

term and short-term adverse effects associated with the occupancy and modification of base flood plains. In addition, NRCS will also avoid direct or indirect support of development in the base flood plain wherever there is a practicable alternative. Where appropriate, NRCS will require design modifications to minimize harm to or within the base flood plain. NRCS will provide appropriate public notice and public participation in the continuing planning process in accordance with NRCS NEPA process.

(vi) NRCS may require the local government to adopt and enforce appropriate flood plain regulations as a condition to receiving project financial assistance.

(3) *Actions on property and facilities under NRCS ownership or control.* For real property and facilities owned by or under the control of NRCS, the following actions will be taken:

(i) Locate new structures, facilities, etc., outside the base flood plain if there is a practicable alternate site.

(ii) Require public participation in decisions to construct structures, facilities, etc., in flood plains that might result in adverse effects and incompatible development in such areas if no practicable alternatives exist.

(iii) New construction or rehabilitation will be in accordance with the standards and criteria of the National Flood Insurance Program and will include floodproofing and other flood protection measures as appropriate.

PARTS 651–652 [RESERVED]

PART 653—TECHNICAL STANDARDS

Sec.

653.1 General.

653.2 Technical standards and criteria.

653.3 Adaptation of technical standards.

653.4 Availability of technical standards.

AUTHORITY: 7 CFR 2.62.

SOURCE: 43 FR 58079, Dec. 12, 1978, unless otherwise noted.

§ 653.1 General.

The Natural Resources Conservation Service (NRCS) is responsible for the technical adequacy of conservation

practices installed under all NRCS programs, and those practices applied under programs administered by the Agricultural Stabilization and Conservation Service (ASCS) where NRCS has the technical responsibility. NRCS technical or financial assistance will be provided when the practices are applied according to established technical standards.

§ 653.2 Technical standards and criteria.

Technical standards and criteria have been established for all conservation practices. They provide the guidance and direction needed to assure that the practices meet the intended purpose and are of the quality needed to assure lasting for the design life. Standards and criteria are developed in consultation with universities, research institutions, and individual industrial and private firms and individuals. Research information and practical experience are used in setting standards. Changes and new technical standards and criteria are prepared in the same manner as set out above.

§ 653.3 Adaptation of technical standards.

Technical standards and criteria developed on a national basis may require special adaptation to meet local needs. These adaptations must be approved by the Administrator of the Natural Resources Conservation Service or his designee.

§ 653.4 Availability of technical standards.

Information on technical standards used by NRCS is available at field, area, or State offices of NRCS.
