**§ 800.96 Weighing procedures.**

(a) *Inbound.* Inbound grain that is to be weighed must be routed directly from the carrier and cannot be cleaned, dried, or otherwise processed to remove or add other grain or material en route. Except as noted in paragraph (c) of this section, the identity of an inbound lot shall be considered lost when a portion of the lot is transferred or otherwise removed prior to weighing or a portion of grain or other material is added to the lot prior to weighing. When loss of identity occurs, no amount shall be shown in the "Net Weight" portion of the weight certificate for the lot.

(b) *Outbound.* Outbound grain that has been weighed must be routed directly from the scale to the carrier and cannot be cleaned, dried, or otherwise processed to remove or add other grain or material en route. Except as noted in paragraph (c) of this section, the identity of an outbound lot will be considered lost if a portion of the lot is transferred or otherwise removed from

the lot after weighing or a portion of grain or other material is added to the lot after weighing. When loss of identity occurs, no amount shall be shown in the "Net Weight" portion of the weight certificate for the lot.

(c) *Exceptions.* (1) *Spills.* (i) *Outbound.*

(A) *Replaced.* If a spill occurs in handling and loading of outbound grain and the spilled grain is retrieved, or is replaced in kind, and is loaded on board during the loading operations, the weight certificate shall show the weight of the grain that was physically loaded on board. Upon request of the applicant, an additional certificate may be issued by the agency or the field office to show the weight of the additional grain that was used to replace a spill.

(B) *Not replaced.* If a spill occurs in the handling and loading of outbound grain and the spilled grain is not retrieved or is not replaced during the loading operation, the weight certificate shall show the weight of the grain that was actually weighed, minus the estimated amount of the grain that was spilled. Upon request of the applicant, an additional certificate may be issued showing the estimated amount of grain that was spilled. The applicant may, upon request, have the total amount that was weighed shown on the weight certificate with the estimated amount of the spilled grain noted.

(ii) *Inbound.* If a spill occurs in the handling of inbound grain and the grain is not retrieved and weighed, the weight certificate shall show the weight of the grain that was actually unloaded from the carrier and a statement regarding the spill as prescribed in the instructions.

(2) *Additives.*<sup>1</sup> If additives are applied during loading to outbound, including export, grain after weighing or during unloading to inbound grain before weighing for the purpose of insect or fungi control, dust suppression, or identification, the weight certificate shall show the actual weight of the
