Environmental Protection Agency

§ 180.539 d-Limonene; tolerances for residues.

(a) General. (1) The insecticide d-limonene may be safely used with the active ingredients dihydro-5-pentyl-2(3H)-furanone and dihydro-5-heptyl-2(3H)-furanone in insect-repellent tablecloths and in insect-repellent strips used in food- or feed-handling establishments.

(2) To assure safe use of the insect repellent, its label and labeling shall conform to that registered by the U.S. Environmental Protection Agency, and it shall be used in accordance with such label and labeling.

(b) Section 18 emergency exemptions. [Reserved]

(c) Tolerances with regional registrations. [Reserved]

(d) Indirect or inadvertent residues. [Reserved]

[65 FR 33715, May 24, 2000]

§ 180.540 Fenithrothion; tolerances for residues.

(a) General. A tolerance of 30 parts per million, of which no more than 15 parts per million is O,O-dimethyl O-(4-nitro-m-tolyl) phosphorothioate or O,O-dimethyl O-(4-nitro-m-tolyl) phosphate, is established for combined residues of the insecticide O,O-dimethyl O-(4-nitro-m-tolyl) phosphorothioate and its metabolites O,O-dimethyl O-(4-nitro-m-tolyl) phosphate and 3-methyl-4-nitrophenol in wheat gluten resulting from postharvest application of the insecticide to stored wheat in Australia.

(b) Section 18 emergency exemptions. [Reserved]

(c) Tolerances with regional registrations. [Reserved]

(d) Indirect or inadvertent residues. [Reserved]

[65 FR 33716, May 24, 2000]

§ 180.541 Propetamphos; tolerances for residues.

(a) General. A tolerance of 0.1 part per million is established for residues of the insecticide propetamphos \[((e)-\text{-methylthyl}) 3\text{-}[[\text{ethy lamino}]\text{-methoxyphosphinothioyloxy}\text{-}2\text{-butenoate}]\) in food commodities exposed to the insecticide during treatment of food- or feed-handling establishments.

(b) Direct application shall be limited solely to spot and/or crack and crevice treatment in food-handling establishments where food and food products are held, processed, prepared, or served. Spray and dust concentrations shall be limited to 1 percent active ingredient. For crack and crevice treatment, equipment capable of delivering a dust or a pin-stream of spray directly into cracks and crevices shall be used. For spot treatment, a coarse, low-pressure spray shall be used to avoid contamination of feed or food-contact surfaces.

(3) To ensure safe use of the insecticide, its label and labeling shall conform to that registered by the U.S. Environmental Protection Agency, and it shall be used in accordance with such label and labeling.

(b) Section 18 emergency exemptions. [Reserved]

(c) Tolerances with regional registrations. [Reserved]

(d) Indirect or inadvertent residues. [Reserved]

[65 FR 33716, May 24, 2000]

§ 180.543 Diclosulam; tolerances for residues.

(a) General. Tolerances are established for residues of the herbicide diclosulam \[N\text{-}(2,6\text{-dichlorophenyl})\text{-}5\text{-ethoxy-7-fluoro}[1,2,4]\text{-triazolo}[1,5-c]\text{pyrimidine-2-sulfonamide}\] in or on the following raw agricultural commodities as follows:

<table>
<thead>
<tr>
<th>Commodity</th>
<th>Parts per million</th>

<tr>
<td>Peanut</td>
<td>..........................</td>
</tr>
</tbody>
</table>

(1) Direct application shall be limited solely to spot and/or crack and crevice treatment in food-handling establishments where food and food products are held, processed, prepared, or served. Spray and dust concentrations shall be limited to a maximum of 1 percent active ingredient. For crack and crevice treatment, equipment capable of delivering a dust or a pin-stream of spray directly into cracks and crevices shall be used. For spot treatment, a coarse, low-pressure spray shall be used to avoid contamination of feed or food-contact surfaces.
