PART 241—ACQUISITION OF UTILITY SERVICES

Subpart 241.1—General

Sec.

241.101 Definitions.

241.102 Applicability.

241.103 Statutory and delegated authority.

Subpart 241.2—Acquiring Utility Services

241.201 Policy.

241.202 Procedures.

241.203 GSA assistance.

241.205 Separate contracts.

241.270 Preaward contract review.

Subpart 241.5—Solicitation Provision and Contract Clauses

241.501-70 Additional clauses.

AUTHORITY: 48 U.S.C. 421 and 48 CFR Chapter 1.

SOURCE: 63 FR 11539, Mar. 9, 1998, unless otherwise noted.

Subpart 241.1—General

241.101 Definitions.

As used in this part—

Definite term contract means a contract for utility services for a definite period of not less than one nor more than ten years.

Dual service area means a geographical area in which two or more utility suppliers are authorized under State law to provide services.

Indefinite term contract means a month-to-month contract for utility services which may be terminated by the Government upon proper notice.

Independent regulatory body means the Federal Energy Regulatory Commission, a state-wide agency, or an agency with less than state-wide jurisdiction when operating pursuant to state authority. The body has the power to fix, establish, or control the rates and services of utility suppliers.

Nonindependent regulatory body means a body that regulates a utility supplier

which is owned or operated by the same entity that created the regulatory body, e.g., a municipal utility.

Regulated utility supplier means a utility supplier regulated by an independent regulatory body.

Service power procurement officer means for the—

Army, the Chief of Engineers;

Navy, the Commander, Naval Facilities Engineering Command;

Air Force, the head of a contracting activity; and

Defense Logistics Agency, the Executive Director of Contracting.

241.102 Applicability.

(a) This part applies to purchase of utility services from nonregulated and regulated utility suppliers. It includes the acquisition of liquefied petroleum gas as a utility service when purchased from regulated utility suppliers.

(b)(7) This part does not apply to third party financed projects. However, it may be used for any purchased utility services directly resulting from such projects, including those authorized by—

(A) 10 U.S.C. 2394 for energy, fuels, and energy production facilities for periods not to exceed 30 years;

(B) 10 U.S.C. 2394a for renewable energy for periods not to exceed 25 years;

(C) 10 U.S.C. 2689 for geothermal resources that result in energy production facilities;

(D) 10 U.S.C. 2809 for potable and waste water treatment plants for periods not to exceed 32 years; and

(E) 10 U.S.C. 2812 for lease/purchase of energy production facilities for periods not to exceed 32 years.

241.103 Statutory and delegated authority.

The contracting officer may enter into a utility service contract related to the conveyance of a utility system for a period not to exceed 50 years (10 U.S.C. 2688(c)(3)).

[65 FR 2059, Jan. 13, 2000; 65 FR 19818, Apr. 12, 2000]

Subpart 241.2—Acquiring Utility Services

241.201 Policy.

(1) Except as provided in FAR 41.201, DoD, as a matter of comity, will comply with the current regulations, practices and decisions of independent regulatory bodies which are subject to judicial appeal. This policy does not extend to regulatory bodies whose decisions are not subject to appeal nor does it extend to nonindependent regulatory bodies.

(2) Purchases of utility services outside the United States may use—

(i) Formats and technical provisions consistent with local practice; and

(ii) Dual language forms and contracts.

(3) Rates established by an independent regulatory body are considered “prices set by law or regulation” and do not require submission of cost or pricing data (see FAR Subpart 15.4).

241.202 Procedures.

(a)(i) *Competitive proposals.* When a new major utility service load develops or a new military installation is established, the contracting officer shall—

(A) Determine whether more than one supplier can provide the required utility services.

(1) Competition may be possible where dual franchises exist or where no franchise exists.

(2) Competition should also be considered when an installation is served by one supplier and other potential suppliers exist even though one supplier has entered into a General Services Administration area-wide contract.

(B) Where competition exists, solicit competitive proposals from all potential suppliers.

(ii) *Periodic reviews for competition.* Conduct periodic review of ongoing contracts to determine the availability of competition. If available, evaluate the need to rewrite the contract considering—

(A) The possible loss of rights vested in the Government under the existing contract;

(B) The age and quality of the contract; and

(C) The number of contract modifications and the ease of administration with the existing contract documents.

(iii) *Connection and service charges.* The Government may pay a connection charge when required to cover the cost of the necessary connecting facilities. A connection charge based on the estimated labor cost of installing and removing the facility shall not include salvage cost. A lump-sum connection charge shall be no more than the agreed cost of the connecting facilities less net salvage. The order of precedence for contractual treatment of connection and service charges is—

(A) *No connection charge.*

(B) *Termination liability.* Use when an obligation is necessary to secure the required services. The obligation must be not more than the agreed connection charge, less any net salvage material costs. Use of a termination liability instead of a connection charge requires the approval of the service power procurement officer or designee.

(C) *Connection charge, refundable.* Use a refundable connection charge when the supplier refuses to provide the facilities based on lack of capital or published rules which prohibit providing up-front funding. The contract should provide for refund of the connection charge within five years unless a longer period or omission of the refund requirement is authorized by the service power procurement officer or designee.

(D) *Connection and service charges, nonrefundable.* The Government may pay certain nonrefundable, non-recurring charges including service initiation charges, a contribution in aid of construction, membership fees, and charges required by the supplier’s rules and regulations to be paid by the customer. If possible, consider sharing the use of (and costs for) facilities when large nonrefundable charges are required.

(iv) *Construction and labor requirements.* (A) Do not use the connection charge provisions for the installation of Government-owned distribution lines and facilities. The acquisition of such facilities must be authorized by legislation and accomplished in accordance with FAR Part 36. Also, do not

Department of Defense

241.501-70

use the connection charge provisions for the installation of new facilities related to the supplier's production and general "backbone" system unless authorized by legislation.

(B) Construction labor standards ordinarily do not apply to construction accomplished under the connection charge provisions of this part. However, if installation includes construction of a public building or public work as defined in FAR 36.102, construction labor standards may apply.

241.203 GSA assistance.

The General Services Administration (GSA) has delegated to DoD the authority to enter into utility service contracts (see FAR 41.103); therefore, contracting officers need not seek assistance or approval from GSA.

241.205 Separate contracts.

(a)(i) Requests for proposals shall state the anticipated service period in terms of months or years. Where the period extends beyond the current fiscal year, evaluate offers of incentives for a definite term contract.

(ii) The solicitation may permit offerors the choice of proposing on the basis of—

(A) A definite term not to exceed the anticipated service period; or

(B) An indefinite term contract.

(iii) Where the expected service period is less than the current fiscal year,

the solicitation shall be on the basis of an indefinite term contract.

(iv) Contracts for utility services for leased premises shall identify the lease document on the face of the contract.

(d) Use an indefinite term utility service contract when it is considered to be in the Government's best interest to—

(i) Have the right to terminate on a 30-day (or longer) notice. A notice of up to one year may be granted by an installation if needed to obtain a more favorable rate, more advantageous conditions, or for other valid reasons; or

(ii) Grant the supplier the right to terminate the contract when of benefit to the Government in the form of lower rates, larger discounts or more favorable terms and conditions.

241.270 Preaward contract review.

Departments/agencies shall conduct their owned preaward contract reviews.

Subpart 241.5—Solicitation Provision and Contract Clauses

241.501-70 Additional clauses.

(a) If the Government must execute a superseding contract and capital credits, connection charge credits, or termination liability exist, use the clause at 252.241-7000, Superseding Contract.

(b) Use the clause at 252.241-70001, Government Access, when the clause at FAR 52.241-5, Contractor's Facilities, is used.
