

§2.51

(b) *Factors Commission will generally consider.* In determining whether a proposed transaction subject to section 203 is consistent with the public interest, the Commission will generally consider the following factors; it may also consider other factors:

- (1) The effect on competition;
- (2) The effect on rates; and
- (3) The effect on regulation.

(c) *Effect on competition.* Applicants should provide data adequate to allow analysis under the Department of Justice/Federal Trade Commission Merger Guidelines, as described in the Policy Statement and Appendix A to the Policy Statement.

(d) *Effect on rates.* Applicants should propose mechanisms to protect customers from costs due to the merger. If the proposal raises substantial issues of relevant fact, the Commission may set this issue for hearing.

(e) *Effect on regulation.* (1) Where the merged entity would be part of a registered public utility holding company, if applicants do not commit in their application to abide by this Commission's policies with regard to affiliate transactions, the Commission will set the issue for a trial-type hearing.

(2) Where the affected state commissions have authority to act on the transaction, the Commission will not set for hearing whether the transaction would impair effective regulation by the state commission. The application should state whether the state commissions have this authority.

(3) Where the affected state commissions do not have authority to act on the transaction, the Commission may set for hearing the issue of whether the transaction would impair effective state regulation.

§2.55 Definition of terms used in section 7(c).

For the purposes of section 7(c) of the Natural Gas Act, as amended, the word *facilities* as used therein shall be interpreted to exclude:

(a) *Auxiliary installations.* (1) Installations (excluding gas compressors) which are merely auxiliary or appurtenant to an authorized or proposed transmission pipeline system and which are installations only for the purpose of obtaining more efficient or more economical operation of the authorized or proposed transmission facilities, such as: Valves; drips; pig launchers/receivers; yard and station piping; cathodic protection equipment; gas cleaning, cooling and dehydration equipment; residual refining equipment; water pumping, treatment and cooling equipment; electrical and communication equipment; and buildings.

(2) *Advance notification.* One of the following requirements will apply to any specified auxiliary installation. If auxiliary facilities are to be installed:

(i) On existing transmission facilities, then no notification is required;

(ii) On, or at the same time as, certificated facilities which are not yet in service (except those authorized under the automatic procedures of part 157 of subpart F of this chapter), then a description of the auxiliary facilities and their locations must be provided to the Commission at least 30 days in advance of their installation; or

(iii) On and at the same time as facilities that are proposed, then the auxiliary facilities must be described in the environmental report specified in §380.12 or in a supplemental filing while the application is pending.

(b) *Replacement of facilities.* (1) Facilities which constitute the replacement of existing facilities that have or will soon become physically deteriorated or
