris removal, etc. There are maintenance funds available through annual Department of the Interior appropriations for use on BIA owned bridges. The Department of the Interior maintenance funds would be the appropriate funding source for bridge maintenance.
