PART 4 [RESERVED]

PART 5—DETERMINATION OF PARITY PRICES

Sec.

- 5.1 Parity index and index of prices received by farmers.
- 5.2 Marketing season average price data.
- 5.3 Selection of calendar year price data.
- 5.4 Commodities for which parity prices shall be calculated.
- 5.5 Publication of season average, calendar year, and parity price data.
- 5.6 Revision of the parity price of a commodity.

AUTHORITY: 7 U.S.C. 1301, 1375.

EDITORIAL NOTE: Nomenclature changes to part 5 appear at 62 FR 8361, Feb. 25, 1997.

§ 5.1 Parity index and index of prices received by farmers.

(a) The parity index and related indices for the purpose of calculating parity prices after May 1, 1976, according to the formula contained in section 301(a) of the Agricultural Adjustment Act of 1938, as amended by the Agricultural Acts of 1948, 1949, 1954, and 1956 (hereinafter referred to as section 301(a)) shall be the index of prices paid by farmers, interest, taxes, and farm wage rates, as revised May 1976 and published in the May 28, 1976, and subsequent issues of the monthly report, "Agricultural Prices." The publication of these indices by the National Agricultural Statistics Service in the

monthly report, "Agricultural Prices", shall be continued.

(b) The measure of the general level of prices received by farmers as provided for in section 301(a)(1)(B)(ii) after January 1, 1959, shall be the index of prices received by farmers as revised January 1959 and published in the January 30, 1959, and subsequent issues of "Agricultural Prices". The simple average of the 120 monthly indices included in the preceding 10 calendar years plus an adjustment to take account of the effect on the index of any adjustment made on average prices of individual commodities as hereinafter specified shall be used in the calculation of the adjusted base prices. Parity prices heretofore published for periods prior to January 1, 1959 shall not be revised.

(c) The term *milkfat* as used in these regulations is synonymous with the term *butterfat*, and when any statute requires calculation of the parity price of butterfat, the parity price of milkfat shall be the parity price of butterfat.

[24 FR 697, Jan. 31, 1959, as amended by Amdt. 6, 24 FR 9778, Dec. 5, 1959; Amdt. 29, 41 FR 22333, June 3, 1976]

§ 5.2 Marketing season average price data.

It is hereby found that it is impractical to use averages of prices received by farmers on a calendar year basis for the following agricultural commodities for the purpose of calculating adjusted base prices and, therefore, marketing season average prices will be used. An allowance for any supplemental payment resulting from price support operations shall be included in the determination of the adjusted base prices. For cigar binder tobacco, types 51-52, for each of the marketing seasons beginning in the years 1949 through 1958, 37.9 cents per pound shall be used in lieu of the average of prices received by farmers for such tobacco during each such marketing season.

BASIC COMMODITIES

Extra long staple cotton; peanuts; rice, and the following types of tobacco: Flue-cured, types 11-14; Virginia fire-cured, type 21; Kentucky-Tennessee fire-cured, types 22-23; burley, type 31; dark air-cured, types 35-36; sun-cured, type 37; Pennsylvania seedleaf, type 41; cigar filler and binder, types 42-44 and 53-
