Environmental Protection Agency

§ 180.287 Amitraz; tolerances for residues.

Tolerances are established for residues of the insecticide amitraz ([N-[(2,4-dimethylphenyl)-N-methylmethylimidazolinyl]methyl] N-methylmethanimidamide) and its metabolites N-(2,4-dimethylphenyl)-N-methyl formamide and N-(2,4-dimethylphenyl)-N-methylmethanimidamide (both calculated as the parent) in or on the following raw agricultural commodities (RAC) at the following levels:

<table>
<thead>
<tr>
<th>Commodity</th>
<th>Parts per million</th>
</tr>
</thead>
<tbody>
<tr>
<td>Artichoke, globe</td>
<td>0.01</td>
</tr>
<tr>
<td>Beet, sugar, roots</td>
<td>0.04</td>
</tr>
<tr>
<td>Beet, sugar, tops</td>
<td>0.02</td>
</tr>
</tbody>
</table>

(d) Indirect or inadvertent residues. [Reserved]

§ 180.289 Methanearsonic acid; tolerances for residues.

(a) General. Tolerances are established for negligible residues of the fungicide 2-(thiocyanomethylthio)benzothiazole in or on barley (fodder, grain and straw), corn (fodder, forage, and grain), cotton, forage, cottonseed, oats (fodder, forage, grain, and straw), rice (grain and straw), Safflower, seed, sorghum (fodder, forage, and grain), sugar beet (roots and tops), and wheat (fodder, forage, grain, and straw) at 0.1 part per million.

(b) Section 18 emergency exemptions. [Reserved]

(c) Tolerances with regional registrations. [Reserved]

(d) Indirect or inadvertent residues. [Reserved]

§ 180.291 Pentachloronitrobenzene; tolerance for residues.

(a) A tolerance of 0.1 part per million is established for negligible residues of the fungicide pentachloronitrobenzene in or on the raw agricultural commodity cottonseed.

(b) Tolerances with regional registration (refer to §180.1 (n)) are established for the combined residues of the fungicides pentachloronitrobenzene
