*Example 4.* B is assigned to an air unit stationed in Nearby Country for the entire month of June. In June, members of air

units of the Armed Forces stationed in Nearby Country fly combat and supply missions into and over Destination Country in direct support of military operations in the combat zone. B flies combat missions over Destination Country from Nearby Country from June 1 through June 8. B's service qualifies B for hostile fire/imminent danger pay. Accordingly, B is deemed to serve in the combat zone during June and is entitled to the exclusion under section 112. The result would be the same if B were to fly supply missions into Destination Country from Nearby Country in direct support of operations in the combat zone qualifying B for hostile fire/imminent danger pay.

*Example 5.* Assigned to an air unit stationed in Nearby Country, B was killed in June when B's plane crashed on returning to the airbase in Nearby Country. B was performing military service in direct support of the military operations in the combat zone at the time of B's death. B's service also qualified B for hostile fire/imminent danger pay. B is deemed to have died while serving in the combat zone or to have died as a result of wounds, disease, or injury incurred while serving in the combat zone for purposes of section 692(a) and section 692(b) (providing relief from certain income taxes for members of the Armed Forces dying in a combat zone or as a result of wounds, disease, or injury incurred while serving in a combat zone) and section 2201 (providing relief from certain estate taxes for members of the Armed Forces dying in a combat zone or by reason of combat-zone-incurred wounds). The result would be the same if B's mission had been a supply mission instead of a combat mission.

*Example 6.* In June, B was killed as a result of an off-duty automobile accident while leaving the airbase in Nearby Country shortly after returning from a mission over Destination Country. At the time of B's death, B was not performing military duty qualifying B for hostile fire/imminent danger pay. B is not deemed to have died while serving in the combat zone or to have died as the result of wounds, disease, or injury incurred while serving in the combat zone. Accordingly, B does not qualify for the benefits of section 692(a), section 692(b), or section 2201.

*Example 7.* B performs military service in Nearby Country from June 1 through June 8 in direct support of the military operations in the combat zone. Nearby Country is designated as an area in which members of the Armed Forces qualify for hostile fire/imminent danger pay due to imminent danger, even though members in Nearby Country are not subject to hostile fire. B is deemed to serve in the combat zone from June 1 through June 8. Accordingly, B is entitled to the exclusion under section 112 for June.

(f) *Nonqualifying presence in combat zone—(1) Inapplicability of exclusion.* The following members of the Armed Forces are not deemed to serve in a combat zone within the meaning of section 112(a)(1) or section 112(b)(1) or to be hospitalized as a result of wounds, disease, or injury incurred while serving in a combat zone within the meaning of section 112(a)(2) or section 112(b)(2)—

(i) Members present in a combat zone while on leave from a duty station located outside a combat zone;

(ii) Members who pass over or through a combat zone during the course of a trip between two points both of which lie outside a combat zone; or

(iii) Members present in a combat zone solely for their own personal convenience.

(2) *Exceptions for temporary duty or special pay.* Paragraph (f)(1) of this section does not apply to members of the Armed Forces who—

(i) Are assigned on official temporary duty to a combat zone (including official temporary duty to the airspace of a combat zone); or

(ii) Qualify for hostile fire/imminent danger pay.

(3) *Examples of nonqualifying presence and its exceptions.* The examples in this paragraph (f)(3) are based on the following circumstances: Certain areas, airspace, and adjacent waters are designated as a combat zone for purposes of section 112 as of May 1. Some members of the Armed Forces are stationed in the combat zone; others are stationed in two foreign countries outside the combat zone, named Nearby Country and Destination Country.

*Example 1.* B is a member of the Armed Forces assigned to a unit stationed in Nearby Country. On June 1, B voluntarily visits a city within the combat zone while on leave. B is not deemed to serve in a combat zone since B is present in a combat zone while on leave from a duty station located outside a combat zone.

*Example 2.* B is a member of the Armed Forces assigned to a unit stationed in Nearby Country. During June, B takes authorized leave and elects to spend the leave period by visiting a city in the combat zone. While on leave in the combat zone, B is subject to hostile fire qualifying B for hostile fire/imminent danger pay. Although B is present in the combat zone while on leave from a duty

station outside the combat zone, B qualifies for the exclusion under section 112 because B qualifies for hostile fire/imminent danger pay while in the combat zone.

*Example 3.* B is a member of the Armed Forces assigned to a ground unit stationed in the combat zone. During June, B takes authorized leave and elects to spend the leave period in the combat zone. B is not on leave from a duty station located outside a combat zone, nor is B present in a combat zone solely for B's own personal convenience. Accordingly, B's combat zone tax benefits continue while B is on leave in the combat zone.

*Example 4.* B is assigned as a navigator to an air unit stationed in Nearby Country. On June 4, during the course of a flight between B's home base in Nearby Country and another base in Destination Country, the aircraft on which B serves as a navigator flies over the combat zone. B is not on official temporary duty to the airspace of the combat zone and does not qualify for hostile fire/imminent danger pay as a result of the flight. Accordingly, B is not deemed to serve in a combat zone since B passes over the combat zone during the course of a trip between two points both of which lie outside the combat zone without either being on official temporary duty to the combat zone or qualifying for hostile fire/imminent danger pay.

*Example 5.* B is a member of the Armed Forces assigned to a unit stationed in Nearby Country. B enters the combat zone on a 3-day pass. B is not on official temporary duty and does not qualify for hostile fire/imminent danger pay while present in the combat zone. Accordingly, B is not deemed to serve in a combat zone since B is present in the combat zone solely for B's own personal convenience.

*Example 6.* B, stationed in Nearby Country, is a military courier assigned on official temporary duty to deliver military pouches in the combat zone and in Destination Country. On June 1, B arrives in the combat zone from Nearby Country, and on June 2, B departs for Destination Country. Although B passes through the combat zone during the course of a trip between two points outside the combat zone, B is nevertheless deemed to serve in a combat zone while in the combat zone because B is assigned to the combat zone on official temporary duty.

*Example 7.* B is a member of an Armed Forces ground unit stationed in Nearby Country. On June 1, B took authorized leave and elected to spend the leave period by visiting a city in the combat zone. On June 2, while on leave in the combat zone, B was wounded by hostile fire qualifying B for hostile fire/imminent danger pay. On June 3, B was transferred for treatment to a hospital in the United States. B is hospitalized from June through October for those wounds. Although B was present in the combat zone

while on leave from a duty station outside the combat zone, B is deemed to have incurred the wounds while serving in the combat zone on June 2, because B qualified for hostile fire/imminent danger pay while in the combat zone. Accordingly, B is entitled to the exclusion under section 112 for June through October.

*Example 8.* The facts are the same as in *Example 7* except that B dies on September 1 as a result of the wounds incurred in the combat zone. B is deemed to have died as a result of wounds, disease, or injury incurred while serving in the combat zone for purposes of section 692(a) and section 692(b) (providing relief from certain income taxes for members of the Armed Forces dying in a combat zone or as a result of wounds, disease, or injury incurred while serving in a combat zone) and section 2201 (providing relief from certain estate taxes for members of the Armed Forces dying in a combat zone or by reason of combat-zone-incurred wounds).

[T.D. 8489, 58 FR 47640, Sept. 10, 1993]

#### **§ 1.113-1 Mustering-out payments for members of the Armed Forces.**

For the purposes of the exclusion from gross income under section 113 of mustering-out payments with respect to service in the Armed Forces, mustering-out payments are payments made to any recipients pursuant to the provisions of 38 U.S.C. 2105 (formerly section 5 of the Mustering-out Payment Act of 1944 and section 505 of the Veterans' Readjustment Assistance Act of 1952).

#### **§ 1.117-1 Exclusion of amounts received as a scholarship or fellowship grant.**

(a) *In general.* Any amount received by an individual as a scholarship at an educational institution or as a fellowship grant, including the value of contributed services and accommodations, shall be excluded from the gross income of the recipient, subject to the limitations set forth in section 117(b) and § 1.117-2. The exclusion from gross income of an amount which is a scholarship or fellowship grant is controlled solely by section 117. Accordingly, to the extent that a scholarship or a fellowship grant exceeds the limitations of section 117(b) and § 1.117-2, it is includible in the gross income of the recipient notwithstanding the provisions of section 102 relating to exclusion from gross income of gifts, or section 74(b) relating to exclusion from gross

income of certain prizes and awards. For definitions, see § 1.117-3.

(b) *Exclusion of amounts received to cover expenses.* (1) Subject to the limitations provided in subparagraph (2) of this paragraph, any amount received by an individual to cover expenses for travel (including meals and lodging while traveling and an allowance for travel of the individual's family), research, clerical help, or equipment is excludable from gross income provided that such expenses are incident to a scholarship or fellowship grant which is excludable from gross income under section 117(a)(1). If, however, only a portion of a scholarship or fellowship grant is excludable from gross income under section 117(a)(1) because of the part-time employment limitation contained in section 117(b)(1) or because of the expiration of the 36-month period described in section 117(b)(2)(B), only the amount received to cover expenses incident to such excludable portion is excludable from gross income. The requirement that these expenses be incident to the scholarship or the fellowship grant means that the expenses of travel, research, clerical help, or equipment must be incurred by the individual in order to effectuate the purpose for which the scholarship or the fellowship grant was awarded.

(2)(i) In the case of a scholarship or fellowship grant which is awarded after July 28, 1956, the exclusion provided under subparagraph (1) of this paragraph is not applicable unless the amount received by the individual is specifically designated to cover expenses for travel, research, clerical help, or equipment.

(ii) In the case of a scholarship or fellowship grant awarded before July 29, 1956, the exclusion provided under subparagraph (1) of this paragraph is not applicable unless the recipient establishes, by competent evidence, that the amount was received to cover expenses for travel, research, clerical help, or equipment, but such amount need not be specifically designated. The fact that the recipient actually incurred expenses for travel, research, clerical help, or equipment is not sufficient to establish that the amount was received to cover such expenses.

(iii) The exclusion provided under subparagraph (1) of this paragraph is applicable only to the extent that the amount received for travel, research, clerical help, or equipment is actually expended for such expenses by the recipient during the term of the scholarship or fellowship grant and within a reasonable time before and after such term.

(3) The portion of any amount received to cover the expenses described in subparagraph (1) of this paragraph which is not actually expended for such expenses within the exclusion period described in subparagraph (2) of this paragraph shall, if not returned to the grantor within this period, be included in the gross income of the recipient for the taxable year in which such exclusion period expires.

#### § 1.117-2 Limitations.

(a) *Individuals who are candidates for degrees*—(1) *In general.* Under the limitations provided by section 117(b)(1) in the case of an individual who is a candidate for a degree at an educational institution, the exclusion from gross income shall not apply (except as otherwise provided in subparagraph (2) of this paragraph) to that portion of any amount received as payment for teaching, research, or other services in the nature of parttime employment required as a condition to receiving the scholarship or fellowship grant. Payments for such part-time employment shall be included in the gross income of the recipient in an amount determined by reference to the rate of compensation ordinarily paid for similar services performed by an individual who is not the recipient of a scholarship or a fellowship grant. A typical example of employment under this subparagraph is the case of an individual who is required, as a condition to receiving the scholarship or the fellowship grant, to perform part-time teaching services. A requirement that the individual shall furnish periodic reports to the grantor of the scholarship or the fellowship grant for the purpose of keeping the grantor informed as to the general progress of the individual shall not be deemed to constitute the performance of services in the nature of part-time employment.

(2) *Exception.* If teaching, research, or other services are required of all candidates (whether or not recipients of scholarships or fellowship grants) for a particular degree as a condition to receiving the degree, such teaching, research, or other services on the part of the recipient of a scholarship or fellowship grant who is a candidate for such degree shall not be regarded as part-time employment within the meaning of this paragraph. Thus, if all candidates for a particular education degree are required, as part of their regular course of study or curriculum, to perform part-time practice teaching services, such services are not to be regarded as part-time employment within the meaning of this paragraph.

(b) *Individuals who are not candidates for degrees—(1) Conditions for exclusion.* In the case of an individual who is not a candidate for a degree at an educational institution, the exclusion from gross income of an amount received as a scholarship or a fellowship grant shall apply (to the extent provided in subparagraph (2) of this paragraph) only if the grantor of the scholarship or fellowship grant is—

(i) An organization described in section 501(c)(3) which is exempt from tax under section 501(a),

(ii) The United States or an instrumentality or agency thereof, or a State, a territory, or a possession of the United States, or any political subdivision thereof, or the District of Columbia, or

(iii) For taxable years beginning after December 31, 1961, a foreign government, an international organization, or a binational or multinational educational and cultural foundation or commission created or continued pursuant to section 103 of the Mutual Educational and Cultural Exchange Act of 1961 (22 U.S.C. 2453).

(2) *Extent of exclusion.* (i) In the case of an individual who is not a candidate for a degree, the amount received as a scholarship or a fellowship grant which is excludable from gross income under section 117(a)(1) shall not exceed an amount equal to \$300 times the number of months for which the recipient received amounts under the scholarship or fellowship grant during the taxable year. In determining the number of

months during the period for which the recipient received amounts under a scholarship or fellowship grant, computation shall be made on the basis of whole calendar months. A whole calendar month means a period of time terminating with the day of the succeeding month numerically corresponding to the day of the month of its beginning, less one, except that if there be no corresponding day of the succeeding month the period terminates with the last day of the succeeding month. For purposes of this computation a fractional part of a calendar month consisting of a period of time including 15 days or more shall be considered to be a whole calendar month and a fractional part of a calendar month consisting of a period of time including 14 days or less shall be disregarded. For example, if an individual receives a fellowship grant on September 13 which is to expire on June 12 of the following year, the grant shall be considered to have extended for a period of 9 months. If in the preceding example the grant expired on June 27, instead of June 12, the grant shall be considered to have extended for a period of 10 months.

(ii) No exclusion shall be allowed under section 117(a)(1) to an individual who is not a candidate for a degree after the recipient has, as an individual who is not a candidate for a degree, been entitled to an exclusion under that section for a period of 36 months. This limitation applies if the individual has received any amount which was either excluded or excludable from his gross income under section 117(a)(1) for any prior 36 months, whether or not consecutive. For example, if the individual received a fellowship grant of \$7,200 for 3 years (which he elected to receive in 36 monthly installments of \$200), his exclusion period would be exhausted even though he did not in any of the 36 months make use of the maximum exclusion. Accordingly, such individual would be entitled to no further exclusion from gross income with respect to any additional grants which he may receive as an individual who is not a candidate for a degree.

(iii) If an individual who is not a candidate for a degree receives amounts

from more than one scholarship or fellowship grant during the taxable year, the total amounts received in the taxable year shall be aggregated for the purpose of computing the amount which may be excludable from gross income for such taxable year. If amounts are received from more than one scholarship or fellowship grant during the same month or months within the taxable year, such month or months shall be counted only once for the purpose of determining the number of months for which the individual received such amounts under the scholarships or fellowship grants during the taxable year. For example, if an individual receives a fellowship grant from one source for the months of January to June of the taxable year and also receives a fellowship grant from another source for the months of March through December of the same taxable year, he shall be considered to have received amounts for 12 months of the taxable year. See example (4) in subparagraph (3) of this paragraph for further illustration.

(3) *Examples.* The application of this paragraph may be further illustrated by the following examples, it being assumed that in each example the grantor is a grantor who is described in section 117(b)(2)(A) and subparagraph (1) of this paragraph:

*Example (1).* B, an individual who files his return on the calendar year basis, is awarded a post-doctorate fellowship grant in March 1955. The grant is to commence on September 1, 1955, and is to end on May 31, 1956, so that it will extend over a period of 9 months. The amount of the fellowship grant is \$4,500 and B receives this amount in monthly installments of \$500 on the first day of each month commencing September 1, 1955. During the taxable year 1955, B receives a total of \$2,000 with respect to the 4-month period September through December, inclusive. He may exclude \$1,200 from gross income in the taxable year 1955 ( $\$300 \times 4$ ) and must include the remaining \$800 in gross income for that year. For the year 1956, he will exclude \$1,500 ( $\$300 \times 5$ ) from gross income with respect to the \$2,500 which he receives in that year and must include in gross income \$1,000.

*Example (2).* Assume the same facts as in example (1) except that B receives the full amount of the grant (\$4,500) on September 1, 1955. Since the amount received in the taxable year 1955 is for the full term of the fellowship grant (9 months), B may exclude \$2,700 ( $\$300 \times 9$ ) from gross income for the tax-

able year 1955. The remaining \$1,800 must be included in gross income for that year.

*Example (3).* C, an individual who files his return on the calendar year basis, is awarded a post-doctorate fellowship grant in March 1955. The amount of the grant is \$4,500 for a period commencing on September 1, 1955, and ending 24 months thereafter. C receives the full amount of the grant on September 1, 1955. C may exclude from gross income for the taxable year 1955, the full amount of the grant (\$4,500) since this amount does not exceed an amount equal to \$300 times the number of months (24) for which he received the amount of the grant during that taxable year.

*Example (4).* (i) F, an individual who files his return on the calendar year basis, is awarded a post-doctorate fellowship grant (Grant A) for two years commencing June 1, 1955, in the amount of \$4,800. He elects to receive his grant in monthly installments of \$200 commencing June 1, 1955. On March 1, 1956, F is awarded another post-doctorate fellowship grant (Grant B) for two years commencing September 1, 1956, in the amount of \$7,200. He elects to receive this grant in monthly installments of \$300 commencing September 1, 1956.

(ii) For the calendar year 1955, F receives \$1,400 from Grant A which he is entitled to exclude from gross income since it does not exceed an amount equal to \$300 times the number of months (7) for which he received amounts under the grant in the taxable year.

(iii) For the calendar year 1956, F receives \$3,600 as the aggregate of amounts received under fellowship grants (\$2,400 from Grant A and \$1,200 from Grant B). F will be entitled to exclude the entire amount of \$3,600 from gross income for the calendar year 1956 since such amount does not exceed an amount equal to \$300 times the number of months (12) for which he received amounts under the grants in the taxable year.

(iv) For the calendar year 1957, F receives \$4,600 as the aggregate of amounts received under fellowship grants (\$1,000 from Grant A and \$3,600 from Grant B). F will be entitled to exclude \$3,600 ( $\$300 \times 12$ ) from gross income for the calendar year 1957 and he will have to include \$1,000 in gross income.

(v) For the calendar year 1958, F receives \$2,400 from Grant B. F is entitled to exclude \$1,500 ( $\$300 \times 5$ ) from gross income for the calendar year 1958 and he will have to include \$900 in gross income. While F receives amounts under fellowship Grant B for 8 months during the calendar year 1958, he is limited to an amount equal to \$300 times 5 (months) because of the fact that he has already been entitled to exclude (and has in fact excluded) amounts received as a fellowship grant for a period of 31 months. Accordingly, he can only exclude amounts received under the fellowship grant for 5 months during the calendar year 1958, because of the 36-

§ 1.117-3

month limitation period. The fact that he was entitled to exclude only \$1,400 (\$200 a month for 7 months) instead of the maximum amount of \$2,100 (\$300×7) in 1955, is immaterial and the limitation period of 36 months is applicable.

(vi) The following chart illustrates the computation of the number of months for which F received amounts under the fellowship grants during the respective taxable years and the computation of the total amounts received under the fellowship grants during each taxable year:

Period for which received and source	Number of months	Amounts received
<b>1955:</b>		
June 1 to December 31 .....	7	
Grant A .....		\$1,400
Grant B .....		None
Aggregate .....	7	1,400
<b>1956:</b>		
January 1 to August 31 .....	8	
Grant A .....		1,600
Grant B .....		None
September 1 to December 31 .....	4	
Grant A .....		800
Grant B .....		1,200
Aggregate .....	12	3,600
<b>1957:</b>		
January 1 to May 31 .....	5	
Grant A .....		1,000
Grant B .....		1,500
June 1 to December 31 .....	7	
Grant A .....		None
Grant B .....		2,100
Aggregate .....	12	4,600
<b>1958:</b>		
January 1 to August 31 .....	8	
Grant A .....		None
Grant B .....		2,400
Aggregate .....		2,400

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6782, 29 FR 18355, Dec. 24, 1964]

§ 1.117-3 Definitions.

(a) *Scholarship.* A scholarship generally means an amount paid or allowed to, or for the benefit of, a student, whether an undergraduate or a graduate, to aid such individual in pursuing his studies. The term includes the value of contributed services and accommodations (see paragraph (d) of this section) and the amount of tuition, matriculation, and other fees which are furnished or remitted to a student to aid him in pursuing his studies. The term also includes any amount received in the nature of a family allowance as a part of a scholar-

ship. However, the term does not include any amount provided by an individual to aid a relative, friend, or other individual in pursuing his studies where the grantor is motivated by family or philanthropic considerations. If an educational institution maintains or participates in a plan whereby the tuition of a child of a faculty member of such institution is remitted by any other participating educational institution attended by such child, the amount of the tuition so remitted shall be considered to be an amount received as a scholarship.

(b) *Educational organization.* For definition of "educational organization" paragraphs (a) and (b) of section 117 adopt the definition of that term which is prescribed in section 151(e)(4). Accordingly, for purposes of section 117 the term "educational organization" means only an educational organization which normally maintains a regular faculty and curriculum and normally has a regularly organized body of students in attendance at the place where its educational activities are carried on. See section 151(e)(4) and regulations thereunder.

(c) *Fellowship grant.* A fellowship grant generally means an amount paid or allowed to, or for the benefit of, an individual to aid him in the pursuit of study or research. The term includes the value of contributed services and accommodations (see paragraph (d) of this section) and the amount of tuition, matriculation, and other fees which are furnished or remitted to an individual to aid him in the pursuit of study or research. The term also includes any amount received in the nature of a family allowance as a part of a fellowship grant. However, the term does not include any amount provided by an individual to aid a relative, friend, or other individual in the pursuit of study or research where the grantor is motivated by family or philanthropic considerations.

(d) *Contributed services and accommodations.* The term "contributed services and accommodations" means such services and accommodations as room, board, laundry service, and similar services or accommodations which are received by an individual as a part of a scholarship or fellowship grant.

(e) *Candidate for a degree.* The term “candidate for a degree” means an individual, whether an undergraduate or a graduate, who is pursuing studies or conducting research to meet the requirements for an academic or professional degree conferred by colleges or universities. It is not essential that such study or research be pursued or conducted at an educational institution which confers such degrees if the purpose thereof is to meet the requirements for a degree of a college or university which does confer such degrees. A student who receives a scholarship for study at a secondary school or other educational institution is considered to be a “candidate for a degree.”

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 21, 1960, as amended by T.D. 8032, 50 FR 27232, July 2, 1985]

**§ 1.117-4 Items not considered as scholarships or fellowship grants.**

The following payments or allowances shall not be considered to be amounts received as a scholarship or a fellowship grant for the purpose of section 117:

(a) *Educational and training allowances to veterans.* Educational and training allowances to a veteran pursuant to section 400 of the Servicemen’s Readjustment Act of 1944 (58 Stat. 287) or pursuant to 38 U.S.C. 1631 (formerly section 231 of the Veterans’ Readjustment Assistance Act of 1952).

(b) *Allowances to members of the Armed Forces of the United States.* Tuition and subsistence allowances to members of the Armed Forces of the United States who are students at an educational institution operated by the United States or approved by the United States for their education and training, such as the United States Naval Academy and the United States Military Academy.

(c) *Amounts paid as compensation for services or primarily for the benefit of the grantor.* (1) Except as provided in paragraph (a) of §§ 1.117-2 and 1.117-5, any amount paid or allowed to, or on behalf of, an individual to enable him to pursue studies or research, if such amount represents either compensation for past, present, or future employment services or represents payment for services which are subject to the direction or supervision of the grantor.

(2) Any amount paid or allowed to, or on behalf of, an individual to enable him to pursue studies or research primarily for the benefit of the grantor.

However, amounts paid or allowed to, or on behalf of, an individual to enable him to pursue studies or research are considered to be amounts received as a scholarship or fellowship grant for the purpose of section 117 if the primary purpose of the studies or research is to further the education and training of the recipient in his individual capacity and the amount provided by the grantor for such purpose does not represent compensation or payment for the services described in subparagraph (1) of this paragraph. Neither the fact that the recipient is required to furnish reports of his progress to the grantor, nor the fact that the results of his studies or research may be of some incidental benefits to the grantor shall, of itself, be considered to destroy the essential character of such amount as a scholarship or fellowship grant.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 21, 1960, as amended by T.D. 8032, 50 FR 27232, July 2, 1985]

**§ 1.117-5 Federal grants requiring future service as a Federal employee.**

(a) *In general.* Under section 117(c), amounts received by an individual under a Federal program as a scholarship or grant for qualified tuition and expenses at an institution of higher education are excluded from the gross income of the recipient even though the recipient is required to perform future service as a Federal employee. See paragraph (c) of this section for the definitions of the terms “qualified tuition and expenses” and “institution of higher education.”

(b) *Exception for uniformed services scholarship programs.* The requirements of this section do not apply to amounts received before 1985 by a member of a uniformed service who entered training before 1981 under the Armed Forces Health Professions Scholarship Program, National Public Health Service Corps Scholarship Training Program, or other substantially similar Federal programs requiring the recipient to work for a uniformed Federal service after completion of studies. These awards are governed by section 4 of

§ 1.117-5

26 CFR Ch. I (4-1-06 Edition)

Pub. L. 93-483 as amended by Pub. L. 95-171, Pub. L. 95-600 and Pub. L. 96-167. See section 101(3) of title 37, United States Code for the definition of the term "uniformed service."

(c) *Definitions*—(1) *Qualified tuition and related expenses.* For purposes of section 117(c) and this section, qualified tuition and related expenses are those amounts which under the terms of the Federal program are required to be used and in fact are used for payment of:

(i) Tuition and fees that are required for the recipient's enrollment or attendance at an institution of higher education; and

(ii) Those amounts used for payment of fees, books, supplies and equipment required for courses of instruction at such an institution.

Incidental expenses are not considered related expenses and thus are not excludable from gross income under section 117(c). Incidental expenses include room and board at an institution of higher education, expenses for travel (including expenses for meals and lodging incurred during travel and allowances for travel of the recipient's family), research, clerical help, equipment and other expenses which are not required for enrollment at the institution or in a course of instruction at such institution.

(2) *Institution of higher education.* To qualify as an institution of higher education under this section, the institution must be a public or other non-profit institution in any state which—

(i) Admits as regular students only individuals who have a certificate of graduation from a high school or the recognized equivalent of such a certificate;

(ii) Is legally authorized within the state to provide a program of education beyond high school; and

(iii) Provides an education program for which it awards a bachelor's or higher degree or which is acceptable for full credit towards such a degree, or which trains and prepares students for gainful employment in a recognized health profession. For purposes of this section, recognized health professions are those health professions which are supervised or monitored by appropriate state or Federal agencies or governing

professional associations and which require members to be currently licensed or certified in order to practice.

(3) *Service as a Federal employee*—(i) *In general.* Except as otherwise provided in paragraph (c)(3)(ii) of this section, service as a Federal employee refers to employment of the recipient by the Federal government to work directly for the Federal government. Thus, Federal grants or scholarships which do not require the recipient to work directly for the Federal government are not governed by the rules of this section.

(ii) *Service in a health manpower shortage area.* For purposes of this section an obligation under a grant for the recipient to serve in a health related field in a health manpower shortage area as designated by the Secretary of Health and Human Services according to the criteria of the Public Health Services Act (42 U.S.C. 254(e)) and the regulations promulgated thereunder (42 CFR 5.1-5.4) will be considered an obligation to serve as a Federal employee.

(d) *Records required for exclusion from gross income.* To exclude amounts received under Federal programs requiring future services as a Federal employee, the recipient must maintain records that establish that the amounts received under such programs were used for qualified tuition and related expenses as defined in paragraph (c)(1) of this section. Qualifying uses may be established by providing to the Service, upon request, copies of relevant bills, receipts, cancelled checks or other convenient documentation or records which clearly reflect the use of the money received under the grant. The recipient must also submit, upon request, documentation establishing receipt of the grant and setting out the terms and requirements of the particular grant.

(e) *Applicability of rules of §§ 117(a) and 117(b).* Except where a different rule has been expressly provided in this section, amounts received under Federal grants requiring future service as a Federal employee, and which meet the requirements for exclusion from gross income under this section, are subject to the rules, limitations and definitions specified in §§ 117 (a) and (b) of the Code and §§ 1.117-1 through 1.117-4.

(f) *Effective date.* Except as provided in paragraph (b) of this section, this section will apply to amounts received after December 31, 1980 under Federal programs which meet the requirements of this section.

[T.D. 8032, 50 FR 27232, July 2, 1985]

**§ 1.118-1 Contributions to the capital of a corporation.**

In the case of a corporation, section 118 provides an exclusion from gross income with respect to any contribution of money or property to the capital of the taxpayer. Thus, if a corporation requires additional funds for conducting its business and obtains such funds through voluntary pro rata payments by its shareholders, the amounts so received being credited to its surplus account or to a special account, such amounts do not constitute income, although there is no increase in the outstanding shares of stock of the corporation. In such a case the payments are in the nature of assessments upon, and represent an additional price paid for, the shares of stock held by the individual shareholders, and will be treated as an addition to and as a part of the operating capital of the company. Section 118 also applies to contributions to capital made by persons other than shareholders. For example, the exclusion applies to the value of land or other property contributed to a corporation by a governmental unit or by a civic group for the purpose of inducing the corporation to locate its business in a particular community, or for the purpose of enabling the corporation to expand its operating facilities. However, the exclusion does not apply to any money or property transferred to the corporation in consideration for goods or services rendered, or to subsidies paid for the purpose of inducing the taxpayer to limit production. See section 362 for the basis of property acquired by a corporation through a contribution to its capital by its stockholders or by nonstockholders.

**§ 1.118-2 Contribution in aid of construction.**

(a) *Special rule for water and sewerage disposal utilities—(1) In general.* For purposes of section 118, the term *contribution to the capital of the taxpayer* in-

cludes any amount of money or other property received from any person (whether or not a shareholder) by a regulated public utility that provides water or sewerage disposal services if—

(i) The amount is a contribution in aid of construction under paragraph (b) of this section;

(ii) In the case of a contribution of property other than water or sewerage disposal facilities, the amount satisfies the expenditure rule under paragraph (c) of this section; and

(iii) The amount (or any property acquired or constructed with the amount) is not included in the taxpayer's rate base for ratemaking purposes.

(2) *Definitions—(i) Regulated public utility* has the meaning given such term by section 7701(a)(33), except that such term does not include any utility which is not required to provide water or sewerage disposal services to members of the general public in its service area.

(ii) *Water or sewerage disposal facility* is defined as tangible property described in section 1231(b) that is used predominately (80% or more) in the trade or business of furnishing water or sewerage disposal services.

(b) *Contribution in aid of construction—(1) In general.* For purposes of section 118(c) and this section, the term *contribution in aid of construction* means any amount of money or other property contributed to a regulated public utility that provides water or sewerage disposal services to the extent that the purpose of the contribution is to provide for the expansion, improvement, or replacement of the utility's water or sewerage disposal facilities.

(2) *Advances.* A contribution in aid of construction may include an amount of money or other property contributed to a regulated public utility for a water or sewerage disposal facility subject to a contingent obligation to repay the amount, in whole or in part, to the contributor (commonly referred to as an advance). For example, an amount received by a utility from a developer to construct a water facility pursuant to an agreement under which the utility will pay the developer a percentage of the receipts from the facility over a fixed period may constitute a contribution in aid of construction. Whether an

advance is a contribution or a loan is determined under general principles of federal tax law based on all the facts and circumstances. For the treatment of any amount of a contribution in aid of construction that is repaid by the utility to the contributor, see paragraphs (c)(2)(ii) and (d)(2) of this section.

(3) *Customer connection fee*—(i) *In general.* Except as provided in paragraph (b)(3)(ii) of this section, a customer connection fee is not a contribution in aid of construction under this paragraph (b) and generally is includible in income. The term *customer connection fee* includes any amount of money or other property transferred to the utility representing the cost of installing a connection or service line (including the cost of meters and piping) from the utility's main water or sewer lines to the line owned by the customer or potential customer. A customer connection fee also includes any amount paid as a service charge for starting or stopping service.

(ii) *Exceptions*—(A) *Multiple customers.* Money or other property contributed for a connection or service line from the utility's main line to the customer's or the potential customer's line is not a customer connection fee if the connection or service line serves, or is designed to serve, more than one customer. For example, a contribution for a split service line that is designed to serve two customers is not a customer connection fee. On the other hand, if a water or sewerage disposal utility treats an apartment or office building as one utility customer, then the cost of installing a connection or service line from the utility's main water or sewer lines serving that single customer is a customer connection fee.

(B) *Fire protection services.* Money or other property contributed for public and private fire protection services is not a customer connection fee.

(4) *Reimbursement for a facility previously placed in service*—(i) *In general.* If a water or sewerage disposal facility is placed in service by the utility before an amount is contributed to the utility, the contribution is not a contribution in aid of construction under this paragraph (b) with respect to the cost of the facility unless, no later

than 8½ months after the close of the taxable year in which the facility was placed in service, there is an agreement, binding under local law, that the utility is to receive the amount as reimbursement for the cost of acquiring or constructing the facility. An order or tariff, binding under local law, that is issued or approved by the applicable public utility commission requiring current or prospective utility customers to reimburse the utility for the cost of acquiring or constructing the facility, is a binding agreement for purposes of the preceding sentence. If an agreement exists, the basis of the facility must be reduced by the amount of the expected contributions. Appropriate adjustments must be made if actual contributions differ from expected contributions.

(ii) *Example.* The application of paragraph (b)(4)(i) of this section is illustrated by the following example:

*Example.* M, a calendar year regulated public utility that provides water services, spent \$1,000,000 for the construction of a water facility that can serve 200 customers. M placed the facility in service in 2000. In June 2001, the public utility commission that regulates M approves a tariff requiring new customers to reimburse M for the cost of constructing the facility by paying a service availability charge of \$5,000 per lot. Pursuant to the tariff, M expects to receive reimbursements for the cost of the facility of \$100,000 per year for the years 2001 through 2010. The reimbursements are contributions in aid of construction under paragraph (b) of this section because no later than 8½ months after the close of the taxable year in which the facility was placed in service there was a tariff, binding under local law, approved by the public utility commission requiring new customers to reimburse the utility for the cost of constructing the facility. The basis of the \$1,000,000 facility is zero because the expected contributions equal the cost of the facility.

(5) *Classification by ratemaking authority.* The fact that the applicable ratemaking authority classifies any money or other property received by a utility as a contribution in aid of construction is not conclusive as to its treatment under this paragraph (b).

(c) *Expenditure rule*—(1) *In general.* An amount satisfies the expenditure rule of section 118(c)(2) if the amount is expended for the acquisition or construction of property described in section

118(c)(2)(A), the amount is paid or incurred before the end of the second taxable year after the taxable year in which the amount was received as required by section 118(c)(2)(B), and accurate records are kept of contributions and expenditures as provided in section 118(c)(2)(C).

(2) *Excess amount*—(i) *Includible in the utility's income.* An amount received by a utility as a contribution in aid of construction that is not expended for the acquisition or construction of water or sewerage disposal facilities as required by paragraph (c)(1) of this section (the excess amount) is not a contribution to the capital of the taxpayer under paragraph (a) of this section. Except as provided in paragraph (c)(2)(ii) of this section, such excess amount is includible in the utility's income in the taxable year in which the amount was received.

(ii) *Repayment of excess amount.* If the excess amount described in paragraph (c)(2)(i) of this section is repaid, in whole or in part, either—

(A) Before the end of the time period described in paragraph (c)(1) of this section, the repayment amount is not includible in the utility's income; or

(B) After the end of the time period described in paragraph (c)(1) of this section, the repayment amount may be deducted by the utility in the taxable year in which it is paid or incurred to the extent such amount was included in income.

(3) *Example.* The application of this paragraph (c) is illustrated by the following example:

*Example.* M, a calendar year regulated public utility that provides water services, received a \$1,000,000 contribution in aid of construction in 2000 for the purpose of constructing a water facility. To the extent that the \$1,000,000 exceeded the actual cost of the facility, the contribution was subject to being returned. In 2001, M built the facility at a cost of \$700,000 and returned \$200,000 to the contributor. As of the end of 2002, M had not returned the remaining \$100,000. Assuming accurate records are kept, the requirement under section 118(c)(2) is satisfied for \$700,000 of the contribution. Because \$200,000 of the contribution was returned within the time period during which qualifying expenditures could be made, this amount is not includible in M's income. However, the remaining \$100,000 is includible in M's income for its 2000 taxable year (the taxable year in which

the amount was received) because the amount was neither spent nor repaid during the prescribed time period. To the extent M repays the remaining \$100,000 after year 2002, M would be entitled to a deduction in the year such repayment is paid or incurred.

(d) *Adjusted basis*—(1) *Exclusion from basis.* Except for a repayment described in paragraph (d)(2) of this section, to the extent that a water or sewerage disposal facility is acquired or constructed with an amount received as a contribution to the capital of the taxpayer under paragraph (a) of this section, the basis of the facility is reduced by the amount of the contribution. To the extent the water or sewerage disposal facility is acquired as a contribution to the capital of the taxpayer under paragraph (a) of this section, the basis of the contributed facility is zero.

(2) *Repayment of contribution.* If a contribution to the capital of the taxpayer under paragraph (a) of this section is repaid to the contributor, either in whole or in part, then the repayment amount is a capital expenditure in the taxable year in which it is paid or incurred, resulting in an increase in the property's adjusted basis in such year. Capital expenditures allocated to depreciable property under paragraph (d)(3) of this section may be depreciated over the remaining recovery period for that property.

(3) *Allocation of contributions.* An amount treated as a capital expenditure under this paragraph (d) is to be allocated proportionately to the adjusted basis of each property acquired or constructed with the contribution based on the relative cost of such property.

(4) *Example.* The application of this paragraph (d) is illustrated by the following example:

*Example.* A, a calendar year regulated public utility that provides water services, received a \$1,000,000 contribution in aid of construction in 2000 as an advance from B, a developer, for the purpose of constructing a water facility. To the extent that the \$1,000,000 exceeds the actual cost of the facility, the contribution is subject to being returned. Under the terms of the advance, A agrees to pay to B a percentage of the receipts from the facility over a fixed period, but limited to the cost of the facility. In 2001, A builds the facility at a cost of \$700,000 and returns \$300,000 to B. In 2002, A pays

\$20,000 to B out of the receipts from the facility. Assuming accurate records are kept, the \$700,000 advance is a contribution to the capital of A under paragraph (a) of this section and is excludable from A's income. The basis of the \$700,000 facility constructed with this contribution to capital is zero. The \$300,000 excess amount is not a contribution to the capital of A under paragraph (a) of this section because it does not meet the expenditure rule described in paragraph (c)(1) of this section. However, this excess amount is not includible in A's income pursuant to paragraph (c)(2)(ii) of this section since the amount is repaid to B within the required time period. The repayment of the \$300,000 excess amount to B in 2001 is not treated as a capital expenditure by A. The \$20,000 payment to B in 2002 is treated as a capital expenditure by A in 2002 resulting in an increase in the adjusted basis of the water facility from zero to \$20,000.

(e) *Statute of limitations*—(1) *Extension of statute of limitations*. Under section 118(d)(1), the statutory period for assessment of any deficiency attributable to a contribution to capital under paragraph (a) of this section does not expire before the expiration of 3 years after the date the taxpayer notifies the Secretary in the time and manner prescribed in paragraph (e)(2) of this section.

(2) *Time and manner of notification*. Notification is made by attaching a statement to the taxpayer's federal income tax return for the taxable year in which any of the reportable items in paragraphs (e)(2)(i) through (iii) of this section occur. The statement must contain the taxpayer's name, address, employer identification number, taxable year, and the following information with respect to contributions of property other than water or sewerage disposal facilities that are subject to the expenditure rule described in paragraph (c) of this section—

(i) The amount of contributions in aid of construction expended during the taxable year for property described in section 118(c)(2)(A) (qualified property) as required under paragraph (c)(1) of this section, identified by taxable year in which the contributions were received;

(ii) The amount of contributions in aid of construction that the taxpayer does not intend to expend for qualified property as required under paragraph (c)(1) of this section, identified by tax-

able year in which the contributions were received; and

(iii) The amount of contributions in aid of construction that the taxpayer failed to expend for qualified property as required under paragraph (c)(1) of this section, identified by taxable year in which the contributions were received.

(f) *Effective date*. This section is applicable for any money or other property received by a regulated public utility that provides water or sewerage disposal services on or after January 11, 2001.

[T.D. 8936, 66 FR 2254, Jan. 11, 2001]

**§ 1.119-1 Meals and lodging furnished for the convenience of the employer.**

(a) *Meals*—(1) *In general*. The value of meals furnished to an employee by his employer shall be excluded from the employee's gross income if two tests are met: (i) The meals are furnished on the business premises of the employer, and (ii) the meals are furnished for the convenience of the employer. The question of whether meals are furnished for the convenience of the employer is one of fact to be determined by analysis of all the facts and circumstances in each case. If the tests described in subdivisions (i) and (ii) of this subparagraph are met, the exclusion shall apply irrespective of whether under an employment contract or a statute fixing the terms of employment such meals are furnished as compensation.

(2) *Meals furnished without a charge*. (i) Meals furnished by an employer without charge to the employee will be regarded as furnished for the convenience of the employer if such meals are furnished for a substantial noncompensatory business reason of the employer. If an employer furnishes meals as a means of providing additional compensation to his employee (and not for a substantial noncompensatory business reason of the employer), the meals so furnished will not be regarded as furnished for the convenience of the employer. Conversely, if the employer furnishes meals to his employee for a substantial noncompensatory business reason, the meals so furnished will be regarded as furnished for the convenience of the employer, even though

such meals are also furnished for a compensatory reason. In determining the reason of an employer for furnishing meals, the mere declaration that meals are furnished for a noncompensatory business reason is not sufficient to prove that meals are furnished for the convenience of the employer, but such determination will be based upon an examination of all the surrounding facts and circumstances. In subdivision (ii) of this subparagraph, there are set forth some of the substantial noncompensatory business reasons which occur frequently and which justify the conclusion that meals furnished for such a reason are furnished for the convenience of the employer. In subdivision (iii) of this subparagraph, there are set forth some of the business reasons which are considered to be compensatory and which, in the absence of a substantial noncompensatory business reason, justify the conclusion that meals furnished for such a reason are not furnished for the convenience of the employer. Generally, meals furnished before or after the working hours of the employee will not be regarded as furnished for the convenience of the employer, but see subdivision (ii) (d) and (f) of this subparagraph for some exceptions to this general rule. Meals furnished on nonworking days do not qualify for the exclusion under section 119. If the employee is required to occupy living quarters on the business premises of his employer as a condition of his employment (as defined in paragraph (b) of this section), the exclusion applies to the value of any meal furnished without charge to the employee on such premises.

(ii)(a) Meals will be regarded as furnished for a substantial noncompensatory business reason of the employer when the meals are furnished to the employee during his working hours to have the employee available for emergency call during his meal period. In order to demonstrate that meals are furnished to the employee to have the employee available for emergency call during the meal period, it must be shown that emergencies have actually occurred, or can reasonably be expected to occur, in the employer's business which have resulted, or will re-

sult, in the employer calling on the employee to perform his job during his meal period.

(b) Meals will be regarded as furnished for a substantial noncompensatory business reason of the employer when the meals are furnished to the employee during his working hours because the employer's business is such that the employee must be restricted to a short meal period, such as 30 or 45 minutes, and because the employee could not be expected to eat elsewhere in such a short meal period. For example, meals may qualify under this subdivision when the employer is engaged in a business in which the peak work load occurs during the normal lunch hours. However, meals cannot qualify under this subdivision (b) when the reason for restricting the time of the meal period is so that the employee can be let off earlier in the day.

(c) Meals will be regarded as furnished for a substantial noncompensatory business reason of the employer when the meals are furnished to the employee during his working hours because the employee could not otherwise secure proper meals within a reasonable meal period. For example, meals may qualify under this subdivision (c) when there are insufficient eating facilities in the vicinity of the employer's premises.

(d) A meal furnished to a restaurant employee or other food service employee for each meal period in which the employee works will be regarded as furnished for a substantial noncompensatory business reason of the employer, irrespective of whether the meal is furnished during, immediately before, or immediately after the working hours of the employee.

(e) If the employer furnishes meals to employees at a place of business and the reason for furnishing the meals to each of substantially all of the employees who are furnished the meals is a substantial noncompensatory business reason of the employer, the meals furnished to each other employee will also be regarded as furnished for a substantial noncompensatory business reason of the employer.

(f) If an employer would have furnished a meal to an employee during his working hours for a substantial

noncompensatory business reason, a meal furnished to such an employee immediately after his working hours because his duties prevented him from obtaining a meal during his working hours will be regarded as furnished for a substantial noncompensatory business reason.

(iii) Meals will be regarded as furnished for a compensatory business reason of the employer when the meals are furnished to the employee to promote the morale or goodwill of the employee, or to attract prospective employees.

(3) *Meals furnished with a charge.* (i) If an employer provides meals which an employee may or may not purchase, the meals will not be regarded as furnished for the convenience of the employer. Thus, meals for which a charge is made by the employer will not be regarded as furnished for the convenience of the employer if the employee has a choice of accepting the meals and paying for them or of not paying for them and providing his meals in another manner.

(ii) If an employer furnishes an employee meals for which the employee is charged an unvarying amount (for example, by subtraction from his stated compensation) irrespective of whether he accepts the meals, the amount of such flat charge made by the employer for such meals is not, as such, part of the compensation includible in the gross income of the employee; whether the value of the meals so furnished is excludable under section 119 is determined by applying the rules of subparagraph (2) of this paragraph. If meals furnished for an unvarying amount are not furnished for the convenience of the employer in accordance with the rules of subparagraph (2) of this paragraph, the employee shall include in gross income the value of the meals regardless of whether the value exceeds or is less than the amount charged for such meals. In the absence of evidence to the contrary, the value of the meals may be deemed to be equal to the amount charged for them.

(b) *Lodging.* The value of lodging furnished to an employee by the employer shall be excluded from the employee's gross income if three tests are met:

(1) The lodging is furnished on the business premises of the employer,

(2) The lodging is furnished for the convenience of the employer, and

(3) The employee is required to accept such lodging as a condition of his employment.

The requirement of subparagraph (3) of this paragraph that the employee is required to accept such lodging as a condition of his employment means that he be required to accept the lodging in order to enable him properly to perform the duties of his employment. Lodging will be regarded as furnished to enable the employee properly to perform the duties of his employment when, for example, the lodging is furnished because the employee is required to be available for duty at all times or because the employee could not perform the services required of him unless he is furnished such lodging. If the tests described in subparagraphs (1), (2), and (3) of this paragraph are met, the exclusion shall apply irrespective of whether a charge is made, or whether, under an employment contract or statute fixing the terms of employment, such lodging is furnished as compensation. If the employer furnishes the employee lodging for which the employee is charged an unvarying amount irrespective of whether he accepts the lodging, the amount of the charge made by the employer for such lodging is not, as such, part of the compensation includible in the gross income of the employee; whether the value of the lodging is excludable from gross income under section 119 is determined by applying the other rules of this paragraph. If the tests described in subparagraph (1), (2), and (3) of this paragraph are not met, the employee shall include in gross income the value of the lodging regardless of whether it exceeds or is less than the amount charged. In the absence of evidence to the contrary, the value of the lodging may be deemed to be equal to the amount charged.

(c) *Business premises of the employer—*

(1) *In general.* For purposes of this section, the term "business premises of the employer" generally means the place of employment of the employee.

For example, meals and lodging furnished in the employer's home to a domestic servant would constitute meals and lodging furnished on the business premises of the employer. Similarly, meals furnished to cowhands while herding their employer's cattle on leased land would be regarded as furnished on the business premises of the employer.

(2) *Certain camps.* For taxable years beginning after December 31, 1981, in the case of an individual who is furnished lodging by or on behalf of his employer in a camp (as defined in paragraph (d) of this section) in a foreign country (as defined in §1.911-2(h)), the camp shall be considered to be part of the business premises of the employer.

(d) *Camp defined*—(1) *In general.* For the purposes of paragraph (c)(2) of this section, a camp is lodging that is all of the following:

(i) Provided by or on behalf of the employer for the convenience of the employer because the place at which the employee renders services is in a remote area where satisfactory housing is not available to the employee on the open market within a reasonable commuting distance of that place;

(ii) Located, as near as practicable, in the vicinity of the place at which the employee renders services; and

(iii) Furnished in a common area or enclave which is not available to the general public for lodging or accommodations and which normally accommodates ten or more employees.

(2) *Satisfactory housing.* For purposes of paragraph (d)(1)(i) of this section, facts and circumstances that may be relevant in determining whether housing available to the employee is satisfactory include, but are not limited to, the size and condition of living space and the availability and quality of utilities such as water, sewers or other waste disposal facilities, electricity, or heat. The general environment in which housing is located (e.g., climate, prevalence of insects, etc.) does not of itself make housing unsatisfactory. The general environment is relevant, however, if housing is inadequate to protect the occupants from environmental conditions. The individual employee's income level is not relevant in determining whether housing is satis-

factory; it may, however, be relevant in determining whether satisfactory housing is available to the employee (see paragraph (d)(3)(i)(B) of this section).

(3) *Availability of satisfactory housing*—(i) *Facts and circumstances.* For purposes of paragraph (d)(1)(i) of this section, facts and circumstances to be considered in determining whether satisfactory housing is available to the employee on the open market include but are not limited to:

(A) The number of housing units available on the open market in relation to the number of housing units required for the employer's employees;

(B) The cost of housing available on the open market;

(C) The quality of housing available on the open market; and

(D) The presence of warfare or civil insurrection within the area where housing would be available which would subject U.S. citizens to unusual risk of personal harm or property loss.

(ii) *Presumptions.* Satisfactory housing will generally be considered to be unavailable to the employee on the open market if either of the following conditions is satisfied:

(A) The foreign government requires the employer to provide housing for its employees other than housing available on the open market; or

(B) An unrelated person awarding work to the employer requires that the employer's employees occupy housing specified by such unrelated person.

The condition of either paragraph (d)(3)(ii) (A) or (B) of this section is not satisfied if the requirement described therein and imposed either by a foreign government or unrelated person applies primarily to U.S. employers and not to a significant number of third country employers or applies primarily to employers of U.S. employees and not to a significant number of employers of third country employees.

(4) *Reasonable commuting distance.* For purposes of paragraph (d)(1)(i) of this section, in determining whether a commuting distance is reasonable, the accessibility of the place at which the employee renders services due to geographic factors, the quality of the roads, the customarily available transportation, and the usual travel time (at

the time of day such travel would be required) to the place at which the employee renders services shall be taken into account.

(5) *Common area or enclave.* A cluster of housing units does not satisfy paragraph (d)(1)(iii) of this section if it is adjacent to or surrounded by substantially similar housing available to the general public. Two or more common areas or enclaves that house employees who work on the same project (for example, a highway project) are considered to be one common area or enclave in determining whether they normally accommodate ten or more employees.

(e) *Rules.* The exclusion provided by section 119 applies only to meals and lodging furnished in kind by or on behalf of an employer to his employee. If the employee has an option to receive additional compensation in lieu of meals or lodging in kind, the value of such meals and lodging is not excludable from gross income under section 119. However, the mere fact that an employee, at his option, may decline to accept meals tendered in kind will not of itself require inclusion of the value thereof in gross income. Cash allowances for meals or lodging received by an employee are includible in gross income to the extent that such allowances constitute compensation.

(f) *Examples.* The provisions of section 119 may be illustrated by the following examples:

*Example (1).* A waitress who works from 7 a.m. to 4 p.m. is furnished without charge two meals a work day. The employer encourages the waitress to have her breakfast on his business premises before starting work, but does not require her to have breakfast there. She is required, however, to have her lunch on such premises. Since the waitress is a food service employee and works during the normal breakfast and lunch periods, the waitress is permitted to exclude from her gross income both the value of the breakfast and the value of the lunch.

*Example (2).* The waitress in example (1) is allowed to have meals on the employer's premises without charge on her days off. The waitress is not permitted to exclude the value of such meals from her gross income.

*Example (3).* A bank teller who works from 9 a.m. to 5 p.m. is furnished his lunch without charge in a cafeteria which the bank maintains on its premises. The bank furnishes the teller such meals in order to limit his lunch period to 30 minutes since the

bank's peak work load occurs during the normal lunch period. If the teller had to obtain his lunch elsewhere, it would take him considerably longer than 30 minutes for lunch, and the bank strictly enforces the 30-minute time limit. The bank teller may exclude from his gross income the value of such meals obtained in the bank cafeteria.

*Example (4).* Assume the same facts as in example (3), except that the bank charges the bank teller an unvarying rate per meal regardless of whether he eats in the cafeteria. The bank teller is not required to include in gross income such flat amount charged as part of his compensation, and he is entitled to exclude from his gross income the value of the meals he receives for such flat charge.

*Example (5).* A Civil Service employee of a State is employed at an institution and is required by his employer to be available for duty at all times. The employer furnishes the employee with meals and lodging at the institution without charge. Under the applicable State statute, his meals and lodging are regarded as part of the employee's compensation. The employee would nevertheless be entitled to exclude the value of such meals and lodging from his gross income.

*Example (6).* An employee of an institution is given the choice of residing at the institution free of charge, or of residing elsewhere and receiving a cash allowance in addition to his regular salary. If he elects to reside at the institution, the value to the employee of the lodging furnished by the employer will be includible in the employee's gross income because his residence at the institution is not required in order for him to perform properly the duties of his employment.

*Example (7).* A construction worker is employed at a construction project at a remote job site in Alaska. Due to the inaccessibility of facilities for the employees who are working at the job site to obtain food and lodging and the prevailing weather conditions, the employer is required to furnish meals and lodging to the employee at the camp site in order to carry on the construction project. The employee is required to pay \$40 a week for the meals and lodging. The weekly charge of \$40 is not, as such, part of the compensation includible in the gross income of the employee, and under paragraphs (a) and (b) of this section the value of the meals and lodging is excludable from his gross income.

*Example (8).* A manufacturing company provides a cafeteria on its premises at which its employees can purchase their lunch. There is no other eating facility located near the company's premises, but the employee can furnish his own meal by bringing his lunch. The amount of compensation which any employee is required to include in gross income is not reduced by the amount charged for the meals, and the meals are not

considered to be furnished for the convenience of the employer.

*Example (9).* A hospital maintains a cafeteria on its premises where all of its 230 employees may obtain a meal during their working hours. No charge is made for these meals. The hospital furnishes such meals in order to have each of 210 of the employees available for any emergencies that may occur, and it is shown that each such employee is at times called upon to perform services during his meal period. Although the hospital does not require such employees to remain on the premises during meal periods, they rarely leave the hospital during their meal period. Since the hospital furnishes meals to each of substantially all of its employees in order to have each of them available for emergency call during his meal period, all of the hospital employees who obtain their meals in the hospital cafeteria may exclude from their gross income the value of such meals.

[T.D. 6745, 29 FR 9380, July 9, 1964, as amended by T.D. 8006, 50 FR 2964, Jan. 23, 1985]

**§ 1.120-1 Statutory subsistence allowance received by police.**

(a) Section 120 excludes from the gross income of an individual employed as a police official by a State, Territory, or possession of the United States, by any of their political subdivisions, or by the District of Columbia, any amount received as a statutory subsistence allowance to the extent that such allowance does not exceed \$5 per day. For purposes of this section, the term "statutory subsistence allowance" means an amount which is designated as a subsistence allowance under the laws of a State, a Territory, or a possession of the United States, any political subdivision of any of the foregoing, or the District of Columbia and which is paid to an individual who is employed as a police official of such governmental unit. A subsistence allowance paid to a police official by any of the foregoing governmental units which is not so provided by statute may not be excluded from gross income under the provisions of section 120. The term "police official" includes an employee of any of the foregoing governmental units who has police duties, such as a sheriff, a detective, a policeman, or a State police trooper, however designated.

(b) The exclusion provided by section 120 is to be computed on a daily basis, that is, for each day for which the stat-

utory allowance is paid. If the statute providing the allowance does not specify the daily amount of such allowance, the allowance shall be converted to a daily basis for the purpose of applying the limitation provided herein. For example, if a State statute provides for a weekly subsistence allowance, the daily amount is to be determined by dividing the weekly amount by the number of days for which the allowance is paid. Thus, if a State trooper receives a weekly statutory subsistence allowance of \$40 would be \$8, that is, \$40 divided by 5 for 5 days of the week, the daily amount would be \$8, that is, \$40 divided by 5. However, for purposes of this section, only \$5 per day may be excluded, or \$25 on a weekly basis.

(c) Expenses in respect of which the allowance under section 120 is paid may not be deducted under any provision of the income tax laws except to the extent that (1) such expenses exceed the amount of the exclusion, and (2) the excess is otherwise allowable as a deduction. For example, if a State statute provides a subsistence allowance of \$3 per day and the taxpayer, a state trooper, incurs expenditures of \$4.50 for meals while away from home overnight on official police duties only \$3 would be excludable under this section. Expenses relating to such exclusion (\$3) may not be deducted under any provision of the income tax laws. However, the remaining \$1.50 may be an allowable deduction under section 162 as traveling expenses while away from home in the performance of official duties. See § 1.162-2.

(d) In the case of taxable years ending after September 30, 1958, section 120 and this section do not apply to amounts received as a statutory subsistence allowance for any day after September 30, 1958.

**§ 1.120-3 Notice of application for recognition of status of qualified group legal services plan.**

(a) *In general.* In order for a plan to be a qualified group legal services plan for purposes of the exclusion from gross income provided by section 120(a), the plan must give notice to the Internal Revenue Service that it is applying for recognition of its status as a qualified plan. Paragraph (b) of this

section describes how the notice is to be filed for the plan. Paragraph (c) of this section describes the action that the Internal Revenue Service will take in response to the notice submitted for the plan. Paragraph (d) of this section describes the period of plan qualification.

(b) *Filing of notice*—(1) *In general.* A notice of application for recognition of the status of a qualified group legal services plan must be filed with the key district director of internal revenue as described in § 601.201(n). The notice must be filed on Form 1024, Application for Recognition of Exemption Under section 501(a) or for Determination Under section 120, with the accompanying Schedule L, and must contain the information required by the form and any accompanying instructions. The form may be filed by either the employer adopting the plan or the person administering the plan. No Form 1024 and Schedule L may be filed for a plan before an employer adopts the plan, or proposes to adopt the plan contingent only upon the recognition of the plan as a qualified plan.

(2) *Plans to which more than one employer contributes.* In general, for purposes of section 120 the adoption of a plan by an employer constitutes the adoption of a separate plan to which that employer alone contributes, notwithstanding that, in form, the employer purports to adopt a plan with respect to which the employer is one of two or more contributing employers. Accordingly, a separate Schedule L must be filed pursuant to the instructions accompanying Form 1024 for each employer adopting a plan.

(3) *Certain collectively bargained plans.* Notwithstanding subparagraph (2) of this paragraph, if a plan to which more than one employer contributes is a plan to which this subparagraph (3) applies, the plan is treated as a single plan for purposes of section 120. Accordingly, only one Form 1024 and Schedule L is required to be filed for the plan, regardless of the number of employers originally adopting the plan. In addition, once a Form 1024 and Schedule L is filed, no additional filing is required with respect to an employer who thereafter adopts the plan. In general, this subparagraph (3) applies to

any plan that is maintained pursuant to a collective bargaining agreement between employee representatives and more than one employer who is required by the plan instrument or other agreement to contribute to the plan with respect to employees (or their spouses or dependents) participating in the plan. This subparagraph does not apply, however, if all employers required to contribute to the plan are corporations which are members of a controlled group of corporations within the meaning of section 1563(a), determined without regard to section 1563(e)(3)(C). If all employers required to contribute to the plan are corporations which are members of such a controlled group, the filing requirements described in subparagraph (2) of this paragraph apply, notwithstanding that the plan is maintained pursuant to a collective bargaining agreement.

(c) *Internal Revenue Service action on notice of application for recognition.* The Internal Revenue Service will issue to the person submitting Form 1024 and Schedule L a ruling or determination letter stating that the plan is or is not a qualified group legal services plan. For general procedural rules, see § 601.201 (a) through (n), as that section relates to rulings and determination letters.

(d) *Period of plan qualification*—(1) *In general.* In the case of a favorable determination, the plan will be considered a qualified group legal services plan. If a Form 1024 and Schedule L required to be filed by or on behalf of an employer is filed before—

- (i) The end of the first plan year (as determined under the plan),
- (ii) The end of the plan year within which the employer adopts the plan, or
- (iii) July 29, 1980.

the period of plan qualification with respect to the employer will begin on the date the plan is adopted by the employer (or, if later, January 1, 1977). If the form and schedule are not filed before the latest of the dates described in subdivisions (i), (ii) and (iii), the period of plan qualification with respect to the employer will begin on the date of filing. In any case in which either the Form 1024 or Schedule L filed by or on behalf of an employer is incomplete, the date of filing is the date on which

the incomplete form or schedule is filed, if the necessary additional information is provided at the request of the Commissioner within the additional time period allowed by the Commissioner. If the additional information is not provided within the additional time period, allowed, the date of filing is the date on which the additional information is filed. If no separate Form 1024 and Schedule L are required to be filed by or on behalf of an employer (see paragraph (b)(3) of this section), the period of plan qualification with respect to the employer will begin on the date the plan is adopted by the employer (or, if later, January 1, 1977). In any case in which a plan is materially modified to conform to the requirements of section 120, either before or after a Form 1024 and Schedule L are filed, the period of plan qualification will not include any period before the effective date of the modification.

(2) *Plans in existence on June 4, 1976.*

(i) Notwithstanding paragraph (d)(1) of this section, a written group legal services plan providing for employer contributions which was in existence on June 4, 1976, will be considered a qualified group legal services plan for the period January 1, 1977, through April 2, 1977. However, if the plan is maintained pursuant to one or more agreements which were in effect on October 4, 1976, and which the Secretary of Labor finds to be collective bargaining agreements, the period of deemed qualification will extend beyond April 2, 1977, and end on the date on which the last of the collective bargaining agreements relating to the plan terminates. Extensions of a bargaining agreement which are agreed to after October 4, 1976, are to be disregarded. The period of deemed qualification for a plan maintained pursuant to a collective bargaining agreement will not, however, extend beyond December 31, 1981.

(ii) A written group legal services plan will be considered to have been in existence on June 4, 1976, if on or before that date the plan was reduced to writing and adopted by one or more employers. No amounts need have been contributed under the plan as of June 4, 1976.

(iii) Notwithstanding that a plan is a qualified plan for the period of deemed

qualification described in this paragraph (d)(2), the rules of paragraphs (c) and (d)(1) of this section still apply with respect to a Form 1024 and Schedule L filed for the plan. For example, if a Form 1024 and Schedule L filed by or on behalf of an employer are filed before the latest of the 3 dates described in paragraph (d)(1) of this section, in the case of a favorable determination the plan will be a qualified plan from the date the plan is adopted by the employer (or, if later, January 1, 1977), and any period of deemed qualification and the period of qualification based upon the favorable determination will overlap. However, in the case of a plan to which this paragraph (d)(2) applies, if a Form 1024 and Schedule L required to be filed by or on behalf of an employer is not filed before the latest of the 3 dates described in paragraph (d)(1) of this section, the following rules shall apply. In general, if Form 1024 and Schedule L are filed before the end of the plan year following the plan year with or within which the plan's period of deemed qualification expires, in the event of a favorable determination the plan will be a qualified plan with respect to the employer beginning on the earlier of the day following the date on which the period of deemed qualification expires or the date on which the Form 1024 and Schedule L are filed. The period of plan qualification with respect to an employer cannot, however, include any period before the employer adopts the plan. If the Form 1024 and Schedule L are not filed before the end of the plan year following the plan year with or within which the plan's period of deemed qualification expires, in the case of a favorable determination the plan will be a qualified plan with respect to an employer from the later of the date of filing or adoption of the plan by the employer. The rules described in paragraph (d)(1) of this section relating to incomplete filings and plan modifications apply with respect to a filing described in this paragraph (d)(2).

(e) *Effective date.* This section is effective for notices of application for recognition of the status of a qualified

## § 1.121-1

## 26 CFR Ch. I (4-1-06 Edition)

group legal services plan filed after May 29, 1980.

(Secs. 120(c)(4) and 7805 of the Internal Revenue Code of 1954, 90 Stat. 1926, 68A Stat. 917; (26 U.S.C. 120(c)(4), 7805))

[T.D. 7696, 45 FR 28320, Apr. 29, 1980]

### § 1.121-1 Exclusion of gain from sale or exchange of a principal residence.

(a) *In general.* Section 121 provides that, under certain circumstances, gross income does not include gain realized on the sale or exchange of property that was owned and used by a taxpayer as the taxpayer's principal residence. Subject to the other provisions of section 121, a taxpayer may exclude gain only if, during the 5-year period ending on the date of the sale or exchange, the taxpayer owned and used the property as the taxpayer's principal residence for periods aggregating 2 years or more.

(b) *Residence*—(1) *In general.* Whether property is used by the taxpayer as the taxpayer's residence depends upon all the facts and circumstances. A property used by the taxpayer as the taxpayer's residence may include a houseboat, a house trailer, or the house or apartment that the taxpayer is entitled to occupy as a tenant-stockholder in a cooperative housing corporation (as those terms are defined in section 216(b)(1) and (2)). Property used by the taxpayer as the taxpayer's residence does not include personal property that is not a fixture under local law.

(2) *Principal residence.* In the case of a taxpayer using more than one property as a residence, whether property is used by the taxpayer as the taxpayer's principal residence depends upon all the facts and circumstances. If a taxpayer alternates between 2 properties, using each as a residence for successive periods of time, the property that the taxpayer uses a majority of the time during the year ordinarily will be considered the taxpayer's principal residence. In addition to the taxpayer's use of the property, relevant factors in determining a taxpayer's principal residence, include, but are not limited to—

- (i) The taxpayer's place of employment;
- (ii) The principal place of abode of the taxpayer's family members;

(iii) The address listed on the taxpayer's federal and state tax returns, driver's license, automobile registration, and voter registration card;

(iv) The taxpayer's mailing address for bills and correspondence;

(v) The location of the taxpayer's banks; and

(vi) The location of religious organizations and recreational clubs with which the taxpayer is affiliated.

(3) *Vacant land*—(i) *In general.* The sale or exchange of vacant land is not a sale or exchange of the taxpayer's principal residence unless—

(A) The vacant land is adjacent to land containing the dwelling unit of the taxpayer's principal residence;

(B) The taxpayer owned and used the vacant land as part of the taxpayer's principal residence;

(C) The taxpayer sells or exchanges the dwelling unit in a sale or exchange that meets the requirements of section 121 within 2 years before or 2 years after the date of the sale or exchange of the vacant land; and

(D) The requirements of section 121 have otherwise been met with respect to the vacant land.

(ii) *Limitations*—(A) *Maximum limitation amount.* For purposes of section 121(b)(1) and (2) (relating to the maximum limitation amount of the section 121 exclusion), the sale or exchange of the dwelling unit and the vacant land are treated as one sale or exchange. Therefore, only one maximum limitation amount of \$250,000 (\$500,000 for certain joint returns) applies to the combined sales or exchanges of vacant land and the dwelling unit. In applying the maximum limitation amount to sales or exchanges that occur in different taxable years, gain from the sale or exchange of the dwelling unit, up to the maximum limitation amount under section 121(b)(1) or (2), is excluded first and each spouse is treated as excluding one-half of the gain from a sale or exchange to which section 121(b)(2)(A) and § 1.121-2(a)(3)(i) (relating to the limitation for certain joint returns) apply.

(B) *Sale or exchange of more than one principal residence in 2-year period.* If a dwelling unit and vacant land are sold or exchanged in separate transactions

that qualify for the section 121 exclusion under this paragraph (b)(3), each of the transactions is disregarded in applying section 121(b)(3) (restricting the application of section 121 to only 1 sale or exchange every 2 years) to the other transactions but is taken into account as a sale or exchange of a principal residence on the date of the transaction in applying section 121(b)(3) to that transaction and the sale or exchange of any other principal residence.

(C) *Sale or exchange of vacant land before dwelling unit.* If the sale or exchange of the dwelling unit occurs in a later taxable year than the sale or exchange of the vacant land and after the date prescribed by law (including extensions) for the filing of the return for the taxable year of the sale or exchange of the vacant land, any gain from the sale or exchange of the vacant land must be treated as taxable on the taxpayer's return for the taxable year of the sale or exchange of the vacant land. If the taxpayer has reported gain from the sale or exchange of the vacant land as taxable, after satisfying the requirements of this paragraph (b)(3) the taxpayer may claim the section 121 exclusion with regard to the sale or exchange of the vacant land (for any period for which the period of limitation under section 6511 has not expired) by filing an amended return.

(4) *Examples.* The provisions of this paragraph (b) are illustrated by the following examples:

*Example 1.* Taxpayer A owns 2 residences, one in New York and one in Florida. From 1999 through 2004, he lives in the New York residence for 7 months and the Florida residence for 5 months of each year. In the absence of facts and circumstances indicating otherwise, the New York residence is A's principal residence. A would be eligible for the section 121 exclusion of gain from the sale or exchange of the New York residence, but not the Florida residence.

*Example 2.* Taxpayer B owns 2 residences, one in Virginia and one in Maine. During 1999 and 2000, she lives in the Virginia residence. During 2001 and 2002, she lives in the Maine residence. During 2003, she lives in the Virginia residence. B's principal residence during 1999, 2000, and 2003 is the Virginia residence. B's principal residence during 2001 and 2002 is the Maine residence. B would be eligible for the 121 exclusion of gain from the

sale or exchange of either residence (but not both) during 2003.

*Example 3.* In 1991 Taxpayer C buys property consisting of a house and 10 acres that she uses as her principal residence. In May 2005 C sells 8 acres of the land and realizes a gain of \$110,000. C does not sell the dwelling unit before the due date for filing C's 2005 return, therefore C is not eligible to exclude the \$110,000 of gain. In March 2007 C sells the house and remaining 2 acres realizing a gain of \$180,000 from the sale of the house. C may exclude the \$180,000 of gain. Because the sale of the 8 acres occurred within 2 years from the date of the sale of the dwelling unit, the sale of the 8 acres is treated as a sale of the taxpayer's principal residence under paragraph (b)(3) of this section. C may file an amended return for 2005 to claim an exclusion for \$70,000 (\$250,000-\$180,000 gain previously excluded) of the \$110,000 gain from the sale of the 8 acres.

*Example 4.* In 1998 Taxpayer D buys a house and 1 acre that he uses as his principal residence. In 1999 D buys 29 acres adjacent to his house and uses the vacant land as part of his principal residence. In 2003 D sells the house and 1 acre and the 29 acres in 2 separate transactions. D sells the house and 1 acre at a loss of \$25,000. D realizes \$270,000 of gain from the sale of the 29 acres. D may exclude the \$245,000 gain from the 2 sales.

(c) *Ownership and use requirements—*  
(1) *In general.* The requirements of ownership and use for periods aggregating 2 years or more may be satisfied by establishing ownership and use for 24 full months or for 730 days (365 × 2). The requirements of ownership and use may be satisfied during nonconcurrent periods if both the ownership and use tests are met during the 5-year period ending on the date of the sale or exchange.

(2) *Use.* (i) In establishing whether a taxpayer has satisfied the 2-year use requirement, occupancy of the residence is required. However, short temporary absences, such as for vacation or other seasonal absence (although accompanied with rental of the residence), are counted as periods of use.

(ii) *Determination of use during periods of out-of-residence care.* If a taxpayer has become physically or mentally incapable of self-care and the taxpayer sells or exchanges property that the taxpayer owned and used as the taxpayer's principal residence for periods aggregating at least 1 year during the 5-year period preceding the sale or exchange, the taxpayer is treated as using the property as the taxpayer's

principal residence for any period of time during the 5-year period in which the taxpayer owns the property and resides in any facility (including a nursing home) licensed by a State or political subdivision to care for an individual in the taxpayer's condition.

(3) *Ownership*—(i) *Trusts*. If a residence is owned by a trust, for the period that a taxpayer is treated under sections 671 through 679 (relating to the treatment of grantors and others as substantial owners) as the owner of the trust or the portion of the trust that includes the residence, the taxpayer will be treated as owning the residence for purposes of satisfying the 2-year ownership requirement of section 121, and the sale or exchange by the trust will be treated as if made by the taxpayer.

(ii) *Certain single owner entities*. If a residence is owned by an eligible entity (within the meaning of § 301.7701-3(a) of this chapter) that has a single owner and is disregarded for federal tax purposes as an entity separate from its owner under § 301.7701-3 of this chapter, the owner will be treated as owning the residence for purposes of satisfying the 2-year ownership requirement of section 121, and the sale or exchange by the entity will be treated as if made by the owner.

(4) *Examples*. The provisions of this paragraph (c) are illustrated by the following examples. The examples assume that § 1.121-3 (relating to the reduced maximum exclusion) does not apply to the sale of the property. The examples are as follows:

*Example 1.* Taxpayer A has owned and used his house as his principal residence since 1986. On January 31, 1998, A moves to another state. A rents his house to tenants from that date until April 18, 2000, when he sells it. A is eligible for the section 121 exclusion because he has owned and used the house as his principal residence for at least 2 of the 5 years preceding the sale.

*Example 2.* Taxpayer B owns and uses a house as her principal residence from 1986 to the end of 1997. On January 4, 1998, B moves to another state and ceases to use the house. B's son moves into the house in March 1999 and uses the residence until it is sold on July 1, 2001. B may not exclude gain from the sale under section 121 because she did not use the property as her principal residence for at least 2 years out of the 5 years preceding the sale.

*Example 3.* Taxpayer C lives in a townhouse that he rents from 1993 through 1996. On January 18, 1997, he purchases the townhouse. On February 1, 1998, C moves into his daughter's home. On May 25, 2000, while still living in his daughter's home, C sells his townhouse. The section 121 exclusion will apply to gain from the sale because C owned the townhouse for at least 2 years out of the 5 years preceding the sale (from January 19, 1997 until May 25, 2000) and he used the townhouse as his principal residence for at least 2 years during the 5-year period preceding the sale (from May 25, 1995 until February 1, 1998).

*Example 4.* Taxpayer D, a college professor, purchases and moves into a house on May 1, 1997. He uses the house as his principal residence continuously until September 1, 1998, when he goes abroad for a 1-year sabbatical leave. On October 1, 1999, 1 month after returning from the leave, D sells the house. Because his leave is not considered to be a short temporary absence under paragraph (c)(2) of this section, the period of the sabbatical leave may not be included in determining whether D used the house for periods aggregating 2 years during the 5-year period ending on the date of the sale. Consequently, D is not entitled to exclude gain under section 121 because he did not use the residence for the requisite period.

*Example 5.* Taxpayer E purchases a house on February 1, 1998, that he uses as his principal residence. During 1998 and 1999, E leaves his residence for a 2-month summer vacation. E sells the house on March 1, 2000. Although, in the 5-year period preceding the date of sale, the total time E used his residence is less than 2 years (21 months), the section 121 exclusion will apply to gain from the sale of the residence because, under paragraph (c)(2) of this section, the 2-month vacations are short temporary absences and are counted as periods of use in determining whether E used the residence for the requisite period.

(d) *Depreciation taken after May 6, 1997*—(1) *In general*. The section 121 exclusion does not apply to so much of the gain from the sale or exchange of property as does not exceed the portion of the depreciation adjustments (as defined in section 1250(b)(3)) attributable to the property for periods after May 6, 1997. Depreciation adjustments allocable to any portion of the property to which the section 121 exclusion does not apply under paragraph (e) of this section are not taken into account for this purpose.

(2) *Example*. The provisions of this paragraph (d) are illustrated by the following example:

*Example.* On July 1, 1999, Taxpayer A moves into a house that he owns and had rented to tenants since July 1, 1997. A took depreciation deductions totaling \$14,000 for the period that he rented the property. After using the residence as his principal residence for 2 full years, A sells the property on August 1, 2001. A's gain realized from the sale is \$40,000. A has no other section 1231 or capital gains or losses for 2001. Only \$26,000 (\$40,000 gain realized—\$14,000 depreciation deductions) may be excluded under section 121. Under section 121(d)(6) and paragraph (d)(1) of this section, A must recognize \$14,000 of the gain as unrecaptured section 1250 gain within the meaning of section 1(h).

(e) *Property used in part as a principal residence*—(1) *Allocation required.* Section 121 will not apply to the gain allocable to any portion (separate from the dwelling unit) of property sold or exchanged with respect to which a taxpayer does not satisfy the use requirement. Thus, if a portion of the property was used for residential purposes and a portion of the property (separate from the dwelling unit) was used for non-residential purposes, only the gain allocable to the residential portion is excludable under section 121. No allocation is required if both the residential and non-residential portions of the property are within the same dwelling unit. However, section 121 does not apply to the gain allocable to the residential portion of the property to the extent provided by paragraph (d) of this section.

(2) *Dwelling unit.* For purposes of this paragraph (e), the term *dwelling unit* has the same meaning as in section 280A(f)(1), but does not include appurtenant structures or other property.

(3) *Method of allocation.* For purposes of determining the amount of gain allocable to the residential and non-residential portions of the property, the taxpayer must allocate the basis and the amount realized between the residential and the non-residential portions of the property using the same method of allocation that the taxpayer used to determine depreciation adjustments (as defined in section 1250(b)(3)), if applicable.

(4) *Examples.* The provisions of this paragraph (e) are illustrated by the following examples:

*Example 1. Non-residential use of property not within the dwelling unit.* (i) Taxpayer A owns

a property that consists of a house, a stable and 35 acres. A uses the stable and 28 acres for non-residential purposes for more than 3 years during the 5-year period preceding the sale. A uses the entire house and the remaining 7 acres as his principal residence for at least 2 years during the 5-year period preceding the sale. For periods after May 6, 1997, A claims depreciation deductions of \$9,000 for the non-residential use of the stable. A sells the entire property in 2004, realizing a gain of \$24,000. A has no other section 1231 or capital gains or losses for 2004.

(ii) Because the stable and the 28 acres used in the business are separate from the dwelling unit, the allocation rules under this paragraph (e) apply and A must allocate the basis and amount realized between the portion of the property that he used as his principal residence and the portion of the property that he used for non-residential purposes. A determines that \$14,000 of the gain is allocable to the non-residential-use portion of the property and that \$10,000 of the gain is allocable to the portion of the property used as his residence. A must recognize the \$14,000 of gain allocable to the non-residential-use portion of the property (\$9,000 of which is unrecaptured section 1250 gain within the meaning of section 1(h), and \$5,000 of which is adjusted net capital gain). A may exclude \$10,000 of the gain from the sale of the property.

*Example 2. Non-residential use of property not within the dwelling unit and rental of the entire property.* (i) In 1998 Taxpayer B buys a property that includes a house, a barn, and 2 acres. B uses the house and 2 acres as her principal residence and the barn for an antiques business. In 2002, B moves out of the house and rents it to tenants. B sells the property in 2004, realizing a gain of \$21,000. Between 1998 and 2004 B claims depreciation deductions of \$4,800 attributable to the antiques business. Between 2002 and 2004 B claims depreciation deductions of \$3,000 attributable to the house. B has no other section 1231 or capital gains or losses for 2004.

(ii) Because the portion of the property used in the antiques business is separate from the dwelling unit, the allocation rules under this paragraph (e) apply. B must allocate basis and amount realized between the portion of the property that she used as her principal residence and the portion of the property that she used for non-residential purposes. B determines that \$4,000 of the gain is allocable to the non-residential portion of the property and that \$17,000 of the gain is allocable to the portion of the property that she used as her principal residence.

(iii) B must recognize the \$4,000 of gain allocable to the non-residential portion of the property (all of which is unrecaptured section 1250 gain within the meaning of section 1(h)). In addition, the section 121 exclusion does not apply to the gain allocable to the

residential portion of the property to the extent of the depreciation adjustments attributable to the residential portion of the property for periods after May 6, 1997 (\$3,000). Therefore, B may exclude \$14,000 of the gain from the sale of the property.

*Example 3. Non-residential use of a separate dwelling unit.* (i) In 2002 Taxpayer C buys a 3-story townhouse and converts the basement level, which has a separate entrance, into a separate apartment by installing a kitchen and bathroom and removing the interior stairway that leads from the basement to the upper floors. After the conversion, the property constitutes 2 dwelling units within the meaning of paragraph (e)(2) of this section. C uses the first and second floors of the townhouse as his principal residence and rents the basement level to tenants from 2003 to 2007. C claims depreciation deductions of \$2,000 for that period with respect to the basement apartment. C sells the entire property in 2007, realizing gain of \$18,000. C has no other section 1231 or capital gains or losses for 2007.

(ii) Because the basement apartment and the upper floors of the townhouse are separate dwelling units, C must allocate the gain between the portion of the property that he used as his principal residence and the portion of the property that he used for non-residential purposes under paragraph (e) of this section. After allocating the basis and the amount realized between the residential and non-residential portions of the property, C determines that \$6,000 of the gain is allocable to the non-residential portion of the property and that \$12,000 of the gain is allocable to the portion of the property used as his residence. C must recognize the \$6,000 of gain allocable to the non-residential portion of the property (\$2,000 of which is unrecaptured section 1250 gain within the meaning of section 1(h), and \$4,000 of which is adjusted net capital gain). C may exclude \$12,000 of the gain from the sale of the property.

*Example 4. Separate dwelling unit converted to residential use.* The facts are the same as in *Example 3* except that in 2007 C incorporates the basement of the townhouse into his principal residence by eliminating the kitchen and building a new interior stairway to the upper floors. C uses all 3 floors of the townhouse as his principal residence for 2 full years and sells the townhouse in 2010, realizing a gain of \$20,000. Under section 121(d)(6) and paragraph (d) of this section, C must recognize \$2,000 of the gain as unrecaptured section 1250 gain within the meaning of section 1(h). Because C used the entire 3 floors of the townhouse as his principal residence for 2 of the 5 years preceding the sale of the property, C may exclude the remaining \$18,000 of the gain from the sale of the house.

*Example 5. Non-residential use within the dwelling unit, property depreciated.* Taxpayer D, an attorney, buys a house in 2003. The

house constitutes a single dwelling unit but D uses a portion of the house as a law office. D claims depreciation deductions of \$2,000 during the period that she owns the house. D sells the house in 2006, realizing a gain of \$13,000. D has no other section 1231 or capital gains or losses for 2006. Under section 121(d)(6) and paragraph (d) of this section, D must recognize \$2,000 of the gain as unrecaptured section 1250 gain within the meaning of section 1(h). D may exclude the remaining \$11,000 of the gain from the sale of her house because, under paragraph (e)(1) of this section, she is not required to allocate gain to the business use within the dwelling unit.

*Example 6. Non-residential use within the dwelling unit, property not depreciated.* The facts are the same as in *Example 5*, except that D is not entitled to claim any depreciation deductions with respect to her business use of the house. D may exclude \$13,000 of the gain from the sale of her house because, under paragraph (e)(1) of this section, she is not required to allocate gain to the business use within the dwelling unit.

(f) *Effective date.* This section is applicable for sales and exchanges on or after December 24, 2002. For rules on electing to apply the provisions of this section retroactively, see § 1.121-4(j).

[T.D. 9030, 67 FR 78361, Dec. 24, 2002]

**§ 1.121-2 Limitations.**

(a) *Dollar limitations—(1) In general.* A taxpayer may exclude from gross income up to \$250,000 of gain from the sale or exchange of the taxpayer's principal residence. A taxpayer is eligible for only one maximum exclusion per principal residence.

(2) *Joint owners.* If taxpayers jointly own a principal residence but file separate returns, each taxpayer may exclude from gross income up to \$250,000 of gain that is attributable to each taxpayer's interest in the property, if the requirements of section 121 have otherwise been met.

(3) *Special rules for joint returns—(i) In general.* A husband and wife who make a joint return for the year of the sale or exchange of a principal residence may exclude up to \$500,000 of gain if—

(A) Either spouse meets the 2-year ownership requirements of § 1.121-1(a) and (c);

(B) Both spouses meet the 2-year use requirements of § 1.121-1(a) and (c); and

(C) Neither spouse excluded gain from a prior sale or exchange of property under section 121 within the last 2 years (as determined under paragraph (b) of this section).

(ii) *Other joint returns.* For taxpayers filing jointly, if either spouse fails to meet the requirements of paragraph (a)(3)(i) of this section, the maximum limitation amount to be claimed by the couple is the sum of each spouse's limitation amount determined on a separate basis as if they had not been married. For this purpose, each spouse is treated as owning the property during the period that either spouse owned the property.

(4) *Examples.* The provisions of this paragraph (a) are illustrated by the following examples. The examples assume that § 1.121-3 (relating to the reduced maximum exclusion) does not apply to the sale of the property. The examples are as follows:

*Example 1.* Unmarried Taxpayers A and B own a house as joint owners, each owning a 50 percent interest in the house. They sell the house after owning and using it as their principal residence for 2 full years. The gain realized from the sale is \$256,000. A and B are each eligible to exclude \$128,000 of gain because the amount of realized gain allocable to each of them from the sale does not exceed each taxpayer's available limitation amount of \$250,000.

*Example 2.* The facts are the same as in *Example 1*, except that A and B are married taxpayers who file a joint return for the taxable year of the sale. A and B are eligible to exclude the entire amount of realized gain (\$256,000) from gross income because the gain realized from the sale does not exceed the limitation amount of \$500,000 available to A and B as taxpayers filing a joint return.

*Example 3.* During 1999, married Taxpayers H and W each sell a residence that each had separately owned and used as a principal residence before their marriage. Each spouse meets the ownership and use tests for his or her respective residence. Neither spouse meets the use requirement for the other spouse's residence. H and W file a joint return for the year of the sales. The gain realized from the sale of H's residence is \$200,000. The gain realized from the sale of W's residence is \$300,000. Because the ownership and use requirements are met for each residence by each respective spouse, H and W are each eligible to exclude up to \$250,000 of gain from the sale of their individual residences. However, W may not use H's unused exclusion to exclude gain in excess of her limitation amount. Therefore, H and W must recognize

\$50,000 of the gain realized on the sale of W's residence.

*Example 4.* Married Taxpayers H and W sell their residence and file a joint return for the year of the sale. W, but not H, satisfies the requirements of section 121. They are eligible to exclude up to \$250,000 of the gain from the sale of the residence because that is the sum of each spouse's dollar limitation amount determined on a separate basis as if they had not been married (\$0 for H, \$250,000 for W).

*Example 5.* Married Taxpayers H and W have owned and used their principal residence since 1998. On February 16, 2001, H dies. On September 24, 2001, W sells the residence and realizes a gain of \$350,000. Pursuant to section 6013(a)(3), W and H's executor make a joint return for 2001. All \$350,000 of the gain from the sale of the residence may be excluded.

*Example 6.* Assume the same facts as *Example 5*, except that W does not sell the residence until January 31, 2002. Because W's filing status for the taxable year of the sale is single, the special rules for joint returns under paragraph (a)(3) of this section do not apply and W may exclude only \$250,000 of the gain.

(b) *Application of section 121 to only 1 sale or exchange every 2 years—(1) In general.* Except as otherwise provided in § 1.121-3 (relating to the reduced maximum exclusion), a taxpayer may not exclude from gross income gain from the sale or exchange of a principal residence if, during the 2-year period ending on the date of the sale or exchange, the taxpayer sold or exchanged other property for which gain was excluded under section 121. For purposes of this paragraph (b)(1), any sale or exchange before May 7, 1997, is disregarded.

(2) *Example.* The following example illustrates the rules of this paragraph (b). The example assumes that § 1.121-3 (relating to the reduced maximum exclusion) does not apply to the sale of the property. The example is as follows:

*Example.* Taxpayer A owns a townhouse that he uses as his principal residence for 2 full years, 1998 and 1999. A buys a house in 2000 that he owns and uses as his principal residence. A sells the townhouse in 2002 and excludes gain realized on its sale under section 121. A sells the house in 2003. Although A meets the 2-year ownership and use requirements of section 121, A is not eligible to exclude gain from the sale of the house because A excluded gain within the last 2 years under section 121 from the sale of the townhouse.

(c) *Effective date.* This section is applicable for sales and exchanges on or after December 24, 2002. For rules on electing to apply the provisions of this section retroactively, see § 1.121-4(j).

[T.D. 9030, 67 FR 78361, Dec. 24, 2002]

**§ 1.121-3 Reduced maximum exclusion for taxpayers failing to meet certain requirements.**

(a) *In general.* In lieu of the limitation under section 121(b) and § 1.121-2, a reduced maximum exclusion limitation may be available for a taxpayer who sells or exchanges property used as the taxpayer's principal residence but fails to satisfy the ownership and use requirements described in § 1.121-1(a) and (c) or the 2-year limitation described in § 1.121-2(b).

(b) *Primary reason for sale or exchange.* In order for a taxpayer to claim a reduced maximum exclusion under section 121(c), the sale or exchange must be by reason of a change in place of employment, health, or unforeseen circumstances. If a safe harbor described in this section applies, a sale or exchange is deemed to be by reason of a change in place of employment, health, or unforeseen circumstances. If a safe harbor described in this section does not apply, a sale or exchange is by reason of a change in place of employment, health, or unforeseen circumstances only if the primary reason for the sale or exchange is a change in place of employment (within the meaning of paragraph (c) of this section), health (within the meaning of paragraph (d) of this section), or unforeseen circumstances (within the meaning of paragraph (e) of this section). Whether the requirements of this section are satisfied depends upon all the facts and circumstances. Factors that may be relevant in determining the taxpayer's primary reason for the sale or exchange include (but are not limited to) the extent to which—

(1) The sale or exchange and the circumstances giving rise to the sale or exchange are proximate in time;

(2) The suitability of the property as the taxpayer's principal residence materially changes;

(3) The taxpayer's financial ability to maintain the property is materially impaired;

(4) The taxpayer uses the property as the taxpayer's residence during the period of the taxpayer's ownership of the property;

(5) The circumstances giving rise to the sale or exchange are not reasonably foreseeable when the taxpayer begins using the property as the taxpayer's principal residence; and

(6) The circumstances giving rise to the sale or exchange occur during the period of the taxpayer's ownership and use of the property as the taxpayer's principal residence.

(c) *Sale or exchange by reason of a change in place of employment—*(1) *In general.* A sale or exchange is by reason of a change in place of employment if, in the case of a qualified individual described in paragraph (f) of this section, the primary reason for the sale or exchange is a change in the location of the individual's employment.

(2) *Distance safe harbor.* A sale or exchange is deemed to be by reason of a change in place of employment (within the meaning of paragraph (c)(1) of this section) if—

(i) The change in place of employment occurs during the period of the taxpayer's ownership and use of the property as the taxpayer's principal residence; and

(ii) The qualified individual's new place of employment is at least 50 miles farther from the residence sold or exchanged than was the former place of employment, or, if there was no former place of employment, the distance between the qualified individual's new place of employment and the residence sold or exchanged is at least 50 miles.

(3) *Employment.* For purposes of this paragraph (c), *employment* includes the commencement of employment with a new employer, the continuation of employment with the same employer, and the commencement or continuation of self-employment.

(4) *Examples.* The following examples illustrate the rules of this paragraph (c):

*Example 1.* A is unemployed and owns a townhouse that she has owned and used as her principal residence since 2003. In 2004 A obtains a job that is 54 miles from her townhouse, and she sells the townhouse. Because

the distance between A's new place of employment and the townhouse is at least 50 miles, the sale is within the safe harbor of paragraph (c)(2) of this section and A is entitled to claim a reduced maximum exclusion under section 121(c)(2).

*Example 2.* B is an officer in the United States Air Force stationed in Florida. B purchases a house in Florida in 2002. In May 2003 B moves out of his house to take a 3-year assignment in Germany. B sells his house in January 2004. Because B's new place of employment in Germany is at least 50 miles farther from the residence sold than is B's former place of employment in Florida, the sale is within the safe harbor of paragraph (c)(2) of this section and B is entitled to claim a reduced maximum exclusion under section 121(c)(2).

*Example 3.* C is employed by Employer R at R's Philadelphia office. C purchases a house in February 2002 that is 35 miles from R's Philadelphia office. In May 2003 C begins a temporary assignment at R's Wilmington office that is 72 miles from C's house, and moves out of the house. In June 2005 C is assigned to work in R's London office. C sells her house in August 2005 as a result of the assignment to London. The sale of the house is not within the safe harbor of paragraph (c)(2) of this section by reason of the change in place of employment from Philadelphia to Wilmington because the Wilmington office is not 50 miles farther from C's house than is the Philadelphia office. Furthermore, the sale is not within the safe harbor by reason of the change in place of employment to London because C is not using the house as her principal residence when she moves to London. However, C is entitled to claim a reduced maximum exclusion under section 121(c)(2) because, under the facts and circumstances, the primary reason for the sale is the change in C's place of employment.

*Example 4.* In July 2003 D, who works as an emergency medicine physician, buys a condominium that is 5 miles from her place of employment and uses it as her principal residence. In February 2004, D obtains a job that is located 51 miles from D's condominium. D may be called in to work unscheduled hours and, when called, must be able to arrive at work quickly. Because of the demands of the new job, D sells her condominium and buys a townhouse that is 4 miles from her new place of employment. Because D's new place of employment is only 46 miles farther from the condominium than is D's former place of employment, the sale is not within the safe harbor of paragraph (c)(2) of this section. However, D is entitled to claim a reduced maximum exclusion under section 121(c)(2) because, under the facts and circumstances, the primary reason for the sale is the change in D's place of employment.

(d) *Sale or exchange by reason of health*—(1) *In general.* A sale or exchange is by reason of health if the primary reason for the sale or exchange is to obtain, provide, or facilitate the diagnosis, cure, mitigation, or treatment of disease, illness, or injury of a qualified individual described in paragraph (f) of this section, or to obtain or provide medical or personal care for a qualified individual suffering from a disease, illness, or injury. A sale or exchange that is merely beneficial to the general health or well-being of an individual is not a sale or exchange by reason of health.

(2) *Physician's recommendation safe harbor.* A sale or exchange is deemed to be by reason of health if a physician (as defined in section 213(d)(4)) recommends a change of residence for reasons of health (as defined in paragraph (d)(1) of this section).

(3) *Examples.* The following examples illustrate the rules of this paragraph (d):

*Example 1.* In 2003 A buys a house that she uses as her principal residence. A is injured in an accident and is unable to care for herself. A sells her house in 2004 and moves in with her daughter so that the daughter can provide the care that A requires as a result of her injury. Because, under the facts and circumstances, the primary reason for the sale of A's house is A's health, A is entitled to claim a reduced maximum exclusion under section 121(c)(2).

*Example 2.* H's father has a chronic disease. In 2003 H and W purchase a house that they use as their principal residence. In 2004 H and W sell their house in order to move into the house of H's father so that they can provide the care he requires as a result of his disease. Because, under the facts and circumstances, the primary reason for the sale of their house is the health of H's father, H and W are entitled to claim a reduced maximum exclusion under section 121(c)(2).

*Example 3.* H and W purchase a house in 2003 that they use as their principal residence. Their son suffers from a chronic illness that requires regular medical care. Later that year their son begins a new treatment that is available at a hospital 100 miles away from their residence. In 2004 H and W sell their house so that they can be closer to the hospital to facilitate their son's treatment. Because, under the facts and circumstances, the primary reason for the sale is to facilitate the treatment of their son's chronic illness, H and W are entitled to claim a reduced maximum exclusion under section 121(c)(2).

*Example 4.* B, who has chronic asthma, purchases a house in Minnesota in 2003 that he uses as his principal residence. B's doctor tells B that moving to a warm, dry climate would mitigate B's asthma symptoms. In 2004 B sells his house and moves to Arizona to relieve his asthma symptoms. The sale is within the safe harbor of paragraph (d)(2) of this section and B is entitled to claim a reduced maximum exclusion under section 121(c)(2).

*Example 5.* In 2003 H and W purchase a house in Michigan that they use as their principal residence. H's doctor tells H that he should get more outdoor exercise, but H is not suffering from any disease that can be treated or mitigated by outdoor exercise. In 2004 H and W sell their house and move to Florida so that H can increase his general level of exercise by playing golf year-round. Because the sale of the house is merely beneficial to H's general health, the sale of the house is not by reason of H's health. H and W are not entitled to claim a reduced maximum exclusion under section 121(c)(2).

(e) *Sale or exchange by reason of unforeseen circumstances*—(1) *In general.* A sale or exchange is by reason of unforeseen circumstances if the primary reason for the sale or exchange is the occurrence of an event that the taxpayer could not reasonably have anticipated before purchasing and occupying the residence. A sale or exchange by reason of unforeseen circumstances (other than a sale or exchange deemed to be by reason of unforeseen circumstances under paragraph (e)(2) or (3) of this section) does not qualify for the reduced maximum exclusion if the primary reason for the sale or exchange is a preference for a different residence or an improvement in financial circumstances.

(2) *Specific event safe harbors.* A sale or exchange is deemed to be by reason of unforeseen circumstances (within the meaning of paragraph (e)(1) of this section) if any of the events specified in paragraphs (e)(2)(i) through (iii) of this section occur during the period of the taxpayer's ownership and use of the residence as the taxpayer's principal residence:

(i) The involuntary conversion of the residence.

(ii) Natural or man-made disasters or acts of war or terrorism resulting in a casualty to the residence (without regard to deductibility under section 165(h)).

(iii) In the case of a qualified individual described in paragraph (f) of this section—

(A) Death;

(B) The cessation of employment as a result of which the qualified individual is eligible for unemployment compensation (as defined in section 85(b));

(C) A change in employment or self-employment status that results in the taxpayer's inability to pay housing costs and reasonable basic living expenses for the taxpayer's household (including amounts for food, clothing, medical expenses, taxes, transportation, court-ordered payments, and expenses reasonably necessary to the production of income, but not for the maintenance of an affluent or luxurious standard of living);

(D) Divorce or legal separation under a decree of divorce or separate maintenance; or

(E) Multiple births resulting from the same pregnancy.

(3) *Designation of additional events as unforeseen circumstances.* The Commissioner may designate other events or situations as unforeseen circumstances in published guidance of general applicability and may issue rulings addressed to specific taxpayers identifying other events or situations as unforeseen circumstances with regard to those taxpayers (see §601.601(d)(2) of this chapter).

(4) *Examples.* The following examples illustrate the rules of this paragraph (e):

*Example 1.* In 2003 A buys a house in California. After A begins to use the house as her principal residence, an earthquake causes damage to A's house. A sells the house in 2004. The sale is within the safe harbor of paragraph (e)(2)(ii) of this section and A is entitled to claim a reduced maximum exclusion under section 121(c)(2).

*Example 2.* H works as a teacher and W works as a pilot. In 2003 H and W buy a house that they use as their principal residence. Later that year W is furloughed from her job for six months. H and W are unable to pay their mortgage and reasonable basic living expenses for their household during the period W is furloughed. H and W sell their house in 2004. The sale is within the safe harbor of paragraph (e)(2)(iii)(C) of this section and H and W are entitled to claim a reduced maximum exclusion under section 121(c)(2).

*Example 3.* In 2003 H and W buy a two-bedroom condominium that they use as their

principal residence. In 2004 W gives birth to twins and H and W sell their condominium and buy a four-bedroom house. The sale is within the safe harbor of paragraph (e)(2)(iii)(E) of this section, and H and W are entitled to claim a reduced maximum exclusion under section 121(c)(2).

*Example 4.* In 2003 B buys a condominium in a high-rise building and uses it as his principal residence. B's monthly condominium fee is \$X. Three months after B moves into the condominium, the condominium association replaces the building's roof and heating system. Six months later, B's monthly condominium fee doubles in order to pay for the repairs. B sells the condominium in 2004 because he is unable to afford the new condominium fee along with a monthly mortgage payment. The safe harbors of paragraph (e)(2) of this section do not apply. However, under the facts and circumstances, the primary reason for the sale, the doubling of the condominium fee, is an unforeseen circumstance because B could not reasonably have anticipated that the condominium fee would double at the time he purchased and occupied the property. Consequently, the sale of the condominium is by reason of unforeseen circumstances and B is entitled to claim a reduced maximum exclusion under section 121(c)(2).

*Example 5.* In 2003 C buys a house that he uses as his principal residence. The property is located on a heavily traveled road. C sells the property in 2004 because C is disturbed by the traffic. The safe harbors of paragraph (e)(2) of this section do not apply. Under the facts and circumstances, the primary reason for the sale, the traffic, is not an unforeseen circumstance because C could reasonably have anticipated the traffic at the time he purchased and occupied the house. Consequently, the sale of the house is not by reason of unforeseen circumstances and C is not entitled to claim a reduced maximum exclusion under section 121(c)(2).

*Example 6.* In 2003 D and her fiancé E buy a house and live in it as their principal residence. In 2004 D and E cancel their wedding plans and E moves out of the house. Because D cannot afford to make the monthly mortgage payments alone, D and E sell the house in 2004. The safe harbors of paragraph (e)(2) of this section do not apply. However, under the facts and circumstances, the primary reason for the sale, the broken engagement, is an unforeseen circumstance because D and E could not reasonably have anticipated the broken engagement at the time they purchased and occupied the house. Consequently, the sale is by reason of unforeseen circumstances and D and E are each entitled to claim a reduced maximum exclusion under section 121(c)(2).

*Example 7.* In 2003 F buys a small condominium that she uses as her principal residence. In 2005 F receives a promotion and a

large increase in her salary. F sells the condominium in 2004 and purchases a house because she can now afford the house. The safe harbors of paragraph (e)(2) of this section do not apply. Under the facts and circumstances, the primary reason for the sale of the house, F's salary increase, is an improvement in F's financial circumstances. Under paragraph (e)(1) of this section, an improvement in financial circumstances, even if the result of unforeseen circumstances, does not qualify for the reduced maximum exclusion by reason of unforeseen circumstances under section 121(c)(2).

*Example 8.* In April 2003 G buys a house that he uses as his principal residence. G sells his house in October 2004 because the house has greatly appreciated in value, mortgage rates have substantially decreased, and G can afford a bigger house. The safe harbors of paragraph (e)(2) of this section do not apply. Under the facts and circumstances, the primary reasons for the sale of the house, the changes in G's house value and in the mortgage rates, are an improvement in G's financial circumstances. Under paragraph (e)(1) of this section, an improvement in financial circumstances, even if the result of unforeseen circumstances, does not qualify for the reduced maximum exclusion by reason of unforeseen circumstances under section 121(c)(2).

*Example 9.* H works as a police officer for City X. In 2003 H buys a condominium that he uses as his principal residence. In 2004 H is assigned to City X's K-9 unit and is required to care for the police service dog at his home. Because H's condominium association does not permit H to have a dog in his condominium, in 2004 he sells the condominium and buys a house. The safe harbors of paragraph (e)(2) of this section do not apply. However, under the facts and circumstances, the primary reason for the sale, H's assignment to the K-9 unit, is an unforeseen circumstance because H could not reasonably have anticipated his assignment to the K-9 unit at the time he purchased and occupied the condominium. Consequently, the sale of the condominium is by reason of unforeseen circumstances and H is entitled to claim a reduced maximum exclusion under section 121(c)(2).

*Example 10.* In 2003, J buys a small house that she uses as her principal residence. After J wins the lottery, she sells the small house in 2004 and buys a bigger, more expensive house. The safe harbors of paragraph (e)(2) of this section do not apply. Under the facts and circumstances, the primary reason for the sale of the house, winning the lottery, is an improvement in J's financial circumstances. Under paragraph (e)(1) of this section, an improvement in financial circumstances, even if the result of unforeseen

## § 1.121-4

## 26 CFR Ch. I (4-1-06 Edition)

circumstances, does not qualify for the reduced maximum exclusion under section 121(c)(2).

(f) *Qualified individual.* For purposes of this section, *qualified individual* means—

- (1) The taxpayer;
- (2) The taxpayer's spouse;
- (3) A co-owner of the residence;
- (4) A person whose principal place of abode is in the same household as the taxpayer; or
- (5) For purposes of paragraph (d) of this section, a person bearing a relationship specified in sections 152(a)(1) through 152(a)(8) (without regard to qualification as a dependent) to a qualified individual described in paragraphs (f)(1) through (4) of this section, or a descendant of the taxpayer's grandparent.

(g) *Computation of reduced maximum exclusion.* (1) The reduced maximum exclusion is computed by multiplying the maximum dollar limitation of \$250,000 (\$500,000 for certain joint filers) by a fraction. The numerator of the fraction is the shortest of the period of time that the taxpayer owned the property during the 5-year period ending on the date of the sale or exchange; the period of time that the taxpayer used the property as the taxpayer's principal residence during the 5-year period ending on the date of the sale or exchange; or the period of time between the date of a prior sale or exchange of property for which the taxpayer excluded gain under section 121 and the date of the current sale or exchange. The numerator of the fraction may be expressed in days or months. The denominator of the fraction is 730 days or 24 months (depending on the measure of time used in the numerator).

(2) *Examples.* The following examples illustrate the rules of this paragraph (g):

*Example 1.* Taxpayer A purchases a house that she uses as her principal residence. Twelve months after the purchase, A sells the house due to a change in place of her employment. A has not excluded gain under section 121 on a prior sale or exchange of property within the last 2 years. A is eligible to exclude up to \$125,000 of the gain from the sale of her house ( $12/24 \times \$250,000$ ).

*Example 2.* (i) Taxpayer H owns a house that he has used as his principal residence since 1996. On January 15, 1999, H and W

marry and W begins to use H's house as her principal residence. On January 15, 2000, H sells the house due to a change in W's place of employment. Neither H nor W has excluded gain under section 121 on a prior sale or exchange of property within the last 2 years.

(ii) Because H and W have not each used the house as their principal residence for at least 2 years during the 5-year period preceding its sale, the maximum dollar limitation amount that may be claimed by H and W will not be \$500,000, but the sum of each spouse's limitation amount determined on a separate basis as if they had not been married. (See § 1.121-2(a)(3)(ii).)

(iii) H is eligible to exclude up to \$250,000 of gain because he meets the requirements of section 121. W is not eligible to exclude the maximum dollar limitation amount. Instead, because the sale of the house is due to a change in place of employment, W is eligible to claim a reduced maximum exclusion of up to \$125,000 of the gain ( $365/730 \times \$250,000$ ). Therefore, H and W are eligible to exclude up to \$375,000 of gain ( $\$250,000 + \$125,000$ ) from the sale of the house.

(h) *Effective dates.* Paragraphs (a) and (g) of this section are applicable for sales and exchanges on or after December 24, 2002. Paragraphs (b) through (f) of this section are applicable for sales and exchanges on or after August 13, 2004.

[T.D. 9030, 67 FR 78361, Dec. 24, 2002, as amended by T.D. 9152, 69 FR 50304, Aug. 16, 2004]

### § 1.121-4 Special rules.

(a) *Property of deceased spouse—(1) In general.* For purposes of satisfying the ownership and use requirements of section 121, a taxpayer is treated as owning and using property as the taxpayer's principal residence during any period that the taxpayer's deceased spouse owned and used the property as a principal residence before death if—

(i) The taxpayer's spouse is deceased on the date of the sale or exchange of the property; and

(ii) The taxpayer has not remarried at the time of the sale or exchange of the property.

(2) *Example.* The provisions of this paragraph (a) are illustrated by the following example. The example assumes that § 1.121-3 (relating to the reduced maximum exclusion) does not apply to the sale of the property. The example is as follows:

*Example.* Taxpayer H has owned and used a house as his principal residence since 1987. H and W marry on July 1, 1999 and from that date they use H's house as their principal residence. H dies on August 15, 2000, and W inherits the property. W sells the property on September 1, 2000, at which time she has not remarried. Although W has owned and used the house for less than 2 years, W will be considered to have satisfied the ownership and use requirements of section 121 because W's period of ownership and use includes the period that H owned and used the property before death.

(b) *Property owned by spouse or former spouse—(1) Property transferred to individual from spouse or former spouse.* If a taxpayer obtains property from a spouse or former spouse in a transaction described in section 1041(a), the period that the taxpayer owns the property will include the period that the spouse or former spouse owned the property.

(2) *Property used by spouse or former spouse.* A taxpayer is treated as using property as the taxpayer's principal residence for any period that the taxpayer has an ownership interest in the property and the taxpayer's spouse or former spouse is granted use of the property under a divorce or separation instrument (as defined in section 71(b)(2)), provided that the spouse or former spouse uses the property as his or her principal residence.

(c) *Tenant-stockholder in cooperative housing corporation.* A taxpayer who holds stock as a tenant-stockholder in a cooperative housing corporation (as those terms are defined in section 216(b)(1) and (2)) may be eligible to exclude gain under section 121 on the sale or exchange of the stock. In determining whether the taxpayer meets the requirements of section 121, the ownership requirements are applied to the holding of the stock and the use requirements are applied to the house or apartment that the taxpayer is entitled to occupy by reason of the taxpayer's stock ownership.

(d) *Involuntary conversions—(1) In general.* For purposes of section 121, the destruction, theft, seizure, requisition, or condemnation of property is treated as a sale of the property.

(2) *Application of section 1033.* In applying section 1033 (relating to involuntary conversions), the amount realized

from the sale or exchange of property used as the taxpayer's principal residence is treated as being the amount determined without regard to section 121, reduced by the amount of gain excluded from the taxpayer's gross income under section 121.

(3) *Property acquired after involuntary conversion.* If the basis of the property acquired as a result of an involuntary conversion is determined (in whole or in part) under section 1033(b) (relating to the basis of property acquired through an involuntary conversion), then for purposes of satisfying the requirements of section 121, the taxpayer will be treated as owning and using the acquired property as the taxpayer's principal residence during any period of time that the taxpayer owned and used the converted property as the taxpayer's principal residence.

(4) *Example.* The provisions of this paragraph (d) are illustrated by the following example:

*Example.* (i) On February 18, 1999, fire destroys Taxpayer A's house which has an adjusted basis of \$80,000. A had owned and used this property as her principal residence for 20 years prior to its destruction. A's insurance company pays A \$400,000 for the house. A realizes a gain of \$320,000 (\$400,000—\$80,000). On August 27, 1999, A purchases a new house at a cost of \$100,000.

(ii) Because the destruction of the house is treated as a sale for purposes of section 121, A will exclude \$250,000 of the realized gain from A's gross income. For purposes of section 1033, the amount realized is then treated as being \$150,000 (\$400,000—\$250,000) and the gain realized is \$70,000 (\$150,000 amount realized—\$80,000 basis). A elects under section 1033 to recognize only \$50,000 of the gain (\$150,000 amount realized—\$100,000 cost of new house). The remaining \$20,000 of gain is deferred and A's basis in the new house is \$80,000 (\$100,000 cost—\$20,000 gain not recognized).

(iii) A will be treated as owning and using the new house as A's principal residence during the 20-year period that A owned and used the destroyed house.

(e) *Sales or exchanges of partial interests—(1) Partial interests other than remainder interests—(i) In general.* Except as provided in paragraph (e)(2) of this section (relating to sales or exchanges of remainder interests), a taxpayer may apply the section 121 exclusion to

gain from the sale or exchange of an interest in the taxpayer's principal residence that is less than the taxpayer's entire interest if the interest sold or exchanged includes an interest in the dwelling unit. For rules relating to the sale or exchange of vacant land, see § 1.121-1(b)(3).

(ii) *Limitations*—(A) *Maximum limitation amount*. For purposes of section 121(b)(1) and (2) (relating to the maximum limitation amount of the section 121 exclusion), sales or exchanges of partial interests in the same principal residence are treated as one sale or exchange. Therefore, only one maximum limitation amount of \$250,000 (\$500,000 for certain joint returns) applies to the combined sales or exchanges of the partial interests. In applying the maximum limitation amount to sales or exchanges that occur in different taxable years, a taxpayer may exclude gain from the first sale or exchange of a partial interest up to the taxpayer's full maximum limitation amount and may exclude gain from the sale or exchange of any other partial interest in the same principal residence to the extent of any remaining maximum limitation amount, and each spouse is treated as excluding one-half of the gain from a sale or exchange to which section 121(b)(2)(A) and § 1.121-2(a)(3)(i) (relating to the limitation for certain joint returns) apply.

(B) *Sale or exchange of more than one principal residence in 2-year period*. For purposes of applying section 121(b)(3) (restricting the application of section 121 to only 1 sale or exchange every 2 years), each sale or exchange of a partial interest is disregarded with respect to other sales or exchanges of partial interests in the same principal residence, but is taken into account as of the date of the sale or exchange in applying section 121(b)(3) to that sale or exchange and the sale or exchange of any other principal residence.

(2) *Sales or exchanges of remainder interests*—(i) *In general*. A taxpayer may elect to apply the section 121 exclusion to gain from the sale or exchange of a remainder interest in the taxpayer's principal residence.

(ii) *Limitations*—(A) *Sale or exchange of any other interest*. If a taxpayer elects to exclude gain from the sale or ex-

change of a remainder interest in the taxpayer's principal residence, the section 121 exclusion will not apply to a sale or exchange of any other interest in the residence that is sold or exchanged separately.

(B) *Sales or exchanges to related parties*. This paragraph (e)(2) will not apply to a sale or exchange to any person that bears a relationship to the taxpayer that is described in section 267(b) or 707(b).

(iii) *Election*. The taxpayer makes the election under this paragraph (e)(2) by filing a return for the taxable year of the sale or exchange that does not include the gain from the sale or exchange of the remainder interest in the taxpayer's gross income. A taxpayer may make or revoke the election at any time before the expiration of a 3-year period beginning on the last date prescribed by law (determined without regard to extensions) for the filing of the return for the taxable year in which the sale or exchange occurred.

(3) *Example*. The provisions of this paragraph (e) are illustrated by the following example:

*Example*. In 1991 Taxpayer A buys a house that A uses as his principal residence. In 2004 A's friend B moves into A's house and A sells B a 50% interest in the house realizing a gain of \$136,000. A may exclude the \$136,000 of gain. In 2005 A sells his remaining 50% interest in the home to B realizing a gain of \$138,000. A may exclude \$114,000 (\$250,000—\$136,000 gain previously excluded) of the \$138,000 gain from the sale of the remaining interest.

(f) *No exclusion for expatriates*. The section 121 exclusion will not apply to any sale or exchange by an individual if the provisions of section 877(a) (relating to the treatment of expatriates) applies to the individual.

(g) *Election to have section not apply*. A taxpayer may elect to have the section 121 exclusion not apply to a sale or exchange of property. The taxpayer makes the election by filing a return for the taxable year of the sale or exchange that includes the gain from the sale or exchange of the taxpayer's principal residence in the taxpayer's gross income. A taxpayer may make an election under this paragraph (g) to have section 121 not apply (or revoke an election to have section 121 not apply)

at any time before the expiration of a 3-year period beginning on the last date prescribed by law (determined without regard to extensions) for the filing of the return for the taxable year in which the sale or exchange occurred.

(h) *Residences acquired in rollovers under section 1034.* If a taxpayer acquires property in a transaction that qualifies under section 1034 (section 1034 property) for the nonrecognition of gain realized on the sale or exchange of another property and later sells or exchanges such property, in determining the period of the taxpayer's ownership and use of the property under section 121 the taxpayer may include the periods that the taxpayer owned and used the section 1034 property as the taxpayer's principal residence (and each prior residence taken into account under section 1223(7) in determining the holding period of the section 1034 property).

(i) [Reserved]

(j) *Election to apply regulations retroactively.* Taxpayers who would otherwise qualify under §§1.121-1 through 1.121-4 to exclude gain from a sale or exchange of a principal residence before December 24, 2002 but on or after May 7, 1997, may elect to apply §§1.121-1 through 1.121-4 for any years for which the period of limitation under section 6511 has not expired. The taxpayer makes the election under this paragraph (j) by filing a return for the taxable year of the sale or exchange that does not include the gain from the sale or exchange of the taxpayer's principal residence in the taxpayer's gross income. Taxpayers who have filed a return for the taxable year of the sale or exchange may elect to apply the provisions of these regulations for any years for which the period of limitation under section 6511 has not expired by filing an amended return.

(k) *Audit protection.* The Internal Revenue Service will not challenge a taxpayer's position that a sale or exchange of a principal residence occurring before December 24, 2002 but on or after May 7, 1997, qualifies for the section 121 exclusion if the taxpayer has made a reasonable, good faith effort to comply with the requirements of section 121. Compliance with the provisions of the regulations project under

section 121 (REG-105235-99 (2000-2 C.B. 447)) generally will be considered a reasonable, good faith effort to comply with the requirements of section 121.

(1) *Effective date.* This section is applicable for sales and exchanges on or after December 24, 2002. For rules on electing to apply the provisions retroactively, see paragraph (j) of this section.

[T.D. 9030, 67 FR 78361, Dec. 24, 2002; 68 FR 6350, Feb. 7, 2003]

**§ 1.121-5 Suspension of 5-year period for certain members of the uniformed services and Foreign Service.**

(a) *In general.* Under section 121(d)(9), a taxpayer who is serving (or whose spouse is serving) on qualified official extended duty as a member of the uniformed services or Foreign Service of the United States may elect to suspend the running of the 5-year period of ownership and use during such service but for not more than 10 years. The election does not suspend the running of the 5-year period for any period during which the running of the 5-year period with respect to any other property of the taxpayer is suspended by an election under section 121(d)(9).

(b) *Manner of making election.* The taxpayer makes the election under section 121(d)(9) and this section by filing a return for the taxable year of the sale or exchange of the taxpayer's principal residence that does not include the gain in the taxpayer's gross income.

(c) *Application of election to closed years.* A taxpayer who would otherwise qualify under §§1.121-1 through 1.121-4 to exclude gain from a sale or exchange of a principal residence on or after May 7, 1997, may elect to apply section 121(d)(9) and this section for any years for which a claim for refund is barred by operation of any law or rule of law by filing an amended return before November 11, 2004.

(d) *Example.* The provisions of this section are illustrated by the following example:

*Example.* B purchases a house in Virginia in 2003 that he uses as his principal residence for 3 years. For 8 years, from 2006 through 2014, B serves on qualified official extended duty as a member of the Foreign Service of the United States in Brazil. In 2015 B sells

the house. B did not use the house as his principal residence for 2 of the 5 years preceding the sale. Under section 121(d)(9) and this section, however, B may elect to suspend the running of the 5-year period of ownership and use during his 8-year period of service with the Foreign Service in Brazil. If B makes the election, the 8-year period is not counted in determining whether B used the house for 2 of the 5 years preceding the sale. Therefore, B may exclude the gain from the sale of the house under section 121.

(e) *Effective date.* This section is applicable for sales and exchanges on or after May 7, 1997.

[T.D. 9152, 69 FR 50306, Aug. 16, 2004]

**§ 1.122-1 Applicable rules relating to certain reduced uniformed services retirement pay.**

(a) *Rule applicable prior to January 1, 1966.* In the case of a member or former member of the uniformed services of the United States (as defined in 37 U.S.C. 101(3)) who has made an election under Subchapter I of Chapter 73 of Title 10 of the U.S. Code (also referred to in this section as the Retired Serviceman's Family Protection Plan (10 U.S.C. 1431)) to receive a reduced amount of retired or retainer pay, gross income shall include the amount of any reduction made in his retired or retainer pay before January 1, 1966, by reason of such election, unless such reduction, or portion thereof, is otherwise excluded from gross income under Part III of Subchapter B of Chapter 1 of the Internal Revenue Code of 1954 or any other provision of law.

(b) *Rule applicable after December 31, 1965—(1)* In a case of a member or former member of the uniformed services of the United States (as defined in 37 U.S.C. 101(3)), gross income shall not include the amount of any reduction made in his or her retired or retainer pay after December 31, 1965, by reason of—

(i) An election made under the Retired Serviceman's Family Protection Plan (10 U.S.C. 1431), or

(ii) The provisions of Subchapter II of Chapter 73 of Title 10 of the U.S. Code (also referred to in this section as the Survivor Benefit Plan (10 U.S.C. 1447)).

(2)(i) In a case where a member or former member of the uniformed services has, pursuant to the election described in paragraph (a) of this section,

received before January 1, 1966, a reduced amount of retired or retainer pay, he shall, after December 31, 1965, exclude from gross income under section 122(b) and this subdivision all amounts received as uniformed services retired or retainer pay until there has been so excluded an amount of retired or retainer pay equal to the "consideration for the contract" (as described in subdivision (iii) of this subparagraph).

(ii) Upon the death of a member or former member of the uniformed services, where the "consideration for the contract" (as described in subdivision (iii) of this subparagraph) has not been excluded in whole or in part from gross income under section 122(b) and subdivision (i) of this subparagraph, the survivor of such member who is receiving an annuity under Chapter 73 of Title 10 of the U.S. Code shall, after December 31, 1965, exclude from gross income under section 72(o) and this subdivision such annuity payments received after December 31, 1965, until there has been so excluded annuity payments equalling the portion of the "consideration for the contract" not previously excluded under subdivision (i) of this subparagraph.

(iii) The term "consideration for the contract" as used in this subparagraph means—

(a) The total amount of the reductions, if any, before January 1, 1966, in retired or retainer pay by reason of an election under Subchapter I of Chapter 73 of Title 10 of the United States Code, plus

(b) The total amount, if any, deposited by the serviceman at any time pursuant to the provisions of sections 1438 or 1452(d) of Title 10 of the United States Code, plus

(c) The total amount, if any, excludable from income under section 101(b)(2)(D) and paragraph (a)(2) of § 1.101-2 with respect to a survivor annuity provided by such retired or retainer pay, minus

(d) The total amount, if any, excluded from income before January 1, 1966, pursuant to the provisions of section 72 (b) and (d) with respect to a survivor annuity provided by such retired or retainer pay.

(iv) In determining whether there has been a recovery of the "consideration for the contract" under subdivision (i) of this subparagraph, the exclusion of retired pay from income after December 31, 1965, under sections 104(a)(4) and 105(d) shall not be considered as recovery of all or part of the "consideration for the contract."

(c) *Special rules.* In any of the following situations, the computation of the excludable portion of disability retired pay received by the member or former member of the uniformed services shall be governed by the following rules:

(1) An exclusion under section 122(a) and paragraph (b)(1) of this section is applicable only in the taxable year in which a reduction in retired pay is made under the Retired Serviceman's Family Protection Plan (10 U.S.C. 1431) or the Survivor Benefit Plan (10 U.S.C. 1447).

(2) Where the member or former member of the uniformed services is entitled to exclude the whole or a portion of his retired pay under the provisions of section 104(a)(4) or section 105(d) and under section 122(a) and paragraph (b)(1) of this section, the exclusion under section 122(a) and paragraph (b)(1) of this section shall be applied prior to the exclusions under sections 104(a)(4) and 105(d).

(3) Where the member or former member of the uniformed services waives a portion of his disability retired pay, or such retired pay reduced under the Retired Serviceman's Family Protection Plan (10 U.S.C. 1431) or the Survivor Benefit Plan (10 U.S.C. 1447) in favor of a nontaxable pension or compensation receivable under laws administered by the Veterans Administration (38 U.S.C. 3105), the waived amount of such disability retired pay, or reduced amount thereof, shall first be subtracted from any amounts which are excludable under the provisions of sections 104(a)(4) or 105(d) so as to reduce the amounts otherwise excludable under those sections.

(4) Where the member or former member of the uniformed services receives (before any forfeiture) disability retired pay (whether or not reduced under the Retired Serviceman's Family Protection Plan) or the Survivor Ben-

efit Plan which is partially excludable under section 104(a)(4), and also forfeits a portion of such disability retired pay under the Dual Compensation Act of 1964 (5 U.S.C. 5531 or any former corresponding provision of law), the amount of the forfeiture under such Act shall be applied against disability retired pay (before any forfeiture) in the same proportion that the excludable portion of such pay under section 104(a)(4) bears to the total amount of such pay after subtraction of any reduction under the Retired Serviceman's Family Protection Plan (10 U.S.C. 1431) or the Survivor Benefit Plan (10 U.S.C. 1447).

(5) The exclusion provided by section 122(b) and paragraph (b)(2)(i) of this section shall be available with respect to repayments made upon removal from the temporary disability retired list even though such repayments were previously excluded from gross income under section 104(a)(4) or 105(d).

However, the exclusion permitted by the prior sentence will apply only to the extent the repaid amount has not been previously excluded under section 122(b) and paragraph (b)(2)(i) of this section.

(d) *Examples with respect to the Retired Serviceman's Family Protection Plan.* The rules discussed in this section relating to the Retired Serviceman's Family Protection Plan (10 U.S.C. 1431) may be illustrated by the following examples:

*Example (1).* A, a member of the uniformed services, retires on January 1, 1963, and receives nondisability retired pay computed to be 60 percent of his active duty pay of \$10,000 per year, or \$6,000 per year, based upon 24 years of service. He elects, under the Retired Serviceman's Family Protection Plan (10 U.S.C. 1431), to provide his survivor with an annuity equal to one-fourth of his reduced retired pay. His retired pay of \$6,000 is reduced by \$600, to \$5,400, in order to provide a survivor annuity of \$1,350 per year or \$112.50 per month. For 1963, 1964, and 1965, A must include in gross income the unreduced amount of retired pay, or \$6,000. For 1966 and subsequent years, he may exclude under section 122(a) and paragraph (b)(1) of this section the \$600 total annual reductions to provide the survivor annuity, and may, for 1966, further exclude from gross income under section 122(b) and paragraph (b)(2)(i) of this section the \$1,800 "consideration for the contract" *i.e.*, the total reductions which were made in 1963, 1964, and 1965, to provide the

survivor annuity. Accordingly, A will include \$3,600 of retired pay in gross income for 1966 (\$6,000 minus the sum of \$600 and \$1,800).

*Example (2).* Assume the facts in Example (1) except that A retires on disability resulting from active service and his disability is rated at 40 percent. The entire amount of disability retirement pay, prior to and including 1966, is excludable from gross income under sections 104(a)(4) and 105(d), and in 1966, section 122(a). Assume further that A attains retirement age on December 31, 1966, dies on January 1, 1967, and his widow then begins receiving a survivor annuity under the Retired Serviceman's Family Protection Plan (10 U.S.C. 1431). A's widow may exclude from gross income in 1967 and 1968 under section 72(o) and paragraph (b)(2)(ii) of this section, the \$1,800 of "consideration for the contract" i.e., the reductions in 1963, 1964, and 1965 to provide the survivor annuity. Thus, A's widow will exclude all of the survivor annuity she receives in 1967 (\$1,350) and \$450 of the \$1,350 annuity received in 1968. In addition, if A had not attained retirement age at the time of his death, his widow would, under section 101 and paragraph (a)(2) of § 1.101-2, exclude up to \$5,000 subject to the limitations of paragraph (b)(2)(ii) of this section.

*Example (3).* Assume, in the previous example, that A dies on January 1, 1965, and his widow then begins receiving a survivor annuity. Assume further that A's widow is entitled to exclude under section 72(b) \$1,000 of the \$1,350 she received in 1965. Under section 72(o) and paragraph (b)(2)(ii) of this section, A's widow for 1966 will exclude the \$200 remaining consideration for the contract (\$1,200-\$1,000) and will include \$1,150 of the survivor annuity in gross income.

*Example (4).* B, a member of the uniformed services, retires on January 1, 1966, after 32 years of active military service, and receives disability retirement pay under section 1401 of title 10, limited to 75 percent of his active duty pay of \$15,000 per year, or \$11,250. His disability rating is 30 percent. B has not reached retirement age (as defined in § 1.79-2(b)(3)). He elects under the Retired Serviceman's Family Protection Plan (10 U.S.C. 1431) to provide his survivor with an annuity equal to one-half of his reduced retired pay and, for that purpose, his retired pay of \$11,250 is reduced by \$1,250 to provide an annuity of \$5,000 per year. B also elects to waive retired pay in the amount of \$1,000 in order to receive disability compensation in like amount under laws administered by the Veterans Administration. In addition, B is required to forfeit \$4,088 of his retired pay under the Dual Compensation Act of 1964 (5 U.S.C. 5532) (\$11,250-\$1,000 = \$10,250 less one-half of excess thereof over \$2,074) and by reason of his Federal employment is not entitled to an exclusion of his retired pay under

section 105(d). B's taxable retired pay for 1966 is \$3,002, computed as follows:

Gross retired pay .....	\$11,250
Less: Section 122(a) exclusion .....	(1,250)
Reduced retired pay .....	10,000
Less: Retired pay waived to receive V.A. compensation .....	(1,000)
Adjusted retired pay—	9,000
Less:	
(i) Excludable retired pay computed under section 104(a)(4) as limited by 10 U.S.C. 1403 .....	\$4,500
(ii) Less: Retired pay, not to exceed (i), waived to receive V.A. compensation .....	(1,000)
(iii) Net disability exclusion .....	(3,500)
Taxable retired pay before adjustment for Dual Compensation forfeiture .....	5,500
Less:	
Adjustment for Dual Compensation forfeiture of \$4,088	
5500+9000×\$4,088 = \$2,498 (rounded) .....	(2,498)
Net taxable retired pay .....	3,002

*Example (5).* C, a member of the uniformed services retires on January 1, 1966, and receives disability retirement pay of \$11,250 per year, which is reduced by \$1,250 to provide a survivor annuity, and \$1,000 of which is waived in order to receive disability compensation in like amount under laws administered by the Veterans Administration. C has not reached retirement age for purposes of section 105(d) and is not employed by the Federal Government. C's taxable disability retirement pay for 1966 is \$300 computed as follows:

Adjusted retired pay .....	\$9,000
Less:	
(i) Excludable retired pay under section (a)(4) as limited by 10 U.S.C. 1403 .....	\$4,500
(ii) Excludable retired pay under section 105(d) .....	5,200
(iii) Total .....	9,700
(iv) Less: Retired pay, not to exceed (iii), waived to receive V.A. compensation "sick pay" exclusion .....	(1,000)
(v) Net disability and "sick pay" exclusion .....	(8,700)
Net taxable retired pay .....	800

*Example (6).* D, a member of the uniformed services, retires for physical disability resulting from active service on January 1, 1966, after 35 years of service and with a disability rated at 20 percent. His active duty pay is \$4,000 per year and he attained retirement age prior to retirement. He had an election in effect under the Retired Serviceman's Family Protection Plan to provide his survivor with an annuity and his retired pay is reduced therefor by \$500 per year. He

**Internal Revenue Service, Treasury**

**§ 1.123-1**

waives \$1,300 of his retired pay in order to receive compensation from the Veterans Administration in like amount. His taxable retired pay for 1966 is \$1,200 computed as follows:

Gross retired pay (75%×\$4,000) .....	\$3,000	
Less: Section 122(a) exclusion .....	(500)	
Reduced retired pay .....	2,500	
Less: V.A. waiver .....	(1,300)	
Adjusted retired pay .....	1,200	
Less:		
(i) Section 104(a)(4) exclusion .....	\$800	
(ii) Less: Retired pay, not to exceed (i), waived to receive V.A. compensation .....	(800)	
(iii) Net disability exclusion .....	0	
Net taxable retired pay .....		1,200

(e) *Principles applicable to the Survivor Benefit Plan.* The principles illustrated by the examples set forth in paragraph (d) of this section apply to an annuity under the Survivor Benefit Plan (10 U.S.C. 1447).

[T.D. 7043, 35 FR 8478, June 2, 1970, as amended by T.D. 7562, 43 FR 38819, Aug. 31, 1978]

**§ 1.123-1 Exclusion of insurance proceeds for reimbursement of certain living expenses.**

(a) *In general.* (1) Gross income does not include insurance proceeds received by an individual on or after January 1, 1969, pursuant to the terms of an insurance contract for indemnification of the temporary increase in living expenses resulting from the loss of use or occupancy of his principal residence, or a part thereof, due to damage or destruction by fire, storm, or other casualty. The term "other casualty" has the same meaning assigned to such term under section 165(c)(3). The exclusion also applies in the case of an individual who is denied access to his principal residence by governmental authorities because of the occurrence (or threat of occurrence) of such a casualty. The amount excludable under this section is subject to the limitation set forth in paragraph (b) of this section.

(2) This exclusion applies to amounts received as reimbursement or compensation for the reasonable and necessary increase in living expenses incurred by the insured and members of his household to maintain their cus-

tomary standard of living during the loss period.

(3) This exclusion does not apply to an insurance recovery for the loss of rental income. Nor does the exclusion apply to any insurance recovery which compensates for the loss of, or damage to, real or personal property. See section 165(c)(3) relating to casualty losses; section 1231 relating to gain on an involuntary conversion of a capital asset held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977); and section 1033 relating to recognition of gain on an involuntary conversion. In the case of property used by an insured partially as a principal residence and partially for other purposes, the exclusion does not apply to the amount of insurance proceeds which compensates for the portion of increased expenses attributable to the nonresidential use of temporary replacement property during the loss period. In the case of denial of access to a principal residence by governmental authority, the exclusion provided by this section does not apply to an insurance recovery received by an individual as reimbursement for living expenses incurred by reason of a governmental condemnation or order not related to a casualty or the threat of a casualty.

(4)(i) Subject to the limitation set forth in paragraph (b), the amount excludable is the amount which is identified by the insurer as being paid exclusively for increased living expenses resulting from the loss of use or occupancy of the principal residence and pursuant to the terms of the insurance contract.

(ii) When a lump-sum insurance settlement includes, but does not specifically identify, compensation for property damage, loss of rental income, and increased living expenses, the amount of such settlement allocable to living expenses shall, in the case of uncontested claims, be that portion of the settlement which bears the same ratio to the total recovery as the amount of claimed increased living expense bears to the total amount of

claimed losses and expenses, to the extent not in excess of the coverage limitations specified in the contract for such losses and expenses.

(iii) In the case of a lump-sum settlement involving contested claims, the insured shall establish the amount reasonably allocable to increased living expenses, consistent with the terms of the contract and other facts of the particular case.

(iv) In no event may the amount of a lump-sum settlement which is allocable to increased living expenses exceed the coverage limitation specified in the contract for increased living expenses. Where, however, a coverage limitation is applicable to the total amount payable for increased living expenses and, for example, loss of rental income, the amount of an unitemized settlement which is allocable to increased living expenses may not exceed the portion of the applicable coverage limitation which bears the same ratio to such limitation as the amount of increased living expenses bears to the sum of the amount of such increased living expenses and the amount, if any, of lost rental income.

(5) The portion of any insurance recovery for increased living expenses which exceeds the limitation set forth in paragraph (b) shall be included in gross income under section 61 of the Code.

(b) *Limitation*—(1) *Amount excludable*. The amount excludable under this section is limited to amounts received which are not in excess of the amount by which (i) total actual living expenses incurred by the insured and members of his household which result from the loss of use or occupancy of their residence exceed (ii) the total normal living expenses which would have been incurred during the loss period but are not incurred as a result of the loss of use or occupancy of the principal residence. Generally, the excludable amount represents such excess expenses actually incurred by reason of a casualty, or threat thereof, for renting suitable housing and for extraordinary expenses for transportation, food, utilities, and miscellaneous services during the period of repair or replacement of the damaged principal

residence or denial of access by governmental authority.

(2) *Actual living expenses*. For purposes of this section, actual living expenses are the reasonable and necessary expenses incurred as a result of the loss of use or occupancy of the principal residence to maintain the insured and members of his household in accordance with their customary standard of living. Actual living expenses must be of such a nature as to qualify as a reimbursable expense under the terms of the applicable insurance contract without regard to monetary limitations upon coverage. Generally, actual living expenses include the cost during the loss period of temporary housing, utilities furnished at the place of temporary housing, meals obtained at restaurants which customarily would have been prepared in the residence, transportation, and other miscellaneous services. To the extent that the loss of use or occupancy of the principal residence results merely in an increase in the amount expended for items of living expenses normally incurred, such as food and transportation, only the increase in such costs shall be considered as actual living expenses in computing the limitation.

(3) *Normal living expenses not incurred*. Normal living expenses consist of the same categories of expenses comprising actual living expenses which would have been incurred but are not incurred as a result of the casualty or threat thereof. If the loss of use of the residence results in a decrease in the amount normally expended for a living expense item during the loss period, the item of normal living expense is considered not to have been incurred to the extent of the decrease for purposes of computing the limitation.

(4) *Examples*. The application of this paragraph (b) may be illustrated by the following examples:

*Example (1)*. On March 1, 1970, A's principal residence, a dwelling owned by A no part of which was rented to others or used for non-residential purposes, was extensively damaged by fire. The damaged residence was under repair during the entire month of March making it necessary for A and his spouse to obtain temporary lodging and to take their meals at a restaurant. A and his spouse incur expenses of \$200 for lodging at a

**Internal Revenue Service, Treasury**

**§ 1.125-2T**

motel, \$180 for meals which customarily would have been prepared in his residence, and \$25 for commercial laundry service which customarily would have been done by A's wife. A makes (directly or through mortgage insurance), or remains liable for, the required March payment of \$190 on the mortgage note on his residence. The mortgage payment results from a contractual obligation having no causal relationship to the occurrence of the casualty and is not considered as an actual living expense resulting from the loss of use of the residence. A's customary commuting expense of \$40 for bus fares to and from work is decreased by \$20 for the month because of the motel's closer proximity to his place of employment. Other transportation expenses remain stable. Since there has been a decrease in the amount of A's customary bus fares, normal transportation expenses are considered not to have been incurred to the extent of the decrease. Finally, A does not incur customary expenses of \$150 for food obtained for home preparation, \$75 for utilities expenses, and \$10 for laundry cleansers. The limitation upon the excludable amount of an insurance recovery for excess living expenses is \$150, computed as follows:

LIVING EXPENSES			
	Actual resulting from casualty	Normal not incurred	Increase (decrease)
Housing .....	\$200.00	.....	\$200.00
Utilities .....	.....	\$75.00	(75.00)
Meals .....	180.00	150.00	30.00
Transportation .....	.....	20.00	(20.00)
Laundry .....	25.00	10.00	150.00
Total .....	405.00	255.00	15.00

*Example (2).* Assume the same facts as in example (1) except that the damaged residence is not owned by A but is rented to him for \$100 per month and that the risk of loss is upon the lessor. Since A would not have incurred the normal rental of \$100 for March, the excludable amount is limited to \$50 (\$150 as in previous example less \$100 normal rent not incurred).

(c) *Principal residence.* Whether or not property is used by the insured taxpayer and members of his household as their principal residence depends upon all the facts and circumstances in each case. For purposes of this section, a principal residence may be a dwelling or an apartment leased to the insured

as well as a dwelling or apartment owned by the insured.

[T.D. 7118, 36 FR 10729, June 2, 1971, as amended by T.D. 7728, 45 FR 72650, Nov. 3, 1980]

**§ 1.125-2T Question and answer relating to the benefits that may be offered under a cafeteria plan (temporary).**

Q-1: What benefits may be offered to participants under a cafeteria plan?

A-1: (a) Generally, for cafeteria plan years beginning on or after January 1, 1985, a cafeteria plan is a written plan under which participants may choose among two or more benefits consisting of cash and certain other permissible benefits. In general, benefits that are excludable from the gross income of an employee under a specific section of the Internal Revenue Code may be offered under a cafeteria plan. However, scholarships and fellowships under section 117, vanpooling under section 124, educational assistance under section 127 and certain fringe benefits under section 132 may not be offered under a cafeteria plan. In addition, meals and lodging under section 119, because they are furnished for the convenience of the employer and thus are not elective in lieu of other benefits or compensation provided by the employer, may not be offered under a cafeteria plan. Thus, a cafeteria plan may offer coverage under a group-term life insurance plan of up to \$50,000 (section 79), coverage under an accident or health plan (sections 105 and 106), coverage under a qualified group legal services plan (section 120), coverage under a dependent care assistance program (section 129), and participation in a qualified cash or deferred arrangement that is part of a profit-sharing or stock bonus plan (section 401(k)). In addition, a cafeteria plan may offer group-term life insurance coverage which is includable in gross income only because it is in excess of \$50,000 or is on the lives of the participant's spouse and/or children. In addition, a cafeteria plan may offer participants the opportunity to purchase, with after-tax employee contributions, coverage under a group-term life insurance plan (section 79), coverage under an accident or health plan (section 105(e)), coverage under a

qualified group legal services plan (section 120), or coverage under a dependent care assistance program (section 129). Finally, a cafeteria plan may offer paid vacation days if the plan precludes any participant from using, or receiving cash for, in a subsequent plan year, any of such paid vacation days remaining unused as of the end of the plan year. For purposes of the preceding sentence, elective vacation days provided under a cafeteria plan are not considered to be used until all nonelective paid vacation days have been used.

(b) Note that benefits that may be offered under a cafeteria plan may or may not be taxable depending upon whether such benefits qualify for an exclusion from gross income. However, a cafeteria plan may not offer a benefit that is taxable because such benefit fails to satisfy any applicable eligibility, coverage, or nondiscrimination requirement. Similarly, a plan may not offer a benefit for purchase with after-tax employee contributions if such benefit would fail to satisfy any eligibility, coverage, or nondiscrimination requirement that would apply if such benefit were designed to be provided on a nontaxable basis with employer contributions. Also, note that section 125(d)(2) provides that a cafeteria plan may not offer a benefit that defers the receipt of compensation (other than the opportunity to make elective contributions under a qualified cash or deferred arrangement) and may not operate in a manner that enables participants to defer the receipt of compensation.

[T.D. 8073, 51 FR 4318, Feb. 4, 1986]

**§ 1.125-3 Effect of the Family and Medical Leave Act (FMLA) on the operation of cafeteria plans.**

The following questions and answers provide guidance on the effect of the Family and Medical Leave Act (FMLA), 29 U.S.C. 2601 *et seq.*, on the operation of cafeteria plans:

**Q-1:** May an employee revoke coverage or cease payment of his or her share of group health plan premiums when taking unpaid FMLA, 29 U.S.C. 2601 *et seq.*, leave?

**A-1:** Yes. An employer must either allow an employee on unpaid FMLA leave to revoke coverage, or continue

coverage but allow the employee to discontinue payment of his or her share of the premium for group health plan coverage (including a health flexible spending arrangement (FSA)) under a cafeteria plan for the period of the FMLA leave. See 29 CFR 825.209(e). FMLA does not require that an employer allow an employee to revoke coverage if the employer pays the employee's share of premiums. As discussed in Q&A-3, if the employer continues coverage during an FMLA leave, the employer may recover the employee's share of the premiums when the employee returns to work. FMLA also provides the employee a right to be reinstated in the group health plan coverage (including a health FSA) provided under a cafeteria plan upon returning from FMLA leave if the employee's group health plan coverage terminated while on FMLA leave (either by revocation or due to nonpayment of premiums). Such an employee is entitled, to the extent required under FMLA, to be reinstated on the same terms as prior to taking FMLA leave (including family or dependent coverage), subject to any changes in benefit levels that may have taken place during the period of FMLA leave as provided in 29 CFR 825.215(d)(1). See 29 CFR 825.209(e) and 825.215(d). In addition, such an employee has the right to revoke or change elections under § 1.125-4 (e.g., because of changes in status or cost or coverage changes as provided under § 1.125-4) under the same terms and conditions as are available to employees participating in the cafeteria plan who are working and not on FMLA leave.

**Q-2:** Who is responsible for making premium payments under a cafeteria plan when an employee on FMLA leave continues group health plan coverage?

**A-2:** FMLA provides that an employee is entitled to continue group health plan coverage during FMLA leave whether or not that coverage is provided under a health FSA or other component of a cafeteria plan. See 29 CFR 825.209(b). FMLA permits an employer to require an employee who chooses to continue group health plan coverage while on FMLA leave to be responsible for the share of group health premiums that would be allocable to

the employee if the employee were working, and, for this purpose, treats amounts paid pursuant to a pre-tax salary reduction agreement as amounts allocable to the employee. However, FMLA requires the employer to continue to contribute the share of the cost of the employee's coverage that the employer was paying before the employee commenced FMLA leave. See 29 CFR 825.100(b) and 825.210(a).

**Q-3:** What payment options are required or permitted to be offered under a cafeteria plan to an employee who continues group health plan coverage while on unpaid FMLA leave, and what is the tax treatment of these payments?

**A-3:** (a) *In general.* Subject to the limitations described in paragraph (b) of this Q&A-3, a cafeteria plan may offer one or more of the following payment options, or a combination of these options, to an employee who continues group health plan coverage (including a health FSA) while on unpaid FMLA leave; provided that the payment options for employees on FMLA leave are offered on terms at least as favorable as those offered to employees not on FMLA leave. These options are referred to in this section as pre-pay, pay-as-you-go, and catch-up. See also the FMLA notice requirements at 29 CFR 825.301(b)(1)(iv).

(1) *Pre-pay.* (i) Under the pre-pay option, a cafeteria plan may permit an employee to pay, prior to commencement of the FMLA leave period, the amounts due for the FMLA leave period. However, FMLA provides that the employer may not mandate that an employee pre-pay the amounts due for the leave period. See 29 CFR 825.210(c)(3) and (4).

(ii) Contributions under the pre-pay option may be made on a pre-tax salary reduction basis from any taxable compensation (including from unused sick days or vacation days). However, see Q&A-5 of this section regarding additional restrictions on pre-tax salary reduction contributions when an employee's FMLA leave spans two cafeteria plan years.

(iii) Contributions under the pre-pay option may also be made on an after-tax basis.

(2) *Pay-as-you-go.* (i) Under the pay-as-you-go option, employees may pay their share of the premium payments on the same schedule as payments would have been made if the employee were not on leave or under any other payment schedule permitted by the Labor Regulations at 29 CFR 825.210(c) (e.g., on the same schedule as payments are made under section 4980B (relating to coverage under the Consolidated Omnibus Budget Reconciliation Act (COBRA), 26 U.S.C. 4980B), under the employer's existing rules for payment by employees on leave without pay, or under any other system voluntarily agreed to between the employer and the employee that is not inconsistent with this section or with 29 CFR 825.210(c)).

(ii) Contributions under the pay-as-you-go option are generally made by the employee on an after-tax basis. However, contributions may be made on a pre-tax basis to the extent that the contributions are made from taxable compensation (e.g., from unused sick days or vacation days) that is due the employee during the leave period.

(iii) An employer is not required to continue the group health coverage of an employee who fails to make required premium payments while on FMLA leave, provided that the employer follows the notice procedures required under FMLA. See 29 CFR 825.212. However, if the employer chooses to continue the health coverage of an employee who fails to pay his or her share of the premium payments while on FMLA leave, FMLA permits the employer to recoup the premiums (to the extent of the employee's share). See 29 CFR 825.212(b). Such recoupment may be made as set forth in paragraphs (a)(3)(i) and (ii) of this Q&A-3. See also Q&A-6 of this section regarding coverage under a health FSA when an employee fails to make the required premium payments while on FMLA leave.

(3) *Catch-up.* (i) Under the catch-up option, the employer and the employee may agree in advance that the group coverage will continue during the period of unpaid FMLA leave, and that the employee will not pay premiums until the employee returns from the FMLA leave. Where an employee is electing to use the catch-up option, the

employer and the employee must agree in advance of the coverage period that: the employee elects to continue health coverage while on unpaid FMLA leave; the employer assumes responsibility for advancing payment of the premiums on the employee's behalf during the FMLA leave; and these advance amounts are to be paid by the employee when the employee returns from FMLA leave.

(ii) When an employee fails to make required premium payments while on FMLA leave, an employer is permitted to utilize the catch-up option to recoup the employee's share of premium payments when the employee returns from FMLA leave. See, e.g., 29 CFR 825.212(b). If the employer chooses to continue group coverage under these circumstances, the prior agreement of the employee, as set forth in paragraph (a)(3)(i) of this Q&A-3, is not required.

(iii) Contributions under the catch-up option may be made on a pre-tax salary reduction basis from any available taxable compensation (including from unused sick days and vacation days) after the employee returns from FMLA leave. The cafeteria plan may provide for the catch-up option to apply on a pre-tax salary reduction basis if premiums have not been paid on any other basis (*i.e.*, have not been paid under the pre-pay or pay-as-you-go options or on a catch-up after-tax basis).

(iv) Contributions under the catch-up option may also be made on an after-tax basis.

(b) *Exceptions.* Whatever payment options are offered to employees on non-FMLA leave must be offered to employees on FMLA leave. In accordance with 29 CFR 825.210(c), cafeteria plans may offer one or more of the payment options described in paragraph (a) of this Q&A-3, with the following exceptions:

(1) FMLA does not permit the pre-pay option to be the sole option offered to employees on FMLA leave. However, the cafeteria plan may include pre-payment as an option for employees on FMLA leave, even if such option is not offered to employees on non-FMLA leave-without-pay.

(2) FMLA allows the catch-up option to be the sole option offered to employees on FMLA leave if and only if the

catch-up option is the sole option offered to employees on non-FMLA leave-without-pay.

(3) If the pay-as-you-go option is offered to employees on non-FMLA leave-without-pay, the option must also be offered to employees on FMLA leave. The employer may also offer employees on FMLA leave the pre-pay option and/or the catch-up option.

(c) *Voluntary waiver of employee payments.* In addition to the foregoing payment options, an employer may voluntarily waive, on a nondiscriminatory basis, the requirement that employees who elect to continue group health coverage while on FMLA leave pay the amounts the employees would otherwise be required to pay for the leave period.

(d) *Example.* The following example illustrates this Q&A-3:

*Example.* (i) Employer Y allows employees to pay premiums for group health coverage during an FMLA leave on an after-tax basis while the employee is on unpaid FMLA leave. Under the terms of Y's cafeteria plan, if an employee elects to continue health coverage during an unpaid FMLA leave and fails to pay one or more of the after-tax premium payments due for that coverage, the employee's salary after the employee returns from FMLA leave is reduced to cover unpaid premiums (*i.e.* the premiums that were to be paid by the employee on an after-tax basis during the FMLA leave, but were paid by the employer instead).

(ii) In this *Example*, Y's cafeteria plan satisfies the conditions in this Q&A-3. Y's cafeteria plan would also satisfy the conditions in this Q&A-3 if the plan provided for coverage to cease in the event the employee fails to make a premium payment when due during an unpaid FMLA leave.

**Q-4:** Do the special FMLA requirements concerning payment of premiums by an employee who continues group health plan coverage under a cafeteria plan apply if the employee is on paid FMLA leave?

**A-4:** No. The Labor Regulations provide that, if an employee's FMLA leave is paid leave as described at 29 CFR 825.207 and the employer mandates that the employee continue group health plan coverage while on FMLA leave, the employee's share of the premiums must be paid by the method normally used during any paid leave (e.g., by pre-tax salary reduction if the employee's share of premiums were paid by pre-tax

salary reduction before the FMLA leave began). See 29 CFR 825.210(b).

Q-5: What restrictions apply to contributions when an employee's FMLA leave spans two cafeteria plan years?

A-5: (a) No amount will be included in an employee's gross income due to participation in a cafeteria plan during FMLA leave, provided that the plan complies with other generally applicable cafeteria plan requirements. Among other requirements, a plan may not operate in a manner that enables employees on FMLA leave to defer compensation from one cafeteria plan year to a subsequent cafeteria plan year. See section 125(d)(2).

(b) The following example illustrates this Q&A-5:

*Example.* (i) Employee A elects group health coverage under a calendar year cafeteria plan maintained by Employer X. Employee A's premium for health coverage is \$100 per month throughout the 12-month period of coverage. Employee A takes FMLA leave for 12 weeks beginning on October 31 after making 10 months of premium payments totaling \$1,000 (10 months × \$100 = \$1,000). Employee A elects to continue health coverage while on FMLA leave and utilizes the pre-pay option by applying his or her unused sick days in order to make the required premium payments due while he or she is on FMLA leave.

(ii) Because A cannot defer compensation from one plan year to a subsequent plan year, A may pre-pay the premiums due in November and December (*i.e.*, \$100 per month) on a pre-tax basis, but A cannot pre-pay the premium payment due in January on a pre-tax basis. If A participates in the cafeteria plan in the subsequent plan year, A must either pre-pay for January on an after-tax basis or use another option (*e.g.*, pay-as-you-go, catch-up, reduction in unused sick days, etc.) to make the premium payment due in January.

Q-6: Are there special rules concerning employees taking FMLA leave who participate in health FSAs offered under a cafeteria plan?

A-6: (a) *In general.* (1) A group health plan that is a flexible spending arrangement (FSA) offered under a cafeteria plan must conform to the generally applicable rules in this section concerning employees who take FMLA leave. Thus, to the extent required by FMLA (see 29 CFR 825.209(b)), an employer must—

(i) Permit an employee taking FMLA leave to continue coverage under a health FSA while on FMLA leave; and

(ii) If an employee is on unpaid FMLA leave, either—

(A) Allow the employee to revoke coverage; or

(B) Continue coverage, but allow the employee to discontinue payment of his or her share of the premium for the health FSA under the cafeteria plan during the unpaid FMLA leave period.

(2) Under FMLA, the plan must permit the employee to be reinstated in health coverage upon return from FMLA leave on the same terms as if the employee had been working throughout the leave period, without a break in coverage. See 29 CFR 825.214(a) and 825.215(d)(1) and paragraph (b)(2) of this Q&A-6. In addition, under FMLA, a plan may require an employee to be reinstated in health coverage upon return from a period of unpaid FMLA leave, provided that employees who return from a period of unpaid leave not covered by the FMLA are also required to resume participation upon return from leave.

(b) *Coverage.* (1) Regardless of the payment option selected under Q&A-3 of this section, for so long as the employee continues health FSA coverage (or for so long as the employer continues the health FSA coverage of an employee who fails to make the required contributions as described in Q&A-3(a)(2)(iii) of this section), the full amount of the elected health FSA coverage, less any prior reimbursements, must be available to the employee at all times, including the FMLA leave period.

(2)(i) If an employee's coverage under the health FSA terminates while the employee is on FMLA leave, the employee is not entitled to receive reimbursements for claims incurred during the period when the coverage is terminated. If an employee subsequently elects or the employer requires the employee to be reinstated in the health FSA upon return from FMLA leave for the remainder of the plan year, the employee may not retroactively elect health FSA coverage for claims incurred during the period when the coverage was terminated. Upon reinstatement into a health FSA upon return

from FMLA leave (either because the employee elects reinstatement or because the employer requires reinstatement), the employee has the right under FMLA: to resume coverage at the level in effect before the FMLA leave and make up the unpaid premium payments, or to resume coverage at a level that is reduced and resume premium payments at the level in effect before the FMLA leave. If an employee chooses to resume health FSA coverage at a level that is reduced, the coverage is prorated for the period during the FMLA leave for which no premiums were paid. In both cases, the coverage level is reduced by prior reimbursements.

(ii) FMLA requires that an employee on FMLA leave have the right to revoke or change elections (because of events described in § 1.125-4) under the same terms and conditions that apply to employees participating in the cafeteria plan who are not on FMLA leave. Thus, for example, if a group health plan offers an annual open enrollment period to active employees, then, under FMLA, an employee on FMLA leave when the open enrollment is offered must be offered the right to make election changes on the same basis as other employees. Similarly, if a group health plan decides to offer a new benefit package option and allows active employees to elect the new option, then, under FMLA, an employee on FMLA leave must be allowed to elect the new option on the same basis as other employees.

(3) The following examples illustrate the rules in this Q&A-6:

*Example 1.* (i) Employee B elects \$1,200 worth of coverage under a calendar year health FSA provided under a cafeteria plan, with an annual premium of \$1,200. Employee B is permitted to pay the \$1,200 through pre-tax salary reduction amounts of \$100 per month throughout the 12-month period of coverage. Employee B incurs no medical expenses prior to April 1. On April 1, B takes FMLA leave after making three months of contributions totaling \$300 (3 months × \$100 = \$300). Employee B's coverage ceases during the FMLA leave. Consequently, B makes no premium payments for the months of April, May, and June, and B is not entitled to submit claims or receive reimbursements for expenses incurred during this period. Employee B returns from FMLA leave and elects to be reinstated in the health FSA on July 1.

(ii) Employee B must be given a choice of resuming coverage at the level in effect before the FMLA leave (*i.e.*, \$1,200) and making up the unpaid premium payments (\$300), or resuming health FSA coverage at a level that is reduced on a prorata basis for the period during the FMLA leave for which no premiums were paid (*i.e.*, reduced for 3 months or 1/4 of the plan year) less prior reimbursements (*i.e.*, \$0) with premium payments due in the same monthly amount payable before the leave (*i.e.*, \$100 per month). Consequently, if B chooses to resume coverage at the level in effect before the FMLA leave, B's coverage for the remainder of the plan year would equal \$1,200 and B's monthly premiums would be increased to \$150 per month for the remainder of the plan year, to make up the \$300 in premiums missed (\$100 per month plus \$50 per month (\$300 divided by the remaining 6 months)). If B chooses prorated coverage, B's coverage for the remainder of the plan year would equal \$900, and B would resume making premium payments of \$100 per month for the remainder of the plan year.

*Example 2.* (i) Assume the same facts as *Example 1* except that B incurred medical expenses totaling \$200 in February and obtained reimbursement of these expenses.

(ii) The results are the same as in *Example 1*, except that if B chooses to resume coverage at the level in effect before the FMLA leave, B's coverage for the remainder of the year would equal \$1,000 (\$1,200 reduced by \$200) and the monthly payments for the remainder of the year would still equal \$150. If instead B chooses prorated coverage, B's coverage for the remainder of the plan year would equal \$700 (\$1,200 prorated for 3 months, and then reduced by \$200) and the monthly payments for the remainder of the year would still equal \$100.

*Example 3.* (i) Assume the same facts as *Example 1* except that, prior to taking FMLA leave, B elects to continue health FSA coverage during the FMLA leave. The plan permits B (and B elects) to use the catch-up payment option described in Q&A-3 of this section, and as further permitted under the plan, B chooses to repay the \$300 in missed payments on a ratable basis over the remaining 6-month period of coverage (*i.e.*, \$50 per month).

(ii) Thus, B's monthly premium payments for the remainder of the plan year will be \$150 (\$100 + \$50).

Q-7: Are employees entitled to non-health benefits while taking FMLA leave?

A-7: FMLA does not require an employer to maintain an employee's non-health benefits (e.g., life insurance) during FMLA leave. An employee's entitlement to benefits other than group

health benefits under a cafeteria plan during a period of FMLA leave is to be determined by the employer's established policy for providing such benefits when the employee is on non-FMLA leave (paid or unpaid). See 29 CFR 825.209(h). Therefore, an employee who takes FMLA leave is entitled to revoke an election of non-health benefits under a cafeteria plan to the same extent as employees taking non-FMLA leave are permitted to revoke elections of non-health benefits under a cafeteria plan. For example, election changes are permitted due to changes of status or upon enrollment for a new plan year. See § 1.125-4. However, FMLA provides that, in certain cases, an employer may continue an employee's non-health benefits under the employer's cafeteria plan while the employee is on FMLA leave in order to ensure that the employer can meet its responsibility to provide equivalent benefits to the employee upon return from unpaid FMLA. If the employer continues an employee's non-health benefits during FMLA leave, the employer is entitled to recoup the costs incurred for paying the employee's share of the premiums during the FMLA leave period. See 29 CFR 825.213(b). Such recoupment may be on a pre-tax basis. A cafeteria plan must, as required by FMLA, permit an employee whose coverage terminated while on FMLA leave (either by revocation or nonpayment of premiums) to be reinstated in the cafeteria plan on return from FMLA leave. See 29 CFR 825.214(a) and 825.215(d).

Q-8: What is the applicability date of the regulations in this section?

A-8: This section is applicable for cafeteria plan years beginning on or after January 1, 2002.

[T.D. 8966, 66 FR 52677, Oct. 17, 2001; 66 FR 63920, Dec. 11, 2001]

#### § 1.125-4 Permitted election changes.

(a) *Election changes.* A cafeteria plan may permit an employee to revoke an election during a period of coverage and to make a new election only as provided in paragraphs (b) through (g) of this section. Section 125 does not require a cafeteria plan to permit any of these changes. See paragraph (h) of this section for special provisions relating to qualified cash or deferred ar-

rangements, and paragraph (i) of this section for special definitions used in this section.

(b) *Special enrollment rights—(1) In general.* A cafeteria plan may permit an employee to revoke an election for coverage under a group health plan during a period of coverage and make a new election that corresponds with the special enrollment rights provided in section 9801(f).

(2) *Examples.* The following examples illustrate the application of this paragraph (b):

*Example 1.* (i) Employer *M* provides health coverage for its employees pursuant to a plan that is subject to section 9801(f). Under the plan, employees may elect either employee-only coverage or family coverage. *M* also maintains a calendar year cafeteria plan under which qualified benefits, including health coverage, are funded through salary reduction. *M*'s employee, *A*, is married to *B* and they have a child, *C*. In accordance with *M*'s cafeteria plan, Employee *A* elects employee-only health coverage before the beginning of the calendar year. During the year, *A* and *B* adopt a child, *D*. Within 30 days thereafter, *A* wants to revoke *A*'s election for employee-only health coverage and obtain family health coverage for *A*'s spouse, *C*, and *D* as of the date of *D*'s adoption. Employee *A* satisfies the conditions for special enrollment of an employee with a new dependent under section 9801(f)(2), so that *A* may enroll in family coverage under *M*'s accident or health plan in order to provide coverage effective as of the date of *D*'s adoption.

(ii) *M*'s cafeteria plan may permit *A* to change *A*'s salary reduction election to family coverage for salary not yet currently available. The increased salary reduction is permitted to reflect the cost of family coverage from the date of adoption. (*A*'s adoption of *D* is also a change in status, and the election of family coverage is consistent with that change in status. Thus, under paragraph (c) of this section, *M*'s cafeteria plan could permit *A* to elect family coverage prospectively in order to cover *B*, *C*, and *D* for the remaining portion of the period of coverage.)

*Example 2.* (i) The employer plans and permissible coverage are the same as in *Example 1*. Before the beginning of the calendar year, Employee *E* elects employee-only health coverage under *M*'s cafeteria plan. Employee *E* marries *F* during the plan year. *F*'s employer, *N*, offers health coverage to *N*'s employees, and, prior to the marriage, *F* had elected employee-only coverage. Employee *E* wants to revoke the election for employee-only coverage under *M*'s cafeteria plan, and

is considering electing family health coverage under *M*'s plan or obtaining family health coverage under *N*'s plan.

(ii) *M*'s cafeteria plan may permit *E* to change *E*'s salary reduction election to reflect the change to family coverage under *M*'s accident or health plan because the marriage would result in special enrollment rights under section 9801(f), pursuant to which an election of family coverage under *M*'s accident or health plan would be required to be effective no later than the first day of the first calendar month beginning after the completed request for enrollment is received by the plan. Since no retroactive coverage is required in the event of marriage under section 9801(f), *E*'s salary reduction election may only be changed on a prospective basis. (*E*'s marriage to *F* is also a change in status under paragraph (c) of this section, as illustrated in Example 1 of paragraph (c)(4) of this section.)

(c) *Changes in status*—(1) *Change in status rule*. A cafeteria plan may permit an employee to revoke an election during a period of coverage with respect to a qualified benefits plan (defined in paragraph (i)(8) of this section) to which this paragraph (c) applies and make a new election for the remaining portion of the period (referred to in this section as an election change) if, under the facts and circumstances—

(i) A change in status described in paragraph (c)(2) of this section occurs; and

(ii) The election change satisfies the consistency rule of paragraph (c)(3) of this section.

(2) *Change in status events*. The following events are changes in status for purposes of this paragraph (c):

(i) *Legal marital status*. Events that change an employee's legal marital status, including the following: marriage; death of spouse; divorce; legal separation; and annulment.

(ii) *Number of dependents*. Events that change an employee's number of dependents, including the following: birth; death; adoption; and placement for adoption.

(iii) *Employment status*. Any of the following events that change the employment status of the employee, the employee's spouse, or the employee's dependent: a termination or commencement of employment; a strike or lockout; a commencement of or return from an unpaid leave of absence; and a change in worksite. In addition, if the

eligibility conditions of the cafeteria plan or other employee benefit plan of the employer of the employee, spouse, or dependent depend on the employment status of that individual and there is a change in that individual's employment status with the consequence that the individual becomes (or ceases to be) eligible under the plan, then that change constitutes a change in employment under this paragraph (c) (e.g., if a plan only applies to salaried employees and an employee switches from salaried to hourly-paid with the consequence that the employee ceases to be eligible for the plan, then that change constitutes a change in employment status under this paragraph (c)(2)(iii)).

(iv) *Dependent satisfies or ceases to satisfy eligibility requirements*. Events that cause an employee's dependent to satisfy or cease to satisfy eligibility requirements for coverage on account of attainment of age, student status, or any similar circumstance.

(v) *Residence*. A change in the place of residence of the employee, spouse, or dependent.

(vi) *Adoption assistance*. For purposes of adoption assistance provided through a cafeteria plan, the commencement or termination of an adoption proceeding.

(3) *Consistency rule*—(i) *Application to accident or health coverage and group-term life insurance*. An election change satisfies the requirements of this paragraph (c)(3) with respect to accident or health coverage or group-term life insurance only if the election change is on account of and corresponds with a change in status that affects eligibility for coverage under an employer's plan. A change in status that affects eligibility under an employer's plan includes a change in status that results in an increase or decrease in the number of an employee's family members or dependents who may benefit from coverage under the plan.

(ii) *Application to other qualified benefits*. An election change satisfies the requirements of this paragraph (c)(3) with respect to other qualified benefits if the election change is on account of and corresponds with a change in status that affects eligibility for coverage under an employer's plan. An election

change also satisfies the requirements of this paragraph (c)(3) if the election change is on account of and corresponds with a change in status that effects expenses described in section 129 (including employment-related expenses as defined in section 21(b)(2)) with respect to dependent care assistance, or expenses described in section 137 (including qualified adoption expenses as defined in section 137(d)) with respect to adoption assistance.

(iii) *Application of consistency rule.* If the change in status is the employee's divorce, annulment or legal separation from a spouse, the death of a spouse or dependent, or a dependent ceasing to satisfy the eligibility requirements for coverage, an employee's election under the cafeteria plan to cancel accident or health insurance coverage for any individual other than the spouse involved in the divorce, annulment or legal separation, the deceased spouse or dependent, or the dependent that ceased to satisfy the eligibility requirements for coverage, respectively, fails to correspond with that change in status. Thus, if a dependent dies or ceases to satisfy the eligibility requirements for coverage, the employee's election to cancel accident or health coverage for any other dependent, for the employee, or for the employee's spouse fails to correspond with that change in status. In addition, if an employee, spouse, or dependent gains eligibility for coverage under a family member plan (as defined in paragraph (i)(5) of this section) as a result of a change in marital status under paragraph (c)(2)(i) of this section or a change in employment status under paragraph (c)(2)(iii) of this section, an employee's election under the cafeteria plan to cease or decrease coverage for that individual under the cafeteria plan corresponds with that change in status only if coverage for that individual becomes applicable or is increased under the family member plan. With respect to group-term life insurance and disability coverage (as defined in paragraph (i)(4) of this section), an election under a cafeteria plan to increase coverage (or an election to decrease coverage) in response to a change in status described in paragraph (c)(2) of this section is deemed to correspond with that change in status

as required by paragraph (c)(3)(i) of this section.

(iv) *Exception for COBRA.* If the employee, spouse, or dependent becomes eligible for continuation coverage under the group health plan of the employee's employer as provided in section 4980B or any similar state law, a cafeteria plan may permit the employee to elect to increase payments under the employer's cafeteria plan in order to pay for the continuation coverage.

(4) *Examples.* The following examples illustrate the application of this paragraph (c):

*Example 1.* (i) Employer *M* provides health coverage (including a health FSA) for its employees through its cafeteria plan. Before the beginning of the calendar year, Employee *A* elects employee-only health coverage under *M*'s cafeteria plan and elects salary reduction contributions to fund coverage under the health FSA. Employee *A* marries *B* during the year. Employee *B*'s employer, *N*, offers health coverage to *N*'s employees (but not including any health FSA), and, prior to the marriage, *B* had elected employee-only coverage. Employee *A* wants to revoke the election for employee-only coverage, and is considering electing family health coverage under *M*'s plan or obtaining family health coverage under *N*'s plan.

(ii) Employee *A*'s marriage to *B* is a change in status under paragraph (c)(2)(i) of this section, pursuant to which *B* has become eligible for coverage under *M*'s health plan under paragraph (c)(3)(i) of this section. Two possible election changes by *A* correspond with the change in status: Employee *A* may elect family health coverage under *M*'s plan to cover *A* and *B*; or *A* may cancel coverage under *M*'s plan, if *B* elects family health coverage under *N*'s plan to cover *A* and *B*. Thus, *M*'s cafeteria plan may permit *A* to make either election change.

(iii) Employee *A* may also increase salary reduction contributions to fund coverage for *B* under the health FSA.

*Example 2.* (i) Employee *C*, a single parent, elects family health coverage under a calendar year cafeteria plan maintained by Employer *O*. Employee *C* and *C*'s 21-year old child, *D*, are covered under *O*'s health plan. During the year, *D* graduates from college. Under the terms of the health plan, dependents over the age of 19 must be full-time students to receive coverage. Employee *C* wants to revoke *C*'s election for family health coverage and obtain employee-only coverage under *O*'s cafeteria plan.

(ii) *D*'s loss of eligibility for coverage under the terms of the health plan is a change in status under paragraph (c)(2)(iv) of

this section. A revocation of *C*'s election for family coverage and new election for employee-only coverage corresponds with the change in status. Thus, *O*'s cafeteria plan may permit *C* to elect employee-only coverage.

*Example 3.* (i) Employee *E* is married to *F* and they have one child, *G*. Employee *E* is employed by Employer *P*, and *P* maintains a calendar year cafeteria plan that allows employees to elect no health coverage, employee-only coverage, employee-plus-one-dependent coverage, or family coverage. Under the plan, before the beginning of the calendar year, *E* elects family health coverage for *E*, *F*, and *G*. *E* and *F* divorce during the year and *F* loses eligibility for coverage under *P*'s plan. *G* does not lose eligibility for health coverage under *P*'s plan upon the divorce. *E* now wants to revoke *E*'s election under the cafeteria plan and elect no coverage.

(ii) The divorce is a change in status under paragraph (c)(2)(i). A change in the cafeteria plan election to cancel health coverage for *F* is consistent with that change in status. However, an election change to cancel *E*'s or *G*'s health coverage does not satisfy the consistency rule under paragraph (c)(3)(iii) of this section regarding cancellation of coverage for an employee's other dependents in the event of divorce. Therefore, the cafeteria plan may not permit *E* to elect no coverage. However, an election to change to employee-plus-one-dependent health coverage would correspond with the change in status, and thus the cafeteria plan may permit *E* to elect employee-plus-one-dependent health coverage.

(iii) In addition, under paragraph (f)(4) of this section, if *F* makes an election change to cover *G* under *F*'s employer's plan, then *E* may make a corresponding change to elect employee-only coverage under *P*'s cafeteria plan.

*Example 4.* (i) Employer *R* maintains a calendar year cafeteria plan under which full-time employees may elect coverage under one of three benefit package options provided under an accident or health plan: an indemnity option or either of two HMO options for employees who work in the respective service areas of the two HMOs. Employee *A*, who works in the service area of HMO #1, elects the HMO #1 option. During the year, *A* is transferred to another work location which is outside the HMO #1 service area and inside the HMO #2 service area.

(ii) The transfer is a change in status under paragraph (c)(2)(iii) of this section (relating to a change in worksite), and, under the consistency rule in paragraph (c)(3) of this section, the cafeteria plan may permit *A* to make an election change to elect the indemnity option or HMO #2 or to cancel accident or health coverage.

(iii) The change in work location has no effect on *A*'s eligibility under *R*'s health FSA, so no change in *A*'s health FSA is authorized under this paragraph (c).

*Example 5.* (i) Employer *S* maintains a calendar year cafeteria plan that allows employees to elect coverage under an accident or health plan providing indemnity coverage and coverage under a health FSA. Prior to the beginning of the calendar year, Employee *B* elects employee-only indemnity coverage, and elects salary reduction contributions of \$600 during the year to fund coverage under the health FSA for up to \$600 of reimbursements for the year. Employee *B*'s spouse, *C*, has employee-only coverage under an accident or health plan maintained by *C*'s employer. During the year, *C* terminates employment and loses coverage under that plan. *B* now wants to elect family coverage under *S*'s accident or health plan and increase *B*'s FSA election.

(ii) *C*'s termination of employment is a change in status under paragraph (c)(2)(iii) of this section, and the election change satisfies the consistency rule of paragraph (c)(3) of this section. Therefore, the cafeteria plan may permit *B* to elect family coverage under *S*'s accident or health plan and to increase *B*'s FSA coverage.

*Example 6.* (i) Employer *T* provides group-term life insurance coverage as described under section 79. Under *T*'s plan, an employee may elect life insurance coverage in an amount up to \$50,000. *T* also maintains a calendar year cafeteria plan under which qualified benefits, including the group-term life insurance coverage, are funded through salary reduction. Employee *D* has a spouse and a child. Before the beginning of the year, *D* elects \$10,000 of group-term life insurance coverage. During the year, *D* is divorced.

(ii) The divorce is a change in status under paragraph (c)(2)(i) of this section. Under paragraph (c)(3)(iii) of this section, either an increase or a decrease in coverage is consistent with this change in status. Thus, *T*'s cafeteria plan may permit *D* to increase or to decrease *D*'s group-term life insurance coverage.

*Example 7.* (i) Employee *E* is married to *F* and they have one child, *G*. Employee *E*'s employer, *U*, maintains a cafeteria plan under which employees may elect no coverage, employee-only coverage, or family coverage under a group health plan maintained by *U*, and may make a separate vision coverage election under the plan. Before the beginning of the calendar year, *E* elects family health coverage and no vision coverage under *U*'s cafeteria plan. Employee *F*'s employer, *V*, maintains a cafeteria plan under which employees may elect no coverage, employee-only coverage, or family coverage under a group health plan maintained by *V*, and may make a separate vision coverage election under the plan. Before the beginning

of the calendar year, *F* elects no health coverage and employee-only vision coverage under *V*'s plan. During the year, *F* terminates employment with *V* and loses vision coverage under *V*'s plan. Employee *E* now wants to elect family vision coverage under *U*'s group health plan.

(i) *F*'s termination of employment is a change in status under paragraph (c)(2)(iii) of this section, and the election change satisfies the consistency rule of paragraph (c)(3) of this section. Therefore, *U*'s cafeteria plan may permit *E* to elect family vision coverage (covering *E* and *G* as well as *F*) under *U*'s group health plan.

*Example 8.* (i) Before the beginning of the year, Employee *H* elects to participate in a cafeteria plan maintained by *H*'s employer, *W*. However, in order to change the election during the year so as to cancel coverage, and by prior understanding with *W*, *H* terminates employment and resumes employment one week later.

(ii) In this *Example 8*, under the facts and circumstances, a principal purpose of the termination of employment was to alter the election, and reinstatement of employment was understood at the time of termination. Accordingly, *H* does not have a change in status under paragraph (c)(2)(iii) of this section.

(iii) However, *H*'s termination of employment would constitute a change in status, permitting a cancellation of coverage during the period of unemployment, if *H*'s original cafeteria plan election for the period of coverage was reinstated upon resumption of employment (for example, if *W*'s cafeteria plan contains a provision requiring an employee who resumes employment within 30 days, without any other intervening event that would permit a change in election, to return to the election in effect prior to termination of employment).

(iv) If, instead, *H* terminates employment and cancels coverage during a period of unemployment, and then returns to work more than 30 days following termination of employment, the cafeteria plan may permit *H* the option of returning to the election in effect prior to termination of employment or making a new election under the plan. Alternatively, the cafeteria plan may prohibit *H* from returning to the plan during that plan year.

*Example 9.* (i) Employee *A* has one child, *B*. Employee *A*'s employer, *X*, maintains a calendar year cafeteria plan that allows employees to elect coverage under a dependent care FSA. Prior to the beginning of the calendar year, *A* elects salary reduction contributions of \$4,000 during the year to fund coverage under the dependent care FSA for up to \$4,000 of reimbursements for the year. During the year, *B* reaches the age of 13, and *A* wants to cancel coverage under the dependent care FSA.

(ii) When *B* turns 13, *B* ceases to satisfy the definition of qualifying individual under section 21(b)(1) of the Internal Revenue Code. Accordingly, *B*'s attainment of age 13 is a change in status under paragraph (c)(2)(iv) of this section that affects *A*'s employment-related expenses as defined in section 21(b)(2). Therefore, *A* may make a corresponding change under *X*'s cafeteria plan to cancel coverage under the dependent care FSA.

*Example 10.* (i) Employer *Y* maintains a calendar year cafeteria plan under which full-time employees may elect coverage under either an indemnity option or an HMO. Employee *C* elects the employee-only indemnity option. During the year, *C* marries *D*. *D* has two children from a previous marriage, and has family group health coverage in a cafeteria plan sponsored by *D*'s employer, *Z*. *C* wishes to change from employee-only indemnity coverage to HMO coverage for the family. *D* wishes to cease coverage in *Z*'s group health plan and certifies to *Z* that *D* will have family coverage under *C*'s plan (and *Z* has no reason to believe the certification is incorrect).

(ii) The marriage is a change in status under paragraph (c)(2)(i) of this section. Under the consistency rule in paragraph (c)(3) of this section, *Y*'s cafeteria plan may permit *C* to change his or her salary reduction contributions to reflect the change from employee-only indemnity to HMO family coverage, and *Z* may permit *D* to revoke coverage under *Z*'s cafeteria plan.

(d) *Judgment, decree, or order*—(1) *Conforming election change.* This paragraph (d) applies to a judgment, decree, or order (order) resulting from a divorce, legal separation, annulment, or change in legal custody (including a qualified medical child support order as defined in section 609 of the Employee Retirement Income Security Act of 1974 (Public Law 93-406 (88 Stat. 829))) that requires accident or health coverage for an employee's child or for a foster child who is a dependent of the employee. A cafeteria plan will not fail to satisfy section 125 if it—

(i) Changes the employee's election to provide coverage for the child if the order requires coverage for the child under the employee's plan; or

(ii) Permits the employee to make an election change to cancel coverage for the child if:

(A) The order requires the spouse, former spouse, or other individual to provide coverage for the child; and

(B) That coverage is, in fact, provided.

(2) *Example.* The following example illustrates the application of this paragraph (d):

*Example.* (i) Employer *M* maintains a calendar year cafeteria plan that allows employees to elect no health coverage, employee-only coverage, employee-plus-one-dependent coverage, or family coverage. *M*'s employee, *A*, is married to *B* and they have one child, *C*. Before the beginning of the year, *A* elects employee-only health coverage. Employee *A* divorces *B* during the year and, pursuant to *A*'s divorce agreement with *B*, *M*'s health plan receives a qualified medical child support order (as defined in section 609 of the Employee Retirement Income Security Act of 1974) during the plan year. The order requires *M*'s health plan to cover *C*.

(ii) Under this paragraph (d), *M*'s cafeteria plan may change *A*'s election from employee-only health coverage to employee-plus-one-dependent coverage in order to cover *C*.

(e) *Entitlement to Medicare or Medicaid.* If an employee, spouse, or dependent who is enrolled in an accident or health plan of the employer becomes entitled to coverage (*i.e.*, becomes enrolled) under Part A or Part B of Title XVIII of the Social Security Act (Medicare) (Public Law 89-97 (79 Stat. 291)) or Title XIX of the Social Security Act (Medicaid) (Public Law 89-97 (79 Stat. 343)), other than coverage consisting solely of benefits under section 1928 of the Social Security Act (the program for distribution of pediatric vaccines), a cafeteria plan may permit the employee to make a prospective election change to cancel or reduce coverage of that employee, spouse, or dependent under the accident or health plan. In addition, if an employee, spouse, or dependent who has been entitled to such coverage under Medicare or Medicaid loses eligibility for such coverage, the cafeteria plan may permit the employee to make a prospective election to commence or increase coverage of that employee, spouse, or dependent under the accident or health plan.

(f) *Significant cost or coverage changes—(1) In general.* Paragraphs (f)(2) through (5) of this section set forth rules for election changes as a result of changes in cost or coverage. This paragraph (f) does not apply to an election change with respect to a health FSA (or on account of a change

in cost or coverage under a health FSA).

(2) *Cost changes—(i) Automatic changes.* If the cost of a qualified benefits plan increases (or decreases) during a period of coverage and, under the terms of the plan, employees are required to make a corresponding change in their payments, the cafeteria plan may, on a reasonable and consistent basis, automatically make a prospective increase (or decrease) in affected employees' elective contributions for the plan.

(ii) *Significant cost changes.* If the cost charged to an employee for a benefit package option (as defined in paragraph (i)(2) of this section) significantly increases or significantly decreases during a period of coverage, the cafeteria plan may permit the employee to make a corresponding change in election under the cafeteria plan. Changes that may be made include commencing participation in the cafeteria plan for the option with a decrease in cost, or, in the case of an increase in cost, revoking an election for that coverage and, in lieu thereof, either receiving on a prospective basis coverage under another benefit package option providing similar coverage or dropping coverage if no other benefit package option providing similar coverage is available. For example, if the cost of an indemnity option under an accident or health plan significantly increases during a period of coverage, employees who are covered by the indemnity option may make a corresponding prospective increase in their payments or may instead elect to revoke their election for the indemnity option and, in lieu thereof, elect coverage under another benefit package option including an HMO option (or drop coverage under the accident or health plan if no other benefit package option is offered).

(iii) *Application of cost changes.* For purposes of paragraphs (f)(2)(i) and (ii) of this section, a cost increase or decrease refers to an increase or decrease in the amount of the elective contributions under the cafeteria plan, whether that increase or decrease results from an action taken by the employee (such as switching between full-time and part-time status) or from an action

taken by an employer (such as reducing the amount of employer contributions for a class of employees).

(iv) *Application to dependent care.* This paragraph (f)(2) applies in the case of a dependent care assistance plan only if the cost change is imposed by a dependent care provider who is not a relative of the employee. For this purpose, a relative is an individual who is related as described in section 152(a)(1) through (8), incorporating the rules of section 152(b)(1) and (2).

(3) *Coverage changes—(i) Significant curtailment without loss of coverage.* If an employee (or an employee's spouse or dependent) has a significant curtailment of coverage under a plan during a period of coverage that is not a loss of coverage as described in paragraph (f)(3)(ii) of this section (for example, there is a significant increase in the deductible, the copay, or the out-of-pocket cost sharing limit under an accident or health plan), the cafeteria plan may permit any employee who had been participating in the plan and receiving that coverage to revoke his or her election for that coverage and, in lieu thereof, to elect to receive on a prospective basis coverage under another benefit package option providing similar coverage. Coverage under a plan is significantly curtailed only if there is an overall reduction in coverage provided under the plan so as to constitute reduced coverage generally. Thus, in most cases, the loss of one particular physician in a network does not constitute a significant curtailment.

(ii) *Significant curtailment with loss of coverage.* If an employee (or the employee's spouse or dependent) has a significant curtailment that is a loss of coverage, the plan may permit that employee to revoke his or her election under the cafeteria plan and, in lieu thereof, to elect either to receive on a prospective basis coverage under another benefit package option providing similar coverage or to drop coverage if no similar benefit package option is available. For purposes of this paragraph (f)(3)(ii), a loss of coverage means a complete loss of coverage under the benefit package option or other coverage option (including the elimination of a benefits package op-

tion, an HMO ceasing to be available in the area where the individual resides, or the individual losing all coverage under the option by reason of an overall lifetime or annual limitation). In addition, the cafeteria plan may, in its discretion, treat the following as a loss of coverage—

(A) A substantial decrease in the medical care providers available under the option (such as a major hospital ceasing to be a member of a preferred provider network or a substantial decrease in the physicians participating in a preferred provider network or an HMO);

(B) A reduction in the benefits for a specific type of medical condition or treatment with respect to which the employee or the employee's spouse or dependent is currently in a course of treatment; or

(C) Any other similar fundamental loss of coverage.

(iii) *Addition or improvement of a benefit package option.* If a plan adds a new benefit package option or other coverage option, or if coverage under an existing benefit package option or other coverage option is significantly improved during a period of coverage, the cafeteria plan may permit eligible employees (whether or not they have previously made an election under the cafeteria plan or have previously elected the benefit package option) to revoke their election under the cafeteria plan and, in lieu thereof, to make an election on a prospective basis for coverage under the new or improved benefit package option.

(4) *Change in coverage under another employer plan.* A cafeteria plan may permit an employee to make a prospective election change that is on account of and corresponds with a change made under another employer plan (including a plan of the same employer or of another employer) if—

(i) The other cafeteria plan or qualified benefits plan permits participants to make an election change that would be permitted under paragraphs (b) through (g) of this section (disregarding this paragraph (f)(4)); or

(ii) The cafeteria plan permits participants to make an election for a period of coverage that is different from the period of coverage under the other

cafeteria plan or qualified benefits plan.

(5) *Loss of coverage under other group health coverage.* A cafeteria plan may permit an employee to make an election on a prospective basis to add coverage under a cafeteria plan for the employee, spouse, or dependent if the employee, spouse, or dependent loses coverage under any group health coverage sponsored by a governmental or educational institution, including the following—

(i) A State's children's health insurance program (CHIP) under Title XXI of the Social Security Act;

(ii) A medical care program of an Indian Tribal government (as defined in section 7701(a)(40)), the Indian Health Service, or a tribal organization;

(iii) A State health benefits risk pool; or

(iv) A Foreign government group health plan.

(6) *Examples.* The following examples illustrate the application of this paragraph (f):

*Example 1.* (i) A calendar year cafeteria plan is maintained pursuant to a collective bargaining agreement for the benefit of Employer M's employees. The cafeteria plan offers various benefits, including indemnity health insurance and a health FSA. As a result of mid-year negotiations, premiums for the indemnity health insurance are reduced in the middle of the year, insurance co-payments for office visits are reduced under the indemnity plan by an amount which constitutes a significant benefit improvement, and an HMO option is added.

(ii) Under these facts, the reduction in health insurance premiums is a reduction in cost. Accordingly, under paragraph (f)(2)(i) of this section, the cafeteria plan may automatically decrease the amount of salary reduction contributions of affected participants by an amount that corresponds to the premium change. However, the plan may not permit employees to change their health FSA elections to reflect the mid-year change in copayments under the indemnity plan.

(iii) Also, the decrease in co-payments is a significant benefit improvement and the addition of the HMO option is an addition of a benefit package option. Accordingly, under paragraph (f)(3)(ii) of this section, the cafeteria plan may permit eligible employees to make an election change to elect the indemnity plan or the new HMO option. However, the plan may not permit employees to change their health FSA elections to reflect differences in co-payments under the HMO option.

*Example 2.* (i) Employer N sponsors an accident or health plan under which employees may elect either employee-only coverage or family health coverage. The 12-month period of coverage under N's cafeteria plan begins January 1, 2001. N's employee, A, is married to B. Employee A elects employee-only coverage under N's plan. B's employer, O, offers health coverage to O's employees under its accident or health plan under which employees may elect either employee-only coverage or family coverage. O's plan has a 12-month period of coverage beginning September 1, 2001. B maintains individual coverage under O's plan at the time A elects coverage under N's plan, and wants to elect no coverage for the plan year beginning on September 1, 2001, which is the next period of coverage under O's accident or health plan. A certifies to N that B will elect no coverage under O's accident or health plan for the plan year beginning on September 1, 2001 and N has no reason to believe that A's certification is incorrect.

(ii) Under paragraph (f)(4)(ii) of this section, N's cafeteria plan may permit A to change A's election prospectively to family coverage under that plan effective September 1, 2001.

*Example 3.* (i) Employer P sponsors a calendar year cafeteria plan under which employees may elect either employee-only or family health coverage. Before the beginning of the year, P's employee, C, elects family coverage under P's cafeteria plan. C also elects coverage under the health FSA for up to \$200 of reimbursements for the year to be funded by salary reduction contributions of \$200 during the year. C is married to D, who is employed by Employer Q. Q does not maintain a cafeteria plan, but does maintain an accident or health plan providing its employees with employee-only coverage. During the calendar year, Q adds family coverage as an option under its health plan. D elects family coverage under Q's plan, and C wants to revoke C's election for health coverage and elect no health coverage under P's cafeteria plan for the remainder of the year.

(ii) Q's addition of family coverage as an option under its health plan constitutes a new coverage option described in paragraph (f)(3)(ii) of this section. Accordingly, pursuant to paragraph (f)(4)(i) of this section, P's cafeteria plan may permit C to revoke C's health coverage election if D actually elects family health coverage under Q's accident or health plan. Employer P's plan may not permit C to change C's health FSA election.

*Example 4.* (i) Employer R maintains a cafeteria plan under which employees may elect accident or health coverage under either an indemnity plan or an HMO. Before the beginning of the year, R's employee, E elects coverage under the HMO at a premium cost of \$100 per month. During the year, E decides to

switch to the indemnity plan, which charges a premium of \$140 per month.

(ii) *E*'s change from the HMO to indemnity plan is not a change in cost or coverage under this paragraph (f), and none of the other election change rules under paragraphs (b) through (e) of this section apply.

(iii) Although *R*'s health plan may permit *E* to make the change from the HMO to the indemnity plan, *R*'s cafeteria plan may not permit *E* to make an election change to reflect the increased premium. Accordingly, if *E* switches from the HMO to the indemnity plan, *E* may pay the \$40 per month additional cost on an after-tax basis.

*Example 5.* (i) Employee *A* is married to Employee *B* and they have one child, *C*. Employee *A*'s employer, *M*, maintains a calendar year cafeteria plan that allows employees to elect coverage under a dependent care FSA. Child *C* attends *X*'s on site child care center at an annual cost of \$3,000. Prior to the beginning of the year, *A* elects salary reduction contributions of \$3,000 during the year to fund coverage under the dependent care FSA for up to \$3,000 of reimbursements for the year. Employee *A* now wants to revoke *A*'s election of coverage under the dependent care FSA, because *A* has found a new child care provider.

(ii) The availability of dependent care services from the new child care provider (whether the new provider is a household employee or family member of *A* or *B* or a person who is independent of *A* and *B*) is a significant change in coverage similar to a benefit package option becoming available. Because the FSA is a dependent care FSA rather than a health FSA, the coverage rules of this section apply and *M*'s cafeteria plan may permit *A* to elect to revoke *A*'s previous election of coverage under the dependent care FSA, and make a corresponding new election to reflect the cost of the new child care provider.

*Example 6.* (i) Employee *D* is married to Employee *E* and they have one child, *F*. Employee *D*'s employer, *N*, maintains a calendar year cafeteria plan that allows employees to elect coverage under a dependent care FSA. Child *F* is cared for by *Y*, *D*'s household employee, who provides child care services five days a week from 9 a.m. to 6 p.m. at an annual cost in excess of \$5,000. Prior to the beginning of the year, *D* elects salary reduction contributions of \$5,000 during the year to fund coverage under the dependent care FSA for up to \$5,000 of reimbursements for the year. During the year, *F* begins school and, as a result, *Y*'s regular hours of work are changed to five days a week from 3 p.m. to 6 p.m. Employee *D* now wants to revoke *D*'s election under the dependent care FSA, and make a new election under the dependent care FSA to an annual cost of \$4,000 to reflect a reduced cost of child care due to *Y*'s reduced hours.

(ii) The change in the number of hours of work performed by *Y* is a change in coverage. Thus, *N*'s cafeteria plan may permit *D* to reduce *D*'s previous election under the dependent care FSA to \$4,000.

*Example 7.* (i) Employee *G* is married to Employee *H* and they have one child, *J*. Employee *G*'s employer, *O*, maintains a calendar year cafeteria plan that allows employees to elect coverage under a dependent care FSA. Child *J* is cared for by *Z*, *G*'s household employee, who is not a relative of *G* and who provides child care services at an annual cost of \$4,000. Prior to the beginning of the year, *G* elects salary reduction contributions of \$4,000 during the year to fund coverage under the dependent care FSA for up to \$4,000 of reimbursements for the year. During the year, *G* raises *Z*'s salary. Employee *G* now wants to revoke *G*'s election under the dependent care FSA, and make a new election under the dependent care FSA to an annual amount of \$4,500 to reflect the raise.

(ii) The raise in *Z*'s salary is a significant increase in cost under paragraph (f)(2)(ii) of this section, and an increase in election to reflect the raise corresponds with that change in status. Thus, *O*'s cafeteria plan may permit *G* to elect to increase *G*'s election under the dependent care FSA.

*Example 8.* (i) Employer *P* maintains a calendar year cafeteria plan that allows employees to elect employee-only, employee plus one dependent, or family coverage under an indemnity plan. During the middle of the year, Employer *P* gives its employees the option to select employee-only or family coverage from an HMO plan. *P*'s employee, *J*, who had elected employee plus one dependent coverage under the indemnity plan, decides to switch to family coverage under the HMO plan.

(ii) Employer *P*'s midyear addition of the HMO option is an addition of a benefit package option. Under paragraph (f) of this section, Employee *J* may change his or her salary reduction contributions to reflect the change from indemnity to HMO coverage, and also to reflect the change from employee plus one dependent to family coverage (however, an election of employee-only coverage under the new option would not correspond with the addition of a new option). Employer *P* may not permit *J* to change *J*'s health FSA election.

(g) *Special requirements relating to the Family and Medical Leave Act.* An employee taking leave under the Family and Medical Leave Act (FMLA) (Public Law 103-3 (107 Stat. 6)) may revoke an existing election of accident or health plan coverage and make such other election for the remaining portion of

the period of coverage as may be provided for under the FMLA. See § 1.125-3 for additional rules.

(h) *Elective contributions under a qualified cash or deferred arrangement.* The provisions of this section do not apply with respect to elective contributions under a qualified cash or deferred arrangement (within the meaning of section 401(k)) or employee contributions subject to section 401(m). Thus, a cafeteria plan may permit an employee to modify or revoke elections in accordance with section 401(k) and (m) and the regulations thereunder.

(i) *Definitions.* Unless otherwise provided, the definitions in paragraphs (i)(1) through (8) of this section apply for purposes of this section.

(1) *Accident or health coverage.* Accident or health coverage means coverage under an accident or health plan as defined in regulations under section 105.

(2) *Benefit package option.* A benefit package option means a qualified benefit under section 125(f) that is offered under a cafeteria plan, or an option for coverage under an underlying accident or health plan (such as an indemnity option, an HMO option, or a PPO option under an accident or health plan).

(3) *Dependent.* A dependent means a dependent as defined in section 152, except that, for purposes of accident or health coverage, any child to whom section 152(e) applies is treated as a dependent of both parents, and, for purposes of dependent care assistance provided through a cafeteria plan, a dependent means a qualifying individual (as defined in section 21(b)(1)) with respect to the employee.

(4) *Disability coverage.* Disability coverage means coverage under an accident or health plan that provides benefits due to personal injury or sickness, but does not reimburse expenses incurred for medical care (as defined in section 213(d)) of the employee or the employee's spouse and dependents. For purposes of this section, disability coverage includes payments described in section 105(c).

(5) *Family member plan.* A family member plan means a cafeteria plan or qualified benefit plan sponsored by the employer of the employee's spouse or the employee's dependent.

(6) *FSA, health FSA.* An FSA means a qualified benefits plan that is a flexible spending arrangement as defined in section 106(c)(2). A health FSA means a health or accident plan that is an FSA.

(7) *Placement for adoption.* Placement for adoption means placement for adoption as defined in regulations under section 9801.

(8) *Qualified benefits plan.* A qualified benefits plan means an employee benefit plan governing the provision of one or more benefits that are qualified benefits under section 125(f). A plan does not fail to be a qualified benefits plan merely because it includes an FSA, assuming that the FSA meets the requirements of section 125 and the regulations thereunder.

(9) *Similar coverage.* Coverage for the same category of benefits for the same individuals (e.g., family to family or single to single). For example, two plans that provide coverage for major medical are considered to be similar coverage. For purposes of this definition, a health FSA is not similar coverage with respect to an accident or health plan that is not a health FSA. A plan may treat coverage by another employer, such as a spouse's or dependent's employer, as similar coverage.

(j) *Effective date*—(1) *General rule.* Except as provided in paragraph (j)(2) of this section, this section is applicable for cafeteria plan years beginning on or after January 1, 2001.

(2) *Delayed effective date for certain provisions.* The following provisions are applicable for cafeteria plan years beginning on or after January 1, 2002: paragraph (c) of this section to the extent applicable to qualified benefits other than an accident or health plan or a group-term life insurance plan; paragraph (d)(1)(ii)(B) of this section (relating to a spouse, former spouse, or other individual obtaining accident or health coverage for an employee's child in response to a judgment, decree, or order); paragraph (f) of this section (rules for election changes as a result

of cost or coverage changes); and paragraph (i)(9) of this section (defining similar coverage).

[T.D. 8878, 65 FR 15550, Mar. 23, 2000, as amended by T.D. 8921, 66 FR 1840, Jan. 10, 2001; T.D. 8921, 66 FR 13013, Mar. 2, 2001; T.D. 8966, 66 FR 52680, Oct. 17, 2001]

**§ 1.125-4T Permitted election changes (temporary).**

(a) *Election changes.* A cafeteria plan may permit an employee to revoke an election during a period of coverage and to make a new election only as provided in paragraphs (b) through (i) of this section. See paragraph (j) of this section for special provisions relating to qualified cash or deferred arrangements.

(b) *Special enrollment rights.* A cafeteria plan may permit an employee to revoke an election for accident or health coverage during a period of coverage and make a new election that corresponds with the special enrollment rights provided in section 9801(f), whether or not the change in election is permitted under paragraph (c) of this section.

(c) *Changes in status for accident or health coverage and group-term life—(1) In general.* A cafeteria plan may permit an employee to revoke an election for accident or health coverage or group-term life insurance coverage during a period of coverage and make a new election for the remaining portion of the period if, under the facts and circumstances—

(i) A change in status occurs; and  
 (ii) The election change satisfies the consistency requirement in paragraph (c)(3) of this section (consistency rule for accident or health coverage) or (c)(4) of this section (consistency rule for group-term life insurance coverage).

(2) *Change in status events.* The following events are changes in status for purposes of this paragraph (c):

(i) *Legal marital status.* Events that change an employee's legal marital status, including marriage, death of spouse, divorce, legal separation, or annulment;

(ii) *Number of dependents.* Events that change an employee's number of dependents (as defined in section 152), including birth, adoption, placement for

adoption (as defined in regulations under section 9801), or death of a dependent;

(iii) *Employment status.* A termination or commencement of employment by the employee, spouse, or dependent;

(iv) *Work schedule.* A reduction or increase in hours of employment by the employee, spouse, or dependent, including a switch between part-time and full-time, a strike or lockout, or commencement or return from an unpaid leave of absence;

(v) *Dependent satisfies or ceases to satisfy the requirements for unmarried dependents.* An event that causes an employee's dependent to satisfy or cease to satisfy the requirements for coverage due to attainment of age, student status, or any similar circumstance as provided in the accident or health plan under which the employee receives coverage; and

(vi) *Residence or worksite.* A change in the place of residence or work of the employee, spouse, or dependent.

(3) *Consistency rule for accident or health coverage.* (i) *General rule.* (A) An employee's revocation of a cafeteria plan election during a period of coverage and new election for the remaining portion of the period (referred to below as an "election change") is consistent with a change in status if, and only if—

(I) The change in status results in the employee, spouse, or dependent gaining or losing eligibility for accident or health coverage under either the cafeteria plan or an accident or health plan of the spouse's or dependent's employer; and

(2) The election change corresponds with that gain or loss of coverage.

(B) A change in status results in an employee, spouse, or dependent gaining (or losing) eligibility for coverage under a plan only if the individual becomes eligible (or ineligible) to participate in the plan. A cafeteria plan may treat an individual as gaining (or losing) eligibility for coverage if the individual becomes eligible (or ineligible) for a particular benefit package option under a plan (e.g., a change in status results in an individual becoming eligible for a managed care option or an indemnity option). If, as a result of a change in status, the individual gains

eligibility for elective coverage under a plan of the spouse's or dependent's employer, the consistency rule of this paragraph (c)(3)(i) is satisfied only if the individual elects the coverage under the spouse's or dependent's employer. See the *Examples* in paragraph (k) of this section for illustrations of the consistency rule.

(ii) *Exception for COBRA.* Notwithstanding paragraph (c)(3)(i) of this section, if the employee, spouse, or dependent becomes eligible for continuation coverage under the employer's group health plan as provided in section 4980B or any similar State law, the employee may elect to increase payments under the employer's cafeteria plan in order to pay for the continuation coverage.

(4) *Consistency rule for group-term life insurance coverage.* Except as provided in this paragraph (c)(4), the provisions of paragraph (c)(3)(i) of this section apply to group-term life insurance coverage. In the case of marriage, birth, adoption, or placement for adoption, a cafeteria plan can allow an election change to increase (but not to reduce) the amount of the employee's life insurance coverage. In the case of divorce, legal separation, annulment, or death of a spouse or dependent, a cafeteria plan may allow an election change to reduce (but not to increase) the amount of the employee's life insurance coverage.

(d) *Judgment, decree, or order.* This paragraph (d) applies to a judgment, decree, or order ("order") resulting from a divorce, legal separation, annulment, or change in legal custody (including a qualified medical child support order defined in section 609 of the Employee Retirement Income Security Act of 1974) that requires accident or health coverage for an employee's child. Notwithstanding the provisions of paragraph (c) of this section, a cafeteria plan may—

(1) Change the employee's election to provide coverage for the child if the order requires coverage under the employee's plan; or

(2) Permit the employee to make an election change to cancel coverage for the child if the order requires the former spouse to provide coverage.

(e) *Entitlement to Medicare or Medicaid.* If an employee, spouse, or dependent who is enrolled in an accident or health plan of the employer becomes entitled to coverage (*i.e.*, enrolled) under Part A or Part B of Title XVIII of the Social Security Act (Medicare) or Title XIX of the Social Security Act (Medicaid), other than coverage consisting solely of benefits under section 1928 of the Social Security Act (the program for distribution of pediatric vaccines), a cafeteria plan may permit the employee to make an election change to cancel coverage of that employee, spouse or dependent under the accident or health plan.

(f) *Changes in status for other qualified benefits.* [Reserved]

(g) *Significant coverage or cost changes.* [Reserved]

(1) *Employer's plan.* [Reserved]

(2) *Plan of spouse's or dependent's employer.* [Reserved]

(h) *Cessation of required contributions.* [Reserved]

(i) *Special requirements concerning the Family and Medical Leave Act.* [Reserved]

(j) *Elective contributions under a qualified cash or deferred arrangement.* The provisions of this section do not apply with respect to elective contributions under a qualified cash or deferred arrangement (within the meaning of section 401(k)) or employee contributions subject to section 401(m). Thus, a cafeteria plan may permit an employee to modify or revoke elections in accordance with sections 401(k) and 401(m) and the regulations thereunder.

(k) *Examples.* The following examples illustrate the rules of this section. In each case involving an accident or health plan, assume that the plan is subject to section 9801(f) (providing for special enrollment rights under certain group health plans).

*Example 1.* (i) Employer M provides health coverage for its employees under which employees may elect either employee-only coverage or family coverage. M also maintains a calendar year cafeteria plan under which qualified benefits, including health coverage, are funded through salary reduction. M's employee, A, elects employee-only health coverage before the beginning of the calendar year. During the year, A adopts a child, C. Within 30 days thereafter, A wants to revoke

A's election for employee-only health coverage and obtain family health coverage, as of the date of C's adoption. A satisfies the conditions for special enrollment of an employee with a new dependent under section 9801(f)(2), so that A may enroll in family coverage under M's accident or health plan in order to provide coverage for C, effective as of the date of C's adoption.

(ii) In this *Example 1*, M's cafeteria plan may permit A to change the employee's salary reduction election to family coverage for salary not yet currently available. The increased salary reduction could reflect the cost of family coverage from the date of adoption. (The adoption of C is also a change in status, and the election of family coverage is consistent with that change in status. Thus, under the change in status provisions of paragraph (c) of this section, M's cafeteria plan could permit A to elect family coverage prospectively in order to cover C for the remaining portion of the coverage period.)

*Example 2.* (i) The employer plans and permissible coverage are the same as in *Example 1*. Before the beginning of the calendar year, Employee A elects employee-only health coverage under M's cafeteria plan. A marries B during the plan year. B's employer, N, offers health coverage to N's employees, and, prior to the marriage, B had elected employee-only coverage. A wants to revoke the election for employee-only coverage, and is considering electing family health coverage under M's plan or obtaining family health coverage under N's plan.

(ii) In this *Example 2*, A's marriage to B is a change in status. Two possible election changes by A would be consistent with the change in status: to cover A and B by electing family health coverage under M's plan, or to cancel coverage under M's plan (with B electing family health coverage under N's plan in order to cover A and B). Thus, M's cafeteria plan may permit A to make either change in election. (M's cafeteria plan could also permit A to change A's salary reduction election to reflect the change to family coverage under M's group health plan in accordance with paragraph (b) of this section because the marriage would also create special enrollment rights under section 9801(f), pursuant to which an election of family coverage under M's plan would be required to be effective no later than the first day of the first calendar month beginning after the completed request for enrollment is received by the plan.)

*Example 3.* (i) Employee G, a single parent, elects family health coverage under a calendar year cafeteria plan maintained by Employer O. G and G's 21-year old child, H, are covered under O's health plan. During the year, H graduates from college. Under the terms of the health plan, dependents over the age of 19 must be full-time students to receive coverage. G wants to revoke G's elec-

tion for family health coverage and obtain employee-only coverage under O's cafeteria plan.

(ii) In this *Example 3*, H's loss of eligibility for coverage under the terms of the health plan is a change in status. A revocation of G's election for family coverage and new election of employee-only coverage is consistent with the change in status. Thus, O's cafeteria plan may permit G to elect employee-only coverage.

*Example 4.* (i) Employee J is married to K and they have one child, S. A calendar year cafeteria plan maintained by Employer P allows employees to elect no health coverage, employee-only coverage, employee-plus-one-dependent coverage, or family coverage. Under the plan, before the beginning of the calendar year, J elects family health coverage for J, K, and S. J and K divorce during the year and, under the terms of P's accident or health plan, K loses eligibility for P's health coverage. S does not lose eligibility for health coverage under P's plan upon the divorce. J now wants to revoke J's election under the cafeteria plan and elect no coverage.

(ii) In this *Example 4*, the divorce is a change in status. A change in the cafeteria plan election to cancel health coverage for K is consistent with that change in status. However, the divorce does not affect J's or S's eligibility for health coverage. Therefore, an election change to cancel J's or S's health coverage is not consistent with the change in status. The cafeteria plan, however, may permit J to elect employee-plus-one-dependent health coverage.

*Example 5.* (i) The facts are the same as *Example 4*, except that, before the beginning of the year, Employee J elected employee-only health coverage (rather than family coverage). Pursuant to J's divorce agreement with K, P's health plan receives a qualified medical child support order (as defined in section 609 of the Employee Retirement Income Security Act) during the plan year. The order requires P's health plan to cover S.

(ii) In this *Example 5*, P's cafeteria plan may change J's election from employee-only health coverage to employee-plus-one-dependent coverage in order to cover S.

*Example 6.* (i) Before the beginning of the coverage period, Employee L elects to participate in a cafeteria plan maintained by L's Employer, Q. However, in order to change the election during the coverage period so as to cancel coverage, and by prior understanding with Q, L terminates employment and resumes employment one week later.

(ii) In this *Example 6*, under the facts and circumstances, in which a principal purpose of the termination of employment was to

alter the election and reinstatement of employment was understood at the time of termination, L does not have a change in status. However, L's termination of employment would constitute a change in status, permitting a cancellation of coverage during the period of unemployment, if L's original cafeteria plan election was reinstated upon resumption of employment (for example, because of a cafeteria plan provision requiring an employee who resumes employment within 30 days, without any other intervening event that would permit a change in election, to return to the election in effect prior to termination of employment).

*Example 7.* (i) Employer R maintains a calendar year cafeteria plan under which full-time employees may elect coverage under one of three benefit package options provided under an accident or health plan: an indemnity option or either of two HMO options for employees that work in the respective service areas of the two HMOs. Employee T, who works in the service area of HMO #1, elects the HMO #1 option. During the year, T is transferred to another work location which is outside the HMO #1 service area and inside the HMO #2 service area.

(ii) In this *Example 7*, the transfer is a change in status and, under the consistency rule, the cafeteria plan may permit T to make an election change to either the indemnity option or HMO #2, or to cancel accident or health coverage.

*Example 8.* (i) A calendar year cafeteria plan maintained by Employer S allows employees to elect coverage under an accident or health plan providing indemnity coverage and under a flexible spending arrangement (FSA). Prior to the beginning of the calendar year, Employee U elects employee-only indemnity coverage, and coverage under the FSA for up to \$600 of reimbursements for the year to be funded by salary reduction contributions of \$600 during the year. U's spouse, V, has employee-only coverage under an accident or health plan maintained by V's employer. During the year, V terminates employment and loses coverage under that plan. U now wants to elect family coverage under S's accident or health plan and increase U's FSA election.

(ii) In this *Example 8*, V's termination of employment is a change in status. The cafeteria plan may permit U to elect family coverage under S's accident or health plan, and to increase U's FSA coverage.

*Example 9.* (i) Employer T provides group-term life insurance coverage as described under section 79. Under T's plan, an employee may elect life insurance coverage in an amount up to the lesser of his or her salary or \$50,000. T also maintains a calendar year cafeteria plan under which qualified benefits, including the group-term life insurance coverage, are funded through salary reduction. Before the beginning of the calendar

year, Employee W elects \$10,000 of life insurance coverage, with W's spouse, X, as the beneficiary. During the year, a child is placed for adoption with W and X. W wants to increase W's election for life insurance coverage to \$50,000 (without changing the designation of X as the beneficiary).

(ii) In this *Example 9*, the placement of a child for adoption with W is a change in status. The increase in coverage is consistent with the change in status. Thus, W's cafeteria plan may permit W to increase W's life insurance coverage.

(1) *Effective date.* This section is applicable for plan years beginning after December 31, 1998, and on or before November 6, 2000.

[T.D. 8738, 62 FR 60166, Nov. 7, 1997; 63 FR 8528, Feb. 19, 1998; T.D. 8878, 65 FR 15553, Mar. 23, 2000]

**§ 1.127-1 Amounts received under a qualified educational assistance program.**

(a) *Exclusion from gross income.* The gross income of an employee does not include—

(1) Amounts paid to, or on behalf of the employee under a qualified educational assistance program described in § 1.127-2, or

(2) The value of education provided to the employee under such a program.

(b) *Disallowance of excluded amounts as credit or deduction.* Any amount excluded from the gross income of an employee under paragraph (a) of this section shall not be allowed as a credit or deduction to such employee under any other provision of this part.

(c) *Amounts received under a non-qualified program.* Any amount received under an educational assistance program that is not a "qualified program" described in § 1.127-2 will not be excluded from gross income under paragraph (a) of this section. All or part of the amounts received under such a nonqualified program may, however, be excluded under section 117 or deducted under section 162 or section 212 (as the case may be), if the requirements of such section are satisfied.

(d) *Definitions.* For rules relating to the meaning of the terms "employee" and "employer", see paragraph (h) of § 1.127-2.

(e) *Effective date.* This section is effective for taxable years of the employee beginning after December 31, 1978, and before January 1, 1984.

[T.D. 7898, 48 FR 31017, July 6, 1983]

**§ 1.127-2 Qualified educational assistance program.**

(a) *In general.* A qualified educational assistance program is a plan established and maintained by an employer under which the employer provides educational assistance to employees. To be a qualified program, the requirements described in paragraphs (b) through (g) of this section must be satisfied. It is not required that a program be funded or that the employer apply to the Internal Revenue Service for a determination that the plan is a qualified program. However, under § 601.201 (relating to rulings and determination letters), an employer may request that the Service determine whether a plan is a qualified program.

(b) *Separate written plan.* The program must be a separate written plan of the employer. This requirement means that the terms of the program must be set forth in a separate document or documents providing only educational assistance within the meaning of paragraph (c) of this section. The requirement for a separate plan does not, however, preclude an educational assistance program from being part of a more comprehensive employer plan that provides a choice of nontaxable benefits to employees.

(c) *Educational assistance—(1) In general.* The benefits provided under the program must consist solely of educational assistance. The term “educational assistance” means—

(i) The employer’s payment of expenses incurred by or on behalf of an employee for education, or

(ii) The employer’s provision of education to an employee.

(2) *Alternative benefits.* Benefits will not be considered to consist solely of educational assistance if the program, in form or in actual operation, provides employees with a choice between educational assistance and other remuneration includible in the employee’s gross income.

(3) *Certain benefits not considered educational assistance.* The term “edu-

cational assistance” does not include the employer’s payment for, or provision of—

(i) Tools or supplies (other than textbooks) that the employee may retain after completing a course of instruction,

(ii) Meals, lodging, or transportation, or

(iii) Education involving sports, games, or hobbies, unless such education involves the business of the employer or is required as part of a degree program. The phrase “sports, games, or hobbies” does not include education that instructs employees how to maintain and improve health so long as such education does not involve the use of athletic facilities or equipment and is not recreational in nature.

(4) *Education defined.* As used in section 127, § 1.127-1, and this section, the term “education” includes any form of instruction or training that improves or develops the capabilities of an individual. Education paid for or provided under a qualified program may be furnished directly by the employer, either alone or in conjunction with other employers, or through a third party such as an educational institution. Education is not limited to courses that are job related or part of a degree program.

(d) *Exclusive benefit.* The program may benefit only the employees of the employer, including, at the employer’s option, individuals who are employees within the meaning of paragraph (h)(1) of this section. A program that provides benefits to spouses or dependents of employees is not a qualified program within the meaning of this section.

(e) *Prohibited discrimination—(1) Eligibility for benefits.* The program must benefit the employer’s employees generally. Among those benefited may be employees who are officers, shareholders, self-employed or highly compensated. A program is not for the benefit of employees generally, however, if the program discriminates in favor of employees described in the preceding sentence (or in favor of their spouses and dependents who are themselves employees) in requirements relating to eligibility for benefits. Thus, although a program need not provide benefits for all employees, it must benefit those

employees who qualify under a classification of employees that does not discriminate in favor of the employees with respect to whom discrimination is prohibited. The classification of employees to be considered benefited will consist of that group of employees who are actually eligible for educational assistance under the program, taking into account the eligibility requirements set forth in the written plan, the eligibility requirements reflected in the types of educational assistance available under the program, and any other conditions that may affect the availability of benefits under the program. Thus, for example, if an employer's plan provides that all employees are eligible for educational assistance, yet limits that assistance to courses of study leading to postgraduate degrees in fields relating to the employer's business, then only those employees able to pursue such a course of study are considered actually eligible for educational assistance under the program. Whether any classification of employees discriminates in favor of employees with respect to whom discrimination is prohibited will generally be determined by applying the same standards as are applied under section 410(b)(1)(B) (relating to qualified pension, profit-sharing and stock bonus plans), without regard to section 401(a)(5). For purposes of making this determination, there shall be excluded from consideration employees not covered by the program who are included in a unit of employees covered by an agreement which the Secretary of Labor finds to be a collective bargaining agreement between employee representatives and one or more employers, if the Internal Revenue Service finds that educational assistance benefits were the subject of good faith bargaining between the employee representatives and the employer or employers. For purposes of determining whether such bargaining occurred, it is not material that the employees are not covered by another educational assistance program or that the employer's present program was not considered in the bargaining.

(2) *Factors not considered in determining the existence of prohibited discrimination.* A program shall not be

considered discriminatory under this paragraph (e) merely because—

(i) Different types of educational assistance available under the program are utilized to a greater degree by employees with respect to whom discrimination is prohibited than by other employees, or

(ii) With respect to a course of study for which benefits are otherwise available, successful completion of the course, attaining a particular course grade, or satisfying a reasonable condition subsequent (such as remaining employed for one year after completing the course) are required or considered in determining the availability of benefits.

(f) *Benefit limitation—(1) In general.* Under section 127(b)(3), a program is a qualified program for a program year only if no more than 5% of the amounts paid or incurred by the employer for educational assistance benefits during the year are provided to the limitation class described in subparagraph (2). For purposes of this paragraph (f), the program year must be specified in the written plan as either the calendar year or the taxable year of the employer.

(2) *Limitation class.* The limitation class consists of—

(i) *Shareholders.* Individuals who, on any day of the program year, own more than 5% of the total number of shares of outstanding stock of the employer, or

(ii) *Owners.* In the case of an employer's trade or business which is not incorporated, individuals who, on any day of the program year, own more than 5% of the capital or profits interest in the employer, and

(iii) *Spouses or dependents.* Individuals who are spouses or dependents of shareholders or owners described in subdivision (i) or (ii). For purposes of determining stock ownership, the attribution rules described in paragraph (h)(4) of this section apply. The regulations prescribed under section 414(c) are applicable in determining an individual's interest in the capital or profits of an unincorporated trade or business.

(g) *Notification of employees.* A program is not a qualified program unless employees eligible to participate in the program are given reasonable notice of

the terms and availability of the program.

(h) *Definitions.* For purposes of this section and § 1.127-1—

(1) *Employee.* The term “employee” includes—

(i) A retired, disabled or laid-off employee,

(ii) A present employee who is on leave, as, for example, in the Armed Forces of the United States, or

(iii) An individual who is self-employed within the meaning of section 401(c)(1).

(2) *Employer.* An individual who owns the entire interest in an unincorporated trade or business shall be treated as his or her own employer. A partnership is treated as the employer of each partner who is an employee within the meaning of section 401(c)(1).

(3) *Officer.* An officer is an individual who is an officer within the meaning of regulations prescribed under section 414(c).

(4) *Shareholder.* The term “shareholder” includes an individual who is a shareholder as determined by the attribution rules under section 1563 (d) and (e), without regard to section 1563(e)(3)(C).

(5) *Highly compensated.* The term “highly compensated” has the same meaning as it does for purposes of section 410(b)(1)(B).

(i) *Substantiation.* An employee receiving payments under a qualified educational assistance program must be prepared to provide substantiation to the employer such that it is reasonable to believe that payments or reimbursements made under the program constitute educational assistance within the meaning of paragraph (c) of this section.

[T.D. 7898, 48 FR 31017, July 6, 1983]

### § 1.132-0 Outline of regulations under section 132.

The following is an outline of regulations in this section relating to exclusions from gross income for certain fringe benefits:

§ 1.132-0 *Outline of regulations under section 132.*

§ 1.132-1 *Exclusion from gross income for certain fringe benefits.*

§ 1.132-1 (a) In general.

§ 1.132-1 (b) Definition of employee.

(1) No-additional-cost services and qualified employee discounts.

(2) Working condition fringes.

(3) On-premises athletic facilities.

(4) De minimis fringes.

(5) Dependent child.

§ 1.132-1 (c) Special rules for employers—Effect of section 414.

§ 1.132-1 (d) Customers not to include employees.

§ 1.132-1 (e) Treatment of on-premises athletic facilities.

(1) In general.

(2) Premises of the employer.

(3) Application of rules to membership in an athletic facility.

(4) Operation by the employer.

(5) Nonapplicability of nondiscrimination rules.

§ 1.132-1 (f) Nonapplicability of section 132 in certain cases.

(1) Tax treatment provided for in another section.

(2) Limited statutory exclusions.

§ 1.132-1 (g) Effective date.

§ 1.132-2 *No-additional-cost services.*

§ 1.132-2 (a) In general.

(1) Definition.

(2) Excess capacity services.

(3) Cash rebates.

(4) Applicability of nondiscrimination rules.

(5) No substantial additional cost.

(6) Payments for telephone service.

§ 1.132-2 (b) Reciprocal agreements.

§ 1.132-2 (c) Example.

§ 1.132-3 *Qualified employee discounts.*

§ 1.132-3 (a) In general.

(1) Definition.

(2) Qualified property or services.

(3) No reciprocal agreement exception.

(4) Property of services provided without charge, at a reduced price, or by rebates.

(5) Property or services provided directly by the employer or indirectly through a third party.

(6) Applicability of nondiscrimination rules.

§ 1.132-3 (b) Employee discount.

(1) Definition.

(2) Price to customers.

(3) Damaged, distressed, or returned goods.

§ 1.132-3 (c) Gross profit percentage.

(1) In general.

(2) Line of business.

(3) Generally accepted accounting principles.

§ 1.132-3 (d) Treatment of leased sections of department stores.

(1) In general.

(2) Employees of the leased section.

§ 1.132-3 (e) Excess discounts.

§ 1.132-4 *Line of business limitation.*

§ 1.132-4 (a) In general.

(1) Applicability.

(2) Definition.

**§ 1.132-0**

**26 CFR Ch. I (4-1-06 Edition)**

- (3) Aggregation of two-digit classifications.
- § 1.132-4 (b) Grandfather rule for certain retail stores.
  - (1) In general.
  - (2) Taxable year of affiliated group.
  - (3) Definition of "sales".
  - (4) Retired and disabled employees.
  - (5) Increase of employee discount.
- § 1.132-4 (c) Grandfather rule for telephone service provided to pre-divestiture retirees.
- § 1.132-4 (d) Special rule for certain affiliates of commercial airlines.
  - (1) General rule.
  - (2) "Airline affiliated group" defined.
  - (3) "Qualified affiliate" defined.
- § 1.132-4 (e) Grandfather rule for affiliated groups operating airlines.
- § 1.132-4 (f) Special rule for qualified air transportation organizations.
- § 1.132-4 (g) Relaxation of line of business requirement.
- § 1.132-4 (h) Line of business requirement does not expand benefits eligible for exclusion.

**§ 1.132-1**

*§ 1.132-7 Employer-operated eating facilities.*

§ 1.132-7 (a) In general.

- (1) Conditions for exclusion.
- (2) Employer-operated eating facility for employees.
- (3) Operation by the employer.
- (4) Example.

§ 1.132-7 (b) Direct operating costs.

- (1) In general.
- (2) Multiple dining rooms or cafeterias.
- (3) Payment to operator of facility.

§ 1.132-7 (c) Valuation of non-excluded meals provided at an employer-operated eating facility for employees.

*§ 1.132-8 Fringe benefit nondiscrimination rules.*

§ 1.132-8 (a) Application of nondiscrimination rules.

- (1) General rule.
- (2) Consequences of discrimination.
- (3) Scope of the nondiscrimination rules provided in this section.

§ 1.132-8 (b) Aggregation of Employees.

- (1) Section 132(a) (1) and (2).
- (2) Section 132(e)(2).
- (3) Classes of employees who may be excluded.

§ 1.132-8 (c) Availability on substantially the same terms.

- (1) General rule.
- (2) Certain terms relating to priority.

§ 1.132-8 (d) Testing for discrimination.

- (1) Classification test.
- (2) Classifications that are per se discriminatory.
- (3) Former employees.
- (4) Restructuring of benefits.
- (5) Employer-operated eating facilities for employees.

§ 1.132-8 (e) Cash bonuses or rebates.

§ 1.132-8 (f) Highly compensated employee.

- (1) Government and non-government employees.
- (2) Former employees.

*§ 1.132-9 Qualified transportation fringes.*

§ 1.132-9 (a) Table of contents.

§ 1.132-9 (b) Questions and answers.

[T.D. 8256, 54 FR 28600, July 6, 1989, as amended by T.D. 8457, 57 FR 62196, Dec. 30, 1992]

**§ 1.132-1 Exclusion from gross income for certain fringe benefits.**

(a) *In general.* Gross income does not include any fringe benefit which qualifies as a—

- (1) No-additional-cost service,
- (2) Qualified employee discount,
- (3) Working condition fringe, or
- (4) De minimis fringe.

Special rules apply with respect to certain on-premises gyms and other athletic facilities (§ 1.132-1(e)), demonstration use of employer-provided automobiles by full-time automobile salesmen (§ 1.132-5(o)), parking provided to

an employee on or near the business premises of the employer (§ 1.132-5(p)), and on-premises eating facilities (§ 1.132-7).

(b) *Definition of employee*—(1) *No-additional-cost services and qualified employee discounts.* For purposes of section 132(a)(1) (relating to no-additional-cost services) and section 132(a)(2) (relating to qualified employee discounts), the term “employee” (with respect to a line of business of an employer means—

(i) Any individual who is currently employed by the employer in the line of business,

(ii) Any individual who was formerly employed by the employer in the line of business and who separated from service with the employer in the line of business by reason of retirement or disability, and

(iii) Any widow or widower of an individual who died while employed by the employer in the line of business or who separated from service with the employer in the line of business by reason of retirement or disability.

For purposes of this paragraph (b)(1), any partner who performs services for a partnership is considered employed by the partnership. In addition, any use by the spouse or dependent child (as defined in paragraph (b)(5) of this section) of the employee will be treated as use by the employee. For purposes of section 132(a)(1) (relating to no-additional-cost services), any use of air transportation by a parent of an employee (determined without regard to section 132(f)(1)(B) and paragraph (b)(1)(iii) of this section) will be treated as use by the employee.

(2) *Working condition fringes.* For purposes of section 132(a)(3) (relating to working condition fringes), the term “employee” means—

(i) Any individual who is currently employed by the employer,

(ii) Any partner who performs services for the partnership,

(iii) Any director of the employer, and

(iv) Any independent contractor who performs services for the employer.

Notwithstanding anything in this paragraph (b)(2) to the contrary, an independent contractor who performs services for the employer cannot exclude

## § 1.132-1

## 26 CFR Ch. I (4-1-06 Edition)

the value of parking or the use of consumer goods provided pursuant to a product testing program under § 1.132-5(n); in addition, any director of the employer cannot exclude the value of the use of consumer goods provided pursuant to a product testing program under § 1.132-5(n).

(3) *On-premises athletic facilities.* For purposes of section 132(h)(5) (relating to on-premises athletic facilities), the term “employee” means—

(i) Any individual who is currently employed by the employer.

(ii) Any individual who was formerly employed by the employer and who separated from service with the employer by reason of retirement or disability, and

(iii) Any widow or widower of an individual who died while employed by the employer or who separated from service with the employer by reason of retirement or disability.

For purposes of this paragraph (b)(3), any partner who performs services for a partnership is considered employed by the partnership. In addition, any use by the spouse or dependent child (as defined in paragraph (b)(5) of this section) of the employee will be treated as use by the employee.

(4) *De minimis fringes.* For purposes of section 132(a)(4) (relating to de minimis fringes), the term “employee” means any recipient of a fringe benefit.

(5) *Dependent child.* The term “dependent child” means any son, stepson, daughter, or stepdaughter of the employee who is a dependent of the employee, or both of whose parents are deceased and who has not attained age 25. Any child to whom section 152(e) applies will be treated as the dependent of both parents.

(c) *Special rules for employers—Effect of section 414.* All employees treated as employed by a single employer under section 414 (b), (c), (m), or (o) will be treated as employed by a single employer for purposes of this section. Thus, employees of one corporation that is part of a controlled group of corporations may under certain circumstances be eligible to receive section 132 benefits from the other corporations that comprise the controlled group. However, the aggregation of employers described in this paragraph (c)

does not change the other requirements for an exclusion, such as the line of business requirement. Thus, for example, if a controlled group of corporations consists of two corporations that operate in different lines of business, the corporations are not treated as operating in the same line of business even though the corporations are treated as one employer.

(d) *Customers not to include employees.* For purposes of section 132 and the regulations thereunder, the term “customer” means any customer who is not an employee. However, the preceding sentence does not apply to section 132(c)(2) (relating to the gross profit percentage for determining a qualified employee discount). Thus, an employer that provides employee discounts cannot exclude sales made to employees in determining the aggregate sales to customers.

(e) *Treatment of on-premises athletic facilities—(1) In general.* Gross income does not include the value of any on-premises athletic facility provided by an employer to its employees. For purposes of section 132(h)(5) and this paragraph (e), the term “on-premises athletic facility” means any gym or other athletic facility (such as a pool, tennis court, or golf course)—

(i) Which is located on the premises of the employer, (ii) Which is operated by the employer, and (iii) Substantially all of the use of which during the calendar year is by employees of the employer, their spouses, and their dependent children.

For purposes of paragraph (e) (1) (iii) of this section, the term “dependent children” has the same meaning as the plural of the term “dependent child” in paragraph (b)(5) of this section. The exclusion of this paragraph (e) does not apply to any athletic facility if access to the facility is made available to the general public through the sale of memberships, the rental of the facility, or a similar arrangement.

(2) *Premises of the employer.* The athletic facility need not be located on the employer’s business premises. However, the athletic facility must be located on premises of the employer. The exclusion provided in this paragraph (e) applies whether the premises are owned or leased by the employer; in addition,

the exclusion is available even if the employer is not a named lessee on the lease so long as the employer pays reasonable rent. The exclusion provided in this paragraph (e) does not apply to any athletic facility that is a facility for residential use. Thus, for example, a resort with accompanying athletic facilities (such as tennis courts, pool, and gym) would not qualify for the exclusion provided in this paragraph (e). An athletic facility is considered to be located on the employer's premises if the facility is located on the premises of a voluntary employees' beneficiary association funded by the employer.

(3) *Application of rules to membership in an athletic facility.* The exclusion provided in this paragraph (e) does not apply to any membership in an athletic facility (including health clubs or country clubs) unless the facility is owned (or leased) and operated by the employer and substantially all the use of the facility is by employees of the employer, their spouses, and their dependent children. Therefore, membership in a health club or country club not meeting the rules provided in this paragraph (e) would not qualify for the exclusion.

(4) *Operation by the employer.* An employer is considered to operate the athletic facility if the employer operates the facility through its own employees, or if the employer contracts out to another to operate the athletic facility. For example, if an employer hires an independent contractor to operate the athletic facility for the employer's employees, the facility is considered to be operated by the employer. In addition, if an athletic facility is operated by more than one employer, it is considered to be operated by each employer. For purposes of paragraph (e) (1) (iii) of this section, substantially all of the use of a facility that is operated by more than one employer must be by employees of the various employers, their spouses, and their dependent children. Where the facility is operated by more than one employer, an employer that pays rent either directly to the owner of the premises or to a sublessor of the premises is eligible for the exclusion. If an athletic facility is operated by a voluntary employees' beneficiary association funded by an employer, the

employer is considered to operate the facility.

(5) *Nonapplicability of nondiscrimination rules.* The nondiscrimination rules of section 132 and §1.132-8 do not apply to on-premises athletic facilities.

(f) *Nonapplicability of section 132 in certain cases—*(1) Tax treatment provided for in another section. If the tax treatment or a particular fringe benefit is expressly provided for in another section of Chapter 1 of the Internal Revenue Code of 1986, section 132 and the applicable regulations (except for section 132 (e) and the regulations thereunder) do not apply to such fringe benefit. For example, because section 129 provides an exclusion from gross income for amounts paid or incurred by an employer for dependent care assistance for an employee, the exclusions under section 132 and this section do not apply to the provision by an employer to an employee of dependent care assistance. Similarly, because section 117 (d) applies to tuition reductions, the exclusions under section 132 do not apply to free or discounted tuition provided to an employee by an organization operated by the employer, whether the tuition is for study at or below the graduate level. Of course, if the amounts paid by the employer are for education relating to the employee's trade or business of being an employee of the employer so that, if the employee paid for the education, the amount paid could be deducted under section 162, the costs of the education may be eligible for exclusion as a working condition fringe.

(2) *Limited statutory exclusions.* If another section of Chapter 1 of the Internal Revenue Code of 1986 provides an exclusion from gross income based on the cost of the benefit provided to the employee and such exclusion is a limited amount, section 132 and the regulations thereunder may apply to the extent the cost of the benefit exceeds the statutory exclusion.

(g) *Effective date.* Sections 1.132-0, 1.132-1, 1.132-2, 1.132-3, 1.132-4, 1.132-5, 1.132-6, 1.132-7 and 1.132-8 are effective as of January 1, 1989, except that §§1.132-1(b)(1) with respect to the use of air transportation by a parent of an employee and 1.132-4(d) are effective as of January 1, 1985. Furthermore, in

## § 1.132-1T

## 26 CFR Ch. I (4-1-06 Edition)

§ 1.132-5, the eleventh sentence of paragraph (m)(1), *Examples 6 and 7* in paragraph (m)(8), and paragraphs (m)(2)(i), (m)(2)(v), (m)(3)(iv), (m)(6), (m)(7), and (r) are effective December 30, 1992; however, taxpayers may treat the rules as applicable to benefits provided on or after January 1, 1989. For the applicable rules relating to employer-provided transportation for security concerns prior to December 30, 1992, see § 1.132-5(m) (as contained in 26 CFR part 1 (§§ 1.61 to 1.169) revised April 1, 1992). See §§ 1.132-1T, 1.132-2T, 1.132-3T, 1.132-4T, 1.132-5T, 1.132-6T, 1.132-7T and 1.132-8T for rules in effect for benefits received from January 1, 1985, to December 31, 1988.

[T.D. 8256, 54 FR 28601, July 6, 1989, as amended by T.D. 8457, 57 FR 62196, Dec. 30, 1992; 58 FR 7296, Feb. 5, 1993]

### § 1.132-1T Exclusion from gross income of certain fringe benefits—1985 through 1988 (temporary).

(a) *In general.* Gross income does not include any fringe benefit which qualifies as a—

- (1) No-additional-cost service,
- (2) Qualified employee discount,
- (3) Working condition fringe, or
- (4) De minimis fringe.

Special rules apply with respect to certain on-premises gyms and other athletic facilities (§ 1.132-1T(e)), demonstration use of employer-provided automobiles by full-time automobile salesmen (§ 1.132-1T(n)), parking provided to an employee on or near the business premises of the employer (§ 1.132-5T(o)), and on-premises eating facilities (§ 1.132-7T).

(b) *Definition of employee*—(1) *No-additional-cost services and qualified employee discounts.* For purposes of section 132(a)(1) (relating to no-additional-cost services) and section 132(a)(2) (relating to qualified employee discounts), the term “employee” (with respect to a line of business of an employer) means—

(i) Any individual who is currently employed by the employer in the line of business,

(ii) Any individual who was formerly employed by the employer in the line of business and who separated from service with the employer in the line of

business by reason of retirement or disability, and

(iii) Any widow or widower of an individual who died while employed by the employer in the line of business or who separated from service with the employer in the line of business by reason of retirement or disability.

For purposes of this paragraph (b)(1), any partner who performs services for a partnership is considered employed by the partnership. In addition, any use by the spouse or dependent child (as defined in this paragraph (b)) of the employee will be treated as use by the employee.

(2) *Working condition fringes.* For purposes of section 132(a)(2) (relating to working condition fringes), the term “employee” means—

(i) Any individual who is currently employed by the employer,

(ii) Any partner who performs services for the partnership,

(iii) Any director of the employer, and

(iv) Any independent contractor who performs services for the employer.

Notwithstanding anything in this paragraph (b)(2) to the contrary, any independent contractor who performs services for the employer cannot exclude the value of parking or the use of consumer goods provided pursuant to a product testing program under § 1.132-5T (n); in addition, any director of the employer cannot exclude the value of the use of consumer goods provided pursuant to a product testing program under § 1.132-5T (n).

(3) *De minimis fringe.* For purpose of section 132(a)(4) (relating to de minimis fringes), the term “employee” means any recipient of a fringe benefit.

(4) *Dependent child.* For purposes of this paragraph (b), the term “dependent child” means any son, stepson, daughter or stepdaughter of the employee who is a dependent of the employee, or both of whose parents are deceased. Any child to whom section 152(e) applies will be treated as the dependent of both parents.

(c) *Special rules for employers—Effect of section 414.* All employees treated as employed by a single employer under section 414(b), (c) or (m) will be treated as employed by a single employer for

purposes of this section. Thus, employees of one corporation that is part of a controlled group of corporations may under certain circumstances be eligible to receive section 132 benefits from the other corporations that comprise the controlled group. However, the aggregation of employers described in this paragraph (c) does not change the other requirements for an exclusion, such as the line of business requirement. Thus, for example, if a controlled group of corporations consists of two corporations that operate in different lines of business, the corporations are not treated as operating in the same line of business even though the corporations are treated as one employer.

(d) *Customers not to include employees.* For purposes of section 132 and the regulations thereunder, the term “customer” means customers who are not employees. However, the preceding sentence does not apply to section 132(c)(2) (relating to the gross profit percentage for determining a qualified employee discount). Thus, an employer that provides employee discounts cannot exclude sales made to employees in determining the aggregate sales to customers.

(e) *Treatment of on-premises athletic facilities—(1) In general.* Gross income does not include the value of any on-premises athletic facility provided by the employer to its employees. For purposes of section 132 and this paragraph (e), the term “on-premises athletic facility” means any gym or other athletic facility (such as a pool, tennis court, or golf course)—

- (i) Which is located on the premises of the employer,
- (ii) Which is operated by the employer, and
- (iii) Where substantially all of the use of which is, during the calendar year, by employees of the employer, their spouses, and their dependent children.

For purposes of this paragraph (e)(1)(iii), the term “dependent children” has the same meaning as the plural of the term “dependent child” in paragraph (b)(4) of this section. The exclusion of this paragraph (e) does not apply to any athletic facility if access to the facility is made available to the

general public through the sale of memberships, the rental of the facility, etc.

(2) *Premises of the employer.* The athletic facility need not be located on the employer’s business premises. However, the athletic facility must be located on premises of the employer. The exclusion provided in this paragraph (e) applies whether the premises are owned or leased by the employer; in addition, the exclusion is available even if the employer is not a named lessee on the lease so long as the employer pays reasonable rent. The exclusion provided in this paragraph (e) does not apply to any athletic facility that is a facility for residential use. Thus, for example, a resort with accompanying athletic facilities (such as tennis courts, pool, and gym) would not qualify for the exclusion provided in this paragraph (e).

(3) *Application of rules to membership in an athletic facility.* The exclusion provided in this paragraph (e) does not apply to any membership in an athletic facility (including health clubs or country clubs) unless the facility is owned (or leased) and operated by the employer and substantially all the use of the facility is by employees of the employer, their spouses, and their dependent children. Therefore, membership in health club or country club not meeting the rules provided in this paragraph (e) would not qualify for the exclusion.

(4) *Operation by the employer.* An employer is considered to operate the athletic facility if the employer itself operates the facility through its own employees, or if the employer contracts out to another to operate the athletic facility. For example, if an employer hires an independent contractor to operate the athletic facility for the employer’s employees, the facility is considered to be operated by the employer. In addition, if an athletic facility is operated by more than one employer, it is considered to be operated by each employer. For purposes of paragraph (e)(1)(iii) of this section, substantially all the use of a facility operated by more than one employer must be by employees of all of the employers, their spouses, and their dependent children. Where the facility is operated by more than one employer, an employer

that either pays rent directly to the owner of the premises or pays rent to a named lessor of the premises is eligible for the exclusion.

(5) *Nonapplicability of nondiscrimination rules.* The nondiscrimination rules of section 132 and §1.132-8T do not apply to on-premises athletic facilities.

(f) *Nonapplicability of section 132.* If the tax treatment of a particular fringe benefit is expressly provided for in another section of Chapter 1, section 132 and the applicable regulations (except for section 132 (e) and the regulations thereunder) do not apply to such fringe benefits. For example, since section 129 provides an exclusion from gross income for amounts paid or incurred by the employer for dependent care assistance for an employee, the exclusions under section 132 and this section do not apply to the provision by an employer to an employee of dependent care assistance.

[T.D. 8063, 50 FR 52297, Dec. 23, 1985, as amended by T.D. 8256, 54 FR 28600, July 6, 1989]

**§ 1.132-2 No-additional-cost services.**

(a) *In general*—(1) *Definition.* Gross income does not include the value of a no-additional-cost service. A “no-additional-cost service” is any service provided by an employer to an employee for the employee’s personal use if—

(i) The service is offered for sale by the employer to its customers in the ordinary course of the line of business of the employer in which the employee performs substantial services, and

(ii) The employer incurs no substantial additional cost in providing the service to the employee (including foregone revenue and excluding any amount paid by or on behalf of the employee for the service).

For rules relating to the line of business limitation, see §1.132-4. For purposes of this section, a service will not be considered to be offered for sale by the employer to its customers if that service is primarily provided to employees and not to the employer’s customers.

(2) *Excess capacity services.* Services that are eligible for treatment as no-additional-cost services include excess capacity services such as hotel accommodations; transportation by aircraft,

train, bus, subway, or cruise line; and telephone services. Services that are not eligible for treatment as no-additional-cost services are non-excess capacity services such as the facilitation by a stock brokerage firm of the purchase of stock. Employees who receive non-excess capacity services may, however, be eligible for a qualified employee discount of up to 20 percent of the value of the service provided. See §1.132-3.

(3) *Cash rebates.* The exclusion for a no-additional-cost service applies whether the service is provided at no charge or at a reduced price. The exclusion also applies if the benefit is provided through a partial or total cash rebate of an amount paid for the service.

(4) *Applicability of nondiscrimination rules.* The exclusion for a no-additional-cost service applies to highly compensated employees only if the service is available on substantially the same terms to each member of a group of employees that is defined under a reasonable classification set up by the employer that does not discriminate in favor of highly compensated employees. See §1.132-8.

(5) *No substantial additional cost*—(i) *In general.* The exclusion for a no-additional-cost service applies only if the employer does not incur substantial additional cost in providing the service to the employee. For purposes of the preceding sentence, the term “cost” includes revenue that is forgone because the service is provided to an employee rather than a nonemployee. (For purposes of determining whether any revenue is forgone, it is assumed that the employee would not have purchased the service unless it were available to the employee at the actual price charged to the employee.) Whether an employer incurs substantial additional cost must be determined without regard to any amount paid by the employee for the service. Thus, any reimbursement by the employee for the cost of providing the service does not affect the determination of whether the employer incurs substantial additional cost.

(ii) *Labor intensive services.* An employer must include the cost of labor

incurred in providing services to employees when determining whether the employer has incurred substantial additional cost. An employer incurs substantial additional cost, whether non-labor costs are incurred, if a substantial amount of time is spent by the employer or its employees in providing the service to employees. This would be the result whether the time spent by the employer or its employees in providing the services would have been "idle," or if the services were provided outside normal business hours. An employer generally incurs no substantial additional cost, however, if the services provided to the employee are merely incidental to the primary service being provided by the employer. For example, the in-flight services of a flight attendant and the cost of in-flight meals provided to airline employees traveling on a space-available basis are merely incidental to the primary service being provided (*i.e.*, air transportation). Similarly, maid service provided to hotel employees renting hotel rooms on a space-available basis is merely incidental to the primary service being provided (*i.e.*, hotel accommodations).

(6) *Payments for telephone service.* Payment made by an entity subject to the modified final judgment (as defined in section 559(c)(5) of the Tax Reform Act of 1984) of all or part of the cost of local telephone service provided to an employee by a person other than an entity subject to the modified final judgment shall be treated as telephone service provided to the employee by the entity making the payment for purposes of this section. The preceding sentence also applies to a rebate of the amount paid by the employee for the service and a payment to the person providing the service. This paragraph (a)(6) applies only to services and employees described in § 1.132-4 (c). For a special line of business rule relating to such services and employees, see § 1.132-4 (c).

(b) *Reciprocal agreements.* For purposes of the exclusion from gross income for a no-additional-cost service, an exclusion is available to an employee of one employer for a no-additional-cost service provided by an unrelated employer only if all of the following requirements are satisfied—

(1) The service provided to such employee by the unrelated employer is the same type of service generally provided to nonemployee customers by both the line of business in which the employee works and the line of business in which the service is provided to such employee (so that the employee would be permitted to exclude from gross income the value of the service if such service were provided directly by the employee's employer);

(2) Both employers are parties to a written reciprocal agreement under which a group of employees of each employer, all of whom perform substantial services in the same line of business, may receive no-additional-cost services from the other employer; and

(3) Neither employer incurs any substantial additional cost (including forgone revenue) in providing such service to the employees of the other employer, or pursuant to such agreement. If one employer receives a substantial payment from the other employer with respect to the reciprocal agreement, the paying employer will be considered to have incurred a substantial additional cost pursuant to the agreement, and consequently services performed under the reciprocal agreement will not qualify for exclusion as no-additional-cost services.

(c) *Example.* The rules of this section are illustrated by the following example:

*Example.* Assume that a commercial airline permits its employees to take personal flights on the airline at no charge and receive reserved seating. Because the employer forgoes potential revenue by permitting the employees to reserve seats, employees receiving such free flights are not eligible for the no-additional-cost exclusion.

[T.D. 8256, 54 FR 28602, July 6, 1989]

**§ 1.132-2T No-additional-cost service—1985 through 1988 (temporary).**

(a) *In general—*(1) *Definition.* Gross income does not include the value of a no-additional-cost service. The term "no-additional-cost service" means any service provided by an employer to an employee for the employee's personal use if—

(i) The service is offered for sale to customers in the ordinary course of the line of business of the employer in

which the employee performs substantial services, and

(ii) The employer incurs no substantial additional cost in providing the service to the employee (including forgone revenue and excluding any amount paid by or on behalf of the employee for the service).

For rules relating to the line of business limitation, see §1.132-4T.

(2) *Examples.* Services that are eligible for treatment as no-additional-cost services are excess capacity services such as hotel accommodations; transportation by aircraft, train, bus, subway, or cruise line; and telephone services. Services that are not eligible for treatment as no-additional-cost services are non-excess capacity services such as the facilitation by a stock brokerage firm of the purchase of stock. Employees who receive non-excess capacity services may, however, be eligible for a qualified employee discount of up to 20 percent of the value of the service provided. See §1.132-3T.

(3) *Cash rebates.* The exclusion for a no-additional-cost service applies whether the service is provided at no charge or at a reduced price. The exclusion also applies if the benefit is provided through a partial or total cash rebate of an amount paid for the service.

(4) *Applicability of nondiscrimination rules.* The exclusion for a no-additional-cost service applies to officers, owners, and highly compensated employees only if the service is available on substantially the same terms to each member of a group of employees that is defined under a reasonable classification set up by the employer that does not discriminate in favor of officers, owners, or highly compensated employees. See §1.132-8T.

(5) *No substantial additional cost—(i) In general.* The exclusion for a non-additional-cost service applies only if the employer does not incur substantial additional cost in providing the service to the employee. For purposes of the preceding sentence, the term “cost” includes revenue that is forgone because the service is provided to an employee rather than a nonemployee. (For purposes of determining whether any revenue is forgone, it is assumed that the employee would not have purchased

the service unless it were available to the employee at the actual price charged to the employee.) Whether an employer incurs substantial additional cost must be determined without regard to any amount paid by the employee for the service. Thus, any reimbursement by the employee for the cost of providing the service does not affect the determination of whether the employer incurs substantial additional cost.

(ii) *Labor intensive services.* An employer must include the cost of labor incurred in providing services to employees when determining whether the employer has incurred substantial additional cost. An employer has incurred substantial additional cost. An employer incurs substantial additional cost, whether or not non-labor costs are incurred, if a substantial amount of time is spent by the employer or its employees in providing the service to employees. This would be the result whether or not the time spent by the employer or its employees in providing the services would have been “idle”, or if the services were provided outside normal business hours. An employer generally incurs no substantial additional cost, however, if the employee services provided are merely incidental to the primary service being provided by the employer. For example, the in-flight services of a flight attendant provided to airline employees traveling on a space-available basis are merely incidental to the primary service being provided (*i.e.*, air transportation). In addition, the cost of in-flight meals provided to airline employees is not considered substantial in relation to the air transportation being provided.

(b) *Reciprocal agreements.* For purposes of the exclusion for a no-additional-cost service, any service provided by an employer to an employee of another employer shall be treated as provided by the employer of such employee if all of the following requirements are satisfied:

(1) The service is provided pursuant to a written reciprocal agreement between the employers under which a group of employees of each employer, all of whom perform substantial services in the same line of business, may

receive no-additional-cost services from the other employer;

(2) The service provided pursuant to the agreement to the employees of both employers is the same type of service provided by the employers to customers both in the line of business in which the employees perform substantial services and the line of business in which the service is provided to customers; and

(3) Neither employer incurs substantial additional cost (including forgone revenue) in providing the service to the employees of the other employer or pursuant to the agreement.

If one employer receives a substantial payment from the other employer with respect to the reciprocal agreement, the paying employer will be considered to have incurred a substantial additional cost pursuant to the agreement.

[T.D. 8063, 50 FR 52298, Dec. 23, 1985, as amended by T.D. 8256, 54 FR 28600, July 6, 1989]

#### § 1.132-3 Qualified employee discounts.

(a) *In general*—(1) *Definition*. Gross income does not include the value of a qualified employee discount. A “qualified employee discount” is any employee discount with respect to qualified property or services provided by an employer to an employee for use by the employee to the extent the discount does not exceed—

(i) The gross profit percentage multiplied by the price at which the property is offered to customers in the ordinary course of the employer’s line of business, for discounts on property, or

(ii) Twenty percent of the price at which the service is offered to customers, for discounts on services.

(2) *Qualified property or services*—(i) *In general*. The term “qualified property or services” means any property or services that are offered for sale to customers in the ordinary course of the line of business of the employer in which the employee performs substantial services. For rules relating to the line of business limitation, see § 1.132-4.

(ii) *Exception for certain property*. The term “qualified property” does not include real property and it does not include personal property (whether tangible or intangible) of a kind com-

monly held for investment. Thus, an employee may not exclude from gross income the amount of an employee discount provided on the purchase of securities, commodities, or currency, or of either residential or commercial real estate, whether or not the particular purchase is made for investment purposes.

(iii) *Property and services not offered in ordinary course of business*. The term “qualified property or services” does not include any property or services of a kind that is not offered for sale to customers in the ordinary course of the line of business of the employer. For example, employee discounts provided on property or services that are offered for sale primarily to employees and their families (such as merchandise sold at an employee store or through an employer-provided catalog service) may not be excluded from gross income. For rules relating to employer-operated eating facilities, see § 1.132-7, and for rules relating to employer-operated on-premises athletic facilities, see § 1.132-1(e).

(3) *No reciprocal agreement exception*. The exclusion for a qualified employee discount does not apply to property or services provided by another employer pursuant to a written reciprocal agreement that exists between employers to provide discounts on property and services to employees of the other employer.

(4) *Property or services provided without charge, at a reduced price, or by rebates*. The exclusion for a qualified employee discount applies whether the property or service is provided at no charge (in which case only part of the discount may be excludable as a qualified employee discount) or at a reduced price. The exclusion also applies if the benefit is provided through a partial or total cash rebate of an amount paid for the property or service.

(5) *Property or services provided directly by the employer or indirectly through a third party*. A qualified employee discount may be provided either directly by the employer or indirectly through a third party. For example, an employee of an appliance manufacturer may receive a qualified employee discount on the manufacturer’s appliances purchased at a retail store that offers

such appliances for sale to customers. The employee may exclude the amount of the qualified employee discount whether the employee is provided the appliance at no charge or purchases it at a reduced price, or whether the employee receives a partial or total cash rebate from either the employer-manufacturer or the retailer. If an employee receives additional rights associated with the property that are not provided by the employee's employer to customers in the ordinary course of the line of business in which the employee performs substantial services (such as the right to return or exchange the property or special warranty rights), the employee may only receive a qualified employee discount with respect to the property and not the additional rights. Receipt of such additional rights may occur, for example, when an employee of a manufacturer purchases property manufactured by the employee's employer at a retail outlet.

(6) *Applicability of nondiscrimination rules.* The exclusion for a qualified employee discount applies to highly compensated employees only if the discount is available on substantially the same terms to each member of a group of employees that is defined under a reasonable classification set up by the employer that does not discriminate in favor of highly compensated employees. See § 1.132-8.

(b) *Employee discount*—(1) *Definition.* The term “employee discount” means the excess of—

(i) The price at which the property or service is being offered by the employer for sale to customers, over

(ii) The price at which the property or service is provided by the employer to an employee for use by the employee. A transfer of property by an employee without consideration is treated as use by the employee for purposes of this section. Thus, for example, if an employee receives a discount on property offered for sale by his employer to customers and the employee makes a gift of the property to his parent, the property will be considered to be provided for use by the employee; thus, the discount will be eligible for exclusion as a qualified employee discount.

(2) *Price to customers*—(i) *Determined at time of sale.* In determining the amount of an employee discount, the price at which the property or service is being offered to customers at the time of the employee's purchase is controlling. For example, assume that an employer offers a product to customers for \$20 during the first six months of a calendar year, but at the time the employee purchases the product at a discount, the price at which the product is being offered to customers is \$25. In this case, the price from which the employee discount is measured is \$25. Assume instead that, at the time the employee purchases the product at a discount, the price at which the product is being offered to customers is \$15 and the price charged the employee is \$12. The employee discount is measured from \$15, the price at which the product is offered for sale to customers at the time of the employee purchase. Thus, the employee discount is \$15 - \$12, or \$3.

(ii) *Quantity discount not reflected.* The price at which a property or service is being offered to customers cannot reflect any quantity discount unless the employee actually purchases the requisite quantity of the property or service.

(iii) *Price to employer's customers controls.* In determining the amount of an employee discount, the price at which a property or service is offered to customers of the employee's employer is controlling. Thus, the price at which the property is sold to the wholesale customers of a manufacturer will generally be lower than the price at which the same property is sold to the customers of a retailer. However, see paragraph (a)(5) of this section regarding the effect of a wholesaler providing to its employees additional rights not provided to customers of the wholesaler in the ordinary course of its business.

(iv) *Discounts to discrete customer or consumer groups.* Subject to paragraph (2)(ii) of this section, if an employer offers for sale property or services at one or more discounted prices to discrete customer or consumer groups, and

sales at all such discounted prices comprise at least 35 percent of the employer's gross sales for a representative period, then in determining the amount of an employee discount, the price at which such property or service is being offered to customers for purposes of this section is a discounted price. The applicable discounted price is the current undiscounted price, reduced by the percentage discount at which the greatest percentage of the employer's discounted gross sales are made for such representative period. If sales at different percentage discounts equal the same percentage of the employer's gross sales, the price at which the property or service is being provided to customers may be reduced by the average of the discounts offered to each of the two groups. For purposes of this section, a representative period is the taxable year of the employer immediately preceding the taxable year in which the property or service is provided to the employee at a discount. If more than one employer would be aggregated under section 414 (b), (c), (m), or (o), and not all of the employers have the same taxable year, the employers required to be aggregated must designate the 12-month period to be used in determining gross sales for a representative period. The 12-month period designated, however, must be used on a consistent basis.

(v) *Examples.* The rules provided in this paragraph (b)(2) are illustrated by the following examples:

*Example (1).* Assume that a wholesale employer offers property for sale to two discrete customer groups at differing prices. Assume further that during the prior taxable year of the employer, 70 percent of the employer's gross sales are made at a 15 percent discount and 30 percent at no discount. For purposes of this paragraph (b)(2), the current undiscounted price at which the property or service is being offered by the employer for sale to customers may be reduced by the 15 percent discount.

*Example (2).* Assume that a retail employer offers a 20 percent discount to members of the American Bar Association, a 15 percent discount to members of the American Medical Association, and a ten percent discount to employees of the Federal Government. Assume further that during the prior taxable year of the employer, sales to American Bar Association members equal 15 percent of the employer's gross sales, sales to American

Medical Association members equal 20 percent of the employer's gross sales, and sales to Federal Government employees equal 25 percent of the employer's gross sales. For purposes of this paragraph (b)(2), the current undiscounted price at which the property or service is being offered by the employer for sale to customers may be reduced by the ten percent Federal Government discount.

(3) *Damaged, distressed, or returned goods.* If an employee pays at least fair market value for damaged, distressed, or returned property, such employee will not have income attributable to such purchase.

(c) *Gross profit percentage*—(1) *In general*—(i) *General rule.* An exclusion from gross income for an employee discount on qualified property is limited to the price at which the property is being offered to customers in the ordinary course of the employer's line of business, multiplied by the employer's gross profit percentage. The term "gross profit percentage" means the excess of the aggregate sales price of the property sold by the employer to customers (including employees) over the employer's aggregate cost of the property, then divided by the aggregate sales price.

(ii) *Calculation of gross profit percentage.* The gross profit percentage must be calculated separately for each line of business based on the aggregate sales price and aggregate cost of property in that line of business for a representative period. For purposes of this section, a representative period is the taxable year of the employer immediately preceding the taxable year in which the discount is available. For example, if the aggregate amount of sales of property in an employer's line of business for the prior taxable year was \$800,000, and the aggregate cost of the property for the year was \$600,000, the gross profit percentage would be 25 percent (\$800,000 minus \$600,000, then divided by \$800,000). If two or more employers are required to aggregate under section 414 (b), (c), (m), or (o) (aggregated employer), and if all of the aggregated employers do not share the same taxable year, then the aggregated employers must designate the 12-month period to be used in determining the gross profit percentage. The 12-month period designated, however, must be used on a consistent basis. If

an employee performs substantial services in more than one line of business, the gross profit percentage of the line of business in which the property is sold determines the amount of the excludable employee discount.

(iii) *Special rule for employers in their first year of existence.* An employer in its first year of existence may estimate the gross profit percentage of a line of business based on its mark-up from cost. Alternatively, an employer in its first year of existence may determine the gross profit percentage by reference to an appropriate industry average.

(iv) *Redetermination of gross profit percentage.* If substantial changes in an employer's business indicate at any time that it is inappropriate for the prior year's gross profit percentage to be used for the current year, the employer must, within a reasonable period, redetermine the gross profit percentage for the remaining portion of the current year as if such portion of the year were the first year of the employer's existence.

(2) *Line of business.* In general, an employer must determine the gross profit percentage on the basis of all property offered to customers (including employees) in each separate line of business. An employer may instead select a classification of property that is narrower than the applicable line of business. However, the classification must be reasonable. For example, if an employer computes gross profit percentage according to the department in which products are sold, such classification is reasonable. Similarly, it is reasonable to compute gross profit percentage on the basis of the type of merchandise sold (such as high mark-up and low mark-up classifications). It is not reasonable, however, for an employer to classify certain low mark-up products preferred by certain employees (such as highly compensated employees) with high mark-up products or to classify certain high mark-up products preferred by other employees with low mark-up products.

(3) *Generally accepted accounting principles.* In general, the aggregate sales price of property must be determined in accordance with generally accepted accounting principles. An employer

must compute the aggregate cost of property in the same manner in which it is computed for the employer's Federal income tax liability; thus, for example, section 263A and the regulations thereunder apply in determining the cost of property.

(d) *Treatment of leased sections of department stores—(1) In general—(i) General rule.* For purposes of determining whether employees of a leased section of a department store may receive qualified employee discounts at the department store and whether employees of the department store may receive qualified employee discounts at the leased section of the department store, the leased section is treated as part of the line of business of the person operating the department store, and employees of the leased section are treated as employees of the person operating the department store as well as employees of their employer. The term "leased section of a department store" means a section of a department store where substantially all of the gross receipts of the leased section are from over-the-counter sales of property made under a lease, license, or similar arrangement where it appears to the general public that individuals making such sales are employed by the department store. A leased section of a department store which, in connection with the offering of beautician services, customarily makes sales of beauty aids in the ordinary course of business is deemed to derive substantially all of its gross receipts from over-the-counter sales of property.

(ii) *Calculation of gross profit percentage.* For purposes of paragraph (d) of this section, when calculating the gross profit percentage of property and services sold at a department store, sales of property and services sold at the department store, as well as sales of property and services sold at the leased section, are considered. The rule provided in the preceding sentence does not apply, however, if it is more reasonable to calculate the gross profit percentage for the department store and leased section separately, or if it would be inappropriate to combine them (such as where either the department store or the leased section but not both provides employee discounts).

(2) *Employees of the leased section*—(i) *Definition.* For purposes of this paragraph (d), “employees of the leased section” means all employees who perform substantial services at the leased section of the department store regardless of whether the employees engage in over-the-counter sales of property or services. The term “employee” has the same meaning as in section 132(f) and § 1.132-1(b)(1).

(ii) *Discounts offered to either department store employees or employees of the leased section.* If the requirements of this paragraph (d) are satisfied, employees of the leased section may receive qualified employee discounts at the department store whether or not employees of the department store are offered discounts at the leased section. Similarly, employees of the department store may receive a qualified employee discount at the leased section whether or not employees of the leased section are offered discounts at the department store.

(e) *Excess discounts.* Unless excludable under a provision of the Internal Revenue Code of 1986 other than section 132(a)(2), an employee discount provided on property is excludable to the extent of the gross profit percentage multiplied by the price at which the property is being offered for sale to customers. If an employee discount exceeds the gross profit percentage, the excess discount is includible in the employee’s income. For example, if the discount on employer-purchased property is 30 percent and the employer’s gross profit percentage for the period in the relevant line of business is 25 percent, then 5 percent of the price at which the property is being offered for sale to customers is includible in the employee’s income. With respect to services, an employee discount of up to 20 percent may be excludable. If an employee discount exceeds 20 percent, the excess discount is includible in the employee’s income. For example, assume that a commercial airline provides a pass to each of its employees permitting the employees to obtain a free round-trip coach ticket with a confirmed seat to any destination the airline services. Neither the exclusion of section 132(a)(1) (relating to no-additional-cost services) nor any other

statutory exclusion applies to a flight taken primarily for personal purposes by an employee under this program. However, an employee discount of up to 20 percent may be excluded as a qualified employee discount. Thus, if the price charged to customers for the flight taken is \$300 (under restrictions comparable to those actually placed on travel associated with the employee airline ticket), \$60 is excludible from gross income as a qualified employee discount and \$240 is includible in gross income.

[T.D. 8256, 54 FR 28603, July 6, 1989]

**§ 1.132-3T Qualified employee discount—1985 through 1988 (temporary).**

(a) *In general*—(1) *Definition.* Gross income does not include the value of a qualified employee discount. The term “qualified employee discount” means any employee discount with respect to qualified property or services provided by an employer to an employee for the employee’s personal use to the extent the discount does not exceed—

(i) The gross profit percentage of the price at which the property is offered to customers, for discounts on property, or

(ii) 20 percent of the price at which the services are offered to customers, for discounts on services.

(2) *Qualified property or services*—(i) *In general.* The term “qualified property or services” means any property or services that are offered for sale to customers in the ordinary course of the line of business of the employer in which the employee performs substantial services. For rules relating to the line of business limitation, see § 1.132-4T.

(ii) *Exception for certain property.* The term “qualified property” does not include real property and it does not include personal property (whether tangible or intangible) of a kind commonly held for investment. Thus, an employee may not exclude from gross income the amount of an employee discount provided on the purchase of either residential or commercial real estate, securities, commodities, or currency, whether or not the particular purchase is made for investment purposes.

(iii) *Property and services not offered in ordinary course of business.* The term “qualified property or services” does not include any property or services of a kind that is not offered for sale to customers in the ordinary course of the line of business of the employer. For example, employee discounts provided on property or services that are offered for sale only to employees and their families (such as merchandise sold at an employee store or through an employer-provided catalog service) may not be excluded from gross income.

(3) *No reciprocal agreement exception.* The exclusion for a qualified employee discount does not apply to property or services provided by another employer pursuant to a written reciprocal agreement that exists between employers to provide discounts on property and services to employees of the other employer.

(4) *Cash or third-party rebates—(i) Property or services provided without charge or at a reduced price.* The exclusion for a qualified employee discount applies whether the property or service is provided at no charge (in which case only part of the discount may be excludable as a qualified employee discount) or at a reduced price. The exclusion also applies if the benefit is provided through a partial or total cash rebate of an amount paid for the property or service.

(ii) *Property or services provided directly by the employer or indirectly through a third party.* A qualified employee discount may be provided either directly by the employer or indirectly through a third party. For example, an employee of an appliance manufacturer may receive a qualified employee discount on the manufacturer’s appliances purchased at a retail store that offers such appliances for sale to customers. The employee may exclude the amount of the qualified employee discount whether the employee is provided the appliance at no charge or purchases it at a reduced price, or whether the employee receives a partial or total cash rebate from either the employer-manufacturer or the retailer. If an employee receives additional rights associated with the property that are not provided by the employee’s employer to customers in the ordinary course of the

line of business in which the employee performs substantial services (such as the right to return or exchange the property or special warranty rights), the employee may only receive a qualified employee discount with respect to the property and not the additional rights. Receipt of such additional rights may occur, for example, when an employee of a manufacturer purchases property manufactured by the employee’s employer at a retail outlet.

(5) *Applicability of nondiscrimination rules.* The exclusion for a qualified employee discount applies to officers, owners, and highly compensated employees only if the discount is available on substantially the same terms to each member of a group of employees that is defined under a reasonable classification set up by the employer that does not discriminate in favor of officers, owners, or highly compensated employees. See § 1.132-8T.

(b) *Employee discount—(1) Definition.* The term “employee discount” means the excess of—

(i) The price at which the property or service is being offered by the employer for sale to customers, over

(ii) The price at which the property or service is provided by the employer to an employee for use by the employee.

A transfer of property by an employee without consideration is considered use by the employee for purposes of this section. Thus, for example, if an employee receives a discount on property offered for sale by his employer to customers and the employee makes a gift of the property to his parent, the property will be considered to be provided for use by the employee, thus enabling the discount to be eligible for exclusion as a qualified employee discount.

(2) *Price to customers—(i) Determined at time of sale.* In determining the amount of an employee discount, the price at which the property or service is being offered to customers at the time of the employee’s purchase is controlling. For example, assume that an employer offers a product to customers for \$20 during the first six months of a calendar year, but at the time the employee purchases the product at a discount, the price at which the product is being offered to customers is \$25. In

this case, the price from which the employee discount is measured is \$25.

(ii) *Quantity discount not reflected.* The price referred to in paragraph (b)(2)(i) of this section cannot reflect any quantity discount unless the employee actually purchases the requisite quantity of the property or service.

(iii) *Customers of employee's employer controls.* In determining the amount of an employee discount, the price at which the property or service is offered to customers of the employee's employer is controlling. Thus, the price at which property is sold to the wholesale customers of a manufacturer will generally be lower than the price at which the same property is sold to the customers of a retailer. However, see paragraph (a)(4)(ii) of this section regarding the effect of a wholesaler providing to its employees additional rights not provided to customers of the wholesaler in the ordinary course of its business.

(iv) *Discounts to discrete customer or consumer groups.* In determining the amount of an employee discount, if an employer offers for sale property or services at one or more discounted prices to discrete customer or consumer groups, and sales at all such discounted prices comprise at least 35 percent of the employer's gross sales for a representative period, then the price at which property or service is being offered to customers is a discounted price. The applicable discounted price is the current undiscounted price, reduced by the percentage discount at which the greatest percentage of the employer's gross sales are made for such representative period. If sales at different percentage discounts equal the same percentage of the employer's gross sales, the price at which the property or service is being provided to customers may be reduced by the average of the two group discounts. For purposes of this section, a representative period is the taxable year of the employer immediately preceding the taxable year in which the property or service is provided to the employee at a discount. If more than one employer would be aggregated under section 414 (b), (c), or (m), and all of the employers do not have the same taxable year, the employers required to be aggregated

must designate the 12-month period to be used in determining gross sales for a representative period.

(v) *Examples.* The rules provided in this paragraph (b)(2) are illustrated by the following examples:

*Example (1).* Assume that a wholesale employer offers property for sale to two discrete customer groups at differing prices. Assume further that during the prior taxable year of the employer, 70 percent of the employer's gross sales are made at a 15-percent discount and 30 percent at no discount. The current undiscounted price at which the property or service is being offered by the employer for sale to customers may be reduced by the 15-percent discount.

*Example (2).* Assume that a retail employer offers a 20 percent discount to members of the American Bar Association, a 15 percent discount to members of the American Medical Association, and a ten percent discount to employees of the Federal Government. Assume further that during the prior taxable year of the employer, sales to American Bar Association members equal 15 percent of the employer's gross sales, sales to American Medical Association members equal 20 percent of the employer's gross sales, and sales to Federal Government employees equal 25 percent of the employer's gross sales. The current undiscounted price at which the property or service is being offered by the employer for sale to customers may be reduced by the ten percent Federal Government discount.

(3) *Damaged, distressed, or returned goods.* If an employee pays at least fair market value for damaged, distressed, or returned property, such employee will not have income attributable to such purchase.

(c) *Gross profit percentage—(1) In general—(i) General rule.* An exclusion from gross income for an employee discount on qualified property is limited to the price at which the property is being offered to customers in the ordinary course of the employer's line of business, multiplied by the employer's gross profit percentage. The term "gross profit percentage" means the excess of the aggregate sales price of the property sold by the employer to customers (including employees) over the employer's aggregate cost of the property, then divided by the aggregate sales price.

(ii) *Calculation of gross profit percentage.* The gross profit percentage must be calculated separately for each line of business based on the aggregate

sales price and aggregate cost of property in that line of business for a representative period. For purposes of this section, a representative period is the taxable year of the employer immediately preceding the taxable year in which the discount is available. For example, if the aggregate sales of property in an employer's line of business for the prior taxable year were \$800,000, and the aggregate cost of the property for the year were \$600,000, the gross profit percentage would be 25 percent (\$800,000 minus \$600,000, then divided by \$800,000). If more than one employer would be aggregated under section 414 (b), (c), or (m), and all of the employers do not have the same taxable year, the employers required to be aggregated must designate the 12-month period to be used in determining the gross profit percentage. If an employee performs substantial services in more than one line of business, the gross profit percentage of the line of business in which the property is sold determines the amount of the excludable employee discount.

(iii) *Special rule for employers in their first year of existence.* An employer in its first year of existence may estimate the gross profit percentage of a line of business based on its mark-up from the cost. Alternatively, an employer in its first year of existence may determine the gross profit percentage by reference to an appropriate industry average.

(iv) *Redetermination of gross profit percentage.* If substantial changes in an employer's business indicate at any time that it is inappropriate for the prior years' gross profit percentage to be used for the current year, the employer must, within a reasonable period, redetermine the gross profit percentage for the remaining portion of the current year as if such portion of the year were the first year of the employer's existence.

(2) *Line of business.* In general, an employer must determine the gross profit percentage on the basis of all property offered to customers (including employees) in each separate line of business. An employer may instead select a classification of property that is narrower than the applicable line of business. However, such classification must

be reasonable. For example, if an employer computes gross profit percentage according to the department in which products are sold, such classification is reasonable. Similarly, it is reasonable to compute gross profit percentage on the basis of the type of merchandise sold (such as high mark-up and low mark-up classifications). It is not reasonable, however, for an employer to classify certain low mark-up products preferred by certain employees (such as officers, owners, and highly compensated employees) with high mark-up products or to classify certain high mark-up products preferred by other employees with low mark-up products.

(3) *Generally accepted accounting principles.* In general, the aggregate sales price of property must be determined in accordance with generally accepted accounting principles. An employer must compute the aggregate cost of property in the same manner in which it is computed for the employer's Federal income tax liability, pursuant to the inventory rules in section 471 and the regulations thereunder.

(d) *Treatment of leased sections of department stores—(1) In general—(i) General rule.* For purposes of determining whether employees of a leased section of a department store may receive qualified employee discounts at the department store and whether employees of the department store may receive qualified employee discounts at the leased section of the department store, the leased section is treated as part of the line of business of the person operating the department store, and employees of the leased section are treated as employees of the person operating the department store as well as employees of their employer. The term "leased section of a department store" means a section of a department store where substantially all of the gross receipts of the leased section are over-the-counter sales of property made under a lease, license, or similar arrangement where it appears to the general public that individuals making such sales are employed by the department store. An example of a leased section of a department store is a cosmetics firm that leases floor space from a department store.

(ii) *Calculation of gross profit percentage.* When calculating the gross profit percentage of property and services sold at the department store under paragraph (c) of this section, sales of property and services sold at the department store, as well as sales of property and services sold at the leased section, are considered. The rule provided in the preceding sentence does not apply, however, if it is reasonable to calculate the gross profit percentage for the department store and leased section separately, or if it would be inappropriate to combine them (such as where either the department store or the leased section, but not both, provides employee discounts).

(2) *Employees of the leased section—(i) Definition.* For purposes of this paragraph (d), “employees of the leased section” means all employees who perform substantial services at the leased section regardless of whether the employees engage in over-the-counter sales of property or services. The term “employee” has the same meaning as in section 133(f).

(ii) *Discounts offered to either department store employees or employees of the leased section.* If the requirements of this paragraph (d) are satisfied, employees of the leased section may receive qualified employee discounts at the department store regardless of whether employees of the department store are offered discounts at the leased section. Similarly, regardless of whether employees of the leased section are offered discounts at the department store, employees of the department store may receive qualified employee discounts at the leased section.

(e) *Excess discounts.* Unless excludable under a statutory provision other than section 132(a)(2), an employee discount provided on property is excludable to the extent of the gross profit percentage multiplied by the price at which the property is being offered for sale to customers. If an employee discount exceeds the gross profit percentage, the excess discount is includable in the employee’s income. For example, if the discount on property is 30 percent and the employer’s gross profit percentage for the period in the relevant line of business is 25 percent, then 5 percent of

the price at which the property is being offered for sale to customers is includable in the employee’s income. With respect to services, an employee discount of up to 20 percent may be excludable. If an employee discount exceeds 20 percent, the excess discount is includable in the employee’s income.

[T.D. 8063, 50 FR 52299, Dec. 23, 1985, as amended by T.D. 8256, 54 FR 28600, July 6, 1989]

#### § 1.132-4 Line of business limitation.

(a) *In general—(1) Applicability—(i) General rule.* A no-additional-cost service or a qualified employee discount provided to an employee is only available with respect to property or services that are offered for sale to customers in the ordinary course of the same line of business in which the employee receiving the property or service performs substantial services. Thus, an employee who does not perform substantial services in a particular line of business of the employer may not exclude from income under section 132 (a)(1) or (a)(2) the value of services or employee discounts received on property or services in that line of business. For rules that relax the line of business requirement, see paragraphs (b) through (g) of this section.

(ii) *Property and services sold to employees rather than customers.* Because the property or services must be offered for sale to customers in the ordinary course of the same line of business in which the employee performs substantial services, the line of business limitation is not satisfied if the employer’s products or services are sold primarily to employees of the employer, rather than to customers. Thus, for example, an employer in the banking line of business is not considered in the variety store line of business if the employer establishes an employee store that offers variety store items for sale to the employer’s employees. See § 1.132-7 for rules relating to employer-operated eating facilities, and see § 1.132-1(e) for rules relating to employer-operated on-premises athletic facilities.

(iii) *Performance of substantial services in more than one line of business.* An employee who performs services in more than one of the employer’s lines of

business may only exclude no-additional-cost services and qualified employee discounts in the lines of business in which the employee performs substantial services.

(iv) *Performance of services that directly benefit more than one line of business*—(A) *In general.* An employee who performs substantial services that directly benefit more than one line of business of an employer is treated as performing substantial services in all such line of business. For example, an employee who maintains accounting records for an employer's three lines of business may receive qualified employee discounts in all three lines of business. Similarly, if an employee of a minor line of business of an employer that is significantly interrelated with a major line of business of the employer performs substantial services that directly benefit both the major and the minor lines of business, the employee is treated as performing substantial services for both the major and the minor lines of business.

(B) *Examples.* The rules provided in this paragraph (a)(1)(iv) are illustrated by the following examples:

*Example (1).* Assume that employees of units of an employer provide repair or financing services, or sell by catalog, with respect to retail merchandise sold by the employer. Such employees may be considered to perform substantial services for the retail merchandise line of business under paragraph (a)(1)(iv)(A) of this section.

*Example (2).* Assume that an employer operates a hospital and a laundry service. Assume further that some of the gross receipts of the laundry service line of business are from laundry services sold to customers other than the hospital employer. Only the employees of the laundry service who perform substantial services which directly benefit the hospital line of business (through the provision of laundry services to the hospital) will be treated as performing substantial services for the hospital line of business. Other employees of the laundry service line of business will not be treated as employees of the hospital line of business.

*Example (3).* Assume the same facts as in example (2), except that the employer also operates a chain of dry cleaning stores. Employees who perform substantial services which directly benefit the dry cleaning stores but who do not perform substantial services that directly benefit the hospital line of business will not be treated as per-

forming substantial services for the hospital line of business.

(2) *Definition*—(i) *In general.* An employer's line of business is determined by reference to the Enterprise Standard Industrial Classification Manual (ESIC Manual) prepared by the Statistical Policy Division of the U.S. Office of Management and Budget. An employer is considered to have more than one line of business if the employer offers for sale to customers property or services in more than one two-digit code classification referred to in the ESIC Manual.

(ii) *Examples.* Examples of two-digit classifications are general retail merchandise stores; hotels and other lodging places; auto repair, services, and garages; and food stores.

(3) *Aggregation of two-digit classifications.* If, pursuant to paragraph (a)(2) of this section, an employer has more than one line of business, such lines of business will be treated as a single line of business where and to the extent that one or more of the following aggregation rules apply:

(i) If it is uncommon in the industry of the employer for any of the separate lines of business of the employer to be operated without the others, the separate lines of business are treated as one line of business.

(ii) If it is common for a substantial number of employees (other than those employees who work at the headquarters or main office of the employer) to perform substantial services for more than one line of business of the employer, so that determination of which employees perform substantial services for which line or lines of business would be difficult, then the separate lines of business of the employer in which such employees perform substantial services are treated as one line of business. For example, assume that an employer operates a delicatessen with an attached service counter at which food is sold for consumption on the premises. Assume further that most but not all employees work both at the delicatessen and at the service counter. Under the aggregation rule of this paragraph (a)(3)(ii), the delicatessen and the service counter are treated as one line of business.

(iii) If the retail operations of an employer that are located on the same premises are in separate lines of business but would be considered to be within one line of business under paragraph (a)(2) of this section if the merchandise offered for sale in such lines of business were offered for sale at a department store, then the operations are treated as one line of business. For example, assume that on the same premises an employer sells both women's apparel and jewelry. Because, if sold together at a department store, the operations would be part of the same line of business, the operations are treated as one line of business.

(b) *Grandfather rule for certain retail stores*—(1) *In general.* The line of business limitation may be relaxed under the special grandfather rule of this paragraph (b). Under this special grandfather rule, if—

(i) On October 5, 1983, at least 85 percent of the employees of one member of an affiliated group (as defined in section 1504 without regard to subsections (b)(2) and (b)(4) thereof) (“first member”) were entitled to receive employee discounts at retail department stores operated by another member of the affiliated group (“second member”), and

(ii) More than 50 percent of the previous year's sales of the affiliated group are attributable to the operation of retail department stores, then, for purposes of the exclusion from gross income of a qualified employee discount, the first member is treated as engaged in the same line of business as the second member (the operator of the retail department stores). Therefore, employees of the first member of the affiliated group may exclude from income qualified employee discounts received at the retail department stores operated by the second member. However, employees of the second member of the affiliated group may not under this paragraph (b)(1) exclude any discounts received on property or services offered for sale to customers by the first member of the affiliated group.

(2) *Taxable year of affiliated group.* If not all of the members of an affiliated group have the same taxable year, the affiliated group must designate the 12-month period to be used in determining the “previous year's sales” (as referred

to in the grandfather rule of this paragraph (b)). The 12-month period designated, however, must be used on a consistent basis.

(3) *Definition of “sales.”* For purposes of this paragraph (b), the term “sales” means the gross receipts of an affiliated group, based upon the accounting methods used by its members.

(4) *Retired and disabled employees.* For purposes of this paragraph (b), an employee includes any individual who was, or whose spouse was, formerly employed by the first member of an affiliated group and who separated from service with the member by reason of retirement or disability if the second member of the group provided employee discounts to that individual on October 5, 1983.

(5) *Increase of employee discount.* If, after October 5, 1983, the employee discount described in this paragraph (b) is increased, the grandfather rule of this paragraph (b) does not apply to the amount of the increase. For example, if on January 1, 1989, the employee discount is increased from 10 percent to 15 percent, the grandfather rule will not apply to the additional 5 percent discount.

(c) *Grandfather rule for telephone service provided to predivestiture retirees.* All entities subject to the modified final judgment (as defined in section 559(c)(5) of the Tax Reform Act of 1984) shall be treated as a single employer engaged in the same line of business for purposes of determining whether telephone service provided to certain employees is a no-additional-cost service. The preceding sentence applies only in the case of an employee who by reason of retirement or disability separated before January 1, 1984, from the service of an entity subject to the modified final judgment. This paragraph (c) only applies to services provided to such employees as of January 1, 1984. For a special no-additional-cost service rule relating to such employees and such services, see § 1.132-2(a)(6).

(d) *Special rule for certain affiliates of commercial airlines*—(1) *General rule.* If a qualified affiliate is a member of an airline affiliated group and employees

of the qualified affiliate who are directly engaged in providing airline-related services are entitled to no-additional-cost service with respect to air transportation provided by such other member, then, for purposes of applying § 1.132-2 (relating to no-additional-cost services with respect to such air transportation), such qualified affiliate shall be treated as engaged in the same line of business as such other member.

(2) *“Airline affiliated group” defined.* An “airline affiliated group” is an affiliated group (as defined in section 1504 (a)) one of whose members operates a commercial airline that provides air transportation to customers on a per-seat basis.

(3) *“Qualified affiliate” defined.* A “qualified affiliate” is any corporation that is predominantly engaged in providing airline-related services. The term “airline-related services” means any of the following services provided in connection with air transportation:

- (i) Catering,
- (ii) Baggage handling,
- (iii) Ticketing and reservations,
- (iv) Flight planning and weather analysis, and
- (v) Restaurants and gift shops located at an airport.

(e) *Grandfather rule for affiliated groups operating airlines.* The line of business limitation may be relaxed under the special grandfather rule of this paragraph (e). Under this special grandfather rule, if, as of September 12, 1984—

- (1) An individual—
  - (i) Was an employee (within the meaning of § 1.132-1 (b)) of one member of an affiliated group (as defined in section 1504(a)) (“first corporation”), and
  - (ii) Was eligible for no-additional-cost services in the form of air transportation provided by another member of such affiliated group (“second corporation”),

(2) At least 50 percent of the individuals performing services for the first corporation were, or had been employees of, or had previously performed services for, the second corporation, and

(3) The primary business of the affiliated group was air transportation of passengers, then, for purposes of applying sections 132(a) (1) and (2), with re-

spect to no-additional-cost services and qualified employee discounts provided after December 31, 1984, for that individual by the second corporation, the first corporation is treated as engaged in the same air transportation line of business as the second corporation. For purposes of the preceding sentence, an employee of the second corporation who is performing services for the first corporation is also treated as an employee of the first corporation.

(f) *Special rule for qualified air transportation organizations.* A qualified air transportation organization is treated as engaged in the line of business of providing air transportation with respect to any individual who performs services for the organization if those services are performed primarily for persons engaged in providing air transportation, and are of a kind which (if performed on September 12, 1984) would qualify the individual for no-additional-cost services in the form of air transportation. The term “qualified air transportation organization” means any organization—

(1) If such organization (or a predecessor) was in existence on September 12, 1984,

(2) If such organization is—

(i) A tax-exempt organization under section(c)(6) whose membership is limited to entities engaged in the transportation by air of individuals or property for compensation or hire, or

(ii) Is a corporation all the stock of which is owned entirely by entities described in paragraph (f)(2)(i) of this section, and

(3) If such organization is operated in furtherance of the activities of its members or owners.

(g) *Relaxation of line of business requirement.* The line of business requirement may be relaxed under an elective grandfather rule provided in section 4977. For rules relating to the section 4977 election, see § 54.4977-1T.

(h) *Line of business requirement does not expand benefits eligible for exclusion.* The line of business requirement limits the benefits eligible for the no-additional-cost service and qualified employee discount exclusions to property or services provided by an employer to its customers in the ordinary course of the line of business of the employer in

which the employee performs substantial services. The requirement is intended to ensure that employers do not offer, on a tax-free or reduced basis, property or services to employees that are not offered to the employer's customers, even if the property or services offered to the customers and the employees are within the same line of business (as defined in this section).

[T.D. 8256, 54 FR 28606, July 6, 1989]

**§ 1.132-4T Line of business limitation—1985 through 1988 (temporary).**

(a) *In general*—(1) *Applicability*—(i) *General rule.* A no-additional-cost service or qualified employee discount provided to an employee must be for property or services that are offered for sale to customers in the ordinary course of the same line of business in which the employee receiving the property or service performs substantial services. Thus, an employee who does not perform substantial services in a particular line of business of the employer may not exclude the value of services or employee discounts received on property or services in that line of business.

(ii) *Property and services sold to employees rather than customers.* Since the property or services must be offered for sale to customers in the ordinary course of the same line of business in which the employee performs substantial services, the line of business limitation is not satisfied if the employer's products or services are sold to employees of the employer, rather than to customers. Thus, for example, an employer in the banking line of business is not considered in the variety store line of business if the employer establishes an employee store that offers variety store items for sale to the employer's employees.

(iii) *Performance of substantial services in more than one line of business.* An employee who performs services in more than one of the employer's lines of business may only exclude no-additional-cost services and qualified employee discounts in the lines of business in which the employee performs substantial services.

(iv) *Performance of services that directly benefit more than one line of busi-*

*ness*—(A) *In general.* An employee who performs substantial services that directly benefit more than one line of business of an employer is treated as performing substantial services in all such lines of business. For example, an employee who maintains accounting records for an employer's three lines of business may receive qualified employee discounts in all three lines of business.

(B) *Significantly interrelated minor line of business.* The employees of a minor line of business of an employer that is significantly interrelated with a major line of business of the employer who perform substantial services that directly benefit both the major and the minor lines of business are treated as employees of both the major and the minor lines of business. Employees of the minor line of business who do not perform substantial services which directly benefit the major line of business are not treated as employees of the major line of business. A minor line of business is significantly interrelated with a major line of business when, for example, the activity of the minor line of business is directly related to but is a minor part of the major line of business (such as laundry services provided at a hospital).

(C) *Examples.* The rules provided in this paragraph are illustrated in the following examples:

*Example (1).* Assume that employees of units of an employer provide repair or financing services, or sell by catalog, with respect to retail merchandise sold by the employer. Such employees may be considered as employees of the retail merchandise line of business under this paragraph (a)(1)(iv).

*Example (2).* Assume that an employer operates a hospital and a laundry service. Assume further that some of the gross receipts of the laundry service line of business are from laundry services sold to customers other than the hospital employer. Only the employees of the laundry service who perform substantial services which directly benefit the hospital line of business (through the provision of laundry services to the hospital) will be treated as employees of the hospital line of business. Other employees of the laundry service line of business will not be treated as employees of the hospital line of business.

*Example (3).* Assume the same facts as in example (2), except that the minor line of

business also operates a chain of dry cleaning stores. Employees who perform substantial services which directly benefit the dry cleaning stores but who do not perform substantial services that directly benefit the hospital line of business will not be treated as employees of the hospital line of business.

(2) *Definition*—(i) *In general.* An employer's line of business is determined by reference to the Enterprise Standard Industrial Classification Manual (ESIC Manual) prepared by the Statistical Policy Division of the U.S. Office of Management and Budget. An employer is considered to have more than one line of business if the employer offers for sale to customers property or services in more than one two-digit code classification referred to in the ESIC Manual.

(ii) *Examples.* Examples of two-digit classifications are general retail merchandise stores; hotels and other lodging places; auto repair, services, and garages; and food stores.

(3) *Aggregation of two-digit classifications.* If, pursuant to paragraph (a)(2) of this section, an employer has more than one line of business, such lines of business will be treated as a single line of business where and to the extent that one or more of the following aggregation rules apply:

(i) If it is uncommon in the industry of the employer for any of the separate lines of business of the employer to be operated without the others, the separate lines of business are treated as one line of business.

(ii) If it is common for a substantial number of employees (other than those employees who work at the headquarters or main office of the employer) to perform substantial services for more than one line of business of the employer, so that determination of which employees perform substantial services for which line of business would be difficult, then the separate lines of business of the employer in which such employees perform substantial services are treated as one line of business. For example, assume that an employer operates a delicatessen with an attached service counter at which food is sold for consumption on the premises. Assume further that most but not all employees work both at the delicatessen and at the service counter. The delicatessen and the service

counter are treated as one line of business.

(iii) If the retail operations of an employer that are located on the same premises are in separate lines of business but would be considered to be within one line of business under paragraph (a)(2) of this section if the merchandise offered for sale in such lines of business were offered for sale at a department store, then the operations are treated as one line of business. For example, assume that on the same premises an employer sells both women's apparel and jewelry. Since, if sold together at a department store, the operations would be part of the same line of business, the operations are treated as one line of business.

(b) *Grandfather rule for certain retail stores*—(1) *In general.* The line of business limitation may be relaxed under a special grandfather rule. If—

(i) On October 5, 1983, 85 percent of the employees of one member of an affiliated group (as defined in section 1504 without regard to subsections (b)(2) and (b)(4) thereof) were entitled to employee discounts at retail department stores operated by another member of the affiliated group, and

(ii) More than 50 percent of the current year's sales of the affiliated group are attributable to the operation of retail department stores,

then for purposes of the exclusion from gross income of a qualified employee discount, the first member is treated as engaged in the same line of business as the second member (the operator of the retail department stores). Therefore, employees of the first member of the affiliated group may exclude qualified employee discounts received at the retail department stores operated by the second member. However, employees of the second member of the affiliated group may not exclude any discounts received on property or services offered for sale to customers by the first member of the affiliated group.

(2) *Taxable year of affiliated group.* If all of the members do not have the same taxable year, the affiliated group must designate the 12-month period to be used in determining the "current year's sales" (as referred to in this paragraph (b)). The 12-month period

designated, however, must be used consistently.

(3) *Definition of "sales"*. For purposes of this paragraph (b), the term "sales" means the gross receipts of the affiliated group, based upon the accounting methods used by its members.

(4) *Retired and disabled employees*. For purposes of this paragraph (b), an employee includes any individual who was, or whose spouse was, formerly employed by the first member of the affiliated group and who separated from service with the member by reason of retirement or disability if the second member of the group provided employee discounts to such individuals on October 5, 1983.

(5) *Increase of employee discount*. If, after October 5, 1983, the employee discount described in this paragraph (b) is increased, the grandfather rule of this paragraph (b) does not apply to the amount of the increase. For example, if on January 1, 1985, the employee discount is increased from 10 percent to 15 percent, the grandfather rule will not apply to the additional five percent discount.

(c) *Relaxation of line of business requirement*. The line of business requirement may be relaxed under an elective grandfather rule provided in section 4977. For rules relating to the section 4977 election, see § 54.4977-1.

[T.D. 8063, 50 FR 52301, Dec. 23, 1985, as amended by T.D. 8256, 54 FR 28600, July 6, 1989]

#### § 1.132-5 Working condition fringes.

(a) *In general*—(1) *Definition*. Gross income does not include the value of a working condition fringe. A "working condition fringe" is any property or service provided to an employee of an employer to the extent that, if the employee paid for the property or service, the amount paid would be allowable as a deduction under section 162 or 167.

(i) A service or property offered by an employer in connection with a flexible spending account is not excludable from gross income as a working condition fringe. For purposes of the preceding sentence, a flexible spending account is an agreement (whether or not written) entered into between an employer and an employee that makes available to the employee over a time

period a certain level of unspecified non-cash benefits with a pre-determined cash value.

(ii) If, under section 274 or any other section, certain substantiation requirements must be met in order for a deduction under section 162 or 167 to be allowable, then those substantiation requirements apply when determining whether a property or service is excludable as a working condition fringe.

(iii) An amount that would be deductible by the employee under a section other than section 162 or 167, such as section 212, is not a working condition fringe.

(iv) A physical examination program provided by the employer is not excludable as a working condition fringe even if the value of such program might be deductible to the employee under section 213. The previous sentence applies without regard to whether the employer makes the program mandatory to some or all employees.

(v) A cash payment made by an employer to an employee will not qualify as a working condition fringe unless the employer requires the employee to—

(A) Use the payment for expenses in connection with a specific or pre-arranged activity or undertaking for which a deduction is allowable under section 162 or 167,

(B) Verify that the payment is actually used for such expenses, and

(C) Return to the employer any part of the payment not so used.

(vi) The limitation of section 67(a) (relating to the two-percent floor on miscellaneous itemized deductions) is not considered when determining the amount of a working condition fringe. For example, assume that an employer provides a \$1,000 cash advance to Employee A and that the conditions of paragraph (a)(1)(v) of this section are not satisfied. Even to the extent A uses the allowance for expenses for which a deduction is allowable under section 162 and 167, because such cash payment is not a working condition fringe, section 67(a) applies. The \$1,000 payment is includible in A's gross income and subject to income and employment tax withholding. If, however, the conditions of paragraph (a)(1)(v) of this section are satisfied with respect to the

payment, then the amount of A's working condition fringe is determined without regard to section 67(a). The \$1,000 payment is excludible from A's gross income and not subject to income and employment tax reporting and withholding.

(2) *Trade or business of the employee—*

(i) *General.* If the hypothetical payment for a property or service would be allowable as a deduction with respect to a trade or business of an employee other than the employee's trade or business of being an employee of the employer, it cannot be taken into account for purposes of determining the amount, if any, of the working condition fringe.

(ii) *Examples.* The rule of paragraph (a)(2)(i) of this section may be illustrated by the following examples:

*Example (1).* Assume that, unrelated to company X's trade or business and unrelated to employee A's trade or business of being an employee of company X, A is a member of the board of directors of company Y. Assume further that company X provides A with air transportation to a company Y board of director's meeting. A may not exclude from gross income the value of the air transportation to the meeting as a working condition fringe. A may, however, deduct such amount under section 162 if the section 162 requirements are satisfied. The result would be the same whether the air transportation was provided in the form of a flight on a commercial airline or a seat on a company X airplane.

*Example (2).* Assume the same facts as in example (1) except that A serves on the board of directors of company Z and company Z regularly purchases a significant amount of goods and services from company X. Because of the relationship between Company Z and A's employer, A's membership on Company Z's board of directors is related to A's trade or business of being an employee of Company X. Thus, A may exclude from gross income the value of air transportation to board meetings as a working condition fringe.

*Example (3).* Assume the same facts as in example (1) except that A serves on the board of directors of a charitable organization. Assume further that the service by A on the charity's board is substantially related to company X's trade or business. In this case, A may exclude from gross income the value of air transportation to board meetings as a working condition fringe.

*Example (4).* Assume the same facts as in example (3) except that company X also provides A with the use of a company X con-

ference room which A uses for monthly meetings relating to the charitable organization. Also assume that A uses company X's copy machine and word processor each month in connection with functions of the charitable organization. Because of the substantial business benefit that company X derives from A's service on the board of the charity, A may exclude as a working condition fringe the value of the use of company X property in connection with the charitable organization.

(b) *Vehicle allocation rules—*(1) *In general—*

(i) *General rule.* In general, with respect to an employer-provided vehicle, the amount excludable as a working condition fringe is the amount that would be allowable as a deduction under section 162 or 167 if the employee paid for the availability of the vehicle. For example, assume that the value of the availability of an employer-provided vehicle for a full year is \$2,000, without regard to any working condition fringe (*i.e.*, assuming all personal use). Assume further that the employee drives the vehicle 6,000 miles for his employer's business and 2,000 miles for reasons other than the employer's business. In this situation, the value of the working condition fringe is \$2,000 multiplied by a fraction, the numerator of which is the business-use mileage (6,000 miles) and the denominator of which is the total mileage (8,000 miles). Thus, the value of the working condition fringe is \$1,500. The total amount includible in the employee's gross income on account of the availability of the vehicle is \$500 (\$2,000 - \$1,500). For purposes of this section, the term "vehicle" has the meaning given the term in § 1.61-21(e)(2). Generally, when determining the amount of an employee's working condition fringe, miles accumulated on the vehicle by all employees of the employer during the period in which the vehicle is available to the employee are considered. For example, assume that during the year in which the vehicle is available to the employee in the above example, other employees accumulate 2,000 additional miles on the vehicle (while the employee is not in the automobile). In this case, the value of the working condition fringe is \$2,000 multiplied by a fraction, the numerator of which is the business-use mileage by the employee (including all mileage

(business and personal) accumulated by other employees) (8,000 miles) and the denominator of which is the total mileage (including all mileage accumulated by other employees) (10,000 miles). Thus, the value of the working condition fringe is \$1,600; the total amount includible in the employee's gross income on account of the availability of the vehicle is \$400 (\$2,000 - \$1,600). If, however, substantially all of the use of the automobile by other employees in the employer's business is limited to a certain period, such as the last three months of the year, the miles driven by the other employees during that period would not be considered when determining the employee's working condition fringe exclusion. Similarly, miles driven by other employees are not considered if the pattern of use of the employer-provided automobiles is designed to reduce Federal taxes. For example, assume that an employer provides employees A and B each with the availability of an employer-provided automobile and that A uses the automobile assigned to him 80 percent for the employer's business and that B uses the automobile assigned to him 30 percent for the employer's business. If A and B alternate the use of their assigned automobiles each week in such a way as to achieve a reduction in federal taxes, then the employer may count only miles placed on the automobile by the employee to whom the automobile is assigned when determining each employee's working condition fringe.

(ii) *Use by an individual other than the employee.* For purposes of this section, if the availability of a vehicle to an individual would be taxed to an employee, use of the vehicle by the individual is included in references to use by the employee.

(iii) *Provision of an expensive vehicle for personal use.* If an employer provides an employee with a vehicle that an employee may use in part for personal purposes, there is no working condition fringe exclusion with respect to the personal miles driven by the employee; if the employee paid for the availability of the vehicle, he would not be entitled to deduct under section 162 or 167 any part of the payment attributable to personal miles. The amount

of the inclusion is not affected by the fact that the employee would have chosen the availability of a less expensive vehicle. Moreover, the result is the same even though the decision to provide an expensive rather than an inexpensive vehicle is made by the employer for bona fide noncompensatory business reasons.

(iv) *Total value inclusion.* In lieu of excluding the value of a working condition fringe with respect of an automobile, an employer using the automobile lease valuation rule of §1.61-21(d) may include in an employee's gross income the entire Annual Lease Value of the automobile. Any deduction allowable to the employee under section 162 or 167 with respect to the automobile may be taken on the employee's income tax return. The total inclusion rule of this paragraph (b)(1)(iv) is not available if the employer is valuing the use or availability of a vehicle under general valuation principles or a special valuation rule other than the automobile lease valuation rule. See §§1.162-25 and 1.162-25T for rules relating to the employee's deduction.

(v) *Shared usage.* In calculating the working condition fringe benefit exclusion with respect to a vehicle provided for use by more than one employee, an employer shall compute the working condition fringe in a manner consistent with the allocation of the value of the vehicle under section 1.61-21(c)(2)(ii)(B).

(2) *Use of different employer-provided vehicles.* The working condition fringe exclusion must be applied on a vehicle-by-vehicle basis. For example, assume that automobile Y is available to employee D for 3 days in January and for 5 days in March, and automobile Z is available to D for a week in July. Assume further that the Daily Lease Value, as defined in §1.61-21(d)(4)(ii), of each automobile is \$50. For the eight days of availability of Y in January and March, D uses Y 90 percent for business (by mileage). During July, D uses Z 60 percent for business (by mileage). The value of the working condition fringe is determined separately for each automobile. Therefore, the working condition fringe for Y is \$360 (\$400 × .90) leaving an income inclusion

of \$40. The working condition fringe for Z is \$210 (\$350×.60), leaving an income inclusion of \$140. If the value of the availability of an automobile is determined under the Annual Lease Value rule for one period and Daily Lease Value rule for a second period (see § 1.61-21(d)), the working condition fringe exclusion must be calculated separately for the two periods.

(3) *Provision of a vehicle and chauffeur services*—(i) *General rule.* In general, with respect to the value of chauffeur services provided by an employer, the amount excludable as a working condition fringe is the amount that would be allowable as a deduction under section 162 and 167 if the employee paid for the chauffeur services. The working condition fringe with respect to a chauffeur is determined separately from the working condition fringe with respect to the vehicle. An employee may exclude from gross income the excess of the value of the chauffeur services over the value of the chauffeur services for personal purposes (such as commuting) as determined under § 1.61-21(b)(5). See § 1.61-21(b)(5) for additional rules and examples concerning the valuation of chauffeur services. See § 1.132-5(m)(5) for rules relating to an exclusion from gross income for the value of body-guard/chauffeur services. When determining whether miles placed on the vehicle are for the employer's business, miles placed on the vehicle by a chauffeur between the chauffeur's residence and the place at which the chauffeur picks up (or drops off) the employee are with respect to the employee (but not the chauffeur) considered to be miles placed on the vehicle for the employer's business and thus eligible for the working condition fringe exclusion. Thus, because miles placed on the vehicle by a chauffeur between the chauffeur's residence and the place at which the chauffeur picks up (or drops off) the employee are not considered business miles with respect to the chauffeur, the value of the availability of the vehicle for commuting is includible in the gross income of the chauffeur. For general and special rules concerning the valuation of the use of employer-provided vehicles, see paragraphs (b) through (f) of § 1.61-21.

(ii) *Examples.* The rules of paragraph (b)(3)(i) of this section are illustrated by the following examples:

*Example (1).* Assume that an employer makes available to an employee an automobile and a chauffeur. Assume further that the value of the chauffeur services determined in accordance with § 1.61-21 is \$30,000 and that the chauffeur spends 30 percent of each workday driving the employee for personal purposes. There may be excluded from the employee's income 70 percent of \$30,000, or \$21,000, leaving an income inclusion with respect to the chauffeur services of \$9,000.

*Example (2).* Assume that the value of the availability of an employer-provided vehicle for a year is \$4,850 and that the value of employer-provided chauffeur services with respect to the vehicle for the year is \$20,000. Assume further that 40 percent of the miles placed on the vehicle are for the employer's business and that 60 percent are for other purposes. In addition, assume that the chauffeur spends 25 percent of each workday driving the employee for personal purposes (*i.e.*, 2 hours). The value of the chauffeur services includible in the employee's income is 25 percent of \$20,000, or \$5,000. The excess of \$20,000 over \$5,000 or \$15,000 is excluded from the employee's income as a working condition fringe. The amount excludable as a working condition fringe with respect to the vehicle is 40 percent of \$4,850, or \$1,940 and the amount includible is \$4,850 - \$1,940, or \$2,910.

(c) *Applicability of substantiation requirements of sections 162 and 274 (d)*—(1) *In general.* The value of property or services provided to an employee may not be excluded from the employee's gross income as a working condition fringe, by either the employer or the employee, unless the applicable substantiation requirements of either section 274(d) or section 162 (whichever is applicable) and the regulations thereunder are satisfied. The substantiation requirements of section 274(d) apply to an employee even if the requirements of section 274 do not apply to the employee's employer for deduction purposes (such as when the employer is a tax-exempt organization or a governmental unit).

(2) *Section 274(d) requirements.* The substantiation requirements of section 274(d) are satisfied by "adequate records or sufficient evidence corroborating the [employee's] own statement". Therefore, such records or evidence provided by the employee, and

relied upon by the employer to the extent permitted by the regulations promulgated under section 274(d), will be sufficient to substantiate a working condition fringe exclusion.

(d) *Safe harbor substantiation rules*—(1) *In general.* Section 1.274-6T provides that the substantiation requirements of section 274(d) and the regulations thereunder may be satisfied, in certain circumstances, by using one or more of the safe harbor rules prescribed in §1.274-6T. If the employer uses one of the safe harbor rules prescribed in §1.274-6T during a period with respect to a vehicle (as defined in §1.61-21(e)(2)), that rule must be used by the employer to substantiate a working condition fringe exclusion with respect to that vehicle during the period. An employer that is exempt from Federal income tax may still use one of the safe harbor rules (if the requirements of that section are otherwise met during a period) to substantiate a working condition fringe exclusion with respect to a vehicle during the period. If the employer uses one of the methods prescribed in §1.274-6T during a period with respect to an employer-provided vehicle, that method may be used by an employee to substantiate a working condition fringe exclusion with respect to the same vehicle during the period, as long as the employee includes in gross income the amount allocated to the employee pursuant to §1.274-6T and this section. (See §1.61-21(c)(2) for other rules concerning when an employee must include in income the amount determined by the employer.) If, however, the employer uses the safe harbor rule prescribed in §1.274-6T(a)(2) or (3) and the employee without the employer's knowledge uses the vehicle for purposes other than de minimis personal use (in the case of the rule prescribed in §1.274-6T(a)(2)), or for purposes other than de minimis personal use and commuting (in the case of the rule prescribed in §1.274-6T(a)(3)), then the employees must include an additional amount in income for the unauthorized use of the vehicle.

(2) *Period for use of safe harbor rules.* The rules prescribed in this paragraph (d) assume that the safe harbor rules prescribed in §1.274-6T are used for a one-year period. Accordingly, ref-

erences to the value of the availability of a vehicle, amounts excluded as a working condition fringe, etc., are based on a one-year period. If the safe harbor rules prescribed in §1.274-6T are used for a period of less than a year, the amounts referred to in the previous sentence must be adjusted accordingly. For purposes of this section, the term "personal use" has the same meaning as prescribed in §1.274-6T (e)(5).

(e) *Safe harbor substantiation rule for vehicles not used for personal purposes.* For a vehicle described in §1.274-6T(a)(2) (relating to certain vehicles not used for personal purposes), the working condition fringe exclusion is equal to the value of the availability of the vehicle if the employer uses the method prescribed in §1.274-6T(a)(2).

(f) *Safe harbor substantiation rule for vehicles not available to employees for personal use other than commuting.* For a vehicle described in §1.274-6T(a)(3) (relating to certain vehicles not used for personal purposes other than commuting), the working condition fringe exclusion is equal to the value of the availability of the vehicle for purposes other than commuting if the employer uses the method prescribed in §1.274-6T(a)(3). This rule applies only if the special rule for valuing commuting use, as prescribed in §1.61-21(f), is used and the amount determined under the special rule is either included in the employee's income or reimbursed by the employee.

(g) *Safe harbor substantiation rule for vehicles used in connection with the business of farming that are available to employees for personal use*—(1) *In general.* For a vehicle described in §1.274-6T(b) (relating to certain vehicles used in connection with the business of farming), the working condition fringe exclusion is calculated by multiplying the value of the availability of the vehicle by 75 percent.

(2) *Vehicles available to more than one individual.* If the vehicle is available to more than one individual, the employer must allocate the gross income inclusion attributable to the vehicle (25 percent of the value of the availability of the vehicle) among the employees (and other individuals whose use would not be attributed to an employee) to whom

the vehicle was available. This allocation must be done in a reasonable manner to reflect the personal use of the vehicle by the individuals. An amount that would be allocated to a sole proprietor reduces the amounts that may be allocated to employees but is otherwise to be disregarded for purposes of this paragraph (g). For purposes of this paragraph (g), the value of the availability of a vehicle may be calculated as if the vehicle were available to only one employee continuously and without regard to any working condition fringe exclusion.

(3) *Examples.* The following examples illustrate a reasonable allocation of gross income with respect to an employer-provided vehicle between two employees:

*Example (1).* Assume that two farm employees share the use of a vehicle that for a calendar year is regularly used directly in connection with the business of farming and qualifies for use of the rule in § 1.274-6T(b). Employee A uses the vehicle in the morning directly in connection with the business of farming and employee B uses the vehicle in the afternoon directly in connection with the business of farming. Assume further that employee B takes the vehicle home in the evenings and on weekends. The employer should allocate all the income attributable to the availability of the vehicle to employee B.

*Example (2).* Assume that for a calendar year, farm employees C and D share the use of a vehicle that is regularly used directly in connection with the business of farming and qualifies for use of the rule in § 1.274-6T(b). Assume further that the employees alternate taking the vehicle home in the evening and alternate the availability of the vehicle for personal purposes on weekends. The employer should allocate the income attributable to the availability of the vehicle for personal use (25 percent of the value of the availability of the vehicle) equally between the two employees.

*Example (3).* Assume the same facts as in example (2) except that C is the sole proprietor of the farm. Based on these facts, C should allocate the same amount of income to D as was allocated to D in example (2). No other income attributable to the availability of the vehicle for personal use should be allocated.

(h) *Qualified nonpersonal use vehicles—*  
(1) *In general.* Except as provided in paragraph (h)(2) of this section, 100 percent of the value of the use of a qualified nonpersonal use vehicle (as de-

scribed in § 1.274-5T(k)) is excluded from gross income as a working condition fringe, provided that, in the case of a vehicle described in paragraph (k) (3) through (8) of that section, the use of the vehicle conforms to the requirements of that paragraph.

(2) *Shared usage of qualified nonpersonal use vehicles.* In general, a working condition fringe under paragraph (h) of this section is available to the driver and all passengers of a qualified nonpersonal use vehicle. However, a working condition fringe under this paragraph (h) is available only with respect to the driver and not with respect to any passengers of a qualified nonpersonal use vehicle described in § 1.274-5T(k)(2)(ii) (L) or (P). In this case, the passengers must comply with provisions of this section (excluding this paragraph (h)) to determine the applicability of the working condition fringe exclusion. For example, if an employer provides a passenger bus with a capacity of 25 passengers to its employees for purposes of transporting employees to and/or from work, the driver of the bus may exclude from gross income as a working condition fringe 100 percent of the value of the use of the vehicle. The value of the commuting use of the employer-provided bus by the employee-passengers is includible in their gross incomes. See § 1.61-21(f) for a special rule to value the commuting-only use of employer-provided vehicles.

(i) [Reserved]

(j) *Application of section 280F.* In determining the amount, if any, of an employee's working condition fringe, section 280F and the regulations thereunder do not apply. For example, assume that an employee has available for a calendar year an employer-provided automobile with a fair market value of \$28,000. Assume further that the special rule provided in § 1.61-21(d) is used yielding an Annual Lease Value, as defined in § 1.61-21(d), of \$7,750, and that all of the employee's use of the automobile is for the employer's business. The employee would be entitled to exclude as a working condition fringe the entire Annual Lease Value, despite the fact that if the employee paid for the availability of the automobile, an income inclusion

would be required under § 1.280F-6(d)(1). This paragraph (j) does not affect the applicability of section 280F to the employer with respect to such employer-provided automobile, nor does it affect the applicability of section 274 to either the employer or the employee. For rules concerning substantiation of an employee's working condition fringe, see paragraph (c) of this section.

(k) *Aircraft allocation rule.* In general, with respect to a flight on an employer-provided aircraft, the amount excludable as a working condition fringe is the amount that would be allowable as a deduction under section 162 or 167 if the employee paid for the flight on the aircraft. For example, if employee P and P's spouse fly on P's employer's airplane primarily for business reasons of P's employer so that P could deduct the expenses relating to the trip to the extent of P's payments, the value of the flights is excludable from gross income as a working condition fringe. However, if P's children accompany P on the trip primarily for personal reasons, the value of the flights by P's children are includible in P's gross income. See § 1.61-21 (g) for special rules for valuing personal flights on employer-provided aircraft.

(l) [Reserved]

(m) *Employer-provided transportation for security concerns—(1) In general.* The amount of a working condition fringe exclusion with respect to employer-provided transportation is the amount that would be allowable as a deduction under section 162 or 167 if the employee paid for the transportation. Generally, if an employee pays for transportation taken for primarily personal purposes, the employee may not deduct any part of the amount paid. Thus, the employee may not generally exclude the value of employer-provided transportation as a working condition fringe if such transportation is primarily personal. If, however, for bona fide business-oriented security concerns, the employee purchases transportation that provides him or her with additional security, the employee may generally deduct the excess of the amount actually paid for the transportation over the amount the employee would have paid for the same mode of transportation absent the bona fide busi-

ness-oriented security concerns. This is the case whether or not the employee would have taken the same mode of transportation absent the bona fide business-oriented security concerns. With respect to a vehicle, the phrase "the same mode of transportation" means use of the same vehicle without the additional security aspects, such as bulletproof glass. With respect to air transportation, the phrase "the same mode of transportation" means comparable air transportation. These same rules apply to the determination of an employee's working condition fringe exclusion. For example, if an employer provides an employee with a vehicle for commuting and, because of bona fide business-oriented security concerns, the vehicle is specially designed for security, then the employee may exclude from gross income the value of the special security design as a working condition fringe. The employee may not exclude the value of the commuting from income as a working condition fringe because commuting is a nondeductible personal expense. However, if an independent security study meeting the requirements of paragraph (m)(2)(v) of this section has been performed with respect to a government employee, the government employee may exclude the value of the personal use (other than commuting) of the employer-provided vehicle that the security study determines to be reasonable and necessary for local transportation. Similarly, if an employee travels on a personal trip in an employer-provided aircraft for bona fide business-oriented security concerns, the employee may exclude the excess, if any, of the value of the flight over the amount the employee would have paid for the same mode of transportation, but for the bona fide business-oriented security concerns. Because personal travel is a nondeductible expense, the employee may not exclude the total value of the trip as a working condition fringe.

(2) *Demonstration of bona fide business-oriented security concerns—(i) In general.* For purposes of this paragraph (m), a bona fide business-oriented security concern exists only if the facts and circumstances establish a specific basis for concern regarding the safety of the employee. A generalized concern for an

employee's safety is not a bona fide business-oriented security concern. Once a bona fide business-oriented security concern is determined to exist with respect to a particular employee, the employer must periodically evaluate the situation for purposes of determining whether the bona fide business-oriented security concern still exists. Example of factors indicating a specific basis for concern regarding the safety of an employee are—

(A) A threat of death or kidnapping of, or serious bodily harm to, the employee or a similarly situated employee because of either employee's status as an employee of the employer; or

(B) A recent history of violent terrorist activity (such as bombings) in the geographic area in which the transportation is provided, unless that activity is focused on a group of individuals which does not include the employee (or a similarly situated employee of an employer), or occurs to a significant degree only in a location within the geographic area where the employee does not travel.

(ii) *Establishment of overall security program.* Notwithstanding anything in paragraph (m)(2)(i) of this section to the contrary, no bona fide business-oriented security concern will be deemed to exist unless the employee's employer establishes to the satisfaction of the Commissioner that an overall security program has been provided with respect to the employee involved. An overall security program is deemed to exist if the requirements of paragraph (m)(2)(iv) of this section are satisfied (relating to an independent security study).

(iii) *Overall security program—(A) Defined.* An overall security program is one in which security is provided to protect the employee on a 24-hour basis. The employee must be protected while at the employee's residence, while commuting to and from the employee's workplace, and while at the employee's workplace. In addition, the employee must be protected while traveling both at home and away from home, whether for business or personal purposes. An overall security program must include the provision of a bodyguard/chauffeur who is trained in eva-

sive driving techniques; an automobile specially equipped for security; guards, metal detectors, alarms, or similar methods of controlling access to the employee's workplace and residence; and, in appropriate cases, flights on the employer's aircraft for business and personal reasons.

(B) *Application.* There is no overall security program when, for example, security is provided at the employee's workplace but not at the employee's residence. In addition, the fact that an employer requires an employee to travel on the employer's aircraft, or in an employer-provided vehicle that contains special security features, does not alone constitute an overall security program. The preceding sentence applies regardless of the existence of a corporate or other resolution requiring the employee to travel in the employer's aircraft or vehicle for personal as well as business reasons.

(iv) *Effect of an independent security study.* An overall security program with respect to an employee is deemed to exist if the conditions of this paragraph (m)(2)(iv) are satisfied:

(A) A security study is performed with respect to the employer and the employee (or a similarly situated employee of the employer) by an independent security consultant;

(B) The security study is based on an objective assessment of all facts and circumstances;

(C) The recommendation of the security study is that an overall security program (as defined in paragraph (m)(2)(iii) of this section) is not necessary and the recommendation is reasonable under the circumstances; and

(D) The employer applies the specific security recommendations contained in the security study to the employee on a consistent basis.

The value of transportation-related security provided pursuant to a security study that meets the requirements of this paragraph (m)(2)(iv) may be excluded from income if the security study conclusions are reasonable and, but for the bona fide business-oriented security concerns, the employee would not have had such security. No exclusion from income applies to security provided by the employer that is not recommended in the security study.

Security study conclusions may be reasonable even if, for example, it is recommended that security be limited to certain geographic areas, as in the case in which air travel security is provided only in certain foreign countries.

(v) *Independent security study with respect to government employees.* For purposes of establishing the existence of an overall security program under paragraph (m)(2)(ii) of this section with respect to a particular government employee, a security study conducted by the government employer (including an agency or instrumentality thereof) will be treated as a security study pursuant to paragraph (m)(2)(iv) of this section if, in lieu of the conditions of paragraphs (m)(2)(iv)(A) through (D) of this section, the following conditions are satisfied:

(A) The security study is conducted by a person expressly designated by the government employer as having the responsibility and independent authority to determine both the need for employer-provided security and the appropriate protective services in response to that determination;

(B) The security study is conducted in accordance with written internal procedures that require an independent and objective assessment of the facts and circumstances, such as the nature of the threat to the employee, the appropriate security response to that threat, an estimate of the length of time protective services will be necessary, and the extent to which employer-provided transportation may be necessary during the period of protection;

(C) With respect to employer-provided transportation, the security study evaluates the extent to which personal use, including commuting, by the employee and the employee's spouse and dependents may be necessary during the period of protection and makes a recommendation as to what would be considered reasonable personal use during that period; and

(D) The employer applies the specific security recommendations contained in the study to the employee on a consistent basis.

(3) *Application of security rules to spouses and dependents.* (i) *In general.* If a bona fide business-oriented security

concern exists with respect to an employee (because, for example, threats are made on the life of an employee), the bona fide business-oriented security concern is deemed to exist with respect to the employee's spouse and dependents to the extent provided in this paragraph (m)(3).

(ii) *Certain transportation.* If a working condition fringe exclusion is available under this paragraph (m) for transportation in a vehicle or aircraft provided for a bona fide business-oriented security concern with respect to an employee, the requirements of this paragraph (m) are deemed to be satisfied with respect to transportation in the same vehicle or aircraft provided at the same time to the employee's spouse and dependent children.

(iii) *Other.* Except as provided in paragraph (m)(3)(ii) of this section, a bona fide business oriented security concern is deemed to exist for the spouse and dependent children of the employer only if the requirements of paragraph (m)(2) (iii) or (iv) of this section are applied independently to such spouse and dependent children.

(iv) *Spouses and dependents of government employees.* The security rules of this paragraph (m)(3) apply to the spouse and dependents of a government employee. However, the value of local vehicle transportation provided to the government employee's spouse and dependents for personal purposes, other than commuting, during the period that a bona fide business-oriented security concern exists with respect to the government employee will not be included in the government employee's gross income if the personal use is determined to be reasonable and necessary by the security study described in paragraph (m)(2)(v) of this section.

(4) *Working condition safe harbor for travel on employer-provided aircraft.* Under the safe harbor rule of this paragraph (m)(4), if, for a bona fide business-oriented security concern, the employer requires that an employee travel on an employer-provided aircraft for a personal trip, the employer and the employee may exclude from the employee's gross income, as a working condition fringe, the excess value of the aircraft trip over the safe harbor airfare without having to show what

method of transportation the employee would have flown but for the bona fide business-oriented security concern. For purposes of the safe harbor rule of this paragraph (m)(4), the value of the safe harbor airfare is determined under the non-commercial flight valuation rule of § 1.61-21(g) (regardless of whether the employer or employee elects to use such valuation rule) by multiplying an aircraft multiple of 200-percent by the applicable cents-per-mile rates and the number of miles in the flight and then adding the applicable terminal charge. The value of the safe harbor airfare determined under this paragraph (m)(4) must be included in the employee's income (to the extent not reimbursed by the employee) regardless of whether the employee or the employer uses the special valuation rule of § 1.61-21(g). The excess of the value of the aircraft trip over this amount may be excluded from gross income as a working condition fringe. If, for a bona fide business-oriented security concern, the employer requires that an employee's spouse and dependents travel on an employer-provided aircraft for a personal trip, the special rule of this paragraph (m)(4) is available to exclude the excess value of the aircraft trips over the safe harbor airfares.

(5) *Bodyguard/chauffeur provided for a bona fide business-oriented security concern.* If an employer provides an employee with vehicle transportation and a bodyguard/chauffeur for a bona fide business-oriented security concern, and but for the bona fide business-oriented security concern the employee would not have had a bodyguard or a chauffeur, then the entire value of the services of the bodyguard/chauffeur is excludable from gross income as a working condition fringe. For purposes of this section, a bodyguard/chauffeur must be trained in evasive driving techniques. An individual who performs services as a driver for an employee is not a bodyguard/chauffeur if the individual is not trained in evasive driving techniques. Thus, no part of the value of the services of such an individual is excludable from gross income under this paragraph (m)(5). (See paragraph (b)(3) of this section for rules relating to the determination of

the working condition fringe exclusion for chauffeur services.)

(6) *Special valuation rule for government employees.* If transportation is provided to a government employee for commuting during the period that a bona fide business-oriented security concern under § 1.132-5(m) exists, the commuting use may be valued by reference to the values set forth in § 1.61-21(e)(1)(i) or (f)(3) (vehicle cents-per-mile or commuting valuation of \$1.50 per one-way commute, respectively) without regard to the additional requirements contained in § 1.61-21 (e) or (f) and is deemed to have met the requirements of § 1.61-21(c).

(7) *Government employer and employee defined.* For purposes of this paragraph (m), "government employer" includes any Federal, State, or local government unit, and any agency or instrumentality thereof. A "government employee" is any individual who is employed by the government employer.

(8) *Examples.* The provisions of this paragraph (m) may be illustrated by the following examples:

*Example (1).* Assume that in response to several death threats on the life of A, the president of X a multinational company, X establishes an overall security program for A, including an alarm system at A's home and guards at A's workplace, the use of a vehicle that is specially equipped with alarms, bulletproof glass, and armor plating, and a bodyguard/chauffeur. Assume further that A is driven for both personal and business reasons in the vehicle. Also, assume that but for the bona fide business-oriented security concerns, no part of the overall security program would have been provided to A. With respect to the transportation provided for security reasons, A may exclude as a working condition fringe the value of the special security features of the vehicle and the value attributable to the bodyguard/chauffeur. Thus, if the value of the specially equipped vehicle is \$40,000, and the value of the vehicle without the security features is \$25,000, A may determine A's inclusion in income attributable to the vehicle as if the vehicle were worth \$25,000. A must include in income the value of the availability of the vehicle for personal use.

*Example (2).* Assume that B is the chief executive officer of Y, a multinational corporation. Assume further that there have been kidnapping attempts and other terrorist activities in the foreign countries in which B performs services and that at least some of such activities have been directed against B or similarly situated employees. In response

to these activities, Y provides B with an overall security program, including an alarm system at B's home and bodyguards at B's workplace, a bodyguard/chauffeur, and a vehicle specially designed for security during B's overseas travels. In addition, assume that Y requires B to travel in Y's airplane for business and personal trips taken to, from, and within these foreign countries. Also, assume that but for bona fide business-oriented security concerns, no part of the overall security program would have been provided to B. B may exclude as a working condition fringe the value of the special security features of the automobile and the value attributable to the bodyguards and the bodyguard/chauffeur. B may also exclude the excess, if any, of the value of the flights over the amount A would have paid for the same mode of transportation but for the security concerns. As an alternative to the preceding sentence, B may use the working condition safe harbor described in paragraph (m)(4) of this section and exclude as a working condition fringe the excess, if any, of the value of personal flights in the Y airplane over the safe harbor airfare determined under the method described in paragraph (m)(4) of this section. If this alternative is used, B must include in income the value of the availability of the vehicle for personal use and the value of the safe harbor.

*Example (3).* Assume the same facts as in example (2) except that Y also requires B to travel in Y's airplane within the United States, and provides B with a chauffeur-driven limousine for business and personal travel in the United States. Assume further that Y also requires B's spouse and dependents to travel in Y's airplane for personal flights in the United States. If no bona fide business-oriented security concern exists with respect to travel in the United States, B may not exclude from income any portion of the value of the availability of the chauffeur or limousine for personal use in the United States. Thus, B must include in income the value of the availability of the vehicle and chauffeur for personal use. In addition, B may not exclude any portion of the value attributable to personal flights by B or B's spouse and dependents on Y's airplane. Thus, B must include in income the value attributable to the personal use of Y's airplane. See § 1.61-21 for rules relating to the valuation of an employer-provided vehicle and chauffeur, and personal flights on employer-provided airplanes.

*Example (4).* Assume that company Z retains an independent security consultant to perform a security study with respect to its chief executive officer. Assume further that, based on an objective assessment of the facts and circumstances, the security consultant reasonably recommends that 24-hour protection is not necessary but that the employee be provided security at his workplace and for

ground transportation, but not for air transportation. If company Z follows the recommendations on a consistent basis, an overall security program will be deemed to exist with respect to the workplace and ground transportation security only.

*Example (5).* Assume the same facts as in example (4) except that company Z only provides the employee security while commuting to and from work, but not for any other ground transportation. Because the recommendations of the independent security study are not applied on a consistent basis, an overall security program will not be deemed to exist. Thus, the value of commuting to and from work is not excludable from income. However, the value of a bodyguard with professional security training who does not provide chauffeur or other personal services to the employee or any member of the employee's family may be excludable as a working condition fringe if such expense would be otherwise allowable as a deduction by the employee under section 162 or 167.

*Example (6).* J is a United States District Judge. At the beginning of a 3-month criminal trial in J's court, a member of J's family receives death threats. M, the division (within government agency W) responsible for evaluating threats and providing protective services to the Federal judiciary, directs its threat analysis unit to conduct a security study with respect to J and J's family. The study is conducted pursuant to internal written procedures that require an independent and objective assessment of any threats to members of the Federal judiciary and their families, a statement of the requisite security response, if any, to a particular threat (including the form of transportation to be furnished to the employee as part of the security program), and a description of the circumstances under which local transportation for the employee and the employee's spouse and dependents may be necessary for personal reasons during the time protective services are provided. M's study concludes that a bona fide business-oriented security concern exists with respect to J and J's family and determines that 24-hour protection of J and J's family is not necessary, but that protection is necessary during the course of the criminal trial whenever J or J's family is away from home. Consistent with that recommendation, J is transported every day in a government vehicle for both personal and business reasons and is accompanied by two bodyguard/chauffeurs who have been trained in evasive driving techniques. In addition, J's spouse is driven to and from work and J's children are driven to and from school and occasional school activities. Shortly after the trial is concluded, M's threat analysis unit determines that J and J's family no longer need special protection because the danger posed by the threat no longer exists

and, accordingly, vehicle transportation is no longer provided. Because the security study conducted by M complies with the conditions of § 1.132-5(m)(2)(v), M has satisfied the requirement for an independent security study and an overall security program with respect to J is deemed to exist. Thus, with respect to the transportation provided for security concerns, J may exclude as a working condition fringe the value of any special security features of the government vehicle and the value attributable to the two body-guard/chauffeurs. See *Example (1)* of this paragraph (m)(8). The value of vehicle transportation provided to J and J's family for personal reasons, other than commuting, may also be excluded during the period of protection, because its provision was consistent with the recommendation of the security study.

*Example (7)*. Assume the same facts as in *Example (6)* and that J's one-way commute between home and work is 10 miles. Under paragraph (m)(6) of this section, the Federal Government may value transportation provided to J for commuting purposes pursuant to the value set forth in either the vehicle cents-per-mile rule of § 1.61-21(e) or the commuting valuation rule of § 1.61-21(f). Because the commuting valuation rule yields the least amount of taxable income to J under the circumstances, W values the transportation provided to J for commuting at \$1.50 per one-way commute, even though J is a control employee within the meaning of § 1.61-21(f)(6).

(n) *Product testing*—(1) *In general*. The fair market value of the use of consumer goods, which are manufactured for sale to nonemployees, for product testing and evaluation by an employee of the manufacturer outside the employer's workplace, is excludible from gross income as a working condition fringe if—

(i) Consumer testing and evaluation of the product is an ordinary and necessary business expense of the employer;

(ii) Business reasons necessitate that the testing and evaluation of the product be performed off the employer's business premises by employees (*i.e.*, the testing and evaluation cannot be carried out adequately in the employer's office or in laboratory testing facilities);

(iii) The product is furnished to the employee for purposes of testing and evaluation;

(iv) The product is made available to the employee for no longer than necessary to test and evaluate its perform-

ance and (to the extent not exhausted) must be returned to the employer at completion of the testing and evaluation period;

(v) The employer imposes limits on the employee's use of the product that significantly reduce the value of any personal benefit to the employee; and

(vi) The employee must submit detailed reports to the employer on the testing and evaluation. The length of the testing and evaluation period must be reasonable in relation to the product being tested.

(2) *Employer-imposed limits*. The requirement of paragraph (n)(1)(v) of this section is satisfied if—

(i) The employer places limits on the employee's ability to select among different models or varieties of the consumer product that is furnished for testing and evaluation purposes; and

(ii) The employer generally prohibits use of the product by persons other than the employee and, in appropriate cases, requires the employee, to purchase or lease at the employee's own expense the same type of product as that being tested (so that personal use by the employee's family will be limited). In addition, any charge by the employer for the personal use by an employee of a product being tested shall be taken into account in determining whether the requirement of paragraph (n)(1)(v) of this section is satisfied.

(3) *Discriminating classifications*. If an employer furnishes products under a testing and evaluation program only, or presumably, to certain classes of employees (such as highly compensated employees, as defined in § 1.132-8(g)), this fact may be relevant when determining whether the products are furnished for testing and evaluation purposes or for compensation purposes, unless the employer can show a business reason for the classification of employees to whom the products are furnished (e.g., that automobiles are furnished for testing and evaluation by an automobile manufacturer to its design engineers and supervisory mechanics).

(4) *Factors that negate the existence of a product testing program*. If an employer fails to tabulate and examine

the results of the detailed reports submitted by employees within a reasonable period of time after expiration of the testing period, the program will not be considered a product testing program for purposes of the exclusion of this paragraph (n). Existence of one or more of the following factors may also establish that the program is not a bona fide product testing program for purposes of the exclusion of this paragraph (n):

(i) The program is in essence a leasing program under which employees lease the consumer goods from the employer for a fee;

(ii) The nature of the product and other considerations are insufficient to justify the testing program; or

(iii) The expense of the program outweighs the benefits to be gained from testing and evaluation.

(5) *Failure to meet the requirements of this paragraph (n).* The fair market value of the use of property for product testing and evaluation by an employee outside the employee's workplace, under a product testing program that does not meet all of the requirements of this paragraph (n), is not excludable from gross income as a working condition fringe under this paragraph (n).

(6) *Example.* The rules of this paragraph (n) may be illustrated by the following example:

*Example.* Assume that an employer that manufactures automobiles establishes a product testing program under which 50 of its 5,000 employees test and evaluate the automobiles for 30 days. Assume further that the 50 employees represent a fair cross-section of all of the employees of the employer, such employees submit detailed reports to the employer on the testing and evaluation, the employer tabulates and examines the test results within a reasonable time, and the use of the automobiles is restricted to the employees. If the employer imposes the limits described in paragraph (n)(2) of this section, the employees may exclude the value of the use of the automobile during the testing and evaluation period.

(o) *Qualified automobile demonstration use—(1) In general.* The value of qualified automobile demonstration use is excludable from gross income as a working condition fringe. "Qualified automobile demonstration use" is any use of a demonstration automobile by a full-time automobile salesman in the

sales area in which the automobile dealer's sales office is located if—

(i) Such use is provided primarily to facilitate the salesman's performance of services for the employer; and

(ii) There are substantial restrictions on the personal use of the automobile by the salesman.

(2) *Full-time automobile salesman—(i) Defined.* The term "full-time automobile salesman" means any individual who—

(A) Is employed by an automobile dealer;

(B) Customarily spends at least half of a normal business day performing the functions of a floor salesperson or sales manager;

(C) Directly engages in substantial promotion and negotiation of sales to customers;

(D) Customarily works a number of hours considered full-time in the industry (but at a rate not less than 1,000 hours per year); and

(E) Derives at least 25 percent of his or her gross income from the automobile dealership directly as a result of the activities described in paragraphs (o)(2)(i) (B) and (C) of this section.

For purposes of paragraph (o)(2)(i) (E) of this section, income is not considered to be derived directly as a result of activities described in paragraphs (o)(2)(i) (B) and (C) of this section to the extent that the income is attributable to an individual's ownership interest in the dealership. An individual will not be considered to engage in direct sales activities if the individual's sales-related activities are substantially limited to review of sales price offers from customers. An individual, such as the general manager of an automobile dealership, who receives a sales commission on the sale of an automobile is not a full-time automobile salesman unless the requirements of this paragraph (o)(2)(i) are met. The exclusion provided in this paragraph (o) is available to an individual who meets the definition of this paragraph (o)(2)(i) whether the individual performs services in addition to those described in this paragraph (o)(2)(i). For example, an individual who is an owner of the automobile dealership but who otherwise meets the

requirements of this paragraph (o)(2)(i) may exclude from gross income the value of qualified automobile demonstration use. However, the exclusion of this paragraph (o) is not available to owners of large automobile dealerships who do not customarily engage in significant sales activities.

(ii) *Use by an individual other than a full-time automobile salesman.* Personal use of a demonstration automobile by an individual other than a full-time automobile salesman is not treated as a working condition fringe. Therefore, any personal use, including commuting use, of a demonstration automobile by a part-time salesman, automobile mechanic, or other individual who is not a full-time automobile salesman is not “qualified automobile demonstration use” and thus not excludable from gross income. This is the case whether or not the personal use is within the sales area (as defined in paragraph (o)(5) of this section).

(3) *Demonstration automobile.* The exclusion provided in this paragraph (o) applies only to qualified use of a demonstration automobile. A demonstration automobile is an automobile that is—

(i) Currently in the inventory of the automobile dealership; and

(ii) Available for test drives by customers during the normal business hours of the employee.

(4) *Substantial restrictions on personal use.* Substantial restrictions on the personal use of a demonstration automobile exist when all of the following conditions are satisfied:

(i) Use by individuals other than the full-time automobile salesmen (e.g., the salesman’s family) is prohibited;

(ii) Use for personal vacation trips is prohibited;

(iii) The storage of personal possessions in the automobile is prohibited; and

(iv) The total use by mileage of the automobile by the salesman outside the salesman’s normal working hours is limited.

(5) *Sales area—(i) In general.* Qualified automobile demonstration use consists of use in the sales area in which the automobile dealer’s sales office is located. The sales area is the geographic area surrounding the automobile deal-

er’s sales office from which the office regularly derives customers.

(ii) *Sales area safe harbor.* With respect to a particular full-time salesman, the automobile dealer’s sales area may be treated as the area within a radius of the larger of—

(A) 75 miles or

(B) The one-way commuting distance (in miles) of the particular salesman from the dealer’s sales office.

(6) *Applicability of substantiation requirements of sections 162 and 274(d).* Notwithstanding anything in this section to the contrary, the value of the use of a demonstration automobile may not be excluded from gross income as a working condition fringe, by either the employer or the employee, unless, with respect to the restrictions of paragraph (o)(4) of this section, the substantiation requirements of section 274(d) and the regulations thereunder are satisfied. See § 1.132-5(c) for general and safe harbor rules relating to the applicability of the substantiation requirements of section 274(d).

(7) *Special valuation rules.* See § 1.61-21(d)(6)(ii) for special rules that may be used to value the availability of demonstration automobiles.

(p) *Parking—(1) In general.* The value of parking provided to an employee on or near the business premises of the employer is excludable from gross income as a working condition fringe under the special rule of this paragraph (p). If the rules of this paragraph (p) are satisfied, the value of parking is excludable from gross income whether the amount paid by the employee for parking would be deductible under section 162. The working condition fringe exclusion applies whether the employer owns or rents the parking facility or parking space.

(2) *Reimbursement of parking expenses.* A reimbursement to the employee of the ordinary and necessary expenses of renting a parking space on or near the business premises of the employer is excludable from gross income as a working condition fringe, if, but for the parking expense, the employee would not have been entitled to receive and retain such amount from the employer. If, however an employee is entitled to retain a general transportation allowance or a similar benefit whether or

not the employee has parking expenses, no portion of that allowance is excludable from gross income under this paragraph (p) even if it is used for parking expenses.

(3) *Parking on residential property.* With respect to an employee, this paragraph (p) does not apply to any parking facility or space located on property owned or leased by the employee for residential purposes.

(4) *Dates of applicability.* This paragraph (p) applies to benefits provided before January 1, 1993. For benefits provided after December 31, 1992, see § 1.132-9.

(q) *Nonapplicability of nondiscrimination rules.* Except to the extent provided in paragraph (n)(3) of this section (relating to discriminating classifications of a product testing program), the nondiscrimination rules of section 132 (h)(1) and § 1.132-8 do not apply in determining the amount, if any, of a working condition fringe.

(r) *Volunteers—(1) In general.* Solely for purposes of section 132(d) and paragraph (a)(1) of this section, a bona fide volunteer (including a director or officer) who performs services for an organization exempt from tax under section 501(a), or for a government employer (as defined in paragraph (m)(7) of this section), is deemed to have a profit motive under section 162.

(2) *Limit on application of this paragraph.* This paragraph (r) shall not be used to support treatment of the bona fide volunteer as having a profit motive for purposes of any provision of the Internal Revenue Code of 1986 (Code) other than section 132(d). Nothing in this paragraph (r) shall be interpreted as determining the employment status of a bona fide volunteer for purposes of any section of the Code other than section 132(d).

(3) *Definitions—(i) Bona fide volunteer.* For purposes of this paragraph (r), an individual is considered a “bona fide volunteer” if the individual does not have a profit motive for purposes of section 162. For example, an individual is considered a “bona fide volunteer” if the total value of the benefits provided with respect to the volunteer services is substantially less than the total value of the volunteer services the in-

dividual provides to an exempt organization or government employer.

(ii) *Liability insurance coverage for a bona fide volunteer.* For purposes of this paragraph (r), the receipt of liability insurance coverage by a volunteer, or an exempt organization or government employer’s undertaking to indemnify the volunteer for liability, does not by itself confer a profit motive on the volunteer, provided the insurance coverage or indemnification relates to acts performed by the volunteer in the discharge of duties, or the performance of services, on behalf of the exempt organization or government employer.

(4) *Example.* The following example illustrates the provisions of paragraph (r) of this section.

*Example.* A is a manager and full-time employee of P, a tax-exempt organization described in section 501(c)(3). B is a member of P’s board of directors. Other than \$25 to defray expenses for attending board meetings, B receives no compensation for serving as a director and does not have a profit motive. Therefore, B is a bona fide volunteer by application of paragraph (r)(3)(i) of this section and is deemed to have a profit motive under paragraph (r)(1) of this section for purposes of section 132(d). In order to provide liability insurance coverage, P purchases a policy that covers actions arising from A’s and B’s activities performed as part of their duties to P. The value of the policy and payments made to or on behalf of A under the policy are excludable for A’s gross income as a working condition fringe, because A has a profit motive under section 162 and would be able to deduct payments for liability insurance coverage had he paid for it himself. The receipt of liability insurance coverage by B does not confer a profit motive on B by application of paragraph (r)(3)(ii) of this section. Thus, the value of the policy and payments made to or on behalf of B under the policy are excludable from B’s income as a working condition fringe. For the year in which the liability insurance coverage is provided to A and B, P may exclude the value of the benefit on the Form W-2 it issues to A or on any Form 1099 it might otherwise issue to B.

(s) *Application of section 274(a)(3)—(1) In general.* If an employer’s deduction under section 162(a) for dues paid or incurred for membership in any club organized for business, pleasure, recreation, or other social purpose is disallowed by section 274(a)(3), the amount, if any, of an employee’s working condition fringe benefit relating to

an employer-provided membership in the club is determined without regard to the application of section 274(a) to the employee. To be excludible as a working condition fringe benefit, however, the amount must otherwise qualify for deduction by the employee under section 162(a). If an employer treats the amount paid or incurred for membership in any club organized for business, pleasure, recreation, or other social purpose as compensation under section 274(e)(2), then the expense is deductible by the employer as compensation and no amount may be excluded from the employee's gross income as a working condition fringe benefit. See § 1.274-2(f)(2)(iii)(A).

(2) *Treatment of tax-exempt employers.*

In the case of an employer exempt from taxation under subtitle A of the Internal Revenue Code, any reference in this paragraph (s) to a deduction disallowed by section 274(a)(3) shall be treated as a reference to the amount which would be disallowed as a deduction by section 274(a)(3) to the employer if the employer were not exempt from taxation under subtitle A of the Internal Revenue Code.

(3) *Examples.* The following examples illustrate this paragraph (s):

*Example 1.* Assume that Company X provides Employee B with a country club membership for which it paid \$20,000. B substantiates, within the meaning of paragraph (c) of this section, that the club was used 40 percent for business purposes. The business use of the club (40 percent) may be considered a working condition fringe benefit, notwithstanding that the employer's deduction for the dues allocable to the business use is disallowed by section 274(a)(3), if X does not treat the club membership as compensation under section 274(e)(2). Thus, B may exclude from gross income \$8,000 (40 percent of the club dues, which reflects B's business use). X must report \$12,000 as wages subject to withholding and payment of employment taxes (60 percent of the value of the club dues, which reflects B's personal use). B must include \$12,000 in gross income. X may deduct as compensation the amount it paid for the club dues which reflects B's personal use provided the amount satisfies the other requirements for a salary or compensation deduction under section 162.

*Example 2.* Assume the same facts as *Example 1* except that Company X treats the \$20,000 as compensation to B under section 274(e)(2). No portion of the \$20,000 will be considered a working condition fringe benefit

because the section 274(a)(3) disallowance will apply to B. Therefore, B must include \$20,000 in gross income.

(t) *Application of section 274(m)(3)—(1)*

*In general.* If an employer's deduction under section 162(a) for amounts paid or incurred for the travel expenses of a spouse, dependent, or other individual accompanying an employee is disallowed by section 274(m)(3), the amount, if any, of the employee's working condition fringe benefit relating to the employer-provided travel is determined without regard to the application of section 274(m)(3). To be excludible as a working condition fringe benefit, however, the amount must otherwise qualify for deduction by the employee under section 162(a). The amount will qualify for deduction and for exclusion as a working condition fringe benefit if it can be adequately shown that the spouse's, dependent's, or other accompanying individual's presence on the employee's business trip has a bona fide business purpose and if the employee substantiates the travel within the meaning of paragraph (c) of this section. If the travel does not qualify as a working condition fringe benefit, the employee must include in gross income as a fringe benefit the value of the employer's payment of travel expenses with respect to a spouse, dependent, or other individual accompanying the employee on business travel. See §§ 1.61-21(a)(4) and 1.162-2(c). If an employer treats as compensation under section 274(e)(2) the amount paid or incurred for the travel expenses of a spouse, dependent, or other individual accompanying an employee, then the expense is deductible by the employer as compensation and no amount may be excluded from the employee's gross income as a working condition fringe benefit. See § 1.274-2(f)(2)(iii)(A).

(2) *Treatment of tax-exempt employers.*

In the case of an employer exempt from taxation under subtitle A of the Internal Revenue Code, any reference in this paragraph (t) to a deduction disallowed by section 274(m)(3) shall be treated as a reference to the amount which would be disallowed as a deduction by section 274(m)(3) to the employer if the employer were not exempt from taxation

under subtitle A of the Internal Revenue Code.

[T.D. 8256, 54 FR 28608, July 6, 1989, as amended by 8451, 57 FR 57669, Dec. 7, 1992; T.D. 8457, 57 FR 62196, Dec. 30, 1992; T.D. 8666, 61 FR 27006, May 30, 1996; T.D. 8933, 66 FR 2244, Jan. 11, 2001]

**§ 1.132-5T Working condition fringe—1985 through 1988 (temporary).**

(a) *In general*—(1) *Definition*. Gross income does not include the value of a working condition fringe. The term “working condition fringe” means any property or service provided to an employee of an employer to the extent that, if the employee paid for the property or service, the amount paid would be allowable as a deduction under section 162 or 167. If, under section 274 or any other section, certain substantiation requirements must be met in order for a deduction under section 162 or 167 to be allowable, those substantiation requirements apply to the determination of a working condition fringe. An amount that would be deductible by the employee under, for example, section 212 is not a working condition fringe.

(2) *Trade or business of the employee*. If the hypothetical payment for the property or service would be allowable as a deduction with respect to a trade or business of the employee other than the employee’s trade or business of being an employee of the employer, it cannot be taken into account for purposes of determining the amount, if any, of the working condition fringe. For example, assume that, unrelated to company X’s trade or business and unrelated to company X’s employee’s trade or business of being an employee of company X, the employee is a member of the board of directors of company Y. Assume further that company X provides the employee with air transportation to a company Y board of director’s meeting. The employee may not exclude the value of the air transportation to the meeting as a working condition fringe. The employee may, however, deduct such amount under section 162 if the section 162 requirements are satisfied. The result would be the same whether the air transportation was provided in the

form of a flight on a commercial airplane or a seat on a company X airplane.

(b) *Vehicle allocation rules*—(1) *In general*—(i) *General rule*. In general, with respect to an employer-provided vehicle, the amount excludable as a working condition fringe is the amount that would be allowable as a deduction under section 162 or 167 if the employee paid for the availability of the vehicle. For example, assume that the value of the availability of an employer-provided vehicle for a full year is \$2,000, without regard to any working condition fringe (*i.e.*, assuming all personal use). Assume further that the employee drives the vehicle 6,000 miles for his employer’s business and 2,000 miles for reasons other than the employer’s business. In this situation, the value of the working condition fringe is \$2,000 multiplied by a fraction, the numerator of which is the business-use mileage (6,000 miles) and the denominator of which is the total mileage (8,000 miles). Thus, the value of the working condition fringe is \$1,500. The total amount includable in the employee’s gross income on account of the availability of the vehicle is \$500. For purposes of this section, the term “vehicle” has the same meaning given the term in § 1.61-2T(e)(2). Generally, when determining the amount of an employee’s working condition fringe, miles accumulated on the vehicle by all employees of the employer during the period in which the vehicle is available to the employee must be considered. For example, assume that an employee of the employer is provided the availability of an automobile for one year. Assume further that during the year, the automobile is regularly used in the employer’s business by other employees. All miles accumulated on the automobile by all employees of the employer during the year must be considered. If, however, substantially all the use of the automobile by other employees in the employer’s business is permitted during a certain period, such as the last three months of the year, the miles driven by the other employees during that period would not be considered when determining the employee’s working condition fringe exclusion.

(ii) *Use by an individual other than the employee*. For purposes of this section,

if the availability of a vehicle to an individual would be taxed to an employee, use of the vehicle by the individual is included in references to use by the employee.

(iii) *Provision of an expensive vehicle for personal use.* Assume an employer provides an employee with an expensive vehicle that an employee may use in part for personal purposes. Even though the decision to provide an expensive rather than an inexpensive vehicle is made by the employer for bona fide noncompensatory business reasons, there is no working condition fringe exclusion with respect to the personal miles driven by the employee. If the employee paid for the availability of the vehicle, he would not be entitled to deduct any part of the payment attributable to personal miles.

(2) *Use of different employer-provided automobiles.* The working condition fringe exclusion must be applied on an automobile by automobile basis. For example, assume that automobile Y is available to employee D for 3 days in January and for 5 days in March, and automobile Z is available to D for a week in July. Assume further that the Daily Lease Value, as defined in § 1.61-2T, of each automobile is \$50. For the eight days of availability of Y in January and March, D uses Y 90 percent for business (by mileage). During July, D uses Z 60 percent for business (by mileage). The value of the working condition fringe is determined separately for each automobile. Therefore, the working condition fringe for Y is \$360 ( $\$400 \times .90$ ) leaving an income inclusion of \$40. The working condition fringe for Z is \$210 ( $\$350 \times .60$ ) leaving an income inclusion of \$140. If the value of the availability of an automobile is determined under the Annual Lease Value rule for one period and Daily Lease Value rule for a second period (see § 1.61-2T), the working condition fringe exclusion must be calculated separately for the two periods.

(c) *Applicability of sections 162 and 274(d)*—(1) *In general.* The value of property or services provided to an employee may not be excluded from the employee's gross income as a working condition fringe, by either the employer or the employee, unless the applicable substantiation requirements of

either section 274(d) or section 162 (whichever is applicable) and the regulations thereunder are satisfied. With respect to listed property, the substantiation requirements of section 274(d) and the regulations thereunder do not apply to the determination of an employee's working condition fringe exclusion prior to the date that those requirements apply to the first taxable year of the employer beginning after December 31, 1985. For example, if an employer's first taxable year beginning after December 31, 1985, begins on July 1, 1986, with respect to listed property, the substantiation requirements of section 274(d) apply as of that date. The substantiation requirements of section 274(d) apply to an employee even if the requirements of section 274 do not apply to the employee's employer for deduction purposes (such as when the employer is a tax-exempt organization or a governmental unit); in these cases, the requirements of section 274(d) apply to the employee as of January 1, 1986.

(2) *Section 274(d) requirements.* The substantiation requirements of section 274(d) are satisfied by "adequate records or sufficient evidence corroborating the [employee's] own statement". Therefore, such records or evidence provided by the employee, and relied upon by the employer to the extent permitted by the regulations promulgated under section 274(d), will be sufficient to substantiate a working condition fringe exclusion.

(d) *Safe harbor rules*—(1) *In general.* Section 1.274-6T provides that the substantiation requirements of section 274(d) and the regulations thereunder may be satisfied, in certain circumstances, by using one or more of the safe harbor rules prescribed in § 1.274-6T. If the employer uses one of the safe harbor rules prescribed in § 1.274-6T during a period with respect to a vehicle (as defined in § 1.61-2T), that rule must be used by the employer to substantiate a working condition fringe exclusion with respect to that vehicle during the period. An employer that is exempt from Federal income tax may still use one of the safe harbor rules (if the requirements of that section are otherwise met during a period) to substantiate a working condition

fringe exclusion with respect to a vehicle during the period. If the employer uses one of the methods prescribed in §1.274-6T during a period with respect to an employer-provided vehicle, that method may be used by an employee to substantiate a working condition fringe exclusion with respect to the same vehicle during the period, as long as the employee includes in gross income the amount allocated to the employee pursuant to §1.274-6T and this section. (See §1.61-2T(c)(2)(i) for other rules concerning when an employee must include in income the amount determined by the employer.) If, however, the employer uses the safe harbor rule prescribed in §1.274-6T(a)(2) or (3) and the employee without the employer's knowledge uses the vehicle for purposes other than de minimis personal use (in the case of the rule prescribed in §1.274-6T(a)(2)), or for purposes other than de minimis personal use and commuting (in the case of the rule prescribed in §1.274-6T(a)(3)), then the employee must include additional income for the unauthorized use of the vehicle.

(2) *Period for use of safe harbor rules.* The rules prescribed in this paragraph (d) assume that the safe harbor rules prescribed in §1.274-6T are used for a one-year period. Accordingly, references to the value of the availability of a vehicle, amounts excluded as a working condition fringe, etc., are based on a one-year period. If the safe harbor rules prescribed in §1.274-6T are used for a period of less than a year, the amounts referenced in the previous sentence must be adjusted accordingly. For purposes of this section, the term "personal use" has the same meaning as prescribed in §1.274-6T(e)(5).

(e) *Vehicles not available to employees for personal use.* For a vehicle described in §1.274-6T(a)(2) (relating to certain vehicles not used for personal purposes), the working condition fringe exclusion is equal to the value of the availability of the vehicle if the employer uses the method prescribed in §1.274-6T(a)(2).

(f) *Vehicles not available to employees for personal use other than commuting.* For a vehicle described in §1.274-6T(a)(3) (relating to certain vehicles not used for personal purposes other than commuting), the working condi-

tion fringe exclusion is equal to the value of the availability of the vehicle for purposes other than commuting if the employer uses the method prescribed in §1.274-6T(a)(3). This rule applies only if the special rule for valuing commuting use, as prescribed in §1.61-2T, is used and the amount determined under the special rule is either included in the employee's income or reimbursed by the employee.

(g) *Vehicles used in connection with the business of farming that are available to employees for personal use—(1) In general.* For a vehicle described in §1.274-6T(b) (relating to certain vehicles used in connection with the business of farming), the working condition fringe exclusion is calculated by multiplying the value of the availability of the vehicle by 75 percent.

(2) *Vehicles available to more than one individual.* If the vehicle is available to more than one individual, the employer must allocate the gross income attributable to the vehicle (25 percent of the value of the availability of the vehicle) among the employees (and other individuals whose use would not be attributed to an employee) to whom the vehicle was available. This allocation must be done in a reasonable manner to reflect the personal use of the vehicle by the individuals. An amount that would be allocated to a sole proprietor reduces the amounts that may be allocated to employees but are otherwise to be disregarded for purposes of this paragraph (g). For purposes of this paragraph (g), the value of the availability of a vehicle may be calculated as if the vehicle were available to only one employee continuously and without regard to any working condition fringe exclusion.

(3) *Examples.* The following examples illustrate a reasonable allocation of gross income with respect to an employer-provided vehicle between two employees:

*Example (1).* Assume that two farm employees share the use of a vehicle which for a calendar year is regularly used directly in connection with the business of farming and qualifies for use of the rule in §1.274-6T (b). Employee A uses the vehicle in the morning directly in connection with the business of farming and employee B uses the vehicle in the afternoon directly in connection with the business of farming. Assume further that

employee B takes the vehicle home in the evenings and on weekends. The employer should allocate all the income attributable to the availability of the vehicle to employee B.

*Example (2).* Assume that for a calendar year, farm employees C and D share the use of a vehicle that is regularly used directly in connection with the business of farming and qualifies for use of the rule in §1.274-6T (b). Assume further that the employees alternate taking the vehicle home in the evening and alternate the availability of the vehicle for personal purposes on weekends. The employer should allocate the income attributable to the availability of the vehicle for personal use (25 percent of the value of the availability of the vehicle) equally between the two employees.

*Example (3).* Assume the same facts as in example (2) except that C is the sole proprietor of the farm. Based on these facts, C should allocate the same amount of income to D as was allocated to D in example (2). No other income attributable to the availability of the vehicle for personal use should be allocated.

(h) *Qualified non-personal use vehicles.* Effective January 1, 1985, 100 percent of the value of the use of a qualified non-personal use vehicle (as described in §1.274-5T (k)) is excluded from gross income as a working condition fringe, provided that, in the case of a vehicle described in paragraph (k) (3) through (7) of that section, the use of the vehicles conforms to the requirements of that paragraph.

(i) [Reserved]

(j) *Application of section 280F.* In determining the amount, if any, of an employee's working condition fringe, section 280F and the regulations thereunder do not apply. For example, assume that an employee has available for a calendar year an employer-provided automobile with a fair market value of \$28,000. Assume further that the special rule provided in §1.61-2T is used and that the Annual Lease Value, as defined in §1.61-2T, is \$7,750, and that all of the employee's use of the automobile is in the employer's business. The employee would be entitled to exclude the entire Annual Lease Value as a working condition fringe, despite the fact that if the employee paid for the availability of the automobile, an income inclusion would be required under §1.280F-5T(d)(1). This paragraph (j) does not affect the applicability of section 280F to the employer

with respect to such employer-provided automobile, nor does it affect the applicability of section 274. For rules concerning substantiation of an employee's working condition fringe, see paragraph (c) of this section.

(k) *Aircraft allocation rule.* In general, with respect to a flight on an employer-provided aircraft, the amount excludable as a working condition fringe is the amount that would be allowable as a deduction under section 162 or 167 if the employee paid for the flight on the aircraft. For example, if employee P flies on P's employer's airplane primarily for business reasons of P's employer, the value of P's flight is excludable as a working condition fringe. However, if P's spouse and children accompany P on such airplane trip primarily for personal reasons, the value of the flights by P's spouse and children are includable in P's gross income. See §1.61-2T(g) for special rules for valuing personal flights.

(l) [Reserved]

(m) *Employer-provided transportation for security concerns—(1) In general.* The amount of a working condition fringe exclusion with respect to employer-provided transportation is the amount that would be allowable as a deduction under section 162 or 167 if the employee paid for the transportation. Generally, if an employee pays for transportation taken for primarily personal purposes, the employee may not deduct any part of the amount paid. Thus, the employee may not generally exclude the value of employer-provided transportation as a working condition fringe if such transportation is primarily personal. If, however, for bona fide business-oriented security concerns, the employee purchases transportation that provides him or her with additional security, the employee may generally deduct the excess of the amount paid for the transportation over the lesser amount the employee would have paid for the same mode of transportation absent the bona fide business-oriented security concerns. With respect to a vehicle, the phrase "the same mode of transportation" means use of the same vehicle without the additional security aspects, such as bulletproof glass. With respect to air transportation, the phrase "the same

mode of transportation'' means comparable air transportation. These same rules apply to the determination of an employee's working condition fringe exclusion. For example, if an employer provides an employee with an automobile for commuting and, for bona fide business-oriented security concerns, the automobile is specially designed for security, then the employee may exclude the value of the special security design as a working condition fringe if the employee's automobile would not have had such security design but for the bona fide business-oriented security concerns. The employee may not exclude the value of the commuting from income as a working condition fringe because commuting is a nondeductible personal expense. Similarly, if an employee travels on a personal trip in an employer-provided aircraft for bona fide business-oriented security concerns, the employee may exclude the excess, if any, of the value of the flight over the amount the employee would have paid for comparable air transportation, but for the bona fide business-oriented security concerns. Because personal travel is a nondeductible expense, the employee may not exclude the total value of the trip as a working condition fringe.

(2) *Demonstration of bona fide business-oriented security concerns*—(i) *In general.* For purposes of this paragraph (m), the existence of a bona fide business-oriented security concern for the furnishing of a specific form of transportation to an employee is determined on the basis of all the facts and circumstances within the following guidelines:

(A) *Services performed outside the United States.* With respect to an employee performing services for an employer in a geographic area other than the United States, a factor indicating a bona fide business-oriented security concern is a recent history of violent terrorist activity in such geographic area (such as bombings or abductions for ransom), unless such activity is focused on a group of individuals which does not include the employee or a similarly situated employee or on a section of the geographic area which does not include the employee.

(B) *Services performed in the United States.* With respect to an employee performing services for an employer in the United States, a factor indicating a bona fide business-oriented security concern is threats on the life of the employee or on the life of a similarly situated employee because of the employee's status as an employee of the employer.

(ii) *Establishment of overall security program.* Notwithstanding anything in paragraph (m)(2)(i) of this section to the contrary, no bona fide business-oriented security concern will be deemed to exist unless the employee's employer establishes an overall security program with respect to the employee involved.

(iii) *Overall security program*—(A) *Definition.* An overall security program is one in which security is provided to protect the employee on a 24-hour basis. The employee must be protected while at the employee's residence, while commuting to and from the employee's workplace, and while at the employee's workplace. In addition, the employee must be protected while traveling, whether for business or personal purposes. An overall security program would include the provision of a bodyguard/driver who is trained in evasive driving techniques; and automobile specially equipped for security; guards, metal detectors, alarms, or similar methods of controlling access to the employee's workplace and residence; and, in appropriate cases, flights on the employer's aircraft for business and personal reasons.

(B) *Application.* There is no overall security program when, for example, security is provided at the employee's workplace but not at the employee's residence. In addition, the fact that an employer requires an employee to travel on the employer's aircraft, or in an employer-provided vehicle that contains special security features, does not alone constitute an overall security program. The preceding sentence applies regardless of the existence of a corporate or other resolution requiring the employee to travel in the employer's airplane or vehicle for personal as well as business reasons. Similarly, the existence of an independent security study particular to the employer and

its employees, or to the employee involved, does not alone constitute an overall security program.

(iv) *Effect of an independent security study.* An overall security program with respect to an employee is deemed to exist even though security is not provided to an employee on a 24-hour basis if the conditions of this paragraph (m)(2)(iv) are satisfied:

(A) A security study is performed with respect to the employer and the employee (or a similarly situated employee) by an independent security consultant;

(B) The security study is based on an objective assessment of all the facts and circumstances;

(C) The recommendation of the security study is that an overall security program (as defined in paragraph (m)(2)(iii) of this section) is not necessary and such recommendation is reasonable under the circumstances; and

(D) The employer applies the specific security recommendations contained in the security study to the employee on a consistent basis.

The value of the security provided pursuant to a security study that meets the requirements of this paragraph (m)(2)(iv) may be excluded from income, if the security study conclusions are reasonable and, but for the bona fide business-oriented security concerns, the employee would not have had such security. No exclusion from income applies to security provided by the employer that is not recommended in the security study. Security study conclusions may be reasonable even if, for example, it is recommended that security be limited to certain geographic areas, as in the case where air travel security is provided only in certain foreign countries.

(v) *Application of security rules to spouses and dependents.* The availability of a working condition fringe exclusion based on the existence of a bona fide business-oriented security concern with respect to the spouse and dependents of an employee is determined separately for such spouse and dependents under the rules established in this paragraph (m).

(vi) *Working condition safe harbor.* Under the special rule of this para-

graph (m)(2)(vi), if, for a bona fide business-oriented security concern, the employer requires that the employee travel on an employer-provided aircraft for a personal trip, the employer and the employee may exclude, as a working condition fringe, the excess value of the trip over comparable first-class airfare without having to show that but for the bona fide business-oriented security concerns, the employee would have flown first-class on a commercial aircraft. If the special valuation rule provided in § 1.61-2T is used, the excess over the amount determined by multiplying an aircraft multiple of 200-percent by the base aircraft valuation formula may be excluded as a working condition fringe.

(3) *Examples.* The provisions of this paragraph (m) may be illustrated by the following examples:

*Example (1).* Assume that in response to several death threats on the life of A, the president of a multinational company (company X), company X establishes an overall security program for A, including an alarm system at A's home and guards at A's workplace, the use of a vehicle that is specially equipped with alarms, bulletproof glass, and armor plating and a bodyguard/driver who is trained in evasive driving techniques. Assume further that A is driven for both personal and business reasons in the vehicle. Also, assume that but for the bona fide business-oriented security concerns, no part of the overall security program would be provided to A. With respect to the transportation provided for security reasons, A may exclude as a working condition fringe the value of the special security features of the vehicle and the value attributable to the bodyguard/driver. Thus, if the value of the specially equipped vehicle is \$40,000, and the value of the vehicle without the security features is \$25,000, A may determine A's income attributable to the vehicle as if the vehicle were worth \$25,000. A must include in income the value of the availability of the vehicle for personal use.

*Example (2).* Assume that B is the chief executive officer of a multinational corporation (company Y). Assume further that there have been kidnapping attempts and other terrorist activities in the foreign countries in which B performs services and that at least some of such activities have been directed against B or similarly situated employees. In response to these activities, company Y provides B with an overall security program, including an alarm system at B's home and bodyguards at B's workplace, a bodyguard/driver who is trained in evasive

driving techniques, and a vehicle specially designed for security during B's overseas travels. In addition, assume that company Y requires B to travel in company Y's airplane for business and personal trips taken to, from, and within these foreign countries. Also, assume that but for bona fide business-oriented security concerns, no part of the overall security program would have been provided to B. B may exclude as a working condition fringe the value of the special security features of the automobile and the value attributable to the bodyguards and the bodyguard/driver. B may also exclude as a working condition fringe the excess, if any, of the value of personal flights in the company Y airplane over first-class airfare (as determined under the special valuation rule provided in §1.61-2T if the safe harbor described in paragraph (m)(2)(vi) of this section is used). B must include in income the value of the availability of the vehicle for personal use and the lesser of the value of first-class airfare or the value of the flight determined under §1.61-2T for each personal flight taken by B in company Y's airplane.

*Example (3).* Assume the same facts as in example (2) except that company Y also requires B to travel in company Y's airplane within the United States, and provides B with a chauffeur-driven limousine for business and personal travel in the United States. Assume further that company Y also requires B's spouse and dependents to travel in company Y's airplane for personal flights in the United States. If no bona fide business-oriented security concern exists with respect to travel in the United States, B may not exclude any portion of the value of the availability of the driver or limousine for personal use in the United States. Thus, B must include in income the value of the availability of the vehicle and driver for personal use. In addition, B may not exclude any portion of the value attributable to personal flights by B or B's spouse and dependents on company Y's airplane. Thus, B must include in income the value attributable to the personal use of company Y's airplane. See §1.61-2T for rules relating to the valuation of personal flights on employer-provided airplanes.

*Example (4).* Assume that company Z retains an independent security consultant to perform a security study with respect to its chief executive officer. Assume further that, based on an objective assessment of the facts and circumstances, the security consultant reasonably recommends that the employee be provided security at his workplace and for ground transportation, but not for air transportation. If company Z follows the recommendations on a consistent basis, an overall security program will be deemed to exist with respect to the workplace and ground transportation security only.

*Example (5).* Assume the same facts as in example (4) except that company Z only provides the employee security while commuting to and from work, but not for any other ground transportation. Since the recommendations of the independent security study are not applied on a consistent basis, an overall security program will not be deemed to exist.

(n) *Product testing*—(1) *In general.* The fair market value of the use of consumer goods, which are manufactured for sale to nonemployees, for product testing and evaluation by an employee outside the employer's workplace is excludable as a working condition fringe if—

(i) Consumer testing and evaluation of the product is an ordinary and necessary business expense of the employer,

(ii) Business reasons necessitate that the testing and evaluation of the product be performed off the employer's business premises by employees (*i.e.*, the testing and evaluation cannot be carried out adequately in the employer's office or in laboratory testing facilities),

(iii) The product is furnished to the employee for purposes of testing and evaluation,

(iv) The product is made available to the employee for no longer than necessary to test and evaluate its performance and must be returned to the employer at completion of the testing and evaluation period,

(v) The employer imposes limitations of the employee's use of the product which significantly reduce the value of any personal benefit to the employee, and

(vi) The employee must submit detailed reports to the employer on the testing and evaluation.

The length of the testing and evaluation period must be reasonable in relation to the product being tested.

(2) *Employer-imposed limitations.* The requirement of paragraph (n)(1)(v) of this section is satisfied if—

(i) The employer places limitations on the employee's ability to select among different models or varieties of the consumer product that is furnished for testing and evaluation purposes,

(ii) The employer's policy provides for the employee, in appropriate cases, to purchase or lease at his or her own

expense the same type of product as that being tested (so that personal use by the employee's family will be limited), and

(iii) The employer generally prohibits use of the product by members of the employee's family.

(3) *Discriminating classifications.* If an employer furnishes products under a testing and evaluation program only to officers, owners, or highly compensated employees, this fact may be considered in a determination of whether the products are furnished for testing and evaluation purposes or for compensation purposes, unless the employer can show a business reason for the classification of employees to whom the products are furnished (e.g., that automobiles are furnished for testing and evaluation by an automobile manufacturer to its design engineers and supervisory mechanics).

(4) *Factors that negate the existence of a product testing program.* If an employer fails to tabulate and examine the results of the detailed reports within a reasonable period of time after expiration of the testing period, the program will not be considered a product testing program. Existence of one or more of the following factors may also establish that the program is not a bona fide product testing program:

(i) The program is in essence a leasing program under which employees lease the consumer goods from the employer for a fee;

(ii) The nature of the product and other considerations are insufficient to justify the testing program; or

(iii) The expense of the program outweighs the benefits to be gained from testing and evaluation.

(5) *Failure to meet the requirements of this paragraph (n).* The fair market value of the use of property for product testing and evaluation by an employee outside the employee's workplace, under a product testing program that does not meet all of the requirements of this paragraph (n), is not excludable as a working condition fringe.

(6) *Example.* Assume that an employer that manufactures automobiles establishes a product testing program under which 50 of its 5,000 employees test and evaluate the automobiles for 30 days. Assume further that the 50 em-

ployees represent a fair cross section of all of the employees of the employer, such employees submit detailed reports to the employer on the testing and evaluation, the employer tabulates and examines the test results within a reasonable time, and the use of the automobiles is restricted to the employees. If the rules of paragraph (n)(2) of this section are also met, the employees may exclude the value of the use of the automobile during the testing and evaluation period.

(o) *Qualified automobile demonstration use—(1) In general.* The value of qualified automobile demonstration use is excludable from gross income as a working condition fringe. The term "qualified automobile demonstration use" means any use of a demonstration automobile by a full-time automobile salesman in the sales area in which the automobile dealer's sales office is located if—

(i) Such use is provided primarily to facilitate the salesman's performance of services for the employer, and

(ii) There are substantial restrictions on the personal use of the automobile by the salesman.

(2) *Full-time automobile salesman—(i) Definition.* The term "full-time automobile salesman" means any individual who—

(A) Is employed by an automobile dealer,

(B) Customarily spends substantially all of a normal business day on the sales floor selling automobiles to customers of the automobile dealership,

(C) Customarily works a number of hours considered full-time in the industry (but at a rate not less than 1,000 hours per year), and

(D) Derives at least 85 percent of his or her gross income from the automobile dealership directly as a result of such automobile sales activities.

An individual, such as the general manager of an automobile dealership, who receives a sales commission on the sale of an automobile is not a full-time automobile salesman unless the requirements of this paragraph (o)(2)(i) are met. The exclusion provided in this paragraph (o) is available to an individual who meets the definition of this paragraph (o)(2)(i) regardless of whether the individual performs services in

addition to those described in this paragraph (o)(2)(i). For example, an individual who is an owner of the automobile dealership but who otherwise meets the requirements of this paragraph (o)(2)(i) may exclude from gross income the value of qualified automobile demonstration use.

(ii) *Use by an individual other than a full-time automobile salesman.* Personal use of a demonstration automobile by an individual other than a full-time automobile salesman is not treated as a working condition fringe. Therefore, any personal use, including commuting use, of a demonstration automobile by a part-time salesman, automobile mechanic, manager, or other individual is not “qualified automobile demonstration use” and thus not excludable from gross income.

(3) *Demonstration Automobile.* The exclusion provided in this paragraph (o) applies only to qualified use of a demonstration automobile. A demonstration automobile is an automobile that is—

(i) Currently in the inventory of the automobile dealership, and

(ii) Available for test drives by customers during the normal business hours of the employee.

(4) *Substantial restrictions on personal use.* Substantial restrictions on the personal use of demonstration automobiles exist when all of the following conditions are satisfied:

(i) Use by individuals other than the full-time automobile salesmen (e.g., the salesman’s family) is prohibited,

(ii) Use for personal vacation trips is prohibited,

(iii) The storage of personal possessions in the automobile is prohibited, and

(iv) The total use by mileage of the automobile by the salesman outside the salesman’s normal working hours is limited.

(5) *Sales area—(i) In general.* Qualified automobile demonstration use must be used in the sales area in which the automobile dealer’s sales office is located. The sales area is the geographic area surrounding the automobile dealer’s sales office from which the office regularly derives customers.

(ii) *Sales area safe harbor.* With respect to a particular full-time sales-

man, the automobile dealer’s sales area may be treated as the larger of the area within a 75 mile radius of the dealer’s sales office, or the on-way commuting distance (in miles) of the particular salesman.

(p) *Parking—(1) In general.* The value of parking provided to an employee on or near the business premises of the employer is excludable from gross income as a working condition fringe. The working condition fringe exclusion applies whether the employer owns or rents the parking facility or parking space.

(2) *Reimbursement of parking expenses.* Any reimbursement to the employee of the ordinary and necessary expenses of renting a parking space on or near the business premises of the employer is excludable as a working condition fringe. The preceding sentence does not apply, however, to cash payments that are not actually used for renting a parking space. Thus, that part of a general transportation allowance that is not used for parking is not excludable as a working condition fringe under this paragraph (p).

(3) *Parking on residential property.* With respect to an employee, this paragraph (p) does not apply to any parking facility or space located on property owned or leased for residential purposes by the employee.

(q) *Nonapplicability of nondiscrimination rules.* Except to the extent provided in paragraph (n)(3) of this section, the nondiscrimination rules of section 132(h)(1) and § 1.132-8T do not apply in determining the amount, if any, of a working condition fringe.

[T.D. 8063, 50 FR 52303, Dec. 23, 1985, as amended by T.D. 8256, 54 FR 28600, July 6, 1989]

#### § 1.132-6 De minimis fringes.

(a) *In general.* Gross income does not include the value of a de minimis fringe provided to an employee. The term “de minimis fringe” means any property or service the value of which is (after taking into account the frequency with which similar fringes are provided by the employer to the employer’s employees) so small as to make accounting for it unreasonable or administratively impracticable.

(b) *Frequency*—(1) *Employee-measured frequency*. Generally, the frequency with which similar fringes are provided by the employer to the employer's employees is determined by reference to the frequency with which the employer provides the fringes to each individual employee. For example, if an employer provides a free meal in kind to one employee on a daily basis, but not to any other employee, the value of the meals is not de minimis with respect to that one employee even though with respect to the employer's entire workforce the meals are provided "infrequently."

(2) *Employer-measured frequency*. Notwithstanding the rule of paragraph (b)(1) of this section, except for purposes of applying the special rules of paragraph (d)(2) of this section, where it would be administratively difficult to determine frequency with respect to individual employees, the frequency with which similar fringes are provided by the employer to the employer's employees is determined by reference to the frequency with which the employer provides the fringes to the workforce as a whole. Therefore, under this rule, the frequency with which any individual employee receives such a fringe benefit is not relevant and in some circumstances, the de minimis fringe exclusion may apply with respect to a benefit even though a particular employee receives the benefit frequently. For example, if an employer exercises sufficient control and imposes significant restrictions on the personal use of a company copying machine so that at least 85 percent of the use of the machine is for business purposes, any personal use of the copying machine by particular employees is considered to be a de minimis fringe.

(c) *Administrability*. Unless excluded by a provision of chapter 1 of the Internal Revenue Code of 1986 other than section 132(a)(4), the value of any fringe benefit that would not be unreasonable or administratively impracticable to account for is includible in the employee's gross income. Thus, except as provided in paragraph (d)(2) of this section, the provision of any cash fringe benefit is never excludable under section 132(a) as a de minimis fringe benefit. Similarly except as otherwise provided in paragraph (d) of this section, a

cash equivalent fringe benefit (such as a fringe benefit provided to an employee through the use of a gift certificate or charge or credit card) is generally not excludable under section 132(a) even if the same property or service acquired (if provided in kind) would be excludable as a de minimis fringe benefit. For example, the provision of cash to an employee for a theatre ticket that would itself be excludable as a de minimis fringe (see paragraph (e)(1) of this section) is not excludable as a de minimis fringe.

(d) *Special rules*—(1) *Transit passes*. A public transit pass provided at a discount to defray an employee's commuting costs may be excluded from the employee's gross income as a de minimis fringe if such discount does not exceed \$21 in any month. The exclusion provided in this paragraph (d)(1) also applies to the provision of tokens or fare cards that enable an individual to travel on the public transit system if the value of such tokens and fare cards in any month does not exceed by more than \$21 the amount the employee paid for the tokens and fare cards for such month. Similarly, the exclusion of this paragraph (d)(1) applies to the provision of a voucher or similar instrument that is exchangeable solely for tokens, fare cards, or other instruments that enable the employee to use the public transit system if the value of such vouchers and other instruments in any month does not exceed \$21. The exclusion of this paragraph (d)(1) also applies to reimbursements made by an employer to an employee after December 31, 1988, to cover the cost of commuting on a public transit system, provided the employee does not receive more than \$21 in such reimbursements for commuting costs in any given month. The reimbursement must be made under a bona fide reimbursement arrangement. A reimbursement arrangement will be treated as bona fide if the employer establishes appropriate procedures for verifying on a periodic basis that the employee's use of public transportation for commuting is consistent with the value of the benefit provided by the employer for that purpose. The amount of in-kind public transit commuting benefits and reimbursements provided during any month

that are excludible under this paragraph (d)(1) is limited to \$21. For months ending before July 1, 1991, the amount is \$15 per month. The exclusion provided in this paragraph (d)(1) does not apply to the provision of any benefit to defray public transit expenses incurred for personal travel other than commuting.

(2) *Occasional meal money or local transportation fare*—(i) *General rule.* Meals, meal money or local transportation fare provided to an employee is excluded as a de minimis fringe benefit if the benefit provided is reasonable and is provided in a manner that satisfies the following three conditions:

(A) *Occasional basis.* The meals, meal money or local transportation fare is provided to the employee on an occasional basis. Whether meal money or local transportation fare is provided to an employee on an occasional basis will depend upon the frequency *i.e.*, the availability of the benefit and regularity with which the benefit is provided by the employer to the employee. Thus, meals, meal money, or local transportation fare or a combination of such benefits provided to an employee on a regular or routine basis is not provided on an occasional basis.

(B) *Overtime.* The meals, meal money or local transportation fare is provided to an employee because overtime work necessitates an extension of the employee's normal work schedule. This condition does not fail to be satisfied merely because the circumstances giving rise to the need for overtime work are reasonably foreseeable.

(C) *Meal money.* In the case of a meal or meal money, the meal or meal money is provided to enable the employee to work overtime. Thus, for example, meals provided on the employer's premises that are consumed during the period that the employee works overtime or meal money provided for meals consumed during such period satisfy this condition.

In no event shall meal money or local transportation fare calculated on the basis of the number of hours worked (e.g., \$1.00 per hour for each hour over eight hours) be considered a de minimis fringe benefit.

(ii) *Applicability of other exclusions for certain meals and for transportation pro-*

*vided for security concerns.* The value of meals furnished to an employee, an employee's spouse, or any of the employee's dependents by or on behalf of the employee's employer for the convenience of the employer is excluded from the employee's gross income if the meals are furnished on the business premises of the employer (see section 119). (For purposes of the exclusion under section 119, the definitions of an employee under §1.132-1(b) do not apply.) If, for a bona fide business-oriented security concern, an employer provides an employee vehicle transportation that is specially designed for security (for example, the vehicle is equipped with bulletproof glass and armor plating), and the conditions of §1.132-5(m) are satisfied, the value of the special security design is excludable from gross income as a working condition fringe if the employee would not have had such special security design but for the bona fide business-oriented security concern.

(iii) *Special rule for employer-provided transportation provided in certain circumstances.* (A) *Partial exclusion of value.* If an employer provides transportation (such as taxi fare to an employee for use in commuting to and/or from work because of unusual circumstances and because, based on the facts and circumstances, it is unsafe for the employee to use other available means of transportation, the excess of the value of each one-way trip over \$1.50 per one-way commute is excluded from gross income. The rule of this paragraph (d)(2)(iii) is not available to a control employee as defined in §1.61-21(f) (5) and (6).

(B) *"Unusual circumstances"*. Unusual circumstances are determined with respect to the employee receiving the transportation and are based on all facts and circumstances. An example of unusual circumstances would be when an employee is asked to work outside of his normal work hours (such as being called to the workplace at 1:00 am when the employee normally works from 8:00 am to 4:00 pm). Another example of unusual circumstances is a temporary change in the employee's work schedule (such as working from 12 midnight to 8:00 am rather than from

8:00 am to 4:00 pm for a two-week period).

(C) “*Unsafe conditions*”. Factors indicating whether it is unsafe for an employee to use other available means of transportation are the history of crime in the geographic area surrounding the employee’s workplace or residence and the time of day during which the employee must commute.

(3) *Use of special rules or examples to establish a general rule.* The special rules provided in this paragraph (d) or examples provided in paragraph (e) of this section may not be used to establish any general rule permitting exclusion as a de minimis fringe. For example, the fact that \$252 (*i.e.*, \$21 per month for 12 months) worth of public transit passes can be excluded from gross income as a de minimis fringe in 1992 does not mean that any fringe benefit with a value equal to or less than \$252 may be excluded as a de minimis fringe. As another example, the fact that the commuting use of an employer-provided vehicle more than one day a month is an example of a benefit not excludable as a de minimis fringe (see paragraph (e)(2) of this section) does not mean that the commuting use of a vehicle up to 12 times per year is excludable from gross income as a de minimis fringe.

(4) *Benefits exceeding value and frequency limits.* If a benefit provided to an employee is not de minimis because either the value or frequency exceeds a limit provided in this paragraph (d), no amount of the benefit is considered to be a de minimis fringe. For example, if, in 1992, an employer provides a \$50 monthly public transit pass, the entire \$50 must be included in income, not just the excess value over \$21.

(e) *Examples—(1) Benefits excludable from income.* Examples of de minimis fringe benefits are occasional typing of personal letters by a company secretary; occasional personal use of an employer’s copying machine, provided that the employer exercises sufficient control and imposes significant restrictions on the personal use of the machine so that at least 85 percent of the use of the machine is for business purposes; occasional cocktail parties, group meals, or picnics for employees and their guests; traditional birthday

or holiday gifts of property (not cash) with a low fair market value; occasional theater or sporting event tickets; coffee, doughnuts, and soft drinks; local telephone calls; and flowers, fruit, books, or similar property provided to employees under special circumstances (e.g., on account of illness, outstanding performance, or family crisis).

(2) *Benefits not excludable as de minimis fringes.* Examples of fringe benefits that are not excludable from gross income as de minimis fringes are: season tickets to sporting or theatrical events; the commuting use of an employer-provided automobile or other vehicle more than one day a month; membership in a private country club or athletic facility, regardless of the frequency with which the employee uses the facility; employer-provided group-term life insurance on the life of the spouse or child of an employee; and use of employer-owned or leased facilities (such as an apartment, hunting lodge, boat, etc.) for a weekend. Some amount of the value of certain of these fringe benefits may be excluded from income under other statutory provisions, such as the exclusion for working condition fringes. See § 1.132-5.

(f) *Nonapplicability of nondiscrimination rules.* Except to the extent provided in § 1.132-7, the nondiscrimination rules of section 132(h)(1) and § 1.132-8 do not apply in determining the amount, if any, of a de minimis fringe. Thus, a fringe benefit may be excludable as a de minimis fringe even if the benefit is provided exclusively to highly compensated employees of the employer.

[T.D. 8256, 54 FR 28615, July 6, 1989, as amended by T.D. 8389, 57 FR 1871, Jan 16, 1992; 57 FR 5982, Feb. 19, 1992]

**§ 1.132-6T De minimis fringe—1985 through 1988 (temporary).**

(a) *In general.* Gross income does not include the value of a de minimis fringe provided to an employee. The term “de minimis fringe” means any property or service the value of which is (after taking into account the frequency with which similar fringes are provided by the employer to the employer’s employees) so small as to make accounting for it unreasonable or administratively impracticable.

(b) *Frequency.* Generally, the frequency with which similar fringes are provided by the employer to the employer's employees is determined by reference to the frequency with which the employer provides the fringe to each individual employee. For example, if an employer provides a free meal to one employee on a daily basis, but not to any other employee, the value of the meals is not de minimis with respect to that one employee even though with respect to the employer's entire workforce the meals are provided "infrequently." However, where it would be administratively difficult to determine frequency with respect to individual employees, the frequency with which similar fringes are provided by the employer to the employer's employees is determined by reference to the frequency with which the employer provides the fringes to the employees and not the frequency with which individual employees receive them. In these cases, if an employer occasionally provides a fringe benefit of de minimis value to the employer's employees, the de minimis fringe exclusion may apply even though a particular employee receives the benefit frequently. For example, if an employer exercises sufficient control and imposes significant restrictions on the personal use of a company copying machine so that at least 85 percent of the use of the machine is for business purposes, any personal use the copying machine by particular employees is considered to be a de minimis fringe.

(c) *Administrability.* Unless excluded by a statutory provision other than section 132(a)(4), the value of any fringe benefit that would not be unreasonable or administratively impracticable to account for must be included in the employee's gross income. Thus, except as otherwise provided in this section, the provision of any cash fringe benefit (or any fringe benefit provided to an employee through the use of a charge or credit card) is not excludable as a de minimis fringe. For example, the provision of cash to an employee for personal entertainment is not excludable as a de minimis fringe.

(d) *Special rules—(1) Transit passes.* A transit pass provided to an employee at a discount not exceeding \$15 per month

may be excluded as a de minimis fringe. The exclusion provided in this paragraph (d) also applies to the provision of \$15 in tokens or fare cards that enable an individual to travel on the transit system. The exclusion provided in this paragraph (d) does not apply to any provision of cash or other benefit to defray transit expenses incurred for personal travel.

(2) *Occasional meal money or local transportation fare.* Occasional meal money or local transportation fare provided to an employee because overtime work necessitates an extension of the employee's normal workday is excluded as a de minimis fringe.

(3) *Use of special rules to establish a general rule.* The special rules provided in this paragraph (d) may not be used to establish any general rule. For example, the fact that \$180 (\$15 per month for 12 months) worth of transit passes can be excluded in a year does not mean that any fringe benefit with a value equal to or less than \$180 may be excluded as a de minimis fringe.

(4) *Benefits exceeding value and frequency limitations.* If the benefit provided to an employee is not de minimis because either the value or frequency exceeds a limit provided in this paragraph (d), no amount of the benefit is considered to be de minimis. For example, if an employer provides a \$20 monthly transit pass, the entire \$20 must be included in income, not just the excess value over \$15.

(e) *Nonapplicability of nondiscrimination rules.* Except to the extent provided in § 1.132-7T, the nondiscrimination rules of section 132(h)(1) and § 1.132-8T do not apply. Thus, for example, a fringe benefit may be a de minimis fringe even if the benefit is provided exclusively to officers of the employer.

(f) *Examples—(1) Benefits excludable from income.* Examples of de minimis fringe benefits are occasional typing of personal letters by a company secretary; occasional personal use of an employer's copying machine, provided that the employer exercises sufficient control and imposes significant restrictions on the personal use of the machine so that at least 85 percent of the use of the machine is for business purposes; occasional cocktail parties or

picnics for employees and their guests; traditional holiday gifts of property (not cash) with a low fair market value; occasional theatre or sporting event tickets; and coffee and doughnuts.

(2) *Benefits not excludable as de minimis fringes.* Examples of fringe benefits that are not excludable from income as de minimis fringes are: season tickets to sporting or theatrical events; the commuting use of an employer-provided automobile or other vehicle more than once a month; membership in a private country club or athletic facility, regardless of the frequency with which the employee uses the facility; and use of employer-owned or leased facilities (such as an apartment, hunting lodge, boat, etc.) for a weekend. Some amount of the value of these fringe benefits may be excluded under other statutory provisions, such as the exclusion for working condition fringes. See § 1.132-5T.

[T.D. 8063, 50 FR 52308, Dec. 23, 1985, as amended by T.D. 8256, 54 FR 28600, July 6, 1989]

**§ 1.132-7 Employer-operated eating facilities.**

(a) *In general*—(1) *Condition for exclusion*—(i) *General rule.* The value of meals provided to employees at an employer-operated eating facility for employees is excludable from gross income as a de minimis fringe only if on an annual basis, the revenue from the facility equals or exceeds the direct operating costs of the facility.

(ii) *Additional condition for highly compensated employees.* With respect to any highly compensated employee, an exclusion is available under this section only if the condition set out in paragraph (a)(1)(i) of this section is satisfied and access to the facility is available on substantially the same terms to each member of a group of employees that is defined under a reasonable classification set up by the employer that does not discriminate in favor of highly compensated employees. See § 1.132-8. For purposes of this paragraph (a)(1)(ii), each dining room or cafeteria in which meals are served is treated as a separate eating facility, whether each such dining room or cafeteria has

its own kitchen or other food-preparation area.

(2) *Employer-operated eating facility for employees.* An employer-operated eating facility for employees is a facility that meets all of the following conditions—

(i) The facility is owned or leased by the employer,

(ii) The facility is operated by the employer,

(iii) The facility is located on or near the business premises of the employer, and

(iv) The meals furnished at the facility are provided during, or immediately before or after, the employee's workday.

For purposes of this section, the term "meals" means food, beverages, and related services provided at the facility. If an employer can reasonably determine the number of meals that are excludable from income by the recipient employees under section 119, the employer may, in determining whether the requirement of paragraph (a)(1)(i) of this section is satisfied, disregard all costs and revenues attributable to such meals provided to such employees. If an employer can reasonably determine the number of meals received by volunteers who receive food and beverages at a hospital, free or at a discount, the employer may, in determining whether the requirement of paragraph (a)(1)(i) of this section is satisfied, disregard all costs and revenues attributable to such meals provided to such volunteers. If an employer charges nonemployees a greater amount than employees, in determining whether the requirement of paragraph (a)(1)(i) of this section is satisfied, the employer must disregard all costs and revenues attributable to such meals provided to such nonemployees.

(3) *Operation by the employer.* If an employer contracts with another to operate an eating facility for its employees, the facility is considered to be operated by the employer for purposes of this section. If an eating facility is operated by more than one employer, it is considered to be operated by each employer.

(4) *Example.* The provisions of this paragraph (a)(2) may be illustrated by the following example:

*Example (1).* Assume that a not-for-profit hospital system maintains cafeterias for the

use of its employees and volunteers. Only the employees are charged for food service at the cafeteria and the policy of the hospital is to charge the employees only for the costs of food, beverage and labor directly attributable to the meal. Most of the cafeterias within the system furnish more free meals to volunteers than they serve paid meals to employees. For purposes of this paragraph, as long as the employer can accurately determine the number of meals received free or at a discount by volunteers, the employer may disregard all the costs and revenues attributable to such meals provided to volunteers. Therefore, for purposes of this paragraph, the costs of the hospital system for furnishing meals to employees who pay for them are the costs to be compared to determine if the revenues from the facility equal or exceed direct operating costs of the facility's service to employees.

(b) *Direct operating costs*—(1) *In general*. For purposes of this section, the direct operating costs of an eating facility are—

(i) The cost of food and beverages, and

(ii) The cost of labor for personnel whose services relating to the facility are performed primarily on the premises of the eating facility. Direct operating costs do not include the labor cost attributable to personnel whose services relating to the facility are not performed primarily on the premises of the eating facility. Thus, for example, the labor costs attributable to cooks, waiters, and waitresses are included in direct operating costs, but the labor cost attributable to a manager of an eating facility whose services relating to the facility are not primarily performed on the premises of the eating facility is not included in direct operating costs. If an employee performs services relating to the facility both on and off the premises of the eating facility, only the portion of the total labor cost of the employee relating to the facility that bears the same proportion to such total labor cost as time spent on the premises bears to total time spent performing services relating to the facility is included in direct operating costs. For example, assume that 60 percent of the services of a cook in the above example are not related to the eating facility. Only 40 percent of the total labor cost of the cook is includible in direct operating costs. For purposes of this section, labor costs in-

clude all compensation required to be reported on a Form W-2 for income tax purposes and related employment taxes paid by the employer. In determining the direct operating costs of an eating facility, the employer may include as part of the facility, vending machines that are provided by the employer and located on the same premises as the other eating facilities operated by the employer.

(2) *Multiple dining rooms or cafeterias*. The direct operating costs test may be applied separately for each dining room or cafeteria. Alternatively, the direct operating costs test may be applied with respect to all the eating facilities operated by the employer.

(3) *Payment to operator of facility*. If an employer contracts with another to operate an eating facility for its employees, the direct operating costs of the facility consist both of direct operating costs, if any, incurred by the employer and the amount paid to the operator of the facility to the extent that such amount is attributable to what would be direct operating costs if the employer operated the facility directly.

(c) *Valuation of non-excluded meals provided at an employer-operated eating facility for employees*. If the exclusion for meals provided at an employer-operated eating facility for employees is not available, the recipient of meals provided at such facility must include in income the amount by which the fair market value of the meals provided exceeds the sum of—

(1) The amount, if any, paid for the meals, and

(2) The amount, if any, specifically excluded by another section of chapter 1 of this subtitle.

For special valuation rules relating to such meals, see § 1.61-21(j).

[T.D. 8256, 54 FR 28617, July 6, 1989]

**§ 1.132-7T Treatment of employer-operated eating facilities—1985 through 1988 (temporary).**

(a) *In general*—(1) *General rule*. The value of meals provided to employees at an employer-operated eating facility for employees is excludable from gross income as a de minimis fringe only if—

(i) On an annual basis, the revenue from the facility equals or exceeds the

direct operating costs of the facility, and

(ii) With respect to any officer, owner or highly compensated employee, access to the facility is available on substantially the same terms to each member of a group of employees that is defined under a reasonable classification set up by the employer that does not discriminate in favor of officers, owners, and highly compensated employees. See § 1.132-8T.

(2) *Employer-operated eating facility for employees.* An employer-operated eating facility for employees is a facility that meets all of the following conditions—

(i) The facility is owned or leased by the employer,

(ii) The facility is operated by the employer,

(iii) The facility is located on or near the business premises of the employer,

(iv) Substantially all of the use of the facility is by employees of the employer operating the facility, and

(v) The meals furnished at the facility are provided during, or immediately before or after, the employee's workday.

For purposes of this section, the term "meals" means food, beverages, and related services provided at the facility. If an employer can determine the number of employees who receive meals that are excludable from income under section 119, the employer may, in determining whether the requirement of paragraph (a)(1)(i) of this section is satisfied, disregard all costs and revenues attributable to such meals provided to such employees. For purposes of this section, each dining room or cafeteria in which meals are served is treated as a separate eating facility, regardless of whether each such dining room or cafeteria has its own kitchen or other food-preparation area.

(3) *Operation by the employer.* If an employer contracts with another to operate an eating facility for its employees, the facility is considered to be operated by the employer for purposes of this section. If an eating facility is operated by more than one employer, it is considered to be operated by each employer.

(b) *Direct operating costs.* The direct operating costs test must be applied separately for each dining room or caf-

eteria. For purpose of this section, the direct operating costs of an eating facilities are: (1) The cost of food and beverages and (2) the cost of labor for personnel whose services relating to the facility are performed primarily on the premises of the eating facility. Direct operating costs do not include the cost of labor for personnel whose services relating to the facility are not performed primarily on the premises of the eating facility. Thus, for example, the labor cost for cooks, waiters, and waitresses is included in direct operating costs, but the labor cost for a manager of an eating facility whose services relating to the facility are not primarily performed on the premises of the eating facility is not included in direct operating costs. If an employee performs services both on and off the premises of the eating facility, only the applicable percentage of the total labor cost of the employee that bears the same proportion as time spent on the premises bears to total time is included in direct operating costs. For example, assume that 60 percent of the services of the cooks in the above example are not related to the eating facility. Only 40 percent of the total labor cost of the cooks is includible in direct operating costs. For purposes of this section, labor costs include all compensation required to be reported on a Form W-2 for income tax purposes and related employment taxes paid by the employer.

(c) *Valuation of non-excluded meals provided at an employer-operated eating facility for employees.* If the exclusion for meals provided at an employer-operated eating facility for employees is not available, the recipient of meals provided at such facility must include in income the amount by which the fair market value of the meals provided exceeds the sum of: (1) The amount, if any, paid for the meals, and (2) the amount, if any, specifically excluded by another section of the Code. For special valuation rules relating to such meals see § 1.61-2T (j).

[T.D. 8063, 50 FR 52308, Dec. 23, 1985, as amended by T.D. 8256, 54 FR 28600, July 6, 1989]

**§ 1.132-8 Fringe benefit non-discrimination rules.**

(a) *Application of nondiscrimination rules—(1) General rule.* A highly compensated employee who receives a no-additional cost service, a qualified employee discount or a meal provided at an employer-operated eating facility for employees shall not be permitted to exclude such benefit from his or her income unless the benefit is available on substantially the same terms to:

- (i) All employees of the employer; or
- (ii) A group of employees of the employer which is defined under a reasonable classification set up by the employer that does not discriminate in favor of highly compensated employees. See paragraph (f) of this section for the definition of a highly compensated employee.

(2) *Consequences of discrimination—(i) In general.* If an employer maintains more than one fringe benefit program, *i.e.*, either different fringe benefits being provided to the same group of employees, or different classifications of employees or the same fringe benefit being provided to two or more classifications of employees, the non-discrimination requirements of section 132 will generally be applied separately to each such program. Thus, a determination that one fringe benefit program discriminates in favor of highly compensated employees generally will not cause other fringe benefit programs covering the same highly compensated employees to be treated as discriminatory. If the fringe benefits provided to a highly compensated individual do not satisfy the nondiscrimination rules provided in this section, such individual shall be unable to exclude from gross income any portion of the benefit. For example, if an employer offers a 20 percent discount (which otherwise satisfies the requirements for a qualified employee discount) to all non-highly compensated employees and a 35 percent discount to all highly compensated employees, the entire value of the 35 percent discount (not just the excess over 20 percent) is includible in the gross income and wages of the highly compensated employees who make purchases at a discount.

(ii) *Exception—(A) Related fringe benefit programs.* If one of a group of fringe

benefit programs discriminates in favor of highly compensated employees, no related fringe benefit provided to such highly compensated employees under any other fringe benefit program may be excluded from the gross income of such highly compensated employees. For example, assume a department store provides a 20 percent merchandise discount to all employees under one fringe benefit program. Assume further that under a second fringe benefit program, the department store provides an additional 15 percent merchandise discount to a group of employees defined under a classification which discriminates in favor of highly compensated employees. Because the second fringe benefit program is discriminatory, the 15 percent merchandise discount provided to the highly compensated employees is not a qualified employee discount. In addition, because the 20 percent merchandise discount provided under the first fringe benefit program is related to the fringe benefit provided under the second fringe benefit program, the 20 percent merchandise discount provided to the highly compensated employees is not a qualified employee discount. Thus, the entire 35 percent merchandise discount provided to the highly compensated employees is includible in such employees' gross incomes.

(B) *Employer operated eating facilities for employees.* For purposes of paragraph (a)(2)(ii)(A) of this section, meals at different employer-operated eating facilities for employees are not related fringe benefits, so that a highly compensated employee may exclude from gross income the value of a meal at a nondiscriminatory facility even though any meals provided to him or her at a discriminatory facility cannot be excluded.

(3) *Scope of the nondiscrimination rules provided in this section.* The nondiscrimination rules provided in this section apply only to fringe benefits provided pursuant to section 132 (a)(1), (a)(2), and (e)(2). These rules have no application to any other employee benefit that may be subject to nondiscrimination requirements under any other section of the Code.

(b) *Aggregation of employees—(1) Section 132(a) (1) and (2).* For purposes of

determining whether the exclusions for no-additional-cost services and qualified employee discounts are available to highly compensated employees, the nondiscrimination rules of this section are applied by aggregating the employees of all related employers (as defined in § 1.132-1(c)), except that employees in different lines of business (as defined in § 1.132-4) are not to be aggregated. Thus, in general, for purposes of this section, the term “employees of the employer” refers to all employees of the employer and any other entity that is a member of a group described in sections 414 (b), (c), (m), or (o) and that performs services within the same line of business as the employer which provides the particular fringe benefit. Employees in different lines of business will be aggregated, however, if the line of business limitation has been relaxed pursuant to paragraphs (b) through (g) of § 1.132-4.

(2) *Section 132 (e) (2)*. For purposes of determining whether the exclusions for meals provided at employer-operated eating facilities are available to highly compensated, the nondiscrimination rules of this section are applied by aggregating the employees of all related employers (as defined in section § 1.132-1(c)) who regularly work at or near the premises on which the eating facility is located, except that employees in different lines of business (as defined in § 1.132-4) are not to be aggregated. The nondiscrimination rules of this section are applied separately to each eating facility. Each dining room or cafeteria in which meals are served is treated as a separate eating facility, regardless of whether each such dining room or cafeteria has its own kitchen or other food-preparation area.

(3) *Classes of employees who may be excluded*. For purposes of applying the nondiscrimination rules of this section to a particular fringe benefit program, there may be excluded from consideration employees who may be excluded from consideration under section 89(h), as enacted by the Tax Reform Act of 1986, Pub. L. 99-514, 100 Stat. 2085 (1986) and amended by the Technical and Miscellaneous Revenue Act of 1988, Pub. L. 100-647, 102 Stat. 3342 (1988).

(c) *Availability on substantially the same terms*—(1) *General rule*. The deter-

mination of whether a benefit is available on substantially the same terms shall be made upon the basis of the facts and circumstances of each situation. In general, however, if any one of the terms or conditions governing the availability of a particular benefit to one or more employees varies from any one of the terms or conditions governing the availability of a benefit made available to one or more other employees, such benefit shall not be considered to be available on substantially the same terms except to the extent otherwise provided in paragraph (c)(2) of this section. For example, if a department store provides a 20 percent qualified employee discount to all of its employees on all merchandise, the substantially the same terms requirement will be satisfied. Similarly, if the discount provided to all employees is 30 percent on certain merchandise (such as apparel), and 20 percent on all other merchandise, the substantially the same terms requirement will be satisfied. However, if a department store provides a 20 percent qualified employee discount to all employees, but as to the employees in certain departments, the discount is available upon hire, and as to the remaining departments, the discount is only available when an employee has completed a specified term of services, the 20 percent discount is not available on substantially the same terms to all of the employees of the employer. Similarly, if a greater discount is given to employees with more seniority, full-time work status, or a particular job description, such benefit (*i.e.*, the discount) would not be available to all employees eligible for the discount on substantially the same terms, except to the extent otherwise provided in paragraph (c)(2) of this section. These examples also apply to no-additional-cost-services. Thus, if an employer charges non-highly compensated employees for a no-additional-cost service and does not charge highly compensated employees (or charges highly compensated employees a lesser amount), the substantially the same terms requirement will not be satisfied.

(2) *Certain terms relating to priority*. Certain fringe benefits made available

to employees are available only in limited quantities that may be insufficient to meet employee demand. This situation may occur either because of employer policy (such as where an employer determines that only a certain number of units of a specific product will be made available to employees each year) or because of the nature of the fringe benefit (such as where an employer provides a no-additional-cost transportation service that is limited to the number of seats available just before departure). Under these circumstances, an employer may find it necessary to establish some method of allocating the limited fringe benefits among the employees eligible to receive the fringe benefits. The employer may establish the priorities described below.

(i) *Priority on a first come, first served, or similar basis.* A benefit shall not fail to be treated as available to a group of employees on substantially the same terms merely because the employer allocates the benefit among such employees on a "first come, first served" or lottery basis, provided that the same notice of the terms of availability is given to all employees in the group and the terms under which the benefit is provided to employees within the group are otherwise the same with respect to all employees. For purposes of the preceding sentence, a program that gives priority to employees who are the first to submit written requests for the benefit will constitute priority on a "first come, first served" basis. Similarly, if the employer regularly engages in the practice of allocating benefits on a priority basis to employees demonstrating a critical need, such benefit shall not fail to be treated as available on substantially the same terms to all of the employees with respect to whom such priority status is available as long as the determination is based upon uniform and objective criteria which have been communicated to all employees in the group of eligible employees. An example of a critical need would be priority transportation given to an employee in the event of a medical emergency involving the employee (or a member of the employee's immediate family) or a recent death in the employee's imme-

diately family. Frustrated vacation plans or forfeited deposits would not be treated as giving rise to particularly critical needs.

(ii) *Priority on the basis of seniority.* Solely for purposes of § 1.132-8, a benefit shall not fail to be treated as available to a group of employees of the employer on substantially the same terms merely because the employer allocates the benefit among such employees on a seniority basis provided that:

(A) The same notice of the terms of availability is given to all employees in the group; and

(B) The average value of the benefit provided for each nonhighly compensated employee is at least 75% of that provided for each highly compensated employee. For purposes of this test, the average value of the benefit provided for each nonhighly compensated (highly compensated) employee is determined by taking the sum of the fair market values of such benefit provided to all the nonhighly compensated (highly compensated) employees, determined in accordance with § 1.61-21, and then dividing that sum by the total number of nonhighly compensated (highly compensated) employees of the employer. For purposes of determining the average value of the benefit provided for each employee, all employees of the employer are counted, including those who are not eligible to receive the benefit from the employer.

(d) *Testing for discrimination—(1) Classification test.* In the event that a benefit described in section 132 (a)(1), (a)(2) or (e)(2) is not available on substantially the same terms to all of the employees of the employer, no exclusion shall be available to a highly compensated employee for such benefit unless the program under which the benefit is provided satisfies the nondiscrimination standards set forth in this section. The nondiscrimination standard of this section will be satisfied only if the benefit is available on substantially the same terms to a group of employees of the employer which is defined under a reasonable classification established by the employer that does not discriminate in favor of highly compensated employees. The determination of whether a

particular classification is discriminatory will generally depend upon the facts and circumstances involved, based upon principles similar to those applied for purposes of section 410(b)(2)(A)(i) or, for years commencing prior to January 1, 1988, section 410(b)(1)(B). Thus, in general, except as otherwise provided in this section, if a benefit is available on substantially the same terms to a group of employees which, when compared with all of the other employees of the employer, constitutes a nondiscriminatory classification under section 410(b)(2)(A)(i) (or, if applicable, section 410(b)(1)(B)), it shall be deemed to be nondiscriminatory.

(2) *Classifications that are per se discriminatory.* A classification that, on its face, makes fringe benefits available principally to highly compensated employees is per se discriminatory. In addition, a classification that is based on either an amount or rate of compensation is per se discriminatory if it favors those with the higher amount or rate of compensation. On the other hand, a classification that is based on factors such as seniority, full-time vs. part-time employment, or job description is not per se discriminatory but may be discriminatory as applied to the workforce of a particular employer.

(3) *Former employees.* When determining whether a classification is discriminatory, former employees shall be tested separately from other employees of the employer. Therefore, a classification is not discriminatory solely because the employer does not make fringe benefits available to any former employee. Whether a classification of former employees discriminates in favor of highly compensated employees will depend upon the particular facts and circumstances.

(4) *Restructuring of benefits.* For purposes of testing whether a particular group of employees would constitute a discriminatory classification for purposes of this section, an employer may restructure its fringe benefit program as described in this paragraph. If a fringe benefit is provided to more than one group of employees, and one or more such groups would constitute a discriminatory classification if considered by itself, then for purposes of this

section, the employer may restructure its fringe benefit program so that all or some of the members of such group may be aggregated with another group, provided that each member of the restructured group will have available to him or her the same benefit upon the same terms and conditions. For example, assume that all highly compensated employees of an employer have fewer than five years of service and all nonhighly compensated employees have over five years of service. If the employer provided a five percent discount to employees with under five years of service and a ten percent discount to employees with over five years of service, the discount program available to the highly compensated employees would not satisfy the nondiscriminatory classification test; however, as a result of the rule described in this paragraph (d)(4), the employer could structure the program to consist of a five percent discount for all employees and a five percent additional discount for nonhighly compensated employees.

(5) *Employer-operated eating facilities for employees—(i) General rule.* If access to an employer-operated eating facility for employees is available to a classification of employees that discriminates in favor of highly compensated employees, then the classification will not be treated as discriminating in favor of highly compensated employees unless the facility is used by one or more executive group employees more than a de minimis amount.

(ii) *Executive group employee.* For purposes of this paragraph (d)(5), an employee is an “executive group employee” if the definition of paragraph (f)(1) of this section is satisfied. For purposes of identifying such employees, the phrase “top one percent of the employees” is substituted for the phrase “top ten percent of the employees” in section 414(q)(4) (relating to the definition of “top-paid group”).

(e) *Cash bonuses or rebates.* A cash bonus or rebate provided to an employee by an employer that is determined with reference to the value of employer-provided property or services purchased by the employee, is treated as an equivalent employee discount. For example, assume a department

store provides a 20 percent merchandise discount to all employees under a fringe benefit program. In addition, assume that the department store provides cash bonuses to a group of employees defined under a classification which discriminates in favor of highly compensated employees. Assume further that such cash bonuses equal 15 percent of the value of merchandise purchased by each employee. This arrangement is substantively identical to the example described in paragraph (e)(2)(i) of this section concerning related fringe benefit programs. Thus, both the 20 percent merchandise discount and the 15 percent cash bonus provided to the highly compensated employees are includible in such employees' gross incomes.

(f) *Highly compensated employee*—(1) *Government and nongovernment employees.* A highly compensated employee of any employer is any employee who, during the year or the preceding year—

- (i) Was a 5-percent owner,
- (ii) Received compensation from the employer in excess of \$75,000,
- (iii) Received compensation from the employer in excess of \$50,000 and was in the top-paid group of employees for such year, or
- (iv) Was at any time an officer and received compensation greater than 150 percent of the amount in effect under section 415(c)(1)(A) for such year.

For purposes of determining whether an employee is a highly compensated employee, the rules of sections 414 (q), (s), and (t) apply.

(2) *Former employees.* A former employee shall be treated as a highly compensated employee if—

- (i) The employee was a highly compensated employee when the employee separated from service, or
- (ii) The employee was a highly compensated employee at any time after attaining age 55.

[T.D. 8256, 54 FR 28618, July 6, 1989]

**§ 1.132-8T Nondiscrimination rules—1985 through 1988 (temporary).**

(a) *Application of nondiscrimination rules*—(1) *General rule.* To qualify under section 132 for the exclusions for non-additional-cost services, qualified employee discounts, or meals provided at employer-operated eating facilities for

employees, the fringe benefit must be available on substantially the same terms to each member of a group of employees which is defined under a reasonable classification set up by the employer that does not discriminate in favor of officers, owners, or highly compensated employees (the “prohibited group employees”).

(2) *Consequences of discrimination.* If the availability of or the provision of the fringe benefit does not satisfy the nondiscrimination rules provided in this section, the exclusion applies only to those employees (if any) who receive the benefit and who are not prohibited group employees. For example, if an employer offers a 20 percent discount (which otherwise satisfies the requirements for a qualified employee discount) to all nonprohibited group employees and a 35 percent discount to all prohibited group employees, the entire value of the 35 percent discount (not just the excess over 20 percent) is includible in the gross income and wages of the prohibited group employees who make purchases at a discount.

(3) *Scope of the nondiscrimination rules provided in this section.* The nondiscrimination rules provided in this section apply only to fringe benefits provided pursuant to section 132 (a)(1), (a)(2), and (e)(2). These rules have no application to any other employee benefit that may be subject to nondiscrimination requirements under any other section of the Code.

(b) *Coverage requirement*—(1) *Section 132 (a)(1) and (2).* For purposes of the exclusions for no-additional-cost services and qualified employee discounts, the nondiscrimination rules of this section are applied by aggregating the employees of all related employers (as defined in § 1.132-1T (c)), but without aggregating employees in different lines of business (as defined in § 1.132-4T). Employees in different lines of business will be aggregated, however, if the line of business limitation has been relaxed pursuant to either section 1.132-4T (b) or (c). Except as provided in paragraph (e) of this section, the nondiscrimination rules of this section are generally applied separately to each fringe benefit program of an employer.

(2) *Section 132(e)(2)*. For purposes of the exclusion for meals provided at employer-operated eating facilities for employees, the nondiscrimination rules of this section are applied by aggregating the employees of all related employers, without regard to different lines of business, who regularly work at or near the premises on which the eating facility is located. The nondiscrimination rules of this section are applied separately to each eating facility. Each dining room or cafeteria in which meals are served is treated as a separate eating facility, regardless of whether each such dining room or cafeteria has its own kitchen or other food-preparation area.

(3) *Classes of employees who may be excluded*. Except as otherwise provided in this section, for purposes of applying the nondiscrimination rules of this section to a particular fringe benefit program, there may be excluded from consideration the following classes of employees provided that, with respect to each class (other than the class described in paragraph (b)(3)(iii) of this section), all employees in the class are excluded from participating in the particular fringe benefit program—

(i) All part-time or seasonal employees who are (or who are reasonably expected to be) credited with less than 1,000 hours (or such lesser number required for the program) of service during a calendar year;

(ii) All employees who are included in a unit of employees covered by an agreement with the Secretary of Labor finds to be a collective bargaining agreement between employee representatives and one or more employers, if there is evidence that the particular fringe benefit program was the subject of good faith bargaining between such employee representatives and such employer or employers (and if, after March 31, 1984, the additional condition of section 7701(a)(46) is satisfied);

(iii) All employees who are non-resident aliens and who receive no earned income (within the meaning of section 911(d)(2)) from the employer which constitutes income from services within the United States (within the meaning of section 861(a)(3));

(iv) All employees who have not completed at least one year (or such lesser period required for the program) of service with the employer;

(v) All employees who have separated from the service of the employer in a year prior to the current year (regardless of the reason for the separation);

(vi) All employees who have separated from the service of the employer in a year prior to the current year except for retired and/or disabled employees (either with or without a time limit based on a set number of years since separation from the service of the employer); and

(vii) All employees of a leased section of a department store.

(c) *Classification requirement*—(1) *General rule*. The determination of whether a particular classification established by an employer discriminates in favor of the prohibited group will depend on the facts and circumstances involved, based on principles similar to those applied in the qualified plan area (see section 410(b)(1)(B) and the regulations thereunder). In general, except as otherwise provided in this section, a classification that would be determined to be nondiscriminatory pursuant to the application of the nondiscrimination standards that are applied in the qualified plan area shall be deemed to be nondiscriminatory for purposes of section 132.

(2) *Classifications that are per se discriminatory*. A classification that, on its face, makes fringe benefits available only to prohibited group employees is per se discriminatory, and no exclusion from gross income is available to any prohibited group employee under section 132. In addition, a classification that is based on either an amount or rate of compensation is per se discriminatory if it favors those with the higher amount or rate of compensation. On the other hand, a classification that is based on factors such as seniority, full-time vs. part-time employment, or job description is not per se discriminatory but may be discriminatory as applied to the workforce of a particular employer.

(3) *Former employees*. When determining whether a classification is discriminatory, former employees shall not be considered together with other

employees of the employer. Therefore, a classification is not discriminatory if the employer does not make the fringe benefits available to any former employee. Whether a classification of former employees discriminates in favor of prohibited group employees will depend on the facts and circumstances. The rules of this section shall apply separately to the former employee classification.

(4) *Employer-operated eating facilities for employees*—(i) *General rule.* If access to an employer-operated eating facility for employees is available to a classification of employees that discriminates in favor of highly compensated employees, the classification will not be treated as discriminating in favor of the prohibited group employees unless the facility is used, more than a de minimis amount, by any executive group employee.

(ii) *Executive group employees.* For purposes of this paragraph (c)(4), the term “executive group employees” has the same meaning as the term “prohibited group employees” (as defined in paragraph (g) of this section), except that for purposes of identifying highly compensated employees—

(A) The exception provided in paragraph (g)(1)(i)(A) of this section does not apply, and

(B) The phrase “highest-paid one percent of all employees of an employer” is substituted for the phrase “highest-paid ten percent of all employees of an employer” in paragraph (g)(1)(ii)(A) of this section.

(d) *Substantially-the-same-terms requirement*—(1) *General rule.* Fringe benefits available to a particular classification of employees must be available to each employee in the classification on substantially the same terms. The determination of whether this requirement is met shall depend on the facts and circumstances involved. For example, if a department store provides a 20 percent qualified employee discount to its employees on all merchandise, the substantially-the-same-terms requirement will be satisfied. Similarly, if the discount provided to all employees is 30 percent on certain merchandise (such as apparel), and 20 percent on all other merchandise, the substantially-the-same-terms requirement will be satisfied.

However, if the discount provided is 20 percent on all merchandise for hourly employees and 30 percent on all merchandise for salaried employees, the substantially-the-same-terms requirement will not be satisfied. In addition, if the percentage discount varies depending on either an employee’s amount or rate of compensation, or volume of purchases, the substantially-the-same-terms requirement will not be satisfied. In order to determine whether such a discount program satisfies the nondiscrimination requirements of section 132, each group of employees that does receive fringe benefits on substantially the same terms must be treated as a separate classification. However, subject to the rules of paragraph (e)(2) of this section, an employer may divide a fringe benefit program into two programs for purposes of aggregating groups of employees. See Example (1) of paragraph (d)(3) of this section.

(2) *Terms relating to priority.* Certain fringe benefits made available to employees are available only in limited quantities that may be insufficient to meet employee demand. This may occur either because of employer policy (such as where an employer determines that only a certain number of units of a specific product will be made available to employees each year) or because of the nature of the fringe benefit (such as where an employer provides a no-additional-cost transportation service that is limited to the number of seats available just before departure). Under these circumstances, an employer may find it necessary to establish some method of allocating the limited fringe benefits among the employees eligible to receive the fringe benefits. An allocation among employees on a “first-come, first-served” basis will not violate the substantially-the-same-terms requirement provided that such an allocation is not discriminatory in practice. In addition, an allocation among employees on a lottery basis will not violate the substantially-the-same-terms requirement provided that such an allocation is nondiscriminatory in practice. For example, assume that an employer has a limited number of a particular benefit to offer to its employees. Assume further that

the employees interested in receiving the benefit submit their names to the employer who then selects a number of names, at random, equal to the number of fringe benefits available. This lottery system would not violate the substantially-the-same-terms requirement. An allocation among employees on other than a “first-come, first-served”, lottery, or similar basis will violate the substantially-the-same-terms requirement. Therefore, an allocation based on seniority, full-time vs. part-time employment, or job description will violate the substantially-the-same-terms requirement. In order to determine whether such a fringe benefit program satisfies the nondiscrimination requirements of section 132, each group of employees that does receive fringe benefits on substantially the same terms must be treated as a separate classification. For purposes of this rule, the last two sentences of paragraph (d)(1) of this section apply.

(3) *Examples.* The followings examples illustrate the provisions of this paragraph (d):

*Example 1.* Assume that with respect to a benefit available in limited quantities an employer provides priority to employees based on seniority. Assume further that all non-prohibited group employees have ten years of seniority and all prohibited group employees have nine years seniority. If each of these groups were tested separately, the benefits offered to prohibited group employees would be discriminatory under this section. In this case, the employer could divide the fringe benefit program provided to non-prohibited group employees into two parts: one relating to nine years of seniority and one relating to an additional year of seniority. As restructured in this manner, all employees receive the benefit relating to nine years seniority and only non-prohibited group employees receive the benefit relating to an additional year of seniority. Both groups (all employees and all non-prohibited group employees) are nondiscriminatory groups.

*Example 2.* Assume that prices charged to prohibited group employees at an employer-operated eating facility for employees are lower than prices charged to non-prohibited group employees. The substantially-the-same requirement is not satisfied.

(4) *Disproportionate use of eating facility.* If access to an employer-operated eating facility for employees is technically available on substantially-the-

same-terms (to (i) all employees who regularly work at or near the premises on which the eating facility is located (the employee group), or (ii) a non-discriminatory classification of the employee group, but in practice a highly disproportionate number of the prohibited group employees in the employee group, compared to the non-prohibited group employees in the employee group, use the facility, the substantially-the-same-terms requirement will not be satisfied unless no member of the executive group eats there more than a de minimis amount.

(e) *Aggregation of separate fringe benefit programs—(1) General rule.* If an employer maintains more than one fringe benefit program, *i.e.*, two or more classifications of employees providing either identical or different fringe benefits, the nondiscrimination requirements of section 132 will generally be applied separately to each such program. Thus, a determination that one fringe benefit program discriminates in favor of prohibited group employees generally will not cause other fringe benefit programs covering the same prohibited group employees to be treated as discriminatory.

(2) *Exception—(i) Related fringe benefit programs.* If one of a group of fringe benefit programs discriminates in favor of prohibited group employees, no related fringe benefit provided to such prohibited group employees under any other fringe benefit program may be excluded from the gross income of such prohibited group employees. For example, assume a department store provides a 20 percent merchandise discount to all employees under one fringe benefit program. Assume further that under a second fringe benefit program, the department store provides an additional 15 percent merchandise discount to a group of employees defined under a classification which discriminates in favor of the prohibited group. Because the second fringe benefit program is discriminatory, the 15 percent merchandise discount provided to the prohibited group employees is not a qualified employee discount. In addition, because the 20 percent merchandise discount provided under the first fringe benefit program is related to the fringe benefit provided under the second

fringe benefit program, the 20 percent merchandise discount provided the prohibited group employees is not a qualified employee discount. Thus, the entire 35 percent merchandise discount provided to the prohibited group employees is includible in such employees' gross incomes.

(ii) *Employer-operated eating facilities for employees.* For purposes of paragraph (e)(2)(i) of this section, meals at different employer-operated eating facilities for employees are not related fringe benefits, so that a prohibited group employee may exclude the value of a meal at a nondiscriminatory facility even though any meals provided to him or her at the discriminatory facility cannot be excluded.

(f) *Cash bonuses or rebates.* A cash bonus or rebate provided to an employee by an employer that is determined pursuant to the value of employer-provided property or services purchased by the employee, is treated as an equivalent employee discount. For example, assume a department store provides a 20 percent merchandise discount to all employees under a fringe benefit program. In addition, assume that the department store provides cash bonuses to a group of employees defined under a classification which discriminates in favor of the prohibited group. Assume further that such cash bonuses equal 15 percent of the value of merchandise purchased by each employee. This arrangement is substantively identical to the example described in paragraph (e)(2) of this section. Thus, both the 20 percent merchandise discount and the 15 percent cash bonus provided to the prohibited group employees are includible in such employees' gross incomes.

(g) *Prohibited group employees—(1) Highly compensated—(i) General rule.* Except as otherwise provided in this paragraph (g)(1)(i), any employee of an employer who has (or is reasonably expected to have) compensation during a calendar year equal to or greater than the employer's base compensation amount is highly compensated. There are two exceptions to this rule:

(A) Any employee who has (or is reasonably expected to have) compensation during a calendar year equal to or greater than \$50,000 is highly com-

pensated, regardless of whether such compensation is in excess of the base compensation amount, and

(B) Any employee who is reasonably expected to have compensation during a calendar year equal to or less than \$20,000 is not highly compensated, unless no employee of the employer is reasonably expected to have compensation equal to or greater than \$35,000.

The determination of whether an employee is a highly compensated employee will be determined based on the entire employee workforce of all employers aggregated pursuant to the rules of section 414 (b), (c), or (m) without regard to the regular workplace of the employees.

(ii) *Base compensation amount—(A) General rule.* The term "base compensation amount" is defined as that amount corresponding to the lowest annual compensation amount received by the highest-paid ten percent of all employees of an employer (the number of employees in the top ten percent will be increased to the next highest integer if necessary), determined on the basis of the preceding calendar year. For purposes of this paragraph (g)(1)(ii), the term "employer" includes all entities that would be aggregated pursuant to the rules of section 414 (b), (c), or (m).

(B) *Employees that are excluded.* For purposes of determining the base compensation amount with respect to a fringe benefit program, employees described in paragraph (b)(3) of this section are excluded whether or not they are covered under the fringe benefit program, except that: (1) Employees described in paragraph (b)(3)(ii) of this section are taken into account with respect to the program even if they are excluded under paragraph (b)(3), and (2) employees described in paragraph (b)(3)(i) and (iv) of this section are taken into account with respect to the program unless they are excluded under paragraph (b)(3).

(C) *Exception to preceding calendar year rule.* In the case of an employer's first year of operation, or where an employer's business has changed significantly from the prior calendar year (e.g., due to an acquisition or merger), the employer must make a good faith attempt to either determine or adjust

the base compensation amount for the current year based on reasonable estimates of current year compensation.

(iii) *Compensation*. The term “compensation” is defined as the amount reportable on a Form W-2 as income. Amounts that would be excluded from income but for section 132(h)(1) are not included in compensation for purposes of this paragraph (g)(1). Compensation includes amounts received from all entities which would be treated as a single employer under section 414 (b), (c), or (m) and is not restricted to amounts received with respect to any one line of business.

(iv) *Employee*. Generally, for purposes of determining whether an employee is highly compensated under this paragraph (g)(1), the term “employee” does not include any individual who does not perform services for the employer as an employee during the calendar year. For example, if an employer has active employees, retired or disabled employees, and widows or widowers who are “employees” under section 132(f)(1)(B), the general rule (described in paragraph (g)(1)(i) of this section) applies only to the active employees.

(2) *Owner*—(i) *General rule*. For purposes of this section, the term “owner” means any employee who owns a one percent or greater interest in either the employer or in any entity that would be aggregated with the employer pursuant to the rules of section 414 (b), (c), or (m). In addition, such an employee shall be treated as an owner of all entities that would be aggregated with the employer pursuant to the rules of section 414 (b), (c), or (m).

(ii) *Determining ownership*. Ownership in a corporation shall be determined pursuant to the rules of section 318(a). For purposes of determining ownership in an entity other than a corporation, the rules of section 318(a) shall apply in a manner similar to the way in which they apply for purposes of determining ownership in a corporation. For non-corporate interests, capital or profits interest must be substituted for stock.

(3) *Officer*—(i) *Non-government*. For purposes of this section, an officer of a non-government employer is any employee who is appointed, confirmed, or elected by the Board or shareholders of the employer. An employee who is an

officer of an employer shall be treated as an officer of all entities treated as a single employer pursuant to section 414 (b), (c), or (m). The number of officers is not to exceed one-percent of the total number of employees of all entities treated as a single employer pursuant to section 414 (b), (c), or (m) (increased to the next highest integer, if necessary). If the number of officers exceeds one-percent of all employees, then the limitation is to be applied to employees in descending order of compensation (as defined in paragraph (g)(1)(iii) of this section). Thus, if an employer with 1,000 employees has 11 board-appointed officers, the employee with the least compensation of those officers would not be an officer under this paragraph (g)(3)(i). In determining the total number of employees with respect to a fringe benefit program, employees described in paragraph (b)(3) of this section are excluded whether or not they are covered under the fringe benefit program, except that (A) employees described in paragraph (b)(3)(ii) of this section are taken into account with respect to the program even if they are excluded under paragraph (b)(3), and (B) employees described in paragraph (b)(3) (i) and (iv) of this section are taken into account with respect to the program unless they are excluded under paragraph (b)(3).

(ii) *Government*. For purposes of this section, an officer of a government employer is any—

(A) Elected official,

(B) Federal employee appointed by the President and confirmed by the Senate. However, in the case of any commissioned officer of the United States Armed Forces, an officer is any employee with the rank of brigadier general or rear admiral (lower half) or above, and

(C) State or local executive officer comparable to individuals described in paragraphs (g)(3)(ii) (A) and (B) of this section.

For purposes of this paragraph (g)(3)(ii), the term “government” includes any Federal, state, or local governmental unit, and any agency or instrumentality thereof.

(4) *Former employees.* [Reserved]

[T.D. 8063, 50 FR 52309, Dec. 23, 1985, as amended by T.D. 8256, 54 FR 28600, July 6, 1989]

**§ 1.132-9 Qualified transportation fringes.**

(a) *Table of contents.* This section contains a list of the questions and answers in § 1.132-9.

(1) *General rules.*

Q-1. What is a qualified transportation fringe?

Q-2. What is transportation in a commuter highway vehicle?

Q-3. What are transit passes?

Q-4. What is qualified parking?

Q-5. May qualified transportation fringes be provided to individuals who are not employees?

Q-6. Must a qualified transportation fringe benefit plan be in writing?

(2) *Dollar limitations.*

Q-7. Is there a limit on the value of qualified transportation fringes that may be excluded from an employee's gross income?

Q-8. What amount is includible in an employee's wages for income and employment tax purposes if the value of the qualified transportation fringe exceeds the applicable statutory monthly limit?

Q-9. Are excludable qualified transportation fringes calculated on a monthly basis?

Q-10. May an employee receive qualified transportation fringes from more than one employer?

(3) *Compensation reduction.*

Q-11. May qualified transportation fringes be provided to employees pursuant to a compensation reduction agreement?

Q-12. What is a compensation reduction election for purposes of section 132(f)?

Q-13. Is there a limit to the amount of the compensation reduction?

Q-14. When must the employee have made a compensation reduction election and under what circumstances may the amount be paid in cash to the employee?

Q-15. May an employee whose qualified transportation fringe costs are less than the employee's compensation reduction carry over this excess amount to subsequent periods?

(4) *Expense reimbursements.*

Q-16. How does section 132(f) apply to expense reimbursements?

Q-17. May an employer provide nontaxable cash reimbursement under section 132(f) for periods longer than one month?

Q-18. What are the substantiation requirements if an employer distributes transit passes?

Q-19. May an employer choose to impose substantiation requirements in addition to those described in this regulation?

(5) *Special rules for parking and vanpools.*

Q-20. How is the value of parking determined?

Q-21. How do the qualified transportation fringe rules apply to van pools?

(6) *Reporting and employment taxes.*

Q-22. What are the reporting and employment tax requirements for qualified transportation fringes?

(7) *Interaction with other fringe benefits.*

Q-23. How does section 132(f) interact with other fringe benefit rules?

(8) *Application to individuals who are not employees.*

Q-24. May qualified transportation fringes be provided to individuals who are partners, 2-percent shareholders of S-corporations, or independent contractors?

(9) *Effective date.*

Q-25. What is the effective date of this section?

(b) *Questions and answers.*

Q-1. What is a qualified transportation fringe?

A-1. (a) The following benefits are qualified transportation fringe benefits:

(1) Transportation in a commuter highway vehicle.

(2) Transit passes.

(3) Qualified parking.

(b) An employer may simultaneously provide an employee with any one or more of these three benefits.

Q-2. What is transportation in a commuter highway vehicle?

A-2. Transportation in a commuter highway vehicle is transportation provided by an employer to an employee in connection with travel between the employee's residence and place of employment. A commuter highway vehicle is a highway vehicle with a seating capacity of at least 6 adults (excluding the driver) and with respect to which at least 80 percent of the vehicle's mileage for a year is reasonably expected to be—

(a) For transporting employees in connection with travel between their residences and their place of employment; and

(b) On trips during which the number of employees transported for commuting is at least one-half of the adult seating capacity of the vehicle (excluding the driver).

Q-3. What are transit passes?

A-3. A transit pass is any pass, token, farecard, voucher, or similar item (including an item exchangeable

for fare media) that entitles a person to transportation—

(a) On mass transit facilities (whether or not publicly owned); or

(b) Provided by any person in the business of transporting persons for compensation or hire in a highway vehicle with a seating capacity of at least 6 adults (excluding the driver).

Q-4. What is qualified parking?

A-4. (a) Qualified parking is parking provided to an employee by an employer—

(1) On or near the employer's business premises; or

(2) At a location from which the employee commutes to work (including commuting by carpool, commuter highway vehicle, mass transit facilities, or transportation provided by any person in the business of transporting persons for compensation or hire).

(b) For purposes of section 132(f), parking on or near the employer's business premises includes parking on or near a work location at which the employee provides services for the employer. However, qualified parking does not include—

(1) The value of parking provided to an employee that is excludable from gross income under section 132(a)(3) (as a working condition fringe), or

(2) Reimbursement paid to an employee for parking costs that is excludable from gross income as an amount treated as paid under an accountable plan. See § 1.62-2.

(c) However, parking on or near property used by the employee for residential purposes is not qualified parking.

(d) Parking is provided by an employer if—

(1) The parking is on property that the employer owns or leases;

(2) The employer pays for the parking; or

(3) The employer reimburses the employee for parking expenses (see Q/A-16 of this section for rules relating to cash reimbursements).

Q-5. May qualified transportation fringes be provided to individuals who are not employees?

A-5. An employer may provide qualified transportation fringes only to individuals who are currently employees of the employer at the time the qualified transportation fringe is provided. The

term employee for purposes of qualified transportation fringes is defined in § 1.132-1(b)(2)(i). This term includes only common law employees and other statutory employees, such as officers of corporations. See Q/A-24 of this section for rules regarding partners, 2-percent shareholders, and independent contractors.

Q-6. Must a qualified transportation fringe benefit plan be in writing?

A-6. No. Section 132(f) does not require that a qualified transportation fringe benefit plan be in writing.

Q-7. Is there a limit on the value of qualified transportation fringes that may be excluded from an employee's gross income?

A-7. (a) *Transportation in a commuter highway vehicle and transit passes.* Before January 1, 2002, up to \$65 per month is excludable from the gross income of an employee for transportation in a commuter highway vehicle and transit passes provided by an employer. On January 1, 2002, this amount is increased to \$100 per month.

(b) *Parking.* Up to \$175 per month is excludable from the gross income of an employee for qualified parking.

(c) *Combination.* An employer may provide qualified parking benefits in addition to transportation in a commuter highway vehicle and transit passes.

(d) *Cost-of-living adjustments.* The amounts in paragraphs (a) and (b) of this Q/A-7 are adjusted annually, beginning with 2000, to reflect cost-of-living. The adjusted figures are announced by the Service before the beginning of the year.

Q-8. What amount is includible in an employee's wages for income and employment tax purposes if the value of the qualified transportation fringe exceeds the applicable statutory monthly limit?

A-8. (a) Generally, an employee must include in gross income the amount by which the fair market value of the benefit exceeds the sum of the amount, if any, paid by the employee and any amount excluded from gross income under section 132(a)(5). Thus, assuming no other statutory exclusion applies, if an employer provides an employee with a qualified transportation fringe that exceeds the applicable statutory

monthly limit and the employee does not make any payment, the value of the benefits provided in excess of the applicable statutory monthly limit is included in the employee's wages for income and employment tax purposes. See § 1.61-21(b)(1).

(b) The following examples illustrate the principles of this Q/A-8:

*Example 1.* (i) For each month in a year in which the statutory monthly transit pass limit is \$100 (i.e., a year after 2001), Employer M provides a transit pass valued at \$110 to Employee D, who does not pay any amount to Employer M for the transit pass.

(ii) In this *Example 1*, because the value of the monthly transit pass exceeds the statutory monthly limit by \$10, \$120 (\$110—\$100, times 12 months) must be included in D's wages for income and employment tax purposes for the year with respect to the transit passes.

*Example 2.* (i) For each month in a year in which the statutory monthly qualified parking limit is \$175, Employer M provides qualified parking valued at \$195 to Employee E, who does not pay any amount to M for the parking.

(ii) In this *Example 2*, because the fair market value of the qualified parking exceeds the statutory monthly limit by \$20, \$240 (\$195—\$175, times 12 months) must be included in Employee E's wages for income and employment tax purposes for the year with respect to the qualified parking.

*Example 3.* (i) For each month in a year in which the statutory monthly qualified parking limit is \$175, Employer P provides qualified parking with a fair market value of \$220 per month to its employees, but charges each employee \$45 per month.

(ii) In this *Example 3*, because the sum of the amount paid by an employee (\$45) plus the amount excludable for qualified parking (\$175) is not less than the fair market value of the monthly benefit, no amount is includible in the employee's wages for income and employment tax purposes with respect to the qualified parking.

Q-9. Are excludable qualified transportation fringes calculated on a monthly basis?

A-9. (a) *In general.* Yes. The value of transportation in a commuter highway vehicle, transit passes, and qualified parking is calculated on a monthly basis to determine whether the value of the benefit has exceeded the applicable statutory monthly limit on qualified transportation fringes. Except in the case of a transit pass provided to an employee, the applicable statutory monthly limit applies to qualified

transportation fringes used by the employee in a month. Monthly exclusion amounts are not combined to provide a qualified transportation fringe for any month exceeding the statutory limit. A month is a calendar month or a substantially equivalent period applied consistently.

(b) *Transit passes.* In the case of transit passes provided to an employee, the applicable statutory monthly limit applies to the transit passes provided by the employer to the employee in a month for that month or for any previous month in the calendar year. In addition, transit passes distributed in advance for more than one month, but not for more than twelve months, are qualified transportation fringes if the requirements in paragraph (c) of this Q/A-9 are met (relating to the income tax and employment tax treatment of advance transit passes). The applicable statutory monthly limit under section 132(f)(2) on the combined amount of transportation in a commuter highway vehicle and transit passes may be calculated by taking into account the monthly limits for all months for which the transit passes are distributed. In the case of a pass that is valid for more than one month, such as an annual pass, the value of the pass may be divided by the number of months for which it is valid for purposes of determining whether the value of the pass exceeds the statutory monthly limit.

(c) *Rule if employee's employment terminates—(1) Income tax treatment.* The value of transit passes provided in advance to an employee with respect to a month in which the individual is not an employee is included in the employee's wages for income tax purposes.

(2) *Reporting and employment tax treatment.* Transit passes distributed in advance to an employee are excludable from wages for employment tax purposes under sections 3121, 3306, and 3401 (FICA, FUTA, and income tax withholding) if the employer distributes transit passes to the employee in advance for not more than three months and, at the time the transit passes are distributed, there is not an established date that the employee's employment will terminate (for example, if the employee has given notice of retirement) which will occur before the beginning

of the last month of the period for which the transit passes are provided. If the employer distributes transit passes to an employee in advance for not more than three months and at the time the transit passes are distributed there is an established date that the employee's employment will terminate, and the employee's employment does terminate before the beginning of the last month of the period for which the transit passes are provided, the value of transit passes provided for months beginning after the date of termination during which the employee is not employed by the employer is included in the employee's wages for employment tax purposes. If transit passes are distributed in advance for more than three months, the value of transit passes provided for the months during which the employee is not employed by the employer is includible in the employee's wages for employment tax purposes regardless of whether at the time the transit passes were distributed there was an established date of termination of the employee's employment.

(d) *Examples.* The following examples illustrate the principles of this Q/A-9:

*Example 1.* (i) Employee E incurs \$150 for qualified parking used during the month of June of a year in which the statutory monthly parking limit is \$175, for which E is reimbursed \$150 by Employer R. Employee E incurs \$180 in expenses for qualified parking used during the month of July of that year, for which E is reimbursed \$180 by Employer R.

(ii) In this *Example 1*, because monthly exclusion amounts may not be combined to provide a benefit in any month greater than the applicable statutory limit, the amount by which the amount reimbursed for July exceeds the applicable statutory monthly limit (\$180 minus \$175 equals \$5) is includible in Employee E's wages for income and employment tax purposes.

*Example 2.* (i) Employee F receives transit passes from Employer G with a value of \$195 in March of a year (for which the statutory monthly transit pass limit is \$65) for January, February, and March of that year. F was hired during January and has not received any transit passes from G.

(ii) In this *Example 2*, the value of the transit passes (three months times \$65 equals \$195) is excludable from F's wages for income and employment tax purposes.

*Example 3.* (i) Employer S has a qualified transportation fringe benefit plan under

which its employees receive transit passes near the beginning of each calendar quarter for that calendar quarter. All employees of Employer S receive transit passes from Employer S with a value of \$195 on March 31 for the second calendar quarter covering the months April, May, and June (of a year in which the statutory monthly transit pass limit is \$65).

(ii) In this *Example 3*, because the value of the transit passes may be calculated by taking into account the monthly limits for all months for which the transit passes are distributed, the value of the transit passes (three months times \$65 equals \$195) is excludable from the employees' wages for income and employment tax purposes.

*Example 4.* (i) Same facts as in *Example 3*, except that Employee T, an employee of Employer S, terminates employment with S on May 31. There was not an established date of termination for Employee T at the time the transit passes were distributed.

(ii) In this *Example 4*, because at the time the transit passes were distributed there was not an established date of termination for Employee T, the value of the transit passes provided for June (\$65) is excludable from T's wages for employment tax purposes. However, the value of the transit passes distributed to Employee T for June (\$65) is not excludable from T's wages for income tax purposes.

(iii) If Employee T's May 31 termination date was established at the time the transit passes were provided, the value of the transit passes provided for June (\$65) is included in T's wages for both income and employment tax purposes.

*Example 5.* (i) Employer F has a qualified transportation fringe benefit plan under which its employees receive transit passes semi-annually in advance of the months for which the transit passes are provided. All employees of Employer F, including Employee X, receive transit passes from F with a value of \$390 on June 30 for the 6 months of July through December (of a year in which the statutory monthly transit pass limit is \$65). Employee X's employment terminates and his last day of work is August 1. Employer F's other employees remain employed throughout the remainder of the year.

(ii) In this *Example 5*, the value of the transit passes provided to Employee X for the months September, October, November, and December (\$65 times 4 months equals \$260) of the year is included in X's wages for income and employment tax purposes. The value of the transit passes provided to Employer F's other employees is excludable from the employees' wages for income and employment tax purposes.

*Example 6.* (i) Each month during a year in which the statutory monthly transit pass limit is \$65, Employer R distributes transit passes with a face amount of \$70 to each of

its employees. Transit passes with a face amount of \$70 can be purchased from the transit system by any individual for \$65.

(ii) In this *Example 6*, because the value of the transit passes distributed by Employer R does not exceed the applicable statutory monthly limit (\$65), no portion of the value of the transit passes is included as wages for income and employment tax purposes.

**Q-10.** May an employee receive qualified transportation fringes from more than one employer?

**A-10.** (a) *General rule.* Yes. The statutory monthly limits described in Q/A-7 of this section apply to benefits provided by an employer to its employees. For this purpose, all employees treated as employed by a single employer under section 414(b), (c), (m), or (o) are treated as employed by a single employer. See section 414(t) and § 1.132-1(c). Thus, qualified transportation fringes paid by entities under common control under section 414(b), (c), (m), or (o) are combined for purposes of applying the applicable statutory monthly limit. In addition, an individual who is treated as a leased employee of the employer under section 414(n) is treated as an employee of that employer for purposes of section 132. See section 414(n)(3)(C).

(b) *Examples.* The following examples illustrate the principles of this Q/A-10:

*Example 1.* (i) During a year in which the statutory monthly qualified parking limit is \$175, Employee E works for Employers M and N, who are unrelated and not treated as a single employer under section 414(b), (c), (m), or (o). Each month, M and N each provide qualified parking benefits to E with a value of \$100.

(ii) In this *Example 1*, because M and N are unrelated employers, and the value of the monthly parking benefit provided by each is not more than the applicable statutory monthly limit, the parking benefits provided by each employer are excludable as qualified transportation fringes assuming that the other requirements of this section are satisfied.

*Example 2.* (i) Same facts as in *Example 1*, except that Employers M and N are treated as a single employer under section 414(b).

(ii) In this *Example 2*, because M and N are treated as a single employer, the value of the monthly parking benefit provided by M and N must be combined for purposes of determining whether the applicable statutory monthly limit has been exceeded. Thus, the amount by which the value of the parking benefit exceeds the monthly limit (\$200 minus the monthly limit amount of \$175

equals \$25) for each month in the year is includible in E's wages for income and employment tax purposes.

**Q-11.** May qualified transportation fringes be provided to employees pursuant to a compensation reduction agreement?

**A-11.** Yes. An employer may offer employees a choice between cash compensation and any qualified transportation fringe. An employee who is offered this choice and who elects qualified transportation fringes is not required to include the cash compensation in income if—

(a) The election is pursuant to an arrangement described in Q/A-12 of this section;

(b) The amount of the reduction in cash compensation does not exceed the limitation in Q/A-13 of this section;

(c) The arrangement satisfies the timing and reimbursement rules in Q/A-14 and 16 of this section; and

(d) The related fringe benefit arrangement otherwise satisfies the requirements set forth elsewhere in this section.

**Q-12.** What is a compensation reduction election for purposes of section 132(f)?

**A-12.** (a) *Election requirements generally.* A compensation reduction arrangement is an arrangement under which the employer provides the employee with the right to elect whether the employee will receive either a fixed amount of cash compensation at a specified future date or a fixed amount of qualified transportation fringes to be provided for a specified future period (such as qualified parking to be used during a future calendar month). The employee's election must be in writing or another form, such as electronic, that includes, in a permanent and verifiable form, the information required to be in the election. The election must contain the date of the election, the amount of the compensation to be reduced, and the period for which the benefit will be provided. The election must relate to a fixed dollar amount or fixed percentage of compensation reduction. An election to reduce compensation for a period by a set amount for such period may be automatically renewed for subsequent periods.

(b) *Automatic election permitted.* An employer may provide under its qualified transportation fringe benefit plan that a compensation reduction election will be deemed to have been made if the employee does not elect to receive cash compensation in lieu of the qualified transportation fringe, provided that the employee receives adequate notice that a compensation reduction will be made and is given adequate opportunity to choose to receive the cash compensation instead of the qualified transportation fringe.

Q-13. Is there a limit to the amount of the compensation reduction?

A-13. Yes. Each month, the amount of the compensation reduction may not exceed the combined applicable statutory monthly limits for transportation in a commuter highway vehicle, transit passes, and qualified parking. For example, for a year in which the statutory monthly limit is \$65 for transportation in a commuter highway vehicle and transit passes, and \$175 for qualified parking, an employee could elect to reduce compensation for any month by no more than \$240 (\$65 plus \$175) with respect to qualified transportation fringes. If an employee were to elect to reduce compensation by \$250 for a month, the excess \$10 (\$250 minus \$240) would be includible in the employee's wages for income and employment tax purposes.

Q-14. When must the employee have made a compensation reduction election and under what circumstances may the amount be paid in cash to the employee?

A-14. (a) The compensation reduction election must satisfy the requirements set forth under paragraphs (b), (c), and (d) of this Q/A-14.

(b) *Timing of election.* The compensation reduction election must be made before the employee is able currently to receive the cash or other taxable amount at the employee's discretion. The determination of whether the employee is able currently to receive the cash does not depend on whether it has been constructively received for purposes of section 451. The election must specify that the period (such as a calendar month) for which the qualified transportation fringe will be provided must not begin before the election is

made. Thus, a compensation reduction election must relate to qualified transportation fringes to be provided after the election. For this purpose, the date a qualified transportation fringe is provided is—

(1) The date the employee receives a voucher or similar item; or

(2) In any other case, the date the employee uses the qualified transportation fringe.

(c) *Revocability of elections.* The employee may not revoke a compensation reduction election after the employee is able currently to receive the cash or other taxable amount at the employee's discretion. In addition, the election may not be revoked after the beginning of the period for which the qualified transportation fringe will be provided.

(d) *Compensation reduction amounts not refundable.* Unless an election is revoked in a manner consistent with paragraph (c) of this Q/A-14, an employee may not subsequently receive the compensation (in cash or any form other than by payment of a qualified transportation fringe under the employer's plan). Thus, an employer's qualified transportation fringe benefit plan may not provide that an employee who ceases to participate in the employer's qualified transportation fringe benefit plan (such as in the case of termination of employment) is entitled to receive a refund of the amount by which the employee's compensation reductions exceed the actual qualified transportation fringes provided to the employee by the employer.

(e) *Examples.* The following examples illustrate the principles of this Q/A-14:

*Example 1.* (i) Employer P maintains a qualified transportation fringe benefit arrangement during a year in which the statutory monthly limit is \$100 for transportation in a commuter highway vehicle and transit passes (2002 or later) and \$180 for qualified parking. Employees of P are paid cash compensation twice per month, with the payroll dates being the first and the fifteenth day of the month. Under P's arrangement, an employee is permitted to elect at any time before the first day of a month to reduce his or her compensation payable during that month in an amount up to the applicable statutory monthly limit (\$100 if the employee elects coverage for transportation in a commuter highway vehicle or a mass transit pass, or

\$180 if the employee chooses qualified parking) in return for the right to receive qualified transportation fringes up to the amount of the election. If such an election is made, P will provide a mass transit pass for that month with a value not exceeding the compensation reduction amount elected by the employee or will reimburse the cost of other qualified transportation fringes used by the employee on or after the first day of that month up to the compensation reduction amount elected by the employee. Any compensation reduction amount elected by the employee for the month that is not used for qualified transportation fringes is not refunded to the employee at any future date.

(ii) In this *Example 1*, the arrangement satisfies the requirements of this Q/A-14 because the election is made before the employee is able currently to receive the cash and the election specifies the future period for which the qualified transportation fringes will be provided. The arrangement would also satisfy the requirements of this Q/A-14 and Q/A-13 of this section if employees are allowed to elect to reduce compensation up to \$280 per month (\$100 plus \$180).

(iii) The arrangement would also satisfy the requirements of this Q/A-14 (and Q/A-13 of this section) if employees are allowed to make an election at any time before the first or the fifteenth day of the month to reduce their compensation payable on that payroll date by an amount not in excess of one-half of the applicable statutory monthly limit (depending on the type of qualified transportation fringe elected by the employee) and P provides a mass transit pass on or after the applicable payroll date for the compensation reduction amount elected by the employee for the payroll date or reimburses the cost of other qualified transportation fringes used by the employee on or after the payroll date up to the compensation reduction amount elected by the employee for that payroll date.

*Example 2.* (i) Employee Q elects to reduce his compensation payable on March 1 of a year (for which the statutory monthly mass transit limit is \$65) by \$195 in exchange for a mass transit voucher to be provided in March. The election is made on the preceding February 27. Employee Q was hired in January of the year. On March 10 of the year, the employer of Employee Q delivers to Employee Q a mass transit voucher worth \$195 for the months of January, February, and March.

(ii) In this *Example 2*, \$65 is included in Employee Q's wages for income and employment tax purposes because the compensation reduction election fails to satisfy the requirement in this Q/A-14 and Q/A-12 of this section that the period for which the qualified transportation fringe will be provided not begin before the election is made to the extent the election relates to \$65 worth of trans-

it passes for January of the year. The \$65 for February is not taxable because the election was for a future period that includes at least one day in February.

(iii) However, no amount would be included in Employee Q's wages as a result of the election if \$195 worth of mass transit passes were instead provided to Q for the months of February, March, and April (because the compensation reduction would relate solely to fringes to be provided for a period not beginning before the date of the election and the amount provided does not exceed the aggregate limit for the period, *i.e.*, the sum of \$65 for each of February, March, and April). See Q/A-9 of this section for rules governing transit passes distributed in advance for more than one month.

*Example 3.* (i) Employee R elects to reduce his compensation payable on March 1 of a year (for which the statutory monthly parking limit is \$175) by \$185 in exchange for reimbursement by Employer T of parking expenses incurred by Employee R for parking on or near Employer T's business premises during the period beginning after the date of the election through March. The election is made on the preceding February 27. Employee R incurs \$10 in parking expenses on February 28 of the year, and \$175 in parking expenses during the month of March. On April 5 of the year, Employer T reimburses Employee R \$185 for the parking expenses incurred on February 28, and during March, of the year.

(ii) In this *Example 3*, no amount would be includible in Employee R's wages for income and employment tax purposes because the compensation reduction related solely to parking on or near Employer R's business premises used during a period not beginning before the date of the election and the amount reimbursed for parking used in any one month does not exceed the statutory monthly limitation.

Q-15. May an employee whose qualified transportation fringe costs are less than the employee's compensation reduction carry over this excess amount to subsequent periods?

A-15. (a) Yes. An employee may carry over unused compensation reduction amounts to subsequent periods under the plan of the employee's employer.

(b) The following example illustrates the principles of this Q/A-15:

*Example.* (i) By an election made before November 1 of a year for which the statutory monthly mass transit limit is \$65, Employee E elects to reduce compensation in the amount of \$65 for the month of November. E incurs \$50 in employee-operated commuter highway vehicle expenses during November for which E is reimbursed \$50 by Employer R,

E's employer. By an election made before December, E elects to reduce compensation by \$65 for the month of December. E incurs \$65 in employee-operated commuter highway vehicle expenses during December for which E is reimbursed \$65 by R. Before the following January, E elects to reduce compensation by \$50 for the month of January. E incurs \$65 in employee-operated commuter highway vehicle expenses during January for which E is reimbursed \$65 by R because R allows E to carry over to the next year the \$15 amount by which the compensation reductions for November and December exceeded the employee-operated commuter highway vehicle expenses incurred during those months.

(ii) In this *Example*, because Employee E is reimbursed in an amount not exceeding the applicable statutory monthly limit, and the reimbursement does not exceed the amount of employee-operated commuter highway vehicle expenses incurred during the month of January, the amount reimbursed (\$65) is excludable from E's wages for income and employment tax purposes.

**Q-16.** How does section 132(f) apply to expense reimbursements?

**A-16.** (a) *In general.* The term qualified transportation fringe includes cash reimbursement by an employer to an employee for expenses incurred or paid by an employee for transportation in a commuter highway vehicle or qualified parking. The term qualified transportation fringe also includes cash reimbursement for transit passes made under a bona fide reimbursement arrangement, but, in accordance with section 132(f)(3), only if permitted under paragraph (b) of this Q/A-16. The reimbursement must be made under a bona fide reimbursement arrangement which meets the rules of paragraph (c) of this Q/A-16. A payment made before the date an expense has been incurred or paid is not a reimbursement. In addition, a bona fide reimbursement arrangement does not include an arrangement that is dependent solely upon an employee certifying in advance that the employee will incur expenses at some future date.

(b) *Special rule for transit passes—(1) In general.* The term *qualified transportation fringe* includes cash reimbursement for transit passes made under a bona fide reimbursement arrangement, but, in accordance with section 132(f)(3), only if no voucher or similar item that may be exchanged only for a transit pass is readily available for di-

rect distribution by the employer to employees. If a voucher is readily available, the requirement that a voucher be distributed in-kind by the employer is satisfied if the voucher is distributed by the employer or by another person on behalf of the employer (for example, if a transit operator credits amounts to the employee's fare card as a result of payments made to the operator by the employer).

(2) *Voucher or similar item.* For purposes of the special rule in paragraph (b) of this Q/A-16, a transit system voucher is an instrument that may be purchased by employers from a voucher provider that is accepted by one or more mass transit operators (e.g., train, subway, and bus) in an area as fare media or in exchange for fare media. Thus, for example, a transit pass that may be purchased by employers directly from a voucher provider is a transit system voucher.

(3) *Voucher provider.* The term voucher provider means any person in the trade or business of selling transit system vouchers to employers, or any transit system or transit operator that sells vouchers to employers for the purpose of direct distribution to employees. Thus, a transit operator might or might not be a voucher provider. A voucher provider is not, for example, a third-party employee benefits administrator that administers a transit pass benefit program for an employer using vouchers that the employer could obtain directly.

(4) *Readily available.* For purposes of this paragraph (b), a voucher or similar item is readily available for direct distribution by the employer to employees if and only if an employer can obtain it from a voucher provider that—

(i) does not impose fare media charges that cause vouchers to not be readily available as described in paragraph (b)(5) of this section; and

(ii) does not impose other restrictions that cause vouchers to not be readily available as described in paragraph (b)(6) of this section.

(5) *Fare media charges.* For purposes of paragraph (b)(4) of this section, fare media charges relate only to fees paid by the employer to voucher providers for vouchers. The determination of

whether obtaining a voucher would result in fare media charges that cause vouchers to not be readily available as described in this paragraph (b) is made with respect to each transit system voucher. If more than one transit system voucher is available for direct distribution to employees, the employer must consider the fees imposed for the lowest cost monthly voucher for purposes of determining whether the fees imposed by the voucher provider satisfy this paragraph. However, if transit system vouchers for multiple transit systems are required in an area to meet the transit needs of the individual employees in that area, the employer has the option of averaging the costs applied to each transit system voucher for purposes of determining whether the fare media charges for transit system vouchers satisfy this paragraph. Fare media charges are described in this paragraph (b)(5), and therefore cause vouchers to not be readily available, if and only if the average annual fare media charges that the employer reasonably expects to incur for transit system vouchers purchased from the voucher provider (disregarding reasonable and customary delivery charges imposed by the voucher provider, e.g., not in excess of \$15) are more than 1 percent of the average annual value of the vouchers for a transit system.

(6) *Other restrictions.* For purposes of paragraph (b)(4) of this section, restrictions that cause vouchers to not be readily available are restrictions imposed by the voucher provider other than fare media charges that effectively prevent the employer from obtaining vouchers appropriate for distribution to employees. Examples of such restrictions include—

(i) *Advance purchase requirements.* Advance purchase requirements cause vouchers to not be readily available only if the voucher provider does not offer vouchers at regular intervals or fails to provide the voucher within a reasonable period after receiving payment for the voucher. For example, a requirement that vouchers may be purchased only once per year may effectively prevent an employer from obtaining vouchers for distribution to employees. An advance purchase re-

quirement that vouchers be purchased not more frequently than monthly does not effectively prevent the employer from obtaining vouchers for distribution to employees.

(ii) *Purchase quantity requirements.* Purchase quantity requirements cause vouchers to not be readily available if the voucher provider does not offer vouchers in quantities that are reasonably appropriate to the number of the employer's employees who use mass transportation (for example, the voucher provider requires a \$1,000 minimum purchase and the employer seeks to purchase only \$200 of vouchers).

(iii) *Limitations on denominations of vouchers that are available.* If the voucher provider does not offer vouchers in denominations appropriate for distribution to the employer's employees, vouchers are not readily available. For example, vouchers provided in \$5 increments up to the monthly limit are appropriate for distribution to employees, while vouchers available only in a denomination equal to the monthly limit are not appropriate for distribution to employees if the amount of the benefit provided to the employer's employees each month is normally less than the monthly limit.

(7) *Example.* The following example illustrates the principles of this paragraph (b):

*Example.* (i) Company C in City X sells mass transit vouchers to employers in the metropolitan area of X in various denominations appropriate for distribution to employees. Employers can purchase vouchers monthly in reasonably appropriate quantities. Several different bus, rail, van pool, and ferry operators service X, and a number of the operators accept the vouchers either as fare media or in exchange for fare media. To cover its operating expenses, C imposes on each voucher a 50 cents charge, plus a reasonable and customary \$15 charge for delivery of each order of vouchers. Employer M disburses vouchers purchased from C to its employees who use operators that accept the vouchers and M reasonably expects that \$55 is the average value of the voucher it will purchase from C for the next calendar year.

(ii) In this *Example*, vouchers for X are readily available for direct distribution by the employer to employees because the expected cost of the vouchers disbursed to M's employees for the next calendar year is not more than 1 percent of the value of the vouchers (50 cents divided by \$55 equals 0.91

percent), the delivery charges are disregarded because they are reasonable and customary, and there are no other restrictions that cause the vouchers to not be readily available. Thus, any reimbursement of mass transportation costs in X would not be a qualified transportation fringe.

(c) *Substantiation requirements.* Employers that make cash reimbursements must establish a bona fide reimbursement arrangement to establish that their employees have, in fact, incurred expenses for transportation in a commuter highway vehicle, transit passes, or qualified parking. For purposes of section 132(f), whether cash reimbursements are made under a bona fide reimbursement arrangement may vary depending on the facts and circumstances, including the method or methods of payment utilized within the mass transit system. The employer must implement reasonable procedures to ensure that an amount equal to the reimbursement was incurred for transportation in a commuter highway vehicle, transit passes, or qualified parking. The expense must be substantiated within a reasonable period of time. An expense substantiated to the payor within 180 days after it has been paid will be treated as having been substantiated within a reasonable period of time. An employee certification at the time of reimbursement in either written or electronic form may be a reasonable reimbursement procedure depending on the facts and circumstances. Examples of reasonable reimbursement procedures are set forth in paragraph (d) of this Q/A-16.

(d) *Illustrations of reasonable reimbursement procedures.* The following are examples of reasonable reimbursement procedures for purposes of paragraph (c) of this Q/A-16. In each case, the reimbursement is made at or within a reasonable period after the end of the events described in paragraphs (d)(1) through (d)(3) of this section.

(1) An employee presents to the employer a parking expense receipt for parking on or near the employer's business premises, the employee certifies that the parking was used by the employee, and the employer has no reason to doubt the employee's certification.

(2) An employee either submits a used time-sensitive transit pass (such as a monthly pass) to the employer and

certifies that he or she purchased it or presents an unused or used transit pass to the employer and certifies that he or she purchased it and the employee certifies that he or she has not previously been reimbursed for the transit pass. In both cases, the employer has no reason to doubt the employee's certification.

(3) If a receipt is not provided in the ordinary course of business (e.g., if the employee uses metered parking or if used transit passes cannot be returned to the user), the employee certifies to the employer the type and the amount of expenses incurred, and the employer has no reason to doubt the employee's certification.

Q-17. May an employer provide non-taxable cash reimbursement under section 132(f) for periods longer than one month?

A-17. (a) *General rule.* Yes. Qualified transportation fringes include reimbursement to employees for costs incurred for transportation in more than one month, provided the reimbursement for each month in the period is calculated separately and does not exceed the applicable statutory monthly limit for any month in the period. See Q/A-8 and 9 of this section if the limit for a month is exceeded.

(b) *Example.* The following example illustrates the principles of this Q/A-17:

*Example.* (i) Employee R pays \$100 per month for qualified parking used during the period from April 1 through June 30 of a year in which the statutory monthly qualified parking limit is \$175. After receiving adequate substantiation from Employee R, R's employer reimburses R \$300 in cash on June 30 of that year.

(ii) In this *Example*, because the value of the reimbursed expenses for each month did not exceed the applicable statutory monthly limit, the \$300 reimbursement is excludable from R's wages for income and employment tax purposes as a qualified transportation fringe.

Q-18. What are the substantiation requirements if an employer distributes transit passes?

A-18. There are no substantiation requirements if the employer distributes transit passes. Thus, an employer may distribute a transit pass for each month with a value not more than the

statutory monthly limit without requiring any certification from the employee regarding the use of the transit pass.

Q-19. May an employer choose to impose substantiation requirements in addition to those described in this regulation?

A-19. Yes.

Q-20. How is the value of parking determined?

A-20. Section 1.61-21(b)(2) applies for purposes of determining the value of parking.

Q-21. How do the qualified transportation fringe rules apply to van pools?

A-21. (a) *Van pools generally.* Employer and employee-operated van pools, as well as private or public transit-operated van pools, may qualify as qualified transportation fringes. The value of van pool benefits which are qualified transportation fringes may be excluded up to the applicable statutory monthly limit for transportation in a commuter highway vehicle and transit passes, less the value of any transit passes provided by the employer for the month.

(b) *Employer-operated van pools.* The value of van pool transportation provided by or for an employer to its employees is excludable as a qualified transportation fringe, provided the van qualifies as a commuter highway vehicle as defined in section 132(f)(5)(B) and Q/A-2 of this section. A van pool is operated by or for the employer if the employer purchases or leases vans to enable employees to commute together or the employer contracts with and pays a third party to provide the vans and some or all of the costs of operating the vans, including maintenance, liability insurance and other operating expenses.

(c) *Employee-operated van pools.* Cash reimbursement by an employer to employees for expenses incurred for transportation in a van pool operated by employees independent of their employer are excludable as qualified transportation fringes, provided that the van qualifies as a commuter highway vehicle as defined in section 132(f)(5)(B) and Q/A-2 of this section. See Q/A-16 of this section for the rules governing cash reimbursements.

(d) *Private or public transit-operated van pool transit passes.* The qualified transportation fringe exclusion for transit passes is available for travel in van pools owned and operated either by public transit authorities or by any person in the business of transporting persons for compensation or hire. In accordance with paragraph (b) of Q/A-3 of this section, the van must seat at least 6 adults (excluding the driver). See Q/A-16(b) and (c) of this section for a special rule for cash reimbursement for transit passes and the substantiation requirements for cash reimbursement.

(e) *Value of van pool transportation benefits.* Section 1.61-21(b)(2) provides that the fair market value of a fringe benefit is based on all the facts and circumstances. Alternatively, transportation in an employer-provided commuter highway vehicle may be valued under the automobile lease valuation rule in §1.61-21(d), the vehicle cents-per-mile rule in §1.61-21(e), or the commuting valuation rule in §1.61-21(f). If one of these special valuation rules is used, the employer must use the same valuation rule to value the use of the commuter highway vehicle by each employee who share the use. See §1.61-21(c)(2)(i)(B).

(f) *Qualified parking prime member.* If an employee obtains a qualified parking space as a result of membership in a car or van pool, the applicable statutory monthly limit for qualified parking applies to the individual to whom the parking space is assigned. This individual is the prime member. In determining the tax consequences to the prime member, the statutory monthly limit amounts of each car pool member may not be combined. If the employer provides access to the space and the space is not assigned to a particular individual, then the employer must designate one of its employees as the prime member who will bear the tax consequences. The employer may not designate more than one prime member for a car or van pool during a month. The employer of the prime member is responsible for including the value of the qualified parking in excess of the statutory monthly limit in the prime member's wages for income and employment tax purposes.

Q-22. What are the reporting and employment tax requirements for qualified transportation fringes?

A-22. (a) *Employment tax treatment generally.* Qualified transportation fringes not exceeding the applicable statutory monthly limit described in Q/A-7 of this section are not wages for purposes of the Federal Insurance Contributions Act (FICA), the Federal Unemployment Tax Act (FUTA), and federal income tax withholding. Any amount by which an employee elects to reduce compensation as provided in Q/A-11 of this section is not subject to the FICA, the FUTA, and federal income tax withholding. Qualified transportation fringes exceeding the applicable statutory monthly limit described in Q/A-7 of this section are wages for purposes of the FICA, the FUTA, and federal income tax withholding and are reported on the employee's Form W-2, Wage and Tax Statement.

(b) *Employment tax treatment of cash reimbursement exceeding monthly limits.* Cash reimbursement to employees (for example, cash reimbursement for qualified parking) in excess of the applicable statutory monthly limit under section 132(f) is treated as paid for employment tax purposes when actually or constructively paid. See §§31.3121(a)-2(a), 31.3301-4, 31.3402(a)-1(b) of this chapter. Employers must report and deposit the amounts withheld in addition to reporting and depositing other employment taxes. See Q/A-16 of this section for rules governing cash reimbursements.

(c) *Noncash fringe benefits exceeding monthly limits.* If the value of noncash qualified transportation fringes exceeds the applicable statutory monthly limit, the employer may elect, for purposes of the FICA, the FUTA, and federal income tax withholding, to treat the noncash taxable fringe benefits as paid on a pay period, quarterly, semi-annual, annual, or other basis, provided that the benefits are treated as paid no less frequently than annually.

Q-23. How does section 132(f) interact with other fringe benefit rules?

A-23. For purposes of section 132, the terms working condition fringe and de minimis fringe do not include any qualified transportation fringe under

section 132(f). If, however, an employer provides local transportation other than transit passes (without any direct or indirect compensation reduction election), the value of the benefit may be excludable, either totally or partially, under fringe benefit rules other than the qualified transportation fringe rules under section 132(f). See §§1.132-6(d)(2)(i) (occasional local transportation fare), 1.132-6(d)(2)(iii) (transportation provided under unusual circumstances), and 1.61-21(k) (valuation of local transportation provided to qualified employees). See also Q/A-4(b) of this section.

Q-24. May qualified transportation fringes be provided to individuals who are partners, 2-percent shareholders of S-corporations, or independent contractors?

A-24. (a) *General rule.* Section 132(f)(5)(E) states that self-employed individuals who are employees within the meaning of section 401(c)(1) are not employees for purposes of section 132(f). Therefore, individuals who are partners, sole proprietors, or other independent contractors are not employees for purposes of section 132(f). In addition, under section 1372(a), 2-percent shareholders of S corporations are treated as partners for fringe benefit purposes. Thus, an individual who is both a 2-percent shareholder of an S corporation and a common law employee of that S corporation is not considered an employee for purposes of section 132(f). However, while section 132(f) does not apply to individuals who are partners, 2-percent shareholders of S corporations, or independent contractors, other exclusions for working condition and de minimis fringes may be available as described in paragraphs (b) and (c) of this Q/A-24. See §§1.132-1(b)(2) and 1.132-1(b)(4).

(b) *Transit passes.* The working condition and de minimis fringe exclusions under section 132(a)(3) and (4) are available for transit passes provided to individuals who are partners, 2-percent shareholders, and independent contractors. For example, tokens or farecards provided by a partnership to an individual who is a partner that enable the partner to commute on a public transit system (not including privately-operated van pools) are excludable from the

partner's gross income if the value of the tokens and farecards in any month does not exceed the dollar amount specified in § 1.132-6(d)(1). However, if the value of a pass provided in a month exceeds the dollar amount specified in § 1.132-6(d)(1), the full value of the benefit provided (not merely the amount in excess of the dollar amount specified in § 1.132-6(d)(1)) is includible in gross income.

(c) *Parking.* The working condition fringe rules under section 132(d) do not apply to commuter parking. See § 1.132-5(a)(1). However, the de minimis fringe rules under section 132(e) are available for parking provided to individuals who are partners, 2-percent shareholders, or independent contractors that qualifies under the de minimis rules. See § 1.132-6(a) and (b).

(d) *Example.* The following example illustrates the principles of this Q/A-24:

*Example.* (i) Individual G is a partner in partnership P. Individual G commutes to and from G's office every day and parks free of charge in P's lot.

(ii) In this *Example*, the value of the parking is not excluded under section 132(f), but may be excluded under section 132(e) if the parking is a de minimis fringe under § 1.132-6.

Q-25. What is the effective date of this section?

A-25. (a) Except as provided in paragraph (b) of this Q/A-25, this section is applicable for employee taxable years beginning after December 31, 2001. For this purpose, an employer may assume that the employee taxable year is the calendar year.

(b) The last sentence of paragraph (b)(5) of Q/A-16 of this section (relating to whether transit system vouchers for transit passes are readily available) is applicable for employee taxable years beginning after December 31, 2003. For this purpose, an employer may assume that the employee taxable year is the calendar year.

[T.D. 8933, 66 FR 2244, Jan. 11, 2001; 66 FR 18190, Apr. 6, 2001]

**§ 1.133-1T Questions and answers relating to interest on certain loans used to acquire employer securities (temporary).**

Q-1: What does section 133 provide?

A-1: In general, section 133 provides that certain commercial lenders may exclude from gross income fifty percent of the interest received with respect to securities acquisition loans. A securities acquisition loan is any loan to an employee stock ownership plan (ESOP) (as defined in section 4975(e)(7)) that qualifies as an exempt loan under §§ 54.4975-7 and -11 to the extent that the proceeds are used to acquire employer securities (within the meaning of section 409(1)) for the ESOP. A loan made to a corporation sponsoring an ESOP (or to a person related to such corporation under section 133(b)(2)) may also qualify as a securities acquisition loan to the extent and for the period that the proceeds are (a) loaned to the corporation's ESOP under a loan that qualifies as an exempt loan under §§ 54.4975-7 and -11 and that has substantially similar terms as the loan from the commercial lender to the sponsoring corporation, and (b) used to acquire employer securities for the ESOP. The terms of the loan between the commercial lender and the sponsoring corporation (or a related corporation) and the loan between such corporation and the ESOP shall be treated as substantially similar only if the timing and rate at which employer securities would be released from encumbrance if the loan from the commercial lender were the exempt loan under the applicable rule of § 54.4975-7(b)(8) are substantially similar to the timing and rate at which employer securities will actually be released from encumbrance in accordance with such rule. For this purpose, if the loan from the commercial lender to the sponsoring corporation states a variable rate of interest and the loan between the corporation and the ESOP states a fixed rate of interest, whether the terms of the loans are substantially similar shall be determined at the time the obligations are initially issued by taking into account the adjustment interval on the variable rate loan and the maturity of the fixed rate loan. For example, if the rate on the loan from the commercial lender to the sponsoring corporation adjusts each six months and the loan from the corporation to the ESOP has a ten year term, the initial interest rate on the variable rate

loan could be compared to the rate on the fixed rate loan by comparing the yields on 6 month and ten year Treasury obligations. Similarly, if the rates on the two loans are based on different compounding assumptions, whether the terms of the loans are substantially similar shall be determined by taking into account the different compounding assumptions. A securities acquisition loan may be evidenced by any note, bond, debenture, or certificate. Also, section 133(b)(2) provides that certain loans between related persons are not securities acquisition loans. In addition, a loan from a commercial lender to an ESOP or sponsoring corporation to purchase employer securities will not be treated as a securities acquisition loan to the extent that such loan is used, either directly or indirectly, to purchase employer securities from any other qualified plan, including any other ESOP, maintained by the employer or any other corporation which is a member of the same controlled group (as defined in section 409(l)(4)).

**Q-2:** What lenders are eligible to receive the fifty percent interest exclusion?

**A-2:** Under section 133(a), a bank (within the meaning of section 581), an insurance company to which subchapter L applies, or a corporation (other than a subchapter S corporation) actively engaged in the business of lending money may exclude from gross income fifty percent of the interest received with respect to a securities acquisition loan (as defined in Q&A-1 of § 1.133-1T). For purposes of section 133(a)(3), a corporation is actively engaged in the business of lending money if it lends money to the public on a regular and continuing basis (other than in connection with the purchase by the public of goods and services from the lender or a related party). A corporation is not actively engaged in the business of lending money if a predominant share of the original value of the loans it makes to unrelated parties (other than in connection with the purchase by the public of goods and services from the lender or a related party) are securities acquisition loans.

**Q-3:** May loans which qualify for the fifty percent interest exclusion under

section 133 be syndicated to other lending institutions?

**A-3:** Securities acquisition loans under section 133 may be syndicated to other lending institutions provided that such lending institutions are described in section 133(a) (1), (2) or (3) and the loan was originated by a qualified holder. Subsequent holders of the debt instrument may qualify for the partial interest exclusion of section 133 if such holders satisfy the requirements of section 133 and such loan does not fail to be a securities acquisition loan under section 133(b)(2).

**Q-4:** When is section 133 effective?

**A-4:** Section 133 applies to securities acquisition loans made after July 18, 1984, and used to acquire employer securities after July 18, 1984. The provision does not apply to loans made after July 18, 1984, to the extent that such loans are renegotiations, directly or indirectly, of loans outstanding on such date. A loan extended to an ESOP or sponsoring corporation after July 18, 1984, will be treated as a renegotiation of an outstanding loan if the loan proceeds are used to refinance acquisitions of employer securities made prior to July 19, 1984. For example, if an ESOP borrowed money prior to July 19, 1984, to purchase employer securities and after July 18, 1984, borrows other funds from the same or a different commercial lender to repay the first loan, the second loan will be treated as a renegotiation of an outstanding loan to the extent of the repaid amount. Similarly, if, after July 18, 1984, an ESOP sells employer securities, uses the proceeds to retire a pre-July 19, 1984, loan and obtains a second loan to acquire replacement employer securities, the second loan will be treated as a renegotiation of an outstanding loan.

### TAX EXEMPTION REQUIREMENTS FOR STATE AND LOCAL BONDS

#### § 1.141-1 **Definitions and rules of general application.**

(a) *In general.* For purposes of §§ 1.141-0 through 1.141-16, the following definitions and rules apply: the definitions in this section, the definitions in § 1.150-1,

the definition of placed in service under § 1.150-2(c), the definition of grant under § 1.148-6(d)(4)(iii), the definition of reasonably required reserve or replacement fund in § 1.148-2(f), and the following definitions under § 1.148-1: bond year, commingled fund, fixed yield issue, higher yielding investments, investment, investment proceeds, issue price, issuer, nonpurpose investment, purpose investment, qualified guarantee, qualified hedge, reasonable expectations or reasonableness, rebate amount, replacement proceeds, sale proceeds, variable yield issue, and yield.

#### (b) *Certain general definitions.*

*Common areas* means portions of a facility that are equally available to all users of a facility on the same basis for uses that are incidental to the primary use of the facility. For example, hallways and elevators generally are treated as common areas if they are used by the different lessees of a facility in connection with the primary use of that facility.

*Consistently applied* means applied uniformly to account for proceeds and other amounts.

*Deliberate action* is defined in § 1.141-2(d)(3).

*Discrete portion* means a portion of a facility that consists of any separate and discrete portion of a facility to which use is limited, other than common areas. A floor of a building and a portion of a building separated by walls, partitions, or other physical barriers are examples of a discrete portion.

*Disposition* is defined in § 1.141-12(c)(1).

*Disposition proceeds* is defined in § 1.141-12(c)(1).

*Essential governmental function* is defined in § 1.141-5(d)(4)(ii).

*Financed* means constructed, reconstructed, or acquired with proceeds of an issue.

*Governmental bond* has the same meaning as in § 1.150-1(b), except that, for purposes of § 1.141-13, governmental bond is defined in § 1.141-13(b)(2)(iv).

*Governmental person* means a state or local governmental unit as defined in § 1.103-1 or any instrumentality thereof. It does not include the United

## § 1.141-2

## 26 CFR Ch. I (4-1-06 Edition)

States or any agency or instrumentality thereof.

*Hazardous waste remediation bonds* is defined in § 1.141-4(f)(1).

*Measurement period* is defined in § 1.141-3(g)(2).

*Nongovernmental person* means a person other than a governmental person.

*Output facility* means electric and gas generation, transmission, distribution, and related facilities, and water collection, storage, and distribution facilities.

*Private business tests* means the private business use test and the private security or payment test of section 141(b).

*Proceeds* means the sale proceeds of an issue (other than those sale proceeds used to retire bonds of the issue that are not deposited in a reasonably required reserve or replacement fund). Proceeds also include any investment proceeds from investments that accrue during the project period (net of rebate amounts attributable to the project period). Disposition proceeds of an issue are treated as proceeds to the extent provided in § 1.141-12. The Commissioner may treat any replaced amounts as proceeds.

*Project period* means the period beginning on the issue date and ending on the date that the project is placed in service. In the case of a multipurpose issue, the issuer may elect to treat the project period for the entire issue as ending on either the expiration of the temporary period described in § 1.148-2(e)(2) or the end of the fifth bond year after the issue date.

*Public utility property* means public utility property as defined in section 168(i)(10).

*Qualified bond* means a qualified bond as defined in section 141(e).

*Renewal option* means a provision under which either party has a legally enforceable right to renew the contract. Thus, for example, a provision under which a contract is automatically renewed for 1-year periods absent cancellation by either party is not a renewal option (even if it is expected to be renewed).

*Replaced amounts* means replacement proceeds other than amounts that are treated as replacement proceeds solely

because they are sinking funds or pledged funds.

*Weighted average maturity* is determined under section 147(b).

*Weighted average reasonably expected economic life* is determined under section 147(b). The reasonably expected economic life of property may be determined by reference to the class life of the property under section 168.

(c) *Elections*. Elections must be made in writing on or before the issue date and retained as part of the bond documents, and, once made, may not be revoked without the permission of the Commissioner.

(d) *Related parties*. Except as otherwise provided, all related parties are treated as one person and any reference to "person" includes any related party.

[T.D. 8712, 62 FR 2284, Jan. 16, 1997, as amended by T.D. 9234, 70 FR 75032, Dec. 19, 2005]

### § 1.141-2 Private activity bond tests.

(a) *Overview*. Interest on a private activity bond is not excludable from gross income under section 103(a) unless the bond is a qualified bond. The purpose of the private activity bond tests of section 141 is to limit the volume of tax-exempt bonds that finance the activities of nongovernmental persons, without regard to whether a financing actually transfers benefits of tax-exempt financing to a nongovernmental person. The private activity bond tests serve to identify arrangements that have the potential to transfer the benefits of tax-exempt financing, as well as arrangements that actually transfer these benefits. The regulations under section 141 may not be applied in a manner that is inconsistent with these purposes.

(b) *Scope*. Sections 1.141-0 through 1.141-16 apply generally for purposes of the private activity bond limitations under section 141.

(c) *General definition of private activity bond*. Under section 141, bonds are private activity bonds if they meet either the private business use test and private security or payment test of section 141(b) or the private loan financing test of section 141(c). The private business use and private security or payment tests are described in §§ 1.141-3 and 1.141-4. The private loan financing test is described in § 1.141-5.

(d) *Reasonable expectations and deliberate actions*—(1) *In general.* An issue is an issue of private activity bonds if the issuer reasonably expects, as of the issue date, that the issue will meet either the private business tests or the private loan financing test. An issue is also an issue of private activity bonds if the issuer takes a deliberate action, subsequent to the issue date, that causes the conditions of either the private business tests or the private loan financing test to be met.

(2) *Reasonable expectations test*—(i) *In general.* In general, the reasonable expectations test must take into account reasonable expectations about events and actions over the entire stated term of an issue.

(ii) *Special rule for issues with mandatory redemption provisions.* An action that is reasonably expected, as of the issue date, to occur after the issue date and to cause either the private business tests or the private loan financing test to be met may be disregarded for purposes of those tests if—

(A) The issuer reasonably expects, as of the issue date, that the financed property will be used for a governmental purpose for a substantial period before the action;

(B) The issuer is required to redeem all nonqualifying bonds (regardless of the amount of disposition proceeds actually received) within 6 months of the date of the action;

(C) The issuer does not enter into any arrangement with a nongovernmental person, as of the issue date, with respect to that specific action; and

(D) The mandatory redemption of bonds meets all of the conditions for remedial action under § 1.141-12(a).

(3) *Deliberate action defined*—(i) *In general.* Except as otherwise provided in this paragraph (d)(3), a deliberate action is any action taken by the issuer that is within its control. An intent to violate the requirements of section 141 is not necessary for an action to be deliberate.

(ii) *Safe harbor exceptions.* An action is not treated as a deliberate action if—

(A) It would be treated as an involuntary or compulsory conversion under section 1033; or

(B) It is taken in response to a regulatory directive made by the federal government. See § 1.141-7(g)(4).

(4) *Special rule for dispositions of personal property in the ordinary course of an established governmental program*—(i) *In general.* Dispositions of personal property in the ordinary course of an established governmental program are not treated as deliberate actions if—

(A) The weighted average maturity of the bonds financing that personal property is not greater than 120 percent of the reasonably expected actual use of that property for governmental purposes;

(B) The issuer reasonably expects on the issue date that the fair market value of that property on the date of disposition will be not greater than 25 percent of its cost; and

(C) The property is no longer suitable for its governmental purposes on the date of disposition.

(ii) *Reasonable expectations test.* The reasonable expectation that a disposition described in paragraph (d)(4)(i) of this section may occur in the ordinary course while the bonds are outstanding will not cause the issue to meet the private activity bond tests if the issuer is required to deposit amounts received from the disposition in a commingled fund with substantial tax or other governmental revenues and the issuer reasonably expects to spend the amounts on governmental programs within 6 months from the date of commingling.

(iii) *Separate issue treatment.* An issuer may treat the bonds properly allocable to the personal property eligible for this exception as a separate issue under § 1.150-1(c)(3).

(5) *Special rule for general obligation bond programs that finance a large number of separate purposes.* The determination of whether bonds of an issue are private activity bonds may be based solely on the issuer's reasonable expectations as of the issue date if all of the requirements of paragraphs (d)(5)(i) through (vii) of this section are met.

(i) The issue is an issue of general obligation bonds of a general purpose governmental unit that finances at least 25 separate purposes (as defined in § 1.150-1(c)(3)) and does not predominantly finance fewer than 4 separate purposes.

(ii) The issuer has adopted a fund method of accounting for its general governmental purposes that makes tracing the bond proceeds to specific expenditures unreasonably burdensome.

(iii) The issuer reasonably expects on the issue date to allocate all of the net proceeds of the issue to capital expenditures within 6 months of the issue date and adopts reasonable procedures to verify that net proceeds are in fact so expended. A program to randomly spot check that 10 percent of the net proceeds were so expended generally is a reasonable verification procedure for this purpose.

(iv) The issuer reasonably expects on the issue date to expend all of the net proceeds of the issue before expending proceeds of a subsequent issue of similar general obligation bonds.

(v) The issuer reasonably expects on the issue date that it will not make any loans to nongovernmental persons with the proceeds of the issue.

(vi) The issuer reasonably expects on the issue date that the capital expenditures that it could make during the 6-month period beginning on the issue date with the net proceeds of the issue that would not meet the private business tests are not less than 125 percent of the capital expenditures to be financed with the net proceeds of the issue.

(vii) The issuer reasonably expects on the issue date that the weighted average maturity of the issue is not greater than 120 percent of the weighted average reasonably expected economic life of the capital expenditures financed with the issue. To determine reasonably expected economic life for this purpose an issuer may use reasonable estimates based on the type of expenditures made from a fund.

(e) *When a deliberate action occurs.* A deliberate action occurs on the date the issuer enters into a binding contract with a nongovernmental person for use of the financed property that is not subject to any material contingencies.

(f) *Certain remedial actions.* See § 1.141-12 for certain remedial actions that prevent a deliberate action with respect to property financed by an issue from causing that issue to meet the

private business use test or the private loan financing test.

(g) *Examples.* The following examples illustrate the application of this section:

*Example 1. Involuntary action.* City B issues bonds to finance the purchase of land. On the issue date, B reasonably expects that it will be the sole user of the land for the entire term of the bonds. Subsequently, the federal government acquires the land in a condemnation action. B sets aside the condemnation proceeds to pay debt service on the bonds but does not redeem them on their first call date. The bonds are not private activity bonds because B has not taken a deliberate action after the issue date. See, however, § 1.141-14(b), *Example 2*.

*Example 2. Reasonable expectations test—involuntary action.* The facts are the same as in *Example 1*, except that, on the issue date, B reasonably expects that the federal government will acquire the land in a condemnation action during the term of the bonds. On the issue date, the present value of the amount that B reasonably expects to receive from the federal government is greater than 10 percent of the present value of the debt service on the bonds. The terms of the bonds do not require that the bonds be redeemed within 6 months of the acquisition by the federal government. The bonds are private activity bonds because the issuer expects as of the issue date that the private business tests will be met.

*Example 3. Reasonable expectations test—mandatory redemption.* City C issues bonds to rehabilitate an existing hospital that it currently owns. On the issue date of the bonds, C reasonably expects that the hospital will be used for a governmental purpose for a substantial period. On the issue date, C also plans to construct a new hospital, but the placed in service date of that new hospital is uncertain. C reasonably expects that, when the new hospital is placed in service, it will sell or lease the rehabilitated hospital to a private hospital corporation. The bond documents require that the bonds must be redeemed within 6 months of the sale or lease of the rehabilitated hospital (regardless of the amount actually received from the sale). The bonds meet the reasonable expectations requirement of the private activity bond tests if the mandatory redemption of bonds meets all of the conditions for a remedial action under § 1.141-12(a).

*Example 4. Dispositions in the ordinary course of an established governmental program.* City D issues bonds with a weighted average maturity of 6 years for the acquisition of police cars. D reasonably expects on the issue date that the police cars will be used solely by its police department, except that, in the ordinary course of its police operations, D sells its police cars to a taxicab corporation after

5 years of use because they are no longer suitable for police use. Further, D reasonably expects that the value of the police cars when they are no longer suitable for police use will be no more than 25 percent of cost. D subsequently sells 20 percent of the police cars after only 3 years of actual use. At that time, D deposits the proceeds from the sale of the police cars in a commingled fund with substantial tax revenues and reasonably expects to spend the proceeds on governmental programs within 6 months of the date of deposit. D does not trace the actual use of these commingled amounts. The sale of the police cars does not cause the private activity bond tests to be met because the requirements of paragraph (d)(4) of this section are met.

[T.D. 8712, 62 FR 2284, Jan. 16, 1997, as amended by T.D. 8757, 63 FR 3260, Jan. 22, 1998; T.D. 9016, 67 FR 59759, Sept. 23, 2002]

**§ 1.141-3 Definition of private business use.**

(a) *General rule*—(1) *In general.* The private business use test relates to the use of the proceeds of an issue. The 10 percent private business use test of section 141(b)(1) is met if more than 10 percent of the proceeds of an issue is used in a trade or business of a nongovernmental person. For this purpose, the use of financed property is treated as the direct use of proceeds. Any activity carried on by a person other than a natural person is treated as a trade or business. Unless the context or a provision clearly requires otherwise, this section also applies to the private business use test under sections 141(b)(3) (unrelated or disproportionate use), 141(b)(4) (\$15 million limitation for certain output facilities), and 141(b)(5) (the coordination with the volume cap where the nonqualified amount exceeds \$15 million).

(2) *Indirect use.* In determining whether an issue meets the private business use test, it is necessary to look to both the indirect and direct uses of proceeds. For example, a facility is treated as being used for a private business use if it is leased to a nongovernmental person and subleased to a governmental person or if it is leased to a governmental person and then subleased to a nongovernmental person, provided that in each case the nongovernmental person's use is in a trade or business. Similarly, the issuer's use of the proceeds to engage

in a series of financing transactions for property to be used by nongovernmental persons in their trades or businesses may cause the private business use test to be met. In addition, proceeds are treated as used in the trade or business of a nongovernmental person if a nongovernmental person, as a result of a single transaction or a series of related transactions, uses property acquired with the proceeds of an issue.

(3) *Aggregation of private business use.* The use of proceeds by all nongovernmental persons is aggregated to determine whether the private business use test is met.

(b) *Types of private business use arrangements*—(1) *In general.* Both actual and beneficial use by a nongovernmental person may be treated as private business use. In most cases, the private business use test is met only if a nongovernmental person has special legal entitlements to use the financed property under an arrangement with the issuer. In general, a nongovernmental person is treated as a private business user of proceeds and financed property as a result of ownership; actual or beneficial use of property pursuant to a lease, or a management or incentive payment contract; or certain other arrangements such as a take or pay or other output-type contract.

(2) *Ownership.* Except as provided in paragraph (d)(1) or (d)(2) of this section, ownership by a nongovernmental person of financed property is private business use of that property. For this purpose, ownership refers to ownership for federal income tax purposes.

(3) *Leases.* Except as provided in paragraph (d) of this section, the lease of financed property to a nongovernmental person is private business use of that property. For this purpose, any arrangement that is properly characterized as a lease for federal income tax purposes is treated as a lease. In determining whether a management contract is properly characterized as a lease, it is necessary to consider all of the facts and circumstances, including the following factors—

(i) The degree of control over the property that is exercised by a nongovernmental person; and

(ii) Whether a nongovernmental person bears risk of loss of the financed property.

(4) *Management contracts*—(i) *Facts and circumstances test*. Except as provided in paragraph (d) of this section, a management contract (within the meaning of paragraph (b)(4)(ii) of this section) with respect to financed property may result in private business use of that property, based on all of the facts and circumstances. A management contract with respect to financed property generally results in private business use of that property if the contract provides for compensation for services rendered with compensation based, in whole or in part, on a share of net profits from the operation of the facility.

(ii) *Management contract defined*. For purposes of this section, a management contract is a management, service, or incentive payment contract between a governmental person and a service provider under which the service provider provides services involving all, a portion of, or any function of, a facility. For example, a contract for the provision of management services for an entire hospital, a contract for management services for a specific department of a hospital, and an incentive payment contract for physician services to patients of a hospital are each treated as a management contract.

(iii) *Arrangements generally not treated as management contracts*. The arrangements described in paragraphs (b)(4)(iii)(A) through (D) of this section generally are not treated as management contracts that give rise to private business use.

(A) Contracts for services that are solely incidental to the primary governmental function or functions of a financed facility (for example, contracts for janitorial, office equipment repair, hospital billing, or similar services).

(B) The mere granting of admitting privileges by a hospital to a doctor, even if those privileges are conditioned on the provision of de minimis services, if those privileges are available to all qualified physicians in the area, consistent with the size and nature of its facilities.

(C) A contract to provide for the operation of a facility or system of facilities

that consists predominantly of public utility property, if the only compensation is the reimbursement of actual and direct expenses of the service provider and reasonable administrative overhead expenses of the service provider.

(D) A contract to provide for services, if the only compensation is the reimbursement of the service provider for actual and direct expenses paid by the service provider to unrelated parties.

(iv) *Management contracts that are properly treated as other types of private business use*. A management contract with respect to financed property results in private business use of that property if the service provider is treated as the lessee or owner of financed property for federal income tax purposes, unless an exception under paragraph (d) of this section applies to the arrangement.

(5) *Output contracts*. See § 1.141-7 for special rules for contracts for the purchase of output of output facilities.

(6) *Research agreements*—(i) *Facts and circumstances test*. Except as provided in paragraph (d) of this section, an agreement by a nongovernmental person to sponsor research performed by a governmental person may result in private business use of the property used for the research, based on all of the facts and circumstances.

(ii) *Research agreements that are properly treated as other types of private business use*. A research agreement with respect to financed property results in private business use of that property if the sponsor is treated as the lessee or owner of financed property for federal income tax purposes, unless an exception under paragraph (d) of this section applies to the arrangement.

(7) *Other actual or beneficial use*—(i) *In general*. Any other arrangement that conveys special legal entitlements for beneficial use of bond proceeds or of financed property that are comparable to special legal entitlements described in paragraphs (b)(2), (3), (4), (5), or (6) of this section results in private business use. For example, an arrangement that conveys priority rights to the use or capacity of a facility generally results in private business use.

(ii) *Special rule for facilities not used by the general public.* In the case of financed property that is not available for use by the general public (within the meaning of paragraph (c) of this section), private business use may be established solely on the basis of a special economic benefit to one or more nongovernmental persons, even if those nongovernmental persons have no special legal entitlements to use of the property. In determining whether special economic benefit gives rise to private business use it is necessary to consider all of the facts and circumstances, including one or more of the following factors—

(A) Whether the financed property is functionally related or physically proximate to property used in the trade or business of a nongovernmental person;

(B) Whether only a small number of nongovernmental persons receive the special economic benefit; and

(C) Whether the cost of the financed property is treated as depreciable by any nongovernmental person.

(c) *Exception for general public use—(1) In general.* Use as a member of the general public (general public use) is not private business use. Use of financed property by nongovernmental persons in their trades or businesses is treated as general public use only if the property is intended to be available and in fact is reasonably available for use on the same basis by natural persons not engaged in a trade or business.

(2) *Use on the same basis.* In general, use under an arrangement that conveys priority rights or other preferential benefits is not use on the same basis as the general public. Arrangements providing for use that is available to the general public at no charge or on the basis of rates that are generally applicable and uniformly applied do not convey priority rights or other preferential benefits. For this purpose, rates may be treated as generally applicable and uniformly applied even if—

(i) Different rates apply to different classes of users, such as volume purchasers, if the differences in rates are customary and reasonable; or

(ii) A specially negotiated rate arrangement is entered into, but only if the user is prohibited by federal law

from paying the generally applicable rates, and the rates established are as comparable as reasonably possible to the generally applicable rates.

(3) *Long-term arrangements not treated as general public use.* An arrangement is not treated as general public use if the term of the use under the arrangement, including all renewal options, is greater than 200 days. For this purpose, a right of first refusal to renew use under the arrangement is not treated as a renewal option if—

(i) The compensation for the use under the arrangement is redetermined at generally applicable, fair market value rates that are in effect at the time of renewal; and

(ii) The use of the financed property under the same or similar arrangements is predominantly by natural persons who are not engaged in a trade or business.

(4) *Relation to other use.* Use of financed property by the general public does not prevent the proceeds from being used for a private business use because of other use under this section.

(d) *Other exceptions—(1) Agents.* Use of proceeds by nongovernmental persons solely in their capacity as agents of a governmental person is not private business use. For example, use by a nongovernmental person that issues obligations on behalf of a governmental person is not private business use to the extent the nongovernmental person's use of proceeds is in its capacity as an agent of the governmental person.

(2) *Use incidental to financing arrangements.* Use by a nongovernmental person that is solely incidental to a financing arrangement is not private business use. A use is solely incidental to a financing arrangement only if the nongovernmental person has no substantial rights to use bond proceeds or financed property other than as an agent of the bondholders. For example, a nongovernmental person that acts solely as an owner of title in a sale and leaseback financing transaction with a city generally is not a private business user of the property leased to the city, provided that the nongovernmental person has assigned all of its rights to use the leased facility to the trustee for the bondholders upon default by the

city. Similarly, bond trustees, servicers, and guarantors are generally not treated as private business users.

(3) *Exceptions for arrangements other than arrangements resulting in ownership of financed property by a nongovernmental person*—(i) *Arrangements not available for use on the same basis by natural persons not engaged in a trade or business.* Use by a nongovernmental person pursuant to an arrangement, other than an arrangement resulting in ownership of financed property by a nongovernmental person, is not private business use if—

(A) The term of the use under the arrangement, including all renewal options, is not longer than 100 days;

(B) The arrangement would be treated as general public use, except that it is not available for use on the same basis by natural persons not engaged in a trade or business because generally applicable and uniformly applied rates are not reasonably available to natural persons not engaged in a trade or business; and

(C) The property is not financed for a principal purpose of providing that property for use by that nongovernmental person.

(ii) *Negotiated arm's-length arrangements.* Use by a nongovernmental person pursuant to an arrangement, other than an arrangement resulting in ownership of financed property by a nongovernmental person, is not private business use if—

(A) The term of the use under the arrangement, including all renewal options, is not longer than 50 days;

(B) The arrangement is a negotiated arm's-length arrangement, and compensation under the arrangement is at fair market value; and

(C) The property is not financed for a principal purpose of providing that property for use by that nongovernmental person.

(4) *Temporary use by developers.* Use during an initial development period by a developer of an improvement that carries out an essential governmental function is not private business use if the issuer and the developer reasonably expect on the issue date to proceed with all reasonable speed to develop the improvement and property benefited by that improvement and to

transfer the improvement to a governmental person, and if the improvement is in fact transferred to a governmental person promptly after the property benefited by the improvement is developed.

(5) *Incidental use*—(i) *General rule.* Incidental uses of a financed facility are disregarded, to the extent that those uses do not exceed 2.5 percent of the proceeds of the issue used to finance the facility. A use of a facility by a nongovernmental person is incidental if—

(A) Except for vending machines, pay telephones, kiosks, and similar uses, the use does not involve the transfer to the nongovernmental person of possession and control of space that is separated from other areas of the facility by walls, partitions, or other physical barriers, such as a night gate affixed to a structural component of a building (a nonpossessory use);

(B) The nonpossessory use is not functionally related to any other use of the facility by the same person (other than a different nonpossessory use); and

(C) All nonpossessory uses of the facility do not, in the aggregate, involve the use of more than 2.5 percent of the facility.

(ii) *Illustrations.* Incidental uses may include pay telephones, vending machines, advertising displays, and use for television cameras, but incidental uses may not include output purchases.

(6) *Qualified improvements.* Proceeds that provide a governmentally owned improvement to a governmentally owned building (including its structural components and land functionally related and subordinate to the building) are not used for a private business use if—

(i) The building was placed in service more than 1 year before the construction or acquisition of the improvement is begun;

(ii) The improvement is not an enlargement of the building or an improvement of interior space occupied exclusively for any private business use;

(iii) No portion of the improved building or any payments in respect of the improved building are taken into

account under section 141(b)(2)(A) (the private security test); and

(iv) No more than 15 percent of the improved building is used for a private business use.

(e) *Special rule for tax assessment bonds.* In the case of a tax assessment bond that satisfies the requirements of §1.141-5(d), the loan (or deemed loan) of the proceeds to the borrower paying the assessment is disregarded in determining whether the private business use test is met. However, the use of the loan proceeds is not disregarded in determining whether the private business use test is met.

(f) *Examples.* The following examples illustrate the application of paragraphs (a) through (e) of this section. In each example, assume that the arrangements described are the only arrangements with nongovernmental persons for use of the financed property.

*Example 1. Nongovernmental ownership.* State A issues 20-year bonds to purchase land and equip and construct a factory. A then enters into an arrangement with Corporation X to sell the factory to X on an installment basis while the bonds are outstanding. The issue meets the private business use test because a nongovernmental person owns the financed facility. See also §1.141-2 (relating to the private activity bond tests), and §1.141-5 (relating to the private loan financing test).

*Example 2. Lease to a nongovernmental person.* (i) The facts are the same as in *Example 1*, except that A enters into an arrangement with X to lease the factory to X for 3 years rather than to sell it to X. The lease payments will be made annually and will be based on the tax-exempt interest rate on the bonds. The issue meets the private business use test because a nongovernmental person leases the financed facility. See also §1.141-14 (relating to anti-abuse rules).

(ii) The facts are the same as in *Example 2(i)*, except that the annual payments made by X will equal fair rental value of the facility and exceed the amount necessary to pay debt service on the bonds for the 3 years of the lease. The issue meets the private business use test because a nongovernmental person leases the financed facility and the test does not require that the benefits of tax-exempt financing be passed through to the nongovernmental person.

*Example 3. Management contract in substance a lease.* City L issues 30-year bonds to finance the construction of a city hospital. L enters into a 15-year contract with M, a nongovernmental person that operates a health maintenance organization relating to the treat-

ment of M's members at L's hospital. The contract provides for reasonable fixed compensation to M for services rendered with no compensation based, in whole or in part, on a share of net profits from the operation of the hospital. However, the contract also provides that 30 percent of the capacity of the hospital will be exclusively available to M's members and M will bear the risk of loss of that portion of the capacity of the hospital so that, under all of the facts and circumstances, the contract is properly characterized as a lease for federal income tax purposes. The issue meets the private business use test because a nongovernmental person leases the financed facility.

*Example 4. Ownership of title in substance a leasehold interest.* Nonprofit Corporation R issues bonds on behalf of City P to finance the construction of a hospital. R will own legal title to the hospital. In addition, R will operate the hospital, but R is not treated as an agent of P in its capacity as operator of the hospital. P has certain rights to the hospital that establish that it is properly treated as the owner of the property for federal income tax purposes. P does not have rights, however, to directly control operation of the hospital while R owns legal title to it and operates it. The issue meets the private business use test because the arrangement provides a nongovernmental person an interest in the financed facility that is comparable to a leasehold interest. See paragraphs (a)(2) and (b)(7)(i) of this section.

*Example 5. Rights to control use of property treated as private business use—parking lot.* Corporation C and City D enter into a plan to finance the construction of a parking lot adjacent to C's factory. Pursuant to the plan, C conveys the site for the parking lot to D for a nominal amount, subject to a covenant running with the land that the property be used only for a parking lot. In addition, D agrees that C will have the right to approve rates charged by D for use of the parking lot. D issues bonds to finance construction of the parking lot on the site. The parking lot will be available for use by the general public on the basis of rates that are generally applicable and uniformly applied. The issue meets the private business use test because a nongovernmental person has special legal entitlements for beneficial use of the financed facility that are comparable to an ownership interest. See paragraph (b)(7)(i) of this section.

*Example 6. Other actual or beneficial use—hydroelectric enhancements.* J, a political subdivision, owns and operates a hydroelectric generation plant and related facilities. Pursuant to a take or pay contract, J sells 15 percent of the output of the plant to Corporation K, an investor-owned utility. K is treated as a private business user of the plant. Under the license issued to J for operation of the plant, J is required by federal

regulations to construct and operate various facilities for the preservation of fish and for public recreation. J issues its obligations to finance the fish preservation and public recreation facilities. K has no special legal entitlements for beneficial use of the financed facilities. The fish preservation facilities are functionally related to the operation of the plant. The recreation facilities are available to natural persons on a short-term basis according to generally applicable and uniformly applied rates. Under paragraph (c) of this section, the recreation facilities are treated as used by the general public. Under paragraph (b)(7) of this section, K's use is not treated as private business use of the recreation facilities because K has no special legal entitlements for beneficial use of the recreation facilities. The fish preservation facilities are not of a type reasonably available for use on the same basis by natural persons not engaged in a trade or business. Under all of the facts and circumstances (including the functional relationship of the fish preservation facilities to property used in K's trade or business) under paragraph (b)(7)(ii) of this section, K derives a special economic benefit from the fish preservation facilities. Therefore, K's private business use may be established solely on the basis of that special economic benefit, and K's use of the fish preservation facilities is treated as private business use.

*Example 7. Other actual or beneficial use—pollution control facilities.* City B issues obligations to finance construction of a specialized pollution control facility on land that it owns adjacent to a factory owned by Corporation N. B will own and operate the pollution control facility, and N will have no special legal entitlements to use the facility. B, however, reasonably expects that N will be the only user of the facility. The facility will not be reasonably available for use on the same basis by natural persons not engaged in a trade or business. Under paragraph (b)(7)(ii) of this section, because under all of the facts and circumstances the facility is functionally related and is physically proximate to property used in N's trade or business, N derives a special economic benefit from the facility. Therefore, N's private business use may be established solely on the basis of that special economic benefit, and N's use is treated as private business use of the facility. See paragraph (b)(7)(ii) of this section.

*Example 8. General public use—airport runway.* (i) City I issues bonds and uses all of the proceeds to finance construction of a runway at a new city-owned airport. The runway will be available for take-off and landing by any operator of an aircraft desiring to use the airport, including general aviation operators who are natural persons not engaged in a trade or business. It is reasonably expected that most of the actual use

of the runway will be by private air carriers (both charter airlines and commercial airlines) in connection with their use of the airport terminals leased by those carriers. These leases for the use of terminal space provide no priority rights or other preferential benefits to the air carriers for use of the runway. Moreover, under the leases the lease payments are determined without taking into account the revenues generated by runway landing fees (that is, the lease payments are not determined on a "residual" basis). Although the lessee air carriers receive a special economic benefit from the use of the runway, this economic benefit is not sufficient to cause the air carriers to be private business users, because the runway is available for general public use. The issue does not meet the private business use test. See paragraphs (b)(7)(i) and (c) of this section.

(ii) The facts are the same as in *Example 8(i)*, except that the runway will be available for use only by private air carriers. The use by these private air carriers is not for general public use, because the runway is not reasonably available for use on the same basis by natural persons not engaged in a trade or business. Depending on all of the facts and circumstances, including whether there are only a small number of lessee private air carriers, the issue may meet the private business use test solely because the private air carriers receive a special economic benefit from the runway. See paragraph (b)(7)(ii) of this section.

(iii) The facts are the same as in *Example 8(i)*, except that the lease payments under the leases with the private air carriers are determined on a residual basis by taking into account the net revenues generated by runway landing fees. These leases cause the private business use test to be met with respect to the runway because they are arrangements that convey special legal entitlements to the financed facility to non-governmental persons. See paragraph (b)(7)(i) of this section.

*Example 9. General public use—airport parking garage.* City S issues bonds and uses all of the proceeds to finance construction of a city-owned parking garage at the city-owned airport. S reasonably expects that more than 10 percent of the actual use of the parking garage will be by employees of private air carriers (both charter airlines and commercial airlines) in connection with their use of the airport terminals leased by those carriers. The air carriers' use of the parking garage, however, will be on the same basis as passengers and other members of the general public using the airport. The leases for the use of the terminal space provide no priority rights to the air carriers for use of the parking garage, and the lease payments are determined without taking into account the revenues generated by the parking garage.

Although the lessee air carriers receive a special economic benefit from the use of the parking garage, this economic benefit is not sufficient to cause the air carriers to be private business users, because the parking garage is available for general public use. The issue does not meet the private business use test. See paragraphs (b)(7)(ii) and (c) of this section.

*Example 10. Long-term arrangements not treated as general public use—insurance fund.* Authority T deposits all of the proceeds of its bonds in its insurance fund and invests all of those proceeds in tax-exempt bonds. The insurance fund provides insurance to a large number of businesses and natural persons not engaged in a trade or business. Each participant receives insurance for a term of 1 year. The use by the participants, other than participants that are natural persons not engaged in a trade or business, is treated as private business use of the proceeds of the bonds because the participants have special legal entitlements to the use of bond proceeds, even though the contractual rights are not necessarily properly characterized as ownership, leasehold, or similar interests listed in paragraph (b) of this section. Use of the bond proceeds is not treated as general public use because the term of the insurance is greater than 200 days. See paragraphs (b)(7)(i) and (c)(3) of this section.

*Example 11. General public use—port road.* Highway Authority W uses all of the proceeds of its bonds to construct a 25-mile road to connect an industrial port owned by Corporation Y with existing roads owned and operated by W. Other than the port, the nearest residential or commercial development to the new road is 12 miles away. There is no reasonable expectation that development will occur in the area surrounding the new road. W and Y enter into no arrangement (either by contract or ordinance) that conveys special legal entitlements to Y for the use of the road. Use of the road will be available without restriction to all users, including natural persons who are not engaged in a trade or business. The issue does not meet the private business use test because the road is treated as used only by the general public.

*Example 12. General public use of governmentally owned hotel.* State Q issues bonds to purchase land and construct a hotel for use by the general public (that is, tourists, visitors, and business travelers). The bond documents provide that Q will own and operate the project for the term of the bonds. Q will not enter into a lease or license with any user for use of rooms for a period longer than 200 days (although users may actually use rooms for consecutive periods in excess of 200 days). Use of the hotel by hotel guests who are travelling in connection with trades or businesses of nongovernmental persons is not a private business use of the hotel by

these persons because the hotel is intended to be available and in fact is reasonably available for use on the same basis by natural persons not engaged in a trade or business. See paragraph (c)(1) of this section.

*Example 13. General public use with rights of first refusal.* Authority V uses all of the proceeds of its bonds to construct a parking garage. At least 90 percent of the spaces in the garage will be available to the general public on a monthly first-come, first-served basis. V reasonably expects that the spaces will be predominantly leased to natural persons not engaged in a trade or business who have priority rights to renew their spaces at then current fair market value rates. More than 10 percent of the spaces will be leased to nongovernmental persons acting in a trade or business. These leases are not treated as arrangements with a term of use greater than 200 days. The rights to renew are not treated as renewal options because the compensation for the spaces is redetermined at generally applicable, fair market value rates that will be in effect at the time of renewal and the use of the spaces under similar arrangements is predominantly by natural persons who are not engaged in a trade or business. The issue does not meet the private business use test because at least 90 percent of the use of the parking garage is general public use. See paragraph (c)(3) of this section.

*Example 14. General public use with a specially negotiated rate agreement with agency of United States.* G, a sewage collection and treatment district, operates facilities that were financed with its bonds. F, an agency of the United States, has a base located within G. Approximately 20 percent of G's facilities are used to treat sewage produced by F under a specially negotiated rate agreement. Under the specially negotiated rate agreement, G uses its best efforts to charge F as closely as possible the same amount for its use of G's services as its other customers pay for the same amount of services, although those other customers pay for services based on standard district charges and tax levies. F is prohibited by federal law from paying for the services based on those standard district charges and tax levies. The use of G's facilities by F is on the same basis as the general public. See paragraph (c)(2)(ii) of this section.

*Example 15. Arrangements not available for use by natural persons not engaged in a trade or business—federal use of prisons.* Authority E uses all of the proceeds of its bonds to construct a prison. E contracts with federal agency F to house federal prisoners on a space-available, first-come, first-served basis, pursuant to which F will be charged approximately the same amount for each prisoner as other persons that enter into similar transfer agreements. It is reasonably expected that other persons will enter into similar agreements. The term of the use

under the contract is not longer than 100 days, and F has no right to renew, although E reasonably expects to renew the contract indefinitely. The prison is not financed for a principal purpose of providing the prison for use by F. It is reasonably expected that during the term of the bonds, more than 10 percent of the prisoners at the prison will be federal prisoners. F's use of the facility is not general public use because this type of use (leasing space for prisoners) is not available for use on the same basis by natural persons not engaged in a trade or business. The issue does not meet the private business use test, however, because the leases satisfy the exception of paragraph (d)(3)(i) of this section.

*Example 16. Negotiated arm's-length arrangements—auditorium reserved in advance.* (i) City Z issues obligations to finance the construction of a municipal auditorium that it will own and operate. The use of the auditorium will be open to anyone who wishes to use it for a short period of time on a rate-scale basis. Z reasonably expects that the auditorium will be used by schools, church groups, sororities, and numerous commercial organizations. Corporation H, a nongovernmental person, enters into an arm's-length arrangement with Z to use the auditorium for 1 week for each year for a 10-year period (a total of 70 days), pursuant to which H will be charged a specific price reflecting fair market value. On the date the contract is entered into, Z has not established generally applicable rates for future years. Even though the auditorium is not financed for a principal purpose of providing use of the auditorium to H, H is not treated as using the auditorium as a member of the general public because its use is not on the same basis as the general public. Because the term of H's use of the auditorium is longer than 50 days, the arrangement does not meet the exception under paragraph (d)(3)(ii) of this section.

(ii) The facts are the same as in *Example 16(i)*, except that H will enter into an arm's-length arrangement with Z to use the auditorium for 1 week for each year for a 4-year period (a total of 28 days), pursuant to which H will be charged a specific price reflecting fair market value. H is not treated as a private business user of the auditorium because its contract satisfies the exception of paragraph (d)(3)(ii) of this section for negotiated arm's-length arrangements.

(g) *Measurement of private business use—(1) In general.* In general, the private business use of proceeds is allocated to property under § 1.141-6. The amount of private business use of that property is determined according to the average percentage of private busi-

ness use of that property during the measurement period.

(2) *Measurement period—(i) General rule.* Except as provided in this paragraph (g)(2), the measurement period of property financed by an issue begins on the later of the issue date of that issue or the date the property is placed in service and ends on the earlier of the last date of the reasonably expected economic life of the property or the latest maturity date of any bond of the issue financing the property (determined without regard to any optional redemption dates). In general, the period of reasonably expected economic life of the property for this purpose is based on reasonable expectations as of the issue date.

(ii) *Special rule for refundings of short-term obligations.* For an issue of short-term obligations that the issuer reasonably expects to refund with a long-term financing (such as bond anticipation notes), the measurement period is based on the latest maturity date of any bond of the last refunding issue with respect to the financed property (determined without regard to any optional redemption dates).

(iii) *Special rule for reasonably expected mandatory redemptions.* If an issuer reasonably expects on the issue date that an action will occur during the term of the bonds to cause either the private business tests or the private loan financing test to be met and is required to redeem bonds to meet the reasonable expectations test of § 1.141-2(d)(2), the measurement period ends on the reasonably expected redemption date.

(iv) *Special rule for ownership by a nongovernmental person.* The amount of private business use resulting from ownership by a nongovernmental person is the greatest percentage of private business use in any 1-year period.

(v) *Anti-abuse rule.* If an issuer establishes the term of an issue for a period that is longer than is reasonably necessary for the governmental purposes of the issue for a principal purpose of increasing the permitted amount of private business use, the Commissioner may determine the amount of private business use according to the greatest percentage of private business use in any 1-year period.

(3) *Determining average percentage of private business use.* The average percentage of private business use is the average of the percentages of private business use during the 1-year periods within the measurement period. Appropriate adjustments must be made for beginning and ending periods of less than 1 year.

(4) *Determining the average amount of private business use for a 1-year period—*

(i) *In general.* The percentage of private business use of property for any 1-year period is the average private business use during that year. This average is determined by comparing the amount of private business use during the year to the total amount of private business use and use that is not private business use (government use) during that year. Paragraphs (g)(4) (ii) through (v) of this section apply to determine the average amount of private business use for a 1-year period.

(ii) *Uses at different times.* For a facility in which actual government use and private business use occur at different times (for example, different days), the average amount of private business use generally is based on the amount of time that the facility is used for private business use as a percentage of the total time for all actual use. In determining the total amount of actual use, periods during which the facility is not in use are disregarded.

(iii) *Simultaneous use.* In general, for a facility in which government use and private business use occur simultaneously, the entire facility is treated as having private business use. For example, a governmentally owned facility that is leased or managed by a nongovernmental person in a manner that results in private business use is treated as entirely used for a private business use. If, however, there is also private business use and actual government use on the same basis, the average amount of private business use may be determined on a reasonable basis that properly reflects the proportionate benefit to be derived by the various users of the facility (for example, reasonably expected fair market value of use). For example, the average amount of private business use of a garage with unassigned spaces that is used for government use and private

business use is generally based on the number of spaces used for private business use as a percentage of the total number of spaces.

(iv) *Discrete portion.* For purposes of this paragraph (g), measurement of the use of proceeds allocated to a discrete portion of a facility is determined by treating that discrete portion as a separate facility.

(v) *Relationship to fair market value.* For purposes of paragraphs (g)(4) (ii) through (iv) of this section, if private business use is reasonably expected as of the issue date to have a significantly greater fair market value than government use, the average amount of private business use must be determined according to the relative reasonably expected fair market values of use rather than another measure, such as average time of use. This determination of relative fair market value may be made as of the date the property is acquired or placed in service if making this determination as of the issue date is not reasonably possible (for example, if the financed property is not identified on the issue date). In general, the relative reasonably expected fair market value for a period must be determined by taking into account the amount of reasonably expected payments for private business use for the period in a manner that properly reflects the proportionate benefit to be derived from the private business use.

(5) *Common areas.* The amount of private business use of common areas within a facility is based on a reasonable method that properly reflects the proportionate benefit to be derived by the users of the facility. For example, in general, a method that is based on the average amount of private business use of the remainder of the entire facility reflects proportionate benefit.

(6) *Allocation of neutral costs.* Proceeds that are used to pay costs of issuance, invested in a reserve or replacement fund, or paid as fees for a qualified guarantee or a qualified hedge must be allocated ratably among the other purposes for which the proceeds are used.

(7) *Commencement of measurement of private business use.* Generally, private business use commences on the first date on which there is a right to actual use by the nongovernmental person.

However, if an issuer enters into an arrangement for private business use a substantial period before the right to actual private business use commences and the arrangement transfers ownership or is an arrangement for other long-term use (such as a lease for a significant portion of the remaining economic life of financed property), private business use commences on the date the arrangement is entered into, even if the right to actual use commences after the measurement period. For this purpose, 10 percent of the measurement period is generally treated as a substantial period.

(8) *Examples.* The following examples illustrate the application of this paragraph (g):

*Example 1. Research facility.* University U, a state owned and operated university, owns and operates a research facility. U proposes to finance general improvements to the facility with the proceeds of an issue of bonds. U enters into sponsored research agreements with nongovernmental persons that result in private business use because the sponsors will own title to any patents resulting from the research. The governmental research conducted by U and the research U conducts for the sponsors take place simultaneously in all laboratories within the research facility. All laboratory equipment is available continuously for use by workers who perform both types of research. Because it is not possible to predict which research projects will be successful, it is not reasonably practicable to estimate the relative revenues expected to result from the governmental and nongovernmental research. U contributed 90 percent of the cost of the facility and the nongovernmental persons contributed 10 percent of the cost. Under this section, the nongovernmental persons are using the facility for a private business use on the same basis as the government use of the facility. The portions of the costs contributed by the various users of the facility provide a reasonable basis that properly reflects the proportionate benefit to be derived by the users of the facility. The nongovernmental persons are treated as using 10 percent of the proceeds of the issue.

*Example 2. Stadium.* (i) City L issues bonds and uses all of the proceeds to construct a stadium. L enters into a long-term contract with a professional sports team T under which T will use the stadium 20 times during each year. These uses will occur on nights and weekends. L reasonably expects that the stadium will be used more than 180 other times each year, none of which will give rise to private business use. This expectation is based on a feasibility study and historical

use of the old stadium that is being replaced by the new stadium. There is no significant difference in the value of T's uses when compared to the other uses of the stadium, taking into account the payments that T is reasonably expected to make for its use. Assuming no other private business use, the issue does not meet the private business use test because not more than 10 percent of the use of the facility is for a private business use.

(ii) The facts are the same as in *Example 2(i)*, except that L reasonably expects that the stadium will be used not more than 60 other times each year, none of which will give rise to private business use. The issue meets the private business use test because 25 percent of the proceeds are used for a private business use.

*Example 3. Airport terminal areas treated as common areas.* City N issues bonds to finance the construction of an airport terminal. Eighty percent of the leasable space of the terminal will be leased to private air carriers. The remaining 20 percent of the leasable space will be used for the term of the bonds by N for its administrative purposes. The common areas of the terminal, including waiting areas, lobbies, and hallways are treated as 80 percent used by the air carriers for purposes of the private business use test.

[T.D. 8712, 62 FR 2286, Jan. 16, 1997, as amended by T.D. 8967, 66 FR 58062, Nov. 20, 2001]

#### § 1.141-4 Private security or payment test.

(a) *General rule—(1) Private security or payment.* The private security or payment test relates to the nature of the security for, and the source of, the payment of debt service on an issue. The private payment portion of the test takes into account the payment of the debt service on the issue that is directly or indirectly to be derived from payments (whether or not to the issuer or any related party) in respect of property, or borrowed money, used or to be used for a private business use. The private security portion of the test takes into account the payment of the debt service on the issue that is directly or indirectly secured by any interest in property used or to be used for a private business use or payments in respect of property used or to be used for a private business use. For additional rules for output facilities, see § 1.141-7.

(2) *Aggregation of private payments and security.* For purposes of the private security or payment test, payments

taken into account as private payments and payments or property taken into account as private security are aggregated. However, the same payments are not taken into account as both private security and private payments.

(3) *Underlying arrangement.* The security for, and payment of debt service on, an issue is determined from both the terms of the bond documents and on the basis of any underlying arrangement. An underlying arrangement may result from separate agreements between the parties or may be determined on the basis of all of the facts and circumstances surrounding the issuance of the bonds. For example, if the payment of debt service on an issue is secured by both a pledge of the full faith and credit of a state or local governmental unit and any interest in property used or to be used in a private business use, the issue meets the private security or payment test.

(b) *Measurement of private payments and security—(1) Scope.* This paragraph (b) contains rules that apply to both private security and private payments.

(2) *Present value measurement—(i) Use of present value.* In determining whether an issue meets the private security or payment test, the present value of the payments or property taken into account is compared to the present value of the debt service to be paid over the term of the issue.

(ii) *Debt service—(A) Debt service paid from proceeds.* Debt service does not include any amount paid or to be paid from sale proceeds or investment proceeds. For example, debt service does not include payments of capitalized interest funded with proceeds.

(B) *Adjustments to debt service.* Debt service is adjusted to take into account payments and receipts that adjust the yield on an issue for purposes of section 148(f). For example, debt service includes fees paid for qualified guarantees under § 1.148-4(f) and is adjusted to take into account payments and receipts on qualified hedges under § 1.148-4(h).

(iii) *Computation of present value—(A) In general.* Present values are determined by using the yield on the issue as the discount rate and by discounting all amounts to the issue date. See,

however, § 1.141-13 for special rules for refunding bonds.

(B) *Fixed yield issues.* For a fixed yield issue, yield is determined on the issue date and is not adjusted to take into account subsequent events.

(C) *Variable yield issues.* The yield on a variable yield issue is determined over the term of the issue. To determine the reasonably expected yield as of any date, the issuer may assume that the future interest rate on a variable yield bond will be the then-current interest rate on the bonds determined under the formula prescribed in the bond documents. A deliberate action requires a recomputation of the yield on the variable yield issue to determine the present value of payments under that arrangement. In that case, the issuer must use the yield determined as of the date of the deliberate action for purposes of determining the present value of payments under the arrangement causing the deliberate action. See paragraph (g) of this section, *Example 3.*

(iv) *Application to private security.* For purposes of determining the present value of debt service that is secured by property, the property is valued at fair market value as of the first date on which the property secures bonds of the issue.

(c) *Private payments—(1) In general.* This paragraph (c) contains rules that apply to private payments.

(2) *Payments taken into account—(i) Payments for use—(A) In general.* Both direct and indirect payments made by any nongovernmental person that is treated as using proceeds of the issue are taken into account as private payments to the extent allocable to the proceeds used by that person. Payments are taken into account as private payments only to the extent that they are made for the period of time that proceeds are used for a private business use. Payments for a use of proceeds include payments (whether or not to the issuer) in respect of property financed (directly or indirectly) with those proceeds, even if not made by a private business user. Payments are not made in respect of financed property if those payments are directly allocable to other property being directly used by the person making the

payment and those payments represent fair market value compensation for that other use. See paragraph (g) of this section, *Example 4* and *Example 5*. See also paragraph (c)(3) of this section for rules relating to allocation of payments to the source or sources of funding of property.

(B) *Payments not to exceed use.* Payments with respect to proceeds that are used for a private business use are not taken into account to the extent that the present value of those payments exceeds the present value of debt service on those proceeds. Payments need not be directly derived from a private business user, however, to be taken into account. Thus, if 7 percent of the proceeds of an issue is used by a person over the measurement period, payments with respect to the property financed with those proceeds are taken into account as private payments only to the extent that the present value of those payments does not exceed the present value of 7 percent of the debt service on the issue.

(C) *Payments for operating expenses.* Payments by a person for a use of proceeds do not include the portion of any payment that is properly allocable to the payment of ordinary and necessary expenses (as defined under section 162) directly attributable to the operation and maintenance of the financed property used by that person. For this purpose, general overhead and administrative expenses are not directly attributable to those operations and maintenance. For example, if an issuer receives \$5,000 rent during the year for use of space in a financed facility and during the year pays \$500 for ordinary and necessary expenses properly allocable to the operation and maintenance of that space and \$400 for general overhead and general administrative expenses properly allocable to that space, \$500 of the \$5,000 received would not be considered a payment for the use of the proceeds allocable to that space (regardless of the manner in which that \$500 is actually used).

(ii) *Refinanced debt service.* Payments of debt service on an issue to be made from proceeds of a refunding issue are taken into account as private payments in the same proportion that the present value of the payments taken

into account as private payments for the refunding issue bears to the present value of the debt service to be paid on the refunding issue. For example, if all the debt service on a note is paid with proceeds of a refunding issue, the note meets the private security or payment test if (and to the same extent that) the refunding issue meets the private security or payment test. This paragraph (c)(2)(ii) does not apply to payments that arise from deliberate actions that occur more than 3 years after the retirement of the prior issue that are not reasonably expected on the issue date of the refunding issue. For purposes of this paragraph (c)(2)(ii), whether an issue is a refunding issue is determined without regard to § 1.150-1(d)(2)(i) (relating to certain payments of interest).

(3) *Allocation of payments—(i) In general.* Private payments for the use of property are allocated to the source or different sources of funding of property. The allocation to the source or different sources of funding is based on all of the facts and circumstances, including whether an allocation is consistent with the purposes of section 141. In general, a private payment for the use of property is allocated to a source of funding based upon the nexus between the payment and both the financed property and the source of funding. For this purpose, different sources of funding may include different tax-exempt issues, taxable issues, and amounts that are not derived from a borrowing, such as revenues of an issuer (equity).

(ii) *Payments for use of discrete property.* Payments for the use of a discrete facility (or a discrete portion of a facility) are allocated to the source or different sources of funding of that discrete property.

(iii) *Allocations among two or more sources of funding.* In general, except as provided in paragraphs (c)(3)(iv) and (v) of this section, if a payment is made for the use of property financed with two or more sources of funding (for example, equity and a tax-exempt issue), that payment must be allocated to those sources of funding in a manner that reasonably corresponds to the relative amounts of those sources of funding that are expended on that property.

If an issuer has not retained records of amounts expended on the property (for example, records of costs of a building that was built 30 years before the allocation), an issuer may use reasonable estimates of those expenditures. For this purpose, costs of issuance and other similar neutral costs are allocated ratably among expenditures in the same manner as in § 1.141-3(g)(6). A payment for the use of property may be allocated to two or more issues that finance property according to the relative amounts of debt service (both paid and accrued) on the issues during the annual period for which the payment is made, if that allocation reasonably reflects the economic substance of the arrangement. In general, allocations of payments according to relative debt service reasonably reflect the economic substance of the arrangement if the maturity of the bonds reasonably corresponds to the reasonably expected economic life of the property and debt service payments on the bonds are approximately level from year to year.

(iv) *Payments made under an arrangement entered into in connection with issuance of bonds.* A private payment for the use of property made under an arrangement that is entered into in connection with the issuance of the issue that finances that property generally is allocated to that issue. Whether an arrangement is entered into in connection with the issuance of an issue is determined on the basis of all of the facts and circumstances. An arrangement is ordinarily treated as entered into in connection with the issuance of an issue if—

(A) The issuer enters into the arrangement during the 3-year period beginning 18 months before the issue date; and

(B) The amount of payments reflects all or a portion of debt service on the issue.

(v) *Allocations to equity.* A private payment for the use of property may be allocated to equity before payments are allocated to an issue only if—

(A) Not later than 60 days after the date of the expenditure of those amounts, the issuer adopts an official intent (in a manner comparable to § 1.150-2(e)) indicating that the issuer

reasonably expects to be repaid for the expenditure from a specific arrangement; and

(B) The private payment is made not later than 18 months after the later of the date the expenditure is made or the date the project is placed in service.

(d) *Private security*—(1) *In general.* This paragraph (d) contains rules that relate to private security.

(2) *Security taken into account.* The property that is the security for, or the source of, the payment of debt service on an issue need not be property financed with proceeds. For example, unimproved land or investment securities used, directly or indirectly, in a private business use that secures an issue provides private security. Private security (other than financed property and private payments) for an issue is taken into account under section 141(b), however, only to the extent it is provided, directly or indirectly, by a user of proceeds of the issue.

(3) *Pledge of unexpended proceeds.* Proceeds qualifying for an initial temporary period under § 1.148-2(e)(2) or (3) or deposited in a reasonably required reserve or replacement fund (as defined in § 1.148-2(f)(2)(i)) are not taken into account under this paragraph (d) before the date on which those amounts are either expended or loaned by the issuer to an unrelated party.

(4) *Secured by any interest in property or payments.* Property used or to be used for a private business use and payments in respect of that property are treated as private security if any interest in that property or payments secures the payment of debt service on the bonds. For this purpose, the phrase any interest in is to be interpreted broadly and includes, for example, any right, claim, title, or legal share in property or payments.

(5) *Payments in respect of property.* The payments taken into account as private security are payments in respect of property used or to be used for a private business use. Except as otherwise provided in this paragraph (d)(5) and paragraph (d)(6) of this section, the rules in paragraphs (c)(2)(i)(A) and (B) and (c)(2)(ii) of this section apply to determine the amount of payments treated as payments in respect of property

used or to be used for a private business use. Thus, payments made by members of the general public for use of a facility used for a private business use (for example, a facility that is the subject of a management contract that results in private business use) are taken into account as private security to the extent that they are made for the period of time that property is used by a private business user.

(6) *Allocation of security among issues.* In general, property or payments from the disposition of that property that are taken into account as private security are allocated to each issue secured by the property or payments on a reasonable basis that takes into account bondholders' rights to the payments or property upon default.

(e) *Generally applicable taxes*—(1) *General rule.* For purposes of the private security or payment test, generally applicable taxes are not taken into account (that is, are not payments from a nongovernmental person and are not payments in respect of property used for a private business use).

(2) *Definition of generally applicable taxes.* A generally applicable tax is an enforced contribution exacted pursuant to legislative authority in the exercise of the taxing power that is imposed and collected for the purpose of raising revenue to be used for governmental purposes. A generally applicable tax must have a uniform tax rate that is applied to all persons of the same classification in the appropriate jurisdiction and a generally applicable manner of determination and collection.

(3) *Special charges.* A payment for a special privilege granted or service rendered is not a generally applicable tax. Special assessments paid by property owners benefiting from financed improvements are not generally applicable taxes. For example, a tax or a payment in lieu of tax that is limited to the property or persons benefited by an improvement is not a generally applicable tax.

(4) *Manner of determination and collection*—(i) *In general.* A tax does not have a generally applicable manner of determination and collection to the extent that one or more taxpayers make any impermissible agreements relating to payment of those taxes. An impermissible

agreement relating to the payment of a tax is taken into account whether or not it is reasonably expected to result in any payments that would not otherwise have been made. For example, if an issuer uses proceeds to make a grant to a taxpayer to improve property, agreements that impose reasonable conditions on the use of the grant do not cause a tax on that property to fail to be a generally applicable tax. If an agreement by a taxpayer causes the tax imposed on that taxpayer not to be treated as a generally applicable tax, the entire tax paid by that taxpayer is treated as a special charge, unless the agreement is limited to a specific portion of the tax.

(ii) *Impermissible agreements.* The following are examples of agreements that cause a tax to fail to have a generally applicable manner of determination and collection: an agreement to be personally liable on a tax that does not generally impose personal liability, to provide additional credit support such as a third party guarantee, or to pay unanticipated shortfalls; an agreement regarding the minimum market value of property subject to property tax; and an agreement not to challenge or seek deferral of the tax.

(iii) *Permissible agreements.* The following are examples of agreements that do not cause a tax to fail to have a generally applicable manner of determination and collection: an agreement to use a grant for specified purposes (whether or not that agreement is secured); a representation regarding the expected value of the property following the improvement; an agreement to insure the property and, if damaged, to restore the property; a right of a grantor to rescind the grant if property taxes are not paid; and an agreement to reduce or limit the amount of taxes collected to further a bona fide governmental purpose. For example, an agreement to abate taxes to encourage a property owner to rehabilitate property in a distressed area is a permissible agreement.

(5) *Payments in lieu of taxes.* A tax equivalency payment and any other payment in lieu of a tax is treated as a generally applicable tax if—

(i) The payment is commensurate with and not greater than the amounts

imposed by a statute for a tax of general application; and

(ii) The payment is designated for a public purpose and is not a special charge (as described in paragraph (e)(3) of this section). For example, a payment in lieu of taxes made in consideration for the use of property financed with tax-exempt bonds is treated as a special charge.

(f) *Certain waste remediation bonds*—(1) *Scope.* This paragraph (f) applies to bonds issued to finance hazardous waste clean-up activities on privately owned land (hazardous waste remediation bonds).

(2) *Persons that are not private users.* Payments from nongovernmental persons who are not (other than coincidentally) either users of the site being remediated or persons potentially responsible for disposing of hazardous waste on that site are not taken into account as private security. This paragraph (f)(2) applies to payments that secure (directly or indirectly) the payment of principal of, or interest on, the bonds under the terms of the bonds. This paragraph (f)(2) applies only if the payments are made pursuant to either a generally applicable state or local taxing statute or a state or local statute that regulates or restrains activities on an industry-wide basis of persons who are engaged in generating or handling hazardous waste, or in refining, producing, or transporting petroleum, provided that those payments do not represent, in substance, payment for the use of proceeds. For this purpose, a state or local statute that imposes payments that have substantially the same character as those described in Chapter 38 of the Code are treated as generally applicable taxes.

(3) *Persons that are private users.* If payments from nongovernmental persons who are either users of the site being remediated or persons potentially responsible for disposing of hazardous waste on that site do not secure (directly or indirectly) the payment of principal of, or interest on, the bonds under the terms of the bonds, the payments are not taken into account as private payments. This paragraph (f)(3) applies only if at the time the bonds are issued the payments from those nongovernmental persons are not ma-

terial to the security for the bonds. For this purpose, payments are not material to the security for the bonds if—

(i) The payments are not required for the payment of debt service on the bonds;

(ii) The amount and timing of the payments are not structured or designed to reflect the payment of debt service on the bonds;

(iii) The receipt or the amount of the payment is uncertain (for example, as of the issue date, no final judgment has been entered into against the nongovernmental person);

(iv) The payments from those nongovernmental persons, when and if received, are used either to redeem bonds of the issuer or to pay for costs of any hazardous waste remediation project; and

(v) In the case when a judgment (but not a final judgment) has been entered by the issue date against a nongovernmental person, there are, as of the issue date, costs of hazardous waste remediation other than those financed with the bonds that may be financed with the payments.

(g) *Examples.* The following examples illustrate the application of this section:

*Example 1. Aggregation of payments.* State B issues bonds with proceeds of \$10 million. B uses \$9.7 million of the proceeds to construct a 10-story office building. B uses the remaining \$300,000 of proceeds to make a loan to Corporation Y. In addition, Corporation X leases 1 floor of the building for the term of the bonds. Under all of the facts and circumstances, it is reasonable to allocate 10 percent of the proceeds to that 1 floor. As a percentage of the present value of the debt service on the bonds, the present value of Y's loan repayments is 3 percent and the present value of X's lease payments is 8 percent. The bonds meet the private security or payment test because the private payments taken into account are more than 10 percent of the present value of the debt service on the bonds.

*Example 2. Indirect private payments.* J, a political subdivision of a state, will issue several series of bonds from time to time and will use the proceeds to rehabilitate urban areas. Under all of the facts and circumstances, the private business use test will be met with respect to each issue that will be used for the rehabilitation and construction of buildings that will be leased or sold to nongovernmental persons for use in their trades or businesses. Nongovernmental persons will make payments for these sales

and leases. There is no limitation either on the number of issues or the aggregate amount of bonds that may be outstanding. No group of bondholders has any legal claim prior to any other bondholders or creditors with respect to specific revenues of J, and there is no arrangement whereby revenues from a particular project are paid into a trust or constructive trust, or sinking fund, or are otherwise segregated or restricted for the benefit of any group of bondholders. There is, however, an unconditional obligation by J to pay the principal of, and the interest on, each issue. Although not directly pledged under the terms of the bond documents, the leases and sales are underlying arrangements. The payments relating to these leases and sales are taken into account as private payments to determine whether each issue of bonds meets the private security or payment test.

*Example 3. Computation of payment in variable yield issues.* (i) City M issues general obligation bonds with proceeds of \$10 million to finance a 5-story office building. The bonds bear interest at a variable rate that is recomputed monthly according to an index that reflects current market yields. The yield that the interest index would produce on the issue date is 6 percent. M leases 1 floor of the office building to Corporation T, a nongovernmental person, for the term of the bonds. Under all of the facts and circumstances, T is treated as using more than 10 percent of the proceeds. Using the 6 percent yield as the discount rate, M reasonably expects on the issue date that the present value of lease payments to be made by T will be 8 percent of the present value of the total debt service on the bonds. After the issue date of the bonds, interest rates decline significantly, so that the yield on the bonds over their entire term is 4 percent. Using this actual 4 percent yield as the discount rate, the present value of lease payments made by T is 12 percent of the present value of the actual total debt service on the bonds. The bonds are not private activity bonds because M reasonably expected on the issue date that the bonds would not meet the private security or payment test and because M did not take any subsequent deliberate action to meet the private security or payment test.

(ii) The facts are the same as *Example 3(i)*, except that 5 years after the issue date M leases a second floor to Corporation S, a nongovernmental person, under a long-term lease. Because M has taken a deliberate action, the present value of the lease payments must be computed. On the date this lease is entered into, M reasonably expects that the yield on the bonds over their entire term will be 5.5 percent, based on actual interest rates to date and the then-current rate on the variable yield bonds. M uses this 5.5 percent yield as the discount rate. Using this 5.5 per-

cent yield as the discount rate, as a percentage of the present value of the debt service on the bonds, the present value of the lease payments made by S is 3 percent. The bonds are private activity bonds because the present value of the aggregate private payments is greater than 10 percent of the present value of debt service.

*Example 4. Payments not in respect of financed property.* In order to further public safety, City Y issues tax assessment bonds the proceeds of which are used to move existing electric utility lines underground. Although the utility lines are owned by a nongovernmental utility company, that company is under no obligation to move the lines. The debt service on the bonds will be paid using assessments levied by City Y on the customers of the utility. Although the utility lines are privately owned and the utility customers make payments to the utility company for the use of those lines, the assessments are payments in respect of the cost of relocating the utility line. Thus, the assessment payments are not made in respect of property used for a private business use. Any direct or indirect payments to Y by the utility company for the undergrounding are, however, taken into account as private payments.

*Example 5. Payments from users of proceeds that are not private business users taken into account.* City P issues general obligation bonds to finance the renovation of a hospital that it owns. The hospital is operated for P by D, a nongovernmental person, under a management contract that results in private business use under § 1.141-3. P will use the revenues from the hospital (after the required payments to D and the payment of operation and maintenance expenses) to pay the debt service on the bonds. The bonds meet the private security or payment test because the revenues from the hospital are payments in respect of property used for a private business use.

*Example 6. Limitation of amount of payments to amount of private business use not determined annually.* City Q issues bonds with a term of 15 years and uses the proceeds to construct an office building. The debt service on the bonds is level throughout the 15-year term. Q enters into a 5-year lease with Corporation R under which R is treated as a user of 11 percent of the proceeds. R will make lease payments equal to 20 percent of the annual debt service on the bonds for each year of the lease. The present value of R's lease payments is equal to 12 percent of the present value of the debt service over the entire 15-year term of the bonds. If, however, the lease payments taken into account as private payments were limited to 11 percent of debt service paid in each year of the lease, the present value of these payments would be only 8 percent of the debt service on the bonds over the entire term of the bonds. The

bonds meet the private security or payment test, because R's lease payments are taken into account as private payments in an amount not to exceed 11 percent of the debt service of the bonds.

*Example 7. Allocation of payments to funds not derived from a borrowing.* City Z purchases property for \$1,250,000 using \$1,000,000 of proceeds of its tax increment bonds and \$250,000 of other revenues that are in its redevelopment fund. Within 60 days of the date of purchase, Z declared its intent to sell the property pursuant to a redevelopment plan and to use that amount to reimburse its redevelopment fund. The bonds are secured only by the incremental property taxes attributable to the increase in value of the property from the planned redevelopment of the property. Within 18 months after the issue date, Z sells the financed property to Developer M for \$250,000, which Z uses to reimburse the redevelopment fund. The property that M uses is financed both with the proceeds of the bonds and Z's redevelopment fund. The payments by M are properly allocable to the costs of property financed with the amounts in Z's redevelopment fund. See paragraphs (c)(3) (i) and (v) of this section.

*Example 8. Allocation of payments to different sources of funding—improvements.* In 1997, City L issues bonds with proceeds of \$8 million to finance the acquisition of a building. In 2002, L spends \$2 million of its general revenues to improve the heating system and roof of the building. At that time, L enters into a 10-year lease with Corporation M for the building providing for annual payments of \$1 million to L. The lease payments are at fair market value, and the lease payments do not otherwise have a significant nexus to either the issue or to the expenditure of general revenues. Eighty percent of each lease payment is allocated to the issue and is taken into account under the private payment test because each lease payment is properly allocated to the sources of funding in a manner that reasonably corresponds to the relative amounts of the sources of funding that are expended on the building.

*Example 9. Security not provided by users of proceeds not taken into account.* County W issues certificates of participation in a lease of a building that W owns and covenants to appropriate annual payments for the lease. A portion of each payment is specified as interest. More than 10 percent of the building is used for private business use. None of the proceeds of the obligations are used with respect to the building. W uses the proceeds of the obligations to make a grant to Corporation Y for the construction of a factory that Y will own. Y makes no payments to W, directly or indirectly, for its use of proceeds, and Y has no relationship to the users of the leased building. If W defaults under the lease, the trustee for the holders of the certificates of participation has a limited right

of repossession under which the trustee may not foreclose but may lease the property to a new tenant at fair market value. The obligations are secured by an interest in property used for a private business use. However, because the property is not provided by a private business user and is not financed property, the obligations do not meet the private security or payment test.

*Example 10. Allocation of payments among issues.* University L, a political subdivision, issued three separate series of revenue bonds during 1989, 1991, and 1993 under the same bond resolution. L used the proceeds to construct facilities exclusively for its own use. Bonds issued under the resolution are equally and ratably secured and payable solely from the income derived by L from rates, fees, and charges imposed by L for the use of the facilities. The bonds issued in 1989, 1991, and 1993 are not private activity bonds. In 1997, L issues another series of bonds under the resolution to finance additional facilities. L leases 20 percent of the new facilities for the term of the 1997 bonds to nongovernmental persons who will use the facilities in their trades or businesses. The present value of the lease payments from the nongovernmental users will equal 15 percent of the present value of the debt service on the 1997 bonds. L will commingle all of the revenues from all its bond-financed facilities in its revenue fund. The present value of the portion of the lease payments from nongovernmental lessees of the new facilities allocable to the 1997 bonds under paragraph (d) of this section is less than 10 percent of the present value of the debt service on the 1997 bonds because the bond documents provide that the bonds are equally and ratably secured. Accordingly, the 1997 bonds do not meet the private security test. The 1997 bonds meet the private payment test, however, because the private lease payments for the new facility are properly allocated to those bonds (that is, because none of the proceeds of the prior issues were used for the new facilities). See paragraph (c) of this section.

*Example 11. Generally applicable tax.* (i) Authority N issues bonds to finance the construction of a stadium. Under a long-term lease, Corporation X, a professional sports team, will use more than 10 percent of the stadium. X will not, however, make any payments for this private business use. The security for the bonds will be a ticket tax imposed on each person purchasing a ticket for an event at the stadium. The portion of the ticket tax attributable to tickets purchased by persons attending X's events will, on a present value basis, exceed 10 percent of the present value of the debt service on N's bonds. The bonds meet the private security or payment test. The ticket tax is not a generally applicable tax and, to the extent that the tax receipts relate to X's events, the

## § 1.141-5

## 26 CFR Ch. I (4-1-06 Edition)

taxes are payments in respect of property used for a private business use.

(ii) The facts are the same as *Example 11(i)*, except that the ticket tax is imposed by N on tickets purchased for events at a number of large entertainment facilities within the N's jurisdiction (for example, other stadiums, arenas, and concert halls), some of which were not financed with tax-exempt bonds. The ticket tax is a generally applicable tax and therefore the revenues from this tax are not payments in respect of property used for a private business use. The receipt of the ticket tax does not cause the bonds to meet the private security or payment test.

[T.D. 8712, 62 FR 2291, Jan. 16, 1997]

### § 1.141-5 Private loan financing test.

(a) *In general.* Bonds of an issue are private activity bonds if more than the lesser of 5 percent or \$5 million of the proceeds of the issue is to be used (directly or indirectly) to make or finance loans to persons other than governmental persons. Section 1.141-2(d) applies in determining whether the private loan financing test is met. In determining whether the proceeds of an issue are used to make or finance loans, indirect, as well as direct, use of the proceeds is taken into account.

(b) *Measurement of test.* In determining whether the private loan financing test is met, the amount actually loaned to a nongovernmental person is not discounted to reflect the present value of the loan repayments.

(c) *Definition of private loan—(1) In general.* Any transaction that is generally characterized as a loan for federal income tax purposes is a loan for purposes of this section. In addition, a loan may arise from the direct lending of bond proceeds or may arise from transactions in which indirect benefits that are the economic equivalent of a loan are conveyed. Thus, the determination of whether a loan is made depends on the substance of a transaction rather than its form. For example, a lease or other contractual arrangement (for example, a management contract or an output contract) may in substance constitute a loan if the arrangement transfers tax ownership of the facility to a nongovernmental person. Similarly, an output contract or a management contract with respect to a financed facility generally is not treated as a loan of proceeds unless the

agreement in substance shifts significant burdens and benefits of ownership to the nongovernmental purchaser or manager of the facility.

(2) *Application only to purpose investments—(i) In general.* A loan may be either a purpose investment or a nonpurpose investment. A loan that is a nonpurpose investment does not cause the private loan financing test to be met. For example, proceeds invested in loans, such as obligations of the United States, during a temporary period, as part of a reasonably required reserve or replacement fund, as part of a refunding escrow, or as part of a minor portion (as each of those terms are defined in § 1.148-1 or § 1.148-2) are generally not treated as loans under the private loan financing test.

(ii) *Certain prepayments treated as loans.* Except as otherwise provided, a prepayment for property or services, including a prepayment for property or services that is made after the date that the contract to buy the property or services is entered into, is treated as a loan for purposes of the private loan financing test if a principal purpose for prepaying is to provide a benefit of tax-exempt financing to the seller. A prepayment is not treated as a loan for purposes of the private loan financing test if—

(A) Prepayments on substantially the same terms are made by a substantial percentage of persons who are similarly situated to the issuer but who are not beneficiaries of tax-exempt financing;

(B) The prepayment is made within 90 days of the reasonably expected date of delivery to the issuer of all of the property or services for which the prepayment is made; or

(C) The prepayment meets the requirements of § 1.148-1(e)(2)(iii)(A) or (B) (relating to certain prepayments to acquire a supply of natural gas or electricity).

(iii) *Customary prepayments.* The determination of whether a prepayment satisfies paragraph (c)(2)(ii)(A) of this section is generally made based on all the facts and circumstances. In addition, a prepayment is deemed to satisfy paragraph (c)(2)(ii)(A) of this section if—

(A) The prepayment is made for—

(1) Maintenance, repair, or an extended warranty with respect to personal property (for example, automobiles or electronic equipment); or

(2) Updates or maintenance or support services with respect to computer software; and

(B) The same maintenance, repair, extended warranty, updates or maintenance or support services, as applicable, are regularly provided to non-governmental persons on the same terms.

(iv) *Additional prepayments as permitted by the Commissioner.* The Commissioner may, by published guidance, set forth additional circumstances in which a prepayment is not treated as a loan for purposes of the private loan financing test.

(3) *Grants—(i) In general.* A grant of proceeds is not a loan. Whether a transaction may be treated as a grant or a loan depends on all of the facts and circumstances.

(ii) *Tax increment financing—(A) In general.* Generally, a grant using proceeds of an issue that is secured by generally applicable taxes attributable to the improvements to be made with the grant is not treated as a loan, unless the grantee makes any impermissible agreements relating to the payment that results in the taxes imposed on that taxpayer not to be treated as generally applicable taxes under § 1.141-4(e).

(B) *Amount of loan.* If a grant is treated as a loan under this paragraph (c)(3), the entire grant is treated as a loan unless the impermissible agreement is limited to a specific portion of the tax. For this purpose, an arrangement with each unrelated grantee is treated as a separate grant.

(4) *Hazardous waste remediation bonds.* In the case of an issue of hazardous waste remediation bonds, payments from nongovernmental persons that are either users of the site being remediated or persons potentially responsible for disposing of hazardous waste on that site do not establish that the transaction is a loan for purposes of this section. This paragraph (c)(4) applies only if those payments do not secure the payment of principal of, or interest on, the bonds (directly or indirectly), under the terms of the bonds

and those payments are not taken into account under the private payment test pursuant to § 1.141-4(f)(3).

(d) *Tax assessment loan exception—(1) General rule.* For purposes of this section, a tax assessment loan that satisfies the requirements of this paragraph (d) is not a loan for purposes of the private loan financing test.

(2) *Tax assessment loan defined.* A tax assessment loan is a loan that arises when a governmental person permits or requires property owners to finance any governmental tax or assessment of general application for an essential governmental function that satisfies each of the requirements of paragraphs (d) (3) through (5) of this section.

(3) *Mandatory tax or other assessment.* The tax or assessment must be an enforced contribution that is imposed and collected for the purpose of raising revenue to be used for a specific purpose (that is, to defray the capital cost of an improvement). Taxes and assessments do not include fees for services. The tax or assessment must be imposed pursuant to a state law of general application that can be applied equally to natural persons not acting in a trade or business and persons acting in a trade or business. For this purpose, taxes and assessments that are imposed subject to protest procedures are treated as enforced contributions.

(4) *Specific essential governmental function—(i) In general.* A mandatory tax or assessment that gives rise to a tax assessment loan must be imposed for one or more specific, essential governmental functions.

(ii) *Essential governmental functions.* For purposes of paragraph (d) of this section, improvements to utilities and systems that are owned by a governmental person and that are available for use by the general public (such as sidewalks, streets and street-lights; electric, telephone, and cable television systems; sewage treatment and disposal systems; and municipal water facilities) serve essential governmental functions. For other types of facilities, the extent to which the service provided by the facility is customarily performed (and financed with governmental bonds) by governments with general taxing powers is a primary factor in determining whether the facility

serves an essential governmental function. For example, parks that are owned by a governmental person and that are available for use by the general public serve an essential governmental function. Except as otherwise provided in this paragraph (d)(4)(ii), commercial or industrial facilities and improvements to property owned by a nongovernmental person do not serve an essential governmental

function. Permitting installment payments of property taxes or other taxes is not an essential governmental function.

(5) *Equal basis requirement*—(i) *In general.* Owners of both business and non-business property benefiting from the financed improvements must be eligible, or required, to make deferred payments of the tax or assessment giving rise to a tax assessment loan on an equal basis (the equal basis requirement). A tax or assessment does not satisfy the equal basis requirement if the terms for payment of the tax or assessment are not the same for all taxed or assessed persons. For example, the equal basis requirement is not met if certain property owners are permitted to pay the tax or assessment over a period of years while others must pay the entire tax or assessment immediately or if only certain property owners are required to prepay the tax or assessment when the property is sold.

(ii) *General rule for guarantees.* A guarantee of debt service on bonds, or of taxes or assessments, by a person that is treated as a borrower of bond proceeds violates the equal basis requirement if it is reasonable to expect on the date the guarantee is entered into that payments will be made under the guarantee.

(6) *Coordination with private business tests.* See §§ 1.141-3 and 1.141-4 for rules for determining whether tax assessment loans cause the bonds financing those loans to be private activity bonds under the private business use and the private security or payment tests.

(e) *Examples.* The following examples illustrate the application of this section:

*Example 1.* Turnkey contract not treated as a loan. State agency Z and federal agency H will each contribute to rehabilitate a project owned by Z. H can only provide its funds

through a contribution to Z to be used to acquire the rehabilitated project on a turnkey basis from an approved developer. Under H's turnkey program, the developer must own the project while it is rehabilitated. Z issues its notes to provide funds for construction. A portion of the notes will be retired using the H contribution, and the balance of the notes will be retired through the issuance by Z of long-term bonds. Z lends the proceeds of its notes to Developer B as construction financing and transfers title to B for a nominal amount. The conveyance is made on condition that B rehabilitate the property and reconvey it upon completion, with Z retaining the right to force reconveyance if these conditions are not satisfied. B must name Z as an additional insured on all insurance. Upon completion, B must transfer title to the project back to Z at a set price, which price reflects B's costs and profit, not fair market value. Further, this price is adjusted downward to reflect any cost-underruns. For purposes of section 141(c), this transaction does not involve a private loan.

*Example 2. Essential government function requirement not met.* City D creates a special taxing district consisting of property owned by nongovernmental persons that requires environmental clean-up. D imposes a special tax on each parcel within the district in an amount that is related to the expected environmental clean-up costs of that parcel. The payment of the tax over a 20-year period is treated as a loan by the property owners for purposes of the private loan financing test. The special district issues bonds, acting on behalf of D, that are payable from the special tax levied within the district, and uses the proceeds to pay for the costs of environmental clean-up on the property within the district. The bonds meet the private loan financing test because more than 5 percent of the proceeds of the issue are loaned to nongovernmental persons. The issue does not meet the tax assessment loan exception because the improvements to property owned by a nongovernmental person are not an essential governmental function under section 141(c)(2). The issue also meets the private business tests of section 141(b).

[T.D. 8712, 62 FR 2296, Jan. 16, 1997, as amended by T.D. 9085, 68 FR 45775, Aug. 4, 2003]

#### **§ 1.141-6 Allocation and accounting rules.**

(a) *Allocation of proceeds to expenditures.* For purposes of §§ 1.141-1 through 1.141-15, the provisions of § 1.148-6(d) apply for purposes of allocating proceeds to expenditures. Thus, allocations generally may be made using any reasonable, consistently applied accounting method, and allocations

under section 141 and section 148 must be consistent with each other.

(b) *Allocation of proceeds to property.* [Reserved]

(c) *Special rules for mixed use facilities.* [Reserved]

(d) *Allocation of proceeds to common areas.* [Reserved]

(e) *Allocation of proceeds to bonds.* [Reserved]

(f) *Treatment of partnerships.* [Reserved]

(g) *Examples.* [Reserved]

[T.D. 8712, 62 FR 2297, Jan. 16, 1997]

**§ 1.141-7 Special rules for output facilities.**

(a) *Overview.* This section provides special rules to determine whether arrangements for the purchase of output from an output facility cause an issue of bonds to meet the private business tests. For this purpose, unless otherwise stated, water facilities are treated as output facilities. Sections 1.141-3 and 1.141-4 generally apply to determine whether other types of arrangements for use of an output facility cause an issue to meet the private business tests.

(b) *Definitions.* For purposes of this section and § 1.141-8, the following definitions and rules apply:

(1) *Available output.* The available output of a facility financed by an issue is determined by multiplying the number of units produced or to be produced by the facility in one year by the number of years in the measurement period of that facility for that issue.

(i) *Generating facilities.* The number of units produced or to be produced by a generating facility in one year is determined by reference to its nameplate capacity or the equivalent (or where there is no nameplate capacity or the equivalent, its maximum capacity), which is not reduced for reserves, maintenance or other unutilized capacity.

(ii) *Transmission and other output facilities—(A) In general.* For transmission, distribution, cogeneration, and other output facilities, available output must be measured in a reasonable manner to reflect capacity.

(B) *Electric transmission facilities.* Measurement of the available output of all or a portion of electric transmission

facilities may be determined in a manner consistent with the reporting rules and requirements for transmission networks promulgated by the Federal Energy Regulatory Commission (FERC). For example, for a transmission network, the use of aggregate load and load share ratios in a manner consistent with the requirements of the FERC may be reasonable. In addition, depending on the facts and circumstances, measurement of the available output of transmission facilities using thermal capacity or transfer capacity may be reasonable.

(iii) *Special rule for facilities with significant unutilized capacity.* If an issuer reasonably expects on the issue date that persons that are treated as private business users will purchase more than 30 percent of the actual output of the facility financed with the issue, the Commissioner may determine the number of units produced or to be produced by the facility in one year on a reasonable basis other than by reference to nameplate or other capacity, such as the average expected annual output of the facility. For example, the Commissioner may determine the available output of a financed peaking electric generating unit by reference to the reasonably expected annual output of that unit if the issuer reasonably expects, on the issue date of bonds that finance the unit, that an investor-owned utility will purchase more than 30 percent of the actual output of the facility during the measurement period under a take or pay contract, even if the amount of output purchased is less than 10 percent of the available output determined by reference to nameplate capacity. The reasonably expected annual output of the generating facility must be consistent with the capacity reported for prudent reliability purposes.

(iv) *Special rule for facilities with a limited source of supply.* If a limited source of supply constrains the output of an output facility, the number of units produced or to be produced by the facility must be determined by reasonably taking into account those constraints. For this purpose, a limited source of supply shall include a physical limitation (for example, flow of water), but

not an economic limitation (for example, cost of coal or gas). For example, the available output of a hydroelectric unit must be determined by reference to the reasonably expected annual flow of water through the unit.

(2) *Measurement period.* The measurement period of an output facility financed by an issue is determined under § 1.141-3(g).

(3) *Sale at wholesale.* A sale at wholesale means a sale of output to any person for resale.

(4) *Take contract and take or pay contract.* A *take contract* is an output contract under which a purchaser agrees to pay for the output under the contract if the output facility is capable of providing the output. A *take or pay contract* is an output contract under which a purchaser agrees to pay for the output under the contract, whether or not the output facility is capable of providing the output.

(5) *Requirements contract.* A *requirements contract* is an output contract, other than a take contract or a take or pay contract, under which a nongovernmental person agrees to purchase all or part of its output requirements.

(6) *Nonqualified amount.* The nonqualified amount with respect to an issue is determined under section 141(b)(8).

(c) *Output contracts—(1) General rule.* The purchase pursuant to a contract by a nongovernmental person of available output of an output facility (output contract) financed with proceeds of an issue is taken into account under the private business tests if the purchase has the effect of transferring the benefits of owning the facility and the burdens of paying the debt service on bonds used (directly or indirectly) to finance the facility (the benefits and burdens test). See paragraph (c)(4) of this section for the treatment of an output contract that is properly characterized as a lease for Federal income tax purposes. See paragraphs (d) and (e) of this section for rules regarding measuring the use of, and payments of debt service for, an output facility for determining whether the private business tests are met. See also § 1.141-8 for rules for when an issue that finances an output facility (other than a water

facility) meets the private business tests because the nonqualified amount of the issue exceeds \$15 million.

(2) *Take contract or take or pay contract.* The benefits and burdens test is met if a nongovernmental person agrees pursuant to a take contract or a take or pay contract to purchase available output of a facility.

(3) *Requirements contract—(i) In general.* A requirements contract may satisfy the benefits and burdens test under paragraph (c)(3)(ii) or (iii) of this section. See § 1.141-15(f)(2) for special effective dates for the application of this paragraph (c)(3) to issues financing facilities subject to requirements contracts.

(ii) *Requirements contract similar to take contract or take or pay contract.* A requirements contract generally meets the benefits and burdens test to the extent that it contains contractual terms that obligate the purchaser to make payments that are not contingent on the output requirements of the purchaser or that obligate the purchaser to have output requirements. For example, a requirements contract with an industrial purchaser meets the benefits and burdens test if the purchaser enters into additional contractual obligations with the issuer or another governmental unit not to cease operations. A requirements contract does not meet the benefits and burdens test, however, by reason of a provision that requires the purchaser to pay reasonable and customary damages (including liquidated damages) in the event of a default, or a provision that permits the purchaser to pay a specified amount to terminate the contract while the purchaser has requirements, in each case if the amount of the payment is reasonably related to the purchaser's obligation to buy requirements that is discharged by the payment.

(iii) *Wholesale requirements contract—(A) In general.* A requirements contract that is a sale at wholesale (a *wholesale requirements contract*) may satisfy the benefits and burdens test, depending on all the facts and circumstances.

(B) *Significant factors.* Significant factors that tend to establish that a wholesale requirements contract meets the benefits and burdens test include, but are not limited to—

(1) The term of the contract is substantial relative to the term of the issue or issues that finance the facility; and

(2) The amount of output to be purchased under the contract represents a substantial portion of the available output of the facility.

(C) *Safe harbors.* A wholesale requirements contract does not meet the benefits and burdens test if—

(1) The term of the contract, including all renewal options, does not exceed the lesser of 5 years or 30 percent of the term of the issue; or

(2) The amount of output to be purchased under the contract (and any other requirements contract with the same purchaser or a related party with respect to the facility) does not exceed 5 percent of the available output of the facility.

(iv) *Retail requirements contract.* Except as otherwise provided in this paragraph (c)(3), a requirements contract that is not a sale at wholesale does not meet the benefits and burdens test.

(4) *Output contract properly characterized as a lease.* Notwithstanding any other provision of this section, an output contract that is properly characterized as a lease for Federal income tax purposes shall be tested under the rules contained in §§1.141-3 and 1.141-4 to determine whether it is taken into account under the private business tests.

(d) *Measurement of private business use.* If an output contract results in private business use under this section, the amount of private business use generally is the amount of output purchased under the contract.

(e) *Measurement of private security or payment.* The measurement of payments made or to be made by nongovernmental persons under output contracts as a percent of the debt service of an issue is determined under the rules provided in §1.141-4.

(f) *Exceptions for certain contracts—(1) Small purchases of output.* An output contract for the use of a facility is not taken into account under the private business tests if the average annual payments to be made under the contract do not exceed 1 percent of the average annual debt service on all outstanding tax-exempt bonds issued to fi-

nance the facility, determined as of the effective date of the contract.

(2) *Swapping and pooling arrangements.* An agreement that provides for swapping or pooling of output by one or more governmental persons and one or more nongovernmental persons does not result in private business use of the output facility owned by the governmental person to the extent that—

(i) The swapped output is reasonably expected to be approximately equal in value (determined over periods of three years or less); and

(ii) The purpose of the agreement is to enable each of the parties to satisfy different peak load demands, to accommodate temporary outages, to diversify supply, or to enhance reliability in accordance with prudent reliability standards.

(3) *Short-term output contracts.* An output contract with a nongovernmental person is not taken into account under the private business tests if—

(i) The term of the contract, including all renewal options, is not longer than 3 years;

(ii) The contract either is a negotiated, arm's-length arrangement that provides for compensation at fair market value, or is based on generally applicable and uniformly applied rates; and

(iii) The output facility is not financed for a principal purpose of providing that facility for use by that nongovernmental person.

(4) *Certain conduit parties disregarded.* A nongovernmental person acting solely as a conduit for the exchange of output among governmentally owned and operated utilities is disregarded in determining whether the private business tests are met with respect to financed facilities owned by a governmental person.

(g) *Special rules for electric output facilities used to provide open access—(1) Operation of transmission facilities by nongovernmental persons—(i) In general.* The operation of an electric transmission facility by a nongovernmental person may result in private business use of the facility under §1.141-3 and this section based on all the facts and circumstances. For example, a transmission facility is generally used for a

private business use if a nongovernmental person enters into a contract to operate the facility and receives compensation based, in whole or in part, on a share of net profits from the operation of the facility.

(ii) *Certain use by independent transmission operators.* A contract for the operation of an electric transmission facility by an independent entity, such as a regional transmission organization or an independent system operator (*independent transmission operator*), does not constitute private business use of the facility if—

(A) The facility is owned by a governmental person;

(B) The operation of the facility by the independent transmission operator is approved by the FERC under one or more provisions of the Federal Power Act (16 U.S.C. 791a through 825r) (or by a state authority under comparable provisions of state law);

(C) No portion of the compensation of the independent transmission operator is based on a share of net profits from the operation of the facility; and

(D) The independent transmission operator does not bear risk of loss of the facility.

(2) *Certain use by nongovernmental persons under output contracts—(i) Transmission facilities.* The use of an electric transmission facility by a nongovernmental person pursuant to an output contract does not constitute private business use of the facility if—

(A) The facility is owned by a governmental person;

(B) The facility is operated by an independent transmission operator in a manner that satisfies paragraph (g)(1)(ii) of this section; and

(C) The facility is not financed for a principal purpose of providing that facility for use by that nongovernmental person.

(ii) *Distribution facilities.* The use of an electric distribution facility by a nongovernmental person pursuant to an output contract does not constitute private business use of the facility if—

(A) The facility is owned by a governmental person;

(B) The facility is available for use on a nondiscriminatory, open access basis by buyers and sellers of electricity in accordance with rates that

are generally applicable and uniformly applied within the meaning of § 1.141-3(c)(2); and

(C) The facility is not financed for a principal purpose of providing that facility for use by that nongovernmental person (other than a retail end-user).

(3) *Ancillary services.* The use of an electric output facility to provide ancillary services required to be offered as part of an open access transmission tariff under rules promulgated by the FERC under the Federal Power Act (16 U.S.C. 791a through 825r) (or by a state regulatory authority under comparable provisions of state law) does not result in private business use.

(4) *Exceptions to deliberate action rules—(i) Mandated wheeling.* Entering into a contract for the use of electric transmission or distribution facilities is not treated as a deliberate action under § 1.141-2(d) if—

(A) The contract is entered into in response to (or in anticipation of) an order by the United States under sections 211 and 212 of the Federal Power Act (16 U.S.C. 824j and 824k) (or a state regulatory authority under comparable provisions of state law); and

(B) The terms of the contract are bona fide and arm's-length, and the consideration paid is consistent with the provisions of section 212(a) of the Federal Power Act.

(ii) *Actions taken to implement non-discriminatory, open access.* An action is not treated as a deliberate action under § 1.141-2(d) if it is taken to implement the offering of non-discriminatory, open access tariffs for the use of electric transmission or distribution facilities in a manner consistent with rules promulgated by the FERC under sections 205 and 206 of the Federal Power Act (16 U.S.C. 824d and 824e) (or comparable provisions of state law). This paragraph (g)(4)(ii) does not apply, however, to the sale, exchange, or other disposition (within the meaning of section 1001(a)) of transmission or distribution facilities to a nongovernmental person.

(iii) *Application of reasonable expectations test to certain current refunding bonds.* An action taken or to be taken with respect to electric transmission or distribution facilities refinanced by an issue is not taken into account under

the reasonable expectations test of § 1.141-2(d) if—

(A) The action is described in paragraph (g)(4)(i) or (ii) of this section;

(B) The bonds of the issue are current refunding bonds that refund bonds originally issued before February 23, 1998; and

(C) The weighted average maturity of the refunding bonds is not greater than the remaining weighted average maturity of the prior bonds.

(5) *Additional transactions as permitted by the Commissioner.* The Commissioner may, by published guidance, set forth additional circumstances in which the use of electric output facilities in a restructured electric industry does not constitute private business use.

(h) *Allocations of output facilities and systems—(1) Facts and circumstances analysis.* Whether output sold under an output contract is allocated to a particular facility (for example, a generating unit), to the entire system of the seller of that output (net of any uses of that system output allocated to a particular facility), or to a portion of a facility is based on all the facts and circumstances. Significant factors to be considered in determining the allocation of an output contract to financed property are the following:

(i) The extent to which it is physically possible to deliver output to or from a particular facility or system.

(ii) The terms of a contract relating to the delivery of output (such as delivery limitations and options or obligations to deliver power from additional sources).

(iii) Whether a contract is entered into as part of a common plan of financing for a facility.

(iv) The method of pricing output under the contract, such as the use of market rates rather than rates designed to pay debt service of tax-exempt bonds used to finance a particular facility.

(2) *Illustrations.* The following illustrate the factors set forth in paragraph (h)(1) of this section:

(i) *Physical possibility.* Output from a generating unit that is fed directly into a low voltage distribution system of the owner of that unit and that cannot physically leave that distribution system generally must be allocated to

those receiving electricity through that distribution system. Output may be allocated without regard to physical limitations, however, if exchange or similar agreements provide output to a purchaser where, but for the exchange agreements, it would not be possible for the seller to provide output to that purchaser.

(ii) *Contract terms relating to performance.* A contract to provide a specified amount of electricity from a system, but only when at least that amount of electricity is being generated by a particular unit, is allocated to that unit. For example, a contract to buy 20 MW of system power with a right to take up to 40 percent of the actual output of a specific 50 MW facility whenever total system output is insufficient to meet all of the seller's obligations generally is allocated to the specific facility rather than to the system.

(iii) *Common plan of financing.* A contract entered into as part of a common plan of financing for a facility generally is allocated to the facility if debt service for the issue of bonds is reasonably expected to be paid, directly or indirectly, from payments under the contract.

(iv) *Pricing method.* Pricing based on the capital and generating costs of a particular turbine tends to indicate that output under the contract is properly allocated to that turbine.

(3) *Transmission and distribution contracts.* Whether use under an output contract for transmission or distribution is allocated to a particular facility or to a transmission or distribution network is based on all the facts and circumstances, in a manner similar to paragraphs (h)(1) and (2) of this section. In general, the method used to determine payments under a contract is a more significant contract term for this purpose than nominal contract path. In general, if reasonable and consistently applied, the determination of use of transmission or distribution facilities under an output contract may be based on a method used by third parties, such as reliability councils.

(4) *Allocation of payments.* Payments for output provided by an output facility financed with two or more sources of funding are generally allocated under the rules in § 1.141-4(c).

(i) *Examples.* The following examples illustrate the application of this section:

*Example 1. Joint ownership.* Z, an investor-owned electric utility, and City H agree to construct an electric generating facility of a size sufficient to take advantage of the economies of scale. H will issue \$50 million of its 24-year bonds, and Z will use \$100 million of its funds for construction of a facility they will jointly own as tenants in common. Each of the participants will share in the ownership, output, and operating expenses of the facility in proportion to its contribution to the cost of the facility, that is, one-third by H and two-thirds by Z. H's bonds will be secured by H's ownership interest in the facility and by revenues to be derived from its share of the annual output of the facility. H will need only 50 percent of its share of the annual output of the facility during the first 20 years of operations. It agrees to sell 10 percent of its share of the annual output to Z for a period of 20 years pursuant to a contract under which Z agrees to take that power if available. The facility will begin operation, and Z will begin to receive power, 4 years after the H bonds are issued. The measurement period for the property financed by the issue is 20 years. H also will sell the remaining 40 percent of its share of the annual output to numerous other private utilities under contracts of three years or less that satisfy the exception under paragraph (f)(3) of this section. No other contracts will be executed obligating any person to purchase any specified amount of the power for any specified period of time. No person (other than Z) will make payments that will result in a transfer of the burdens of paying debt service on bonds used directly or indirectly to provide H's share of the facilities. The bonds are not private activity bonds, because H's one-third interest in the facility is not treated as used by the other owners of the facility. Although 10 percent of H's share of the annual output of the facility will be used in the trade or business of Z, a nongovernmental person, under this section, that portion constitutes not more than 10 percent of the available output of H's ownership interest in the facility.

*Example 2. Wholesale requirements contract.*

(i) City J issues 20-year bonds to acquire an electric generating facility having a reasonably expected economic life substantially greater than 20 years and a nameplate capacity of 100 MW. The available output of the facility under paragraph (b)(1) of this section is approximately 17,520,000 MWh (100 MW × 24 hours × 365 days × 20 years). On the issue date, J enters into a contract with T, an investor-owned utility, to provide T with all of its power requirements for a period of 10 years, commencing on the issue date. J reasonably expects that T will actually pur-

chase an average of 30 MW over the 10-year period. The contract is taken into account under the private business tests pursuant to paragraph (c)(3) of this section because the term of the contract is substantial relative to the term of the issue and the amount of output to be purchased is a substantial portion of the available output.

(ii) Under paragraph (d) of this section, the amount of reasonably expected private business use under this contract is approximately 15 percent (30 MW × 24 hours × 365 days × 10 years, or 2,628,000 MWh) of the available output. Accordingly, the issue meets the private business use test. J reasonably expects that the amount to be paid for an average of 30 MW of power (less the operation and maintenance costs directly attributable to generating that 30 MW of power), will be more than 10 percent of debt service on the issue on a present-value basis. Accordingly, the issue meets the private security or payment test because J reasonably expects that payment of more than 10 percent of the debt service will be indirectly derived from payments by T. The bonds are private activity bonds under paragraph (c) of this section. Further, if 15 percent of the sale proceeds of the issue is greater than \$15 million and the issue meets the private security or payment test with respect to the \$15 million output limitation, the bonds are also private activity bonds under section 141(b)(4). See § 1.141-8.

*Example 3. Retail contracts.* (i) State Agency M, a political subdivision, issues bonds in 2003 to finance the construction of a generating facility that will be used to furnish electricity to M's retail customers. In 2007, M enters into a 10-year contract with industrial corporation I. Under the contract, M agrees to supply I with all of its power requirements during the contract term, and I agrees to pay for that power at a negotiated price as it is delivered. The contract does not require I to pay for any power except to the extent I has requirements. In addition, the contract requires I to pay reasonable and customary liquidated damages in the event of a default by I, and permits I to terminate the contract while it has requirements by paying M a specified amount that is a reasonable and customary amount for terminating the contract. Any damages or termination payment by I will be reasonably related to I's obligation to buy requirements that is discharged by the payment. Under paragraph (c)(3) of this section, the contract does not meet the benefits and burdens test. Thus, it is not taken into account under the private business tests.

(ii) The facts are the same as in paragraph (i) of this *Example 3*, except that the contract requires I to make guaranteed minimum payments, regardless of I's requirements, in an amount such that the contract does not meet the exception for small purchases in

paragraph (f)(1) of this section. Under paragraph (c)(3)(ii) of this section, the contract meets the benefits and burdens test because it obligates I to make payments that are not contingent on its output requirements. Thus, it is taken into account under the private business tests.

*Example 4. Allocation of existing contracts to new facilities.* Power Authority K, a political subdivision created by the legislature in State X to own and operate certain power generating facilities, sells all of the power from its existing facilities to four private utility systems under contracts executed in 1999, under which the four systems are required to take or pay for specified portions of the total power output until the year 2029. Existing facilities supply all of the present needs of the four utility systems, but their future power requirements are expected to increase substantially beyond the capacity of K's current generating system. K issues 20-year bonds in 2004 to construct a large generating facility. As part of the financing plan for the bonds, a fifth private utility system contracts with K to take or pay for 15 percent of the available output of the new facility. The balance of the output of the new facility will be available for sale as required, but initially it is not anticipated that there will be any need for that power. The revenues from the contract with the fifth private utility system will be sufficient to pay less than 10 percent of the debt service on the bonds (determined on a present value basis). The balance, which will exceed 10 percent of the debt service on the bonds, will be paid from revenues derived from the contracts with the four systems initially from sale of power produced by the old facilities. The output contracts with all the private utilities are allocated to K's entire generating system. See paragraphs (h)(1) and (2) of this section. Thus, the bonds meet the private business use test because more than 10 percent of the proceeds will be used in the trade or business of a nongovernmental person. In addition, the bonds meet the private security or payment test because payment of more than 10 percent of the debt service, pursuant to underlying arrangements, will be derived from payments in respect of property used for a private business use.

*Example 5. Allocation to displaced resource.* Municipal utility MU, a political subdivision, purchases all of the electricity required to meet the needs of its customers (1,000 MW) from B, an investor-owned utility that operates its own electric generating facilities, under a 50-year take or pay contract. MU does not anticipate that it will require additional electric resources, and any new resources would produce electricity at a higher cost to MU than its cost under its contract with B. Nevertheless, B encourages MU to construct a new generating plant sufficient to meet MU's requirements. MU issues obli-

gations to construct facilities that will produce 1,000 MW of electricity. MU, B, and I, another investor-owned utility, enter into an agreement under which MU assigns to I its rights under MU's take or pay contract with B. Under this arrangement, I will pay MU, and MU will continue to pay B, for the 1,000 MW. I's payments to MU will at least equal the amounts required to pay debt service on MU's bonds. In addition, under paragraph (h)(1)(iii) of this section, the contract among MU, B, and I is entered into as part of a common plan of financing of the MU facilities. Under all the facts and circumstances, MU's assignment to I of its rights under the original take or pay contract is allocable to MU's new facilities under paragraph (h) of this section. Because I is a nongovernmental person, MU's bonds are private activity bonds.

*Example 6. Operation of transmission facilities by regional transmission organization.* (i) Public Power Agency D is a political subdivision that owns and operates electric generation, transmission and distribution facilities. In 2003, D transfers operating control of its transmission system to a regional transmission organization (RTO), a nongovernmental person, pursuant to an operating agreement that is approved by the FERC under sections 205 and 206 of the Federal Power Act. D retains ownership of its facilities. No portion of the RTO's compensation is based on a share of net profits from the operation of D's facilities, and the RTO does not bear any risk of loss of those facilities. Under paragraph (g)(1)(ii) of this section, the RTO's use of D's facilities does not constitute a private business use.

(ii) Company A is located in D's service territory. In 2004, Power Supplier E, a nongovernmental person, enters into a 10-year contract with A to supply A's electricity requirements. The electricity supplied by E to A will be transmitted over D's transmission and distribution facilities. D's distribution facilities are available for use on a non-discriminatory, open access basis by buyers and sellers of electricity in accordance with rates that are generally applicable and uniformly applied within the meaning of § 1.141-3(c)(2). D's facilities are not financed for a principal purpose of providing the facilities for use by E. Under paragraph (g)(2) of this section, the contract between A and E does not result in private business use of D's facilities.

*Example 7. Certain actions not treated as deliberate actions.* The facts are the same as in *Example 6* of this paragraph (i), except that the RTO's compensation is based on a share of net profits from operating D's facilities. In addition, D had issued bonds in 1994 to finance improvements to its transmission system. At the time D transfers operating control of its transmission system to the RTO, D chooses to apply the private activity bond

regulations of §§1.141-1 through 1.141-15 to the 1994 bonds. The operation of D's facilities by the RTO results in private business use under §1.141-3 and paragraph (g)(1)(i) of this section. Under the special exception in paragraph (g)(4)(ii) of this section, however, the transfer of control is not treated as a deliberate action. Accordingly, the transfer of control does not cause the 1994 bonds to meet the private activity bond tests.

*Example 8. Current refunding.* The facts are the same as in *Example 7* of this paragraph (i), and in addition D issues bonds in 2004 to currently refund the 1994 bonds. The weighted average maturity of the 2004 bonds is not greater than the remaining weighted average maturity of the 1994 bonds. D chooses to apply the private activity bond regulations of §§1.141-1 through 1.141-15 to the refunding bonds. In general, reasonable expectations must be separately tested on the date that refunding bonds are issued under §1.141-2(d). Under the special exception in paragraph (g)(4)(iii) of this section, however, the transfer of the financed facilities to the RTO need not be taken into account in applying the reasonable expectations test to the refunding bonds.

[T.D. 9016, 67 FR 59759, Sept. 23, 2002; 67 FR 70845, Nov. 27, 2002]

**§ 1.141-8 \$15 million limitation for output facilities.**

(a) *In general*—(1) *General rule.* Section 141(b)(4) provides a special private activity bond limitation (the \$15 million output limitation) for issues 5 percent or more of the proceeds of which are to be used to finance output facilities (other than a facility for the furnishing of water). Under this rule, an issue consists of private activity bonds under the private business tests of section 141(b)(1) and (2) if the nonqualified amount with respect to output facilities financed by the proceeds of the issue exceeds \$15 million. The \$15 million output limitation applies in addition to the private business tests of section 141(b)(1) and (2). Under section 141(b)(4) and paragraph (a)(2) of this section, the \$15 million output limitation is reduced in certain cases. Specifically, an issue meets the test in section 141(b)(4) if both of the following tests are met:

(i) More than \$15 million of the proceeds of the issue to be used with respect to an output facility are to be used for a private business use. Investment proceeds are disregarded for this purpose if they are not allocated dis-

proportionately to the private business use portion of the issue.

(ii) The payment of the principal of, or the interest on, more than \$15 million of the sale proceeds of the portion of the issue used with respect to an output facility is (under the terms of the issue or any underlying arrangement) directly or indirectly—

(A) Secured by any interest in an output facility used or to be used for a private business use (or payments in respect of such an output facility); or

(B) To be derived from payments (whether or not to the issuer) in respect of an output facility used or to be used for a private business use.

(2) *Reduction in \$15 million output limitation for outstanding issues*—(i) *General rule.* In determining whether an issue 5 percent or more of the proceeds of which are to be used with respect to an output facility consists of private activity bonds under the \$15 million output limitation, the \$15 million limitation on private business use and private security or payments is applied by taking into account the aggregate non-qualified amounts of any outstanding bonds of other issues 5 percent or more of the proceeds of which are or will be used with respect to that output facility or any other output facility that is part of the same project.

(ii) *Bonds taken into account.* For purposes of this paragraph (a)(2), in applying the \$15 million output limitation to an issue (the later issue), a tax-exempt bond of another issue (the earlier issue) is taken into account if—

(A) That bond is outstanding on the issue date of the later issue;

(B) That bond will not be redeemed within 90 days of the issue date of the later issue in connection with the refunding of that bond by the later issue; and

(C) 5 percent or more of the sale proceeds of the earlier issue financed an output facility that is part of the same project as the output facility that is financed by 5 percent or more of the sale proceeds of the later issue.

(3) *Benefits and burdens test applicable*—(i) *In general.* In applying the \$15 million output limitation, the benefits and burdens test of §1.141-7 applies, except that “\$15 million” is applied in

place of “10 percent”, or “5 percent” as appropriate.

(ii) *Earlier issues for the project.* If bonds of an earlier issue are outstanding and must be taken into account under paragraph (a)(2) of this section, the nonqualified amount for that earlier issue is multiplied by a fraction, the numerator of which is the adjusted issue price of the earlier issue as of the issue date of the later issue, and the denominator of which is the issue price of the earlier issue. Pre-issuance accrued interest as defined in § 1.148-1(b) is disregarded for this purpose.

(b) *Definition of project*—(1) *General rule.* For purposes of paragraph (a)(2) of this section, *project* has the meaning provided in this paragraph. Facilities that are functionally related and subordinate to a project are treated as part of that same project. Facilities having different purposes or serving different customer bases are not ordinarily part of the same project. For example, the following are generally not part of the same project—

(i) Generation, transmission and distribution facilities;

(ii) Separate facilities designed to serve wholesale customers and retail customers; and

(iii) A peaking unit and a baseload unit (regardless of the location of the units).

(2) *Separate ownership.* Except as otherwise provided in this paragraph (b)(2), facilities that are not owned by the same person are not part of the same project. If different governmental persons act in concert to finance a project, however (for example as participants in a joint powers authority), their interests are aggregated with respect to that project to determine whether the \$15 million output limitation is met. In the case of undivided ownership interests in a single output facility, property that is not owned by different persons is treated as separate projects only if the separate interests are financed—

(i) With bonds of different issuers; and

(ii) Without a principal purpose of avoiding the limitation in this section.

(3) *Generating property*—(i) *Property on same site.* In the case of generation

and related facilities, *project* means property located at the same site.

(ii) *Special rule for generating units.* Separate generating units are not part of the same project if one unit is reasonably expected, on the issue date of each issue that finances the units, to be placed in service more than 3 years before the other. Common facilities or property that will be functionally related to more than one generating unit must be allocated on a reasonable basis. If a generating unit already is constructed or is under construction (the first unit) and bonds are to be issued to finance an additional generating unit (the second unit), all costs for any common facilities paid or incurred before the earlier of the issue date of bonds to finance the second unit or the commencement of construction of the second unit are allocated to the first unit. At the time that bonds are issued to finance the second unit (or, if earlier, upon commencement of construction of that unit), any remaining costs of the common facilities may be allocated between the first and second units so that in the aggregate the allocation is reasonable.

(4) *Transmission and distribution.* In the case of transmission or distribution facilities, *project* means functionally related or contiguous property. Separate transmission or distribution facilities are not part of the same project if one facility is reasonably expected, on the issue date of each issue that finances the facilities, to be placed in service more than 2 years before the other.

(5) *Subsequent improvements*—(i) In general. An improvement to generation, transmission or distribution facilities that is not part of the original design of those facilities (the original project) is not part of the same project as the original project if the construction, reconstruction, or acquisition of that improvement commences more than 3 years after the original project was placed in service and the bonds issued to finance that improvement are issued more than 3 years after the original project was placed in service.

(ii) *Special rule for transmission and distribution facilities.* An improvement

to transmission or distribution facilities that is not part of the original design of that property is not part of the same project as the original project if the issuer did not reasonably expect the need to make that improvement when it commenced construction of the original project and the construction, reconstruction, or acquisition of that improvement is mandated by the federal government or a state regulatory authority to accommodate requests for wheeling.

(6) *Replacement property.* For purposes of this section, property that replaces existing property of an output facility is treated as part of the same project as the replaced property unless—

(i) The need to replace the property was not reasonably expected on the issue date or the need to replace the property occurred more than 3 years before the issuer reasonably expected (determined on the issue date of the bonds financing the property) that it would need to replace the property; and

(ii) The bonds that finance (and refinance) the output facility have a weighted average maturity that is not greater than 120 percent of the reasonably expected economic life of the facility.

(c) *Example.* The application of the provisions of this section is illustrated by the following example:

*Example.* (i) Power Authority K, a political subdivision, intends to issue a single issue of tax-exempt bonds at par with a stated principal amount and sale proceeds of \$500 million to finance the acquisition of an electric generating facility. No portion of the facility will be used for a private business use, except that L, an investor-owned utility, will purchase 10 percent of the output of the facility under a take contract and will pay 10 percent of the debt service on the bonds. The non-qualified amount with respect to the bonds is \$50 million.

(ii) The maximum amount of tax-exempt bonds that may be issued for the acquisition of an interest in the facility in paragraph (i) of this *Example* is \$465 million (that is, \$450 million for the 90 percent of the facility that is governmentally owned and used plus a nonqualified amount of \$15 million).

[T.D. 9016, 67 FR 59763, Sept. 23, 2002]

**§ 1.141-9 Unrelated or disproportionate use test.**

(a) *General rules—(1) Description of test.* Under section 141(b)(3) (the unre-

lated or disproportionate use test), an issue meets the private business tests if the amount of private business use and private security or payments attributable to unrelated or disproportionate private business use exceeds 5 percent of the proceeds of the issue. For this purpose, the private business use test is applied by taking into account only use that is not related to any government use of proceeds of the issue (unrelated use) and use that is related but disproportionate to any government use of those proceeds (disproportionate use).

(2) *Application of unrelated or disproportionate use test—(i) Order of application.* The unrelated or disproportionate use test is applied by first determining whether a private business use is related to a government use. Next, private business use that relates to a government use is examined to determine whether it is disproportionate to that government use.

(ii) *Aggregation of unrelated and disproportionate use.* All the unrelated use and disproportionate use financed with the proceeds of an issue are aggregated to determine compliance with the unrelated or disproportionate use test. The amount of permissible unrelated and disproportionate private business use is not reduced by the amount of private business use financed with the proceeds of an issue that is neither unrelated use nor disproportionate use.

(iii) *Deliberate actions.* A deliberate action that occurs after the issue date does not result in unrelated or disproportionate use if the issue meets the conditions of § 1.141-12(a).

(b) *Unrelated use—(1) In general.* Whether a private business use is related to a government use financed with the proceeds of an issue is determined on a case-by-case basis, emphasizing the operational relationship between the government use and the private business use. In general, a facility that is used for a related private business use must be located within, or adjacent to, the governmentally used facility.

(2) *Use for the same purpose as government use.* Use of a facility by a non-governmental person for the same purpose as use by a governmental person is not treated as unrelated use if the

government use is not insignificant. Similarly, a use of a facility in the same manner both for private business use that is related use and private business use that is unrelated use does not result in unrelated use if the related use is not insignificant. For example, a privately owned pharmacy in a governmentally owned hospital does not ordinarily result in unrelated use solely because the pharmacy also serves individuals not using the hospital. In addition, use of parking spaces in a garage by a nongovernmental person is not treated as unrelated use if more than an insignificant portion of the parking spaces are used for a government use (or a private business use that is related to a government use), even though the use by the nongovernmental person is not directly related to that other use.

(c) *Disproportionate use*—(1) *Definition of disproportionate use.* A private business use is disproportionate to a related government use only to the extent that the amount of proceeds used for that private business use exceeds the amount of proceeds used for the related government use. For example, a private use of \$100 of proceeds that is related to a government use of \$70 of proceeds results in \$30 of disproportionate use.

(2) *Aggregation of related uses.* If two or more private business uses of the proceeds of an issue relate to a single government use of those proceeds, those private business uses are aggregated to apply the disproportionate use test.

(3) *Allocation rule.* If a private business use relates to more than a single use of the proceeds of the issue (for example, two or more government uses of the proceeds of the issue or a government use and a private use), the amount of any disproportionate use may be determined by—

(i) Reasonably allocating the proceeds used for the private business use among the related uses;

(ii) Aggregating government uses that are directly related to each other; or

(iii) Allocating the private business use to the government use to which it is primarily related.

(d) *Maximum use taken into account.* The determination of the amount of unrelated use or disproportionate use of a facility is based on the maximum amount of reasonably expected government use of a facility during the measurement period. Thus, no unrelated use or disproportionate use arises solely because a facility initially has excess capacity that is to be used by a nongovernmental person if the facility will be completely used by the issuer during the term of the issue for more than an insignificant period.

(e) *Examples.* The following examples illustrate the application of this section:

*Example 1. School and remote cafeteria.* County X issues bonds with proceeds of \$20 million and uses \$18.1 million of the proceeds for construction of a new school building and \$1.9 million of the proceeds for construction of a privately operated cafeteria in its administrative office building, which is located at a remote site. The bonds are secured, in part, by the cafeteria. The \$1.9 million of proceeds is unrelated to the government use (that is, school construction) financed with the bonds and exceeds 5 percent of \$20 million. Thus, the issue meets the private business tests.

*Example 2. Public safety building and courthouse.* City Y issues bonds with proceeds of \$50 million for construction of a new public safety building (\$32 million) and for improvements to an existing courthouse (\$15 million). Y uses \$3 million of the bond proceeds for renovations to an existing privately operated cafeteria located in the courthouse. The bonds are secured, in part, by the cafeteria. Y's use of the \$3 million for the privately operated cafeteria does not meet the unrelated or disproportionate use test because these expenditures are neither unrelated use nor disproportionate use.

*Example 3. Unrelated garage.* City Y issues bonds with proceeds of \$50 million for construction of a new public safety building (\$30.5 million) and for improvements to an existing courthouse (\$15 million). Y uses \$3 million of the bond proceeds for renovations to an existing privately operated cafeteria located in the courthouse. The bonds are secured, in part, by the cafeteria. Y also uses \$1.5 million of the proceeds to construct a privately operated parking garage adjacent to a private office building. The private business use of the parking garage is unrelated to any government use of proceeds of the issue. Since the proceeds used for unrelated uses and disproportionate uses do not exceed 5 percent of the proceeds, the unrelated or disproportionate use test is not met.

**§ 1.141-10**

*Example 4. Disproportionate use of garage.* County Z issues bonds with proceeds of \$20 million for construction of a hospital with no private business use (\$17 million); renovation of an office building with no private business use (\$1 million); and construction of a garage that is entirely used for a private business use (\$2 million). The use of the garage is related to the use of the office building but not to the use of the hospital. The private business use of the garage results in \$1 million of disproportionate use because the proceeds used for the garage (\$2 million) exceed the proceeds used for the related government use (\$1 million). The bonds are not private activity bonds, however, because the disproportionate use does not exceed 5 percent of the proceeds of the issue.

*Example 5. Bonds for multiple projects.* (i) County W issues bonds with proceeds of \$80 million for the following purposes: (1) \$72 million to construct a County-owned and operated waste incinerator; (2) \$1 million for a County-owned and operated facility for the temporary storage of hazardous waste prior to final disposal; (3) \$1 million to construct a privately owned recycling facility located at a remote site; and (4) \$6 million to build a garage adjacent to the County-owned incinerator that will be leased to Company T to store and repair trucks that it owns and uses to haul County W refuse. Company T uses 75 percent of its trucks to haul materials to the incinerator and the remaining 25 percent of its trucks to haul materials to the temporary storage facility.

(ii) The \$1 million of proceeds used for the recycling facility is used for an unrelated use. The garage is related use. In addition, 75 percent of the use of the \$6 million of proceeds used for the garage is allocable to the government use of proceeds at the incinerator. The remaining 25 percent of the proceeds used for the garage (\$1.5 million) relates to the government use of proceeds at the temporary storage facility. Thus, this portion of the proceeds used for the garage exceeds the proceeds used for the temporary storage facility by \$0.5 million and this excess is disproportionate use (but not unrelated use). Thus, the aggregate amount of unrelated use and disproportionate use financed with the proceeds of the issue is \$1.5 million. Alternatively, under paragraph (c)(3)(iii) of this section, the entire garage may be treated as related to the government use of the incinerator and, under that allocation, the garage is not disproportionate use. In either event, section 141(b)(3) limits the aggregate unrelated use and disproportionate use to \$4 million. Therefore, the bonds are not private activity bonds under this section.

[T.D. 8712, 62 FR 2297, Jan. 16, 1997]

**26 CFR Ch. I (4-1-06 Edition)**

**§ 1.141-10 Coordination with volume cap. [Reserved]**

**§ 1.141-11 Acquisition of nongovernmental output property. [Reserved]**

**§ 1.141-12 Remedial actions.**

(a) *Conditions to taking remedial action.* An action that causes an issue to meet the private business tests or the private loan financing test is not treated as a deliberate action if the issuer takes a remedial action described in paragraph (d), (e), or (f) of this section with respect to the nonqualified bonds and if all of the requirements in paragraphs (a) (1) through (5) of this section are met.

(1) *Reasonable expectations test met.* The issuer reasonably expected on the issue date that the issue would meet neither the private business tests nor the private loan financing test for the entire term of the bonds. For this purpose, if the issuer reasonably expected on the issue date to take a deliberate action prior to the final maturity date of the issue that would cause either the private business tests or the private loan financing test to be met, the term of the bonds for this purpose may be determined by taking into account a redemption provision if the provisions of § 1.141-2(d)(2)(ii) (A) through (C) are met.

(2) *Maturity not unreasonably long.* The term of the issue must not be longer than is reasonably necessary for the governmental purposes of the issue (within the meaning of § 1.148-1(c)(4)). Thus, this requirement is met if the weighted average maturity of the bonds of the issue is not greater than 120 percent of the average reasonably expected economic life of the property financed with the proceeds of the issue as of the issue date.

(3) *Fair market value consideration.* Except as provided in paragraph (f) of this section, the terms of any arrangement that results in satisfaction of either the private business tests or the private loan financing test are bona fide and arm's-length, and the new user pays fair market value for the use of

the financed property. Thus, for example, fair market value may be determined in a manner that takes into account restrictions on the use of the financed property that serve a bona fide governmental purpose.

(4) *Disposition proceeds treated as gross proceeds for arbitrage purposes.* The issuer must treat any disposition proceeds as gross proceeds for purposes of section 148. For purposes of eligibility for temporary periods under section 148(c) and exemptions from the requirement of section 148(f) the issuer may treat the date of receipt of the disposition proceeds as the issue date of the bonds and disregard the receipt of disposition proceeds for exemptions based on expenditure of proceeds under § 1.148-7 that were met before the receipt of the disposition proceeds.

(5) *Proceeds expended on a governmental purpose.* Except for a remedial action under paragraph (d) of this section, the proceeds of the issue that are affected by the deliberate action must have been expended on a governmental purpose before the date of the deliberate action.

(b) *Effect of a remedial action—(1) In general.* The effect of a remedial action is to cure use of proceeds that causes the private business use test or the private loan financing test to be met. A remedial action does not affect application of the private security or payment test.

(2) *Effect on bonds that have been advance refunded.* If proceeds of an issue were used to advance refund another bond, a remedial action taken with respect to the refunding bond proportionately reduces the amount of proceeds of the advance refunded bond that is taken into account under the private business use test or the private loan financing test.

(c) *Disposition proceeds—(1) Definition.* *Disposition proceeds* are any amounts (including property, such as an agreement to provide services) derived from the sale, exchange, or other disposition (disposition) of property (other than investments) financed with the proceeds of an issue.

(2) *Allocating disposition proceeds to an issue.* In general, if the requirements of paragraph (a) of this section are met, after the date of the disposition, the

proceeds of the issue allocable to the transferred property are treated as financing the disposition proceeds rather than the transferred property. If a disposition is made pursuant to an installment sale, the proceeds of the issue continue to be allocated to the transferred property. If an issue does not meet the requirements for remedial action in paragraph (a) of this section or the issuer does not take an appropriate remedial action, the proceeds of the issue are allocable to either the transferred property or the disposition proceeds, whichever allocation produces the greater amount of private business use and private security or payments.

(3) *Allocating disposition proceeds to different sources of funding.* If property has been financed by different sources of funding, for purposes of this section, the disposition proceeds from that property are first allocated to the outstanding bonds that financed that property in proportion to the principal amounts of those outstanding bonds. In no event may disposition proceeds be allocated to bonds that are no longer outstanding or to a source of funding not derived from a borrowing (such as revenues of the issuer) if the disposition proceeds are not greater than the total principal amounts of the outstanding bonds that are allocable to that property. For purposes of this paragraph (c)(3), principal amount has the same meaning as in § 1.148-9(b)(2) and outstanding bonds do not include advance refunded bonds.

(d) *Redemption or defeasance of nonqualified bonds—(1) In general.* The requirements of this paragraph (d) are met if all of the nonqualified bonds of the issue are redeemed. Proceeds of tax-exempt bonds must not be used for this purpose, unless the tax-exempt bonds are qualified bonds, taking into account the purchaser's use of the facility. If the bonds are not redeemed within 90 days of the date of the deliberate action, a defeasance escrow must be established for those bonds within 90 days of the deliberate action.

(2) *Special rule for dispositions for cash.* If the consideration for the disposition of financed property is exclusively cash, the requirements of this paragraph (d) are met if the disposition proceeds are used to redeem a pro rata

portion of the nonqualified bonds at the earliest call date after the deliberate action. If the bonds are not redeemed within 90 days of the date of the deliberate action, the disposition proceeds must be used to establish a defeasance escrow for those bonds within 90 days of the deliberate action.

(3) *Notice of defeasance.* The issuer must provide written notice to the Commissioner of the establishment of the defeasance escrow within 90 days of the date the defeasance escrow is established.

(4) *Special limitation.* The establishment of a defeasance escrow does not satisfy the requirements of this paragraph (d) if the period between the issue date and the first call date of the bonds is more than 10 1/2 years.

(5) *Defeasance escrow defined.* A defeasance escrow is an irrevocable escrow established to redeem bonds on their earliest call date in an amount that, together with investment earnings, is sufficient to pay all the principal of, and interest and call premium on, bonds from the date the escrow is established to the earliest call date. The escrow may not be invested in higher yielding investments or in any investment under which the obligor is a user of the proceeds of the bonds.

(e) *Alternative use of disposition proceeds—(1) In general.* The requirements of this paragraph (e) are met if—

(i) The deliberate action is a disposition for which the consideration is exclusively cash;

(ii) The issuer reasonably expects to expend the disposition proceeds within two years of the date of the deliberate action;

(iii) The disposition proceeds are treated as proceeds for purposes of section 141 and are used in a manner that does not cause the issue to meet either the private business tests or the private loan financing test, and the issuer does not take any action subsequent to the date of the deliberate action to cause either of these tests to be met; and

(iv) If the issuer does not use all of the disposition proceeds for an alternative use described in paragraph (e)(1)(iii) of this section, the issuer uses those remaining disposition proceeds

for a remedial action that meets paragraph (d) of this section.

(2) *Special rule for use by 501(c)(3) organizations.* If the disposition proceeds are to be used by a 501(c)(3) organization, the nonqualified bonds must in addition be treated as reissued for purposes of sections 141, 145, 147, 149, and 150 and, under this treatment, satisfy all of the applicable requirements for qualified 501(c)(3) bonds. Thus, beginning on the date of the deliberate action, nonqualified bonds that satisfy these requirements must be treated as qualified 501(c)(3) bonds for all purposes, including sections 145(b) and 150(b).

(f) *Alternative use of facility.* The requirements of this paragraph (f) are met if—

(1) The facility with respect to which the deliberate action occurs is used in an alternative manner (for example, used for a qualifying purpose by a non-governmental person or used by a 501(c)(3) organization rather than a governmental person);

(2) The nonqualified bonds are treated as reissued, as of the date of the deliberate action, for purposes of sections 55 through 59 and 141, 142, 144, 145, 146, 147, 149 and 150, and under this treatment, the nonqualified bonds satisfy all the applicable requirements for qualified bonds throughout the remaining term of the nonqualified bonds;

(3) The deliberate action does not involve a disposition to a purchaser that finances the acquisition with proceeds of another issue of tax-exempt bonds; and

(4) Any disposition proceeds other than those arising from an agreement to provide services (including disposition proceeds from an installment sale) resulting from the deliberate action are used to pay the debt service on the bonds on the next available payment date or, within 90 days of receipt, are deposited into an escrow that is restricted to the yield on the bonds to pay the debt service on the bonds on the next available payment date.

(g) *Rules for deemed reissuance.* For purposes of determining whether bonds that are treated as reissued under paragraphs (e) and (f) of this section are qualified bonds—

(1) The provisions of the Code and regulations thereunder in effect as of the date of the deliberate action apply; and

(2) For purposes of paragraph (f) of this section, section 147(d) (relating to the acquisition of existing property) does not apply.

(h) *Authority of Commissioner to provide for additional remedial actions.* The Commissioner may, by publication in the FEDERAL REGISTER or the Internal Revenue Bulletin, provide additional remedial actions, including making a remedial payment to the United States, under which a subsequent action will not be treated as a deliberate action for purposes of § 1.141-2.

(i) *Effect of remedial action on continuing compliance.* Solely for purposes of determining whether deliberate actions that are taken after a remedial action cause an issue to meet the private business tests or the private loan financing test—

(1) If a remedial action is taken under paragraph (d), (e), or (f) of this section, the private business use or private loans resulting from the deliberate action are not taken into account for purposes of determining whether the bonds are private activity bonds; and

(2) After a remedial action is taken, the amount of disposition proceeds is treated as equal to the proceeds of the issue that had been allocable to the transferred property immediately prior to the disposition. See paragraph (k) of this section, *Example 5*.

(j) *Nonqualified bonds*—(1) *Amount of nonqualified bonds.* The percentage of outstanding bonds that are nonqualified bonds equals the highest percentage of private business use in any 1-year period commencing with the deliberate action.

(2) *Allocation of nonqualified bonds.* Allocations to nonqualified bonds must be made on a pro rata basis, except that, for purposes of paragraph (d) of this section (relating to redemption or defeasance), an issuer may treat bonds with longer maturities (determined on a bond-by-bond basis) as the nonqualified bonds.

(k) *Examples.* The following examples illustrate the application of this section:

*Example 1. Disposition proceeds less than outstanding bonds used to retire bonds.* On June 1, 1997, City C issues 30-year bonds with an issue price of \$10 million to finance the construction of a hospital building. The bonds have a weighted average maturity that does not exceed 120 percent of the reasonably expected economic life of the building. On the issue date, C reasonably expects that it will be the only user of the building for the entire term of the bonds. Six years after the issue date, C sells the building to Corporation P for \$5 million. The sale price is the fair market value of the building, as verified by an independent appraiser. C uses all of the \$5 million disposition proceeds to immediately retire a pro rata portion of the bonds. The sale does not cause the bonds to be private activity bonds because C has taken a remedial action described in paragraph (d) of this section so that P is not treated as a private business user of bond proceeds.

*Example 2. Lease to nongovernmental person.* The facts are the same as in *Example 1*, except that instead of selling the building, C, 6 years after the issue date, leases the building to P for 7 years and uses other funds to redeem all of the \$10 million outstanding bonds within 90 days of the deliberate act. The bonds are not treated as private activity bonds because C has taken the remedial action described in paragraph (d) of this section.

*Example 3. Sale for less than fair market value.* The facts are the same as in *Example 1*, except that the fair market value of the building at the time of the sale to P is \$6 million. Because the transfer was for less than fair market value, the bonds are ineligible for the remedial actions under this section. The bonds are private activity bonds because P is treated as a user of all of the proceeds and P makes a payment (\$6 million) for this use that is greater than 10 percent of the debt service on the bonds, on a present value basis.

*Example 4. Fair market value determined taking into account governmental restrictions.* The facts are the same as in *Example 1*, except that the building was used by C only for hospital purposes and C determines to sell the building subject to a restriction that it be used only for hospital purposes. After conducting a public bidding procedure as required by state law, the best price that C is able to obtain for the building subject to this restriction is \$4.5 million from P. C uses all of the \$4.5 million disposition proceeds to immediately retire a pro rata portion of the bonds. The sale does not cause the bonds to be private activity bonds because C has taken a remedial action described in paragraph (d) of this section so that P is not treated as a private business user of bond proceeds.

*Example 5. Alternative use of disposition proceeds.* The facts are the same as in *Example 1*,

except that C reasonably expects on the date of the deliberate action to use the \$5 million disposition proceeds for another governmental purpose (construction of governmentally owned roads) within two years of receipt, rather than using the \$5 million to redeem outstanding bonds. C treats these disposition proceeds as gross proceeds for purposes of section 148. The bonds are not private activity bonds because C has taken a remedial action described in paragraph (e) of this section. After the date of the deliberate action, the proceeds of all of the outstanding bonds are treated as used for the construction of the roads, even though only \$5 million of disposition proceeds was actually used for the roads.

*Example 6. Alternative use of financed property.* The facts are the same as in *Example 1*, except that C determines to lease the hospital building to Q, an organization described in section 501(c)(3), for a term of 10 years rather than to sell the building to P. In order to induce Q to provide hospital services, C agrees to lease payments that are less than fair market value. Before entering into the lease, an applicable elected representative of C approves the lease after a noticed public hearing. As of the date of the deliberate action, the issue meets all the requirements for qualified 501(c)(3) bonds, treating the bonds as reissued on that date. For example, the issue meets the two percent restriction on use of proceeds of finance issuance costs of section 147(g) because the issue pays no costs of issuance from disposition proceeds in connection with the deemed reissuance. C and Q treat the bonds as qualified 501(c)(3) bonds for all purposes commencing with the date of the deliberate action. The bonds are treated as qualified 501(c)(3) bonds commencing with the date of the deliberate action.

*Example 7. Deliberate action before proceeds are expended on a governmental purpose.* County J issues bonds with proceeds of \$10 million that can be used only to finance a correctional facility. On the issue date of the bonds, J reasonably expects that it will be the sole user of the bonds for the useful life of the facility. The bonds have a weighted average maturity that does not exceed 120 percent of the reasonably expected economic life of the facility. After the issue date of the bonds, but before the facility is placed in service, J enters into a contract with the federal government pursuant to which the federal government will make a fair market value, lump sum payment equal to 25 percent of the cost of the facility. In exchange for this payment, J provides the federal government with priority rights to use of 25 percent of the facility. J uses the payment received from the federal government to defease the nonqualified bonds. The agreement does not cause the bonds to be private activity bonds because J has taken a remedial action de-

scribed in paragraph (d) of this section. See paragraph (a)(5) of this section.

*Example 8. Compliance after remedial action.* In 1997, City G issues bonds with proceeds of \$10 million to finance a courthouse. The bonds have a weighted average maturity that does not exceed 120 percent of the reasonably expected economic life of the courthouse. G uses \$1 million of the proceeds for a private business use and more than 10 percent of the debt service on the issue is secured by private security or payments. G later sells one-half of the courthouse property to a nongovernmental person for cash. G immediately redeems 60 percent of the outstanding bonds. This percentage of outstanding bonds is based on the highest private business use of the courthouse in any 1-year period commencing with the deliberate action. For purposes of subsequently applying section 141 to the issue, G may continue to use all of the proceeds of the outstanding bonds in the same manner (that is, for both the courthouse and the existing private business use) without causing the issue to meet the private business use test. The issue, however, continues to meet the private security or payment test. The result would be the same if D, instead of redeeming the bonds, established a defeasance escrow for those bonds, provided that the requirement of paragraph (d)(4) of this section was met.

[T.D. 8712, 62 FR 2298, Jan. 16, 1997]

### § 1.141-13 Refunding issues.

(a) *In general.* Except as provided in this section, a refunding issue and a prior issue are tested separately under section 141. Thus, the determination of whether a refunding issue consists of private activity bonds generally does not depend on whether the prior issue consists of private activity bonds.

(b) *Application of private business use test and private loan financing test—(1) Allocation of proceeds.* In applying the private business use test and the private loan financing test to a refunding issue, the proceeds of the refunding issue are allocated to the same expenditures and purpose investments as the proceeds of the prior issue.

(2) *Determination of amount of private business use—(i) In general.* Except as provided in paragraph (b)(2)(ii) of this section, the amount of private business use of a refunding issue is determined under § 1.141-3(g), based on the measurement period for that issue (for example, without regard to any private business use that occurred prior to the issue date of the refunding issue).

(ii) *Refundings of governmental bonds.* In applying the private business use test to a refunding issue that refunds a prior issue of governmental bonds, the amount of private business use of the refunding issue is the amount of private business use—

(A) During the combined measurement period; or

(B) At the option of the issuer, during the period described in paragraph (b)(2)(i) of this section, but only if, without regard to the reasonable expectations test of § 1.141-2(d), the prior issue does not satisfy the private business use test, based on a measurement period that begins on the first day of the combined measurement period and ends on the issue date of the refunding issue.

(iii) *Combined measurement period—(A) In general.* Except as provided in paragraph (b)(2)(iii)(B) of this section, the *combined measurement period* is the period that begins on the first day of the measurement period (as defined in § 1.141-3(g)) for the prior issue (or, in the case of a series of refundings of governmental bonds, the first issue of governmental bonds in the series) and ends on the last day of the measurement period for the refunding issue.

(B) *Transition rule for refundings of bonds originally issued before May 16, 1997.* If the prior issue (or, in the case of a series of refundings of governmental bonds, the first issue of governmental bonds in the series) was issued before May 16, 1997, then the issuer, at its option, may treat the combined measurement period as beginning on the date (the transition date) that is the earlier of December 19, 2005 or the first date on which the prior issue (or an earlier issue in the case of a series of refundings of governmental bonds) became subject to the 1997 regulations (as defined in § 1.141-15(b)). If the issuer treats the combined measurement period as beginning on the transition date in accordance with this paragraph (b)(2)(iii)(B), then paragraph (c)(2) of this section shall be applied by treating the transition date as the issue date of the earliest issue, by treating the bonds as reissued on the transition date at an issue price equal to the value of the bonds (as determined under § 1.148-4(e)) on that date, and by

disregarding any private security or private payments before the transition date.

(iv) *Governmental bond.* For purposes of this section, the term *governmental bond* means any bond that, when issued, purported to be a governmental bond, as defined in § 1.150-1(b), or a qualified 501(c)(3) bond, as defined in section 145(a).

(v) *Special rule for refundings of qualified 501(c)(3) bonds with governmental bonds.* For purposes of applying this paragraph (b)(2) to a refunding issue that refunds a qualified 501(c)(3) bond, any use of the property refinanced by the refunding issue before the issue date of the refunding issue by a 501(c)(3) organization with respect to its activities that do not constitute an unrelated trade or business under section 513(a) is treated as government use.

(c) *Application of private security or payment test—(1) Separate issue treatment.* If the amount of private business use of a refunding issue is determined based on the measurement period for that issue in accordance with paragraph (b)(2)(i) or (b)(2)(ii)(B) of this section, then the amount of private security and private payments allocable to the refunding issue is determined under § 1.141-4 by treating the refunding issue as a separate issue.

(2) *Combined issue treatment.* If the amount of private business use of a refunding issue is determined based on the combined measurement period for that issue in accordance with paragraph (b)(2)(ii)(A) of this section, then the amount of private security and private payments allocable to the refunding issue is determined under § 1.141-4 by treating the refunding issue and all earlier issues taken into account in determining the combined measurement period as a combined issue. For this purpose, the present value of the private security and private payments is compared to the present value of the debt service on the combined issue (other than debt service paid with proceeds of any refunding bond). Present values are computed as of the issue date of the earliest issue taken into account in determining the combined measurement period (the earliest issue). Except as provided in paragraph

(c)(3) of this section, present values are determined by using the yield on the combined issue as the discount rate. The yield on the combined issue is determined by taking into account payments on the refunding issue and all earlier issues taken into account in determining the combined measurement period (other than payments made with proceeds of any refunding bond), and based on the issue price of the earliest issue. In the case of a refunding of only a portion of the original principal amount of a prior issue, the refunded portion of the prior issue is treated as a separate issue and any private security or private payments with respect to the prior issue are allocated ratably between the combined issue and the unrefunded portion of the prior issue in a consistent manner based on relative debt service. See paragraph (b)(2)(iii)(B) of this section for special rules relating to certain refundings of governmental bonds originally issued before May 16, 1997.

(3) *Special rule for arrangements not entered into in contemplation of the refunding issue.* In applying the private security or payment test to a refunding issue that refunds a prior issue of governmental bonds, the issuer may use the yield on the prior issue to determine the present value of private security and private payments under arrangements that were not entered into in contemplation of the refunding issue. For this purpose, any arrangement that was entered into more than 1 year before the issue date of the refunding issue is treated as not entered into in contemplation of the refunding issue.

(d) *Multipurpose issue allocations—(1) In general.* For purposes of section 141, unless the context clearly requires otherwise, § 1.148-9(h) applies to allocations of multipurpose issues (as defined in § 1.148-1(b)), including allocations involving the refunding purposes of the issue. An allocation under this paragraph (d) may be made at any time, but once made may not be changed. An allocation is not reasonable under this paragraph (d) if it achieves more favorable results under section 141 than could be achieved with actual separate issues. The issue to be allocated and each of the separate issues under the

allocation must consist of one or more tax-exempt bonds. Allocations made under this paragraph (d) and § 1.148-9(h) must be consistent for purposes of section 141 and section 148.

(2) *Exceptions.* This paragraph (d) does not apply for purposes of sections 141(c)(1) and 141(d)(1).

(e) *Application of reasonable expectations test to certain refunding bonds.* An action that would otherwise cause a refunding issue to satisfy the private business tests or the private loan financing test is not taken into account under the reasonable expectations test of § 1.141-2(d) if—

(1) The action is not a deliberate action within the meaning of § 1.141-2(d)(3); and

(2) The weighted average maturity of the refunding bonds is not greater than the weighted average reasonably expected economic life of the property financed by the prior bonds.

(f) *Special rule for refundings of certain general obligation bonds.* Notwithstanding any other provision of this section, a refunding issue does not consist of private activity bonds if—

(1) The prior issue meets the requirements of § 1.141-2(d)(5) (relating to certain general obligation bond programs that finance a large number of separate purposes); or

(2) The refunded portion of the prior issue is part of a series of refundings of all or a portion of an issue that meets the requirements of § 1.141-2(d)(5).

(g) *Examples.* The following examples illustrate the application of this section:

*Example 1. Measuring private business use.* In 2002, Authority A issues tax-exempt bonds that mature in 2032 to acquire an office building. The measurement period for the 2002 bonds under § 1.141-3(g) is 30 years. At the time A acquires the building, it enters into a 10-year lease with a nongovernmental person under which the nongovernmental person will use 5 percent of the building in its trade or business during each year of the lease term. In 2007, A issues bonds to refund the 2002 bonds. The 2007 bonds mature on the same date as the 2002 bonds and have a measurement period of 25 years under § 1.141-3(g). Under paragraph (b)(2)(ii)(A) of this section, the amount of private business use of the proceeds of the 2007 bonds is 1.67 percent, which equals the amount of private business use during the combined measurement period (5 percent of  $\frac{1}{3}$  of the 30-year combined

**Internal Revenue Service, Treasury**

**§ 1.141-13**

measurement period). In addition, the 2002 bonds do not satisfy the private business use test, based on a measurement period beginning on the first day of the measurement period for the 2002 bonds and ending on the issue date of the 2007 bonds, because only 5 percent of the proceeds of the 2002 bonds are used for a private business use during that period. Thus, under paragraph (b)(2)(ii)(B) of this section, A may treat the amount of private business use of the 2007 bonds as 1 percent (5 percent of 1/5 of the 25-year measurement period for the 2007 bonds). The 2007 bonds do not satisfy the private business use test.

*Example 2. Combined issue yield computation.*

(i) On January 1, 2000, County B issues 20-year bonds to finance the acquisition of a municipal auditorium. The 2000 bonds have a yield of 7.7500 percent, compounded annually, and an issue price and par amount of \$100 million. The debt service payments on the 2000 bonds are as follows:

Date	Debt service
1/1/01	\$9,996,470
1/1/02	9,996,470
1/1/03	9,996,470
1/1/04	9,996,470
1/1/05	9,996,470
1/1/06	9,996,470
1/1/07	9,996,470
1/1/08	9,996,470
1/1/09	9,996,470
1/1/10	9,996,470
1/1/11	9,996,470
1/1/12	9,996,470
1/1/13	9,996,470
1/1/14	9,996,470
1/1/15	9,996,470
1/1/16	9,996,470
1/1/17	9,996,470
1/1/18	9,996,470
1/1/19	9,996,470
1/1/20	9,996,470
	199,929,400

(ii) On January 1, 2005, B issues 15-year bonds to refund all of the outstanding 2000 bonds maturing after January 1, 2005 (in the aggregate principal amount of \$86,500,000). The 2005 bonds have a yield of 6.0000 percent, compounded annually, and an issue price and par amount of \$89,500,000. The debt service payments on the 2005 bonds are as follows:

Date	Debt service
1/1/06	\$9,215,167
1/1/07	9,215,167
1/1/08	9,215,167
1/1/09	9,215,167
1/1/10	9,215,167
1/1/11	9,215,167
1/1/12	9,215,167
1/1/13	9,215,167
1/1/14	9,215,167
1/1/15	9,215,167
1/1/16	9,215,167
1/1/17	9,215,167
1/1/18	9,215,167
1/1/19	9,215,167
1/1/20	9,215,167
	138,227,511

(iii) In accordance with § 1.141-15(h), B chooses to apply § 1.141-13 (together with the other provisions set forth in § 1.141-15(h)), to the 2005 bonds. For purposes of determining the amount of private security and private payments with respect to the 2005 bonds, the 2005 bonds and the refunded portion of the 2000 bonds are treated as a combined issue under paragraph (c)(2) of this section. The yield on the combined issue is determined in accordance with §§ 1.148-4, 1.141-4(b)(2)(iii) and 1.141-13(c)(2). Under this methodology, the yield on the combined issue is 7.1062 percent per year compounded annually, illustrated as follows:

Date	Previous debt service on refunded portion of prior issue	Refunding debt service	Total debt service	Present value on 1/1/00
1/1/00				(\$86,500,000.00)

*Example 3. Determination of private payments allocable to combined issue.* The facts are the same as in *Example 2*. In addition, on January 1, 2001, B enters into a contract with a nongovernmental person for the use of the auditorium. The contract results in a private payment in the amount of \$500,000 on each January 1 beginning on January 1, 2001, and ending on January 1, 2020. Under paragraph (c)(2) of this section, the amount of the pri-

vate payments allocable to the combined issue is determined by treating the refunded portion of the 2000 bonds (\$86,500,000 principal amount) as a separate issue, and by allocating the total private payments ratably between the combined issue and the unrefunded portion of the 2000 bonds (\$13,500,000 principal amount) based on relative debt service, as follows:

Date	Private payments	Debt service on unrefunded portion of prior issue	Debt service on combined issue	Percentage of private payments allocable to combined issue	Amount of private payments allocable to combined issue
1/1/01 .....	\$500,000	\$3,306,677	\$6,689,793	66.92	\$334,608
1/1/02 .....	500,000	3,306,677	6,689,793	66.92	334,608
1/1/03 .....	500,000	3,306,677	6,689,793	66.92	334,608
1/1/04 .....	500,000	3,306,677	6,689,793	66.92	334,608
1/1/05 .....	500,000	3,306,677	6,689,793	66.92	334,608
1/1/06 .....	500,000	.....	9,215,167	100.00	500,000
1/1/07 .....	500,000	.....	9,215,167	100.00	500,000
1/1/08 .....	500,000	.....	9,215,167	100.00	500,000
1/1/09 .....	500,000	.....	9,215,167	100.00	500,000
1/1/10 .....	500,000	.....	9,215,167	100.00	500,000
1/1/11 .....	500,000	.....	9,215,167	100.00	500,000
1/1/12 .....	500,000	.....	9,215,167	100.00	500,000
1/1/13 .....	500,000	.....	9,215,167	100.00	500,000
1/1/14 .....	500,000	.....	9,215,167	100.00	500,000
1/1/15 .....	500,000	.....	9,215,167	100.00	500,000
1/1/16 .....	500,000	.....	9,215,167	100.00	500,000
1/1/17 .....	500,000	.....	9,215,167	100.00	500,000

1/1/19 .....	500,000	.....	9,215,167	100.00	500,000
1/1/20 .....	500,000	.....	9,215,167	100.00	500,000
	\$10,000,000	\$16,533,385	\$171,676,476	.....	\$9,173,039

*Example 4. Refunding taxable bonds and qualified bonds.* (i) In 1999, City C issues taxable bonds to finance the construction of a facility for the furnishing of water. The bonds are secured by revenues from the facility. The facility is managed pursuant to a management contract with a nongovernmental person that gives rise to private business use. In 2007, C terminates the management contract and takes over the operation of the facility. In 2009, C issues bonds to refund the 1999 bonds. On the issue date of the 2009 bonds, C reasonably expects that the facility will not be used for a private business use during the term of the 2009 bonds. In addition, during the term of the 2009 bonds, the facility is not used for a private business use. Under paragraph (b)(2)(i) of this section, the

2009 bonds do not satisfy the private business use test because the amount of private business use is based on the measurement period for those bonds and therefore does not take into account any private business use that occurred pursuant to the management contract.

(ii) The facts are the same as in paragraph (i) of this *Example 4*, except that the 1999 bonds are issued as exempt facility bonds under section 142(a)(4). The 2009 bonds do not satisfy the private business use test.

*Example 5. Multipurpose issue.* In 2001, State D issues bonds to finance the construction of two office buildings, Building 1 and Building 2. D expends an equal amount of the proceeds on each building. D enters into arrangements that result in 8 percent of Building 1 and 12

percent of Building 2 being used for a private business use during the measurement period under § 1.141-3(g). These arrangements result in a total of 10 percent of the proceeds of the 2001 bonds being used for a private business use. In 2006, D purports to allocate, under paragraph (d) of this section, an equal amount of the outstanding 2001 bonds to Building 1 and Building 2. D also enters into another private business use arrangement with respect to Building 1 that results in an additional 2 percent (and a total of 10 percent) of Building 1 being used for a private business use during the measurement period. An allocation is not reasonable under paragraph (d) of this section if it achieves more favorable results under section 141 than could be achieved with actual separate issues. D's allocation is unreasonable because, if permitted, it would result in more than 10 percent of the proceeds of the 2001 bonds being used for a private business use.

*Example 6. Non-deliberate action.* In 1998, City E issues bonds to finance the purchase of land and construction of a building (the prior bonds). On the issue date of the prior bonds, E reasonably expects that it will be the sole user of the financed property for the entire term of the bonds. In 2003, the federal government acquires the financed property in a condemnation action. In 2006, E issues bonds to refund the prior bonds (the refunding bonds). The weighted average maturity of the refunding bonds is not greater than the reasonably expected economic life of the financed property. In general, under § 1.141-2(d) and this section, reasonable expectations must be separately tested on the issue date of a refunding issue. Under paragraph (e) of this section, however, the condemnation action is not taken into account in applying the reasonable expectations test to the refunding bonds because the condemnation action is not a deliberate action within the meaning of § 1.141-2(d)(3) and the weighted average maturity of the refunding bonds is not greater than the weighted average reasonably expected economic life of the property financed by the prior bonds. Thus, the condemnation action does not cause the refunding bonds to be private activity bonds.

*Example 7. Non-transitioned refunding of bonds subject to 1954 Code.* In 1985, County F issues bonds to finance a court house. The 1985 bonds are subject to the provisions of the Internal Revenue Code of 1954. In 2006, F issues bonds to refund all of the outstanding 1985 bonds. The weighted average maturity of the 2006 bonds is longer than the remaining weighted average maturity of the 1985 bonds. In addition, the 2006 bonds do not satisfy any transitional rule for refundings in the Tax Reform Act of 1986, 100 Stat. 2085 (1986). Section 141 and this section apply to determine whether the 2006 bonds are private

activity bonds including whether, for purposes of § 1.141-13(b)(2)(ii)(B), the 1985 bonds satisfy the private business use test based on a measurement period that begins on the first day of the combined measurement period for the 2006 bonds and ends on the issue date of the 2006 bonds.

[T.D. 9234, 70 FR 75032, Dec. 19, 2006]

#### § 1.141-14 Anti-abuse rules.

(a) *Authority of Commissioner to reflect substance of transactions.* If an issuer enters into a transaction or series of transactions with respect to one or more issues with a principal purpose of transferring to nongovernmental persons (other than as members of the general public) significant benefits of tax-exempt financing in a manner that is inconsistent with the purposes of section 141, the Commissioner may take any action to reflect the substance of the transaction or series of transactions, including—

(1) Treating separate issues as a single issue for purposes of the private activity bond tests;

(2) Reallocating proceeds to expenditures, property, use, or bonds;

(3) Reallocating payments to use or proceeds;

(4) Measuring private business use on a basis that reasonably reflects the economic benefit in a manner different than as provided in § 1.141-3(g); and

(5) Measuring private payments or security on a basis that reasonably reflects the economic substance in a manner different than as provided in § 1.141-4.

(b) *Examples.* The following examples illustrate the application of this section:

*Example 1. Reallocating proceeds to indirect use.* City C issues bonds with proceeds of \$20 million for the stated purpose of financing improvements to roads that it owns. As a part of the same plan of financing, however, C also agrees to make a loan of \$7 million to Corporation M from its general revenues that it otherwise would have used for the road improvements. The interest rate of the loan corresponds to the interest rate on a portion of the issue. A principal purpose of the financing arrangement is to transfer to M significant benefits of the tax-exempt financing. Although C actually allocates all of the proceeds of the bonds to the road improvements, the Commissioner may reallocate a portion of the proceeds of the bonds to the loan to M because a principal purpose of the financing arrangement is to transfer to

M significant benefits of tax-exempt financing in a manner that is inconsistent with the purposes of section 141. The bonds are private activity bonds because the issue meets the private loan financing test. The bonds also meet the private business tests. See also §§ 1.141-3(a)(2), 1.141-4(a)(1), and 1.141-5(a), under which indirect use of proceeds and payments are taken into account.

*Example 2. Taking into account use of amounts derived from proceeds that would be otherwise disregarded.* County B issues bonds with proceeds of \$10 million to finance the purchase of land. On the issue date, B reasonably expects that it will be the sole user of the land. Subsequently, the federal government acquires the land for \$3 million in a condemnation action. B uses this amount to make a loan to Corporation M. In addition, the interest rate on the loan reflects the tax-exempt interest rate on the bonds and thus is substantially less than a current market rate. A principal purpose of the arrangement is to transfer to M significant benefits of the tax-exempt financing. Although the condemnation action is not a deliberate action, the Commissioner may treat the condemnation proceeds as proceeds of the issue because a principal purpose of the arrangement is to transfer to M significant benefits of tax-exempt financing in a manner inconsistent with the purposes of section 141. The bonds are private activity bonds.

*Example 3. Measuring private business use on an alternative basis.* City F issues bonds with a 30-year term to finance the acquisition of an industrial building having a remaining reasonably expected useful economic life of more than 30 years. On the issue date, F leases the building to Corporation G for 3 years. F reasonably expects that it will be the sole user of the building for the remaining term of the bonds. Because of the local market conditions, it is reasonably expected that the fair rental value of the industrial building will be significantly greater during the early years of the term of the bonds than in the later years. The annual rental payments are significantly less than fair market value, reflecting the interest rate on the bonds. The present value of these rental payments (net of operation and maintenance expenses) as of the issue date, however, is approximately 25 percent of the present value of debt service on the issue. Under § 1.141-3, the issue does not meet the private business tests, because only 10 percent of the proceeds are used in a trade or business by a nongovernmental person. A principal purpose of the issue is to transfer to G significant benefits of tax-exempt financing in a manner inconsistent with the purposes of section 141. The method of measuring private business use over the reasonably expected useful economic life of financed property is for the administrative convenience of issuers of state and local bonds. In cases where this method

is used in a manner inconsistent with the purposes of section 141, the Commissioner may measure private business use on another basis that reasonably reflects economic benefit, such as in this case on an annual basis. If the Commissioner measures private business use on an annual basis, the bonds are private activity bonds because the private payment test is met and more than 10 percent of the proceeds are used in a trade or business by a nongovernmental person.

*Example 4. Treating separate issues as a single issue.* City D enters into a development agreement with Corporation T to induce T to locate its headquarters within D's city limits. Pursuant to the development agreement, in 1997 D will issue \$20 million of its general obligation bonds (the 1997 bonds) to purchase land that it will grant to T. The development agreement also provides that, in 1998, D will issue \$20 million of its tax increment bonds (the 1998 bonds), secured solely by the increase in property taxes in a special taxing district. Substantially all of the property within the special taxing district is owned by T or D. T will separately enter into an agreement to guarantee the payment of tax increment to D in an amount sufficient to retire the 1998 bonds. The proceeds of the 1998 bonds will be used to finance improvements owned and operated by D that will not give rise to private business use. Treated separately, the 1997 issue meets the private business use test, but not the private security or payment test; the 1998 issue meets the private security or payment test, but not the private business use test. A principal purpose of the financing plan, including the two issues, is to transfer significant benefits of tax-exempt financing to T for its headquarters. Thus, the 1997 issue and the 1998 issue may be treated by the Commissioner as a single issue for purposes of applying the private activity bond tests. Accordingly, the bonds of both the 1997 issue and the 1998 issue may be treated as private activity bonds.

*Example 5. Reallocating proceeds.* City E acquires an electric generating facility with a useful economic life of more than 40 years and enters into a 30-year take or pay contract to sell 30 percent of the available output to investor-owned utility M. E plans to use the remaining 70 percent of available output for its own governmental purposes. To finance the entire cost of the facility, E issues \$30 million of its series A taxable bonds at taxable interest rates and \$70 million series B bonds, which purport to be tax-exempt bonds, at tax-exempt interest rates. E allocates all of M's private business use to the proceeds of the series A bonds and all of its own government use to the proceeds of the series B bonds. The series A bonds have a weighted average maturity of 15 years, while the series B bonds have a weighted average maturity of 26 years. M's payments under the take or pay contract are expressly

determined by reference to 30 percent of M's total costs (that is, the sum of the debt service required to be paid on both the series A and the series B bonds and all other operating costs). The allocation of all of M's private business use to the series A bonds does not reflect economic substance because the series of transactions transfers to M significant benefits of the tax-exempt interest rates paid on the series B bonds. A principal purpose of the financing arrangement is to transfer to M significant benefits of the tax-exempt financing. Accordingly, the Commissioner may allocate M's private business use on a pro rata basis to both the series B bonds as well as the series A bonds, in which case the series B bonds are private activity bonds.

*Example 6. Allocations respected.* The facts are the same as in *Example 5*, except that the debt service component of M's payments under the take or pay contract is based exclusively on the amounts necessary to pay the debt service on the taxable series A bonds. E's allocation of all of M's private business use to the series A bonds is respected because the series of transactions does not actually transfer benefits of tax-exempt interest rates to M. Accordingly, the series B bonds are not private activity bonds. The result would be the same if M's payments under the take or pay contract were based exclusively on fair market value pricing, rather than the tax-exempt interest rates on E's bonds. The result also would be the same if the series A bonds and the series B bonds had substantially equivalent weighted average maturities and E and M had entered into a customary contract providing for payments based on a ratable share of total debt service. E would not be treated by the Commissioner in any of these cases as entering into the contract with a principal purpose of transferring the benefits of tax-exempt financing to M in a manner inconsistent with the purposes of section 141.

[T.D. 8712, 62 FR 2301, Jan. 16, 1997]

#### § 1.141-15 Effective dates.

(a) *Scope.* The effective dates of this section apply for purposes of §§ 1.141-1 through 1.141-6(a), 1.141-7 through 1.141-14, 1.145-1 through 1.145-2, 1.150-1(a)(3) and the definition of bond documents contained in § 1.150-1(b).

(b) *Effective dates—(1) In general.* Except as otherwise provided in this section, §§ 1.141-0 through 1.141-6(a), 1.141-9 through 1.141-12, 1.141-14, 1.145-1 through 1.145-2(c), and the definition of bond documents contained in § 1.150-1(b) (the 1997 regulations) apply to bonds issued on or after May 16, 1997, that are subject to section 1301 of the Tax Reform Act of 1986 (100 Stat. 2602).

(2) *Certain short-term arrangements.* The provisions of § 1.141-3 that refer to arrangements for 200 days, 100 days, or 50 days apply to any bond sold on or after November 20, 2001 and may be applied to any bond outstanding on November 20, 2001 to which § 1.141-3 applies.

(3) *Certain prepayments.* Except as provided in paragraph (c) of this section, paragraphs (c)(2)(ii), (c)(2)(iii) and (c)(2)(iv) of § 1.141-5 apply to bonds sold on or after October 3, 2003. Issuers may apply paragraphs (c)(2)(ii), (c)(2)(iii) and (c)(2)(iv) of § 1.141-5, in whole but not in part, to bonds sold before October 3, 2003 that are subject to § 1.141-5.

(c) *Refunding bonds.* Except as otherwise provided in this section, the 1997 regulations (defined in paragraph (b)(1) of this section) do not apply to any bonds issued on or after May 16, 1997, to refund a bond to which those regulations do not apply unless—

(1) The refunding bonds are subject to section 1301 of the Tax Reform Act of 1986 (100 Stat. 2602); and

(2)(i) The weighted average maturity of the refunding bonds is longer than—

(A) The weighted average maturity of the refunded bonds; or

(B) In the case of a short-term obligation that the issuer reasonably expects to refund with a long-term financing (such as a bond anticipation note), 120 percent of the weighted average reasonably expected economic life of the facilities financed; or

(ii) A principal purpose for the issuance of the refunding bonds is to make one or more new conduit loans.

(d) *Permissive application of regulations.* Except as provided in paragraph (e) of this section, the 1997 regulations (defined in paragraph (b)(1) of this section) may be applied in whole, but not in part, to actions taken before February 23, 1998, with respect to—

(1) Bonds that are outstanding on May 16, 1997, and subject to section 141; or

(2) Refunding bonds issued on or after May 16, 1997, that are subject to 141.

(e) *Permissive application of certain sections.* The following sections may each be applied to any bonds—

(1) Section 1.141-3(b)(4);

(2) Section 1.141-3(b)(6); and

(3) Section 1.141-12.

(f) *Effective dates for certain regulations relating to output facilities*—(1) *General rule.* Except as otherwise provided in this section, §§1.141-7 and 1.141-8 apply to bonds sold on or after November 22, 2002, that are subject to section 1301 of the Tax Reform Act of 1986 (100 Stat. 2602).

(2) *Transition rule for requirements contracts.* For bonds otherwise subject to §§1.141-7 and 1.141-8, §1.141-7(c)(3) applies to output contracts entered into on or after September 19, 2002. An output contract is treated as entered into on or after that date if it is amended on or after that date, but only if the amendment results in a change in the parties to the contract or increases the amount of requirements covered by the contract by reason of an extension of the contract term or a change in the method for determining such requirements. For purposes of this paragraph (f)(2)—

(i) The extension of the term of a contract causes the contract to be treated as entered into on the first day of the additional term;

(ii) The exercise by a party of a legally enforceable right that was provided under a contract before September 19, 2002, on terms that were fixed and determinable before such date, is not treated as an amendment of the contract. For example, the exercise by a purchaser after September 19, 2002 of a renewal option that was provided under a contract before that date, on terms identical to the original contract, is not treated as an amendment of the contract; and

(iii) An amendment that increases the amount of requirements covered by the contract by reason of a change in the method for determining such requirements is treated as a separate contract that is entered into as of the effective date of the amendment, but only with respect to the increased output to be provided under the contract.

(g) *Refunding bonds for output facilities.* Except as otherwise provided in paragraph (h) or (i) of this section, §§1.141-7 and 1.141-8 do not apply to any bonds sold on or after November 22, 2002, to refund a bond to which §§1.141-7 and 1.141-8 do not apply unless—

(1) The refunding bonds are subject to section 1301 of the Tax Reform Act of 1986 (100 Stat. 2602); and

(2)(i) The weighted average maturity of the refunding bonds is longer than—

(A) The weighted average maturity of the refunded bonds; or

(B) In the case of a short-term obligation that the issuer reasonably expects to refund with a long-term financing (such as a bond anticipation note), 120 percent of the weighted average reasonably expected economic life of the facilities financed; or

(ii) A principal purpose for the issuance of the refunding bonds is to make one or more new conduit loans.

(h) *Permissive retroactive application.* Except as provided in paragraphs (d), (e) or (i) of this section, §§1.141-1 through 1.141-6(a), 1.141-7 through 1.141-14, 1.145-1 through 1.145-2, 1.149(d)-1(g), 1.150-1(a)(3), the definition of bond documents contained in §1.150-1(b) and §1.150-1(c)(3)(ii) may be applied by issuers in whole, but not in part, to—

(1) Outstanding bonds that are sold before February 17, 2006, and subject to section 141; or

(2) Refunding bonds that are sold on or after February 17, 2006, and subject to section 141.

(i) *Permissive application of certain regulations relating to output facilities.* Issuers may apply §§1.141-7(f)(3) and 1.141-7(g) to any bonds.

(j) *Effective dates for certain regulations relating to refundings.* Except as otherwise provided in this section, §§1.141-13, 1.145-2(d), 1.149(d)-1(g), 1.150-1(a)(3) and 1.150-1(c)(3)(ii) apply to bonds that are sold on or after February 17, 2006, and that are subject to the 1997 regulations (defined in paragraph (b)(1) of this section).

[T.D. 8757, 63 FR 3265, Jan. 22, 1998, as amended by T.D. 8941, 66 FR 4670, Jan. 18, 2001; T.D. 8967, 66 FR 58062, Nov. 20, 2001; T.D. 9016, 67 FR 59765, Sept. 23, 2002; T.D. 9085, 68 FR 45775, Aug. 4, 2003; T.D. 9234, 70 FR 75035, Dec. 19, 2005; 71 FR 1971, Jan. 12, 2006]

**§ 1.141-16 Effective dates for qualified private activity bond provisions.**

(a) *Scope.* The effective dates of this section apply for purposes of §§1.142-0 through 1.142-2, 1.144-0 through 1.144-2, 1.147-0 through 1.147-2, and 1.150-4.

(b) *Effective dates.* Except as otherwise provided in this section, the regulations designated in paragraph (a) of this section apply to bonds issued on or after May 16, 1997 (the effective date).

(c) *Permissive application.* The regulations designated in paragraph (a) of this section may be applied by issuers in whole, but not in part, to bonds outstanding on the effective date. For this purpose, issuers may apply § 1.142-2 without regard to paragraph (c)(3) thereof to failures to properly use proceeds that occur on or after April 21, 2003.

(d) *Certain remedial actions—(1) General rule.* The provisions of § 1.142-2(e) apply to failures to properly use proceeds that occur on or after August 13, 2004 and may be applied by issuers to failures to properly use proceeds that occur on or after May 14, 2004, provided that the bonds are subject to § 1.142-2.

(2) *Special rule for allocations of nonqualified bonds.* For purposes of § 1.142-2(e)(2), in addition to the allocation methods permitted in § 1.142-2(e)(2), an issuer may treat bonds with the longest maturities (determined on a bond-by-bond basis) as the nonqualified bonds, but only with respect to failures to properly use proceeds that occur on or after May 14, 2004, with respect to bonds sold before August 13, 2004.

[T.D. 8712, 62 FR 2302, Jan. 16, 1997, as amended by T.D. 9150, 69 FR 50066, Aug. 13, 2004]

[T.D. 8712, 62 FR 2302, Jan. 16, 1997, as amended by T.D. 9150, 69 FR 50066, Aug. 13, 2004]

#### § 1.142-1 Exempt facility bonds.

(a) *Overview.* Interest on a private activity bond is not excludable from gross income under section 103(a) unless the bond is a qualified bond. Under section 141(e)(1)(A), an exempt facility bond issued under section 142 may be a qualified bond.

Under section 142(a), an exempt facility bond is any bond issued as a part of an issue using 95 percent or more of the proceeds for certain exempt facilities.

(b) *Scope.* Sections 1.142-0 through 1.142-3 apply for purposes of the rules for exempt facility bonds under section 142, except that, with respect to net proceeds that have been spent, § 1.142-2 does not apply to bonds issued under section 142(d) (relating to bonds issued to provide qualified residential rental projects) and section 142(f) (2) and (4) (relating to bonds issued to provide local furnishing of electric energy or gas).

(c) *Effective dates.* For effective dates of §§ 1.142-0 through 1.142-2, see § 1.141-16.

[T.D. 8712, 62 FR 2302, Jan. 16, 1997]

#### § 1.142-2 Remedial actions.

(a) *General rule.* If less than 95 percent of the net proceeds of an exempt facility bond are actually used to provide an exempt facility, and for no other purpose, the issue will be treated as meeting the use of proceeds requirement of section 142(a) if the issue meets the condition of paragraph (b) of this section and the issuer takes the remedial action described in paragraph (c) of this section.

(b) *Reasonable expectations requirement.* The issuer must have reasonably expected on the issue date that 95 percent of the net proceeds of the issue would be used to provide an exempt facility and for no other purpose for the entire term of the bonds (disregarding any redemption provisions). To meet this condition the amount of the issue must have been based on reasonable estimates about the cost of the facility.

**§ 1.142-3**

**26 CFR Ch. I (4-1-06 Edition)**

(c) *Redemption or defeasance*—(1) *In general.* The requirements of this paragraph (c) are met if all of the nonqualified bonds of the issue are redeemed on the earliest call date after the date on which the failure to properly use the proceeds occurs under paragraph (d) of this section. Proceeds of tax-exempt bonds (other than those described in paragraph (d)(1) of this section) must not be used for this purpose. If the bonds are not redeemed within 90 days of the date on which the failure to properly use proceeds occurs, a defeasance escrow must be established for those bonds within 90 days of that date.

(2) *Notice of defeasance.* The issuer must provide written notice to the Commissioner of the establishment of the defeasance escrow within 90 days of the date the escrow is established.

(3) *Special limitation.* The establishment of a defeasance escrow does not satisfy the requirements of this paragraph (c) if the period between the issue date and the first call date is more than 10½ years.

(4) *Special rule for dispositions of personal property.* For dispositions of personal property exclusively for cash, the requirements of this paragraph (c) are met if the issuer expends the disposition proceeds within 6 months of the date of the disposition to acquire replacement property for the same qualifying purpose of the issue under section 142.

(5) *Definitions.* For purposes of paragraph (c)(4) of this section, *disposition proceeds* means disposition proceeds as defined in § 1.141-12(c).

(d) *When a failure to properly use proceeds occurs*—(1) *Proceeds not spent.* For net proceeds that are not spent, a failure to properly use proceeds occurs on the earlier of the date on which the issuer reasonably determines that the financed facility will not be completed or the date on which the financed facility is placed in service.

(2) *Proceeds spent.* For net proceeds that are spent, a failure to properly use proceeds occurs on the date on which an action is taken that causes the bonds not to be used for the qualifying purpose for which the bonds were issued.

(e) *Nonqualified bonds*—(1) *Amount of nonqualified bonds.* For purposes of this section, the nonqualified bonds are a portion of the outstanding bonds in an amount that, if the remaining bonds were issued on the date on which the failure to properly use the proceeds occurs, at least 95 percent of the net proceeds of the remaining bonds would be used to provide an exempt facility. If no proceeds have been spent to provide an exempt facility, all of the outstanding bonds are nonqualified bonds.

(2) *Allocation of nonqualified bonds.* Allocations of nonqualified bonds must be made on a pro rata basis, except that an issuer may treat any bonds of an issue as the nonqualified bonds so long as—

(i) The remaining weighted average maturity of the issue, determined as of the date on which the nonqualified bonds are redeemed or defeased (determination date), and excluding from the determination the nonqualified bonds redeemed or defeased by the issuer to meet the requirements of paragraph (c) of this section, is not greater than

(ii) The remaining weighted average maturity of the issue, determined as of the determination date, but without regard to the redemption or defeasance of any bonds (including the nonqualified bonds) occurring on the determination date.

[T.D. 8712, 62 FR 2302, Jan. 16, 1997, as amended by T.D. 9150, 69 FR 50067, Aug. 13, 2004]

**§ 1.142-3 Refunding Issues. [Reserved]**

**§ 1.142-4 Use of proceeds to provide a facility.**

(a) *In general.* [Reserved]

(b) *Reimbursement allocations.* If an expenditure for a facility is paid before the issue date of the bonds to provide that facility, the facility is described in section 142(a) only if the expenditure meets the requirements of § 1.150-2 (relating to reimbursement allocations). For purposes of this paragraph (b), if the proceeds of an issue are used to pay principal of or interest on an obligation other than a State or local bond (for example, temporary construction financing of the conduit borrower), that issue is not a refunding issue, and, thus, § 1.150-2(g) does not apply.

(c) *Limitation on use of facilities by substantial users*—(1) *In general.* If the original use of a facility begins before the issue date of the bonds to provide the facility, the facility is not described in section 142(a) if any person that was a substantial user of the facility at any time during the 5-year period before the issue date or any related person to that user receives (directly or indirectly) 5 percent or more of the proceeds of the issue for the user's interest in the facility and is a substantial user of the facility at any time during the 5-year period after the issue date, unless—

(i) An official intent for the facility is adopted under §1.150-2 within 60 days after the date on which acquisition, construction, or reconstruction of that facility commenced; and

(ii) For an acquisition, no person that is a substantial user or related person after the acquisition date was also a substantial user more than 60 days before the date on which the official intent was adopted.

(2) *Definitions.* For purposes of paragraph (c)(1) of this section, *substantial user* has the meaning used in section 147(a)(1), *related person* has the meaning used in section 144(a)(3), and a user that is a governmental unit within the meaning of §1.103-1 is disregarded.

(d) *Effective date*—(1) *In general.* This section applies to bonds sold on or after July 8, 1997. See §1.103-8(a)(5) for rules applicable to bonds sold before that date.

(2) *Elective retroactive application.* An issuer may apply this section to any bond sold before July 8, 1997.

[T.D. 8718, 62 FR 25506, May 9, 1997]

**§ 1.142(a)(5)-1 Exempt facility bonds: Sewage facilities.**

(a) *In general.* Under section 103(a), a private activity bond is a tax-exempt bond only if it is a qualified bond. A qualified bond includes an exempt facility bond, defined as any bond issued as part of an issue 95 percent or more of the net proceeds of which are used to provide a facility specified in section 142. One type of facility specified in section 142(a) is a sewage facility. This section defines the term *sewage facility* for purposes of section 142(a).

(b) *Definitions*—(1) *Sewage facility defined.* A sewage facility is property—

(i) Except as provided in paragraphs (b)(2) and (d) of this section, used for the secondary treatment of wastewater; however, for property treating wastewater reasonably expected to have an average daily raw wasteload concentration of biochemical oxygen demand (BOD) that exceeds 350 milligrams per liter as oxygen (measured at the time the influent enters the facility) (the *BOD limit*), this paragraph (b)(1)(i) applies only to the extent the treatment is for wastewater having an average daily raw wasteload concentration of BOD that does not exceed the BOD limit;

(ii) Used for the preliminary and/or primary treatment of wastewater but only to the extent used in connection with secondary treatment (without regard to the BOD limit described in paragraph (b)(1)(i) of this section);

(iii) Used for the advanced or tertiary treatment of wastewater but only to the extent used in connection with and after secondary treatment;

(iv) Used for the collection, storage, use, processing, or final disposal of—

(A) Wastewater, which property is necessary for such preliminary, primary, secondary, advanced, or tertiary treatment; or

(B) Sewage sludge removed during such preliminary, primary, secondary, advanced, or tertiary treatment (without regard to the BOD limit described in paragraph (b)(1)(i) of this section);

(v) Used for the treatment, collection, storage, use, processing, or final disposal of septage (without regard to the BOD limit described in paragraph (b)(1)(i) of this section); and

(vi) Functionally related and subordinate to property described in this paragraph (b)(1), such as sewage disinfection property.

(2) *Special rules and exceptions*—(i) *Exception to BOD limit.* A facility treating wastewater with an average daily raw wasteload concentration of BOD exceeding the BOD limit will not fail to qualify as a sewage facility described in paragraph (b)(1) of this section to the extent that the failure to satisfy the BOD limit results from the implementation of a federal, state, or local

water conservation program (for example, a program designed to promote water use efficiency that results in BOD concentrations beyond the BOD limit).

(ii) *Anti-abuse rule for BOD limit.* A facility does not satisfy the BOD limit if there is any intentional manipulation of the BOD level to circumvent the BOD limit (for example, increasing the volume of water in the wastewater before the influent enters the facility with the intention of reducing the BOD level).

(iii) *Authority of Commissioner.* In appropriate cases upon application to the Commissioner, the Commissioner may determine that facilities employing technologically advanced or innovative treatment processes qualify as sewage facilities if it is demonstrated that these facilities perform functions that are consistent with the definition of sewage facilities described in paragraph (b)(1) of this section.

(3) *Other applicable definitions*—(i) *Advanced or tertiary treatment* means the treatment of wastewater after secondary treatment. Advanced or tertiary treatment ranges from biological treatment extensions to physical-chemical separation techniques such as denitrification, ammonia stripping, carbon adsorption, and chemical precipitation.

(ii) *Nonconventional pollutants* are any pollutants that are not listed in 40 CFR 401.15, 401.16, or appendix A to part 423.

(iii) *Preliminary treatment* means treatment that removes large extraneous matter from incoming wastewater and renders the incoming wastewater more amenable to subsequent treatment and handling.

(iv) *Pretreatment* means a process that preconditions wastewater to neutralize or remove toxic, priority, or nonconventional pollutants that could adversely affect sewers or inhibit a preliminary, primary, secondary, advanced, or tertiary treatment operation.

(v) *Primary treatment* means treatment that removes material that floats or will settle, usually by screens or settling tanks.

(vi) *Priority pollutants* are those pollutants listed in appendix A to 40 CFR part 423.

(vii) *Secondary treatment* means the stage in sewage treatment in which a bacterial process (or an equivalent process) consumes the organic parts of wastes, usually by trickling filters or an activated sludge process.

(viii) *Sewage sludge* is defined in 40 CFR 122.2 and includes septage.

(ix) *Toxic pollutants* are those pollutants listed in 40 CFR 401.15.

(c) *Other property not included in the definition of a sewage facility.* Property other than property described in paragraph (b)(1) of this section is not a sewage facility. Thus, for example, property is not a sewage facility, or functionally related and subordinate property, if the property is used for pretreatment of wastewater (whether or not this treatment is necessary to perform preliminary, primary, secondary, advanced, or tertiary treatment), or the related collection, storage, use, processing, or final disposal of the wastewater. In addition, property used to treat, process, or use wastewater subsequent to the time the wastewater can be discharged into navigable waters, as defined in 33 U.S.C. 1362, is not a sewage facility.

(d) *Allocation of costs.* In the case of property that has both a use described in paragraph (b)(1) of this section (a sewage treatment function) and a use other than sewage treatment, only the portion of the cost of the property allocable to the sewage treatment function is taken into account as an expenditure to provide sewage facilities. The portion of the cost of property allocable to the sewage treatment function is determined by allocating the cost of that property between the property's sewage treatment function and any other uses by any method which, based on all the facts and circumstances, reasonably reflects a separation of costs for each use of the property.

(e) *Effective date*—(1) *In general.* This section applies to issues of bonds issued after February 21, 1995.

(2) *Refundings.* In the case of a refunding bond issued to refund a bond to which this section does not apply, the issuer need not apply this section to that refunding bond. This paragraph (e)(2) applies only if the weighted average maturity of the refunding bonds, as

described in section 147(b), is not greater than the remaining weighted average maturity of the refunded bonds.

[T.D. 8576, 59 FR 66163, Dec. 23, 1994]

**§ 1.142(f)(4)-1 Manner of making election to terminate tax-exempt bond financing.**

(a) *Overview.* Section 142(f)(4) permits a person engaged in the local furnishing of electric energy or gas (a local furnisher) that uses facilities financed with exempt facility bonds under section 142(a)(8) and that expands its service area in a manner inconsistent with the requirements of sections 142(a)(8) and (f) to make an election to ensure that those bonds will continue to be treated as exempt facility bonds. The election must meet the requirements of paragraphs (b) and (c) of this section.

(b) *Time for making election—(1) In general.* An election under section 142(f)(4)(B) must be filed with the Internal Revenue Service on or before 90 days after the date of the service area expansion that causes bonds to cease to meet the requirements of sections 142(a)(8) and (f).

(2) *Date of service area expansion.* For the purposes of this section, the date of the service area expansion is the first date on which the local furnisher is authorized to collect revenue for the provision of service in the expanded area.

(c) *Manner of making election.* An election under section 142(f)(4)(B) must be captioned “ELECTION TO TERMINATE TAX-EXEMPT BOND FINANCING”, must be signed under penalties of perjury by a person who has authority to sign on behalf of the local furnisher, and must contain the following information—

- (1) The name of the local furnisher;
- (2) The tax identification number of the local furnisher;
- (3) The complete address of the local furnisher;
- (4) The date of the service area expansion;
- (5) Identification of each bond issue subject to the election, including the complete name of each issue, the tax identification number of each issuer, the report number of the information return filed under section 149(e) for each issue, the issue date of each issue,

the CUSIP number (if any) of the bond with the latest maturity of each issue, the issue price of each issue, the adjusted issue price of each issue as of the date of the election, the earliest date on which the bonds of each issue may be redeemed, and the principal amount of bonds of each issue to be redeemed on the earliest redemption date;

(6) A statement that the local furnisher making the election agrees to the conditions stated in section 142(f)(4)(B); and

(7) A statement that each issuer of the bonds subject to the election has received written notice of the election.

(d) *Effect on section 150(b).* Except as provided in paragraph (e) of this section, if a local furnisher files an election within the period specified in paragraph (b) of this section, section 150(b) does not apply to bonds identified in the election during and after that period.

(e) *Effect of failure to meet agreements.* If a local furnisher fails to meet any of the conditions stated in an election pursuant to paragraph (c)(6) of this section, the election is invalid.

(f) *Corresponding provisions of the Internal Revenue Code of 1954.* Section 103(b)(4)(E) of the Internal Revenue Code of 1954 set forth corresponding requirements for the exclusion from gross income of the interest on bonds issued for facilities for the local furnishing of electric energy or gas. For the purposes of this section any reference to sections 142(a)(8) and (f) of the Internal Revenue Code of 1986 includes a reference to the corresponding portion of section 103(b)(4)(E) of the Internal Revenue Code of 1954.

(g) *Effective dates.* This section applies to elections made on or after January 19, 2001.

[T.D. 8941, 66 FR 4671, Jan. 18, 2001]

**§ 1.143(g)-1 Requirements related to arbitrage.**

(a) *In general.* Under section 143, for an issue to be an issue of qualified mortgage bonds or qualified veterans' mortgage bonds (together, mortgage revenue bonds), the requirements of section 143(g) must be satisfied. An issue satisfies the requirements of section 143(g) only if such issue meets the

requirements of paragraph (b) of this section and, in the case of an issue 95 percent or more of the net proceeds of which are to be used to provide residences for veterans, such issue also meets the requirements of paragraph (c) of this section. The requirements of section 143(g) and this section are applicable in addition to the requirements of section 148 and §§1.148-0 through 1.148-11.

(b) *Effective rate of mortgage interest not to exceed bond yield by more than 1.125 percentage points*—(1) *Maximum yield.* An issue shall be treated as meeting the requirements of this paragraph (b) only if the excess of the effective rate of interest on the mortgages financed by the issue, over the yield on the issue, is not greater over the term of the issue than 1.125 percentage points.

(2) *Effective rate of interest.* (i) In determining the effective rate of interest on any mortgage for purposes of this paragraph (b), there shall be taken into account all fees, charges, and other amounts borne by the mortgagor that are attributable to the mortgage or to the bond issue. Such amounts include points, commitment fees, origination fees, servicing fees, and prepayment penalties paid by the mortgagor.

(ii) Items that shall be treated as borne by the mortgagor and shall be taken into account in calculating the effective rate of interest also include—

(A) All points, commitment fees, origination fees, or similar charges borne by the seller of the property; and

(B) The excess of any amounts received from any person other than the mortgagor by any person in connection with the acquisition of the mortgagor's interest in the property over the usual and reasonable acquisition costs of a person acquiring like property when owner-financing is not provided through the use of mortgage revenue bonds.

(iii) The following items shall not be treated as borne by the mortgagor and shall not be taken into account in calculating the effective rate of interest—

(A) Any expected rebate of arbitrage profit under paragraph (c) of this section; and

(B) Any application fee, survey fee, credit report fee, insurance charge or

similar settlement or financing cost to the extent such amount does not exceed amounts charged in the area in cases when owner-financing is not provided through the use of mortgage revenue bonds. For example, amounts paid for Federal Housing Administration, Veterans' Administration, or similar private mortgage insurance on an individual's mortgage, or amounts paid for pool mortgage insurance on a pool of mortgages, are not taken into account so long as such amounts do not exceed the amounts charged in the area with respect to a similar mortgage, or pool of mortgages, that is not financed with mortgage revenue bonds. For this purpose, amounts paid for pool mortgage insurance include amounts paid to an entity (for example, the Government National Mortgage Association, the Federal National Mortgage Association (FNMA), the Federal Home Loan Mortgage Corporation, or other mortgage insurer) to directly guarantee the pool of mortgages financed with the bonds, or to guarantee a pass-through security backed by the pool of mortgages financed with the bonds.

(C) The following example illustrates the provisions of this paragraph (b)(2)(iii):

*Example.* Housing Authority X issues bonds intended to be qualified mortgage bonds under section 143(a). At the time the bonds are issued, X enters into an agreement with a group of mortgage lending institutions (lenders) under which the lenders agree to originate and service mortgages that meet certain specified requirements. After originating a specified amount of mortgages, each lender issues a "pass-through security" (each, a PTS) backed by the mortgages and sells the PTS to X. Under the terms of the PTS, the lender pays X an amount equal to the regular monthly payments on the mortgages (less certain fees), whether or not received by the lender (plus any prepayments and liquidation proceeds in the event of a foreclosure or other disposition of any mortgages). FNMA guarantees the timely payment of principal and interest on each PTS. From the payments received from each mortgagor, the lender pays a fee to FNMA for its guarantee of the PTS. The amounts paid to FNMA do not exceed the amounts charged in the area with respect to a similar pool of mortgages that is not financed with mortgage revenue bonds. Under this paragraph (b)(2)(iii), the fees for the guarantee provided by FNMA are an insurance charge

because the guarantee is pool mortgage insurance. Because the amounts charged for the guarantee do not exceed the amounts charged in the area with respect to a similar pool of mortgages that is not financed with mortgage revenue bonds, the amounts charged for the guarantee are not taken into account in computing the effective rate of interest on the mortgages financed with X's bonds.

(3) *Additional rules.* To the extent not inconsistent with the Tax Reform Act of 1986, Public Law 99-514 (the 1986 Act), or subsequent law, § 6a.103A-2(i)(2) (other than paragraphs (i)(2)(i) and (i)(2)(ii)(A) through (C)) of this chapter applies to provide additional rules relating to compliance with the requirement that the effective rate of mortgage interest not exceed the bond yield by more than 1.125 percentage points.

(c) *Arbitrage and investment gains to be used to reduce costs of owner-financing.* As provided in section 143(g)(3), certain earnings on nonpurpose investments must either be paid or credited to mortgagors, or paid to the United States, in certain circumstances. To the extent not inconsistent with the 1986 Act or subsequent law, § 6a.103A-2(i)(4) of this chapter applies to provide guidance relating to compliance with this requirement.

(d) *Effective dates—(1) In general.* Except as otherwise provided in this section, § 1.143(g)-1 applies to bonds sold on or after May 23, 2005, that are subject to section 143.

(2) *Permissive retroactive application in whole.* Except as provided in paragraph (d)(4) of this section, issuers may apply § 1.143(g)-1, in whole, but not in part, to bonds sold before May 23, 2005, that are subject to section 143.

(3) *Bonds subject to the Internal Revenue Code of 1954.* Except as provided in paragraph (d)(4) of this section and subject to the applicable effective dates for the corresponding statutory provisions, an issuer may apply § 1.143(g)-1, in whole, but not in part, to bonds that are subject to section 103A(i) of the Internal Revenue Code of 1954.

(4) *Special rule for pre-July 1, 1993 bonds.* To the extent that an issuer applies this section to bonds issued before July 1, 1993, § 6a.103A-2(i)(3) of this chapter also applies to the bonds.

[T.D. 9204, 70 FR 29449, May 23, 2005]

#### § 1.144-0 Table of contents.

This section lists the captioned paragraphs contained in §§ 1.144-1 and 1.144-2.

§ 1.144-1 *Qualified small issue bonds, qualified student loan bonds, and qualified redevelopment bonds.*

(a) Overview.

(b) Scope.

(c) Effective dates.

§ 1.144-2 *Remedial actions.*

[T.D. 8712, 62 FR 2303, Jan. 16, 1997]

#### § 1.144-1 Qualified small issue bonds, qualified student loan bonds, and qualified redevelopment bonds.

(a) *Overview.* Interest on a private activity bond is not excludable from gross income under section 103(a) unless the bond is a qualified bond. Under section 141(e)(1)(D), a qualified small issue bond issued under section 144(a) may be a qualified bond. Under section 144(a), any qualified small issue bond is any bond issued as a part of an issue 95 percent or more of the proceeds of which are to be used to provide certain manufacturing facilities or certain depreciable farm property and which meets other requirements. Under section 141(e)(1)(F) a qualified redevelopment bond issued under section 144(c) is a qualified bond. Under section 144(c), a qualified redevelopment bond is any bond issued as a part of an issue 95 percent or more of the net proceeds of which are to be used for one or more redevelopment purposes and which meets certain other requirements.

(b) *Scope.* Sections 1.144-0 through 1.144-2 apply for purposes of the rules for small issue bonds under section 144(a) and qualified redevelopment bonds under section 144(c), except that § 1.144-2 does not apply to the requirements for qualified small issue bonds under section 144(a)(4) (relating to the limitation on capital expenditures) or under section 144(a)(10) (relating to the aggregate limit of tax-exempt bonds per taxpayer).

(c) *Effective dates.* For effective dates of §§ 1.144-0 through 1.144-2, see § 1.141-16.

### § 1.145-1 Qualified 501(c)(3) bonds.

(a) *Overview.* Interest on a private activity bond is not excludable from gross income under section 103(a) unless the bond is a qualified bond. Under section 141(e)(1)(G), a qualified 501(c)(3) bond issued under section 145 is a qualified bond. Under section 145, a qualified 501(c)(3) bond is any bond issued as a part of an issue that satisfies the requirements of sections 145(a) through (d).

(b) *Scope.* Sections 1.145-0 through 1.145-2 apply for purposes of section 145(a).

(c) *Effective dates.* For effective dates of §§ 1.145-0 through 1.145-2, see § 1.141-15.

[T.D. 8712, 62 FR 2303, Jan. 16, 1997]

### § 1.145-2 Application of private activity bond regulations.

(a) *In general.* Except as provided in this section, §§ 1.141-0 through 1.141-15 apply to section 145(a). For example, under this section, § 1.141-1, and § 1.141-2, an issue ceases to be an issue of quali-

fied 501(c)(3) bonds if the issuer or a conduit borrower 501(c)(3) organization takes a deliberate action, subsequent to the issue date, that causes the issue to fail to comply with the requirements of sections 141(e) and 145 (such as an action that results in revocation of exempt status of the 501(c)(3) organization).

(b) *Modification of private business tests.* In applying §§ 1.141-0 through 1.141-15 to section 145(a)—

(1) References to governmental persons include 501(c)(3) organizations with respect to their activities that do not constitute unrelated trades or businesses under section 513(a);

(2) References to “10 percent” and “proceeds” in the context of the private business use test and the private security or payment test mean “5 percent” and “net proceeds”; and

(3) References to the private business use test in §§ 1.141-2 and 1.141-12 include the ownership test of section 145(a)(1).

(c) *Exceptions—(1) Certain provisions relating to governmental programs.* The following provisions do not apply to section 145: § 1.141-2(d)(4) (relating to the special rule for dispositions of personal property in the ordinary course of an established governmental program) and § 1.141-2(d)(5) (relating to the special rule for general obligation bond programs that finance a large number of separate purposes).

(2) *Costs of issuance.* Section 1.141-3(g)(6) does not apply to section 145(a)(2) to the extent that it provides that costs of issuance are allocated ratably among the other purposes for which the proceeds are used. For purposes of section 145(a)(2), costs of issuance are treated as private business use.

(d) *Issuance costs financed by prior issue.* Solely for purposes of applying the private business use test to a refunding issue under § 1.141-13, the use of proceeds of the prior issue (or any earlier issue in a series of refundings) to pay issuance costs of the prior issue (or the earlier issue) is treated as a government use.

[T.D. 8712, 62 FR 2303, Jan. 16, 1997, as amended by T.D. 9234, 70 FR 75035, Dec. 19, 2005]

## Internal Revenue Service, Treasury

## § 1.148-0

### § 1.147-0 Table of contents.

This section lists the captioned paragraphs contained in §§1.147-1 and 1.147-2.

*§1.147-1 Other requirements applicable to certain private activity bonds.*

- (a) Overview.
- (b) Scope.
- (c) Effective dates.

*§1.147-2 Remedial actions.*

[T.D. 8712, 62 FR 2304, Jan. 16, 1997]

### § 1.147-1 Other requirements applicable to certain private activity bonds.

(a) *Overview.* Interest on a private activity bond is not excludable from gross income under section 103(a) unless the bond is a qualified bond. Under section 147, certain requirements must be met for a private activity bond to qualify as a qualified bond.

(b) *Scope.* Sections 1.147-0 through 1.147-2 apply for purposes of the rules in section 147 for qualified private activity bonds that permit use of proceeds to acquire land for environmental purposes (section 147(c)(3)), permit use of proceeds for certain rehabilitations (section 147(d) (2) and (3)), prohibit use of proceeds to finance skyboxes, airplanes, gambling establishments and similar facilities (section 147(e)), and require public approval (section 147(f)), but not for the rules limiting use of proceeds to acquire land or existing property under sections 147(c) (1) and (2), and (d)(1).

(c) *Effective dates.* For effective dates of §§1.147-0 through 1.147-2, see §1.141-16.

[T.D. 8712, 62 FR 2304, Jan. 16, 1997]

### § 1.147-2 Remedial actions.

The remedial action rules of §1.142-2 apply to the rules in section 147 for qualified private activity bonds that permit use of proceeds to acquire land for environmental purposes (section 147(c)(3)), permit use of proceeds for certain rehabilitations (section 147(d) (2) and (3)), prohibit use of proceeds to finance skyboxes, airplanes, gambling establishments and similar facilities (section 147(e)), and require public approval (section 147(f)), for this purpose treating those private activity bonds subject to the rules under section 147

as exempt facility bonds and the qualifying purposes for those bonds as exempt facilities.

[T.D. 8712, 62 FR 2304, Jan. 16, 1997]

### § 1.147(b)-1 Bond maturity limitation-treatment of working capital.

Section 147(b) does not apply to proceeds of a private activity bond issue used to finance working capital expenditures.

[T.D. 8476, 58 FR 33515, June 18, 1993]

### § 1.148-0 Scope and table of contents.

(a) *Overview.* Under section 103(a), interest on certain obligations issued by States and local governments is excludable from the gross income of the owners. Section 148 was enacted to minimize the arbitrage benefits from investing gross proceeds of tax-exempt bonds in higher yielding investments and to remove the arbitrage incentives to issue more bonds, to issue bonds earlier, or to leave bonds outstanding longer than is otherwise reasonably necessary to accomplish the governmental purposes for which the bonds were issued. To accomplish these purposes, section 148 restricts the direct and indirect investment of bond proceeds in higher yielding investments and requires that certain earnings on higher yielding investments be rebated to the United States. Violation of these provisions causes the bonds in the issue to become *arbitrage bonds*, the interest on which is not excludable from the gross income of the owners under section 103(a). The regulations in §§1.148-1 through 1.148-11 apply in a manner consistent with these purposes.

(b) *Scope.* Sections 1.148-1 through 1.148-11 apply generally for purposes of the arbitrage restrictions on State and local bonds under section 148.

(c) *Table of contents.* This paragraph (c) lists the table of contents for §§1.148-1, 1.148-2, 1.148-3, 1.148-4, 1.148-5, 1.148-6, 1.148-7, 1.148-8, 1.148-9, 1.148-10 and 1.148-11.

*§1.148-1 Definitions and elections.*

- (a) In general.
- (b) Certain definitions.
- (c) Definition of replacement proceeds.
  - (1) In general.
  - (2) Sinking fund.
  - (3) Pledged fund.
  - (4) Other replacement proceeds.

**§ 1.148-0**

**26 CFR Ch. I (4-1-06 Edition)**

- (d) Elections.
- (e) Investment-type property.
  - (1) In general.
  - (2) Prepayments.
  - (3) Certain hedges.

**§ 1.148-2 General arbitrage yield restriction rules.**

- (a) In general.
- (b) Reasonable expectations.
  - (1) In general.
  - (2) Certification of expectations.
  - (c) Intentional acts.
  - (d) Materially higher yielding investments.
    - (1) In general.
    - (2) Definitions of materially higher yield.
    - (3) Mortgage loans.
  - (e) Temporary periods.
    - (1) In general.
    - (2) General 3-year temporary period for capital projects and qualified mortgage loans.
    - (3) Temporary period for restricted working capital expenditures.
    - (4) Temporary period for pooled financings.
    - (5) Temporary period for replacement proceeds.
    - (6) Temporary period for investment proceeds.
    - (7) Other amounts.
  - (f) Reserve or replacement funds.
    - (1) General 10 percent limitation on funding with sale proceeds.
    - (2) Exception from yield restriction for reasonably required reserve or replacement funds.
    - (3) Certain parity reserve funds.
    - (g) Minor portion.
    - (h) Certain waivers permitted.

**§ 1.148-3 General arbitrage rebate rules.**

- (a) In general.
- (b) Definition of rebate amount.
- (c) Computation of future value of a payment or receipt.
- (d) Payments and receipts.
  - (1) Definition of payments.
  - (2) Definition of receipts.
  - (3) Special rules for commingled funds.
- (e) Computation dates.
  - (1) In general.
  - (2) Final computation date.
- (f) Amount of required rebate installment payment.
  - (1) Amount of interim rebate payments.
  - (2) Amount of final rebate payment.
  - (3) Future value of rebate payments.
  - (g) Time and manner of payment.
  - (h) Penalty in lieu of loss of tax exemption.
    - (1) In general.
    - (2) Interest on underpayments.
    - (3) Waivers of the penalty.
    - (4) Application to alternative penalty under § 1.148-7.
  - (i) Recovery of overpayment of rebate.
    - (1) In general.
    - (2) Limitations on recovery.
  - (j) Examples.
  - (k) Bona fide debt service fund exception.

**§ 1.148-4 Yield on an issue of bonds.**

- (a) In general.
- (b) Computing yield on a fixed yield issue.
  - (1) In general.
  - (2) Yield on certain fixed yield bonds subject to mandatory or contingent early redemption.
  - (3) Yield on certain fixed yield bonds subject to optional early redemption.
  - (4) Yield recomputed upon transfer of certain rights associated with the bond.
  - (5) Special aggregation rule treating certain bonds as a single fixed yield bond.
  - (6) Examples.
- (c) Computing yield on a variable yield issue.
  - (1) In general.
  - (2) Payments on bonds included in yield for a computation period.
  - (3) Example.
  - (d) Conversion from variable yield issue to fixed yield issue.
  - (e) Value of bonds.
    - (1) Plain par bonds.
    - (2) Other bonds.
    - (f) Qualified guarantees.
      - (1) In general.
      - (2) Interest savings.
      - (3) Guarantee in substance.
      - (4) Reasonable charge.
      - (5) Guarantee of purpose investments.
      - (6) Allocation of qualified guarantee payments.
    - (7) Refund or reduction of guarantee payments.
  - (g) Yield on certain mortgage revenue and student loan bonds.
  - (h) Qualified hedging transactions.
    - (1) In general.
    - (2) Qualified hedge defined.
    - (3) Accounting for qualified hedges.
    - (4) Certain variable yield bonds treated as fixed yield bonds.
    - (5) Contracts entered into before issue date of hedged bond.
    - (6) Authority of the Commissioner.

**§ 1.148-5 Yield and valuation of investments.**

- (a) In general.
- (b) Yield on an investment.
  - (1) In general.
  - (2) Yield on a separate class of investments.
  - (3) Investments to be held beyond issue's maturity or beyond temporary period.
  - (4) Consistent redemption assumptions on purpose investments.
  - (5) Student loan special allowance payments included in yield.
- (c) Yield reduction payments to the United States.
  - (1) In general.
  - (2) Manner of payment.
  - (3) Applicability of special yield reduction rule.
  - (d) Value of investments.
    - (1) In general.

- (2) Mandatory valuation of yield restricted investments at present value.
  - (3) Mandatory valuation of certain investments at fair market value.
  - (4) Special transition rule for transferred proceeds.
  - (5) Definition of present value of an investment.
  - (6) Definition of fair market value.
  - (e) Administrative costs of investments.
    - (1) In general.
    - (2) Qualified administrative costs on non-purpose investments.
    - (3) Qualified administrative costs on purpose investments.
- § 1.148-6 General allocation and accounting rules.*
- (a) In general.
    - (1) Reasonable accounting methods required.
    - (2) Bona fide deviations from accounting method.
  - (b) Allocation of gross proceeds to an issue.
    - (1) One-issue rule and general ordering rules.
    - (2) Universal cap on value of nonpurpose investments allocated to an issue.
  - (c) Fair market value limit on allocations to nonpurpose investments.
  - (d) Allocation of gross proceeds to expenditures.
    - (1) Expenditures in general.
    - (2) Treatment of gross proceeds invested in purpose investments.
    - (3) Expenditures for working capital purposes.
    - (4) Expenditures for grants.
    - (5) Expenditures for reimbursement purposes.
    - (6) Expenditures of certain commingled investment proceeds of governmental issues.
    - (7) Payments to related parties.
  - (e) Special rules for commingled funds.
    - (1) In general.
    - (2) Investments held by a commingled fund.
    - (3) Certain expenditures involving a commingled fund.
    - (4) Fiscal periods.
    - (5) Unrealized gains and losses on investments of a commingled fund.
    - (6) Allocations of commingled funds serving as common reserve funds or sinking funds.
- § 1.148-7 Spending exceptions to the rebate requirement.*
- (a) Scope of section.
    - (1) In general.
    - (2) Relationship of spending exceptions.
    - (3) Spending exceptions not mandatory.
  - (b) Rules applicable for all spending exceptions.
    - (1) Special transferred proceeds rules.
    - (2) Application of multipurpose issue rules.
    - (3) Expenditures for governmental purposes of the issue.
  - (4) De minimis rule.
  - (5) Special definition of reasonably required reserve or replacement fund.
  - (6) Pooled financing issue.
    - (c) 6-month exception.
      - (1) General rule.
      - (2) Additional period for certain bonds.
    - (3) Amounts not included in gross proceeds.
    - (4) Series of refundings.
      - (d) 18-month exception.
        - (1) General rule.
        - (2) Extension for reasonable retainage.
      - (3) Gross proceeds.
      - (4) Application to multipurpose issues.
    - (e) 2-year exception.
      - (1) General rule.
      - (2) Extension for reasonable retainage.
    - (3) Definitions.
      - (f) Construction issue.
        - (1) Definition.
        - (2) Use of actual facts.
        - (3) Ownership requirement.
      - (g) Construction expenditures.
        - (1) Definition.
        - (2) Certain acquisitions under turnkey contracts treated as construction expenditures.
        - (3) Constructed personal property.
        - (4) Specially developed computer software.
      - (5) Examples.
        - (h) Reasonable retainage definition.
          - (i) Available construction proceeds.
        - (1) Definition in general.
          - (2) Earnings on a reasonably required reserve or replacement fund.
        - (3) Reasonable expectations test for future earnings.
      - (4) Issuance costs.
        - (5) One and one-half percent penalty in lieu of arbitrage rebate.
      - (6) Payments on purpose investments and repayments of grants.
        - (7) Examples.
          - (j) Election to treat portion of issue used for construction as separate issue.
            - (1) In general.
            - (2) Example.
          - (k) One and one-half percent penalty in lieu of arbitrage rebate.
            - (1) In general.
            - (2) Application to reasonable retainage.
            - (3) Coordination with rebate requirement.
          - (1) Termination of 1½ percent penalty.
            - (1) Termination after initial temporary period.
            - (2) Termination before end of initial temporary period.
            - (3) Application to reasonable retainage.
            - (4) Example.
          - (m) Payment of penalties.

*§ 1.148-8 Small issuer exception to rebate requirement.*

    - (a) Scope.
      - (b) General taxing powers.
      - (c) Size limitation.
        - (1) In general.
        - (2) Aggregation rules.

**§ 1.148-1**

**26 CFR Ch. I (4-1-06 Edition)**

- (3) Certain refunding bonds not taken into account.
  - (d) Pooled financings.
  - (1) Treatment of pool issuer.
  - (2) Treatment of conduit borrowers.
  - (e) Refunding issues.
  - (1) In general.
  - (2) Multipurpose issues.
- § 1.148-9 Arbitrage rules for refunding issues.*
- (a) Scope of application.
  - (b) Transferred proceeds allocation rule.
  - (1) In general.
  - (2) Special definition of principal amount.
  - (3) Relation of transferred proceeds rule to universal cap rule.
  - (4) Limitation on multi-generational transfers.
  - (c) Special allocation rules for refunding issues.
  - (1) Allocations of investments.
  - (2) Allocations of mixed escrows to expenditures for principal, interest, and redemption prices on a prior issue.
  - (d) Temporary periods in refundings.
  - (1) In general.
  - (2) Types of temporary periods in refundings.
  - (e) Reasonably required reserve or replacement funds in refundings.
  - (f) Minor portions in refundings.
  - (g) Certain waivers permitted.
  - (h) Multipurpose issue allocations.
  - (1) Application of multipurpose issue allocation rules.
  - (2) Rules on allocations of multipurpose issues.
  - (3) Separate purposes of a multipurpose issue.
  - (4) Allocations of bonds of a multipurpose issue.
  - (5) Limitation on multi-generation allocations.
  - (i) Operating rules for separation of prior issues into refunded and unrefunded portions.
  - (1) In general.
  - (2) Allocations of proceeds and investments in a partial refunding.
  - (3) References to prior issue.
- § 1.148-10 Anti-abuse rules and authority of Commissioner.*
- (a) Abusive arbitrage device.
  - (1) In general.
  - (2) Abusive arbitrage device defined.
  - (3) Exploitation of tax-exempt interest rates.
  - (4) Overburdening the tax-exempt market.
  - (b) Consequences of overburdening the tax-exempt bond market.
  - (1) In general.
  - (2) Application.
  - (c) Anti-abuse rules on excess gross proceeds of advance refunding issues.
  - (1) In general.
  - (2) Definition of excess gross proceeds.
  - (3) Special treatment of transferred proceeds.

- (4) Special rule for crossover refundings.
  - (5) Special rule for gross refundings.
  - (d) Examples.
  - (e) Authority of the Commissioner to clearly reflect the economic substance of a transaction.
  - (f) Authority of the Commissioner to require an earlier date for payment of rebate.
  - (g) Authority of the Commissioner to waive regulatory limitations.
- § 1.148-11 Effective dates.*
- (a) In general.
  - (b) Elective retroactive application in whole.
  - (1) In general.
  - (2) No elective retroactive application for 18-month spending exception.
  - (3) No elective retroactive application for hedges of fixed rate issues.
  - (4) No elective retroactive application for safe harbor for establishing fair market value for guaranteed investment contracts and investments purchased for a yield restricted defeasance escrow.
  - (c) Elective retroactive application of certain provisions.
  - (1) Retroactive application of overpayment recovery provisions.
  - (2) Certain allocations of multipurpose issues.
  - (3) Special limitation.
  - (d) Transition rule excepting certain state guarantee funds from the definition of replacement proceeds.
  - (1) Certain perpetual trust funds.
  - (2) Permanent University Fund.
  - (e) Transition rule regarding special allowance payments.
  - (f) Transition rule regarding applicability of yield reduction rule.
  - (g) Provisions applicable to certain bonds sold before effective date.
  - (h) Safe harbor for establishing fair market value for guaranteed investment contracts and investments purchased for a yield restricted defeasance escrow.
  - (i) Special rule for certain broker's commissions and similar fees.
  - (j) Certain prepayments.

[T.D. 8476, 58 FR 33515, June 18, 1993, as amended by T.D. 8538, 59 FR 24041, May 10, 1994; T.D. 8718, 62 FR 25506, May 9, 1997; T.D. 9085, 68 FR 45775, Aug. 4, 2003; T.D. 9097, 68 FR 69022, Dec. 11, 2003]

**§ 1.148-1 Definitions and elections.**

- (a) *In general.* The definitions in this section and the definitions under section 150 apply for purposes of section 148 and §§ 1.148-1 through 1.148-11.
- (b) *Certain definitions.* The following definitions apply:
  - Accounting method* means both the overall method used to account for

gross proceeds of an issue (e.g., the cash method or a modified accrual method) and the method used to account for or allocate any particular item within that overall accounting method (e.g., accounting for investments, expenditures, allocations to and from different sources, and particular items of the foregoing).

*Annuity contract* means annuity contract as defined in section 72.

*Available amount* means available amount as defined in §1.148-6(d)(3)(iii).

*Bona fide debt service fund* means a fund, which may include proceeds of an issue, that—

(1) Is used primarily to achieve a proper matching of revenues with principal and interest payments within each bond year; and

(2) Is depleted at least once each bond year, except for a reasonable carryover amount not to exceed the greater of:

(i) the earnings on the fund for the immediately preceding bond year; or

(ii) one-twelfth of the principal and interest payments on the issue for the immediately preceding bond year.

*Bond year* means, in reference to an issue, each 1-year period that ends on the day selected by the issuer. The first and last bond years may be short periods. If no day is selected by the issuer before the earlier of the final maturity date of the issue or the date that is 5 years after the issue date, bond years end on each anniversary of the issue date and on the final maturity date.

*Capital project or capital projects* means all capital expenditures, plus related working capital expenditures to which the de minimis rule under §1.148-6(d)(3)(ii)(A) applies, that carry out the governmental purposes of an issue. For example, a capital project may include capital expenditures for one or more buildings, plus related start-up operating costs.

*Commingled fund* means any fund or account containing both gross proceeds of an issue and amounts in excess of \$25,000 that are not gross proceeds of that issue if the amounts in the fund or account are invested and accounted for collectively, without regard to the source of funds deposited in the fund or account. An open-end regulated investment company under section 851, however, is not a commingled fund.

*Computation date* means each date on which the rebate amount for an issue is computed under §1.148-3(e).

*Computation period* means the period between computation dates. The first computation period begins on the issue date and ends on the first computation date. Each succeeding computation period begins on the date immediately following the computation date and ends on the next computation date.

*Consistently applied* means applied uniformly within a fiscal period and between fiscal periods to account for gross proceeds of an issue and any amounts that are in a commingled fund.

*De minimis amount* means—

(1) In reference to original issue discount (as defined in section 1273(a)(1)) or premium on an obligation—

(i) An amount that does not exceed 2 percent multiplied by the stated redemption price at maturity; plus

(ii) Any original issue premium that is attributable exclusively to reasonable underwriters' compensation; and

(2) In reference to market discount (as defined in section 1278(a)(2)(A)) or premium on an obligation, an amount that does not exceed 2 percent multiplied by the stated redemption price at maturity.

*Economic accrual method* (also known as the *constant interest method* or *actuarial method*) means the method of computing yield that is based on the compounding of interest at the end of each compounding period.

*Fair market value* means fair market value as defined in §1.148-5(d)(6).

*Fixed rate investment* means any investment whose yield is fixed and determinable on the issue date.

*Fixed yield bond* means any bond whose yield is fixed and determinable on the issue date using the assumptions and rules provided in §1.148-4(b).

*Fixed yield issue* means any issue if each bond that is part of the issue is a fixed yield bond.

*Gross proceeds* means any proceeds and replacement proceeds of an issue.

*Guaranteed investment contract* includes any nonpurpose investment that has specifically negotiated withdrawal or reinvestment provisions and a specifically negotiated interest rate, and also includes any agreement to supply

investments on two or more future dates (e.g., a forward supply contract).

*Higher yielding investments* means higher yielding investments as defined in section 148(b)(1).

*Investment* means any investment property as defined in sections 148(b)(2) and 148(b)(3), and any other tax-exempt bond.

*Investment proceeds* means any amounts actually or constructively received from investing proceeds of an issue.

*Investment-type property* is defined in paragraph (e) of this section.

*Issue price* means, except as otherwise provided, issue price as defined in sections 1273 and 1274. Generally, the issue price of bonds that are publicly offered is the first price at which a substantial amount of the bonds is sold to the public. Ten percent is a substantial amount. The public does not include bond houses, brokers, or similar persons or organizations acting in the capacity of underwriters or wholesalers. The issue price does not change if part of the issue is later sold at a different price. The issue price of bonds that are not substantially identical is determined separately. The issue price of bonds for which a bona fide public offering is made is determined as of the sale date based on reasonable expectations regarding the initial public offering price. If a bond is issued for property, the applicable Federal tax-exempt rate is used in lieu of the Federal rate in determining the issue price under section 1274. The issue price of bonds may not exceed their fair market value as of the sale date.

*Issuer* generally means the entity that actually issues the issue, and, unless the context or a provision clearly requires otherwise, each conduit borrower of the issue. For example, rules imposed on issuers to account for gross proceeds of an issue apply to a conduit borrower to account for any gross proceeds received under a purpose investment. Provisions regarding elections, filings, liability for the rebate amount, and certifications of reasonable expectations apply only to the actual issuer.

*Multipurpose issue* means an issue the proceeds of which are used for two or more separate purposes determined in accordance with § 1.148-9(h).

*Net sale proceeds* means sale proceeds, less the portion of those sale proceeds invested in a reasonably required reserve or replacement fund under section 148(d) and as part of a minor portion under section 148(e).

*Nonpurpose investment* means any investment property, as defined in section 148(b), that is not a purpose investment.

*Payment* means a payment as defined in § 1.148-3(d) for purposes of computing the rebate amount, and a payment as defined in § 1.148-5(b) for purposes of computing the yield on an investment.

*Plain par bond* means a qualified tender bond or a bond—

(1) Issued with not more than a de minimis amount of original issue discount or premium;

(2) Issued for a price that does not include accrued interest other than pre-issuance accrued interest;

(3) That bears interest from the issue date at a single, stated, fixed rate or that is a variable rate debt instrument under section 1275, in each case with interest unconditionally payable at least annually; and

(4) That has a lowest stated redemption price that is not less than its outstanding stated principal amount.

*Plain par investment* means an investment that is an obligation—

(1) Issued with not more than a de minimis amount of original issue discount or premium, or, if acquired on a date other than the issue date, acquired with not more than a de minimis amount of market discount or premium;

(2) Issued for a price that does not include accrued interest other than pre-issuance accrued interest;

(3) That bears interest from the issue date at a single, stated, fixed rate or that is a variable rate debt instrument under section 1275, in each case with interest unconditionally payable at least annually; and

(4) That has a lowest stated redemption price that is not less than its outstanding stated principal amount.

*Pre-issuance accrued interest* means amounts representing interest that accrued on an obligation for a period not greater than one year before its issue date but only if those amounts are paid within one year after the issue date.

*Proceeds* means any sale proceeds, investment proceeds, and transferred proceeds of an issue. Proceeds do not include, however, amounts actually or constructively received with respect to a purpose investment that are properly allocable to the immaterially higher yield under § 1.148-2(d) or section 143(g) or to qualified administrative costs recoverable under § 1.148-5(e).

*Program investment* means a purpose investment that is part of a governmental program in which—

(1) The program involves the origination or acquisition of purpose investments;

(2) At least 95 percent (90 percent for qualified student loans under section 144(b)(1)(A)) of the cost of the purpose investments acquired under the program represents one or more loans to a substantial number of persons representing the general public, States or political subdivisions, 501(c)(3) organizations, persons who provide housing and related facilities, or any combination of the foregoing;

(3) At least 95 percent of the receipts from the purpose investments are used to pay principal, interest, or redemption prices on issues that financed the program, to pay or reimburse administrative costs of those issues or of the program, to pay or reimburse anticipated future losses directly related to the program, to finance additional purpose investments for the same general purposes of the program, or to redeem and retire governmental obligations at the next earliest possible date of redemption;

(4) The program documents prohibit any obligor on a purpose investment financed by the program or any related party to that obligor from purchasing bonds of an issue that finance the program in an amount related to the amount of the purpose investment acquired from that obligor; and

(5) The issuer has not waived the right to treat the investment as a program investment.

*Purpose investment* means an investment that is acquired to carry out the governmental purpose of an issue.

*Qualified administrative costs* means qualified administrative costs as defined in § 1.148-5(e).

*Qualified guarantee* means a qualified guarantee as defined in § 1.148-4(f).

*Qualified hedge* means a qualified hedge as defined in § 1.148-4(h)(2).

*Reasonable expectations or reasonableness.* An issuer's expectations or actions are reasonable only if a prudent person in the same circumstances as the issuer would have those same expectations or take those same actions, based on all the objective facts and circumstances. Factors relevant to a determination of reasonableness include the issuer's history of conduct concerning stated expectations made in connection with the issuance of obligations, the level of inquiry by the issuer into factual matters, and the existence of covenants, enforceable by bondholders, that require implementation of specific expectations. For a conduit financing issue, factors relevant to a determination of reasonableness include the reasonable expectations of the conduit borrower, but only if, under the circumstances, it is reasonable and prudent for the issuer to rely on those expectations.

*Rebate amount* means 100 percent of the amount owed to the United States under section 148(f)(2), as further described in § 1.148-3.

*Receipt* means a receipt as defined in § 1.148-3(d) for purposes of computing the rebate amount, and a receipt as defined in § 1.148-5(b) for purposes of computing yield on an investment.

*Refunding escrow* means one or more funds established as part of a single transaction or a series of related transactions, containing proceeds of a refunding issue and any other amounts to provide for payment of principal or interest on one or more prior issues. For this purpose, funds are generally not so established solely because of—

(1) The deposit of proceeds of an issue and replacement proceeds of the prior issue in an escrow more than 6 months apart, or

(2) The deposit of proceeds of completely separate issues in an escrow.

*Replacement proceeds* is defined in paragraph (c) of this section.

*Restricted working capital expenditures* means working capital expenditures that are subject to the proceeds-spent-last rule in § 1.148-6(d)(3)(i) and are ineligible for any exception to that rule.

*Sale proceeds* means any amounts actually or constructively received from the sale of the issue, including amounts used to pay underwriters' discount or compensation and accrued interest other than pre-issuance accrued interest. Sale proceeds also include, but are not limited to, amounts derived from the sale of a right that is associated with a bond, and that is described in § 1.148-4(b)(4). See also § 1.148-4(h)(5) treating amounts received upon the termination of certain hedges as sale proceeds.

*Stated redemption price* means the redemption price of an obligation under the terms of that obligation, including any call premium.

*Transferred proceeds* means transferred proceeds as defined in § 1.148-9 (or the applicable corresponding provision of prior law).

*Unconditionally payable* means payable under terms in which—

(1) Late payment or nonpayment results in a significant penalty to the borrower or reasonable remedies to the lender, and

(2) It is reasonably certain on the issue date that the payment will actually be made.

*Value* means value determined under § 1.148-4(e) for a bond, and value determined under § 1.148-5(d) for an investment.

*Variable yield bond* means any bond that is not a fixed yield bond.

*Variable yield issue* means any issue that is not a fixed yield issue.

*Yield* means yield computed under § 1.148-4 for an issue, and yield computed under § 1.148-5 for an investment.

*Yield restricted* means required to be invested at a yield that is not materially higher than the yield on the issue under section 148(a) and § 1.148-2.

(c) *Definition of replacement proceeds—*

(1) *In general.* Amounts are replacement proceeds of an issue if the amounts have a sufficiently direct nexus to the issue or to the governmental purpose of the issue to conclude that the amounts would have been used for that governmental purpose if the proceeds of the issue were not used or to be used for that governmental purpose. For this purpose, governmental purposes include the expected use of amounts for the payment of debt serv-

ice on a particular date. The mere availability or preliminary earmarking of amounts for a governmental purpose, however, does not in itself establish a sufficient nexus to cause those amounts to be replacement proceeds. Replacement proceeds include, but are not limited to, sinking funds, pledged funds, and other replacement proceeds described in paragraph (c)(4) of this section, to the extent that those funds or amounts are held by or derived from a substantial beneficiary of the issue. A substantial beneficiary of an issue includes the issuer and any related party to the issuer, and, if the issuer is not a state, the state in which the issuer is located. A person is not a substantial beneficiary of an issue solely because it is a guarantor under a qualified guarantee.

(2) *Sinking fund.* *Sinking fund* includes a debt service fund, redemption fund, reserve fund, replacement fund, or any similar fund, to the extent reasonably expected to be used directly or indirectly to pay principal or interest on the issue.

(3) *Pledged fund—(i) In general.* A *pledged fund* is any amount that is directly or indirectly pledged to pay principal or interest on the issue. A pledge need not be cast in any particular form but, in substance, must provide reasonable assurance that the amount will be available to pay principal or interest on the issue, even if the issuer encounters financial difficulties. A pledge to a guarantor of an issue is an indirect pledge to secure payment of principal or interest on the issue. A pledge of more than 50 percent of the outstanding stock of a corporation that is a conduit borrower of the issue is not treated as a pledge for this purpose, unless the corporation is formed or availed of to avoid the creation of replacement proceeds.

(ii) *Negative pledges.* An amount is treated as pledged to pay principal or interest on an issue if it is held under an agreement to maintain the amount at a particular level for the direct or indirect benefit of the bondholders or a guarantor of the bonds. An amount is not treated as pledged under this paragraph (c)(3)(ii), however, if—

(A) The issuer or a substantial beneficiary may grant rights in the amount

that are superior to the rights of the bondholders or the guarantor; or

(B) The amount does not exceed reasonable needs for which it is maintained, the required level is tested no more frequently than every 6 months, and the amount may be spent without any substantial restriction other than a requirement to replenish the amount by the next testing date.

(4) *Other replacement proceeds*—(i) *Bonds outstanding longer than necessary*—(A) *In general.* Replacement proceeds arise to the extent that the issuer reasonably expects as of the issue date that—

(1) The term of an issue will be longer than is reasonably necessary for the governmental purposes of the issue, and

(2) There will be available amounts during the period that the issue remains outstanding longer than necessary. Whether an issue is outstanding longer than necessary is determined under § 1.148-10. Replacement proceeds are created under this paragraph (c)(4)(i)(A) at the beginning of each fiscal year during which an issue remains outstanding longer than necessary in an amount equal to available amounts of the issuer as of that date.

(B) *Safe harbor against creation of replacement proceeds.* As a safe harbor, replacement proceeds do not arise under paragraph (c)(4)(i)(A) of this section—

(1) For the portion of an issue that is to be used to finance restricted working capital expenditures, if that portion is not outstanding longer than 2 years;

(2) For the portion of an issue (including a refunding issue) that is to be used to finance or refinance capital projects, if that portion has a weighted average maturity that does not exceed 120 percent of the average reasonably expected economic life of the financed capital projects, determined in the same manner as under section 147(b); or

(3) For the portion of an issue that is a refunding issue, if that portion has a weighted average maturity that does not exceed the remaining weighted average maturity of the prior issue, and the issue of which the prior issue is a part satisfies paragraph (c)(4)(i)(B) (1) or (2) of this section.

(ii) *Bonds financing a working capital reserve*—(A) *In general.* Except as otherwise provided in paragraph (c)(4)(ii)(B) of this section, replacement proceeds arise to the extent a working capital reserve is, directly or indirectly, financed with the proceeds of the issue (regardless of the expenditure of proceeds of the issue). Thus, for example, if an issuer that does not maintain a working capital reserve borrows to fund a working capital reserve, the issuer will have replacement proceeds. To determine the amount of a working capital reserve maintained, an issuer may use the average amount maintained as a working capital reserve during annual periods of at least 1 year, the last of which ends within 1 year before the issue date. For example, the amount of a working capital reserve may be computed using the average of the beginning or ending monthly balances of the amount maintained as a reserve (net of unexpended gross proceeds) during the 1 year period preceding the issue date.

(B) *Exception to creation of replacement proceeds.* Replacement proceeds do not arise under paragraph (c)(4)(ii)(A) of this section with respect to an issue—

(1) All of the net proceeds of which are spent within 6 months of the issue date under section 148(f)(4)(B)(iii)(I); or

(2) That is not subject to the rebate requirement under the exception provided by section 148(f)(4)(D).

(d) *Elections.* Except as otherwise provided, any required elections must be made in writing, and, once made, may not be revoked without the permission of the Commissioner.

(e) *Investment-type property*—(1) *In general.* Investment-type property includes any property, other than property described in section 148(b)(2)(A), (B), (C) or (E), that is held principally as a passive vehicle for the production of income. For this purpose, production of income includes any benefit based on the time value of money.

(2) *Prepayments*—(i) *In general*—(A) *Generally.* Except as otherwise provided in this paragraph (e)(2), a prepayment for property or services, including a prepayment for property or services that is made after the date that the contract to buy the property or services is entered into, also gives rise to

investment-type property if a principal purpose for prepaying is to receive an investment return from the time the prepayment is made until the time payment otherwise would be made. A prepayment does not give rise to investment-type property if—

(1) Prepayments on substantially the same terms are made by a substantial percentage of persons who are similarly situated to the issuer but who are not beneficiaries of tax-exempt financing;

(2) The prepayment is made within 90 days of the reasonably expected date of delivery to the issuer of all of the property or services for which the prepayment is made; or

(3) The prepayment meets the requirements of paragraph (e)(2)(iii)(A) or (B) of this section.

(B) *Example.* The following example illustrates an application of this paragraph (e)(2)(i):

*Example.* Prepayment after contract is executed.

In 1998, City A enters into a ten-year contract with Company Y. Under the contract, Company Y is to provide services to City A over the term of the contract and in return City A will pay Company Y for its services as they are provided. In 2004, City A issues bonds to finance a lump sum payment to Company Y in satisfaction of City A's obligation to pay for Company Y's services to be provided over the remaining term of the contract. The use of bond proceeds to make the lump sum payment constitutes a prepayment for services under paragraph (e)(2)(i) of this section, even though the payment is made after the date that the contract is executed.

(ii) *Customary prepayments.* The determination of whether a prepayment satisfies paragraph (e)(2)(i)(A)(I) of this section is generally made based on all the facts and circumstances. In addition, a prepayment is deemed to satisfy paragraph (e)(2)(i)(A)(I) of this section if—

(A) The prepayment is made for—

(1) Maintenance, repair, or an extended warranty with respect to personal property (for example, automobiles or electronic equipment); or

(2) Updates or maintenance or support services with respect to computer software; and

(B) The same maintenance, repair, extended warranty, updates or maintenance

or support services, as applicable, are regularly provided to non-governmental persons on the same terms.

(iii) *Certain prepayments to acquire a supply of natural gas or electricity—(A) Natural gas prepayments.* A prepayment meets the requirements of this paragraph (e)(2)(iii)(A) if—

(1) It is made by or for one or more utilities that are owned by a governmental person, as defined in §1.141-1(b) (each of which is referred to in this paragraph (e)(2)(iii)(A) as the issuing municipal utility), to purchase a supply of natural gas; and

(2) At least 90 percent of the prepaid natural gas financed by the issue is used for a qualifying use. Natural gas is used for a qualifying use if it is to be—

(i) Furnished to retail gas customers of the issuing municipal utility who are located in the natural gas service area of the issuing municipal utility, provided, however, that gas used to produce electricity for sale shall not be included under this paragraph (e)(2)(iii)(A)(2)(i);

(ii) Used by the issuing municipal utility to produce electricity that will be furnished to retail electric customers of the issuing municipal utility who are located in the electricity service area of the issuing municipal utility;

(iii) Used by the issuing municipal utility to produce electricity that will be sold to a utility that is owned by a governmental person and furnished to retail electric customers of the purchaser who are located in the electricity service area of the purchaser;

(iv) Sold to a utility that is owned by a governmental person if the requirements of paragraph (e)(2)(iii)(A)(2)(i), (ii) or (iii) of this section are satisfied by the purchaser (treating the purchaser as the issuing municipal utility); or

(v) Used to fuel the pipeline transportation of the prepaid gas supply acquired in accordance with this paragraph (e)(2)(iii)(A).

(B) *Electricity prepayments.* A prepayment meets the requirements of this paragraph (e)(2)(iii)(B) if—

(1) It is made by or for one or more utilities that are owned by a governmental person (each of which is referred to in this paragraph (e)(2)(iii)(B) as the issuing municipal utility) to purchase a supply of electricity; and

(2) At least 90 percent of the prepaid electricity financed by the issue is used for a qualifying use. Electricity is used for a qualifying use if it is to be—

(i) Furnished to retail electric customers of the issuing municipal utility who are located in the electricity service area of the issuing municipal utility; or

(ii) Sold to a utility that is owned by a governmental person and furnished to retail electric customers of the purchaser who are located in the electricity service area of the purchaser.

(C) *Service area.* For purposes of this paragraph (e)(2)(iii), the service area of a utility owned by a governmental person consists of—

(1) Any area throughout which the utility provided, at all times during the 5-year period ending on the issue date—

(i) In the case of a natural gas utility, natural gas transmission or distribution service; and

(ii) In the case of an electric utility, electricity distribution service; and

(2) Any area recognized as the service area of the utility under state or Federal law.

(D) *Retail customer.* For purposes of this paragraph (e)(2)(iii), a retail customer is a customer that purchases natural gas or electricity, as applicable, other than for resale.

(E) *Commodity swaps.* A prepayment does not fail to meet the requirements of this paragraph (e)(2)(iii) by reason of any commodity swap contract that may be entered into between the issuer and an unrelated party (other than the gas or electricity supplier), or between the gas or electricity supplier and an unrelated party (other than the issuer), so long as each swap contract is an independent contract. A swap contract is an independent contract if the obligation of each party to perform under the swap contract is not dependent on performance by any person (other than the other party to the swap contract) under another contract (for example, a gas or electricity supply contract or

another swap contract); provided, however, that a commodity swap contract will not fail to be an independent contract solely because the swap contract may terminate in the event of a failure of a gas or electricity supplier to deliver gas or electricity for which the swap contract is a hedge.

(F) *Remedial action.* Issuers may apply principles similar to the rules of §1.141-12, including §1.141-12(d) (relating to redemption or defeasance of nonqualified bonds) and §1.141-12(e) (relating to alternative use of disposition proceeds), to cure a violation of paragraph (e)(2)(iii)(A)(2) or (e)(2)(iii)(B)(2) of this section. For this purpose, the amount of nonqualified bonds is determined in the same manner as for output contracts taken into account under the private business tests, including the principles of §1.141-7(d), treating nonqualified sales of gas or electricity under this paragraph (e)(2)(iii) as satisfying the benefits and burdens test under §1.141-7(c)(1).

(iv) *Additional prepayments as permitted by the Commissioner.* The Commissioner may, by published guidance, set forth additional circumstances in which a prepayment does not give rise to investment-type property.

[T.D. 8476, 58 FR 33517, June 18, 1993; 58 FR 44452, Aug. 23, 1993, as amended by T.D. 8538, 59 FR 24041, May 10, 1994; T.D. 8718, 62 FR 25507, May 9, 1997; T.D. 9085, 68 FR 45775, Aug. 4, 2003]

#### § 1.148-2 General arbitrage yield restriction rules.

(a) *In general.* Under section 148(a), the direct or indirect investment of the gross proceeds of an issue in higher yielding investments causes the bonds of the issue to be arbitrage bonds. The investment of proceeds in higher yielding investments, however, during a temporary period described in paragraph (e) of this section, as part of a reasonably required reserve or replacement fund described in paragraph (f) of this section, or as part of a minor portion described in paragraph (g) of this section does not cause the bonds of the issue to be arbitrage bonds. Bonds are not arbitrage bonds under this section as a result of an inadvertent, insubstantial error.

(b) *Reasonable expectations*—(1) *In general.* Except as provided in paragraph (c) of this section, the determination of whether an issue consists of arbitrage bonds under section 148(a) is based on the issuer's reasonable expectations as of the issue date regarding the amount and use of the gross proceeds of the issue.

(2) *Certification of expectations*—(i) *In general.* An officer of the issuer responsible for issuing the bonds must, in good faith, certify the issuer's expectations as of the issue date. The certification must state the facts and estimates that form the basis for the issuer's expectations. The certification is evidence of the issuer's expectations, but does not establish any conclusions of law or any presumptions regarding either the issuer's actual expectations or their reasonableness.

(ii) *Exceptions to certification requirement.* An issuer is not required to make a certification for an issue under paragraph (b)(2)(i) of this section if—

(A) The issuer reasonably expects as of the issue date that there will be no unspent gross proceeds after the issue date, other than gross proceeds in a bona fide debt service fund (e.g., equipment lease financings in which the issuer purchases equipment in exchange for an installment payment note); or

(B) The issue price of the issue does not exceed \$1,000,000.

(c) *Intentional acts.* The taking of any deliberate, intentional action by the issuer or person acting on its behalf after the issue date in order to earn arbitrage causes the bonds of the issue to be arbitrage bonds if that action, had it been expected on the issue date, would have caused the bonds to be arbitrage bonds. An intent to violate the requirements of section 148 is not necessary for an action to be intentional.

(d) *Materially higher yielding investments*—(1) *In general.* The yield on investments is materially higher than the yield on the issue to which the investments are allocated if the yield on the investments over the term of the issue exceeds the yield on the issue by an amount in excess of the applicable definition of *materially higher* set forth in paragraph (d)(2) of this section. If yield restricted investments in the

same class are subject to different definitions of *materially higher*, the applicable definition of *materially higher* that produces the lowest permitted yield applies to all the investments in the class. The yield on the issue is determined under § 1.148-4. The yield on investments is determined under § 1.148-5.

(2) *Definitions of materially higher yield*—(i) *General rule for purpose and nonpurpose investments.* For investments that are not otherwise described in this paragraph (d)(2), *materially higher* means one-eighth of 1 percentage point.

(ii) *Refunding escrows and replacement proceeds.* For investments in a refunding escrow or for investments allocable to replacement proceeds, *materially higher* means one-thousandth of 1 percentage point.

(iii) *Program investments.* For program investments that are not described in paragraph (d)(2)(iv) of this section, *materially higher* means 1 and one-half percentage points.

(iv) *Student loans.* For qualified student loans that are program investments, *materially higher* means 2 percentage points.

(v) *Tax-exempt investments.* For investments that are tax-exempt bonds and are not investment property under section 148(b)(3), no yield limitation applies.

(3) *Mortgage loans.* Qualified mortgage loans that satisfy the requirements of section 143(g) are treated as meeting the requirements of this paragraph (d).

(e) *Temporary periods*—(1) *In general.* During the temporary periods set forth in this paragraph (e), the proceeds and replacement proceeds of an issue may be invested in higher yielding investments without causing bonds in the issue to be arbitrage bonds. This paragraph (e) does not apply to refunding issues (see § 1.148-9).

(2) *General 3-year temporary period for capital projects and qualified mortgage loans*—(i) *In general.* The net sale proceeds and investment proceeds of an issue reasonably expected to be allocated to expenditures for capital projects qualify for a temporary period of 3 years beginning on the issue date (the *3-year temporary period*). The 3-year temporary period also applies to the

proceeds of qualified mortgage bonds and qualified veterans' mortgage bonds by substituting *qualified mortgage loans* in each place that *capital projects* appears in this paragraph (e)(2). The 3-year temporary period applies only if the issuer reasonably expects to satisfy the expenditure test, the time test, and the due diligence test. These rules apply separately to each conduit loan financed by an issue (other than qualified mortgage loans), with the expenditure and time tests measured from the issue date of the issue.

(A) *Expenditure test.* The expenditure test is met if at least 85 percent of the net sale proceeds of the issue are allocated to expenditures on the capital projects by the end of the 3-year temporary period.

(B) *Time test.* The time test is met if the issuer incurs within 6 months of the issue date a substantial binding obligation to a third party to expend at least 5 percent of the net sale proceeds of the issue on the capital projects. An obligation is not binding if it is subject to contingencies within the issuer's or a related party's control.

(C) *Due diligence test.* The due diligence test is met if completion of the capital projects and the allocation of the net sale proceeds of the issue to expenditures proceed with due diligence.

(ii) *5-year temporary period.* In the case of proceeds expected to be allocated to a capital project involving a substantial amount of construction expenditures (as defined in §1.148-7), a 5-year temporary period applies in lieu of the 3-year temporary period if the issuer satisfies the requirements of paragraph (e)(2)(i) of this section applied by substituting "5 years" in each place that "3 years" appears, and both the issuer and a licensed architect or engineer certify that the longer period is necessary to complete the capital project.

(3) *Temporary period for restricted working capital expenditures—(i) General rule.* The proceeds of an issue that are reasonably expected to be allocated to restricted working capital expenditures within 13 months after the issue date qualify for a temporary period of 13 months beginning on the issue date. Paragraph (e)(2) of this section contains additional temporary period rules

for certain working capital expenditures that are treated as part of a capital project.

(ii) *Longer temporary period for certain tax anticipation issues.* If an issuer reasonably expects to use tax revenues arising from tax levies for a single fiscal year to redeem or retire an issue, and the issue matures by the earlier of 2 years after the issue date or 60 days after the last date for payment of those taxes without interest or penalty, the temporary period under paragraph (e)(3)(i) of this section is extended until the maturity date of the issue.

(4) *Temporary period for pooled financings—(i) In general.* Proceeds of a pooled financing issue reasonably expected to be used to finance purpose investments qualify for a temporary period of 6 months while held by the issuer before being loaned to a conduit borrower. Any otherwise available temporary period for proceeds held by a conduit borrower, however, is reduced by the period of time during which those proceeds were held by the issuer before being loaned. For example, if the proceeds of a pooled financing issue loaned to a conduit borrower would qualify for a 3-year temporary period, and the proceeds are held by the issuer for 5 months before being loaned to the conduit borrower, the proceeds qualify for only an additional 31-month temporary period after being loaned to the conduit borrower. Except as provided in paragraph (e)(4)(iv) of this section, this paragraph (e)(4) does not apply to any qualified mortgage bond or qualified veterans' mortgage bond under section 143.

(ii) *Loan repayments—(A) Amount held by the issuer.* The temporary period under this paragraph (e)(4) for proceeds from the sale or repayment of any loan that are reasonably expected to be used to make or finance new loans is 3 months.

(B) *Amounts re-loaned to conduit borrowers.* Any temporary period for proceeds held by a conduit borrower under a new loan from amounts described in paragraph (e)(4)(ii)(A) of this section is determined by treating the date the new loan is made as the issue date and by reducing the temporary period by the period the amounts were held by

the issuer following the last repayment.

(iii) *Construction issues.* If all or a portion of a pooled financing issue qualifies as a construction issue under § 1.148-7(b)(6), paragraph (e)(4)(i) of this section is applied by substituting “2 years” for “6 months.”

(iv) *Amounts re-loaned for qualified mortgage loans.* The temporary period under this paragraph (e)(4) for proceeds from the sale, prepayment, or repayment of any qualified mortgage loan that are reasonably expected to be used to make or finance new qualified mortgage loans is 3 years.

(5) *Temporary period for replacement proceeds—(i) In general.* Except as otherwise provided, replacement proceeds qualify for a temporary period of 30 days beginning on the date that the amounts are first treated as replacement proceeds.

(ii) *Temporary period for bona fide debt service funds.* Amounts in a bona fide debt service fund for an issue qualify for a temporary period of 13 months. If only a portion of a fund qualifies as a bona fide debt service fund, only that portion qualifies for this temporary period.

(6) *Temporary period for investment proceeds.* Except as otherwise provided in this paragraph (e), investment proceeds qualify for a temporary period of 1 year beginning on the date of receipt.

(7) *Other amounts.* Gross proceeds not otherwise eligible for a temporary period described in this paragraph (e) qualify for a temporary period of 30 days beginning on the date of receipt.

(f) *Reserve or replacement funds—(1) General 10 percent limitation on funding with sale proceeds.* An issue consists of arbitrage bonds if sale proceeds of the issue in excess of 10 percent of the stated principal amount of the issue are used to finance any reserve or replacement fund, without regard to whether those sale proceeds are invested in higher yielding investments. If an issue has more than a de minimis amount of original issue discount or premium, the issue price (net of pre-issuance accrued interest) is used to measure the 10-percent limitation in lieu of stated principal amount. This rule does not limit the use of amounts other than sale pro-

ceeds of an issue to fund a reserve or replacement fund.

(2) *Exception from yield restriction for reasonably required reserve or replacement funds—(i) In general.* The investment of amounts that are part of a reasonably required reserve or replacement fund in higher yielding investments will not cause an issue to consist of arbitrage bonds. A reasonably required reserve or replacement fund may consist of all or a portion of one or more funds, however labelled, derived from one or more sources. Amounts in a reserve or replacement fund in excess of the amount that is reasonably required are not part of a reasonably required reserve or replacement fund.

(ii) *Size limitation.* The amount of gross proceeds of an issue that qualifies as a reasonably required reserve or replacement fund may not exceed an amount equal to the least of 10 percent of the stated principal amount of the issue, the maximum annual principal and interest requirements on the issue, or 125 percent of the average annual principal and interest requirements on the issue. If an issue has more than a de minimis amount of original issue discount or premium, the issue price of the issue (net of pre-issuance accrued interest) is used to measure the 10 percent limitation in lieu of its stated principal amount. For a reserve or replacement fund that secures more than one issue (e.g. a parity reserve fund), the size limitation may be measured on an aggregate basis.

(iii) *Valuation of investments.* Investments in a reasonably required reserve or replacement fund may be valued in any reasonable, consistently applied manner that is permitted under § 1.148-5.

(iv) *150 percent debt service limitation on investment in nonpurpose investments for certain private activity bonds.* Section 148(d)(3) contains additional limits on the amount of gross proceeds of an issue of private activity bonds, other than qualified 501(c)(3) bonds, that may be invested in higher yielding nonpurpose investments without causing the bonds to be arbitrage bonds. For purposes of these rules, *initial temporary period* means the temporary periods under paragraphs (e)(2), (e)(3), and

(e)(4) of this section and under § 1.148-9(d)(2)(i), (ii), and (iii).

(3) *Certain parity reserve funds.* The limitation contained in paragraph (f)(1) of this section does not apply to an issue if the master legal document authorizing the issuance of the bonds (e.g., a master indenture) was adopted before August 16, 1986, and that document—

(i) Requires a reserve or replacement fund in excess of 10 percent of the sale proceeds, but not more than maximum annual principal and interest requirements;

(ii) Is not amended after August 31, 1986 (other than to permit the issuance of additional bonds as contemplated in the master legal document); and

(iii) Provides that bonds having a parity of security may not be issued by or on behalf of the issuer for the purposes provided under the document without satisfying the reserve fund requirements of the indenture.

(g) *Minor portion.* Under section 148(e), a bond of an issue is not an arbitrage bond solely because of the investment in higher yielding investments of gross proceeds of the issue in an amount not exceeding the lesser of—

(1) 5 percent of the sale proceeds of the issue; or

(2) \$100,000.

(h) *Certain waivers permitted.* On or before the issue date, an issuer may elect to waive the right to invest in higher yielding investments during any temporary period under paragraph (e) of this section or as part of a reasonably required reserve or replacement fund under paragraph (f) of this section. At any time, an issuer may waive the right to invest in higher yielding investments as part of a minor portion under paragraph (g) of this section.

[T.D. 8476, 58 FR 33520, June 18, 1993; 58 FR 44452, Aug. 23, 1993, as amended by T.D. 8538, 59 FR 24042, May 10, 1994; T.D. 8718, 62 FR 25507, May 9, 1997]

### § 1.148-3 General arbitrage rebate rules.

(a) *In general.* Section 148(f) requires that certain earnings on nonpurpose investments allocable to the gross proceeds of an issue be paid to the United States to prevent the bonds in the issue from being arbitrage bonds. The

arbitrage that must be rebated is based on the difference between the amount actually earned on nonpurpose investments and the amount that would have been earned if those investments had a yield equal to the yield on the issue.

(b) *Definition of rebate amount.* As of any date, the rebate amount for an issue is the excess of the future value, as of that date, of all receipts on nonpurpose investments over the future value, as of that date, of all payments on nonpurpose investments.

(c) *Computation of future value of a payment or receipt.* The future value of a payment or receipt at the end of any period is determined using the economic accrual method and equals the value of that payment or receipt when it is paid or received (or treated as paid or received), plus interest assumed to be earned and compounded over the period at a rate equal to the yield on the issue, using the same compounding interval and financial conventions used to compute that yield.

(d) *Payments and receipts—(1) Definition of payments.* For purposes of this section, payments are—

(i) Amounts actually or constructively paid to acquire a nonpurpose investment (or treated as paid to a commingled fund);

(ii) For a nonpurpose investment that is first allocated to an issue on a date after it is actually acquired (e.g., an investment that becomes allocable to transferred proceeds or to replacement proceeds) or that becomes subject to the rebate requirement on a date after it is actually acquired (e.g., an investment allocated to a reasonably required reserve or replacement fund for a construction issue at the end of the 2-year spending period), the value of that investment on that date;

(iii) For a nonpurpose investment that was allocated to an issue at the end of the preceding computation period, the value of that investment at the beginning of the computation period;

(iv) On the last day of each bond year during which there are amounts allocated to gross proceeds of an issue that are subject to the rebate requirement, and on the final maturity date, a computation credit of \$1,000; and

(v) Yield reduction payments on nonpurpose investments made pursuant to § 1.148-5(c).

(2) *Definition of receipts.* For purposes of this section, receipts are—

(i) Amounts actually or constructively received from a nonpurpose investment (including amounts treated as received from a commingled fund), such as earnings and return of principal;

(ii) For a nonpurpose investment that ceases to be allocated to an issue before its disposition or redemption date (e.g., an investment that becomes allocable to transferred proceeds of another issue or that ceases to be allocable to the issue pursuant to the universal cap under § 1.148-6) or that ceases to be subject to the rebate requirement on a date earlier than its disposition or redemption date (e.g., an investment allocated to a fund initially subject to the rebate requirement but that subsequently qualifies as a bona fide debt service fund), the value of that nonpurpose investment on that date; and

(iii) For a nonpurpose investment that is held at the end of a computation period, the value of that investment at the end of that period.

(3) *Special rules for commingled funds.* Section 1.148-6(e) provides special rules to limit certain of the required determinations of payments and receipts for investments of a commingled fund.

(e) *Computation dates—(1) In general.* For a fixed yield issue, an issuer may treat any date as a computation date. For a variable yield issue, an issuer:

(i) May treat the last day of any bond year ending on or before the latest date on which the first rebate amount is required to be paid under paragraph (f) of this section (the *first required payment date*) as a computation date but may not change that treatment after the first payment date; and

(ii) After the first required payment date, must consistently treat either the end of each bond year or the end of each fifth bond year as computation dates and may not change these computation dates after the first required payment date.

(2) *Final computation date.* The date that an issue is discharged is the final computation date. For an issue retired

within 3 years of the issue date, however, the final computation date need not occur before the end of 8 months after the issue date or during the period in which the issuer reasonably expects that any of the spending exceptions under § 1.148-7 will apply to the issue.

(f) *Amount of required rebate installment payment—(1) Amount of interim rebate payments.* The first rebate installment payment must be made for a computation date that is not later than 5 years after the issue date. Subsequent rebate installment payments must be made for a computation date that is not later than 5 years after the previous computation date for which an installment payment was made. A rebate installment payment must be in an amount that, when added to the future value, as of the computation date, of previous rebate payments made for the issue, equals at least 90 percent of the rebate amount as of that date.

(2) *Amount of final rebate payment.* For the final computation date, a final rebate payment must be paid in an amount that, when added to the future value of previous rebate payments made for the issue, equals 100 percent of the rebate amount as of that date.

(3) *Future value of rebate payments.* The future value of a rebate payment is determined under paragraph (c) of this section. This value is computed by taking into account recoveries of overpayments.

(g) *Time and manner of payment.* Each rebate payment must be paid no later than 60 days after the computation date to which the payment relates. Any rebate payment paid within this 60-day period may be treated as paid on the computation date to which it relates. A rebate payment is paid when it is filed with the Internal Revenue Service at the place or places designated by the Commissioner. A payment must be accompanied by the form provided by the Commissioner for this purpose.

(h) *Penalty in lieu of loss of tax exemption—(1) In general.* The failure to pay the correct rebate amount when required will cause the bonds of the issue to be arbitrage bonds, unless the Commissioner determines that the failure was not caused by willful neglect and the issuer promptly pays a penalty to

the United States. If no bond of the issue is a private activity bond (other than a qualified 501(c)(3) bond), the penalty equals 50 percent of the rebate amount not paid when required to be paid, plus interest on that amount. Otherwise, the penalty equals 100 percent of the rebate amount not paid when required to be paid, plus interest on that amount.

(2) *Interest on underpayments.* Interest accrues at the underpayment rate under section 6621, beginning on the date the correct rebate amount is due and ending on the date 10 days before it is paid.

(3) *Waivers of the penalty.* The penalty is automatically waived if the rebate amount that the issuer failed to pay plus interest is paid within 180 days after discovery of the failure, unless, the Commissioner determines that the failure was due to willful neglect, or the issue is under examination by the Commissioner at any time during the period beginning on the date the failure first occurred and ending on the date 90 days after the receipt of the rebate amount. Generally, extensions of this 180-day period and waivers of the penalty in other cases will be granted by the Commissioner only in unusual circumstances. For purposes of this paragraph (h)(3), willful neglect does not include a failure that is attributable solely to the permissible retroactive selection of a short first bond year if the rebate amount that the issuer failed to pay is paid within 60 days of the selection of that bond year.

(4) *Application to alternative penalty under §1.148-7.* Paragraphs (h) (1), (2), and (3) of this section apply to failures to pay penalty payments under §1.148-7 (*alternative penalty amounts*) by substituting *alternative penalty amounts for rebate amount and the last day of each spending period for computation date.*

(i) *Recovery of overpayment of rebate—*  
 (1) *In general.* An issuer may recover an overpayment for an issue of tax-exempt bonds by establishing to the satisfaction of the Commissioner that the overpayment occurred. An overpayment is the excess of the amount paid to the United States for an issue under section 148 over the sum of the rebate amount for the issue as of the most recent computation date and all amounts

that are otherwise required to be paid under section 148 as of the date the recovery is requested.

(2) *Limitations on recovery.* (i) An overpayment may be recovered only to the extent that a recovery on the date that it is first requested would not result in an additional rebate amount if that date were treated as a computation date.

(ii) Except for overpayments of penalty in lieu of rebate under section 148(f)(4)(C)(vii) and §1.148-7(k), an overpayment of less than \$5,000 may not be recovered before the final computation date.

(j) *Examples.* The provisions of this section may be illustrated by the following examples.

*Example 1. Calculation and payment of rebate for a fixed yield issue.* (i) *Facts.* On January 1, 1994, City A issues a fixed yield issue and invests all the sale proceeds of the issue (\$49 million). There are no other gross proceeds. The issue has a yield of 7.0000 percent per year compounded semiannually (computed on a 30 day month/360 day year basis). City A receives amounts from the investment and immediately expends them for the governmental purpose of the issue as follows:

Date	Amount
2/1/94 .....	\$3,000,000
5/1/94 .....	5,000,000
1/1/95 .....	5,000,000
9/1/95 .....	20,000,000
3/1/96 .....	22,000,000

(ii) *First computation date.* (A) City A chooses January 1, 1999, as its first computation date. This date is the latest date that may be used to compute the first required rebate installment payment. The rebate amount as of this date is computed by determining the future value of the receipts and the payments for the investment. The compounding interval is each 6-month (or shorter) period and the 30 day month/360 day year basis is used because these conventions were used to compute yield on the issue. The future value of these amounts, plus the computation credit, as of January 1, 1999, is:

Date	Receipts (payments)	FV (7.0000 percent)
1/1/94 .....	(\$49,000,000)	(\$69,119,339)
2/1/94 .....	3,000,000	4,207,602
5/1/94 .....	5,000,000	6,893,079
1/1/95 .....	5,000,000	6,584,045
1/1/95 .....	(1,000)	(1,317)
9/1/95 .....	20,000,000	25,155,464
1/1/96 .....	(1,000)	1,229
3/1/96 .....	22,000,000	26,735,275
1/1/97 .....	(1,000)	(1,148)

§ 1.148-3

26 CFR Ch. I (4-1-06 Edition)

Date	Receipts (payments)	FV (7.0000 percent)
Rebate amount (1/01/99) .....	.....	452,432

(B) City A pays 90 percent of the rebate amount (\$407,189) to the United States within 60 days of January 1, 1999.

(iii) *Second computation date.* (A) On the next required computation date, January 1, 2004, the future value of the payments and receipts is:

Date	Receipts (payments)	FV (7.0000 percent)
1/1/99 .....	\$452,432	\$638,200
Rebate amount (1/01/04) .....	.....	638,200

(B) As of this computation date, the future value of the payment treated as made on January 1, 1999, is \$574,380, which equals at least 90 percent of the rebate amount as of this computation date (\$638,200 × 0.9), and thus no additional rebate payment is due as of this date.

(iv) *Final computation date.* (A) On January 1, 2009, City A redeems all the bonds, and thus this date is the final computation date. The future value of the receipts and payments as of this date is:

Date	Receipts (payments)	FV (7.0000 percent)
1/1/04 .....	\$638,200	\$900,244
1/1/09 .....	(1,000)	(1,000)
Rebate amount (1/01/09) .....	.....	899,244

(B) As of this computation date, the future value of the payment made on January 1, 1999, is \$810,220 and thus an additional rebate payment of \$89,024 is due. This payment reflects the future value of the 10 percent unpaid portion, and thus would not be owed had the issuer paid the full rebate amount as of any prior computation date.

*Example 2. Calculation and payment of rebate for a variable yield issue.* (i) *Facts.* On July 1, 1994, City B issues a variable yield issue and invests all of the sale proceeds of the issue (\$30 million). There are no other gross proceeds. As of July 1, 1999, there are nonpurpose investments allocated to the issue. Prior to July 1, 1999, City B receives amounts from nonpurpose investments and immediately expends them for the governmental purpose of the issue as follows:

Date	Amount
8/1/1994 .....	\$5,000,000
7/1/1995 .....	8,000,000
12/1/1995 .....	17,000,000
7/1/1999 .....	650,000

(ii) *First computation date.* (A) City B treats the last day of the fifth bond year (July 1,

1999) as a computation date. The yield on the variable yield issue during the first computation period (the period beginning on the issue date and ending on the first computation date) is 6.0000 percent per year compounded semiannually. The value of the nonpurpose investments allocated to the issue as of July 1, 1999, is \$3 million. The rebate amount as of July 1, 1999, is computed by determining the future value of the receipts and the payments for the nonpurpose investments. The compounding interval is each 6-month (or shorter) period and the 30 day month/360 day year basis is used because these conventions were used to compute yield on the issue. The future value of these amounts and of the computation date credits as of July 1, 1999, is:

Date	Receipts (payments)	FV (6.0000 percent)
7/1/1994 .....	(\$30,000,000)	(\$40,317,491)
8/1/1994 .....	5,000,000	6,686,560
7/1/1995 .....	(1,000)	(1,267)
7/1/1995 .....	8,000,000	10,134,161
12/1/1995 .....	17,000,000	21,011,112
7/1/1996 .....	(1,000)	(1,194)
7/1/1997 .....	(1,000)	(1,126)
7/1/1998 .....	(1,000)	(1,061)
7/1/1999 .....	3,000,000	3,000,000
7/1/1999 .....	650,000	650,000
7/1/1999 .....	(1,000)	(1,000)
Rebate amount (7/01/1999) .....	.....	1,158,694

(B) City B pays 90 percent of the rebate amount (\$1,042,824.60) to the United States within 60 days of July 1, 1999.

(iii) *Next computation date.* (A) On July 1, 2004, City B redeems all of the bonds. Thus, the next computation date is July 1, 2004. On July 30, 1999, City B chose to compute rebate for periods following the first computation period by treating the end of each fifth bond year as a computation date. The yield during the second computation period is 5.0000 percent per year compounded semiannually. The computation of the rebate amount as of this date reflects the value of the nonpurpose investments allocated to the issue at the end of the prior computation period. On July 1, 2004, City B sells those nonpurpose investments for \$3,925,000 and expends that amount for the governmental purpose of the issue.

(B) As of July 1, 2004, the future value of the rebate amount computed as of July 1, 1999, and of all other payments and receipts is:

Date	Receipts (payments)	FV (5.0000 percent)
7/1/1999 .....	\$1,158,694	\$1,483,226
7/1/1999 .....	(3,000,000)	(3,840,254)
7/1/2000 .....	(1,000)	(1,218)
7/1/2001 .....	(1,000)	(1,160)
7/1/2002 .....	(1,000)	(1,104)
7/1/2003 .....	(1,000)	(1,051)

**Internal Revenue Service, Treasury**

**§ 1.148-4**

Date	Receipts (payments)	FV (5.0000 percent)
7/1/2004 .....	(2,000)	(2,000)
7/1/2004 .....	3,925,000	3,925,000
		1,561,439

(C) As of this computation date, the future value of the payment made on July 1, 1999, is \$1,334,904 and thus an additional rebate payment of \$226,535 is due.

(D) If the yield during the second computation period were, instead, 7.0000 percent, the rebate amount computed as of July 1, 1999, would be \$1,320,891. The future value of the payment made on July 1, 1999, would be \$1,471,007, and, therefore, City B would have overpaid the rebate amount by \$150,116.

(k) *Bona fide debt service fund exception.* Under section 148(f)(4)(A), the rebate requirement does not apply to amounts in certain bona fide debt service funds. An issue with an average annual debt service that is not in excess of \$2,500,000 may be treated as satisfying the \$100,000 limitation in section 148(f)(4)(A)(ii).

[T.D. 8476, 58 FR 33522, June 18, 1993; 58 FR 44452, Aug. 23, 1993, as amended by T.D. 8538, 59 FR 24042, May 10, 1994; T.D. 8476, 59 FR 24350, May 11, 1994; T.D. 8718, 62 FR 25507, May 9, 1997]

**§ 1.148-4 Yield on an issue of bonds.**

(a) *In general.* The yield on an issue of bonds is used to apply investment yield restrictions under section 148(a) and to compute rebate liability under section 148(f). Yield is computed under the economic accrual method using any consistently applied compounding interval of not more than one year. A short first compounding interval and a short last compounding interval may be used. Yield is expressed as an annual percentage rate that is calculated to at least four decimal places (e.g., 5.2525 percent). Other reasonable, standard financial conventions, such as the 30 days per month/360 days per year convention, may be used in computing yield but must be consistently applied. The yield on an issue that would be a purpose investment (absent section 148(b)(3)(A)) is equal to the yield on the conduit financing issue that financed that purpose investment. The Commissioner may permit issuers of qualified mortgage bonds or qualified student

loan bonds to use a single yield for two or more issues.

(b) *Computing yield on a fixed yield issue—(1) In general—(i) Yield on an issue.* The yield on a fixed yield issue is the discount rate that, when used in computing the present value as of the issue date of all unconditionally payable payments of principal, interest, and fees for qualified guarantees on the issue and amounts reasonably expected to be paid as fees for qualified guarantees on the issue, produces an amount equal to the present value, using the same discount rate, of the aggregate issue price of bonds of the issue as of the issue date. Further, payments include certain amounts properly allocable to a qualified hedge. Yield on a fixed yield issue is computed as of the issue date and is not affected by subsequent unexpected events, except to the extent provided in paragraphs (b)(4) and (h)(3) of this section.

(ii) *Yield on a bond.* Yield on a fixed yield bond is computed in the same manner as yield on a fixed yield issue.

(2) *Yield on certain fixed yield bonds subject to mandatory or contingent early redemption—(i) In general.* The yield on a fixed yield issue that includes a bond subject to mandatory early redemption or expected contingent redemption is computed by treating that bond as redeemed on its reasonably expected early redemption date for an amount equal to its value on that date. Reasonable expectations are determined on the issue date. A bond is subject to mandatory early redemption if it is unconditionally payable in full before its final maturity date. A bond is subject to a contingent redemption if it must be, or is reasonably expected to be, redeemed prior to final maturity upon the occurrence of a contingency. A contingent redemption is taken into account only if the contingency is reasonably expected to occur, in which case the date of occurrence of the contingency must be reasonably estimated. For example, if bonds are reasonably expected to be redeemed early using excess revenues from general or special property taxes or benefit assessments or similar amounts, the reasonably expected redemption schedule is used to determine yield. For purposes of this paragraph (b)(2)(i), excess

proceeds calls for issues for which the requirements of § 1.148-2(e) (2) or (3) are satisfied, calamity calls, and refundings do not cause a bond to be subject to early redemption. The value of a bond is determined under paragraph (e) of this section.

(ii) *Substantially identical bonds subject to mandatory early redemption.* If substantially identical bonds of an issue are subject to specified mandatory redemptions prior to final maturity (e.g., a mandatory sinking fund redemption requirement), yield on that issue is computed by treating those bonds as redeemed in accordance with the redemption schedule for an amount equal to their value. Generally, bonds are substantially identical if the stated interest rate, maturity, and payment dates are the same. In computing the yield on an issue containing bonds described in this paragraph (b)(2)(ii), each of those bonds must be treated as redeemed at its present value, unless the stated redemption price at maturity of the bond does not exceed the issue price of the bond by more than one-fourth of one percent multiplied by the product of the stated redemption price at maturity and the number of years to the weighted average maturity date of the substantially identical bonds, in which case each of those bonds must be treated as redeemed at its outstanding stated principal amount, plus accrued, unpaid interest. Weighted average maturity is determined by taking into account the mandatory redemption schedule.

(3) *Yield on certain fixed yield bonds subject to optional early redemption—(i) In general.* If a fixed yield bond is subject to optional early redemption and is described in paragraph (b)(3)(ii) of this section, the yield on the issue containing the bond is computed by treating the bond as redeemed at its stated redemption price on the optional redemption date that would produce the lowest yield on the issue.

(ii) *Fixed yield bonds subject to special yield calculation rule.* A fixed yield bond is described in this paragraph (b)(3)(ii) only if it—

(A) Is subject to optional redemption within five years of the issue date, but only if the yield on the issue computed by assuming all bonds in the issue sub-

ject to redemption within 5 years of the issue date are redeemed at maturity is more than one-eighth of one percentage point higher than the yield on that issue computed by assuming all bonds subject to optional redemption within 5 years of the issue date are redeemed at the earliest date for their redemption;

(B) Is issued at an issue price that exceeds the stated redemption price at maturity by more than one-fourth of one percent multiplied by the product of the stated redemption price at maturity and the number of complete years to the first optional redemption date for the bond; or

(C) Bears interest at increasing interest rates (*i.e.*, a *stepped coupon bond*).

(4) *Yield recomputed upon transfer of certain rights associated with the bond.* For purposes of § 1.148-3, as of the date of any transfer, waiver, modification, or similar transaction (collectively, a *transfer*) of any right that is part of the terms of a bond or is otherwise associated with a bond (e.g., a redemption right), in a transaction that is separate and apart from the original sale of the bond, the issue is treated as if it were retired and a new issue issued on the date of the transfer (*reissued*). The redemption price of the retired issue and the issue price of the new issue equal the aggregate values of all the bonds of the issue on the date of the transfer. In computing yield on the new issue, any amounts received by the issuer as consideration for the transfer are taken into account.

(5) *Special aggregation rule treating certain bonds as a single fixed yield bond.* Two variable yield bonds of an issue are treated in the aggregate as a single fixed yield bond if—

(i) Aggregate treatment would result in the single bond being a fixed yield bond; and

(ii) The terms of the bonds do not contain any features that could distort the aggregate fixed yield from what the yield would be if a single fixed yield bond were issued. For example, if an issue contains a bond bearing interest at a floating rate and a related bond bearing interest at a rate equal to a fixed rate minus that floating rate, those two bonds are treated as a single fixed yield bond only if neither bond

**Internal Revenue Service, Treasury**

**§ 1.148-4**

may be redeemed unless the other bond is also redeemed at the same time.

(6) *Examples.* The provisions of this paragraph (b) may be illustrated by the following examples.

*Example 1. No early call—(i) Facts.* On January 1, 1994, City A issues an issue consisting of four identical fixed yield bonds. The stated final maturity date of each bond is January 1, 2004, and no bond is subject to redemption before this date. Interest is payable on January 1 of each year at a rate of 6.0000 percent per year on the outstanding principal amount. The total stated principal amount of the bonds is \$20 million. The issue price of the bonds \$20,060,000.

(ii) *Computation.* The yield on the issue is computed by treating the bonds as retired at the stated maturity under the general rule of § 1.148-4(b)(1). The bonds are treated as redeemed for their stated redemption prices. The yield on the issue is 5.8731 percent per year compounded semiannually, computed as follows:

Date	Payments	PV (5.8731 percent)
1/1/1995	\$1,200,000	\$1,132,510
1/1/1996	1,200,000	1,068,816
1/1/1997	1,200,000	1,008,704
1/1/1998	1,200,000	951,973
1/1/1999	1,200,000	898,433
1/1/2000	1,200,000	847,903
1/1/2001	1,200,000	800,216
1/1/2002	1,200,000	755,210
1/1/2003	1,200,000	712,736
1/1/2004	21,200,000	11,883,498
		20,060,000

*Example 2. Mandatory calls. (i) Facts.* The facts are the same as in *Example 1*. In this case, however, the bonds are subject to mandatory sinking fund redemption on January 1 of each year, beginning January 1, 2001. On each sinking fund redemption date, one of the bonds is chosen by lottery and is required to be redeemed at par plus accrued interest.

(ii) *Computation.* Because the bonds are subject to specified redemptions, yield on the issue is computed by treating the bonds as redeemed in accordance with the redemption schedule under § 1.148-4(b)(2)(ii). Because the bonds are not sold at a discount, the bonds are treated as retired at their stated redemption prices. The yield on the issue is 5.8678 percent per year compounded semiannually, computed as follows:

Date	Payments	PV (5.8678 percent)
1/1/1995	\$1,200,000	\$1,132,569
1/1/1996	1,200,000	1,068,926
1/1/1997	1,200,000	1,008,860
1/1/1998	1,200,000	952,169
1/1/1999	1,200,000	898,664
1/1/2000	1,200,000	848,166

Date	Payments	PV (5.8678 percent)
1/1/2001	6,200,000	4,135,942
1/1/2002	5,900,000	3,714,650
1/1/2003	5,600,000	3,327,647
1/1/2004	5,300,000	2,972,407
		\$20,060,000

*Example 3. Optional early call. (i) Facts.* On January 1, 1994, City C issues an issue consisting of three bonds. Each bond has a stated principal amount of \$10 million dollars and is issued for par. Bond X bears interest at 5 percent per year and matures on January 1, 1999. Bond Y bears interest at 6 percent per year and matures on January 1, 2002. Bond Z bears interest at 7 percent per year and matures on January 1, 2004. Bonds Y and Z are callable by the issuer at par plus accrued interest after December 31, 1998.

(ii) *Computation.* (A) The yield on the issue computed as if each bond is outstanding to its maturity is 6.0834 percent per year compounded semiannually, computed as follows:

Date	Payments	PV (6.0834 percent)
1/1/1995	\$1,800,000	\$1,695,299
1/1/1996	1,800,000	1,596,689
1/1/1997	1,800,000	1,503,814
1/1/1998	1,800,000	1,416,342
1/1/1999	11,800,000	8,744,830
1/1/2000	1,300,000	907,374
1/1/2001	1,300,000	854,595
1/1/2002	11,300,000	6,996,316
1/1/2003	700,000	408,190
1/1/2004	10,700,000	5,876,551
		30,000,000

(B) The yield on the issue computed as if all bonds are called at the earliest date for redemption is 5.9126 percent per year compounded semiannually, computed as follows:

Date	Payments	PV (5.9126 percent)
1/1/1995	\$1,800,000	\$1,698,113
1/1/1996	1,800,000	1,601,994
1/1/1997	1,800,000	1,511,315
1/1/1998	1,800,000	1,425,769
1/1/1999	31,800,000	23,762,809
		30,000,000

(C) Because the yield on the issue computed by assuming all bonds in the issue subject to redemption within 5 years of the issue date are redeemed at maturity is more than one-eighth of one percentage point higher than the yield on the issue computed by assuming all bonds subject to optional redemption within 5 years of the issue date are redeemed at the earliest date for their redemption, each bond is treated as redeemed on the date that would produce the lowest yield for the issue. The lowest yield on the issue would result from a redemption of all the

bonds on January 1, 1999. Thus, the yield on the issue is 5.9126 percent per year compounded semiannually.

(c) *Computing yield on a variable yield issue*—(1) *In general.* The yield on a variable yield issue is computed separately for each computation period. The yield for each computation period is the discount rate that, when used in computing the present value as of the first day of the computation period of all the payments of principal and interest and fees for qualified guarantees that are attributable to the computation period, produces an amount equal to the present value, using the same discount rate, of the aggregate issue price (or deemed issue price, as determined in paragraph (c)(2)(iv) of this section) of the bonds of the issue as of the first day of the computation period. The yield on a variable yield bond is computed in the same manner as the yield on a variable yield issue. Except as provided in paragraph (c)(2) of this section, yield on any fixed yield bond in a variable yield issue is computed in the same manner as the yield on a fixed yield issue as provided in paragraph (b) of this section.

(2) *Payments on bonds included in yield for a computation period*—(i) *Payments in general.* The payments on a bond that are attributable to a computation period include any amounts actually paid during the period for principal on the bond. Payments also include any amounts paid during the current period both for interest accruing on the bond during the current period and for interest accruing during the prior period that was included in the deemed issue price of the bond as accrued unpaid interest at the start of the current period under this paragraph (c)(2). Further, payments include any amounts properly allocable to fees for a qualified guarantee of the bond for the period and to any amounts properly allocable to a qualified hedge for the period.

(ii) *Payments at actual redemption.* If a bond is actually redeemed during a computation period, an amount equal to the greater of its value on the redemption date or the actual redemption price is a payment on the actual redemption date.

(iii) *Payments for bonds outstanding at end of computation period.* If a bond is

outstanding at the end of a computation period, a payment equal to the bond's value is taken into account on the last day of that period.

(iv) *Issue price for bonds outstanding at beginning of next computation period.* A bond outstanding at the end of a computation period is treated as if it were immediately reissued on the next day for a deemed issue price equal to the value from the day before as determined under paragraph (c)(2)(iii) of this section.

(3) *Example.* The provisions of this paragraph (c) may be illustrated by the following example.

*Example.* On January 1, 1994, City A issues an issue of identical plain par bonds in an aggregate principal amount of \$1,000,000. The bonds pay interest at a variable rate on each June 1 throughout the term of the issue. The entire principal amount of the bonds plus accrued, unpaid interest is payable on the final maturity date of January 1, 2000. No bond year is selected. On June 1, 1994, 1995, 1996, 1997, and 1998, interest in the amounts of \$30,000, \$55,000, \$57,000, \$56,000, and \$45,000 is paid on the bonds. From June 1, 1998, to January 1, 1999, \$30,000 of interest accrues on the bonds. From January 1, 1999, to June 1, 1999, another \$35,000 of interest accrues. On June 1, 1999, the issuer actually pays \$65,000 of interest. On January 1, 2000, \$1,000,000 of principal and \$38,000 of accrued interest are paid. The payments for the computation period starting on the issue date and ending on January 1, 1999, include all annual interest payments paid from the issue date to June 1, 1998. Because the issue is outstanding on January 1, 1999, it is treated as redeemed on that date for amount equal to its value (\$1,000,000 plus accrued, unpaid interest of \$30,000 under paragraph (e)(1) of this section). Thus, \$1,030,000 is treated as paid on January 1, 1999. The issue is then treated as reissued on January 1, 1999, for \$1,030,000. The payments for the next computation period starting on January 1, 1999, and ending on January 1, 2000, include the interest actually paid on the bonds during that period (\$65,000 on June 1, 1999, plus \$38,000 paid on January 1, 2000). Because the issue was actually redeemed on January 1, 2000, an amount equal to its stated redemption price is also treated as paid on January 1, 2000.

(d) *Conversion from variable yield issue to fixed yield issue.* For purposes of determining yield under this section, as of the first day on which a variable yield issue would qualify as a fixed yield issue if it were newly issued on that date (a *conversion date*), that issue is treated as if it were reissued as a

fixed yield issue on the conversion date. The redemption price of the variable yield issue and the issue price of the fixed yield issue equal the aggregate values of all the bonds on the conversion date. Thus, for example, for plain par bonds (e.g., tender bonds), the deemed issue price would be the outstanding principal amount, plus accrued unpaid interest. If the conversion date occurs on a date other than a computation date, the issuer may continue to treat the issue as a variable yield issue until the next computation date, at which time it must be treated as converted to a fixed yield issue.

(e) *Value of bonds*—(1) *Plain par bonds*. Except as otherwise provided, the value of a plain par bond is its outstanding stated principal amount, plus accrued unpaid interest. The value of a plain par bond that is actually redeemed or treated as redeemed is its stated redemption price on the redemption date, plus accrued, unpaid interest.

(2) *Other bonds*. The value of a bond other than a plain par bond on a date is its present value on that date. The present value of a bond is computed under the economic accrual method taking into account all the unconditionally payable payments of principal, interest, and fees for a qualified guarantee to be paid on or after that date and using the yield on the bond as the discount rate, except that for purposes of § 1.148-6(b)(2) (relating to the universal cap), these values may be determined by consistently using the yield on the issue of which the bonds are a part. To determine yield on fixed yield bonds, see paragraph (b)(1) of this section. The rules contained in paragraphs (b)(2) and (b)(3) of this section apply for this purpose. In the case of bonds described in paragraph (b)(2)(ii) of this section, the present value of those bonds on any date is computed using the yield to the final maturity date of those bonds as the discount rate. In determining the present value of a variable yield bond under this paragraph (e)(2), the initial interest rate on the bond established by the interest index or other interest rate setting mechanism is used to determine the interest payments on that bond.

(f) *Qualified guarantees*—(1) *In general*. Fees properly allocable to payments

for a qualified guarantee for an issue (as determined under paragraph (f)(6) of this section) are treated as additional interest on that issue under section 148. A guarantee is a qualified guarantee if it satisfies each of the requirements of paragraphs (f)(2) through (f)(4) of this section.

(2) *Interest savings*. As of the date the guarantee is obtained, the issuer must reasonably expect that the present value of the fees for the guarantee will be less than the present value of the expected interest savings on the issue as a result of the guarantee. For this purpose, present value is computed using the yield on the issue, determined with regard to guarantee payments, as the discount rate.

(3) *Guarantee in substance*. The arrangement must create a guarantee in substance. The arrangement must impose a secondary liability that unconditionally shifts substantially all of the credit risk for all or part of the payments, such as payments for principal and interest, redemption prices, or tender prices, on the guaranteed bonds. Reasonable procedural or administrative requirements of the guarantee do not cause the guarantee to be conditional. In the case of a guarantee against failure to remarket a qualified tender bond, commercially reasonable limitations based on credit risk, such as limitations on payment in the event of default by the primary obligor or the bankruptcy of a long-term credit guarantor, do not cause the guarantee to be conditional. The guarantee may be in any form. The guarantor may not be a co-obligor. Thus, the guarantor must not expect to make any payments other than under a direct-pay letter of credit or similar arrangement for which the guarantor will be reimbursed immediately. The guarantor and any related parties together must not use more than 10 percent of the proceeds of the portion of the issue allocable to the guaranteed bonds.

(4) *Reasonable charge*—(i) *In general*. Fees for a guarantee must not exceed a reasonable, arm's-length charge for the transfer of credit risk. In complying with this requirement, the issuer may not rely on the representations of the guarantor.

(ii) *Fees for services other than transfer of credit risk must be separately stated.* A fee for a guarantee must not include any payment for any direct or indirect services other than the transfer of credit risk, unless the compensation for those other services is separately stated, reasonable, and excluded from the guarantee fee. Fees for the transfer of credit risk include fees for the guarantor's overhead and other costs relating to the transfer of credit risk. For example, a fee includes payment for services other than transfer of credit risk if—

(A) It includes payment for the cost of underwriting or remarketing bonds or for the cost of insurance for casualty to bond-financed property;

(B) It is refundable upon redemption of the guaranteed bond before the final maturity date and the amount of the refund would exceed the portion of the fee that had not been earned; or

(C) The requirements of § 1.148-2(e)(2) (relating to temporary periods for capital projects) are not satisfied, and the guarantor is not reasonably assured that the bonds will be repaid if the project to be financed is not completed.

(5) *Guarantee of purpose investments.* Except for guarantees of qualified mortgage loans and qualified student loans, a guarantee of payments on a purpose investment is a qualified guarantee of the issue if all payments on the purpose investment reasonably coincide with payments on the related bonds and the payments on the purpose investment are unconditionally payable no more than 6 months before the corresponding interest payment and 12 months before the corresponding principal payments on the bonds. This paragraph (f)(5) only applies if, in addition to satisfying the other requirements of this paragraph (f), the guarantee is, in substance, a guarantee of the bonds allocable to that purpose investment and to no other bonds except for bonds that are equally and ratably secured by purpose investments of the same conduit borrower.

(6) *Allocation of qualified guarantee payments—(i) In general.* Payments for a qualified guarantee must be allocated to bonds and to computation periods in a manner that properly reflects the proportionate credit risk for which the

guarantor is compensated. Proportionate credit risk for bonds that are not substantially identical may be determined using any reasonable, consistently applied method. For example, this risk may be based on the ratio of the total principal and interest paid and to be paid on a guaranteed bond to the total principal and interest paid and to be paid on all bonds of the guaranteed issue. An allocation method generally is not reasonable, for example, if a substantial portion of the fee is allocated to the construction portion of the issue and a correspondingly insubstantial portion is allocated to the later years covered by the guarantee. Reasonable letter of credit *set up* fees may be allocated ratably during the initial term of the letter of credit. Upon an early redemption of a variable yield bond, fees otherwise allocable to the period after the redemption are allocated to remaining outstanding bonds of the issue or, if none remain outstanding, to the period before the redemption.

(ii) *Safe harbor for allocation of qualified guarantee fees for variable yield issues.* An allocation of non-level payments for a qualified guarantee for variable yield bonds is treated as meeting the requirements of paragraph (f)(6)(i) of this section if, for each bond year for which the guarantee is in effect, an equal amount (or for any short bond year, a proportionate amount of the equal amount) is treated as paid as of the beginning of that bond year. The present value of the annual amounts must equal the fee for the guarantee allocated to that bond, with present value computed as of the first day the guarantee is in effect by using as the discount rate the yield on the variable yield bonds covered by the guarantee, determined without regard to any fee allocated under this paragraph (f)(6)(ii).

(7) *Refund or reduction of guarantee payments.* If as a result of an investment of proceeds of a refunding issue in a refunding escrow, there will be a reduction in, or refund of, payments for a guarantee (*savings*), the savings must be treated as a reduction in the payments on the refunding issue.

(g) *Yield on certain mortgage revenue and student loan bonds.* For purposes of

section 148 and this section, section 143(g)(2)(C)(ii) applies to the computation of yield on an issue of qualified mortgage bonds or qualified veterans' mortgage bonds. For purposes of applying section 148 and section 143(g) with respect to purpose investments allocable to a variable yield issue of qualified mortgage bonds, qualified veterans' mortgage bonds, or qualified student loan bonds that is reasonably expected as of the issue date to convert to a fixed yield issue, the yield may be computed over the term of the issue, and, if the yield is so computed, paragraph (d) of this section does not apply to the issue. As of any date, the yield over the term of the issue is based on—

(1) With respect to any bond of the issue that has not converted to a fixed and determinable yield on or before that date, the actual amounts paid or received to that date and the amounts that are reasonably expected (as of that date) to be paid or received with respect to that bond over the remaining term of the issue (taking into account prepayment assumptions under section 143(g)(2)(B)(iv), if applicable); and

(2) With respect to any bond of the issue that has converted to a fixed and determinable yield on or before that date, the actual amounts paid or received before that bond converted, if any, and the amount that was reasonably expected (on the date that bond converted) to be paid or received with respect to that bond over the remaining term of the issue (taking into account prepayment assumptions under section 143(g)(2)(B)(iv), if applicable).

(h) *Qualified hedging transactions*—(1) *In general.* Payments made or received by an issuer under a qualified hedge (as defined in paragraph (h)(2) of this section) relating to bonds of an issue are taken into account (as provided in paragraph (h)(3) of this section) to determine the yield on the issue. Except as provided in paragraphs (h)(4) and (h)(5)(ii)(E) of this section, the bonds to which a qualified hedge relates are treated as variable yield bonds from the issue date of the bonds. This paragraph (h) applies solely for purposes of sections 143(g), 148, and 149(d).

(2) *Qualified hedge defined.* Except as provided in paragraph (h)(5) of this sec-

tion, the term *qualified hedge* means a contract that satisfies each of the following requirements:

(i) *Hedge*—(A) *In general.* The contract is entered into primarily to modify the issuer's risk of interest rate changes with respect to a bond (a hedge). For example, the contract may be an interest rate swap, an interest rate cap, a futures contract, a forward contract, or an option.

(B) *Special rule for fixed rate issues.* If the contract modifies the issuer's risk of interest rate changes with respect to a bond that is part of an issue that, absent the contract, would be a fixed rate issue, the contract must be entered into—

(1) No later than 15 days after the issue date (or the deemed issue date under paragraph (d) of this section) of the issue; or

(2) No later than the expiration of a qualified hedge with respect to bonds of that issue that satisfies paragraph (h)(2)(i)(B)(1) of this section; or

(3) No later than the expiration of a qualified hedge with respect to bonds of that issue that satisfies either paragraph (h)(2)(i)(B)(2) of this section or this paragraph (h)(2)(i)(B)(3).

(C) *Contracts with certain acquisition payments.* If a hedge provider makes a single payment to the issuer (e.g., a payment for an off-market swap) in connection with the acquisition of a contract, the issuer may treat a portion of that contract as a hedge provided—

(1) The hedge provider's payment to the issuer and the issuer's payments under the contract in excess of those that it would make if the contract bore rates equal to the on-market rates for the contract (determined as of the date the parties enter into the contract) are separately identified in a certification of the hedge provider; and

(2) The payments described in paragraph (h)(2)(i)(C)(1) of this section are not treated as payments on the hedge.

(ii) *No significant investment element*—(A) *In general.* The contract does not contain a significant investment element. Except as provided in paragraph (h)(2)(ii)(B) of this section, a contract contains a significant investment element if a significant portion of any

payment by one party relates to a conditional or unconditional obligation by the other party to make a payment on a different date. Examples of contracts that contain a significant investment element are a debt instrument held by the issuer; an interest rate swap requiring any payments other than periodic payments, within the meaning of § 1.446-3 (periodic payments) (e.g., a payment for an off-market swap or prepayment of part or all of one leg of a swap); and an interest rate cap requiring the issuer's premium for the cap to be paid in a single, up-front payment.

(B) *Special level payment rule for interest rate caps.* An interest rate cap does not contain a significant investment element if—

(1) All payments to the issuer by the hedge provider are periodic payments;

(2) The issuer makes payments for the cap at the same time as periodic payments by the hedge provider must be made if the specified index (within the meaning of § 1.446-3) of the cap is above the strike price of the cap; and

(3) Each payment by the issuer bears the same ratio to the notional principal amount (within the meaning of § 1.446-3) that is used to compute the hedge provider's payment, if any, on that date.

(iii) *Parties.* The contract is entered into between the issuer or the political subdivision on behalf of which the issuer issues the bonds (collectively referred to in this paragraph (h) as the *issuer*) and a provider that is not a related party (the *hedge provider*).

(iv) *Hedged bonds.* The contract covers, in whole or in part, all of one or more groups of substantially identical bonds in the issue (*i.e.*, all of the bonds having the same interest rate, maturity, and terms). Thus, for example, a qualified hedge may include a hedge of all or a pro rata portion of each interest payment on the variable rate bonds in an issue for the first 5 years following their issuance. For purposes of this paragraph (h), unless the context clearly requires otherwise, *hedged bonds* means the specific bonds or portions thereof covered by a hedge.

(v) *Interest based contract.* The contract is primarily interest based. A contract is not primarily interest based unless—

(A) The hedged bond, without regard to the contract, is either a fixed rate bond, a variable rate debt instrument within the meaning of § 1.1275-5 provided the rate is not based on an objective rate other than a qualified inverse floating rate or a qualified inflation rate, a tax-exempt obligation described in § 1.1275-4(d)(2), or an inflation-indexed debt instrument within the meaning of § 1.1275-7; and

(B) As a result of treating all payments on (and receipts from) the contract as additional payments on (and receipts from) the hedged bond, the resulting bond would be substantially similar to either a fixed rate bond, a variable rate debt instrument within the meaning of § 1.1275-5 provided the rate is not based on an objective rate other than a qualified inverse floating rate or a qualified inflation rate, a tax-exempt obligation described in § 1.1275-4(d)(2), or an inflation-indexed debt instrument within the meaning of § 1.1275-7. For this purpose, differences that would not prevent the resulting bond from being substantially similar to another type of bond include a difference between the index used to compute payments on the hedged bond and the index used to compute payments on the hedge where one index is substantially the same, but not identical to, the other; the difference resulting from the payment of a fixed premium for a cap (e.g., payments for a cap that are made in other than level installments); and the difference resulting from the allocation of a termination payment where the termination was not expected as of the date the contract was entered into.

(vi) *Payments closely correspond.* The payments received by the issuer from the hedge provider under the contract correspond closely in time to either the specific payments being hedged on the hedged bonds or specific payments required to be made pursuant to the bond documents, regardless of the hedge, to a sinking fund, debt service fund, or similar fund maintained for the issue of which the hedged bond is a part.

(vii) *Source of payments.* Payments to the hedge provider are reasonably expected to be made from the same source of funds that, absent the hedge, would be reasonably expected to be

used to pay principal and interest on the hedged bonds.

(viii) *Identification.* The contract must be identified by the actual issuer on its books and records maintained for the hedged bonds not later than 3 days after the date on which the issuer and the hedge provider enter into the contract. The identification must specify the hedge provider, the terms of the contract, and the hedged bonds. The identification must contain sufficient detail to establish that the requirements of this paragraph (h)(2) and, if applicable, paragraph (h)(4) of this section are satisfied. In addition, the existence of the hedge must be noted on the first form relating to the issue of which the hedged bonds are a part that is filed with the Internal Revenue Service on or after the date on which the contract is identified pursuant to this paragraph (h)(2)(viii).

(3) *Accounting for qualified hedges—(i) In general.* Except as otherwise provided in paragraph (h)(4) of this section, payments made or received by the issuer under a qualified hedge are treated as payments made or received, as appropriate, on the hedged bonds that are taken into account in determining the yield on those bonds. These payments are reasonably allocated to the hedged bonds in the period to which the payments relate, as determined under paragraph (h)(3)(iii) of this section. Payments made or received by the issuer include payments deemed made or received when a contract is terminated or deemed terminated under this paragraph (h)(3). Payments reasonably allocable to the modification of risk of interest rate changes and to the hedge provider's overhead under this paragraph (h) are included as payments made or received under a qualified hedge.

(ii) *Exclusions from hedge.* If any payment for services or other items under the contract is not expressly treated by paragraph (h)(3)(i) of this section as a payment under the qualified hedge, the payment is not a payment with respect to a qualified hedge.

(iii) *Timing and allocation of payments.* Except as provided in paragraphs (h)(3)(iv) and (h)(5) of this section, payments made or received by the issuer under a qualified hedge are taken into

account in the same period in which those amounts would be treated as income or deductions under § 1.446-4 (without regard to § 1.446-4(a)(2)(iv)) and are adjusted as necessary to reflect the end of a computation period and the start of a new computation period.

(iv) *Termination payments—(A) Termination defined.* A termination of a qualified hedge includes any sale or other disposition of the hedge by the issuer or the acquisition by the issuer of an offsetting hedge. A deemed termination occurs when the hedged bonds are redeemed or when a hedge ceases to be a qualified hedge of the hedged bonds. In the case of an assignment by a hedge provider of its remaining rights and obligations under the hedge to a third party or a modification of the hedging contract, the assignment or modification is treated as a termination with respect to the issuer only if it results in a deemed exchange of the hedge and a realization event under section 1001 to the issuer.

(B) *General rule.* A payment made or received by an issuer to terminate a qualified hedge, including loss or gain realized or deemed realized, is treated as a payment made or received on the hedged bonds, as appropriate. The payment is reasonably allocated to the remaining periods originally covered by the terminated hedge in a manner that reflects the economic substance of the hedge.

(C) *Special rule for terminations when bonds are redeemed.* Except as otherwise provided in this paragraph (h)(3)(iv)(C) and in paragraph (h)(3)(iv)(D) of this section, when a qualified hedge is deemed terminated because the hedged bonds are redeemed, the fair market value of the qualified hedge on the redemption date is treated as a termination payment made or received on that date. When hedged bonds are redeemed, any payment received by the issuer on termination of a hedge, including a termination payment or a deemed termination payment, reduces, but not below zero, the interest payments made by the issuer on the hedged bonds in the computation period ending on the termination date. The remainder of the payment, if any, is reasonably allocated over the bond years in the immediately preceding

computation period or periods to the extent necessary to eliminate the excess.

(D) *Special rules for refundings.* To the extent that the hedged bonds are redeemed using the proceeds of a refunding issue, the termination payment is accounted for under paragraph (h)(3)(iv)(B) of this section by treating it as a payment on the refunding issue, rather than the hedged bonds. In addition, to the extent that the refunding issue is redeemed during the period to which the termination payment has been allocated to that issue, paragraph (h)(3)(iv)(C) of this section applies to the termination payment by treating it as a payment on the redeemed refunding issue.

(E) *Safe harbor for allocation of certain termination payments.* A payment to terminate a qualified hedge does not result in that hedge failing to satisfy the applicable provisions of paragraph (h)(3)(iv)(B) of this section if the payment is allocated in accordance with this paragraph (h)(3)(iv)(E). For an issue that is a variable yield issue after termination of a qualified hedge, an amount must be allocated to each date on which the hedge provider's payment, if any, would have been made had the hedge not been terminated. The amounts allocated to each date must bear the same ratio to the notional principal amount (within the meaning of § 1.446-3) that would have been used to compute the hedge provider's payment, if any, on that date, and the sum of the present values of those amounts must equal the present value of the termination payment. Present value is computed as of the day the qualified hedge is terminated, using the yield on the hedged bonds, determined without regard to the termination payment. The yield used for this purpose is computed for the period beginning on the first date the qualified hedge is in effect and ending on the date the qualified hedge is terminated. On the other hand, for an issue that is a fixed yield issue after termination of a qualified hedge, the termination payment is taken into account as a single payment on the date it is paid.

(4) *Certain variable yield bonds treated as fixed yield bonds—(i) In general.* Except as otherwise provided in this para-

graph (h)(4), if the issuer of variable yield bonds enters into a qualified hedge, the hedged bonds are treated as fixed yield bonds paying a fixed interest rate if:

(A) *Maturity.* The term of the hedge is equal to the entire period during which the hedged bonds bear interest at variable interest rates, and the issuer does not reasonably expect that the hedge will be terminated before the end of that period.

(B) *Payments closely correspond.* Payments to be received under the hedge correspond closely in time to the hedged portion of payments on the hedged bonds. Hedge payments received within 15 days of the related payments on the hedged bonds generally so correspond.

(C) *Aggregate payments fixed.* Taking into account all payments made and received under the hedge and all payments on the hedged bonds (*i.e.*, after netting all payments), the issuer's aggregate payments are fixed and determinable as of a date not later than 15 days after the issue date of the hedged bonds. Payments on bonds are treated as fixed for purposes of this paragraph (h)(4)(i)(C) if payments on the bonds are based, in whole or in part, on one interest rate, payments on the hedge are based, in whole or in part, on a second interest rate that is substantially the same as, but not identical to, the first interest rate and payments on the bonds would be fixed if the two rates were identical. Rates are treated as substantially the same if they are reasonably expected to be substantially the same throughout the term of the hedge. For example, an objective 30-day tax-exempt variable rate index or other objective index may be substantially the same as an issuer's individual 30-day interest rate.

(ii) *Accounting.* Except as otherwise provided in this paragraph (h)(4)(ii), in determining yield on the hedged bonds, all the issuer's payments on the hedged bonds and all payments made and received on a hedge described in paragraph (h)(4)(i) of this section are taken into account. If payments on the bonds and payments on the hedge are based, in whole or in part, on variable interest rates that are substantially the same within the meaning of paragraph

(h)(4)(i)(C) of this section (but not identical), yield on the issue is determined by treating the variable interest rates as identical. For example, if variable rate bonds bearing interest at a weekly rate equal to the rate necessary to re-market the bonds at par are hedged with an interest rate swap under which the issuer receives payments based on a short-term floating rate index that is substantially the same as, but not identical to, the weekly rate on the bonds, the interest payments on the bonds are treated as equal to the payments received by the issuer under the swap for purposes of computing the yield on the bonds.

(iii) *Effect of termination*—(A) *In general*. Except as otherwise provided in this paragraph (h)(4)(iii) and paragraph (h)(5) of this section, the issue of which the hedged bonds are a part is treated as if it were reissued as of the termination date of the qualified hedge covered by paragraph (h)(4)(i) of this section in determining yield on the hedged bonds for purposes of §1.148-3. The redemption price of the retired issue and the issue price of the new issue equal the aggregate values of all the bonds of the issue on the termination date. In computing the yield on the new issue for this purpose, any termination payment is accounted for under paragraph (h)(3)(iv) of this section, applied by treating the termination payment as made or received on the new issue under this paragraph (h)(4)(iii).

(B) *Effect of early termination*. Except as otherwise provided in this paragraph (h)(4)(iii), the general rules of paragraph (h)(4)(i) of this section do not apply in determining the yield on the hedged bonds for purposes of §1.148-3 if the hedge is terminated or deemed terminated within 5 years after the issue date of the issue of which the hedged bonds are a part. Thus, the hedged bonds are treated as variable yield bonds for purposes of §1.148-3 from the issue date.

(C) *Certain terminations disregarded*. This paragraph (h)(4)(iii) does not apply to a termination if, based on the facts and circumstances (e.g., taking into account both the termination and any qualified hedge that immediately replaces the terminated hedge), there is no change in the yield.

(5) *Contracts entered into before issue date of hedged bond*—(i) *In general*. A contract does not fail to be a hedge under paragraph (h)(2)(i) of this section solely because it is entered into before the issue date of the hedged bond. However, that contract must be one to which either paragraph (h)(5)(ii) or (h)(5)(iii) of this section applies.

(ii) *Contracts expected to be closed substantially contemporaneously with the issue date of hedged bond*—(A) *Application*. This paragraph (h)(5)(ii) applies to a contract if, on the date the contract is identified, the issuer reasonably expects to terminate or otherwise close (terminate) the contract substantially contemporaneously with the issue date of the hedged bond.

(B) *Contract terminated*. If a contract to which this paragraph (h)(5)(ii) applies is terminated substantially contemporaneously with the issue date of the hedged bond, the amount paid or received, or deemed to be paid or received, by the issuer in connection with the issuance of the hedged bond to terminate the contract is treated as an adjustment to the issue price of the hedged bond and as an adjustment to the sale proceeds of the hedged bond for purposes of section 148. Amounts paid or received, or deemed to be paid or received, before the issue date of the hedged bond are treated as paid or received on the issue date in an amount equal to the future value of the payment or receipt on that date. For this purpose, future value is computed using yield on the hedged bond without taking into account amounts paid or received (or deemed paid or received) on the contract.

(C) *Contract not terminated*. If a contract to which this paragraph (h)(5)(ii) applies is not terminated substantially contemporaneously with the issue date of the hedged bond, the contract is deemed terminated for its fair market value as of the issue date of the hedged bond. Once a contract has been deemed terminated pursuant to this paragraph (h)(5)(ii)(C), payments on and receipts from the contract are no longer taken into account under this paragraph (h) for purposes of determining yield on the hedged bond.

(D) *Relation to other requirements of a qualified hedge.* Payments made in connection with the issuance of a bond to terminate a contract to which this paragraph (h)(5)(ii) applies do not prevent the contract from satisfying the requirements of paragraph (h)(2)(vi) of this section.

(E) *Fixed yield treatment.* A bond that is hedged with a contract to which this paragraph (h)(5)(ii) applies does not fail to be a fixed yield bond if, taking into account payments on the contract and the payments to be made on the bond, the bond satisfies the definition of fixed yield bond. See also paragraph (h)(4) of this section.

(iii) *Contracts expected not to be closed substantially contemporaneously with the issue date of hedged bond—(A) Application.* This paragraph (h)(5)(iii) applies to a contract if, on the date the contract is identified, the issuer does not reasonably expect to terminate the contract substantially contemporaneously with the issue date of the hedge bond.

(B) *Contract terminated.* If a contract to which this paragraph (h)(5)(iii) applies is terminated in connection with the issuance of the hedged bond, the amount paid or received, or deemed to be paid or received, by the issuer to terminate the contract is treated as an adjustment to the issue price of the hedged bond and as an adjustment to the sale proceeds of the hedged bond for purposes of section 148.

(C) *Contract not terminated.* If a contract to which this paragraph (h)(5)(iii) applies is not terminated substantially contemporaneously with the issue date of the hedged bond, no payments with respect to the hedge made by the issuer before the issue date of the hedged bond are taken into account under this section.

(iv) *Identification.* The identification required under paragraph (h)(2)(viii) of this section must specify the reasonably expected governmental purpose, issue price, maturity, and issue date of the hedged bond, the manner in which interest is reasonably expected to be computed, and whether paragraph (h)(5)(ii) or (h)(5)(iii) of this section applies to the contract. If an issuer identifies a contract under this paragraph (h)(5)(iv) that would be a qualified

hedge with respect to the anticipated bond, but does not issue the anticipated bond on the identified issue date, the contract is taken into account as a qualified hedge of any bond of the issuer that is issued for the identified governmental purpose within a reasonable interval around the identified issue date of the anticipated bond.

(6) *Authority of the Commissioner.* The Commissioner, by publication of a revenue ruling or revenue procedure (see § 601.601(d)(2) of this chapter), may specify contracts that, although they do not meet the requirements of paragraph (h)(2) of this section, are qualified hedges or, although they do not meet the requirements of paragraph (h)(4) of this section, cause the hedged bonds to be treated as fixed yield bonds.

[T.D. 8476, 58 FR 33524, June 18, 1993; 58 FR 44452, Aug. 23, 1993, as amended by T.D. 8538, 59 FR 24042, May 10, 1994; T.D. 8718, 62 FR 25507, May 9, 1997; T.D. 8838, 64 FR 48547, Sept. 7, 1999]

**§ 1.148-5 Yield and valuation of investments.**

(a) *In general.* This section provides rules for computing the yield and value of investments allocated to an issue for various purposes under section 148.

(b) *Yield on an investment—(1) In general.* Except as otherwise provided, the yield on an investment allocated to an issue is computed under the economic accrual method, using the same compounding interval and financial conventions used to compute the yield on the issue. The yield on an investment allocated to an issue is the discount rate that, when used in computing the present value as of the date the investment is first allocated to the issue of all unconditionally payable receipts from the investment, produces an amount equal to the present value of all unconditionally payable payments for the investment. For this purpose, *payments* means amounts to be actually or constructively paid to acquire the investment, and *receipts* means amounts to be actually or constructively received from the investment, such as earnings and return of principal. The yield on a variable rate investment is determined in a manner comparable to the determination of the

yield on a variable rate issue. For an issue of qualified mortgage bonds, qualified veterans' mortgage bonds, or qualified student loan bonds on which interest is paid semiannually, all regular monthly loan payments to be received during a semiannual debt service period may be treated as received at the end of that period. In addition, for any conduit financing issue, payments made by the conduit borrower are not treated as paid until the conduit borrower ceases to receive the benefit of earnings on those amounts.

(2) *Yield on a separate class of investments*—(i) *In general.* For purposes of the yield restriction rules of section 148(a) and § 1.148-2, yield is computed separately for each class of investments. For this purpose, in determining the yield on a separate class of investments, the yield on each individual investment within the class is blended with the yield on other individual investments within the class, whether or not held concurrently, by treating those investments as a single investment. The yields on investments that are not within the same class are not blended.

(ii) *Separate classes of investments.* Each of the following is a separate class of investments—

(A) Each category of yield restricted purpose investment and program investment that is subject to a different definition of *materially higher* under § 1.148-2(d)(2);

(B) Yield-restricted nonpurpose investments; and

(C) All other nonpurpose investments;

(iii) *Permissive application of single investment rules to certain yield restricted investments for all purposes of section 148.* For all purposes of section 148, if an issuer reasonably expects as of the issue date to establish and maintain a sinking fund solely to reduce the yield on the investments in a refunding escrow, then the issuer may treat all of the yield restricted nonpurpose investments in the refunding escrow and that sinking fund as a single investment having a single yield, determined under this paragraph (b)(2). Thus, an issuer may not treat the nonpurpose investments in a reasonably required reserve fund and a refunding escrow as a single

investment having a single yield under this paragraph (b)(2)(iii).

(iv) *Mandatory application of single investment rules for refunding escrows for all purposes of section 148.* For all purposes of section 148, in computing the yield on yield restricted investments allocable to proceeds (*i.e.*, sale proceeds, investment proceeds, and transferred proceeds) of a refunding issue that are held in one or more refunding escrows, the individual investments are treated as a single investment having a single yield, whether or not held concurrently. For example, this single investment includes both the individual investments allocable to sale and investment proceeds of a refunding issue that are held in one refunding escrow for a prior issue and the investments allocable to transferred proceeds of that refunding issue that are held in another refunding escrow.

(3) *Investments to be held beyond issue's maturity or beyond temporary period.* In computing the yield on investments allocable to an issue that are to be held beyond the reasonably expected redemption date of the issue, those investments are treated as sold for an amount equal to their value on that date. In computing the yield on investments that are held beyond an applicable temporary period under § 1.148-2, for purposes of § 1.148-2 those investments may be treated as purchased for an amount equal to their fair market value as of the end of the temporary period.

(4) *Consistent redemption assumptions on purpose investments.* The yield on purpose investments allocable to an issue is computed using the same redemption assumptions used to compute the yield on the issue. Yield on purpose investments allocable to an issue of qualified mortgage bonds and qualified veterans' mortgage bonds must be determined in a manner that is consistent with, and using the assumptions required by, section 143(g)(2)(B).

(5) *Student loan special allowance payments included in yield.* Except as provided in § 1.148-11(e), the yield on qualified student loans is computed by including as receipts any special allowance payments made by the Secretary of Education pursuant to section 438 of the Higher Education Act of 1965.

(c) *Yield reduction payments to the United States*—(1) *In general.* In determining the yield on an investment to which this paragraph (c) applies, any amount paid to the United States in accordance with this paragraph (c), including a rebate amount, is treated as a payment for that investment that reduces the yield on that investment.

(2) *Manner of payment*—(i) *In general.* Except as otherwise provided in paragraph (c)(2)(ii) of this section, an amount is paid under this paragraph (c) if it is paid to the United States at the same time and in the same manner as rebate amounts are required to be paid or at such other time or in such manner as the Commissioner may prescribe. For example, yield reduction payments must be made on or before the date of required rebate installment payments as described in §§ 1.148-3(f), (g), and (h). The provisions of § 1.148-3(i) apply to payments made under this paragraph (c).

(ii) *Special rule for purpose investments.* For purpose investments allocable to an issue—

(A) No amounts are required to be paid to satisfy this paragraph (c) until the earlier of the end of the tenth bond year after the issue date of the issue or 60 days after the date on which the issue is no longer outstanding; and

(B) For payments made prior to the date on which the issue is retired, the issuer need not pay more than 75 percent of the amount otherwise required to be paid as of the date to which the payment relates.

(3) *Applicability of special yield reduction rule*—(i) *Covered investments.* This paragraph (c) applies to—

(A) Nonpurpose investments allocable to proceeds of an issue that qualified for one of the temporary periods available for capital projects, restricted working capital expenditures, pooled financings, or investment proceeds under § 1.148-2(e)(2), (e)(3), (e)(4), or (e)(6), respectively;

(B) Investments allocable to a variable yield issue during any computation period in which at least 5 percent of the value of the issue is represented by variable yield bonds, unless the issue is an issue of hedge bonds (as defined in section 149(g)(3)(A));

(C) Nonpurpose investments allocable to transferred proceeds of—

(1) A current refunding issue to the extent necessary to reduce the yield on those investments to satisfy yield restrictions under section 148(a); or

(2) An advance refunding issue to the extent that investment of the refunding escrows allocable to the proceeds, other than transferred proceeds, of the refunding issue in zero-yielding nonpurpose investments is insufficient to satisfy yield restrictions under section 148(a);

(D) Purpose investments allocable to qualified student loans under a program described in section 144(b)(1)(A);

(E) Nonpurpose investments allocable to gross proceeds of an issue in a reasonably required reserve or replacement fund or in a fund that, except for its failure to satisfy the size limitation in § 1.148-2(f)(2)(ii), would qualify as a reasonably required reserve or replacement fund, but only to the extent that—

(1) The value of the nonpurpose investments in the fund is not greater than 15 percent of the stated principal amount of the issue, as computed under § 1.148-2(f)(2)(ii), or

(2) The amounts in the fund (other than investment earnings) are not reasonably expected to be used to pay debt service on the issue other than in connection with reductions in the amount required to be in that fund (e.g. a reserve fund for a revolving fund loan program);

(F) Nonpurpose investments allocated to replacement proceeds of a refunded issue as a result of the application of the universal cap to amounts in a refunding escrow (see § 1.148-11(c)(1)(ii)); and

(G) Investments described in § 1.148-11(f).

(ii) *Exception to yield reduction payments rule for advance refunding issues.* Paragraph (c)(1) of this section does not apply to investments allocable to gross proceeds of an advance refunding issue, other than—

(A) Transferred proceeds to which paragraph (c)(3)(i)(C) of this section applies;

(B) Replacement proceeds to which paragraph (c)(3)(i)(F) of this section applies; and

(C) Transferred proceeds to which paragraph (c)(3)(i)(E) of this section applies, but only to the extent necessary to satisfy yield restriction under section 148(a) on those proceeds treating all investments allocable to those proceeds as a separate class.

(d) *Value of investments*—(1) *In general.* Except as otherwise provided, the value of an investment (including a payment or receipt on the investment) on a date must be determined using one of the following valuation methods consistently for all purposes of section 148 to that investment on that date:

(i) *Plain par investment—outstanding principal amount.* A plain par investment may be valued at its outstanding stated principal amount, plus any accrued unpaid interest on that date.

(ii) *Fixed rate investment—present value.* A fixed rate investment may be valued at its present value on that date.

(iii) *Any investment—fair market value.* An investment may be valued at its fair market value on that date.

(2) *Mandatory valuation of yield restricted investments at present value.* Any yield restricted investment must be valued at present value. For example, a purpose investment or an investment allocable to gross proceeds in a refunding escrow after the expiration of the initial temporary period must be valued at present value. See, however, paragraph (b)(3) of this section.

(3) *Mandatory valuation of certain investments at fair market value*—(i) *In general.* Except as provided in paragraphs (d)(2), (d)(3)(ii), and (d)(4) of this section, an investment must be valued at fair market value on the date that it is first allocated to an issue or first ceases to be allocated to an issue as a consequence of a deemed acquisition or deemed disposition. For example, if an issuer deposits existing investments into a sinking fund for an issue, those investments must be valued at fair market value as of the date first deposited into the fund.

(ii) *Exception to fair market value requirement for transferred proceeds allocations, universal cap allocations, and commingled funds.* Paragraph (d)(3)(i) of this section does not apply if the investment is allocated from one issue to another issue as a result of the trans-

ferred proceeds allocation rule under §1.148-9(b) or the universal cap rule under §1.148-6(b)(2), provided that both issues consist exclusively of tax-exempt bonds. In addition, paragraph (d)(3)(i) of this section does not apply to investments in a commingled fund (other than a bona fide debt service fund) unless it is an investment being initially deposited in or withdrawn from a commingled fund described in §1.148-6(e)(5)(iii).

(4) *Special transition rule for transferred proceeds.* The value of a nonpurpose investment that is allocated to transferred proceeds of a refunding issue on a transfer date may not exceed the value of that investment on the transfer date used for purposes of applying the arbitrage restrictions to the refunded issue.

(5) *Definition of present value of an investment.* Except as otherwise provided, present value of an investment is computed under the economic accrual method, using the same compounding interval and financial conventions used to compute the yield on the issue. The present value of an investment on a date is equal to the present value of all unconditionally payable receipts to be received from and payments to be paid for the investment after that date, using the yield on the investment as the discount rate.

(6) *Definition of fair market value*—(i) *In general.* The fair market value of an investment is the price at which a willing buyer would purchase the investment from a willing seller in a bona fide, arm's-length transaction. Fair market value generally is determined on the date on which a contract to purchase or sell the nonpurpose investment becomes binding (*i.e.*, the trade date rather than the settlement date). Except as otherwise provided in this paragraph (d)(6), an investment that is not of a type traded on an established securities market, within the meaning of section 1273, is rebuttably presumed to be acquired or disposed of for a price that is not equal to its fair market value. The fair market value of a United States Treasury obligation that is purchased directly from the United States Treasury is its purchase price.

(ii) *Safe harbor for establishing fair market value for certificates of deposit.*

This paragraph (d)(6)(ii) applies to a certificate of deposit that has a fixed interest rate, a fixed payment schedule, and a substantial penalty for early withdrawal. The purchase price of such a certificate of deposit is treated as its fair market value on the purchase date if the yield on the certificate of deposit is not less than—

(A) The yield on reasonably comparable direct obligations of the United States; and

(B) The highest yield that is published or posted by the provider to be currently available from the provider on reasonably comparable certificates of deposit offered to the public.

(iii) *Safe harbor for establishing fair market value for guaranteed investment contracts and investments purchased for a yield restricted defeasance escrow.* The purchase price of a guaranteed investment contract and the purchase price of an investment purchased for a yield restricted defeasance escrow will be treated as the fair market value of the investment on the purchase date if all of the following requirements are satisfied:

(A) The issuer makes a bona fide solicitation for the purchase of the investment. A bona fide solicitation is a solicitation that satisfies all of the following requirements:

(1) The bid specifications are in writing and are timely forwarded to potential providers.

(2) The bid specifications include all material terms of the bid. A term is material if it may directly or indirectly affect the yield or the cost of the investment.

(3) The bid specifications include a statement notifying potential providers that submission of a bid is a representation that the potential provider did not consult with any other potential provider about its bid, that the bid was determined without regard to any other formal or informal agreement that the potential provider has with the issuer or any other person (whether or not in connection with the bond issue), and that the bid is not being submitted solely as a courtesy to the issuer or any other person for purposes of satisfying the requirements of paragraph (d)(6)(iii)(B)(1) or (2) of this section.

(4) The terms of the bid specifications are commercially reasonable. A term is commercially reasonable if there is a legitimate business purpose for the term other than to increase the purchase price or reduce the yield of the investment. For example, for solicitations of investments for a yield restricted defeasance escrow, the hold firm period must be no longer than the issuer reasonably requires.

(5) For purchases of guaranteed investment contracts only, the terms of the solicitation take into account the issuer's reasonably expected deposit and drawdown schedule for the amounts to be invested.

(6) All potential providers have an equal opportunity to bid. For example, no potential provider is given the opportunity to review other bids (*i.e.*, a last look) before providing a bid.

(7) At least three reasonably competitive providers are solicited for bids. A reasonably competitive provider is a provider that has an established industry reputation as a competitive provider of the type of investments being purchased.

(B) The bids received by the issuer meet all of the following requirements:

(1) The issuer receives at least three bids from providers that the issuer solicited under a bona fide solicitation meeting the requirements of paragraph (d)(6)(iii)(A) of this section and that do not have a material financial interest in the issue. A lead underwriter in a negotiated underwriting transaction is deemed to have a material financial interest in the issue until 15 days after the issue date of the issue. In addition, any entity acting as a financial advisor with respect to the purchase of the investment at the time the bid specifications are forwarded to potential providers has a material financial interest in the issue. A provider that is a related party to a provider that has a material financial interest in the issue is deemed to have a material financial interest in the issue.

(2) At least one of the three bids described in paragraph (d)(6)(iii)(B)(1) of this section is from a reasonably competitive provider, within the meaning of paragraph (d)(6)(iii)(A)(7) of this section.

(3) If the issuer uses an agent to conduct the bidding process, the agent did not bid to provide the investment.

(C) The winning bid meets the following requirements:

(1) *Guaranteed investment contracts.* If the investment is a guaranteed investment contract, the winning bid is the highest yielding bona fide bid (determined net of any broker's fees).

(2) *Other investments.* If the investment is not a guaranteed investment contract, the following requirements are met:

(i) The winning bid is the lowest cost bona fide bid (including any broker's fees). The lowest cost bid is either the lowest cost bid for the portfolio or, if the issuer compares the bids on an investment-by-investment basis, the aggregate cost of a portfolio comprised of the lowest cost bid for each investment. Any payment received by the issuer from a provider at the time a guaranteed investment contract is purchased (e.g., an escrow float contract) for a yield restricted defeasance escrow under a bidding procedure meeting the requirements of this paragraph (d)(6)(iii) is taken into account in determining the lowest cost bid.

(ii) The lowest cost bona fide bid (including any broker's fees) is not greater than the cost of the most efficient portfolio comprised exclusively of State and Local Government Series Securities from the United States Department of the Treasury, Bureau of Public Debt. The cost of the most efficient portfolio of State and Local Government Series Securities is to be determined at the time that bids are required to be submitted pursuant to the terms of the bid specifications.

(iii) If State and Local Government Series Securities from the United States Department of the Treasury, Bureau of Public Debt are not available for purchase on the day that bids are required to be submitted pursuant to terms of the bid specifications because sales of those securities have been suspended, the cost comparison of paragraph (d)(6)(iii) (C)(2)(ii) of this section is not required.

(D) The provider of the investments or the obligor on the guaranteed investment contract certifies the administrative costs that it pays (or expects

to pay, if any) to third parties in connection with supplying the investment.

(E) The issuer retains the following records with the bond documents until three years after the last outstanding bond is redeemed:

(1) For purchases of guaranteed investment contracts, a copy of the contract, and for purchases of investments other than guaranteed investment contracts, the purchase agreement or confirmation.

(2) The receipt or other record of the amount actually paid by the issuer for the investments, including a record of any administrative costs paid by the issuer, and the certification under paragraph (d)(6)(iii)(D) of this section.

(3) For each bid that is submitted, the name of the person and entity submitting the bid, the time and date of the bid, and the bid results.

(4) The bid solicitation form and, if the terms of the purchase agreement or the guaranteed investment contract deviated from the bid solicitation form or a submitted bid is modified, a brief statement explaining the deviation and stating the purpose for the deviation. For example, if the issuer purchases a portfolio of investments for a yield restricted defeasance escrow and, in order to satisfy the yield restriction requirements of section 148, an investment in the winning bid is replaced with an investment with a lower yield, the issuer must retain a record of the substitution and how the price of the substitute investment was determined. If the issuer replaces an investment in the winning bid portfolio with another investment, the purchase price of the new investment is not covered by the safe harbor unless the investment is bid under a bidding procedure meeting the requirements of this paragraph (d)(6)(iii).

(5) For purchases of investments other than guaranteed investment contracts, the cost of the most efficient portfolio of State and Local Government Series Securities, determined at the time that the bids were required to be submitted pursuant to the terms of the bid specifications.

(e) *Administrative costs of investments—*  
(1) *In general.* Except as otherwise provided in this paragraph (e), an allocation of gross proceeds of an issue to a

payment or a receipt on an investment is not adjusted to take into account any costs or expenses paid, directly or indirectly, to purchase, carry, sell, or retire the investment (administrative costs). Thus, these administrative costs generally do not increase the payments for, or reduce the receipts from, investments.

(2) *Qualified administrative costs on nonpurpose investments*—(i) *In general.* In determining payments and receipts on nonpurpose investments, qualified administrative costs are taken into account. Thus, qualified administrative costs increase the payments for, or decrease the receipts from, the investments. Qualified administrative costs are reasonable, direct administrative costs, other than carrying costs, such as separately stated brokerage or selling commissions, but not legal and accounting fees, recordkeeping, custody, and similar costs. General overhead costs and similar indirect costs of the issuer such as employee salaries and office expenses and costs associated with computing the rebate amount under section 148(f) are not qualified administrative costs. In general, administrative costs are not reasonable unless they are comparable to administrative costs that would be charged for the same investment or a reasonably comparable investment if acquired with a source of funds other than gross proceeds of tax-exempt bonds.

(ii) *Special rule for administrative costs of nonpurpose investments in certain regulated investment companies and commingled funds.* Qualified administrative costs include all reasonable administrative costs, without regard to the limitation on indirect costs under paragraph (e)(2)(i) of this section, incurred by:

(A) *Regulated investment companies.* A publicly offered regulated investment company (as defined in section 67(c)(2)(B)); and

(B) *External commingled funds.* A widely held commingled fund in which no investor in the fund owns more than 10 percent of the beneficial interest in the fund. For purposes of this paragraph (e)(2)(ii)(B), a fund is treated as widely held only if, during the immediately preceding fixed, semiannual period chosen by the fund (e.g., semiannual peri-

ods ending June 30 and December 31), the fund had a daily average of more than 15 investors that were not related parties, and the daily average amount each investor had invested in the fund was not less than the lesser of \$500,000 and 1 percent of the daily average of the total amount invested in the fund. For purposes of this paragraph (e)(2)(ii)(B), an investor will be treated as owning not more than 10 percent of the beneficial interest in the fund if, on the date of each deposit by the investor into the fund, the total amount the investor and any related parties have on deposit in the fund is not more than 10 percent of the total amount that all investors have on deposit in the fund. For purposes of the preceding sentence, the total amount that all investors have on deposit in the fund is equal to the sum of all deposits made by the investor and any related parties on the date of those deposits and the closing balance in the fund on the day before those deposits. If any investor in the fund owns more than 10 percent of the beneficial interest in the fund, the fund does not qualify under this paragraph (e)(2)(ii)(B) until that investor makes sufficient withdrawals from the fund to reduce its beneficial interest in the fund to 10 percent or less.

(iii) *Special rule for guaranteed investment contracts and investments purchased for a yield restricted defeasance escrow*—(A) *In general.* An amount paid for a broker's commission or similar fee with respect to a guaranteed investment contract or investments purchased for a yield restricted defeasance escrow is a qualified administrative cost if the fee is reasonable within the meaning of paragraph (e)(2)(i) of this section.

(B) *Safe harbor*—(1) *In general.* A broker's commission or similar fee with respect to the acquisition of a guaranteed investment contract or investments purchased for a yield restricted defeasance escrow is reasonable within the meaning of paragraph (e)(2)(i) of this section to the extent that—

(i) The amount of the fee that the issuer treats as a qualified administrative cost does not exceed the lesser of:

(A) \$30,000 and

(B) 0.2% of the computational base or, if more, \$3,000; and

(ii) For any issue, the issuer does not treat as qualified administrative costs more than \$85,000 in brokers' commissions or similar fees with respect to all guaranteed investment contracts and investments for yield restricted defeasance escrows purchased with gross proceeds of the issue.

(2) *Computational base.* For purposes of paragraph (e)(2)(iii)(B)(1) of this section, computational base shall mean—

(i) For a guaranteed investment contract, the amount of gross proceeds the issuer reasonably expects, as of the date the contract is acquired, to be deposited in the guaranteed investment contract over the term of the contract, and

(ii) For investments (other than guaranteed investment contracts) to be deposited in a yield restricted defeasance escrow, the amount of gross proceeds initially invested in those investments.

(3) *Cost-of-living adjustment.* In the case of a calendar year after 2004, each of the dollar amounts in paragraph (e)(2)(iii)(B)(1) of this section shall be increased by an amount equal to—

(i) Such dollar amount; multiplied by

(ii) The cost-of-living adjustment determined under section 1(f)(3) for such calendar year by using the language “calendar year 2003” instead of “calendar year 1992” in section 1(f)(3)(B).

(4) *Rounding.* If any increase determined under paragraph (e)(2)(iii)(B)(3) of this section is not a multiple of \$1,000, such increase shall be rounded to the nearest multiple thereof.

(5) *Applicable year for cost-of-living adjustment.* The cost-of-living adjustments under paragraph (e)(2)(iii)(B)(3) of this section shall apply to the safe harbor amounts under paragraph (e)(2)(iii)(B)(1) of this section based on the year the guaranteed investment contract or the investments for the yield restricted defeasance escrow, as applicable, are acquired.

(6) *Cost-of-living adjustment to determine remaining amount of per-issue safe harbor—(i) In general.* This paragraph (e)(2)(iii)(B)(6) applies to determine the portion of the safe harbor amount under paragraph (e)(2)(iii)(B)(1)(ii) of this section, as modified by paragraph (e)(2)(iii)(B)(3) of this section (the per-issue safe harbor), that is available (the remaining amount) for any year

(the determination year) if the per-issue safe harbor was partially used in one or more prior years.

(ii) *Remaining amount of per-issue safe harbor.* The remaining amount of the per-issue safe harbor for any determination year is equal to the per-issue safe harbor for that year, reduced by the portion of the per-issue safe harbor used in one or more prior years.

(iii) *Portion of per-issue safe harbor used in prior years.* The portion of the per-issue safe harbor used in any prior year (the prior year) is equal to the total amount of broker's commissions or similar fees paid in connection with guaranteed investment contracts or investments for a yield restricted defeasance escrow acquired in the prior year that the issuer treated as qualified administrative costs for the issue, multiplied by a fraction the numerator of which is the per-issue safe harbor for the determination year and the denominator of which is the per-issue safe harbor for the prior year. See paragraph (e)(2)(iii)(C) *Example 2* of this section.

(C) *Examples.* The following examples illustrate the application of the safe harbor in paragraph (e)(2)(iii)(B) of this section:

*Example 1. Multipurpose issue.* In 2003, the issuer of a multipurpose issue uses brokers to acquire the following investments with gross proceeds of the issue: a guaranteed investment contract for amounts to be deposited in a construction fund (construction GIC), Treasury securities to be deposited in a yield restricted defeasance escrow (Treasury investments) and a guaranteed investment contract that will be used to earn a return on what otherwise would be idle cash balances from maturing investments in the yield restricted defeasance escrow (the float GIC). The issuer deposits \$22,000,000 into the construction GIC and reasonably expects that no further deposits will be made over its term. The issuer uses \$8,040,000 of the proceeds to purchase the Treasury investments. The issuer reasonably expects that it will make aggregate deposits of \$600,000 to the float GIC over its term. The brokers' fees are \$30,000 for the construction GIC, \$16,080 for the Treasury investments and \$3,000 for the float GIC. The issuer has not previously treated any brokers' commissions or similar fees as qualified administrative costs. The issuer may claim all \$49,080 in brokers' fees for these investments as qualified administrative costs because the fees do not exceed the safe harbors in paragraph (e)(2)(iii)(B) of

this section. Specifically, each of the brokers' fees equals the lesser of \$30,000 and 0.2% of the computational base (or, if more, \$3,000) (i.e., lesser of \$30,000 and  $0.2\% \times \$22,000,000$  for the construction GIC; lesser of \$30,000 and  $0.2\% \times \$8,040,000$  for the Treasury investments; and lesser of \$30,000 and \$3,000 for the float GIC). In addition, the total amount of brokers' fees claimed by the issuer as qualified administrative costs (\$49,080) does not exceed the per-issue safe harbor of \$85,000.

*Example 2. Cost-of-living adjustment.* In 2003, an issuer issues bonds and uses gross proceeds of the issue to acquire two guaranteed investment contracts. The issuer pays a total of \$50,000 in brokers' fees for the two guaranteed investment contracts and treats these fees as qualified administrative costs. In a year subsequent to 2003 (Year Y), the issuer uses gross proceeds of the issue to acquire two additional guaranteed investment contracts, paying a total of \$20,000 in broker's fees for the two guaranteed investment contracts, and treats those fees as qualified administrative costs. For Year Y, applying the cost-of-living adjustment under paragraph (e)(2)(iii)(B)(3) of this section, the safe harbor dollar limits under paragraph (e)(2)(iii)(B)(1) of this section are \$3,000, \$32,000 and \$90,000. The remaining amount of the per-issue safe harbor for Year Y is \$37,059 ( $\$90,000 - [\$50,000 \times \$90,000/\$85,000]$ ). The broker's fees in Year Y do not exceed the per-issue safe harbor under paragraph (e)(2)(iii)(B)(1)(ii) (as modified by paragraph (e)(2)(iii)(B)(3) of this section) because the broker's fees do not exceed the remaining amount of the per-issue safe harbor determined under paragraph (e)(2)(iii)(B)(6) of this section for Year Y. In a year subsequent to Year Y (Year Z), the issuer uses gross proceeds of the issue to acquire an additional guaranteed investment contract, pays a broker's fee of \$15,000 for the guaranteed investment contract, and treats the broker's fee as a qualified administrative cost. For Year Z, applying the cost-of-living adjustment under paragraph (e)(2)(iii)(B)(3) of this section, the safe harbor dollar limits under paragraph (e)(2)(iii)(B)(1) of this section are \$3,000, \$33,000 and \$93,000. The remaining amount of the per-issue safe harbor for Year Z is \$17,627 ( $\$93,000 - [(\$50,000 \times \$93,000/\$85,000) + (\$20,000 \times \$93,000/\$90,000)]$ ). The broker's fee incurred in Year Z does not exceed the per-issue safe harbor under paragraph (e)(2)(iii)(B)(1)(ii) (as modified by paragraph (e)(2)(iii)(B)(3) of this section) because the broker's fee does not exceed the remaining amount of the per-issue safe harbor determined under paragraph (e)(2)(iii)(B)(6) of this section for Year Z. See paragraph (e)(2)(iii)(B)(6) of this section.

(3) *Qualified administrative costs on purpose investments—(i) In general.* In determining payments and receipts on purpose investments, qualified admin-

istrative costs described in this paragraph (e)(3) paid by the conduit borrower are taken into account. Thus, these costs increase the payments for, or decrease the receipts from, the purpose investments. This rule applies even if those payments merely reimburse the issuer. Although the actual payments by the conduit borrower may be made at any time, for this purpose, a pro rata portion of each payment made by a conduit borrower is treated as a reimbursement of reasonable administrative costs, if the present value of those payments does not exceed the present value of the reasonable administrative costs paid by the issuer, using the yield on the issue as the discount rate.

(ii) *Definition of qualified administrative costs of purpose investments—(A) In general.* Except as otherwise provided in this paragraph (e)(3)(ii), qualified administrative costs of a purpose investment means—

(1) Costs or expenses paid, directly or indirectly, to purchase, carry, sell, or retire the investment; and

(2) Costs of issuing, carrying, or repaying the issue, and any underwriters' discount.

(B) *Limitation on program investments.* For a program investment, qualified administrative costs include only those costs described in paragraph (e)(3)(ii)(A)(2) of this section.

[T.D. 8476, 58 FR 33529, June 18, 1993; 58 FR 44452, Aug. 23, 1993, as amended by T.D. 8538, 59 FR 24044, May 10, 1994; T.D. 8718, 62 FR 25511, May 9, 1997; T.D. 8801, 63 FR 71751, Dec. 30, 1998; T.D. 9097, 68 FR 69022, Dec. 11, 2003]

#### § 1.148-6 General allocation and accounting rules.

(a) *In general—(1) Reasonable accounting methods required.* An issuer may use any reasonable, consistently applied accounting method to account for gross proceeds, investments, and expenditures of an issue.

(2) *Bona fide deviations from accounting method.* An accounting method does not fail to be reasonable and consistently applied solely because a different accounting method is used for a bona fide governmental purpose to consistently account for a particular item. Bona fide governmental purposes may include special State law restrictions

imposed on specific funds or actions to avoid grant forfeitures.

(3) *Absence of allocation and accounting methods.* If an issuer fails to maintain books and records sufficient to establish the accounting method for an issue and the allocation of the proceeds of that issue, the rules of this section are applied using the specific tracing method. This paragraph (a)(3) applies to bonds issued on or after May 16, 1997.

(b) *Allocation of gross proceeds to an issue—(1) One-issue rule and general ordering rules.* Except as otherwise provided, amounts are allocable to only one issue at a time as gross proceeds, and if amounts simultaneously are proceeds of one issue and replacement proceeds of another issue, those amounts are allocable to the issue of which they are proceeds. Amounts cease to be allocated to an issue as proceeds only when those amounts are allocated to an expenditure for a governmental purpose, are allocated to transferred proceeds of another issue, or cease to be allocated to that issue at retirement of the issue or under the universal cap of paragraph (b)(2) of this section. Amounts cease to be allocated to an issue as replacement proceeds only when those amounts are allocated to an expenditure for a governmental purpose, are no longer used in a manner that causes those amounts to be replacement proceeds of that issue, or cease to be allocated to that issue because of the retirement of the issue or the application of the universal cap under paragraph (b)(2) of this section. Amounts that cease to be allocated to an issue as gross proceeds are eligible for allocation to another issue. Under §1.148-10(a), however, the rules in this paragraph (b)(1) do not apply in certain cases involving abusive arbitrage devices.

(2) *Universal cap on value of nonpurpose investments allocated to an issue—(i) Application.* The rules in this paragraph (b)(2) provide an overall limitation on the amount of gross proceeds allocable to an issue. Although the universal cap generally may be applied at any time in the manner described in this paragraph (b)(2), it need not be applied on any otherwise required date of application if its application on that date would not result in a reduction or reallocation of gross proceeds of an issue.

For this purpose, if an issuer reasonably expects as of the issue date that the universal cap will not reduce the amount of gross proceeds allocable to the issue during the term of the issue, the universal cap need not be applied on any date on which an issue actually has all of the following characteristics—

(A) No replacement proceeds are allocable to the issue, other than replacement proceeds in a bona fide debt service fund or a reasonably required reserve or replacement fund;

(B) The net sale proceeds of the issue—

(1) Qualified for one of the temporary periods available for capital projects, restricted working capital expenditures, or pooled financings under §1.148-2 (e)(2), (e)(3), or (e)(4), and those net sales proceeds were in fact allocated to expenditures prior to the expiration of the longest applicable temporary period; or

(2) were deposited in a refunding escrow and expended as originally expected;

(C) The issue does not refund a prior issue that, on any transfer date, has unspent proceeds allocable to it;

(D) None of the bonds are retired prior to the date on which those bonds are treated as retired in computing the yield on the issue; and

(E) No proceeds of the issue are invested in qualified student loans or qualified mortgage loans.

(ii) *General rule.* Except as otherwise provided below, amounts that would otherwise be gross proceeds allocable to an issue are allocated (and remain allocated) to the issue only to the extent that the value of the nonpurpose investments allocable to those gross proceeds does not exceed the value of all outstanding bonds of the issue. For this purpose, gross proceeds allocable to cash, tax-exempt bonds that would be nonpurpose investments (absent section 148(b)(3)(A)), qualified student loans, and qualified mortgage loans are treated as nonpurpose investments. The values of bonds and investments are determined under §1.148-4(e) and §1.148-5(d), respectively. The value of all outstanding bonds of the issue is referred to as the *universal cap*. Thus, for example, the universal cap for an issue

of plain par bonds is equal to the outstanding stated principal amount of those bonds plus accrued interest.

(iii) *Determination and application of the universal cap.* Except as otherwise provided, beginning with the first bond year that commences after the second anniversary of the issue date, the amount of the universal cap and the value of the nonpurpose investments must be determined as of the first day of each bond year. For refunding and refunded issues, the cap and values must be determined as of each date that, but for this paragraph (b)(2), proceeds of the refunded issue would become transferred proceeds of the refunding issue, and need not otherwise be determined in the bond year in which that date occurs. All values are determined as of the close of business on each determination date, after giving effect to all payments on bonds and payments for and receipts on investments on that date.

(iv) *General ordering rule for allocations of amounts in excess of the universal cap—(A) In general.* If the value of all nonpurpose investments allocated to the gross proceeds of an issue exceeds the universal cap for that issue on a date as of which the cap is determined under paragraph (b)(2)(iii) of this section, nonpurpose investments allocable to gross proceeds necessary to eliminate that excess cease to be allocated to the issue, in the following order of priority—

(1) First, nonpurpose investments allocable to replacement proceeds;

(2) Second, nonpurpose investments allocable to transferred proceeds; and

(3) Third, nonpurpose investments allocable to sale proceeds and investment proceeds.

(B) *Re-allocation of certain amounts.* Except as provided in § 1.148-9(b)(3), amounts that cease to be allocated to an issue as a result of the application of the universal cap may only be allocated to another issue as replacement proceeds.

(C) *Allocations of portions of investments.* Portions of investments to which this paragraph (b)(2)(iv) applies are allocated under either the ratable method or the representative method in the same manner as allocations of

portions of investments to transferred proceeds under § 1.148-9(c).

(v) *Nonpurpose investments in a bona fide debt service fund not counted.* For purposes of this paragraph (b)(2), nonpurpose investments allocated to gross proceeds in a bona fide debt service fund for an issue are not taken into account in determining the value of the nonpurpose investments, and those nonpurpose investments remain allocated to the issue.

(c) *Fair market value limit on allocations to nonpurpose investments.* Upon a purchase or sale of a nonpurpose investment, gross proceeds of an issue are not allocated to a payment for that nonpurpose investment in an amount greater than, or to a receipt from that nonpurpose investment in an amount less than, the fair market value of the nonpurpose investment as of the purchase or sale date. For purposes of this paragraph (c) only, the fair market value of a nonpurpose investment is adjusted to take into account qualified administrative costs allocable to the investment.

(d) *Allocation of gross proceeds to expenditures—(1) Expenditures in general—*

(i) *General rule.* Reasonable accounting methods for allocating funds from different sources to expenditures for the same governmental purpose include any of the following methods if consistently applied: a specific tracing method; a gross proceeds spent first method; a first-in, first-out method; or a ratable allocation method.

(ii) *General limitation.* An allocation of gross proceeds of an issue to an expenditure must involve a current outlay of cash for a governmental purpose of the issue. A *current outlay of cash* means an outlay reasonably expected to occur not later than 5 banking days after the date as of which the allocation of gross proceeds to the expenditure is made.

(iii) *Timing.* An issuer must account for the allocation of proceeds to expenditures not later than 18 months after the later of the date the expenditure is paid or the date the project, if any, that is financed by the issue is placed in service. This allocation must be made in any event by the date 60 days after the fifth anniversary of the issue date or the date 60 days after the

retirement of the issue, if earlier. This paragraph (d)(1)(iii) applies to bonds issued on or after May 16, 1997.

(2) *Treatment of gross proceeds invested in purpose investments—(i) In general.* Gross proceeds of an issue invested in a purpose investment are allocated to an expenditure on the date on which the conduit borrower under the purpose investment allocates the gross proceeds to an expenditure in accordance with this paragraph (d).

(ii) *Exception for qualified mortgage loans and qualified student loans.* If gross proceeds of an issue are allocated to a purpose investment that is a qualified mortgage loan or a qualified student loan, those gross proceeds are allocated to an expenditure for the governmental purpose of the issue on the date on which the issuer allocates gross proceeds to that purpose investment.

(iii) *Continuing allocation of gross proceeds to purpose investments.* Regardless of whether gross proceeds of a conduit financing issue invested in a purpose investment have been allocated to an expenditure under paragraph (d)(2) (i) or (ii) of this section, with respect to the actual issuer those gross proceeds continue to be allocated to the purpose investment until the sale, discharge, or other disposition of the purpose investment.

(3) *Expenditures for working capital purposes—(i) In general.* Except as otherwise provided in this paragraph (d)(3) or paragraph (d)(4) of this section, proceeds of an issue may only be allocated to working capital expenditures as of any date to the extent that those working capital expenditures exceed available amounts (as defined in paragraph (d)(3)(iii) of this section) as of that date (i.e., a “proceeds-spent-last” method). For this purpose, proceeds include replacement proceeds described in § 1.148-1(c)(4).

(ii) *Exceptions—(A) General de minimis exception.* Paragraph (d)(3)(i) of this section does not apply to expenditures to pay—

(1) Any issuance costs of the issue or any qualified administrative costs within the meaning of §§ 1.148-5(e)(2) (i) or (ii), or § 1.148-5(e)(3)(ii)(A);

(2) Fees for qualified guarantees of the issue or payments for a qualified hedge for the issue;

(3) Interest on the issue for a period commencing on the issue date and ending on the date that is the later of three years from the issue date or one year after the date on which the project is placed in service;

(4) Amounts paid to the United States under §§ 1.148-3, 1.148-5(c), or 1.148-7 for the issue;

(5) Costs, other than those described in paragraphs (d)(3)(ii)(A) (1) through (4) of this section, that do not exceed 5 percent of the sale proceeds of an issue and that are directly related to capital expenditures financed by the issue (e.g., initial operating expenses for a new capital project);

(6) Principal or interest on an issue paid from unexpected excess sale or investment proceeds; and

(7) Principal or interest on an issue paid from investment earnings on a reserve or replacement fund that are deposited in a bona fide debt service fund.

(B) *Exception for extraordinary items.* Paragraph (d)(3)(i) of this section does not apply to expenditures for extraordinary, nonrecurring items that are not customarily payable from current revenues, such as casualty losses or extraordinary legal judgments in amounts in excess of reasonable insurance coverage. If, however, an issuer or a related party maintains a reserve for such items (e.g., a self-insurance fund) or has set aside other available amounts for such expenses, gross proceeds within that reserve must be allocated to expenditures only after all other available amounts in that reserve are expended.

(C) *Exception for payment of principal and interest on prior issues.* Paragraph (d)(3)(i) of this section does not apply to expenditures for payment of principal, interest, or redemption prices on a prior issue and, for a crossover refunding issue, interest on that issue.

(D) *No exceptions if replacement proceeds created.* The exceptions provided in this paragraph (d)(3)(ii) do not apply if the allocation merely substitutes gross proceeds for other amounts that would have been used to make those expenditures in a manner that gives

rise to replacement proceeds. For example, if a purported reimbursement allocation of proceeds of a reimbursement bond does not result in an expenditure under §1.150-2, those proceeds may not be allocated to pay interest on an issue that, absent this allocation, would have been paid from the issuer's current revenues.

(iii) *Definition of available amount—*  
 (A) *In general.* For purposes of this paragraph (d)(3), *available amount* means any amount that is available to an issuer for working capital expenditure purposes of the type financed by an issue. Except as otherwise provided, *available amount* excludes proceeds of the issue but includes cash, investments, and other amounts held in accounts or otherwise by the issuer or a related party if those amounts may be used by the issuer for working capital expenditures of the type being financed by an issue without legislative or judicial action and without a legislative, judicial, or contractual requirement that those amounts be reimbursed.

(B) *Reasonable working capital reserve treated as unavailable.* A reasonable working capital reserve is treated as unavailable. Any working capital reserve is reasonable if it does not exceed 5 percent of the actual working capital expenditures of the issuer in the fiscal year before the year in which the determination of available amounts is made. For this purpose only, in determining the working capital expenditures of an issuer for a prior fiscal year, any expenditures (whether capital or working capital expenditures) that are paid out of current revenues may be treated as working capital expenditures.

(C) *Qualified endowment funds treated as unavailable.* For a 501(c)(3) organization, a qualified endowment fund is treated as unavailable. A fund is a qualified endowment fund if—

(1) The fund is derived from gifts or bequests, or the income thereon, that were neither made nor reasonably expected to be used to pay working capital expenditures;

(2) Pursuant to reasonable, established practices of the organization, the governing body of the 501(c)(3) organization designates and consistently operates the fund as a permanent en-

dowment fund or quasi-endowment fund restricted as to use; and

(3) There is an independent verification that the fund is reasonably necessary as part of the organization's permanent capital.

(D) *Application to statutory safe harbor for tax and revenue anticipation bonds.* For purposes of section 148(f)(4)(B)(iii)(II), *available amount* has the same meaning as in paragraph (d)(3)(iii) of this section, except that the otherwise-permitted reasonable working capital reserve is treated as part of the available amount.

(4) *Expenditures for grants—(i) In general.* Gross proceeds of an issue that are used to make a grant are allocated to an expenditure on the date on which the grant is made.

(ii) *Characterization of repayments of grants.* If any amount of a grant financed by gross proceeds of an issue is repaid to the grantor, the repaid amount is treated as unspent proceeds of the issue as of the repayment date unless expended within 60 days of repayment.

(iii) *Definition of grant.* *Grant* means a transfer for a governmental purpose of money or property to a transferee that is not a related party to or an agent of the transferor. The transfer must not impose any obligation or condition to directly or indirectly repay any amount to the transferor. Obligations or conditions intended solely to assure expenditure of the transferred moneys in accordance with the governmental purpose of the transfer do not prevent a transfer from being a grant.

(5) *Expenditures for reimbursement purposes.* In allocating gross proceeds of issues of reimbursement bonds (as defined in §1.150-2) to certain expenditures, §1.150-2 applies. In allocating gross proceeds to an expenditure to reimburse a previously paid working capital expenditure, paragraph (d)(3) of this section applies. Thus, if the expenditure is described in paragraph (d)(3)(ii) of this section or there are no available amounts on the date a working capital expenditure is made and there are no other available amounts on the date of the reimbursement of

that expenditure, gross proceeds are allocated to the working capital expenditure as of the date of the reimbursement.

(6) *Expenditures of certain commingled investment proceeds of governmental issues.* This paragraph (d)(6) applies to any issue of governmental bonds, any issue of private activity bonds issued to finance a facility that is required by section 142 to be owned by a governmental unit, and any portion of an issue that is not treated as consisting of private activity bonds under section 141(b)(9). Investment proceeds of the issue (other than investment proceeds held in a refunding escrow) are treated as allocated to expenditures for a governmental purpose when the amounts are deposited in a commingled fund with substantial tax or other revenues from governmental operations of the issuer and the amounts are reasonably expected to be spent for governmental purposes within 6 months from the date of the commingling. In establishing these reasonable expectations, an issuer may use any reasonable accounting assumption and is not bound by the *proceeds-spent-last* assumption generally required for working capital expenditures under paragraph (d)(3) of this section.

(7) *Payments to related parties.* Any payment of gross proceeds of the issue to a related party of the payor is not an expenditure of those gross proceeds.

(e) *Special rules for commingled funds—*

(1) *In general.* An accounting method for gross proceeds of an issue in a commingled fund, other than a bona fide debt service fund, is reasonable only if it satisfies the requirements of paragraphs (e)(2) through (6) of this section in addition to the other requirements of this section.

(2) *Investments held by a commingled fund—(i) Required ratable allocations.* Not less frequently than as of the close of each fiscal period, all payments and receipts (including deemed payments and receipts) on investments held by a commingled fund must be allocated (but not necessarily distributed) among the different investors in the fund. This allocation must be based on a consistently applied, reasonable ratable allocation method.

(ii) *Safe harbors for ratable allocation methods.* Reasonable ratable allocation methods include, without limitation, methods that allocate these items in proportion to either—

(A) The average daily balances of the amounts in the commingled fund from different investors during a fiscal period (as described in paragraph (e)(4) of this section); or

(B) The average of the beginning and ending balances of the amounts in the commingled fund from different investors for a fiscal period that does not exceed one month.

(iii) *Definition of investor.* For purposes of this paragraph (e), the term *investor* means each different source of funds invested in a commingled fund. For example, if a city invests gross proceeds of an issue and tax revenues in a commingled fund, it is treated as two different investors.

(3) *Certain expenditures involving a commingled fund.* If a ratable allocation method is used under paragraph (d) of this section to allocate expenditures from the commingled fund, the same ratable allocation method must be used to allocate payments and receipts on investments in the commingled fund under paragraph (e)(2) of this section.

(4) *Fiscal periods.* The fiscal year of a commingled fund is the calendar year unless the fund adopts another fiscal year. A commingled fund may use any consistent fiscal period that does not exceed three months (e.g., a daily, weekly, monthly, or quarterly fiscal period).

(5) *Unrealized gains and losses on investments of a commingled fund—(i) Mark-to-market requirement for internal commingled funds with longer-term investment portfolios.* Except as otherwise provided in this paragraph (e), in the case of a commingled fund in which the issuer and any related party own more than 25 percent of the beneficial interests in the fund (an *internal commingled fund*), the fund must treat all its investments as if sold at fair market value either on the last day of the fiscal year or the last day of each fiscal period. The net gains or losses from these deemed sales of investments must be allocated to all investors of the commingled fund during the period since the last allocation.

(ii) *Exception for internal commingled funds with shorter-term investment portfolios.* If the remaining weighted average maturity of all investments held by a commingled fund during a particular fiscal year does not exceed 18 months, and the investments held by the commingled fund during that fiscal year consist exclusively of obligations, the mark-to-market requirement of paragraph (e)(5)(i) of this section does not apply.

(iii) *Exception for commingled reserve funds and sinking funds.* The mark-to-market requirement of paragraph (e)(5)(i) of this section does not apply to a commingled fund that operates exclusively as a reserve fund, sinking fund, or replacement fund for two or more issues of the same issuer.

(6) *Allocations of commingled funds serving as common reserve funds or sinking funds—(i) Permitted ratable allocation methods.* If a commingled fund serves as a common reserve fund, replacement fund, or sinking fund for two or more issues (a *commingled reserve*), after making reasonable adjustments to account for proceeds allocated under paragraph (b)(1) or (b)(2) of this section, investments held by that commingled fund must be allocated ratably among the issues served by the commingled fund in accordance with one of the following methods—

(A) The relative values of the bonds of those issues under § 1.148-4(e);

(B) The relative amounts of the remaining maximum annual debt service requirements on the outstanding principal amounts of those issues; or

(C) The relative original stated principal amounts of the outstanding issues.

(ii) *Frequency of allocations.* An issuer must make any allocations required by this paragraph (e)(6) as of a date at least every 3 years and as of each date that an issue first becomes secured by the commingled reserve. If relative original principal amounts are used to allocate, allocations must also be made on the retirement of any issue secured by the commingled reserve.

[T.D. 8476, 58 FR 33532, June 18, 1993; 58 FR 44452, Aug. 23, 1993, as amended by T.D. 8538, 59 FR 24045, May 10, 1994; T.D. 8712, 62 FR 2304, Jan. 16, 1997; T.D. 8718, 62 FR 25512, May 9, 1997]

**§ 1.148-7 Spending exceptions to the rebate requirement.**

(a) *Scope of section—(1) In general.* This section provides guidance on the spending exceptions to the arbitrage rebate requirement of section 148(f)(2). These exceptions are the 6-month exception in section 148(f)(4)(B) (the *6-month exception*), the 18-month exception under paragraph (d) of this section (the *18-month exception*), and the 2-year construction exception under section 148(f)(4)(C) (the *2-year exception*) (collectively, the *spending exceptions*).

(2) *Relationship of spending exceptions.* Each of the spending exceptions is an independent exception to arbitrage rebate. For example, a construction issue may qualify for the 6-month exception or the 18-month exception even though the issuer makes one or more elections under the 2-year exception with respect to the issue.

(3) *Spending exceptions not mandatory.* Use of the spending exceptions is not mandatory. An issuer may apply the arbitrage rebate requirement to an issue that otherwise satisfies a spending exception. If an issuer elects to pay penalty in lieu of rebate under the 2-year exception, however, the issuer must apply those penalty provisions.

(b) *Rules applicable for all spending exceptions.* The provisions of this paragraph (b) apply for purposes of applying each of the spending exceptions.

(1) *Special transferred proceeds rules—*

(i) *Application to prior issues.* For purposes of applying the spending exceptions to a prior issue only, proceeds of the prior issue that become transferred proceeds of the refunding issue continue to be treated as unspent proceeds of the prior issue. If the prior issue satisfies one of the spending exceptions, the proceeds of the prior issue that are excepted from rebate under that spending exception are not subject to rebate either as proceeds of the prior issue or as transferred proceeds of the refunding issue.

(ii) *Application to refunding issues—(A) In general.* The only spending exception applicable to refunding issues is the 6-month exception. For purposes of applying the 6-month exception to a refunding issue only, proceeds of the prior issue that become transferred

proceeds of the refunding issue generally are not treated as proceeds of the refunding issue and need not be spent for the refunding issue to satisfy that spending exception. Even if the refunding issue qualifies for that spending exception, those transferred proceeds are subject to rebate as proceeds of the refunding issue unless an exception to rebate applied to those proceeds as proceeds of the prior issue.

(B) *Exception.* For purposes of applying the 6-month exception to refunding issues, those transferred proceeds of the refunding issue excluded from the gross proceeds of the prior issue under the special definition of gross proceeds in paragraph (c)(3) of this section, and those that transferred from a prior taxable issue, are generally treated as gross proceeds of the refunding issue. Thus, for the refunding issue to qualify for the 6-month exception, those proceeds must be spent within 6 months of the issue date of the refunding issue, unless those amounts continue to be used in a manner that does not cause those amounts to be gross proceeds under paragraph (c)(3) of this section.

(2) *Application of multipurpose issue rules.* Except as otherwise provided, if any portion of an issue is treated as a separate issue allocable to refunding purposes under §1.148-9(h) (relating to multipurpose issues), for purposes of this section, that portion is treated as a separate issue.

(3) *Expenditures for governmental purposes of the issue.* For purposes of this section, expenditures for the governmental purpose of an issue include payments for interest, but not principal, on the issue, and for principal or interest on another issue of obligations. The preceding sentence does not apply for purposes of the 18-month and 2-year exceptions if those payments cause the issue to be a refunding issue.

(4) *De minimis rule.* Any failure to satisfy the final spending requirement of the 18-month exception or the 2-year exception is disregarded if the issuer exercises due diligence to complete the project financed and the amount of the failure does not exceed the lesser of 3 percent of the issue price of the issue or \$250,000.

(5) *Special definition of reasonably required reserve or replacement fund.* For

purposes of this section only, a reasonably required reserve or replacement fund also includes any fund to the extent described in §1.148-5(c)(3)(i)(E) or (G).

(6) *Pooled financing issue—(i) In general.* Except as otherwise provided in this paragraph (b)(6), the spending exceptions apply to a pooled financing issue as a whole, rather than to each loan separately.

(ii) *Election to apply spending exceptions separately to each loan—(A) In general.* At the election (made on or before the issue date) of the issuer of a pooled financing issue, the spending exceptions are applied separately to each conduit loan, and the applicable spending requirements for a loan begin on the earlier of the date the loan is made, or the first day following the 1-year period beginning on the issue date of the pooled financing issue. If this election is made, the rebate requirement applies to, and none of the spending exceptions are available for, gross proceeds of the pooled financing bonds before the date on which the spending requirements for those proceeds begin.

(B) *Application of spending exceptions.* If the issuer makes the election under this paragraph (b)(6)(ii), the rebate requirement is satisfied for proceeds used to finance a particular conduit loan to the extent that the loan satisfies a spending exception or the small issuer exception under §1.148-8, regardless of whether any other conduit loans allocable to the issue satisfy such an exception. A pooled financing issue is an issue of arbitrage bonds, however, unless the entire issue satisfies the requirements of section 148. An issuer may pay rebate for some conduit loans and 1½ percent penalty for other conduit loans from the same pooled financing issue. The 1½ percent penalty is computed separately for each conduit loan.

(C) *Elections under 2-year exception.* If the issuer makes the election under this paragraph (b)(6)(ii), the issuer may make all elections under the 2-year exception separately for each loan. Elections regarding a loan that otherwise must be made by the issuer on or before the issue date instead may be made on or before the date the loan is

made (but not later than 1 year after the issue date).

(D) *Example.* The operation of this paragraph (b)(6) is illustrated by the following example:

*Example.* Pooled financing issue. On January 1, 1994, Authority *J* issues bonds. As of the issue date, *J* reasonably expects to use the proceeds of the issue to make loans to City *K*, County *L*, and City *M*. *J* does not reasonably expect to use more than 75 percent of the available construction proceeds of the issue for construction expenditures. On or before the issue date, *J* elects to apply the spending exceptions separately for each loan, with spending requirements beginning on the earlier of the date the loan is made or the first day following the 1-year period beginning on the issue date. On February 1, 1994, *J* loans a portion of the proceeds to *K*, and *K* reasonably expects that 45 percent of those amounts will be used for construction expenditures. On the date this loan is made, *J* elects under paragraph (j) of this section to treat 60 percent of the amount loaned to *K* as a separate construction issue, and also elects the 1½ percent penalty under paragraph (k) of this section for the separate construction issue. On March 1, 1994, *J* loans a portion of the proceeds to *L*, and *L* reasonably expects that more than 75 percent of those amounts will be used for construction expenditures. On March 1, 1995, *J* loans the remainder of the proceeds to *M*, and none of those amounts will be used for construction expenditures. *J* must satisfy the rebate requirement for all gross proceeds before those amounts are loaned. For the loan to *K*, the spending periods begin on February 1, 1994, and the 1½ percent penalty must be paid for any failure to meet a spending requirement for the portion of the loan to *K* that is treated as a separate construction issue. Rebate must be paid on the remaining portion of the loan to *K*, unless that portion qualifies for the 6-month exception. For the loan to *L*, the spending periods begin on March 1, 1994, and the rebate requirement must be satisfied unless the 6-month, 18-month, or the 2-year exception is satisfied with respect to those amounts. For the loan to *M*, the spending periods begin on January 2, 1995, and the rebate requirement must be satisfied for those amounts unless the 6-month or 18-month exception is satisfied.

(c) *6-month exception—(1) General rule.* An issue is treated as meeting the rebate requirement if—

(i) The gross proceeds (as modified by paragraph (c)(3) of this section) of the issue are allocated to expenditures for the governmental purposes of the issue within the 6-month period beginning on

the issue date (the *6-month spending period*); and

(ii) The rebate requirement is met for amounts not required to be spent within the 6-month spending period (excluding earnings on a bona fide debt service fund).

(2) *Additional period for certain bonds.* The 6-month spending period is extended for an additional 6 months in certain circumstances specified under section 148(f)(4)(B)(ii).

(3) *Amounts not included in gross proceeds.* For purposes of paragraph (c)(1)(i) of this section only, gross proceeds has the meaning used in § 1.148-1, except it does not include amounts—

- (i) In a bona fide debt service fund;
- (ii) In a reasonably required reserve or replacement fund (see § 1.148-7(b)(5));
- (iii) That, as of the issue date, are not reasonably expected to be gross proceeds but that become gross proceeds after the end of the 6-month spending period;
- (iv) Representing sale or investment proceeds derived from payments under any purpose investment of the issue; and
- (v) Representing repayments of grants (as defined in § 1.148-6(d)(4)) financed by the issue.

(4) *Series of refundings.* If a principal purpose of a series of refunding issues is to exploit the difference between taxable and tax-exempt interest rates by investing proceeds during the temporary periods provided in § 1.148-9(d), the 6-month spending period for all issues in the series begins on the issue date of the first issue in the series.

(d) *18-month exception—(1) General rule.* An issue is treated as meeting the rebate requirement if all of the following requirements are satisfied—

(i) *18-month expenditure schedule met.* The gross proceeds (as defined in paragraph (d)(3) of this section) are allocated to expenditures for a governmental purpose of the issue in accordance with the following schedule (the *18-month expenditure schedule*) measured from the issue date—

- (A) At least 15 percent within 6 months (the *first spending period*);
- (B) At least 60 percent within 12 months (the *second spending period*); and

(C) 100 percent within 18 months (the *third spending period*).

(ii) *Rebate requirement met for amounts not required to be spent.* The rebate requirement is met for all amounts not required to be spent in accordance with the 18-month expenditure schedule (other than earnings on a bona fide debt service fund).

(iii) *Issue qualifies for initial temporary period.* All of the gross proceeds (as defined in paragraph (d)(3)(i) of this section) of the issue qualify for the initial temporary period under § 1.148-2(e)(2).

(2) *Extension for reasonable retainage.* An issue does not fail to satisfy the spending requirement for the third spending period as a result of a reasonable retainage if the reasonable retainage is allocated to expenditures within 30 months of the issue date. Reasonable retainage has the meaning under paragraph (h) of this section, as modified to refer to net sale proceeds on the date 18 months after the issue date.

(3) *Gross proceeds*—(i) *Definition of gross proceeds.* For purposes of paragraph (d)(1) of this section only, *gross proceeds* means gross proceeds as defined in paragraph (c)(3) of this section, as modified to refer to “18 months” in paragraph (c)(3)(iii) of this section in lieu of “6 months.”

(ii) *Estimated earnings.* For purposes of determining compliance with the first two spending periods under paragraph (d)(1)(i) of this section, the amount of investment proceeds included in gross proceeds of the issue is determined based on the issuer’s reasonable expectations on the issue date.

(4) *Application to multipurpose issues.* This paragraph (d) does not apply to an issue any portion of which is treated as meeting the rebate requirement under paragraph (e) of this section (relating to the 2-year exception).

(e) *2-year exception*—(1) *General rule.* A construction issue is treated as meeting the rebate requirement for available construction proceeds if those proceeds are allocated to expenditures for governmental purposes of the issue in accordance with the following schedule (the *2-year expenditure schedule*), measured from the issue date—

(i) At least 10 percent within 6 months (the *first spending period*);

(ii) At least 45 percent within 1 year (the *second spending period*);

(iii) At least 75 percent within 18 months (the *third spending period*); and

(iv) 100 percent within 2 years (the *fourth spending period*).

(2) *Extension for reasonable retainage.* An issue does not fail to satisfy the spending requirement for the fourth spending period as a result of unspent amounts for reasonable retainage (as defined in paragraph (h) of this section) if those amounts are allocated to expenditures within 3 years of the issue date.

(3) *Definitions.* For purposes of the 2-year exception, the following definitions apply:

(i) *Real property* means land and improvements to land, such as buildings or other inherently permanent structures, including interests in real property. For example, real property includes wiring in a building, plumbing systems, central heating or air-conditioning systems, pipes or ducts, elevators, escalators installed in a building, paved parking areas, roads, wharves and docks, bridges, and sewage lines.

(ii) *Tangible personal property* means any tangible property other than real property, including interests in tangible personal property. For example, tangible personal property includes machinery that is not a structural component of a building, subway cars, fire trucks, automobiles, office equipment, testing equipment, and furnishings.

(iii) *Substantially completed.* Construction may be treated as substantially completed when the issuer abandons construction or when at least 90 percent of the total costs of the construction reasonably expected, as of that date, to be financed with the available construction proceeds have been allocated to expenditures.

(f) *Construction issue*—(1) *Definition.* *Construction issue* means any issue that is not a refunding issue if—

(i) The issuer reasonably expects, as of the issue date, that at least 75 percent of the available construction proceeds of the issue will be allocated to construction expenditures (as defined in paragraph (g) of this section) for

property owned by a governmental unit or a 501(c)(3) organization; and

(ii) Any private activity bonds that are part of the issue are qualified 501(c)(3) bonds or private activity bonds issued to finance property to be owned by a governmental unit or a 501(c)(3) organization.

(2) *Use of actual facts.* For the provisions of paragraphs (e) through (m) of this section that apply based on the issuer's reasonable expectations, an issuer may elect on or before the issue date to apply all of those provisions based on actual facts, except that this election does not apply for purposes of determining whether an issue is a construction issue under paragraph (f)(1) of this section if the 1½ percent penalty election is made under paragraph (k) of this section.

(3) *Ownership requirement*—(i) *In general.* A governmental unit or 501(c)(3) organization is treated as the owner of property if it would be treated as the owner for Federal income tax purposes. For obligations issued on behalf of a State or local governmental unit, the entity that actually issues the bonds is treated as a governmental unit.

(ii) *Safe harbor for leases and management contracts.* Property leased by a governmental unit or a 501(c)(3) organization is treated as owned by the governmental unit or 501(c)(3) organization if the lessee complies with the requirements of section 142(b)(1)(B). For a bond described in section 142(a)(6), the requirements of section 142(b)(1)(B) apply as modified by section 146(h)(2).

(g) *Construction expenditures*—(1) *Definition.* Except as otherwise provided, *construction expenditures* means capital expenditures (as defined in § 1.150-1) that are allocable to the cost of real property or constructed personal property (as defined in paragraph (g)(3) of this section). Except as provided in paragraph (g)(2) of this section, construction expenditures do not include expenditures for acquisitions of interests in land or other existing real property.

(2) *Certain acquisitions under turnkey contracts treated as construction expenditures.* Expenditures are not for the acquisition of an interest in existing real property other than land if the contract between the seller and the issuer

requires the seller to build or install the property (e.g., a *turnkey contract*), but only to the extent that the property has not been built or installed at the time the parties enter into the contract.

(3) *Constructed personal property.* *Constructed personal property* means tangible personal property (or, if acquired pursuant to a single acquisition contract, properties) or specially developed computer software if—

(i) A substantial portion of the property or properties is completed more than 6 months after the earlier of the date construction or rehabilitation commenced and the date the issuer entered into an acquisition contract;

(ii) Based on the reasonable expectations of the issuer, if any, or representations of the person constructing the property, with the exercise of due diligence, completion of construction or rehabilitation (and delivery to the issuer) could not have occurred within that 6-month period; and

(iii) If the issuer itself builds or rehabilitates the property, not more than 75 percent of the capitalizable cost is attributable to property acquired by the issuer (e.g., components, raw materials, and other supplies).

(4) *Specially developed computer software.* *Specially developed computer software* means any programs or routines used to cause a computer to perform a desired task or set of tasks, and the documentation required to describe and maintain those programs, provided that the software is specially developed and is functionally related and subordinate to real property or other constructed personal property.

(5) *Examples.* The operation of this paragraph (g) is illustrated by the following examples:

*Example 1. Purchase of construction materials.* City A issues bonds to finance a new office building. A uses proceeds of the bonds to purchase materials to be used in constructing the building, such as bricks, pipes, wires, lighting, carpeting, heating equipment, and similar materials. Expenditures by A for the construction materials are construction expenditures because those expenditures will be capitalizable to the cost of the building upon completion, even though they are not initially capitalizable to the cost of existing real property. This result would be the same if A hires a third-party to perform

the construction, unless the office building is partially constructed at the time that *A* contracts to purchase the building.

*Example 2. Turnkey contract.* City *B* issues bonds to finance a new office building. *B* enters into a turnkey contract with developer *D* under which *D* agrees to provide *B* with a completed building on a specified completion date on land currently owned by *D*. Under the agreement, *D* holds title to the land and building and assumes any risk of loss until the completion date, at which time title to the land and the building will be transferred to *B*. No construction has been performed by the date that *B* and *D* enter into the agreement. All payments by *B* to *D* for construction of the building are construction expenditures because all the payments are properly capitalized to the cost of the building, but payments by *B* to *D* allocable to the acquisition of the land are not construction expenditures.

*Example 3. Right-of-way.* *P*, a public agency, issues bonds to finance the acquisition of a right-of-way and the construction of sewage lines through numerous parcels of land. The right-of-way is acquired primarily through *P*'s exercise of its powers of eminent domain. As of the issue date, *P* reasonably expects that it will take approximately 2 years to acquire the entire right-of-way because of the time normally required for condemnation proceedings. No expenditures for the acquisition of the right-of-way are construction expenditures because they are costs incurred to acquire an interest in existing real property.

*Example 4. Subway cars.* City *C* issues bonds to finance new subway cars. *C* reasonably expects that it will take more than 6 months for the subway cars to be constructed to *C*'s specifications. The subway cars are constructed personal property. Alternatively, if the builder of the subway cars informs *C* that it will only take 3 months to build the subway cars to *C*'s specifications, no payments for the subway cars are construction expenditures.

*Example 5. Fractional interest in property.* *U*, a public agency, issues bonds to finance an undivided fractional interest in a newly constructed power-generating facility. *U* contributes its ratable share of the cost of building the new facility to the project manager for the facility. *U*'s contributions are construction expenditures in the same proportion that the total expenditures for the facility qualify as construction expenditures.

*Example 6. Park land.* City *D* issues bonds to finance the purchase of unimproved land and the cost of subsequent improvements to the land, such as grading and landscaping, necessary to transform it into a park. The costs of the improvements are properly capitalizable to the cost of the land, and therefore, are construction expenditures, but

expenditures for the acquisition of the land are not.

(h) *Reasonable retainage definition.* *Reasonable retainage* means an amount, not to exceed 5 percent of available construction proceeds as of the end of the fourth spending period, that is retained for reasonable business purposes relating to the property financed with the proceeds of the issue. For example, a reasonable retainage may include a retention to ensure or promote compliance with a construction contract in circumstances in which the retained amount is not yet payable, or in which the issuer reasonably determines that a dispute exists regarding completion or payment.

(i) *Available construction proceeds*—(1) *Definition in general.* *Available construction proceeds* has the meaning used in section 148(f)(4)(C)(vi). For purposes of this definition, earnings include earnings on any tax-exempt bond. Pre-issuance accrued interest and earnings thereon may be disregarded. Amounts that are not gross proceeds as a result of the application of the universal cap under § 1.148-6(b)(2) are not available construction proceeds.

(2) *Earnings on a reasonably required reserve or replacement fund.* Earnings on any reasonably required reserve or replacement fund are available construction proceeds only to the extent that those earnings accrue before the earlier of the date construction is substantially completed or the date that is 2 years after the issue date. An issuer may elect on or before the issue date to exclude from available construction proceeds the earnings on such a fund. If the election is made, the rebate requirement applies to the excluded amounts from the issue date.

(3) *Reasonable expectations test for future earnings.* For purposes of determining compliance with the spending requirements as of the end of each of the first three spending periods, available construction proceeds include the amount of future earnings that the issuer reasonably expected as of the issue date.

(4) *Issuance costs.* Available construction proceeds do not include gross proceeds used to pay issuance costs financed by an issue, but do include

earnings on such proceeds. Thus, an expenditure of gross proceeds of an issue for issuance costs does not count toward meeting the spending requirements. The expenditure of earnings on gross proceeds used to pay issuance costs does count toward meeting those requirements. If the spending requirements are met and the proceeds used to pay issuance costs are expended by the end of the fourth spending period, those proceeds and the earnings thereon are treated as having satisfied the rebate requirement.

(5) *One and one-half percent penalty in lieu of arbitrage rebate.* For purposes of the spending requirements of paragraph (e) of this section, available construction proceeds as of the end of any spending period are reduced by the amount of penalty in lieu of arbitrage rebate (under paragraph (k) of this section) that the issuer has paid from available construction proceeds before the last day of the spending period.

(6) *Payments on purpose investments and repayments of grants.* Available construction proceeds do not include—

(i) Sale or investment proceeds derived from payments under any purpose investment of the issue; or

(ii) Repayments of grants (as defined in § 1.148-6(d)(4)) financed by the issue.

(7) *Examples.* The operation of this paragraph (i) is illustrated by the following examples:

*Example 1. Treatment of investment earnings.* City F issues bonds having an issue price of \$10,000,000. F deposits all of the proceeds of the issue into a construction fund to be used for expenditures other than costs of issuance. F estimates on the issue date that, based on reasonably expected expenditures and rates of investment, earnings on the construction fund will be \$800,000. As of the issue date and the end of each of the first three spending periods, the amount of available construction proceeds is \$10,800,000. To qualify as a construction issue, F must reasonably expect on the issue date that at least \$8,100,000 (75 percent of \$10,800,000) will be used for construction expenditures. In order to meet the 10 percent spending requirement at the end of the first spending period, F must spend at least \$1,080,000. As of the end of the fourth spending period, F has received \$1,100,000 in earnings. In order to meet the spending requirement at the end of the fourth spending period, however, F must spend all of the \$11,100,000 of actual available construction proceeds (except for reasonable retainage not exceeding \$555,000).

*Example 2. Treatment of investment earnings without a reserve fund.* City G issues bonds having an issue price of \$11,200,000. G does not elect to exclude earnings on the reserve fund from available construction proceeds. G uses \$200,000 of proceeds to pay issuance costs and deposits \$1,000,000 of proceeds into a reasonably required reserve fund. G deposits the remaining \$10,000,000 of proceeds into a construction fund to be used for construction expenditures. On the issue date, G reasonably expects that, based on the reasonably expected date of substantial completion and rates of investment, total earnings on the construction fund will be \$800,000, and total earnings on the reserve fund to the date of substantial completion will be \$150,000. G reasonably expects that substantial completion will occur during the fourth spending period. As of the issue date, the amount of available construction proceeds is \$10,950,000 (\$10,000,000 originally deposited into the construction fund plus \$800,000 expected earnings on the construction fund and \$150,000 expected earnings on the reserve fund). To qualify as a construction issue, G must reasonably expect on the issue date that at least \$8,212,500 will be used for construction expenditures.

*Example 3. Election to exclude earnings on a reserve fund.* The facts are the same as *Example 2*, except that G elects on the issue date to exclude earnings on the reserve fund from available construction proceeds. The amount of available construction proceeds as of the issue date is \$10,800,000.

(j) *Election to treat portion of issue used for construction as separate issue—(1) In general.* For purposes of paragraph (e) of this section, if any proceeds of an issue are to be used for construction expenditures, the issuer may elect on or before the issue date to treat the portion of the issue that is not a refunding issue as two, and only two, separate issues, if—

(i) One of the separate issues is a construction issue as defined in paragraph (f) of this section;

(ii) The issuer reasonably expects, as of the issue date, that this construction issue will finance all of the construction expenditures to be financed by the issue; and

(iii) The issuer makes an election to apportion the issue under this paragraph (j)(1) in which it identifies the amount of the issue price of the issue allocable to the construction issue.

(2) *Example.* The operation of this paragraph (j) is illustrated by the following example.

*Example.* City *D* issues bonds having an issue price of \$19,000,000. On the issue date, *D* reasonably expects to use \$10,800,000 of bond proceeds (including investment earnings) for construction expenditures for the project being financed. *D* deposits \$10,000,000 in a construction fund to be used for construction expenditures and \$9,000,000 in an acquisition fund to be used for acquisition of equipment not qualifying as construction expenditures. *D* estimates on the issue date, based on reasonably expected expenditures and rates of investment, that total earnings on the construction fund will be \$800,000 and total earnings on the acquisition fund will be \$200,000. Because the total construction expenditures to be financed by the issue are expected to be \$10,800,000, the maximum available construction proceeds for a construction issue is \$14,400,000 (\$10,800,000 divided by 0.75). To determine the maximum amount of the issue price allocable to a construction issue, the estimated investment earnings allocable to the construction issue are subtracted. The entire \$800,000 of earnings on the construction fund are allocable to the construction issue. Only a portion of the \$200,000 of earnings on the acquisition fund, however, are allocable to the construction issue. The total amount of the available construction proceeds that is expected to be used for acquisition is \$3,600,000 (\$14,400,000 – \$10,800,000). The portion of earnings on the acquisition fund that is allocable to the construction issue is \$78,261 ( $\$200,000 \times \$3,600,000 / \$9,200,000$ ). Accordingly, *D* may elect on or before the issue date to treat up to \$13,521,739 of the issue price as a construction issue (\$14,400,000 – \$800,000 – \$78,261). *D*'s election must specify the amount of the issue price treated as a construction issue. The balance of the issue price is treated as a separate nonconstruction issue that is subject to the rebate requirement unless it meets another exception to arbitrage rebate. Because the financing of a construction issue is a separate governmental purpose under § 1.148-9(h), the election causes the issue to be a multipurpose issue under that section.

(k) *One and one-half percent penalty in lieu of arbitrage rebate*—(1) *In general.* Under section 148(f)(4)(C)(vii), an issuer of a construction issue may elect on or before the issue date to pay a penalty (the *1½ percent penalty*) to the United States in lieu of the obligation to pay the rebate amount on available construction proceeds upon failure to satisfy the spending requirements of paragraph (e) of this section. The *1½ percent penalty* is calculated separately for each spending period, including each semiannual period after the end of the fourth spending period, and is equal

to 1.5 percent times the underexpended proceeds as of the end of the spending period. For each spending period, underexpended proceeds equal the amount of available construction proceeds required to be spent by the end of the spending period, less the amount actually allocated to expenditures for the governmental purposes of the issue by that date. The *1½ percent penalty* must be paid to the United States no later than 90 days after the end of the spending period to which it relates. The *1½ percent penalty* continues to apply at the end of each spending period and each semiannual period thereafter until the earliest of the following—

- (i) The termination of the penalty under paragraph (1) of this section;
- (ii) The expenditure of all of the available construction proceeds; or
- (iii) The last stated final maturity date of bonds that are part of the issue and any bonds that refund those bonds.

(2) *Application to reasonable retainage.* If an issue meets the exception for reasonable retainage except that all retainage is not spent within 3 years of the issue date, the issuer must pay the *1½ percent penalty* to the United States for any reasonable retainage that was not so spent as of the close of the 3-year period and each later spending period.

(3) *Coordination with rebate requirement.* The rebate requirement is treated as met with respect to available construction proceeds for a period if the *1½ percent penalty* is paid in accordance with this section.

(1) *Termination of 1½ percent penalty*—(1) *Termination after initial temporary period.* The issuer may terminate the *1½ percent penalty* after the initial temporary period (a *section 148(f)(4)(C)(viii) penalty termination*) if—

- (i) Not later than 90 days after the earlier of the end of the initial temporary period or the date construction is substantially completed, the issuer elects to terminate the *1½ percent penalty*; provided that solely for this purpose, the initial temporary period may be extended by the issuer to a date ending 5 years after the issue date;

- (ii) Within 90 days after the end of the initial temporary period, the issuer pays a penalty equal to 3 percent of the

unexpended available construction proceeds determined as of the end of the initial temporary period, multiplied by the number of years (including fractions of years computed to 2 decimal places) in the initial temporary period;

(iii) For the period beginning as of the close of the initial temporary period, the unexpended available construction proceeds are not invested in higher yielding investments; and

(iv) On the earliest date on which the bonds may be called or otherwise redeemed, with or without a call premium, the unexpended available construction proceeds as of that date (not including any amount earned after the date on which notice of the redemption was required to be given) must be used to redeem the bonds. Amounts used to pay any call premium are treated as used to redeem bonds. This redemption requirement may be met by purchases of bonds by the issuer on the open market at prices not exceeding fair market value. A portion of the annual principal payment due on serial bonds of a construction issue may be paid from the unexpended amount, but only in an amount no greater than the amount that bears the same ratio to the annual principal due that the total unexpended amount bears to the issue price of the construction issue.

(2) *Termination before end of initial temporary period.* If the construction to be financed by the construction issue is substantially completed before the end of the initial temporary period, the issuer may elect to terminate the 1½ percent penalty before the end of the initial temporary period (a *section 148(f)(4)(C)(ix) penalty termination*) if—

(i) Before the close of the initial temporary period and not later than 90 days after the date the construction is substantially completed, the issuer elects to terminate the 1½ percent penalty;

(ii) The election identifies the amount of available construction proceeds that will not be spent for the governmental purposes of the issue; and

(iii) The issuer has met all of the conditions for a *section 148(f)(4)(C)(viii) penalty termination*, applied as if the initial temporary period ended as of the date the required election for a sec-

tion *148(f)(4)(C)(ix) penalty termination* is made. That penalty termination election satisfies the required election for a *section 148(f)(4)(C)(viii) termination*.

(3) *Application to reasonable retainage.* Solely for purposes of determining whether the conditions for terminating the 1½ percent penalty are met, reasonable retainage may be treated as spent for a governmental purpose of the construction issue. Reasonable retainage that is so treated continues to be subject to the 1½ percent penalty.

(4) *Example.* The operation of this paragraph (1) is illustrated by the following example.

*Example.* City *I* issues a construction issue having a 20-year maturity and qualifying for a 3-year initial temporary period. The bonds are first subject to optional redemption 10 years after the issue date at a premium of 3 percent. *I* elects, on or before the issue date, to pay the 1½ percent penalty in lieu of arbitrage rebate. At the end of the 3-year temporary period, the project is not substantially completed, and \$1,500,000 of available construction proceeds of the issue are unspent. At that time, *I* reasonably expects to need \$500,000 to complete the project. *I* may terminate the 1½ percent penalty in lieu of arbitrage rebate with respect to the excess \$1,500,000 by electing to terminate within 90 days of the end of the initial temporary period; paying a penalty to the United States of \$135,000 (3 percent of \$1,500,000 multiplied by 3 years); restricting the yield on the investment of unspent available construction proceeds for 7 years until the first call date, although any portion of these proceeds may still be spent on the project prior to that call date; and using the available construction proceeds that, as of the first call date, have not been allocated to expenditures for the governmental purposes of the issue to redeem bonds on that call date. If *I* fails to make the termination election, *I* is required to pay the 1½ percent penalty on unspent available construction proceeds every 6 months until the latest maturity date of bonds of the issue (or any bonds of another issue that refund such bonds).

(m) *Payment of penalties.* Each penalty payment under this section must be paid in the manner provided in § 1.148-3(g). See § 1.148-3(h) for rules on failures to pay penalties under this section.

[T.D. 8476, 58 FR 33535, June 18, 1993; 58 FR 44452, Aug. 23, 1993]

**§ 1.148-8 Small issuer exception to rebate requirement.**

(a) *Scope.* Under section 148(f)(4)(D), bonds issued to finance governmental activities of certain small issuers are treated as meeting the arbitrage rebate requirement of section 148(f)(2) (the “small issuer exception”). This section provides guidance on the small issuer exception.

(b) *General taxing powers.* The small issuer exception generally applies only to bonds issued by governmental units with general taxing powers. A governmental unit has general taxing powers if it has the power to impose taxes (or to cause another entity to impose taxes) of general applicability which, when collected, may be used for the general purposes of the issuer. The taxing power may be limited to a specific type of tax, provided that the applicability of the tax is not limited to a small number of persons. The governmental unit’s exercise of its taxing power may be subject to procedural limitations, such as voter approval requirements, but may not be contingent on approval by another governmental unit. See, also, section 148(f)(4)(D)(iv).

(c) *Size limitation*—(1) *In general.* An issue (other than a refunding issue) qualifies for the small issuer exception only if the issuer reasonably expects, as of the issue date, that the aggregate face amount of all tax-exempt bonds (other than private activity bonds) issued by it during that calendar year will not exceed \$5,000,000; or the aggregate face amount of all tax-exempt bonds of the issuer (other than private activity bonds) actually issued during that calendar year does not exceed \$5,000,000. For this purpose, if an issue has more than a de minimis amount of original issue discount or premium, *aggregate face amount* means the aggregate issue price of that issue (determined without regard to pre-issuance accrued interest).

(2) *Aggregation rules.* The following aggregation rules apply for purposes of applying the \$5,000,000 size limitation under paragraph (c)(1) of this section.

(i) *On-behalf-of issuers.* An issuer and all entities (other than political subdivisions) that issue bonds on behalf of that issuer are treated as one issuer.

(ii) *Subordinate entities*—(A) *In general.* Except as otherwise provided in paragraph (d) of this section and section 148(f)(4)(D)(iv), all bonds issued by a subordinate entity are also treated as issued by each entity to which it is subordinate. An issuer is subordinate to another governmental entity if it is directly or indirectly controlled by the other entity within the meaning of § 1.150-1(e).

(B) *Exception for allocations of size limitation.* If an entity properly makes an allocation of a portion of its \$5,000,000 size limitation to a subordinate entity (including an on behalf of issuer) under section 148(f)(4)(D)(iv), the portion of bonds issued by the subordinate entity under the allocation is treated as issued only by the allocating entity and not by any other entity to which the issuing entity is subordinate. These allocations are irrevocable and must bear a reasonable relationship to the benefits received by the allocating unit from issues issued by the subordinate entity. The benefits to be considered include the manner in which—

- (1) Proceeds are to be distributed;
- (2) The debt service is to be paid;
- (3) The facility financed is to be owned;
- (4) The use or output of the facility is to be shared; and
- (5) Costs of operation and maintenance are to be shared.

(iii) *Avoidance of size limitation.* An entity formed or availed of to avoid the purposes of the \$5,000,000 size limitation and all entities that would benefit from the avoidance are treated as one issuer. Situations in which an entity is formed or availed of to avoid the purposes of the \$5,000,000 size limitation include those in which the issuer—

(A) Issues bonds which, but for the \$5,000,000 size limitation, would have been issued by another entity; and

(B) Does not receive a substantial benefit from the project financed by the bonds.

(3) *Certain refunding bonds not taken into account.* In applying the \$5,000,000 size limitation, there is not taken into account the portion of an issue that is a current refunding issue to the extent that the stated principal amount of the refunding bond does not exceed the portion of the outstanding stated principal

amount of the refunded bond paid with proceeds of the refunding bond. For this purpose, *principal amount* means, in reference to a plain par bond, its stated principal amount plus accrued unpaid interest, and in reference to any other bond, its present value.

(d) *Pooled financings*—(1) *Treatment of pool issuer*. To the extent that an issuer of a pooled financing is not an ultimate borrower in the financing and the conduit borrowers are governmental units with general taxing powers and not subordinate to the issuer, the pooled financing is not counted towards the \$5,000,000 size limitation of the issuer for purposes of applying the small issuer exception to its other issues. The issuer of the pooled financing issue is, however, subject to the rebate requirement for any unloaned gross proceeds.

(2) *Treatment of conduit borrowers*. A loan to a conduit borrower in a pooled financing qualifies for the small issuer exception, regardless of the size of either the pooled financing or of any loan to other conduit borrowers, only if—

- (i) The bonds of the pooled financing are not private activity bonds;
- (ii) None of the loans to conduit borrowers are private activity bonds; and
- (iii) The loan to the conduit borrower meets all the requirements of the small issuer exception.

(e) *Refunding issues*—(1) *In general*. Sections 148(f)(4)(D) (v) and (vi) provide restrictions on application of the small issuer exception to refunding issues.

(2) *Multipurpose issues*. The multipurpose issue allocation rules of § 1.148-9(h) apply for purposes of determining whether refunding bonds meet the requirements of section 148(f)(4)(D)(v).

[T.D. 8476, 58 FR 33540, June 18, 1993]

**§ 1.148-9 Arbitrage rules for refunding issues.**

(a) *Scope of application*. This section contains special arbitrage rules for refunding issues. These rules apply for all purposes of section 148 and govern allocations of proceeds, bonds, and investments to determine transferred proceeds, temporary periods, reasonably required reserve or replacement funds, minor portions, and separate issue

treatment of certain multipurpose issues.

(b) *Transferred proceeds allocation rule*—(1) *In general*. When proceeds of the refunding issue discharge any of the outstanding principal amount of the prior issue, proceeds of the prior issue become transferred proceeds of the refunding issue and cease to be proceeds of the prior issue. The amount of proceeds of the prior issue that becomes transferred proceeds of the refunding issue is an amount equal to the proceeds of the prior issue on the date of that discharge multiplied by a fraction—

(i) The numerator of which is the principal amount of the prior issue discharged with proceeds of the refunding issue on the date of that discharge; and

(ii) The denominator of which is the total outstanding principal amount of the prior issue on the date immediately before the date of that discharge.

(2) *Special definition of principal amount*. For purposes of this section, *principal amount* means, in reference to a plain par bond, its stated principal amount, and in reference to any other bond, its present value.

(3) *Relation of transferred proceeds rule to universal cap rule*—(i) *In general*. Paragraphs (b)(1) and (c) of this section apply to allocate transferred proceeds and corresponding investments to a refunding issue on any date required by those paragraphs before the application of the universal cap rule of § 1.148-6(b)(2) to reallocate any of those amounts. To the extent nonpurpose investments allocable to proceeds of a refunding issue exceed the universal cap for the issue on the date that amounts become transferred proceeds of the refunding issue, those transferred proceeds and corresponding investments are reallocated back to the issue from which they transferred on that same date to the extent of the unused universal cap on that prior issue.

(ii) *Example*. The following example illustrates the application of this paragraph of (b)(3):

*Example*. On January 1, 1995, \$100,000 of nonpurpose investments allocable to proceeds of issue A become transferred proceeds of issue B under § 1.148-9, but the unused portion of issue B's universal cap is \$75,000 as of

that date. On January 1, 1995, issue A has unused universal cap in excess of \$25,000. Thus, \$25,000 of nonpurpose investments representing the transferred proceeds are immediately reallocated back to issue A on January 1, 1995, and are proceeds of issue A. On the next transfer date under § 1.148-9, the \$25,000 receives no priority in determining transferred proceeds as of that date but is treated the same as all other proceeds of issue A subject to transfer.

(4) *Limitation on multi-generational transfers.* This paragraph (b)(4) contains limitations on the manner in which proceeds of a first generation issue that is refunded by a refunding issue (a *second generation issue*) become transferred proceeds of a refunding issue (a *third generation issue*) that refunds the second generation issue. Proceeds of the first generation issue that become transferred proceeds of the third generation issue are treated as having a yield equal to the yield on the refunding escrow allocated to the second generation issue (*i.e.*, as determined under § 1.148-5(b)(2)(iv)). The determination of the transferred proceeds of the third generation issue does not affect compliance with the requirements of section 148, including the determination of the amount of arbitrage rebate with respect to or the yield on the refunding escrow, of the second generation issue.

(c) *Special allocation rules for refunding issues*—(1) *Allocations of investments*—(i) *In general.* Except as otherwise provided in this paragraph (c), investments purchased with sale proceeds or investment proceeds of a refunding issue must be allocated to those proceeds, and investments not purchased with those proceeds may not be allocated to those proceeds (*i.e.*, a *specific tracing method*).

(ii) *Allocations to transferred proceeds.* When proceeds of a prior issue become transferred proceeds of a refunding issue, investments (and the related payments and receipts) of proceeds of the prior issue that are held in a refunding escrow for another issue are allocated to the transferred proceeds under the ratable allocation method described in paragraph (c)(1)(iii) of this section. Investments of proceeds of the prior issue that are not held in a refunding escrow for another issue are allocated to the transferred proceeds by application of the allocation methods

described in paragraph (c)(1) (iii) or (iv) of this section, consistently applied to all investments on a transfer date.

(iii) *Ratable allocation method.* Under the ratable allocation method, a ratable portion of each nonpurpose and purpose investment of proceeds of the prior issue is allocated to transferred proceeds of the refunding issue.

(iv) *Representative allocation method*—(A) *In general.* Under the representative allocation method, representative portions of the portfolio of nonpurpose investments and the portfolio of purpose investments of proceeds of the prior issue are allocated to transferred proceeds of the refunding issue. Unlike the ratable allocation method, this representative allocation method permits an allocation of particular whole investments. Whether a portion is representative is based on all the facts and circumstances, including, without limitation, whether the current yields, maturities, and current unrealized gains or losses on the particular allocated investments are reasonably comparable to those of the unallocated investments in the aggregate. In addition, if a portion of nonpurpose investments is otherwise representative, it is within the issuer's discretion to allocate the portion from whichever source of funds it deems appropriate, such as a reserve fund or a construction fund for a prior issue.

(B) *Mark-to-market safe harbor for representative allocation method.* In addition to other representative allocations, a specific allocation of a particular nonpurpose investment to transferred proceeds (*e.g.*, of lower yielding investments) is treated as satisfying the representative allocation method if that investment is valued at fair market value on the transfer date in determining the payments and receipts on that date, but only if the portion of the nonpurpose investments that transfers is based on the relative fair market value of all nonpurpose investments.

(2) *Allocations of mixed escrows to expenditures for principal, interest, and redemption prices on a prior issue*—(i) *In general.* Except for amounts required or permitted to be accounted for under paragraph (c)(2)(ii) of this section, proceeds of a refunding issue and other

amounts that are not proceeds of a refunding issue that are deposited in a refunding escrow (a *mixed escrow*) must be accounted for under this paragraph (c)(2)(i). Those proceeds and other amounts must be allocated to expenditures for principal, interest, or stated redemption prices on the prior issue so that the expenditures of those proceeds do not occur faster than ratably with expenditures of the other amounts in the mixed escrow. During the period that the prior issue has unspent proceeds, however, these allocations must be ratable (with reasonable adjustments for rounding) both between sources for expenditures (*i.e.*, proceeds and other amounts) and between uses (*i.e.*, principal, interest, and stated redemption prices on the prior issue).

(ii) *Exceptions—(A) Mandatory allocation of certain non-proceeds to earliest expenditures.* If amounts other than proceeds of the refunding issue are deposited in a mixed escrow, but before the issue date of the refunding issue those amounts had been held in a bona fide debt service fund or a fund to carry out the governmental purpose of the prior issue (e.g., a construction fund), those amounts must be allocated to the earliest maturing investments in the mixed escrow.

(B) *Permissive allocation of non-proceeds to earliest expenditures.* Excluding amounts covered by paragraph (c)(2)(ii)(A) of this section and subject to any required earlier expenditure of those amounts, any amounts in a mixed escrow that are not proceeds of a refunding issue may be allocated to the earliest maturing investments in the mixed escrow, provided that those investments mature and the proceeds thereof are expended before the date of any expenditure from the mixed escrow to pay any principal of the prior issue.

(d) *Temporary periods in refundings—(1) In general.* Proceeds of a refunding issue may be invested in higher yielding investments under section 148(c) only during the temporary periods described in paragraph (d)(2) of this section.

(2) *Types of temporary periods in refundings.* The available temporary periods for proceeds of a refunding issue are as follows:

(i) *General temporary period for refunding issues.* Except as otherwise provided in this paragraph (d)(2), the temporary period for proceeds (other than transferred proceeds) of a refunding issue is the period ending 30 days after the issue date of the refunding issue.

(ii) *Temporary periods for current refunding issues—(A) In general.* Except as otherwise provided in paragraph (d)(2)(ii)(B) of this section, the temporary period for proceeds (other than transferred proceeds) of a current refunding issue is 90 days.

(B) *Temporary period for short-term current refunding issues.* The temporary period for proceeds (other than transferred proceeds) of a current refunding issue that has an original term to maturity of 270 days or less may not exceed 30 days. The aggregate temporary periods for proceeds (other than transferred proceeds) of all current refunding issues described in the preceding sentence that are part of the same series of refundings is 90 days. An issue is part of a series of refundings if it finances or refinances the same expenditures for a particular governmental purpose as another issue.

(iii) *Temporary periods for transferred proceeds—(A) In general.* Except as otherwise provided in paragraph (d)(2)(iii)(B) of this section, each available temporary period for transferred proceeds of a refunding issue begins on the date those amounts become transferred proceeds of the refunding issue and ends on the date that, without regard to the discharge of the prior issue, the available temporary period for those proceeds would have ended had those proceeds remained proceeds of the prior issue.

(B) *Termination of initial temporary period for prior issue in an advance refunding.* The initial temporary period under § 1.148-2(e) (2) and (3) for the proceeds of a prior issue that is refunded by an advance refunding issue (including transferred proceeds) terminates on the issue date of the advance refunding issue.

(iv) *Certain short-term gross proceeds.* Except for proceeds of a refunding issue held in a refunding escrow, proceeds otherwise reasonably expected to be used to pay principal or interest on the prior issue, replacement proceeds not

held in a bona fide debt service fund, and transferred proceeds, the temporary period for gross proceeds of a refunding issue is the 13-month period beginning on the date of receipt.

(e) *Reasonably required reserve or replacement funds in refundings.* In addition to the requirements of § 1.148-2(f), beginning on the issue date of a refunding issue, a reserve or replacement fund for a refunding issue or a prior issue is a reasonably required reserve or replacement fund under section 148(d) that may be invested in higher yielding investments only if the aggregate amount invested in higher yielding investments under this paragraph (e) for both the refunding issue and the prior issue does not exceed the size limitations under § 1.148-2 (f)(2) and (f)(3), measured by reference to the refunding issue only (regardless of whether proceeds of the prior issue have become transferred proceeds of the refunding issue).

(f) *Minor portions in refundings.* Beginning on the issue date of the refunding issue, gross proceeds not in excess of a minor portion of the refunding issue qualify for investment in higher yielding investments under section 148(e), and gross proceeds not in excess of a minor portion of the prior issue qualify for investment in higher yielding investments under either section 148(e) or section 149(d)(3)(A)(v), whichever is applicable. *Minor portion* is defined in § 1.148-2(g).

(g) *Certain waivers permitted.* On or before the issue date, an issuer may waive the right to invest in higher yielding investments during any temporary period or as part of a reasonably required reserve or replacement fund. At any time, an issuer may waive the right to invest in higher yielding investments as part of a minor portion.

(h) *Multipurpose issue allocations—(1) Application of multipurpose issue allocation rules.* The portion of the bonds of a multipurpose issue reasonably allocated to any separate purpose under this paragraph (h) is treated as a separate issue for all purposes of section 148 except the following—

(i) *Arbitrage yield.* Except to the extent that the proceeds of an issue are allocable to two or more conduit loans that are tax-exempt bonds, deter-

mining the yield on a multipurpose issue and the yield on investments for purposes of the arbitrage yield restrictions of section 148 and the arbitrage rebate requirement of section 148(f);

(ii) *Rebate amount.* Except as provided in paragraph (h)(1)(i) of this section, determining the rebate amount for a multipurpose issue, including subsidiary matters with respect to that determination, such as the computation date credit under § 1.148-3(d)(1), the due date for payments, and the \$100,000 bona fide debt service fund exception under section 148(f)(4)(A)(ii);

(iii) *Minor portion.* Determining the *minor portion* of an issue under section 148(e);

(iv) *Reasonably required reserve or replacement fund.* Determining the portion of an issue eligible for investment in higher yielding investments as part of a reasonably required reserve or replacement fund under section 148(d); and

(v) *Effective date.* Applying the provisions of § 1.148-11(b) (relating to elective retroactive application of §§ 1.148-1 through 1.148-10 to certain issues).

(2) *Rules on allocations of multipurpose issues—(i) In general.* This paragraph (h) applies to allocations of multipurpose issues, including allocations involving the refunding purposes of the issue. Except as otherwise provided in this paragraph (h), proceeds, investments, and bonds of a multipurpose issue may be allocated among the various separate purposes of the issue using any reasonable, consistently applied allocation method. An allocation is not reasonable if it achieves more favorable results under section 148 or 149(d) than could be achieved with actual separate issues. An allocation under this paragraph (h) may be made at any time, but once made may not be changed.

(ii) *Allocations involving certain common costs.* A ratable allocation of common costs (as described in paragraph (h)(3)(ii) of this section) among the separate purposes of the multipurpose issue is generally reasonable. If another allocation method more accurately reflects the extent to which any separate purpose of a multipurpose issue enjoys the economic benefit or bears the economic burden of certain

common costs, that allocation method may be used.

(3) *Separate purposes of a multipurpose issue*—(i) *In general.* Separate purposes of a multipurpose issue include refunding a separate prior issue, financing a separate purpose investment, financing a construction issue (as defined in § 1.148-7(f)), and any clearly discrete governmental purpose reasonably expected to be financed by that issue. In general, all integrated or functionally related capital projects that qualify for the same initial temporary period under § 1.148-2(e)(2) are treated as having a single governmental purpose. The separate purposes of a refunding issue include the separate purposes of the prior issue, if any. Separate purposes may be treated as a single purpose if the proceeds used to finance those purposes are eligible for the same initial temporary period under section 148(c). For example, the use of proceeds of a multipurpose issue to finance separate qualified mortgage loans may be treated as a single purpose.

(ii) *Financing common costs.* Common costs of a multipurpose issue are not separate purposes. Common costs include issuance costs, accrued interest, capitalized interest on the issue, a reserve or replacement fund, qualified guarantee fees, and similar costs properly allocable to the separate purposes of the issue.

(iii) *Example.* The following example illustrates the application of this paragraph (h)(3).

*Example.* On January 1, 1994, Housing Authority of State A issues a \$10 million issue (the 1994 issue) at an interest rate of 10 percent to finance qualified mortgage loans for owner-occupied residences under section 143. During 1994, A originates \$5 million in qualified mortgage loans at an interest rate of 10 percent. In 1995, the market interest rates for housing loans falls to 8 percent and A is unable to originate further loans from the 1994 issue. On January 1, 1996, A issues a \$5 million issue (the 1996 issue) at an interest rate of 8 percent to refund partially the 1994 issue. Under paragraph (h) of this section, A treats the portion of the 1994 issue used to originate \$5 million in loans as a separate issue comprised of that group of purpose investments. A allocates those purpose investments representing those loans to that separate unrefunded portion of the issue. In addition, A treats the unoriginated portion of the 1994 issue as a separate issue and allocates

the nonpurpose investments representing the unoriginated proceeds of the 1994 issue to the refunded portion of the issue. Thus, when proceeds of the 1996 issue are used to pay principal on the refunded portion of the 1994 issue that is treated as a separate issue under paragraph (h) of this section, only the portion of the 1994 issue representing unoriginated loan funds invested in nonpurpose investments transfer to become transferred proceeds of the 1996 issue.

(4) *Allocations of bonds of a multipurpose issue*—(i) *Reasonable allocation of bonds to portions of issue.* After reasonable adjustment of the issue price of a multipurpose issue to account for common costs, the portion of the bonds of a multipurpose issue allocated to a separate purpose must have an issue price that bears the same ratio to the aggregate issue price of the multipurpose issue as the portion of the sale proceeds of the multipurpose issue used for that separate purpose bears to the aggregate sale proceeds of the multipurpose issue. For a refunding issue used to refund two or more prior issues, the portion of the sales proceeds allocated to the refunding of a separate prior issue is based on the present value of the refunded debt service on that prior issue, using the yield on investments in the refunding escrow allocable to the entire refunding issue as the discount rate.

(ii) *Safe harbor for pro rata allocation method for bonds.* The use of the relative amount of sales proceeds used for each separate purpose to ratably allocate each bond or a ratable number of substantially identical whole bonds is a reasonable method for allocating bonds of a multipurpose issue.

(iii) *Safe harbor for allocations of bonds used to finance separate purpose investments.* An allocation of a portion of the bonds of a multipurpose issue to a particular purpose investment is generally reasonable if that purpose investment has principal and interest payments that reasonably coincide in time and amount to principal and interest payments on the bonds allocated to that purpose investment.

(iv) *Rounding of bond allocations to next whole bond denomination permitted.* An allocation that rounds each resulting fractional bond up or down to the next integral multiple of a permitted denomination of bonds of that issue

not in excess of \$100,000 does not prevent the allocation from satisfying this paragraph (h)(4).

(v) *Restrictions on allocations of bonds to refunding purposes.* For each portion of a multipurpose issue that is used to refund a separate prior issue, a method of allocating bonds of that issue is reasonable under this paragraph (h) only if, in addition to the requirements of paragraphs (h)(1) and (h)(2) of this section, the portion of the bonds allocated to the refunding of that prior issue—

(A) Results from a pro rata allocation under paragraph (h)(4)(ii) of this section;

(B) Reflects aggregate principal and interest payable in each bond year that is less than, equal to, or proportionate to, the aggregate principal and interest payable on the prior issue in each bond year;

(C) Results from an allocation of all the bonds of the entire multipurpose issue in proportion to the remaining weighted average economic life of the capital projects financed or refinanced by the issue, determined in the same manner as under section 147(b); or

(D) Results from another reasonable allocation method, but only to the extent that the application of the allocation methods provided in this paragraph (h)(4)(v) is not permitted under state law restrictions applicable to the bonds, reasonable terms of bonds issued before, or subject to a master indenture that became effective prior to, July 1, 1993, or other similar restrictions or circumstances. This paragraph (h)(4)(v)(D) shall be strictly construed and is available only if it does not result in a greater burden on the market for tax-exempt bonds than would occur using one of the other allocation methods provided in this paragraph (h)(4)(v). (See also § 1.148-11(c)(2).)

(vi) *Exception for refundings of interim notes.* Paragraph (h)(4)(v) of this section need not be applied to refunding bonds issued to provide permanent financing for one or more projects if the prior issue had a term of less than 3 years and was sold in anticipation of permanent financing, but only if the aggregate term of all prior issues sold in anticipation of permanent financing was less than 3 years.

(5) *Limitation on multi-generation allocations.* This paragraph (h) does not apply to allocations of a multipurpose refunded issue unless that refunded issue is refunded directly by an issue to which this paragraph (h) applies. For example, if a 1994 issue refunds a 1984 multipurpose issue, which in turn refunded a 1980 multipurpose issue, this paragraph (h) applies to allocations of the 1984 issue for purposes of allocating the refunding purposes of the 1994 issue, but does not permit allocations of the 1980 issue.

(i) *Operating rules for separation of prior issue into refunded and unrefunded portions—(1) In general.* For purposes of paragraph (h)(3)(i) of this section, the separate purposes of a prior issue include the refunded and unrefunded portions of the prior issue. Thus, the refunded and unrefunded portions are treated as separate issues under paragraph (h)(1) of this section. Those separate issues must satisfy the requirements of paragraphs (h) and (i) of this section. The refunded portion of the bonds of a prior issue is based on a fraction the numerator of which is the principal amount of the prior issue to be paid with proceeds of the refunding issue and the denominator of which is the outstanding principal amount of the bonds of the prior issue, each determined as of the issue date of the refunding issue. (See also paragraph (b)(2) of this section.)

(2) *Allocations of proceeds and investments in a partial refunding.* As of the issue date of a partial refunding issue under this paragraph (i), unspent proceeds of the prior issue are allocated ratably between the refunded and unrefunded portions of the prior issue and the investments allocable to those unspent proceeds are allocated in the manner required for the allocation of investments to transferred proceeds under paragraph (c)(1)(ii) of this section.

(3) *References to prior issue.* If the refunded and unrefunded portions of a prior issue are treated as separate issues under this paragraph (i), then, except to the extent that the context clearly requires otherwise (e.g., references to the aggregate prior issue in the mixed escrow rule in paragraph (c)(2) of this section), all references in

this section to a prior issue refer only to the refunded portion of that prior issue.

[T.D. 8476, 58 FR 33541, June 18, 1993; 58 FR 44453, Aug. 23, 1993, as amended by T.D. 8538, 59 FR 24045, May 10, 1994; T.D. 8718, 62 FR 25512, May 9, 1997]

**§ 1.148-10 Anti-abuse rules and authority of Commissioner.**

(a) *Abusive arbitrage device*—(1) *In general.* Bonds of an issue are arbitrage bonds under section 148 if an abusive arbitrage device under paragraph (a)(2) of this section is used in connection with the issue. This paragraph (a) is to be applied and interpreted broadly to carry out the purposes of section 148, as further described in § 1.148-0. Except as otherwise provided in paragraph (c) of this section, any action that is expressly permitted by section 148 or §§ 1.148-1 through 1.148-11 is not an abusive arbitrage device (e.g., investment in higher yielding investments during a permitted temporary period under section 148(c)).

(2) *Abusive arbitrage device defined.* Any action is an abusive arbitrage device if the action has the effect of—

(i) Enabling the issuer to exploit the difference between tax-exempt and taxable interest rates to obtain a material financial advantage; and

(ii) Overburdening the tax-exempt bond market.

(3) *Exploitation of tax-exempt interest rates.* An action may exploit tax-exempt interest rates under paragraph (a)(2) of this section as a result of an investment of any portion of the gross proceeds of an issue over any period of time, notwithstanding that, in the aggregate, the gross proceeds of the issue are not invested in higher yielding investments over the term of the issue.

(4) *Overburdening the tax-exempt market.* An action overburdens the tax-exempt bond market under paragraph (a)(2)(ii) of this section if it results in issuing more bonds, issuing bonds earlier, or allowing bonds to remain outstanding longer than is otherwise reasonably necessary to accomplish the governmental purposes of the bonds, based on all the facts and circumstances. Whether an action is reasonably necessary to accomplish the governmental purposes of the bonds de-

pends on whether the primary purpose of the transaction is a bona fide governmental purpose (e.g., an issue of refunding bonds to achieve a debt service restructuring that would be issued independent of any arbitrage benefit). An important factor bearing on this determination is whether the action would reasonably be taken to accomplish the governmental purpose of the issue if the interest on the issue were not excludable from gross income under section 103(a) (assuming that the hypothetical taxable interest rate would be the same as the actual tax-exempt interest rate). Factors evidencing an overissuance include the issuance of an issue the proceeds of which are reasonably expected to exceed by more than a minor portion the amount necessary to accomplish the governmental purposes of the issue, or an issue the proceeds of which are, in fact, substantially in excess of the amount of sale proceeds allocated to expenditures for the governmental purposes of the issue. One factor evidencing an early issuance is the issuance of bonds that do not qualify for a temporary period under § 1.148-2(e)(2), (e)(3), or (e)(4). One factor evidencing that bonds may remain outstanding longer than necessary is a term that exceeds the safe harbors against the creation of replacement proceeds under § 1.148-1(c)(4)(i)(B). These factors may be outweighed by other factors, however, such as bona fide cost underruns or long-term financial distress.

(b) *Consequences of overburdening the tax-exempt bond market*—(1) *In general.* An issue that overburdens the tax-exempt bond market (within the meaning of paragraph (a)(4) of this section) is subject to the following special limitations—

(i) *Special yield restriction.* Investments are subject to the definition of *materially higher yield* under § 1.148-2(d) that is equal to one-thousandth of 1 percent. In addition, each investment is treated as a separate class of investments under § 1.148-5(b)(2)(ii), the yield on which may not be blended with that of other investments.

(ii) *Certain regulatory provisions inapplicable.* The provisions of § 1.148-5(c) (relating to yield reduction payments) and § 1.148-5(e) (2) and (3) (relating to

recovery of qualified administrative costs) do not apply.

(iii) *Restrictive expenditure rule.* Proceeds are not allocated to expenditures unless the proceeds-spent-last rule under § 1.148-6(d)(3)(i) is satisfied, applied by treating those proceeds as proceeds to be used for restricted working capital expenditures. For this purpose, available amount includes a reasonable working capital reserve as defined in § 1.148-6(d)(3)(iii)(B).

(2) *Application.* The provisions of this paragraph (b) only apply to the portion of an issue that, as a result of actions taken (or actions not taken) after the issue date, overburdens the market for tax-exempt bonds, except that for an issue that is reasonably expected as of the issue date to overburden the market, those provisions apply to all of the gross proceeds of the issue.

(c) *Anti-abuse rules on excess gross proceeds of advance refunding issues—(1) In general.* Except as otherwise provided in this paragraph (c), an abusive arbitrage device is used and bonds of an advance refunding issue are arbitrage bonds if the issue has excess gross proceeds.

(2) *Definition of excess gross proceeds.* Excess gross proceeds means all gross proceeds of an advance refunding issue that exceed an amount equal to 1 percent of sale proceeds of the issue, other than gross proceeds allocable to—

(i) Payment of principal, interest, or call premium on the prior issue;

(ii) Payment of pre-issuance accrued interest on the refunding issue, and interest on the refunding issue that accrues for a period up to the completion date of any capital project for which the prior issue was issued, plus one year;

(iii) A reasonably required reserve or replacement fund for the refunding issue or investment proceeds of such a fund;

(iv) Payment of costs of issuance of the refunding issue;

(v) Payment of administrative costs allocable to repaying the prior issue, carrying and repaying the refunding issue, or investments of the refunding issue;

(vi) Transferred proceeds that will be used or maintained for the governmental purpose of the prior issue;

(vii) Interest on purpose investments;

(viii) Replacement proceeds in a sinking fund for the refunding issue;

(ix) Qualified guarantee fees for the refunding issue or the prior issue; and

(x) Fees for a qualified hedge for the refunding issue.

(3) *Special treatment of transferred proceeds.* For purposes of this paragraph (c), all unspent proceeds of the prior issue as of the issue date of the refunding issue are treated as transferred proceeds of the advance refunding issue.

(4) *Special rule for crossover refundings.*

An advance refunding issue is not an issue of arbitrage bonds under this paragraph (c) if all excess gross proceeds of the refunding issue are used to pay interest that accrues on the refunding issue before the prior issue is discharged, and no gross proceeds of any refunding issue are used to pay interest on the prior issue or to replace funds used directly or indirectly to pay such interest (other than transferred proceeds used to pay interest on the prior issue that accrues for a period up to the completion date of the project for which the prior issue was issued, plus one year, or proceeds used to pay principal that is attributable to accrued original issue discount).

(5) *Special rule for gross refundings.*

This paragraph (c)(5) applies if an advance refunding issue (the *series B issue*) is used together with one or more other advance refunding issues (the *series A issues*) in a gross refunding of a prior issue, but only if the use of a gross refunding method is required under bond documents that were effective prior to November 6, 1992. These advance refunding issues are not arbitrage bonds under this paragraph (c) if—

(i) All excess gross proceeds of the series B issue and each series A issue are investment proceeds used to pay principal and interest on the series B issue;

(ii) At least 99 percent of all principal and interest on the series B issue is paid with proceeds of the series B and series A issues or with the earnings on other amounts in the refunding escrow for the prior issue;

(iii) The series B issue is discharged not later than the prior issue; and

(iv) As of any date, the amount of gross proceeds of the series B issue allocated to expenditures does not exceed the aggregate amount of expenditures before that date for principal and interest on the series B issue, and administrative costs of carrying and repaying the series B issue, or of investments of the series B issue.

(d) *Examples.* The provisions of this section are illustrated by the following examples:

*Example 1. Mortgage sale.* In 1982, City issued its revenue issue (the 1982 issue) and lent the proceeds to Developer to finance a low-income housing project under former section 103(b)(4)(A) of the 1954 Code. In 1994, Developer encounters financial difficulties and negotiates with City to refund the 1982 issue. City issues \$10 million in principal amount of its 8 percent bonds (the 1994 issue). City lends the proceeds of the 1994 issue to Developer. To evidence Developer's obligation to repay that loan, Developer, as obligor, issues a note to City (the *City note*). Bank agrees to provide Developer with a direct-pay letter of credit pursuant to which Bank will make all payments to the trustee for the 1994 issue necessary to meet Developer's obligations under the *City note*. Developer pays Bank a fee for the issuance of the letter of credit and issues a note to Bank (the *Bank note*). The *Bank note* is secured by a mortgage on the housing project and is guaranteed by FHA. The *Bank note* and the 1994 issue have different prepayment terms. The City does not reasonably expect to treat prepayments of the *Bank note* as gross proceeds of the 1994 issue. At the same time or pursuant to a series of related transactions, Bank sells the *Bank note* to Investor for \$9.5 million. Bank invests these monies together with its other funds. In substance, the transaction is a loan by City to Bank, under which Bank enters into a series of transactions that, in effect, result in Bank retaining \$9.5 million in amounts treated as proceeds of the 1994 issue. Those amounts are invested in materially higher yielding investments that provide funds sufficient to equal or exceed the Bank's liability under the letter of credit. Alternatively, the letter of credit is investment property in a sinking fund for the 1994 issue provided by Developer, a substantial beneficiary of the financing. Because, in substance, Developer acquires the \$10 million principal amount letter of credit for a fair market value purchase price of \$9.5 million, the letter of credit is a materially higher yielding investment. Neither result would change if Developer's obligation under the *Bank note* is contingent on Bank performing its obligation under the letter of credit. Each characterization causes the bonds to be arbitrage bonds.

*Example 2. Bonds outstanding longer than necessary for yield-blending device.* (i) *Longer bond maturity to create sinking fund.* In 1994, Authority issues an advance refunding issue (the *refunding issue*) to refund a 1982 prior issue (the *prior issue*). Under current market conditions, Authority will have to invest the refunding escrow at a yield significantly below the yield on the refunding issue. Authority issues its refunding issue with a longer weighted average maturity than otherwise necessary primarily for the purpose of creating a sinking fund for the refunding issue that will be invested in a guaranteed investment contract. The weighted average maturity of the refunding issue is less than 120 percent of the remaining average economic life of the facilities financed with the proceeds of the prior issue. The guaranteed investment contract has a yield that is higher than the yield on the refunding issue. The yield on the refunding escrow blended with the yield on the guaranteed investment contract does not exceed the yield on the issue. The refunding issue uses an abusive arbitrage device and the bonds of the issue are arbitrage bonds under section 148(a).

(ii) *Refunding of noncallable bonds.* The facts are the same as in paragraph (i) of this *Example 2* except that instead of structuring the refunding issue to enable it to take advantage of sinking fund investments, Authority will also refund other long-term, non-callable bonds in the same refunding issue. There are no savings attributable to the refunding of the non-callable bonds (e.g., a *low-to-high* refunding). The Authority invests the portion of the proceeds of the refunding issue allocable to the refunding of the non-callable bonds in the refunding escrow at a yield that is higher than the yield on the refunding issue, based on the relatively long escrow period for this portion of the refunding. The Authority invests the other portion of the proceeds of the refunding issue in the refunding escrow at a yield lower than the yield on the refunding issue. The blended yield on all the investments in the refunding escrow for the prior issues does not exceed the yield on the refunding issue. The portion of the refunding issue used to refund the noncallable bonds, however, was not otherwise necessary and was issued primarily to exploit the difference between taxable and tax-exempt rates for that long portion of the refunding escrow to minimize the effect of lower yielding investments in the other portion of the escrow. The refunding issue uses an abusive arbitrage device and the bonds of the issue are arbitrage bonds.

(iii) *Governmental purpose.* In paragraphs (i) and (ii) of this *Example 2*, the existence of a governmental purpose for the described financing structures would not change the conclusions unless Authority clearly established that the primary purpose for the use of the particular structure was a bona fide

governmental purpose. The fact that each financing structure had the effect of eliminating significant amounts of negative arbitrage is strong evidence of a primary purpose that is not a bona fide governmental purpose. Moreover, in paragraph (i) of this *Example 2*, the structure of the refunding issue coupled with the acquisition of the guaranteed investment contract to lock in the investment yield associated with the structure is strong evidence of a primary purpose that is not a bona fide governmental purpose.

*Example 3. Window refunding.* (i) Authority issues its 1994 refunding issue to refund a portion of the principal and interest on its outstanding 1985 issue. The 1994 refunding issue is structured using zero-coupon bonds that pay no interest or principal for the 5-year period following the issue date. The proceeds of the 1994 refunding issue are deposited in a refunding escrow to be used to pay only the interest requirements of the refunded portion of the 1985 issue. Authority enters into a guaranteed investment contract with a financial institution, *G*, under which *G* agrees to provide a guaranteed yield on revenues invested by Authority during the 5-year period following the issue date. The guaranteed investment contract has a yield that is no higher than the yield on the refunding issue. The revenues to be invested under this guaranteed investment contract consist of the amounts that Authority otherwise would have used to pay principal and interest on the 1994 refunding issue. The guaranteed investment contract is structured to generate receipts at times and in amounts sufficient to pay the principal and redemption requirements of the refunded portion of the 1985 issue. A principal purpose of these transactions is to avoid transferred proceeds. Authority will continue to invest the unspent proceeds of the 1985 issue that are on deposit in a refunding escrow for its 1982 issue at a yield equal to the yield on the 1985 issue and will not otherwise treat those unspent proceeds as transferred proceeds of the 1994 refunding issue. The 1994 refunding issue is an issue of arbitrage bonds since those bonds involve a transaction or series of transactions that overburdens the market by leaving bonds outstanding longer than is necessary to obtain a material financial advantage based on arbitrage. Specifically, Authority has structured the 1994 refunding issue to make available for the refunding of the 1985 issue replacement proceeds rather than proceeds so that the unspent proceeds of the 1985 issue will not become transferred proceeds of the 1994 refunding issue.

(ii) The result would be the same in each of the following circumstances:

(A) The facts are the same as in paragraph (i) of this *Example 3* except that Authority does not enter into the guaranteed investment contract but instead, as of the issue date of the 1994 refunding issue, reasonably

expects that the released revenues will be available for investment until used to pay principal and interest on the 1985 issue.

(B) The facts are the same as in paragraph (i) of this *Example 3* except that there are no unspent proceeds of the 1985 issue and Authority invests the released revenues at a yield materially higher than the yield on the 1994 issue.

(C) The facts are the same as in paragraph (i) of this *Example 3* except that Authority uses the proceeds of the 1994 issue for capital projects instead of to refund a portion of the 1985 issue.

*Example 4. Sale of conduit loan.* On January 1, 1994, Authority issues a conduit financing issue (the 1994 conduit financing issue) and uses the proceeds to purchase from City, an unrelated party, a tax-exempt bond of City (the *City note*). The proceeds of the 1994 conduit financing issue are to be used to advance refund a prior conduit financing issue that was issued in 1988 and used to make a loan to City. The 1994 conduit financing issue and the *City note* each have a yield of 8 percent on January 1, 1994. On June 30, 1996, interest rates have decreased and Authority sells the *City note* to D, a person unrelated to either City or Authority. Based on the sale price of the *City note* and treating June 30, 1996 as the issue date of the *City note*, the *City note* has a 6 percent yield. Authority deposits the proceeds of the sale of the *City note* into an escrow to redeem the bonds of the 1994 conduit financing issue on January 1, 2001. The escrow is invested in nonpurpose investments having a yield of 8 percent. For purposes of section 149(d), City and Authority are related parties and, therefore, the issue date of the *City note* is treated as being June 30, 1996. Thus, the *City note* is an advance refunding of Authority's 1994 conduit financing issue. Interest on the *City note* is not exempt from Federal income tax from the date it is sold to D under section 149(d), because, by investing the escrow investments at a yield of 8 percent instead of a yield not materially higher than 6 percent, the sale of the *City note* employs a device to obtain a material financial advantage, based on arbitrage, apart from the savings attributable to lower interest rates. In addition, the *City note* is not a tax-exempt bond because the note is the second advance refunding of the original bond under section 149(d)(3). The *City note* also employs an abusive arbitrage device and is an arbitrage bond under section 148.

*Example 5. Re-refunding.* (i) On January 1, 1984, City issues a tax-exempt issue (the 1984 issue) to finance the cost of constructing a prison. The 1984 issue has a 7 percent yield and a 30-year maturity. The 1984 issue is callable at any time on or after January 1, 1994. On January 1, 1990, City issues a refunding issue (the 1990 issue) to advance refund the 1984 issue. The 1990 issue has an 8 percent

## § 1.148-10

## 26 CFR Ch. I (4-1-06 Edition)

yield and a 30-year maturity. The 1990 issue is callable at any time on or after January 1, 2000. The proceeds of the 1990 issue are invested at an 8 percent yield in a refunding escrow for the 1984 issue (the *original 1984 escrow*) in a manner sufficient to pay debt service on the 1984 issue until maturity (*i.e.*, an escrow to maturity). On January 1, 1994, City issues a refunding issue (the *1994 issue*). The 1994 issue has a 6 percent yield and a 30-year maturity. City does not invest the proceeds of the 1994 issue in a refunding escrow for the 1990 issue in a manner sufficient to pay a portion of the debt service until, and redeem a portion of that issue on, January 1, 2000. Instead, City invests those proceeds at a 6 percent yield in a new refunding escrow for a portion of the 1984 issue (the *new 1984 escrow*) in a manner sufficient to pay debt service on a portion of the 1984 issue until maturity. City also liquidates the investments allocable to the proceeds of the 1990 issue held in the original 1984 escrow and reinvests those proceeds in an escrow to pay a portion of the debt service on the 1990 issue itself until, and redeem a portion of that issue on, January 1, 2000 (the *1990 escrow*). The 1994 bonds are arbitrage bonds and employ an abusive device under section 149(d)(4). Although, in form, the proceeds of the 1994 issue are used to pay principal on the 1984 issue, this accounting for the use of the proceeds of the 1994 issue is an unreasonable, inconsistent accounting method under § 1.148-6(a). Moreover, since the proceeds of the 1990 issue were set aside in an escrow to be used to retire the 1984 issue, the use of proceeds of the 1994 issue for that same purpose involves a replacement of funds invested in higher yielding investments under section 148(a)(2). Thus, using a reasonable, consistent accounting method and giving effect to the substance of the transaction, the proceeds of the 1994 issue are treated as used to refund the 1990 issue and are allocable to the 1990 escrow. The proceeds of the 1990 issue are treated as used to refund the 1984 issue and are allocable to the investments in the new 1984 escrow. The proceeds of the 1990 issue allocable to the nonpurpose investments in the new 1984 escrow become transferred proceeds of the 1994 issue as principal is paid on the 1990 issue from amounts on deposit in the 1990 escrow. As a result, the yield on nonpurpose investments allocable to the 1994 issue is materially higher than the yield on the 1994 issue, causing the bonds of the 1994 issue to be arbitrage bonds. In addition, the transaction employs a device under section 149(d)(4) to obtain a material financial advantage based on arbitrage, other than savings attributable to lower interest rates.

(ii) The following changes in the facts do not affect the conclusion that the 1994 issue consists of arbitrage bonds—

- (1) The 1990 issue is a taxable issue;

- (2) The original 1984 escrow is used to pay the 1994 issue (rather than the 1990 issue); or

- (3) The 1994 issue is used to retire the 1984 issue within 90 days of January 1, 1994.

(e) *Authority of the Commissioner to clearly reflect the economic substance of a transaction.* If an issuer enters into a transaction for a principal purpose of obtaining a material financial advantage based on the difference between tax-exempt and taxable interest rates in a manner that is inconsistent with the purposes of section 148, the Commissioner may exercise the Commissioner's discretion to depart from the rules of § 1.148-1 through § 1.148-11 as necessary to clearly reflect the economic substance of the transaction. For this purpose, the Commissioner may recompute yield on an issue or on investments, reallocate payments and receipts on investments, recompute the rebate amount on an issue, treat a hedge as either a qualified hedge or not a qualified hedge, or otherwise adjust any item whatsoever bearing upon the investments and expenditures of gross proceeds of an issue. For example, if the amount paid for a hedge is specifically based on the amount of arbitrage earned or expected to be earned on the hedged bonds, a principal purpose of entering into the contract is to obtain a material financial advantage based on the difference between tax-exempt and taxable interest rates in a manner that is inconsistent with the purposes of section 148.

(f) *Authority of the Commissioner to require an earlier date for payment of rebate.* If the Commissioner determines that an issue is likely to fail to meet the requirements of § 1.148-3 and that a failure to serve a notice of demand for payment on the issuer will jeopardize the assessment or collection of tax on interest paid or to be paid on the issue, the date that the Commissioner serves notice on the issuer is treated as a required computation date for payment of rebate for that issue.

(g) *Authority of the Commissioner to waive regulatory limitations.* Notwithstanding any specific provision in §§ 1.148-1 through 1.148-11, the Commissioner may prescribe extensions of temporary periods, larger reasonably required reserve or replacement funds, or consequences of failures or remedial

action under section 148 in lieu of or in addition to other consequences of those failures, or take other action, if the Commissioner finds that good faith or other similar circumstances so warrant, consistent with the purposes of section 148.

[T.D. 8476, 58 FR 33544, June 18, 1993; 58 FR 44453, Aug. 23, 1993, as amended by T.D. 8538, 59 FR 24046, May 10, 1994; T.D. 8476, 59 FR 24351, May 11, 1994; T.D. 8718, 62 FR 25512, May 9, 1997]

#### § 1.148-11 Effective dates.

(a) *In general.* Except as otherwise provided in this section, §§1.148-1 through 1.148-11 apply to bonds sold on or after July 8, 1997.

(b) *Elective retroactive application in whole—(1) In general.* Except as otherwise provided in this section, and subject to the applicable effective dates for the corresponding statutory provisions, an issuer may apply the provisions of §§1.148-1 through 1.148-11 in whole, but not in part, to any issue that is outstanding on July 8, 1997, and is subject to section 148(f) or to sections 103(c)(6) or 103A(i) of the Internal Revenue Code of 1954, in lieu of otherwise applicable regulations under those sections.

(2) *No elective retroactive application for 18-month spending exception.* The provisions of §1.148-7(d) (relating to the 18-month spending exception) may not be applied to any issue issued on or before June 30, 1993.

(3) *No elective retroactive application for hedges of fixed rate issues.* The provisions of §1.148-4(h)(2)(i)(B) (relating to hedges of fixed rate issues) may not be applied to any bond sold on or before July 8, 1997.

(4) *No elective retroactive application for safe harbor for establishing fair market value for guaranteed investment contracts and investments purchased for a yield restricted defeasance escrow.* The provisions of §§1.148-5(d)(6)(iii) (relating to the safe harbor for establishing fair market value of guaranteed investment contracts and yield restricted defeasance escrow investments) and 1.148-5(e)(2)(iv) (relating to a special rule for yield restricted defeasance escrow investments) may not be applied to any bond sold before December 30, 1998.

(c) *Elective retroactive application of certain provisions and special rules—(1) Retroactive application of overpayment recovery provisions.* An issuer may apply the provisions of §1.148-3(i) to any issue that is subject to section 148(f) or to sections 103(c)(6) or 103A(i) of the Internal Revenue Code of 1954.

(2) *Certain allocations of multipurpose issues.* An allocation of bonds to a refunding purpose under §1.148-9(h) may be adjusted as necessary to reflect allocations made between May 18, 1992, and August 15, 1993, if the allocations satisfied the corresponding prior provision of §1.148-11(j)(4) under applicable prior regulations.

(3) *Special limitation.* The provisions of §1.148-9 apply to issues issued before August 15, 1993, only if the issuer in good faith estimates the present value savings, if any, associated with the effect of the application of that section on refunding escrows, using any reasonable accounting method, and applies those savings, if any, to redeem outstanding tax-exempt bonds of the applicable issue at the earliest possible date on which those bonds may be redeemed or otherwise retired. These savings are not reduced to take into account any administrative costs associated with applying these provisions retroactively.

(d) *Transition rule excepting certain state guarantee funds from the definition of replacement proceeds—(1) Certain perpetual trust funds.* A guarantee by a fund created and controlled by a State and established pursuant to its constitution does not cause the amounts in the fund to be pledged funds treated as replacement proceeds if—

(i) Substantially all of the corpus of the fund consists of nonfinancial assets, revenues derived from these assets, gifts, and bequests;

(ii) The corpus of the guarantee fund may be invaded only to support specifically designated essential governmental functions (*designated functions*) carried on by political subdivisions with general taxing powers;

(iii) Substantially all of the available income of the fund is required to be applied annually to support designated functions;

## § 1.148-11

## 26 CFR Ch. I (4-1-06 Edition)

(iv) The issue guaranteed consists of general obligations that are not private activity bonds substantially all of the proceeds of which are to be used for designated functions;

(v) The fund satisfied each of the requirements of paragraphs (d)(1)(i) through (d)(1)(iii) of this section on August 16, 1986; and

(vi) The guarantee is not attributable to a deposit to the fund made after May 14, 1989, unless—

(A) The deposit is attributable to the sale or other disposition of fund assets; or

(B) Prior to the deposit, the outstanding amount of the bonds guaranteed by the fund did not exceed 250 percent of the lower of the cost or fair market value of the fund.

(2) *Permanent University Fund.* Replacement proceeds do not include amounts allocable to investments of the fund described in section 648 of Public Law 98-369.

(e) *Transition rule regarding special allowance payments.* Section 1.148-5(b)(5) applies to any bond issued after January 5, 1990, except a bond issued exclusively to refund a bond issued before January 6, 1990, if the amount of the refunding bond does not exceed 101 percent of the amount of the refunded bond, and the maturity date of the refunding bond is not later than the date that is 17 years after the date on which the refunded bond was issued (or, in the case of a series of refundings, the date on which the original bond was issued), but only if § 1.148-2(d)(2)(iv) is applied by substituting *1 and one-half percentage points* for *2 percentage points*.

(f) *Transition rule regarding applicability of yield reduction rule.* Section 1.148-5(c) applies to nonpurpose investments allocable to replacement proceeds of an issue that are held in a reserve or replacement fund to the extent that—

(1) Amounts must be paid into the fund under a constitutional provision, statute, or ordinance adopted before May 3, 1978;

(2) Under that provision, amounts paid into the fund (and investment earnings thereon) can be used only to pay debt service on the issues; and

(3) The size of the payments made into the fund is independent of the size

of the outstanding issues or the debt service thereon.

(g) *Provisions applicable to certain bonds sold before effective date.* Except for bonds to which paragraph (b)(1) of this section applies—

(1) Section 1.148-11A provides rules applicable to bonds sold after June 6, 1994, and before July 8, 1997; and

(2) Sections 1.148-1 through 1.148-11 as in effect on July 1, 1993 (see 26 CFR part 1 as revised April 1, 1994), and § 1.148-11A(i) (relating to elective retroactive application of certain provisions) provide rules applicable to certain issues issued before June 7, 1994.

(h) *Safe harbor for establishing fair market value for guaranteed investment contracts and investments purchased for a yield restricted defeasance escrow.* The provisions of § 1.148-5(d)(6)(iii) are applicable to bonds sold on or after March 1, 1999. Issuers may apply these provisions to bonds sold on or after December 30, 1998, and before March 1, 1999.

(i) *Special rule for certain broker's commissions and similar fees.* Section 1.148-5(e)(2)(iii) applies to bonds sold on or after February 9, 2004. In the case of bonds sold before February 9, 2004, that are subject to § 1.148-5 (pre-effective date bonds), issuers may apply § 1.148-5(e)(2)(iii), in whole but not in part, with respect to transactions entered into on or after December 11, 2003. If an issuer applies § 1.148-5(e)(2)(iii) to pre-effective date bonds, the per-issue safe harbor in § 1.148-5(e)(2)(iii)(B)(1)(ii) is applied by taking into account all brokers' commissions or similar fees with respect to guaranteed investment contracts and investments for yield restricted defeasance escrows that the issuer treats as qualified administrative costs for the issue, including all such commissions or fees paid before February 9, 2004. For purposes of §§ 1.148-5(e)(2)(iii)(B)(3) and 1.148-5(e)(2)(iii)(B)(6) (relating to cost-of-living adjustments), transactions entered into before 2003 are treated as entered into in 2003.

(j) *Certain prepayments.* Section 1.148-1(e)(1) and (2) apply to bonds sold on or after October 3, 2003. Issuers may apply § 1.148-1(e)(1) and (2), in whole but not

**Internal Revenue Service, Treasury**

**§ 1.149(d)-1**

in part, to bonds sold before October 3, 2003, that are subject to §1.148-1.

[T.D. 8476, 58 FR 33547, June 18, 1993; 58 FR 44453, Aug. 23, 1993, as amended by T.D. 8538, 59 FR 24046, May 10, 1994; T.D. 8718, 62 FR 25512, May 9, 1997; T.D. 8476, 64 FR 37037, July 9, 1999; T.D. 9085, 68 FR 45777, Aug. 4, 2003; T.D. 9097, 68 FR 69023, Dec. 11, 2003]

**§ 1.149(b)-1 Federally guaranteed bonds.**

(a) *General rule.* Under section 149(b) and this section, nothing in section 103(a) or in any other provision of law shall be construed to provide an exemption from Federal income tax for interest on any bond issued as part of an issue that is federally guaranteed.

(b) *Exceptions.* Pursuant to section 149(b)(3)(B), section 149(b)(1) and paragraph (a) of this section do not apply to—

(1) Investments in obligations issued pursuant to §21B(d)(3) of the Federal Home Loan Bank Act, as amended by §511 of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989, or any successor provision; or

(2) Any investments that are held in a refunding escrow (as defined in §1.148-1).

(c) *Effective date.* This section applies to investments made after June 30, 1993.

[T.D. 8476, 58 FR 33548, June 18, 1993]

**§ 1.149(d)-1 Limitations on advance refundings.**

(a) *General rule.* Under section 149(d) and this section, nothing in section 103(a) or in any other provision of law shall be construed to provide an exemption from Federal income tax for interest on any bond issued as part of an issue described in paragraphs (2), (3), or (4) of section 149(d).

(b) *Advance refunding issues that employ abusive devices—(1) In general.* An advance refunding issue employs an abusive device and is described in section 149(d)(4) if the issue violates any of the anti-abuse rules under §1.148-10.

(2) *Failure to pay required rebate.* An advance refunding issue is described in section 149(d)(4) if the issue fails to meet the requirements of §1.148-3. This paragraph (b)(2) applies to any advance refunding issue issued after August 31, 1986.

(3) *Mixed escrows invested in tax-exempt bonds.* An advance refunding issue is described in section 149(d)(4) if—

(i) Any of the proceeds of the issue are invested in a refunding escrow in which a portion of the proceeds are invested in tax-exempt bonds and a portion of the proceeds are invested in nonpurpose investments;

(ii) The yield on the tax-exempt bonds in the refunding escrow exceeds the yield on the issue;

(iii) The yield on all the investments (including investment property and tax-exempt bonds) in the refunding escrow exceeds the yield on the issue; and

(iv) The weighted average maturity of the tax-exempt bonds in the refunding escrow is more than 25 percent greater or less than the weighted average maturity of the nonpurpose investments in the refunding escrow, and the weighted average maturity of nonpurpose investments in the refunding escrow is greater than 60 days.

(4) *Tax-exempt conduit loans.* For purposes of applying section 149(d) to a conduit financing issue that finances any conduit loan that is a tax-exempt bond, the actual issuer of a conduit financing issue and the conduit borrower of that conduit financing issue are treated as related parties. Thus, the issue date of the conduit loan does not occur prior to the date on which the actual issuer of the conduit financing issue sells, exchanges, or otherwise disposes of that conduit loan, and the use of the proceeds of the disposition to pay debt service on the conduit financing issue causes the conduit loan to be a refunding issue. See §1.148-10(d), *Example 4*.

(c) *Unrefunded debt service remains eligible for future advance refunding.* For purposes of section 149(d)(3)(A)(i), any principal or interest on a prior issue that has not been paid or provided for by any advance refunding issue is treated as not having been advance refunded.

(d) *Application of arbitrage regulations—(1) Application of multipurpose issue rules.* For purposes of sections 149(d)(2) and (3)(A)(i), (ii), and (iii), the provisions of the multipurpose issue rule in §1.148-9(h) apply, except that

the limitation in §1.148-9(h)(5) is disregarded.

(2) *General mixed escrow rules.* For purposes of section 149(d), the provisions of §1.148-9(c) (relating to mixed escrows) apply, except that those provisions do not apply for purposes of section 149(d)(2) and (d)(3)(A) (i) and (ii) to amounts that were not gross proceeds of the prior issue before the issue date of the refunding issue.

(3) *Temporary periods and minor portions.* Section 1.148-9(d) and (f) contains rules applicable to temporary periods and minor portions for advance refunding issues.

(4) *Definitions.* Section 1.148-1 applies for purposes of section 149(d).

(e) *Taxable refundings—(1) In general.* Except as provided in paragraph (e)(2) of this section, for purposes of section 149(d)(3)(A)(i), an advance refunding issue the interest on which is not excludable from gross income under section 103(a) (*i.e.*, a taxable advance refunding issue) is not taken into account. In addition, for this purpose, an advance refunding of a taxable issue is not taken into account unless the taxable issue is a conduit loan of a tax-exempt conduit financing issue.

(2) *Use to avoid section 149(d)(3)(A)(i).* A taxable issue is taken into account under section 149(d)(3)(A)(i) if it is issued to avoid the limitations of that section. For example, in the case of a refunding of a tax-exempt issue with a taxable advance refunding issue that is, in turn, currently refunded with a tax-exempt issue, the taxable advance refunding issue is taken into account under section 149(d)(3)(A)(i) if the two tax-exempt issues are outstanding concurrently for more than 90 days.

(f) *Redemption at first call date—(1) General rule.* Under sections 149(d)(3)(A) (ii) and (iii) (the *first call requirement*), bonds refunded by an advance refunding must be redeemed on their first call date if the savings test under section 149(d)(3)(B)(i) (the *savings test*) is satisfied. The savings test is satisfied if the issuer may realize present value debt service savings (determined without regard to administrative expenses) in connection with the issue of which the refunding bond is a part.

(2) *First call date.* *First call date* means the earliest date on which a bond may

be redeemed (or, if issued before 1986, on the earliest date on which that bond may be redeemed at a redemption price not in excess of 103 percent of par). If, however, the savings test is not met with respect to the date described in the preceding sentence (*i.e.*, there are no present value savings if the refunded bonds are retired on that date), the first call date is the first date thereafter on which the bonds can be redeemed and on which the savings test is met.

(3) *Application of savings test to multipurpose issues.* Except as otherwise provided in this paragraph (f)(3), the multipurpose issue rules in §1.148-9(h) apply for purposes of the savings test. If any separate issue in a multipurpose issue increases the aggregate present value debt service savings on the entire multipurpose issue or reduces the present value debt service losses on that entire multipurpose issue, that separate issue satisfies the savings test.

(g) *Limitation on advance refundings of private activity bonds.* Under section 149(d)(2) and this section, interest on a bond is not excluded from gross income if any portion of the issue of which the bond is a part is issued to advance refund a private activity bond (other than a qualified 501(c)(3) bond). For this purpose, the term private activity bond—

(1) Includes a qualified bond described in section 141(e) (other than a qualified 501(c)(3) bond), regardless of whether the refunding issue consists of private activity bonds under §1.141-13; and

(2) Does not include a taxable bond.

(h) *Effective dates—(1) In general.* Except as provided in this paragraph (h), this section applies to bonds issued after June 30, 1993, to which §§1.148-1 through 1.148-11 apply, including conduit loans that are treated as issued after June 30, 1993, under paragraph (b)(4) of this section. In addition, this section applies to any issue to which the election described in §1.148-11(b)(1) is made.

(2) *Special effective date for paragraph (b)(3).* Paragraph (b)(3) of this section applies to any advance refunding issue issued after May 28, 1991.

(3) *Special effective date for paragraph (f)(3).* Paragraph (f)(3) of this section applies to bonds sold on or after July 8, 1997 and to any issue to which the election described in § 1.148-11(b)(1) is made. See § 1.148-11A(i) for rules relating to certain bonds sold before July 8, 1997.

(4) *Special effective date for paragraph (g).* See § 1.141-15 for the applicability date of paragraph (g) of this section.

[T.D. 8476, 58 FR 33548, June 18, 1993; 58 FR 44453, Aug. 23, 1993, as amended by T.D. 8538, 59 FR 24046, May 10, 1994; T.D. 8718, 62 FR 25513, May 9, 1997; T.D. 9234, 70 FR 75035, Dec. 19, 2005]

**§ 1.149(e)-1 Information reporting requirements for tax-exempt bonds.**

(a) *General rule.* Interest on a bond is included in gross income unless certain information with respect to the issue of which the bond is a part is reported to the Internal Revenue Service in accordance with the requirements of this section. This section applies to any bond if the issue of which the bond is a part is issued after December 31, 1986 (including any bond issued to refund a bond issued on or before December 31, 1986).

(b) *Requirements for private activity bonds—(1) In general.* If the issue of which the bond is a part is an issue of private activity bonds, the issuer must comply with the following requirements—

(i) Not later than the 15th day of the second calendar month after the close of the calendar quarter in which the issue is issued, the issuer must file with the Internal Revenue Service a completed information reporting form prescribed for this purpose;

(ii) If any bond that is part of the issue is taken into account under section 146 (relating to volume cap on private activity bonds), the state certification requirement of paragraph (b)(2) of this section must be satisfied; and

(iii) If any bond that is part of the issue is a qualified mortgage bond or qualified veterans' mortgage bond (within the meaning of section 143 (a) or (b) or section 103A(c) (1) or (3) as in effect on the day before enactment of the Tax Reform Act of 1986), the issuer must submit the annual report containing information on the borrowers of the original proceeds of the issue as

required under § 1.103A-2 (k)(2)(ii) and (k)(3) through (k)(6).

(2) *State certification with respect to volume cap—(i) In general.* If an issue is subject to the volume cap under section 146, a state official designated by state law (if there is no such official, then the governor or the governor's delegate) must certify that the issue meets the requirements of section 146, and a copy of this certification must be attached to the information reporting form filed with respect to the issue. In the case of any constitutional home rule city (as defined in section 146(d)(3)(C)), the preceding sentence is applied by substituting "city" for "state" and "chief executive officer" for "governor."

(ii) *Certification.* The certifying official need not perform an independent investigation in order to certify that the issue meets the requirements of section 146. For example, if the certifying official receives an affidavit that was executed by an officer of the issuer who is responsible for issuing the bonds and that sets forth, in brief and summary terms, the facts necessary to determine that the issue meets the requirements of section 146 and if the certifying official has compared the information in that affidavit to other readily available information with respect to that issuer (e.g., previous affidavits and certifications for other private activity bonds issued by that issuer), the certifying official may rely on the affidavit.

(c) *Requirements for governmental bonds—(1) Issue price of \$100,000 or more.* If the issue of which the bond is a part has an issue price of \$100,000 or more and is not an issue of private activity bonds, then, not later than the 15th day of the second calendar month after the close of the calendar quarter in which the issue is issued, the issuer must file with the Internal Revenue Service a completed information reporting form prescribed for this purpose.

(2) *Issue price of less than \$100,000—(i) In general.* If the issue of which the bond is a part has an issue price of less than \$100,000 and is not an issue of private activity bonds, the issuer must file with the Internal Revenue Service

one of the following information reporting forms within the prescribed period—

(A) *Separate return.* Not later than the 15th day of the second calendar month after the close of the calendar quarter in which the issue is issued, a completed information reporting form prescribed for this purpose with respect to that issue; or

(B) *Consolidated return.* Not later than February 15 of the calendar year following the calendar year in which the issue is issued, a completed information form prescribed for this purpose with respect to all issues to which this paragraph (c)(2) applies that were issued by the issuer during the calendar year and for which information was not reported on a separate information return pursuant to paragraph (c)(2)(i)(A) of this section.

(ii) *Bond issues issued before January 1, 1992.* Paragraph (c)(2)(i)(A) of this section does not apply if the issue of which the bond is a part is issued before January 1, 1992.

(iii) *Extended filing date for first and second calendar quarters of 1992.* If the issue of which the bond is a part is issued during the first or second calendar quarter of 1992, the prescribed period for filing an information reporting form with respect to that issue pursuant to paragraph (c)(2)(i)(A) of this section is extended until November 16, 1992.

(d) *Filing of forms and special rules—(1) Completed form.* For purposes of this section—

(i) *Good faith effort.* An information reporting form is treated as completed if the issuer (or a person acting on behalf of the issuer) has made a good faith effort to complete the form (taking into account the instructions to the form).

(ii) *Information.* In general, information reporting forms filed pursuant to this section must be completed on the basis of available information and reasonable expectations as of the date the issue is issued. Forms that are filed on a consolidated basis pursuant to paragraph (c)(2)(i)(B) of this section, however, may be completed on the basis of information readily available to the issuer at the close of the calendar year to which the form relates, supple-

mented by estimates made in good faith.

(iii) *Certain information not required.* An issuer need not report to the Internal Revenue Service any information specified in the first sentence of section 149(e)(2) that is not required to be reported to the Internal Revenue Service pursuant to the information reporting forms prescribed under that section and the instructions to those forms.

(2) *Manner of filing—(i) Place for filing.* The information reporting form must be filed with the Internal Revenue Service at the address specified on the form or in the instructions to the form.

(ii) *Extension of time.* The Commissioner may grant an extension of time to file any form or attachment required under this section if the Commissioner determines that the failure to file in a timely manner was not due to willful neglect. The Commissioner may make this determination with respect to an issue or to a class of issues.

(e) *Definitions.* For purposes of this section only—(1) *Private activity bond.* The term “private activity bond” has the meaning given that term in section 141(a) of the Internal Revenue Code, except that the term does not include any bond described in section 1312(c) of the Tax Reform Act of 1986 to which section 1312 or 1313 of the Tax Reform Act of 1986 applies.

(2) *Issue—(i) In general.* Except as otherwise provided in this paragraph (e)(2), bonds are treated as part of the same issue only if the bonds are issued—

(A) By the same issuer;

(B) On the same date; and

(C) Pursuant to a single transaction or to a series of related transactions.

(ii) *Draw-down loans, commercial paper, etc.* (A) Bonds issued during the same calendar year may be treated as part of the same issue if the bonds are issued—

(1) Pursuant to a loan agreement under which amounts are to be advanced periodically (“draw-down loan”); or

(2) With a term not exceeding 270 days.

(B) In addition, the bonds must be equally and ratably secured under a single indenture or loan agreement and issued pursuant to a common financing arrangement (e.g., pursuant to the

same official statement that is periodically updated to reflect changing factual circumstances). In the case of bonds issued pursuant to a draw-down loan that meets the requirements of the preceding sentence, bonds issued during different calendar years may be treated as part of the same issue if all the amounts to be advanced pursuant to the draw-down loan are reasonably expected to be advanced within three years of the date of issue of the first bond.

(iii) *Leases and installment sales.* Bonds other than private activity bonds may be treated as part of the same issue if—

(A) The bonds are issued pursuant to a single agreement that is in the form of a lease or installment sales agreement; and

(B) All of the property covered by that agreement is reasonably expected to be delivered within three years of the date of issue of the first bond.

(iv) *Qualified 501(c)(3) bonds.* If an issuer elects under section 141(b)(9) to treat a portion of an issue as a qualified 501(c)(3) bond, that portion is treated as a separate issue.

(3) *Date of issue*—(i) *Bond.* The date of issue of a bond is determined under § 1.150-1.

(ii) *Issue.* The date of issue of an issue of bonds is the date of issue of the first bond that is part of the issue. See paragraphs (e)(2) (ii) and (iii) of this section for rules relating to draw-down loans, commercial paper, etc., and leases and installment sales.

(iii) *Bonds to which prior law applied.* Notwithstanding the provisions of this paragraph (e)(3), an issue for which an information report was required to be filed under section 103(1) or section 103A(j)(3) is treated as issued prior to January 1, 1987.

(4) *Issue price.* The term “issue price” has the same meaning given the term under § 1.148-1(b).

[T.D. 8425, 57 FR 36002, Aug. 12, 1992, as amended by T.D. 8425, 59 FR 24351, May 11, 1994]

#### § 1.149(g)-1 Hedge bonds.

(a) *Certain definitions.* Except as otherwise provided, the definitions set forth in § 1.148-1 apply for purposes of section 149(g) and this section. In addition,

the following terms have the following meanings:

*Reasonable expectations* means reasonable expectations (as defined in § 1.148-1), as modified to take into account the provisions of section 149(f)(2)(B).

*Spendable proceeds* means net sale proceeds (as defined in § 1.148-1).

(b) *Applicability of arbitrage allocation and accounting rules.* Section 1.148-6 applies for purposes of section 149(g), except that an expenditure that results in the creation of replacement proceeds (other than amounts in a bona fide debt service fund or a reasonably required reserve or replacement fund) is not an expenditure for purposes of section 149(g).

(c) *Refundings*—(1) *Investment in tax-exempt bonds.* A bond issued to refund a bond that is a tax-exempt bond by virtue of the rule in section 149(g)(3)(B) is not a tax-exempt bond unless the gross proceeds of that refunding bond (other than proceeds in a refunding escrow for the refunded bond) satisfy the requirements of section 149(g)(3)(B).

(2) *Anti-abuse rule.* A refunding bond is treated as a hedge bond unless there is a significant governmental purpose for the issuance of that bond (e.g., an advance refunding bond issued to realize debt service savings or to relieve the issuer of significantly burdensome document provisions, but not to otherwise hedge against future increases in interest rates).

(d) *Effective date.* This section applies to bonds issued after June 30, 1993 to which §§ 1.148-1 through 1.148-11 apply. In addition, this section applies to any issue to which the election described in § 1.148-11(b)(1) is made.

[T.D. 8476, 58 FR 33549, June 18, 1993]

#### § 1.150-1 Definitions.

(a) *Scope and effective date*—(1) *In general.* Except as otherwise provided, the definitions in this section apply for all purposes of sections 103 and 141 through 150.

(2) *Effective date*—(i) *In general.* Except as otherwise provided in this paragraph (a)(2), this section applies to issues issued after June 30, 1993 to which §§ 1.148-1 through 1.148-11 apply. In addition, this section (other than paragraph (c)(3) of this section) applies

to any issue to which the election described in § 1.148-11(b)(1) is made.

(ii) *Special effective date for paragraphs (c)(1), (c)(4)(iii), and (c)(6).* Paragraphs (c)(1), (c)(4)(iii), and (c)(6) of this section apply to bonds sold on or after July 8, 1997 and to any issue to which the election described in § 1.148-11(b)(1) is made. See § 1.148-11A(i) for rules relating to certain bonds sold before July 8, 1997.

(3) *Exceptions to general effective date.* See § 1.141-15 for the applicability date of the definition of bond documents contained in paragraph (b) of this section and the effective date of paragraph (c)(3)(ii) of this section.

(b) *Certain general definitions.* The following definitions apply:

*Bond* means any obligation of a State or political subdivision thereof under section 103(c)(1).

*Bond documents* means the bond indenture or resolution, transcript of proceedings, and any related documents.

*Capital expenditure* means any cost of a type that is properly chargeable to capital account (or would be so chargeable with a proper election or with the application of the definition of placed in service under § 1.150-2(c)) under general Federal income tax principles. For example, costs incurred to acquire, construct, or improve land, buildings, and equipment generally are capital expenditures. Whether an expenditure is a capital expenditure is determined at the time the expenditure is paid with respect to the property. Future changes in law do not affect whether an expenditure is a capital expenditure.

*Conduit borrower* means the obligor on a purpose investment (as defined in § 1.148-1). For example, if an issuer invests proceeds in a purpose investment in the form of a loan, lease, installment sale obligation, or similar obligation to another entity and the obligor uses the proceeds to carry out the governmental purpose of the issue, the obligor is a conduit borrower.

*Conduit financing issue* means an issue the proceeds of which are used or are reasonably expected to be used to finance at least one purpose investment representing at least one conduit loan to one conduit borrower.

*Conduit loan* means a purpose investment (as defined in § 1.148-1).

*Governmental bond* means any bond of an issue of tax-exempt bonds in which none of the bonds are private activity bonds.

*Issuance costs* means costs to the extent incurred in connection with, and allocable to, the issuance of an issue within the meaning of section 147(g). For example, issuance costs include the following costs but only to the extent incurred in connection with, and allocable to, the borrowing: underwriters' spread; counsel fees; financial advisory fees; rating agency fees; trustee fees; paying agent fees; bond registrar, certification, and authentication fees; accounting fees; printing costs for bonds and offering documents; public approval process costs; engineering and feasibility study costs; guarantee fees, other than for qualified guarantees (as defined in § 1.148-4(f)); and similar costs.

*Issue date* means, in reference to an issue, the first date on which the issuer receives the purchase price in exchange for delivery of the evidence of indebtedness representing any bond included in the issue. Issue date means, in reference to a bond, the date on which the issuer receives the purchase price in exchange for that bond. In no event is the issue date earlier than the first day on which interest begins to accrue on the bond or bonds for Federal income tax purposes.

*Obligation* means any valid evidence of indebtedness under general Federal income tax principles.

*Pooled financing issue* means an issue the proceeds of which are to be used to finance purpose investments representing conduit loans to two or more conduit borrowers, unless those conduit loans are to be used to finance a single capital project.

*Private activity bond* means a private activity bond (as defined in section 141).

*Qualified mortgage loan* means a mortgage loan with respect to an owner-occupied residence acquired with the proceeds of an obligation described in section 143(a)(1) or 143(b) (or applicable prior law).

*Qualified student loan* means a student loan acquired with the proceeds of

an obligation described in section 144(b)(1).

*Related party* means, in reference to a governmental unit or a 501(c)(3) organization, any member of the same controlled group, and, in reference to any person that is not a governmental unit or 501(c)(3) organization, a related person (as defined in section 144(a)(3)).

*Taxable bond* means any obligation the interest on which is not excludable from gross income under section 103.

*Tax-exempt bond* means any bond the interest on which is excludable from gross income under section 103(a). For purposes of section 148, tax-exempt bond includes:

(1) An interest in a regulated investment company to the extent that at least 95 percent of the income to the holder of the interest is interest that is excludable from gross income under section 103; and

(2) A certificate of indebtedness issued by the United States Treasury pursuant to the Demand Deposit State and Local Government Series program described in 31 CFR part 344.

*Working capital expenditure* means any cost that is not a capital expenditure. Generally, current operating expenses are working capital expenditures.

(c) *Definition of issue*—(1) *In general.* Except as otherwise provided in this paragraph (c), the term *issue* means two or more bonds that meet all of the following requirements:

(i) *Sold at substantially the same time.* The bonds are sold at substantially the same time. Bonds are treated as sold at substantially the same time if they are sold less than 15 days apart.

(ii) *Sold pursuant to the same plan of financing.* The bonds are sold pursuant to the same plan of financing. Factors material to the plan of financing include the purposes for the bonds and the structure of the financing. For example, generally—

(A) Bonds to finance a single facility or related facilities are part of the same plan of financing;

(B) Short-term bonds to finance working capital expenditures and long-term bonds to finance capital projects are not part of the same plan of financing; and

(C) Certificates of participation in a lease and general obligation bonds secured by tax revenues are not part of the same plan of financing.

(iii) *Payable from same source of funds.* The bonds are reasonably expected to be paid from substantially the same source of funds, determined without regard to guarantees from parties unrelated to the obligor.

(2) *Exception for taxable bonds.* Taxable bonds and tax-exempt bonds are not part of the same issue under this paragraph (c). The issuance of tax-exempt bonds in a transaction (or series of related transactions) that includes taxable bonds, however, may constitute an abusive arbitrage device under §1.148-10(a) or a device to avoid other limitations in sections 103 and 141 through 150 (for example, structures involving *windfalls* or unreasonable allocations of bonds).

(3) *Exception for certain bonds financing separate purposes*—(i) *In general.* Bonds may be treated as part of separate issues if the requirements of this paragraph (c)(3) are satisfied. Each of these separate issues must finance a separate purpose (e.g., refunding a separate prior issue, financing a separate purpose investment, financing integrated or functionally related capital projects, and financing any clearly discrete governmental purpose). Each of these separate issues independently must be a tax-exempt bond (e.g., a governmental bond or a qualified mortgage bond). The aggregate proceeds, investments, and bonds in such a transaction must be allocated between each of the separate issues using a reasonable, consistently applied allocation method. If any separate issue consists of refunding bonds, the allocation rules in §1.148-9(h) must be satisfied. An allocation is not reasonable if it achieves more favorable results under sections 103 and 141 to 150 than could be achieved with actual separate issues. All allocations under this paragraph (c)(3) must be made in writing on or before the issue date.

(ii) *Exceptions.* This paragraph (c)(3) does not apply for purposes of sections 141, 144(a), 148, 149(d) and 149(g).

(4) *Special rules for certain financings*—(i) *Draw-down loans.* Bonds issued pursuant to a draw-down loan are treated

as part of a single issue. The issue date of that issue is the first date on which the aggregate draws under the loan exceed the lesser of \$50,000 or 5 percent of the issue price.

(ii) *Commercial paper*—(A) *In general.* Short-term bonds having a maturity of 270 days or less (*commercial paper*) issued pursuant to the same commercial paper program may be treated as part of a single issue, the issue date of which is the first date the aggregate amount of commercial paper issued under the program exceeds the lesser of \$50,000 or 5 percent of the aggregate issue price of the commercial paper in the program. A commercial paper program is a program to issue commercial paper to finance or refinance the same governmental purpose pursuant to a single master legal document. Commercial paper is not part of the same commercial paper program unless issued during an 18-month period, beginning on the deemed issue date. In addition, commercial paper issued after the end of this 18-month period may be treated as part of the program to the extent issued to refund commercial paper that is part of the program, but only to the extent that—

(1) There is no increase in the principal amount outstanding; and

(2) The program does not have a term in excess of—

(i) 30 years; or

(ii) The period reasonably necessary for the governmental purposes of the program.

(B) *Safe harbor.* The requirement of paragraph (c)(4)(ii)(A)(2) of this section is treated as satisfied if the weighted average maturity of the issue does not exceed 120 percent of the weighted average expected economic life of the property financed by the issue.

(iii) *Certain general obligation bonds.* Except as otherwise provided in paragraph (c)(2) of this section, bonds that are secured by a pledge of the issuer's full faith and credit (or a substantially similar pledge) and sold and issued on the same dates pursuant to a single offering document may be treated as part of the same issue if the issuer so elects on or before the issue date.

(5) *Anti-abuse rule.* In order to prevent the avoidance of sections 103 and 141 through 150 and the general purposes

thereof, the Commissioner may treat bonds as part of the same issue or as part of separate issues to clearly reflect the economic substance of a transaction.

(6) *Sale date.* The sale date of a bond is the first day on which there is a binding contract in writing for the sale or exchange of the bond.

(d) *Definition of refunding issue and related definitions*—(1) *General definition of refunding issue.* *Refunding issue* means an issue of obligations the proceeds of which are used to pay principal, interest, or redemption price on another issue (a *prior issue*, as more particularly defined in paragraph (d)(5) of this section), including the issuance costs, accrued interest, capitalized interest on the refunding issue, a reserve or replacement fund, or similar costs, if any, properly allocable to that refunding issue.

(2) *Exceptions and special rules.* For purposes of paragraph (d)(1) of this section, the following exceptions and special rules apply—

(i) *Payment of certain interest.* An issue is not a refunding issue if the only principal and interest that is paid with proceeds of the issue (determined without regard to the multipurpose issue rules of §1.148-9(h)) is interest on another issue that—

(A) Accrues on the other issue during a one-year period including the issue date of the issue that finances the interest;

(B) Is a capital expenditure; or

(C) Is a working capital expenditure to which the de minimis rule of §1.148-6(d)(3)(ii)(A) applies.

(ii) *Certain issues with different obligors*—(A) *In general.* An issue is not a refunding issue to the extent that the obligor (as defined in paragraph (d)(2)(ii)(B) of this section) of one issue is neither the obligor of the other issue nor a related party with respect to the obligor of the other issue.

(B) *Definition of obligor.* The *obligor* of an issue means the actual issuer of the issue, except that the obligor of the portion of an issue properly allocable to an investment in a purpose investment means the conduit borrower under that purpose investment. The obligor of an issue used to finance qualified mortgage loans, qualified student

loans, or similar program investments (as defined in §1.148-1) does not include the ultimate recipient of the loan (e.g., the homeowner, the student).

(iii) *Certain special rules for purpose investments.* For purposes of this paragraph (d), the following special rules apply:

(A) *Refunding of a conduit financing issue by a conduit loan refunding issue.* Except as provided in paragraph (d)(2)(iii)(B) of this section, the use of the proceeds of an issue that is used to refund an obligation that is a purpose investment (a *conduit refunding issue*) by the actual issuer of the conduit financing issue determines whether the conduit refunding issue is a refunding of the conduit financing issue (in addition to a refunding of the obligation that is the purpose investment).

(B) *Recycling of certain payments under purpose investments.* A conduit refunding issue is not a refunding of a conduit financing issue to the extent that the actual issuer of the conduit financing issue reasonably expects as of the date of receipt of the proceeds of the conduit refunding issue to use those amounts within 6 months (or, if greater, during the applicable temporary period for those amounts under section 148(c) or under applicable prior law) to acquire a new purpose investment. Any new purpose investment is treated as made from the proceeds of the conduit financing issue.

(C) *Application to tax-exempt loans.* For purposes of this paragraph (d), obligations that would be purpose investments (absent section 148(b)(3)(A)) are treated as purpose investments.

(iv) *Substance of transaction controls.* In the absence of other applicable controlling rules under this paragraph (d), the determination of whether an issue is a refunding issue is based on the substance of the transaction in light of all the facts and circumstances.

(v) *Certain integrated transactions in connection with asset acquisition not treated as refunding issues.* If, within six months before or after a person assumes (including taking subject to) obligations of an unrelated party in connection with an asset acquisition (other than a transaction to which section 381(a) applies if the person assuming the obligation is the acquiring cor-

poration within the meaning of section 381(a)), the assumed issue is refinanced, the refinancing issue is not treated as a refunding issue.

(3) *Current refunding issue.* *Current refunding issue* means:

(i) Except as provided in paragraph (d)(3)(ii) of this section, a refunding issue that is issued not more than 90 days before the last expenditure of any proceeds of the refunding issue for the payment of principal or interest on the prior issue; and

(ii) In the case of a refunding issue issued before 1986—

(A) A refunding issue that is issued not more than 180 days before the last expenditure of any proceeds of the refunding issue for the payment of principal or interest on the prior issue; or

(B) A refunding issue if the prior issue had a term of less than 3 years and was sold in anticipation of permanent financing, but only if the aggregate term of all prior issues sold in anticipation of permanent financing was less than 3 years.

(4) *Advance refunding issue.* *Advance refunding issue* means a refunding issue that is not a current refunding issue.

(5) *Prior issue.* *Prior issue* means an issue of obligations all or a portion of the principal, interest, or call premium on which is paid or provided for with proceeds of a refunding issue. A prior issue may be issued before, at the same time as, or after a refunding issue. If the refunded and unrefunded portions of a prior issue are treated as separate issues under §1.148-9(i), for the purposes for which that section applies, except to the extent that the context clearly requires otherwise, references to a prior issue refer only to the refunded portion of that prior issue.

(e) *Controlled group* means a group of entities controlled directly or indirectly by the same entity or group of entities within the meaning of this paragraph (e).

(1) *Direct control.* The determination of direct control is made on the basis of all the relevant facts and circumstances. One entity or group of entities (the *controlling entity*) generally controls another entity or group of entities (the *controlled entity*) for purposes of this paragraph if the controlling entity possesses either of the following

rights or powers and the rights or powers are discretionary and non-ministerial—

(i) The right or power both to approve and to remove without cause a controlling portion of the governing body of the controlled entity; or

(ii) The right or power to require the use of funds or assets of the controlled entity for any purpose of the controlling entity.

(2) *Indirect control.* If a controlling entity controls a controlled entity under the test in paragraph (e)(1) of this section, then the controlling entity also controls all entities controlled, directly or indirectly, by the controlled entity or entities.

(3) *Exception for general purpose governmental entities.* An entity is not a controlled entity under this paragraph (e) if the entity possesses substantial taxing, eminent domain, and police powers. For example, a city possessing substantial amounts of each of these sovereign powers is not a controlled entity of the state.

[T.D. 8476, 58 FR 33549, June 18, 1993; 58 FR 44453, Aug. 23, 1993, as amended by T.D. 8538, 59 FR 24046, May 10, 1994; T.D. 8712, 62 FR 2304, Jan. 16, 1997; T.D. 8718, 62 FR 25513, May 9, 1997; T.D. 9234, 70 FR 75036, Dec. 19, 2005]

**§ 1.150-2 Proceeds of bonds used for reimbursement.**

(a) *Table of contents.* This table of contents contains a listing of the headings contained in § 1.150-2.

- (a) Table of contents.
- (b) Scope.
- (c) Definitions.
- (d) General operating rules for reimbursement expenditures.
  - (1) Official intent.
  - (2) Reimbursement period.
  - (3) Nature of expenditure.
- (e) Official intent rules.
  - (1) Form of official intent.
  - (2) Project description in official intent.
  - (3) Reasonableness of official intent.
- (f) Exceptions to general operating rules.
  - (1) De minimis exception.
  - (2) Preliminary expenditures exception.
- (g) Special rules on refundings.
  - (1) In general—once financed, not reimbursed.
  - (2) Certain proceeds of prior issue used for reimbursement treated as unspent.
- (h) Anti-abuse rules.
  - (1) General rule.
  - (2) One-year step transaction rule.

(i) Authority of the Commissioner to prescribe rules.

(j) Effective date.

- (1) In general.
- (2) Transitional rules.

(b) *Scope.* This section applies to reimbursement bonds (as defined in paragraph (c) of this section) for all purposes of sections 103 and 141 to 150.

(c) *Definitions.* The following definitions apply:

*Issuer* means—

(1) For any private activity bond (excluding a qualified 501(c)(3) bond, qualified student loan bond, qualified mortgage bond, or qualified veterans' mortgage bond), the entity that actually issues the reimbursement bond; and

(2) For any bond not described in paragraph (1) of this definition, either the entity that actually issues the reimbursement bond or, to the extent that the reimbursement bond proceeds are to be loaned to a conduit borrower, that conduit borrower.

*Official intent* means an issuer's declaration of intent to reimburse an original expenditure with proceeds of an obligation.

*Original expenditure* means an expenditure for a governmental purpose that is originally paid from a source other than a reimbursement bond.

*Placed in service* means, with respect to a facility, the date on which, based on all the facts and circumstances—

(1) The facility has reached a degree of completion which would permit its operation at substantially its design level; and

(2) The facility is, in fact, in operation at such level.

*Reimbursement allocation* means an allocation in writing that evidences an issuer's use of proceeds of a reimbursement bond to reimburse an original expenditure. An allocation made within 30 days after the issue date of a reimbursement bond may be treated as made on the issue date.

*Reimbursement bond* means the portion of an issue allocated to reimburse an original expenditure that was paid before the issue date.

(d) *General operating rules for reimbursement expenditures.* Except as otherwise provided, a reimbursement allocation is treated as an expenditure of proceeds of a reimbursement bond for

the governmental purpose of the original expenditure on the date of the reimbursement allocation only if:

(1) *Official intent.* Not later than 60 days after payment of the original expenditure, the issuer adopts an official intent for the original expenditure that satisfies paragraph (e) of this section.

(2) *Reimbursement period*—(i) *In general.* The reimbursement allocation is made not later than 18 months after the later of—

(A) The date the original expenditure is paid; or

(B) The date the project is placed in service or abandoned, but in no event more than 3 years after the original expenditure is paid.

(ii) *Special rule for small issuers.* In applying paragraph (d)(2)(i) of this section to an issue that satisfies section 148(f)(4)(D)(i) (I) through (IV), the “18 month” limitation is changed to “3 years” and the “3-year” maximum reimbursement period is disregarded.

(iii) *Special rule for long-term construction projects.* In applying paragraph (d)(2)(i) to a construction project for which both the issuer and a licensed architect or engineer certify that at least 5 years is necessary to complete construction of the project, the maximum reimbursement period is changed from “3 years” to “5 years.”

(3) *Nature of expenditure.* The original expenditure is a capital expenditure, a cost of issuance for a bond, an expenditure described in §1.148-6(d)(3)(ii)(B) (relating to certain extraordinary working capital items), a grant (as defined in §1.148-6(d)(4)), a qualified student loan, a qualified mortgage loan, or a qualified veterans’ mortgage loan.

(e) *Official intent rules.* An official intent satisfies this paragraph (e) if:

(1) *Form of official intent.* The official intent is made in any reasonable form, including issuer resolution, action by an appropriate representative of the issuer (e.g., a person authorized or designated to declare official intent on behalf of the issuer), or specific legislative authorization for the issuance of obligations for a particular project.

(2) *Project description in official intent*—(i) *In general.* The official intent generally describes the project for which the original expenditure is paid and states the maximum principal

amount of obligations expected to be issued for the project. A project includes any property, project, or program (e.g., *highway capital improvement program, hospital equipment acquisition, or school building renovation*).

(ii) *Fund accounting.* A project description is sufficient if it identifies, by name and functional purpose, the fund or account from which the original expenditure is paid (e.g., *parks and recreation fund—recreational facility capital improvement program*).

(iii) *Reasonable deviations in project description.* Deviations between a project described in an official intent and the actual project financed with reimbursement bonds do not invalidate the official intent to the extent that the actual project is reasonably related in function to the described project. For example, *hospital equipment* is a reasonable deviation from *hospital building improvements*. In contrast, a *city office building rehabilitation* is not a reasonable deviation from *highway improvements*.

(3) *Reasonableness of official intent.* On the date of the declaration, the issuer must have a reasonable expectation (as defined in §1.148-1(b)) that it will reimburse the original expenditure with proceeds of an obligation. Official intents declared as a matter of course or in amounts substantially in excess of the amounts expected to be necessary for the project (e.g., *blanket declarations*) are not reasonable. Similarly, a pattern of failure to reimburse actual original expenditures covered by official intents (other than in extraordinary circumstances) is evidence of unreasonableness. An official intent declared pursuant to a specific legislative authorization is rebuttably presumed to satisfy this paragraph (e)(3).

(f) *Exceptions to general operating rules*—(1) *De minimis exception.* Paragraphs (d)(1) and (d)(2) of this section do not apply to costs of issuance of any bond or to an amount not in excess of the lesser of \$100,000 or 5 percent of the proceeds of the issue.

(2) *Preliminary expenditures exception.* Paragraphs (d)(1) and (d)(2) of this section do not apply to any preliminary expenditures, up to an amount not in excess of 20 percent of the aggregate

issue price of the issue or issues that finance or are reasonably expected by the issuer to finance the project for which the preliminary expenditures were incurred. Preliminary expenditures include architectural, engineering, surveying, soil testing, reimbursement bond issuance, and similar costs that are incurred prior to commencement of acquisition, construction, or rehabilitation of a project, other than land acquisition, site preparation, and similar costs incident to commencement of construction.

(g) *Special rules on refundings*—(1) *In general—once financed, not reimbursed.* Except as provided in paragraph (g)(2) of this section, paragraph (d) of this section does not apply to an allocation to pay principal or interest on an obligation or to reimburse an original expenditure paid by another obligation. Instead, such an allocation is analyzed under rules on refunding issues. See § 1.148-9.

(2) *Certain proceeds of prior issue used for reimbursement treated as unspent.* In the case of a refunding issue (or series of refunding issues), proceeds of a prior issue purportedly used to reimburse original expenditures are treated as unspent proceeds of the prior issue unless the purported reimbursement was a valid expenditure under applicable law on reimbursement expenditures on the issue date of the prior issue.

(h) *Anti-abuse rules*—(1) *General rule.* A reimbursement allocation is not an expenditure of proceeds of an issue under this section if the allocation employs an abusive arbitrage device under § 1.148-10 to avoid the arbitrage restrictions or to avoid the restrictions under sections 142 through 147.

(2) *One-year step transaction rule*—(i) *Creation of replacement proceeds.* A purported reimbursement allocation is invalid and thus is not an expenditure of proceeds of an issue if, within 1 year after the allocation, funds corresponding to the proceeds of a reimbursement bond for which a reimbursement allocation was made are used in a manner that results in the creation of replacement proceeds (as defined in § 1.148-1) of that issue or another issue. The preceding sentence does not apply to amounts deposited in a bona fide

debt service fund (as defined in § 1.148-1).

(ii) *Example.* The provisions of paragraph (h)(2)(i) of this section are illustrated by the following example.

*Example.* On January 1, 1994, County A issues an issue of 7 percent tax-exempt bonds (the 1994 issue) and makes a purported reimbursement allocation to reimburse an original expenditure for specified capital improvements. A immediately deposits funds corresponding to the proceeds subject to the reimbursement allocation in an escrow fund to provide for payment of principal and interest on its outstanding 1991 issue of 9 percent tax-exempt bonds (the prior issue). The use of amounts corresponding to the proceeds of the reimbursement bonds to create a sinking fund for another issue within 1 year after the purported reimbursement allocation invalidates the reimbursement allocation. The proceeds retain their character as unspent proceeds of the 7 percent issue upon deposit in the escrow fund. Accordingly, the proceeds are subject to the 7 percent yield restriction of the 1994 issue instead of the 9 percent yield restriction of the prior issue.

(i) *Authority of the Commissioner to prescribe rules.* The Commissioner may by revenue ruling or revenue procedure (see § 601.601(d)(2)(ii)(b) of this chapter) prescribe rules for the expenditure of proceeds of reimbursement bonds in circumstances that do not otherwise satisfy this section.

(j) *Effective date*—(1) *In general.* The provisions of this section apply to all allocations of proceeds of reimbursement bonds issued after June 30, 1993.

(2) *Transitional rules*—(i) *Official intent.* An official intent is treated as satisfying the official intent requirement of paragraph (d)(1) of this section if it—

(A) Satisfied the applicable provisions of § 1.103-8(a)(5) as in effect prior to July 1, 1993, (as contained in 26 CFR part 1 revised as of April 1, 1993) and was made prior to that date, or

(B) Satisfied the applicable provisions of § 1.103-18 as in effect between January 27, 1992, and June 30, 1993, (as contained in 26 CFR part 1 revised as of April 1, 1993) and was made during that period.

(ii) *Certain expenditures of private activity bonds.* For any expenditure that was originally paid prior to August 15, 1993, and that would have qualified for expenditure by reimbursement from the proceeds of a private activity bond

**Internal Revenue Service, Treasury**

**§ 1.148-1A**

under T.D. 7199, section 1.103-8(a)(5), 1972-2 C.B. 45 (see § 601.601(d)(2)(ii)(b)) of this chapter, the requirements of that section may be applied in lieu of this section.

[T.D. 8476, 58 FR 33551, June 18, 1993; 58 FR 44453, Aug. 23, 1993]

**§ 1.150-4 Change in use of facilities financed with tax-exempt private activity bonds.**

(a) *Scope.* This section applies for purposes of the rules for change of use of facilities financed with private activity bonds under sections 150(b)(3) (relating to qualified 501(c)(3) bonds), 150(b)(4) (relating to certain exempt facility bonds and small issue bonds), 150(b)(5) (relating to facilities required to be owned by governmental units or 501(c)(3) organizations), and 150(c).

(b) *Effect of remedial actions—(1) In general.* Except as provided in this section, the change of use provisions of sections 150(b) (3) through (5), and 150(c) apply even if the issuer takes a remedial action described in §§ 1.142-2, 1.144-2, or 1.145-2.

(2) *Exceptions—(i) Redemption.* If non-qualified bonds are redeemed within 90 days of a deliberate action under § 1.145-2(a) or within 90 days of the date on which a failure to properly use proceeds occurs under § 1.142-2 or § 1.144-2, sections 150(b) (3) through (5) do not apply during the period between that date and the date on which the non-qualified bonds are redeemed.

(ii) *Alternative qualifying use of facility.* If a bond-financed facility is used for an alternative qualifying use under §§ 1.145-2 and 1.141-12(f), sections 150(b) (3) and (5) do not apply because of the alternative use.

(iii) *Alternative use of disposition proceeds.* If disposition proceeds are used for a qualifying purpose under §§ 1.145-2 and 1.141-12(e), 1.142-2(c)(4), or 1.144-2, sections 150(b) (3) through (5) do not apply because of the deliberate action that gave rise to the disposition proceeds after the date on which all of the disposition proceeds have been expended on the qualifying purpose. If all of the disposition proceeds are so expended within 90 days of the date of the deliberate action, however, sections 150(b) (3) through (5) do not apply because of the deliberate action.

(c) *Allocation rules—(1) In general.* If a change in use of a portion of the property financed with an issue of qualified private activity bonds causes section 150 (b)(3), (b)(4), or (b)(5) to apply to an issue, the bonds of the issue allocable to that portion under section 150(c)(3) are the same as the nonqualified bonds determined for purposes of §§ 1.142-1, 1.144-1, and 1.145-1, except that bonds allocable to all common areas are also allocated to that portion.

(2) *Special rule when remedial action is taken.* If an issuer takes a remedial action with respect to an issue of private activity bonds under §§ 1.142-2, 1.144-2, or 1.145-2, the bonds of the issue allocable to a portion of property are the same as the nonqualified bonds determined for purposes of those sections.

(d) *Effective dates.* For effective dates of this section, see § 1.141-16.

[T.D. 8712, 62 FR 2304, Jan. 16, 1997]

**§ 1.150-5 Filing notices and elections.**

(a) *In general.* Notices and elections under the following sections must be filed with the Internal Revenue Service, 1111 Constitution Avenue, NW, Attention: T:GE:TEB:O, Washington, DC 20224 or such other place designated by publication of a notice in the Internal Revenue Bulletin—

- (1) Section 1.141-12(d)(3);
- (2) Section 1.142(f)(4)-1; and
- (3) Section 1.142-2(c)(2).

(b) *Effective dates.* This section applies to notices and elections filed on or after January 19, 2001.

[T.D. 8941, 66 FR 4671, Jan. 18, 2001]

**REGULATIONS APPLICABLE TO CERTAIN BONDS SOLD PRIOR TO JULY 8, 1997**

EDITORIAL NOTE: IRS redesignated the following sections to appear below the undesignated center heading "Regulations Applicable to Certain Bonds Sold Prior to July 8, 1997" and preceding the undesignated center heading "Deductions for Personal Exemptions." See 62 FR 25507 and 25513, May 9, 1997 for the specific sections involved in the redesignation.

**§ 1.148-1A Definitions and elections.**

(a) [Reserved]. For guidance see § 1.148-1.

(b) *Certain definitions.*

## § 1.148-2A

*Investment-type property.* See § 1.148-1(b). Investment-type property also includes a contract that would be a hedge (within the meaning of § 1.148-4(h)) except that it contains a significant investment element.

(c) through (c)(4)(i) [Reserved]. For guidance see § 1.148-1.

(c)(4)(ii) *Bonds financing a working capital reserve—(A) In general.* Except as otherwise provided in § 1.148-1(c)(4)(ii)(B), replacement proceeds arise to the extent a working capital reserve is, directly or indirectly, financed with the proceeds of the issue (regardless of the expenditure of proceeds of the issue). Thus, for example, if an issuer that does not maintain a working capital reserve borrows to fund such a reserve, the issuer will have replacement proceeds. To determine the amount of a working capital reserve maintained, an issuer may use the average amount maintained as a working capital reserve during annual periods of at least one year, the last of which ends within a year before the issue date. For example, the amount of a working capital reserve may be computed using the average of the beginning or ending monthly balances of the amount maintained as a reserve (net of unexpended gross proceeds) during the one year period preceding the issue date.

[T.D. 8538, 59 FR 24041, May 10, 1994. Redesignated by T.D. 8718, 62 FR 25507, May 9, 1997]

## § 1.148-2A General arbitrage yield restriction rules.

(a) through (b)(2)(i) [Reserved]. For guidance see § 1.148-2.

(b)(2)(ii) *Exceptions to certification requirement.* An issuer is not required to make a certification for an issue under § 1.148-2(b)(2)(i) if—

(A) The issuer reasonably expects as of the issue date that there will be no unspent gross proceeds after the issue date, other than gross proceeds in a bona fide debt service fund (e.g., *equipment lease* financings in which the issuer purchases equipment in exchange for an installment payment note); or

(B) The issue price of the issue does not exceed \$1,000,000.

[T.D. 8538, 59 FR 24042, May 10, 1994. Redesignated by T.D. 8718, 62 FR 25507, May 9, 1997]

## 26 CFR Ch. I (4-1-06 Edition)

### § 1.148-3A General arbitrage rebate rules.

(a) through (h)(2) [Reserved]. For guidance see § 1.148-3.

(h)(3) *Waivers of the penalty.* For purposes of § 1.148-3(h)(3), willful neglect does not include a failure that is attributable solely to the permissible retroactive selection of a short first bond year if the rebate amount that the issuer failed to pay is paid within 60 days of the selection of that bond year.

[T.D. 8538, 59 FR 24042, May 10, 1994. Redesignated by T.D. 8718, 62 FR 25507, May 9, 1997]

### § 1.148-4A Yield on an issue of bonds.

(a) through (b)(4) [Reserved]. For guidance see § 1.148-4.

(b)(5) *Special aggregation rule treating certain bonds as a single fixed yield bond.* Two variable yield bonds of an issue are treated in the aggregate as a single fixed yield bond if—

(i) Aggregate treatment would result in the single bond being a fixed yield bond; and

(ii) The terms of the bonds do not contain any features that could distort the aggregate fixed yield from what the yield would be if a single fixed yield bond were issued. For example, if an issue contains a bond bearing interest at a floating rate and a related bond bearing interest at a rate equal to a fixed rate minus that floating rate, those two bonds are treated as a single fixed yield bond only if neither bond may be redeemed unless the other bond is also redeemed at the same time.

(c) through (f) [Reserved]. For guidance see § 1.148-4.

(g) *Yield on certain mortgage revenue and student loan bonds.* For purposes of section 148 and § 1.148-4, section 143(g)(2)(C)(ii) applies to the computation of yield on an issue of qualified mortgage bonds or qualified veterans' mortgage bonds. For purposes of applying sections 148 and 143(g) to a variable yield issue of qualified mortgage bonds, qualified veterans' mortgage bonds, or qualified student loan bonds, the yield on that issue is computed over the term of the issue, and § 1.148-4(d) does not apply to the issue. As of any date before the final maturity date, the yield over the term of the issue is

based on the actual amounts paid or received to that date and the amounts that are reasonably expected (as of that date) to be paid or received over the remaining term of the issue.

(h) *Qualified hedging transactions*—(1) *In general.* Payments made or received by an issuer under a qualified hedge (as defined in § 1.148-4(h)(2)) relating to bonds of an issue are taken into account (as provided in paragraph (h)(3) of this section) to determine the yield on the issue. Except as provided in paragraphs (h)(4) and (h)(5)(ii)(C) of this section, the bonds to which a qualified hedge relates are treated as variable yield bonds. These hedging rules apply solely for purposes of sections 143(g), 148, and 149(d).

(2) (i) through (vi) [Reserved]. For guidance see § 1.148-4(h)(2).

(2)(vii) *Timing and duration.* For a contract to be a qualified hedge under § 1.148-4(h)(2), payments must not begin to accrue under the contract on a date earlier than the issue date of the hedged bonds and must not accrue longer than the hedged interest payments on the hedged bonds.

(viii) [Reserved]. For guidance see § 1.148-4(h).

(ix) *Identification.* For a contract to be a qualified hedge under § 1.148-4(h)(2), the contract must be identified by the actual issuer on its books and records maintained for the hedged bonds not later than three days after the date on which the parties enter into the contract. The identification must specify the hedge provider, the terms of the contract, and the hedged bonds. The identification must contain sufficient detail to establish that the requirements of § 1.148-4(h)(2), and if applicable, paragraph (h)(4) of this section are satisfied. The existence of the hedge must be noted on all forms filed with the Internal Revenue Service for the issue on or after the date on which the hedge is entered into.

(3) *Accounting for qualified hedges*—(i) *In general.* Except as otherwise provided in paragraph (h)(4) of this section, payments made or received by the issuer under a qualified hedge are treated as payments made or received, as appropriate, on the hedged bonds that are taken into account in determining the yield on those bonds. These

payments are reasonably allocated to the hedged bonds in the period to which the payments relate, as determined under paragraph (h)(3)(iii) of this section. Payments made or received by the issuer include payments deemed made or received when a contract is terminated or deemed terminated under this paragraph (h)(3). Payments reasonably allocable to the reduction of risk of interest rate changes and to the hedge provider's overhead under this paragraph (h) are included as payments made or received under a qualified hedge.

(ii) *Exclusions from hedge.* Payments for services or other items under the contract that are not expressly treated as payments under the qualified hedge under paragraph (h)(3)(i) of this section are not payments with respect to a qualified hedge.

(iii) *Timing and allocation of payments.* The period to which a payment made by the issuer relates is determined under general Federal income tax principles, including, without limitation, § 1.446-3, and adjusted as necessary to reflect the end of a computation period and the start of a new computation period. Except as provided in paragraphs (h)(3)(iv) and (h)(5)(ii) of this section, a payment received by the issuer is taken into account in the period that the interest payment that the payment hedges is required to be made.

(iv) *Termination payments*—(A) *Termination defined.* A termination of a qualified hedge includes any sale or other disposition of the hedge by the issuer, or the acquisition by the issuer of an offsetting hedge. A deemed termination occurs when the hedged bonds are redeemed and when a hedge ceases to be a qualified hedge of the hedged bonds. In the case of an assignment by a hedge provider of its remaining rights and obligations on the hedge to a third party or a modification of the hedging contract, the assignment or modification is treated as a termination with respect to the issuer only if it results in a deemed exchange of the hedge and a realization event under section 1001.

(B) *General rule.* A payment made or received by an issuer to terminate a qualified hedge, including loss or gain realized or deemed realized, is treated

as a payment made or received on the hedged bonds, as appropriate. The payment is reasonably allocated to the remaining periods originally covered by the terminated hedge in a manner that reflects the economic substance of the hedge.

(C) *Special rule for terminations when bonds are redeemed.* Except as otherwise provided in this paragraph (h)(3)(iv)(C) and in paragraph (h)(3)(iv)(D) of this section, when a qualified hedge is deemed terminated because the hedged bonds are redeemed, the fair market value of the contract on the redemption date is treated as a termination payment made or received on that date. When hedged bonds are redeemed, any payment received by the issuer on termination of a hedge, including a termination payment or a deemed termination payment, reduces, but not below zero, the interest payments made by the issuer on the hedged bonds in the computation period ending on the termination date. The remainder of the payment, if any, is reasonably allocated over the bond years in the immediately preceding computation period or periods to the extent necessary to eliminate the excess.

(D) *Special rules for refundings.* To the extent that the hedged bonds are redeemed using the proceeds of a refunding issue, the termination payment is accounted for under paragraph (h)(3)(iv)(B) of this section by treating it as a payment on the refunding issue, rather than the hedged bonds. In addition, to the extent that the refunding issue, rather than the hedged bonds, has been redeemed, paragraph (h)(3)(iv)(C) of this section applies to the termination payment by treating it as a payment on the redeemed refunding issue.

(E) *Safe harbor for certain non-level payments.* A non-level payment to terminate a hedge does not result in that hedge failing to satisfy the applicable provisions of paragraph (h)(3)(iv)(B) of this section if the payment is allocated to each bond year for which the hedge would have been in effect in accordance with this paragraph (h)(3)(iv)(E). For a variable yield issue, an equal amount (or for any short bond year, a proportionate amount of the equal amount) must be allocated to each bond year

such that the sum of the present values of the annual amounts equals the present value of the non-level payment. Present value is computed as of the day the hedge is terminated, using the yield on the hedged bonds, determined without regard to the non-level payment. The yield used for this purpose is computed for the period beginning on the first date the hedge is in effect and ending on the date the hedge is terminated. On the other hand, for a fixed yield issue, the non-level payment is taken into account as a single payment on the date it is paid.

(4) *Certain variable yield bonds treated as fixed yield bonds—(i) In general.* Except as otherwise provided in this paragraph (h)(4), if the issuer of variable yield bonds enters into a qualified hedge, the hedged bonds are treated as fixed yield bonds paying a fixed interest rate if:

(A) *Start date.* The date on which payments begin to accrue on the hedge is not later than 15 days after the issue date of the hedged bonds.

(B) *Maturity.* The term of the hedge is equal to the entire period during which the hedged bonds bear interest at variable interest rates.

(C) *Payments closely correspond.* Payments to be received under the hedge correspond closely in time to the hedged portion of the payments on the hedged bonds. Hedge payments received within 15 days of the related payments on the hedged bonds generally so correspond.

(D) *Aggregate payments fixed.* Taking into account all payments made and received under the hedge and all payments on the hedged bonds (*i.e.*, after netting all payments), the issuer's aggregate payments are fixed and determinable as of a date not later than 15 days after the issue date of the hedged bonds. Payments on bonds are treated as fixed for purposes of this paragraph (h)(4)(i)(D) if payments on the bonds are based, in whole or in part, on one interest rate, payments on the hedge are based, in whole or in part, on a second interest rate that is substantially the same as, but not identical to, the first interest rate and payments on the bonds would be fixed if the two rates were identical. Rates are treated as

substantially the same if they are reasonably expected to be substantially the same throughout the term of the hedge. For example, an objective 30-day tax-exempt variable rate index or other objective index (e.g., J.J. Kenny Index, PSA Municipal swap index, a percentage of LIBOR) may be substantially the same as an issuer's individual 30-day interest rate.

(ii) *Accounting.* Except as otherwise provided in this paragraph (h)(4)(ii), in determining yield on the hedged bonds, all the issuer's actual interest payments on the hedged bonds and all payments made and received on a hedge described in paragraph (h)(4)(i) of this section are taken into account. If payments on the bonds and payments on the hedge are based, in whole or in part, on variable interest rates that are substantially the same within the meaning of paragraph (h)(4)(i)(D) of this section (but not identical), yield on the issue is determined by treating the variable interest rates as identical. For example, if variable rate bonds bearing interest at a weekly rate equal to the rate necessary to remarket the bonds at par are hedged with an interest rate swap under which the issuer receives payments based on a short-term floating rate index that is substantially the same as, but not identical to, the weekly rate on the bonds, the interest payments on the bonds are treated as equal to the payments received by the issuer under the swap for purposes of computing the yield on the bonds.

(iii) *Effect of termination—(A) In general.* Except as otherwise provided in this paragraph (h)(4)(iii) and paragraph (h)(5) of this section, the issue of which the hedged bonds are a part is treated as if it were reissued as of the termination date of the qualified hedge covered by paragraph (h)(4)(i) of this section in determining yield on the hedged bonds for purposes of § 1.148-3. The redemption price of the retired issue and the issue price of the new issue equal the aggregate values of all the bonds of the issue on the termination date. In computing the yield on the new issue for this purpose, any termination payment is accounted for under paragraph (h)(3)(iv) of this section, applied by treating the termination payment as

made or received on the new issue under this paragraph (h)(4)(iii).

(B) *Effect of early termination.* Except as otherwise provided in this paragraph (h)(4)(iii), the general rules of paragraph (h)(4)(i) of this section do not apply in determining the yield on the hedged bonds for purposes of § 1.148-3 if the hedge is terminated or deemed terminated within 5 years after the issue date of the issue of which the hedged bonds are a part. Thus, the hedged bonds are treated as variable yield bonds for purposes of § 1.148-3 from the issue date.

(C) *Certain terminations disregarded.* This paragraph (h)(4)(iii) does not apply to a termination if, based on the facts and circumstances (e.g., taking into account both the termination and any qualified hedge that immediately replaces the terminated hedge), there is no change in the yield. In addition, this paragraph (h)(4)(iii) does not apply to a termination caused by the bankruptcy or insolvency of the hedge provider if the Commissioner determines that the termination occurred without any action by the issuer (other than to protect its rights under the hedge).

(5) *Special rules for certain hedges—(i) Certain acquisition payments.* A payment to the issuer by the hedge provider (e.g., an up-front payment for an off-market swap) in connection with the acquisition of a hedge that, but for that payment, would be a qualified hedge, does not cause the hedge to fail to be a qualified hedge provided the payment to the issuer and the issuer's payments under the hedge in excess of those that it would make if the hedge bore rates equal to the on-market rates for the hedge are separately identified in a certification of the hedge provider and not taken into account in determining the yield on the issue of which the hedged bonds are a part. The on-market rates are determined as of the date the parties enter into the contract.

(ii) *Anticipatory hedges—(A) In general.* A contract does not fail to be a hedge under § 1.148-4(h)(2)(i)(A) solely because it is entered into with respect to an anticipated issuance of tax-exempt bonds. The identification required under § 1.148-4T(h)(2)(ix) must

## § 1.148-5A

## 26 CFR Ch. I (4-1-06 Edition)

specify the reasonably expected governmental purpose, principal amount, and issue date of the hedged bonds, and the manner in which interest is reasonably expected to be computed.

(B) *Special rules.* Payments made in connection with the issuance of a bond to terminate or otherwise close (*terminate*) an anticipatory hedge of that bond do not prevent the hedge from satisfying the requirements of § 1.148-4(h)(2)(vi) and paragraph (h)(2)(vii) of this section. Amounts received or deemed to be received by the issuer in connection with the issuance of the hedged bonds to terminate an anticipatory hedge are treated as proceeds of the hedged bonds.

(C) *Fixed yield treatment.* A bond that is hedged with an anticipatory hedge is a fixed yield bond if, taking into account payments on the hedge that are made or fixed on or before the issue date of the bond and the payments to be made on the bond, the bond satisfies the definition of fixed yield bond. See also paragraph (h)(4) of this section.

(6) *Authority of the Commissioner—(i) In general.* A contract is not a qualified hedge if the Commissioner determines, based on all the facts and circumstances, that treating the contract as a qualified hedge would provide a material potential for arbitrage, or a principal purpose for entering into the contract is that arbitrage potential. For example, a contract that requires a substantial nonperiodic payment may constitute, in whole or part, an embedded loan, investment-type property, or other investment.

(ii) *Other qualified hedges.* The Commissioner, by publication of a revenue ruling or revenue procedure, may specify contracts that do not otherwise meet the requirements of § 1.148-4(h)(2) as qualified hedges and contracts that do not otherwise meet the requirements of paragraph (h)(4) of this section as causing the hedged bonds to be treated as fixed yield bonds.

(iii) *Recomputation of yield.* If an issuer enters into a hedge that is not properly identified, fails to properly associate an anticipatory hedge with the hedged bonds, or otherwise fails to meet the requirements of this section, the Commissioner may recompute the yield on the issue taking the hedge

into account if the failure to take the hedge into account distorts that yield or otherwise fails to clearly reflect the economic substance of the transaction.

[T.D. 8538, 59 FR 24042, May 10, 1994. Redesignated by T.D. 8718, 62 FR 25507, May 9, 1997]

### § 1.148-5A Yield and valuation of investments.

(a) through (b)(2)(ii) [Reserved]. For guidance see § 1.148-5.

(b)(2)(iii) *Permissive application of single investment rules to certain yield restricted investments for all purposes of section 148.* For all purposes of section 148, an issuer may treat all of the yield restricted nonpurpose investments in a refunding escrow and a sinking fund that is reasonably expected as of the issue date to be maintained to reduce the yield on the investments in the refunding escrow as a single investment having a single yield, determined under § 1.148(b)(2).

(b) (2)(iv) through (c)(1) [Reserved]. For guidance see § 1.148-5.

(c)(2) *Manner of payment—(i) In general.* Except as otherwise provided in § 1.148-5(c)(2)(ii), an amount is paid under § 1.148-5(c) if it is paid to the United States at the same time and in the same manner as rebate amounts are required to be paid or at such other time or in such manner as the Commissioner may prescribe. For example, yield reduction payments must be made on or before the date of required rebate installment payments as described in § 1.148-3(f). The date a payment is required to be paid is determined without regard to § 1.148-3(h). An amount that is paid untimely is not taken into account under this paragraph (c) unless the Commissioner determines that the failure to pay timely is not due to willful neglect. The provisions of § 1.148-3(i) apply to payments made under § 1.148-5(c).

(c)(2)(ii) through (c)(3)(i) [Reserved]. For guidance see § 1.148-5.

(c)(3)(ii) *Exception to yield reduction payments rule for advance refunding issues.* Section 1.148-5(c)(1) does not apply to investments allocable to gross proceeds of an advance refunding issue, other than—

(A) Transferred proceeds to which § 1.148-5(c)(3)(i)(C) applies;

## Internal Revenue Service, Treasury

## § 1.148-9A

(B) Replacement proceeds to which § 1.148-5(c)(3)(i)(F) applies; and

(C) Transferred proceeds to which § 1.148-5(c)(3)(i)(E) applies, but only to the extent necessary to satisfy yield restriction under section 148(a) on those proceeds treating all investments allocable to those proceeds as a separate class.

(d)(1) through (d)(3)(i) [Reserved]. For guidance see § 1.148-5.

(d)(3)(ii) *Exception to fair market value requirement for transferred proceeds allocations, universal cap allocations, and commingled funds.* Section 1.148-5(d)(3)(i) does not apply if the investment is allocated from one issue to another issue as a result of the transferred proceeds allocation rule under § 1.148-9(b) or the universal cap rule under § 1.148-6(b)(2), provided that both issues consist exclusively of tax-exempt bonds. In addition, § 1.148-5(d)(3)(i) does not apply to investments in a commingled fund (other than a bona fide debt service fund) unless it is an investment being initially deposited in or withdrawn from a commingled fund described in § 1.148-6(e)(5)(iii).

(e)(1) through (e)(2)(i)(A) [Reserved]. For guidance see § 1.148-5.

(e)(2)(ii)(B) *External commingled funds.* For any semiannual period, a commingled fund satisfies the 10 percent requirement of § 1.148-5(e)(2)(ii)(B) if—

(1) Based on average amounts on deposit, this requirement was satisfied for the prior semiannual period; and

(2) The fund does not accept deposits that would cause it to fail to meet this requirement.

(iii) *Special rule for guaranteed investment contracts.* For a guaranteed investment contract, a broker's commission or similar fee paid on behalf of either an issuer or the provider is treated as an administrative cost and, except in the case of an issue that satisfies section 148(f)(4)(D)(i), is not a qualified administrative cost to the extent that the present value of the commission, as of the date the contract is allocated to the issue, exceeds the present value of annual payments equal to .05 percent of the weighted average amount reasonably expected to be invested each year of the term of the contract. For this purpose, present value is computed using the taxable discount rate used by

the parties to compute the commission or, if not readily ascertainable, a reasonable taxable discount rate.

[T.D. 8538, 59 FR 24045, May 10, 1994. Redesignated by T.D. 8718, 62 FR 25507, May 9, 1997]

### § 1.148-6A General allocation and accounting rules.

(a) through (d)(3)(iii)(B) [Reserved]. For guidance see § 1.148-6.

(d)(3)(iii)(C) *Qualified endowment funds treated as unavailable.* For a 501(c)(3) organization, a qualified endowment fund is treated as unavailable. A fund is a qualified endowment fund if—

(1) The fund is derived from gifts or bequests, or the income thereon, that were neither made nor reasonably expected to be used to pay working capital expenditures;

(2) Pursuant to reasonable, established practices of the organization, the governing body of the 501(c)(3) organization designates and consistently operates the fund as a permanent endowment fund or quasi-endowment fund restricted as to use; and

(3) There is an independent verification (e.g., from an independent certified public accountant) that the fund is reasonably necessary as part of the organization's permanent capital.

[T. D. 8538, 59 FR 24045, May 10, 1994. Redesignated by T.D. 8718, 62 FR 25507, May 9, 1997]

### § 1.148-9A Arbitrage rules for refunding issues.

(a) through (c)(2)(ii)(A) [Reserved]. For guidance see § 1.148-9.

(c)(2)(ii)(B) *Permissive allocation of non-proceeds to earliest expenditures.* Excluding amounts covered by § 1.148-9(c)(2)(ii)(A) and subject to any required earlier expenditure of those amounts, any amounts in a mixed escrow that are not proceeds of a refunding issue may be allocated to the earliest maturing investments in the mixed escrow, provided that those investments mature and the proceeds thereof are expended before the date of any expenditure from the mixed escrow to pay any principal of the prior issue.

(d) through (h)(4)(v) [Reserved]. For guidance see § 1.148-9.

(h)(4)(vi) *Exception for refundings of interim notes.* Section 1.148-9(h)(4)(v) need not be applied to refunding bonds

## § 1.148-10A

## 26 CFR Ch. I (4-1-06 Edition)

issued to provide permanent financing for one or more projects if the prior issue had a term of less than 3 years and was sold in anticipation of permanent financing, but only if the aggregate term of all prior issues sold in anticipation of permanent financing was less than 3 years.

[T.D. 8538, 59 FR 24045, May 10, 1994. Redesignated by T.D. 8718, 62 FR 25507, May 9, 1997]

### § 1.148-10A Anti-abuse rules and authority of Commissioner.

(a) through (b)(1) [Reserved]. For guidance see § 1.148-10.

(b)(2) *Application.* The provisions of § 1.148-10(b) only apply to the portion of an issue that, as a result of actions taken (or actions not taken) after the issue date, overburdens the market for tax-exempt bonds, except that for an issue that is reasonably expected as of the issue date to overburden the market, those provisions apply to all of the gross proceeds of the issue.

(c) through (c)(2)(viii) [Reserved]. For guidance see § 1.148-10.

(c)(2)(ix) For purposes of § 1.148-10(c)(2), excess gross proceeds do not include gross proceeds allocable to fees for a qualified hedge for the refunding issue.

[T.D. 8538, 59 FR 24046, May 10, 1994. Redesignated by T.D. 8718, 62 FR 25507, May 9, 1997]

### § 1.148-11A Effective dates.

(a) through (c)(3) [Reserved]. For guidance see § 1.148-11.

(c)(4) *Retroactive application of overpayment recovery provisions.* An issuer may apply the provisions of § 1.148-3(i) to any issue that is subject to section 148(f) or to sections 103(c)(6) or 103A(i) of the Internal Revenue Code of 1954.

(d) through (h) [Reserved]. For guidance see § 1.148-11.

(i) *Transition rules for certain amendments—(1) In general.* Section 1.103-8(a)(5), §§ 1.148-1, 1.148-2, 1.148-3, 1.148-4, 1.148-5, 1.148-6, 1.148-7, 1.148-8, 1.148-9, 1.148-10, 1.148-11, 1.149(d)-1, and 1.150-1 as in effect on June 7, 1994 (see 26 CFR part 1 as revised April 1, 1997), and §§ 1.148-1A through 1.148-11A, 1.149(d)-1A, and 1.150-1A apply, in whole, but not in part—

(i) To bonds sold after June 6, 1994, and before July 8, 1997;

(ii) To bonds issued before July 1, 1993, that are outstanding on June 7, 1994, if the first time the issuer applies §§ 1.148-1 through 1.148-11 as in effect on June 7, 1994 (see 26 CFR part 1 as revised April 1, 1997), to the bonds under § 1.148-11 (b) or (c) is after June 6, 1994, and before July 8, 1997;

(iii) At the option of the issuer, to bonds to which §§ 1.148-1 through 1.148-11, as in effect on July 1, 1993 (see 26 CFR part 1 as revised April 1, 1994), apply, if the bonds are outstanding on June 7, 1994, and the issuer applies § 1.103-8(a)(5), §§ 1.148-1, 1.148-2, 1.148-3, 1.148-4, 1.148-5, 1.148-6, 1.148-7, 1.148-8, 1.148-9, 1.148-10, 1.148-11, 1.149(d)-1, and 1.150-1 as in effect on June 7, 1994 (see 26 CFR part 1 as revised April 1, 1997), and §§ 1.148-1A through 1.148-11A, 1.149(d)-1A, and 1.150-1A to the bonds before July 8, 1997.

(2) *Special rule.* For purposes of paragraph (i)(1) of this section, any reference to a particular paragraph of §§ 1.148-1T, 1.148-2T, 1.148-3T, 1.148-4T, 1.148-5T, 1.148-6T, 1.148-9T, 1.148-10T, 1.148-11T, 1.149(d)-1T, or 1.150-1T shall be applied as a reference to the corresponding paragraph of §§ 1.148-1A, 1.148-2A, 1.148-3A, 1.148-4A, 1.148-5A, 1.148-6A, 1.148-9A, 1.148-10A, 1.148-11A, 1.149(d)-1A, or 1.150-1A, respectively.

(3) *Identification of certain hedges.* For any hedge entered into after June 18, 1993, and on or before June 6, 1994, that would be a qualified hedge within the meaning of § 1.148-4(h)(2), as in effect on June 7, 1994 (see 26 CFR part 1 as revised April 1, 1997), except that the hedge does not meet the requirements of § 1.148-4A(h)(2)(ix) because the issuer failed to identify the hedge not later than 3 days after which the issuer and the provider entered into the contract, the requirements of § 1.148-4A(h)(2)(ix) are treated as met if the contract is identified by the actual issuer on its books and records maintained for the hedged bonds not later than July 8, 1997.

[T.D. 8538, 59 FR 24046, May 10, 1994. Redesignated and amended by T.D. 8718, 62 FR 25507, 25513, May 9, 1997]

### § 1.149(d)-1A Limitations on advance refundings.

(a) Through (f)(2) [Reserved]. For guidance see § 1.149(d)-1.

## Internal Revenue Service, Treasury

## § 1.151-1

(f)(3) *Application of savings test to multipurpose issues.* Except as otherwise provided in this paragraph (f)(3), the multipurpose issue rules in §1.148-9(h) apply for purposes of the savings test. If any separate issue in a multipurpose issue increases the aggregate present value debt service savings on the entire multipurpose issue or reduces the present value debt service losses on that entire multipurpose issue, that separate issue satisfies the savings test.

[T.D. 8538, 59 FR 24046, May 10, 1994. Redesignated by T.D. 8718, 62 FR 25513, May 9, 1997]

### § 1.150-1A Definitions.

(a) through (b) [Reserved]. For guidance see §1.150-1.

(c) *Definition of issue*—(1) *In general.* Except as otherwise provided, the provisions of this paragraph (c) apply for all purposes of sections 103 and 141 through 150. Except as otherwise provided in this paragraph (c), two or more bonds are treated as part of the same issue if all of the following factors are present:

(i) *Sold at substantially the same time.* The bonds are sold at substantially the same time. Bonds are treated as sold at substantially the same time if they are sold less than 15 days apart. For this purpose only, a variable yield bond is treated as sold on its issue date.

(ii) *Sold pursuant to the same plan of financing.* The bonds are sold pursuant to the same plan of financing. Factors material to the plan of financing include the purposes for the bonds and the structure of the financing. For example, generally—

(A) Bonds to finance a single facility or related facilities are part of the same plan of financing;

(B) Short-term bonds to finance working capital expenditures and long-term bonds to finance capital projects are not part of the same plan of financing; and

(C) Certificates of participation in a lease and general obligation bonds secured by tax revenues are not part of the same plan of financing.

(iii) *Payable from same source of funds.* The bonds are reasonably expected to be paid from substantially the same source of funds, determined without re-

gard to guarantees from parties unrelated to the obligor.

(2) through (4)(ii) [Reserved]. For guidance see §1.150-1 (c)(3) through (c)(4)(ii).

(c)(4)(iii) *Certain general obligation bonds.* Bonds are part of the same issue if secured by a pledge of the issuer's full faith and credit (or a substantially similar pledge) and sold and issued on the same dates pursuant to a single offering document.

(5) [Reserved]. For guidance see §1.150-1(c)(5).

(6) *Sale date.* The sale date of a bond is the first day on which there is a binding contract in writing for the sale or exchange of the bond.

[T.D. 8538, 59 FR 24046, May 10, 1994. Redesignated by T.D. 8718, 62 FR 25513, May 9, 1997]

## DEDUCTIONS FOR PERSONAL EXEMPTIONS

### § 1.151-1 Deductions for personal exemptions.

(a) *In general.* (1) In computing taxable income, an individual is allowed a deduction for the exemptions specified in section 151. Such exemptions are: (i) The exemptions for an individual taxpayer and spouse (the so-called personal exemptions); (ii) the additional exemptions for a taxpayer attaining the age of 65 years and spouse attaining the age of 65 years (the so-called old-age exemptions); (iii) the additional exemptions for a blind taxpayer and a blind spouse; and (iv) the exemptions for dependents of the taxpayer.

(2) A nonresident alien individual who is a bona fide resident of Puerto Rico during the entire taxable year and subject to tax under section 1 or 1201(b) is allowed as deductions the exemptions specified in section 151, even though as to the United States such individual is a nonresident alien. See section 876 and the regulations thereunder, relating to alien residents of Puerto Rico.

(b) *Exemptions for individual taxpayer and spouse (so-called personal exemptions).* Section 151(b) allows an exemption for the taxpayer and an additional exemption for the spouse of the taxpayer if a joint return is not made by the taxpayer and his spouse, and if the spouse, for the calendar year in which

the taxable year of the taxpayer begins, has no gross income and is not the dependent of another taxpayer. Thus, a husband is not entitled to an exemption for his wife on his separate return for the taxable year beginning in a calendar year during which she has any gross income (though insufficient to require her to file a return). Since, in the case of a joint return, there are two taxpayers (although under section 6013 there is only one income for the two taxpayers on such return, *i.e.*, their aggregate income), two exemptions are allowed on such return, one for each taxpayer spouse. If in any case a joint return is made by the taxpayer and his spouse, no other person is allowed an exemption for such spouse even though such other person would have been entitled to claim an exemption for such spouse as a dependent if such joint return had not been made.

(c) *Exemptions for taxpayer attaining the age of 65 and spouse attaining the age of 65 (so-called old-age exemptions).* (1) Section 151(c) provides an additional exemption for the taxpayer if he has attained the age of 65 before the close of his taxable year. An additional exemption is also allowed to the taxpayer for his spouse if a joint return is not made by the taxpayer and his spouse and if the spouse has attained the age of 65 before the close of the taxable year of the taxpayer and, for the calendar year in which the taxable year of the taxpayer begins, the spouse has no gross income and is not the dependent of another taxpayer. If a husband and wife make a joint return, an old-age exemption will be allowed as to each taxpayer spouse who has attained the age of 65 before the close of the taxable year for which the joint return is made. The exemptions under section 151(c) are in addition to the exemptions for the taxpayer and spouse under section 151(b).

(2) In determining the age of an individual for the purposes of the exemption for old age, the last day of the taxable year of the taxpayer is the controlling date. Thus, in the event of a separate return by a husband, no additional exemption for old age may be claimed for his spouse unless such spouse has attained the age of 65 on or before the close of the taxable year of

the husband. In no event shall the additional exemption for old age be allowed with respect to a spouse who dies before attaining the age of 65 even though such spouse would have attained the age of 65 before the close of the taxable year of the taxpayer. For the purposes of the old-age exemption, an individual attains the age of 65 on the first moment of the day preceding his sixty-fifth birthday. Accordingly, an individual whose sixty-fifth birthday falls on January 1 in a given year attains the age of 65 on the last day of the calendar year immediately preceding.

(d) *Exemptions for the blind.* (1) Section 151(d) provides an additional exemption for the taxpayer if he is blind at the close of his taxable year. An additional exemption is also allowed to the taxpayer for his spouse if the spouse is blind and, for the calendar year in which the taxable year of the taxpayer begins, has no gross income and is not the dependent of another taxpayer. The determination of whether the spouse is blind shall be made as of the close of the taxable year of the taxpayer, unless the spouse dies during such taxable year, in which case such determination shall be made as of the time of such death.

(2) The exemptions for the blind are in addition to the exemptions for the taxpayer and spouse under section 151(b) and are also in addition to the exemptions under section 151(c) for taxpayers and spouses attaining the age of 65 years. Thus, a single individual who has attained the age of 65 before the close of his taxable year and who is blind at the close of his taxable year is entitled, in addition to the so-called personal exemption, to two further exemptions, one by reason of his age and the other by reason of his blindness. If a husband and wife make a joint return, an exemption for the blind will be allowed as to each taxpayer spouse who is blind at the close of the taxable year for which the joint return is made.

(3) A taxpayer claiming an exemption allowed by section 151(d) for a blind taxpayer and a blind spouse shall, if the individual for whom the exemption is claimed is not totally blind as of the last day of the taxable year of the taxpayer (or, in the case of a spouse who

dies during such taxable year, as of the time of such death), attach to his return a certificate from a physician skilled in the diseases of the eye or a registered optometrist stating that as of the applicable status determination date in the opinion of such physician or optometrist (i) the central visual acuity of the individual for whom the exemption is claimed did not exceed 20/200 in the better eye with correcting lenses or (ii) such individual's visual acuity was accompanied by a limitation in the fields of vision such that the widest diameter of the visual field subtends an angle no greater than 20 degrees. If such individual is totally blind as of the status determination date there shall be attached to the return a statement by the person or persons making the return setting forth such fact.

(4) Notwithstanding subparagraph (3) of this paragraph, this subparagraph may be applied where the individual for whom an exemption under section 151(d) is claimed is not totally blind, and in the certified opinion of an examining physician skilled in the diseases of the eye there is no reasonable probability that the individual's visual acuity will ever improve beyond the minimum standards described in subparagraph (3) of this paragraph. In this event, if the examination occurs during a taxable year for which the exemption is claimed, and the examining physician certifies that, in his opinion, the condition is irreversible, and a copy of this certification is filed with the return for that taxable year, then a statement described in subparagraph (3) of this paragraph need not be attached to such individual's return for subsequent taxable years so long as the condition remains irreversible. The taxpayer shall retain a copy of the certified opinion in his records, and a statement referring to such opinion shall be attached to future returns claiming the section 151(d) exemption.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 7114, 36 FR 9018, May 18, 1971; T.D. 7230, 37 FR 28288, Dec. 22, 1972]

#### § 1.151-2 Additional exemptions for dependents.

(a) Section 151(e) allows to a taxpayer an exemption for each dependent

(as defined in section 152) whose gross income (as defined in section 61) for the calendar year in which the taxable year of the taxpayer begins is less than the amount provided in section 151(e)(1)(A) applicable to the taxable year of the taxpayer, or who is a child of the taxpayer and who—

(1) The taxable year of the taxpayer begins, or

(2) Is a student, as defined in paragraph (b) of § 1.151-3.

No exemption shall be allowed under section 151(e) for any dependent who has made a joint return with his spouse under section 6013 for the taxable year beginning in the calendar year in which the taxable year of the taxpayer begins. The amount provided in section 151(e)(1)(A) is \$750 in the case of a taxable year beginning after December 31, 1972; \$700 in the case of a taxable year beginning after December 31, 1971, and before January 1, 1973; \$650 in the case of a taxable year beginning after December 31, 1970, and before January 1, 1972; \$625 in the case of a taxable year beginning after December 31, 1969, and before January 1, 1971; and \$600 in the case of a taxable year beginning before January 1, 1970. For special rules in the case of a taxpayer whose taxable year is a fiscal year ending after December 31, 1969, and beginning before January 1, 1973, see section 21(d) and the regulations thereunder.

(b) The only exemption allowed for a dependent of the taxpayer is that provided by section 151(e). The exemptions provided by section 151(c) (old-age exemptions) and section 151(d) (exemptions for the blind) are allowed only for the taxpayer or his spouse. For example, where a taxpayer provides the entire support for his father who meets all the requirements of a dependent, he is entitled to only one exemption for his father (section 151(e)), even though his father is over the age of 65.

[T.D. 7114, 36 FR 9019, May 18, 1971]

#### § 1.151-3 Definitions.

(a) *Child*. For purposes of sections 151(e), 152, and the regulations thereunder, the term "child" means a son, stepson, daughter, stepdaughter, adopted son, adopted daughter, or for taxable years beginning after December 31,

## § 1.151-4

1958, a child who is a member of an individual's household if the child was placed with the individual by an authorized placement agency for legal adoption pursuant to a formal application filed by the individual with the agency (see paragraph (c)(2) of § 1.152-2), or, for taxable years beginning after December 31, 1969, a foster child (if such foster child satisfies the requirements set forth in paragraph (b) of § 1.152-1 with respect to the taxpayer) of the taxpayer.

(b) *Student*. For purposes of section 151(e) and section 152(d), and the regulations thereunder, the term "student" means an individual who during each of 5 calendar months during the calendar year in which the taxable year of the taxpayer begins is a full-time student at an educational institution or is pursuing a full-time course of institutional on-farm training under the supervision of an accredited agent of an educational institution or of a State or political subdivision of a State. An example of "institutional on-farm training" is that authorized by 38 U.S.C. 1652 (formerly section 252 of the Veterans' Readjustment Assistance Act of 1952), as described in section 252 of such act. A full-time student is one who is enrolled for some part of 5 calendar months for the number of hours or courses which is considered to be full-time attendance. The 5 calendar months need not be consecutive. School attendance exclusively at night does not constitute full-time attendance. However, full-time attendance at an educational institution may include some attendance at night in connection with a full-time course of study.

(c) *Educational institution*. For purposes of sections 151(e) and 152, and the regulations thereunder, the term "educational institution" means a school maintaining a regular faculty and established curriculum, and having an organized body of students in attendance. It includes primary and secondary schools, colleges, universities, normal schools, technical schools, mechanical schools, and similar institutions, but does not include noneducational institutions, on-the-job train-

## 26 CFR Ch. I (4-1-06 Edition)

ing, correspondence schools, night schools, and so forth.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 7051, 35 FR 11020, July 9, 1970]

### § 1.151-4 Amount of deduction for each exemption under section 151.

The amount allowed as a deduction for each exemption under section 151 is (a) \$750 in the case of a taxable year beginning after December 31, 1972; (b) \$700 in the case of a taxable year beginning after December 31, 1971, and before January 1, 1973; (c) \$650 in the case of a taxable year beginning after December 31, 1970, and before January 1, 1972; (d) \$625 in the case of a taxable year beginning after December 31, 1969, and before January 1, 1971; and (e) \$600 in the case of a taxable year beginning before January 1, 1970. For special rules in the case of a fiscal year ending after December 31, 1969, and beginning before January 1, 1973, see section 21(d) and the regulations thereunder.

[T.D. 7114, 36 FR 9019, May 18, 1971]

### § 1.152-1 General definition of a dependent.

(a)(1) For purposes of the income taxes imposed on individuals by chapter 1 of the Code, the term "dependent" means any individual described in paragraphs (1) through (10) of section 152(a) over half of whose support, for the calendar year in which the taxable year of the taxpayer begins, was received from the taxpayer.

(2)(i) For purposes of determining whether or not an individual received, for a given calendar year, over half of his support from the taxpayer, there shall be taken into account the amount of support received from the taxpayer as compared to the entire amount of support which the individual received from all sources, including support which the individual himself supplied. The term "support" includes food, shelter, clothing, medical and dental care, education, and the like. Generally, the amount of an item of support will be the amount of expense incurred by the one furnishing such item. If the item of support furnished an individual is in the form of property or lodging, it will be necessary to measure

the amount of such item of support in terms of its fair market value.

(ii) In computing the amount which is contributed for the support of an individual, there must be included any amount which is contributed by such individual for his own support, including income which is ordinarily excludable from gross income, such as benefits received under the Social Security Act (42 U.S.C. ch. 7). For example, a father receives \$800 social security benefits, \$400 interest, and \$1,000 from his son during 1955, all of which sums represent his sole support during that year. The fact that the social security benefits of \$800 are not includible in the father's gross income does not prevent such amount from entering into the computation of the total amount contributed for the father's support. Consequently, since the son's contribution of \$1,000 was less than one-half of the father's support (\$2,200) he may not claim his father as a dependent.

(iii)(a) For purposes of determining the amount of support furnished for a child (or children) by a taxpayer for a given calendar year, an arrearage payment made in a year subsequent to a calendar year for which there is an unpaid liability shall not be treated as paid either during that calendar year or in the year of payment, but no amount shall be treated as an arrearage payment to the extent that there is an unpaid liability (determined without regard to such payment) with respect to the support of a child for the taxable year of payment; and

(b) Similarly, payments made prior to any calendar year (whether or not made in the form of a lump sum payment in settlement of the parent's liability for support) shall not be treated as made during such calendar year, but payments made during any calendar year from amounts set aside in trust by a parent in a prior year, shall be treated as made during the calendar year in which paid.

(b) Section 152(a)(9) applies to any individual (other than an individual who at any time during the taxable year was the spouse, determined without regard to section 153, of the taxpayer) who lives with the taxpayer and is a member of the taxpayer's household during the entire taxable year of the

taxpayer. An individual is not a member of the taxpayer's household if at any time during the taxable year of the taxpayer the relationship between such individual and the taxpayer is in violation of local law. It is not necessary under section 152(a)(9) that the dependent be related to the taxpayer. For example, foster children may qualify as dependents. It is necessary, however, that the taxpayer both maintain and occupy the household. The taxpayer and dependent will be considered as occupying the household for such entire taxable year notwithstanding temporary absences from the household due to special circumstances. A non-permanent failure to occupy the common abode by reason of illness, education, business, vacation, military service, or a custody agreement under which the dependent is absent for less than six months in the taxable year of the taxpayer, shall be considered temporary absence due to special circumstances. The fact that the dependent dies during the year shall not deprive the taxpayer of the deduction if the dependent lived in the household for the entire part of the year preceding his death. Likewise, the period during the taxable year preceding the birth of an individual shall not prevent such individual from qualifying as a dependent under section 152(a)(9). Moreover, a child who actually becomes a member of the taxpayer's household during the taxable year shall not be prevented from being considered a member of such household for the entire taxable year, if the child is required to remain in a hospital for a period following its birth, and if such child would otherwise have been a member of the taxpayer's household during such period.

(c) In the case of a child of the taxpayer who is under 19 or who is a student, the taxpayer may claim the dependency exemption for such child provided he has furnished more than one-half of the support of such child for the calendar year in which the taxable year of the taxpayer begins, even though the income of the child for such calendar year may be equal to or in excess of the amount determined pursuant to §1.151-2 applicable to such calendar year. In such a case, there may

be two exemptions claimed for the child: One on the parent's (or step-parent's) return, and one on the child's return. In determining whether the taxpayer does in fact furnish more than one-half of the support of an individual who is a child, as defined in paragraph (a) of §1.151-3, of the taxpayer and who is a student, as defined in paragraph (b) of §1.151-3, a special rule regarding scholarships applies. Amounts received as scholarships, as defined in paragraph (a) of §1.117-3, for study at an educational institution shall not be considered in determining whether the taxpayer furnishes more than one-half the support of such individual. For example, A has a child who receives a \$1,000 scholarship to the X college for 1 year. A contributes \$500, which constitutes the balance of the child's support for that year. A may claim the child as a dependent, as the \$1,000 scholarship is not counted in determining the support of the child. For purposes of this paragraph, amounts received for tuition payments and allowances by a veteran under the provisions of the Servicemen's Readjustment Act of 1944 (58 Stat. 284) or the Veterans' Readjustment Assistance Act of 1952 (38 U.S.C. ch. 38) are not amounts received as scholarships. See also §1.117-4. For definition of the terms "child", "student", and "educational institution", as used in this paragraph, see §1.151-3.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6603, 28 FR 7094, July 11, 1963; T.D. 7099, 36 FR 5337, Mar. 20, 1971; T.D. 7114, 36 FR 9019, May 18, 1971]

**§ 1.152-2 Rules relating to general definition of dependent.**

(a)(1) Except as provided in subparagraph (2) of this paragraph, to qualify as a dependent an individual must be a citizen or resident of the United States or be a resident of the Canal Zone, the Republic of Panama, Canada, or Mexico, or, for taxable years beginning after December 31, 1971, a national of the United States, at some time during the calendar year in which the taxable year of the taxpayer begins. A resident of the Republic of the Philippines who was born to or legally adopted by the taxpayer in the Philippine Islands before January 1, 1956, at a time when the

taxpayer was a member of the Armed Forces of the United States, may also be claimed as a dependent if such resident otherwise qualifies as a dependent. For definition of "Armed Forces of the United States," see section 7701(a)(15).

(2)(i) For any taxable year beginning after December 31, 1957, a taxpayer who is a citizen, or, for any taxable year beginning after December 31, 1971, a national, of the United States is permitted under section 152(b)(3)(B) to treat as a dependent his legally adopted child who lives with him, as a member of his household, for the entire taxable year and who, but for the citizenship, nationality, or residence requirements of section 152(b)(3) and subparagraph (1) of this paragraph, would qualify as a dependent of the taxpayer for such taxable year.

(ii) Under section 152(b)(3)(B) and this subparagraph, it is necessary that the taxpayer both maintain and occupy the household. The taxpayer and his legally adopted child will be considered as occupying the household for the entire taxable year of the taxpayer notwithstanding temporary absences from the household due to special circumstances. A nonpermanent failure to occupy the common abode by reason of illness, education, business, vacation, military service, or a custody agreement under which the legally adopted child is absent for less than six months in the taxable year of the taxpayer shall be considered temporary absence due to special circumstances. The fact that a legally adopted child dies during the year shall not deprive the taxpayer of the deduction if the child lived in the household for the entire part of the year preceding his death. The period during the taxable year preceding the birth of a child shall not prevent such child from qualifying as a dependent under this subparagraph. Moreover, a legally adopted child who actually becomes a member of the taxpayer's household during the taxable year shall not be prevented from being considered a member of such household for the entire taxable year, if the child is required to remain in a hospital for a period following its birth and if such child would otherwise have been a

member of the taxpayer's household during such period.

(iii) For purposes of section 152(b)(3)(B) and this subparagraph, any child whose legal adoption by the taxpayer (a citizen or national of the United States) becomes final at any time before the end of the taxable year of the taxpayer shall not be disqualified as a dependent of such taxpayer by reason of his citizenship, nationality, or residence, provided the child lived with the taxpayer and was a member of the taxpayer's household for the entire taxable year in which the legal adoption became final. For example, A, a citizen of the United States who makes his income tax returns on the basis of the calendar year, is employed in Brazil by an agency of the United States Government. In October 1958 he takes into his household C, a resident of Brazil who is not a citizen of the United States, for the purpose of initiating adoption proceedings. C lives with A and is a member of his household for the remainder of 1958 and for the entire calendar year 1959. On July 1, 1959, the adoption proceedings were completed and C became the legally adopted child of A. If C otherwise qualifies as a dependent, he may be claimed as a dependent by A for 1959.

(b) A payment to a wife which is includible in her gross income under section 71 or section 682 shall not be considered a payment by her husband for the support of any dependent.

(c)(1) For purposes of determining the existence of any of the relationships specified in section 152 (a) or (b)(1), a legally adopted child of an individual shall be treated as a child of such individual by blood.

(2) For any taxable year beginning after December 31, 1958, a child who is a member of an individual's household also shall be treated as a child of such individual by blood if the child was placed with the individual by an authorized placement agency for legal adoption pursuant to a formal application filed by the individual with the agency. For purposes of this subparagraph an authorized placement agency is any agency which is authorized by a State, the District of Columbia, a possession of the United States, a foreign country, or a political subdivision of

any of the foregoing to place children for adoption. A taxpayer who claims as a dependent a child placed with him for adoption shall attach to his income tax return a statement setting forth the name of the child for whom the dependency deduction is claimed, the name and address of the authorized placement agency, and the date the formal application was filed with the agency.

(3) The application of this paragraph may be illustrated by the following example:

*Example.* On March 1, 1959, D, a resident of the United States, made formal application to an authorized child placement agency for the placement of E, a resident of the United States, with him for legal adoption. On June 1, 1959, E was placed with D for legal adoption. During the year 1959 E received over one-half of his support from D. D may claim E as a dependent for 1959. Since E was a resident of the United States, his qualification as a dependent is in no way based on the provisions of section 152(b)(3)(B). Therefore, it is immaterial that E was not a member of D's household during the entire taxable year.

(4) For purposes of determining the existence of any of the relationships specified in section 152 (a) or (b)(1), a foster child of an individual (if such foster child satisfies the requirements set forth in paragraph (b) of §1.152-1 with respect to such individual) shall, for taxable years beginning after December 31, 1969, be treated as a child of such individual by blood. For purposes of this subparagraph, a foster child is a child who is in the care of a person or persons (other than the parents or adopted parents of the child) who care for the child as their own child. Status as a foster child is not dependent upon or affected by the circumstances under which the child became a member of the household.

(d) In the case of a joint return it is not necessary that the prescribed relationship exist between the person claimed as a dependent and the spouse who furnishes the support; it is sufficient if the prescribed relationship exists with respect to either spouse. Thus, a husband and wife making a joint return may claim as a dependent a daughter of the wife's brother (wife's niece) even though the husband is the one who furnishes the chief support. The relationship of affinity once existing will not terminate by divorce or

**§ 1.152-3**

the death of a spouse. For example, a widower may continue to claim his deceased wife's father (his father-in-law) as a dependent provided he meets the other requirements of section 151.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6603, 28 FR 7094, July 11, 1963; T.D. 7051, 35 FR 11020, July 9, 1970; T.D. 7291, 38 FR 33396, Dec. 4, 1973]

**§ 1.152-3 Multiple support agreements.**

(a) Section 152(c) provides that a taxpayer shall be treated as having contributed over half of the support of an individual for the calendar year (in cases where two or more taxpayers contributed to the support of such individual) if—

(1) No one person contributed over half of the individual's support,

(2) Each member of the group which collectively contributed more than half of the support of the individual would have been entitled to claim the individual as a dependent but for the fact that he did not contribute more than one-half of such support.

(3) The member of the group claiming the individual as a dependent contributed more than 10 percent of the individual's support, and

(4) Each other person in the group who contributed more than 10 percent of such support furnishes to the taxpayer claiming the dependent a written declaration that such other person will not claim the individual as a dependent for any taxable year beginning in such calendar year.

(b) *Examples.* Application of the rule contained in paragraph (a) of this section may be illustrated by the following examples:

*Example (1).* During the taxable year, brothers A, B, C, and D contributed the entire support of their mother in the following percentages: A, 30 percent; B, 20 percent; C, 29 percent; and D, 21 percent. Any one of the brothers, except for the fact that he did not contribute more than half of her support, would have been entitled to claim his mother as a dependent. Consequently, any one of the brothers could claim a deduction for the exemption of the mother if he obtained a written declaration (as provided in paragraph (a)(4) of this section) from each of the other brothers. Even though A and D together contributed more than one-half the support of the mother, A, if he wished to claim his mother as a dependent, would be

required to obtain written declarations from B, C, and D, since each of those three contributed more than 10 percent of the support and, but for the failure to contribute more than half of the mother's support, would have been entitled to claim his mother as a dependent.

*Example (2).* During the taxable year, E, an individual who resides with his son, S, received his entire support for that year as follows:

Source	Percentage of total
Social Security .....	25
N, an unrelated neighbor .....	11
B, a brother .....	14
D, a daughter .....	10
S, a son .....	40
Total received by E .....	100

B, D, and S are persons each of whom, but for the fact that none contributed more than half of E's support, could claim E as a dependent for the taxable year. The three together contributed 64 percent of E's support, and, thus, each is a member of the group to be considered for the purpose of section 152(c). B and S are the only members of such group who can meet all the requirements of section 152(c), and either one could claim E as a dependent for his taxable year if he obtained a written declaration (as provided in paragraph (a)(4) of this section) signed by the other, and furnished the other information required by the return with respect to all the contributions to E. Inasmuch as D did not contribute more than 10 percent of E's support, she is not entitled to claim E as a dependent for the taxable year nor is she required to furnish a written declaration with respect to her contributions to E. N contributed over 10 percent of the support of E, but, since he is an unrelated neighbor, he does not qualify as a member of the group for the purpose of the multiple support agreement under section 152(c).

(c)(1) The member of a group of contributors who claims an individual as a dependent for a taxable year beginning before January 1, 2002, under the multiple support agreement provisions of section 152(c) must attach to the member's income tax return for the year of the deduction a written declaration from each of the other persons who contributed more than 10 percent of the support of such individual and who, but for the failure to contribute more than half of the support of the individual, would have been entitled to claim the individual as a dependent.

(2) The taxpayer claiming an individual as a dependent for a taxable

year beginning after December 31, 2001, under the multiple support agreement provisions of section 152(c) must provide with the income tax return for the year of the deduction—

(i) A statement identifying each of the other persons who contributed more than 10 percent of the support of the individual and who, but for the failure to contribute more than half of the support of the individual, would have been entitled to claim the individual as a dependent; and

(ii) A statement indicating that the taxpayer obtained a written declaration from each of the persons described in section 152(c)(2) waiving the right to claim the individual as a dependent.

(3) The taxpayer claiming the individual as a dependent for a taxable year beginning after December 31, 2001, must retain the waiver declarations and should be prepared to furnish the waiver declarations and any other information necessary to substantiate the claim, which may include a statement showing the names of all contributors (whether or not members of the group described in section 152(c)(2)) and the amount contributed by each to the support of the claimed dependent.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6603, 28 FR 7094, July 11, 1963; T.D. 8989, 67 FR 20031, Apr. 24, 2002; T.D. 9040, 68 FR 4920, Jan. 31, 2003]

**§ 1.152-4 Support test in case of child of divorced or separated parents.**

(a) *Applicability.* For taxable years beginning after December 31, 1966, the provisions of section 152(e) and this section relate to a determination of which of separated parents (that is, parents who are divorced or legally separated under a decree of divorce or separate maintenance, or separated under a written separation agreement) is to be treated for purposes of section 152(a) and § 1.152-1 as having provided more than half of the support of a child, as defined in section 151(e)(3) and § 1.151-3(a). For section 152(e) and this section to apply either parent or both parents combined must provide more than one-half of the child's total support, within the meaning of § 1.152-1(a)(2)(i) during the calendar year in which the taxable year of the parent who is claiming the child as a depend-

ent begins; and such child must be in the custody of one or both of his parents for more than one-half of the calendar year. Thus, section 152(e) and this section do not apply if a person other than the parents provides one-half or more for the support of such child during the calendar year or has custody of the child for one-half or more of the calendar year. In addition, section 152(e) and this section do not apply in any case where over half of the support of the child is treated as having been received from a taxpayer pursuant to a multiple support agreement under the provisions of section 152(c) and § 1.152-3. Nor does section 152(e) and this section apply to a period for which a joint return signed by both parents is filed.

(b) *Custody.* "Custody," for purposes of this section, will be determined by the terms of the most recent decree of divorce or separate maintenance, or subsequent custody decree, or, if none, a written separation agreement. In the event of so-called "split" custody, or if neither a decree or agreement establishes who has custody, or if the validity or continuing effect of such decree or agreement is uncertain by reason of proceedings pending on the last day of the calendar year, "custody" will be deemed to be with the parent who, as between both parents, has the physical custody of the child for the greater portion of the calendar year.

(c) *General rule.* For purposes of section 152(a) and § 1.152-1, a child shall be treated as receiving over half of his support during the calendar year from the parent (hereinafter referred to as the "custodial parent") having custody within the meaning of paragraph (b) of this section for a greater portion of the calendar year unless the exceptions of paragraph (d) of this section apply. If the parents of such a child are divorced or separated for only a portion of a calendar year after having had joint custody of the child for the prior portion of the year, the parent who has custody for the greater portion of the remainder of the year after divorce or separation shall be treated as having custody for a greater portion of the calendar year. Except as provided in section 152(e)(2)(A) and paragraph (d)(2) of this

section (relating to decree or agreement) parents who are unable to enter into a multiple support agreement under section 152(c) cannot enter into an agreement as to which parent is entitled to claim a child as a dependent. Therefore, in general, the custodial parent shall be allowed as a deduction the exemption for the dependent child, if the requirements of section 151(e) are met.

(d) *Exceptions*—(1) *In general.* Notwithstanding paragraph (c) of this section, a child shall be treated as receiving over half of his support during the calendar year from the parent who is not the custodial parent (hereinafter referred to as the “noncustodial parent”) if the conditions of subparagraph (2) or (3) of this paragraph are met.

(2) *Decree or agreement.* A noncustodial parent who provides at least \$600 for the support of a child during the calendar year shall be treated as having provided more than half the support of the child if the decree of divorce or of separate maintenance, or a written agreement between the parents applicable to the taxable year of the noncustodial parent beginning in such calendar year, provides that the noncustodial parent shall be entitled to any deduction allowable under section 151 as an exemption for the dependent child. In order for this subparagraph to apply, the noncustodial parent must provide at least \$600 for the support of each child he claims as a dependent. For taxable years beginning after December 31, 1970, in the case of a written agreement or portion of a written agreement between the parents which allocates the deduction to the noncustodial parent, the noncustodial parent must attach to his return (or amended return) a copy of such agreement or such portion of such agreement which is applicable to the calendar year in which the taxable year of the noncustodial parent begins.

(3) *Actual support.* A noncustodial parent who provides \$1,200 or more support for the child (or, for taxable years beginning before October 5, 1976, if there is more than one child for which he claims an exemption, \$1,200 or more for the combined support for all of such children) shall be treated as having provided more than half the support for

the child (or children) notwithstanding any provision to the contrary contained in a decree of divorce or separation or in a written agreement, unless the custodial parent clearly established that the custodial parent provided, in fact, more for the support of the child during the calendar year than the noncustodial parent. Under section 152(e)(2)(B) and this subparagraph, if the noncustodial parent established that the noncustodial parent has provided \$1,200 or more for support of the child, then the custodial parent has the burden of establishing by a clear preponderance of the evidence that the custodial parent has provided more for the support of the child than has been established by the noncustodial parent in order to be treated as having provided over half of the support of the child. See paragraph (e) of this section with regard to notification and submission of itemized statements.

(4) *Amount of support.* For purposes of this paragraph, amounts expended for the support of a child shall be treated as received from the noncustodial parent to the extent that the noncustodial parent provided amounts for the support of the child, whether or not such amounts provided by the noncustodial parent are actually expended for child support. Therefore, for example, if only the parents have provided support for the child during a calendar year, only the excess of the total amount expended for the support of the child over the amount so provided by the noncustodial parent shall be treated as provided by the custodial parent for the support of the child.

(e) *Itemized statement*—(1) *Exchange.*

(i) If a parent intends to claim for a taxable year a child as a dependent or a parent is uncertain whether he is entitled to claim a child and desires either to determine whether the second parent intends to or has claimed the same child as a dependent, or if the first parent desires to receive an itemized statement as provided in subparagraph (3) of this paragraph from the second parent, the first parent is entitled to receive such information from the second parent in writing upon request provided he both notifies the second parent of his intention (or possible intention) to so claim the child

and sends the second parent a copy of such an itemized statement upon which the first parent's claim is based. A failure to make such a request shall not affect the right of the first parent to claim the child as a dependent. However, if the first parent makes such a request, and the second parent does not respond within a reasonable time, and it is determined that the first parent is not entitled to claim the child as a dependent, the inability of the first parent to obtain information will be taken into account in determining whether the addition to tax under section 6653, relating to failure to pay tax, is applicable.

(ii) Upon receipt of such a request accompanied by an itemized statement, if the second parent intends to claim (with respect to the calendar year in which such taxable year of the first parent begins) or has claimed the same child as a dependent, the second parent shall so inform the first parent, and if so requested shall send him a copy of the itemized statement upon which the second parent's claim is based. A notification under this subparagraph that the parent is claiming or is not claiming the child as a dependent shall not affect the rights of the parent making such notification and does not constitute a waiver.

(2) *Attachment to return.* For taxable years beginning after December 31, 1970, if a parent intends to claim a child as a dependent and, prior to the filing of his return or the time prescribed by law for filing the return (determined without regard to any extension thereof), whichever is later, such parent makes or receives a request under the procedures provided under paragraph (e)(1) of this section, then unless he is reasonably certain that the other parent will not claim the child as a dependent, such parent must attach to his return (or if the return is already filed, to a corrected or amended return) a copy of the itemized statement upon which such parent's claim is based, as provided in subparagraph (3) of this paragraph, together with a copy of the other parent's itemized statement, if available, at the time the return is filed. Failure to attach an itemized statement to the extent required by this subparagraph will be

taken into account in determining whether the addition to tax under section 6653, relating to failure to pay tax, is applicable in the event it is determined that the parent is not entitled to claim the child as a dependent.

(3) *Contents.* The itemized statement referred to in subparagraphs (1) and (2) of this paragraph shall include—

(i) The name of the child (or children) being claimed as a dependent as well as the name of both parents and, if known, the address and social security number of both parents;

(ii) If known, the number of months the dependent child (or children) lived during the calendar year in the home of each parent or person other than the parents;

(iii) If known, income for the taxable year of each dependent child;

(iv) If known, the total amount of support furnished the child (or children) (including amounts furnished by persons other than the parents);

(v) A list of amounts expended during the calendar year for the child (or children) made by the parent making the statement and itemized to show the amounts expended for medical and dental care, food, shelter, clothing, education, recreation, and transportation;

(vi) Amounts actually paid by the parent making the statement during the calendar year for the support of the child (or children) pursuant to a decree of divorce or separate maintenance, or a written separation agreement; and

(vii) Other amounts paid or expended by the parent making the statement during the calendar year, for the support of the child (or children).

(4) *Requirement by officer.* Notwithstanding subparagraph (1), (2), or (3) of this paragraph, an internal revenue officer may require the submission of an itemized statement from either parent and may make it available to the other parent. Such itemized statement shall contain the information requested by the internal revenue officer and shall be filed within such reasonable time as may be designated by him. If the required statement is not furnished pursuant to the instructions of the internal revenue officer, the claim of support of the parent failing to comply

with such requirement may be disallowed by the Internal Revenue Service.

(f) *Illustration of principles.* The application of the provisions of this section may be illustrated by the following examples:

*Example (1).* A, a child of B and C, who were divorced June 1, 1970, received \$1,000 for support during the calendar year 1970, of which \$400 was provided by B and \$300 was provided by C. No multiple support agreement was entered into. Prior to the divorce B and C jointly had custody of A, and for the remainder of 1970, B had custody of A for the months of October through December, while C had custody of A for the months of June through September. Since C had custody for 4 of the 7 months following the divorce, C is the custodial parent for 1970 and is treated as having provided over half of the support for A during 1970.

*Example (2).* Assume the same facts as in example (1) and that for the calendar year 1971, of \$1,000 support expended for A during 1971, \$400 was provided by B and \$300 was provided by C. Furthermore, assume that in addition to having custody of A for the months of October through December 1971, B had custody for the first 5 months of 1971. Since B had custody of A for a total of 8 months in 1971, B is the custodial parent for 1971 and is treated as having provided over half of the support for A during 1971.

*Example (3).* D received all of his support, \$1,000, during the calendar year 1970, from his parents E and F, who are separated under a written separation agreement. F had custody of D for the entire year of 1970, but under the agreement E was to provide \$600 for the support of D during 1970, and E is entitled to any deduction allowable under section 151 for the years 1970 and 1971. E, in fact, provides only \$550 for the support of D during 1970, but makes up the arrearage of \$50 early in 1971. Nevertheless, F is treated as having provided over half of the support for D during 1970.

*Example (4).* Assume the same facts as in example (3) and that F had custody of D for the entire year 1971, and of \$2,350 expended for the support of D during 1971, E provided \$650 while F provided \$1,700. Since under the written separation agreement E is entitled to any deduction allowable under section 151 for D for the year 1971 and E provided at least \$600 for the support of D, E is treated as having provided over half of the support of D, for 1971.

*Example (5).* G and H are legally separated under a decree of separate maintenance. G has custody of I, the child of G and H, for the entire year, and G and H enter into a written agreement that G is entitled to any deduction allowable under section 151 for I for the calendar year 1970. However, during 1970, of

the \$2,000 provided for the support of I, H provided \$1,300 while G provided only \$700. H has provided more than \$1,200 for the support of I, and G cannot establish that G provided more for the support of I, than did H. Therefore, notwithstanding the agreement, since H does not have custody of I, H is treated as having provided over half of the support for I for 1970.

*Example (6).* J and K, the children of L and M, who are divorced, received a total of \$3,400 for the support of both during the calendar year 1970 from their parents. L, who has custody of J and K for the entire year 1970, provided \$1,800 for the support of both, while M, the noncustodial parent, provided \$1,600 for such support. Under the decree of divorce, M is entitled to any deduction allowable under section 151 for such children. Since M has provided at least \$600 for the support of each child, M is treated as having provided over half the support for J and K for 1970. Furthermore, as J and K are determined under section 152(e) and § 1.152-4 to be dependents of M for purposes of section 151(e), they are also considered to be dependents of M with respect to other provisions of the Code that are dependent upon such a determination for their operation. (For example, section 213.)

*Example (7).* N, O, and P are the children of divorced parents Q and R, both calendar year taxpayers. During calendar year 1976, the children received over half their support from Q and R. Q, who has custody of the three children for the entire year 1976, provided \$800 for the support of each of the three children. R, the noncustodial parent, provided \$2,700 during 1976 for the combined support of the three children under the terms of the decree of divorce. So, for calendar year 1976, although R, the noncustodial parent, did not provide support in the amount \$1,200 per child under paragraph (d)(3) of this section, R, the noncustodial parent, is treated as having provided more than half the support of each child during 1976, since R provided more than \$1,200 for the combined support of all the children and Q did not provide more for the support of either N, O, or P (\$800 per child) during 1976 than R provided during 1976 (\$900 per child).

*Example (8).* Assume the same facts that occurred in 1976 in example 7 also occurred in 1977. For 1977 R does not satisfy the \$1,200 support test under paragraph (d)(3) of this section because he has not provided \$1,200 support for each individual child N, O, or P for calendar year 1977. Therefore, R, the noncustodial parent, is not treated as having provided more than half the support of the children for calendar year 1977.

*Example (9).* A, B, and C, the children of divorced parents M and N, both calendar year taxpayers, receive all of their support, \$5,900, from their parents during the calendar year

1979. M has custody of A, B, and C and provides \$2,700 for their collective support during 1979. Pursuant to the terms of the decree of divorce N provided \$1,200 for the support of A, \$1,000 for the support of B, and \$1,000 for the support of C. Since N has provided \$1,200 or more for the support of A, and M has provided \$900 (\$2,700÷3) for the support of A during 1979, N is treated as having provided more than half the support for A during 1979. However, since N has not provided \$1,200 or more for the support of either B or C, N, the noncustodial parent, is not treated as having provided more than half the support of B or C during 1979.

[T.D. 7099, 36 FR 5337, Mar. 20, 1971, as amended by T.D. 7145, 36 FR 20039, Oct. 15, 1971; T.D. 7639, 44 FR 48674, Aug. 20, 1979]

**§ 1.152-4T Dependency exemption in the case of a child of divorced parents, etc. (temporary).**

(a) *In general.*

Q-1 Which parent may claim the dependency exemption in the case of a child of divorced or separated parents?

A-1 Provided the parents together would have been entitled to the dependency exemption had they been married and filing a joint return, the parent having custody of a child for the greater portion of the year (the custodial parent) will generally be entitled to the dependency exemption. This rule applies to parents not living together during the last 6 months of the calendar year, as well as those divorced or separated under a separation agreement.

Q-2 Are there any exceptions to the general rule in A-1?

A-2 Yes, there are three exceptions. The general rule does not apply (i) if a multiple support agreement is in effect (see section 152(c)), (ii) if a decree or agreement executed prior to January 1, 1985 provides that the custodial parent has agreed to release his or her claim to the dependency exemption to the noncustodial parent and the noncustodial parent provides at least \$600 of support to the child (see section 152(e)(4)), or (iii) if the custodial parent relinquishes the exemption in the manner described in A-3.

Q-3 How may the exemption for a dependent child be claimed by a noncustodial parent?

A-3 A noncustodial parent may claim the exemption for a dependent child only if the noncustodial parent

attaches to his/her income tax return for the year of the exemption a written declaration from the custodial parent stating that he/she will not claim the child as a dependent for the taxable year beginning in such calendar year. The written declaration may be made on a form to be provided by the Service for this purpose. Once the Service has released the form, any declaration made other than on the official form shall conform to the substance of such form.

Q-4 For what period may a custodial parent release to the noncustodial parent a claim to the exemption for a dependent child?

A-4 The exemption may be released for a single year, for a number of specified years (for example, alternate years), or for all future years, as specified in the declaration. If the exemption is released for more than one year, the original release must be attached to the return of the noncustodial spouse and a copy of such release must be attached to his/her return for each succeeding taxable year for which he/she claims the dependency exemption.

Q-5 May only the custodial parent claim a deduction under section 213(d) for medical expenses paid by the parent or an income exclusion under section 105(b) for medical expenses paid by an employer for a dependent child?

A-5 No. Under the new rules, if a child receives over half of his support during the calendar year from his parents who are divorced or legally separated under a decree of divorce or separate maintenance, or who are separated under a written separation agreement, that child will be treated as a dependent of both parents for purposes of sections 105(b) and 213(d). Thus, a parent can deduct medical expenses paid by that parent for a child even though a dependency exemption for the child is claimed by the other parent. The special rule of sections 105(b) and 213(d) does not apply where over half of the support of a child is treated as having been received from a person under the provisions of section 152(c) (relating to multiple support agreements).

Q-6 When does section 152(e), as amended by the Tax Reform Act of 1984, become effective?

## § 1.153-1

A-6 Section 152(e), as amended, is effective with respect to dependency exemptions for taxable years beginning after December 31, 1984.

(Secs. 1041(d)(4) (98 Stat. 798, 26 U.S.C. 1041(d)(4)), 152(e)(2)(A) (98 Stat. 802, 26 U.S.C. 152(e)(2)(A)), 215(c) (98 Stat. 800, 26 U.S.C. 215(c)) and 7805 (68A Stat. 917, 26 U.S.C. 7805) of the Internal Revenue Code of 1954)

[T.D. 7973, 49 FR 34459, Aug. 31, 1984]

### § 1.153-1 Determination of marital status.

For the purpose of determining the right of an individual to claim an exemption for his spouse under section 151(b), the determination of whether such individual is married shall be made as of the close of his taxable year, unless his spouse dies during such year, in which case the determination shall be made as of the time of such death. An individual legally separated from his spouse under a decree of divorce or separate maintenance shall not be considered as married. The provisions of this section may be illustrated by the following examples:

*Example (1).* A, who files his returns on the basis of a calendar year, married B on December 31, 1956. B, who had never previously married, had no gross income for the calendar year 1956 nor was she the dependent of another taxpayer for such year. A may claim an exemption for B for 1956.

*Example (2).* C and his wife, D, were married in 1940. They remained married until July 1956 at which time D was granted a decree of divorce. C, who files his income tax returns on a calendar year basis, cannot claim an exemption for D on his 1956 return as C and D were not married on the last day of C's taxable year. Had D died instead of being divorced, C could have claimed an exemption for D for 1956 as their marital status would have been determined as of the date of D's death.

### § 1.154 Statutory provisions; cross references.

SEC. 154. *Cross references.* (1) For definitions of "husband" and "wife", as used in section 152(b)(4), see section 7701(a)(17).

(2) For deductions of estates and trusts, in lieu of the exemptions under section 151, see section 642(b).

(3) For exemptions of nonresident aliens, see section 873(b)(3).

## 26 CFR Ch. I (4-1-06 Edition)

(4) For exemptions of citizens deriving income mainly from sources within possessions of the United States, see section 931(e).

[Sec. 154 as amended by sec. 103(c)(2), Foreign Investors Tax Act 1966 (80 Stat. 1551)]

[TD 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 21, 1960, as amended by T.D. 7332, 39 FR 44216, Dec. 23, 1974]

### ITEMIZED DEDUCTIONS FOR INDIVIDUALS AND CORPORATIONS

### § 1.161-1 Allowance of deductions.

Section 161 provides for the allowance as deductions, in computing taxable income under section 63(a), of the items specified in Part VI (section 161 and following), Subchapter B, Chapter 1 of the Code, subject to the exceptions provided in Part IX (section 261 and following), of such Subchapter B, relating to items not deductible. Double deductions are not permitted. Amounts deducted under one provision of the Internal Revenue Code of 1954 cannot again be deducted under any other provision thereof. See also section 7852(c), relating to the taking into account, both in computing a tax under Subtitle A of the Internal Revenue Code of 1954 and a tax under Chapter 1 or 2 of the Internal Revenue Code of 1939, of the same item of deduction.

### § 1.162-1 Business expenses.

(a) *In general.* Business expenses deductible from gross income include the ordinary and necessary expenditures directly connected with or pertaining to the taxpayer's trade or business, except items which are used as the basis for a deduction or a credit under provisions of law other than section 162. The cost of goods purchased for resale, with proper adjustment for opening and closing inventories, is deducted from gross sales in computing gross income. See paragraph (a) of § 1.161-3. Among the items included in business expenses are management expenses, commissions (but see section 263 and the regulations thereunder), labor, supplies, incidental repairs, operating expenses of automobiles used in the trade or business, traveling expenses while away from home solely in the pursuit of a trade or business (see § 1.162-2), advertising and other selling expenses, together with insurance premiums

against fire, storm, theft, accident, or other similar losses in the case of a business, and rental for the use of business property. No such item shall be included in business expenses, however, to the extent that it is used by the taxpayer in computing the cost of property included in its inventory or used in determining the gain or loss basis of its plant, equipment, or other property. See section 1054 and the regulations thereunder. A deduction for an expense paid or incurred after December 30, 1969, which would otherwise be allowable under section 162 shall not be denied on the grounds that allowance of such deduction would frustrate a sharply defined public policy. See section 162(c), (f), and (g) and the regulations thereunder. The full amount of the allowable deduction for ordinary and necessary expenses in carrying on a business is deductible, even though such expenses exceed the gross income derived during the taxable year from such business. In the case of any sports program to which section 114 (relating to sports programs conducted for the American National Red Cross) applies, expenses described in section 114(a)(2) shall be allowable as deductions under section 162(a) only to the extent that such expenses exceed the amount excluded from gross income under section 114(a).

(b) *Cross references.* (1) For charitable contributions by individuals and corporations not deductible under section 162, see § 1.162-15.

(2) For items not deductible, see sections 261-276, inclusive, and the regulations thereunder.

(3) For research and experimental expenditures, see section 174 and regulations thereunder.

(4) For soil and water conservation expenditures, see section 175 and regulations thereunder.

(5) For expenditures attributable to grant or loan by United States for encouragement of exploration for, or development or mining of, critical and strategic minerals or metals, see section 621 and regulations thereunder.

(6) For treatment of certain rental payments with respect to public utility property, see section 167(1) and § 1.167(1)-3.

(7) For limitations on the deductibility of miscellaneous itemized deductions, see section 67 and §§ 1.67-1T through 1.67-4T.

(8) For the timing of deductions with respect to notional principal contracts, see § 1.446-3.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6690, 28 FR 12253, Nov. 19, 1963; T.D. 6996, 34 FR 835, Jan. 18, 1969; T.D. 7315, 39 FR 20203, June 7, 1974, as amended by T.D. 7345, 40 FR 7437, Feb. 20, 1975; T.D. 8189, 53 FR 9881, Mar. 28, 1988; T.D. 8491, 58 FR 53128, Oct. 14, 1993]

#### § 1.162-2 Traveling expenses.

(a) Traveling expenses include travel fares, meals and lodging, and expenses incident to travel such as expenses for sample rooms, telephone and telegraph, public stenographers, etc. Only such traveling expenses as are reasonable and necessary in the conduct of the taxpayer's business and directly attributable to it may be deducted. If the trip is undertaken for other than business purposes, the travel fares and expenses incident to travel are personal expenses and the meals and lodging are living expenses. If the trip is solely on business, the reasonable and necessary traveling expenses, including travel fares, meals and lodging, and expenses incident to travel, are business expenses. For the allowance of traveling expenses as deductions in determining adjusted gross income, see section 62(2)(B) and the regulations thereunder.

(b)(1) If a taxpayer travels to a destination and while at such destination engages in both business and personal activities, traveling expenses to and from such destination are deductible only if the trip is related primarily to the taxpayer's trade or business. If the trip is primarily personal in nature, the traveling expenses to and from the destination are not deductible even though the taxpayer engages in business activities while at such destination. However, expenses while at the destination which are properly allocable to the taxpayer's trade or business are deductible even though the traveling expenses to and from the destination are not deductible.

(2) Whether a trip is related primarily to the taxpayer's trade or business or is primarily personal in nature

depends on the facts and circumstances in each case. The amount of time during the period of the trip which is spent on personal activity compared to the amount of time spent on activities directly relating to the taxpayer's trade or business is an important factor in determining whether the trip is primarily personal. If, for example, a taxpayer spends one week while at a destination on activities which are directly related to his trade or business and subsequently spends an additional five weeks for vacation or other personal activities, the trip will be considered primarily personal in nature in the absence of a clear showing to the contrary.

(c) Where a taxpayer's wife accompanies him on a business trip, expenses attributable to her travel are not deductible unless it can be adequately shown that the wife's presence on the trip has a bona fide business purpose. The wife's performance of some incidental service does not cause her expenses to qualify as deductible business expenses. The same rules apply to any other members of the taxpayer's family who accompany him on such a trip.

(d) Expenses paid or incurred by a taxpayer in attending a convention or other meeting may constitute an ordinary and necessary business expense under section 162 depending upon the facts and circumstances of each case. No distinction will be made between self-employed persons and employees. The fact that an employee uses vacation or leave time or that his attendance at the convention is voluntary will not necessarily prohibit the allowance of the deduction. The allowance of deductions for such expenses will depend upon whether there is a sufficient relationship between the taxpayer's trade or business and his attendance at the convention or other meeting so that he is benefiting or advancing the interests of his trade or business by such attendance. If the convention is for political, social or other purposes unrelated to the taxpayer's trade or business, the expenses are not deductible.

(e) Commuters' fares are not considered as business expenses and are not deductible.

(f) For rules with respect to the reporting and substantiation of traveling and other business expenses of employees for taxable years beginning after December 31, 1957, see § 1.162-17.

#### § 1.162-3 Cost of materials.

Taxpayers carrying materials and supplies on hand should include in expenses the charges for materials and supplies only in the amount that they are actually consumed and used in operation during the taxable year for which the return is made, provided that the costs of such materials and supplies have not been deducted in determining the net income or loss or taxable income for any previous year. If a taxpayer carries incidental materials or supplies on hand for which no record of consumption is kept or of which physical inventories at the beginning and end of the year are not taken, it will be permissible for the taxpayer to include in his expenses and to deduct from gross income the total cost of such supplies and materials as were purchased during the taxable year for which the return is made, provided the taxable income is clearly reflected by this method.

#### § 1.162-4 Repairs.

The cost of incidental repairs which neither materially add to the value of the property nor appreciably prolong its life, but keep it in an ordinarily efficient operating condition, may be deducted as an expense, provided the cost of acquisition or production or the gain or loss basis of the taxpayer's plant, equipment, or other property, as the case may be, is not increased by the amount of such expenditures. Repairs in the nature of replacements, to the extent that they arrest deterioration and appreciably prolong the life of the property, shall either be capitalized and depreciated in accordance with section 167 or charged against the depreciation reserve if such an account is kept.

#### § 1.162-5 Expenses for education.

(a) *General rule.* Expenditures made by an individual for education (including research undertaken as part of his

educational program) which are not expenditures of a type described in paragraph (b) (2) or (3) of this section are deductible as ordinary and necessary business expenses (even though the education may lead to a degree) if the education—

(1) Maintains or improves skills required by the individual in his employment or other trade or business, or

(2) Meets the express requirements of the individual's employer, or the requirements of applicable law or regulations, imposed as a condition to the retention by the individual of an established employment relationship, status, or rate of compensation.

(b) *Non deductible educational expenditures*—(1) *In general.* Educational expenditures described in subparagraphs (2) and (3) of this paragraph are personal expenditures or constitute an inseparable aggregate of personal and capital expenditures and, therefore, are not deductible as ordinary and necessary business expenses even though the education may maintain or improve skills required by the individual in his employment or other trade or business or may meet the express requirements of the individual's employer or of applicable law or regulations.

(2) *Minimum educational requirements.*

(i) The first category of nondeductible educational expenses within the scope of subparagraph (1) of this paragraph are expenditures made by an individual for education which is required of him in order to meet the minimum educational requirements for qualification in his employment or other trade or business. The minimum education necessary to qualify for a position or other trade or business must be determined from a consideration of such factors as the requirements of the employer, the applicable law and regulations, and the standards of the profession, trade, or business involved. The fact that an individual is already performing service in an employment status does not establish that he has met the minimum educational requirements for qualification in that employment. Once an individual has met the minimum educational requirements for qualification in his employment or other trade or business (as in effect when he enters

the employment or trade or business), he shall be treated as continuing to meet those requirements even though they are changed.

(ii) The minimum educational requirements for qualification of a particular individual in a position in an educational institution is the minimum level of education (in terms of aggregate college hours or degree) which under the applicable laws or regulations, in effect at the time this individual is first employed in such position, is normally required of an individual initially being employed in such a position. If there are no normal requirements as to the minimum level of education required for a position in an educational institution, then an individual in such a position shall be considered to have met the minimum educational requirements for qualification in that position when he becomes a member of the faculty of the educational institution. The determination of whether an individual is a member of the faculty of an educational institution must be made on the basis of the particular practices of the institution. However, an individual will ordinarily be considered to be a member of the faculty of an institution if (a) he has tenure or his years of service are being counted toward obtaining tenure; (b) the institution is making contributions to a retirement plan (other than Social Security or a similar program) in respect of his employment; or (c) he has a vote in faculty affairs.

(iii) The application of this subparagraph may be illustrated by the following examples:

*Example (1).* General facts: State X requires a bachelor's degree for beginning secondary school teachers which must include 30 credit hours of professional educational courses. In addition, in order to retain his position, a secondary school teacher must complete a fifth year of preparation within 10 years after beginning his employment. If an employing school official certifies to the State Department of Education that applicants having a bachelor's degree and the required courses in professional education cannot be found, he may hire individuals as secondary school teachers if they have completed a minimum of 90 semester hours of college work. However, to be retained in his position, such an individual must obtain his bachelor's degree and complete the required professional educational courses within 3

years after his employment commences. Under these facts, a bachelor's degree, without regard to whether it includes 30 credit hours of professional educational courses, is considered to be the minimum educational requirement for qualification as a secondary school teacher in State X. This is the case notwithstanding the number of teachers who are actually hired without such a degree. The following are examples of the application of these facts in particular situations:

*Situation 1.* A, at the time he is employed as a secondary school teacher in State X, has a bachelor's degree including 30 credit hours of professional educational courses. After his employment, A completes a fifth college year of education and, as a result, is issued a standard certificate. The fifth college year of education undertaken by A is not education required to meet the minimum educational requirements for qualification as a secondary school teacher. Accordingly, the expenditures for such education are deductible unless the expenditures are for education which is part of a program of study being pursued by A which will lead to qualifying him in a new trade or business.

*Situation 2.* Because of a shortage of applicants meeting the stated requirements, B, who has a bachelor's degree, is employed as a secondary school teacher in State X even though he has only 20 credit hours of professional educational courses. After his employment, B takes an additional 10 credit hours of professional educational courses. Since these courses do not constitute education required to meet the minimum educational requirements for qualification as a secondary school teacher which is a bachelor's degree and will not lead to qualifying B in a new trade or business, the expenditures for such courses are deductible.

*Situation 3.* Because of a shortage of applicants meeting the stated requirements, C is employed as a secondary school teacher in State X although he has only 90 semester hours of college work toward his bachelor's degree. After his employment, C undertakes courses leading to a bachelor's degree. These courses (including any courses in professional education) constitute education required to meet the minimum educational requirements for qualification as a secondary school teacher. Accordingly, the expenditures for such education are not deductible.

*Situation 4.* Subsequent to the employment of A, B, and C, but before they have completed a fifth college year of education, State X changes its requirements affecting secondary school teachers to provide that beginning teachers must have completed 5 college years of preparation. In the cases of A, B, and C, a fifth college year of education is not considered to be education undertaken to meet the minimum educational requirements for qualifications as a secondary school teacher. Accordingly, expenditures

for a fifth year of college will be deductible unless the expenditures are for education which is part of a program being pursued by A, B, or C which will lead to qualifying him in a new trade or business.

*Example (2).* D, who holds a bachelor's degree, obtains temporary employment as an instructor at University Y and undertakes graduate courses as a candidate for a graduate degree. D may become a faculty member only if he obtains a graduate degree and may continue to hold a position as instructor only so long as he shows satisfactory progress towards obtaining this graduate degree. The graduate courses taken by D constitute education required to meet the minimum educational requirements for qualification in D's trade or business and, thus, the expenditures for such courses are not deductible.

*Example (3).* E, who has completed 2 years of a normal 3-year law school course leading to a bachelor of laws degree (LL.B.), is hired by a law firm to do legal research and perform other functions on a full-time basis. As a condition to continued employment, E is required to obtain an LL.B. and pass the State bar examination. E completes his law school education by attending night law school, and he takes a bar review course in order to prepare for the State bar examination. The law courses and bar review course constitute education required to meet the minimum educational requirements for qualification in E's trade or business and, thus, the expenditures for such courses are not deductible.

(3) *Qualification for new trade or business.* (1) The second category of non-deductible educational expenses within the scope of subparagraph (1) of this paragraph are expenditures made by an individual for education which is part of a program of study being pursued by him which will lead to qualifying him in a new trade or business. In the case of an employee, a change of duties does not constitute a new trade or business if the new duties involve the same general type of work as is involved in the individual's present employment. For this purpose, all teaching and related duties shall be considered to involve the same general type of work. The following are examples of changes in duties which do not constitute new trades or businesses:

(a) Elementary to secondary school classroom teacher.

(b) Classroom teacher in one subject (such as mathematics) to classroom teacher in another subject (such as science).

(c) Classroom teacher to guidance counselor.

(d) Classroom teacher to principal.

(ii) The application of this subparagraph to individuals other than teachers may be illustrated by the following examples:

*Example (1).* A, a self-employed individual practicing a profession other than law, for example, engineering, accounting, etc., attends law school at night and after completing his law school studies receives a bachelor of laws degree. The expenditures made by A in attending law school are nondeductible because this course of study qualifies him for a new trade or business.

*Example (2).* Assume the same facts as in example (1) except that A has the status of an employee rather than a self-employed individual, and that his employer requires him to obtain a bachelor of laws degree. A intends to continue practicing his nonlegal profession as an employee of such employer. Nevertheless, the expenditures made by A in attending law school are not deductible since this course of study qualifies him for a new trade or business.

*Example (3).* B, a general practitioner of medicine, takes a 2-week course reviewing new developments in several specialized fields of medicine. B's expenses for the course are deductible because the course maintains or improves skills required by him in his trade or business and does not qualify him for a new trade or business.

*Example (4).* C, while engaged in the private practice of psychiatry, undertakes a program of study and training at an accredited psychoanalytic institute which will lead to qualifying him to practice psychoanalysis. C's expenditures for such study and training are deductible because the study and training maintains or improves skills required by him in his trade or business and does not qualify him for a new trade or business.

(c) *Deductible educational expenditures*—(1) *Maintaining or improving skills.* The deduction under the category of expenditures for education which maintains or improves skills required by the individual in his employment or other trade or business includes refresher courses or courses dealing with current developments as well as academic or vocational courses provided the expenditures for the courses are not within either category of nondeductible expenditures described in paragraph (b) (2) or (3) of this section.

(2) *Meeting requirements of employer.* An individual is considered to have undertaken education in order to meet

the express requirements of his employer, or the requirements of applicable law or regulations, imposed as a condition to the retention by the taxpayer of his established employment relationship, status, or rate of compensation only if such requirements are imposed for a bona fide business purpose of the individual's employer. Only the minimum education necessary to the retention by the individual of his established employment relationship, status, or rate of compensation may be considered as undertaken to meet the express requirements of the taxpayer's employer. However, education in excess of such minimum education may qualify as education undertaken in order to maintain or improve the skills required by the taxpayer in his employment or other trade or business (see subparagraph (1) of this paragraph). In no event, however, is a deduction allowable for expenditures for education which, even though for education required by the employer or applicable law or regulations, are within one of the categories of nondeductible expenditures described in paragraph (b) (2) and (3) of this section.

(d) *Travel as a form of education.* Subject to the provisions of paragraph (b) and (e) of this section, expenditures for travel (including travel while on sabbatical leave) as a form of education are deductible only to the extent such expenditures are attributable to a period of travel that is directly related to the duties of the individual in his employment or other trade or business. For this purpose, a period of travel shall be considered directly related to the duties of an individual in his employment or other trade or business only if the major portion of the activities during such period is of a nature which directly maintains or improves skills required by the individual in such employment or other trade or business. The approval of a travel program by an employer or the fact that travel is accepted by an employer in the fulfillment of its requirements for retention of rate of compensation, status or employment, is not determinative that the required relationship exists between the travel involved and

the duties of the individual in his particular position.

(e) *Travel away from home.* (1) If an individual travels away from home primarily to obtain education the expenses of which are deductible under this section, his expenditures for travel, meals, and lodging while away from home are deductible. However, if as an incident of such trip the individual engages in some personal activity such as sightseeing, social visiting, or entertaining, or other recreation, the portion of the expenses attributable to such personal activity constitutes non-deductible personal or living expenses and is not allowable as a deduction. If the individual's travel away from home is primarily personal, the individual's expenditures for travel, meals and lodging (other than meals and lodging during the time spent in participating in deductible education pursuits) are not deductible. Whether a particular trip is primarily personal or primarily to obtain education the expenses of which are deductible under this section depends upon all the facts and circumstances of each case. An important factor to be taken into consideration in making the determination is the relative amount of time devoted to personal activity as compared with the time devoted to educational pursuits. The rules set forth in this paragraph are subject to the provisions of section 162(a)(2), relating to deductibility of certain traveling expenses, and section 274 (c) and (d), relating to allocation of certain foreign travel expenses and substantiation required, respectively, and the regulations thereunder.

(2) *Examples.* The application of this subsection may be illustrated by the following examples:

*Example (1).* A, a self-employed tax practitioner, decides to take a 1-week course in new developments in taxation, which is offered in City X, 500 miles away from his home. His primary purpose in going to X is to take the course, but he also takes a side trip to City Y (50 miles from X) for 1 day, takes a sightseeing trip while in X, and entertains some personal friends. A's transportation expenses to City X and return to his home are deductible but his transportation expenses to City Y are not deductible. A's expenses for meals and lodging while away from home will be allocated between his educational pursuits and his personal activities.

Those expenses which are entirely personal, such as sightseeing and entertaining friends, are not deductible to any extent.

*Example (2).* The facts are the same as in example (1) except that A's primary purpose in going to City X is to take a vacation. This purpose is indicated by several factors, one of which is the fact that he spends only 1 week attending the tax course and devotes 5 weeks entirely to personal activities. None of A's transportation expenses are deductible and his expenses for meals and lodging while away from home are not deductible to the extent attributable to personal activities. His expenses for meals and lodging allocable to the week attending the tax course are, however, deductible.

*Example (3).* B, a high school mathematics teacher in New York City, in the summertime travels to a university in California in order to take a mathematics course the expense of which is deductible under this section. B pursues only one-fourth of a full course of study and the remainder of her time is devoted to personal activities the expense of which is not deductible. Absent a showing by B of a substantial nonpersonal reason for taking the course in the university in California, the trip is considered taken primarily for personal reasons and the cost of traveling from New York City to California and return would not be deductible. However, one-fourth of the cost of B's meals and lodging while attending the university in California may be considered properly allocable to deductible educational pursuits and, therefore, is deductible.

[T.D. 6918, 32 FR 6679, May 2, 1967]

#### § 1.162-6 Professional expenses.

A professional man may claim as deductions the cost of supplies used by him in the practice of his profession, expenses paid or accrued in the operation and repair of an automobile used in making professional calls, dues to professional societies and subscriptions to professional journals, the rent paid or accrued for office rooms, the cost of the fuel, light, water, telephone, etc., used in such offices, and the hire of office assistance. Amounts currently paid or accrued for books, furniture, and professional instruments and equipment, the useful life of which is short, may be deducted.

#### § 1.162-7 Compensation for personal services.

(a) There may be included among the ordinary and necessary expenses paid or incurred in carrying on any trade or

business a reasonable allowance for salaries or other compensation for personal services actually rendered. The test of deductibility in the case of compensation payments is whether they are reasonable and are in fact payments purely for services.

(b) The test set forth in paragraph (a) of this section and its practical application may be further stated and illustrated as follows:

(1) Any amount paid in the form of compensation, but not in fact as the purchase price of services, is not deductible. An ostensible salary paid by a corporation may be a distribution of a dividend on stock. This is likely to occur in the case of a corporation having few shareholders, practically all of whom draw salaries. If in such a case the salaries are in excess of those ordinarily paid for similar services and the excessive payments correspond or bear a close relationship to the stockholdings of the officers or employees, it would seem likely that the salaries are not paid wholly for services rendered, but that the excessive payments are a distribution of earnings upon the stock. An ostensible salary may be in part payment for property. This may occur, for example, where a partnership sells out to a corporation, the former partners agreeing to continue in the service of the corporation. In such a case it may be found that the salaries of the former partners are not merely for services, but in part constitute payment for the transfer of their business.

(2) The form or method of fixing compensation is not decisive as to deductibility. While any form of contingent compensation invites scrutiny as a possible distribution of earnings of the enterprise, it does not follow that payments on a contingent basis are to be treated fundamentally on any basis different from that applying to compensation at a flat rate. Generally speaking, if contingent compensation is paid pursuant to a free bargain between the employer and the individual made before the services are rendered, not influenced by any consideration on the part of the employer other than that of securing on fair and advantageous terms the services of the individual, it should be allowed as a deduction even though in the actual working out of

the contract it may prove to be greater than the amount which would ordinarily be paid.

(3) In any event the allowance for the compensation paid may not exceed what is reasonable under all the circumstances. It is, in general, just to assume that reasonable and true compensation is only such amount as would ordinarily be paid for like services by like enterprises under like circumstances. The circumstances to be taken into consideration are those existing at the date when the contract for services was made, not those existing at the date when the contract is questioned.

(4) For disallowance of deduction in the case of certain transfers of stock pursuant to employees stock options, see section 421 and the regulations thereunder.

#### **§ 1.162-8 Treatment of excessive compensation.**

The income tax liability of the recipient in respect of an amount ostensibly paid to him as compensation, but not allowed to be deducted as such by the payor, will depend upon the circumstances of each case. Thus, in the case of excessive payments by corporations, if such payments correspond or bear a close relationship to stockholdings, and are found to be a distribution of earnings or profits, the excessive payments will be treated as a dividend. If such payments constitute payment for property, they should be treated by the payor as a capital expenditure and by the recipient as part of the purchase price. In the absence of evidence to justify other treatment, excessive payments for salaries or other compensation for personal services will be included in gross income of the recipient.

#### **§ 1.162-9 Bonuses to employees.**

Bonuses to employees will constitute allowable deductions from gross income when such payments are made in good faith and as additional compensation for the services actually rendered by the employees, provided such payments, when added to the stipulated salaries, do not exceed a reasonable compensation for the services rendered. It is immaterial whether such

bonuses are paid in cash or in kind or partly in cash and partly in kind. Donations made to employees and others, which do not have in them the element of compensation or which are in excess of reasonable compensation for services, are not deductible from gross income.

**§ 1.162-10 Certain employee benefits.**

(a) *In general.* Amounts paid or accrued by a taxpayer on account of injuries received by employees and lump sum amounts paid or accrued as compensation for injuries, are proper deductions as ordinary and necessary expenses. Such deductions are limited to the amount not compensated for by insurance or otherwise. Amounts paid or accrued within the taxable year for dismissal wages, unemployment benefits, guaranteed annual wages, vacations, or a sickness, accident, hospitalization, medical expense, recreational, welfare, or similar benefit plan, are deductible under section 162(a) if they are ordinary and necessary expenses of the trade or business. However, except as provided in paragraph (b) of this section, such amounts shall not be deductible under section 162(a) if, under any circumstances, they may be used to provide benefits under a stock bonus, pension, annuity, profit-sharing, or other deferred compensation plan of the type referred to in section 404(a). In such an event, the extent to which these amounts are deductible from gross income shall be governed by the provisions of section 404 and the regulations issued thereunder.

(b) *Certain negotiated plans.* (1) Subject to the limitations set forth in subparagraphs (2) and (3) of this paragraph, contributions paid by an employer under a plan under which such contributions are held in a welfare trust for the purpose of paying (either from principal or income or both) for the benefit of employees, their families, and dependents, at least medical or hospital care, and pensions on retirement or death of employees, are deductible when paid as business expenses under section 162(a).

(2) For the purpose of subparagraph (1) of this paragraph, the word “plan” means any plan established prior to January 1, 1954, as a result of an agree-

ment between employee representatives and the Government of the United States, during a period of Government operation, under seizure powers, of a major part of the productive facilities of the industry in which the employer claiming the deduction is engaged. The phrase “plan established prior to January 1, 1954, as a result of an agreement” is intended primarily to cover a trust established under the terms of such an agreement. It also includes a trust established under a plan of an employer, or group of employers, who, by reason of producing the same commodity, are in competition with the employers whose facilities were seized and who would therefore be expected to establish such a trust as a reasonable measure to maintain a sound position in the labor market producing the commodity. For example, if a trust was established under such an agreement in the bituminous coal industry, a similar trust established in the anthracite coal industry within a reasonable time, but before January 1, 1954, would qualify under subparagraph (1) of this paragraph.

(3) If any trust described in subparagraph (2) of this paragraph becomes qualified for exemption from tax under the provisions of section 501(a), the deductibility of contributions by an employer to such trust on or after any date of such qualification shall no longer be governed by the provisions of section 162, even though the trust may later lose its exemption from tax under section 501(a).

(c) *Other plans providing deferred compensation.* For rules relating to the deduction of amounts paid to or under a stock bonus, pension, annuity, or profit-sharing plan or amounts paid or accrued under any other plan deferring the receipt of compensation, see section 404 and the regulations thereunder.

**§ 1.162-10T Questions and answers relating to the deduction of employee benefits under the Tax Reform Act of 1984; certain limits on amounts deductible (temporary).**

Q-1: How does the amendment of section 404(b) by the Tax Reform Act of 1984 affect the deduction of employee benefits under section 162 of the Internal Revenue Code?

A-1: As amended by the Tax Reform Act of 1984, section 404(b) clarifies that section 404(a) and (d) (in the case of employees and nonemployees, respectively) shall govern the deduction of contributions paid or compensation paid or incurred under a plan, or method or arrangement, deferring the receipt of compensation or providing for deferred benefits. Section 404(a) and (d) requires that such a contribution or compensation be paid or incurred for purposes of section 162 or 212 and satisfy the requirements for deductibility under either of these sections. However, notwithstanding the above, section 404 does not apply to contributions paid or accrued with respect to a "welfare benefit fund" (as defined in section 419(e)) after July 18, 1984, in taxable years of employers (and payors) ending after that date.

Also, section 463 shall govern the deduction of vacation pay by a taxpayer that has elected the application of such section. Section 404(b), as amended, generally applies to contributions paid and compensation paid or incurred after July 18, 1984, in taxable years of employers (and payors) ending after that date. See Q&A-3 of §1.404(b)-1T. For rules relating to the deduction of contributions attributable to the provision of deferred benefits, see section 404 (a), (b) and (d) and §1.404(a)-1T, §1.404(b)-1T and §1.404(d)-1T. For rules relating to the deduction of contributions paid or accrued with respect to a welfare benefit fund, see section 419, §1.419-1T and §1.419A-2T. For rules relating to the deduction of vacation pay for which an election is made under section 463, see §301.9100-16T of this chapter and §1.463-1T.

Q-2: How does the enactment of section 419 by the Tax Reform Act of 1984 affect the deduction of employee benefits under section 162?

A-2: As enacted by the Tax Reform Act of 1984, section 419 shall govern the deduction of contributions paid or accrued by an employer (or a person receiving services under section 419(g)) with respect to a "welfare benefit fund" (within the meaning of section 419(e)) after December 31, 1985, in taxable years of the employer (or person receiving the services) ending after that date. Section 419(a) requires that

such a contribution be paid or accrued for purposes of section 162 or 212 and satisfy the requirements for deductibility under either of those sections. Generally, subject to a binding contract exception (as described in section 511(e)(5) of the Tax Reform Act of 1984), section 419 shall also govern the deduction of the contribution of a facility (or other contribution used to acquire or improve a facility) to a welfare benefit fund after June 22, 1984. See Q&A-11 of §1.419-1T. In the case of a welfare benefit fund maintained pursuant to a collective bargaining agreement, section 419 applies to the extent provided under the special effective date rule described in Q&A-2 of §1.419-1T and the special rules of §1.419A-2T. For rules relating to the deduction of contributions paid or accrued with respect to a welfare benefit fund, see section 419 and §1.419-1T.

[T.D. 8073, 51 FR 4319, Feb. 4, 1986, as amended by T.D. 8435, 57 FR 43896, Sept. 23, 1992]

#### § 1.162-11 Rentals.

(a) *Acquisition of a leasehold.* If a leasehold is acquired for business purposes for a specified sum, the purchaser may take as a deduction in his return an aliquot part of such sum each year, based on the number of years the lease has to run. Taxes paid by a tenant to or for a landlord for business property are additional rent and constitute a deductible item to the tenant and taxable income to the landlord, the amount of the tax being deductible by the latter. For disallowance of deduction for income taxes paid by a lessee corporation pursuant to a lease arrangement with the lessor corporation, see section 110 and the regulations thereunder. See section 178 and the regulations thereunder for rules governing the effect to be given renewal options in amortizing the costs incurred after July 28, 1958 of acquiring a lease. See §1.197-2 for rules governing the amortization of costs to acquire limited interests in section 197 intangibles.

(b) *Improvements by lessee on lessor's property.* (1) The cost to a lessee of erecting buildings or making permanent improvements on property of which he is the lessee is a capital investment, and is not deductible as a

business expense. If the estimated useful life in the hands of the taxpayer of the building erected or of the improvements made, determined without regard to the terms of the lease, is longer than the remaining period of the lease, an annual deduction may be made from gross income of an amount equal to the total cost of such improvements divided by the number of years remaining in the term of the lease, and such deduction shall be in lieu of a deduction for depreciation. If, on the other hand, the useful life of such buildings or improvements in the hands of the taxpayer is equal to or shorter than the remaining period of the lease, this deduction shall be computed under the provisions of section 167 (relating to depreciation).

(2) If the lessee began improvements on leased property before July 28, 1958, or if the lessee was on such date and at all times thereafter under a binding legal obligation to make such improvements, the matter of spreading the cost of erecting buildings or making permanent improvements over the term of the original lease, together with the renewal period or periods depends upon the facts in the particular case, including the presence or absence of an obligation of renewal and the relationship between the parties. As a general rule, unless the lease has been renewed or the facts show with reasonable certainty that the lease will be renewed, the cost or other basis of the lease, or the cost of improvements shall be spread only over the number of years the lease has to run without taking into account any right of renewal. The provisions of this subparagraph may be illustrated by the following examples:

*Example (1).* A subsidiary corporation leases land from its parent at a fair rental for a 25-year period. The subsidiary erects on the land valuable factory buildings having an estimated useful life of 50 years. These facts show with reasonable certainty that the lease will be renewed, even though the lease contains no option of renewal. Therefore, the cost of the buildings shall be depreciated over the estimated useful life of the buildings in accordance with section 167 and the regulations thereunder.

*Example (2).* A retail merchandising corporation leases land at a fair rental from an unrelated lessor for the longest period that the lessor is willing to lease the land (30 years). The lessee erects on the land a de-

partment store having an estimated useful life of 40 years. These facts do not show with reasonable certainty that the lease will be renewed. Therefore, the cost of the building shall be spread over the remaining term of the lease. An annual deduction may be made of an amount equal to the cost of the building divided by the number of years remaining in the term of the lease, and such deduction shall be in lieu of a deduction for depreciation.

(3) See section 178 and the regulations thereunder for rules governing the effect to be given renewal options where a lessee begins improvements on leased property after July 28, 1958, other than improvements which on such date and at all times thereafter, the lessee was under a binding legal obligation to make.

[T.D. 6520, 25 FR 13692, Dec. 24, 1960; as amended by T.D. 8867, 65 FR 3825, Jan. 25, 2000]

#### § 1.162-12 Expenses of farmers.

(a) *Farms engaged in for profit.* A farmer who operates a farm for profit is entitled to deduct from gross income as necessary expenses all amounts actually expended in the carrying on of the business of farming. The cost of ordinary tools of short life or small cost, such as hand tools, including shovels, rakes, etc., may be deducted. The purchase of feed and other costs connected with raising livestock may be treated as expense deductions insofar as such costs represent actual outlay, but not including the value of farm produce grown upon the farm or the labor of the taxpayer. For rules regarding the capitalization of expenses of producing property in the trade or business of farming, see section 263A and the regulations thereunder. For taxable years beginning after July 12, 1972, where a farmer is engaged in producing crops and the process of gathering and disposal of such crops is not completed within the taxable year in which such crops were planted, expenses deducted may, with the consent of the Commissioner (see section 446 and the regulations thereunder), be determined upon the crop method, and such deductions must be taken in the taxable year in which the gross income from the crop has been realized. For taxable years beginning on or before July 12, 1972, where a farmer is engaged in producing

crops which take more than a year from the time of planting to the process of gathering and disposal, expenses deducted may, with the consent of the Commissioner (see section 446 and the regulations thereunder), be determined upon the crop method, and such deductions must be taken in the taxable year in which the gross income from the crop has been realized. If a farmer does not compute income upon the crop method, the cost of seeds and young plants which are purchased for further development and cultivation prior to sale in later years may be deducted as an expense for the year of purchase, provided the farmer follows a consistent practice of deducting such costs as an expense from year to year. The preceding sentence does not apply to the cost of seeds and young plants connected with the planting of timber (see section 611 and the regulations thereunder). For rules regarding the capitalization of expenses of producing property in the trade or business of farming, see section 263A of the Internal Revenue Code and §1.263A-4. The cost of farm machinery, equipment, and farm buildings represents a capital investment and is not an allowable deduction as an item of expense. Amounts expended in the development of farms, orchards, and ranches prior to the time when the productive state is reached may, at the election of the taxpayer, be regarded as investments of capital. For the treatment of soil and water conservation expenditures as expenses which are not chargeable to capital account, see section 175 and the regulations thereunder. For taxable years beginning after December 31, 1959, in the case of expenditures paid or incurred by farmers for fertilizer, lime, etc., see section 180 and the regulations thereunder. Amounts expended in purchasing work, breeding, dairy, or sporting animals are regarded as investments of capital, and shall be depreciated unless such animals are included in an inventory in accordance with §1.61-4. The purchase price of an automobile, even when wholly used in carrying on farming operations, is not deductible, but is regarded as an investment of capital. The cost of gasoline, repairs, and upkeep of an automobile if used wholly in the business of farming

is deductible as an expense; if used partly for business purposes and partly for the pleasure or convenience of the taxpayer or his family, such cost may be apportioned according to the extent of the use for purposes of business and pleasure or convenience, and only the proportion of such cost justly attributable to business purposes is deductible as a necessary expense.

(b) *Farms not engaged in for profit; taxable years beginning before January 1, 1970*—(1) *In general.* If a farm is operated for recreation or pleasure and not on a commercial basis, and if the expenses incurred in connection with the farm are in excess of the receipts therefrom, the entire receipts from the sale of farm products may be ignored in rendering a return of income, and the expenses incurred, being regarded as personal expenses, will not constitute allowable deductions.

(2) *Effective date.* The provisions of this paragraph shall apply with respect to taxable years beginning before January 1, 1970.

(3) *Cross reference.* For provisions relating to activities not engaged in for profit, applicable to taxable years beginning after December 31, 1969, see section 183 and the regulations thereunder.

[T.D. 7198, 37 FR 13679, July 13, 1972, as amended by T.D. 8729, 62 FR 44546, Aug. 22, 1997; T.D. 8897, 65 FR 50643, Aug. 21, 2000]

#### § 1.162-13 Depositors' guaranty fund.

Banking corporations which pursuant to the laws of the State in which they are doing business are required to set apart, keep, and maintain in their banks the amount levied and assessed against them by the State authorities as a "Depositors' guaranty fund," may deduct from their gross income the amount so set apart each year to this fund provided that such fund, when set aside and carried to the credit of the State banking board or duly authorized State officer, ceases to be an asset of the bank and may be withdrawn in whole or in part upon demand by such board or State officer to meet the needs of these officers in reimbursing depositors in insolvent banks, and provided further that no portion of the amount thus set aside and credited is returnable under the laws of the State

to the assets of the banking corporation. If, however, such amount is simply set up on the books of the bank as a reserve to meet a contingent liability and remains an asset of the bank, it will not be deductible except as it is actually paid out as required by law and upon demand of the proper State officers.

**§ 1.162-14 Expenditures for advertising or promotion of good will.**

A corporation which has, for the purpose of computing its excess profits tax credit under Subchapter E, Chapter 2, or Subchapter D, Chapter 1 of the Internal Revenue Code of 1939, elected under section 733 or section 451 (applicable to the excess profits tax imposed by Subchapter E of Chapter 2, and Subchapter D of Chapter 1, respectively) to charge to capital account for taxable years in its base period expenditures for advertising or the promotion of good will which may be regarded as capital investments, may not deduct similar expenditures for the taxable year. See section 263(b). Such a taxpayer has the burden of proving that expenditures for advertising or the promotion of good will which it seeks to deduct in the taxable year may not be regarded as capital investments under the provisions of the regulations prescribed under section 733 or section 451 of the Internal Revenue Code of 1939. See 26 CFR, 1938 ed., 35.733-2 (Regulations 112) and 26 CFR (1939) 40.451-2 (Regulations 130). For the disallowance of deductions for the cost of advertising in programs of certain conventions of political parties, or in publications part of the proceeds of which directly or indirectly inures (or is intended to inure) to or for the use of a political party or political candidate, see § 1.276-1.

[T.D. 6996, 34 FR 835, Jan. 18, 1969]

**§ 1.162-15 Contributions, dues, etc.**

(a) *Contributions to organizations described in section 170—(1) In general.* No deduction is allowable under section 162(a) for a contribution or gift by an individual or a corporation if any part thereof is deductible under section 170. For example, if a taxpayer makes a contribution of \$5,000 and only \$4,000 of this amount is deductible under section

170(a) (whether because of the percentage limitation under either section 170(b) (1) or (2), the requirement as to time of payment, or both) no deduction is allowable under section 162(a) for the remaining \$1,000.

(2) *Scope of limitations.* The limitations provided in section 162(b) and this paragraph apply only to payments which are in fact contributions or gifts to organizations described in section 170. For example, payments by a transit company to a local hospital (which is a charitable organization within the meaning of section 170) in consideration of a binding obligation on the part of the hospital to provide hospital services and facilities for the company's employees are not contributions or gifts within the meaning of section 170 and may be deductible under section 162(a) if the requirements of section 162(a) are otherwise satisfied.

(b) *Other contributions.* Donations to organizations other than those described in section 170 which bear a direct relationship to the taxpayer's business and are made with a reasonable expectation of a financial return commensurate with the amount of the donation may constitute allowable deductions as business expenses, provided the donation is not made for a purpose for which a deduction is not allowable by reason of the provisions of paragraph (b)(1)(i) or (c) of § 1.162-20. For example, a transit company may donate a sum of money to an organization (of a class not referred to in section 170) intending to hold a convention in the city in which it operates, with a reasonable expectation that the holding of such convention will augment its income through a greater number of people using its transportation facilities.

(c) *Dues.* Dues and other payments to an organization, such as a labor union or a trade association, which otherwise meet the requirements of the regulations under section 162, are deductible in full. For limitations on the deductibility of dues and other payments, see paragraph (b) and (c) of § 1.162-20.

(d) *Cross reference.* For provisions dealing with expenditures for institutional or "good will" advertising, see § 1.162-20.

[T.D. 6819, 30 FR 5580, Apr. 20, 1965]

**§ 1.162-16 Cross reference.**

For special rules relating to expenses in connection with subdividing real property for sale, see section 1237 and the regulations thereunder.

**§ 1.162-17 Reporting and substantiation of certain business expenses of employees.**

(a) *Introductory.* The purpose of the regulations in this section is to provide rules for the reporting of information on income tax returns by taxpayers who pay or incur ordinary and necessary business expenses in connection with the performance of services as an employee and to furnish guidance as to the type of records which will be useful in compiling such information and in its substantiation, if required. The rules prescribed in this section do not apply to expenses paid or incurred for incidentals, such as office supplies for the employer or local transportation in connection with an errand. Employees incurring such incidental expenses are not required to provide substantiation for such amounts. The term "ordinary and necessary business expenses" means only those expenses which are ordinary and necessary in the conduct of the taxpayer's business and are directly attributable to such business. The term does not include nondeductible personal, living or family expenses.

(b) *Expenses for which the employee is required to account to his employer—(1) Reimbursements equal to expenses.* The employee need not report on his tax return (either itemized or in total amount) expenses for travel, transportation, entertainment, and similar purposes paid or incurred by him solely for the benefit of his employer for which he is required to account and does account to his employer and which are charged directly or indirectly to the employer (for example, through credit cards) or for which the employee is paid through advances, reimbursements, or otherwise, provided the total amount of such advances, reimbursements, and charges is equal to such expenses. In such a case the taxpayer need only state in his return that the total of amounts charged directly or indirectly to his employer through credit cards or otherwise and received

from the employer as advances or reimbursements did not exceed the ordinary and necessary business expenses paid or incurred by the employee.

(2) *Reimbursements in excess of expenses.* In case the total of amounts charged directly or indirectly to the employer and received from the employer as advances, reimbursements, or otherwise, exceeds the ordinary and necessary business expenses paid or incurred by the employee and the employee is required to and does account to his employer for such expenses, the taxpayer must include such excess in income and state on his return that he has done so.

(3) *Expenses in excess of reimbursements.* If the employee's ordinary and necessary business expenses exceed the total of the amounts charged directly or indirectly to the employer and received from the employer as advances, reimbursements, or otherwise, and the employee is required to and does account to his employer for such expenses, the taxpayer may make the statement in his return required by subparagraph (1) of this paragraph unless he wishes to claim a deduction for such excess. If, however, he wishes to secure a deduction for such excess, he must submit a statement showing the following information as part of his tax return:

(i) The total of any charges paid or borne by the employer and of any other amounts received from the employer for payment of expenses whether by means of advances, reimbursements or otherwise; and

(ii) The nature of his occupation, the number of days away from home on business, and the total amount of ordinary and necessary business expenses paid or incurred by him (including those charged directly or indirectly to the employer through credit cards or otherwise) broken down into such broad categories as transportation, meals and lodging while away from home overnight, entertainment expenses, and other business expenses.

(4) To "account" to his employer as used in this section means to submit an expense account or other required written statement to the employer showing the business nature and the amount of all the employee's expenses

(including those charged directly or indirectly to the employer through credit cards or otherwise) broken down into such broad categories as transportation, meals and lodging while away from home overnight, entertainment expenses, and other business expenses. For this purpose, the Commissioner in his discretion may approve reasonable business practices under which mileage, per diem in lieu of subsistence, and similar allowances providing for ordinary and necessary business expenses in accordance with a fixed scale may be regarded as equivalent to an accounting to the employer.

(c) *Expenses for which the employee is not required to account to his employer.* If the employee is not required to account to his employer for his ordinary and necessary business expenses, e.g., travel, transportation, entertainment, and similar items, or, though required, fails to account for such expenses, he must submit, as a part of his tax return, a statement showing the following information:

(1) The total of all amounts received as advances or reimbursements from his employer in connection with the ordinary and necessary business expenses of the employee, including amounts charged directly or indirectly to the employer through credit cards or otherwise; and

(2) The nature of his occupation, the number of days away from home on business, and the total amount of ordinary and necessary business expenses paid or incurred by him (including those charged directly or indirectly to the employer through credit cards or otherwise) broken down into such broad categories as transportation, meals and lodging while away from home overnight, entertainment expenses, and other business expenses.

(d) *Substantiation of items of expense.*

(1) Although the Commissioner may require any taxpayer to substantiate such information concerning expense accounts as may appear to be pertinent in determining tax liability, taxpayers ordinarily will not be called upon to substantiate expense account information except those in the following categories:

(i) A taxpayer who is not required to account to his employer, or who does not account;

(ii) A taxpayer whose expenses exceed the total of amounts charged to his employer and amounts received through advances, reimbursements or otherwise and who claims a deduction on his return for such excess;

(iii) A taxpayer who is related to his employer within the meaning of section 267(b); and

(iv) Other taxpayers in cases where it is determined that the accounting procedures used by the employer for the reporting and substantiation of expenses by employees are not adequate.

(2) The Code contemplates that taxpayers keep such records as will be sufficient to enable the Commissioner to correctly determine income tax liability. Accordingly, it is to the advantage of taxpayers who may be called upon to substantiate expense account information to maintain as adequate and detailed records of travel, transportation, entertainment, and similar business expenses as practical since the burden of proof is upon the taxpayer to show that such expenses were not only paid or incurred but also that they constitute ordinary and necessary business expenses. One method for substantiating expenses incurred by an employee in connection with his employment is through the preparation of a daily diary or record of expenditures, maintained in sufficient detail to enable him to readily identify the amount and nature of any expenditure, and the preservation of supporting documents, especially in connection with large or exceptional expenditures. Nevertheless, it is recognized that by reason of the nature of certain expenses or the circumstances under which they are incurred, it is often difficult for an employee to maintain detailed records or to preserve supporting documents for all his expenses. Detailed records of small expenditures incurred in traveling or for transportation, as for example, tips, will not be required.

(3) Where records are incomplete or documentary proof is unavailable, it may be possible to establish the amount of the expenditures by approximations based upon reliable secondary sources of information and collateral

evidence. For example, in connection with an item of traveling expense a taxpayer might establish that he was in a travel status a certain number of days but that it was impracticable for him to establish the details of all his various items of travel expense. In such a case rail fares or plane fares can usually be ascertained with exactness and automobile costs approximated on the basis of mileage covered. A reasonable approximation of meals and lodging might be based upon receipted hotel bills or upon average daily rates for such accommodations and meals prevailing in the particular community for comparable accommodations. Since detailed records of incidental items are not required, deductions for these items may be based upon a reasonable approximation. In cases where a taxpayer is called upon to substantiate expense account information, the burden is on the taxpayer to establish that the amounts claimed as a deduction are reasonably accurate and constitute ordinary and necessary business expenses paid or incurred by him in connection with his trade or business. In connection with the determination of factual matters of this type, due consideration will be given to the reasonableness of the stated expenditures for the claimed purposes in relation to the taxpayer's circumstances (such as his income and the nature of his occupation), to the reliability and accuracy of records in connection with other items more readily lending themselves to detailed recordkeeping, and to all of the facts and circumstances in the particular case.

(e) *Applicability.* (1) Except as provided in subparagraph (2) of this paragraph, the provisions of the regulations in this section are supplemental to existing regulations relating to information required to be submitted with income tax returns, and shall be applicable with respect to taxable years beginning after December 31, 1957, notwithstanding any existing regulation to the contrary.

(2) With respect to taxable years ending after December 31, 1962, but only in respect of periods after such date, the provisions of the regulations in this section are superseded by the regula-

tions under section 274(d) to the extent inconsistent therewith. See § 1.274-5.

(3) For taxable years beginning on or after January 1, 1989, the provisions of this section are superseded by the regulations under section 62(c) to the extent this section is inconsistent with those regulations. See § 1.62-2.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6630, 27 FR 12935, Dec. 29, 1962; T.D. 8276, 54 FR 51026, Dec. 12, 1989; T.D. 8324, 55 FR 51695, Dec. 17, 1990]

#### § 1.162-18 Illegal bribes and kickbacks.

(a) *Illegal payments to government officials or employees—(1) In general.* No deduction shall be allowed under section 162(a) for any amount paid or incurred, directly or indirectly, to an official or employee of any government, or of any agency or other instrumentality of any government, if—

(i) In the case of a payment made to an official or employee of a government other than a foreign government described in subparagraph (3) (ii) or (iii) of this paragraph, the payment constitutes an illegal bribe or kickback, or

(ii) In the case of a payment made to an official or employee of a foreign government described in subparagraph (3) (ii) or (iii) of this paragraph, the making of the payment would be unlawful under the laws of the United States (if such laws were applicable to the payment and to the official or employee at the time the expenses were paid or incurred).

No deduction shall be allowed for an accrued expense if the eventual payment thereof would fall within the prohibition of this section. The place where the expenses are paid or incurred is immaterial. For purposes of subdivision (ii) of this subparagraph, lawfulness, or unlawfulness of the payment under the laws of the foreign country is immaterial.

(2) *Indirect payment.* For purposes of this paragraph, an indirect payment to an individual shall include any payment which inures to his benefit or promotes his interests, regardless of the medium in which the payment is made and regardless of the identity of the immediate recipient or payor. Thus, for example, payment made to an

agent, relative, or independent contractor of an official or employee, or even directly into the general treasury of a foreign country of which the beneficiary is an official or employee, may be treated as an indirect payment to the official or employee, if in fact such payment inures or will inure to his benefit or promotes or will promote his financial or other interests. A payment made by an agent or independent contractor of the taxpayer which benefits the taxpayer shall be treated as an indirect payment by the taxpayer to the official or employee.

(3) *Official or employee of a government.* Any individual officially connected with—

(i) The Government of the United States, a State, a territory or possession of the United States, the District of Columbia, or the Commonwealth of Puerto Rico,

(ii) The government of a foreign country, or

(iii) A political subdivision of, or a corporation or other entity serving as an agency or instrumentality of, any of the above,

in whatever capacity, whether on a permanent or temporary basis, and whether or not serving for compensation, shall be included within the term “official or employee of a government”, regardless of the place of residence or post of duty of such individual. An independent contractor would not ordinarily be considered to be an official or employee. For purposes of section 162(c) and this paragraph, the term “foreign country” shall include any foreign nation, whether or not such nation has been accorded diplomatic recognition by the United States. Individuals who purport to act on behalf of or as the government of a foreign nation, or an agency or instrumentality thereof, shall be treated under this section as officials or employees of a foreign government, whether or not such individuals in fact control such foreign nation, agency, or instrumentality, and whether or not such individuals are accorded diplomatic recognition. Accordingly, a group in rebellion against an established government shall be treated as officials or employees of a foreign government, as shall officials or employ-

ees of the government against which the group is in rebellion.

(4) *Laws of the United States.* The term “laws of the United States”, to which reference is made in paragraph (a)(1)(ii) of this section, shall be deemed to include only Federal statutes, including State laws which are assimilated into Federal law by Federal statute, and legislative and interpretative regulations thereunder. The term shall also be limited to statutes which prohibit some act or acts, for the violation of which there is a civil or criminal penalty.

(5) *Burden of proof.* In any proceeding involving the issue of whether, for purposes of section 162(c)(1), a payment made to a government official or employee constitutes an illegal bribe or kickback (or would be unlawful under the laws of the United States) the burden of proof in respect of such issue shall be upon the Commissioner to the same extent as he bears the burden of proof in civil fraud cases under section 7454 (*i.e.*, he must prove the illegality of the payment by clear and convincing evidence).

(6) *Example.* The application of this paragraph may be illustrated by the following example:

*Example.* X Corp. is in the business of selling hospital equipment in State Y. During 1970, X Corp. employed A who at the time was employed full time by State Y as Superintendent of Hospitals. The purpose of A’s employment by X Corp. was to procure for it an improper advantage over other concerns in the making of sales to hospitals in respect of which A, as Superintendent, had authority. X Corp. paid A \$5,000 during 1970. The making of this payment was illegal under the laws of State Y. Under section 162(c)(1), X Corp. is precluded from deducting as a trade or business expense the \$5,000 paid to A.

(b) *Other illegal payments—(1) In general.* No deduction shall be allowed under section 162(a) for any payment (other than a payment described in paragraph (a) of this section) made, directly or indirectly, to any person, if the payment constitutes an illegal bribe, illegal kickback, or other illegal payment under the laws of the United States (as defined in paragraph (a)(4) of this section), or under any State law (but only if such State law is generally enforced), which subjects the payor to

a criminal penalty or the loss (including a suspension) of license or privilege to engage in a trade or business (whether or not such penalty or loss is actually imposed upon the taxpayer). For purposes of this paragraph, a kickback includes a payment in consideration of the referral of a client, patient, or customer. This paragraph applies only to payments made after December 30, 1969.

(2) *State law.* For purposes of this paragraph, State law means a statute of a State or the District of Columbia.

(3) *Generally enforced.* For purposes of this paragraph, a State law shall be considered to be generally enforced unless it is never enforced or the only persons normally charged with violations thereof in the State (or the District of Columbia) enacting the law are infamous or those whose violations are extraordinarily flagrant. For example, a criminal statute of a State shall be considered to be generally enforced unless violations of the statute which are brought to the attention of appropriate enforcement authorities do not result in any enforcement action in the absence of unusual circumstances.

(4) *Burden of proof.* In any proceeding involving the issue of whether, for purposes of section 162(c)(2), a payment constitutes an illegal bribe, illegal kickback, or other illegal payment the burden of proof in respect of such issue shall be upon the Commissioner to the same extent as he bears the burden of proof in civil fraud cases under section 7454 (*i.e.*, he must prove the illegality of the payment by clear and convincing evidence).

(5) *Example.* The application of this paragraph may be illustrated by the following example:

*Example.* X Corp., a calendar-year taxpayer, is engaged in the ship repair business in State Y. During 1970, repairs on foreign ships accounted for a substantial part of its total business. It was X Corp.'s practice to kick back approximately 10 percent of the repair bill to the captain and chief engineer of all foreign-owned vessels, which kickbacks are illegal under a law of State Y (which is generally enforced) and potentially subject X Corp. to fines. During 1970, X Corp. paid \$50,000 in such kickbacks. On X Corp.'s return for 1970, a deduction under section 162 was taken for the \$50,000. The deduction of the \$50,000 of illegal kickbacks during 1970 is

disallowed under section 162(c)(2), whether or not X Corp. is prosecuted with respect to the kickbacks.

(c) *Kickbacks, rebates, and bribes under medicare and medicaid.* No deduction shall be allowed under section 162(a) for any kickback, rebate, or bribe (whether or not illegal) made on or after December 10, 1971, by any provider of services, supplier, physician, or other person who furnishes items or services for which payment is or may be made under the Social Security Act, as amended, or in whole or in part out of Federal funds under a State plan approved under such Act, if such kickback, rebate, or bribe is made in connection with the furnishing of such items or services or the making or receipt of such payments. For purposes of this paragraph, a kickback includes a payment in consideration of the referral of a client, patient, or customer.

[T.D. 7345, 40 FR 7437, Feb. 20, 1975; 40 FR 8948, Mar. 4, 1975]

#### § 1.162-19 Capital contributions to Federal National Mortgage Association.

(a) *In general.* The initial holder of stock of the Federal National Mortgage Association (FNMA) which is issued pursuant to section 303(c) of the Federal National Mortgage Association Charter Act (12 U.S.C., section 1718) in a taxable year beginning after December 31, 1959, shall treat the excess, if any, of the issuance price (the amount of capital contributions evidenced by a share of stock) over the fair market value of the stock as of the issue date of such stock as an ordinary and necessary business expense paid or incurred during the year in which occurs the date of issuance of the stock. To the extent that a sale to FNMA of mortgage paper gives rise to the issuance of a share of FNMA stock during a taxable year beginning after December 31, 1959, such sale is to be treated in a manner consistent with the purpose for, and the legislative intent underlying the enactment of, the provisions of section 8, Act of September 14, 1960 (Pub. L. 86-779, 74 Stat. 1003). Thus, for the purpose of determining an initial holder's gain or loss from the sale to FNMA of mortgage paper, with respect to which a share of FNMA stock

§ 1.162-20

is issued in a taxable year beginning after December 31, 1959 (irrespective of when the sale is made), the amount realized by the initial holder from the sale of the mortgage paper is the amount of the "FNMA purchase price". The "FNMA purchase price" is the gross amount of the consideration agreed upon between FNMA and the initial holder for the purchase of the mortgage paper, without regard to any deduction therefrom as, for example, a deduction representing a capital contribution or a purchase or marketing fee. The date of issuance of the stock is the date which appears on the stock certificates of the initial holder as the date of issue. The initial holder is the original purchaser who is issued stock of the Federal National Mortgage Association pursuant to section 303(c) of the Act, and who appears on the books of FNMA as the initial holder. In determining the period for which the initial holder has held such stock, such period shall begin with the date of issuance.

(b) *Examples.* The provisions of paragraph (a) of this section may be illustrated by the following examples:

*Example (1).* A, a banking institution which reports its income on a calendar year basis, sold mortgage paper with an outstanding principal balance of \$12,500 to FNMA on October 17, 1960. The FNMA purchase price was \$11,500. A's basis for the mortgage paper was \$10,500. In accordance with the terms of the contract, FNMA deducted \$375 (\$250 representing capital contribution and \$125 representing purchase and marketing fee) from the amount of the purchase price. FNMA credited A's account with the amount of the capital contribution. A stock certificate evidencing two shares of FNMA common stock of \$100 par value was mailed to A and FNMA deducted \$200 from A's account, leaving a net balance of \$50 in such account. The stock certificate, bearing an issue date of November 1, 1960, was received by A on November 7, 1960. The fair market value of a share of FNMA stock on October 17, 1960, was \$65, on November 1, 1960, was \$67, and on November 7, 1960, was \$68. A may deduct \$66 the difference between the issuance price (\$200) and the fair market value (\$134) of the two shares of stock on the date of issuance (November 1, 1960), as a business expense for the taxable year 1960. The basis of each share of stock issued as of November 1, 1960 will be \$67. See section 1054 and § 1.1054-1. A's gain from the sale of the mortgage paper is \$875 computed as follows:

Amount realized in FNMA purchase price ..... \$11,500

A's basis in mortgage paper .....	\$10,500	
Purchase and marketing fee .....	125	
		10,625
Gain on sale .....		875

*Example (2).* Assume the same facts as in Example (1), and, in addition, that A sold to FNMA on December 15, 1960, additional mortgage paper having an outstanding principal balance of \$12,500. FNMA deducted from the FNMA purchase price \$250 representing capital contribution and credited A's account with this amount. A then had a total credit of \$300 to his account consisting of the \$50 balance from the transaction described in Example (1) and \$250 from the December 15th transaction. A stock certificate evidencing three shares of FNMA common stock of \$100 par value was mailed to A and FNMA deducted \$300 from A's account. The stock certificate, bearing an issue date of January 1, 1961, was received by A on January 9, 1961. The fair market value of a share of FNMA stock on January 1, 1961, was \$69. A may deduct \$93, the difference between the issuance price (\$300) and the fair market value (\$207) of the three shares of stock on the date of issuance (January 1, 1961), as a business expense for the taxable year 1961. The gain or loss on the sale of mortgage paper on December 15, 1960, is reportable for the taxable year 1960.

[T.D. 6690, 28 FR 12253, Nov. 19, 1963]

**§ 1.162-20 Expenditures attributable to lobbying, political campaigns, attempts to influence legislation, etc., and certain advertising.**

(a) *In general*—(1) *Scope of section.* This section contains rules governing the deductibility or nondeductibility of expenditures for lobbying purposes, for the promotion or defeat of legislation, for political campaign purposes (including the support of or opposition to any candidate for public office) or for carrying on propaganda (including advertising) related to any of the foregoing purposes. For rules applicable to such expenditures in respect of taxable years beginning before January 1, 1963, and for taxable years beginning after December 31, 1962, see paragraphs (b) and (c), respectively, of this section. This section also deals with expenditures for institutional or "good will" advertising.

(2) *Institutional or "good will" advertising.* Expenditures for institutional or "good will" advertising which keeps the taxpayer's name before the public are generally deductible as ordinary

and necessary business expenses provided the expenditures are related to the patronage the taxpayer might reasonably expect in the future. For example, a deduction will ordinarily be allowed for the cost of advertising which keeps the taxpayer's name before the public in connection with encouraging contributions to such organizations as the Red Cross, the purchase of United States Savings Bonds, or participation in similar causes. In like fashion, expenditures for advertising which presents views on economic, financial, social, or other subjects of a general nature, but which does not involve any of the activities specified in paragraph (b) or (c) of this section for which a deduction is not allowable, are deductible if they otherwise meet the requirements of the regulations under section 162.

(b) *Taxable years beginning before January 1, 1963*—(1) *In general.* (i) For taxable years beginning before January 1, 1963, expenditures for lobbying purposes, for the promotion or defeat of legislation, for political campaign purposes (including the support of or opposition to any candidate for public office), or for carrying on propaganda (including advertising) related to any of the foregoing purposes are not deductible from gross income. For example, the cost of advertising to promote or defeat legislation or to influence the public with respect to the desirability or undesirability of proposed legislation is not deductible as a business expense, even though the legislation may directly affect the taxpayer's business.

(ii) If a substantial part of the activities of an organization, such as a labor union or a trade association, consists of one or more of the activities specified in the first sentence of this subparagraph, deduction will be allowed only for such portion of the dues or other payments to the organization as the taxpayer can clearly establish is attributable to activities other than those so specified. The determination of whether such specified activities constitute a substantial part of an organization's activities shall be based on all the facts and circumstances. In no event shall special assessments or similar payments (including an increase in dues) made to any organization for any of such specified purposes

be deductible. For other provisions relating to the deductibility of dues and other payments to an organization, such as a labor union or a trade association, see paragraph (c) of § 1.162-15.

(2) *Expenditures for promotion or defeat of legislation.* For purposes of this paragraph, expenditures for the promotion or the defeat of legislation include, but shall not be limited to, expenditures for the purpose of attempting to—

(i) Influence members of a legislative body directly, or indirectly by urging or encouraging the public to contact such members for the purpose of proposing, supporting, or opposing legislation, or

(ii) Influence the public to approve or reject a measure in a referendum, initiative, vote on a constitutional amendment, or similar procedure.

(c) *Taxable years beginning after December 31, 1962*—(1) *In general.* For taxable years beginning after December 31, 1962, certain types of expenses incurred with respect to legislative matters are deductible under section 162(a) if they otherwise meet the requirements of the regulations under section 162. These deductible expenses are described in subparagraph (2) of this paragraph. All other expenditures for lobbying purposes, for the promotion or defeat of legislation (see paragraph (b)(2) of this section), for political campaign purposes (including the support of or opposition to any candidate for public office), or for carrying on propaganda (including advertising) relating to any of the foregoing purposes are not deductible from gross income for such taxable years. For the disallowance of deductions for bad debts and worthless securities of a political party, see § 1.271-1. For the disallowance of deductions for certain indirect political contributions, such as the cost of certain advertising and the cost of admission to certain dinners, programs, and inaugural events, see § 1.276-1.

(2) *Appearances, etc., with respect to legislation*—(i) *General rule.* Pursuant to the provisions of section 162(e), expenses incurred with respect to legislative matters which may be deductible are those ordinary and necessary expenses (including, but not limited to, traveling expenses described in section

162(a)(2) and the cost of preparing testimony) paid or incurred by the taxpayer during a taxable year beginning after December 31, 1962, in carrying on any trade or business which are in direct connection with—

(a) Appearances before, submission of statements to, or sending communications to, the committees, or individual members of Congress or of any legislative body of a State, a possession of the United States, or a political subdivision of any of the foregoing with respect to legislation or proposed legislation of direct interest to the taxpayer, or

(b) Communication of information between the taxpayer and an organization of which he is a member with respect to legislation or proposed legislation of direct interest to the taxpayer and to such organization.

For provisions relating to dues paid or incurred with respect to an organization of which the taxpayer is a member, see subparagraph (3) of this paragraph.

(ii) *Legislation or proposed legislation of direct interest to the taxpayer—(a) Legislation or proposed legislation.* The term “legislation or proposed legislation” includes bills and resolutions introduced by a member of Congress or other legislative body referred to in subdivision (i)(a) of this subparagraph for consideration by such body as well as oral or written proposals for legislative action submitted to the legislative body or to a committee or member of such body.

(b) *Direct interest—(1) In general.* (i) Legislation or proposed legislation is of direct interest to a taxpayer if the legislation or proposed legislation is of such a nature that it will, or may reasonably be expected to, affect the trade or business of the taxpayer. It is immaterial whether the effect, or expected effect, on the trade or business will be beneficial or detrimental to the trade or business or whether it will be immediate. If legislation or proposed legislation has such a relationship to a trade or business that the expenses of any appearance or communication in connection with the legislation meets the ordinary and necessary test of section 162(a), then such legislation ordinarily meets the direct interest test of sec-

tion 162(e). However, if the nature of the legislation or proposed legislation is such that the likelihood of its having an effect on the trade or business of the taxpayer is remote or speculative, the legislation or proposed legislation is not of direct interest to the taxpayer. Legislation or proposed legislation which will not affect the trade or business of the taxpayer is not of direct interest to the taxpayer even though such legislation will affect the personal, living, or family activities or expenses of the taxpayer. Legislation or proposed legislation is not of direct interest to a taxpayer merely because it may affect business in general; however, if the legislation or proposed legislation will, or may reasonably be expected to, affect the taxpayer’s trade or business it will be of direct interest to the taxpayer even though it also will affect the trade or business of other taxpayers or business in general. To meet the direct interest test, it is not necessary that all provisions of the legislation or proposed legislation have an effect, or expected effect, on the taxpayer’s trade or business. The test will be met if one of the provisions of the legislation has the specified effect. Legislation or proposed legislation will be considered to be of direct interest to a membership organization if it is of direct interest to the organization, as such, or if it is of direct interest to one or more of its members.

(ii) Legislation which would increase or decrease the taxes applicable to the trade or business, increase or decrease the operating costs or earnings of the trade or business, or increase or decrease the administrative burdens connected with the trade or business meets the direct interest test. Legislation which would increase the social security benefits or liberalize the right to such benefits meets the direct interest test because such changes in the social security benefits may reasonably be expected to affect the retirement benefits which the employer will be asked to provide his employees or to increase his taxes. Legislation which would impose a retailer’s sales tax is of direct interest to a retailer because, although the tax may be passed on to his customers, collection of the tax will

impose additional burdens on the retailer, and because the increased cost of his products to the consumer may reduce the demand for them. Legislation which would provide an income tax credit or exclusion for shareholders is of direct interest to a corporation, because those tax benefits may increase the sources of capital available to the corporation. Legislation which would favorably or adversely affect the business of a competitor so as to affect the taxpayer's competitive position is of direct interest to the taxpayer. Legislation which would improve the school system of a community is of direct interest to a membership organization comprised of employers in the community because the improved school system is likely to make the community more attractive to prospective employees of such employers. On the other hand, proposed legislation relating to Presidential succession in the event of the death of the President has only a remote and speculative effect on any trade or business and therefore does not meet the direct interest test. Similarly, if a corporation is represented before a congressional committee to oppose an appropriation bill merely because of a desire to bring increased Government economy with the hope that such economy will eventually cause a reduction in the Federal income tax, the legislation does not meet the direct interest test because any effect it may have upon the corporation's trade or business is highly speculative.

(2) *Appearances, etc., by expert witnesses.* (i) An appearance or communication (of a type described in paragraph (c)(2)(i)(a) of this section) by an individual in connection with legislation or proposed legislation shall be considered to be with respect to legislation of direct interest to such individual if the legislation is in a field in which he specializes as an employee, if the appearance or communication is not on behalf of his employer, and if it is customary for individuals in his type of employment to publicly express their views in respect of matters in their field of competence. Expenses incurred by such an individual in connection with such an appearance of communication, including traveling ex-

penses properly allocable thereto, represent ordinary and necessary business expenses and are, therefore, deductible under section 162. For example, if a university professor who teaches in the field of money and banking appears, on his own behalf, before a legislative committee to testify on proposed legislation regarding the banking system, his expenses incurred in connection with such appearance are deductible under section 162 since university professors customarily take an active part in the development of the law in their field of competence and publicly communicate the results of their work.

(ii) An appearance or communication (of a type described in paragraph (c)(2)(i)(a) of this section) by an employee or self-employed individual in connection with legislation or proposed legislation shall be considered to be with respect to legislation of direct interest to such person if the legislation is in the field in which he specializes in his business (or as an employee) and if the appearance or communication is made pursuant to an invitation extended to him individually for the purpose of receiving his expert testimony. Expenses incurred by an employee or self-employed individual in connection with such an appearance or communication, including traveling expenses properly allocable thereto, represent ordinary and necessary business expenses and are, therefore, deductible under section 162. For example, if a self-employed individual is personally invited by a congressional committee to testify on proposed legislation in the field in which he specializes in his business, his expenses incurred in connection with such appearance are deductible under section 162. If a self-employed individual makes an appearance, on his own behalf, before a legislative committee without having been extended an invitation his expenses will be deductible to the extent otherwise provided in this paragraph.

(3) *Nominations, etc.* A taxpayer does not have a direct interest in matters such as nominations, appointments, or the operation of the legislative body.

(iii) *Allowable expenses.* To be deductible under section 162(a), expenditures which meet the tests of deductibility under the provisions of this paragraph

must also qualify as ordinary and necessary business expenses under section 162(a) and, in addition, be in direct connection with the carrying on of the activities specified in subdivision (i)(a) or (i)(b) of this subparagraph. For example, a taxpayer appearing before a committee of the Congress to present testimony concerning legislation or proposed legislation in which he has a direct interest may deduct the ordinary and necessary expenses directly connected with his appearance, such as traveling expenses described in section 162(a)(2), and the cost of preparing testimony.

(3) *Deductibility of dues and other payments to an organization.* If a substantial part of the activities of an organization, such as a labor union or a trade association, consists of one or more of the activities to which this paragraph relates (legislative matters, political campaigns, etc.), exclusive of any activity constituting an appearance or communication with respect to legislation or proposed legislation of direct interest to the organization (see subparagraph (c)(2)(ii)(b)(I)), a deduction will be allowed only for such portion of the dues or other payments to the organization as the taxpayer can clearly establish is attributable to activities to which this paragraph does not relate and to any activity constituting an appearance or communication with respect to legislation or proposed legislation of direct interest to the organization. The determination of whether a substantial part of an organization's activities consists of one or more of the activities to which this paragraph relates (exclusive of appearances or communications with respect to legislation or proposed legislation of direct interest to the organization) shall be based on all the facts and circumstances. In no event shall a deduction be allowed for that portion of a special assessment or similar payment (including an increase in dues) made to any organization for any activity to which this paragraph relates if the activity does not constitute an appearance or communication with respect to legislation or proposed legislation of direct interest to the organization. If an organization pays or incurs expenses allocable to legislative activities which meet the

tests of subdivisions (i) and (ii) of subparagraph (2) of this paragraph (appearances or communications with respect to legislation or proposed legislation of direct interest to the organization), on behalf of its members, the dues paid by a taxpayer are deductible to the extent used for such activities. Dues paid by a taxpayer will be considered to be used for such an activity, and thus deductible, although the legislation or proposed legislation involved is not of direct interest to the taxpayer, if, pursuant to the provisions of subparagraph (2)(ii)(b)(I) of this paragraph, the legislation or proposed legislation is of direct interest to the organization, as such, or is of direct interest to one or more members of the organization. For other provisions relating to the deductibility of dues and other payments to an organization, such as a labor union or a trade association, see paragraph (c) of § 1.162-15.

(4) *Limitations.* No deduction shall be allowed under section 162(a) for any amount paid or incurred (whether by way of contribution, gift, or otherwise) in connection with any attempt to influence the general public, or segments thereof, with respect to legislative matters, elections, or referendums. For example, no deduction shall be allowed for any expenses incurred in connection with "grassroot" campaigns or any other attempts to urge or encourage the public to contact members of a legislative body for the purpose of proposing, supporting, or opposing legislation.

(5) *Expenses paid or incurred after December 31, 1993, in connection with influencing legislation other than certain local legislation.* The provisions of paragraphs (c)(1) through (3) of this section are superseded for expenses paid or incurred after December 31, 1993, in connection with influencing legislation (other than certain local legislation) to the extent inconsistent with section 162(e)(1)(A) (as limited by section 162(e)(2)) and §§ 1.162-20(d) and 1.162-29.

(d) *Dues allocable to expenditures after 1993.* No deduction is allowed under section 162(a) for the portion of dues or other similar amounts paid by the taxpayer to an organization exempt from tax (other than an organization described in section 501(c)(3)) which the

organization notifies the taxpayer under section 6033(e)(1)(A)(ii) is allocable to expenditures to which section 162(e)(1) applies. The first sentence of this paragraph (d) applies to dues or other similar amounts whether or not paid on or before December 31, 1993. Section 1.162-20(c)(3) is superseded to the extent inconsistent with this paragraph (d).

[T.D. 6819, 30 FR 5581, Apr. 20, 1965, as amended by T.D. 6996, 34 FR 835, Jan. 18, 1969; T.D. 8602, 60 FR 37573, July 21, 1995]

#### § 1.162-21 Fines and penalties.

(a) *In general.* No deduction shall be allowed under section 162(a) for any fine or similar penalty paid to—

(1) The government of the United States, a State, a territory or possession of the United States, the District of Columbia, or the Commonwealth of Puerto Rico;

(2) The government of a foreign country; or

(3) A political subdivision of, or corporation or other entity serving as an agency or instrumentality of, any of the above.

(b) *Definition.* (1) For purposes of this section a fine or similar penalty includes an amount—

(i) Paid pursuant to conviction or a plea of guilty or *nolo contendere* for a crime (felony or misdemeanor) in a criminal proceeding;

(ii) Paid as a civil penalty imposed by Federal, State, or local law, including additions to tax and additional amounts and assessable penalties imposed by chapter 68 of the Internal Revenue Code of 1954;

(iii) Paid in settlement of the taxpayer's actual or potential liability for a fine or penalty (civil or criminal); or

(iv) Forfeited as collateral posted in connection with a proceeding which could result in imposition of such a fine or penalty.

(2) The amount of a fine or penalty does not include legal fees and related expenses paid or incurred in the defense of a prosecution or civil action arising from a violation of the law imposing the fine or civil penalty, nor court costs assessed against the taxpayer, or stenographic and printing charges. Compensatory damages (including damages under section 4A of

the Clayton Act (15 U.S.C. 15a), as amended) paid to a government do not constitute a fine or penalty.

(c) *Examples.* The application of this section may be illustrated by the following examples:

*Example (1).* M Corp. was indicted under section 1 of the Sherman Anti-Trust Act (15 U.S.C. 1) for fixing and maintaining prices of certain electrical products. M Corp. was convicted and was fined \$50,000. The United States sued M Corp. under section 4A of the Clayton Act (15 U.S.C. 15a) for \$100,000, the amount of the actual damages resulting from the price fixing of which M Corp. was convicted. Pursuant to a final judgment entered in the civil action, M Corp. paid the United States \$100,000 in damages. Section 162(f) precludes M Corp. from deducting the fine of \$50,000 as a trade or business expense. Section 162(f) does not preclude it from deducting the \$100,000 paid to the United States as actual damages.

*Example (2).* N Corp. was found to have violated 33 U.S.C. 1321(b)(3) when a vessel it operated discharged oil in harmful quantities into the navigable waters of the United States. A civil penalty under 33 U.S.C. 1321(b)(6) of \$5,000 was assessed against N Corp. with respect to the discharge. N Corp. paid \$5,000 to the Coast Guard in payment of the civil penalty. Section 162(f) precludes N Corp. from deducting the \$5,000 penalty.

*Example (3).* O Corp., a manufacturer of motor vehicles, was found to have violated 42 U.S.C. 1857f-2(a)(1) by selling a new motor vehicle which was not covered by the required certificate of conformity. Pursuant to 42 U.S.C. 1857f-4, O Corp. was required to pay, and did pay, a civil penalty of \$10,000. In addition, pursuant to 42 U.S.C. 1857f-5a(c)(1), O Corp. was required to expend, and did expend, \$500 in order to remedy the nonconformity of that motor vehicle. Section 162(f) precludes O Corp. from deducting the \$10,000 penalty as a trade or business expense, but does not preclude it from deducting the \$500 which it expended to remedy the nonconformity.

*Example (4).* P Corp. was the operator of a coal mine in which occurred a violation of a mandatory safety standard prescribed by the Federal Coal Mine Health and Safety Act of 1969 (30 U.S.C. 801 *et seq.*). Pursuant to 30 U.S.C. 819(a), a civil penalty of \$10,000 was assessed against P Corp., and P Corp. paid the penalty. Section 162(f) precludes P Corp. from deducting the \$10,000 penalty.

*Example (5).* Q Corp., a common carrier engaged in interstate commerce by railroad, hauled a railroad car which was not equipped with efficient hand brakes, in violation of 45 U.S.C. 11. Q Corp. was found to be liable for a penalty of \$250 pursuant to 45 U.S.C. 13. Q

Corp. paid that penalty. Section 162(f) precludes Q Corp. from deducting the \$250 penalty.

*Example (6).* R Corp. owned and operated on the highways of State X a truck weighing in excess of the amount permitted under the law of State X. R Corp. was found to have violated the law and was assessed a fine of \$85 which it paid to State X. Section 162(f) precludes R Corp. from deducting the amount so paid.

*Example (7).* S Corp. was found to have violated a law of State Y which prohibited the emission into the air of particulate matter in excess of a limit set forth in a regulation promulgated under that law. The Environmental Quality Hearing Board of State Y assessed a fine of \$500 against S Corp. The fine was payable to State Y, and S Corp. paid it. Section 162(f) precludes S Corp. from deducting the \$500 fine.

*Example (8).* T Corp. was found by a magistrate of City Z to be operating in such city an apartment building which did not conform to a provision of the city housing code requiring operable fire escapes on apartment buildings of that type. Upon the basis of the magistrate's finding, T Corp. was required to pay, and did pay, a fine of \$200 to City Z. Section 162(f) precludes T Corp. from deducting the \$200 fine.

[T.D. 7345, 40 FR 7437, Feb. 20, 1975; 40 FR 8948, Mar. 4, 1975, as amended by T.D. 7366, 40 FR 29290, July 11, 1975]

**§ 1.162-22 Treble damage payments under the antitrust laws.**

(a) *In general.* In the case of a taxpayer who after December 31, 1969, either is convicted in a criminal action of a violation of the Federal antitrust laws or enters a plea of guilty or *nolo contendere* to an indictment or information charging such a violation, and whose conviction or plea does not occur in a new trial following an appeal of a conviction on or before such date, no deduction shall be allowed under section 162(a) for two-thirds of any amount paid or incurred after December 31, 1969, with respect to—

(1) Any judgment for damages entered against the taxpayer under section 4 of the Clayton Act (15 U.S.C. 15), as amended, on account of such violation or any related violation of the Federal antitrust laws, provided such related violation occurred prior to the date of the final judgment of such conviction, or

(2) Settlement of any action brought under such section 4 on account of such violation or related violation.

For the purposes of this section, where a civil judgment has been entered or a settlement made with respect to a violation of the antitrust laws and a criminal proceeding is based upon the same violation, the criminal proceeding need not have been brought prior to the civil judgment or settlement. If, in his return for any taxable year, a taxpayer claims a deduction for an amount paid or incurred with respect to a judgment or settlement described in the first sentence of this paragraph and is subsequently convicted of a violation of the antitrust laws which makes a portion of such amount unallowable, then the taxpayer shall file an amended return for such taxable year on which the amount of the deduction is appropriately reduced. Attorney's fees, court costs, and other amounts paid or incurred in connection with a controversy under such section 4 which meet the requirements of section 162 are deductible under that section. For purposes of subparagraph (2) of this paragraph, the amount paid or incurred in settlement shall not include amounts attributable to the plaintiff's costs of suit and attorney's fees, to the extent that such costs or fees have actually been paid.

(b) *Conviction.* For purposes of paragraph (a) of this section, a taxpayer is convicted of a violation of the antitrust laws if a judgment of conviction (whether or not a final judgment) with respect to such violation has been entered against him, provided a subsequent final judgment of acquittal has not been entered or criminal prosecution with respect to such violation terminated without a final judgment of conviction. During the pendency of an appeal or other action directly contesting a judgment of conviction, the taxpayer should file a protective claim for credit or refund to avoid being barred by the period of limitations on credit or refund under section 6511.

(c) *Related violation.* For purposes of this section, a violation of the Federal antitrust laws is related to a subsequent violation if (1) with respect to the subsequent violation the United States obtains both a judgment in a criminal proceeding and an injunction against the taxpayer, and (2) the taxpayer's actions which constituted the

prior violation would have contravened such injunction if such injunction were applicable at the time of the prior violation.

(d) *Settlement following a dismissal of an action or amendment of the complaint.* For purposes of paragraph (a)(2) of this section, an amount may be considered as paid in settlement of an action even though the action is dismissed or otherwise disposed of prior to such settlement or the complaint is amended to eliminate the claim with respect to the violation or related violation.

(e) *Antitrust laws.* The term “anti-trust laws” as used in section 162(g) and this section shall include the Federal acts enumerated in paragraph (1) of section 1 of the Clayton Act (15 U.S.C. 12), as amended.

(f) *Examples.* The application of this section may be illustrated by the following examples:

*Example (1).* In 1970, the United States instituted a criminal prosecution against X Co., Y Co., A, the president of X Co., and B, the president of Y Co., under section 1 of the Sherman Anti-Trust Act, 15 U.S.C. 1. In the indictment, the defendants were charged with conspiring to fix and maintain prices of electrical transformers from 1965 to 1970. All defendants entered pleas of nolo contendere to these charges. These pleas were accepted and judgments of conviction entered. In a companion civil suit, the United States obtained an injunction prohibiting the defendants from conspiring to fix and maintain prices in the electrical transformer market. Thereafter, Z Co. sued X Co. and Y Co. for \$300,000 in treble damages under section 4 of the Clayton Act. Z Co.’s complaint alleged that the criminal conspiracy between X Co. and Y Co. forced Z Co. to pay excessive prices for electrical transformers. X Co. and Y Co. each paid Z Co. \$85,000 in full settlement of Z Co.’s action. Of each \$85,000 paid, \$10,000 was attributable to court costs and attorney’s fees actually paid by Z Co. Under section 162(g), X Co. and Y Co. are each precluded from deducting as a trade or business expense more than \$35,000 of the \$85,000 paid to Z Co. in settlement—

$\$10,000 + [(\$85,000 - \$10,000) \times 3]$

*Example (2).* Assume the same facts as in example (1) except that Z Co.’s claim for treble damages was based on a conspiracy to fix and maintain prices in the sale of electrical transformers during 1963. Although the criminal prosecution of the defendants did not involve 1963 (a year barred by the applicable criminal statute of limitations when the prosecution was instituted), Z Co.’s

pleadings alleged that the civil statute of limitations had been tolled by the defendants’ fraudulent concealment of their conspiracy. Since the United States has obtained both a judgment in a criminal proceeding and an injunction against the defendants in connection with their activities from 1965 to 1970, and the alleged actions of the defendants in 1963 would have contravened such injunction if it were applicable in 1963, the alleged violation in 1963 is related to the violation from 1965 to 1970. Accordingly, the tax consequences to X Co. and Y Co. of the payments of \$85,000 in settlement of Z Co.’s claim against X Co. and Y Co. are the same as in example (1).

*Example (3).* Assume the same facts as in example (1) except that Z Co.’s claim for treble damages was based on a conspiracy to fix and maintain prices with respect to electrical insulators for high-tension power poles. Since the civil action was not based on the same violation of the Federal antitrust laws as the criminal action, or on a related violation (a violation which would have contravened the injunction if it were applicable), X Co. and Y Co. are not precluded by section 162(g) from deducting as a trade or business expense the entire \$85,000 paid by each in settlement of the civil action.

[T.D. 7217, 37 FR 23916, Nov. 10, 1972]

#### § 1.162-25 Deductions with respect to noncash fringe benefits.

(a) [Reserved]

(b) *Employee.* If an employer provides the use of a vehicle (as defined in § 1.61-21(e)(2)) to an employee as a noncash fringe benefit and includes the entire value of the benefit in the employee’s gross income without taking into account any exclusion for a working condition fringe allowable under section 132 and the regulations thereunder, the employee may deduct that value multiplied by the percentage of the total use of the vehicle that is in connection with the employer’s trade or business (business value). For taxable years beginning before January 1, 1990, the employee may deduct the business value from gross income in determining adjusted gross income. For taxable years beginning on or after January 1, 1990, the employee may deduct the business value only as a miscellaneous itemized deduction in determining taxable income, subject to the 2-percent floor provided in section 67. If the employer determines the value of the noncash fringe benefit under a special accounting rule that allows the employer to

**§ 1.162-25T**

treat the value of benefits provided during the last two months of the calendar year or any shorter period as paid during the subsequent calendar year, then the employee must determine the deduction allowable under this paragraph (b) without regard to any use of the benefit during those last two months or any shorter period. The employee may not use a cents-per-mile valuation method to determine the deduction allowable under this paragraph (b).

[T.D. 8451, 57 FR 57669, Dec. 7, 1992; 57 FR 60568, Dec. 21, 1992]

**§ 1.162-25T Deductions with respect to noncash fringe benefits (temporary).**

(a) *Employer.* If an employer includes the value of a noncash fringe benefit in an employee's gross income, the employer may not deduct this amount as compensation for services, but rather may deduct only the costs incurred by the employer in providing the benefit to the employee. The employer may be allowed a cost recovery deduction under section 168 or a deduction under section 179 for an expense not chargeable to capital account, or, if the noncash fringe benefit is property leased by the employer, a deduction for the ordinary and necessary business expense of leasing the property.

(b) [Reserved]

(c) *Examples.* The following examples illustrate the provisions of this section.

*Example (1).* On January 1, 1986, X Company owns and provides the use of an automobile with a fair market value of \$20,000 to E, an employee, for the entire calendar year. Both X and E compute taxable income on the basis of the calendar year. Seventy percent of the use of the automobile by E is in connection with X's trade or business. If X uses the special rule provided in § 1.61-2T for valuing the availability of the automobile and takes into account the amount excludable as a working condition fringe, X would include \$1,680 (\$5,600, the Annual Lease Value, less 70 percent of \$5,600) in E's gross income for 1986. X may not deduct the amount included in E's income as compensation for services. X may, however, determine a cost recovery deduction under section 168, subject to the limitations under section 280F, for taxable year 1986.

*Example (2).* The facts are the same as in example (1), except that X includes \$5,600 in

E's gross income, the value of the noncash fringe benefit without taking into account the amount excludable as a working condition fringe. X may not deduct that amount as compensation for services, but may determine a cost recovery deduction under section 168, subject to the limitations under section 280F. For purposes of determining adjusted gross income, E may deduct \$3,920 (\$5,600 multiplied by the percent of business use).

[T.D. 8061, 50 FR 46013, Nov. 6, 1985, as amended by T.D. 8063, 50 FR 52312, Dec. 23, 1985; T.D. 8276, 54 FR 51026, Dec. 12, 1989; T.D. 8451, 57 FR 57669, Dec. 7, 1992]

**§ 1.162-27 Certain employee remuneration in excess of \$1,000,000.**

(a) *Scope.* This section provides rules for the application of the \$1 million deduction limit under section 162(m) of the Internal Revenue Code. Paragraph (b) of this section provides the general rule limiting deductions under section 162(m). Paragraph (c) of this section provides definitions of generally applicable terms. Paragraph (d) of this section provides an exception from the deduction limit for compensation payable on a commission basis. Paragraph (e) of this section provides an exception for qualified performance-based compensation. Paragraphs (f) and (g) of this section provide special rules for corporations that become publicly held corporations and payments that are subject to section 280G, respectively. Paragraph (h) of this section provides transition rules, including the rules for contracts that are grandfathered and not subject to section 162(m). Paragraph (j) of this section contains the effective date provisions. For rules concerning the deductibility of compensation for services that are not covered by section 162(m) and this section, see section 162(a)(1) and § 1.162-7. This section is not determinative as to whether compensation meets the requirements of section 162(a)(1).

(b) *Limitation on deduction.* Section 162(m) precludes a deduction under chapter 1 of the Internal Revenue Code by any publicly held corporation for compensation paid to any covered employee to the extent that the compensation for the taxable year exceeds \$1,000,000.

(c) *Definitions—(1) Publicly held corporation—(i) General rule.* A publicly held corporation means any corporation

issuing any class of common equity securities required to be registered under section 12 of the Exchange Act. A corporation is not considered publicly held if the registration of its equity securities is voluntary. For purposes of this section, whether a corporation is publicly held is determined based solely on whether, as of the last day of its taxable year, the corporation is subject to the reporting obligations of section 12 of the Exchange Act.

(ii) *Affiliated groups.* A publicly held corporation includes an affiliated group of corporations, as defined in section 1504 (determined without regard to section 1504(b)). For purposes of this section, however, an affiliated group of corporations does not include any subsidiary that is itself a publicly held corporation. Such a publicly held subsidiary, and its subsidiaries (if any), are separately subject to this section. If a covered employee is paid compensation in a taxable year by more than one member of an affiliated group, compensation paid by each member of the affiliated group is aggregated with compensation paid to the covered employee by all other members of the group. Any amount disallowed as a deduction by this section must be prorated among the payor corporations in proportion to the amount of compensation paid to the covered employee by each such corporation in the taxable year.

(2) *Covered employee*—(i) *General rule.* A covered employee means any individual who, on the last day of the taxable year, is—

(A) The chief executive officer of the corporation or is acting in such capacity; or

(B) Among the four highest compensated officers (other than the chief executive officer).

(ii) *Application of rules of the Securities and Exchange Commission.* Whether an individual is the chief executive officer described in paragraph (c)(2)(i)(A) of this section or an officer described in paragraph (c)(2)(i)(B) of this section is determined pursuant to the executive compensation disclosure rules under the Exchange Act.

(3) *Compensation*—(i) *In general.* For purposes of the deduction limitation described in paragraph (b) of this sec-

tion, *compensation* means the aggregate amount allowable as a deduction under chapter 1 of the Internal Revenue Code for the taxable year (determined without regard to section 162(m)) for remuneration for services performed by a covered employee, whether or not the services were performed during the taxable year.

(ii) *Exceptions.* *Compensation* does not include—

(A) Remuneration covered in section 3121(a)(5)(A) through section 3121(a)(5)(D) (concerning remuneration that is not treated as *wages* for purposes of the Federal Insurance Contributions Act); and

(B) Remuneration consisting of any benefit provided to or on behalf of an employee if, at the time the benefit is provided, it is reasonable to believe that the employee will be able to exclude it from gross income. In addition, compensation does not include salary reduction contributions described in section 3121(v)(1).

(4) *Compensation Committee.* The *compensation committee* means the committee of directors (including any subcommittee of directors) of the publicly held corporation that has the authority to establish and administer performance goals described in paragraph (e)(2) of this section, and to certify that performance goals are attained, as described in paragraph (e)(5) of this section. A committee of directors is not treated as failing to have the authority to establish performance goals merely because the goals are ratified by the board of directors of the publicly held corporation or, if applicable, any other committee of the board of directors. See paragraph (e)(3) of this section for rules concerning the composition of the compensation committee.

(5) *Exchange Act.* The *Exchange Act* means the Securities Exchange Act of 1934.

(6) *Examples.* This paragraph (c) may be illustrated by the following examples:

*Example 1.* Corporation X is a publicly held corporation with a July 1 to June 30 fiscal year. For Corporation X's taxable year ending on June 30, 1995, Corporation X pays compensation of \$2,000,000 to A, an employee. However, A's compensation is not required to be reported to shareholders under the executive compensation disclosure rules of the

Exchange Act because A is neither the chief executive officer nor one of the four highest compensated officers employed on the last day of the taxable year. A's compensation is not subject to the deduction limitation of paragraph (b) of this section.

*Example 2.* C, a covered employee, performs services and receives compensation from Corporations X, Y, and Z, members of an affiliated group of corporations. Corporation X, the parent corporation, is a publicly held corporation. The total compensation paid to C from all affiliated group members is \$3,000,000 for the taxable year, of which Corporation X pays \$1,500,000; Corporation Y pays \$900,000; and Corporation Z pays \$600,000. Because the compensation paid by all affiliated group members is aggregated for purposes of section 162(m), \$2,000,000 of the aggregate compensation paid is nondeductible. Corporations X, Y, and Z each are treated as paying a ratable portion of the nondeductible compensation. Thus, two thirds of each corporation's payment will be nondeductible. Corporation X has a nondeductible compensation expense of \$1,000,000 ( $\$1,500,000 \times \$2,000,000 / \$3,000,000$ ). Corporation Y has a nondeductible compensation expense of \$600,000 ( $\$900,000 \times \$2,000,000 / \$3,000,000$ ). Corporation Z has a nondeductible compensation expense of \$400,000 ( $\$600,000 \times \$2,000,000 / \$3,000,000$ ).

*Example 3.* Corporation W, a calendar year taxpayer, has total assets equal to or exceeding \$5 million and a class of equity security held of record by 500 or more persons on December 31, 1994. However, under the Exchange Act, Corporation W is not required to file a registration statement with respect to that security until April 30, 1995. Thus, Corporation W is not a publicly held corporation on December 31, 1994, but is a publicly held corporation on December 31, 1995.

*Example 4.* The facts are the same as in *Example 3*, except that on December 15, 1996, Corporation W files with the Securities and Exchange Commission to disclose that Corporation W is no longer required to be registered under section 12 of the Exchange Act and to terminate its registration of securities under that provision. Because Corporation W is no longer subject to Exchange Act reporting obligations as of December 31, 1996, Corporation W is not a publicly held corporation for taxable year 1996, even though the registration of Corporation W's securities does not terminate until 90 days after Corporation W files with the Securities and Exchange Commission.

(d) *Exception for compensation paid on a commission basis.* The deduction limit in paragraph (b) of this section shall not apply to any compensation paid on a commission basis. For this purpose, compensation is paid on a commission

basis if the facts and circumstances show that it is paid solely on account of income generated directly by the individual performance of the individual to whom the compensation is paid. Compensation does not fail to be attributable directly to the individual merely because support services, such as secretarial or research services, are utilized in generating the income. However, if compensation is paid on account of broader performance standards, such as income produced by a business unit of the corporation, the compensation does not qualify for the exception provided under this paragraph (d).

(e) *Exception for qualified performance-based compensation—*

(1) *In general.* The deduction limit in paragraph (b) of this section does not apply to qualified performance-based compensation. Qualified performance-based compensation is compensation that meets all of the requirements of paragraphs (e)(2) through (e)(5) of this section.

(2) *Performance goal requirement—(i) Preestablished goal.* Qualified performance-based compensation must be paid solely on account of the attainment of one or more preestablished, objective performance goals. A performance goal is considered preestablished if it is established in writing by the compensation committee not later than 90 days after the commencement of the period of service to which the performance goal relates, provided that the outcome is substantially uncertain at the time the compensation committee actually establishes the goal. However, in no event will a performance goal be considered to be preestablished if it is established after 25 percent of the period of service (as scheduled in good faith at the time the goal is established) has elapsed. A performance goal is objective if a third party having knowledge of the relevant facts could determine whether the goal is met. Performance goals can be based on one or more business criteria that apply to the individual, a business unit, or the corporation as a whole. Such business criteria could include, for example, stock price, market share, sales, earnings per share, return on equity, or costs. A performance goal need not, however, be

based upon an increase or positive result under a business criterion and could include, for example, maintaining the status quo or limiting economic losses (measured, in each case, by reference to a specific business criterion). A performance goal does not include the mere continued employment of the covered employee. Thus, a vesting provision based solely on continued employment would not constitute a performance goal. See paragraph (e)(2)(vi) of this section for rules on compensation that is based on an increase in the price of stock.

(ii) *Objective compensation formula.* A preestablished performance goal must state, in terms of an objective formula or standard, the method for computing the amount of compensation payable to the employee if the goal is attained. A formula or standard is objective if a third party having knowledge of the relevant performance results could calculate the amount to be paid to the employee. In addition, a formula or standard must specify the individual employees or class of employees to which it applies.

(iii) *Discretion.*

(A) The terms of an objective formula or standard must preclude discretion to increase the amount of compensation payable that would otherwise be due upon attainment of the goal. A performance goal is not discretionary for purposes of this paragraph (e)(2)(iii) merely because the compensation committee reduces or eliminates the compensation or other economic benefit that was due upon attainment of the goal. However, the exercise of negative discretion with respect to one employee is not permitted to result in an increase in the amount payable to another employee. Thus, for example, in the case of a bonus pool, if the amount payable to each employee is stated in terms of a percentage of the pool, the sum of these individual percentages of the pool is not permitted to exceed 100 percent. If the terms of an objective formula or standard fail to preclude discretion to increase the amount of compensation merely because the amount of compensation to be paid upon attainment of the performance goal is based, in whole or in part, on a percentage of salary or base pay and

the dollar amount of the salary or base pay is not fixed at the time the performance goal is established, then the objective formula or standard will not be considered discretionary for purposes of this paragraph (e)(2)(iii) if the maximum dollar amount to be paid is fixed at that time.

(B) If compensation is payable upon or after the attainment of a performance goal, and a change is made to accelerate the payment of compensation to an earlier date after the attainment of the goal, the change will be treated as an increase in the amount of compensation, unless the amount of compensation paid is discounted to reasonably reflect the time value of money. If compensation is payable upon or after the attainment of a performance goal, and a change is made to defer the payment of compensation to a later date, any amount paid in excess of the amount that was originally owed to the employee will not be treated as an increase in the amount of compensation if the additional amount is based either on a reasonable rate of interest or on one or more predetermined actual investments (whether or not assets associated with the amount originally owed are actually invested therein) such that the amount payable by the employer at the later date will be based on the actual rate of return of a specific investment (including any decrease as well as any increase in the value of an investment). If compensation is payable in the form of property, a change in the timing of the transfer of that property after the attainment of the goal will not be treated as an increase in the amount of compensation for purposes of this paragraph (e)(2)(iii). Thus, for example, if the terms of a stock grant provide for stock to be transferred after the attainment of a performance goal and the transfer of the stock also is subject to a vesting schedule, a change in the vesting schedule that either accelerates or defers the transfer of stock will not be treated as an increase in the amount of compensation payable under the performance goal.

(C) Compensation attributable to a stock option, stock appreciation right, or other stock-based compensation

does not fail to satisfy the requirements of this paragraph (e)(2) to the extent that a change in the grant or award is made to reflect a change in corporate capitalization, such as a stock split or dividend, or a corporate transaction, such as any merger of a corporation into another corporation, any consolidation of two or more corporations into another corporation, any separation of a corporation (including a spinoff or other distribution of stock or property by a corporation), any reorganization of a corporation (whether or not such reorganization comes within the definition of such term in section 368), or any partial or complete liquidation by a corporation.

(iv) *Grant-by-grant determination.* The determination of whether compensation satisfies the requirements of this paragraph (e)(2) generally shall be made on a grant-by-grant basis. Thus, for example, whether compensation attributable to a stock option grant satisfies the requirements of this paragraph (e)(2) generally is determined on the basis of the particular grant made and without regard to the terms of any other option grant, or other grant of compensation, to the same or another employee. As a further example, except as provided in paragraph (e)(2)(vi), whether a grant of restricted stock or other stock-based compensation satisfies the requirements of this paragraph (e)(2) is determined without regard to whether dividends, dividend equivalents, or other similar distributions with respect to stock, on such stock-based compensation are payable prior to the attainment of the performance goal. Dividends, dividend equivalents, or other similar distributions with respect to stock that are treated as separate grants under this paragraph (e)(2)(iv) are not performance-based compensation unless they separately satisfy the requirements of this paragraph (e)(2).

(v) *Compensation contingent upon attainment of performance goal.* Compensation does not satisfy the requirements of this paragraph (e)(2) if the facts and circumstances indicate that the employee would receive all or part of the compensation regardless of whether the performance goal is attained. Thus, if the payment of compensation under

a grant or award is only nominally or partially contingent on attaining a performance goal, none of the compensation payable under the grant or award will be considered performance-based. For example, if an employee is entitled to a bonus under either of two arrangements, where payment under a nonperformance-based arrangement is contingent upon the failure to attain the performance goals under an otherwise performance-based arrangement, then neither arrangement provides for compensation that satisfies the requirements of this paragraph (e)(2). Compensation does not fail to be qualified performance-based compensation merely because the plan allows the compensation to be payable upon death, disability, or change of ownership or control, although compensation actually paid on account of those events prior to the attainment of the performance goal would not satisfy the requirements of this paragraph (e)(2). As an exception to the general rule set forth in the first sentence of paragraph (e)(2)(iv) of this section, the facts-and-circumstances determination referred to in the first sentence of this paragraph (e)(2)(v) is made taking into account all plans, arrangements, and agreements that provide for compensation to the employee.

(vi) *Application of requirements to stock options and stock appreciation rights—(A) In general.* Compensation attributable to a stock option or a stock appreciation right is deemed to satisfy the requirements of this paragraph (e)(2) if the grant or award is made by the compensation committee; the plan under which the option or right is granted states the maximum number of shares with respect to which options or rights may be granted during a specified period to any employee; and, under the terms of the option or right, the amount of compensation the employee could receive is based solely on an increase in the value of the stock after the date of the grant or award. Conversely, if the amount of compensation the employee will receive under the grant or award is not based solely on an increase in the value of the stock after the date of grant or award (e.g., in the case of restricted stock, or an option that is granted with an exercise

price that is less than the fair market value of the stock as of the date of grant), none of the compensation attributable to the grant or award is qualified performance-based compensation because it does not satisfy the requirement of this paragraph (e)(2)(vi)(A). Whether a stock option grant is based solely on an increase in the value of the stock after the date of grant is determined without regard to any dividend equivalent that may be payable, provided that payment of the dividend equivalent is not made contingent on the exercise of the option. The rule that the compensation attributable to a stock option or stock appreciation right must be based solely on an increase in the value of the stock after the date of grant or award does not apply if the grant or award is made on account of, or if the vesting or exercisability of the grant or award is contingent on, the attainment of a performance goal that satisfies the requirements of this paragraph (e)(2).

(B) *Cancellation and repricing.* Compensation attributable to a stock option or stock appreciation right does not satisfy the requirements of this paragraph (e)(2) to the extent that the number of options granted exceeds the maximum number of shares for which options may be granted to the employee as specified in the plan. If an option is canceled, the canceled option continues to be counted against the maximum number of shares for which options may be granted to the employee under the plan. If, after grant, the exercise price of an option is reduced, the transaction is treated as a cancellation of the option and a grant of a new option. In such case, both the option that is deemed to be canceled and the option that is deemed to be granted reduce the maximum number of shares for which options may be granted to the employee under the plan. This paragraph (e)(2)(vi)(B) also applies in the case of a stock appreciation right where, after the award is made, the base amount on which stock appreciation is calculated is reduced to reflect a reduction in the fair market value of stock.

(vii) *Examples.* This paragraph (e)(2) may be illustrated by the following examples:

*Example 1.* No later than 90 days after the start of a fiscal year, but while the outcome is substantially uncertain, Corporation S establishes a bonus plan under which A, the chief executive officer, will receive a cash bonus of \$500,000, if year-end corporate sales are increased by at least 5 percent. The compensation committee retains the right, if the performance goal is met, to reduce the bonus payment to A if, in its judgment, other subjective factors warrant a reduction. The bonus will meet the requirements of this paragraph (e)(2).

*Example 2.* The facts are the same as in *Example 1*, except that the bonus is based on a percentage of Corporation S's total sales for the fiscal year. Because Corporation S is virtually certain to have some sales for the fiscal year, the outcome of the performance goal is not substantially uncertain, and therefore the bonus does not meet the requirements of this paragraph (e)(2).

*Example 3.* The facts are the same as in *Example 1*, except that the bonus is based on a percentage of Corporation S's total profits for the fiscal year. Although some sales are virtually certain for virtually all public companies, it is substantially uncertain whether a company will have profits for a specified future period even if the company has a history of profitability. Therefore, the bonus will meet the requirements of this paragraph (e)(2).

*Example 4.* B is the general counsel of Corporation R, which is engaged in patent litigation with Corporation S. Representatives of Corporation S have informally indicated to Corporation R a willingness to settle the litigation for \$50,000,000. Subsequently, the compensation committee of Corporation R agrees to pay B a bonus if B obtains a formal settlement for at least \$50,000,000. The bonus to B does not meet the requirement of this paragraph (e)(2) because the performance goal was not established at a time when the outcome was substantially uncertain.

*Example 5.* Corporation S, a public utility, adopts a bonus plan for selected salaried employees that will pay a bonus at the end of a 3-year period of \$750,000 each if, at the end of the 3 years, the price of S stock has increased by 10 percent. The plan also provides that the 10-percent goal will automatically adjust upward or downward by the percentage change in a published utilities index. Thus, for example, if the published utilities index shows a net increase of 5 percent over a 3-year period, then the salaried employees would receive a bonus only if Corporation S stock has increased by 15 percent. Conversely, if the published utilities index shows a net decrease of 5 percent over a 3-year period, then the salaried employees would receive a bonus if Corporation S stock has increased by 5 percent. Because these automatic adjustments in the performance goal

are preestablished, the bonus meets the requirement of this paragraph (e)(2), notwithstanding the potential changes in the performance goal.

*Example 6.* The facts are the same as in *Example 5*, except that the bonus plan provides that, at the end of the 3-year period, a bonus of \$750,000 will be paid to each salaried employee if either the price of Corporation S stock has increased by 10 percent or the earnings per share on Corporation S stock have increased by 5 percent. If both the earnings-per-share goal and the stock-price goal are preestablished, the compensation committee's discretion to choose to pay a bonus under either of the two goals does not cause any bonus paid under the plan to fail to meet the requirement of this paragraph (e)(2) because each goal independently meets the requirements of this paragraph (e)(2). The choice to pay under either of the two goals is tantamount to the discretion to choose not to pay under one of the goals, as provided in paragraph (e)(2)(iii) of this section.

*Example 7.* Corporation U establishes a bonus plan under which a specified class of employees will participate in a bonus pool if certain preestablished performance goals are attained. The amount of the bonus pool is determined under an objective formula. Under the terms of the bonus plan, the compensation committee retains the discretion to determine the fraction of the bonus pool that each employee may receive. The bonus plan does not satisfy the requirements of this paragraph (e)(2). Although the aggregate amount of the bonus plan is determined under an objective formula, a third party could not determine the amount that any individual could receive under the plan.

*Example 8.* The facts are the same as in *Example 7*, except that the bonus plan provides that a specified share of the bonus pool is payable to each employee, and the total of these shares does not exceed 100% of the pool. The bonus plan satisfies the requirements of this paragraph (e)(2). In addition, the bonus plan will satisfy the requirements of this paragraph (e)(2) even if the compensation committee retains the discretion to reduce the compensation payable to any individual employee, provided that a reduction in the amount of one employee's bonus does not result in an increase in the amount of any other employee's bonus.

*Example 9.* Corporation V establishes a stock option plan for salaried employees. The terms of the stock option plan specify that no salaried employee shall receive options for more than 100,000 shares over any 3-year period. The compensation committee grants options for 50,000 shares to each of several salaried employees. The exercise price of each option is equal to or greater than the fair market value at the time of each grant. Compensation attributable to the exercise of the options satisfies the re-

quirements of this paragraph (e)(2). If, however, the terms of the options provide that the exercise price is less than fair market value at the date of grant, no compensation attributable to the exercise of those options satisfies the requirements of this paragraph (e)(2) unless issuance or exercise of the options was contingent upon the attainment of a preestablished performance goal that satisfies this paragraph (e)(2).

*Example 10.* The facts are the same as in *Example 9*, except that, within the same 3-year grant period, the fair market value of Corporation V stock is significantly less than the exercise price of the options. The compensation committee reprices those options to that lower current fair market value of Corporation V stock. The repricing of the options for 50,000 shares held by each salaried employee is treated as the grant of new options for an additional 50,000 shares to each employee. Thus, each of the salaried employees is treated as having received grants for 100,000 shares. Consequently, if any additional options are granted to those employees during the 3-year period, compensation attributable to the exercise of those additional options would not satisfy the requirements of this paragraph (e)(2). The results would be the same if the compensation committee canceled the outstanding options and issued new options to the same employees that were exercisable at the fair market value of Corporation V stock on the date of reissue.

*Example 11.* Corporation W maintains a plan under which each participating employee may receive incentive stock options, nonqualified stock options, stock appreciation rights, or grants of restricted Corporation W stock. The plan specifies that each participating employee may receive options, stock appreciation rights, restricted stock, or any combination of each, for no more than 20,000 shares over the life of the plan. The plan provides that stock options may be granted with an exercise price of less than, equal to, or greater than fair market value on the date of grant. Options granted with an exercise price equal to, or greater than, fair market value on the date of grant do not fail to meet the requirements of this paragraph (e)(2) merely because the compensation committee has the discretion to determine the types of awards (*i.e.*, options, rights, or restricted stock) to be granted to each employee or the discretion to issue options or make other compensation awards under the plan that would not meet the requirements of this paragraph (e)(2). Whether an option granted under the plan satisfies the requirements of this paragraph (e)(2) is determined on the basis of the specific terms of the option and without regard to other options or awards under the plan.

*Example 12.* Corporation X maintains a plan under which stock appreciation rights may

be awarded to key employees. The plan permits the compensation committee to make awards under which the amount of compensation payable to the employee is equal to the increase in the stock price plus a percentage “gross up” intended to offset the tax liability of the employee. In addition, the plan permits the compensation committee to make awards under which the amount of compensation payable to the employee is equal to the increase in the stock price, based on the highest price, which is defined as the highest price paid for Corporation X stock (or offered in a tender offer or other arms-length offer) during the 90 days preceding exercise. Compensation attributable to awards under the plan satisfies the requirements of paragraph (e)(2)(vi) of this section, provided that the terms of the plan specify the maximum number of shares for which awards may be made.

*Example 13.* Corporation W adopts a plan under which a bonus will be paid to the CEO only if there is a 10% increase in earnings per share during the performance period. The plan provides that earnings per share will be calculated without regard to any change in accounting standards that may be required by the Financial Accounting Standards Board after the goal is established. After the goal is established, such a change in accounting standards occurs. Corporation W’s reported earnings, for purposes of determining earnings per share under the plan, are adjusted pursuant to this plan provision to factor out this change in standards. This adjustment will not be considered an exercise of impermissible discretion because it is made pursuant to the plan provision.

*Example 14.* Corporation X adopts a performance-based incentive pay plan with a four-year performance period. Bonuses under the plan are scheduled to be paid in the first year after the end of the performance period (year 5). However, in the second year of the performance period, the compensation committee determines that any bonuses payable in year 5 will instead, for bona fide business reasons, be paid in year 10. The compensation committee also determines that any compensation that would have been payable in year 5 will be adjusted to reflect the delay in payment. The adjustment will be based on the greater of the future rate of return of a specified mutual fund that invests in blue chip stocks or of a specified venture capital investment over the five-year deferral period. Each of these investments, considered by itself, is a predetermined actual investment because it is based on the future rate of return of an actual investment. However, the adjustment in this case is not based on predetermined actual investments within the meaning of paragraph (e)(2)(iii)(B) of this section because the amount payable by Corporation X in year 10 will be based on the greater of the two investment returns and,

thus, will not be based on the actual rate of return on either specific investment.

*Example 15.* The facts are the same as in *Example 14*, except that the increase will be based on Moody’s Average Corporate Bond Yield over the five-year deferral period. Because this index reflects a reasonable rate of interest, the increase in the compensation payable that is based on the index’s rate of return is not considered an impermissible increase in the amount of compensation payable under the formula.

*Example 16.* The facts are the same as in *Example 14*, except that the increase will be based on the rate of return for the Standard & Poor’s 500 Index. This index does not measure interest rates and thus does not represent a reasonable rate of interest. In addition, this index does not represent an actual investment. Therefore, any additional compensation payable based on the rate of return of this index will result in an impermissible increase in the amount payable under the formula. If, in contrast, the increase were based on the rate of return of an existing mutual fund that is invested in a manner that seeks to approximate the Standard & Poor’s 500 Index, the increase would be based on a predetermined actual investment within the meaning of paragraph (e)(2)(iii)(B) of this section and thus would not result in an impermissible increase in the amount payable under the formula.

(3) *Outside directors*—(i) *General rule.* The performance goal under which compensation is paid must be established by a compensation committee comprised solely of two or more outside directors. A director is an outside director if the director—

(A) Is not a current employee of the publicly held corporation;

(B) Is not a former employee of the publicly held corporation who receives compensation for prior services (other than benefits under a tax-qualified retirement plan) during the taxable year;

(C) Has not been an officer of the publicly held corporation; and

(D) Does not receive remuneration from the publicly held corporation, either directly or indirectly, in any capacity other than as a director. For this purpose, remuneration includes any payment in exchange for goods or services.

(ii) *Remuneration received.* For purposes of this paragraph (e)(3), remuneration is received, directly or indirectly, by a director in each of the following circumstances:

(A) If remuneration is paid, directly or indirectly, to the director personally

or to an entity in which the director has a beneficial ownership interest of greater than 50 percent. For this purpose, remuneration is considered paid when actually paid (and throughout the remainder of that taxable year of the corporation) and, if earlier, throughout the period when a contract or agreement to pay remuneration is outstanding.

(B) If remuneration, other than de minimis remuneration, was paid by the publicly held corporation in its preceding taxable year to an entity in which the director has a beneficial ownership interest of at least 5 percent but not more than 50 percent. For this purpose, remuneration is considered paid when actually paid or, if earlier, when the publicly held corporation becomes liable to pay it.

(C) If remuneration, other than de minimis remuneration, was paid by the publicly held corporation in its preceding taxable year to an entity by which the director is employed or self-employed other than as a director. For this purpose, remuneration is considered paid when actually paid or, if earlier, when the publicly held corporation becomes liable to pay it.

(iii) *De minimis remuneration*—(A) *In general.* For purposes of paragraphs (e)(3)(ii)(B) and (C) of this section, remuneration that was paid by the publicly held corporation in its preceding taxable year to an entity is de minimis if payments to the entity did not exceed 5 percent of the gross revenue of the entity for its taxable year ending with or within that preceding taxable year of the publicly held corporation.

(B) *Remuneration for personal services and substantial owners.* Notwithstanding paragraph (e)(3)(iii)(A) of this section, remuneration in excess of \$60,000 is not de minimis if the remuneration is paid to an entity described in paragraph (e)(3)(ii)(B) of this section, or is paid for personal services to an entity described in paragraph (e)(3)(ii)(C) of this section.

(iv) *Remuneration for personal services.* For purposes of paragraph (e)(3)(iii)(B) of this section, remuneration from a publicly held corporation is for personal services if—

(A) The remuneration is paid to an entity for personal or professional serv-

ices, consisting of legal, accounting, investment banking, and management consulting services (and other similar services that may be specified by the Commissioner in revenue rulings, notices, or other guidance published in the Internal Revenue Bulletin), performed for the publicly held corporation, and the remuneration is not for services that are incidental to the purchase of goods or to the purchase of services that are not personal services; and

(B) The director performs significant services (whether or not as an employee) for the corporation, division, or similar organization (within the entity) that actually provides the services described in paragraph (e)(3)(iv)(A) of this section to the publicly held corporation, or more than 50 percent of the entity's gross revenues (for the entity's preceding taxable year) are derived from that corporation, subsidiary, or similar organization.

(v) *Entity defined.* For purposes of this paragraph (e)(3), entity means an organization that is a sole proprietorship, trust, estate, partnership, or corporation. The term also includes an affiliated group of corporations as defined in section 1504 (determined without regard to section 1504(b)) and a group of organizations that would be an affiliated group but for the fact that one or more of the organizations are not incorporated. However, the aggregation rules referred to in the preceding sentence do not apply for purposes of determining whether a director has a beneficial ownership interest of at least 5 percent or greater than 50 percent.

(vi) *Employees and former officers.* Whether a director is an employee or a former officer is determined on the basis of the facts at the time that the individual is serving as a director on the compensation committee. Thus, a director is not precluded from being an outside director solely because the director is a former officer of a corporation that previously was an affiliated corporation of the publicly held corporation. For example, a director of a parent corporation of an affiliated group is not precluded from being an

outside director solely because that director is a former officer of an affiliated subsidiary that was spun off or liquidated. However, an outside director would no longer be an outside director if a corporation in which the director was previously an officer became an affiliated corporation of the publicly held corporation.

(vii) *Officer.* Solely for purposes of this paragraph (e)(3), *officer* means an administrative executive who is or was in regular and continued service. The term implies continuity of service and excludes those employed for a special and single transaction. An individual who merely has (or had) the title of officer but not the authority of an officer is not considered an officer. The determination of whether an individual is or was an officer is based on all of the facts and circumstances in the particular case, including without limitation the source of the individual's authority, the term for which the individual is elected or appointed, and the nature and extent of the individual's duties.

(viii) *Members of affiliated groups.* For purposes of this paragraph (e)(3), the outside directors of the publicly held member of an affiliated group are treated as the outside directors of all members of the affiliated group.

(ix) *Examples.* This paragraph (e)(3) may be illustrated by the following examples:

*Example 1.* Corporations X and Y are members of an affiliated group of corporations as defined in section 1504, until July 1, 1994, when Y is sold to another group. Prior to the sale, A served as an officer of Corporation Y. After July 1, 1994, A is not treated as a former officer of Corporation X by reason of having been an officer of Y.

*Example 2.* Corporation Z, a calendar-year taxpayer, uses the services of a law firm by which B is employed, but in which B has a less-than-5-percent ownership interest. The law firm reports income on a July 1 to June 30 basis. Corporation Z appoints B to serve on its compensation committee for calendar year 1998 after determining that, in calendar year 1997, it did not become liable to the law firm for remuneration exceeding the lesser of \$60,000 or five percent of the law firm's gross revenue (calculated for the year ending June 30, 1997). On October 1, 1998, Corporation Z becomes liable to pay remuneration of \$50,000 to the law firm on June 30, 1999. For the year ending June 30, 1998, the law firm's gross rev-

enue was less than \$1 million. Thus, in calendar year 1999, B is not an outside director. However, B may satisfy the requirements for an outside director in calendar year 2000, if, in calendar year 1999, Corporation Z does not become liable to the law firm for additional remuneration. This is because the remuneration actually paid on June 30, 1999 was considered paid on October 1, 1998 under paragraph (e)(3)(ii)(C) of this section.

*Example 3.* Corporation Z, a publicly held corporation, purchases goods from Corporation A. D, an executive and less-than-5-percent owner of Corporation A, sits on the board of directors of Corporation Z and on its compensation committee. For 1997, Corporation Z obtains representations to the effect that D is not eligible for any commission for D's sales to Corporation Z and that, for purposes of determining D's compensation for 1997, Corporation A's sales to Corporation Z are not otherwise treated differently than sales to other customers of Corporation A (including its affiliates, if any) or are irrelevant. In addition, Corporation Z has no reason to believe that these representations are inaccurate or that it is otherwise paying remuneration indirectly to D personally. Thus, in 1997, no remuneration is considered paid by Corporation Z indirectly to D personally under paragraph (e)(3)(ii)(A) of this section.

*Example 4.* (i) Corporation W, a publicly held corporation, purchases goods from Corporation T. C, an executive and less-than-5-percent owner of Corporation T, sits on the board of directors of Corporation W and on its compensation committee. Corporation T develops a new product and agrees on January 1, 1998 to pay C a bonus of \$500,000 if Corporation W contracts to purchase the product. Even if Corporation W purchases the new product, sales to Corporation W will represent less than 5 percent of Corporation T's gross revenues. In 1999, Corporation W contracts to purchase the new product and, in 2000, C receives the \$500,000 bonus from Corporation T. In 1998, 1999, and 2000, Corporation W does not obtain any representations relating to indirect remuneration to C personally (such as the representations described in *Example 3*).

(ii) Thus, in 1998, 1999, and 2000, remuneration is considered paid by Corporation W indirectly to C personally under paragraph (e)(3)(ii)(A) of this section. Accordingly, in 1998, 1999, and 2000, C is not an outside director of Corporation W. The result would have been the same if Corporation W had obtained appropriate representations but nevertheless had reason to believe that it was paying remuneration indirectly to C personally.

*Example 5.* Corporation R, a publicly held corporation, purchases utility service from Corporation Q, a public utility. The chief executive officer, and less-than-5-percent

owner, of Corporation Q is a director of Corporation R. Corporation R pays Corporation Q more than \$60,000 per year for the utility service, but less than 5 percent of Corporation Q's gross revenues. Because utility services are not personal services, the fees paid are not subject to the \$60,000 de minimis rule for remuneration for personal services within the meaning of paragraph (e)(3)(iii)(B) of this section. Thus, the chief executive officer qualifies as an outside director of Corporation R, unless disqualified on some other basis.

*Example 6.* Corporation A, a publicly held corporation, purchases management consulting services from Division S of Conglomerate P. The chief financial officer of Division S is a director of Corporation A. Corporation A pays more than \$60,000 per year for the management consulting services, but less than 5 percent of Conglomerate P's gross revenues. Because management consulting services are personal services within the meaning of paragraph (e)(3)(iv)(A) of this section, and the chief financial officer performs significant services for Division S, the fees paid are subject to the \$60,000 de minimis rule as remuneration for personal services. Thus, the chief financial officer does not qualify as an outside director of Corporation A.

*Example 7.* The facts are the same as in *Example 6*, except that the chief executive officer, and less-than-5-percent owner, of the parent company of Conglomerate P is a director of Corporation A and does not perform significant services for Division S. If the gross revenues of Division S do not constitute more than 50 percent of the gross revenues of Conglomerate P for P's preceding taxable year, the chief executive officer will qualify as an outside director of Corporation A, unless disqualified on some other basis.

(4) *Shareholder approval requirement—*

(i) *General rule.* The material terms of the performance goal under which the compensation is to be paid must be disclosed to and subsequently approved by the shareholders of the publicly held corporation before the compensation is paid. The requirements of this paragraph (e)(4) are not satisfied if the compensation would be paid regardless of whether the material terms are approved by shareholders. The material terms include the employees eligible to receive compensation; a description of the business criteria on which the performance goal is based; and either the maximum amount of compensation that could be paid to any employee or the formula used to calculate the amount of compensation to be paid to the employee if the performance goal is

attained (except that, in the case of a formula based, in whole or in part, on a percentage of salary or base pay, the maximum dollar amount of compensation that could be paid to the employee must be disclosed).

(ii) *Eligible employees.* Disclosure of the employees eligible to receive compensation need not be so specific as to identify the particular individuals by name. A general description of the class of eligible employees by title or class is sufficient, such as the chief executive officer and vice presidents, or all salaried employees, all executive officers, or all key employees.

(iii) *Description of business criteria—*  
(A) *In general.* Disclosure of the business criteria on which the performance goal is based need not include the specific targets that must be satisfied under the performance goal. For example, if a bonus plan provides that a bonus will be paid if earnings per share increase by 10 percent, the 10-percent figure is a target that need not be disclosed to shareholders. However, in that case, disclosure must be made that the bonus plan is based on an earnings-per-share business criterion. In the case of a plan under which employees may be granted stock options or stock appreciation rights, no specific description of the business criteria is required if the grants or awards are based on a stock price that is no less than current fair market value.

(B) *Disclosure of confidential information.* The requirements of this paragraph (e)(4) may be satisfied even though information that otherwise would be a material term of a performance goal is not disclosed to shareholders, provided that the compensation committee determines that the information is confidential commercial or business information, the disclosure of which would have an adverse effect on the publicly held corporation. Whether disclosure would adversely affect the corporation is determined on the basis of the facts and circumstances. If the compensation committee makes such a determination, the disclosure to shareholders must state the compensation committee's

belief that the information is confidential commercial or business information, the disclosure of which would adversely affect the company. In addition, the ability not to disclose confidential information does not eliminate the requirement that disclosure be made of the maximum amount of compensation that is payable to an individual under a performance goal. Confidential information does not include the identity of an executive or the class of executives to which a performance goal applies or the amount of compensation that is payable if the goal is satisfied.

(iv) *Description of compensation.* Disclosure as to the compensation payable under a performance goal must be specific enough so that shareholders can determine the maximum amount of compensation that could be paid to any employee during a specified period. If the terms of the performance goal do not provide for a maximum dollar amount, the disclosure must include the formula under which the compensation would be calculated. Thus, for example, if compensation attributable to the exercise of stock options is equal to the difference in the exercise price and the current value of the stock, disclosure would be required of the maximum number of shares for which grants may be made to any employee and the exercise price of those options (e.g., fair market value on date of grant). In that case, shareholders could calculate the maximum amount of compensation that would be attributable to the exercise of options on the basis of their assumptions as to the future stock price.

(v) *Disclosure requirements of the Securities and Exchange Commission.* To the extent not otherwise specifically provided in this paragraph (e)(4), whether the material terms of a performance goal are adequately disclosed to shareholders is determined under the same standards as apply under the Exchange Act.

(vi) *Frequency of disclosure.* Once the material terms of a performance goal are disclosed to and approved by shareholders, no additional disclosure or approval is required unless the compensation committee changes the material terms of the performance goal. If, however, the compensation committee has

authority to change the targets under a performance goal after shareholder approval of the goal, material terms of the performance goal must be disclosed to and reapproved by shareholders no later than the first shareholder meeting that occurs in the fifth year following the year in which shareholders previously approved the performance goal.

(vii) *Shareholder vote.* For purposes of this paragraph (e)(4), the material terms of a performance goal are approved by shareholders if, in a separate vote, a majority of the votes cast on the issue (including abstentions to the extent abstentions are counted as voting under applicable state law) are cast in favor of approval.

(viii) *Members of affiliated group.* For purposes of this paragraph (e)(4), the shareholders of the publicly held member of the affiliated group are treated as the shareholders of all members of the affiliated group.

(ix) *Examples.* This paragraph (e)(4) may be illustrated by the following examples:

*Example 1.* Corporation X adopts a plan that will pay a specified class of its executives an annual cash bonus based on the overall increase in corporate sales during the year. Under the terms of the plan, the cash bonus of each executive equals \$100,000 multiplied by the number of percentage points by which sales increase in the current year when compared to the prior year. Corporation X discloses to its shareholders prior to the vote both the class of executives eligible to receive awards and the annual formula of \$100,000 multiplied by the percentage increase in sales. This disclosure meets the requirements of this paragraph (e)(4). Because the compensation committee does not have the authority to establish a different target under the plan, Corporation X need not re-disclose to its shareholders and obtain their reapproval of the material terms of the plan until those material terms are changed.

*Example 2.* The facts are the same as in *Example 1* except that Corporation X discloses only that bonuses will be paid on the basis of the annual increase in sales. This disclosure does not meet the requirements of this paragraph (e)(4) because it does not include the formula for calculating the compensation or a maximum amount of compensation to be paid if the performance goal is satisfied.

*Example 3.* Corporation Y adopts an incentive compensation plan in 1995 that will pay a specified class of its executives a bonus

every 3 years based on the following 3 factors: increases in earnings per share, reduction in costs for specified divisions, and increases in sales by specified divisions. The bonus is payable in cash or in Corporation Y stock, at the option of the executive. Under the terms of the plan, prior to the beginning of each 3-year period, the compensation committee determines the specific targets under each of the three factors (*i.e.*, the amount of the increase in earnings per share, the reduction in costs, and the amount of sales) that must be met in order for the executives to receive a bonus. Under the terms of the plan, the compensation committee retains the discretion to determine whether a bonus will be paid under any one of the goals. The terms of the plan also specify that no executive may receive a bonus in excess of \$1,500,000 for any 3-year period. To satisfy the requirements of this paragraph (e)(4), Corporation Y obtains shareholder approval of the plan at its 1995 annual shareholder meeting. In the proxy statement issued to shareholders, Corporation Y need not disclose to shareholders the specific targets that are set by the compensation committee. However, Corporation Y must disclose that bonuses are paid on the basis of earnings per share, reductions in costs, and increases in sales of specified divisions. Corporation Y also must disclose the maximum amount of compensation that any executive may receive under the plan is \$1,500,000 per 3-year period. Unless changes in the material terms of the plan are made earlier, Corporation Y need not disclose the material terms of the plan to the shareholders and obtain their reapproval until the first shareholders' meeting held in 2000.

*Example 4.* The same facts as in *Example 3*, except that prior to the beginning of the second 3-year period, the compensation committee determines that different targets will be set under the plan for that period with regard to all three of the performance criteria (*i.e.*, earnings per share, reductions in costs, and increases in sales). In addition, the compensation committee raises the maximum dollar amount that can be paid under the plan for a 3-year period to \$2,000,000. The increase in the maximum dollar amount of compensation under the plan is a changed material term. Thus, to satisfy the requirements of this paragraph (e)(4), Corporation Y must disclose to and obtain approval by the shareholders of the plan as amended.

*Example 5.* In 1998, Corporation Z establishes a plan under which a specified group of executives will receive a cash bonus not to exceed \$750,000 each if a new product that has been in development is completed and ready for sale to customers by January 1, 2000. Although the completion of the new product is a material term of the performance goal under this paragraph (e)(4), the compensation committee determines that the disclosure to shareholders of the performance goal

would adversely affect Corporation Z because its competitors would be made aware of the existence and timing of its new product. In this case, the requirements of this paragraph (e)(4) are satisfied if all other material terms, including the maximum amount of compensation, are disclosed and the disclosure affirmatively states that the terms of the performance goal are not being disclosed because the compensation committee has determined that those terms include confidential information, the disclosure of which would adversely affect Corporation Z.

(5) *Compensation committee certification.* The compensation committee must certify in writing prior to payment of the compensation that the performance goals and any other material terms were in fact satisfied. For this purpose, approved minutes of the compensation committee meeting in which the certification is made are treated as a written certification. Certification by the compensation committee is not required for compensation that is attributable solely to the increase in the value of the stock of the publicly held corporation.

(f) *Companies that become publicly held, spinoffs, and similar transactions—*

(1) *In general.* In the case of a corporation that was not a publicly held corporation and then becomes a publicly held corporation, the deduction limit of paragraph (b) of this section does not apply to any remuneration paid pursuant to a compensation plan or agreement that existed during the period in which the corporation was not publicly held. However, in the case of such a corporation that becomes publicly held in connection with an initial public offering, this relief applies only to the extent that the prospectus accompanying the initial public offering disclosed information concerning those plans or agreements that satisfied all applicable securities laws then in effect. In accordance with paragraph (c)(1)(ii) of this section, a corporation that is a member of an affiliated group that includes a publicly held corporation is considered publicly held and, therefore, cannot rely on this paragraph (f)(1).

(2) *Reliance period.* Paragraph (f)(1) of this section may be relied upon until the earliest of—

(i) The expiration of the plan or agreement;

(ii) The material modification of the plan or agreement, within the meaning of paragraph (h)(1)(iii) of this section;

(iii) The issuance of all employer stock and other compensation that has been allocated under the plan; or

(iv) The first meeting of shareholders at which directors are to be elected that occurs after the close of the third calendar year following the calendar year in which the initial public offering occurs or, in the case of a privately held corporation that becomes publicly held without an initial public offering, the first calendar year following the calendar year in which the corporation becomes publicly held.

(3) *Stock-based compensation.* Paragraph (f)(1) of this section will apply to any compensation received pursuant to the exercise of a stock option or stock appreciation right, or the substantial vesting of restricted property, granted under a plan or agreement described in paragraph (f)(1) of this section if the grant occurs on or before the earliest of the events specified in paragraph (f)(2) of this section.

(4) *Subsidiaries that become separate publicly held corporations—(i) In general.* If a subsidiary that is a member of the affiliated group described in paragraph (c)(1)(ii) of this section becomes a separate publicly held corporation (whether by spinoff or otherwise), any remuneration paid to covered employees of the new publicly held corporation will satisfy the exception for performance-based compensation described in paragraph (e) of this section if the conditions in either paragraph (f)(4)(ii) or (f)(4)(iii) of this section are satisfied.

(ii) *Prior establishment and approval.* Remuneration satisfies the requirements of this paragraph (f)(4)(ii) if the remuneration satisfies the requirements for performance-based compensation set forth in paragraphs (e)(2), (e)(3), and (e)(4) of this section (by application of paragraphs (e)(3)(viii) and (e)(4)(viii) of this section) before the corporation becomes a separate publicly held corporation, and the certification required by paragraph (e)(5) of this section is made by the compensation committee of the new publicly held corporation (but if the perform-

ance goals are attained before the corporation becomes a separate publicly held corporation, the certification may be made by the compensation committee referred to in paragraph (e)(3)(viii) of this section before it becomes a separate publicly held corporation). Thus, this paragraph (f)(4)(ii) requires that the outside directors and shareholders (within the meaning of paragraphs (e)(3)(viii) and (e)(4)(viii) of this section) of the corporation before it becomes a separate publicly held corporation establish and approve, respectively, the performance-based compensation for the covered employees of the new publicly held corporation in accordance with paragraphs (e)(3) and (e)(4) of this section.

(iii) *Transition period.* Remuneration satisfies the requirements of this paragraph (f)(4)(iii) if the remuneration satisfies all of the requirements of paragraphs (e)(2), (e)(3), and (e)(5) of this section. The outside directors (within the meaning of paragraph (e)(3)(viii) of this section) of the corporation before it becomes a separate publicly held corporation, or the outside directors of the new publicly held corporation, may establish and administer the performance goals for the covered employees of the new publicly held corporation for purposes of satisfying the requirements of paragraphs (e)(2) and (e)(3) of this section. The certification required by paragraph (e)(5) of this section must be made by the compensation committee of the new publicly held corporation. However, a taxpayer may rely on this paragraph (f)(4)(iii) to satisfy the requirements of paragraph (e) of this section only for compensation paid, or stock options, stock appreciation rights, or restricted property granted, prior to the first regularly scheduled meeting of the shareholders of the new publicly held corporation that occurs more than 12 months after the date the corporation becomes a separate publicly held corporation. Compensation paid, or stock options, stock appreciation rights, or restricted property granted, on or after the date of that meeting of shareholders must satisfy all requirements of paragraph (e) of this section, including the shareholder approval requirement of paragraph (e)(4) of this section, in order to satisfy

the requirements for performance-based compensation.

(5) *Example.* The following example illustrates the application of paragraph (f)(4)(ii) of this section:

*Example.* Corporation P, which is publicly held, decides to spin off Corporation S, a wholly owned subsidiary of Corporation P. After the spinoff, Corporation S will be a separate publicly held corporation. Before the spinoff, the compensation committee of Corporation P, pursuant to paragraph (e)(3)(viii) of this section, establishes a bonus plan for the executives of Corporation S that provides for bonuses payable after the spinoff and that satisfies the requirements of paragraph (e)(2) of this section. If, pursuant to paragraph (e)(4)(viii) of this section, the shareholders of Corporation P approve the plan prior to the spinoff, that approval will satisfy the requirements of paragraph (e)(4) of this section with respect to compensation paid pursuant to the bonus plan after the spinoff. However, the compensation committee of Corporation S will be required to certify that the goals are satisfied prior to the payment of the bonuses in order for the bonuses to be considered performance-based compensation.

(g) *Coordination with disallowed excess parachute payments.* The \$1,000,000 limitation in paragraph (b) of this section is reduced (but not below zero) by the amount (if any) that would have been included in the compensation of the covered employee for the taxable year but for being disallowed by reason of section 280G. For example, assume that during a taxable year a corporation pays \$1,500,000 to a covered employee and no portion satisfies the exception in paragraph (d) of this section for commissions or paragraph (e) of this section for qualified performance-based compensation. Of the \$1,500,000, \$600,000 is an excess parachute payment, as defined in section 280G(b)(1) and is disallowed by reason of that section. Because the excess parachute payment reduces the limitation of paragraph (b) of this section, the corporation can deduct \$400,000, and \$500,000 of the otherwise deductible amount is nondeductible by reason of section 162(m).

(h) *Transition rules—(1) Compensation payable under a written binding contract which was in effect on February 17, 1993—(i) General rule.* The deduction limit of paragraph (b) of this section does not apply to any compensation payable under a written binding con-

tract that was in effect on February 17, 1993. The preceding sentence does not apply unless, under applicable state law, the corporation is obligated to pay the compensation if the employee performs services. However, the deduction limit of paragraph (b) of this section does apply to a contract that is renewed after February 17, 1993. A written binding contract that is terminable or cancelable by the corporation after February 17, 1993, without the employee's consent is treated as a new contract as of the date that any such termination or cancellation, if made, would be effective. Thus, for example, if the terms of a contract provide that it will be automatically renewed as of a certain date unless either the corporation or the employee gives notice of termination of the contract at least 30 days before that date, the contract is treated as a new contract as of the date that termination would be effective if that notice were given. Similarly, for example, if the terms of a contract provide that the contract will be terminated or canceled as of a certain date unless either the corporation or the employee elects to renew within 30 days of that date, the contract is treated as renewed by the corporation as of that date. Alternatively, if the corporation will remain legally obligated by the terms of a contract beyond a certain date at the sole discretion of the employee, the contract will not be treated as a new contract as of that date if the employee exercises the discretion to keep the corporation bound to the contract. A contract is not treated as terminable or cancelable if it can be terminated or canceled only by terminating the employment relationship of the employee.

(ii) *Compensation payable under a plan or arrangement.* If a compensation plan or arrangement meets the requirements of paragraph (h)(1)(i) of this section, the compensation paid to an employee pursuant to the plan or arrangement will not be subject to the deduction limit of paragraph (b) of this section even though the employee was not eligible to participate in the plan as of February 17, 1993. However, the preceding sentence does not apply unless the employee was employed on February 17, 1993, by the corporation that

maintained the plan or arrangement, or the employee had the right to participate in the plan or arrangement under a written binding contract as of that date.

(iii) *Material modifications.* (A) Paragraph (h)(1)(i) of this section will not apply to any written binding contract that is materially modified. A material modification occurs when the contract is amended to increase the amount of compensation payable to the employee. If a binding written contract is materially modified, it is treated as a new contract entered into as of the date of the material modification. Thus, amounts received by an employee under the contract prior to a material modification are not affected, but amounts received subsequent to the material modification are not treated as paid under a binding, written contract described in paragraph (h)(1)(i) of this section.

(B) A modification of the contract that accelerates the payment of compensation will be treated as a material modification unless the amount of compensation paid is discounted to reasonably reflect the time value of money. If the contract is modified to defer the payment of compensation, any compensation paid in excess of the amount that was originally payable to the employee under the contract will not be treated as a material modification if the additional amount is based on either a reasonable rate of interest or one or more predetermined actual investments (whether or not assets associated with the amount originally owed are actually invested therein) such that the amount payable by the employer at the later date will be based on the actual rate of return of the specific investment (including any decrease as well as any increase in the value of the investment).

(C) The adoption of a supplemental contract or agreement that provides for increased compensation, or the payment of additional compensation, is a material modification of a binding, written contract where the facts and circumstances show that the additional compensation is paid on the basis of substantially the same elements or conditions as the compensation that is otherwise paid under the written bind-

ing contract. However, a material modification of a written binding contract does not include a supplemental payment that is equal to or less than a reasonable cost-of-living increase over the payment made in the preceding year under that written binding contract. In addition, a supplemental payment of compensation that satisfies the requirements of qualified performance-based compensation in paragraph (e) of this section will not be treated as a material modification.

(iv) *Examples.* The following examples illustrate the exception of this paragraph (h)(1):

*Example 1.* Corporation X executed a 3-year compensation arrangement with C on February 15, 1993, that constitutes a written binding contract under applicable state law. The terms of the arrangement provide for automatic extension after the 3-year term for additional 1-year periods, unless the corporation exercises its option to terminate the arrangement within 30 days of the end of the 3-year term or, thereafter, within 30 days before each anniversary date. Termination of the compensation arrangement does not require the termination of C's employment relationship with Corporation X. Unless terminated, the arrangement is treated as renewed on February 15, 1996, and the deduction limit of paragraph (b) of this section applies to payments under the arrangement after that date.

*Example 2.* Corporation Y executed a 5-year employment agreement with B on January 1, 1992, providing for a salary of \$900,000 per year. Assume that this agreement constitutes a written binding contract under applicable state law. In 1992 and 1993, B receives the salary of \$900,000 per year. In 1994, Corporation Y increases B's salary with a payment of \$20,000. The \$20,000 supplemental payment does not constitute a material modification of the written binding contract because the \$20,000 payment is less than or equal to a reasonable cost-of-living increase from 1993. However, the \$20,000 supplemental payment is subject to the limitation in paragraph (b) of this section. On January 1, 1995, Corporation Y increases B's salary to \$1,200,000. The \$280,000 supplemental payment is a material modification of the written binding contract because the additional compensation is paid on the basis of substantially the same elements or conditions as the compensation that is otherwise paid under the written binding contract and it is greater than a reasonable, annual cost-of-living increase. Because the written binding contract is materially modified as of January 1, 1995, all compensation paid to B in 1995 and

thereafter is subject to the deduction limitation of section 162(m).

*Example 3.* Assume the same facts as in *Example 2*, except that instead of an increase in salary, B receives a restricted stock grant subject to B's continued employment for the balance of the contract. The restricted stock grant is not a material modification of the binding written contract because any additional compensation paid to B under the grant is not paid on the basis of substantially the same elements and conditions as B's salary because it is based both on the stock price and B's continued service. However, compensation attributable to the restricted stock grant is subject to the deduction limitation of section 162(m).

(2) *Special transition rule for outside directors.* A director who is a disinterested director is treated as satisfying the requirements of an outside director under paragraph (e)(3) of this section until the first meeting of shareholders at which directors are to be elected that occurs on or after January 1, 1996. For purposes of this paragraph (h)(2) and paragraph (h)(3) of this section, a director is a disinterested director if the director is disinterested within the meaning of Rule 16b-3(c)(2)(i), 17 CFR 240.16b-3(c)(2)(i), under the Exchange Act (including the provisions of Rule 16b-3(d)(3), as in effect on April 30, 1991).

(3) *Special transition rule for previously-approved plans—(i) In general.* Any compensation paid under a plan or agreement approved by shareholders before December 20, 1993, is treated as satisfying the requirements of paragraphs (e)(3) and (e)(4) of this section, provided that the directors administering the plan or agreement are disinterested directors and the plan was approved by shareholders in a manner consistent with Rule 16b-3(b), 17 CFR 240.16b-3(b), under the Exchange Act or Rule 16b-3(a), 17 CFR 240.16b-3(a) (as contained in 17 CFR part 240 revised April 1, 1990). In addition, for purposes of satisfying the requirements of paragraph (e)(2)(vi) of this section, a plan or agreement is treated as stating a maximum number of shares with respect to which an option or right may be granted to any employee if the plan or agreement that was approved by the shareholders provided for an aggregate limit, consistent with Rule 16b-3(b), 17 CFR 250.16b-3(b), on the shares of employer stock with respect to which

awards may be made under the plan or agreement.

(ii) *Reliance period.* The transition rule provided in this paragraph (h)(3) shall continue and may be relied upon until the earliest of—

(A) The expiration or material modification of the plan or agreement;

(B) The issuance of all employer stock and other compensation that has been allocated under the plan; or

(C) The first meeting of shareholders at which directors are to be elected that occurs after December 31, 1996.

(iii) *Stock-based compensation.* This paragraph (h)(3) will apply to any compensation received pursuant to the exercise of a stock option or stock appreciation right, or the substantial vesting of restricted property, granted under a plan or agreement described in paragraph (h)(3)(i) of this section if the grant occurs on or before the earliest of the events specified in paragraph (h)(3)(ii) of this section.

(iv) *Example.* The following example illustrates the application of this paragraph (h)(3):

*Example.* Corporation Z adopted a stock option plan in 1991. Pursuant to Rule 16b-3 under the Exchange Act, the stock option plan has been administered by disinterested directors and was approved by Corporation Z shareholders. Under the terms of the plan, shareholder approval is not required again until 2001. In addition, the terms of the stock option plan include an aggregate limit on the number of shares available under the plan. Option grants under the Corporation Z plan are made with an exercise price equal to or greater than the fair market value of Corporation Z stock. Compensation attributable to the exercise of options that are granted under the plan before the earliest of the dates specified in paragraph (h)(3)(ii) of this section will be treated as satisfying the requirements of paragraph (e) of this section for qualified performance-based compensation, regardless of when the options are exercised.

(i) [Reserved]

(j) *Effective date—(1) In general.* Section 162(m) and this section apply to compensation that is otherwise deductible by the corporation in a taxable year beginning on or after January 1, 1994.

(2) *Delayed effective date for certain provisions—(i) Date on which remuneration is considered paid.* Notwithstanding paragraph (j)(1) of this section, the

rules in the second sentence of each of paragraphs (e)(3)(ii)(A), (e)(3)(ii)(B), and (e)(3)(ii)(C) of this section for determining the date or dates on which remuneration is considered paid to a director are effective for taxable years beginning on or after January 1, 1995. Prior to those taxable years, taxpayers must follow the rules in paragraphs (e)(3)(ii)(A), (e)(3)(ii)(B), and (e)(3)(ii)(C) of this section or another reasonable, good faith interpretation of section 162(m) with respect to the date or dates on which remuneration is considered paid to a director.

(ii) *Separate treatment of publicly held subsidiaries.* Notwithstanding paragraph (j)(1) of this section, the rule in paragraph (c)(1)(ii) of this section that treats publicly held subsidiaries as separately subject to section 162(m) is effective as of the first regularly scheduled meeting of the shareholders of the publicly held subsidiary that occurs more than 12 months after December 2, 1994. The rule for stock-based compensation set forth in paragraph (f)(3) of this section will apply for this purpose, except that the grant must occur before the shareholder meeting specified in this paragraph (j)(2)(ii). Taxpayers may choose to rely on the rule referred to in the first sentence of this paragraph (j)(2)(ii) for the period prior to the effective date of the rule.

(iii) *Subsidiaries that become separate publicly held corporations.* Notwithstanding paragraph (j)(1) of this section, if a subsidiary of a publicly held corporation becomes a separate publicly held corporation as described in paragraph (f)(4)(i) of this section, then, for the duration of the reliance period described in paragraph (f)(2) of this section, the rules of paragraph (f)(1) of this section are treated as applying (and the rules of paragraph (f)(4) of this section do not apply) to remuneration paid to covered employees of that new publicly held corporation pursuant to a plan or agreement that existed prior to December 2, 1994, provided that the treatment of that remuneration as performance-based is in accordance with a reasonable, good faith interpretation of section 162(m). However, if remuneration is paid to covered employees of that new publicly held corporation pursuant to a plan or agreement that ex-

isted prior to December 2, 1994, but that remuneration is not performance-based under a reasonable, good faith interpretation of section 162(m), the rules of paragraph (f)(1) of this section will be treated as applying only until the first regularly scheduled meeting of shareholders that occurs more than 12 months after December 2, 1994. The rules of paragraph (f)(4) of this section will apply as of that first regularly scheduled meeting. The rule for stock-based compensation set forth in paragraph (f)(3) of this section will apply for purposes of this paragraph (j)(2)(iii), except that the grant must occur before the shareholder meeting specified in the preceding sentence if the remuneration is not performance-based under a reasonable, good faith interpretation of section 162(m). Taxpayers may choose to rely on the rules of paragraph (f)(4) of this section for the period prior to the applicable effective date referred to in the first or second sentence of this paragraph (j)(2)(iii).

(iv) *Bonus pools.* Notwithstanding paragraph (j)(1) of this section, the rules in paragraph (e)(2)(iii)(A) that limit the sum of individual percentages of a bonus pool to 100 percent will not apply to remuneration paid before January 1, 2001, based on performance in any performance period that began prior to December 20, 1995.

(v) *Compensation based on a percentage of salary or base pay.* Notwithstanding paragraph (j)(1) of this section, the requirement in paragraph (e)(4)(i) of this section that, in the case of certain formulas based on a percentage of salary or base pay, a corporation disclose to shareholders the maximum dollar amount of compensation that could be paid to the employee, will apply only to plans approved by shareholders after April 30, 1995.

[T.D. 8650, 60 FR 65537, Dec. 20, 1995, as amended by T.D. 8650, 61 FR 4350, Feb. 6, 1996]

#### § 1.162-28 Allocation of costs to lobbying activities.

(a) *Introduction—(1) In general.* Section 162(e)(1) denies a deduction for certain amounts paid or incurred in connection with activities described in section 162(e)(1) (A) and (D) (*lobbying activities*). To determine the nondeductible amount, a taxpayer must allocate

costs to lobbying activities. This section describes costs that must be allocated to lobbying activities and prescribes rules permitting a taxpayer to use a reasonable method to allocate those costs. This section does not apply to taxpayers subject to section 162(e)(5)(A). In addition, this section does not apply for purposes of sections 4911 and 4945 and the regulations thereunder.

(2) *Recordkeeping.* For recordkeeping requirements, see section 6001 and the regulations thereunder.

(b) *Reasonable method of allocating costs—(1) In general.* A taxpayer must use a reasonable method to allocate the costs described in paragraph (c) of this section to lobbying activities. A method is not reasonable unless it is applied consistently and is consistent with the special rules in paragraph (g) of this section. Except as provided in paragraph (b)(2) of this section, reasonable methods of allocating costs to lobbying activities include (but are not limited to)—

(i) The ratio method described in paragraph (d) of this section;

(ii) The gross-up method described in paragraph (e) of this section; and

(iii) A method that applies the principles of section 263A and the regulations thereunder (see paragraph (f) of this section).

(2) *Taxpayers not permitted to use certain methods.* A taxpayer (other than one subject to section 6033(e)) that does not pay or incur reasonable labor costs for persons engaged in lobbying activities may not use the gross-up method. For example, a partnership or sole proprietorship in which the lobbying activities are performed by the owners who do not receive a salary or guaranteed payment for services does not pay or incur reasonable labor costs for persons engaged in those activities and may not use the gross-up method.

(c) *Costs allocable to lobbying activities—(1) In general.* Costs properly allocable to lobbying activities include labor costs and general and administrative costs.

(2) *Labor costs.* For each taxable year, labor costs include costs attributable to full-time, part-time, and contract employees. Labor costs include all elements of compensation, such as basic

compensation, overtime pay, vacation pay, holiday pay, sick leave pay, payroll taxes, pension costs, employee benefits, and payments to a supplemental unemployment benefit plan.

(3) *General and administrative costs.* For each taxable year, general and administrative costs include depreciation, rent, utilities, insurance, maintenance costs, security costs, and other administrative department costs (for example, payroll, personnel, and accounting).

(d) *Ratio method—(1) In general.* Under the ratio method described in this paragraph (d), a taxpayer allocates to lobbying activities the sum of its third-party costs (as defined in paragraph (d)(5) of this section) allocable to lobbying activities and the costs determined by using the following formula:

$$\frac{\text{Lobbying labor hours}}{\text{Total labor hours}} \times \frac{\text{Total costs}}{\text{of operations}}.$$

(2) *Lobbying labor hours.* Lobbying labor hours are the hours that a taxpayer's personnel spend on lobbying activities during the taxable year. A taxpayer may use any reasonable method to determine the number of labor hours spent on lobbying activities and may use the de minimis rule of paragraph (g)(1) of this section. A taxpayer may treat as zero the lobbying labor hours of personnel engaged in secretarial, clerical, support, and other administrative activities (as opposed to activities involving significant judgment with respect to lobbying activities). Thus, for example, the hours spent on lobbying activities by para-professionals and analysts may not be treated as zero.

(3) *Total labor hours.* Total labor hours means the total number of hours that a taxpayer's personnel spend on a taxpayer's trade or business during the taxable year. A taxpayer may make reasonable assumptions concerning total hours spent by personnel on the taxpayer's trade or business. For example, it may be reasonable, based on all the facts and circumstances, to assume that all full-time personnel spend 1,800 hours per year on a taxpayer's trade or business. If, under paragraph (d)(2) of this section, a taxpayer treats as zero the lobbying labor hours of personnel

engaged in secretarial, clerical, support, and other administrative activities, the taxpayer must also treat as zero the total labor hours of all personnel engaged in those activities.

(4) *Total costs of operations.* A taxpayer's total costs of operations means the total costs of the taxpayer's trade or business for a taxable year, excluding third-party costs (as defined in paragraph (d)(5) of this section).

(5) *Third-party costs.* Third-party costs are amounts paid or incurred in whole or in part for lobbying activities conducted by third parties (such as amounts paid to taxpayers subject to section 162(e)(5)(A) or dues or other similar amounts that are not deductible in whole or in part under section 162(e)(3)) and amounts paid or incurred

for travel (including meals and lodging while away from home) and entertainment relating in whole or in part to lobbying activities.

(6) *Example.* The provisions of this paragraph (d) are illustrated by the following example.

*Example.* (i) In 1996, three full-time employees, A, B, and C, of Taxpayer W engage in both lobbying activities and nonlobbying activities. A spends 300 hours, B spends 1,700 hours, and C spends 1,000 hours on lobbying activities, for a total of 3,000 hours spent on lobbying activities for W. W reasonably assumes that each of its three employees spends 2,000 hours a year on W's business.

(ii) W's total costs of operations are \$300,000. W has no third-party costs.

(iii) Under the ratio method, X allocates \$150,000 to its lobbying activities for 1996, as follows:

$$\frac{\text{Lobbying labor hours}}{\text{Total labor hours}} \times \text{Total costs of operations} + \text{Allocable third-party costs} = \text{Costs allocable to lobbying activities}$$

$$\left[ \frac{300 + 1,700 + 1,000}{6,000} \times \$300,000 \right] + [0] = \$150,000.$$

(e) *Gross-up method*—(1) *In general.* Under the gross-up method described in this paragraph (e)(1), the taxpayer allocates to lobbying activities the sum of its third-party costs (as defined in paragraph (d)(5) of this section) allocable to lobbying activities and 175 percent of its basic lobbying labor costs (as defined in paragraph (e)(3) of this section) of all personnel.

(2) *Alternative gross-up method.* Under the alternative gross-up method described in this paragraph (e)(2), the taxpayer allocates to lobbying activities the sum of its third-party costs (as defined in paragraph (d)(5) of this section) allocable to lobbying activities and 225 percent of its basic lobbying labor costs (as defined in paragraph (e)(3)), excluding the costs of personnel who engage in secretarial, clerical, support, and other administrative activities (as opposed to activities involving significant judgment with respect to lobbying activities).

(3) *Basic lobbying labor costs.* For purposes of this paragraph (e), basic lob-

bying labor costs are the basic costs of lobbying labor hours (as defined in paragraph (d)(2) of this section) determined for the appropriate personnel. For purposes of this paragraph (e), basic costs of lobbying labor hours are wages or other similar costs of labor, including, for example, guaranteed payments for services. Basic costs do not include pension, profit-sharing, employee benefits, and supplemental unemployment benefit plan costs, or other similar costs.

(4) *Example.* The provisions of this paragraph (e) are illustrated by the following example.

*Example.* (i) In 1996, three employees, A, B, and C, of Taxpayer X engage in both lobbying activities and nonlobbying activities. A spends 300 hours, B spends 1,700 hours, and C spends 1,000 hours on lobbying activities.

(ii) X has no third-party costs.

(iii) For purposes of the gross-up method, X determines that its basic labor costs are \$20 per hour for A, \$30 per hour for B, and \$25 per hour for C. Thus, its basic lobbying labor costs are  $(\$20 \times 300) + (\$30 \times 1,700) + (\$25 \times 1,000)$ , or

§ 1.162-28

26 CFR Ch. I (4-1-06 Edition)

(\$6,000+\$51,000+\$25,000), for total basic lobbying labor costs for 1996 of \$82,000.

(iv) Under the gross-up method, X allocates \$143,500 to its lobbying activities for 1996, as follows:

$$\begin{array}{rcl}
 175\% \times \text{Basic lobbying labor costs of all personnel} & + & \text{Allocable third-party costs} & = & \text{Costs allocable to lobbying activities} \\
 [175\% \times \$82,000] & & + [0] & & = \$143,500.
 \end{array}$$

(f) *Section 263A cost allocation methods—(1) In general.* A taxpayer may allocate its costs to lobbying activities under the principles set forth in section 263A and the regulations thereunder, except to the extent inconsistent with paragraph (g) of this section. For this purpose, lobbying activities are considered a service department or function. Therefore, a taxpayer may allocate costs to lobbying activities by applying the methods provided in §§ 1.263A-1 through 1.263A-3. See § 1.263A-1(e)(4), which describes service costs generally; § 1.263A-1(f), which sets forth cost allocation methods available under section 263A; and § 1.263A-1(g)(4), which provides methods of allocating service costs.

(2) *Example.* The provisions of this paragraph (f) are illustrated by the following example.

*Example.* (i) Three full-time employees, A, B, and C, work in the Washington office of Taxpayer Y, a manufacturing concern. They each engage in lobbying activities and non-lobbying activities. In 1996, A spends 75 hours, B spends 1,750 hours, and C spends 2,000 hours on lobbying activities. A's hours are not spent on direct contact lobbying as defined in paragraph (g)(2) of this section. All three work 2,000 hours during 1996. The Washington office also employs one secretary, D, who works exclusively for A, B, and C.

(ii) In addition, three departments in the corporate headquarters in Chicago benefit the Washington office: Public affairs, human resources, and insurance.

(iii) Y is subject to section 263A and uses the step-allocation method to allocate its service costs. Prior to the amendments to section 162(e), the Washington office was treated as an overall management function for purposes of section 263A. As such, its costs were fully deductible and no further allocations were made under Y's step allocation. Following the amendments to section 162(e), Y adopts its 263A step-allocation methodology to allocate costs to lobbying activities. Y adds a lobbying department to its step-allocation program, which results in an allocation of costs to the lobbying department from both the Washington office and the Chicago office.

(iv) Y develops a labor ratio to allocate its Washington office costs between the newly defined lobbying department and the overall management department. To determine the hours allocable to lobbying activities, Y uses the de minimis rule of paragraph (g)(1) of this section. Under this rule, A's hours spent on lobbying activities are treated as zero because less than 5 percent of A's time is spent on lobbying (75/2,000 = 3.75%). In addition, because D works exclusively for personnel engaged in lobbying activities, D's hours are not used to develop the allocation ratio. Y assumes that D's allocation of time follows the average time of all the personnel engaged in lobbying activities. Thus, Y's labor ratio is determined as follows:

Employee	Departments		
	Lobbying hours	Overall management hours	Total hours
A .....	0	2,000	2,000
B .....	1,750	250	2,000
C .....	2,000	0	2,000
Totals .....	3,750	2,250	6,000

$$\text{Lobbying Department Ratio} = \frac{3,750}{6,000} = 62.5\%$$

$$\text{Overall Management Department Ratio} = \frac{2,250}{6,000} = 37.5\%$$

(v) In 1996, the Washington office has the following costs:

Account	Amount
Professional Salaries and Benefits .....	\$660,000
Clerical Salaries and Benefits .....	50,000
Rent Expense .....	100,000
Depreciation on Furniture and Equip .....	40,000
Utilities .....	15,000
Outside Payroll Service .....	5,000
Miscellaneous .....	10,000
Third-Party Lobbying (Law Firm) .....	90,000
<b>Total Washington Costs .....</b>	<b>\$970,000</b>

(vi) In addition, \$233,800 of costs from the public affairs department, \$30,000 of costs from the insurance department, and \$5,000 of costs from the human resources department are allocable to the Washington office from departments in Chicago. Therefore, the Washington office costs are allocated to the Lobbying and Overall Management departments as follows:

Total Washington department costs from above	\$970,000
Plus Costs Allocated From Other Departments	268,800
Less third-party costs directly allocable to lobbying .....	(90,000)
<b>Total Washington office costs .....</b>	<b>1,148,800</b>

	Lobbying department	Overall management department
Department Allocation Ratios ....	62.5%	37.5%
× Washington Office Costs .....	\$1,148,800	\$1,148,800
= Costs Allocated to Departments .....	\$718,000	\$430,800

(vii) Y's step-allocation for its Lobbying Department is determined as follows:

Y's step-allocation	Lobbying department
Washington costs allocated to lobbying department .....	\$718,000
Plus third-party costs .....	90,000
<b>Total costs of lobbying activities .....</b>	<b>808,000</b>

(g) *Special rules.* The following rules apply to any reasonable method of allocating costs to lobbying activities.

(1) *De minimis rule for labor hours.* Subject to the exception provided in paragraph (g)(2) of this section, a tax-

payer may treat time spent by an individual on lobbying activities as zero if less than five percent of the person's time is spent on lobbying activities. Reasonable methods must be used to determine if less than five percent of a person's time is spent on lobbying activities.

(2) *Direct contact lobbying labor hours.* Notwithstanding paragraph (g)(1) of this section, a taxpayer must treat all hours spent by a person on direct contact lobbying (as well as the hours that person spends in connection with direct contact lobbying, including time spent traveling that is allocable to the direct contact lobbying) as labor hours allocable to lobbying activities. An activity is direct contact lobbying if it is a meeting, telephone conversation, letter, or other similar means of communication with a legislator (other than a local legislator) or covered executive branch official (as defined in section 162(e)(6)) and otherwise qualifies as a lobbying activity. A person who engages in research, preparation, and other background activities related to direct contact lobbying but who does not make direct contact with a legislator or covered executive branch official is not engaged in direct contact lobbying.

(3) *Taxpayer defined.* For purposes of this section, a taxpayer includes a tax-exempt organization subject to section 6033(e).

(h) *Effective date.* This section is effective for amounts paid or incurred on or after July 21, 1995. Taxpayers must adopt a reasonable interpretation of sections 162(e)(1)(A) and (D) for amounts paid or incurred before this date.

[T.D. 8602, 60 FR 37573, July 21, 1995]

**§ 1.162-29 Influencing legislation.**

(a) *Scope.* This section provides rules for determining whether an activity is influencing legislation for purposes of section 162(e)(1)(A). This section does not apply for purposes of sections 4911 and 4945 and the regulations thereunder.

(b) *Definitions.* For purposes of this section—

(1) *Influencing legislation.* Influencing legislation means—

(i) Any attempt to influence any legislation through a lobbying communication; and

(ii) All activities, such as research, preparation, planning, and coordination, including deciding whether to make a lobbying communication, engaged in for a purpose of making or supporting a lobbying communication, even if not yet made. See paragraph (c) of this section for rules for determining the purposes for engaging in an activity.

(2) *Attempt to influence legislation.* An attempt to influence any legislation through a lobbying communication is making the lobbying communication.

(3) *Lobbying communication.* A lobbying communication is any communication (other than any communication compelled by subpoena, or otherwise compelled by Federal or State law) with any member or employee of a legislative body or any other government official or employee who may participate in the formulation of the legislation that—

(i) Refers to specific legislation and reflects a view on that legislation; or

(ii) Clarifies, amplifies, modifies, or provides support for views reflected in a prior lobbying communication.

(4) *Legislation.* Legislation includes any action with respect to Acts, bills, resolutions, or other similar items by a legislative body. Legislation includes a proposed treaty required to be submitted by the President to the Senate for its advice and consent from the time the President's representative begins to negotiate its position with the prospective parties to the proposed treaty.

(5) *Specific legislation.* Specific legislation includes a specific legislative proposal that has not been introduced in a legislative body.

(6) *Legislative bodies.* Legislative bodies are Congress, state legislatures, and other similar governing bodies, excluding local councils (and similar governing bodies), and executive, judicial, or administrative bodies. For this purpose, administrative bodies include school boards, housing authorities, sewer and water districts, zoning boards, and other similar Federal, State, or local special purpose bodies, whether elective or appointive.

(7) *Examples.* The provisions of this paragraph (b) are illustrated by the following examples.

*Example 1.* Taxpayer P's employee, A, is assigned to approach members of Congress to gain their support for a pending bill. A drafts and P prints a position letter on the bill. P distributes the letter to members of Congress. Additionally, A personally contacts several members of Congress or their staffs to seek support for P's position on the bill. The letter and the personal contacts are lobbying communications. Therefore, P is influencing legislation.

*Example 2.* Taxpayer R is invited to provide testimony at a congressional oversight hearing concerning the implementation of The Financial Institutions Reform, Recovery, and Enforcement Act of 1989. Specifically, the hearing concerns a proposed regulation increasing the threshold value of commercial and residential real estate transactions for which an appraisal by a state licensed or certified appraiser is required. In its testimony, R states that it is in favor of the proposed regulation. Because R does not refer to any specific legislation or reflect a view on any such legislation, R has not made a lobbying communication. Therefore, R is not influencing legislation.

*Example 3.* State X enacts a statute that requires the licensing of all day-care providers. Agency B in State X is charged with writing rules to implement the statute. After the enactment of the statute, Taxpayer S sends a letter to Agency B providing detailed proposed rules that S recommends Agency B adopt to implement the statute on licensing of day-care providers. Because the letter to Agency B neither refers to nor reflects a view on any specific legislation, it is not a lobbying communication. Therefore, S is not influencing legislation.

*Example 4.* Taxpayer T proposes to a State Park Authority that it purchase a particular tract of land for a new park. Even if T's proposal would necessarily require the State Park Authority eventually to seek appropriations to acquire the land and develop the new park, T has not made a lobbying communication because there has been no reference to, nor any view reflected on, any specific legislation. Therefore, T's proposal is not influencing legislation.

*Example 5.* (i) Taxpayer U prepares a paper that asserts that lack of new capital is hurting State X's economy. The paper indicates that State X residents either should invest more in local businesses or increase their savings so that funds will be available to others interested in making investments. U forwards a summary of the unpublished paper to legislators in State X with a cover letter that states in part:

You must take action to improve the availability of new capital in the state.

(ii) Because neither the summary nor the cover letter refers to any specific legislative proposal and no other facts or circumstances indicate that they refer to an existing legislative proposal, forwarding the summary to legislators in State X is not a lobbying communication. Therefore, U is not influencing legislation.

(iii) Q, a member of the legislature of State X, calls U to request a copy of the unpublished paper from which the summary was prepared. U forwards the paper with a cover letter that simply refers to the enclosed materials. Because U's letter to Q and the unpublished paper do not refer to any specific legislation or reflect a view on any such legislation, the letter is not a lobbying communication. Therefore, U is not influencing legislation.

*Example 6.* (i) Taxpayer V prepares a paper that asserts that lack of new capital is hurting the national economy. The paper indicates that lowering the capital gains rate would increase the availability of capital and increase tax receipts from the capital gains tax. V forwards the paper to its representatives in Congress with a cover letter that says, in part:

I urge you to support a reduction in the capital gains tax rate.

(ii) V's communication is a lobbying communication because it refers to and reflects a view on a specific legislative proposal (*i.e.*, lowering the capital gains rate). Therefore, V is influencing legislation.

*Example 7.* Taxpayer W, based in State A, notes in a letter to a legislator of State A that State X has passed a bill that accomplishes a stated purpose and then says that State A should pass such a bill. No such bill has been introduced into the State A legislature. The communication is a lobbying communication because it refers to and reflects a view on a specific legislative proposal. Therefore, W is influencing legislation.

*Example 8.* (i) Taxpayer Y represents citrus fruit growers. Y writes a letter to a United States senator discussing how pesticide O has benefited citrus fruit growers and disputing problems linked to its use. The letter discusses a bill pending in Congress and states in part:

This bill would prohibit the use of pesticide O. If citrus growers are unable to use this pesticide, their crop yields will be severely reduced, leading to higher prices for consumers and lower profits, even bankruptcy, for growers.

(ii) Y's views on the bill are reflected in this statement. Thus, the communication is a lobbying communication, and Y is influencing legislation.

*Example 9.* (i) B, the president of Taxpayer Z, an insurance company, meets with Q, who chairs the X state legislature's committee with jurisdiction over laws regulating insurance companies, to discuss the possibility of

legislation to address current problems with surplus-line companies. B recommends that legislation be introduced that would create minimum capital and surplus requirements for surplus-line companies and create clearer guidelines concerning the risks that surplus-line companies can insure. B's discussion with Q is a lobbying communication because B refers to and reflects a view on a specific legislative proposal. Therefore, Z is influencing legislation.

(ii) Q is not convinced that the market for surplus-line companies is substantial enough to warrant such legislation and requests that B provide information on the amount and types of risks covered by surplus-line companies. After the meeting, B has employees of Z prepare estimates of the percentage of property and casualty insurance risks handled by surplus-line companies. B sends the estimates with a cover letter that simply refers to the enclosed materials. Although B's follow-up letter to Q does not refer to specific legislation or reflect a view on such legislation, B's letter supports the views reflected in the earlier communication. Therefore, the letter is a lobbying communication and Z is influencing legislation.

(c) *Purpose for engaging in an activity*—(1) *In general.* The purposes for engaging in an activity are determined based on all the facts and circumstances. Facts and circumstances include, but are not limited to—

(i) Whether the activity and the lobbying communication are proximate in time;

(ii) Whether the activity and the lobbying communication relate to similar subject matter;

(iii) Whether the activity is performed at the request of, under the direction of, or on behalf of a person making the lobbying communication;

(iv) Whether the results of the activity are also used for a nonlobbying purpose; and

(v) Whether, at the time the taxpayer engages in the activity, there is specific legislation to which the activity relates.

(2) *Multiple purposes.* If a taxpayer engages in an activity both for the purpose of making or supporting a lobbying communication and for some nonlobbying purpose, the taxpayer must treat the activity as engaged in partially for a lobbying purpose and partially for a nonlobbying purpose. This division of the activity must result in a reasonable allocation of costs to influencing legislation. See § 1.162-28

(allocation rules for certain expenditures to which section 162(e)(1) applies). A taxpayer's treatment of these multiple-purpose activities will, in general, not result in a reasonable allocation if it allocates to influencing legislation—

(i) Only the incremental amount of costs that would not have been incurred but for the lobbying purpose; or

(ii) An amount based solely on the number of purposes for engaging in that activity without regard to the relative importance of those purposes.

(3) *Activities treated as having no purpose to influence legislation.* A taxpayer that engages in any of the following activities is treated as having done so without a purpose of making or supporting a lobbying communication—

(i) Before evidencing a purpose to influence any specific legislation referred to in paragraph (c)(3)(i)(A) or (B) of this section (or similar legislation)—

(A) Determining the existence or procedural status of specific legislation, or the time, place, and subject of any hearing to be held by a legislative body with respect to specific legislation; or

(B) Preparing routine, brief summaries of the provisions of specific legislation;

(ii) Performing an activity for purposes of complying with the requirements of any law (for example, satisfying state or federal securities law filing requirements);

(iii) Reading any publications available to the general public or viewing or listening to other mass media communications; and

(iv) Merely attending a widely attended speech.

(4) *Examples.* The provisions of this paragraph (c) are illustrated by the following examples.

*Example 1.* (i) *Facts.* In 1997, Agency F issues proposed regulations relating to the business of Taxpayer W. There is no specific legislation during 1997 that is similar to the regulatory proposal. W undertakes a study of the impact of the proposed regulations on its business. W incorporates the results of that study in comments sent to Agency F in 1997. In 1998, legislation is introduced in Congress that is similar to the regulatory proposal. Also in 1998, W writes a letter to Senator P stating that it opposes the proposed legislation. W encloses with the letter a copy of the comments it sent to Agency F.

(ii) *Analysis.* W's letter to Senator P refers to and reflects a view on specific legislation

and therefore is a lobbying communication. Although W's study of the impact of the proposed regulations is proximate in time and similar in subject matter to its lobbying communication, W performed the study and incorporated the results in comments sent to Agency F when no legislation with a similar subject matter was pending (a nonlobbying use). On these facts, W engaged in the study solely for a nonlobbying purpose.

*Example 2.* (i) *Facts.* The governor of State Q proposes a budget that includes a proposed sales tax on electricity. Using its records of electricity consumption, Taxpayer Y estimates the additional costs that the budget proposal would impose upon its business. In the same year, Y writes to members of the state legislature and explains that it opposes the proposed sales tax. In its letter, Y includes its estimate of the costs that the sales tax would impose on its business. Y does not demonstrate any other use of its estimates.

(ii) *Analysis.* The letter is a lobbying communication (because it refers to and reflects a view on specific legislation, the governor's proposed budget). Y's estimate of additional costs under the proposal supports the lobbying communication, is proximate in time and similar in subject matter to a specific legislative proposal then in existence, and is not used for a nonlobbying purpose. Based on these facts, Y estimated its additional costs under the budget proposal solely to support the lobbying communication.

*Example 3.* (i) *Facts.* A senator in the State Q legislature announces her intention to introduce legislation to require health insurers to cover a particular medical procedure in all policies sold in the state. Taxpayer Y has different policies for two groups of employees, one of which covers the procedure and one of which does not. After the bill is introduced, Y's legislative affairs staff asks Y's human resources staff to estimate the additional cost to cover the procedure for both groups of employees. Y's human resources staff prepares a study estimating Y's increased costs and forwards it to the legislative affairs staff. Y's legislative staff then writes to members of the state legislature and explains that it opposes the proposed change in insurance coverage based on the study. Y's legislative affairs staff thereafter forwards the study, prepared for its use in opposing the statutory proposal, to its labor relations staff for use in negotiations with employees scheduled to begin later in the year.

(ii) *Analysis.* The letter to legislators is a lobbying communication (because it refers to and reflects a view on specific legislation). The activity of estimating Y's additional costs under the proposed legislation relates to the same subject as the lobbying communication, occurs close in time to the lobbying communication, is conducted at the

request of a person making a lobbying communication, and relates to specific legislation then in existence. Although Y used the study in its labor negotiations, mere use for that purpose does not establish that Y estimated its additional costs under the proposed legislation in part for a nonlobbying purpose. Thus, based on all the facts and circumstances, Y estimated the additional costs it would incur under the proposal solely to make or support the lobbying communication.

*Example 4.* (i) *Facts.* After several years of developmental work under various contracts, in 1996, Taxpayer A contracts with the Department of Defense (DOD) to produce a prototype of a new generation military aircraft. A is aware that DOD will be able to fund the contract only if Congress appropriates an amount for that purpose in the upcoming appropriations process. In 1997, A conducts simulation tests of the aircraft and revises the specifications of the aircraft's expected performance capabilities, as required under the contract. A submits the results of the tests and the revised specifications to DOD. In 1998, Congress considers legislation to appropriate funds for the contract. In that connection, A summarizes the results of the simulation tests and of the aircraft's expected performance capabilities, and submits the summary to interested members of Congress with a cover letter that encourages them to support appropriations of funds for the contract.

(ii) *Analysis.* The letter is a lobbying communication (because it refers to specific legislation (*i.e.*, appropriations) and requests passage). The described activities in 1996, 1997, and 1998 relate to the same subject as the lobbying communication. The summary was prepared specifically for, and close in time to, that communication. Based on these facts, the summary was prepared solely for a lobbying purpose. In contrast, A conducted the tests and revised the specifications to comply with its production contract with DOD. A conducted the tests and revised the specifications solely for a nonlobbying purpose.

*Example 5.* (i) *Facts.* C, president of Taxpayer W, travels to the state capital to attend a two-day conference on new manufacturing processes. C plans to spend a third day in the capital meeting with state legislators to explain why W opposes a pending bill unrelated to the subject of the conference. At the meetings with the legislators, C makes lobbying communications by referring to and reflecting a view on the pending bill.

(ii) *Analysis.* C's traveling expenses (transportation and meals and lodging) are partially for the purpose of making or supporting the lobbying communications and partially for a nonlobbying purpose. As a result, under paragraph (c)(2) of this section, W

must reasonably allocate C's traveling expenses between these two purposes. Allocating to influencing legislation only C's incremental transportation expenses (*i.e.*, the taxi fare to meet with the state legislators) does not result in a reasonable allocation of traveling expenses.

*Example 6.* (i) *Facts.* On February 1, 1997, a bill is introduced in Congress that would affect Company E. Employees in E's legislative affairs department, as is customary, prepare a brief summary of the bill and periodically confirm the procedural status of the bill through conversations with employees and members of Congress. On March 31, 1997, the head of E's legislative affairs department meets with E's President to request that B, a chemist, temporarily help the legislative affairs department analyze the bill. The President agrees, and suggests that B also be assigned to draft a position letter in opposition to the bill. Employees of the legislative affairs department continue to confirm periodically the procedural status of the bill. On October 31, 1997, B's position letter in opposition to the bill is delivered to members of Congress.

(ii) *Analysis.* B's letter is a lobbying communication because it refers to and reflects a view on specific legislation. Under paragraph (c)(3)(i) of this section, the assignment of B to assist the legislative affairs department in analyzing the bill and in drafting a position letter in opposition to the bill evidences a purpose to influence legislation. Neither the activity of periodically confirming the procedural status of the bill nor the activity of preparing the routine, brief summary of the bill before March 31 constitutes influencing legislation. In contrast, periodically confirming the procedural status of the bill on or after March 31 relates to the same subject as, and is close in time to, the lobbying communication and is used for no nonlobbying purpose. Consequently, after March 31, E determined the procedural status of the bill for the purpose of supporting the lobbying communication by B.

(d) *Lobbying communication made by another.* If a taxpayer engages in activities for a purpose of supporting a lobbying communication to be made by another person (or by a group of persons), the taxpayer's activities are treated under paragraph (b) of this section as influencing legislation. For example, if a taxpayer or an employee of the taxpayer (as a volunteer or otherwise) engages in an activity to assist a trade association in preparing its lobbying communication, the taxpayer's activities are influencing legislation even if the lobbying communication is made by the trade association and not

the taxpayer. If, however, the taxpayer's employee, acting outside the employee's scope of employment, volunteers to engage in those activities, then the taxpayer is not influencing legislation.

(e) *No lobbying communication.* Paragraph (e) of this section applies if a taxpayer engages in an activity for a purpose of making or supporting a lobbying communication, but no lobbying communication that the activity supports has yet been made.

(1) *Before the filing date.* Under this paragraph (e)(1), if on the filing date of the return for any taxable year the taxpayer no longer expects, under any reasonably foreseeable circumstances, that a lobbying communication will be made that is supported by the activity, then the taxpayer will be treated as if it did not engage in the activity for a purpose of making or supporting a lobbying communication. Thus, the taxpayer need not treat any amount allocated to that activity for that year under § 1.162-28 as an amount to which section 162(e)(1)(A) applies. The filing date for purposes of paragraph (e) of this section is the earlier of the time the taxpayer files its timely return for the year or the due date of the timely return.

(2) *After the filing date—(i) In general.* If, at any time after the filing date, the taxpayer no longer expects, under any reasonably foreseeable circumstances, that a lobbying communication will be made that is supported by the activity, then any amount previously allocated under § 1.162-28 to the activity and disallowed under section 162(e)(1)(A) is treated as an amount that is not subject to section 162(e)(1)(A) and that is paid or incurred only at the time the taxpayer no longer expects that a lobbying communication will be made.

(ii) *Special rule for certain tax-exempt organizations.* For a tax-exempt organization subject to section 6033(e), the amounts described in paragraph (e)(2)(i) of this section are treated as reducing (but not below zero) its expenditures to which section 162(e)(1) applies beginning with that year and continuing for subsequent years to the extent not treated in prior years as reducing those expenditures.

(f) *Anti-avoidance rule.* If a taxpayer, alone or with others, structures its activities with a principal purpose of achieving results that are unreasonable in light of the purposes of section 162(e)(1)(A) and section 6033(e), the Commissioner can recast the taxpayer's activities for federal tax purposes as appropriate to achieve tax results that are consistent with the intent of section 162(e)(1)(A), section 6033(e) (if applicable), and this section, and the pertinent facts and circumstances.

(g) *Taxpayer defined.* For purposes of this section, a taxpayer includes a tax-exempt organization subject to section 6033(e).

(h) *Effective date.* This section is effective for amounts paid or incurred on or after July 21, 1995. Taxpayers must adopt a reasonable interpretation of section 162(e)(1)(A) for amounts paid or incurred before this date.

[T.D. 8602, 60 FR 37575, July 21, 1995]

### § 1.163-1 Interest deduction in general.

(a) Except as otherwise provided in sections 264 to 267, inclusive, interest paid or accrued within the taxable year on indebtedness shall be allowed as a deduction in computing taxable income. For rules relating to interest on certain deferred payments, see section 483 and the regulations thereunder.

(b) Interest paid by the taxpayer on a mortgage upon real estate of which he is the legal or equitable owner, even though the taxpayer is not directly liable upon the bond or note secured by such mortgage, may be deducted as interest on his indebtedness. Pursuant to the provisions of section 163(c), any annual or periodic rental payment made by a taxpayer on or after January 1, 1962, under a redeemable ground rent, as defined in section 1055(c) and paragraph (b) of § 1.1055-1, is required to be treated as interest on an indebtedness secured by a mortgage and, accordingly, may be deducted by the taxpayer as interest on his indebtedness. Section 163(c) has no application in respect of any annual or periodic rental payment made prior to January 1, 1962, or pursuant to an arrangement which does not constitute a "redeemable ground rent"

as defined in section 1055(c) and paragraph (b) of §1.1055-1. Accordingly, annual or periodic payments of Pennsylvania ground rents made before, on, or after January 1, 1962, are deductible as interest if the ground rent is redeemable. An annual or periodic rental payment under a Maryland redeemable ground rent made prior to January 1, 1962, is deductible in accordance with the rules and regulations applicable at the time such payment was made. Any annual or periodic rental payment under a Maryland redeemable ground rent made by the taxpayer on or after January 1, 1962, is, pursuant to the provisions of section 163(c), treated as interest on an indebtedness secured by a mortgage and, accordingly, is deductible by the taxpayer as interest on his indebtedness. In any case where the ground rent is irredeemable, any annual or periodic ground rent payment shall be treated as rent and shall be deductible only to the extent that the payment constitutes a proper business expense. Amounts paid in redemption of a ground rent shall not be treated as interest. For treatment of redeemable ground rents and real property held subject to liabilities under redeemable ground rents, see section 1055 and the regulations thereunder.

(c) Interest calculated for costkeeping or other purposes on account of capital or surplus invested in the business which does not represent a charge arising under an interest-bearing obligation, is not an allowable deduction from gross income. Interest paid by a corporation on scrip dividends is an allowable deduction. So-called interest on preferred stock, which is in reality a dividend thereon, cannot be deducted in computing taxable income. (See, however, section 583.) In the case of banks and loan or trust companies, interest paid within the year on deposits, such as interest paid on moneys received for investment and secured by interest-bearing certificates of indebtedness issued by such bank or loan or trust company, may be deducted from gross income.

(d) To the extent of assistance payments made in respect of an indebtedness of the taxpayer during the taxable year by the Department of Housing and Urban Development under section 235

of the National Housing Act (12 U.S.C. 1715z), as amended, no deduction shall be allowed under section 163 and this section for interest paid or accrued with respect to such indebtedness. However, such payments shall not affect the amount of any deduction under any section of the Code other than section 163. The provisions of this paragraph shall apply to taxable years beginning after December 31, 1974.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6821, 30 FR 6216, May 4, 1965; T.D. 6873, 31 FR 941, Jan. 25, 1966; T.D. 7408, 41 FR 9547, Mar. 5, 1976]

**§ 1.163-2 Installment purchases where interest charge is not separately stated.**

(a) *In general.* (1) Whenever there is a contract with a seller for the purchase of personal property providing for payment of part or all of the purchase price in installments and there is a separately stated carrying charge (including a finance charge, service charge, and the like) but the actual interest charge cannot be ascertained, a portion of the payments made during the taxable year under the contract shall be treated as interest and is deductible under section 163 and this section. Section 163(b) contains a formula, described in paragraph (b) of this section, in accordance with which the amount of interest deductible in the taxable year must be computed. This formula is designed to operate automatically in the case of any installment purchase, without regard to whether payments under the contract are made when due or are in default. For applicable limitations when an obligation to pay is terminated, see paragraph (c) of this section.

(2) Whenever there is a contract with an educational institution for the purchase of educational services providing for payment of part or all of the purchase price in installments and there is a separately stated carrying charge (including a finance charge, service charge, and the like) but the actual interest charge cannot be ascertained, a portion of the payments made during the taxable year under the contract shall be treated as interest and is deductible under section 163 and this section. See paragraphs (b) and (c) of this

§ 1.163-2

26 CFR Ch. I (4-1-06 Edition)

section for the applicable computation and limitations rules. For purposes of section 163(b) and this section, the term "educational services" means any service (including lodging) which is purchased from an educational institution (as defined in section 151(e)(4) and paragraph (c) of §1.151-3) and which is provided for a student of such institution.

(3) Section 163(b) and this section do not apply to a contract for the loan of money, even if the loan is to be repaid in installments and even if the borrowed amount is used to purchase personal property or educational services. In cases to which the preceding sentence applies, the portion of the installment payment which constitutes interest (as distinguished from payments of principal and charges such as payments for credit life insurance) is deductible under section 163(a) and §1.163-1.

(b) *Computation.* The portion of any such payments to be treated as interest shall be equal to 6 percent of the average unpaid balance under the contract during the taxable year. For purposes of this computation, the average unpaid balance under the contract is the sum of the unpaid balance outstanding on the first day of each month beginning during the taxable year, divided by 12.

(c) *Limitations.* The amount treated as interest under section 163(b) and this section for any taxable year shall not exceed the amount of the payments made under the contract during the taxable year nor the aggregate carrying charges properly attributable to each contract for such taxable year. In computing the amount to be treated as interest if the obligation to pay is terminated as, for example, in the case of a repossession of the property, the unpaid balance on the first day of the month during which the obligation is terminated shall be zero.

(d) *Illustrations.* The provisions of this section may be illustrated by the following examples:

*Example (1).* On January 20, 1955, A purchased a television set for \$400, including a stated carrying charge of \$25. The down payment was \$50, and the balance was paid in 14 monthly installments of \$25 each, on the 20th day of each month commencing with Feb-

ruary. Assuming that A is a cash method, calendar year taxpayer and that no other installment purchases were made, the amount to be treated as interest in 1955 is \$12.38, computed as follows:

YEAR 1955	
First day of	Unpaid balance out-standing
January .....	0
February .....	\$350
March .....	325
April .....	300
May .....	275
June .....	250
July .....	225
August .....	200
September .....	175
October .....	150
November .....	125
December .....	100
	2,475

Sum of unpaid balances  $\$2,475 \div 12 = \$206.25$ ; 6 percent thereof = \$12.38.

*Example (2).* On November 20, 1955, B purchased a furniture set for \$1,250, including a stated carrying charge of \$48. The down payment was \$50 and the balance was payable in 12 monthly installments of \$100 each, on the first day of each month commencing with December 1955. Assume that B is a cash method, calendar year taxpayer and that no other installment purchases were made. Assume further that B made the first payment when due, but made only one other payment on June 1, 1956. The amount to be treated as interest in 1955 is \$4, and the amount to be treated as interest in 1956 is \$33, computed as follows:

YEAR 1955	
First day of	Unpaid balance out-standing
December .....	\$1,200

Sum of unpaid balances  $\$1,200 \div 12 = \$100$ ; 6 percent thereof = \$6.

Carrying charges attributable to 1955 = \$4.

YEAR 1956	
First day of	Unpaid balance out-standing
January .....	\$1,100
February .....	1,000
March .....	900
April .....	800
May .....	700
June .....	600
July .....	500

**Internal Revenue Service, Treasury**

**§ 1.163-2**

**YEAR 1956—Continued**

First day of	Unpaid balance out-standing
August .....	400
September .....	300
October .....	200
November .....	100
	6,600

Sum of unpaid balances  $\$6,600 \div 12 = \$550$ ; 6 percent thereof =  $\$33$ .

Carrying charges attributable to 1956 =  $\$44$  ( $\$4 \times 11$ ).

*Example (3).* Assume the same facts as in example (2), except that the furniture was repossessed and B's obligation to pay terminated as of July 15, 1956. The amount to be treated as interest in 1955 is  $\$4$ , computed as in example (2) above. The amount to be treated as interest in 1956 is  $\$25.50$ , computed as follows:

**YEAR 1956**

First day of	Unpaid balance out-standing
January .....	$\$1,100$
February .....	1,000
March .....	900
April .....	800
May .....	700
June .....	600
July-November .....	0
	$5,100$

Sum of unpaid balances  $\$5,100 \div 12 = \$425$ . 6 percent thereof =  $\$25.50$ .

Carrying charges attributable to 1956 =  $\$44$  ( $\$4 \times 11$ ).

*Example (4).* (i) On September 15, 1968, C registered at X University for the 1968-69 academic year. C entered into an agreement with the X University for the purchase during such academic year of educational services (including lodging and tuition) for a total fee of  $\$1,000$ , including a separately stated carrying charge of  $\$50$ . Under the terms of the agreement, an initial payment of  $\$200$  was to be made by C on September 15, 1968, and the balance was to be paid in 8 monthly installments of  $\$100$  each, on the 15th day of each month commencing with October 1968. C made all of the required 1968 payments. Assuming that C is a cash method, calendar year taxpayer and that no other installment purchases of services or property were made, the amount to be treated as interest in 1968 is  $\$10.50$ , computed as follows:

**YEAR 1968**

First day of	Unpaid balance out-standing
January-September .....	0
October .....	$\$800$
November .....	700
December .....	600
Total .....	$2,100$

The sum of unpaid balances ( $\$2,100$ ) divided by 12 is  $\$175$ ; 6 percent thereof is  $\$10.50$ . The carrying charges attributable to 1968 are  $\$18.75$  (i.e., the total carrying charges ( $\$50$ ), divided by the total number of payments (8), multiplied by the number of payments made in 1968 (3)). Since the amount to be treated as interest in 1968 ( $\$10.50$ ) does not exceed the carrying charges attributable to 1968 ( $\$18.75$ ), the limitation set forth in paragraph (c) of this section is not applicable.

(ii) The result in this example would be the same even if the X University assigned the agreement to a bank or other financial institution and C made his payments directly to the bank or other financial institution.

*Example (5).* On September 15, 1968, D registered at Y University for the 1968-69 academic year. The tuition for such year was  $\$1,500$ . In order to pay his tuition, D borrowed  $\$1,500$  from the M Corporation, a lending institution, and remitted that sum to the Y University. The loan agreement between M Corporation and D provided that D was to repay the loan, plus a service charge, in 10 equal monthly installments, on the first day of each month commencing with October 1968. The service charge consisted of interest and the cost of credit life insurance on D's life. Since section 163(b) and this section do not apply to a contract for the loan of money, D is not entitled to compute his interest deduction with respect to his loan from M Corporation under such sections. D may deduct that portion of each installment payment which constitutes interest (as distinguished from payments of principal and the charge for credit life insurance) under section 163(a) and § 1.163-1, provided that the amount of such interest can be ascertained.

(e) *Effective date.* Except in the case of payments made under a contract for educational services, the rule provided in section 163(b) and this section applies to payments made during taxable years beginning after December 31, 1953, and ending after August 16, 1954, regardless of when the contract of sale was made. In the case of payments made under a contract for educational services, the rule provided in section

163(b) and this section applies to payments made during taxable years beginning after December 31, 1963, regardless of when the contract for educational services was made.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6991, 34 FR 742, Jan. 17, 1969]

**§ 1.163-3 Deduction for discount on bond issued on or before May 27, 1969.**

(a) *Discount upon issuance.* (1) If bonds are issued by a corporation at a discount, the net amount of such discount is deductible and should be prorated or amortized over the life of the bonds. For purposes of this section, the amortizable bond discount equals the excess of the amount payable at maturity (or, in the case of a callable bond, at the earlier call date) over the issue price of the bond (as defined in paragraph (b)(2) of § 1.1232-3).

(2) In the case of a bond issued by a corporation after December 31, 1954, as part of an investment unit consisting of an obligation and an option, the issue price of the bond is determined by allocating the amount received for the investment unit to the individual elements of the unit in the manner set forth in subdivision (ii)(a) of § 1.1232-3(b)(2). Discount with respect to bonds issued by a corporation as part of investment units consisting of obligations and options after December 31, 1954, and before Dec. 24, 1968—

(i) Increased by any amount treated as bond premium which has been included in gross income with respect to such bonds prior to Dec. 24, 1968, or

(ii) Decreased by any amount which has been deducted by the issuer as discount attributable to such bonds prior to Dec. 24, 1968, and

(iii) Decreased by any amount which has been deducted by the issuer prior to Dec. 24, 1968 upon the exercise or sale by investors of options issued in investment units with such bonds,

should be amortized, starting with the first taxable year ending on or after Dec. 24, 1968 over the remaining life of such bonds.

(b) *Examples.* The rules in paragraph (a) of this section are illustrated by the following examples:

*Example (1).* M Corporation, on January 1, 1960, the beginning of its taxable year issued for \$95,000, 3 percent bonds, maturing 10 years from the date of issue, with a stated redemption price at maturity of \$100,000. M Corporation should treat \$5,000 (\$100,000-\$95,000) as the total amount to be amortized over the life of the bonds.

*Example (2).* Assume the same facts as example (1), except that the bonds are convertible into common stock of M Corporation. Since the issue price of the bonds includes any amount attributable to the conversion privilege, the result is the same as in example (1).

*Example (3).* Assume the same facts as example (1), except that the bonds are issued as part of an investment unit consisting of an obligation and an option. Assume further that the issue price of the bonds as determined under the rules of allocation set forth in subdivision (ii)(a) of § 1.1232-3(b)(2) is \$94,000. Accordingly, M Corporation should treat \$6,000 (\$100,000-\$94,000) as the total amount to be amortized over the life of the bonds.

*Example (4).* Assume in example (3), that prior to Dec. 24, 1968, M Corporation had only treated \$5,000 as the bond discount to be amortized and deducted only \$4,000 of this amount. Starting with the first taxable year ending on or after Dec. 24, 1968, M Corporation should amortize \$2,000 (\$6,000 discount, less \$4,000 previously deducted) over the remaining life of the bonds.

*Example (5).* N Corporation, on January 1, 1956, for a consideration of \$102,000, issued 20-year bonds in the face amount of \$100,000, together with options to purchase stock of N Corporation. The issue price of the bonds as determined under the rules of allocation set forth in subdivision (ii)(a) of § 1.1232-3(b)(2) is \$99,000. Until Dec. 24, 1968, N Corporation has treated as bond premium, \$2,000, representing the excess of the consideration received for the bond-option investment units over the maturity value of the bonds, and has accordingly prorated and included in income \$1,200 of such amount. Starting with the first taxable year beginning on or after Dec. 24, 1968, N Corporation may amortize as a deduction over the remaining life of the bonds the amount of \$2,200 (\$1,000 discount, plus \$1,200 previously included in income).

*Example (6).* O Corporation, on January 1, 1956, for a consideration of \$100,000, issued 20-year bonds with a \$100,000 face value, together with options to purchase stock of O Corporation, which could be exercised at any time up to 5 years from the date of issue. The issue price of the bonds as determined under the rules of allocation set forth in subdivision (ii)(a) of § 1.1232-3(b)(2) is \$98,000. O Corporation, upon the exercise of the options prior to Dec. 24, 1968, had deducted from income their fair market value at the time of exercise, which is assumed for purposes of

this example to have been \$3,000. Even though the bonds are considered to have been issued at a discount under paragraph (a)(1) of this section, O Corporation would have no deduction over the remaining life of the bonds, inasmuch as O Corporation, in computing the amount of such deduction, is required under paragraph (a)(2)(iii) of this section to reduce the amount which would otherwise be treated as bond discount, \$2,000 (\$100,000-\$98,000), by the amount deducted from income upon the exercise of the options, in this case, \$3,000.

(c) *Deduction upon repurchase.* (1) Except as provided in subparagraphs (2) and (3) of this paragraph, if bonds are issued by a corporation and are subsequently repurchased by the corporation at a price in excess of the issue price plus any amount of discount deducted prior to repurchase, or (in the case of bonds issued subsequent to Feb. 28, 1913) minus any amount of premium returned as income prior to repurchase, the excess of the purchase price over the issue price adjusted for amortized premium or discount is a deductible expense for the taxable year.

(2) In the case of a convertible bond (except a bond which the corporation, before Sept. 5, 1968, has obligated itself to repurchase at a specified price), the deduction allowable under subparagraph (1) of this paragraph may not exceed an amount equal to 1 year's interest at the rate specified in the bond, except to the extent that the corporation can demonstrate to the satisfaction of the Commissioner or his delegate that an amount in excess of 1 year's interest does not include any amount attributable to the conversion feature.

(3) No deduction shall be allowed under subparagraph (1) of this paragraph to the extent a deduction is disallowed under subparagraph (2) of this paragraph or to the extent a deduction is disallowed by section 249 (relating to limitation on deduction of bond premium on repurchase of convertible obligation) and the regulations thereunder. See paragraph (f) of §1.249-1 for effective date limitation on section 249.

(d) *Definition.* For purposes of this section, a debenture, note, certificate or other evidence of indebtedness, issued by a corporation and bearing interest shall be given the same treatment as a bond.

(e) *Effective date.* The provisions of this section shall not apply in respect of a bond issued after May 27, 1969, unless issued pursuant to a written commitment which was binding on that date and at all times thereafter.

[T.D. 6984, 33 FR 19175, Dec. 24, 1968, as amended at 36 FR 24996, Dec. 28, 1971; T.D. 7259, 38 FR 4253, Feb. 12, 1973]

**§ 1.163-4 Deduction for original issue discount on certain obligations issued after May 27, 1969.**

(a) *In general.* (1) If an obligation is issued by a corporation with original issue discount, the amount of such discount is deductible as interest and shall be prorated or amortized over the life of the obligation. For purposes of this section the term "obligation" shall have the same meaning as in §1.1232-1 (without regard to whether the obligation is a capital asset in the hands of the holder) and the term "original issue discount" shall have the same meaning as in section 1232(b)(1) (without regard to the one-fourth of 1 percent limitation in the second sentence thereof). Thus, in general, the amount of original issue discount equals the excess of the amount payable at maturity over the issue price of the bond (as defined in paragraph (b)(2) of §1.1232-3), regardless of whether that amount is less than one-fourth of 1 percent of the redemption price at maturity multiplied by the number of complete years to maturity. For the rule as to whether there is original issue discount in the case of an obligation issued in an exchange for property other than money, and the amount thereof, see paragraph (b)(2)(iii) of §1.1232-3. In any case in which original issue discount is carried over from one corporation to another corporation under section 381(c)(9) or from an obligation exchanged to an obligation received in any exchange under paragraph (b)(1)(iv) of §1.1232-3, such discount shall be carried over for purposes of this section. The amount of original issue discount carried over in an exchange of obligations under the preceding sentence shall be prorated or amortized over the life of the obligation issued in such exchange. For computation of issue price and the amount of original issue discount in the case of

serial obligations, see paragraph (b)(2)(iv) of § 1.1232-3.

(2) In the case of an obligation issued by a corporation as part of an investment unit (as defined in paragraph (b)(2)(ii)(a) of § 1.1232-3) consisting of an obligation and other property, the issue price of the obligation is determined by allocating the amount received for the investment unit to the individual elements of the unit in the manner set forth in paragraph (b)(2)(ii) of § 1.1232-3.

(3) *Recovery or retention of amounts previously deducted.* In any taxable year in which an amount of original issue discount which was deducted as interest under this section is retained or recovered by the taxpayer, such as, for example, by reason of a fine, penalty, forfeiture, or other withdrawal fee, such amount shall be includible in the gross income of such taxpayer for such taxable year.

(b) *Examples.* The rules in paragraph (a) of this section are illustrated by the following examples:

*Example (1).* N Corporation, which uses the calendar year as its taxable year, on January 1, 1970, issued for \$99,000, 9 percent bonds maturing 10 years from the date of issue, with a stated redemption price at maturity of \$100,000. The original issue discount on each bond (as determined under section 1232(b)(1) without regard to the one-fourth-of-1-percent limitation in the second sentence thereof) is \$1,000, *i.e.*, redemption price, \$100,000, minus issue price, \$99,000. N shall treat \$1,000 as the total amount to be amortized over the life of the bonds.

*Example (2).* Assume the same facts as example (1), except that the bonds are convertible into common stock of N Corporation. Since the issue price of the bonds includes any amount attributable to the conversion privilege, the result is the same as in example (1).

*Example (3).* Assume the same facts as example (1), except that the bonds are issued as part of an investment unit consisting of an obligation and an option. Assume further that the issue price of the bonds as determined under the rules of allocation set forth in paragraph (b)(2)(ii) of § 1.1232-3 is \$94,000. The original issue discount on the bond (as determined under section 1232(b)(1) without regard to the one-fourth-of-1-percent limitation in the second sentence thereof) is \$6,000, *i.e.*, redemption price, \$100,000, minus issue price, \$94,000. N shall treat \$6,000 as the total amount to be amortized over the life of the bonds.

*Example (4).* On January 1, 1971, a commercial bank which uses the calendar year as its taxable year, issued a certificate of deposit for \$10,000. The certificate of deposit is not redeemable until December 31, 1975, except in an emergency as defined in, and subject to the qualifications provided by Regulations Q of the Board of Governors of the Federal Reserve. See 12 CFR § 217.4(d). The stated redemption price at maturity is \$13,382.26. The certificate is an obligation to which section 1232(a)(3)(A) applies (see paragraph (d) of § 1.1232-1), and the original issue discount with respect to the certificate (as determined under section 1232(b)(1) without regard to the one-fourth-of-1-percent limitation in the second sentence thereof) is \$3,382.26 (*i.e.*, redemption price, \$13,382.26, minus issued price, \$10,000). Y shall treat \$3,382.26 as the total amount to be amortized over the life of the certificate.

(c) *Deduction upon repurchase.* (1) Except as provided in subparagraph (2) of this paragraph, if bonds are issued by a corporation and are subsequently repurchased by the corporation at a price in excess of the issue price plus any amount of original issue discount deducted prior to repurchase, or minus any amount of premium returned as income prior to repurchase, the excess of the repurchase price over the issue price adjusted for amortized premium or deducted discount is deductible as interest for the taxable year.

(2) The provisions of subparagraph (1) of this paragraph shall not apply to the extent a deduction is disallowed by section 249 (relating to limitation on deduction of bond premium or repurchase of convertible obligation) and the regulations thereunder.

(d) *Effective date.* The provisions of this section shall apply in respect of obligations issued after May 27, 1969, other than—

(1) Obligations issued pursuant to a written commitment which was binding on May 27, 1969, and at all times thereafter, and

(2) Deposits made before January 1, 1971, in the case of certificates of deposit, time deposits, bonus plans, and other deposit arrangements with banks, domestic building and loan associations, and similar financial institutions.

[36 FR 24996, Dec. 28, 1971, as amended by T.D. 7213, 37 FR 21991, Oct. 18, 1972; T.D. 7259, 38 FR 4253, Feb. 12, 1973]

**§ 1.163-5 Denial of interest deduction on certain obligations issued after December 31, 1982, unless issued in registered form.**

(a)-(b) [Reserved]

(c) *Obligations issued to foreign persons after September 21, 1984*—(1) *In general.* A determination of whether an obligation satisfies each of the requirements of this paragraph shall be made on an obligation-by-obligation basis. An obligation issued directly (or through affiliated entities) in bearer form by, or guaranteed by, a United States Government-owned agency or a United States Government-sponsored enterprise, such as the Federal National Mortgage Association, the Federal Home Loan Banks, the Federal Loan Mortgage Corporation, the Farm Credit Administration, and the Student Loan Marketing Association, may not satisfy this paragraph (c). An obligation issued after September 21, 1984 is described in this paragraph if—

(i) There are arrangements reasonably designed to ensure that such obligation will be sold (or resold in connection with its original issuance) only to a person who is not a United States person or who is a United States person that is a financial institution (as defined in § 1.165-12(c)(1)(v)) purchasing for its own account or for the account of a customer and that agrees to comply with the requirements of section 165(j)(3) (A), (B), or (C) and the regulations thereunder, and

(ii) In the case of an obligation which is not in registered form—

(A) Interest on such obligation is payable only outside the United States and its possessions, and

(B) Unless the obligation is described in subparagraph (2)(i)(C) of this paragraph or is a temporary global security, the following statement in English either appears on the face of the obligation and on any interest coupons which may be detached therefrom or, if the obligation is evidenced by a book entry, appears in the book or record in which the book entry is made: “Any United States person who holds this obligation will be subject to limitations under the United States income tax laws, including the limitations provided in sections 165(j) and 1287(a) of the Internal Revenue Code.”

For purposes of this paragraph, the term “temporary global security” means a security which is held for the benefit of the purchasers of the obligations of the issuer and interests in which are exchangeable for securities in definitive registered or bearer form prior to its stated maturity.

(2) *Rules for the application of this paragraph*—(i) *Arrangements reasonably designed to ensure sale to non-United States persons.* An obligation will be considered to satisfy paragraph (c)(1)(i) of this section if the conditions of paragraph (c)(2)(i) (A), (B), (C), or (D) of this section are met in connection with the original issuance of the obligation. An exchange of one obligation for another is considered an original issuance if and only if the exchange constitutes a disposition of property for purposes of section 1001 of the Code. However, an exchange of one obligation for another will not be considered a new issuance if the obligation received is identical in all respects to the obligation surrendered in exchange therefor, except that the obligor of the obligation received need not be the same obligor as the obligor of the obligation surrendered. Obligations that meet the conditions of paragraph (c)(2)(i) (A), (B), (C) or (D) of this section may be issued in a single public offering. The preceding sentence does not apply to certificates of deposit issued under the conditions of paragraph (c)(2)(i)(C) of this section by a United States person or by a controlled foreign corporation within the meaning of section 957(a) that is engaged in the active conduct of a banking business within the meaning of section 954(c)(3)(B) as in effect prior to the Tax Reform Act of 1986, and the regulations thereunder. A temporary global security need not satisfy the conditions of paragraph (c)(2)(i) (A), (B) or (C) of this section, but must satisfy the applicable requirements of paragraph (c)(2)(i)(D) of this section.

(A) In connection with the original issuance of an obligation, the obligation is offered for sale or resale only outside of the United States and its possessions, is delivered only outside the United States and its possessions and is not registered under the Securities Act of 1933 because it is intended for distribution to persons who are not

United States persons. An obligation will not be considered to be required to be registered under the Securities Act of 1933 if the issuer, in reliance on the written opinion of counsel received prior to the issuance thereof, determines in good faith that the obligation need not be registered under the Securities Act of 1933 for the reason that it is intended for distribution to persons who are not United States persons. Solely for purposes of this subdivision (i)(A), the term "United States person" has the same meaning as it has for purposes of determining whether an obligation is intended for distribution to persons under the Securities Act of 1933. Except as provided in paragraph (c)(3) of this section, this paragraph (c)(2)(i)(A) applies only to obligations issued on or before September 7, 1990.

(B) The obligation is registered under the Securities Act of 1933, is exempt from registration by reason of section 3 or section 4 of such Act, or does not qualify as a security under the Securities Act of 1933; all of the conditions set forth in paragraph (c)(2)(i)(B) (1), (2), (3), (4), and (5) of this section are met with respect to such obligations; and, except as provided in paragraph (c)(3) of this section, the obligation is issued on or before September 7, 1990.

(1) In connection with the original issuance of an obligation in bearer form, the obligation is offered for sale or resale only outside the United States and its possessions.

(2) The issuer does not, and each underwriter and each member of the selling group, if any, covenants that it will not, in connection with the original issuance of the obligation, offer to sell or resell the obligation in bearer form to any person inside the United States or to a United States person unless such United States person is a financial institution as defined in § 1.165-12(c)(v) purchasing for its own account or for the account of a customer, which financial institution, as a condition of the purchase, agrees to provide on delivery of the obligation (or on issuance, if the obligation is not in definitive form) the certificate required under paragraph (c)(2)(i)(B)(4).

(3) In connection with its sale or resale during the original issuance of the obligation in bearer form, each under-

writer and each member of the selling group, if any, or the issuer, if there is no underwriter or selling group, sends a confirmation to the purchaser of the bearer obligation stating that the purchaser represents that it is not a United States person or, if it is a United States person, it is a financial institution as defined in § 1.165-12(c)(v) purchasing for its own account or for the account of a customer and that the financial institution will comply with the requirements of section 165(j)(3) (A), (B), or (C) and the regulations thereunder. The confirmation must also state that, if the purchaser is a dealer, it will send similar confirmations to whomever purchases from it.

(4) In connection with the original issuance of the obligation in bearer form it is delivered in definitive form (or issued, if the obligation is not in definitive form) to the person entitled to physical delivery thereof only outside the United States and its possessions and only upon presentation of a certificate signed by such person to the issuer, underwriter, or member of the selling group, which certificate states that the obligation is not being acquired by or on behalf of a United States person, or for offer to resell or for resale to a United States person or any person inside the United States, or, if a beneficial interest in the obligation is being acquired by a United States person, that such person is a financial institution as defined in § 1.165.12(c)(1)(v) or is acquiring through a financial institution and that the obligation is held by a financial institution that has agreed to comply with the requirements of section 165(j)(3) (A), (B), or (C) and the regulations thereunder and that is not purchasing for offer to resell or for resale inside the United States. When a certificate is provided by a clearing organization, it must be based on statements provided to it by its member organizations. A clearing organization is an entity which is in the business of holding obligations for member organizations and transferring obligations among such members by credit or debit to the account of a member without the necessity of physical delivery of the obligation. For purposes of paragraph (c)(2)(i)(B), the term "delivery" does

not include the delivery of an obligation to an underwriter or member of the selling group, if any.

(5) The issuer, underwriter, or member of the selling group does not have actual knowledge that the certificate described in paragraph (c)(2)(i)(B)(4) of this section is false. The issuer, underwriter, or member of the selling group shall be deemed to have actual knowledge that the certificate described in paragraph (c)(2)(i)(B)(4) of this section is false if the issuer, underwriter, or member of the selling group has a United States address for the beneficial owner (other than a financial institution as defined in § 1.165-12(c)(v) that represents that it will comply with the requirements of section 165(j)(3) (A), (B), or (C) and the regulations thereunder) and does not have documentary evidence as described in § 1.6049-5(c)(1) that the beneficial owner is not a United States person.

(C) The obligation is issued only outside the United States and its possessions by an issuer that does not significantly engage in interstate commerce with respect to the issuance of such obligation either directly or through its agent, an underwriter, or a member of the selling group. In the case of an issuer that is a United States person, such issuer may only satisfy the test set forth in this paragraph (c)(2)(i)(C) if—

(1) It is engaged through a branch in the active conduct of a banking business, within the meaning of section 954(c)(3)(B) as in effect before the Tax Reform Act of 1986, and the regulations thereunder, outside the United States;

(2) The obligation is issued outside of the United States by the branch in connection with that trade or business;

(3) The obligation that is so issued is sold directly to the public and is not issued as a part of a larger issuance made by means of a public offering; and

(4) The issuer either maintains documentary evidence as described in subdivision (iii) of A-5 of § 35a.9999-4T that the purchaser is not a United States person (provided that the issuer has no actual knowledge that the documentary evidence is false) or on delivery of the obligation the issuer receives a statement signed by the person entitled to physical delivery thereof and

stating either that the obligation is not being acquired by or on behalf of a United States person or that, if a beneficial interest in the obligation is being acquired by a United States person, such person is a financial institution as defined in § 1.165-12(c)(v) or is acquiring through a financial institution and the obligation is held by a financial institution that has agreed to comply with the requirements of 165(j)(3) (A), (B) or (C) and the regulations thereunder and that it is not purchasing for offer to resell or for resale inside the United States (provided that the issuer has no actual knowledge that the statement is false).

In addition, an issuer that is a controlled foreign corporation within the meaning of section 957 (a) that is engaged in the active conduct of a banking business outside the United States within the meaning of section 954(c)(3)(B) as in effect before the Tax Reform Act of 1986, and the regulations thereunder, can only satisfy the provisions of this paragraph (c)(2)(i)(C), if it meets the requirements of this paragraph (c)(2)(i)(C)(2), (3) and (4).

(D) The obligation is issued after September 7, 1990, and all of the conditions set forth in this paragraph (c)(2)(i)(D) are met with respect to such obligation.

(1) *Offers and sales—(i) Issuer.* The issuer does not offer or sell the obligation during the restricted period to a person who is within the United States or its possessions or to a United States person.

(ii) *Distributors.* (A) The distributor of the obligation does not offer or sell the obligation during the restricted period to a person who is within the United States or its possessions or to a United States person.

(B) The distributor of the obligation will be deemed to satisfy the requirements of paragraph (c)(2)(i)(D)(1)(ii)(A) of this section if the distributor of the obligation covenants that it will not offer or sell the obligation during the restricted period to a person who is within the United States or its possessions or to a United States person; and the distributor of the obligation has in effect, in connection with the offer and sale of the obligation during the restricted period, procedures reasonably

designed to ensure that its employees or agents who are directly engaged in selling the obligation are aware that the obligation cannot be offered or sold during the restricted period to a person who is within the United States or its possessions or is a United States person.

(iii) *Certain rules.* For purposes of paragraph (c)(2)(i)(D)(1) (i) and (ii) of this section:

(A) An offer or sale will be considered to be made to a person who is within the United States or its possessions if the offeror or seller of the obligation has an address within the United States or its possessions for the offeree or buyer of the obligation with respect to the offer or sale.

(B) An offer or sale of an obligation will not be treated as made to a person within the United States or its possessions or to a United States person if the person to whom the offer or sale is made is: An exempt distributor, as defined in paragraph (c)(2)(i)(D)(5) of this section; An international organization as defined in section 7701(a)(18) and the regulations thereunder, or a foreign central bank as defined in section 895 and the regulations thereunder; or The foreign branch of a United States financial institution as described in paragraph (c)(2)(i)(D)(6)(i) of this section.

Paragraph (c)(2)(i)(D)(1)(iii)(B) regarding an exempt distributor will only apply to an offer to the United States office of an exempt distributor, and paragraph (c)(2)(i)(D)(1)(iii)(B) regarding an international organization or foreign central bank will only apply to an offer to an international organization or foreign central bank, if such offer is made directly and specifically to the United States office, organization or bank.

(C) A sale of an obligation will not be treated as made to a person within the United States or its possessions or to a United States person if the person to whom the sale is made is a person described in paragraph (c)(2)(i)(D)(6)(ii) of this section.

(2) *Delivery.* In connection with the sale of the obligation during the restricted period, neither the issuer nor any distributor delivers the obligation

in definitive form within the United States or its possessions.

(3) *Certification—(i) In general.* On the earlier of the date of the first actual payment of interest by the issuer on the obligation or the date of delivery by the issuer of the obligation in definitive form, a certificate is provided to the issuer of the obligation stating that on such date:

(A) The obligation is owned by a person that is not a United States person:

(B) The obligation is owned by a United States person described in paragraph (c)(2)(i)(D)(6) of this section; or

(C) The obligation is owned by a financial institution for purposes of resale during the restricted period, and such financial institution certifies in addition that it has not acquired the obligation for purposes of resale directly or indirectly to a United States person or to a person within the United States or its possessions.

A certificate described in paragraph (c)(2)(i)(D)(3)(i) (A) or (B) of this section may not be given with respect to an obligation that is owned by a financial institution for purposes of resale during the restricted period. For purposes of paragraph (c)(2)(i)(D) (2) and (3) of this section, a temporary global security (as defined in § 1.163-5 (c)(1)(ii)(B)) is not considered to be an obligation in definitive form. If the issuer does not make the obligation available for delivery in definitive form within a reasonable period of time after the end of the restricted period, then the obligation shall be treated as not satisfying the requirements of this paragraph (c)(2)(i)(D)(3). The certificate must be signed (or sent, as provided in paragraph (c)(2)(i)(D)(3)(ii) of this section) either by the owner of the obligation or by a financial institution or clearing organization through which the owner holds the obligation, directly or indirectly. For purposes of this paragraph (c)(2)(i)(D)(3), the term “financial institution” means a financial institution described in § 1.165-12(c)(i)(v). When a certificate is provided by a clearing organization, the certificate must be based on statements provided to it by its member organizations. The requirement of this paragraph (c)(1)(D)(3) shall be deemed not to be satisfied with respect to an obligation if the issuer

knows or has reason to know that the certificate with respect to such obligation is false. The certificate must be retained by the issuer (and statements by member organizations must be retained by the clearing organization, in the case of certificates based on such statements) for a period of four calendar years following the year in which the certificate is received.

(ii) *Electronic certification.* The certificate required by paragraph (c)(2)(i)(D)(3)(i) of this section (including a statement provided to a clearing organization by a member organization) may be provided electronically, but only if the person receiving such electronic certificate maintains adequate records, for the retention period described in paragraph (c)(2)(i)(D)(3)(i) of this section, establishing that such certificate was received in respect of the subject obligation, and only if there is a written agreement entered into prior to the time of certification (including the written membership rules of a clearing organization) to which the sender and recipient are subject, providing that the electronic certificate shall have the effect of a signed certificate described in paragraph (c)(2)(i)(D)(3)(i) of this section.

(iii) *Exception for certain obligations.* This paragraph (c)(2)(i)(D)(3) shall not apply, and no certificate shall be required, in the case of an obligation that is sold during the restricted period and that satisfies all of the following requirements:

(A) The interest and principal with respect to the obligation are denominated only in the currency of a single foreign country.

(B) The interest and principal with respect to the obligation are payable only within that foreign country (according to rules similar to those set forth in § 1.163-5(c)(2)(v)).

(C) The obligation is offered and sold in accordance with practices and documentation customary in that foreign country.

(D) The distributor covenants to use reasonable efforts to sell the obligation within that foreign country.

(E) The obligation is not listed, or the subject of an application for listing, on an exchange located outside that foreign country.

(F) The Commissioner has designated that foreign country as a foreign country in which certification under paragraph (c)(2)(i)(D)(3)(i) of this section is not permissible.

(G) The issuance of the obligation is subject to guidelines or restrictions imposed by governmental, banking or securities authorities in that foreign country.

(H) More than 80 percent by value of the obligations included in the offering of which the obligation is a part are offered and sold to non-distributors by distributors maintaining an office located in that foreign country. Foreign currency denominated obligations that are convertible into U.S. dollar denominated obligations or that by their terms are linked to the U.S. dollar in a way which effectively converts the obligations to U.S. dollar denominated obligations do not satisfy the requirements of this paragraph (c)(2)(i)(D)(3)(iii). A foreign currency denominated obligation will not be treated as linked, by its terms, to the U.S. dollar solely because the obligation is the subject of a swap transaction.

(4) *Distributor.* For purposes of this paragraph (c)(2)(i)(D), the term “distributor” means:

(i) A person that offers or sells the obligation during the restricted period pursuant to a written contract with the issuer;

(ii) Any person that offers or sells the obligation during the restricted period pursuant to a written contract with a person described in paragraph (c)(2)(i)(D) (4) (i); and

(iii) Any affiliate that acquires the obligation from another member of its affiliated group for the purpose of offering or selling the obligation during the restricted period, but only if the transferor member of the group is the issuer or a person described in paragraph (c)(2)(i)(D) (4)(i) or (ii) of this section. The terms “affiliate” and “affiliated group” have the same meanings as in section 1504(a) of the Code, but without regard to the exceptions contained in section 1504(b) and substituting “50 percent” for “80 percent” each time it appears.

For purposes of this paragraph (c)(2)(i)(D)(4), a written contract does

not include a confirmation or other notice of the transaction.

(5) *Exempt distributor.* For purposes of this paragraph (c)(2)(i)(D), the term “exempt distributor” means a distributor that covenants in its contract with the issuer or with a distributor described in paragraph (c)(2)(i)(D)(4)(i) that it is buying the obligation for the purpose of resale in connection with the original issuance of the obligation, and that if it retains the obligation for its own account, it will only do so in accordance with the requirements of paragraph (c)(2)(i)(D)(6) of this section. In the latter case, the covenant will constitute the certificate required under paragraph (c)(2)(i)(D)(6). The provisions of paragraph (c)(2)(i)(D)(7) governing the restricted period for unsold allotments or subscriptions shall apply to any obligation retained for investment by an exempt distributor.

(6) *Certain United States persons.* A person is described in this paragraph (c)(2)(i)(D)(6) if the requirements of this paragraph are satisfied and the person is:

(i) The foreign branch of a United States financial institution purchasing for its own account or for resale, or

(ii) A United States person who acquired the obligation through the foreign branch of a United States financial institution and who, for purposes of the certification required in paragraph (c)(2)(i)(D)(3) of this section, holds the obligation through such financial institution on the date of certification.

For purposes of paragraph (c)(2)(i)(D)(6)(ii) of this section, a United States person will be considered to acquire and hold an obligation through the foreign branch of a United States financial institution if the United States person has an account with the United States office of a financial institution, and the transaction is executed by a foreign office of that financial institution, or by the foreign office of another financial institution acting on behalf of that financial institution. This paragraph (c)(2)(i)(D)(6) will apply, however, only if the United States financial institution (or the United States office of a foreign financial institution) holding

the obligation provides a certificate to the issuer or distributor selling the obligation within a reasonable time stating that it agrees to comply with the requirements of section 165(j)(3)(A), (B), or (C) and the regulations thereunder. For purposes of this paragraph (c)(2)(i)(D)(6), the term “financial institution” means a financial institution as defined in § 1.165-12(c)(1)(v). As an alternative to the certification required above, a financial institution may provide a blanket certificate to the issuer or distributor selling the obligation stating that the financial institution will comply with the requirements of section 165(j)(3)(A), (B) or (C) and the regulations thereunder. A blanket certificate must be received by the issuer or the distributor in the year of the issuance of the obligation or in either of the preceding two calendar years, and must be retained by the issuer or distributor for at least four years after the end of the last calendar year to which it relates.

(7) *Restricted period.* For purposes of this paragraph (c)(2)(i)(D), the restricted period with respect to an obligation begins on the earlier of the closing date (or the date on which the issuer receives the loan proceeds, if there is no closing with respect to the obligation), or the first date on which the obligation is offered to persons other than a distributor. The restricted period with respect to an obligation ends on the expiration of the forty day period beginning on the closing date (or the date on which the issuer receives the loan proceeds, if there is no closing with respect to the obligation). Notwithstanding the preceding sentence, any offer or sale of the obligation by the issuer or a distributor shall be deemed to be during the restricted period if the issuer or distributor holds the obligation as part of an unsold allotment or subscription.

(8) *Clearing organization.* For purposes of this paragraph (c)(2)(i)(D), a “clearing organization” is an entity which is in the business of holding obligations for member organizations and transferring obligations among such members by credit or debit to the account of a member without the necessity of physical delivery of the obligation.

(ii) *Special rules.* An obligation shall not be considered to be described in paragraph (c)(2)(i)(C) of this section if it is—

(A) Guaranteed by a United States shareholder of the issuer;

(B) Convertible into a debt or equity interest in a United States shareholder of the issuer; or

(C) Substantially identical to an obligation issued by a United States shareholder of the issuer.

For purposes of this paragraph (c)(2)(ii), the term “United States shareholder” is defined as it is defined in section 951 (b) and the regulations thereunder. For purposes of this paragraph (c)(2)(ii)(C), obligations are substantially identical if the face amount, interest rate, term of the issue, due dates for payments, and maturity date of each is substantially identical to the other.

(iii) *Interstate commerce.* For purposes of this paragraph, the term “interstate commerce” means trade or commerce in obligations or any transportation or communication relating thereto between any foreign country and the United States or its possessions.

(A) An issuer will not be considered to engage significantly in interstate commerce with respect to the issuance of an obligation if the only activities with respect to which the issuer uses the means or instrumentalities of interstate commerce are activities of a preparatory or auxiliary character that do not involve communication between a prospective purchaser and an issuer, its agent, an underwriter, or member of the selling group if either is inside the United States or its possessions. Activities of a preparatory or auxiliary character include, but are not limited to, the following activities:

(1) Establishment or participation in establishment of policies concerning the issuance of obligations and the allocation of funding by a United States shareholder with respect to obligations issued by a foreign corporation or by a United States office with respect to obligations issued by a foreign branch;

(2) Negotiation between the issuer and underwriters as to the terms and pricing of an issue;

(3) Transfer of funds to an office of an issuer in the United States or its pos-

sessions by a foreign branch or to a United States shareholder by a foreign corporation;

(4) Consultation by an issuer with accountants and lawyers or other financial advisors in the United States or its possessions regarding the issuance of an obligation;

(5) Document drafting and printing; and

(6) Provision of payment or delivery instructions to members of the selling group by an issuer’s office or agent that is located in the United States or its possessions.

(B) Activities that will not be considered to be of a preparatory or auxiliary character include, but are not limited to, any of the following activities:

(1) Negotiation or communication between a prospective purchaser and an issuer, its agent, an underwriter, or a member of the selling group concerning the sale of an obligation if either is inside the United States or its possessions;

(2) Involvement of an issuer’s office, its agent, an underwriter, or a member of the selling group in the United States or its possessions in the offer or sale of a particular obligation, either directly with the prospective purchaser, or through the issuer in a foreign country;

(3) Delivery of an obligation in the United States or its possessions; or

(4) Advertising or otherwise promoting an obligation in the United States or its possessions.

(C) The following examples illustrate the application of this subdivision (iii) of § 1.163-5(c)(2).

*Example (1).* Foreign corporation A, a corporation organized in and doing business in foreign country Z, and not a controlled foreign corporation within the meaning of section 957(a) that is engaged in the conduct of a banking business within the meaning of section 954(c)(3)(B) as in effect before the Tax Reform Act of 1986, issues its debentures outside the United States. The debentures are not guaranteed by a United States shareholder of A, nor are they convertible into a debt or equity interest of a United States shareholder of A, nor are they substantially identical to an obligation issued by a United States shareholder of A. A consults its accountants and lawyers in the United States for certain securities and tax advice regarding the debt offering. The underwriting and selling group in respect to A’s offering is

composed entirely of foreign securities firms, some of which are foreign subsidiaries of United States securities firms. A U.S. affiliate of the foreign underwriter communicates payment and delivery instructions to the selling group. All offering circulars for the offering are mailed and delivered outside the United States and its possessions. All debentures are delivered and paid for outside the United States and its possessions. No office located in the United States or in a United States possession is involved in the sale of debentures. Interest on the debentures is payable only outside the United States and its possessions. A is not significantly engaged in interstate commerce with respect to the offering.

*Example (2).* B, a United States bank, does business in foreign country X through a branch located in X. The branch is a staffed and operating unit engaged in the active conduct of a banking business consisting of one or more of the activities set forth in § 1.954-2(d)(2)(ii). As part of its ongoing business, the branch in X issues negotiable certificates of deposit with a maturity in excess of one year to customers upon request. The certificates of deposit are not guaranteed by a United States shareholder of B, nor are they convertible into a debt or equity interest of a United States shareholder of B, nor are they substantially identical to an obligation issued by a United States shareholder of B. Policies regarding the issuance of negotiable certificates of deposit and funding allocations for foreign branches are set in the United States at B's main office. Branch personnel decide whether to issue a negotiable certificate of deposit based on the guidelines established by the United States offices of B, but without communicating with the United States offices of B with respect to the issuance of a particular obligation. Negotiable certificates of deposits are delivered and paid for outside the United States and its possessions. Interest on the negotiable certificates of deposit is payable only outside the United States and its possessions. B maintains documentary evidence described in § 1.163-5(c)(2)(i)(C)(4). After the issuance of negotiable certificates of deposit by the foreign branch of B, the foreign branch sends the funds to a United States branch of B for use in domestic operations. B is not significantly engaged in interstate commerce with respect to the issuance of such obligation.

*Example (3).* The facts in Example (2) apply except that the foreign branch of B consulted, by telephone, the main office in the United States to request approval of the issuance of the certificate of deposit at a particular rate of interest. The main office granted permission to issue the negotiable certificate of deposit to the customer by a telex sent from the main office of B to the branch in X. B is significantly engaged in interstate commerce with respect to the

issuance of the obligation as a result of involvement of B's United States office in the issuance of the obligation.

*Example (4).* The facts in Example (2) apply with the additional fact that a customer contacted the foreign branch of B through a telex originating in the United States or its possessions. Subsequent to the telex, the foreign branch issued the negotiable certificate of deposit and recorded it on the books. B is significantly engaged in interstate commerce with respect to the issuance of the obligation as a result of its communication by telex with a customer in the United States.

(iv) *Possessions.* For purposes of this section, the term "possessions" includes Puerto Rico, the U.S. Virgin Islands, Guam, American Samoa, Wake Island, and Northern Mariana Islands.

(v) *Interest payable outside of the United States.* Interest will be considered payable only outside the United States and its possessions if payment of such interest can be made only upon presentation of a coupon, or upon making of any other demand for payment, outside of the United States and its possessions to the issuer or a paying agent. The fact that payment is made by a draft drawn on a United States bank account or by a wire or other electronic transfer from a United States account does not affect this result. Interest payments will be considered to be made within the United States if the payments are made by a transfer of funds into an account maintained by the payee in the United States or mailed to an address in the United States, if—

(A) The interest is paid on an obligation issued by either a United States person, a controlled foreign corporation as defined in section 957 (a), or a foreign corporation if 50 percent or more of the gross income of the foreign corporation from all sources of the 3-year period ending with the close of its taxable year preceding the original issuance of the obligation (or for such part of the period that the foreign corporation has been in existence) was effectively connected with the conduct of a trade or business within the United States; and

(B) The interest is paid to a person other than—

(I) A person who may satisfy the requirements of section 165 (j)(3) (A), (B),

or (C) and the regulations thereunder; and

(2) A financial institution as a step in the clearance of funds and such interest is promptly credited to an account maintained outside the United States for such financial institution or for persons for which the financial institution has collected such interest.

Interest is considered to be paid within the United States and its possessions if a coupon is presented, or a demand for payment is otherwise made, to the issuer or a paying agent (whether a United States or foreign person) in the United States and its possessions even if the funds paid are credited to an account maintained by the payee outside the United States and its possessions. Interest will be considered payable only outside the United States and its possessions notwithstanding that such interest may become payable at the office of the issuer or its United States paying agent under the following conditions: the issuer has appointed paying agents located outside the United States and its possessions with the reasonable expectation that such paying agents will be able to pay the interest in United States dollars, and the full amount of such payment at the offices of all such paying agents is illegal or effectively precluded because of the imposition of exchange controls or other similar restrictions on the full payment or receipt of interest in United States dollars. A lawsuit brought in the United States or its possessions for payment of the obligation or interest thereon as a result of a default shall not be considered to be a demand for payment. For purposes of this subdivision (v), interest includes original issue discount as defined in section 1273(a). Therefore, an amount equal to the original issue discount as defined in section 1273(a) is payable only outside the United States and its possessions. The amount of market discount as defined in section 1278(a) does not affect the amount of interest to be considered payable only outside the United States and its possessions.

(vi) *Rules relating to obligations issued after December 31, 1982 and on or before September 21, 1984.* Whether an obligation originally issued after December 31, 1982 and on or before September 21,

1984, or an obligation originally issued after September 21, 1984 pursuant to the exercise of a warrant or the conversion of a convertible obligation, which warrant or obligation (including conversion privilege) was issued after December 31, 1982 and on or before September 21, 1984, is described in section 163(f)(2)(B) shall be determined under the rules provided in §5f.163-1(c) as in effect prior to its removal. Notwithstanding the preceding sentence, an issuer will be considered to satisfy the requirements of section 163(f)(2)(B) with respect to an obligation issued after December 31, 1982 and on or before September 21, 1984 or after September 21, 1984 pursuant to the exercise of a warrant or the conversion of a convertible obligation, which warrant or obligation (including conversion privilege) was issued after December 31, 1982 and on or before September 21, 1984, if the issuer substantially complied with the proposed regulations provided in §1.163-5(c), which were published in the FEDERAL REGISTER on September 2, 1983 (48 FR 39953) and superseded by temporary regulations published in the FEDERAL REGISTER on August 22, 1984 (49 FR 33228).

(3) *Effective date*—(i) *In general.* These regulations apply generally to obligations issued after January 20, 1987. A taxpayer may choose to apply the rules of §1.163-5(c) with respect to an obligation issued after December 31, 1982 and on or before January 20, 1987. If this choice is made, the rules of §1.163-5(c) will apply in lieu of §1.163-5T(c) except that the legend requirement under §1.163-5(c)(1)(ii)(B) does not apply with respect to a bearer obligation evidenced exclusively by a book entry and that the certification requirement under §1.163-5T(c)(2)(B)(4) applies in lieu of the certification under §1.163-5(c)(2)(i)(B)(4).

(ii) *Special rules.* If an obligation is originally issued after September 7, 1990 pursuant to the exercise of a warrant or the conversion of a convertible obligation, which warrant or obligation (including conversion privilege) was issued on or before May 10, 1990, then the issuer may choose to apply either the rules of §1.163-5(c)(2)(i)(A) or §1.163-5(c)(2)(i)(B), or the rules of §1.163-5(c)(2)(i)(D). The issuer of an obligation

may choose to apply either the rules of § 1.163-5(c)(2)(i) (A) or (B), or the rules of § 1.163-5(c)(2)(i)(D), to an obligation that is originally issued after May 10, 1990, and on or before September 7, 1990. However, any issuer choosing to apply the rules of § 1.163-5(c)(2)(i)(A) must apply the definition of United States person used for such purposes on December 31, 1989, and must obtain any certificates that would have been required under applicable law on December 31, 1989.

[T.D. 8110, 51 FR 45456, Dec. 19, 1986, as amended by T.D. 8203, 53 FR 17926, May 19, 1988; T.D. 8300, 55 FR 19624, May 10, 1990; T.D. 8734, 62 FR 53416, Oct. 14, 1997]

**§ 1.163-5T Denial of interest deduction on certain obligations issued after December 31, 1982, unless issued in registered form (temporary).**

(a)—(c) [Reserved]

(d) *Pass-through certificates.* (1) A pass-through or participation certificate evidencing an interest in a pool of mortgage loans which under subpart E of subchapter J of the Code is treated as a trust of which the grantor is the owner (or similar evidence of interest in a similar pooled fund or pooled trust treated as a grantor trust) (“pass-through certificate”) is considered to be a “registration-required obligation” under section 163(f)(2)(A) and § 1.163-5(c) if the pass-through certificate is described in section 163(f)(2)(A) and § 1.163-5(c) without regard to whether any obligation held by the fund or trust to which the pass-through certificate relates is described in section 163(f)(2)(A) and § 1.163-5(c). A pass-through certificate is considered to be described in section 163(f)(2)(B) and § 1.163-5(c) if the pass-through certificate is described in section 163(f)(2)(B) and § 1.163-5(c) without regard to whether any obligation held by the fund or trust to which the pass-through certificate relates is described in section 163(f)(2)(B) and § 1.163-5(c).

(2) An obligation held by a fund or trust in which ownership interests are represented by pass-through certificates is considered to be in registered form under section 149(a) and the regulations thereunder or to be described in section 163(f)(2) (A) or (B), if the obligation held by the fund or trust is in reg-

istered form under section 149(a) and the regulations thereunder or is described in section 163(f)(2) (A) or (B), respectively, without regard to whether the pass-through certificates are so considered.

(3) For purposes of section 4701, a pass-through certificate is considered to be issued solely by the recipient of the proceeds from the issuance of the pass-through certificate (hereinafter the “sponsor”). The sponsor is therefore liable for any excise tax under section 4701 that may be imposed with reference to the principal amount of the pass-through certificate.

(4) In order to implement the purpose of section 163, § 1.163-5(c) and this section, the Commissioner may characterize a certificate or other evidence of interest in a fund or trust which under subpart E of subchapter J of the Code is treated as a trust of which the grantor is the owner and any obligation held by such fund or trust in accordance with the substance of the arrangement they represent and may impose the penalties provided under sections 163(f)(1) and 4701 in the appropriate amounts and on the appropriate persons. This provision may be applied, for example, where a corporation issues obligations purportedly in registered form, contributes them to a grantor trust as its only assets, and arranges for the sale to investors of bearer certificates of interest in the trust which do not meet the requirements of section 163(f)(2)(B). If this provision is applied, the obligations held by the fund or trust will not be considered to be issued in registered form or to meet the requirements of section 163(f)(2)(B). The corporation will not be allowed a deduction for the payment of interest on the obligations held by the trust, and the excise tax under section 4701, calculated with reference to the principal amount of the obligations held by the trust will be imposed on the corporation may be collected from the corporation and its agents. This paragraph (d)(4) will not be applied so as to alter the tax consequences of transactions as to which rulings have been issued by the Internal Revenue Service prior to September 19, 1985.

(5) The rules set forth in this paragraph (d) apply solely for purposes of

sections 4701, 163(f)(2)(A), 163(f)(2)(B), §1.163-5(c), and any other section that refers to this section for the definition of the term “registration-required obligation” (such as the regulations under sections 871(h) and 881(c)). The treatment of obligations described in this paragraph (d) for purposes of section 163(f)(2) (A) and (B) does not affect the determination of whether bearer obligations that are issued or guaranteed by the United States Government, a United States Government-owned agency, a United States Government sponsored enterprise (within the meaning of §1.163-5(c)(1)) or that are backed (as described in the Treasury Department News Release R-2835 of September 10, 1984 and Treasury Department News Release R-2847 of September 14, 1984) by obligations issued by the United States Government, a United States Government-owned agency, or a United States Government sponsored enterprise comply with the requirements of section 163(f)(2)(B) and the regulations thereunder.

(6) The provisions of paragraphs (d) (1) through (5) may be illustrated by the following example:

Commercial Bank K forms a pool of 1000 residential mortgage loans, each made to a different individual homeowner, by assigning them to Commercial Bank L, an unrelated entity serving as trustee of the pool. Commercial Bank L immediately sells in a public offering certificates of interest in the trust of a maturity of 10 years in registered form. Commercial Bank L transfers the cash proceeds of the offering to Commercial Bank K. The certificates of interest in the trust are of a type offered to the public and are not described in section 163(f)(2)(B). Pursuant to paragraph (d)(1), the certificates of interest in the pool are registration-required obligations without regard to the fact that the obligations held by the trust are not registration-required obligations.

(e) *Regular interests in REMICS.* (1) A regular interest in a REMIC, as defined in sections 860D and 860G and the regulations thereunder, is considered to be a “registration-required obligation” under section 163(f)(2)(A) and §1.163-5(c) if the regular interest is described in section 163(f)(2)(A) and §1.163-5(c), without regard to whether any obligation held by the REMIC to which the regular interest relates is described in section 163(f)(2)(A) and §1.163-5(c). A

regular interest in a REMIC is considered to be described in section 163(f)(2)(B) and §1.163-5(c), if the regular interest is described in section 163(f)(2)(B) and §1.163(c), without regard to whether any obligation held by the REMIC to which the regular interest relates is described in section 163(f)(2)(B) and §1.163-5(c).

(2) An obligation held by a REMIC is considered to be described in section 163(f)(2) (A) or (B) if such obligation is described in section 163(f)(2) (A) or (B), respectively, without regard to whether the regular interests in the REMIC are so considered.

(3) For purposes of section 4701, a regular interest is considered to be issued solely by the recipient of the proceeds from the issuance of the regular interest (hereinafter the “sponsor”). The sponsor is therefore liable for any excise tax under section 4701 that may be imposed with reference to the principal amount of the regular interest.

(4) In order to implement the purpose of section 163, §1.163-5(c), and this section, the Commissioner may characterize a regular interest in a REMIC and any obligation held by such REMIC in accordance with the substance of the arrangement they represent and may impose the penalties provided under sections 163(f)(1) and 4701 in the appropriate amounts and on the appropriate persons. This provision may be applied, for example, where a corporation issues an obligation that is purportedly in registered form and that will qualify as a “qualified mortgage” within the meaning of section 860G(a)(3) in the hands of a REMIC, contributes the obligation to a REMIC as its only asset, and arranges for the sale to investors of regular interests in the REMIC in bearer form that do not meet the requirements of section 163(f)(2)(B). If this provision is applied, the obligation held by the REMIC will not be considered to be issued in registered form or to meet the requirements of section 163(f)(2)(B). The corporation will not be allowed a deduction for the payment of interest on the obligation held by the REMIC, and the excise tax under section 4701, calculated with reference to the principal amount of the obligation held by the REMIC, will be imposed on

the corporation and may be collected from the corporation and its agents.

[T.D. 8202, 53 FR 17928, May 19, 1988, as amended by T.D. 8300, 55 FR 19626, May 10, 1990]

**§ 1.163-6T Reduction of deduction where section 25 credit taken (temporary).**

(a) *In general.* The amount of the deduction under section 163 for interest paid or accrued during any taxable year on a certified indebtedness amount with respect to a mortgage credit certificate which has been issued under section 25 shall be reduced by the amount of the credit allowable with respect to such interest under section 25 (determined without regard to section 26).

(b) *Cross reference.* See §§ 1.25-1T through 1.25-8T with respect to rules relating to mortgage credit certificates.

[T.D. 8023, 50 FR 19355, May 8, 1985]

**§ 1.163-7 Deduction for OID on certain debt instruments.**

(a) *General rule.* Except as otherwise provided in paragraph (b) of this section, an issuer (including a transferee) determines the amount of OID that is deductible each year under section 163(e)(1) by using the constant yield method described in § 1.1272-1(b). This determination, however, is made without regard to section 1272(a)(7) (relating to acquisition premium) and § 1.1273-1(d) (relating to de minimis OID). An issuer is permitted a deduction under section 163(e)(1) only to the extent the issuer is primarily liable on the debt instrument. For certain limitations on the deductibility of OID, see sections 163(e) and 1275(b)(2). To determine the amount of interest (OID) that is deductible each year on a debt instrument that provides for contingent payments, see § 1.1275-4.

(b) *Special rules for de minimis OID—(1) Stated interest.* If a debt instrument has a de minimis amount of OID (within the meaning of § 1.1273-1(d)), the issuer treats all stated interest on the debt instrument as qualified stated interest. See §§ 1.446-2(b) and 1.461-1 for the treatment of qualified stated interest.

(2) *Deduction of de minimis OID on other than a constant yield basis.* In lieu

of deducting de minimis OID under the general rule of paragraph (a) of this section, an issuer of a debt instrument with a de minimis amount of OID (other than a de minimis amount treated as qualified stated interest under paragraph (b)(1) of this section) may choose to deduct the OID at maturity, on a straight-line basis over the term of the debt instrument, or in proportion to stated interest payments. The issuer makes this choice by reporting the de minimis OID in a manner consistent with the method chosen on the issuer's timely filed Federal income tax return for the taxable year in which the debt instrument is issued.

(c) *Deduction upon repurchase.* Except to the extent disallowed by any other section of the Internal Revenue Code (e.g., section 249) or this paragraph (c), if a debt instrument is repurchased by the issuer for a price in excess of its adjusted issue price (as defined in § 1.1275-1(b)), the excess (repurchase premium) is deductible as interest for the taxable year in which the repurchase occurs. If the issuer repurchases a debt instrument in a debt-for-debt exchange, the repurchase price is the issue price of the newly issued debt instrument (reduced by any unstated interest within the meaning of section 483). However, if the issue price of the newly issued debt instrument is determined under either section 1273(b)(4) or section 1274, any repurchase premium is not deductible in the year of the repurchase, but is amortized over the term of the newly issued debt instrument in the same manner as if it were OID.

(d) *Choice of accrual periods to determine whether a debt instrument is an applicable high yield discount obligation (AHYDO).* Section 163(e)(5) affects an issuer's OID deductions for certain high yield debt instruments that have significant OID. For purposes of section 163(i)(2), which defines significant OID, the issuer's choice of accrual periods to determine OID accruals is used to determine whether a debt instrument has significant OID. See § 1.1275-2(e) for rules relating to the issuer's obligation to disclose certain information to holders.

(e) *Qualified reopening—(1) In general.* In a qualified reopening of an issue of debt instruments, if a holder pays more

or less than the adjusted issue price of the original debt instruments to acquire an additional debt instrument, the issuer treats this difference as an adjustment to the issuer's interest expense for the original and additional debt instruments. As provided by paragraphs (e)(2) through (5) of this section, the adjustment is taken into account over the term of the instrument using constant yield principles.

(2) *Positive adjustment.* If the difference is positive (that is, the holder pays more than the adjusted issue price of the original debt instrument), then, with respect to the issuer but not the holder, the difference increases the aggregate adjusted issue prices of all of the debt instruments in the issue, both original and additional.

(3) *Negative adjustment.* If the difference is negative (that is, the holder pays less than the adjusted issue price of the original debt instrument), then, with respect to the issuer but not the holder, the difference reduces the aggregate adjusted issue prices of all of the debt instruments in the issue, both original and additional.

(4) *Determination of issuer's interest accruals.* As of the reopening date, the issuer must redetermine the yield of the debt instruments in the issue for purposes of applying the constant yield method described in §1.1272-1(b) to determine the issuer's accruals of interest expense over the remaining term of the debt instruments in the issue. This redetermined yield is based on the aggregate adjusted issue prices of the debt instruments in the issue (as determined under this paragraph (e)) and the remaining payment schedule of the debt instruments in the issue. If the aggregate adjusted issue prices of the debt instruments in the issue (as determined under this paragraph (e)) are less than the aggregate stated redemption price at maturity of the instruments (determined as of the reopening date) by a *de minimis* amount (within the meaning of §1.1273-1(d)), the issuer may use the rules in paragraph (b) of this section to determine the issuer's accruals of interest expense.

(5) *Effect of adjustments on issuer's adjusted issue price.* The adjustments made under this paragraph (e) are taken into account for purposes of de-

termining the issuer's adjusted issue price under §1.1275-1(b).

(6) *Definitions.* The terms *additional debt instrument*, *original debt instrument*, *qualified reopening*, and *reopening date* have the same meanings as in §1.1275-2(k).

(f) *Effective dates.* This section (other than paragraph (e) of this section) applies to debt instruments issued on or after April 4, 1994. Taxpayers, however, may rely on this section (other than paragraph (e) of this section) for debt instruments issued after December 21, 1992, and before April 4, 1994. Paragraph (e) of this section applies to qualified reopenings where the reopening date is on or after March 13, 2001.

[T.D. 8517, 59 FR 4804, Feb. 2, 1994, as amended by T.D. 8674, 61 FR 30138, June 14, 1996; T.D. 8934, 66 FR 2815, Jan. 12, 2001]

**§ 1.163-8T Allocation of interest expense among expenditures (temporary).**

(a) *In general*—(1) *Application.* This section prescribes rules for allocating interest expense for purposes of applying sections 469 (the “passive loss limitation”) and 163 (d) and (h) (the “non-business interest limitations”).

(2) *Cross-references.* This paragraph provides an overview of the manner in which interest expense is allocated for the purposes of applying the passive loss limitation and nonbusiness interest limitations and the manner in which interest expense allocated under this section is treated. See paragraph (b) of this section for definitions of certain terms, paragraph (c) for the rules for allocating debt and interest expense among expenditures, paragraphs (d) and (e) for the treatment of debt repayments and refinancings, paragraph (j) for the rules for reallocating debt upon the occurrence of certain events, paragraph (m) for the coordination of the rules in this section with other limitations on the deductibility of interest expense, and paragraph (n) of this section for effective date and transitional rules.

(3) *Manner of allocation.* In general, interest expense on a debt is allocated in the same manner as the debt to which such interest expense relates is allocated. Debt is allocated by tracing disbursements of the debt proceeds to

specific expenditures. This section prescribes rules for tracing debt proceeds to specific expenditures.

(4) *Treatment of interest expenses*—(i) *General rule.* Except as otherwise provided in paragraph (m) of this section (relating to limitations on interest expense other than the passive loss and nonbusiness interest limitations), interest expense allocated under the rules of this section is treated in the following manner:

(A) Interest expense allocated to a trade or business expenditure (as defined in paragraph (b)(7) of this section) is taken into account under section 163 (h)(2)(A);

(B) Interest expense allocated to a passive activity expenditure (as defined in paragraph (b)(4) of this section) or a former passive activity expenditure (as defined in paragraph (b)(2) of this section) is taken into account for purposes of section 469 in determining the income or loss from the activity to which such expenditure relates;

(C) Interest expense allocated to an investment expenditure (as defined in paragraph (b)(3) of this section) is treated for purposes of section 163(d) as investment interest;

(D) Interest expense allocated to a personal expenditure (as defined in paragraph (b)(5) of this section) is treated for purposes of section 163(h) as personal interest; and

(E) Interest expense allocated to a portfolio expenditure (as defined in paragraph (b)(6) of this section) is treated for purposes of section 469(e)(2)(B)(ii) as interest expense described in section 469(e)(1)(A)(i)(III).

(ii) *Examples.* The following examples illustrate the application of this paragraph (a)(4):

*Example (1).* Taxpayer A, an individual, incurs interest expense allocated under the rules of this section to the following expenditures:

\$6,000 Passive activity expenditure.  
\$4,000 Personal expenditure.

The \$6,000 interest expense allocated to the passive activity expenditure is taken into account for purposes of section 469 in computing A's income or loss from the activity to which such interest relates. Pursuant to section 163(h), A may not deduct the \$4,000 interest expense allocated to the personal expenditure (except to the extent such inter-

est is qualified residence interest, within the meaning of section 163(h)(3)).

*Example (2).* (i) Corporation M, a closely held C corporation (within the meaning of section 469 (j)(1)) has \$10,000 of interest expense for a taxable year. Under the rules of this section, M's interest expense is allocated to the following expenditures:

\$2,000 Passive activity expenditure.  
\$3,000 Portfolio expenditure.  
\$5,000 Other expenditures.

(ii) Under section 163(d)(3)(D) and this paragraph (a)(4), the \$2,000 interest expense allocated to the passive activity expenditure is taken into account in computing M's passive activity loss for the taxable year, but, pursuant to section 469(e)(1) and this paragraph (a)(4), the interest expense allocated to the portfolio expenditure and the other expenditures is not taken into account for such purposes.

(iii) Since M is a closely held C corporation, its passive activity loss is allowable under section 469(e)(2)(A) as a deduction from net active income. Under section 469(e)(2)(B) and this paragraph (a)(4), the \$5,000 interest expense allocated to other expenditures is taken into account in computing M's net active income, but the interest expense allocated to the passive activity expenditure and the portfolio expenditure is not taken into account for such purposes.

(iv) Since M is a corporation, the \$3,000 interest expense allocated to the portfolio expenditure is allowable without regard to section 163(d). If M were an individual, however, the interest expense allocated to the portfolio expenditure would be treated as investment interest for purposes of applying the limitation of section 163(d).

(b) *Definitions.* For purposes of this section—

(1) "Former passive activity" means an activity described in section 469(f)(3), but only if an unused deduction or credit (within the meaning of section 469(f)(1) (A) or (B)) is allocable to the activity under section 469(b) for the taxable year.

(2) "Former passive activity expenditure" means an expenditure that is taken into account under section 469 in computing the income or loss from a former passive activity of the taxpayer or an expenditure (including an expenditure properly chargeable to capital account) that would be so taken into account if such expenditure were otherwise deductible.

(3) "Investment expenditure" means an expenditure (other than a passive activity expenditure) properly chargeable to capital account with respect to

property held for investment (within the meaning of section 163(d)(5)(A)) or an expenditure in connection with the holding of such property.

(4) “Passive activity expenditure” means an expenditure that is taken into account under section 469 in computing income or loss from a passive activity of the taxpayer or an expenditure (including an expenditure properly chargeable to capital account) that would be so taken into account if such expenditure were otherwise deductible. For purposes of this section, the term “passive activity expenditure” does not include any expenditure with respect to any low-income housing project in any taxable year in which any benefit is allowed with respect to such project under section 502 of the Tax Reform Act of 1986.

(5) “Personal expenditure” means an expenditure that is not a trade or business expenditure, a passive activity expenditure, or an investment expenditure.

(6) “Portfolio expenditure” means an investment expenditure properly chargeable to capital account with respect to property producing income of a type described in section 469(e)(1)(A) or an investment expenditure for an expense clearly and directly allocable to such income.

(7) “Trade or business expenditure” means an expenditure (other than a passive activity expenditure or an investment expenditure) in connection with the conduct of any trade or business other than the trade or business of performing services as an employee.

(c) *Allocation of debt and interest expense*—(1) *Allocation in accordance with use of proceeds.* Debt is allocated to expenditures in accordance with the use of the debt proceeds and, except as provided in paragraph (m) of this section, interest expense accruing on a debt during any period is allocated to expenditures in the same manner as the debt is allocated from time to time during such period. Except as provided in paragraph (m) of this section, debt proceeds and related interest expense are allocated solely by reference to the use of such proceeds, and the allocation is not affected by the use of an interest in any property to secure the repayment of such debt or interest. The fol-

lowing example illustrates the principles of this paragraph (c)(1):

*Example.* Taxpayer A, an individual, pledges corporate stock held for investment as security for a loan and uses the debt proceeds to purchase an automobile for personal use. Interest expense accruing on the debt is allocated to the personal expenditure to purchase the automobile even though the debt is secured by investment property.

(2) *Allocation period*—(i) *Allocation of debt.* Debt is allocated to an expenditure for the period beginning on the date the proceeds of the debt are used or treated as used under the rules of this section to make the expenditure and ending on the earlier of—

(A) The date the debt is repaid; or

(B) The date the debt is reallocated in accordance with the rules in paragraphs (c)(4) and (j) of this section.

(ii) *Allocation of interest expense*—(A) *In general.* Except as otherwise provided in paragraph (m) of this section, interest expense accruing on a debt for any period is allocated in the same manner as the debt is allocated from time to time, regardless of when the interest is paid.

(B) *Effect of compounding.* Accrued interest is treated as a debt until it is paid and any interest accruing on unpaid interest is allocated in the same manner as the unpaid interest is allocated. For the taxable year in which a debt is reallocated under the rules in paragraphs (c)(4) and (j) of this section, however, compound interest accruing on such debt (other than compound interest accruing on interest that accrued before the beginning of the year) may be allocated between the original expenditure and the new expenditure on a straight-line basis (*i.e.*, by allocating an equal amount of such interest expense to each day during the taxable year). In addition, a taxpayer may treat a year as consisting of 12 30-day months for purposes of allocating interest on a straight-line basis.

(C) *Accrual of interest expense.* For purposes of this paragraph (c)(2)(ii), the amount of interest expense that accrues during any period is determined by taking into account relevant provisions of the loan agreement and any applicable law such as sections 163(e), 483, and 1271 through 1275.

(iii) *Examples.* The following examples illustrate the principles of this paragraph (c)(2):

*Example (1).* (i) On January 1, taxpayer B, a calendar year taxpayer, borrows \$1,000 at an interest rate of 11 percent, compounded semiannually. B immediately uses the debt proceeds to purchase an investment security. On July 1, B sells the investment security for \$1,000 and uses the sales proceeds to make a passive activity expenditure. On December 31, B pays accrued interest on the \$1,000 debt for the entire year.

(ii) Under this paragraph (c)(2) and paragraph (j) of this section, the \$1,000 debt is allocated to the investment expenditure for the period from January 1 through June 30, and to the passive activity expenditure from July 1 through December 31. Interest expense accruing on the \$1,000 debt is allocated in accordance with the allocation of the debt from time to time during the year even though the debt was allocated to the passive activity expenditure on the date the interest was paid. Thus, the \$55 interest expense for the period from January 1 through June 30 is allocated to the investment expenditure. In addition, during the period from July 1 through December 31, the interest expense allocated to the investment expenditure is a debt, the proceeds of which are treated as used to make an investment expenditure. Accordingly, an additional \$3 of interest expense for the period from July 1 through December 31 ( $\$55 \times .055$ ) is allocated to the in-

vestment expenditure. The remaining \$55 of interest expense for the period from July 1 through December 31 ( $\$1,000 \times .055$ ) is allocated to the passive activity expenditure.

(iii) Alternatively, under the rule in paragraph (c)(2)(ii)(B) of this section, B may allocate the interest expense on a straight-line basis and may also treat the year as consisting of 12 30-day months for this purpose. In that case, \$56.50 of interest expense ( $180/360 \times \$113$ ) would be allocated to the investment expenditure and the remaining \$56.50 of interest expense would be allocated to the passive activity expenditure.

*Example (2).* On January 1, 1988, taxpayer C borrows \$10,000 at an interest rate of 11 percent, compounded annually. All interest and principal on the debt is payable in a lump sum on December 31, 1992. C immediately uses the debt proceeds to make a passive activity expenditure. C materially participates in the activity in 1990, 1991, and 1992. Therefore, under paragraphs (c)(2) (i) and (j) of this section, the debt is allocated to a passive activity expenditure from January 1, 1988, through December 31, 1989, and to a former passive activity expenditure from January 1, 1990, through December 31, 1992. In accordance with the loan agreement (and consistent with § 1.1272-1(d)(1) of the proposed regulations, 51 FR 12022, April 8, 1986), interest expense accruing during any period is determined on the basis of annual compounding. Accordingly, the interest expense on the debt is allocated as follows:

Year	Amount		Expenditure
1988 .....	$\$10,000 \times .11$	\$1,100	Passive activity.
1989 .....	$11,100 \times .11$	1,221	Passive activity.
1990 .....	$12,321 \times .11 = 1,355$	.....	.....
	$1,355 \times 2,321/12,321$	255	Passive activity.
	$1,355 \times 10,000/12,321$	1,100	Former passive activity.
		1,355	
1991 .....	$13,676 \times .11 = 1,504$	.....	.....
	$1,504 \times 2,576/13,676$	283	Passive activity.
	$1,504 \times 11,100/13,676$	1,221	Former passive activity.
		1,504	
1992 .....	$15,180 \times .11 = 1,670$	.....	.....
	$1,670 \times 2,859/15,180$	315	Passive activity.
	$1,670 \times 12,321/15,180$	1,355	Former passive activity.
		1,670	

(3) *Allocation of debt; proceeds not disbursed to borrower—(i) Third-party financing.* If a lender disburses debt proceeds to a person other than the borrower in consideration for the sale or use of property, for services, or for any other purpose, the debt is treated for purposes of this section as if the borrower used an amount of the debt pro-

ceeds equal to such disbursement to make an expenditure for such property, services, or other purpose.

(ii) *Debt assumptions not involving cash disbursements.* If a taxpayer incurs or assumes a debt in consideration for the sale or use of property, for services, or

for any other purpose, or takes property subject to a debt, and no debt proceeds are disbursed to the taxpayer, the debt is treated for purposes of this section as if the taxpayer used an amount of the debt proceeds equal to the balance of the debt outstanding at such time to make an expenditure for such property, services, or other purpose.

(4) *Allocation of debt; proceeds deposited in borrower's account—(i) Treatment of deposit.* For purposes of this section, a deposit of debt proceeds in an account is treated as an investment expenditure, and amounts held in an account (whether or not interest bearing) are treated as property held for investment. Debt allocated to an account under this paragraph (c)(4)(i) must be reallocated as required by paragraph (j) of this section whenever debt proceeds held in the account are used for another expenditure. This paragraph (c)(4) provides rules for determining when debt proceeds are expended from the account. The following example illustrates the principles of this paragraph (c)(4)(i):

*Example.* Taxpayer C, a calendar year taxpayer, borrows \$100,000 on January 1 and immediately uses the proceeds to open a non-interest-bearing checking account. No other amounts are deposited in the account during the year, and no portion of the principal amount of the debt is repaid during the year. On April 1, C uses \$20,000 of the debt proceeds held in the account for a passive activity expenditure. On September 1, C uses an additional \$40,000 of the debt proceeds held in the account for a personal expenditure. Under this paragraph (c)(4)(i), from January 1 through March 31 the entire \$100,000 debt is allocated to an investment expenditure for the account. From April 1 through August 31, \$20,000 of the debt is allocated to the passive activity expenditure, and \$80,000 of the debt is allocated to the investment expenditure for the account. From September 1 through December 31, \$40,000 of the debt is allocated to the personal expenditure, \$20,000 is allocated to the passive activity expenditure, and \$40,000 is allocated to an investment expenditure for the account.

(ii) *Expenditures from account; general ordering rule.* Except as provided in paragraph (c)(4)(iii) (B) or (C) of this section, debt proceeds deposited in an account are treated as expended before—

(A) Any unborrowed amounts held in the account at the time such debt proceeds are deposited; and

(B) Any amounts (borrowed or unborrowed) that are deposited in the account after such debt proceeds are deposited.

The following example illustrates the application of this paragraph (c)(4)(ii):

*Example.* On January 10, taxpayer E opens a checking account, depositing \$500 of proceeds of Debt A and \$1,000 of unborrowed funds. The following chart summarizes the transactions which occur during the year with respect to the account:

Date	Transaction
Jan. 10 .....	\$500 proceeds of Debt A and \$1,000 unborrowed funds deposited.
Jan. 11 .....	\$500 proceeds of Debt B deposited.
Feb. 17 .....	\$800 personal expenditure.
Feb. 26 .....	\$700 passive activity expenditure.
June 21 .....	\$1,000 proceeds of Debt C deposited.
Nov. 24 .....	\$800 investment expenditure.
Dec. 20 .....	\$600 personal expenditure.

The \$800 personal expenditure is treated as made from the \$500 proceeds of Debt A and \$300 of the proceeds of Debt B. The \$700 passive activity expenditure is treated as made from the remaining \$200 proceeds of Debt B and \$500 of unborrowed funds. The \$800 investment expenditure is treated as made entirely from the proceeds of Debt C. The \$600 personal expenditure is treated as made from the remaining \$200 proceeds of Debt C and \$400 of unborrowed funds. Under paragraph (c)(4)(i) of this section, debt is allocated to an investment expenditure for periods during which debt proceeds are held in the account.

(iii) *Expenditures from account; supplemental ordering rules—(A) Checking or similar accounts.* Except as otherwise provided in this paragraph (c)(4)(iii), an expenditure from a checking or similar account is treated as made at the time the check is written on the account, provided the check is delivered or mailed to the payee within a reasonable period after the writing of the check. For this purpose, the taxpayer may treat checks written on the same day as written in any order. In the absence of evidence to the contrary, a check is presumed to be written on the date appearing on the check and to be delivered or mailed to the payee within a reasonable period thereafter. Evidence to the contrary may include the fact that a check does not clear within a reasonable period after the date appearing on the check.

(B) *Expenditures within 15 days after deposit of borrowed funds.* The taxpayer may treat any expenditure made from an account within 15 days after debt proceeds are deposited in such account as made from such proceeds to the extent thereof even if under paragraph (c)(4)(ii) of this section the debt proceeds would be treated as used to make one or more other expenditures. Any such expenditures and the debt proceeds from which such expenditures are treated as made are disregarded in applying paragraph (c)(4)(ii) of this section. The following examples illustrate the application of this paragraph (c)(4)(iii)(B):

*Example (1).* Taxpayer D incurs a \$1,000 debt on June 5 and immediately deposits the proceeds in an account ("Account A"). On June 17, D transfers \$2,000 from Account A to another account ("Account B"). On June 30, D writes a \$1,500 check on Account B for a passive activity expenditure. In addition, numerous deposits of borrowed and unborrowed amounts and expenditures occur with respect to both accounts throughout the month of June. Notwithstanding these other transactions, D may treat \$1,000 of the deposit to Account B on June 17 as an expenditure from the debt proceeds deposited in Account A on June 5. In addition, D may similarly treat \$1,000 of the passive activity expenditure on June 30 as made from debt proceeds treated as deposited in Account B on June 17.

*Example (2).* The facts are the same as in the example in paragraph (c)(4)(ii) of this section, except that the proceeds of Debt B are deposited on February 11 rather than on January 11. Since the \$700 passive activity expenditure occurs within 15 days after the proceeds of Debt B are deposited in the account, E may treat such expenditure as being made from the proceeds of Debt B to the extent thereof. If E treats the passive activity expenditure in this manner, the expenditures from the account are treated as follows: The \$800 personal expenditure is treated as made from the \$500 proceeds of Debt A and \$300 of unborrowed funds. The \$700 passive activity expenditure is treated as made from the \$500 proceeds of Debt B and \$200 of unborrowed funds. The remaining expenditures are treated as in the example in paragraph (c)(4)(ii) of this section.

(C) *Interest on segregated account.* In the case of an account consisting solely of the proceeds of a debt and interest earned on such account, the taxpayer may treat any expenditure from such account as made first from amounts constituting interest (rather than debt

proceeds) to the extent of the balance of such interest in the account at the time of the expenditure, determined by applying the rules in this paragraph (c)(4). To the extent any expenditure is treated as made from interest under this paragraph (c)(4)(iii)(C), the expenditure is disregarded in applying paragraph (c)(4)(ii) of this section.

(iv) *Optional method for determining date of reallocation.* Solely for the purpose of determining the date on which debt allocated to an account under paragraph (c)(4)(i) of this section is reallocated, the taxpayer may treat all expenditures made during any calendar month from debt proceeds in the account as occurring on the later of the first day of such month or the date on which such debt proceeds are deposited in the account. This paragraph (c)(4)(iv) applies only if all expenditures from an account during the same calendar month are similarly treated. The following example illustrates the application of this paragraph (c)(4)(iv):

*Example.* On January 10, taxpayer G opens a checking account, depositing \$500 of proceeds of Debt A and \$1,000 of unborrowed funds. The following chart summarizes the transactions which occur during the year with respect to the account (note that these facts are the same as the facts of the example in paragraph (c)(4)(ii) of this section):

Date	Transaction
Jan. 10 .....	\$500 proceeds of Debt A and \$1,000 unborrowed funds deposited.
Jan. 11 .....	\$500 proceeds of Debt B deposited.
Feb. 17 .....	\$800 personal expenditure.
Feb. 26 .....	\$700 passive activity expenditure.
June 21 .....	\$1,000 proceeds of Debt C deposited.
Nov. 24 .....	\$800 investment expenditure.
Dec. 20 .....	\$600 personal expenditure.

Assume that G chooses to apply the optional rule of this paragraph (c)(4)(iv) to all expenditures. For purposes of determining the date on which debt is allocated to the \$800 personal expenditure made on February 17, the \$500 treated as made from the proceeds of Debt A and the \$300 treated as made from the proceeds of Debt B are treated as expenditures occurring on February 1. Accordingly, Debt A is allocated to an investment expenditure for the account from January 10 through January 31 and to the personal expenditure from February 1 through December 31, and \$300 of Debt B is allocated to an investment expenditure for the account from January 11 through January 31 and to the personal expenditure from February 1 through December 31. The remaining \$200 of

Debt B is allocated to an investment expenditure for the account from January 11 through January 31 and to the passive activity expenditure from February 1 through December 31. The \$800 of Debt C used to make the investment expenditure on November 24 is allocated to an investment expenditure for the account from June 21 through October 31 and to an investment expenditure from November 1 through December 31. The remaining \$200 of Debt C is allocated to an investment expenditure for the account from June 21 through November 30 and to a personal expenditure from December 1 through December 31.

(v) *Simultaneous deposits*—(A) *In general.* If the proceeds of two or more debts are deposited in an account simultaneously, such proceeds are treated for purposes of this paragraph (c)(4) as deposited in the order in which the debts were incurred.

(B) *Order in which debts incurred.* If two or more debts are incurred simultaneously or are treated under applicable law as incurred simultaneously, the debts are treated for purposes of this paragraph (c)(4)(v) as incurred in any order the taxpayer selects.

(C) *Borrowings on which interest accrues at different rates.* If interest does not accrue at the same fixed or variable rate on the entire amount of a borrowing, each portion of the borrowing on which interest accrues at a different fixed or variable rate is treated as a separate debt for purposes of this paragraph (c)(4)(v).

(vi) *Multiple accounts.* The rules in this paragraph (c)(4) apply separately to each account of a taxpayer.

(5) *Allocation of debt; proceeds received in cash*—(i) *Expenditure within 15 days of receiving debt proceeds.* If a taxpayer receives the proceeds of a debt in cash, the taxpayer may treat any cash expenditure made within 15 days after receiving the cash as made from such debt proceeds to the extent thereof and may treat such expenditure as made on the date the taxpayer received the cash. The following example illustrates the rule in this paragraph (c)(5)(i):

*Example.* Taxpayer F incurs a \$1,000 debt on August 4 and receives the debt proceeds in cash. F deposits \$1,500 cash in an account on August 15 and on August 27 writes a check on the account for a passive activity expenditure. In addition, F engages in numerous other cash transactions throughout the month of August, and numerous deposits of

borrowed and unborrowed amounts and expenditures occur with respect to the account during the same period. Notwithstanding these other transactions, F may treat \$1,000 of the deposit on August 15 as an expenditure made from the debt proceeds on August 4. In addition, under the rule in paragraph (c)(4)(v)(B) of this section, F may treat the passive activity expenditure on August 27 as made from the \$1,000 debt proceeds treated as deposited in the account.

(ii) *Other expenditures.* Except as provided in paragraphs (c)(5) (i) and (iii) of this section, any debt proceeds a taxpayer (other than a corporation) receives in cash are treated as used to make personal expenditures. For purposes of this paragraph (c)(5), debt proceeds are received in cash if, for example, a withdrawal of cash from an account is treated under the rules of this section as an expenditure of debt proceeds.

(iii) *Special rules for certain taxpayers.*  
[Reserved]

(6) *Special rules*—(i) *Qualified residence debt.* [Reserved]

(ii) *Debt used to pay interest.* To the extent proceeds of a debt are used to pay interest, such debt is allocated in the same manner as the debt on which such interest accrued is allocated from time to time. The following example illustrates the application of this paragraph (c)(6)(ii):

*Example.* On January 1, taxpayer H incurs a debt of \$1,000, bearing interest at an annual rate of 10 percent, compounded annually, payable at the end of each year (“Debt A”). H immediately opens a checking account, in which H deposits the proceeds of Debt A. No other amounts are deposited in the account during the year. On April 1, H writes a check for a personal expenditure in the amount of \$1,000. On December 31, H borrows \$100 (“Debt B”) and immediately uses the proceeds of Debt B to pay the accrued interest of \$100 on Debt A. From January 1 through March 31, Debt A is allocated, under the rule in paragraph (c)(4)(i) of this section, to the investment expenditure for the account. From April 1 through December 31, Debt A is allocated to the personal expenditure. Under the rule in paragraph (c)(2)(ii) of this section, \$25 of the interest on Debt A for the year is allocated to the investment expenditure, and \$75 of the interest on Debt A for the year is allocated to the personal expenditure. Accordingly, for the purpose of allocating the interest on Debt B for all periods until Debt B is repaid, \$25 of Debt B is allocated to the investment expenditure, and \$75

of Debt B is allocated to the personal expenditure.

(iii) *Debt used to pay borrowing costs—*  
(A) *Borrowing costs with respect to different debt.* To the extent the proceeds of a debt (the “ancillary debt”) are used to pay borrowing costs (other than interest) with respect to another debt (the “primary debt”), the ancillary debt is allocated in the same manner as the primary debt is allocated from time to time. To the extent the primary debt is repaid, the ancillary debt will continue to be allocated in the same manner as the primary debt was allocated immediately before its repayment. The following example illustrates the rule in this paragraph (c)(6)(iii)(A):

*Example.* Taxpayer I incurs debts of \$60,000 (“Debt A”) and \$10,000 (“Debt B”). I immediately uses \$30,000 of the proceeds of Debt A to make a trade or business expenditure, \$20,000 to make a passive activity expenditure, and \$10,000 to make an investment expenditure. I immediately use \$3,000 of the proceeds of Debt B to pay borrowing costs (other than interest) with respect to Debt A (such as loan origination, loan commitment, abstract, and recording fees) and deposits the remaining \$7,000 in an account. Under the rule in this paragraph (c)(6)(iii)(A), the \$3,000 of Debt B used to pay expenses of incurring Debt A is allocated \$1,500 to the trade or business expenditure ( $\$3,000 \times \$30,000/\$60,000$ ), \$1,000 to the passive activity expenditure ( $\$3,000 \times \$20,000/\$60,000$ ), and \$500 ( $\$3,000 \times \$10,000/\$60,000$ ) to the investment expenditure. The manner in which the \$3,000 of Debt B used to pay expenses of incurring Debt A is allocated may change if the allocation of Debt A changes, but such allocation will be unaffected by any repayment of Debt A. The remaining \$7,000 of Debt B is allocated to an investment expenditure for the account until such time, if any, as this amount is used for a different expenditure.

(B) *Borrowing costs with respect to same debt.* To the extent the proceeds of a debt are used to pay borrowing costs (other than interest) with respect to such debt, such debt is allocated in the same manner as the remaining debt is allocated from time to time. The remaining debt for this purpose is the portion of the debt that is not used to pay borrowing costs (other than interest) with respect to such debt. Any repayment of the debt is treated as a repayment of the debt allocated under this paragraph (c)(6)(iii)(B) and the re-

maining debt is the same proportion as such amount bear to each other. The following example illustrates the application of this paragraph (c)(6)(iii)(B):

*Example.* (i) Taxpayer J borrows \$85,000. The lender disburses \$80,000 of this amount to J, retaining \$5,000 for borrowing costs (other than interest) with respect to the loan. J immediately uses \$40,000 of the debt proceeds to make a personal expenditure, \$20,000 to make a passive activity expenditure, and \$20,000 to make an investment expenditure. Under the rule in this paragraph (c)(6)(iii)(B), the \$5,000 used to pay borrowing costs is allocated \$2,500 ( $\$5,000 \times \$40,000/\$80,000$ ) to the personal expenditure, \$1,250 ( $\$5,000 \times \$20,000/\$80,000$ ) to the investment expenditure. The manner in which this \$5,000 is allocated may change if the allocation of the remaining \$80,000 of debt is changed.

(ii) Assume that J repays \$50,000 of the debt. The repayment is treated as a repayment of \$2,941 ( $\$50,000 \times \$5,000/\$85,000$ ) of the debt used to pay borrowing costs and a repayment of \$47,059 ( $\$50,000 \times \$80,000/\$85,000$ ) of the remaining debt. Under paragraph (d) of this section, J is treated as repaying the \$42,500 of debt allocated to the personal expenditure (\$2,500 of debt used to pay borrowing costs and \$40,000 of remaining debt). In addition, assuming that under paragraph (d)(2) J chooses to treat the allocation to the passive activity expenditure as having occurred before the allocation to the investment expenditure, J is treated as repaying \$7,500 of debt allocated to the passive activity expenditure (\$441 of debt used to pay borrowing costs and \$7,059 of remaining debt).

(iv) *Allocation of debt before actual receipt of debt proceeds.* If interest properly accrues on a debt during any period before the debt proceeds are actually received or used to make an expenditure, the debt is allocated to an investment expenditure for such period.

(7) *Antiabuse rules.* [Reserved]

(d) *Debt repayments—*(1) *General ordering rule.* If, at the time any portion of a debt is repaid, such debt is allocated to more than one expenditure, the debt is treated for purposes of this section as repaid in the following order:

(i) Amounts allocated to personal expenditures;

(ii) Amounts allocated to investment expenditures and passive activity expenditures (other than passive activity expenditures described in paragraph (d)(1)(iii) of this section);

(iii) Amounts allocated to passive activity expenditures in connection with

a rental real estate activity with respect to which the taxpayer actively participates (within the meaning of section 469(i));

(iv) Amounts allocated to former passive activity expenditures; and

(v) Amounts allocated to trade or business expenditures and to expenditures described in the last sentence of paragraph (b)(4) of this section.

(2) *Supplemental ordering rules for expenditures in same class.* Amounts allocated to two or more expenditures that are described in the subdivision of paragraph (d)(1) of this section (e.g., amounts allocated to different personal expenditures) are treated as repaid in the order in which the amounts were allocated (or reallocated) to such expenditures. For purposes of this paragraph (d)(2), the taxpayer may treat allocations and reallocations that occur on the same day as occurring in any order (without regard to the order in which expenditures are treated as made under paragraph (c)(4)(iii)(A) of this section).

(3) *Continuous borrowings.* In the case of borrowings pursuant to a line of credit or similar account or arrangement that allows a taxpayer to borrow funds periodically under a single loan agreement—

(i) All borrowings on which interest accrues at the same fixed or variable rate are treated as a single debt; and

(ii) Borrowings or portions of borrowings on which interest accrues at different fixed or variable rates are treated as different debts, and such debts are treated as repaid for purposes of this paragraph (d) in the order in which such borrowings are treated as repaid under the loan agreement.

(4) *Examples.* The following examples illustrate the application of this paragraph (d):

*Example (1).* Taxpayer B borrows \$100,000 (“Debt A”) on July 12, immediately deposits the proceeds in an account, and uses the debt proceeds to make the following expenditures on the following dates:

August 31—\$40,000 passive activity expenditure #1.

October 5—\$20,000 passive activity expenditure #2.

December 24—\$40,000 personal expenditure.

On January 19 of the following year, B repays \$90,000 of Debt A (leaving \$10,000 of Debt A outstanding). The \$40,000 of Debt A allo-

cated to the personal expenditure, the \$40,000 allocated to passive activity expenditure #1, and \$10,000 of the \$20,000 allocated to passive activity expenditure #2 are treated as repaid.

*Example (2).* (i) Taxpayer A obtains a line of credit. Interest on any borrowing on the line of credit accrues at the lender’s “prime lending rate” on the date of the borrowing plus two percentage points. The loan documents provide that borrowings on the line of credit are treated as repaid in the order the borrowings were made. A borrows \$30,000 (“Borrowing #1”) on the line of credit and immediately uses \$20,000 of the debt proceeds to make a personal expenditure (“personal expenditure #1”) and \$10,000 to make a trade or business expenditure (“trade or business expenditure #1”). A subsequently borrows another \$20,000 (“Borrowing #2”) on the line of credit and immediately uses \$15,000 of the debt proceeds to make a personal expenditure (“personal expenditure #2”) and \$5,000 to make a trade or business expenditure (“trade or business expenditure #2”). A then repays \$40,000 of the borrowings.

(ii) If the prime lending rate plus two percentage points was the same on both the date of Borrowing #1 and the date of Borrowing #2, the borrowings are treated for purposes of this paragraph (d) as a single debt, and A is treated as having repaid \$35,000 of debt allocated to personal expenditure #1 and personal expenditure #2, and \$5,000 of debt allocated to trade or business expenditure #1.

(iii) If the prime lending rate plus two percentage points was different on the date of Borrowing #1 and Borrowing #2, the borrowings are treated as two debts, and, in accordance with the loan agreement, the \$40,000 repaid amount is treated as a repayment of Borrowing #1 and \$10,000 of Borrowing #2. Accordingly, A is treated as having repaid \$20,000 of debt allocated to personal expenditure #1, \$10,000 of debt allocated to trade or business expenditure #1, and \$10,000 of debt allocated to personal expenditure #2.

(e) *Debt refinancings—(1) In general.* To the extent proceeds of any debt (the “replacement debt”) are used to repay any portion of a debt, the replacement debt is allocated to the expenditures to which the repaid debt was allocated. The amount of replacement debt allocated to any such expenditure is equal to the amount of debt allocated to such expenditure that was repaid with proceeds of the replacement debt. To the extent proceeds of the replacement debt are used for expenditures other than repayment of a debt, the replacement debt is allocated to expenditures

in accordance with the rules of this section.

(2) *Example.* The following example illustrates the application of this paragraph (e):

*Example.* Taxpayer C borrows \$100,000 (“Debt A”) on July 12, immediately deposits the debt proceeds in an account, and uses the proceeds to make the following expenditures on the following dates (note that the facts of this example are the same as the facts of example (1) in paragraph (d)(4) of this section):

August 31—\$40,000 passive activity expenditure #1.  
 October 5—\$20,000 passive activity expenditure #2.  
 December 24—\$40,000 personal expenditure #1.

On January 19 of the following year, C borrows \$120,000 (“Debt B”) and uses \$90,000 of the proceeds to repay \$90,000 of Debt A (leaving \$10,000 of Debt A outstanding). In addition, C uses \$30,000 of the proceeds of Debt B to make a personal expenditure (“personal expenditure #2”). Debt B is allocated \$40,000 to personal expenditure #1, \$40,000 to passive activity expenditure #1, \$10,000 to passive activity expenditure #2, and \$30,000 to personal expenditure #2. Under paragraph (d)(1) of this section, Debt B will be treated as repaid in the following order: (1) amounts allocated to personal expenditure #1, (2) amounts allocated to personal expenditure #2, (3) amounts allocated to passive activity expenditure #1, and (4) amounts allocated to passive activity expenditure #2.

(f) *Debt allocated to distributions by passthrough entities.* [Reserved]

(g) *Repayment of passthrough entity debt.* [Reserved]

(h) *Debt allocated to expenditures for interests in passthrough entities.* [Reserved]

(i) *Allocation of debt to loans between passthrough entities and interest holders.* [Reserved]

(j) *Reallocation of debt—(1) Debt allocated to capital expenditures—(i) Time of reallocation.* Except as provided in paragraph (j)(2) of this section, debt allocated to an expenditure properly chargeable to capital account with respect to an asset (the “first expenditure”) is reallocated to another expenditure on the earlier of—

(A) The date on which proceeds from a disposition of such asset are used for another expenditure; or

(B) The date on which the character of the first expenditure changes (e.g., from a passive activity expenditure to

an expenditure that is not a passive activity expenditure) by reason of a change in the use of the asset with respect to which the first expenditure was capitalized.

(ii) *Limitation on amount reallocated.* The amount of debt reallocated under paragraph (j)(1)(i)(A) of this section may not exceed the proceeds from the disposition of the asset. The amount of debt reallocated under paragraph (j)(1)(i)(B) of this section may not exceed the fair market value of the asset on the date of the change in use. In applying this paragraph (j)(1)(ii) with respect to a debt in any case in which two or more debts are allocable to expenditures properly chargeable to capital account with respect to the same asset, only a ratable portion (determined with respect to any such debt by dividing the amount of such debt by the aggregate amount of all such debts) of the fair market value or proceeds from the disposition of such asset shall be taken into account.

(iii) *Treatment of loans made by the taxpayer.* Except as provided in paragraph (j)(1)(iv) of this section, an expenditure to make a loan is treated as an expenditure properly chargeable to capital account with respect to an asset, and for purposes of paragraph (j)(1)(i)(A) of this section any repayment of the loan is treated as a disposition of the asset. Paragraph (j)(3) of this section applies to any repayment of a loan in installments.

(iv) *Treatment of accounts.* Debt allocated to an account under paragraph (c)(4)(i) of this section is treated as allocated to an expenditure properly chargeable to capital account with respect to an asset, and any expenditure from the account is treated as a disposition of the asset. See paragraph (c)(4) of this section for rules under which debt proceeds allocated to an account are treated as used for another expenditure.

(2) *Disposition proceeds in excess of debt.* If the proceeds from the disposition of an asset exceed the amount of debt reallocated by reason of such disposition, or two or more debts are reallocated by reason of the disposition of an asset, the proceeds of the disposition are treated as an account to which

the rules in paragraph (c)(4) of this section apply.

(3) *Special rule for deferred payment sales.* If any portion of the proceeds of a disposition of an asset are received subsequent to the disposition—

(i) The portion of the proceeds to be received subsequent to the disposition is treated for periods prior to the receipt as used to make an investment expenditure; and

(ii) Debt reallocated by reason of the disposition is allocated to such investment expenditure to the extent such debt exceeds the proceeds of the disposition previously received (other than proceeds used to repay such debt).

(4) *Examples.* The following examples illustrate the application of this paragraph (j):

*Example (1).* On January 1, 1988, taxpayer D sells an asset for \$25,000. Immediately before the sale, the amount of debt allocated to expenditures properly chargeable to capital account with respect to the asset was \$15,000. The proceeds of the disposition are treated as an account consisting of \$15,000 of debt proceeds and \$10,000 of unborrowed funds to which paragraph (c)(4) of this section applies. Thus, if D immediately makes a \$10,000 personal expenditure from the proceeds and within 15 days deposits the remaining proceeds in an account, D may, pursuant to paragraph (c)(4)(iii)(B) of this section, treat the entire \$15,000 deposited in the account as proceeds of a debt.

*Example (2).* The facts are the same as in example (1) except that, instead of receiving all \$25,000 of the sale proceeds on January 1, 1988, D receives 5,000 on that date, \$10,000 on January 1, 1989, and \$10,000 on January 1, 1990. D does not use any portion of the sale proceeds to repay the debt. Between January 1, 1988, and December 31, 1988, D is treated under paragraph (j)(3) of this section as making an investment expenditure of \$20,000 to which \$10,000 of debt is allocated. In addition, the remaining \$5,000 of debt is reallocated on January 1, 1988, in accordance with D's use of the sales proceeds received on that date. Between January 1, 1989, and December 31, 1989, D is treated as making an investment expenditure of \$10,000 to which no debt is allocated. In addition, as of January 1, 1989, \$10,000 of debt is reallocated in accordance with D's use of the sales proceeds received on that date.

*Example 3.* The facts are the same as in example (2), except that D immediately uses the \$5,000 sale proceeds received on January 1, 1988, to repay \$5,000 of the \$15,000 debt. Between January 1, 1988, and December 31, 1988, D is treated as making an investment expenditure of \$20,000 to which the remaining

balance (\$10,000) of the debt is reallocated. The results in 1989 are as described in example (2).

(k) *Modification of rules in the case of interest expense allocated to foreign source income.* [Reserved]

(l) [Reserved]

(m) *Coordination with other provisions—(1) Effect of other limitations—(i) In general.* All debt is allocated among expenditures pursuant to the rules in this section, without regard to any limitations on the deductibility of interest expense on such debt. The applicability of the passive loss and non-business interest limitations to interest on such debt, however, may be affected by other limitations on the deductibility of interest expense.

(ii) *Disallowance provisions.* Interest expense that is not allowable as a deduction by reason of a disallowance provision (within the meaning of paragraph (m)(7)(ii) of this section) is not taken into account for any taxable year for purposes of applying the passive loss and nonbusiness interest limitations.

(iii) *Deferral provisions.* Interest expense that is not allowable as a deduction for the taxable year in which paid or accrued by reason of a deferral provision (within the meaning of paragraph (m)(7)(iii) of this section) is allocated in the same manner as the debt giving rise to the interest expense is allocated for such taxable year. Such interest expense is taken into account for purposes of applying the passive loss and nonbusiness interest limitations for the taxable year in which such interest expense is allowable under such deferral provision.

(iv) *Capitalization provisions.* Interest expense that is capitalized pursuant to a capitalization provision (within the meaning of paragraph (m)(7)(i) of this section) is not taken into account as interest for any taxable year for purposes of applying the passive loss and nonbusiness interest limitations.

(2) *Effect on other limitations—(i) General rule.* Except as provided in paragraph (m)(2)(ii) of this section, any limitation on the deductibility of an item (other than the passive loss and nonbusiness interest limitations) applies without regard to the manner in

which debt is allocated under this section. Thus, for example, interest expense treated under section 265(a)(2) as interest on indebtedness incurred or continued to purchase or carry obligations the interest on which is wholly exempt from Federal income tax is not deductible regardless of the expenditure to which the underlying debt is allocated under this section.

(ii) *Exception.* Capitalization provisions (within the meaning of paragraph (m)(7)(i) of this section) do not apply to interest expense allocated to any personal expenditure under the rules of this section.

(3) *Qualified residence interest.* Qualified residence interest (within the meaning of section 163(h)(3)) is allowable as a deduction without regard to the manner in which such interest expense is allocated under the rules of this section. In addition, qualified residence interest is not taken into account in determining the income or loss from any activity for purposes of section 469 or in determining the amount of investment interest for purposes of section 163(d). The following example illustrates the rule in this paragraph (m)(3):

*Example.* Taxpayer E, an individual, incurs a \$20,000 debt secured by a residence and immediately uses the proceeds to purchase an automobile exclusively for E's personal use. Under the rules in this section, the debt and interest expense on the debt are allocated to a personal expenditure. If, however, the interest on the debt is qualified residence interest within the meaning of section 163(h)(3), the interest is not treated as personal interest for purposes of section 163(h).

(4) *Interest described in section 163(h)(2)(E).* Interest described in section 163(h)(2)(E) is allowable as a deduction without regard to the rules of this section.

(5) *Interest on deemed distributee debt.* [Reserved]

(6) *Examples.* The following examples illustrate the relationship between the passive loss and nonbusiness interest limitations and other limitations on the deductibility of interest expense:

*Example (1).* Debt is allocated pursuant to the rules in this section to an investment expenditure for the purchase of taxable investment securities. Pursuant to section 265(a)(2), the debt is treated as indebtedness incurred or continued to purchase or carry

obligations the interest on which is wholly exempt from Federal income tax, and, accordingly, interest on the debt is disallowed. If section 265(a)(2) subsequently ceases to apply (because, for example, the taxpayer ceases to hold any tax-exempt obligations), and the debt at such time continues to be allocated to an investment expenditure, interest on the debt that accrues after such time is subject to section 163(d).

*Example (2).* An accrual method taxpayer incurs a debt payable to a cash method lender who is related to the taxpayer within the meaning of section 267(b). During the period in which interest on the debt is not deductible by reason of section 267(a)(2), the debt is allocated to a passive activity expenditure. Thus, interest that accrues on the debt for such period is also allocated to the passive activity expenditure. When such interest expense becomes deductible under section 267(a)(2), it will be allocated to the passive activity expenditure, regardless of how the debt is allocated at such time.

*Example (3).* A taxpayer incurs debt that is allocated under the rules of this section to an investment expenditure. Under section 263A(f), however, interest expense on such debt is capitalized during the production period (within the meaning of section 263A(f)(4)(B)) of property used in a passive activity of the taxpayer. The capitalized interest expense is not allocated to the investment expenditure, and depreciation deductions attributable to the capitalized interest expense are subject to the passive loss limitation as long as the property is used in a passive activity. However, interest expense on the debt for periods after the production period is allocated to the investment expenditure as long as the debt remains allocated to the investment expenditure.

(7) *Other limitations on interest expense—(i) Capitalization provisions.* A capitalization provision is any provision that requires or allows interest expense to be capitalized. Capitalization provisions include sections 263(g), 263A(f), and 266.

(ii) *Disallowance provisions.* A disallowance provision is any provision (other than the passive loss and nonbusiness interest limitations) that disallows a deduction for interest expense for all taxable years and is not a capitalization provision. Disallowance provisions include sections 163(f)(2), 264(a)(2), 264(a)(4), 265(a)(2), 265(b)(2), 279(a), 291(e)(1)(B)(ii), 805(b)(1), and 834(c)(5).

(iii) *Deferral provisions.* A deferral provision is any provision (other than

the passive loss and nonbusiness interest limitations) that disallows a deduction for interest expense for any taxable year and is not a capitalization or disallowance provision. Deferral provisions include sections 267(a)(2), 465, 1277, and 1282.

(n) *Effective date*—(1) *In general*. This section applies to interest expense paid or accrued in taxable years beginning after December 31, 1986.

(2) *Transitional rule for certain expenditures*. For purposes of determining whether debt is allocated to expenditures made on or before August 3, 1987, paragraphs (c)(4)(iii)(B) and (c)(5)(i) of this section are applied by substituting “90 days” for “15 days.”

(3) *Transitional rule for certain debt*—(i) *General rule*. Except as provided in paragraph (n)(3)(ii) of this section, any debt outstanding on December 31, 1986, that is properly attributable to a business or rental activity is treated for purposes of this section as debt allocated to expenditures properly chargeable to capital account with respect to the assets held for use or for sale to customers in such business or rental activity. Debt is properly attributable to a business or rental activity for purposes of this section (regardless of whether such debt otherwise would be allocable under this section to expenditures in connection with such activity) if the taxpayer has properly and consistently deducted interest expense (including interest subject to limitation under section 163(d) as in effect prior to the Tax Reform Act of 1986) on such debt on Schedule C, E, or F of Form 1040 in computing income or loss from such business or rental activity for taxable years beginning before January 1, 1987. For purposes of this paragraph (n)(3), amended returns filed after July 2, 1987 are disregarded in determining whether a taxpayer has consistently deducted interest expense on Schedule C, E, or F of Form 1040 in computing income or loss from a business or rental activity.

(ii) *Exceptions*—(A) *Debt financed distributions by passthrough entities*. [Reserved]

(B) *Election out*. This paragraph (n)(3) does not apply with respect to debt of a taxpayer who elects under paragraph (n)(3) (viii) of this section to allocate

debt outstanding on December 31, 1986, in accordance with the provisions of this section other than this paragraph (n)(3) (*i.e.*, in accordance with the use of the debt proceeds).

(iii) *Business or rental activity*. For purposes of this paragraph (n)(3), a business or rental activity is any trade or business or rental activity of the taxpayer. For this purpose—

(A) A trade or business includes a business or profession the income and deductions of which (or, in the case of a partner or S corporation shareholder, the taxpayer’s share thereof) are properly reported on Schedule C, E, or F of Form 1040; and

(B) A rental activity includes an activity of renting property the income and deductions of which (or, in the case of a partner or S corporation shareholder, the taxpayer’s share thereof) are properly reported on Schedule E of Form 1040.

(iv) *Example*. The following example illustrates the circumstances in which debt is properly attributable to a business or rental activity:

*Example*. Taxpayer H incurred a debt in 1979 and properly deducted the interest expense on the debt on Schedule C of Form 1040 for each year from 1979 through 1986. Under this paragraph (n) (3), the debt is properly attributable to the business the results of which are reported on Schedule C.

(v) *Allocation requirement*—(A) *In general*. Debt outstanding on December 31, 1986, that is properly attributable (within the meaning of paragraph (n)(3)(i) of this section) to a business or rental activity must be allocated in a reasonable and consistent manner among the assets held for use or for sale to customers in such activity on the last day of the taxable year that includes December 31, 1986. The taxpayer shall specify the manner in which such debt is allocated by filing a statement in accordance with paragraph (n)(3)(vii) of this section. If the taxpayer does not file such a statement or fails to allocate such debt in a reasonable and consistent manner, the Commissioner shall allocate the debt.

(B) *Reasonable and consistent manner—examples of improper allocation*. For purposes of this paragraph (n)(3)(v), debt is not treated as allocated in a reasonable and consistent manner if—

§ 1.163-9T

26 CFR Ch. I (4-1-06 Edition)

(1) The amount of debt allocated to goodwill exceeds the basis of the goodwill; or

(2) The amount of debt allocated to an asset exceeds the fair market value of the asset, and the amount of debt allocated to any other asset is less than the fair market value (lesser of basis or fair market value in the case of goodwill) of such other asset.

(vi) *Coordination with other provisions.* The effect of any events occurring after the last day of the taxable year that includes December 31, 1986, shall be determined under the rules of this section, applied by treating the debt allocated to an asset under paragraph (n)(3)(v) of this section as if proceeds of such debt were used to make an expenditure properly chargeable to capital account with respect to such asset on the last day of the taxable year that includes December 31, 1986. Thus, debt that is allocated to an asset in accordance with this paragraph (n)(3) must be reallocated in accordance with paragraph (j) of this section upon the occurrence with respect to such asset of any event described in such paragraph (j). Similarly, such debt is treated as repaid in the order prescribed in paragraph (d) of this section. In addition, a replacement debt (within the meaning of paragraph (e) of this section) is allocated to an expenditure properly chargeable to capital account with respect to an asset to the extent the proceeds of such debt are used to repay the portion of a debt allocated to such asset under this paragraph (n)(3).

(vii) *Form for allocation of debt.* A taxpayer shall allocate debt for purposes of this paragraph (n)(3) by attaching to the taxpayer's return for the first taxable year beginning after December 31, 1986, a statement that is prominently identified as a transitional allocation statement under §1.163-8T(n)(3) and includes the following information:

- (A) A description of the business or rental activity to which the debt is properly attributable;
- (B) The amount of debt allocated;
- (C) The assets among which the debt is allocated;
- (D) The manner in which the debt is allocated;
- (E) The amount of debt allocated to each asset; and

(F) Such other information as the Commissioner may require.

(viii) *Form for election out.* A taxpayer shall elect to allocate debt outstanding on December 31, 1986, in accordance with the provisions of this section other than this paragraph (n)(3) by attaching to the taxpayer's return (or amended return) for the first taxable year beginning after December 31, 1986, a statement to that effect, prominently identified as an election out under §1.163-8T(n)(3).

(ix) *Special rule for partnerships and S corporations.* For purposes of paragraph (n)(3)(ii)(B), (v), (vii) and (viii) of this section (relating to the allocation of debt and election out), a partnership or S corporation shall be treated as the taxpayer with respect to the debt of the partnership or S corporation.

(x) *Irrevocability.* An allocation or election filed in accordance with paragraph (n)(3) (vii) or (viii) of this section may not be revoked or modified except with the consent of the Commissioner.

[T.D. 8145, 52 FR 24999, July 2, 1987, as amended by T.D. 8145, 62 FR 40270, July 28, 1997]

**§ 1.163-9T Personal interest (temporary).**

(a) *In general.* No deduction under any provision of Chapter 1 of the Internal Revenue Code shall be allowed for personal interest paid or accrued during the taxable year by a taxpayer other than a corporation.

(b) *Personal interest—(1) Definition.* For purposes of this section, personal interest is any interest expense other than—

(i) Interest paid or accrued on indebtedness properly allocable (within the meaning of §1.163-8T) to the conduct of trade or business (other than the trade or business of performing services as an employee),

(ii) Any investment interest (within the meaning of section 163(d)(3)),

(iii) Any interest that is taken into account under section 469 in computing income or loss from a passive activity of the taxpayer,

(iv) Any qualified residence interest (within the meaning of section 163(h)(3) and §1.163-10T), and

(v) Any interest payable under section 6601 with respect to the unpaid portion of the tax imposed by section

2001 for the period during which an extension of time for payment of such tax is in effect under section 6163, 6166, or 6166A (as in effect before its repeal by the Economic Recovery Tax Act of 1981).

(2) *Interest relating to taxes*—(i) *In general*. Except as provided in paragraph (b)(2)(iii) of this section, personal interest includes interest—

(A) Paid on underpayments of individual Federal, State or local income taxes and on indebtedness used to pay such taxes (within the meaning of § 1.163-8T), regardless of the source of the income generating the tax liability;

(B) Paid under section 453(e)(4)(B) (interest on deferred tax resulting from certain installment sales) and section 1291(c) (interest on deferred tax attributable to passive foreign investment companies); or

(C) Paid by a trust, S corporation, or other pass-through entity on underpayments of State or local income taxes and on indebtedness used to pay such taxes.

(ii) *Example*. A, an individual, owns stock of an S corporation. On its return for 1987, the corporation underreports its taxable income. Consequently, A underreports A's share of that income on A's tax return. In 1989, A pays the resulting deficiency plus interest to the Internal Revenue Service. The interest paid by A in 1989 on the tax deficiency is personal interest, notwithstanding the fact that the additional tax liability may have arisen out of income from a trade or business. The result would be the same if A's business had been operated as a sole proprietorship.

(iii) *Certain other taxes*. Personal interest does not include interest—

(A) Paid with respect to sales, excise and similar taxes that are incurred in connection with a trade or business or an investment activity;

(B) Paid by an S corporation with respect to an underpayment of income tax from a year in which the S corporation was a C corporation or with respect to an underpayment of the taxes imposed by sections 1374 or 1375, or similar provision of State law; or

(C) Paid by a transferee under section 6901 (tax liability resulting from trans-

ferred assets), or a similar provision of State law, with respect to a C corporation's underpayment of income tax.

(3) *Cross references*. See § 1.163-8T for rules for determining the allocation of interest expense to various activities. See § 1.163-10T for rules concerning qualified residence interest.

(c) *Effective date*—(1) *In general*. The provisions of this section are effective for taxable years beginning after December 31, 1986. In the case of any taxable year beginning in calendar years 1987 through 1990, the amount of personal interest that is nondeductible under this section is limited to the applicable percentage of such amount.

(2) *Applicable percentages*. The applicable percentage for taxable years beginning in 1987 through 1990 are as follows:

1987:	35 percent
1988:	60 percent
1989:	80 percent
1990:	90 percent

[T.D. 8168, 52 FR 48409, Dec. 22, 1987; 68 FR 13226, Mar. 19, 2003]

#### § 1.163-10T Qualified residence interest (temporary).

(a) *Table of contents*. This paragraph (a) lists the major paragraphs that appear in this § 1.163-10T.

- (a) Table of contents.
- (b) Treatment of qualified residence interest.
- (c) Determination of qualified residence interest when secured debt does not exceed the adjusted purchase price.
  - (1) In general.
  - (2) Examples.
- (d) Determination of qualified residence interest when secured debt exceeds adjusted purchase price—Simplified method.
  - (1) In general.
  - (2) Treatment of interest paid or accrued on secured debt that is not qualified residence interest.
  - (3) Example.
- (e) Determination of qualified residence interest when secured debt exceeds adjusted purchase price—Exact method.
  - (1) In general.
  - (2) Determination of applicable debt limit.
  - (3) Example.
  - (4) Treatment of interest paid or accrued with respect to secured debt that is not qualified residence interest.
    - (i) In general.
    - (ii) Example.

§ 1.163-10T

26 CFR Ch. I (4-1-06 Edition)

- (iii) Special rule of debt is allocated to more than one expenditure.
- (iv) Example.
- (f) Special rules.
  - (1) Special rules for personal property.
    - (i) In general.
    - (ii) Example.
  - (2) Special rule for real property.
    - (i) In general.
    - (ii) Example.
- (g) Selection of method.
- (h) Average balance.
  - (1) Average balance defined.
  - (2) Average balance reported by lender.
  - (3) Average balance computed on a daily basis.
    - (i) In general.
    - (ii) Example.
  - (4) Average balance computed using the interest rate.
    - (i) In general.
    - (ii) Points and prepaid interest.
    - (iii) Examples.
  - (5) Average balance computed using average of beginning and ending balance.
    - (i) In general.
    - (ii) Example.
  - (6) Highest principal balance.
  - (7) Other methods provided by the Commissioner.
  - (8) Anti-abuse rule.
- (i) [Reserved]
- (j) Determination of interest paid or accrued during the taxable year.
  - (1) In general.
  - (2) Special rules for cash-basis taxpayers.
    - (i) Points deductible in year paid under section 461(g)(2).
    - (ii) Points and other prepaid interest described in section 461(g)(1).
  - (3) Examples.
- (k) Determination of adjusted purchase price and fair market value.
  - (1) Adjusted purchase price.
    - (i) In general.
    - (ii) Adjusted purchase price of a qualified residence acquired incident to divorce.
      - (iii) Examples.
  - (2) Fair market value.
    - (i) In general.
    - (ii) Examples.
  - (3) Allocation of adjusted purchase price and fair market value.
- (l) [Reserved]
- (m) Grandfathered amount.
  - (1) Substitution for adjusted purchase price.
  - (2) Determination of grandfathered amount.
    - (i) In general.
    - (ii) Special rule for lines of credit and certain other debt.
    - (iii) Fair market value limitation.
    - (iv) Examples.
  - (3) Refinancing of grandfathered debt.
    - (i) In general.
- (ii) Determination of grandfathered amount.
- (4) Limitation on terms of grandfathered debt.
  - (i) In general.
  - (ii) Special rule for nonamortizing debt.
  - (iii) Example.

  - (6) Special rule for the time-sharing arrangements.
- (q) Special rules for tenant-stockholders in cooperative housing corporations.
  - (1) In general.
  - (2) Special rule where stock may not be used to secure debt.

- (3) Treatment of interest expense of the cooperative described in section 216(a)(2).
  - (4) Special rule to prevent tax avoidance.
  - (5) Other definitions.
- (r) Effective date.

(b) *Treatment of qualified residence interest.* Except as provided below, qualified residence interest is deductible under section 163(a). Qualified residence interest is not subject to limitation or otherwise taken into account under section 163(d) (limitation on investment interest), section 163(h)(1) (disallowance of deduction for personal interest), section 263A (capitalization and inclusion in inventory costs of certain expenses) or section 469 (limitations on losses from passive activities). Qualified residence interest is subject to the limitation imposed by section 263(g) (certain interest in the case of straddles), section 264(a) (2) and (4) (interest paid in connection with certain insurance), section 265(a)(2) (interest relating to tax-exempt income), section 266 (carrying charges), section 267(a)(2) (interest with respect to transactions between related taxpayers) section 465 (deductions limited to amount at risk), section 1277 (deferral of interest deduction allocable to accrued market discount), and section 1282 (deferral of interest deduction allocable to accrued discount).

(c) *Determination of qualified residence interest when secured debt does not exceed adjusted purchase price—(1) In general.* If the sum of the average balances for the taxable year of all secured debts on a qualified residence does not exceed the adjusted purchase price (determined as of the end of the taxable year) of the qualified residence, all of the interest paid or accrued during the taxable year with respect to the secured debts is qualified residence interest. If the sum of the average balances for the taxable year of all secured debts exceeds the adjusted purchase price of the qualified residences (determined as of the end of the taxable year), the taxpayer must use either the simplified method (see paragraph (d) of this section) or the exact method (see paragraph (e) of this section) to determine the amount of interest that is qualified residence interest.

(2) *Examples.*

*Example (1).* T purchases a qualified residence in 1987 for \$65,000. T pays \$6,500 in cash and finances the remainder of the purchase with a mortgage of \$58,500. In 1988, the average balance of the mortgage is \$58,000. Because the average balance of the mortgage is less than the adjusted purchase price of the residence (\$65,000), all of the interest paid or accrued during 1988 on the mortgage is qualified residence interest.

*Example (2).* The facts are the same as in example (1), except that T incurs a second mortgage on January 1, 1988, with an initial principal balance of \$2,000. The average balance of the second mortgage in 1988 is \$1,900. Because the sum of the average balance of the first and second mortgages (\$59,900) is less than the adjusted purchase price of the residence (\$65,000), all of the interest paid or accrued during 1988 on both the first and second mortgages is qualified residence interest.

*Example (3).* P borrows \$50,000 on January 1, 1988 and secures the debt by a qualified residence. P pays the interest on the debt monthly, but makes no principal payments in 1988. There are no other debts secured by the residence during 1988. On December 31, 1988, the adjusted purchase price of the residence is \$40,000. The average balance of the debt in 1988 is \$50,000. Because the average balance of the debt exceeds the adjusted purchase price (\$10,000), some of the interest on the debt is not qualified residence interest. The portion of the total interest that is qualified residence interest must be determined in accordance with the rules of paragraph (d) or paragraph (e) of this section.

(d) *Determination of qualified residence interest when secured debt exceeds adjusted purchase price—Simplified method—(1) In general.* Under the simplified method, the amount of qualified residence interest for the taxable year is equal to the total interest paid or accrued during the taxable year with respect to all secured debts multiplied by a fraction (not in excess of one), the numerator of which is the adjusted purchase price (determined as of the end of the taxable year) of the qualified residence and the denominator of which is the sum of the average balances of all secured debts.

(2) *Treatment of interest paid or accrued on secured debt that is not qualified residence interest.* Under the simplified method, the excess of the total interest paid or accrued during the taxable year with respect to all secured debts over the amount of qualified residence interest is personal interest.

(3) *Example.*

§ 1.163-10T

26 CFR Ch. I (4-1-06 Edition)

*Example.* R's principal residence has an adjusted purchase price on December 31, 1988, of \$105,000. R has two debts secured by the residence, with the following average balances and interest payments:

Debt	Date secured	Average balance	Interest
Debt 1	June 1983	\$80,000	\$8,000
Debt 2	May 1987	40,000	4,800
Total	.....	120,000	12,800

The amount of qualified residence interest is determined under the simplified method by multiplying the total interest (\$12,800) by a fraction (expressed as a decimal amount) equal to the adjusted purchase price (\$105,000) of the residence divided by the combined average balances (\$120,000). For 1988, this fraction is equal to 0.875 (\$105,000/\$120,000). Therefore, \$11,200 (\$12,800×0.875) of the total interest is qualified residence interest. The remaining \$1,600 in interest (\$12,800-\$11,200) is personal interest, even if (under the rules of §1.163-8T) such remaining interest would be allocated to some other category of interest.

(e) *Determination of qualified residence interest when secured debt exceeds adjusted purchase price—Exact method—(1) In general.* Under the exact method, the amount of qualified residence interest for the taxable year is determined on a debt-by-debt basis by computing the applicable debt limit for each secured debt and comparing each such applicable debt limit to the average balance of the corresponding debt. If, for the taxable year, the average balance of a secured debt does not exceed the applicable debt limit for that debt, all of the interest paid or accrued during the taxable year with respect to the debt is qualified residence interest. If the average balance of the secured debt exceeds the applicable debt limit for that debt, the amount of qualified residence

interest with respect to the debt is determined by multiplying the interest paid or accrued with respect to the debt by a fraction, the numerator of which is the applicable debt limit for that debt and the denominator of which is the average balance of the debt.

(2) *Determination of applicable debt limit.* For each secured debt, the applicable debt limit for the taxable year is equal to

(i) The lesser of—

(A) The fair market value of the qualified residence as of the date the debt is first secured, and

(B) The adjusted purchase price of the qualified residence as of the end of the taxable year,

(ii) Reduced by the average balance of each debt previously secured by the qualified residence.

For purposes of paragraph (e)(2)(ii) of this section, the average balance of a debt shall be treated as not exceeding the applicable debt limit of such debt. See paragraph (n)(1)(i) of this section for the rule that increases the adjusted purchase price in paragraph (e)(2)(i)(B) of this section by the amount of any qualified indebtedness (certain medical and educational debt). See paragraph (f) of this section for special rules relating to the determination of the fair market value of the qualified residence.

(3) *Example.* (i) R's principal residence has an adjusted purchase price on December 31, 1988, of \$105,000. R has two debts secured by the residence. The average balances and interest payments on each debt during 1988 and fair market value of the residence on the date each debt was secured are as follows:

Debt	Date secured	Fair market value	Average balance	Interest
Debt 1	June 1983	\$100,000	\$80,000	\$8,000
Debt 2	May 1987	140,000	40,000	4,800
Total	.....	.....	120,000	12,800

(ii) The amount of qualified residence interest for 1988 under the exact method is determined as follows. Because there are no debts previously secured by the residence, the applicable debt

limit for Debt 1 is \$100,000 (the lesser of the adjusted purchase price as of the end of the taxable year and the fair market value of the residence at the time the debt was secured). Because

the average balance of Debt 1 (\$80,000) does not exceed its applicable debt limit (\$100,000), all of the interest paid on the debt during 1988 (\$8,000) is qualified residence interest.

(iii) The applicable debt limit for Debt 2 is \$25,000 (\$105,000 (the lesser of \$140,000 fair market value and \$105,000 adjusted purchase price) reduced by \$80,000 (the average balance of Debt 1)). Because the average balance of Debt 2 (\$40,000) exceeds its applicable debt limit, the amount of qualified residence interest on Debt 2 is determined by multiplying the amount of interest paid on the debt during the year (\$4,800) by a fraction equal to its applicable debt limit divided by its average balance ( $\$25,000/\$40,000 = 0.625$ ). Accordingly, \$3,000 ( $\$4,800 \times 0.625$ ) of the interest paid in 1988 on Debt 2 is qualified residence interest. The character of the remaining \$1,800 of interest paid on Debt 2 is determined under the rules of paragraph (e)(4) of this section.

(4) *Treatment of interest paid or accrued with respect to secured debt that is not qualified residence interest—(i) In general.* Under the exact method, the excess of the interest paid or accrued during the taxable year with respect to a secured debt over the amount of qualified residence interest with respect to the debt is allocated under the rules of § 1.163-8T.

(ii) *Example.* T borrows \$20,000 and the entire proceeds of the debt are disbursed by the lender to T's broker to purchase securities held for investment. T secures the debt with T's principal residence. In 1990, T pays \$2,000 of interest on the debt. Assume that under the rules of paragraph (e) of this section, \$1,500 of the interest is qualified residence interest. The remaining \$500 in interest expense would be allocated under the rules of § 1.163-8T. Section 1.163-8T generally allocates debt (and the associated interest expense) by tracing disbursements of the debt proceeds to specific expenditures. Accordingly, the \$500 interest expense on the debt that is not qualified residence interest is investment interest subject to section 163(d).

(iii) *Special rule if debt is allocated to more than one expenditure.* If—

(A) The average balance of a secured debt exceeds the applicable debt limit for that debt, and

(B) Under the rules of § 1.163-8T, interest paid or accrued with respect to such debt is allocated to more than one expenditure,

the interest expense that is not qualified residence interest may be allocated among such expenditures, to the extent of such expenditures, in any manner selected by the taxpayer.

(iv) *Example.* (i) C borrows \$60,000 secured by a qualified residence. C uses (within the meaning of § 1.163-8T) \$20,000 of the proceeds in C's trade or business, \$20,000 to purchase stock held for investment and \$20,000 for personal purposes. In 1990, C pays \$6,000 in interest on the debt and, under the rules of § 1.163-8T, \$2,000 in interest is allocable to trade or business expenses, \$2,000 to investment expenses and \$2,000 to personal expenses. Assume that under paragraph (e) of this section, \$2,500 of the interest is qualified residence interest and \$3,500 of the interest is not qualified residence interest.

(ii) Under paragraph (e)(4)(iii) of this section, C may allocate up to \$2,000 of the interest that is not qualified residence interest to any of the three categories of expenditures up to a total of \$3,500 for all three categories. Therefore, for example, C may allocate \$2,000 of such interest to C's trade or business and \$1,500 of such interest to the purchase of stock.

(f) *Special rules—(1) Special rules for personal property—(i) In general.* If a qualified residence is personal property under State law (e.g., a boat or motorized vehicle)—

(A) For purposes of paragraphs (c)(1) and (d)(1) of this section, if the fair market value of the residence as of the date that any secured debt (outstanding during the taxable year) is first secured by the residence is less than the adjusted purchase price as of the end of the taxable year, the lowest such fair market value shall be substituted for the adjusted purchase price.

(B) For purposes of paragraphs (e)(2)(i)(A) and (f)(1)(i)(A) of this section, the fair market value of the residence as of the date the debt is first secured by the residence shall not exceed

the fair market value as of any date on which the taxpayer borrows any additional amount with respect to the debt.

(ii) *Example.* D owns a recreational vehicle that is a qualified residence under paragraph (p)(4) of this section. The adjusted purchase price and fair market value of the recreational vehicle is \$20,000 in 1989. In 1989, D establishes a line of credit secured by the recreational vehicle. As of June 1, 1992, the fair market value of the vehicle has decreased to \$10,000. On that day, D borrows an additional amount on the debt by using the line of credit. Although under paragraphs (e)(2)(i) and (f)(1)(i)(A) of this section, fair market value is determined at the time the debt is first secured, under paragraph (f)(1)(i)(B) of this section, the fair market value is the lesser of that amount or the fair market value on the most recent date that D borrows any additional amount with respect to the line of credit. Therefore, the fair market value with respect to the debt is \$10,000.

(2) *Special rule for real property—(i) In general.* For purposes of paragraph (e)(2)(i)(A) of this section, the fair market value of a qualified residence that is real property under State law is presumed irrebuttably to be not less than the adjusted purchase price of the residence as of the last day of the taxable year.

(ii) *Example.* (i) C purchases a residence on August 11, 1987, for \$50,000, incurring a first mortgage. The residence is real property under State law. During 1987, C makes \$10,000 in home improvements. Accordingly, the adjusted purchase price of the residence as of December 31, 1988, is \$60,000. C incurs a second mortgage on May 19, 1988, as of which time the fair market value of the residence is \$55,000.

(ii) For purposes of determining the applicable debt limit for each debt, the fair market value of the residence is generally determined as of the time the debt is first secured. Accordingly, the fair market value would be \$50,000 and \$55,000 with respect to the first and second mortgage, respectively. Under the special rule of paragraph (f)(2)(i) of this section, however, the fair market value with respect to both debts in 1988

is \$60,000, the adjusted purchase price on December 31, 1988.

(g) *Selection of method.* For any taxable year, a taxpayer may use the simplified method (described in paragraph (d) of this section) or the exact method (described in paragraph (e) of this section) by completing the appropriate portion of Form 8598. A taxpayer with two qualified residences may use the simplified method for one residence and the exact method for the other residence.

(h) *Average balance—(1) Average balance defined.* For purposes of this section, the term “average balance” means the amount determined under this paragraph (h). A taxpayer is not required to use the same method to determine the average balance of all secured debts during a taxable year or of any particular secured debt from one year to the next.

(2) *Average balance reported by lender.* If a lender that is subject to section 6050H (returns relating to mortgage interest received in trade or business from individuals) reports the average balance of a secured debt on Form 1098, the taxpayer may use the average balance so reported.

(3) *Average balance computed on a daily basis—(i) In general.* The average balance may be determined by—

(A) Adding the outstanding balance of a debt on each day during the taxable year that the debt is secured by a qualified residence, and

(B) Dividing the sum by the number of days during the taxable year that the residence is a qualified residence.

(ii) *Example.* Taxpayer A incurs a debt of \$10,000 on September 1, 1989, securing the debt with A’s principal residence. The residence is A’s principal residence during the entire taxable year. A pays current interest on the debt monthly, but makes no principal payments. The debt is, therefore, outstanding for 122 days with a balance each day of \$10,000. The residence is a qualified residence for 365 days. The average balance of the debt for 1989 is \$3,342 ( $122 \times \$10,000/365$ ).

(4) *Average balance computed using the interest rate—(i) In general.* If all accrued interest on a secured debt is paid at least monthly, the average balance of the secured debt may be determined

by dividing the interest paid or accrued during the taxable year while the debt is secured by a qualified residence by the annual interest rate on the debt. If the interest rate on a debt varies during the taxable year, the lowest annual interest rate that applies to the debt during the taxable year must be used for purposes of this paragraph (h)(4). If the residence securing the debt is a qualified residence for less than the entire taxable year, the average balance of any secured debt may be determined by dividing the average balance determined under the preceding sentence by the percentage of the taxable year that the debt is secured by a qualified residence.

(ii) *Points and prepaid interest.* For purposes of paragraph (h)(4)(i) of this section, the amount of interest paid during the taxable year does not include any amount paid as points and includes prepaid interest only in the year accrued.

(iii) *Examples.*

*Example (1).* B has a line of credit secured by a qualified residence for the entire taxable year. The interest rate on the debt is 10 percent throughout the taxable year. The principal balance on the debt changes throughout the year. B pays the accrued interest on the debt monthly. B pays \$2,500 in interest on the debt during the taxable year. The average balance of the debt (\$25,000) may be computed by dividing the total interest paid by the interest rate (\$25,000 = \$2,500/0.10).

*Example (2).* Assume the same facts as in example 1, except that the residence is a qualified residence, and the debt is outstanding, for only one-half of the taxable year and B pays only \$1,250 in interest on the debt during the taxable year. The average balance of the debt may be computed by first dividing the total interest paid by the interest rate (\$12,500 = \$1,250/0.10). Second, because the residence is not a qualified residence for the entire taxable year, the average balance must be determined by dividing this amount (\$12,500) by the portion of the year that the residence is qualified (0.50). The average balance is therefore \$25,000 (\$12,500/0.50).

(5) *Average balance computed using average of beginning and ending balances—*  
(i) *In general.* If—

(A) A debt requires level payments at fixed equal intervals (e.g., monthly, quarterly) no less often than semi-annually during the taxable year,

(B) The taxpayer prepays no more than one month's principal on the debt during the taxable year, and

(C) No new amounts are borrowed on the debt during the taxable year,

the average balance of the debt may be determined by adding the principal balance as of the first day of the taxable year that the debt is secured by the qualified residence and the principal balance as of the last day of the taxable year that the debt is secured by the qualified residence and dividing the sum by 2. If the debt is secured by a qualified residence for less than the entire period during the taxable year that the residence is a qualified residence, the average balance may be determined by multiplying the average balance determined under the preceding sentence by a fraction, the numerator of which is the number of days during the taxable year that the debt is secured by the qualified residence and the denominator of which is the number of days during the taxable year that the residence is a qualified residence. For purposes of this paragraph (h)(5)(i), the determination of whether payments are level shall disregard the fact that the amount of the payments may be adjusted from time to time to take into account changes in the applicable interest rate.

(ii) *Example.* C borrows \$10,000 in 1988, securing the debt with a second mortgage on a principal residence. The terms of the loan require C to make equal monthly payments of principal and interest so as to amortize the entire loan balance over 20 years. The balance of the debt is \$9,652 on January 1, 1990, and is \$9,450 on December 31, 1990. The average balance of the debt during 1990 may be computed as follows:

Balance on first day of the year: \$9,652  
Balance on last day of the year: \$9,450

$$\text{Average balance: } \frac{\$9,652 + \$9,450}{2} = \$9,551$$

(6) *Highest principal balance.* The average balance of a debt may be determined by taking the highest principal balance of the debt during the taxable year.

(7) *Other methods provided by the Commissioner.* The average balance may be

determined using any other method provided by the Commissioner by form, publication, revenue ruling, or revenue procedure. Such methods may include methods similar to (but with restrictions different from) those provided in paragraph (h) of this section.

(8) *Anti-abuse rule.* If, as a result of the determination of the average balance of a debt using any of the methods specified in paragraphs (h) (4), (5), or (6) of this section, there is a significant overstatement of the amount of qualified residence interest and a principal purpose of the pattern of payments and borrowing on the debt is to cause the amount of such qualified residence interest to be overstated, the district director may redetermine the average balance using the method specified under paragraph (h)(3) of this section.

(i) [Reserved]

(j) *Determination of interest paid or accrued during the taxable year—(1) In general.* For purposes of determining the amount of qualified residence interest with respect to a secured debt, the amount of interest paid or accrued during the taxable year includes only interest paid or accrued while the debt is secured by a qualified residence.

(2) *Special rules for cash-basis taxpayers—(i) Points deductible in year paid under section 461(g)(2).* If points described in section 461(g)(2) (certain points paid in respect of debt incurred in connection with the purchase or improvement of a principal residence) are paid with respect to a debt, the amount of such points is qualified residence interest.

(ii) *Points and other prepaid interest described in section 461(g)(1).* The amount of points or other prepaid interest charged to capital account under section 461(g)(1) (prepaid interest) that is qualified residence interest shall be determined under the rules of paragraphs (c) through (e) of this section in the same manner as any other interest paid with respect to the debt in the taxable year to which such payments are allocable under section 461(g)(1).

(3) *Examples.*

*Example (1).* T designates a vacation home as a qualified residence as of October 1, 1987. The home is encumbered by a mortgage during the entire taxable year. For purposes of determining the amount of qualified resi-

dence interest for 1987, T may take into account the interest paid or accrued on the secured debt from October 1, 1987, through December 31, 1987.

*Example (2).* R purchases a principal residence on June 17, 1987. As part of the purchase price, R obtains a conventional 30-year mortgage, secured by the residence. At closing, R pays 2½ points on the mortgage and interest on the mortgage for the period June 17, 1987 through June 30, 1987. The points are actually paid by R and are not merely withheld from the loan proceeds. R incurs no additional secured debt during 1987. Assuming that the points satisfy the requirements of section 461(g) (2), the entire amount of points and the interest paid at closing are qualified residence interest.

*Example (3).* (i) On July 1, 1987, W borrows \$120,000 to purchase a residence to use as a vacation home. W secures the debt with the residence. W pays 2 points, or \$2,400. The debt has a term of 10 years and requires monthly payments of principal and interest. W is permitted to amortize the points at the rate of \$20 per month over 120 months. W elects to treat the residence as a second residence. W has no other debt secured by the residence. The average balance of the debt in each taxable year is less than the adjusted purchase price of the residence. W sells the residence on June 30, 1990, and pays off the remaining balance of the debt.

(ii) W is entitled to treat the following amounts of the points as interest paid on a debt secured by a qualified residence—

1987 .....	\$120 = \$20×6 months;
1988 .....	\$240 = \$20×12 months;
1989 .....	\$120 = \$20×6 months.
Total .....	\$480

All of the interest paid on the debt, including the allocable points, is qualified residence interest. Upon repaying the debt, the remaining \$1,920 (\$2,400 - \$480) in unamortized points is treated as interest paid in 1990 and, because the average balance of the secured debt in 1990 is less than the adjusted purchase price, is also qualified residence interest.

(k) *Determination of adjusted purchase price and fair market value—(1) Adjusted purchase price—(i) In general.* For purposes of this section, the adjusted purchase price of a qualified residence is equal to the taxpayer's basis in the residence as initially determined under section 1012 or other applicable sections of the Internal Revenue Code, increased by the cost of any improvements to the residence that have been added to the taxpayer's basis in the residence under section 1016(a)(1). Any other adjustments to basis, including

those required under section 1033(b) (involuntary conversions), and 1034(e) (rollover of gain or sale of principal residence) are disregarded in determining the taxpayer's adjusted purchase price. If, for example, a taxpayer's second residence is rented for a portion of the year and its basis is reduced by depreciation allowed in connection with the rental use of the property, the amount of the taxpayer's adjusted purchase price in the residence is not reduced. See paragraph (m) of this section for a rule that treats the sum of the grandfathered amounts of all secured debts as the adjusted purchase price of the residence.

(ii) *Adjusted purchase price of a qualified residence acquired incident to divorce.* [Reserved]

(iii) *Examples.*

*Example (1).* X purchases a residence for \$120,000. X's basis, as determined under section 1012, is the cost of the property, or \$120,000. Accordingly, the adjusted purchase price of the residence is initially \$120,000.

*Example (2).* Y owns a principal residence that has a basis of \$30,000. Y sells the residence for \$100,000 and purchases a new principal residence for \$120,000. Under section 1034, Y does not recognize gain on the sale of the former residence. Under section 1034(e), Y's basis in the new residence is reduced by the amount of gain not recognized. Therefore, under section 1034(e), Y's basis in the new residence is \$50,000 (\$120,000 - \$70,000). For purposes of section 163(h), however, the adjusted purchase price of the residence is not adjusted under section 1034(e). Therefore, the adjusted purchase price of the residence is initially \$120,000.

*Example (3).* Z acquires a residence by gift. The donor's basis in the residence was \$30,000. Z's basis in the residence, determined under section 1015, is \$30,000. Accordingly, the adjusted purchase price of the residence is initially \$30,000.

(2) *Fair market value—(i) In general.* For purposes of this section, the fair market value of a qualified residence on any date is the fair market value of the taxpayer's interest in the residence on such date. In addition, the fair market value determined under this paragraph (k)(2)(i) shall be determined by taking into account the cost of improvements to the residence reasonably expected to be made with the proceeds of the debt.

(ii) *Example.* In 1988, the adjusted purchase price of P's second residence is

\$65,000 and the fair market value of the residence is \$70,000. At that time, P incurs an additional debt of \$10,000, the proceeds of which P reasonably expects to use to add two bedrooms to the residence. Because the fair market value is determined by taking into account the cost of improvements to the residence that are reasonably expected to be made with the proceeds of the debt, the fair market value of the residence with respect to the debt incurred in 1988 is \$80,000 (\$70,000 + \$10,000).

(3) *Allocation of adjusted purchase price and fair market value.* If a property includes both a qualified residence and other property, the adjusted purchase price and the fair market value of such property must be allocated between the qualified residence and the other property. See paragraph (p)(4) of this section for rules governing such an allocation.

(1) [Reserved]

(m) *Grandfathered amount—(1) Substitution for adjusted purchase price.* If, for the taxable year, the sum of the grandfathered amounts, if any, of all secured debts exceeds the adjusted purchase price of the qualified residence, such sum may be treated as the adjusted purchase price of the residence under paragraphs (c), (d) and (e) of this section.

(2) *Determination of grandfathered amount—(i) In general.* For any taxable year, the grandfathered amount of any secured debt that was incurred on or before August 16, 1986, and was secured by the residence continuously from August 16, 1986, through the end of the taxable year, is the average balance of the debt for the taxable year. A secured debt that was not incurred and secured on or before August 16, 1986, has no grandfathered amount.

(ii) *Special rule for lines of credit and certain other debt.* If, with respect to a debt described in paragraph (m)(2)(i) of this section, a taxpayer has borrowed any additional amounts after August 16, 1986, the grandfathered amount of such debt is equal to the lesser of—

(A) The average balance of the debt for the taxable year, or

(B) The principal balance of the debt as of August 16, 1986, reduced (but not below zero) by all principal payments

after August 16, 1986, and before the first day of the current taxable year.

For purposes of this paragraph (m)(2)(ii), a taxpayer shall not be considered to have borrowed any additional amount with respect to a debt merely because accrued interest is added to the principal balance of the debt, so long as such accrued interest is paid by the taxpayer no less often than quarterly.

(iii) *Fair market value limitation.* The grandfathered amount of any debt for any taxable year may not exceed the fair market value of the residence on August 16, 1986, reduced by the principal balance on that day of all previously secured debt.

(iv) *Examples.*

*Example (1).* As of August 16, 1986, T has one debt secured by T's principal residence. The debt is a conventional self-amortizing mortgage and, on August 16, 1986, it has an outstanding principal balance of \$75,000. In 1987, the average balance of the mortgage is \$73,000. The adjusted purchase price of the residence as of the end of 1987 is \$50,000. Because the mortgage was incurred and secured on or before August 16, 1986 and T has not borrowed any additional amounts with respect to the mortgage, the grandfathered amount is the average balance, \$73,000. Because the grandfathered amount exceeds the adjusted purchase price (\$50,000), T may treat the grandfathered amount as the adjusted purchase price in determining the amount of qualified residence interest.

*Example (2).* (i) The facts are the same as in example (1), except that in May 1986, T also obtains a home equity line of credit that, on August 16, 1986, has a principal balance of \$40,000. In November 1986, T borrows an additional \$10,000 on the home equity line, increasing the balance to \$50,000. In December 1986, T repays \$5,000 of principal on the home equity line. The average balance of the home equity line in 1987 is \$45,000.

(ii) Because T has borrowed additional amounts on the line of credit after August 16, 1986, the grandfathered amount for that debt must be determined under the rules of paragraph (m)(2)(ii) of this section. Accordingly, the grandfathered amount for the line of credit is equal to the lesser of \$45,000, the average balance of the debt in 1987, and \$35,000, the principal balance on August 16, 1986, reduced by all principal payments between August 17, 1986, and December 31, 1986 (\$40,000-\$5,000). The sum of the grandfathered amounts with respect to the residence is \$108,000 (\$73,000+\$35,000). Because the sum of the grandfathered amounts exceeds the adjusted purchase price (\$50,000), T may treat

the sum as the adjusted purchase price in determining the qualified residence interest for 1987.

(3) *Refinancing of grandfathered debt—*

(i) *In general.* A debt incurred and secured on or before August 16, 1986, is refinanced if some or all of the outstanding balance of such a debt (the "original debt") is repaid out of the proceeds of a second debt secured by the same qualified residence (the "replacement debt"). In the case of a refinancing, the replacement debt is treated as a debt incurred and secured on or before August 16, 1986, and the grandfathered amount of such debt is the amount (but not less than zero) determined pursuant to paragraph (m)(3)(ii) of this section.

(ii) *Determination of grandfathered amount—(A) Exact refinancing.* If—

(1) The entire proceeds of a replacement debt are used to refinance one or more original debts, and

(2) The taxpayer has not borrowed any additional amounts after August 16, 1986, with respect to the original debt or debts,

the grandfathered amount of the replacement debt is the average balance of the replacement debt. For purposes of the preceding sentence, the fact that proceeds of a replacement debt are used to pay costs of obtaining the replacement debt (including points or other closing costs) shall be disregarded in determining whether the entire proceeds of the replacement debt have been used to refinance one or more original debts.

(B) *Refinancing other than exact refinancings—(1) Year of refinancing.* In the taxable year in which an original debt is refinanced, the grandfathered amount of the original and replacement debts is equal to the lesser of—

(i) The sum of the average balances of the original debt and the replacement debt, and

(ii) The principal balance of the original debt as of August 16, 1986, reduced by all principal payments on the original debt after August 16, 1986, and before the first day of the current taxable year.

(2) *In subsequent years.* In any taxable year after the taxable year in which an

original debt is refinanced, the grandfathered amount of the replacement debt is equal to the least of—

(i) The average balance of the replacement debt for the taxable year,

(ii) The amount of the replacement debt used to repay the principal balance of the original debt, reduced by all principal payments on the replacement debt after the date of the refinancing and before the first day of the current taxable year, or

(iii) The principal balance of the original debt on August 16, 1986, reduced by all principal payments on the original debt after August 16, 1986, and before the date of the refinancing, and further reduced by all principal payments on the replacement debt after the date of the refinancing and before the first day of the current taxable year.

(C) *Example. (i) Facts.* On August 16, 1986, T has a single debt secured by a principal residence with a balance of \$150,000. On July 1, 1988, T refinances the debt, which still has a principal balance of \$150,000, with a new secured debt. The principal balance of the replacement debt throughout 1988 and 1989 is \$150,000. The adjusted purchase price of the residence is \$100,000 throughout 1987, 1988 and 1989. The average balance of the original debt was \$150,000 in 1987 and \$75,000 in 1988. The average balance of the replacement debt is \$75,000 in 1988 and \$150,000 in 1989.

(ii) *Grandfathered amount in 1987.* The original debt was incurred and secured on or before August 16, 1986 and T has not borrowed any additional amounts with respect to the debt. Therefore, its grandfathered amount in 1987 is its average balance (\$150,000). This amount is treated as the adjusted purchase price for 1987 and all of the interest paid on the debt is qualified residence interest.

(iii) *Grandfathered amount in 1988.* Because the replacement debt was used to refinance a debt incurred and secured on or before August 16, 1986, the replacement debt is treated as a grandfathered debt. Because all of the proceeds of the replacement debt were used in the refinancing and because no amounts have been borrowed after August 16, 1986, on the original debt, the grandfathered amount for the original

debt is its average balance (\$75,000) and the grandfathered amount for the replacement debt is its average balance (\$75,000). Since the sum of the grandfathered amounts (\$150,000) exceeds the adjusted purchase price of the residence, the sum of the grandfathered amounts may be substituted for the adjusted purchase price for 1988 and all of the interest paid on the debt is qualified residence interest.

(iv) *Grandfathered amount in 1989.* The grandfathered amount for the replacement debt is its average balance (\$150,000). This amount is treated as the adjusted purchase price for 1989 and all of the interest paid on the mortgage is qualified residence interest.

(4) *Limitation on term of grandfathered debt—(i) In general.* An original debt or replacement debt shall not have any grandfathered amount in any taxable year that begins after the date, as determined on August 16, 1986, that the original debt was required to be repaid in full (the “maturity date”). If a replacement debt is used to refinance more than one original debt, the maturity date is determined by reference to the original debt that, as of August 16, 1986, had the latest maturity date.

(ii) *Special rule for nonamortizing debt.* If an original debt was actually incurred and secured on or before August 16, 1986, and if as of such date the terms of such debt did not require the amortization of its principal over its original term, the maturity date of the replacement debt is the earlier of the maturity date of the replacement debt or the date 30 years after the date the original debt is first refinanced.

(iii) *Example.* C incurs a debt on May 10, 1986, the final payment of which is due May 1, 2006. C incurs a second debt on August 11, 1990, with a term of 20 years and uses the proceeds of the second debt to refinance the first debt. Because, under paragraph (m)(4)(i) of this section, a replacement debt will not have any grandfathered amount in any taxable year that begins after the maturity date of the original debt (May 1, 2006), the second debt has no grandfathered amount in any taxable year after 2006.

(n) *Qualified indebtedness (secured debt used for medical and educational purposes)—(1) In general—(i) Treatment of*

qualified indebtedness. The amount of any qualified indebtedness resulting from a secured debt may be added to the adjusted purchase price under paragraph (e)(2)(i)(B) of this section to determine the applicable debt limit for that secured debt and any other debt subsequently secured by the qualified residence.

(ii) *Determination of amount of qualified indebtedness.* If, as of the end of the taxable year (or the last day in the taxable year that the debt is secured), at least 90 percent of the proceeds of a secured debt are used (within the meaning of paragraph (n)(2) of this section) to pay for qualified medical and educational expenses (within the meaning of paragraphs (n)(3) and (n)(4) of this section), the amount of qualified indebtedness resulting from that debt for the taxable year is equal to the average balance of such debt for the taxable year.

(iii) *Determination of amount of qualified indebtedness for mixed-use debt.* If, as of the end of the taxable year (or the last day in the taxable year that the debt is secured), more than ten percent of the proceeds of a secured debt are used to pay for expenses other than qualified medical and educational expenses, the amount of qualified indebtedness resulting from that debt for the taxable year shall equal the lesser of—

(A) The average balance of the debt, or

(B) The amount of the proceeds of the debt used to pay for qualified medical and educational expenses through the end of the taxable year, reduced by any principal payments on the debt before the first day of the current taxable year.

(iv) *Example.* (i) C incurs a \$10,000 debt on April 20, 1987, which is secured on that date by C's principal residence. C immediately uses (within the meaning of paragraph (n)(2) of this section) \$4,000 of the proceeds of the debt to pay for a qualified medical expense. C makes no principal payments on the debt during 1987. During 1988 and 1989, C makes principal payments of \$1,000 per year. The average balance of the debt during 1988 is \$9,500 and the average balance during 1989 is \$8,500.

(ii) Under paragraph (n)(1)(iii) of this section, C determines the amount of

qualified indebtedness for 1988 as follows:

Average balance .....	\$9,500
Amount of debt used to pay for qualified medical expenses .....	\$4,000
Less payments of principal before 1988 .....	\$0
Net qualified expenses .....	\$4,000

The amount of qualified indebtedness for 1988 is, therefore, \$4,000 (lesser of \$9,500 average balance or \$4,000 net qualified expenses). This amount may be added to the adjusted purchase price of C's principal residence under paragraph (e)(2)(i)(B) of this section for purposes of computing the applicable debt limit for this debt and any other debt subsequently secured by the principal residence.

(iii) C determines the amount of qualified indebtedness for 1989 as follows:

Average balance .....	\$8,500
Amount of debt used to pay for qualified medical expenses .....	\$4,000
Less payments of principal before 1988 .....	\$1,000
Net qualified expenses .....	\$3,000

The amount of qualified indebtedness for 1989 is, therefore, \$3,000 (lesser of \$8,500 average balance or \$3,000 net qualified expenses).

(v) *Prevention of double counting in year of refinancing—(A) In general.* A debt used to pay for qualified medical or educational expenses is refinanced if some or all of the outstanding balance of the debt (the "original debt") is repaid out of the proceeds of a second debt (the "replacement debt"). If, in the year of a refinancing, the combined qualified indebtedness of the original debt and the replacement debt exceeds the combined qualified expenses of such debts, the amount of qualified indebtedness for each such debt shall be determined by multiplying the amount of qualified indebtedness for each such debt by a fraction, the numerator of which is the combined qualified expenses and the denominator of which is the combined qualified indebtedness.

(B) *Definitions.* For purposes of paragraph (n)(1)(v)(A) of this section—

(I) The term "combined qualified indebtedness" means the sum of the qualified indebtedness (determined without regard to paragraph (n)(1)(v) of

this section) for the original debt and the replacement debt.

(2) The term “combined qualified expenses” means the amount of the proceeds of the original debt used to pay for qualified medical and educational expenses through the end of the current taxable year, reduced by any principal payments on the debt before the first day of the current taxable year, and increased by the amount, if any, of the proceeds of the replacement debt used to pay such expenses through the end of the current taxable year other than as part of the refinancing.

(C) *Example.* (i) On August 11, 1987, C incurs a \$8,000 debt secured by a principal residence. C uses (within the meaning of paragraph (n)(2)(i) of this section) \$5,000 of the proceeds of the debt to pay for qualified educational expenses. C makes no principal payments on the debt. On July 1, 1988, C incurs a new debt in the amount of \$8,000 secured by C’s principal residence and uses all of the proceeds of the new debt to repay the original debt. Under paragraph (n)(2)(ii) of this section \$5,000 of the new debt is treated as being used to pay for qualified educational expenses. C makes no principal payments (other than the refinancing) during 1987 or 1988 on either debt and pays all accrued interest monthly. The average balance of each debt in 1988 is \$4,000.

(ii) Under paragraph (n)(1)(iii) of this section, the amount of qualified indebtedness for 1988 with respect to the original debt is \$4,000 (the lesser of its average balance (\$4,000) and the amount of the debt used to pay for qualified medical and educational expenses (\$5,000)). Similarly, the amount of qualified indebtedness for 1988 with respect to the replacement debt is also \$4,000. Both debts, however, are subject in 1988 to the limitation in paragraph (n)(1)(v)(A) of this section. The combined qualified indebtedness, determined without regard to the limitation, is \$8,000 (\$4,000 of qualified indebtedness from each debt). The combined qualified expenses are \$5,000 (\$5,000 from the original debt and \$0 from the replacement debt). The amount of qualified indebtedness from each debt must, therefore, be reduced by a fraction, the numerator of which is \$5,000

(the combined qualified expenses) and the denominator of which is \$8,000 (the combined qualified indebtedness). After application of the limitation, the amount of qualified indebtedness for the original debt is \$2,500 ( $\$4,000 \times \frac{5}{8}$ ). Similarly, the amount of qualified indebtedness for the replacement debt is \$2,500. Note that the total qualified indebtedness for both the original and the replacement debt is \$5,000 ( $\$2,500 + \$2,500$ ). Therefore, C is entitled to the same amount of qualified indebtedness as C would have been entitled to if C had not refinanced the debt.

(vi) *Special rule for principal payments in excess of qualified expenses.* For purposes of paragraph (n)(1)(iii)(B), (n)(1)(v)(B)(2) and (n)(2)(ii) of this section, a principal payment is taken into account only to the extent that the payment, when added to all prior payments, does not exceed the amount used on or before the date of the payment to pay for qualified medical and educational expenses.

(2) *Debt used to pay for qualified medical or educational expenses—(i) In general.* For purposes of this section, the proceeds of a debt are used to pay for qualified medical or educational expenses to the extent that—

(A) The taxpayer pays qualified medical or educational expenses within 90 days before or after the date that amounts are actually borrowed with respect to the debt, the proceeds of the debt are not directly allocable to another expense under § 1.163-8T(c)(3) (allocation of debt; proceeds not disbursed to borrower) and the proceeds of any other debt are not allocable to the medical or educational expenses under § 1.163-8T(c)(3), or

(B) The proceeds of the debt are otherwise allocated to such expenditures under § 1.163-8T.

(ii) *Special rule for refinancings.* For purposes of this section, the proceeds of a debt are used to pay for qualified medical and educational expenses to the extent that the proceeds of the debt are allocated under § 1.163-8T to the repayment of another debt (the “original debt”), but only to the extent of the amount of the original debt used

to pay for qualified medical and educational expenses, reduced by any principal payments on such debt up to the time of the refinancing.

(iii) *Other special rules.* The following special rules apply for purposes of this section.

(A) Proceeds of a debt are used to pay for qualified medical or educational expenses as of the later of the taxable year in which such proceeds are borrowed or the taxable year in which such expenses are paid.

(B) The amount of debt which may be treated as being used to pay for qualified medical or educational expenses may not exceed the amount of such expenses.

(C) Proceeds of a debt may not be treated as being used to pay for qualified medical or educational expenses to the extent that:

(1) The proceeds have been repaid as of the time the expense is paid;

(2) The proceeds are actually borrowed before August 17, 1986; or

(3) The medical or educational expenses are paid before August 17, 1986.

(iv) *Examples—*

*Example (1).* A pays a \$5,000 qualified educational expense from a checking account that A maintains at Bank 1 on November 9, 1987. On January 1, 1988, A incurs a \$20,000 debt that is secured by A's residence and places the proceeds of the debt in a savings account that A also maintains at Bank 1. A pays another \$5,000 qualified educational expense on March 15 from a checking account that A maintains at Bank 2. Under paragraph (n)(2) of this section, the debt proceeds are used to pay for both educational expenses, regardless of other deposits to, or expenditures from, the accounts, because both expenditures are made within 90 days before or after the debt was incurred.

*Example (2).* B pays a \$5,000 qualified educational expense from a checking account on November 1, 1987. On November 30, 1987, B incurs a debt secured by B's residence, and the lender disburses the debt proceeds directly to a person who sells B a new car. Although the educational expense is paid within 90 days of the date the debt is incurred, the proceeds of the debt are not used to pay for the educational expense because the proceeds are directly allocable to the purchase of the new car under §1.163-8T(c)(3).

*Example (3).* On November 1, 1987, C borrows \$5,000 from C's college. The proceeds of this debt are not disbursed to C, but rather are used to pay tuition fees for C's attendance at the college. On November 30, 1987, C incurs a second debt and secures the debt by C's resi-

dence. Although the \$5,000 educational expense is paid within 90 days before the second debt is incurred, the proceeds of the second debt are not used to pay for the educational expense, because the proceeds of the first debt are directly allocable to the educational expense under §1.163-8T(c)(3).

*Example (4).* On January 1, 1988, D incurs a \$20,000 debt secured by a qualified residence. D places the proceeds of the debt in a separate account (*i.e.*, the proceeds of the debt are the only deposit in the account). D makes payments of \$5,000 each for qualified educational expenses on September 1, 1988, September 1, 1989, September 1, 1990, and September 1, 1991. Because the debt proceeds are allocated to educational expenses as of the date the expenses are paid, under the rules of §1.163-8T(c)(4), the following amounts of the debt proceeds are used to pay for qualified educational expenses as of the end of each year:

1988:	\$5,000
1989:	\$10,000
1990:	\$15,000
1991:	\$20,000

*Example (5).* During 1987 E incurs a \$10,000 debt secured by a principal residence. E uses (within the meaning of paragraph (n)(2)(i) of this section) all of the proceeds of the debt to pay for qualified educational expenses. On August 20, 1988, at which time the balance of the debt is \$9,500, E incurs a new debt in the amount of \$9,500 secured by E's principal residence and uses all of the proceeds of the new debt to repay the original debt. Under paragraph (n)(2)(ii) of this section, all of the proceeds of the new debt are used to pay for qualified educational expenses.

(3) *Qualified medical expenses.* Qualified medical expenses are amounts that are paid for medical care (within the meaning of section 213(d)(1) (A) and (B)) for the taxpayer, the taxpayer's spouse, or a dependent of the taxpayer (within the meaning of section 152), and that are not compensated for by insurance or otherwise.

(4) *Qualified educational expenses.* Qualified educational expenses are amounts that are paid for tuition, fees, books, supplies and equipment required for enrollment, attendance or courses of instruction at an educational organization described in section 170(b)(1)(A)(ii) and for any reasonable living expenses while away from home while in attendance at such an institution, for the taxpayer, the taxpayer's spouse or a dependent of the taxpayer (within the meaning of section 152) and that are not reimbursed by scholarship or otherwise.

(o) *Secured debt*—(1) *In general.* For purposes of this section, the term “secured debt” means a debt that is on the security of any instrument (such as a mortgage, deed of trust, or land contract)—

(i) That makes the interest of the debtor in the qualified residence specific security for the payment of the debt,

(ii) Under which, in the event of default, the residence could be subjected to the satisfaction of the debt with the same priority as a mortgage or deed of trust in the jurisdiction in which the property is situated, and

(iii) That is recorded, where permitted, or is otherwise perfected in accordance with applicable State law.

A debt will not be considered to be secured by a qualified residence if it is secured solely by virtue of a lien upon the general assets of the taxpayer or by a security interest, such as a mechanic’s lien or judgment lien, that attaches to the property without the consent of the debtor.

(2) *Special rule for debt in certain States.* Debt will not fail to be treated as secured solely because, under an applicable State or local homestead law or other debtor protection law in effect on August 16, 1986, the security interest is ineffective or the enforceability of the security interest is restricted.

(3) *Times at which debt is treated as secured.* For purposes of this section, a debt is treated as secured as of the date on which each of the requirements of paragraph (o)(1) of this section are satisfied, regardless of when amounts are actually borrowed with respect to the debt. For purposes of this paragraph (o)(3), if the instrument is recorded within a commercially reasonable time after the security interest is granted, the instrument will be treated as recorded on the date that the security interest was granted.

(4) *Partially secured debt*—(i) *In general.* If the security interest is limited to a prescribed maximum amount or portion of the residence, and the average balance of the debt exceeds such amount or the value of such portion, such excess shall not be treated as secured debt for purposes of this section.

(ii) *Example.* T borrows \$80,000 on January 1, 1991. T secures the debt with a

principal residence. The security in the residence for the debt, however, is limited to \$20,000. T pays \$8,000 in interest on the debt in 1991 and the average balance of the debt in that year is \$80,000. Because the average balance of the debt exceeds the maximum amount of the security interest, such excess is not treated as secured debt. Therefore, for purposes of applying the limitation on qualified residence interest, the average balance of the secured debt is \$20,000 (the maximum amount of the security interest) and the interest paid or accrued on the secured debt is \$2,000 (the total interest paid on the debt multiplied by the ratio of the average balance of the secured debt (\$20,000) and the average balance of the total debt (\$80,000)).

(5) *Election to treat debt as not secured by a qualified residence*—(i) *In general.* For purposes of this section, a taxpayer may elect to treat any debt that is secured by a qualified residence as not secured by the qualified residence. An election made under this paragraph shall be effective for the taxable year for which the election is made and for all subsequent taxable years unless revoked with the consent of the Commissioner.

(ii) *Example.* T owns a principal residence with a fair market value of \$75,000 and an adjusted purchase price of \$40,000. In 1988, debt A, the proceeds of which were used to purchase the residence, has an average balance of \$15,000. The proceeds of debt B, which is secured by a second mortgage on the property, are allocable to T’s trade or business under § 1.163-8T and has an average balance of \$25,000. In 1988, T incurs debt C, which is also secured by T’s principal residence and which has an average balance in 1988 of \$5,000. In the absence of an election to treat debt B as unsecured, the applicable debt limit for debt C in 1988 under paragraph (e) of this section would be zero dollars (\$40,000 – \$15,000 – \$25,000) and none of the interest paid on debt C would be qualified residence interest. If, however, T makes or has previously made an election pursuant to paragraph (o)(5)(i) of this section to treat debt B as not secured by the residence, the applicable debt limit for debt C would be \$25,000 (\$40,000 – \$15,000), and all of the

interest paid on debt C during the taxable year would be qualified residence interest. Since the proceeds of debt B are allocable to T's trade or business under § 1.163-8T, interest on debt B may be deductible under other sections of the Internal Revenue Code.

(iii) *Allocation of debt secured by two qualified residences.* [Reserved]

(p) *Definition of qualified residence*—(1) *In general.* The term “qualified residence” means the taxpayer’s principal residence (as defined in paragraph (p)(2) of this section), or the taxpayer’s second residence (as defined in paragraph (p)(3) of this section).

(2) *Principal residence.* The term “principal residence” means the taxpayer’s principal residence within the meaning of section 1034. For purposes of this section, a taxpayer cannot have more than one principal residence at any one time.

(3) *Second residence*—(i) *In general.* The term “second residence” means—

(A) A residence within the meaning of paragraph (p)(3)(ii) of this section,

(B) That the taxpayer uses as a residence within the meaning of paragraph (p)(3)(iii) of this section, and

(C) That the taxpayer elects to treat as a second residence pursuant to paragraph (p)(3)(iv) of this section.

A taxpayer cannot have more than one second residence at any time.

(ii) *Definition of residence.* Whether property is a residence shall be determined based on all the facts and circumstances, including the good faith of the taxpayer. A residence generally includes a house, condominium, mobile home, boat, or house trailer, that contains sleeping space and toilet and cooking facilities. A residence does not include personal property, such as furniture or a television, that, in accordance with the applicable local law, is not a fixture.

(iii) *Use as a residence.* If a residence is rented at any time during the taxable year, it is considered to be used as a residence only if the taxpayer uses it during the taxable year as a residence within the meaning of section 280A(d). If a residence is not rented at any time during the taxable year, it shall be considered to be used as a residence. For purposes of the preceding sentence, a residence will be deemed to be rented

during any period that the taxpayer holds the residence out for rental or resale or repairs or renovates the residence with the intention of holding it out for rental or resale.

(iv) *Election of second residence.* A taxpayer may elect a different residence (other than the taxpayer’s principal residence) to be the taxpayer’s second residence for each taxable year. A taxpayer may not elect different residences as second residences at different times of the same taxable year except as provided below—

(A) If the taxpayer acquires a new residence during the taxable year, the taxpayer may elect the new residence as a taxpayer’s second residence as of the date acquired;

(B) If property that was the taxpayer’s principal residence during the taxable year ceases to qualify as the taxpayer’s principal residence, the taxpayer may elect that property as the taxpayer’s second residence as of the date that the property ceases to be the taxpayer’s principal residence; or

(C) If property that was the taxpayer’s second residence is sold during the taxable year or becomes the taxpayer’s principal residence, the taxpayer may elect a new second residence as of such day.

(4) *Allocations between residence and other property*—(i) *In general.* For purposes of this section, the adjusted purchase price and fair market value of property must be allocated between the portion of the property that is a qualified residence and the portion that is not a qualified residence. Neither the average balance of the secured debt nor the interest paid or accrued on secured debt is so allocated. Property that is not used for residential purposes does not qualify as a residence. For example, if a portion of the property is used as an office in the taxpayer’s trade or business, that portion of the property does not qualify as a residence.

(ii) *Special rule for rental of residence.* If a taxpayer rents a portion of his or her principal or second residence to another person (a “tenant”), such portion may be treated as used by the taxpayer for residential purposes if, but only if—

(A) Such rented portion is used by the tenant primarily for residential purposes,

(B) The rented portion is not a self-contained residential unit containing separate sleeping space and toilet and cooking facilities, and

(C) The total number of tenants renting (directly or by sublease) the same or different portions of the residence at any time during the taxable year does not exceed two. For this purpose, if two persons (and the dependents, as defined by section 152, of either of them) share the same sleeping quarters, they shall be treated as a single tenant.

(iii) *Examples.*

*Example (1).* D, a dentist, uses a room in D's principal residence as an office which qualifies under section 280A(c)(1)(B) as a portion of the dwelling unit used exclusively on a regular basis as a place of business for meeting with patients in the normal course of D's trade or business. D's adjusted purchase price of the property is \$65,000; \$10,000 of which is allocable under paragraph (o)(4)(i) of this section to the room used as an office. For purposes of this section, D's residence does not include the room used as an office. The adjusted purchase price of the residence is, accordingly, \$55,000. Similarly, the fair market value of D's residence must be allocated between the office and the remainder of the property.

*Example (2).* J rents out the basement of property that is otherwise used as J's principal residence. The basement is a self-contained residential unit, with sleeping space and toilet and cooking facilities. The adjusted purchase price of the property is \$100,000; \$15,000 of which is allocable under paragraph (o)(4)(i) of this section to the basement. For purposes of this section, J's residence does not include the basement and the adjusted purchase price of the residence is \$85,000. Similarly, the fair market value of the residence must be allocated between the basement unit and the remainder of the property.

(5) *Residence under construction—(i) In general.* A taxpayer may treat a residence under construction as a qualified residence for a period of up to 24 months, but only if the residence becomes a qualified residence, without regard to this paragraph (p)(5)(i), as of the time that the residence is ready for occupancy.

(ii) *Example.* X owns a residential lot suitable for the construction of a vacation home. On April 20, 1987, X obtains a mortgage secured by the lot and any property to be constructed on the lot. On August 9, 1987, X begins construction of a residence on the lot. The resi-

dence is ready for occupancy on November 9, 1989. The residence is used as a residence within the meaning of paragraph (p)(3)(iii) of this section during 1989 and X elects to treat the residence as his second residence for the period November 9, 1989, through December 31, 1989. Since the residence under construction is a qualified residence as of the first day that the residence is ready for occupancy (November 9, 1987), X may treat the residence as his second residence under paragraph (p)(5)(i) of this section for up to 24 months of the period during which the residence is under construction, commencing on or after the date that construction is begun (August 9, 1987). If X treats the residence under construction as X's second residence beginning on August 9, 1987, the residence under construction would cease to qualify as a qualified residence under paragraph (p)(5)(i) on August 8, 1989. The residence's status as a qualified residence for future periods would be determined without regard to paragraph (p)(5)(i) of this section.

(6) *Special rule for time-sharing arrangements.* Property that is otherwise a qualified residence will not fail to qualify as such solely because the taxpayer's interest in or right to use the property is restricted by an arrangement whereby two or more persons with interests in the property agree to exercise control over the property for different periods during the taxable year. For purposes of determining the use of a residence under paragraph (p)(3)(iii) of this section, a taxpayer will not be considered to have used or rented a residence during any period that the taxpayer does not have the right to use the property or to receive any benefits from the rental of the property.

(q) *Special rules for tenant-stockholders in cooperative housing corporations—(1) In general.* For purposes of this section, a residence includes stock in a cooperative housing corporation owned by a tenant-stockholder if the house or apartment which the tenant-stockholder is entitled to occupy by virtue of owning such stock is a residence within the meaning of paragraph (p)(3)(ii) of this section.

(2) *Special rule where stock may not be used to secure debt.* For purposes of this section, if stock described in paragraph (q)(1) of this section may not be used to secure debt because of restrictions under local or State law or because of restrictions in the cooperative agreement (other than restrictions the principal purpose of which is to permit the tenant-stockholder to treat unsecured debt as secured debt under this paragraph (q)(2)), debt may be treated as secured by such stock to the extent that the proceeds of the debt are allocated to the purchase of the stock under the rules of § 1.163-8T. For purposes of this paragraph (q)(2), proceeds of debt incurred prior to January 1, 1987, may be treated as allocated to the purchase of such stock to the extent that the tenant-stockholder has properly and consistently deducted interest expense on such debt as home mortgage interest attributable to such stock on Schedule A of Form 1040 in determining his taxable income for taxable years beginning before January 1, 1987. For purposes of this paragraph (q)(2), amended returns filed after December 22, 1987, are disregarded.

(3) *Treatment of interest expense of the cooperative described in section 216(a)(2).* For purposes of section 163(h) and § 1.163-9T (disallowance of deduction for personal interest) and section 163(d) (limitation on investment interest), any amount allowable as a deduction to a tenant-stockholder under section 216(a)(2) shall be treated as interest paid or accrued by the tenant-stockholder. If a tenant-stockholder's stock in a cooperative housing corporation is a qualified residence of the tenant-shareholder, any amount allowable as a deduction to the tenant-stockholder under section 216(a)(2) is qualified residence interest.

(4) *Special rule to prevent tax avoidance.* If the amount treated as qualified residence interest under this section exceeds the amount which would be so treated if the tenant-stockholder were treated as directly owning his proportionate share of the assets and liabilities of the cooperative and one of the principal purposes of the cooperative arrangement is to permit the tenant-stockholder to increase the amount of qualified residence interest, the dis-

trict director may determine that such excess is not qualified residence interest.

(5) *Other definitions.* For purposes of this section, the terms "tenant-stockholder," "cooperative housing corporation" and "proportionate share" shall have the meaning given by section 216 and the regulations thereunder.

(r) *Effective date.* The provisions of this section are effective for taxable years beginning after December 31, 1986.

[T.D. 8168, 52 FR 48410, Dec. 22, 1987]

**§ 1.163-12 Deduction of original issue discount on instrument held by related foreign person.**

(a) *General rules—(1) Deferral of deduction.* Except as provided in paragraph (b) of this section, section 163(e)(3) requires a taxpayer to use the cash method of accounting with respect to the deduction of original issue discount owed to a related foreign person. A deduction for an otherwise deductible portion of original issue discount with respect to a debt instrument will not be allowable as a deduction to the issuer until paid if, at the close of the issuer's taxable year in which such amount would otherwise be deductible, the person holding the debt instrument is a related foreign person. For purposes of this section, a related foreign person is any person that is not a United States person within the meaning of section 7701(a)(30), and that is related (within the meaning of section 267(b)) to the issuer at the close of the taxable year in which the amount incurred by the taxpayer would otherwise be deductible. Section 267(f) defines "controlled group" for purposes of section 267(b) without regard to the limitations of section 1563(b). An amount is treated as paid for purposes of this section if the amount is considered paid for purposes of section 1441 or section 1442 (including an amount taken into account pursuant to section 871(a)(1)(C), section 881(a)(3), or section 884(f)). The rules of this paragraph (a) apply even if the original issue discount is not subject to United States tax, or is subject to a reduced rate of tax, pursuant to a provision of the Internal Revenue Code or a treaty obligation of the United States. For purposes

of this section, original issue discount is an amount described in section 1273, whether from sources inside or outside the United States.

(2) *Change in method of accounting.* A taxpayer that uses a method of accounting other than that required by the rules of this section must change its method of accounting to conform its method to the rules of this section. The taxpayer's change in method must be made pursuant to the rules of section 446(e), the regulations thereunder, and any applicable administrative procedures prescribed by the Commissioner. Because the rules of this section prescribe a method of accounting, these rules apply in the determination of a taxpayer's earnings and profits pursuant to § 1.312-6(a).

(b) *Exceptions and special rules*—(1) *Effectively connected income.* The provisions of section 267(a)(2) and the regulations thereunder, and not the provisions of paragraph (a) of this section, apply to an amount of original issue discount that is income of the related foreign person that is effectively connected with the conduct of a United States trade or business of such related foreign person. An amount described in this paragraph (b)(1) thus is allowable as a deduction as of the day on which the amount is includible in the gross income of the related foreign person as effectively connected income under sections 872(a)(2) or 882(b) (or, if later, as of the day on which the deduction would be so allowable but for section 267(a)(2)). However, this paragraph (b)(1) does not apply if the related foreign person is exempt from United States income tax on the amount owed, or is subject to a reduced rate of tax, pursuant to a treaty obligation of the United States (such as under an article relating to the taxation of business profits).

(2) *Certain obligations issued by natural persons.* This section does not apply to any debt instrument described in section 163(e)(4) (relating to obligations issued by natural persons before March 2, 1984, and to loans between natural persons).

(3) *Amounts owed to a foreign personal holding company, controlled foreign corporation, or passive foreign investment company*—(i) *Foreign personal holding*

*companies.* If an amount to which paragraph (a) of this section otherwise applies is owed to a related foreign person that is a foreign personal holding company within the meaning of section 552, then the amount is allowable as a deduction as of the day on which the amount is includible in the income of the foreign personal holding company. The day on which the amount is includible in income is determined with reference to the method of accounting under which the foreign personal holding company computes its taxable income and earnings and profits for purposes of sections 551 through 558. See section 551(c) and the regulations thereunder for the reporting requirements of the foreign personal holding company provisions (sections 551 through 558).

(ii) *Controlled foreign corporations.* If an amount to which paragraph (a) of this section otherwise applies is owed to a related foreign person that is a controlled foreign corporation within the meaning of section 957, then the amount is allowable as a deduction as of the day on which the amount is includible in the income of the controlled foreign corporation. The day on which the amount is includible in income is determined with reference to the method of accounting under which the controlled foreign corporation computes its taxable income and earnings and profits for purposes of sections 951 through 964. See section 6038 and the regulations thereunder for the reporting requirements of the controlled foreign corporation provisions (sections 951 through 964).

(iii) *Passive foreign investment companies.* If an amount to which paragraph (a) of this section otherwise applies is owed to a related foreign person that is a passive foreign investment company within the meaning of section 1296, then the amount is allowable as a deduction as of the day on which amount is includible in the income of the passive foreign investment company. The day on which the amount is includible in income is determined with reference to the method of accounting under which the earnings and profits of the passive foreign investment company are computed for purposes of sections 1291 through 1297. See sections 1291

through 1297 and the regulations thereunder for the reporting requirements of the passive foreign investment company provisions. This exception shall apply, however, only if the person that owes the amount at issue has made and has in effect an election pursuant to section 1295 with respect to the passive foreign investment company to which the amount at issue is owed.

(c) *Application of section 267.* Except as limited in paragraph (b)(1) of this section, the provisions of section 267 and the regulations thereunder shall apply to any amount of original issue discount to which the provisions of this section do not apply.

(d) *Effective date.* The rules of this section are effective with respect to all original issue discount on debt instruments issued after June 9, 1984.

[T.D. 8465, 58 FR 236, Jan. 5, 1993; 58 FR 8098, Feb. 11, 1993]

**§ 1.163-13 Treatment of bond issuance premium.**

(a) *General rule.* If a debt instrument is issued with bond issuance premium, this section limits the amount of the issuer's interest deduction otherwise allowable under section 163(a). In general, the issuer determines its interest deduction by offsetting the interest allocable to an accrual period with the bond issuance premium allocable to that period. Bond issuance premium is allocable to an accrual period based on a constant yield. The use of a constant yield to amortize bond issuance premium is intended to generally conform the treatment of debt instruments having bond issuance premium with those having original issue discount. Unless otherwise provided, the terms used in this section have the same meaning as those terms in section 163(e), sections 1271 through 1275, and the corresponding regulations. Moreover, unless otherwise provided, the provisions of this section apply in a manner consistent with those of section 163(e), sections 1271 through 1275, and the corresponding regulations. In addition, the anti-abuse rule in § 1.1275-2(g) applies for purposes of this section. For rules dealing with the treatment of bond premium by a holder, see §§ 1.171-1 through 1.171-5.

(b) *Exceptions.* This section does not apply to—

(1) A debt instrument described in section 1272(a)(6)(C) (regular interests in a REMIC, qualified mortgages held by a REMIC, and certain other debt instruments, or pools of debt instruments, with payments subject to acceleration); or

(2) A debt instrument to which § 1.1275-4 applies (relating to certain debt instruments that provide for contingent payments).

(c) *Bond issuance premium.* Bond issuance premium is the excess, if any, of the issue price of a debt instrument over its stated redemption price at maturity. For purposes of this section, the issue price of a convertible bond (as defined in § 1.171-1(e)(1)(iii)(C)) does not include an amount equal to the value of the conversion option (as determined under § 1.171-1(e)(1)(iii)(A)).

(d) *Offsetting qualified stated interest with bond issuance premium—(1) In general.* An issuer amortizes bond issuance premium by offsetting the qualified stated interest allocable to an accrual period with the bond issuance premium allocable to the accrual period. This offset occurs when the issuer takes the qualified stated interest into account under its regular method of accounting.

(2) *Qualified stated interest allocable to an accrual period.* See § 1.446-2(b) to determine the accrual period to which qualified stated interest is allocable and to determine the accrual of qualified stated interest within an accrual period.

(3) *Bond issuance premium allocable to an accrual period.* The bond issuance premium allocable to an accrual period is determined under this paragraph (d)(3). Within an accrual period, the bond issuance premium allocable to the period accrues ratably.

(i) *Step one: Determine the debt instrument's yield to maturity.* The yield to maturity of a debt instrument is determined under the rules of § 1.1272-1(b)(1)(i).

(ii) *Step two: Determine the accrual periods.* The accrual periods are determined under the rules of § 1.1272-1(b)(1)(ii).

(iii) *Step three: Determine the bond issuance premium allocable to the accrual*

*period.* The bond issuance premium allocable to an accrual period is the excess of the qualified stated interest allocable to the accrual period over the product of the adjusted issue price at the beginning of the accrual period and the yield. In performing this calculation, the yield must be stated appropriately taking into account the length of the particular accrual period. Principles similar to those in § 1.1272-1(b)(4) apply in determining the bond issuance premium allocable to an accrual period.

(4) *Bond issuance premium in excess of qualified stated interest—(i) Ordinary income.* If the bond issuance premium allocable to an accrual period exceeds the qualified stated interest allocable to the accrual period, the excess is treated as ordinary income by the issuer for the accrual period. However, the amount treated as ordinary income is limited to the amount by which the issuer's total interest deductions on the debt instrument in prior accrual periods exceed the total amount treated by the issuer as ordinary income on the debt instrument in prior accrual periods.

(ii) *Carryforward.* If the bond issuance premium allocable to an accrual period exceeds the sum of the qualified stated interest allocable to the accrual period and the amount treated as ordinary income for the accrual period under paragraph (d)(4)(i) of this section, the excess is carried forward to the next accrual period and is treated as bond issuance premium allocable to that period. If a carryforward exists on the date the debt instrument is retired, the carryforward is treated as ordinary income on that date.

(e) *Special rules—(1) Variable rate debt instruments.* An issuer determines bond issuance premium on a variable rate debt instrument by reference to the stated redemption price at maturity of the equivalent fixed rate debt instrument constructed for the variable rate debt instrument. The issuer also allocates any bond issuance premium among the accrual periods by reference to the equivalent fixed rate debt instrument. The issuer constructs the equivalent fixed rate debt instrument, as of the issue date, by using the principles of § 1.1275-5(e).

(2) *Inflation-indexed debt instruments.* An issuer determines bond issuance premium on an inflation-indexed debt instrument by assuming that there will be no inflation or deflation over the term of the instrument. The issuer also allocates any bond issuance premium among the accrual periods by assuming that there will be no inflation or deflation over the term of the instrument. The bond issuance premium allocable to an accrual period offsets qualified stated interest allocable to the period. Notwithstanding paragraph (d)(4) of this section, if the bond issuance premium allocable to an accrual period exceeds the qualified stated interest allocable to the period, the excess is treated as a deflation adjustment under § 1.1275-7(f)(1)(ii). See § 1.1275-7 for other rules relating to inflation-indexed debt instruments.

(3) *Certain debt instruments subject to contingencies—(i) In general.* Except as provided in paragraph (e)(3)(ii) of this section, the rules of § 1.1272-1(c) apply to determine a debt instrument's payment schedule for purposes of this section. For example, an issuer uses the payment schedule determined under § 1.1272-1(c) to determine the amount, if any, of bond issuance premium on the debt instrument, the yield and maturity of the debt instrument, and the allocation of bond issuance premium to an accrual period.

(ii) *Mandatory sinking fund provision.* Notwithstanding paragraph (e)(3)(i) of this section, if a debt instrument is subject to a mandatory sinking fund provision described in § 1.1272-1(c)(3), the issuer must determine the payment schedule by assuming that a pro rata portion of the debt instrument will be called under the sinking fund provision.

(4) *Remote and incidental contingencies.* For purposes of determining the amount of bond issuance premium and allocating bond issuance premium among accrual periods, if a bond provides for a contingency that is remote or incidental (within the meaning of § 1.1275-2(h)), the issuer takes the contingency into account under the rules for remote and incidental contingencies in § 1.1275-2(h).

(f) *Example.* The following example illustrates the rules of this section:

*Example—* (i) *Facts.* On February 1, 1999, X issues for \$110,000 a debt instrument maturing on February 1, 2006, with a stated principal amount of \$100,000, payable at maturity. The debt instrument provides for unconditional payments of interest of \$10,000, payable on February 1 of each year. X uses the calendar year as its taxable year, X uses the cash receipts and disbursements method of accounting, and X decides to use annual accrual periods ending on February 1 of each year. X's calculations assume a 30-day month and 360-day year.

(ii) *Amount of bond issuance premium.* The issue price of the debt instrument is \$110,000. Because the interest payments on the debt instrument are qualified stated interest, the stated redemption price at maturity of the debt instrument is \$100,000. Therefore, the amount of bond issuance premium is \$10,000 (\$110,000 - \$100,000).

(iii) *Bond issuance premium allocable to the first accrual period.* Based on the payment schedule and the issue price of the debt instrument, the yield of the debt instrument is 8.07 percent, compounded annually. (Although, for purposes of simplicity, the yield as stated is rounded to two decimal places, the computations do not reflect this rounding convention.) The bond issuance premium allocable to the accrual period ending on February 1, 2000, is the excess of the qualified stated interest allocable to the period (\$10,000) over the product of the adjusted issue price at the beginning of the period (\$110,000) and the yield (8.07 percent, compounded annually). Therefore, the bond issuance premium allocable to the accrual period is \$1,118.17 (\$10,000 - \$8,881.83).

(iv) *Premium used to offset interest.* Although X makes an interest payment of \$10,000 on February 1, 2000, X only deducts interest of \$8,881.83, the qualified stated interest allocable to the period (\$10,000) offset with the bond issuance premium allocable to the period (\$1,118.17).

(g) *Effective date.* This section applies to debt instruments issued on or after March 2, 1998.

(h) *Accounting method changes—*(1) *Consent to change.* An issuer required to change its method of accounting for bond issuance premium to comply with this section must secure the consent of the Commissioner in accordance with the requirements of § 1.446-1(e). Paragraph (h)(2) of this section provides the Commissioner's automatic consent for certain changes.

(2) *Automatic consent.* The Commissioner grants consent for an issuer to change its method of accounting for bond issuance premium on debt instruments issued on or after March 2, 1998.

Because this change is made on a cut-off basis, no items of income or deduction are omitted or duplicated and, therefore, no adjustment under section 481 is allowed. The consent granted by this paragraph (h)(2) applies provided—

(i) The change is made to comply with this section;

(ii) The change is made for the first taxable year for which the issuer must account for a debt instrument under this section; and

(iii) The issuer attaches to its federal income tax return for the taxable year containing the change a statement that it has changed its method of accounting under this section.

[T.D. 8746, 62 FR 68176, Dec. 31, 1997, as amended by T.D. 8838, 64 FR 48547, Sept. 7, 1999]

**§ 1.163(d)-1 Time and manner for making elections under the Omnibus Budget Reconciliation Act of 1993 and the Jobs and Growth Tax Relief Reconciliation Act of 2003.**

(a) *Description.* Section 163(d)(4)(B)(iii), as added by section 13206(d) of the Omnibus Budget Reconciliation Act of 1993 (Pub. L. 103-66, 107 Stat. 467), allows an electing taxpayer to take all or a portion of certain net capital gain attributable to dispositions of property held for investment into account as investment income. Section 163(d)(4)(B), as amended by section 302(b) of the Jobs and Growth Tax Relief Reconciliation Act of 2003 (Pub. L. 108-27, 117 Stat. 762), allows an electing taxpayer to take all or a portion of qualified dividend income, as defined in section 1(h)(11)(B), into account as investment income. As a consequence, the net capital gain and qualified dividend income taken into account as investment income under these elections are not eligible to be taxed at the capital gains rates. An election may be made for net capital gain recognized by noncorporate taxpayers during any taxable year beginning after December 31, 1992. An election may be made for qualified dividend income received by noncorporate taxpayers during any taxable year beginning after December 31, 2002, but before January 1, 2009.

(b) *Time and manner for making the elections.* The elections for net capital gain and qualified dividend income

must be made on or before the due date (including extensions) of the income tax return for the taxable year in which the net capital gain is recognized or the qualified dividend income is received. The elections are to be made on Form 4952, "Investment Interest Expense Deduction," in accordance with the form and its instructions.

(c) *Revocability of elections.* The elections described in this section are revocable with the consent of the Commissioner.

(d) *Effective date.* The rules set forth in this section regarding the net capital gain election apply beginning December 12, 1996. The rules set forth in this section regarding the qualified dividend income election apply to any taxable year beginning after December 31, 2002, but before January 1, 2009.

[T.D. 9191, 70 FR 13100, Mar. 18, 2005]

#### § 1.164-1 Deduction for taxes.

(a) *In general.* Only the following taxes shall be allowed as a deduction under this section for the taxable year within which paid or accrued, according to the method of accounting used in computing taxable income:

(1) State and local, and foreign, real property taxes.

(2) State and local personal property taxes.

(3) State and local, and foreign, income, war profits, and excess profits taxes.

(4) State and local general sales taxes.

(5) State and local taxes on the sale of gasoline, diesel fuel, and other motor fuels.

In addition, there shall be allowed as a deduction under this section State and local and foreign taxes not described in subparagraphs (1) through (5) of this paragraph which are paid or accrued within the taxable year in carrying on a trade or business or an activity described in section 212 (relating to expenses for production of income). For example, dealers or investors in securities and dealers or investors in real estate may deduct State stock transfer and real estate transfer taxes, respectively, under section 164, to the extent they are expenses incurred in carrying on a trade or business or an activity

for the production of income. In general, taxes are deductible only by the person upon whom they are imposed. However, see § 1.164-5 in the case of certain taxes paid by the consumer. Also, in the case of a qualified State individual income tax (as defined in section 6362 and the regulations thereunder) which is determined by reference to a percentage of the Federal income tax (pursuant to section 6362 (c)), an accrual method taxpayer shall use the cash receipts and disbursements method to compute the amount of his deduction therefor. Thus, the deduction under section 164 is in the amount actually paid with respect to the qualified tax, rather than the amount accrued with respect thereto, during the taxable year even though the taxpayer uses the accrual method of accounting for other purposes. In addition, see paragraph (f)(1) of § 301.6361-1 of this chapter (Regulations on Procedure and Administration) with respect to rules relating to allocation and reallocation of amounts collected on account of the Federal income tax and qualified taxes.

(b) *Taxable years beginning before January 1, 1964.* For taxable years beginning before January 1, 1964, except as otherwise provided in §§ 1.164-2 through 1.164-8, inclusive, taxes imposed by the United States, any State, territory, possession of the United States, or a political subdivision of any of the foregoing, or by any foreign country, are deductible from gross income for the taxable year in which paid or accrued, according to the method of accounting used in computing taxable income. For this purpose, postage is not a tax and automobile license or registration fees are ordinarily taxes.

(c) *Cross references.* For the definition of the term "real property taxes", see paragraph (d) of § 1.164-3. For the definition of the term "foreign taxes", see paragraph (d) of § 1.164-3. For the definition of the term "general sales taxes", see paragraph (f) of § 1.164-3. For the treatment of gasoline, diesel fuel, and other motor fuel taxes, see § 1.164-5. For apportionment of taxes on real property between seller and purchaser, see section 164(d) and § 1.164-6. For the general rule for taxable year of

deduction, see section 461. For provisions disallowing any deduction for the tax paid at the source on interest from tax-free covenant bonds, see section 1451(f).

[T.D. 6780, 29 FR 18145, Dec. 22, 1964, as amended by T.D. 7577, 43 FR 59357, Dec. 20, 1978]

### § 1.164-2 Deduction denied in case of certain taxes.

This section and § 1.275 describe certain taxes for which no deduction is allowed. In the case of taxable years beginning before January 1, 1964, the denial is provided for by section 164(b) (prior to being amended by section 207 of the Revenue Act of 1964 (78 Stat. 40)). In the case of taxable years beginning after December 31, 1963, the denial is governed by sections 164 and 275. No deduction is allowed for the following taxes:

(a) *Federal income taxes.* Federal income taxes, including the taxes imposed by section 3101, relating to the tax on employees under the Federal Insurance Contributions Act (chapter 21 of the Code); sections 3201 and 3211, relating to the taxes on railroad employees and railroad employee representatives; section 3402, relating to the tax withheld at source on wages; and by corresponding provisions of prior internal revenue laws.

(b) *Federal war profits and excess profits taxes.* Federal war profits and excess profits taxes including those imposed by Title II of the Revenue Act of 1917 (39 Stat. 1000), Title III of the Revenue Act of 1918 (40 Stat. 1088), Title III of the Revenue Act of 1921 (42 Stat. 271), section 216 of the National Industrial Recovery Act (48 Stat. 208), section 702 of the Revenue Act of 1934 (48 Stat. 770), Subchapter D, Chapter 1 of the Internal Revenue Code of 1939, and Subchapter E, Chapter 2 of the Internal Revenue Code of 1939.

(c) *Estate and gift taxes.* Estate, inheritance, legacy, succession, and gift taxes.

(d) *Foreign income, war profits, and excess profits taxes.* Income, war profits, and excess profits taxes imposed by the authority of any foreign country or possession of the United States, if the taxpayer chooses to take to any extent the benefits of section 901, relating to

the credit for taxes of foreign countries and possessions of the United States.

(e) *Real property taxes.* Taxes on real property, to the extent that section 164(d) and § 1.164-6 require such taxes to be treated as imposed on another taxpayer.

(f) *Federal duties and excise taxes.* Federal import or tariff duties, business, license, privilege, excise, and stamp taxes (not described in paragraphs (a), (b), (c), or (h) of this section, or § 1.164-4) paid or accrued within the taxable year. The fact that any such tax is not deductible as a tax under section 164 does not prevent (1) its deduction under section 162 or section 212, provided it represents an ordinary and necessary expense paid or incurred during the taxable year by a corporation or an individual in the conduct of any trade or business or, in the case of an individual for the production or collection of income, for the management, conservation, or maintenance of property held for the production of income, or in connection with the determination, collection, or refund of any tax, or (2) its being taken into account during the taxable year by a corporation or an individual as a part of the cost of acquiring or producing property in the trade or business or, in the case of an individual, as a part of the cost of property held for the production of income with respect to which it relates.

(g) *Taxes for local benefits.* Except as provided in § 1.164-4, taxes assessed against local benefits of a kind tending to increase the value of the property assessed.

(h) *Excise tax on real estate investment trusts.* The excise tax imposed on certain real estate investment trusts by section 4981.

[T.D. 6780, 29 FR 18145, Dec 22, 1964, as amended by T.D. 7767, 46 FR 11263, Feb. 6, 1981]

### § 1.164-3 Definitions and special rules.

For purposes of section 164 and § 1.164-1 to § 1.164-8, inclusive—

(a) *State or local taxes.* A State or local tax includes only a tax imposed by a State, a possession of the United States, or a political subdivision of any of the foregoing, or by the District of Columbia.

(b) *Real property taxes.* The term “real property taxes” means taxes imposed

on interests in real property and levied for the general public welfare, but it does not include taxes assessed against local benefits. See §1.164-4.

(c) *Personal property taxes.* The term “personal property tax” means an ad valorem tax which is imposed on an annual basis in respect of personal property. To qualify as a personal property tax, a tax must meet the following three tests:

(1) The tax must be ad valorem—that is, substantially in proportion to the value of the personal property. A tax which is based on criteria other than value does not qualify as ad valorem. For example, a motor vehicle tax based on weight, model year, and horsepower, or any of these characteristics is not an ad valorem tax. However, a tax which is partly based on value and partly based on other criteria may qualify in part. For example, in the case of a motor vehicle tax of 1 percent of value plus 40 cents per hundred-weight, the part of the tax equal to 1 percent of value qualifies as an ad valorem tax and the balance does not qualify.

(2) The tax must be imposed on an annual basis, even if collected more frequently or less frequently.

(3) The tax must be imposed in respect of personal property. A tax may be considered to be imposed in respect of personal property even if in form it is imposed on the exercise of a privilege. Thus, for taxable years beginning after December 31, 1963, State and local taxes on the registration or licensing of highway motor vehicles are not deductible as personal property taxes unless and to the extent that the tests prescribed in this subparagraph are met. For example, an annual ad valorem tax qualifies as a personal property tax although it is denominated a registration fee imposed for the privilege of registering motor vehicles or of using them on the highways.

(d) *Foreign taxes.* The term “foreign tax” includes only a tax imposed by the authority of a foreign country. A tax imposed by a political subdivision of a foreign country is considered to be imposed by the authority of that foreign country.

(e) *Sales tax.* (1) The term “sales tax” means a tax imposed upon persons en-

gaged in selling tangible personal property, or upon the consumers of such property, including persons selling gasoline or other motor vehicle fuels at wholesale or retail, which is a stated sum per unit of property sold or which is measured by the gross sales price or the gross receipts from the sale. The term also includes a tax imposed upon persons engaged in furnishing services which is measured by the gross receipts for furnishing such services.

(2) In general, the term “consumer” means the ultimate user or purchaser; it does not include a purchaser such as a retailer, who acquires the property for resale.

(f) *General sales tax.* A “general sales tax” is a sales tax which is imposed at one rate in respect of the sale at retail of a broad range of classes of items. No foreign sales tax is deductible under section 164(a) and paragraph (a)(4) of §1.164-1. To qualify as a general sales tax, a tax must meet the following two tests:

(1) The tax must be a tax in respect of sales at retail. This may include a tax imposed on persons engaged in selling property at retail or furnishing services at retail, for example, if the tax is measured by gross sales price or by gross receipts from sales or services. Rentals qualify as sales at retail if so treated under applicable State sales tax laws.

(2) The tax must be general—that is, it must be imposed at one rate in respect of the retail sales of a broad range of classes of items. A sales tax is considered to be general although imposed on sales of various classes of items at more than one rate provided that one rate applies to the retail sales of a broad range of classes of items. The term “items” includes both commodities and services.

(g) *Special rules relating to general sales taxes.* (1) A sales tax which is general is usually imposed at one rate in respect of the retail sales of all tangible personal property (with exceptions and additions). However, a sales tax which is selective—that is, a tax which applies at one rate with respect to retail sales of specified classes of items also qualifies as general if the specified classes represent a broad range of classes of items. A selective

sales tax which does not apply at one rate to the retail sales of a broad range of classes of items is not general. For example, a tax which applies only to sales of alcoholic beverages, tobacco, admissions, luxury items, and a few other items is not general. Similarly, a tax imposed solely on services is not general. However, a selective sales tax may be deemed to be part of the general sales tax and hence may be deductible, even if imposed by a separate title, etc., of the State or local law, if imposed at the same rate as the general rate of tax (as defined in subparagraph (4) of this paragraph) which qualifies a tax in the taxing jurisdiction as a general sales tax. For example, if a State has a 5 percent general sales tax and a separate selective sales tax of 5 percent on transient accommodations, the tax on transient accommodations is deductible.

(2) A tax is imposed at one rate only if it is imposed at that rate on generally the same base for all items subject to tax. For example, a sales tax imposed at a 3 percent rate on 100 percent of the sales price of some classes of items and at a 3 percent rate on 50 percent of the sales price of other classes of items would not be imposed at one rate with respect to all such classes. However, a tax is considered to be imposed at one rate although it allows dollar exemptions, if the exemptions are designed to exclude all sales under a certain dollar amount. For example, a tax may be imposed at one rate although it applies to all sales of tangible personal property but applies only to sales amounting to more than 10 cents.

(3) The fact that a sales tax exempts food, clothing, medical supplies, and motor vehicles, or any of them, shall not be taken into account in determining whether the tax applies to a broad range of classes of items. The fact that a sales tax applies to food, clothing, medical supplies, and motor vehicles, or any of them, at a rate which is lower than the general rate of tax (as defined in subparagraph (4) of this paragraph) is not taken into account in determining whether the tax is imposed at one rate on the retail sales of a broad range of classes of items. For purposes of this section, the

term "food" means food for human consumption off the premises where sold, and the term "medical supplies" includes drugs, medicines, and medical devices.

(4) Except in the case of a lower rate of tax applicable in respect of food, clothing, medical supplies, and motor vehicles, or any of them, no deduction is allowed for a general sales tax in respect of any item if the tax is imposed on such item at a rate other than the general rate of tax. The general rate of tax is the one rate which qualifies a tax in a taxing jurisdiction as a general sales tax because the tax is imposed at such one rate on a broad range of classes of items. There can be only one general rate of tax in any one taxing jurisdiction. However, a general sales tax imposed at a lower rate or rates on food, clothing, motor vehicles, and medical supplies, or any of them, may nonetheless be deductible with respect to such items. For example, a sales tax which is imposed at 1 percent with respect to food, imposed at 3 percent with respect to a broad range of classes of tangible personal property, and imposed at 4 percent with respect to transient accommodations would qualify as a general sales tax. Taxes paid at the 1 percent and the 3 percent rates are deductible, but tax paid at the 4 percent rate is not deductible. The fact that a sales tax provides for the adjustment of the general rate of tax to reflect the sales tax rate in another taxing jurisdiction shall not be taken into account in determining whether the tax is imposed at one rate on the retail sales of a broad range of classes of items. Moreover, a general sales tax imposed at a lower rate with respect to an item in order to reflect the tax rate in another jurisdiction is also deductible at such lower rate. For example, State E imposes a general sales tax whose general rate is 3 percent. The State E sales tax law provides that in areas bordering on States with general sales taxes, selective sales taxes, or special excise taxes, the rate applied in the adjoining State will be used if such rate is under 3 percent. State F imposes a 2 percent sales tax. The 2 percent sales tax paid by residents of State E in areas bordering on State F is deductible.

(h) *Compensating use taxes.* A compensating use tax in respect of any item is treated as a general sales tax. The term "compensating use tax" means, in respect of any item, a tax which is imposed on the use, storage, or consumption of such item and which is complementary to a general sales tax which is deductible with respect to sales of similar items.

(i) *Special rules relating to compensating use taxes.* (1) In general, a use tax on an item is complementary to a general sales tax on similar items if the use tax is imposed on an item which was not subject to such general sales tax but which would have been subject to such general sales tax if the sale of the item had taken place within the jurisdiction imposing the use tax. For example, a tax imposed by State A on the use of a motor vehicle purchased in State B is complementary to the general sales tax of State A on similar items, if the latter tax applies to motor vehicles sold in State A.

(2) Since a compensating use tax is treated as a general sales tax, it is subject to the rule of subparagraph (C) of section 164(b)(2) and paragraph (g)(4) of this section that no deduction is allowed for a general sales tax imposed in respect of an item at a rate other than the general rate of tax (except in the case of lower rates on the sale of food, clothing, medical supplies, and motor vehicles). The fact that a compensating use tax in respect of any item provides for an adjustment in the rate of the compensating use tax or the amount of such tax to be paid on account of a sales tax on such item imposed by another taxing jurisdiction is not taken into account in determining whether the compensating use tax is imposed in respect of the item at a rate other than the general rate of tax. For example, a compensating use tax imposed by State C on the use of an item purchased in State D is considered to be imposed at the general rate of tax even though the tax imposed by State C allows a credit for any sales tax paid on such item in State D, or the rate of such compensating use tax is adjusted to reflect the rate of sales tax imposed by State D.

[T.D. 6780, 29 FR 18146, Dec. 22, 1964]

#### § 1.164-4 Taxes for local benefits.

(a) So-called taxes for local benefits referred to in paragraph (g) of § 1.164-2, more properly assessments, paid for local benefits such as street, sidewalk, and other like improvements, imposed because of and measured by some benefit inuring directly to the property against which the assessment is levied are not deductible as taxes. A tax is considered assessed against local benefits when the property subject to the tax is limited to property benefited. Special assessments are not deductible, even though an incidental benefit may inure to the public welfare. The real property taxes deductible are those levied for the general public welfare by the proper taxing authorities at a like rate against all property in the territory over which such authorities have jurisdiction. Assessments under the statutes of California relating to irrigation, and of Iowa relating to drainage, and under certain statutes of Tennessee relating to levees, are limited to property benefited, and if the assessments are so limited, the amounts paid thereunder are not deductible as taxes. For treatment of assessments for local benefits as adjustments to the basis of property, see section 1016(a)(1) and the regulations thereunder.

(b)(1) Insofar as assessments against local benefits are made for the purpose of maintenance or repair or for the purpose of meeting interest charges with respect to such benefits, they are deductible. In such cases, the burden is on the taxpayer to show the allocation of the amounts assessed to the different purposes. If the allocation cannot be made, none of the amount so paid is deductible.

(2) Taxes levied by a special taxing district which was in existence on December 31, 1963, for the purpose of retiring indebtedness existing on such date, are deductible, to the extent levied for such purpose, if (i) the district covers the whole of at least one county, (ii) if at least 1,000 persons are subject to the taxes levied by the district, and (iii) if the district levies its assessments annually at a uniform rate on the same

## § 1.164-5

assessed value of real property, including improvements, as is used for purposes of the real property tax generally.

[T.D. 6780, 29 FR 18147, Dec. 22, 1964]

### § 1.164-5 Certain retail sales taxes and gasoline taxes.

For taxable years beginning before January 1, 1964, any amount representing a State or local sales tax paid by a consumer of services or tangible personal property is deductible by such consumer as a tax, provided it is separately stated and not paid in connection with his trade or business. For taxable years beginning after December 31, 1963, only the amount of any separately stated State and local general sales tax (as defined in paragraph (g) of § 1.164-3) and tax on the sale of gasoline, diesel fuel or other motor fuel paid by the consumer (other than in connection with his trade or business) is deductible by the consumer as tax. The fact that, under the law imposing it, the incidence of such State or local tax does not fall on the consumer is immaterial. The requirement that the amount of tax must be separately stated will be deemed complied with where it clearly appears that at the time of sale to the consumer, the tax was added to the sales price and collected or charged as a separate item. It is not necessary, for the purpose of this section, that the consumer be furnished with a sales slip, bill, invoice, or other statement on which the tax is separately stated. For example, where the law imposing the State or local tax for which the taxpayer seeks a deduction contains a prohibition against the seller absorbing the tax, or a provision requiring a posted notice stating that the tax will be added to the quoted price, or a requirement that the tax be separately shown in advertisements or separately stated on all bills and invoices, it is presumed that the amount of the State or local tax was separately stated at the time paid by the consumer; except that such presumption shall have no application to a tax on the sale of gasoline, diesel fuel or other motor fuel imposed upon a wholesaler unless such provisions of law apply with re-

## 26 CFR Ch. I (4-1-06 Edition)

spect to both the sale at wholesale and the sale at retail.

[T.D. 6780, 29 FR 18147, Dec. 22, 1964]

### § 1.164-6 Apportionment of taxes on real property between seller and purchaser.

(a) *Scope.* Except as provided otherwise in section 164(f) and § 1.164-8, when real property is sold, section 164(d)(1) governs the deduction by the seller and the purchaser of current real property taxes. Section 164(d)(1) performs two functions: (1) It provides a method by which a portion of the taxes for the real property tax year in which the property is sold may be deducted by the seller and a portion by the purchaser; and (2) it limits the deduction of the seller and the purchaser to the portion of the taxes corresponding to the part of the real property tax year during which each was the owner of the property. These functions are accomplished by treating a portion of the taxes for the real property tax year in which the property is sold as imposed on the seller and a portion as imposed on the purchaser. To the extent that the taxes are treated as imposed on the seller and the purchaser, each shall be allowed a deduction, under section 164(a), in the taxable year such tax is paid or accrued, or treated as paid or accrued under section 164(d)(2) (A) or (D) and this section. No deduction is allowed for taxes on real property to the extent that they are imposed on another taxpayer, or are treated as imposed on another taxpayer under section 164(d). For the election to accrue real property taxes ratably see section 461(c) and the regulations thereunder.

(b) *Application of rule of apportionment.* (1)(i) For purposes of the deduction provided by section 164(a), if real property is sold during any real property tax year, the portion of the real property tax properly allocable to that part of the real property tax year which ends on the day before the date of the sale shall be treated as a tax imposed on the seller, and the portion of such tax properly allocable to that part of such real property tax year which begins on the date of the sale shall be treated as a tax imposed on the purchaser. For definition of "real property

tax year” see paragraph (c) of this section. This rule shall apply whether or not the seller and the purchaser apportion such tax. The rule of apportionment contained in section 164(d)(1) applies even though the same real property is sold more than once during the real property tax year. (See paragraph (d)(5) of this section for rule requiring inclusion in gross income of excess deductions.)

(ii) Where the real property tax becomes a personal liability or a lien before the beginning of the real property tax year to which it relates and the real property is sold subsequent to the time the tax becomes a personal liability or a lien but prior to the beginning of the related real property tax year—

(a) The seller may not deduct any amount for real property taxes for the related real property tax year, and

(b) To the extent that he holds the property for such real property tax year, the purchaser may deduct the amount of such taxes for the taxable year they are paid (or amounts representing such taxes are paid to the seller, mortgagee, trustee or other person having an interest in the property as security) or accrued by him according to his method of accounting.

(iii) Similarly, where the real property tax becomes a personal liability or a lien after the end of the real property tax year to which it relates and the real property is sold prior to the time the tax becomes a personal liability or a lien but after the end of the related real property tax year—

(a) The purchaser may not deduct any amount for real property taxes for the related real property tax year, and

(b) To the extent that he holds the property for such real property tax year, the seller may deduct the amount of such taxes for the taxable year they are paid (or amounts representing such taxes are paid to the purchaser, mortgagee, trustee, or other person having an interest in the property as security) or accrued by him according to his method of accounting.

(iv) Where the real property is sold (or purchased) during the related real property tax year the real property taxes for such year are apportioned between the parties to such sale and may be deducted by such parties in accord-

ance with the provisions of paragraph (d) of this section.

(2) Section 164(d) does not apply to delinquent real property taxes for any real property tax year prior to the real property tax year in which the property is sold.

(3) The provisions of this paragraph may be illustrated by the following examples:

*Example (1).* The real property tax year in County R is April 1 to March 31. A, the owner on April 1, 1954, of real property located in County R sells the real property to B on June 30, 1954. B owns the real property from June 30, 1954, through March 31, 1955. The real property tax for the real property tax year April 1, 1954–March 31, 1955 is \$365. For purposes of section 164(a), \$90 ( $90/365 \times \$365$ , April 1, 1954–June 29, 1954) of the real property tax is treated as imposed on A, the seller, and \$275 ( $275/365 \times \$365$ , June 30, 1954–March 31, 1955) of such real property tax is treated as imposed on B, the purchaser.

*Example (2).* In County S the real property tax year is the calendar year. The real property tax becomes a lien on June 1 and is payable on July 1 of the current real property tax year, but there is no personal liability for such tax. On April 30, 1955, C, the owner of real property in County S on January 1, 1955, sells the real property to D. On July 1, 1955, D pays the 1955 real property tax. On August 31, 1955, D sells the same real property to E. C, D, and E use the cash receipts and disbursements method of accounting. Under the provisions of section 164(d)(1), 119/365 (January 1–April 29, 1955) of the real property tax payable on July 1, 1955, for the 1955 real property tax year is treated as imposed on C, and, under the provisions of section 164(d)(2)(A), such portion is treated as having been paid by him on the date of sale. Under the provisions of section 164(d)(1), 123/365 (April 30–August 30, 1955) of the real property tax paid July 1, 1955, for the 1955 real property tax year is treated as imposed on D and may be deducted by him. Under the provisions of section 164(d)(1), 123/365 (August 31–December 31, 1955) of the real property tax due and paid on July 1, 1955, for the 1955 real property tax year is treated as imposed on E and, under the provisions of section 164(d)(2)(A) such portion is treated as having been paid by him on the date of sale.

*Example (3).* In State X the real property tax year is the calendar year. The real property tax becomes a lien on November 1 of the preceding calendar year. On November 15, 1955, F sells real property in State X to G. G owns the real property through December 31, 1956. Under section 164(d)(1), the real property tax (which became a lien on November 1, 1954) for the 1955 real property tax year is apportioned between F and G. No part of the

real property tax for the 1956 real property tax year may be deducted by F. The entire real property tax for the 1956 real property tax year may be deducted by G when paid or accrued, depending upon the method of accounting used by him. See subparagraph (6) of paragraph (d) and section 461(c) and the regulations thereunder.

(c) *Real property tax year.* As used in section 164(d), the term “real property tax year” refers to the period which, under the law imposing the tax, is regarded as the period to which the tax imposed relates. Where the State and one or more local governmental units each imposes a tax on real property, the real property tax year for each tax must be determined for purposes of applying the rule of apportionment of section 164(d)(1) to each tax. The time when the tax rate is determined, the time when the assessment is made, the time when the tax becomes a lien, or the time when the tax becomes due or delinquent does not necessarily determine the real property tax year. The real property tax year may or may not correspond to the fiscal year of the governmental unit imposing the tax. In each case the State or local law determines what constitutes the real property tax year. Although the seller and the purchaser may or may not make an allocation of real property taxes, the meaning of “real property tax year” in section 164(d) and the application of section 164(d) do not depend upon what real property taxes were allocated nor the method of allocation used by the parties.

(d) *Special rules*—(1) *Seller using cash receipts and disbursements method of accounting.* Under the provisions of section 164(d), if the seller by reason of his method of accounting may not deduct any amount for taxes unless paid, and—

(i) The purchaser (under the law imposing the real property tax) is liable for the real property tax for the real property tax year, or

(ii) The seller (under the law imposing the real property tax) is liable for the real property tax for the real property tax year and the tax is not payable until after the date of sale,

then the portion of the tax treated under section 164(d)(1) as imposed upon the seller (whether or not actually paid

by him in the taxable year in which the sale occurs) shall be considered as having been paid by him in such taxable year. Such portion may be deducted by him for the taxable year in which the sale occurs, or, if at a later time, for the taxable year (which would be proper under the taxpayer’s method of accounting) in which the tax is actually paid, or an amount representing such tax is paid to the purchaser, mortgagee, trustee, or other person having an interest in the property as security.

(2) *Purchasers using the cash receipts and disbursements method of accounting.* Under the provisions of section 164(d), if the purchaser by reason of his method of accounting may not deduct any amount for taxes unless paid and the seller (under the law imposing the real property tax) is liable for the real property tax for the real property tax year, the portion of the tax treated under section 164(d)(1) as imposed upon the purchaser (whether or not actually paid by him in the taxable year in which the sale occurs) shall be considered as having been paid by him in such taxable year. Such portion may be deducted by him for the taxable year in which the sale occurs, or, if at a later time, for the taxable year (which would be proper under the taxpayer’s method of accounting) in which the tax is actually paid, or an amount representing such tax is paid to the seller, mortgagee, trustee, or other person having an interest in the property as security.

(3) *Persons considered liable for tax.* Where the tax is not a liability of any person, the person who holds the property at the time the tax becomes a lien on the property shall be considered liable for the tax. As to a particular sale, in determining:

(i) Whether the other party to the sale is liable for the tax or,

(ii) The person who holds the property at the time the tax becomes a lien on the property (where the tax is not a liability of any person),

prior or subsequent sales of the property during the real property tax year shall be disregarded.

(4) *Examples.* The provisions of subparagraphs (1), (2), and (3) of this paragraph may be illustrated as follows:

*Example (1).* In County X the real property tax year is the calendar year. The real property tax is a personal liability of the owner of the real property on June 30 of the current real property tax year, but is not payable until February 28 of the following real property tax year. A, the owner of real property in County X on January 1, 1955, uses the cash receipts and disbursements method of accounting. On May 30, 1955, A sells the real property to B, who also uses the cash receipts and disbursements method of accounting. B retains ownership of the real property for the balance of the 1955 calendar year. Under the provisions of section 164(d)(1), 149/365 (January 1–May 29, 1955) of the real property tax payable on February 28, 1956, for the 1955 real property tax year is treated as imposed on A, the seller, and under the provisions of section 164(d)(2)(A) such portion is treated as having been paid by him on the date of sale and may be deducted by him for his taxable year in which the sale occurs (whether or not such portion is actually paid by him in that year) or for his taxable year in which the tax is actually paid or an amount representing such tax is paid. Under the provisions of section 164(d)(1), 216/365 (May 30–December 31, 1955) of the real property tax payable on February 28, 1956, for the 1955 real property tax year is treated as imposed on B, the purchaser, and may be deducted by him for his taxable year in which the tax is actually paid, or an amount representing such tax is paid.

*Example (2).* In County Y, the real property tax year is the calendar year. The real property tax becomes a lien on January 1, 1955, and is payable on April 30, 1955. There is no personal liability for the real property tax imposed by County Y. On April 30, 1955, C, the owner of real property in County Y on January 1, 1955, pays the real property tax for the 1955 real property tax year. On May 1, 1955, C sells the real property to D. On September 1, 1955, D sells the real property to E. C, D, and E use the cash receipts and disbursements method of accounting. Under the provisions of section 164(d)(1), 120/365 (January 1–April 30, 1955) of the real property tax is treated as imposed upon C and may be deducted by him for his taxable year in which the tax is actually paid. Under section 164(d)(1), 123/365 (May 1–August 31, 1955) of the real property tax is treated as imposed upon D and, under the provisions of section 164(d)(2)(A), is treated as having been paid by him on May 1, 1955, and may be deducted by D for his taxable year in which the sale from C to him occurs (whether or not such portion is actually paid by him in that year), or for his taxable year in which an amount representing such tax is paid. Since, according to paragraph (d)(3) of this section, the prior sale by C to D is disregarded, under the provisions of section 164(d)(1), 122/365 (September 1–December 31, 1955) of the real property tax

is treated as imposed on E and, under the provisions of section 164(d)(2)(A), is treated as having been paid by him on September 1, 1955, and may be deducted by E for his taxable year in which the sale from D to him occurs (whether or not such portion is actually paid by him in that year), or for his taxable year in which an amount representing such tax is paid.

*Example (3).* In County X the real property tax year is the calendar year and the real property taxes are assessed and become a lien on June 30 of the current real property tax year, but are not payable until September 1 of that year. There is no personal liability for the real property tax imposed by County X. A, the owner on January 1, 1955, of real property in County X, uses the cash receipts and disbursements method of accounting. On July 15, 1955, A sells the real property to B. Under the provisions of section 164(d)(1), 195/365 (January 1–July 14, 1955) of the real property tax payable on September 1, 1955, for the 1955 real property tax year is treated as imposed on A, and may be deducted by him for his taxable year in which the sale occurs (whether or not such portion is actually paid by him in that year) or for his taxable year in which the tax is actually paid or an amount representing such tax is paid. Under the provisions of section 164(d)(1), 170/365 (July 15–December 31, 1955) of the real property tax is treated as imposed on B and may be deducted by him for his taxable year in which the sale occurs (whether or not such portion is actually paid by him in that year), or for his taxable year in which the tax is actually paid or an amount representing such tax is paid.

(5) *Treatment of excess deduction.* If, for a taxable year prior to the taxable year of sale of real property, a taxpayer has deducted an amount for real property tax in excess of the portion of such real property tax treated as imposed on him under the provisions of section 164(d), the excess of the amount deducted over the portion treated as imposed on him shall be included in his gross income for the taxable year of the sale, subject to the provisions of section 111, relating to the recovery of bad debts, prior taxes, and delinquency amounts. The provisions of this subparagraph may be illustrated as follows:

*Example (1).* In Borough Y the real property tax is due and payable on November 30 for the succeeding calendar year, which is also the real property tax year. On November 30, 1954, taxpayer A, who reports his income on a calendar year under the cash receipts and disbursements method of accounting, pays

the real property tax on real property owned by him in Borough Y for the 1955 real property tax year. On June 30, 1955, A sells the real property. Under the provisions of section 164(d), only 180/365 (January 1–June 29, 1955) of the real property tax for the 1955 real property tax year is treated as imposed on A, and the excess of the amount of real property tax for 1955 deducted by A, on his 1954 income tax return, over the 180/365 portion of such tax treated as imposed on him under section 164(d), must be included in gross income in A's 1955 income tax return, subject to the provisions of section 111.

*Example (2).* In County Z the real property tax year is the calendar year. The real property tax becomes a personal liability of the owner of real property on January 1 of the current real property tax year, and is payable on July 1 of the current real property tax year. On May 1, 1955, A, the owner of real property in County Z on January 1, 1955, sells the real property to B. On November 1, 1955, B sells the same real property to C. B uses the cash receipts and disbursements method of accounting and reports his income on the basis of a fiscal year ending July 31. B, on July 1, 1955, pays the entire real property tax for the real property tax year ending December 31, 1955. Under the provisions of section 164(d), only 184/365 (May 1–October 31, 1955) of the real property tax for the 1955 real property tax year is treated as imposed on B, and the excess of the amount of real property tax for 1955 deducted by B on his income tax return for the fiscal year ending July 31, 1955, over the 184/365 portion of such tax treated as imposed on him under section 164(d), must be included in gross income in B's income tax return for his fiscal year ending July 31, 1956, subject to the provisions of section 111.

(6) *Persons using an accrual method of accounting.* Where real property is sold and the seller or the purchaser computes his taxable income (for the taxable year during which the sale occurs) on an accrual method of accounting then, if the seller or the purchaser has not made the election provided in section 461(c) (relating to the accrual of real property taxes), the portion of any real property tax which is treated as imposed on him and which may not be deducted by him for any taxable year by reason of his method of accounting shall be treated as having accrued on the date of sale. The provisions of this subparagraph may be illustrated as follows:

*Example.* In County X the real property tax becomes a lien on property and is assessed on November 30 for the current calendar year,

which is also the real property tax year. There is no personal liability for the real property tax imposed by County X. A owns, on January 1, 1955, real property in County X. A uses an accrual method of accounting and has not made any election under section 461(c) to accrue ratably real property taxes. A sells real property on June 30, 1955. By reason of A's method of accounting, he could not deduct any part of the real property tax for 1955 on the real property since he sold the real property prior to November 30, 1955, the accrual date. Under section 164(d)(1), 180/365 (January 1–June 29, 1955) of the real property tax for the 1955 real property tax year is treated as imposed on A, and under section 164(d)(2)(D) that portion is treated as having accrued on June 30, 1955, and may be deducted by A for his taxable year in which such date falls. B, the purchaser from A, who uses an accrual method of accounting, has likewise not made an election under section 461(c) to accrue real property taxes ratably. Under section 164(d)(1), 185/365 of the real property taxes may be accrued by B on November 30, 1955, and deducted for his taxable year in which such date falls.

(7) *Cross references.* For determination of amount realized on a sale of real property, see section 1001(b) and the regulations thereunder. For determination of basis of real property acquired by purchase, see section 1012 and the regulations thereunder.

(8) *Effective dates.* Section 164(d) applies to taxable years ending after December 31, 1953, but only in the case of sales made after December 31, 1953. However, section 164(d) does not apply to any real property tax to the extent that such tax was allowable as a deduction under the Internal Revenue Code of 1939 to the seller for any taxable year which ended before January 1, 1954.

#### § 1.164-7 Taxes of shareholder paid by corporation.

Banks and other corporations paying taxes assessed against their shareholders on account of their ownership of the shares of stock issued by such corporations without reimbursement from such shareholders may deduct the amount of taxes so paid. In such cases no deduction shall be allowed to the shareholders for such taxes. The amount so paid should not be included in the gross income of the shareholder.

**§ 1.164-8 Payments for municipal services in atomic energy communities.**

(a) *General.* For taxable years beginning after December 31, 1957, amounts paid or accrued by any owner of real property within any community (as defined in section 21b of the Atomic Energy Community Act of 1955 (42 U.S.C. 2304)) to compensate the Atomic Energy Commission for municipal-type services (or any agent or contractor authorized by the Atomic Energy Commission to charge for such services) shall be treated as State real property taxes paid or accrued for purposes of section 164. Such amounts shall be deductible as taxes to the extent provided in section 164, §§ 1.164-1 through 1.164-7, and this section. See paragraph (b) of this section for definition of the term "Atomic Energy Commission"; paragraph (c) of this section for the definition of the term "municipal-type services"; and paragraph (d) of this section for the definition of the term "owner".

(b) *Atomic Energy Commission.* For purposes of paragraph (a) of this section, the term "Atomic Energy Commission" shall mean—

(1) The Atomic Energy Commission, and

(2) Any other agency of the United States Government to which the duties and responsibilities of providing municipal-type services are delegated under the authority of section 101 of the Atomic Energy Community Act of 1955 (42 U.S.C. 2313).

(c) *Municipal-type services.* For purposes of paragraph (a) of this section, the term "municipal-type services" includes services usually rendered by a municipality and usually paid for by taxes. Examples of municipal-type services are police protection, fire protection, public recreational facilities, public libraries, public schools, public health, public welfare, and the maintenance of roads and streets. The term shall include sewage and refuse disposal which are maintained out of revenues derived from a general charge for municipal-type services; however, the term shall not include sewage and refuse disposal if a separate charge for such services is made. Charges assessed against local benefits of a kind tending to increase the value of the property assessed are not charges for municipal-

type services. See section 164(c)(1) and § 1.164-4.

(d) *Owner.* For purposes of paragraph (a) of this section, the term "owner" includes a person who holds the real property under a leasehold of 40 or more years from the Atomic Energy Commission (or any agency of the United States Government to which the duties and responsibilities of leasing real property are delegated under section 101 of the Atomic Energy Community Act of 1955), and a person who has entered into a contract to purchase under section 61 of the Atomic Energy Community Act of 1955 (42 U.S.C. 2361). An assignee (either immediate or more remote) of a lessee referred to in the preceding sentence will also qualify as an owner for purposes of paragraph (a) of this section.

(e) *Nonapplication of section 164(d).* Section 164(d) and § 1.164-6, relating to apportionment of taxes on real property between seller and purchaser, do not apply to a sale by the United States or any of its agencies of real property to which section 164(f) and this section apply. Thus, amounts paid or accrued which qualify under paragraph (a) of this section will continue to be deductible as taxes to the extent provided in this section, even in the taxable year in which the owner actually purchases the real property from the United States or any of its agencies. However, the provisions of section 164(d) and § 1.164-6 shall apply to a sale of real property to which section 164(f) and this section apply, if the seller is other than the United States or any of its agencies.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6789, 29 FR 18147, Dec. 22, 1964]

**§ 1.165-1 Losses.**

(a) *Allowance of deduction.* Section 165(a) provides that, in computing taxable income under section 63, any loss actually sustained during the taxable year and not made good by insurance or some other form of compensation shall be allowed as a deduction subject to any provision of the internal revenue laws which prohibits or limits the amount of the deduction. This deduction for losses sustained shall be taken in accordance with section 165 and the

regulations thereunder. For the disallowance of deductions for worthless securities issued by a political party, see § 1.271-1.

(b) *Nature of loss allowable.* To be allowable as a deduction under section 165(a), a loss must be evidenced by closed and completed transactions, fixed by identifiable events, and, except as otherwise provided in section 165(h) and § 1.165-11, relating to disaster losses, actually sustained during the taxable year. Only a bona fide loss is allowable. Substance and not mere form shall govern in determining a deductible loss.

(c) *Amount deductible.* (1) The amount of loss allowable as a deduction under section 165(a) shall not exceed the amount prescribed by § 1.1011-1 as the adjusted basis for determining the loss from the sale or other disposition of the property involved. In the case of each such deduction claimed, therefore, the basis of the property must be properly adjusted as prescribed by § 1.1011-1 for such items as expenditures, receipts, or losses, properly chargeable to capital account, and for such items as depreciation, obsolescence, amortization, and depletion, in order to determine the amount of loss allowable as a deduction. To determine the allowable loss in the case of property acquired before March 1, 1913, see also paragraph (b) of § 1.1053-1.

(2) The amount of loss recognized upon the sale or exchange of property shall be determined for purposes of section 165(a) in accordance with § 1.1002-1.

(3) A loss from the sale or exchange of a capital asset shall be allowed as a deduction under section 165(a) but only to the extent allowed in section 1211 (relating to limitation on capital losses) and section 1212 (relating to capital loss carrybacks and carryovers), and in the regulations under those sections.

(4) In determining the amount of loss actually sustained for purposes of section 165(a), proper adjustment shall be made for any salvage value and for any insurance or other compensation received.

(d) *Year of deduction.* (1) A loss shall be allowed as a deduction under section 165(a) only for the taxable year in which the loss is sustained. For this

purpose, a loss shall be treated as sustained during the taxable year in which the loss occurs as evidenced by closed and completed transactions and as fixed by identifiable events occurring in such taxable year. For provisions relating to situations where a loss attributable to a disaster will be treated as sustained in the taxable year immediately preceding the taxable year in which the disaster actually occurred, see section 165(h) and § 1.165-11.

(2)(i) If a casualty or other event occurs which may result in a loss and, in the year of such casualty or event, there exists a claim for reimbursement with respect to which there is a reasonable prospect of recovery, no portion of the loss with respect to which reimbursement may be received is sustained, for purposes of section 165, until it can be ascertained with reasonable certainty whether or not such reimbursement will be received. Whether a reasonable prospect of recovery exists with respect to a claim for reimbursement of a loss is a question of fact to be determined upon an examination of all facts and circumstances. Whether or not such reimbursement will be received may be ascertained with reasonable certainty, for example, by a settlement of the claim, by an adjudication of the claim, or by an abandonment of the claim. When a taxpayer claims that the taxable year in which a loss is sustained is fixed by his abandonment of the claim for reimbursement, he must be able to produce objective evidence of his having abandoned the claim, such as the execution of a release.

(ii) If in the year of the casualty or other event a portion of the loss is not covered by a claim for reimbursement with respect to which there is a reasonable prospect of recovery, then such portion of the loss is sustained during the taxable year in which the casualty or other event occurs. For example, if property having an adjusted basis of \$10,000 is completely destroyed by fire in 1961, and if the taxpayer's only claim for reimbursement consists of an insurance claim for \$8,000 which is settled in 1962, the taxpayer sustains a loss of

\$2,000 in 1961. However, if the taxpayer's automobile is completely destroyed in 1961 as a result of the negligence of another person and there exists a reasonable prospect of recovery on a claim for the full value of the automobile against such person, the taxpayer does not sustain any loss until the taxable year in which the claim is adjudicated or otherwise settled. If the automobile had an adjusted basis of \$5,000 and the taxpayer secures a judgment of \$4,000 in 1962, \$1,000 is deductible for the taxable year 1962. If in 1963 it becomes reasonably certain that only \$3,500 can ever be collected on such judgment, \$500 is deductible for the taxable year 1963.

(iii) If the taxpayer deducted a loss in accordance with the provisions of this paragraph and in a subsequent taxable year receives reimbursement for such loss, he does not recompute the tax for the taxable year in which the deduction was taken but includes the amount of such reimbursement in his gross income for the taxable year in which received, subject to the provisions of section 111, relating to recovery of amounts previously deducted.

(3) Any loss arising from theft shall be treated as sustained during the taxable year in which the taxpayer discovers the loss (see § 1.165-8, relating to theft losses). However, if in the year of discovery there exists a claim for reimbursement with respect to which there is a reasonable prospect of recovery, no portion of the loss with respect to which reimbursement may be received is sustained, for purposes of section 165, until the taxable year in which it can be ascertained with reasonable certainty whether or not such reimbursement will be received.

(4) The rules of this paragraph are applicable with respect to a casualty or other event which may result in a loss and which occurs after January 16, 1960. If the casualty or other event occurs on or before such date, a taxpayer may treat any loss resulting therefrom in accordance with the rules then applicable, or, if he so desires, in accordance with the provisions of this paragraph; but no provision of this paragraph shall be construed to permit a deduction of the same loss or any part thereof in more than one taxable year

or to extend the period of limitations within which a claim for credit or refund may be filed under section 6511.

(e) *Limitation on losses of individuals.* In the case of an individual, the deduction for losses granted by section 165(a) shall, subject to the provisions of section 165(c) and paragraph (a) of this section, be limited to:

(1) Losses incurred in a trade or business;

(2) Losses incurred in any transaction entered into for profit, though not connected with a trade or business; and

(3) Losses of property not connected with a trade or business and not incurred in any transaction entered into for profit, if such losses arise from fire, storm, shipwreck, or other casualty, or from theft, and if the loss involved has not been allowed for estate tax purposes in the estate tax return. For additional provisions pertaining to the allowance of casualty and theft losses, see §§ 1.165-7 and 1.165-8, respectively.

For special rules relating to an election by a taxpayer to deduct disaster losses in the taxable year immediately preceding the taxable year in which the disaster occurred, see section 165(h) and § 1.165-11.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6735, 29 FR 6493, May 19, 1964; T.D. 6996, 34 FR 835, Jan. 18, 1969; T.D. 7301, 39 FR 963, Jan. 4, 1974; T.D. 7522, 42 FR 63411, Dec. 16, 1977]

#### § 1.165-2 Obsolescence of nondepreciable property.

(a) *Allowance of deduction.* A loss incurred in a business or in a transaction entered into for profit and arising from the sudden termination of the usefulness in such business or transaction of any nondepreciable property, in a case where such business or transaction is discontinued or where such property is permanently discarded from use therein, shall be allowed as a deduction under section 165(a) for the taxable year in which the loss is actually sustained. For this purpose, the taxable year in which the loss is sustained is not necessarily the taxable year in which the overt act of abandonment, or the loss of title to the property, occurs.

(b) *Exceptions.* This section does not apply to losses sustained upon the sale

or exchange of property, losses sustained upon the obsolescence or worthlessness of depreciable property, casualty losses, or losses reflected in inventories required to be taken under section 471. The limitations contained in sections 1211 and 1212 upon losses from the sale or exchange of capital assets do not apply to losses allowable under this section.

(c) *Cross references.* For the allowance under section 165(a) of losses arising from the permanent withdrawal of depreciable property from use in the trade or business or in the production of income, see § 1.167(a)-8. For provisions respecting the obsolescence of depreciable property, see § 1.167(a)-9. For the allowance of casualty losses, see § 1.165-7.

#### § 1.165-3 Demolition of buildings.

(a) *Intent to demolish formed at time of purchase.* (1) Except as provided in subparagraph (2) of this paragraph, the following rule shall apply when, in the course of a trade or business or in a transaction entered into for profit, real property is purchased with the intention of demolishing either immediately or subsequently the buildings situated thereon: No deduction shall be allowed under section 165(a) on account of the demolition of the old buildings even though any demolition originally planned is subsequently deferred or abandoned. The entire basis of the property so purchased shall, notwithstanding the provisions of § 1.167(a)-5, be allocated to the land only. Such basis shall be increased by the net cost of demolition or decreased by the net proceeds from demolition.

(2)(i) If the property is purchased with the intention of demolishing the buildings and the buildings are used in a trade or business or held for the production of income before their demolition, a portion of the basis of the property may be allocated to such buildings and depreciated over the period during which they are so used or held. The fact that the taxpayer intends to demolish the buildings shall be taken into account in making the apportionment of basis between the land and buildings under § 1.167(a)-5. In any event, the portion of the purchase price which may be allocated to the build-

ings shall not exceed the present value of the right to receive rentals from the buildings over the period of their intended use. The present value of such right shall be determined at the time that the buildings are first used in the trade or business or first held for the production of income. If the taxpayer does not rent the buildings, but uses them in his own trade or business or in the production of his income, the present value of such right shall be determined by reference to the rentals which could be realized during such period of intended use. The fact that the taxpayer intends to rent or use the buildings for a limited period before their demolition shall also be taken into account in computing the useful life in accordance with paragraph (b) of § 1.167(a)-1.

(ii) Any portion of the purchase price which is allocated to the buildings in accordance with this subparagraph shall not be included in the basis of the land computed under subparagraph (1) of this paragraph, and any portion of the basis of the buildings which has not been recovered through depreciation or otherwise at the time of the demolition of the buildings is allowable as a deduction under section 165.

(iii) The application of this subparagraph may be illustrated by the following example:

*Example.* In January 1958, A purchased land and a building for \$60,000 with the intention of demolishing the building. In the following April, A concludes that he will be unable to commence the construction of a proposed new building for a period of more than 3 years. Accordingly, on June 1, 1958, he leased the building for a period of 3 years at an annual rental of \$1,200. A intends to demolish the building upon expiration of the lease. A may allocate a portion of the \$60,000 basis of the property to the building to be depreciated over the 3-year period. That portion is equal to the present value of the right to receive \$3,600 (3 times \$1,200). Assuming that the present value of that right determined as of June 1, 1958, is \$2,850, A may allocate that amount to the building and, if A files his return on the basis of a taxable year ending May 31, 1959, A may take a depreciation deduction with respect to such building of \$950 for such taxable year. The basis of the land to A as determined under subparagraph (1) of this paragraph is reduced by \$2,850. If on June 1, 1960, A ceases to rent the building and demolishes it, the balance of the

undepreciated portion allocated to the buildings, \$950, may be deducted from gross income under section 165.

(3) The basis of any building acquired in replacement of the old buildings shall not include any part of the basis of the property originally purchased even though such part was, at the time of purchase, allocated to the buildings to be demolished for purposes of determining allowable depreciation for the period before demolition.

(b) *Intent to demolish formed subsequent to the time of acquisition.* (1) Except as provided in subparagraph (2) of this paragraph, the loss incurred in a trade or business or in a transaction entered into for profit and arising from a demolition of old buildings shall be allowed as a deduction under section 165(a) if the demolition occurs as a result of a plan formed subsequent to the acquisition of the buildings demolished. The amount of the loss shall be the adjusted basis of the buildings demolished increased by the net cost of demolition or decreased by the net proceeds from demolition. See paragraph (c) of §1.165-1 relating to amount deductible under section 165. The basis of any building acquired in replacement of the old buildings shall not include any part of the basis of the property demolished.

(2) If a lessor or lessee of real property demolishes the buildings situated thereon pursuant to a lease or an agreement which resulted in a lease, under which either the lessor was required or the lessee was required or permitted to demolish such buildings, no deduction shall be allowed to the lessor under section 165(a) on account of the demolition of the old buildings. However, the adjusted basis of the demolished buildings, increased by the net cost of demolition or decreased by the net proceeds from demolition, shall be considered as a part of the cost of the lease to be amortized over the remaining term thereof.

(c) *Evidence of intention.* (1) Whether real property has been purchased with the intention of demolishing the buildings thereon or whether the demolition of the buildings occurs as a result of a plan formed subsequent to their acquisition is a question of fact, and the answer depends upon an examination of

all the surrounding facts and circumstances. The answer to the question does not depend solely upon the statements of the taxpayer at the time he acquired the property or demolished the buildings, but such statements, if made, are relevant and will be considered. Certain other relevant facts and circumstances that exist in some cases and the inferences that might reasonably be drawn from them are described in subparagraphs (2) and (3) of this paragraph. The question as to the taxpayer's intention is not answered by any inference that is drawn from any one fact or circumstance but can be answered only by a consideration of all relevant facts and circumstances and the reasonable inferences to be drawn therefrom.

(2) An intention at the time of acquisition to demolish may be suggested by:

(i) A short delay between the date of acquisition and the date of demolition;

(ii) Evidence of prohibitive remodeling costs determined at the time of acquisition;

(iii) Existence of municipal regulations at the time of acquisition which would prohibit the continued use of the buildings for profit purposes;

(iv) Unsuitability of the buildings for the taxpayer's trade or business at the time of acquisition; or

(v) Inability at the time of acquisition to realize a reasonable income from the buildings.

(3) The fact that the demolition occurred pursuant to a plan formed subsequent to the acquisition of the property may be suggested by:

(i) Substantial improvement of the buildings immediately after their acquisition;

(ii) Prolonged use of the buildings for business purposes after their acquisition;

(iii) Suitability of the buildings for investment purposes at the time of acquisition;

(iv) Substantial change in economic or business conditions after the date of acquisition;

(v) Loss of useful value occurring after the date of acquisition;

(vi) Substantial damage to the buildings occurring after their acquisition;

## § 1.165-4

## 26 CFR Ch. I (4-1-06 Edition)

(vii) Discovery of latent structural defects in the buildings after their acquisition;

(viii) Decline in the taxpayer's business after the date of acquisition;

(ix) Condemnation of the property by municipal authorities after the date of acquisition; or

(x) Inability after acquisition to obtain building material necessary for the improvement of the property.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 74474, 41 FR 55710, Dec. 22, 1976]

### § 1.165-4 Decline in value of stock.

(a) *Deduction disallowed.* No deduction shall be allowed under section 165(a) solely on account of a decline in the value of stock owned by the taxpayer when the decline is due to a fluctuation in the market price of the stock or to other similar cause. A mere shrinkage in the value of stock owned by the taxpayer, even though extensive, does not give rise to a deduction under section 165(a) if the stock has any recognizable value on the date claimed as the date of loss. No loss for a decline in the value of stock owned by the taxpayer shall be allowed as a deduction under section 165(a) except insofar as the loss is recognized under § 1.1002-1 upon the sale or exchange of the stock and except as otherwise provided in § 1.165-5 with respect to stock which becomes worthless during the taxable year.

(b) *Stock owned by banks.* (1) In the regulation of banks and certain other corporations, Federal and State authorities may require that stock owned by such organizations be charged off as worthless or written down to a nominal value. If, in any such case, this requirement is premised upon the worthlessness of the stock, the charging off or writing down will be considered prima facie evidence of worthlessness for purposes of section 165(a); but, if the charging off or writing down is due to a fluctuation in the market price of the stock or if no reasonable attempt to determine the worthlessness of the stock has been made, then no deduction shall be allowed under section 165(a) for the amount so charged off or written down.

(2) This paragraph shall not be construed, however, to permit a deduction

under section 165(a) unless the stock owned by the bank or other corporation actually becomes worthless in the taxable year. Such a taxpayer owning stock which becomes worthless during the taxable year is not precluded from deducting the loss under section 165(a) merely because, in obedience to the specific orders or general policy of such supervisory authorities, the value of the stock is written down to a nominal amount instead of being charged off completely.

(c) *Application to inventories.* This section does not apply to a decline in the value of corporate stock reflected in inventories required to be taken by a dealer in securities under section 471. See § 1.471-5.

(d) *Definition.* As used in this section, the term "stock" means a share of stock in a corporation or a right to subscribe for, or to receive, a share of stock in a corporation.

### § 1.165-5 Worthless securities.

(a) *Definition of security.* As used in section 165(g) and this section, the term "security" means:

(1) A share of stock in a corporation;

(2) A right to subscribe for, or to receive, a share of stock in a corporation; or

(3) A bond, debenture, note, or certificate, or other evidence of indebtedness to pay a fixed or determinable sum of money, which has been issued with interest coupons or in registered form by a domestic or foreign corporation or by any government or political subdivision thereof.

(b) *Ordinary loss.* If any security which is not a capital asset becomes wholly worthless during the taxable year, the loss resulting therefrom may be deducted under section 165(a) as an ordinary loss.

(c) *Capital loss.* If any security which is a capital asset becomes wholly worthless at any time during the taxable year, the loss resulting therefrom may be deducted under section 165(a) but only as though it were a loss from a sale or exchange, on the last day of the taxable year, of a capital asset. See section 165(g)(1). The amount so allowed as a deduction shall be subject to the limitations upon capital losses described in paragraph (c)(3) of § 1.165-1.

(d) *Loss on worthless securities of an affiliated corporation*—(1) *Deductible as an ordinary loss.* If a taxpayer which is a domestic corporation owns any security of a domestic or foreign corporation which is affiliated with the taxpayer within the meaning of subparagraph (2) of this paragraph and such security becomes wholly worthless during the taxable year, the loss resulting therefrom may be deducted under section 165(a) as an ordinary loss in accordance with paragraph (b) of this section. The fact that the security is in fact a capital asset of the taxpayer is immaterial for this purpose, since section 165(g)(3) provides that such security shall be treated as though it were not a capital asset for the purposes of section 165(g)(1). A debt which becomes wholly worthless during the taxable year shall be as an ordinary loss in accordance with the provisions of this subparagraph, to the extent that such debt is a security within the meaning of paragraph (a)(3) of this section.

(2) *Affiliated corporation defined.* For purposes of this paragraph, a corporation shall be treated as affiliated with the taxpayer owning the security if—

(i)(a) In the case of a taxable year beginning on or after January 1, 1970, the taxpayer owns directly—

(1) Stock possessing at least 80 percent of the voting power of all classes of such corporation's stock, and

(2) At least 80 percent of each class of such corporation's nonvoting stock excluding for purposes of this subdivision (i)(a) nonvoting stock which is limited and preferred as to dividends (see section 1504(a)), or

(b) In the case of a taxable year beginning before January 1, 1970, the taxpayer owns directly at least 95 percent of each class of the stock of such corporation;

(ii) None of the stock of such corporation was acquired by the taxpayer solely for the purpose of converting a capital loss sustained by reason of the worthlessness of any such stock into an ordinary loss under section 165(g)(3), and

(iii) More than 90 percent of the aggregate of the gross receipts of such corporation for all the taxable years during which it has been in existence has been from sources other than roy-

alties, rents (except rents derived from rental of properties to employees of such corporation in the ordinary course of its operating business), dividends, interest (except interest received on the deferred purchase price of operating assets sold), annuities, and gains from sales or exchanges of stocks and securities. For this purpose, the term "gross receipts" means total receipts determined without any deduction for cost of goods sold, and gross receipts from sales or exchanges of stocks and securities shall be taken into account only to the extent of gains from such sales or exchanges.

(e) *Bonds issued by an insolvent corporation.* A bond of an insolvent corporation secured only by a mortgage from which nothing is realized for the bondholders on foreclosure shall be regarded as having become worthless not later than the year of the foreclosure sale, and no deduction in respect of the loss shall be allowed under section 165(a) in computing a bondholder's taxable income for a subsequent year. See also paragraph (d) of § 1.165-1.

(f) *Decline in market value.* A taxpayer possessing a security to which this section relates shall not be allowed any deduction under section 165(a) on account of mere market fluctuation in the value of such security. See also § 1.165-4.

(g) *Application to inventories.* This section does not apply to any loss upon the worthlessness of any security reflected in inventories required to be taken by a dealer in securities under section 471. See § 1.471-5.

(h) *Special rules for banks.* For special rules applicable under this section to worthless securities of a bank, including securities issued by an affiliated bank, see § 1.582-1.

(i) *Examples.* The provisions of this section may be illustrated by the following examples:

*Example (1).* (i) X Corporation, a domestic manufacturing corporation which makes its return on the basis of the calendar year, owns 100 percent of each class of the stock of Y Corporation; and, in addition, 19 percent of the common stock (the only class of stock) of Z Corporation, which it acquired in 1948. Y Corporation, a domestic manufacturing corporation which makes its return on the basis of the calendar year, owns 81 percent of the

common stock of Z Corporation, which it acquired in 1946. It is established that the stock of Z Corporation, which has from its inception derived all of its gross receipts from manufacturing operations, became worthless during 1971.

(ii) Since the stock of Z Corporation which is owned by X Corporation is a capital asset and since X Corporation does not directly own at least 80 percent of the stock of Z Corporation, any loss sustained by X Corporation upon the worthlessness of such stock shall be deducted under section 165(g)(1) and paragraph (c) of this section as a loss from a sale or exchange on December 31, 1971, of a capital asset. The loss so sustained by X Corporation shall be considered a long-term capital loss under the provisions of section 1222(4), since the stock was held by that corporation for more than 6 months.

(iii) Since Z Corporation is considered to be affiliated with Y Corporation under the provisions of paragraph (d)(2) of this section, any loss sustained by Y Corporation upon the worthlessness of the stock of Z Corporation shall be deducted in 1971 under section 165(g)(3) and paragraph (d)(1) of this section as an ordinary loss.

*Example (2).* (i) On January 1, 1971, X Corporation, a domestic manufacturing corporation which makes its return on the basis of the calendar year, owns 60 percent of each class of the stock of Y Corporation, a foreign corporation, which it acquired in 1950. Y Corporation has, from the date of its incorporation, derived all of its gross receipts from manufacturing operations. It is established that the stock of Y Corporation became worthless on June 30, 1971. On August 1, 1971, X Corporation acquires the balance of the stock of Y Corporation for the purpose of obtaining the benefit of section 165(g)(3) with respect to the loss it has sustained on the worthlessness of the stock of Y Corporation.

(ii) Since the stock of Y Corporation which is owned by X Corporation is a capital asset and since Y Corporation is not to be treated as affiliated with X Corporation under the provisions of paragraph (d)(2) of this section, notwithstanding the fact that, at the close of 1971, X Corporation owns 100 percent of each class of stock of Y Corporation, any loss sustained by X Corporation upon the worthlessness of such stock shall be deducted under the provisions of section 165(g)(1) and paragraph (c) of this section as a loss from a sale or exchange on December 31, 1971, of a capital asset.

*Example (3).* (i) X Corporation, a domestic manufacturing corporation which makes its return on the basis of the calendar year, owns 80 percent of each class of the stock of Y Corporation, which from its inception has derived all of its gross receipts from manufacturing operations. As one of its capital assets, X Corporation owns \$100,000 in registered bonds issued by Y Corporation pay-

able at maturity on December 31, 1974. It is established that these bonds became worthless during 1971.

(ii) Since Y Corporation is considered to be affiliated with X Corporation under the provisions of paragraph (d)(2) of this section, any loss sustained by X Corporation upon the worthlessness of these bonds may be deducted in 1971 under section 165(g)(3) and paragraph (d)(1) of this section as an ordinary loss. The loss may not be deducted under section 166 as a bad debt. See section 166(e).

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 7224, 37 FR 25928, Dec. 6, 1972]

#### § 1.165-6 Farming losses.

(a) *Allowance of losses.* (1) Except as otherwise provided in this section, any loss incurred in the operation of a farm as a trade or business shall be allowed as a deduction under section 165(a) or as a net operating loss deduction in accordance with the provisions of section 172. See § 1.172-1.

(2) If the taxpayer owns and operates a farm for profit in addition to being engaged in another trade or business, but sustains a loss from the operation of the farming business, then the amount of loss sustained in the operation of the farm may be deducted from gross income, if any, from all other sources.

(3) Loss incurred in the operation of a farm for recreation or pleasure shall not be allowed as a deduction from gross income. See § 1.162-12.

(b) *Loss from shrinkage.* If, in the course of the business of farming, farm products are held for a favorable market, no deduction shall be allowed under section 165(a) in respect of such products merely because of shrinkage in weight, decline in value, or deterioration in storage.

(c) *Loss of prospective crop.* The total loss by frost, storm, flood, or fire of a prospective crop being grown in the business of farming shall not be allowed as a deduction under section 165(a).

(d) *Loss of livestock—(1) Raised stock.* A taxpayer engaged in the business of raising and selling livestock, such as cattle, sheep, or horses, may not deduct as a loss under section 165(a) the value of animals that perish from

among those which were raised on the farm.

(2) *Purchased stock.* The loss sustained upon the death by disease, exposure, or injury of any livestock purchased and used in the trade or business of farming shall be allowed as a deduction under section 165(a). See, also, paragraph (e) of this section.

(e) *Loss due to compliance with orders of governmental authority.* The loss sustained upon the destruction by order of the United States, a State, or any other governmental authority, of any livestock, or other property, purchased and used in the trade or business of farming shall be allowed as a deduction under section 165(a).

(f) *Amount deductible—(1) Expenses of operation.* The cost of any feed, pasture, or care which is allowed under section 162 as an expense of operating a farm for profit shall not be included as a part of the cost of livestock for purposes of determining the amount of loss deductible under section 165(a) and this section. For the deduction of farming expenses, see §1.162-12.

(2) *Losses reflected in inventories.* If inventories are taken into account in determining the income from the trade or business of farming, no deduction shall be allowed under this section for losses sustained during the taxable year upon livestock or other products, whether purchased for resale or produced on the farm, to the extent such losses are reflected in the inventory on hand at the close of the taxable year. Nothing in this section shall be construed to disallow the deduction of any loss reflected in the inventories of the taxpayer. For provisions relating to inventories of farmers, see section 471 and the regulations thereunder.

(3) *Other limitations.* For other provisions relating to the amount deductible under this section, see paragraph (c) of §1.165-1, relating to the amount deductible under section 165(a); §1.165-7, relating to casualty losses; and §1.1231-1, relating to gains and losses from the sale or exchange of certain property used in the trade or business.

(g) *Other provisions applicable to farmers.* For other provisions relating to farmers, see §1.61-4, relating to gross income of farmers; paragraph (b) of §1.167(a)-6, relating to depreciation in

the case of farmers; and §1.175-1, relating to soil and water conservation expenditures.

#### § 1.165-7 Casualty losses.

(a) *In general—(1) Allowance of deduction.* Except as otherwise provided in paragraphs (b)(4) and (c) of this section, any loss arising from fire, storm, shipwreck, or other casualty is allowable as a deduction under section 165(a) for the taxable year in which the loss is sustained. However, see §1.165-6, relating to farming losses, and §1.165-11, relating to an election by a taxpayer to deduct disaster losses in the taxable year immediately preceding the taxable year in which the disaster occurred. The manner of determining the amount of a casualty loss allowable as a deduction in computing taxable income under section 63 is the same whether the loss has been incurred in a trade or business or in any transaction entered into for profit, or whether it has been a loss of property not connected with a trade or business and not incurred in any transaction entered into for profit. The amount of a casualty loss shall be determined in accordance with paragraph (b) of this section. For other rules relating to the treatment of deductible casualty losses, see §1.1231-1, relating to the involuntary conversion of property.

(2) *Method of valuation.* (i) In determining the amount of loss deductible under this section, the fair market value of the property immediately before and immediately after the casualty shall generally be ascertained by competent appraisal. This appraisal must recognize the effects of any general market decline affecting undamaged as well as damaged property which may occur simultaneously with the casualty, in order that any deduction under this section shall be limited to the actual loss resulting from damage to the property.

(ii) The cost of repairs to the property damaged is acceptable as evidence of the loss of value if the taxpayer shows that (a) the repairs are necessary to restore the property to its condition immediately before the casualty, (b) the amount spent for such repairs is not excessive, (c) the repairs do

not care for more than the damage suffered, and (d) the value of the property after the repairs does not as a result of the repairs exceed the value of the property immediately before the casualty.

(3) *Damage to automobiles.* An automobile owned by the taxpayer, whether used for business purposes or maintained for recreation or pleasure, may be the subject of a casualty loss, including those losses specifically referred to in subparagraph (1) of this paragraph. In addition, a casualty loss occurs when an automobile owned by the taxpayer is damaged and when:

(i) The damage results from the faulty driving of the taxpayer or other person operating the automobile but is not due to the willful act or willful negligence of the taxpayer or of one acting in his behalf or

(ii) The damage results from the faulty driving of the operator of the vehicle with which the automobile of the taxpayer collides.

(4) *Application to inventories.* This section does not apply to a casualty loss reflected in the inventories of the taxpayer. For provisions relating to inventories, see section 471 and the regulations thereunder.

(5) *Property converted from personal use.* In the case of property which originally was not used in the trade or business or for income-producing purposes and which is thereafter converted to either of such uses, the fair market value of the property on the date of conversion, if less than the adjusted basis of the property at such time, shall be used, after making proper adjustments in respect of basis, as the basis for determining the amount of loss under paragraph (b)(1) of this section. See paragraph (b) of § 1.165-9, and § 1.167(g)-1.

(6) *Theft losses.* A loss which arises from theft is not considered a casualty loss for purposes of this section. See § 1.165-8, relating to theft losses.

(b) *Amount deductible*—(1) *General rule.* In the case of any casualty loss whether or not incurred in a trade or business or in any transaction entered into for profit, the amount of loss to be taken into account for purposes of section 165(a) shall be the lesser of either—

(i) The amount which is equal to the fair market value of the property immediately before the casualty reduced by the fair market value of the property immediately after the casualty; or

(ii) The amount of the adjusted basis prescribed in § 1.1011-1 for determining the loss from the sale or other disposition of the property involved.

However, if property used in a trade or business or held for the production of income is totally destroyed by casualty, and if the fair market value of such property immediately before the casualty is less than the adjusted basis of such property, the amount of the adjusted basis of such property shall be treated as the amount of the loss for purposes of section 165(a).

(2) *Aggregation of property for computing loss.* (i) A loss incurred in a trade or business or in any transaction entered into for profit shall be determined under subparagraph (1) of this paragraph by reference to the single, identifiable property damaged or destroyed. Thus, for example, in determining the fair market value of the property before and after the casualty in a case where damage by casualty has occurred to a building and ornamental or fruit trees used in a trade or business, the decrease in value shall be measured by taking the building and trees into account separately, and not together as an integral part of the realty, and separate losses shall be determined for such building and trees.

(ii) In determining a casualty loss involving real property and improvements thereon not used in a trade or business or in any transaction entered into for profit, the improvements (such as buildings and ornamental trees and shrubbery) to the property damaged or destroyed shall be considered an integral part of the property, for purposes of subparagraph (1) of this paragraph, and no separate basis need be apportioned to such improvements.

(3) *Examples.* The application of this paragraph may be illustrated by the following examples:

*Example (1).* In 1956 B purchases for \$3,600 an automobile which he uses for nonbusiness purposes. In 1959 the automobile is damaged

**Internal Revenue Service, Treasury**

**§ 1.165-7**

in an accidental collision with another automobile. The fair market value of B's automobile is \$2,000 immediately before the collision and \$1,500 immediately after the collision. B receives insurance proceeds of \$300 to cover the loss. The amount of the deduction allowable under section 165(a) for the taxable year 1959 is \$200, computed as follows:

Value of automobile immediately before casualty .....	\$2,000
Less: Value of automobile immediately after casualty .....	1,500
Value of property actually destroyed .....	500
Loss to be taken into account for purposes of section 165(a): Lesser amount of property actually destroyed (\$500) or adjusted basis of property (\$3,600) .....	500
Less: Insurance received .....	300
Deduction allowable .....	200

*Example (2).* In 1958 A purchases land containing an office building for the lump sum of \$90,000. The purchase price is allocated between the land (\$18,000) and the building (\$72,000) for purposes of determining basis. After the purchase A planted trees and ornamental shrubs on the grounds surrounding the building. In 1961 the land, building, trees, and shrubs are damaged by hurricane. At the time of the casualty the adjusted basis of the land is \$18,000 and the adjusted basis of the building is \$66,000. At that time the trees and shrubs have an adjusted basis of \$1,200. The fair market value of the land and building immediately before the casualty is \$18,000 and \$70,000, respectively, and immediately after the casualty is \$18,000 and \$52,000, respectively. The fair market value of the trees and shrubs immediately before the casualty is \$2,000 and immediately after the casualty is \$400. In 1961 insurance of \$5,000 is received to cover the loss to the building. A has no other gains or losses in 1961 subject to section 1231 and §1.1231-1. The amount of the deduction allowable under section 165(a) with respect to the building for the taxable year 1961 is \$13,000, computed as follows:

Value of property immediately before casualty .....	\$70,000
Less: Value of property immediately after casualty .....	52,000
Value of property actually destroyed .....	18,000
Less: Insurance received .....	5,000
Loss to be taken into account for purposes of section 165(a): Lesser amount of property actually destroyed (\$18,000) or adjusted basis of property (\$66,000) .....	18,000
Less: Insurance received .....	5,000
Deduction allowable .....	13,000

The amount of the deduction allowable under section 165(a) with respect to the trees and shrubs for the taxable year 1961 is \$1,200, computed as follows:

Value of property immediately before casualty .....	\$2,000
Less: Value of property immediately after casualty .....	\$400

Value of property actually destroyed .....	1,600
Loss to be taken into account for purposes of section 165(a): Lesser amount of property actually destroyed (\$1,600) or adjusted basis of property (\$1,200) .....	1,200

*Example (3).* Assume the same facts as in example (2) except that A purchases land containing a house instead of an office building. The house is used as his private residence. Since the property is used for personal purposes, no allocation of the purchase price is necessary for the land and house. Likewise, no individual determination of the fair market values of the land, house, trees, and shrubs is necessary. The amount of the deduction allowable under section 165(a) with respect to the land, house, trees, and shrubs for the taxable year 1961 is \$14,600, computed as follows:

Value of property immediately before casualty .....	\$90,000
Less: Value of property immediately after casualty .....	70,400
Value of property actually destroyed .....	19,600
Loss to be taken into account for purposes of section 165(a): Lesser amount of property actually destroyed (\$19,600) or adjusted basis of property (\$91,200) .....	19,600
Less: Insurance received .....	5,000
Deduction allowable .....	14,600

(4) *Limitation on certain losses sustained by individuals after December 31, 1963.* (i) Pursuant to section 165(c)(3), the deduction allowable under section 165(a) in respect of a loss sustained—

(a) After December 31, 1963, in a taxable year ending after such date,

(b) In respect of property not used in a trade or business or for income producing purposes, and

(c) From a single casualty

shall be limited to that portion of the loss which is in excess of \$100. The non-deductibility of the first \$100 of loss applies to a loss sustained after December 31, 1963, without regard to when the casualty occurred. Thus, if property not used in a trade or business or for income producing purposes is damaged or destroyed by a casualty which occurred prior to January 1, 1964, and loss resulting therefrom is sustained after December 31, 1963, the \$100 limitation applies.

(ii) The \$100 limitation applies separately in respect of each casualty and applies to the entire loss sustained from each casualty. Thus, if as a result of a particular casualty occurring in 1964, a taxpayer sustains in 1964 a loss

of \$40 and in 1965 a loss of \$250, no deduction is allowable for the loss sustained in 1964 and the loss sustained in 1965 must be reduced by \$60 (\$100 - \$40). The determination of whether damage to, or destruction of, property resulted from a single casualty or from two or more separate casualties will be made upon the basis of the particular facts of each case. However, events which are closely related in origin generally give rise to a single casualty. For example, if a storm damages a taxpayer's residence and his automobile parked in his driveway, any loss sustained results from a single casualty. Similarly, if a hurricane causes high waves, all wind and flood damage to a taxpayer's property caused by the hurricane and the waves results from a single casualty.

(iii) Except as otherwise provided in this subdivision, the \$100 limitation applies separately to each individual taxpayer who sustains a loss even though the property damaged or destroyed is owned by two or more individuals. Thus, if a house occupied by two sisters and jointly owned by them is damaged or destroyed, the \$100 limitation applies separately to each sister in respect of any loss sustained by her. However, for purposes of applying the \$100 limitation, a husband and wife who file a joint return for the first taxable year in which the loss is allowable as a deduction are treated as one individual taxpayer. Accordingly, if property jointly owned by a husband and wife, or property separately owned by the husband or by the wife, is damaged or destroyed by a single casualty in 1964, and a loss is sustained in that year by either or both the husband or wife, only one \$100 limitation applies if a joint return is filed for 1964. If, however, the husband and wife file separate returns for 1964, the \$100 limitation applies separately in respect of any loss sustained by the husband and in respect of any loss sustained by the wife. Where losses from a single casualty are sustained in two or more separate tax years, the husband and wife shall, for purposes of applying the \$100 limitation to such losses, be treated as one individual for all such years if they file a joint return for the first year in which a loss is sustained from the casualty; they shall be treated as separate

individuals for all such years if they file separate returns for the first such year. If a joint return is filed in the first loss year but separate returns are filed in a subsequent year, any unused portion of the \$100 limitation shall be allocated equally between the husband and wife in the latter year.

(iv) If a loss is sustained in respect of property used partially for business and partially for nonbusiness purposes, the \$100 limitation applies only to that portion of the loss properly attributable to the nonbusiness use. For example, if a taxpayer sustains a \$1,000 loss in respect of an automobile which he uses 60 percent for business and 40 percent for nonbusiness, the loss is allocated 60 percent to business use and 40 percent to nonbusiness use. The \$100 limitation applies to the portion of the loss allocable to the nonbusiness loss.

(c) *Loss sustained by an estate.* A casualty loss of property not connected with a trade or business and not incurred in any transaction entered into for profit which is sustained during the settlement of an estate shall be allowed as a deduction under sections 165(a) and 641(b) in computing the taxable income of the estate if the loss has not been allowed under section 2054 in computing the taxable estate of the decedent and if the statement has been filed in accordance with § 1.642(g)-1. See section 165(c)(3).

(d) *Loss treated as though attributable to a trade or business.* For the rule treating a casualty loss not connected with a trade or business as though it were a deduction attributable to a trade or business for purposes of computing a net operating loss, see paragraph (a)(3)(iii) of § 1.172-3.

(e) *Effective date.* The rules of this section are applicable to any taxable year beginning after January 16, 1960. If, for any taxable year beginning on or before such date, a taxpayer computed the amount of any casualty loss in accordance with the rules then applicable, such taxpayer is not required to change the amount of the casualty loss allowable for any such prior taxable year. On the other hand, the taxpayer may, if he so desires, amend his income tax return for such year to compute the amount of a casualty loss in accordance with the provisions of this

section, but no provision in this section shall be construed as extending the period of limitations within which a claim for credit or refund may be filed under section 6511.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6712, 29 FR 3652, Mar. 24, 1964; T.D. 6786, 29 FR 18501, Dec. 29, 1964; T.D. 7522, 42 FR 63411, Dec. 16, 1977]

### § 1.165-8 Theft losses.

(a) *Allowance of deduction.* (1) Except as otherwise provided in paragraphs (b) and (c) of this section, any loss arising from theft is allowable as a deduction under section 165(a) for the taxable year in which the loss is sustained. See section 165(c)(3).

(2) A loss arising from theft shall be treated under section 165(a) as sustained during the taxable year in which the taxpayer discovers the loss. See section 165(e). Thus, a theft loss is not deductible under section 165(a) for the taxable year in which the theft actually occurs unless that is also the year in which the taxpayer discovers the loss. However, if in the year of discovery there exists a claim for reimbursement with respect to which there is a reasonable prospect of recovery, see paragraph (d) of § 1.165-1.

(3) The same theft loss shall not be taken into account both in computing a tax under chapter 1, relating to the income tax, or chapter 2, relating to additional income taxes, of the Internal Revenue Code of 1939 and in computing the income tax under the Internal Revenue Code of 1954. See section 7852(c), relating to items not to be twice deducted from income.

(b) *Loss sustained by an estate.* A theft loss of property not connected with a trade or business and not incurred in any transaction entered into for profit which is discovered during the settlement of an estate, even though the theft actually occurred during a taxable year of the decedent, shall be allowed as a deduction under sections 165(a) and 641(b) in computing the taxable income of the estate if the loss has not been allowed under section 2054 in computing the taxable estate of the decedent and if the statement has been filed in accordance with § 1.642(g)-1. See section 165(c)(3). For purposes of deter-

mining the year of deduction, see paragraph (a)(2) of this section.

(c) *Amount deductible.* The amount deductible under this section in respect of a theft loss shall be determined consistently with the manner prescribed in § 1.165-7 for determining the amount of casualty loss allowable as a deduction under section 165(a). In applying the provisions of paragraph (b) of § 1.165-7 for this purpose, the fair market value of the property immediately after the theft shall be considered to be zero. In the case of a loss sustained after December 31, 1963, in a taxable year ending after such date, in respect of property not used in a trade or business or for income producing purposes, the amount deductible shall be limited to that portion of the loss which is in excess of \$100. For rules applicable in applying the \$100 limitation, see paragraph (b)(4) of § 1.165-7. For other rules relating to the treatment of deductible theft losses, see § 1.1231-1, relating to the involuntary conversion of property.

(d) *Definition.* For purposes of this section the term "theft" shall be deemed to include, but shall not necessarily be limited to, larceny, embezzlement, and robbery.

(e) *Application to inventories.* This section does not apply to a theft loss reflected in the inventories of the taxpayer. For provisions relating to inventories, see section 471 and the regulations thereunder.

(f) *Example.* The application of this section may be illustrated by the following example:

*Example.* In 1955 B, who makes her return on the basis of the calendar year, purchases for personal use a diamond brooch costing \$4,000. On November 30, 1961, at which time it has a fair market value of \$3,500, the brooch is stolen; but B does not discover the loss until January 1962. The brooch was fully insured against theft. A controversy develops with the insurance company over its liability in respect of the loss. However, in 1962, B has a reasonable prospect of recovery of the fair market value of the brooch from the insurance company. The controversy is settled in March 1963, at which time B receives \$2,000 in insurance proceeds to cover the loss from theft. No deduction for the loss is allowable for 1961 or 1962; but the amount of the deduction allowable under section 165(a) for the taxable year 1963 is \$1,500, computed as follows:

Value of property immediately before theft .....	\$3,500
--	---------

§ 1.165-9

Less: Value of property immediately after the theft	0
Balance	3,500
Loss to be taken into account for purposes of section 165(a): (\$3,500 but not to exceed adjusted basis of \$4,000 at time of theft)	\$3,500
Less: Insurance received in 1963	2,000
Deduction allowable for 1963	1,500

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6786, 29 FR 18502, Dec. 29, 1964]

§ 1.165-9 Sale of residential property.

(a) *Losses not allowed.* A loss sustained on the sale of residential property purchased or constructed by the taxpayer for use as his personal residence and so used by him up to the time of the sale is not deductible under section 165(a).

(b) *Property converted from personal use.* (1) If property purchased or constructed by the taxpayer for use as his personal residence is, prior to its sale, rented or otherwise appropriated to income-producing purposes and is used for such purposes up to the time of its sale, a loss sustained on the sale of the property shall be allowed as a deduction under section 165(a).

(2) The loss allowed under this paragraph upon the sale of the property shall be the excess of the adjusted basis prescribed in § 1.1011-1 for determining loss over the amount realized from the sale. For this purpose, the adjusted basis for determining loss shall be the lesser of either of the following amounts, adjusted as prescribed in § 1.1011-1 for the period subsequent to the conversion of the property to income-producing purposes:

- (i) The fair market value of the property at the time of conversion, or
- (ii) The adjusted basis for loss, at the time of conversion, determined under § 1.1011-1 but without reference to the fair market value.

(3) For rules relating to casualty losses of property converted from personal use, see paragraph (a)(5) of § 1.165-7. To determine the basis for depreciation in the case of such property, see § 1.167(g)-1. For limitations on the loss from the sale of a capital asset, see paragraph (c)(3) of § 1.165-1.

(c) *Examples.* The application of paragraph (b) of this section may be illustrated by the following examples:

*Example (1).* Residential property is purchased by the taxpayer in 1943 for use as his personal residence at a cost of \$25,000, of which \$15,000 is allocable to the building. The taxpayer uses the property as his personal residence until January 1, 1952, at which time its fair market value is \$22,000, of which \$12,000 is allocable to the building. The taxpayer rents the property from January 1, 1952, until January 1, 1955, at which time it is sold for \$16,000. On January 1, 1952, the building has an estimated useful life of 20 years. It is assumed that the building has no estimated salvage value and that there are no adjustments in respect of basis other than depreciation, which is computed on the straight-line method. The loss to be taken into account for purposes of section 165(a) for the taxable year 1955 is \$4,200, computed as follows:

Basis of property at time of conversion for purposes of this section (that is, the lesser of \$25,000 cost or \$22,000 fair market value)	\$22,000
Less: Depreciation allowable from January 1, 1952, to January 1, 1955 (3 years at 5 percent based on \$12,000, the value of the building at time of conversion, as prescribed by § 1.167(g)-1)	1,800
Adjusted basis prescribed in § 1.1011-1 for determining loss on sale of the property	20,200
Less: Amount realized on sale	16,000

Loss to be taken into account for purposes of section 165(a)	4,200
--	-------

In this example the value of the building at the time of conversion is used as the basis for computing depreciation. See example (2) of this paragraph wherein the adjusted basis of the building is required to be used for such purpose.

*Example (2).* Residential property is purchased by the taxpayer in 1940 for use as his personal residence at a cost of \$23,000, of which \$10,000 is allocable to the building. The taxpayer uses the property as his personal residence until January 1, 1953, at which time its fair market value is \$20,000, of which \$12,000 is allocable to the building. The taxpayer rents the property from January 1, 1953, until January 1, 1957, at which time it is sold for \$17,000. On January 1, 1953, the building has an estimated useful life of 20 years. It is assumed that the building has no estimated salvage value and that there are no adjustments in respect of basis other than depreciation, which is computed on the straight-line method. The loss to be taken into account for purposes of section 165(a) for the taxable year 1957 is \$1,000, computed as follows:

**Internal Revenue Service, Treasury**

**§ 1.165-11**

Basis of property at time of conversion for purposes of this section (that is, the lesser of \$23,000 cost or \$20,000 fair market value) .....	\$20,000
Less: Depreciation allowable from January 1, 1953, to January 1, 1957 (4 years at 5 percent based on \$10,000, the cost of the building, as prescribed by § 1.167(g)-1 .....	2,000
Adjusted basis prescribed in § 1.1011-1 for determining loss on sale of the property .....	\$18,000
Less: Amount realized on sale .....	17,000
Loss to be taken into account for purposes of section 165(a) .....	1,000

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6712, 29 FR 3652, Mar. 24, 1964]

**§ 1.165-10 Wagering losses.**

Losses sustained during the taxable year on wagering transactions shall be allowed as a deduction but only to the extent of the gains during the taxable year from such transactions. In the case of a husband and wife making a joint return for the taxable year, the combined losses of the spouses from wagering transactions shall be allowed to the extent of the combined gains of the spouses from wagering transactions.

**§ 1.165-11 Election in respect of losses attributable to a disaster.**

(a) *In general.* Section 165(h) provides that a taxpayer who has sustained a disaster loss which is allowable as a deduction under section 165(a) may, under certain circumstances, elect to deduct such loss for the taxable year immediately preceding the taxable year in which the disaster actually occurred.

(b) *Loss subject to election.* The election provided by section 165(h) and paragraph (a) of this section applies only to a loss:

(1) Arising from a disaster resulting in a determination referred to in subparagraph (2) of this paragraph and occurring—

- (i) After December 31, 1971, or
- (ii) After December 31, 1961, and before January 1, 1972, and during the period following the close of a particular taxable year of the taxpayer and on or before the due date for filing the income tax return for that taxable year (determined without regard to any ex-

tension of time granted the taxpayer for filing such return);

(2) Occurring in an area subsequently determined by the President of the United States to warrant assistance by the Federal Government under the Disaster Relief Act of 1974; and

(3) Constituting a loss otherwise allowable as a deduction for the year in which the loss occurred under section 165(a) and the provisions of §§ 1.165-1 through 1.165-10 which are applicable to such losses.

(c) *Amount of loss to which election applies.* The amount of the loss to which section 165(h) and this section apply shall be the amount of the loss sustained during the period specified in paragraph (b)(1) of this section computed in accordance with the provisions of section 165 and those provisions of §§ 1.165-1 through 1.165-10 which are applicable to such losses. However, for purposes of making such computation, the period specified in paragraph (b)(1) of this section shall be deemed to be a taxable year.

(d) *Scope and effect of election.* An election made pursuant to section 165(h) and this section in respect of a loss arising from a particular disaster shall apply to the entire loss sustained by the taxpayer from such disaster during the period specified in paragraph (b)(1) of this section in the area specified in paragraph (b)(2) of this section. If such an election is made, the disaster to which the election relates will be deemed to have occurred in the taxable year immediately preceding the taxable year in which the disaster actually occurred, and the loss to which the election applies will be deemed to have been sustained in such preceding taxable year.

(e) *Time and manner of making election.* An election to claim a deduction with respect to a disaster loss described in paragraph (b) of this section for the taxable year immediately preceding the taxable year in which the disaster actually occurred must be made by filing a return, an amended return, or a claim for refund clearly showing that the election provided by section 165(h) has been made. In general, the return or claim should specify the date or dates of the disaster which gave rise to the loss, and the city,

town, county, and State in which the property which was damaged or destroyed was located at the time of the disaster. An election in respect of a loss arising from a particular disaster occurring after December 31, 1971, must be made on or before the later of (1) the due date for filing the income tax return (determined without regard to any extension of time granted the taxpayer for filing such return) for the taxable year in which the disaster actually occurred, or (2) the due date of filing the income tax return (determined with regard to any extension of time granted the taxpayer for filing such return) for the taxable year immediately preceding the taxable year in which the disaster actually occurred. Such election shall be irrevocable after the later of (1) 90 days after the date on which the election was made, or (2) March 6, 1973. No revocation of such election shall be effective unless the amount of any credit or refund which resulted from such election is paid to the Internal Revenue Service within the revocation period described in the preceding sentence. However, in the case of a revocation made before receipt by the taxpayer of a refund claimed pursuant to such election, the revocation shall be effective if the refund is repaid within 30 calendar days after such receipt. An election in respect of a loss arising from a particular disaster occurring after December 31, 1961, and before January 1, 1972, must be made on or before the later of (1) the 15th day of the third month following the month in which falls the date prescribed for the filing of the income tax return (determined without regard to any extension of time granted the taxpayer for filing such return) for the taxable year immediately preceding the taxable year in which the disaster actually occurred, or (2) the due date for filing the income tax return (determined with regard to any extension of time granted the taxpayer for filing such return) for the taxable year immediately preceding the taxable year in which the disaster actually occurred. Such election shall be ir-

revocable after the date by which it must be made.

[T.D. 6735, 29 FR 6493, May 19, 1964, as amended by T.D. 7224, 37 FR 25928, Dec. 6, 1972; T.D. 7522, 42 FR 63411, Dec. 16, 1977]

**§ 1.165-12 Denial of deduction for losses on registration-required obligations not in registered form.**

(a) *In general.* Except as provided in paragraph (c) of this section, nothing in section 165(a) and the regulations thereunder, or in any other provision of law, shall be construed to provide a deduction for any loss sustained on any registration-required obligation held after December 31, 1982, unless the obligation is in registered form or the issuance of the obligation was subject to tax under section 4701. The term “registration-required obligation” has the meaning given to that term in section 163(f)(2), except that clause (iv) of subparagraph (A) thereof shall not apply. Therefore, although an obligation that is not in registered form is described in § 1.163-5(c)(1), the holder of such an obligation shall not be allowed a deduction for any loss sustained on such obligation unless paragraph (c) of this section applies. The term “holder” means the person that would be denied a loss deduction under section 165(j)(1) or denied capital gain treatment under section 1287(a). For purposes of this section, the term *United States* means the United States and its possessions within the meaning of § 1.163-5(c)(2)(iv).

(b) *Registered form—(1) Obligations issued after September 21, 1984.* With respect to any obligation originally issued after September 21, 1984, the term “registered form” has the meaning given that term in section 103(j)(3) and the regulations thereunder. Therefore, an obligation that would otherwise be in registered form is not considered to be in registered form if it can be transferred at that time or at any time until its maturity by any means not described in § 5f.103-1(c). An obligation that, as of a particular time, is not considered to be in registered form because it can be transferred by any means not described in § 5f.103-1(c) is considered to be in registered form at all times during the period beginning with a later time and ending with the maturity of the obligation in which

the obligation can be transferred only by a means described in § 5f.103-1(c).

(2) *Obligations issued after December 31, 1982 and on or before September 21, 1984.* With respect to any obligation originally issued after December 31, 1982 and on or before September 21, 1984 or an obligation originally issued after September 21, 1984 pursuant to the exercise of a warrant or the conversion of a convertible obligation, which warrant or obligation (including conversion privilege) was issued after December 31, 1982 and on or before September 21, 1984, that obligation will be considered in registered form if it satisfied § 5f.163-1 or the proposed regulations provided in § 1.163-5(c) and published in the FEDERAL REGISTER on September 2, 1983 (48 FR 39953).

(c) *Registration-required obligations not in registered form which are not subject to section 165(j)(1).* Notwithstanding the fact that an obligation is a registration-required obligation that is not in registered form, the holder will not be subject to section 165(j)(1) if the holder meets the conditions of any one of the following subparagraphs (1), (2), (3), or (4) of this paragraph (c).

(1) *Persons permitted to hold in connection with the conduct of a trade or business.* (i) The holder is an underwriter, broker, dealer, bank, or other financial institution (defined in paragraph (c)(1)(iv)) that holds such obligation in connection with its trade or business conducted outside the United States; or the holder is a broker-dealer (registered under Federal or State law or exempted from registration by the provisions of such law because it is a bank) that holds such obligation for sale to customers in the ordinary course of its trade or business.

(ii) The holder must offer to sell, sell and deliver the obligation in bearer form only outside of the United States except that a holder that is a registered broker-dealer as described in paragraph (c)(1)(i) of this section may offer to sell and sell the obligation in bearer form inside the United States to a financial institution as defined in paragraph (c)(1)(iv) of this section for its own account or for the account of another financial institution or of an exempt organization as defined in section 501(c)(3).

(iii) The holder may deliver an obligation in bearer form that is offered or sold inside the United States only if the holder delivers it to a financial institution that is purchasing for its own account, or for the account of another financial institution or of an exempt organization, and the financial institution or organization that purchases the obligation for its own account or for whose account the obligation is purchased represents that it will comply with the requirements of section 165(j)(3) (A), (B), or (C). Absent actual knowledge that the representation is false, the holder may rely on a written statement provided by the financial institution or exempt organization, including a statement that is delivered in electronic form. The holder may deliver a registration-required obligation in bearer form that is offered and sold outside the United States to a person other than a financial institution only if the holder has evidence in its records that such person is not a U.S. citizen or resident and does not have actual knowledge that such evidence is false. Such evidence may include a written statement by that person, including a statement that is delivered electronically. For purposes of this paragraph (c), the term *deliver* includes a transfer of an obligation evidenced by a book entry including a book entry notation by a clearing organization evidencing transfer of the obligation from one member of the organization to another member. For purposes of this paragraph (c), the term *deliver* does not include a transfer of an obligation to the issuer or its agent for cancellation or extinguishment. The record-retention provisions in § 1.1441-1(e)(4)(iii) shall apply to any statement that a holder receives pursuant to this paragraph (c)(1)(iii).

(iv) For purposes of paragraph (c) of this section, the term "financial institution" means a person which itself is, or more than 50 percent of the total combined voting power of all classes of whose stock entitled to vote is owned by a person which is—

(A) Engaged in the conduct of a banking, financing, or similar business within the meaning of section 954(c)(3)(B) as in effect before the Tax

Reform Act of 1986, and the regulations thereunder;

(B) Engaged in business as a broker or dealer in securities;

(C) An insurance company;

(D) A person that provides pensions or other similar benefits to retired employees;

(E) Primarily engaged in the business of rendering investment advice;

(F) A regulated investment company or other mutual fund; or

(G) A finance corporation a substantial part of the business of which consists of making loans (including the acquisition of obligations under a lease which is entered into primarily as a financing transaction), acquiring accounts receivable, notes or installment obligations arising out of the sale of tangible personal property or the performing of services, or servicing debt obligations.

(2) *Persons permitted to hold obligations for their own investment account.* The holder is a financial institution holding the obligation for its own investment account that satisfies the conditions set forth in subdivisions (i), (ii), (iii), and (iv) of his paragraph (c) (2).

(i) The holder reports on its Federal income tax return for the taxable year any interest payments received (including original issue discount includable in gross income for such taxable year) with respect to such obligation and gain or loss on the sale or other disposition of such obligation;

(ii) The holder indicates on its Federal income tax return that income, gain or loss described in paragraph (c)(2)(i) is attributable to registration-required obligations held in bearer form for its own account;

(iii) The holder of a bearer obligation that resells the obligation inside the United States resells the obligation only to another financial institution for its own account or for the account of another financial institution or exempt organization; and

(iv) The holder delivers such obligation in bearer form to any other person in accordance with paragraph (c)(1) (ii) and (iii) of this section.

(3) *Persons permitted to hold through financial institutions.* The holder is any person that purchases and holds a registration-required obligation in bearer

form through a financial institution with which the holder maintains a customer, custodial or nominee relationship and such institution agrees to satisfy, and does in fact satisfy, the conditions set forth in subdivisions (i), (ii), (iii), (iv) and (v) of this paragraph (c)(3).

(i) The financial institution makes a return of information to the Internal Revenue Service with respect to any interest payments received. The financial institution must report original issue discount includable in the holder's gross income for the taxable year on any obligation so held, but only if the obligation appears in an Internal Revenue Service publication of obligations issued at an original issue discount and only in an amount determined in accordance with information contained in that publication. An information return for any interest payment shall be made on a Form 1099 for the calendar year. It shall indicate the aggregate amount of the payment received, the name, address and taxpayer identification number of the holder, and such other information as is required by the form. No return of information is required under this subdivision if the financial institution reports payments under section 6041 or 6049.

(ii) The financial institution makes a return of information on Form 1099B with respect to any disposition by the holder of such obligation. The return shall show the name, address, and taxpayer identification number of the holder of the obligation, Committee on Uniform Security Information Procedures (CUSIP), gross proceeds, sale date, and such other information as may be required by the form. No return of information is required under this subdivision if such financial institution reports with respect to the disposition under section 6045.

(iii) In the case of a bearer obligation offered for resale or resold in the United States, the financial institution may resell the obligation only to another financial institution for its own account or for the account of an exempt organization.

(iv) The financial institution covenants with the holder that the financial institution will deliver the obligation in bearer form in accordance with

the requirements set forth in paragraph (c)(1) (ii) and (iii).

(v) The financial institution delivers the obligation in bearer form in accordance with paragraph (c)(1) (ii) and (iv) as if the financial institution delivering the obligation were the holder referred to in such paragraph.

(4) *Conversion of obligations into registered form.* The holder is not a person described in paragraph (c) (1), (2), or (3) of this section, and within thirty days of the date when the seller or other transferor is reasonably able to make the bearer obligation available to the holder, the holder surrenders the obligation to a transfer agent or the issuer for conversion of the obligation into registered form. If such obligation is not registered within such 30 day period, the holder shall be subject to sections 165(j) and 1287(a).

(d) *Effective date.* These regulations apply generally to obligations issued after January 20, 1987. However, a taxpayer may choose to apply the rules of § 1.165-12 with respect to an obligation issued after December 31, 1982 and on or before January 20, 1987, which obligation is held after January 20, 1987.

[T.D. 8110, 51 FR 45459, Dec. 19, 1986, as amended by T.D. 8734, 62 FR 53416, Oct. 14, 1997]

**§ 1.165-13T Questions and answers relating to the treatment of losses on certain straddle transactions entered into before the effective date of the Economic Recovery Tax Act of 1981, under section 108 of the Tax Reform Act of 1984 (temporary).**

The following questions and answers concern the treatment of losses on certain straddle transactions entered into before the effective date of the Economic Recovery Tax Act of 1981, under the Tax Reform Act of 1984 (98 Stat. 494).

*Q-1* What is the scope of section 108 of the Tax Reform Act of 1984 (Act)?

*A-1* Section 108 of the Act provides that in the case of any disposition of one or more positions, which were entered into before 1982 and form part of a straddle, and to which the provisions of Title V of The Economic Recovery Act of 1981 (ERTA) do not apply, any loss from such disposition shall be allowed for the taxable year of the dis-

position if such position is part of a transaction entered into for profit. For purposes of section 108 of the Act, the term "straddle" has the meaning given to such term by section 1092(c) of the Internal Revenue Code of 1954 as in effect on the day after the date of enactment of ERTA; including a straddle all the positions of which are regulated futures contracts (as defined in Q&A-6 of this section). Straddles in certain listed stock options were not covered by ERTA and are not affected by this provision.

*Q-2* What transactions are considered entered into for profit?

*A-2* A transaction is considered entered into for profit if the transaction is entered into for profit within the meaning of section 165(c)(2) of the Code. In this respect, section 108 of the Act restates existing law applicable to straddle transactions. All the circumstances surrounding the transaction, including the magnitude and timing for entry into, and disposition of, the positions comprising the transaction are relevant in making the determination whether a transaction is considered entered into for profit. Moreover, in order for section 108 of the Act to apply, the transaction must have sufficient substance to be recognized for Federal income tax purposes. Thus, for example, since a "sham" transaction would not be recognized for tax purposes, section 108 of the Act would not apply to such a transaction.

*Q-3* If a loss is disallowed in a taxable year (year 1) because the transaction was not entered into for profit, is the entire gain from the straddle occurring in a later taxable year taxed?

*A-3* No. Under section 108(c) of the Act the taxpayer is allowed to offset the gain in the subsequent taxable year by the amount of loss (including expenses) disallowed in year 1.

*Q-4* In what manner does the for-profit test of Q&A-2 apply to losses from straddle transactions sustained by commodities dealers and persons regularly engaged in investing in regulated futures contracts?

*A-4* In general, for a loss to be allowable with respect to positions that form part of a straddle, the for-profit test of Q&A-2 must be satisfied. However, certain positions (see Q&A-6) held

by a commodities dealer or person regularly engaged in investing in regulated futures contracts are rebuttably presumed to be part of a transaction entered into for profit. Thus, the for profit test is applied to commodities dealers and persons regularly engaged in investing in regulated futures contracts in light of the factors relating to the applicability and rebuttal of the profit presumption, including, for example, the nature and extent of the taxpayer's trading activities.

**Q-5** Under what circumstances is the presumption considered rebutted?

**A-5** All the facts and circumstances of each case are to be considered in determining if the presumption is rebutted. The following factors are significant in making this determination: (1) The level of transaction costs; (2) the extent to which the transaction results from trading patterns different from the taxpayer's regular patterns; and (3) the extent of straddle transactions having tax results disproportionate to economic consequences. Factors other than the ones described above may be taken into account in making the determination. Moreover, a determination is not to be made solely on the basis of the number of factors indicating that the presumption is rebutted.

**Q-6** Does a commodities dealer or person regularly engaged in investing in regulated futures contracts qualify for the profit presumption for all transactions?

**A-6** No. The presumption is only applicable to regulated futures contract transactions in property that is the subject of the person's regular trading activity. For example, a commodities dealer who regularly trades only in agricultural futures will not qualify for the presumption for a silver futures straddle transaction. For purposes of this section, the term "regulated futures contracts" has the meaning given to such term by section 1256(b) of the Code as in effect before the enactment of the Tax Reform Act of 1984.

**Q-7** Who qualifies as a commodities dealer or as a person regularly engaged in investing in regulated futures contracts for purposes of the profit presumption?

**A-7** For purposes of this section, the term "commodities dealer" has the meaning given to such term by section 1402(i)(2)(B) of the Code. Section 1402(i)(2)(B) defines a commodities dealer as a person who is actively engaged in trading section 1256 contracts (which includes regulated futures contracts as defined in Q&A-6) and is registered with a domestic board of trade which is designated as a contract market by the Commodity Futures Trading Commission. To determine if a person is regularly engaged in investing in regulated futures contracts all the facts and circumstances should be considered including, but not limited to, the following factors: (1) Regularity of trading at all times throughout the year; (2) the level of transaction costs; (3) substantial volume and economic consequences of trading at all times throughout the year; (4) percentage of time dedicated to commodity trading activities as compared to other activities; and (5) the person's knowledge of the regulated futures contract market.

**Q-8** If a commodities dealer or a person regularly engaged in investing in regulated futures contracts participates in a syndicate, as defined in section 1256(e)(3)(B) of the Code, does the rebuttable presumption of "entered into for profit" apply to the transactions entered into through the syndicate?

**A-8** No. A participant in a syndicate does not qualify for the rebuttable presumption of "entered into for profit" with respect to transactions entered into by or for the syndicate. A syndicate is defined in section 1256(e)(3)(B) of the Code as any partnership or other entity (other than a corporation which is not an S corporation) if more than 35 percent of the losses of such entity during the taxable year are allocable to limited partners or limited entrepreneurs (within the meaning of section 464(e)(2)).

**Q-9** Will the Service continue to make the closed and completed transaction argument set forth in Rev. Rul. 77-185, 1977-1 C.B. 48, with respect to transactions covered by section 108 of the Act?

**A-9** No. The closed and completed transaction argument will not be made

regarding transactions subject to section 108 of the Act. In general, losses in such transactions will be allowed for the taxable year of disposition if the transaction is not viewed as a sham and satisfies the "entered into for profit" test described in Q&A-2. Nevertheless, for certain positions covered by section 108 of the Act, various Code sections may apply without regard to whether such position constitutes a straddle to disallow or limit the loss otherwise allowable in the year of the disposition. For example, dispositions of certain positions held by a partnership which resulted in a loss to a partner may be limited or disallowed under section 465 of 704(d).

[T.D. 7968, 49 FR 33445, Aug. 23, 1984]

#### § 1.166-1 Bad debts.

(a) *Allowance of deduction.* Section 166 provides that, in computing taxable income under section 63, a deduction shall be allowed in respect of bad debts owed to the taxpayer. For this purpose, bad debts shall, subject to the provisions of section 166 and the regulations thereunder, be taken into account either as—

(1) A deduction in respect of debts which become worthless in whole or in part; or as

(2) A deduction for a reasonable addition to a reserve for bad debts.

(b) *Manner of selecting method.* (1) A taxpayer filing a return of income for the first taxable year for which he is entitled to a bad debt deduction may select either of the two methods prescribed by paragraph (a) of this section for treating bad debts, but such selection is subject to the approval of the district director upon examination of the return. If the method so selected is approved, it shall be used in returns for all subsequent taxable years unless the Commissioner grants permission to use the other method. A statement of facts substantiating any deduction claimed under section 166 on account of bad debts shall accompany each return of income.

(2) Taxpayers who have properly selected one of the two methods for treating bad debts under provisions of prior law corresponding to section 166 shall continue to use that method for all subsequent taxable years unless the

Commissioner grants permission to use the other method.

(3)(i) For taxable years beginning after December 31, 1959, application for permission to change the method of treating bad debts shall be made in accordance with section 446(e) and paragraph (e)(3) of §1.446-1.

(ii) For taxable years beginning before January 1, 1960, application for permission to change the method of treating bad debts shall be made at least 30 days before the close of the taxable year for which the change is effective.

(4) Notwithstanding paragraphs (b) (1), (2), and (3) of this section, a dealer in property currently employing the accrual method of accounting and currently maintaining a reserve for bad debts under section 166(c) (which may have included guaranteed debt obligations described in section 166(f)(1)(A)) may establish a reserve for section 166(f)(1)(A) guaranteed debt obligations for a taxable year ending after October 21, 1965 under section 166(f) and §1.166-10 by filing on or before April 17, 1986 an amended return indicating that such a reserve has been established. The establishment of such a reserve will not be considered a change in method of accounting for purposes of section 446(e). However, an election by a taxpayer to establish a reserve for bad debts under section 166(c) shall be treated as a change in method of accounting. See also §1.166-4, relating to reserve for bad debts, and §1.166-10, relating to reserve for guaranteed debt obligations.

(c) *Bona fide debt required.* Only a bona fide debt qualifies for purposes of section 166. A bona fide debt is a debt which arises from a debtor-creditor relationship based upon a valid and enforceable obligation to pay a fixed or determinable sum of money. A debt arising out of the receivables of an accrual method taxpayer is deemed to be an enforceable obligation for purposes of the preceding sentence to the extent that the income such debt represents have been included in the return of income for the year for which the deduction as a bad debt is claimed or for a prior taxable year. For example, a debt arising out of gambling receivables that are unenforceable under state or

local law, which an accrual method taxpayer includes in income under section 61, is an enforceable obligation for purposes of this paragraph. A gift or contribution to capital shall not be considered a debt for purposes of section 166. The fact that a bad debt is not due at the time of deduction shall not of itself prevent its allowance under section 166. For the disallowance of deductions for bad debts owed by a political party, see § 1.271-1.

(d) *Amount deductible*—(1) *General rule.* Except in the case of a deduction for a reasonable addition to a reserve for bad debts, the basis for determining the amount of deduction under section 166 in respect of a bad debt shall be the same as the adjusted basis prescribed by § 1.1011-1 for determining the loss from the sale or other disposition of property. To determine the allowable deduction in the case of obligations acquired before March 1, 1913, see also paragraph (b) of § 1.1053-1.

(2) *Specific cases.* Subject to any provision of section 166 and the regulations thereunder which provides to the contrary, the following amounts are deductible as bad debts:

(i) *Notes or accounts receivable.* (a) If, in computing taxable income, a taxpayer values his notes or accounts receivable at their fair market value when received, the amount deductible as a bad debt under section 166 in respect of such receivables shall be limited to such fair market value even though it is less than their face value.

(b) A purchaser of accounts receivable which become worthless during the taxable year shall be entitled under section 166 to a deduction which is based upon the price he paid for such receivables but not upon their face value.

(ii) *Bankruptcy claim.* Only the difference between the amount received in distribution of the assets of a bankrupt and the amount of the claim may be deducted under section 166 as a bad debt.

(iii) *Claim against decedent's estate.* The excess of the amount of the claim over the amount received by a creditor of a decedent in distribution of the assets of the decedent's estate may be considered a worthless debt under section 166.

(e) *Prior inclusion in income required.* Worthless debts arising from unpaid wages, salaries, fees, rents, and similar items of taxable income shall not be allowed as a deduction under section 166 unless the income such items represent has been included in the return of income for the year for which the deduction as a bad debt is claimed or for a prior taxable year.

(f) *Recovery of bad debts.* Any amount attributable to the recovery during the taxable year of a bad debt, or of a part of a bad debt, which was allowed as a deduction from gross income in a prior taxable year shall be included in gross income for the taxable year of recovery, except to the extent that the recovery is excluded from gross income under the provisions of § 1.111-1, relating to the recovery of certain items previously deducted or credited. This paragraph shall not apply, however, to a bad debt which was previously charged against a reserve by a taxpayer on the reserve method of treating bad debts.

(g) *Worthless securities.* (1) Section 166 and the regulations thereunder do not apply to a debt which is evidenced by a bond, debenture, note, or certificate, or other evidence of indebtedness, issued by a corporation or by a government or political subdivision thereof, with interest coupons or in registered form. See section 166(e). For provisions allowing the deduction of a loss resulting from the worthlessness of such a debt, see § 1.165-5.

(2) The provisions of subparagraph (1) of this paragraph do not apply to any loss sustained by a bank and resulting from the worthlessness of a security described in section 165(g)(2)(C). See paragraph (a) of § 1.582-1.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6996, 34 FR 835, Jan. 18, 1969; T.D. 7902, 48 FR 33260, July 21, 1983; T.D. 8071, 51 FR 2479, Jan. 17, 1986]

#### § 1.166-2 Evidence of worthlessness.

(a) *General rule.* In determining whether a debt is worthless in whole or in part the district director will consider all pertinent evidence, including the value of the collateral, if any, securing the debt and the financial condition of the debtor.

(b) *Legal action not required.* Where the surrounding circumstances indicate that a debt is worthless and uncollectible and that legal action to enforce payment would in all probability not result in the satisfaction of execution on a judgment, a showing of these facts will be sufficient evidence of the worthlessness of the debt for purposes of the deduction under section 166.

(c) *Bankruptcy*—(1) *General rule.* Bankruptcy is generally an indication of the worthlessness of at least a part of an unsecured and unpreferred debt.

(2) *Year of deduction.* In bankruptcy cases a debt may become worthless before settlement in some instances; and in others, only when a settlement in bankruptcy has been reached. In either case, the mere fact that bankruptcy proceedings instituted against the debtor are terminated in a later year, thereby confirming the conclusion that the debt is worthless, shall not authorize the shifting of the deduction under section 166 to such later year.

(d) *Banks and other regulated corporations*—(1) *Worthlessness presumed in year of charge-off.* If a bank or other corporation which is subject to supervision by Federal authorities, or by State authorities maintaining substantially equivalent standards, charges off a debt in whole or in part, either—

(i) In obedience to the specific orders of such authorities, or

(ii) In accordance with established policies of such authorities, and, upon their first audit of the bank or other corporation subsequent to the charge-off, such authorities confirm in writing that the charge-off would have been subject to such specific orders if the audit had been made on the date of the charge-off,

then the debt shall, to the extent charged off during the taxable year, be conclusively presumed to have become worthless, or worthless only in part, as the case may be, during such taxable year. But no such debt shall be so conclusively presumed to be worthless, or worthless only in part, as the case may be, if the amount so charged off is not claimed as a deduction by the taxpayer at the time of filing the return for the taxable year in which the charge-off takes place.

(2) *Evidence of worthlessness in later taxable year.* If such a bank or other corporation does not claim a deduction for such a totally or partially worthless debt in its return for the taxable year in which the charge-off takes place, but claims the deduction for a later taxable year, then the charge-off in the prior taxable year shall be deemed to have been involuntary and the deduction under section 166 shall be allowed for the taxable year for which claimed, provided that the taxpayer produces sufficient evidence to show that—

(i) The debt became wholly worthless in the later taxable year, or became recoverable only in part subsequent to the taxable year of the involuntary charge-off, as the case may be; and,

(ii) To the extent that the deduction claimed in the later taxable year for a debt partially worthless was not involuntarily charged off in prior taxable years, it was charged off in the later taxable year.

(3) *Conformity election*—(i) *Eligibility for election.* In lieu of applying paragraphs (d)(1) and (2) of this section, a bank (as defined in paragraph (d)(4)(i) of this section) that is subject to supervision by Federal authorities, or by state authorities maintaining substantially equivalent standards, may elect under this paragraph (d)(3) to use a method of accounting that establishes a conclusive presumption of worthlessness for debts, provided that the bank meets the express determination requirement of paragraph (d)(3)(iii)(D) of this section for the taxable year of the election.

(ii) *Conclusive presumption*—(A) *In general.* If a bank satisfies the express determination requirement of paragraph (d)(3)(iii)(D) of this section and elects to use the method of accounting under this paragraph (d)(3)—

(1) Debts charged off, in whole or in part, for regulatory purposes during a taxable year are conclusively presumed to have become worthless, or worthless only in part, as the case may be, during that year, but only if the charge-off results from a specific order of the bank's supervisory authority or corresponds to the bank's classification of the debt, in whole or in part, as a loss asset, as

described in paragraph (d)(3)(ii)(C) of this section; and

(2) A bad debt deduction for a debt that is subject to regulatory loss classification standards is allowed for a taxable year only to the extent that the debt is conclusively presumed to have become worthless under paragraph (d)(3)(ii)(A)(I) of this section during that year.

(B) *Charge-off should have been made in earlier year.* The conclusive presumption that a debt is worthless in the year that it is charged off for regulatory purposes applies even if the bank's supervisory authority determines in a subsequent year that the charge-off should have been made in an earlier year. A pattern of charge-offs in the wrong year, however, may result in revocation of the bank's election by the Commissioner pursuant to paragraph (d)(3)(iv)(D) of this section.

(C) *Loss asset defined.* A debt is classified as a loss asset by a bank if the bank assigns the debt to a class that corresponds to a loss asset classification under the standards set forth in the "Uniform Agreement on the Classification of Assets and Securities Held by Banks" (See Attachment to Comptroller of the Currency Banking Circular No. 127, Rev. 4-26-91, Comptroller of the Currency, Communications Department, Washington, DC 20219) or similar guidance issued by the Office of the Comptroller of the Currency, the Federal Deposit Insurance Corporation, the Board of Governors of the Federal Reserve, or the Farm Credit Administration; or for institutions under the supervision of the Office of Thrift Supervision, 12 CFR 563.160(b)(3).

(iii) *Election—(A) In general.* An election under this paragraph (d)(3) is to be made on bank-by-bank basis and constitutes either the adoption of or a change in method of accounting, depending on the particular bank's facts. A change in method of accounting that results from the making of an election under this paragraph (d)(3) has the effects described in paragraph (d)(3)(iii)(B) of this section.

(B) *Effect of change in method of accounting.* A change in method of accounting resulting from an election under this paragraph (d)(3) does not require or permit an adjustment under

section 481(a). Under this cut-off approach—

(1) There is no change in the § 1.1011-1 adjusted basis of the bank's existing debts (as determined under the bank's former method of accounting for bad debts) as a result of the change in method of accounting;

(2) With respect to debts that are subject to regulatory loss classification standards and are held by the bank at the beginning of the year of change (to the extent that they have not been charged off for regulatory purposes), and with respect to debts subject to regulatory loss classification standards that are originated or acquired subsequent to the beginning of the year of change, bad debt deductions in the year of change and thereafter are determined under the method of accounting for bad debts prescribed by this paragraph (d)(3);

(3) With respect to debts that are not subject to regulatory loss classification standards or that have been totally charged off prior to the year of change, bad debt deductions are determined under the general rules of section 166; and

(4) If there was any partial charge-off of a debt in a prechange year, any portion of which was not claimed as a deduction, the deduction reflecting that partial charge-off must be taken in the first year in which there is any further charge-off of the debt for regulatory purposes.

(C) *Procedures—(1) In general.* A new bank adopts the method of accounting under this paragraph (d)(3) for any taxable year ending on or after December 31, 1991 (and for all subsequent taxable years) when it adopts its overall method of accounting for bad debts, by attaching a statement to this effect to its income tax return for that year. Any other bank makes an election for any taxable year ending on or after December 31, 1991 (and for all subsequent taxable years) by filing a completed Form 3115 (Application for Change in Accounting Method) in accordance with the rules of paragraph (d)(3)(iii)(C)(2) or (3) of this section. The statement or Form 3115 must include the name, address, and taxpayer identification number of the electing bank and contain a declaration that

the express determination requirement of paragraph (d)(3)(iii)(D) of this section is satisfied for the taxable year of the election. When a Form 3115 is used, the declaration must be made in the space provided on the form for "Other changes in method of accounting." The words "ELECTION UNDER §1.166-2(d)(3)" must be typed or legibly printed at the top of the statement or page 1 of the Form 3115.

(2) *First election.* The first time a bank makes this election, the statement or Form 3115 must be attached to the bank's timely filed return (taking into account extensions of time to file) for the first taxable year covered by the election. The consent of the Commissioner to make a change in method of accounting under this paragraph (d)(3) is granted, pursuant to section 446(e), to any bank that makes the election in accordance with this paragraph (d)(3)(iii)(C), provided the bank has not made a prior election under this paragraph (d)(3).

(3) *Subsequent elections.* The advance consent of the Commissioner is required to make any election under this paragraph (d)(3) after a previous election has been revoked pursuant to paragraph (d)(3)(iv) of this section. This consent must be requested under the procedures, terms, and conditions prescribed under the authority of section 446(e) and §1.446-1(e) for requesting a change in method of accounting.

(D) *Express determination requirement.* In connection with its most recent examination involving the bank's loan review process, the bank's supervisory authority must have made an express determination (in accordance with any applicable administrative procedure prescribed hereunder) that the bank maintains and applies loan loss classification standards that are consistent with the regulatory standards of that supervisory authority. For purposes of this paragraph (d)(3)(iii)(D), the supervisory authority of a bank is the *appropriate Federal banking agency* for the bank, as that term is defined in 12 U.S.C. 1813(q), or, in the case of an institution in the Farm Credit System, the Farm Credit Administration.

(E) *Transition period election.* For taxable years ending before completion of the first examination of the bank by

its supervisory authority (as defined in paragraph (d)(3)(iii)(D) of this section) that is after October 1, 1992, and that involves the bank's loan review process, the statement or Form 3115 filed by the bank must include a declaration that the bank maintains and applies loan loss classification standards that are consistent with the regulatory standards of that supervisory authority. A bank that makes this declaration is deemed to satisfy the express determination requirement of paragraph (d)(3)(iii)(D) of this section for those years, even though an express determination has not yet been made.

(iv) *Revocation of Election—(A) In general.* Revocation of an election under this paragraph (d)(3) constitutes a change in method of accounting that has the effects described in paragraph (d)(3)(iv)(B) of this section. If an election under this paragraph (d)(3) has been revoked, a bank may make a subsequent election only under the provisions of paragraph (d)(3)(iii)(C)(3) of this section.

(B) *Effect of change in method of accounting.* A change in method of accounting resulting from revocation of an election under this paragraph (d)(3) does not require or permit an adjustment under section 481(a). Under this cut-off approach—

(1) There is no change in the §1.1011-1 adjusted basis of the bank's existing debts (as determined under this paragraph (d)(3) method or any other former method of accounting used by the bank with respect to its bad debts) as a result of the change in method of accounting; and

(2) Bad debt deductions in the year of change and thereafter with respect to all debts held by the bank, whether in existence at the beginning of the year of change or subsequently originated or acquired, are determined under the new method of accounting.

(C) *Automatic revocation—(1) In general—*A bank's election under this paragraph (d)(3) is revoked automatically if, in connection with any examination involving the bank's loan review process by the bank's supervisory authority as defined in paragraph (d)(3)(iii)(D) of this section, the bank does not obtain the express determination required by that paragraph.

(2) *Year of revocation.* If a bank makes the conformity election under the transition rules of paragraph (d)(3)(iii)(E) of this section and does not obtain the express determination in connection with the first examination involving the bank's loan review process that is after October 1, 1992, the election is revoked as of the beginning of the taxable year of the election or, if later, the earliest taxable year for which tax may be assessed. In other cases in which a bank does not obtain an express determination in connection with an examination of its loan review process, the election is revoked as of the beginning of the taxable year that includes the date as of which the supervisory authority conducts the examination even if the examination is completed in the following taxable year.

(3) *Consent granted.* Under the Commissioner's authority in section 446(e) and § 1.446-1(e), the bank is directed to and is granted consent to change from this paragraph (3)(1) method as of the year of revocation (year of change) prescribed by paragraph (d)(3)(iv)(C)(2) of this section.

(4) *Requirements.* A bank changing its method of accounting under the automatic revocation rules of this paragraph (d)(3)(iv)(C) must attach a completed Form 3115 to its income tax return for the year of revocation prescribed by paragraph (d)(3)(iv)(C)(2) of this section. The words "REVOCATION OF § 1.166-2(d)(3) ELECTION" must be typed or legibly printed at the top of page 1 of the Form 3115. If the year of revocation is a year for which the bank has already filed its income tax return, the bank must file an amended return for that year reflecting its change in method of accounting and must attach the completed Form 3115 to that amended return. The bank also must file amended returns reflecting the new method of accounting for all subsequent taxable years for which returns have been filed and tax may be assessed.

(D) *Revocation by Commissioner.* An election under this paragraph (d)(3) may be revoked by the Commissioner as of the beginning of any taxable year for which a bank fails to follow the method of accounting prescribed by this paragraph. In addition, the Com-

missioner may revoke an election as of the beginning of any taxable year for which the Commissioner determines that a bank has taken charge-offs and deductions that, under all facts and circumstances existing at the time, were substantially in excess of those warranted by the exercise of reasonable business judgment in applying the regulatory standards of the bank's supervisory authority as defined in paragraph (d)(3)(III)(D) of this section.

(E) *Voluntary revocation.* A bank may apply for revocation of its election made under this paragraph (d)(3) by timely filing a completed Form 3115 for the appropriate year and obtaining the consent of the Commissioner in accordance with section 446(e) and § 1.446-1(e) (including any applicable administrative procedures prescribed thereunder). The words "REVOCATION OF § 1.166-2(d)(3) ELECTION" must be typed or legibly printed at the top of page 1 of the Form 3115. If any bank has had its election automatically revoked pursuant to paragraph (d)(3)(iv)(C) of this section and has not changed its method of accounting in accordance with the requirements of that paragraph, the Commissioner will require that any voluntary change in method of accounting under this paragraph (d)(3)(iv)(E) be implemented retroactively pursuant to the same amended return terms and conditions as are prescribed by paragraph (d)(3)(iv)(C) of this section.

(4) *Definitions.* For purposes of this paragraph (d)—

(i) *Bank.* The term *bank* has the meaning assigned to it by section 581. The term *bank* also includes any corporation that would be a bank within the meaning of section 581 except for the fact that it is a foreign corporation, but this paragraph (d) applies only with respect to loans the interest on which is effectively connected with the conduct of a banking business within the United States. In addition, the term *bank* includes a Farm Credit System institution that is subject to supervision by the Farm Credit Administration.

(ii) *Charge-off.* For banks regulated by the Office of Thrift Supervision, the term *charge-off* includes the establishment of specific allowances for loan

## Internal Revenue Service, Treasury

## § 1.166-4

losses in the amount of 100 percent of the portion of the debt classified as loss.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 7254, 38 FR 2418, Jan. 26, 1973; T.D. 8396, 57 FR 6294, Feb. 24, 1992; T.D. 8441, 57 FR 45569, Oct. 2, 1992; T.D. 8492, 58 FR 53658, Oct. 18, 1993]

### § 1.166-3 Partial or total worthlessness.

(a) *Partial worthlessness*—(1) *Applicable to specific debts only.* A deduction under section 166(a)(2) on account of partially worthless debts shall be allowed with respect to specific debts only.

(2) *Charge-off required.* (i) If, from all the surrounding and attending circumstances, the district director is satisfied that a debt is partially worthless, the amount which has become worthless shall be allowed as a deduction under section 166(a)(2) but only to the extent charged off during the taxable year.

(ii) If a taxpayer claims a deduction for a part of a debt for the taxable year within which that part of the debt is charged off and the deduction is disallowed for that taxable year, then, in a case where the debt becomes partially worthless after the close of that taxable year, a deduction under section 166(a)(2) shall be allowed for a subsequent taxable year but not in excess of the amount charged off in the prior taxable year plus any amount charged off in the subsequent taxable year. In such instance, the charge-off in the prior taxable year shall, if consistently maintained as such, be sufficient to that extent to meet the charge-off requirement of section 166(a)(2) with respect to the subsequent taxable year.

(iii) Before a taxpayer may deduct a debt in part, he must be able to demonstrate to the satisfaction of the district director the amount thereof which is worthless and the part thereof which has been charged off.

(3) *Significantly modified debt*—(i) *Deemed charge-off.* If a significant modification of a debt instrument (within the meaning of § 1.1001-3) during a taxable year results in the recognition of gain by a taxpayer under § 1.1001-1(a), and if the requirements of paragraph (a)(3)(ii) of this section are

met, there is a deemed charge-off of the debt during that taxable year in the amount specified in paragraph (a)(3)(iii) of this section.

(ii) *Requirements for deemed charge-off.* A debt is deemed to have been charged off only if—

(A) The taxpayer (or, in the case of a debt that constitutes transferred basis property within the meaning of section 7701(a)(43), a transferor taxpayer) has claimed a deduction for partial worthlessness of the debt in any prior taxable year; and

(B) Each prior charge-off and deduction for partial worthlessness satisfied the requirements of paragraphs (a) (1) and (2) of this section.

(iii) *Amount of deemed charge-off.* The amount of the deemed charge-off, if any, is the amount by which the tax basis of the debt exceeds the greater of the fair market value of the debt or the amount of the debt recorded on the taxpayer's books and records reduced as appropriate for a specific allowance for loan losses. The amount of the deemed charge-off, however, may not exceed the amount of recognized gain described in paragraph (a)(3)(i) of this section.

(iv) *Effective date.* This paragraph (a)(3) applies to significant modifications of debt instruments occurring on or after September 23, 1996.

(b) *Total worthlessness.* If a debt becomes wholly worthless during the taxable year, the amount thereof which has not been allowed as a deduction from gross income for any prior taxable year shall be allowed as a deduction for the current taxable year.

[T.D. 6500, 25 FR 11402, Nov. 29, 1960, as amended by T.D. 8763, 63 FR 4396, Jan. 29, 1998]

### § 1.166-4 Reserve for bad debts.

(a) *Allowance of deduction.* A taxpayer who has established the reserve method of treating bad debts and has maintained proper reserve accounts for bad debts or who, in accordance with paragraph (b) of § 1.166-1, adopts the reserve method of treating bad debts may deduct from gross income a reasonable addition to a reserve for bad debts in lieu of deducting specific bad debt items. This paragraph applies both to bad debts owed to the taxpayer and to

bad debts arising out of section 166(f)(1)(A) guaranteed debt obligations. If a reserve is maintained for bad debts arising out of section 166(f)(1)(A) guaranteed debt obligations, then a separate reserve must also be maintained for all other debt obligations of the taxpayer in the same trade or business, if any. A taxpayer may not maintain a reserve for bad debts arising out of section 166(f)(1)(A) guaranteed debt obligations if with respect to direct debt obligations in the same trade or business the taxpayer takes deductions when the debts become worthless in whole or in part rather than maintaining a reserve for such obligations. See § 1.166-10 for rules concerning section 166(f)(1)(A) guaranteed debt obligations.

(b) *Reasonableness of addition to reserve*—(1) *Relevant factors.* What constitutes a reasonable addition to a reserve for bad debts shall be determined in the light of the facts existing at the close of the taxable year of the proposed addition. The reasonableness of the addition will vary as between classes of business and with conditions of business prosperity. It will depend primarily upon the total amount of debts outstanding as of the close of the taxable year, including those arising currently as well as those arising in prior taxable years, and the total amount of the existing reserve.

(2) *Correction of errors in prior estimates.* In the event that subsequent realizations upon outstanding debts prove to be more or less than estimated at the time of the creation of the existing reserve, the amount of the excess or inadequacy in the existing reserve shall be reflected in the determination of the reasonable addition necessary in the current taxable year.

(c) *Statement required.* A taxpayer using the reserve method shall file with his return a statement showing—

(1) The volume of his charge sales or other business transactions for the taxable year and the percentage of the reserve to such amount;

(2) The total amount of notes and accounts receivable at the beginning and close of the taxable year;

(3) The amount of the debts which have become wholly or partially worth-

less and have been charged against the reserve account; and

(4) The computation of the addition to the reserve for bad debts.

(d) *Special rules applicable to financial institutions.* (1) For special rules for the addition to the bad debt reserves of certain banks, see §§ 1.585-1 through 1.585-3.

(2) For special rules for the addition to the bad debt reserves of small business investment companies and business development corporations, see §§ 1.586-1 and 1.586-2.

(3) For special rules for the addition to the bad debts reserves of certain mutual savings banks, domestic building and loan associations, and cooperative banks, see §§ 1.593-1 through 1.593-11.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6728, 29 FR 5855, May 5, 1964; T.D. 7444, 41 FR 53481, Dec. 7, 1976; T.D. 8071, 51 FR 2479, Jan. 17, 1986]

**§ 1.166-5 Nonbusiness debts.**

(a) *Allowance of deduction as capital loss.* (1) The loss resulting from any nonbusiness debt's becoming partially or wholly worthless within the taxable year shall not be allowed as a deduction under either section 166(a) or section 166(c) in determining the taxable income of a taxpayer other than a corporation. See section 166(d)(1)(A).

(2) If, in the case of a taxpayer other than a corporation, a nonbusiness debt becomes wholly worthless within the taxable year, the loss resulting therefrom shall be treated as a loss from the sale or exchange, during the taxable year, of a capital asset held for not more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977). Such a loss is subject to the limitations provided in section 1211, relating to the limitation on capital losses, and section 1212, relating to the capital loss carryover, and in the regulations under those sections. A loss on a nonbusiness debt shall be treated as sustained only if and when the debt has become totally worthless, and no deduction shall be allowed for a nonbusiness debt which is recoverable in part during the taxable year.

(b) *Nonbusiness debt defined.* For purposes of section 166 and this section, a

nonbusiness debt is any debt other than—

(1) A debt which is created, or acquired, in the course of a trade or business of the taxpayer, determined without regard to the relationship of the debt to a trade or business of the taxpayer at the time when the debt becomes worthless; or

(2) A debt the loss from the worthlessness of which is incurred in the taxpayer's trade or business.

The question whether a debt is a nonbusiness debt is a question of fact in each particular case. The determination of whether the loss on a debt's becoming worthless has been incurred in a trade or business of the taxpayer shall, for this purpose, be made in substantially the same manner for determining whether a loss has been incurred in a trade or business for purposes of section 165(c)(1). For purposes of subparagraph (2) of this paragraph, the character of the debt is to be determined by the relation which the loss resulting from the debt's becoming worthless bears to the trade or business of the taxpayer. If that relation is a proximate one in the conduct of the trade or business in which the taxpayer is engaged at the time the debt becomes worthless, the debt comes within the exception provided by that subparagraph. The use to which the borrowed funds are put by the debtor is of no consequence in making a determination under this paragraph. For purposes of section 166 and this section, a nonbusiness debt does not include a debt described in section 165(g)(2)(C). See §1.165-5, relating to losses on worthless securities.

(c) *Guaranty of obligations.* For provisions treating a loss sustained by a guarantor of obligations as a loss resulting from the worthlessness of a debt, see §§1.166-8 and 1.166-9.

(d) *Examples.* The application of this section may be illustrated by the following examples involving a case where A, an individual who is engaged in the grocery business and who makes his return on the basis of the calendar year, extends credit to B in 1955 on an open account:

*Example (1).* In 1956 A sells the business but retains the claim against B. The claim becomes worthless in A's hands in 1957. A's loss

is not controlled by the nonbusiness debt provisions, since the original consideration has been advanced by A in his trade or business.

*Example (2).* In 1956 A sells the business to C but sells the claim against B to the taxpayer, D. The claim becomes worthless in D's hands in 1957. During 1956 and 1957, D is not engaged in any trade or business. D's loss is controlled by the nonbusiness debt provisions even though the original consideration has been advanced by A in his trade or business, since the debt has not been created or acquired in connection with a trade or business of D and since in 1957 D is not engaged in a trade or business incident to the conduct of which a loss from the worthlessness of such claim is a proximate result.

*Example (3).* In 1956 A dies, leaving the business, including the accounts receivable, to his son, C, the taxpayer. The claim against B becomes worthless in C's hands in 1957. C's loss is not controlled by the nonbusiness debt provisions. While C does not advance any consideration for the claim, or create or acquire it in connection with his trade or business, the loss is sustained as a proximate incident to the conduct of the trade or business in which he is engaged at the time the debt becomes worthless.

*Example (4).* In 1956 A dies, leaving the business to his son, C, but leaving the claim against B to his son, D, the taxpayer. The claim against B becomes worthless in D's hands in 1957. During 1956 and 1957, D is not engaged in any trade or business. D's loss is controlled by the nonbusiness debt provisions even though the original consideration has been advanced by A in his trade or business, since the debt has not been created or acquired in connection with a trade or business of D and since in 1957 D is not engaged in a trade or business incident to the conduct of which a loss from the worthlessness of such claim is a proximate result.

*Example (5).* In 1956 A dies; and, while his executor, C, is carrying on the business, the claim against B becomes worthless in 1957. The loss sustained by A's estate is not controlled by the nonbusiness debt provisions. While C does not advance any consideration for the claim on behalf of the estate, or create or acquire it in connection with a trade or business in which the estate is engaged, the loss is sustained as a proximate incident to the conduct of the trade or business in which the estate is engaged at the time the debt becomes worthless.

*Example (6).* In 1956, A, in liquidating the business, attempts to collect the claim against B but finds that it has become worthless. A's loss is not controlled by the nonbusiness debt provisions, since the original consideration has been advanced by A in

## § 1.166-6

## 26 CFR Ch. I (4-1-06 Edition)

his trade or business and since a loss incurred in liquidating a trade or business is a proximate incident to the conduct thereof.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 7657, 44 FR 68464, Nov. 29, 1979; T.D. 7728, 45 FR 72650, Nov. 3, 1980]

### § 1.166-6 Sale of mortgaged or pledged property.

(a) *Deficiency deductible as bad debt*—

(1) *Principal amount.* If mortgaged or pledged property is lawfully sold (whether to the creditor or another purchaser) for less than the amount of the debt, and the portion of the indebtedness remaining unsatisfied after the sale is wholly or partially uncollectible, the mortgagee or pledgee may deduct such amount under section 166(a) (to the extent that it constitutes capital or represents an item the income from which has been returned by him) as a bad debt for the taxable year in which it becomes wholly worthless or is charged off as partially worthless. See § 1.166-3.

(2) *Accrued interest.* Accrued interest may be included as part of the deduction allowable under this paragraph, but only if it has previously been returned as income.

(b) *Realization of gain or loss*—(1) *Termination of amount.* If, in the case of a sale described in paragraph (a) of this section, the creditor buys in the mortgaged or pledged property, loss or gain is also realized, measured by the difference between the amount of those obligations of the debtor which are applied to the purchase or bid price of the property (to the extent that such obligations constitute capital or represent an item the income from which has been returned by the creditor) and the fair market value of the property.

(2) *Fair market value defined.* The fair market value of the property for this purpose shall, in the absence of clear and convincing proof to the contrary, be presumed to be the amount for which it is bid in by the taxpayer.

(c) *Basis of property purchased.* If the creditor subsequently sells the property so acquired, the basis for determining gain or loss upon the subsequent sale is the fair market value of the property at the date of its acquisition by the creditor.

(d) *Special rules applicable to certain banking organizations.* For special rules relating to the treatment of mortgaged or pledged property by certain mutual savings banks, domestic building and loan associations, and cooperative banks, see section 595 and the regulations thereunder.

(e) *Special rules applicable to certain reacquisitions of real property.* Notwithstanding this section, special rules apply for taxable years beginning after September 2, 1964 (and for certain taxable years beginning after December 31, 1957), to the gain or loss on certain reacquisitions of real property, to indebtedness remaining unsatisfied as a result of such reacquisitions, and to the basis of the reacquired real property. See §§ 1.1038-1 through 1.1038-3.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6814, 30 FR 4472, Apr. 7, 1965, T.D. 6916, 32 FR 5923, Apr. 13, 1967]

### § 1.166-7 Worthless bonds issued by an individual.

(a) *Allowance of deduction.* A bond or other similar obligation issued by an individual, if it becomes worthless in whole or in part, is subject to the bad debt provisions of section 166. The loss from the worthlessness of any such bond or obligation is deductible in accordance with section 166(a), unless such bond or obligation is a nonbusiness debt as defined in section 166(d)(2). If the bond or obligation is a nonbusiness debt, it is subject to section 166(d) and § 1.166-5.

(b) *Decline in market value.* A taxpayer possessing debts evidenced by bonds or other similar obligations issued by an individual shall not be allowed any deduction under section 166 on account of mere market fluctuation in the value of such obligations.

(c) *Worthless bonds issued by corporation.* For provisions allowing the deduction under section 165(a) of the loss sustained upon the worthlessness of any bond or similar obligation issued by a corporation or a government, see § 1.165-5.

(d) *Application to inventories.* This section does not apply to any loss upon the worthlessness of any bond or similar obligation reflected in inventories required to be taken by a dealer in securities under section 471. See § 1.471-5.

**§ 1.166-8 Losses of guarantors, endorsers, and indemnitors incurred on agreements made before January 1, 1976.**

(a) *Noncorporate obligations*—(1) *Deductible as bad debt*. A payment during the taxable year by a taxpayer other than a corporation in discharge of part or all of his obligation as a guarantor, endorser, or indemnitor of an obligation issued by a person other than a corporation shall, for purposes of section 166 and the regulations thereunder, be treated as a debt's becoming worthless within the taxable year, if—

(i) The proceeds of the obligation so issued have been used in the trade or business of the borrower, and

(ii) The borrower's obligation to the person to whom the taxpayer's payment is made is worthless at the time of payment except for the existence of the guaranty, endorsement, or indemnity, whether or not such obligation has in fact become worthless within the taxable year in which payment is made.

(2) *Nonbusiness debt rule not applicable*. If a payment is treated as a loss in accordance with the provisions of subparagraph (1) of this paragraph, section 166(d), relating to the special rule for losses sustained on the worthlessness of a nonbusiness debt, shall not apply. Accordingly, in each instance the loss shall be deducted under section 166(a)(1) as a wholly worthless debt even though there has been a discharge of only a part of the taxpayer's obligation. Thus, if the taxpayer makes a payment during the taxable year in discharge of only part of his obligation as a guarantor, endorser, or indemnitor, he may treat such payment under section 166(a)(1) as a debt's becoming wholly worthless within the taxable year, provided that he can establish that such part of the borrower's obligation to the person to whom the taxpayer's payment is made is worthless at the time of payment and the conditions of subparagraph (1) of this paragraph have otherwise been satisfied.

(3) *Other applicable provisions*. Other provisions of the internal revenue laws relating to bad debts, such as section 111, relating to the recovery of bad debts, shall be deemed to apply to any

payment which, under the provisions of this paragraph, is treated as a bad debt. If the requirements of section 166(f) are not met, any loss sustained by a guarantor, endorser, or indemnitor upon the worthlessness of the debtor's obligation shall be treated under the provisions of law applicable thereto. See, for example, paragraph (b) of this section.

(b) *Corporate obligations*. The loss sustained during the taxable year by a taxpayer other than a corporation in discharge of all of his obligation as a guarantor of an obligation issued by a corporation shall be treated, in accordance with section 166(d) and the regulations thereunder, as a loss sustained on the worthlessness of a nonbusiness debt if the debt created in the guarantor's favor as a result of the payment does not come within the exceptions prescribed by section 166(d)(2) (A) or (B). See paragraph (a)(2) of § 1.166-5.

(c) *Examples*. The application of this section may be illustrated by the following examples:

*Example (1)*. During 1955, A, an individual who makes his return on the basis of the calendar year, guarantees payment of an obligation of B, an individual, to the X Bank, the proceeds of the obligation being used in B's business. B defaults on his obligation in 1956. A makes payment to the X Bank during 1957 in discharge of his entire obligation as a guarantor, the obligation of B to the X Bank being wholly worthless. For his taxable year 1957, A is entitled to a deduction under section 166(a)(1) as a result of his payment during that year.

*Example (2)*. During 1955, A, an individual who makes his return on the basis of the calendar year, guarantees payment of an obligation of B, an individual, to the X Bank, the proceeds of the obligation being used in B's business. In 1956, B pays a part of his obligation to the X Bank but defaults on the remaining part. In 1957, A makes payment to the X Bank, in discharge of part of his obligation as a guarantor, of the remaining unpaid part of B's obligation to the bank, such part of B's obligation then being worthless. For his taxable year 1957, A is entitled to a deduction under section 166(a)(1) as a result of his payment of the remaining unpaid part of B's obligation.

*Example (3)*. During 1955, A, an individual who makes his return on the basis of the calendar year, guarantees payment of an obligation of B, an individual, to the X Bank, the proceeds of the obligation being used for B's personal use. B defaults on his obligation in 1956. A makes payment to the X Bank during

1957 in discharge of his entire obligation as a guarantor, the obligation of B to X Bank being wholly worthless. A may not apply the benefit of section 166(f) to his loss, since the proceeds of B's obligation have not been used in B's trade or business.

*Example (4).* During 1955, A, an individual who makes his return on the basis of the calendar year, guarantees payment of an obligation of Y Corporation to the X Bank, the proceeds of the obligation being used in Y Corporation's business. Y Corporation defaults on its obligation in 1956. A makes payment to the X Bank during 1957 in discharge of his entire obligation as a guarantor, the obligation of Y Corporation to the X Bank being wholly worthless. At no time during 1955 or 1957 is A engaged in a trade or business. For his taxable year 1957, A is entitled to deduct a capital loss in accordance with the provisions of section 166(d) and paragraph (a) (2) of § 1.166-5. He may not apply the benefit of section 166(f) to his loss, since his payment is in discharge of an obligation issued by a corporation.

(d) *Effective date.* This section applies only to losses, regardless of the taxable year in which incurred, on agreements made before January 1, 1976.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 7657, 44 FR 68464, Nov. 29, 1979]

**§ 1.166-9 Losses of guarantors, endorsers, and indemnitors incurred, on agreements made after December 31, 1975, in taxable years beginning after such date.**

(a) *Payment treated as worthless business debt.* This paragraph applies to taxpayers who, after December 31, 1975, enter into an agreement in the course of their trade or business to act as (or in a manner essentially equivalent to) a guarantor, endorser, or indemnitor of (or other secondary obligor upon) a debt obligation. Subject to the provisions of paragraphs (c), (d), and (e) of this section, a payment of principal or interest made during a taxable year beginning after December 31, 1975, by the taxpayer in discharge of part or all of the taxpayer's obligation as a guarantor, endorser, or indemnitor is treated as a business debt becoming worthless in the taxable year in which the payment is made or in the taxable year described in paragraph (e)(2) of this section. Neither section 163 (relating to interest) nor section 165 (relating to losses) shall apply with respect to such a payment.

(b) *Payment treated as worthless non-business debt.* This paragraph applies to taxpayers (other than corporations) who, after December 31, 1975, enter into a transaction for profit, but not in the course of their trade or business, to act as (or in a manner essentially equivalent to) a guarantor, endorser, or indemnitor of (or other secondary obligor upon) a debt obligation. Subject to the provisions of paragraphs (c), (d), and (e) of this section, a payment of principal or interest made during a taxable year beginning after December 31, 1975, by the taxpayer in discharge of part or all of the taxpayer's obligation as a guarantor, endorser, or indemnitor is treated as a worthless nonbusiness debt in the taxable year in which the payment is made or in the taxable year described in paragraph (e)(2) of this section. Neither section 163 nor section 165 shall apply with respect to such a payment.

(c) *Obligations issued by corporations.* No treatment as a worthless debt is allowed with respect to a payment made by the taxpayer in discharge of part or all of the taxpayer's obligation as a guarantor, endorser, or indemnitor of an obligation issued by a corporation if, on the basis of the facts and circumstances at the time the obligation was entered into, the payment constitutes a contribution to capital by a shareholder. The rule of this paragraph (c) applies to payments whenever made (see paragraph (f) of this section).

(d) *Certain payments treated as worthless debts.* A payment in discharge of part or all of taxpayer's agreement to act as guarantor, endorser, or indemnitor of an obligation is to be treated as a worthless debt only if—

(1) The agreement was entered into in the course of the taxpayer's trade or business or a transaction for profit;

(2) There was an enforceable legal duty upon the taxpayer to make the payment (except that legal action need not have been brought against the taxpayer); and

(3) The agreement was entered into before the obligation became worthless (or partially worthless in the case of an agreement entered into in the course of the taxpayer's trade or business). See §§ 1.166-2 and 1.166-3 for rules on worthless and partially worthless debts. For

purposes of this paragraph (d)(3), an agreement is considered as entered into before the obligation became worthless (or partially worthless) if there was a reasonable expectation on the part of the taxpayer at the time the agreement was entered into that the taxpayer would not be called upon to pay the debt (subject to such agreement) without full reimbursement from the issuer of the obligation.

(e) *Special rules*—(1) *Reasonable consideration required.* Treatment as a worthless debt of a payment made by a taxpayer in discharge of part or all of the taxpayer's agreement to act as a guarantor, endorser, or indemnitor of an obligation is allowed only if the taxpayer demonstrates that reasonable consideration was received for entering into the agreement. For purposes of this paragraph (e)(1), reasonable consideration is not limited to direct consideration in the form of cash or property. Thus, where a taxpayer can demonstrate that the agreement was given without direct consideration in the form of cash or property but in accordance with normal business practice or for a good faith business purpose, worthless debt treatment is allowed with respect to a payment in discharge of part or all of the agreement if the conditions of this section are met. However, consideration received from a taxpayer's spouse or any individual listed in section 152(a) must be direct consideration in the form of cash or property.

(2) *Right of subrogation.* With respect to a payment made by a taxpayer in discharge of part or all of the taxpayer's agreement to act as a guarantor, endorser, or indemnitor where the agreement provides for a right of subrogation or other similar right against the issuer, treatment as a worthless debt is not allowed until the taxable year in which the right of subrogation or other similar right becomes totally worthless (or partially worthless in the case of an agreement which arose in the course of the taxpayer's trade or business).

(3) *Other applicable provisions.* Unless inconsistent with this section, other Internal Revenue laws concerning worthless debts, such as section 111 relating to the recovery of bad debts,

apply to any payment which, under the provisions of this section, is treated as giving rise to a worthless debt.

(4) *Taxpayer defined.* For purposes of this section, except as otherwise provided, the term "taxpayer" means any taxpayer and includes individuals, corporations, partnerships, trusts and estates.

(f) *Effective date.* This section applies to losses incurred on agreements made after December 31, 1975, in taxable years beginning after such date. However, paragraph (c) of this section also applies to payments, regardless of the taxable year in which made, under agreements made before January 1, 1976.

[T.D. 7657, 44 FR 68465, Nov. 29, 1979, as amended by T.D. 7920, 48 FR 50712, Nov. 3, 1983]

#### § 1.166-10 Reserve for guaranteed debt obligations.

(a) *Definitions.* The following provisions apply for purposes of this section and section 166(f):

(1) *Dealer in property.* A dealer in property is a person who regularly sells property in the ordinary course of the person's trade or business.

(2) *Guaranteed debt obligation.* A guaranteed debt obligation is a legal duty of one person as a guarantor, endorser or indemnitor of a second person to pay a third person. It does not include duties based solely on moral or good public relations considerations that are not legally binding. A guaranteed debt obligation typically arises where a seller receives in payment for property or services the debt obligation of a purchaser and sells that obligation to a third party with recourse. However, a guaranteed debt obligation also may arise out of a sale in respect of which there is no direct debtor-creditor relationship between the debtor purchaser and the seller. For example, it arises where a purchaser borrows money from a third party to make payment to the seller and the seller guarantees the payment of the purchaser's debt. Generally, debt obligations which are sold without recourse do not result in any obligation of the seller as a guarantor, endorser, or indemnitor. However, there are certain without-recourse transactions which may give rise to a

seller's liability as a guarantor or indemnitor. For example, such a liability may arise where a holder of a debt obligation holds money or other property of a seller which the holder may apply, without seeking permission of the seller, against any uncollectible debt obligations transferred to the holder by the seller without recourse, or where the seller is under a legal obligation to reacquire the real or tangible personal property from the holder of the debt obligation who repossessed property in satisfaction of the debt obligations.

(3) *Real or tangible personal property.* Real or tangible personal property generally does not include other forms of property, such as securities. However, if the sale of other property is related to the sale of actual real or tangible personal property, the other property will be considered to be real or tangible personal property. In order for the sale of other property to be related, it must be—

- (i) Incidental to the sale of the actual real or tangible personal property; and
- (ii) Made under an agreement, entered into at the same time as the sale of actual real or tangible personal property, between the dealer in that property and the customer with respect to that property.

The other property may be charged for as a part of, or in addition to, the sales price of the actual real or tangible personal property. If the value of the other property is not greater than 20 percent of the total sales price, including the value of all related services other than financing services, the sale of the other property is related to the sale of actual real or tangible personal property.

(4) *Related services.* In the case of a sale of both property and services a determination must be made as to whether the services are related to the property. Related services include only those services which are—

- (i) Incidental to the sale of the real or tangible personal property; and
- (ii) To be performed under an agreement, entered into at the same time as the sale of the property, between the dealer in property and the customer with respect to the property.

Delivery, financing installation, maintenance, repair, or instructional services generally qualify as related services. The services may be charged for as a part of, or in addition to, the sales price of the property. Where the value of all services other than financing services is not greater than 20 percent of the total of the sales price of the property, including the value of all the services other than financing services, all of the services are considered to be incidental to the sale of the property. Where the value of the services is greater than 20 percent, the determination as to whether a service is a related service in a particular case is to be made on the basis of all relevant facts and circumstances.

(5) *Examples.* The following examples apply to paragraph (a)(4) of this section:

*Example (1).* A, a dealer in television sets, sells a television set to B, his customer. If at the time of the sale A, for a separate charge which is added to the sales price of the set and which is not greater than 20 percent of the total sales price, provides a 3-year service contract on only that television set, the service contract is a related service agreement. However, if A does not sell the service contract to B contemporaneously with the sale of the television set, as would be the case if the service agreement were entered into after the sale of the set were completed, or if the service contract includes services for a television set in addition to the one then sold by A to B, the service contract is not an agreement for a related service.

*Example (2).* C, an automobile dealer, at the time of the sale by C of an automobile to D, agrees to make available to D driving instructions furnished by the M driving school, the cost of which is included in the sale price of the automobile and is not greater than 20 percent of the total sales price. C also agrees to pay M for the driving instructions furnished to D. Since C's agreement with D to make available driving instructions is incidental to the sale of the automobile, is made contemporaneously with the sale, and is charged for as part of the sales price of the automobile, it is an agreement for a related service. In contrast, however, because M's agreement with C is not an agreement between the dealer in property and the customer, M's agreement with C to provide driving instructions to C's customers is not an agreement for a related service.

(b) *Incorporation of section 166(c) rules.* A reserve for section 166(f)(1)(A) guaranteed debt obligations must be established and maintained under the rules applicable to the reserve for bad debts under section 166(c) (with the exception of the statement requirement under § 1.166-4 (c)). For example, the rules in § 1.166-4(b), relating to what constitutes a reasonable addition to a reserve for bad debts and to correction of errors in prior estimates, apply to a reserve for section 166(f)(1)(A) guaranteed debt obligations as well.

(c) *Special requirements.* Any reserve for section 166(f)(1)(A) guaranteed debt obligations must be established and maintained separately from any reserve for other debt obligations. In addition, a taxpayer who charges off direct debts when they become worthless in whole or in part rather than maintaining a reserve for such obligations may not maintain a reserve for section 166(f)(1)(A) guaranteed debt obligations in the same trade or business.

(d) *Requirement of statement.* A taxpayer who uses the reserve method of treating section 166(f)(1)(A) guaranteed debt obligations must attach to his return for each taxable year, returns for which are filed after April 17, 1986, and for each trade or business for which the reserve is maintained a statement showing—

- (1) The total amount of these obligations at the beginning of the taxable year;
- (2) The total amount of these obligations incurred during the taxable year;
- (3) The amount of the initial balance of the suspense account, if any, established with respect to these obligations;
- (4) The balance of the suspense account, if any, at the beginning of the taxable year.
- (5) The adjustment, if any, to that account;

(6) The adjusted balance, if any, at the close of the taxable year;

(7) The reconciliation of the beginning and closing balances of the reserve for these obligations and the computation of the addition to the reserve; and

(8) The taxable year for which the reserve for these obligations was established.

(e) *Computation of opening balance—(1) In general.* The opening balance of a reserve for section 166(f)(1)(A) guaranteed debt obligations established for the first taxable year for which a taxpayer maintains such a reserve shall be determined as if the taxpayer had maintained such a reserve for the taxable years preceding that taxable year. The amount of the opening balance may be determined under the following formula:

$$OB = CG \times \frac{SNL}{SG}$$

where—

OB = the opening balance at the beginning of the first taxable year

CG = the amount of these obligations at the close of the last preceding taxable year

SG = the sum of the amounts of these obligations at the close of the five preceding taxable years

SNL = the sum of the amounts of net losses arising from these obligations for the five preceding taxable years

(2) *Example.* The following example applies to paragraph (e)(1) of this section.

*Example.* For 1977, A, a dealer in automobiles who uses the calendar year as the taxable year, adopts in accordance with this section the reserve method of treating section 166(f)(1)(A) guaranteed debt obligations. A's first year in business as an automobile dealer is 1973. For 1972, 1973, 1974, 1975, and 1976, A's records disclose the following information with respect to these obligations:

Year	Obligations outstanding at close of year	Gross losses from these obligations	Recoveries from these obligations	Net losses from these obligations
1972 .....	\$0	\$0	\$0	\$0
1973 .....	780,000	9,700	1,000	8,700
1974 .....	795,000	8,900	1,050	7,850
1975 .....	850,000	8,850	850	8,000
1976 .....	820,000	8,300	1,400	7,900
Total .....	3,245,000	36,750	4,300	32,450

**§ 1.167(a)-1**

**26 CFR Ch. I (4-1-06 Edition)**

The opening balance for 1977 of A's reserve for these obligations is \$8,200, determined as follows:

$$\$8,200 = \$820,000 \times \frac{\$32,450}{\$3,245,000}$$

(3) *More appropriate balance.* A taxpayer may select a balance other than the one produced under paragraph (e)(1) of this section if it is more appropriate, based upon the taxpayer's actual experience, and in the event the taxpayer's return is examined, if the balance is approved by the district director.

(4) *No losses in the five preceding taxable years.* If a taxpayer is in the taxpayer's first taxable year of a particular trade or business, or if the taxpayer has no losses arising from section 166(f)(1)(A) guaranteed debt obligations in a particular trade or business for any other reason in the five preceding taxable years, then the taxpayer's opening balance is zero for that particular trade or business.

(5) *Where reserve method was used before October 22, 1965.* If for a taxable year ending before October 22, 1965, the taxpayer maintained a reserve for bad debts under section 166(c) which included guaranteed debt obligations described in section 166(f)(1)(A), and if the taxpayer is allowed a deduction referred to in paragraph (g)(2) of this section on account of those obligations, the amount of the opening balance of

the reserve for section 166(f)(1)(A) guaranteed debt obligations for the taxpayer's first taxable year ending after October 21, 1965, shall be an amount equal to that portion of the section 166(c) reserve at the close of the last taxable year which is attributable to those debt obligations. The amount of the balance of the section 166(c) reserve for the taxable year shall be reduced by the amount of the opening balance of the reserve for those guaranteed debt obligations.

(f) *Suspense account*—(1) *Zero opening balance cases.* No suspense account shall be maintained if the opening balance of the reserve for section 166(f)(1)(A) guaranteed debt obligations under section 166(f)(3) is zero

(2) *Example.* The following example applies to section 166(f)(4)(B), relating to adjustments to the suspense account:

*Example.* In 1977, A, an individual who operates an appliance store and uses the calendar year as the taxable year, adopts the reserve method of treating section 166(f)(1)(A) guaranteed debt obligations. The initial balance of A's suspense account is \$8,200. At the close of 1977, 1978, 1979, and 1980, the balance of A's reserve for these obligations is \$8,400, \$8,250, \$8,150, and \$8,175, respectively, after making the addition to the reserve for each year. The adjustments under section 166(f)(4)(B) to the suspense account at the close of each of the years involved are as follows:

(1) Taxable year .....	1977	1978	1979	1980
(2) Closing reserve account balance .....	\$8,400	\$8,250	\$8,150	\$8,175
(3) Opening suspense account balance .....	8,200	8,200	8,200	8,150
(4) Line (2) less line (3) .....	200	50	(50)	25
(5) Adjustment to suspense account balance .....	0	0	(50)	25
(6) Closing suspense account balance (line 3 plus line 5) .....	8,200	8,200	8,150	8,175

(g) *Effective date*—(1) *In general.* This section is generally effective for taxable years ending after October 21, 1965.

(2) *Transitional rule.* Section 2(b) of the Act of November 2, 1966 (Pub. L. 89-722, 80 Stat. 1151) allows additions to section 166(c) bad debt reserves in earlier taxable years on account of section 166(f)(1)(A) guaranteed debt obligations to be deducted for those earlier taxable years. Paragraphs (c), (d), (e), and (f) of this section do not apply in determining whether a deduction is allowed under section 2(b) of the Act. See Rev.

Rul. 68-313 (1968-1C.B. 75) for rules relating to that deduction.

[T.D. 8071, 51 FR 2479, Jan. 17, 1986; 51 FR 9787, Mar. 21, 1986]

**§ 1.167(a)-1 Depreciation in general.**

(a) *Reasonable allowance.* Section 167(a) provides that a reasonable allowance for the exhaustion, wear and tear, and obsolescence of property used in the trade or business or of property held by the taxpayer for the production of income shall be allowed as a depreciation deduction. The allowance is

that amount which should be set aside for the taxable year in accordance with a reasonably consistent plan (not necessarily at a uniform rate), so that the aggregate of the amounts set aside, plus the salvage value, will, at the end of the estimated useful life of the depreciable property, equal the cost or other basis of the property as provided in section 167(g) and §1.167(g)-1. An asset shall not be depreciated below a reasonable salvage value under any method of computing depreciation. However, see section 167(f) and §1.167(f)-1 for rules which permit a reduction in the amount of salvage value to be taken into account for certain personal property acquired after October 16, 1962. See also paragraph (c) of this section for definition of salvage. The allowance shall not reflect amounts representing a mere reduction in market value. See section 179 and §1.179-1 for a further description of the term "reasonable allowance."

(b) *Useful life.* For the purpose of section 167 the estimated useful life of an asset is not necessarily the useful life inherent in the asset but is the period over which the asset may reasonably be expected to be useful to the taxpayer in his trade or business or in the production of his income. This period shall be determined by reference to his experience with similar property taking into account present conditions and probable future developments. Some of the factors to be considered in determining this period are (1) wear and tear and decay or decline from natural causes, (2) the normal progress of the art, economic changes, inventions, and current developments within the industry and the taxpayer's trade or business, (3) the climatic and other local conditions peculiar to the taxpayer's trade or business, and (4) the taxpayer's policy as to repairs, renewals, and replacements. Salvage value is not a factor for the purpose of determining useful life. If the taxpayer's experience is inadequate, the general experience in the industry may be used until such time as the taxpayer's own experience forms an adequate basis for making the determination. The estimated remaining useful life may be subject to modification by reason of conditions known to exist at the end of

the taxable year and shall be redetermined when necessary regardless of the method of computing depreciation. However, estimated remaining useful life shall be redetermined only when the change in the useful life is significant and there is a clear and convincing basis for the redetermination. For rules covering agreements with respect to useful life, see section 167(d) and §1.167(d)-1. If a taxpayer claims an investment credit with respect to an asset for a taxable year preceding the taxable year in which the asset is considered as placed in service under §1.167(a)-10(b) or §1.167(a)-11(e), the useful life of the asset under this paragraph shall be the same useful life assigned to the asset under §1.46-3(e).

(c) *Salvage.* (1) Salvage value is the amount (determined at the time of acquisition) which is estimated will be realizable upon sale or other disposition of an asset when it is no longer useful in the taxpayer's trade or business or in the production of his income and is to be retired from service by the taxpayer. Salvage value shall not be changed at any time after the determination made at the time of acquisition merely because of changes in price levels. However, if there is a redetermination of useful life under the rules of paragraph (b) of this section, salvage value may be redetermined based upon facts known at the time of such redetermination of useful life. Salvage, when reduced by the cost of removal, is referred to as net salvage. The time at which an asset is retired from service may vary according to the policy of the taxpayer. If the taxpayer's policy is to dispose of assets which are still in good operating condition, the salvage value may represent a relatively large proportion of the original basis of the asset. However, if the taxpayer customarily uses an asset until its inherent useful life has been substantially exhausted, salvage value may represent no more than junk value. Salvage value must be taken into account in determining the depreciation deduction either by a reduction of the amount subject to depreciation or by a reduction in the rate of depreciation,

## § 1.167(a)-2

## 26 CFR Ch. I (4-1-06 Edition)

but in no event shall an asset (or an account) be depreciated below a reasonable salvage value. See, however, paragraph (a) of § 1.167(b)-2 for the treatment of salvage under the declining balance method, and § 1.179-1 for the treatment of salvage in computing the additional first-year depreciation allowance. The taxpayer may use either salvage or net salvage in determining depreciation allowances but such practice must be consistently followed and the treatment of the costs of removal must be consistent with the practice adopted. For specific treatment of salvage value, see §§ 1.167(b)-1, 1.167(b)-2, and 1.167(b)-3. When an asset is retired or disposed of, appropriate adjustments shall be made in the asset and depreciation reserve accounts. For example, the amount of the salvage adjusted for the costs of removal may be credited to the depreciation reserve.

(2) For taxable years beginning after December 31, 1961, and ending after October 16, 1962, see section 167(f) and § 1.167(f)-1 for rules applicable to the reduction of salvage value taken into account for certain personal property acquired after October 16, 1962.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6712, 29 FR 3653, Mar. 24, 1964; T.D. 7203, 37 FR 17133, Aug. 25, 1972]

### § 1.167(a)-2 Tangible property.

The depreciation allowance in the case of tangible property applies only to that part of the property which is subject to wear and tear, to decay or decline from natural causes, to exhaustion, and to obsolescence. The allowance does not apply to inventories or stock in trade, or to land apart from the improvements or physical development added to it. The allowance does not apply to natural resources which are subject to the allowance for depletion provided in section 611. No deduction for depreciation shall be allowed on automobiles or other vehicles used solely for pleasure, on a building used by the taxpayer solely as his residence, or on furniture or furnishings therein, personal effects, or clothing; but properties and costumes used exclusively in a business, such as a theatrical business, may be depreciated.

### § 1.167(a)-3 Intangibles.

(a) *In general.* If an intangible asset is known from experience or other factors to be of use in the business or in the production of income for only a limited period, the length of which can be estimated with reasonable accuracy, such an intangible asset may be the subject of a depreciation allowance. Examples are patents and copyrights. An intangible asset, the useful life of which is not limited, is not subject to the allowance for depreciation. No allowance will be permitted merely because, in the unsupported opinion of the taxpayer, the intangible asset has a limited useful life. No deduction for depreciation is allowable with respect to goodwill. For rules with respect to organizational expenditures, see section 248 and the regulations thereunder. For rules with respect to trademark and trade name expenditures, see section 177 and the regulations thereunder. See sections 197 and 167(f) and, to the extent applicable, §§ 1.197-2 and 1.167(a)-14 for amortization of goodwill and certain other intangibles acquired after August 10, 1993, or after July 25, 1991, if a valid retroactive election under § 1.197-1T has been made.

(b) *Safe harbor amortization for certain intangible assets—(1) Useful life.* Solely for purposes of determining the depreciation allowance referred to in paragraph (a) of this section, a taxpayer may treat an intangible asset as having a useful life equal to 15 years unless—

(i) An amortization period or useful life for the intangible asset is specifically prescribed or prohibited by the Internal Revenue Code, the regulations thereunder (other than by this paragraph (b)), or other published guidance in the Internal Revenue Bulletin (see § 601.601(d)(2) of this chapter);

(ii) The intangible asset is described in § 1.263(a)-4(c) (relating to intangibles acquired from another person) or § 1.263(a)-4(d)(2) (relating to created financial interests);

(iii) The intangible asset has a useful life the length of which can be estimated with reasonable accuracy; or

(iv) The intangible asset is described in § 1.263(a)-4(d)(8) (relating to certain benefits arising from the provision, production, or improvement of real

property), in which case the taxpayer may treat the intangible asset as having a useful life equal to 25 years solely for purposes of determining the depreciation allowance referred to in paragraph (a) of this section.

(2) *Applicability to acquisitions of a trade or business, changes in the capital structure of a business entity, and certain other transactions.* The safe harbor useful life provided by paragraph (b)(1) of this section does not apply to an amount required to be capitalized by § 1.263(a)-5 (relating to amounts paid to facilitate an acquisition of a trade or business, a change in the capital structure of a business entity, and certain other transactions).

(3) *Depreciation method.* A taxpayer that determines its depreciation allowance for an intangible asset using the 15-year useful life prescribed by paragraph (b)(1) of this section (or the 25-year useful life in the case of an intangible asset described in § 1.263(a)-4(d)(8)) must determine the allowance by amortizing the basis of the intangible asset (as determined under section 167(c) and without regard to salvage value) ratably over the useful life beginning on the first day of the month in which the intangible asset is placed in service by the taxpayer. The intangible asset is not eligible for amortization in the month of disposition.

(4) *Effective date.* This paragraph (b) applies to intangible assets created on or after December 31, 2003.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 21, 1960, as amended by T.D. 8867, 65 FR 3825, Jan. 25, 2000; T.D. 9107, 69 FR 444, Jan. 5, 2004]

#### § 1.167(a)-4 Leased property.

Capital expenditures made by a lessee for the erection of buildings or the construction of other permanent improvements on leased property are recoverable through allowances for depreciation or amortization. If the useful life of such improvements in the hands of the taxpayer is equal to or shorter than the remaining period of the lease, the allowances shall take the form of depreciation under section 167. See §§ 1.167(b)-0, 1.167(b)-1, 1.167(b)-2, 1.167(b)-3, and 1.167(b)-4 for methods of computing such depreciation allowances. If, on the other hand, the esti-

mated useful life of such property in the hands of the taxpayer, determined without regard to the terms of the lease, would be longer than the remaining period of such lease, the allowances shall take the form of annual deductions from gross income in an amount equal to the unrecovered cost of such capital expenditures divided by the number of years remaining of the term of the lease. Such deductions shall be in lieu of allowances for depreciation. See section 162 and the regulations thereunder. See section 178 and the regulations thereunder for rules governing the effect to be given renewal options in determining whether the useful life of the improvement exceeds the remaining term of the lease where a lessee begins improvements on leased property after July 28, 1958, other than improvements which on such date and at all times thereafter, the lessee was under a binding legal obligation to make. Capital expenditures made by a lessor for the erection of buildings or other improvements shall, if subject to depreciation allowances, be recovered by him over the estimated life of the improvements without regard to the period of the lease.

[T.D. 6520, 25 FR 13692, Dec. 24, 1960]

#### § 1.167(a)-5 Apportionment of basis.

In the case of the acquisition on or after March 1, 1913, of a combination of depreciable and nondepreciable property for a lump sum, as for example, buildings and land, the basis for depreciation cannot exceed an amount which bears the same proportion to the lump sum as the value of the depreciable property at the time of acquisition bears to the value of the entire property at that time. In the case of property which is subject to both the allowance for depreciation and amortization, depreciation is allowable only with respect to the portion of the depreciable property which is not subject to the allowance for amortization and may be taken concurrently with the allowance for amortization. After the close of the amortization period or after amortization deductions have been discontinued with respect to any such property, the unrecovered cost or other basis of the depreciable portion of such property

## § 1.167(a)-5T

## 26 CFR Ch. I (4-1-06 Edition)

will be subject to depreciation. For adjustments to basis, see section 1016 and other applicable provisions of law. For the adjustment to the basis of a structure in the case of a donation of a qualified conservation contribution under section 170(h), see §1.170A-14(h)(3)(iii).

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 21, 1960, as amended by T.D. 8069, 51 FR 1498, Jan. 14, 1986]

### § 1.167(a)-5T Application of section 1060 to section 167 (temporary).

In the case of an acquisition of a combination of depreciable and non-depreciable property for a lump sum in an applicable asset acquisition to which section 1060 applies, the basis for depreciation of the depreciable property cannot exceed the amount of consideration allocated to that property under section 1060 and § 1.1060-1T.

[T.D. 8215, 53 FR 27043, July 18, 1988]

### § 1.167(a)-6 Depreciation in special cases.

(a) *Depreciation of patents or copyrights.* The cost or other basis of a patent or copyright shall be depreciated over its remaining useful life. Its cost to the patentee includes the various Government fees, cost of drawings, models, attorneys' fees, and similar expenditures. For rules applicable to research and experimental expenditures, see sections 174 and 1016 and the regulations thereunder. If a patent or copyright becomes valueless in any year before its expiration the unrecovered cost or other basis may be deducted in that year. See § 1.167(a)-14(c)(4) for depreciation of a separately acquired interest in a patent or copyright described in section 167(f)(2) acquired after January 25, 2000. See § 1.197-2 for amortization of interests in patents and copyrights that constitute amortizable section 197 intangibles.

(b) *Depreciation in case of farmers.* A reasonable allowance for depreciation may be claimed on farm buildings (except a dwelling occupied by the owner), farm machinery, and other physical property but not including land. Livestock acquired for work, breeding, or dairy purposes may be depreciated unless included in an inventory used to determine profits in accordance with

section 61 and the regulations thereunder. Such depreciation should be determined with reference to the cost or other basis, salvage value, and the estimated useful life of the livestock. See also section 162 and the regulations thereunder relating to trade or business expenses, section 165 and the regulations thereunder relating to losses of farmers, and section 175 and the regulations thereunder relating to soil or water conservation expenditures.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 21, 1960, as amended by T.D. 8867, 65 FR 3825, Jan. 25, 2000]

### § 1.167(a)-7 Accounting for depreciable property.

(a) Depreciable property may be accounted for by treating each individual item as an account, or by combining two or more assets in a single account. Assets may be grouped in an account in a variety of ways. For example, assets similar in kind with approximately the same useful lives may be grouped together. Such an account is commonly known as a group account. Another appropriate grouping might consist of assets segregated according to use without regard to useful life, for example, machinery and equipment, furniture and fixtures, or transportation equipment. Such an account is commonly known as a classified account. A broader grouping, where assets are included in the same account regardless of their character or useful lives, is commonly referred to as a composite account. For example, all the assets used in a business may be included in a single account. Group, classified, or composite accounts may be further broken down on the basis of location, dates of acquisition, cost, character, use, etc.

(b) When group, classified, or composite accounts are used with average useful lives and a normal retirement occurs, the full cost or other basis of the asset retired, unadjusted for depreciation or salvage, shall be removed from the asset account and shall be charged to the depreciation reserve. Amounts representing salvage ordinarily are credited to the depreciation reserve. Where an asset is disposed of for reasons other than normal retirement, the full cost or other basis of the asset shall be removed from the asset

account, and the depreciation reserve shall be charged with the depreciation applicable to the retired asset. For rules with respect to losses on normal retirements, see § 1.167 (a)-8.

(c) A taxpayer may establish as many accounts for depreciable property as he desires. Depreciation allowances shall be computed separately for each account. Such depreciation preferably should be recorded in a depreciation reserve account; however, in appropriate cases it may be recorded directly in the asset account. Where depreciation reserves are maintained, a separate reserve account shall be maintained for each asset account. The regular books of account or permanent auxiliary records shall show for each account the basis of the property, including adjustments necessary to conform to the requirements of section 1016 and other provisions of law relating to adjustments to basis, and the depreciation allowances for tax purposes. In the event that reserves for book purposes do not correspond with reserves maintained for tax purposes, permanent auxiliary records shall be maintained with the regular books of accounts reconciling the differences in depreciation for tax and book purposes because of different methods of depreciation, bases, rates, salvage, or other factors. Depreciation schedules filed with the income tax return shall show the accumulated reserves computed in accordance with the allowances for income tax purposes.

(d) In classified or composite accounts, the average useful life and rate shall be redetermined whenever additions, retirements, or replacements substantially alter the relative proportion of types of assets in the accounts. See example (2) in paragraph (b) of § 1.167(b)-1 for method of determining the depreciation rate for a classified or composite account.

#### § 1.167(a)-8 Retirements.

(a) *Gains and losses on retirements.* For the purposes of this section the term "retirement" means the permanent withdrawal of depreciable property from use in the trade or business or in the production of income. The withdrawal may be made in one of several ways. For example, the withdrawal

may be made by selling or exchanging the asset, or by actual abandonment. In addition, the asset may be withdrawn from such productive use without disposition as, for example, by being placed in a supplies or scrap account. The tax consequences of a retirement depend upon the form of the transaction, the reason therefor, the timing of the retirement, the estimated useful life used in computing depreciation, and whether the asset is accounted for in a separate or multiple asset account. Upon the retirement of assets, the rules in this section apply in determining whether gain or loss will be recognized, the amount of such gain or loss, and the basis for determining gain or loss:

(1) Where an asset is retired by sale at arm's length, recognition of gain or loss will be subject to the provisions of sections 1002, 1231, and other applicable provisions of law.

(2) Where an asset is retired by exchange, the recognition of gain or loss will be subject to the provisions of sections 1002, 1031, 1231, and other applicable provisions of law.

(3) Where an asset is permanently retired from use in the trade or business or in the production of income but is not disposed of by the taxpayer or physically abandoned (as, for example, when the asset is transferred to a supplies or scrap account), gain will not be recognized. In such a case loss will be recognized measured by the excess of the adjusted basis of the asset at the time of retirement over the estimated salvage value or over the fair market value at the time of such retirement if greater, but only if—

(i) The retirement is an abnormal retirement, or

(ii) The retirement is a normal retirement from a single asset account (but see paragraph (d) of this section for special rule for item accounts), or

(iii) The retirement is a normal retirement from a multiple asset account in which the depreciation rate was based on the maximum expected life of the longest lived asset contained in the account.

(4) Where an asset is retired by actual physical abandonment (as, for example, in the case of a building condemned as unfit for further occupancy

or other use), loss will be recognized measured by the amount of the adjusted basis of the asset abandoned at the time of such abandonment. In order to qualify for the recognition of loss from physical abandonment, the intent of the taxpayer must be irrevocably to discard the asset so that it will neither be used again by him nor retrieved by him for sale, exchange, or other disposition.

Experience with assets which have attained an exceptional or unusual age shall, with respect to similar assets, be disregarded in determining the maximum expected useful life of the longest lived asset in a multiple asset account. For example, if a manufacturer establishes a proper multiple asset account for 50 assets which are expected to have an average life of 30 years but which will remain useful to him for varying periods between 20 and 40 years, the maximum expected useful life will be 40 years, even though an occasional asset of this kind may last 60 years.

(b) *Definition of normal and abnormal retirements.* For the purpose of this section the determination of whether a retirement is normal or abnormal shall be made in the light of all the facts and circumstances. In general, a retirement shall be considered a normal retirement unless the taxpayer can show that the withdrawal of the asset was due to a cause not contemplated in setting the applicable depreciation rate. For example, a retirement is considered normal if made within the range of years taken into consideration in fixing the depreciation rate and if the asset has reached a condition at which, in the normal course of events, the taxpayer customarily retires similar assets from use in his business. On the other hand, a retirement may be abnormal if the asset is withdrawn at an earlier time or under other circumstances, as, for example, when the asset has been damaged by casualty or has lost its usefulness suddenly as the result of extraordinary obsolescence.

(c) *Basis of assets retired.* The basis of an asset at the time of retirement for computing gain or loss shall be its adjusted basis for determining gain or loss upon a sale or other disposition as determined in accordance with the pro-

visions of section 1011 and the following rules:

(1) In the case of a normal retirement of an asset from a multiple asset account where the depreciation rate is based on average expected useful life, the term "adjusted basis" means the salvage value estimated in determining the depreciation deduction in accordance with the provisions in paragraph (c) of § 1.167(a)-1.

(2) In the case of a normal retirement of an asset from a multiple asset account on which the depreciation rate was based on the maximum expected life of the longest lived asset in the account, the adjustment for depreciation allowed or allowable shall be made at the rate which would have been proper if the asset had been depreciated in a single asset account (under the method of depreciation used for the multiple asset account) using a rate based upon the maximum expected useful life of that asset, and

(3) In the case of an abnormal retirement from a multiple asset account the adjustment for depreciation allowed or allowable shall be made at the rate which would have been proper had the asset been depreciated in a single asset account (under the method of depreciation used for the multiple asset account) and using a rate based upon either the average expected useful life or the maximum expected useful life of the asset, depending upon the method of determining the rate of depreciation used in connection with the multiple asset account.

(d) *Special rule for item accounts.* (1) As indicated in paragraph (a)(3)(ii) and (iii) of this section, a loss is recognized upon the normal retirement of an asset from a single asset account but a loss on the normal retirement of an asset in a multiple asset account is not allowable where the depreciation rate is based upon the average useful life of the assets in the account. Where a taxpayer with more than one depreciable asset chooses to set up a separate account for each such asset and the depreciation rate is based on the average useful life of such assets (so that he uses the same life for each account), the question arises whether his depreciation deductions in substance are the equivalent of those which would result

from the use of multiple asset accounts and, therefore, he should be subject to the rules governing losses on retirements of assets from multiple asset accounts. Where a taxpayer has only a few depreciable assets which he chooses to account for in single asset accounts, particularly where such assets cover a relatively narrow range of lives, it cannot be said in the usual case that the allowance of losses on retirements from such accounts clearly will distort income. This results from the fact that where a taxpayer has only a few depreciable assets it is usually not possible clearly to determine that the depreciation rate is based upon the average useful life of such assets. Accordingly, it cannot be said that the taxpayer is in effect clearly operating with a multiple asset account using an average life rate so that losses should not be allowed on normal retirements. Therefore, losses normally will be allowed upon retirement of assets from single asset accounts where the taxpayer has only a few depreciable assets. On the other hand, when a taxpayer who has only a few depreciable assets chooses to account for them in single asset accounts, using for each account a depreciation rate based on the average useful life of such assets, and the assets cover a wide range of lives, the likelihood that income will be distorted is greater than where the group of assets covers a relatively narrow range of lives. In those cases where the allowance of losses would distort income, the rules with respect to the allowance of losses on normal retirement shall be applied to such assets in the same manner as though the assets had been accounted for in multiple asset accounts using a rate based upon average expected useful life.

(2) Where a taxpayer has a large number of depreciable assets and depreciation is based on the average useful life of such assets, then, whether such assets are similar or dissimilar and regardless of whether they are accounted for in individual asset accounts or multiple asset accounts the allowance of losses on the normal retirement of such assets would distort income. Such distortion would result from the fact that the use of average useful life (and, accordingly, average

rate) assumes that while some assets normally will be retired before the expiration of the average life, others normally will be retired after expiration of the average life. Accordingly, if instead of accounting for a large number of similar or dissimilar depreciable assets in multiple asset accounts, the taxpayer chooses to account separately for such assets, using a rate based upon the average life of such assets, the rules with respect to the allowances of losses on normal retirements will be applied to such assets in the same manner as though the assets were accounted for in multiple asset accounts using a rate based upon average expected useful life.

(3) Where a taxpayer who does not have a large number of depreciable assets (and who therefore is not subject to subparagraph (2) of this paragraph) chooses to set up a separate account for each such asset, and has sought to compute an average life for such assets on which to base his depreciation deductions (so that he uses the same life for each account), the allowance of losses on normal retirements from such accounts may in some situations substantially distort income. Such distortion would result from the fact that the use of average useful life (and, accordingly, average rate) assumes that while some assets normally will be retired before expiration of the average life, others normally will be retired after expiration of the average life. Accordingly, where a taxpayer chooses to account separately for such assets instead of accounting for them in multiple asset accounts, and the result is to substantially distort his income, the rules with respect to the allowance of losses on normal retirements shall be applied to such assets in the same manner as though the assets had been accounted for in multiple asset accounts using a rate based upon average expected useful life.

(4) Whenever a taxpayer is treated under this paragraph as though his assets were accounted for in a multiple asset account using an average life rate, and, therefore, he is denied a loss on retirements, the unrecovered cost less salvage of each asset which was accounted for separately may be amortized in accordance with the regulation

**§ 1.167(a)-9**

stated in paragraph (e)(1)(ii) of this section.

(e) *Accounting treatment of asset retirements.* (1) In the case of a normal retirement where under the foregoing rules no loss is recognized and where the asset is retired without disposition or abandonment, (i) if the asset was contained in a multiple asset account, the full cost of such asset, reduced by estimated salvage, shall be charged to the depreciation reserve, or (ii) if the asset was accounted for separately, the unrecovered cost or other basis, less salvage, of the asset may be amortized through annual deductions from gross income in amounts equal to the unrecovered cost or other basis of such asset, divided by the average expected useful life (not the remaining useful life) applicable to the asset at the time of retirement. For example, if an asset is retired after six years of use and at the time of retirement depreciation was being claimed on the basis of an average expected useful life of ten years, the unrecovered cost or other basis less salvage would be amortized through equal annual deductions over a period of ten years from the time of retirement.

(2) Where multiple asset accounts are used and acquisitions and retirements are numerous, if a taxpayer, in order to avoid unnecessarily detailed accounting for individual retirements, consistently follows the practice of charging the reserve with the full cost or other basis of assets retired and of crediting it with all receipts from salvage, the practice may be continued so long as, in the opinion of the Commissioner, it clearly reflects income. Conversely, where the taxpayer customarily follows a practice of reporting all receipts from salvage as ordinary taxable income such practice may be continued so long as, in the opinion of the Commissioner, it clearly reflects income.

(f) *Cross reference.* For special rules in connection with the retirement of the last assets of a given year's acquisitions under the declining balance method, see example (2) in paragraph (b) of § 1.167 (b)-2.

**§ 1.167(a)-9 Obsolescence.**

The depreciation allowance includes an allowance for normal obsolescence

which should be taken into account to the extent that the expected useful life of property will be shortened by reason thereof. Obsolescence may render an asset economically useless to the taxpayer regardless of its physical condition. Obsolescence is attributable to many causes, including technological improvements and reasonably foreseeable economic changes. Among these causes are normal progress of the arts and sciences, supersession or inadequacy brought about by developments in the industry, products, methods, markets, sources of supply, and other like changes, and legislative or regulatory action. In any case in which the taxpayer shows that the estimated useful life previously used should be shortened by reason of obsolescence greater than had been assumed in computing such estimated useful life, a change to a new and shorter estimated useful life computed in accordance with such showing will be permitted. No such change will be permitted merely because in the unsupported opinion of the taxpayer the property may become obsolete. For rules governing the allowance of a loss when the usefulness of depreciable property is suddenly terminated, see § 1.167(a)-8. If the estimated useful life and the depreciation rates have been the subject of a previous agreement, see section 167(d) and § 1.167(d)-1.

**§ 1.167(a)-10 When depreciation deduction is allowable.**

(a) A taxpayer should deduct the proper depreciation allowance each year and may not increase his depreciation allowances in later years by reason of his failure to deduct any depreciation allowance or of his action in deducting an allowance plainly inadequate under the known facts in prior years. The inadequacy of the depreciation allowance for property in prior years shall be determined on the basis of the allowable method of depreciation used by the taxpayer for such property or under the straight line method if no allowance has ever been claimed for such property. The preceding sentence shall not be construed as precluding application of any method provided in section 167(b) if taxpayer's failure to claim any allowance

for depreciation was due solely to erroneously treating as a deductible expense an item properly chargeable to capital account. For rules relating to adjustments to basis, see section 1016 and the regulations thereunder.

(b) The period for depreciation of an asset shall begin when the asset is placed in service and shall end when the asset is retired from service. A proportionate part of one year's depreciation is allowable for that part of the first and last year during which the asset was in service. However, in the case of a multiple asset account, the amount of depreciation may be determined by using what is commonly described as an "averaging convention", that is, by using an assumed timing of additions and retirements. For example, it might be assumed that all additions and retirements to the asset account occur uniformly throughout the taxable year, in which case depreciation is computed on the average of the beginning and ending balances of the asset account for the taxable year. See example (3) under paragraph (b) of § 1.167(b)-1. Among still other averaging conventions which may be used is the one under which it is assumed that all additions and retirements during the first half of a given year were made on the first day of that year and that all additions and retirements during the second half of the year were made on the first day of the following year. Thus, a full year's depreciation would be taken on additions in the first half of the year and no depreciation would be taken on additions in the second half. Moreover, under this convention, no depreciation would be taken on retirements in the first half of the year and a full year's depreciation would be taken on the retirements in the second half. An averaging convention, if used, must be consistently followed as to the account or accounts for which it is adopted, and must be applied to both additions and retirements. In any year in which an averaging convention substantially distorts the depreciation allowance for the taxable year, it may not be used.

**§ 1.167(a)-11 Depreciation based on class lives and asset depreciation ranges for property placed in service after December 31, 1970.**

(a) *In general*—(1) *Summary*. This section provides an asset depreciation range and class life system for determining the reasonable allowance for depreciation of designated classes of assets placed in service after December 31, 1970. The system is designed to minimize disputes between taxpayers and the Internal Revenue Service as to the useful life of property, and as to salvage value, repairs, and other matters. The system is optional with the taxpayer. The taxpayer has an annual election. Generally, an election for a taxable year must apply to all additions of eligible property during the taxable year of election, but does not apply to additions of eligible property in any other taxable year. The taxpayer's election, made with the return for the taxable year, may not be revoked or modified for any property included in the election. Generally, the taxpayer must establish vintage accounts for all eligible property included in the election, must determine the allowance for depreciation of such property in the taxable year of election, and in subsequent taxable years, on the basis of the asset depreciation period selected and must apply the first-year convention specified in the election to determine the allowance for depreciation of such property. This section also contains special provisions for the treatment of salvage value, retirements, and the costs of the repair, maintenance, rehabilitation or improvement of property. In general, a taxpayer may not apply any provision of this section unless he makes an election and thereby consents to, and agrees to apply, all the provisions of this section. A taxpayer who elects to apply this section does, however, have certain options as to the application of specified provisions of this section. A taxpayer may elect to apply this section for a taxable year only if for such taxable year he complies with the requirements of paragraph (f)(4) of this section.

(2) *Definitions*. For the meaning of certain terms used in this section, see paragraphs (b)(2) ("eligible property"),

(b)(3) (“vintage account” and “vintage”), (b)(4) (“asset depreciation range”, “asset guideline class”, “asset guideline period”, and “asset depreciation period”), (b)(5)(iii)(c) (“used property”), (b)(6)(i) (“public utility property”), (c)(1)(iv) (“original use”), (c)(1)(v) (“unadjusted basis” and “adjusted basis”), (c)(2)(ii) (“modified half-year convention”), (c)(2)(iii) (“half-year convention”), (d)(1)(i) (“gross salvage value”), (d)(1)(ii) (“salvage value”), (d)(2)(iii) (“repair allowance”, “repair allowance percentage”, and “repair allowance property”), (d)(2)(vi) (“excluded addition”), (d)(2)(vii) (“property improvement”), (d)(3)(ii) (“ordinary retirement” and “extraordinary retirement”), (d)(3)(vi) (“special basis vintage account”), and (e)(1) (“first placed in service”) of this section.

(b) *Reasonable allowance using asset depreciation ranges*—(1) *In general.* The allowance for depreciation of eligible property (as defined in subparagraph (2) of this paragraph) to which the taxpayer elects to apply this section shall be determined as provided in paragraph (c) of this section and shall constitute the reasonable allowance for depreciation of such property under section 167(a).

(2) *Definition of eligible property.* For purposes of this section, the term “eligible property” means tangible property which is subject to the allowance for depreciation provided by section 167(a) but only if—

(i) An asset guideline class and asset guideline period are in effect for such property for the taxable year of election (see subparagraph (4) of this paragraph);

(ii) The property is first placed in service (as described in paragraph (e)(1) of this section) by the taxpayer after December 31, 1970 (but see subparagraph (7) of this paragraph for special rule where there is a mere change in the form of conducting a trade or business); and

(iii) The property is either—

(a) Section 1245 property as defined in section 1245(a)(3), or

(b) Section 1250 property as defined in section 1250(c).

See, however, subparagraph (6) of this paragraph for special rule for certain

public utility property as defined in section 167(1)(3)(A). Property which meets the requirements of this subparagraph is eligible property even if depreciation with respect to such property, determined in accordance with this section, is allocated to or otherwise required to be reflected in the cost of a capitalized item. The term “eligible property” includes any property which meets the requirements of this subparagraph, whether such property is new property, “used property” (as described in subparagraph (5)(iii)(c) of this paragraph), a “property improvement” (as described in paragraph (d)(2)(vii) of this section), or an “excluded addition” (as described in paragraph (d)(2)(vi) of this section). For the treatment of expenditures for the repair, maintenance, rehabilitation or improvement of certain property, see paragraph (d)(2) of this section.

(3) *Requirement of vintage accounts*—(i) *In general.* For purposes of this section, a “vintage account” is a closed-end depreciation account containing eligible property to which the taxpayer elects to apply this section, first placed in service by the taxpayer during the taxable year of election. The “vintage” of an account refers to the taxable year during which the eligible property in the account is first placed in service by the taxpayer. Such an account will consist of an asset, or a group of assets, within a single asset guideline class established pursuant to subparagraph (4) of this paragraph and may contain only eligible property. Each item of eligible property to which the taxpayer elects to apply this section, first placed in service by the taxpayer during the taxable year of election (determined without regard to a convention described in paragraph (c)(2) of this section) shall be placed in a vintage account of the taxable year of election. For rule regarding “special basis vintage accounts” for certain property improvements, see paragraph (d)(2)(viii) and (3)(vi) of this section. Any number of vintage accounts of a taxable year may be established. More than one account of the same vintage may be established for different assets of the same asset guideline class. See paragraph (d)(3)(xi) of this section for special rule for

treatment of certain multiple asset and item accounts.

(ii) *Special rule.* Section 1245 property may not be placed in a vintage account with section 1250 property. Property the original use of which does not commence with the taxpayer may not be placed in a vintage account with property the original use of which commences with the taxpayer. Property described in section 167(f)(2) may not be placed in a vintage account with property not described in section 167(f)(2). Property described in section 179(d)(1) for which the taxpayer elects the allowance for the first taxable year in accordance with section 179(c) may not be placed in a vintage account with property not described in section 179(d)(1) or for which the taxpayer does not elect such allowance for the first taxable year. For special rule for property acquired in a transaction to which section 381(a) applies, see paragraph (e)(3)(i) of this section. For additional rules with respect to accounting for eligible property, see paragraph (e) of this section.

(4) *Asset depreciation ranges and periods—(i) Selection of asset depreciation period.* The taxpayer's books and records must specify for each vintage account of the taxable year of election—

(a) In the case of vintage account for property in an asset guideline class for which no asset depreciation range is in effect for the taxable year, the asset depreciation period (which shall be equal to the asset guideline period for the assets in such account), or

(b) In the case of a vintage account for property in an asset guideline class for which an asset depreciation range is in effect for the taxable year, the asset depreciation period selected by the taxpayer from the asset depreciation range for the assets in such account.

Unless otherwise expressly provided in the establishment thereof, for purposes of this section, the term "asset guideline class" means a category of assets (including "subsidiary assets") for which a separate asset guideline period is in effect for the taxable year as provided in subdivision (ii) of this subparagraph. The "asset depreciation range" is a period of years which extends from 80 percent of the asset

guideline period to 120 percent of such period, determined in each case by rounding any fractional part of a year to the nearer of the nearest whole or half year. Except as provided in paragraph (e)(3)(iv) of this section, in the case of an asset guideline class for which an asset depreciation range is in effect, any period within the asset depreciation range for the assets in a vintage account which is a whole number of years or a whole number of years plus a half year, may be selected. The term "asset depreciation period" means the period selected from the asset depreciation range, or if no asset depreciation range is in effect for the class, the asset guideline period. The "asset guideline period" is established in accordance with subdivision (ii) of this subparagraph and is the class life under section 167(m). See Revenue Procedure 72-10 for special rules for section 1250 property and property predominantly used outside the United States. In general, an asset guideline period, but no asset depreciation range, is in effect for such property.

(ii) *Establishment of asset guideline classes and periods.* The asset guideline classes and the asset guideline periods, and the asset depreciation ranges determined from such periods, in effect for taxable years ending before the effective date of the first supplemental asset guideline classes, asset guideline periods, and asset depreciation ranges, established pursuant to this section are set forth in Revenue Procedure 72-10. Asset guideline classes and periods, and asset depreciation ranges, will from time to time be established, supplemented, and revised with express reference to this section, and will be published in the Internal Revenue Bulletin. The asset guideline classes, the asset guideline periods, and the asset depreciation ranges determined from such periods in effect as of the last day of a taxable year of election shall apply to all vintage accounts of such taxable year, except that neither the asset guideline period nor the lower limit of the asset depreciation range for any such account shall be longer than the asset guideline period or the lower limit of the asset depreciation range, as the case may be, for such account in effect as of the first day of the taxable

year (or as of such later time in such year as an asset guideline class first established during such year becomes effective). Generally, the reasonable allowance for depreciation of property for any taxable year in a vintage account shall not be changed to reflect any supplement or revision of the asset guideline classes or periods, and asset depreciation ranges, for the taxable year in which the account is established, which occurs after the end of such taxable year. However, if expressly provided in such a supplement or revision, the taxpayer may, at his option in the manner specified therein, apply the revised or supplemented asset guideline classes or periods and asset depreciation ranges to such property for such taxable year and succeeding taxable years.

(iii) *Applicable guideline classes and periods in special situations.* (a) An electric or gas utility which would in accordance with Revenue Procedure 64-21 be entitled to use a composite guideline class basis for applying Revenue Procedure 62-21 may, solely with respect to property for which an asset depreciation range is in effect for the taxable year, elect to apply this section on the basis of a composite asset guideline class and asset guideline period determined by applying the provisions of Revenue Procedure 64-21 to such property. The asset depreciation range for such a composite asset guideline class shall be determined by reference to the composite asset guideline period at the beginning of the first taxable year to which the taxpayer elects to apply this section and shall not be changed until such time as major variations in the asset mix or the asset guideline classes or periods justify some other composite asset guideline period. Except as provided in paragraph (d)(2)(iii) of this section with respect to buildings and other structures, for the purposes of this section, all property in the composite asset guideline class shall be treated as included in a single asset guideline class. If the taxpayer elects to apply this subdivision, the election shall be made on the tax return filed for the first taxable year for which the taxpayer elects to apply this section. An election to apply this subdivision for any taxable year shall

apply to all succeeding taxable years to which the taxpayer elects to apply this section, except to the extent the election to apply this subdivision is with the consent of the Commissioner terminated with respect to a succeeding taxable year and all taxable years thereafter.

(b) For purposes of this section, property shall be included in the asset guideline class for the activity in which the property is primarily used. See paragraph (e)(3)(iii) of this section for rule for leased property. Property shall be classified according to primary use even though the activity in which such property is primarily used is insubstantial in relation to all the taxpayer's activities. No change in the classification of property shall be made because of a change in primary use after the end of the taxable year in which property is first placed in service, including a change in use which results in section 1250 property becoming section 1245 property.

(c) An incorrect classification or characterization by the taxpayer of property for the purposes of this section (such as under (b) of this subdivision or under subparagraph (2) or (3) (ii) of this paragraph) shall not cause or permit a revocation of the election to apply this section for the taxable year in which such property was first placed in service. The classification or characterization of such property shall be corrected. All adjustments necessary to the correction shall be made, including adjustments of unadjusted basis, adjusted basis, salvage value, the reserve for depreciation of all vintage accounts affected, and the amount of depreciation allowable for all taxable years for which the period for assessment of tax prescribed in section 6501 has not expired. If because of incorrect classification or characterization property included in an election to apply this section was not placed in a vintage account and no asset depreciation period was selected for the property or the property was placed in a vintage account but an asset depreciation period was selected from an incorrect asset depreciation range, the taxpayer shall place the property in a vintage

account and select an asset depreciation period for the account from the correct asset depreciation range.

(d) Generally, except as provided in subparagraph (5)(v)(a) of this paragraph, a taxpayer may not compute depreciation for eligible property first placed in service during the taxable year under a method of depreciation not described in section 167(b) (1), (2), or (3). (If the taxpayer computes depreciation with respect to such property under section 167(k), or amortizes such property, the property must be excluded from the election to apply this section.) (See subparagraph (5)(v)(b) of this paragraph.) However, if the taxpayer establishes to the satisfaction of the Commissioner that a method of depreciation not described in section 167(b) (1), (2), (3), or (k) was adopted for property in the asset guideline class on the basis of a good faith mistake as to the proper asset guideline class for the property, then, unless the requirements of subparagraph (5)(v)(a) of this paragraph are met, the taxpayer must terminate (as of the beginning of the taxable year) such method of depreciation with respect to all eligible property in the asset guideline class which was first placed in service during the taxable year. In such event, the taxpayer's election to apply this section shall include eligible property in the asset guideline class without regard to subparagraph (5)(v)(a) of this paragraph. The provisions of (c) of this subdivision shall apply to the correction in the classification of the property.

(e) If the provisions of section 167(j) apply to require a change in the method of depreciation with respect to an item of section 1250 property in a multiple asset vintage account, the asset shall be removed from the account and placed in a separate item vintage account. The unadjusted basis of the asset shall be removed from the unadjusted basis of the vintage account as of the first day of the taxable year in which the change in method of depreciation is required and the depreciation reserve established for the account shall be reduced by the depreciation allowable for the property computed in the manner prescribed in paragraph (c)(1)(v)(b) of this section for determination of the adjusted basis of prop-

erty. See paragraph (d)(3)(vii)(e) of this section for treatment of salvage value when property is removed from a vintage account.

(iv) *Examples.* The principles of this subparagraph may be illustrated by the following examples:

*Example (1).* Corporation X purchases a bulldozer for the use in its construction business. The bulldozer is first placed in service in 1972. Since the bulldozer is tangible property for which an asset guideline class and period have been established, the bulldozer is eligible property. The bulldozer is in asset guideline class 15.1 of Revenue Procedure 72-10, and the asset depreciation range is 4-6 years.

*Example (2).* In 1972, corporation Y first places in service a factory building. Since the factory building is tangible property for which an asset guideline class and period have been established, it is eligible property. The factory building is in asset guideline class 65.11 of Revenue Procedure 72-10. Since no asset depreciation range is in effect for the asset guideline class, the asset depreciation period is the asset guideline period of 45 years. (See subparagraph (5)(vi) of this paragraph for election to exclude certain section 1250 property during transition period.)

*Example (3).* In January of 1971, corporation Y, a calendar year taxpayer, pays or incurs \$2,000 for the rehabilitation and improvement of machine A which was first placed in service in 1969. On January 1, 1971, corporation Y first placed in service machines B and C, each with an unadjusted basis of \$10,000. Machines B and C are eligible property. Machine A would be eligible property but for the fact it was first placed in service prior to January 1, 1971 (that is, machine A is eligible property determined without regard to subparagraph (2)(ii) of this paragraph). Corporation Y elects to apply this section for the taxable year, and adopts the modified half-year convention described in paragraph (c)(2)(ii) of this section, but does not elect to apply the asset guideline class repair allowance described in paragraph (d)(2)(iii) of this section. Machines A, B, and C are in asset guideline class 24.4 under Revenue Procedure 72-10 for which the asset depreciation range is 8 to 12 years. The \$2,000 expended on machine A substantially increases its capacity and is a capital expenditure under sections 162 and 263. The \$2,000 is a property improvement (as defined in paragraph (d)(2)(vii)(b) of this section) which is eligible property. However, corporation Y by mistake treats the property improvement of \$2,000 as a deductible repair. Also by mistake, corporation Y includes machine B in asset guideline class 24.3 under Revenue Procedure 72-10 for which the asset depreciation range is 5 to 7 years. Corporation Y establishes vintage accounts

§ 1.167(a)-11

26 CFR Ch. I (4-1-06 Edition)

for 1971, and computes depreciation for 1971 and 1972 as follows:

	Dec. 31, 1972, reserve for depreciation	Dec. 31, 1972, adjusted basis
Vintage account for machine B, with an asset depreciation period of 5 years and an unadjusted basis of \$10,000 for which corporation Y adopts the straight line method .....	\$4,000	\$6,000
Vintage account for machine C, with an asset depreciation period of 8 years and an unadjusted basis of \$10,000 for which corporation Y adopts the straight line method .....	2,500	7,500

After audit in 1973 of corporation Y's taxable years 1971 and 1972, it is determined that the \$2,000 paid in 1971 for the rehabilitation and improvement of machine A is a capital expenditure and that machine B is in asset guideline class 24.4. The incorrect classification is corrected. Corporation Y places machine B and the property improvement in a vintage account of 1971 and on its tax return filed for 1973 selects an asset depreciation period of 8 years for that account. Giving effect to the correction in classification of the property in accordance with subdivision (iii) (c) of this subparagraph, at the end of 1972 the unadjusted basis, reserve for depreciation, and adjusted basis of the vintage account for machine B and the property improvement with respect to machine A are \$12,000, \$3,000, and \$9,000, respectively. Corporation Y's deduction of the \$2,000 property improvement in 1971 as a repair expense under section 162 is disallowed. For 1971 and 1972 depreciation deductions are disallowed in the amount of \$500 each year (that is, \$750 excess annual depreciation on machine B minus \$250 annual depreciation on the property improvement).

*Example (4).* (a) In 1971, Corporation X, a calendar year taxpayer, first places in service machines A through M, all of which are eligible property. All the machines except machine A are in asset guideline class 24.3 under Revenue Procedure 72-10. Machine A is in asset guideline class 24.4 under Revenue Procedure 72-10. Machine B has an unadjusted basis equal to 80 percent of the total unadjusted basis of machines B through M. By good faith mistake as to proper classification, corporation X includes both machine A and machine B in asset guideline class 24.4. Corporation X consistently uses the machine hour method of depreciation on all property in asset guideline class 24.4, and for 1971 computes depreciation for machines A and B under that method. Corporation X elects to apply this section for 1971 on the assumption that the election includes ma-

chines C through M which are in asset guideline class 24.3. In 1973, upon audit of corporation X's taxable years 1971 and 1972, it is determined that machine B is included in asset guideline class 24.3 and that since for 1971 corporation X computed depreciation on machine B under the machine hour method, in accordance with subparagraph (5)(v)(a) of this paragraph, all property in asset guideline class 24.3 (machines B through M) is excluded from corporation X's election to apply this section for 1971. Although corporation X has consistently used the machine hour method for asset guideline class 24.4, corporation X has not in the past used the machine hour method for machines of the type and function of machines C through M which are in asset guideline class 24.3. Both machine A and machine B are used in connection with the manufacture of wood products. There is reasonable basis for corporation X having assumed that machine B is in asset guideline class 24.4 along with machine A to which it is similar. Corporation X establishes to the satisfaction of the Commissioner that it used the machine hour method for machine B on the basis of a good faith mistake as to the proper classification of the machine. Corporation X may, at its option (see subparagraph (5)(v) of this paragraph), terminate the machine hour method of depreciation for machine B as of the beginning of 1971, and in that event corporation X's election to apply this section for 1971 will apply to machines B through M without regard to subparagraph (5)(v)(a) of this paragraph. The adjustments provided in subdivision (iii)(c) of this subparagraph will be made as a result of the correction in classification of property. If corporation X does not terminate the machine hour method with respect to machine B, machines B through M must be excluded from the election to apply this section (see subparagraph (5)(v) of this paragraph).

(b) The facts are the same as in (a) of this example except that machine B has an unadjusted basis equal to only 65 percent of the total unadjusted basis of machines B through M.

In this case, corporation X must either terminate the machine hour method of depreciation with respect to asset B (since the provisions of subparagraph (5)(v) of this paragraph do not permit the exclusion of the property from the election to apply this section) or otherwise comply with the provisions of subparagraph (5)(v) of this paragraph. (See paragraph (c)(1)(iv) for limitation on methods which may be adopted for property included in the election to apply this section.)

(5) *Requirements of election*—(i) *In general.* Except as otherwise provided in paragraph (d)(2) of this section dealing

with expenditures for the repair, maintenance, rehabilitation or improvement of certain property, no provision of this section shall apply to any property other than eligible property to which the taxpayer elects in accordance with this section, to apply this section. For the time and manner of election, and certain conditions to an election, see paragraph (f) of this section. Except as otherwise provided in subparagraph (4)(iii) of this paragraph, subdivision (v) of this subparagraph and in subparagraph (6)(iii) of this paragraph, a taxpayer's election to apply this section may not be revoked or modified after the last day prescribed for filing the election. Thus, for example, after such day, a taxpayer may not cease to apply this section to property included in the election, establish different vintage accounts for the taxable year of election, select a different period from the asset depreciation range for any such account, or adopt a different first-year convention for any such account.

(ii) *Property required to be included in election.* Except as otherwise provided in subdivision (iii) of this subparagraph dealing with certain "used property", in subdivision (iv) of this subparagraph dealing with "section 38 property", in subdivision (v) of this subparagraph dealing with property subject to special depreciation or amortization, in subdivision (vi) of this subparagraph dealing with certain section 1250 property, in subdivision (vii) of this subparagraph dealing with certain subsidiary assets, and in paragraph (e)(3) (i) and (iv) of this section dealing with transactions to which section 381(a) applies, if the taxpayer elects to apply this section to any eligible property first placed in service by the taxpayer during the taxable year of election, the election shall apply to all such eligible property, whether placed in service in a trade or business or held for production of income.

(iii) *Special 10 percent used property rule.* (a) If (1) the unadjusted basis of eligible used section 1245 property (as defined in (c) of this subdivision) first placed in service by the taxpayer during the taxable year of election, for which no specific used property asset guideline class (as defined in (c) of this

subdivision) is in effect for the taxable year, exceeds (2) 10 percent of the unadjusted basis of all eligible section 1245 property first placed in service during the taxable year of election, the taxpayer may exclude all (but not less than all) the property described in (a)(1) of this subdivision from the election to apply this section.

(b) If (1) the unadjusted basis of eligible used section 1250 property first placed in service by the taxpayer during the taxable year of election, for which no specific used property asset guideline class is in effect for the taxable year, exceeds (2) 10 percent of the unadjusted basis of all eligible section 1250 property first placed in service during the taxable year of election, the taxpayer may exclude all (but not less than all) the property described in (b)(1) of this subdivision from the election to apply this section.

(c) For the purposes of this section, the term "used property" means property the original use of which does not commence with the taxpayer. Solely for the purpose of determining whether the 10 percent rule of this subdivision is satisfied, (1) eligible used property first placed in service during the taxable year and excluded from the election to apply this section pursuant to subdivision (v)(a) of this subparagraph and (2) eligible property acquired during the taxable year in a transaction to which section 381(a) applies, shall all be treated as used property regardless of whether such property would be treated as new property under section 167(c) and the regulations thereunder. The term "specific used property asset guideline class" means a class established in accordance with subparagraph (4) of this paragraph solely for used property primarily used in connection with the activity to which the class relates.

(iv) *Property subject to investment tax credit.* The taxpayer may exclude from an election to apply this section all, or less than all, units of eligible property first placed in service during the taxable year which is—

(a) "Section 38 property" as defined in section 48(a) which meets the requirements of section 49 and which is not property described in section 50, or

(b) Property to which section 47(a)(5)(B) applies which would be section 38 property but for section 49 and which is placed in service to replace section 38 property (other than property described in section 50) disposed of prior to August 15, 1971.

(v) *Property subject to special method of depreciation or authorization.* (a) In the case of eligible property first placed in service in a taxable year of election (and not otherwise properly excluded from an election to apply this section) the taxpayer may not compute depreciation for any of such property in the asset guideline class under a method not described in section 167(b) (1), (2), (3), or (k) unless he (1) computes depreciation under a method or methods not so described for eligible property first placed in service in the taxable year in the asset guideline class with an unadjusted basis at least equal to 75 percent of the unadjusted basis of all eligible property first placed in service in the taxable year in the asset guideline class and (2) agrees to continue to depreciate such property under such method or methods until the consent of the Commissioner is obtained to a change in method. The consent of the Commissioner must be obtained by filing Form 3115 with the Commissioner of Internal Revenue, Washington, D.C. 20224, within the first 180 days of the taxable year for which the change is desired. If for the taxable year of election the taxpayer computes depreciation under any method not described in section 167(b) (1), (2), (3), or (k) for any eligible property (other than property otherwise properly excluded from an election to apply this section) first placed in service during the taxable year, an election to apply this section for the taxable year shall not include such property or any other eligible property in the same asset guideline class as such property. With respect to a taxable year beginning before January 1, 1973, if the taxpayer has adopted a method of depreciation which is not permitted under this subdivision, the taxpayer may under this section adopt a method of depreciation permitted under this subdivision or otherwise comply with the provisions of this subdivision.

(b) An election to apply this section shall not include eligible property for which, for the taxable year of election, the taxpayer computes depreciation under section 167(k), or computes amortization under section 169, 184, 185, 187, 188, or paragraph (b) of § 1.162-11. If the taxpayer has elected to apply this section to eligible property described in section 167(k), 169, 184, 185, or 187 and the taxpayer thereafter computes depreciation or amortization for such property for any taxable year in accordance with section 167(k), 169, 184, 185, or 187, then the election to apply this section to such property shall terminate as of the beginning of the taxable year for which depreciation or amortization is computed under such section. Application of this section to the property for any period prior to the termination date will not be affected by the termination. The unadjusted basis of the property shall be removed as of the termination date from the unadjusted basis of the vintage account. The depreciation reserve established for the account shall be reduced by the depreciation allowable for the property, computed in the manner prescribed in paragraph (c)(1)(v)(b) of this section for determination of the adjusted basis of the property. See paragraph (d)(3)(vii)(e) of this section for treatment of salvage value when property is removed from a vintage account.

(vi) *Certain section 1250 property.* (a) The taxpayer may exclude from an election to apply this section all, or less than all, items of eligible section 1250 property first placed in service during the taxable year of election provided that—

(1) The item is first placed in service before the earlier of the effective date of the first supplemental asset guideline class including such property established in accordance with subparagraph (4)(ii) of this paragraph, or January 1, 1974, and

(2) The taxpayer establishes that a useful life shorter than the asset guideline period in effect on January 1, 1971, for such item of property is justified for such taxable year.

A useful life shorter than the asset guideline period in effect on January 1, 1971, will be considered justified only if

such life is justified in accordance with the provisions of Revenue Procedure 62-21 (including all modifications, amendments or supplements thereto as of January 1, 1971), determined without application of the minimal adjustment rule in section 4, part II, of Revenue Procedure 65-13. If an item of section 1250 property is excluded from an election to apply this section pursuant to this subdivision, any elevator or escalator which is a part of such item shall also be excluded from the election.

(b) If the taxpayer excludes an item of section 1250 property from an election to apply this section in accordance with this subdivision, the useful life justified under Revenue Procedure 62-21 in accordance with this subdivision for the taxable year of exclusion will be treated as justified for such item of section 1250 property for the taxable year of the exclusion and all subsequent taxable years.

(vii) *Subsidiary assets.* The taxpayer may exclude from an election to apply this section all (but not less than all) subsidiary assets first placed in service during the taxable year of election in an asset guideline class, provided that—

(a) The unadjusted basis of eligible subsidiary assets first placed in service during the taxable year in the class is as much as 3 percent of the unadjusted basis of all eligible property first placed in service during the taxable year in the class, and

(b) Such subsidiary assets are first placed in service by the taxpayer before the earlier of (1) the effective date of the first supplemental asset guideline class including such subsidiary assets established in accordance with subparagraph (4)(ii) of this paragraph, or (2) January 1, 1974.

For purposes of this subdivision the term “subsidiary assets” includes jigs, dies, molds, returnable containers, glassware, silverware, textile mill cam assemblies, and other equipment included in group 1, class 5, of Revenue Procedure 62-21, which is usually and property accounted for separately from other property and under a method of depreciation not expressed in terms of years.

(6) *Special rule for certain public utility property—(i) Requirement of normaliza-*

*tion in certain cases.* Under section 167(1), in the case of public utility property (as defined in section 167(1)(3)(A)), if the taxpayer—

(a) Is entitled to use a method of depreciation other than a “subsection (1) method” of depreciation (as defined in section 167(1)(3)(F)) only if it uses the “normalization method of accounting” (as defined in section 167(1)(3)(G)) with respect to such property, or

(b) Is entitled for the taxable year to use only a “subsection (1) method” of depreciation, such property shall be eligible property (as defined in subparagraph (2) of this paragraph) only if the taxpayer normalizes the tax deferral resulting from the election to apply this section.

(ii) *Normalization.* The taxpayer will be considered to normalize the tax deferral resulting from the election to apply this section only if it computes its tax expense for purposes of establishing its cost of service for rate-making purposes and for reflecting operating results in its regulated books of account using a period for depreciation no less than the lesser of—

(a) 100 percent of the asset guideline period in effect in accordance with subparagraph (4)(ii) of this paragraph for the first taxable year to which this section applies, or

(b) The period for computing its depreciation expense for ratemaking purposes and for reflecting operating results in its regulated books of account, and makes adjustments to a reserve to reflect the deferral of taxes resulting from the election to apply this section. A determination whether the taxpayer is considered to normalize (within the meaning of the preceding sentence) the tax deferral resulting from the election to apply this section shall be made in a manner consistent with the principles for determining whether a taxpayer is using the “normalization method of accounting” (within the meaning of section 167(1)(3)(G)). [Removed] See § 1.167(1)-1(h).

(iii) *Failure to normalize.* If a taxpayer, which has elected to apply this section to any eligible public utility property and is required under subdivision (i) of this subparagraph to normalize the tax deferral resulting from the election to apply this section to

such property, fails to normalize such tax deferral, the election to apply this section to such property shall terminate as of the beginning of the taxable year for which the taxpayer fails to normalize such tax deferral. Application of this section to such property for any period prior to the termination date will not be affected by the termination. The unadjusted basis of the property shall be removed as of the termination date from the unadjusted basis of the vintage account. The depreciation reserve established for the account shall be reduced by the depreciation allowable for the property, computed in the manner prescribed in paragraph (c)(1)(v)(b) of this section for determination of the adjusted basis of the property. See paragraph (d)(3)(vii)(e) of this section for treatment of salvage value when property is removed from a vintage account.

(iv) *Examples.* The principles of this subparagraph may be illustrated by the following examples:

*Example (1).* Corporation A is a gas pipeline company, subject to the jurisdiction of the Federal Power Commission, which is entitled under section 167(1) to use a method of depreciation other than a "subsection (1) method" of depreciation (as defined in section 167(1)(3)(F)) only if it uses the "normalization method of accounting" (as defined in section 167(1)(3)(G)). Corporation A elects to apply this section for 1972 with respect to all eligible property. In 1972, corporation A places in service eligible property with an unadjusted basis of \$2 million. One hundred percent of the asset guideline period for such property is 22 years and the asset depreciation range is from 17.5 years to 26.5 years. The taxpayer uses the double declining balance method of depreciation, selects an asset depreciation period of 17.5 years and applies the half-year convention (described in paragraph (c)(2)(iii) of this section). The depreciation allowable under this section with respect to such property in 1972 is \$114,285. The taxpayer will be considered to normalize the tax deferral resulting from the election to apply this section and to use the "normalization method of accounting" (within the meaning of section 167(1)(3)(G)) if it computes its tax expense for purposes of determining its cost of service for rate making purposes and for reflecting operating results in its regulated books of account using a "subsection (1) method" of depreciation, such as the straight line method, determined by using a depreciation period of 22 years (that is, 100 percent of the asset guideline period). A depreciation allowance computed in this man-

ner is \$45,454. The difference in the amount determined under this section (\$114,285) and the amount used in computing its tax expense for purposes of estimating its cost of service for rate making purposes and for reflecting operating results in its regulated books of account (\$45,454) is \$68,831. Assuming a tax rate of 48 percent, the deferral of taxes resulting from an election to apply this section and using a different method of depreciation for tax purposes from that used for establishing its cost of service for rate making purposes and for reflecting operating results in its regulated books of account is 48 percent of \$68,831, or \$33,039, which amount should be added to a reserve to reflect the deferral of taxes resulting from the election to apply this section and from the use of a different method of depreciation in computing the allowance for depreciation under section 167 from that used in computing its depreciation expense for purposes of establishing its cost of service for rate making purposes and for reflecting operating results in its regulated books of account.

*Example (2).* Corporation B, a telephone company subject to the jurisdiction of the Federal Communications Commission used a "flow-through method of accounting" (as defined in section 167(1)(3)(H)) for its "July 1969 accounting period" (as defined in section 167(1)(3)(I)) with respect to all of its pre-1970 public utility property and did not make an election under section 167(1)(4)(A). Thus, corporation B is entitled under section 167(1) to use a method of depreciation other than a "subsection (1) method" with respect to certain property without using the "normalization method of accounting." In 1972, corporation B makes an election to apply this section with respect to all eligible property. Corporation B is not required to normalize the tax deferral resulting from the election to apply this section in the case of property for which it is not required to use the "normalization method of accounting" under section 167(1).

*Example (3).* Assume the same facts as in example (2) except that corporation B made a timely election under section 167(1)(4)(A) that section 167(1)(2)(C) not apply with respect to property which increases the productive or operational capacity of the taxpayer. Corporation B must normalize the tax deferral resulting from the election to apply this section with respect to such property.

(7) *Mere change in form of conducting a trade or business.* Property which was first placed in service by the transferor before January 1, 1971, shall not be eligible property if such property is first placed in service by the transferee after December 31, 1970, by reason of a mere change in the form of conducting

a trade or business in which such property is used. A mere change in the form of conducting a trade or business in which such property is used will be considered to have occurred if—

(i) The transferor (or in a case where the transferor is a partnership, estate, trust, or corporation, the partners, beneficiaries, or shareholders) of such property retains a substantial interest in such trade or business, or

(ii) The basis of such property in the hands of the transferee is determined in whole or in part by reference to the basis of such property in the hands of the transferor.

For purposes of this subparagraph, a transferor (or in a case where the transferor is a partnership, estate, trust, or corporation, the partners, beneficiaries, or shareholders) shall be considered as having retained a substantial interest in the trade or business only if, after the change in form, his (or their) interest in such trade or business is substantial in relation to the total interest of all persons in such trade or business. This subparagraph shall apply to property first placed in service prior to January 1, 1971, held for the production of income (within the meaning of section 167(a)(2)) as well as to property used in a trade or business. The principles of this subdivision may be illustrated by the following examples:

*Example (1).* Corporation X and corporation Y are includible corporations in an affiliated group as defined in section 1504(a). In 1971 corporation X sells property to corporation Y for cash. The property would meet the requirements of subparagraph (2) of this paragraph for eligible property except that it was first placed in service by corporation X in 1970. After the transfer, the property is first placed in service by corporation Y in 1971. The property is not eligible property because of the mere change in the form of conducting a trade or business.

*Example (2).* In 1971, in a transaction to which section 351 applies, taxpayer B transfers to corporation W property which would meet the requirements of subparagraph (2) of this paragraph for eligible property except that the property was first placed in service by B in 1969. Corporation W first places the property in service in 1971. The property is not eligible property because of the mere change in the form of conducting a trade or business.

(c) *Manner of determining allowance—*

(1) *In general—(i) Computation of allowance.* (a) The allowance for depreciation of property in a vintage account shall be determined in the manner specified in this paragraph by using the method of depreciation adopted by the taxpayer for the account and a rate based upon the asset depreciation period for the account. (For limitations on methods of depreciation permitted with respect to property, see section 167 (c) and (j) and subdivision (iv) of this subparagraph.) In applying the method of depreciation adopted by the taxpayer, the annual allowance for depreciation of a vintage account shall be determined without adjustment for the salvage value of the property in such account except that no account may be depreciated below the reasonable salvage value of the account. (For rules regarding estimation and treatment of salvage value, see paragraph (d)(1) and (3) (vii) and (viii) of this section.) Regardless of the method of depreciation adopted by the taxpayer, the depreciation allowable for a taxable year with respect to a vintage account may not exceed the amount by which (as of the beginning of the taxable year) the unadjusted basis of the account exceeds (1) the reserve for depreciation established for the account plus (2) the salvage value of the account. The unadjusted basis of a vintage account is defined in subdivision (v) of this subparagraph. The adjustments to the depreciation reserve are described in subdivision (ii) of this subparagraph.

(b) The annual allowance for depreciation of a vintage account using the straight line method of depreciation shall be determined by dividing the unadjusted basis of the vintage account (without reduction for salvage value) by the number of years in the asset depreciation period selected for the account. See subdivision (iii)(b) of this subparagraph for the manner of computing the depreciation allowance following a change from the declining balance method or the sum of the years-digits method to the straight line method.

(c) In the case of the sum of the years-digits method, the annual allowance for depreciation of a vintage account shall be computed by multiplying the unadjusted basis of the vintage account (without reduction for salvage value) by a fraction, the numerator of which changes each year to a number which corresponds to the years remaining in the asset depreciation period for the account (including the year for which the allowance is being computed) and the denominator of which is the sum of all the year's digits corresponding to the asset depreciation period for the account. See subdivision (iii)(c) of this subparagraph for the manner of computing the depreciation allowance following a change from the declining balance method to the sum of the years-digits method.

(d) The annual allowance for depreciation of a vintage account using a declining balance method is determined by applying a uniform rate to the excess of the unadjusted basis of the vintage account over the depreciation reserve established for that account. The rate under the declining balance method may not exceed twice the straight line rate based upon the asset depreciation period for the vintage account.

(e) The allowance for depreciation under this paragraph shall constitute the amount of depreciation allowable under section 167. See section 179 for additional first-year allowance for certain property.

(ii) *Establishment of depreciation reserve.* The taxpayer must establish a depreciation reserve for each vintage account. The amount of the reserve for a guideline class must be stated on each income tax return on which depreciation with respect to such class is determined under this section. The depreciation reserve for a vintage account consists of the accumulated depreciation allowable under this section with respect to the vintage account, increased by the adjustments for ordinary retirements prescribed by paragraph (d)(3)(iii) of this section, by the adjustments for reduction of the salvage value of a vintage account prescribed by paragraph (d)(3)(vii)(d) of this section, and by the adjustments for transfers to supplies or scrap prescribed by paragraph (d)(3)(viii)(b) of

this section, and decreased by the adjustments for extraordinary retirements and certain special retirements as prescribed by paragraph (d)(3) (iv) and (v) of this section, by the adjustments for the amount of the reserve in excess of the unadjusted basis of a vintage account prescribed by paragraph (d)(3)(ix)(a) of this section, and by the adjustments for property removed from a vintage account prescribed by paragraphs (b)(4)(iii)(e), (5)(v)(b) and (6)(iii) of this section. The adjustments to the depreciation reserve for ordinary retirements during the taxable year shall be made as of the beginning of the taxable year. The adjustments to the depreciation reserve for extraordinary retirements shall be made as of the date the retirement is treated as having occurred in accordance with the first-year convention (described in subparagraph (2) of this paragraph) adopted by the taxpayer for the vintage account. The adjustment to the depreciation reserve for reduction of salvage value and for transfers to supplies or scrap shall, in the case of an ordinary retirement, be made as of the beginning of the taxable year, and in the case of an extraordinary retirement the adjustment for reduction of salvage value shall be made as of the date the retirement is treated as having occurred in accordance with the first-year convention (described in subparagraph (2) of this paragraph) adopted by the taxpayer for the vintage account. The adjustment to the depreciation reserve for property removed from a vintage account in accordance with paragraph (b)(4)(iii)(e), (5)(v)(b) and (6)(iii) of this section shall be made as of the beginning of the taxable year. The depreciation reserve of a vintage account may not be decreased below zero.

(iii) *Consent to change in method of depreciation.* (a) During the asset depreciation period for a vintage account, the taxpayer is permitted to change under this section from a declining balance method of depreciation to the sum of the years-digits method of depreciation and from a declining balance method of depreciation or the sum of the years-digits method of depreciation to the straight line method of depreciation with respect to such account. Except as provided in section 167(j)(2)(1),

and paragraph (e)(3)(i) of this section, no other changes in the method of depreciation adopted for a vintage account will be permitted. The provisions of §1.167(e)-1 shall not apply to any change in depreciation method permitted under this section. The change in method applies to all property in the vintage account and must be adhered to for the entire taxable year of the change.

(b) When a change is made to the straight line method of depreciation, the annual allowance for depreciation of the vintage account shall be determined by dividing the adjusted basis of the vintage account (without reduction for salvage value) by the number of years remaining (at the time as of which the change is made) in the asset depreciation period selected for the account. However, the depreciation allowable for any taxable year following a change to the straight line method may not exceed an amount determined by dividing the unadjusted basis of the vintage account (without reduction for salvage value) by the number of years in the asset depreciation period selected for the account.

(c) When a change is made from the declining balance method of depreciation to the sum of the years-digits method of depreciation, the annual allowance for depreciation of a vintage account shall be determined by multiplying the adjusted basis of the account (without reduction for salvage value) at the time as of which the change is made by a fraction, the numerator of which changes each year to a number which corresponds to the number of years remaining in the asset depreciation period selected for the account (including the year for which the allowance is being computed), and the

denominator of which is the sum of all the year's digits corresponding to the number of years remaining in the asset depreciation period at the time as of which the change is made.

(d) The number of years remaining in the asset depreciation period selected for an account is equal to the asset depreciation period less the number of years of depreciation previously allowed. For this purpose, regardless of the first year convention adopted by the taxpayer, it will be assumed that depreciation was allowed for one-half of a year in the first year.

(e) The taxpayer shall furnish a statement setting forth the vintage accounts for which the change is made with the income tax return filed for the taxable year of the change.

(f) The principles of this subdivision may be illustrated by the following examples:

*Example (1).* A, a calendar year taxpayer, places new section 1245 property in service in a trade or business as follows:

Asset	Placed in service	Unadjusted basis	Estimated salvage
X .....	Mar. 15, 1971 .....	\$400	\$20
Y .....	June 13, 1971 .....	500	50
Z .....	July 30, 1971 .....	100	0

The property is eligible property and is properly included in a single vintage account. The asset depreciation range for such property is 5 to 7 years and the taxpayer selects an asset depreciation period of 5½ years and adopts the 200-percent declining balance method of depreciation. The taxpayer adopts the half-year convention described in subparagraph (2)(iii) of this paragraph. After 3 years, A changes from the 200-percent declining balance method to the straight line method of depreciation. Depreciation allowances would be as follows:

Year	Unadjusted basis	Rate	Depreciation	Reserve	Adjusted basis
1971 .....	\$1,000	0.18182	\$181.82	\$181.82	\$818.18
1972 .....	1,000	.36363	297.52	479.34	520.66
1973 .....	1,000	.36363	189.33	668.67	331.33
1974 .....	1,000	<sup>1</sup> .33333	110.44	779.11	220.89
1975 .....	1,000	.33333	110.44	889.56	110.44
1976 .....	1,000	.33333	<sup>2</sup> 40.44	930.00	70.00

<sup>1</sup> Rate applied to adjusted basis of the account (without reduction by salvage) at the time as of which the change is made to the straight line method.

<sup>2</sup> The allowable depreciation is limited by estimated salvage.

§ 1.167(a)-11

26 CFR Ch. I (4-1-06 Edition)

Example (2). The facts are the same as in example (1) except that A elects to use the modified half-year convention described in

subparagraph (2)(ii) of this paragraph. The depreciation allowances would be as follows:

Year	Unadjusted basis	Rate	Depreciation	Reserve	Adjusted basis
1971	\$1,000	<sup>1</sup> 0.36363	\$327.27	\$327.27	\$672.73
1972	1,000	.36363	244.63	571.90	428.10
1973	1,000	.36363	155.67	727.57	272.43
1974	1,000	.33333	90.81	818.38	181.62
1975	1,000	.33333	90.81	909.19	90.81
1976	1,000	.33333	<sup>2</sup> 20.81	930.00	70.00

<sup>1</sup> Rate applied to \$900, the amount of assets placed in service during the first half of the taxable year.  
<sup>2</sup> The allowable depreciation is limited by estimated salvage.

Example (3). The facts are the same as in example (1) except that A adopted the sum of the years-digits method of depreciation and

does not change to the straight line method of depreciation. The depreciation allowances would be as follows:

Year	Unadjusted basis	Rate	Depreciation	Reserve	Adjusted basis
1971	\$1,000	<sup>1</sup> 2.75/18	\$152.78	\$152.78	\$847.22
1972	1,000	5/18	277.78	430.56	569.44
1973	1,000	4/18	222.22	652.78	347.22
1974	1,000	3/18	166.67	819.45	180.55
1975	1,000	2/18	<sup>2</sup> 110.55	930.00	70.00
1976	1,000	1/18	0.00	930.00	70.00
1977	1,000	0.25/18	0.00	930.00	70.00

<sup>1</sup> Rate is equal to one-half of 5.5/18. The denominator is equal to 5.5+4.5+3.5+2.5+1.5+0.5.  
<sup>2</sup> The allowable depreciation is limited by estimated salvage.

Example (4). The facts are the same as in example (3) except that A elects to use the modified half-year convention described in

subparagraph (2) (ii) of this paragraph. The depreciation allowances would be as follows:

Year	Unadjusted basis	Rate	Depreciation	Reserve	Adjusted basis
1971	\$1,000	<sup>1</sup> 5.5/18	\$275.00	\$275.00	\$725.00
1972	1,000	5/18	277.78	552.78	447.22
1973	1,000	4/18	222.22	775.00	225.00
1974	1,000	3/18	<sup>2</sup> 155.00	930.00	70.00
1975	1,000	2/18	0.00	930.00	70.00
1976	1,000	1/18	0.00	930.00	70.00
1977	1,000	0.25/18	0.00	930.00	70.00

<sup>1</sup> Rate applied to \$900, the amount of assets placed in service during the first half of the taxable year.  
<sup>2</sup> The allowable depreciation is limited by estimated salvage.

Example (5). The facts are the same as in example (2) except that after 2 years A changes from the 200-percent declining bal-

ance method to the sum of the years-digits method of depreciation. The depreciation allowances would be as follows:

Year	Unadjusted basis	Rate	Depreciation	Reserve	Adjusted basis
1971	\$1,000	0.36363	\$327.27	\$327.27	\$672.73
1972	1,000	.36363	244.63	571.90	428.10
1973	1,000	4/10	171.24	743.14	256.86
1974	1,000	3/10	128.43	871.57	128.43
1975	1,000	2/10	<sup>1</sup> 58.43	930.00	70.00
1976	1,000	1/10	0.00	930.00	70.00

<sup>1</sup> The allowable depreciation is limited by estimated salvage.

(iv) *Limitation on methods.* (a) The same method of depreciation must be adopted for all property in a single vintage account. Generally, the method of depreciation which may be adopted is subject to the limitations contained in section 167 (c), (j) and (l).

(b) Except as otherwise provided in section 167(j) with respect to certain eligible section 1250 property—

(1) In the case of a vintage account for which the taxpayer has selected an asset depreciation period of 3 years or more and which only contains property the original use of which commences with the taxpayer, any method of depreciation described in section 167(b) (1), (2), or (3) may be adopted, but if the vintage account contains property the original use of which does not commence with the taxpayer, or if the asset depreciation period for the account is less than 3 years, a method of depreciation described in section 167(b) (2) or (3) may not be adopted for the account, and

(2) The declining balance method using a rate not in excess of 150 percent of the straight line rate based upon the asset depreciation period for the vintage account may be adopted for the account even if the original use of the property does not commence with the taxpayer provided the asset depreciation period for the account is at least 3 years.

(c) The term “original use” means the first use to which the property is put, whether or not such use corresponds to the use of such property by the taxpayer. (See §1.167(c)-1).

(v) *Unadjusted and adjusted basis.* (a) For purposes of this section, the unadjusted basis of an asset (including an “excluded addition” and a “property improvement” as described, respectively, in paragraph (d)(2) (vi) and (vii) of this section) is its cost or other basis without any adjustment for depreciation or amortization (other than depreciation under section 179) but with other adjustments required under section 1016 or other applicable provisions of law. The unadjusted basis of a vintage account is the total of the unadjusted bases of all the assets in the account. The unadjusted basis of a “special basis vintage account” as described in paragraph (d)(3)(vi) of this

section is the amount of the property improvement determined in paragraph (d)(2)(vii)(a) of this section.

(b) The adjusted basis of a vintage account is the amount by which the unadjusted basis of the account exceeds the reserve for depreciation for the account. The adjusted basis of an asset in a vintage account is the amount by which the unadjusted basis of the asset exceeds the amount of depreciation allowable for the asset under this section computed by using the method of depreciation and the rate applicable to the account. For purposes of this subdivision, the depreciation allowable for an asset shall include, to the extent identifiable, the amount of proceeds previously added to the depreciation reserve in accordance with paragraph (d)(3)(iii) of this section upon the retirement of any portion of such asset. (See paragraph (d)(3)(vi) of this section for election under certain circumstances to allocate adjusted basis of an amount of property improvement determined under paragraph (d)(2)(vii)(a) of this section.)

(2) *Conventions applied to additions and retirements—*(i) *In general.* The allowance for depreciation of a vintage account (whether an item account or a multiple asset account) shall be determined by applying one of the conventions described in subdivisions (ii) and (iii) of this subparagraph. (For the manner of applying a convention in the case of taxable years beginning before and ending after December 31, 1970, see subparagraph (3) of this paragraph.) The same convention must be adopted for all vintage accounts of a taxable year, but the same convention need not be adopted for the vintage accounts of another taxable year. An election to apply this section must specify the convention adopted. (See paragraph (f) of this section for information required in making the election.) The convention adopted by the taxpayer is a method of accounting for purposes of section 446, but the consent of the Commissioner will be deemed granted to make an annual adoption of either of the conventions described in subdivisions (ii) and (iii) of this subparagraph.

(ii) *Modified half-year convention.* The depreciation allowance for a vintage account for which the taxpayer adopts

the “modified half-year convention” shall be determined by treating: (a) All property in such account which is placed in service during the first half of the taxable year as placed in service on the first day of the taxable year; and (b) all property in such account which is placed in service during the second half of the taxable year as placed in service on the first day of the succeeding taxable year. The depreciation allowance for a vintage account for a taxable year in which there is an extraordinary retirement (as defined in paragraph (d) (3) (ii) of this section) of property first placed in service during the first half of the taxable year is determined by treating all such retirements from such account during the first half of the taxable year as occurring on the first day of the taxable year and all such retirements from such account during the second half of the taxable year as occurring on the first day of the second half of the taxable year. The depreciation allowance for a vintage account for a taxable year in which there is an extraordinary retirement (as defined in paragraph (d)(3)(ii) of this section) of property first placed in service during the second half of the taxable year is determined by treating all such retirements from such account during the first half of the taxable year as occurring on the first day of the second half of the taxable year and all such retirements in the second half of the taxable year as occurring on the first day of the succeeding taxable year.

(iii) *Half-year convention.* The depreciation allowance for a vintage account for which the taxpayer adopts the “half-year convention” shall be determined by treating all property in the account as placed in service on the first day of the second half of the taxable year and by treating all extraordinary retirements (as defined in paragraph (d)(3)(ii) of this section) from the account as occurring on the first day of the second half of the taxable year.

(iv) *Rules of application.* (a) The first-year convention adopted for a vintage account must be consistently applied to all additions to and all extraordinary retirements from such account. See paragraph (d)(3) (ii) and (iii) of this

section for definition and treatment of ordinary retirements.

(b) If the actual number of months in a taxable year is other than 12 full calendar months, depreciation is allowed only for such actual number of months and the term “taxable year”, for purposes of this subparagraph, shall mean only such number of months. In such event, the first half of such taxable year shall be deemed to expire at the close of the last day of a calendar month which is the closest such last day to the middle of such taxable year and the second half of such taxable year shall be deemed to begin the day after the expiration of the first half of such taxable year. If a taxable year consists of a period which includes only 1 calendar month, the first half of the taxable year shall be deemed to expire on the first day which is nearest to the midpoint of the month, and the second half of the taxable year shall begin the day after the expiration of the first half of the month.

(c) For purposes of this subparagraph, for property placed in service after November 14, 1979, other than depreciable property described in paragraph (c)(2)(iv)(e) of this section, the taxable year of the person placing such property in service does not include any month before the month in which the person begins engaging in a trade or business or holding depreciable property for the production of income.

(d) For purposes of paragraph (c)(2) (iv)(c) of this section—

(1) For property placed in service after February 21, 1981, an employee is not considered engaged in a trade or business by virtue of employment.

(2) If a person engages in a small amount of trade or business activity after February 21, 1981, for the purpose of obtaining a disproportionately large depreciation deduction for assets for the taxable year in which they are placed in service, and placing those assets in service represents a substantial increase in the person’s level of business activity, then for purposes of depreciating those assets the person will not be treated as beginning a trade or business until the increased amount of business activity begins. For property held for the production of income, the

principle of the preceding sentence applies.

(3) A person may elect to apply the rules of § 1.167(a)-11 (c)(2)(iv)(d) as set forth in T.D. 7763 (“(d) rules in T.D. 7763”). This election shall be made by reflecting it under paragraph (f)(4) of this section in the books and records. If necessary, amended returns shall be filed.

(4) If an averaging convention was adopted in reliance on or in anticipation of the (d) rules in T.D. 7763, that convention may be changed without regard to paragraph (f)(3) of this section. Similarly, if an election is made under paragraph (c)(2)(iv)(d)(3) of this section to apply to the (d) rules in T.D. 7763, the averaging convention adopted for the taxable years for which the election is made may be changed. The change shall be made by filing a timely amended return for the taxable year for which the convention was adopted. Notwithstanding the three preceding sentences, if an averaging convention was adopted in reliance on or in anticipation of the (d) rules in T.D. 7763, and if an election is made to apply those rules, the averaging convention adopted cannot be changed except as provided in paragraph (f) of this section.

(e) The rules in paragraph (c)(2)(iv)(c) of this section do not apply to depreciable property placed in service after November 14, 1979, and the rules in paragraph (c)(2)(iv)(d) of this section do not apply to depreciable property placed in service after February 21, 1981, with respect to which substantial expenditures were paid or incurred prior to November 15, 1979. For purposes of the preceding sentence, expenditures will not be considered substantial unless they exceed the lesser of 30 percent of the final cost of the property or \$10 million. Expenditures that are not includible in the basis of the depreciable property will be considered expenditures with respect to property if they are directly related to a specific project involving such property. For purposes of determining whether expenditures were paid or incurred prior to November 15, 1979, expenditures made by a person (transferor) other than the person placing the property in service (transferee) will be taken into account only if the basis

of the property in the hands of the transferee is determined in whole or in part by reference to the basis in the hands of the transferor. The principle of the preceding sentence also applies if there are multiple transfers.

(v) *Mass assets.* In the case of mass assets, if extraordinary retirements of such assets in a guideline class during the first half of the taxable year are allocated to a particular vintage year for which the taxpayer applied the modified half-year convention, then that portion of the mass assets so allocated which bears the same ratio to the total number of mass assets so allocated as the mass assets in the same vintage and assets guideline class placed in service during the first half of that vintage year bear to the total mass assets in the same vintage and asset guideline class shall be treated as retired on the first day of the taxable year. The remaining mass assets which are subject to extraordinary retirement during the first half of the taxable year and which are allocated to that vintage year and assets guideline class shall be treated as retired on the first days of the second half of the taxable year. If extraordinary retirements of mass assets in a guideline class occur in the second half of the taxable year and are allocated to a particular vintage year for which the taxpayer applied the modified half-year convention, then that portion of the mass assets so allocated which bears the same ratio to the total number of mass assets so allocated as the mass assets in the same vintage and asset guideline class first placed in service during the first half of that vintage year bear to the total mass assets in the same vintage and asset guideline class shall be treated as retired on the first day of the second half of the taxable year. The remaining mass assets which are subject to extraordinary retirements during the second half of the taxable year and which are allocated to that same vintage and asset guideline class shall be treated as retired on the first day of the succeeding taxable year. If the taxpayer has applied the half-year convention for the vintage year to which the extraordinary retirements are allocated, the mass assets shall be treated as retired on the first

§ 1.167(a)-11

26 CFR Ch. I (4-1-06 Edition)

day of the second half of the taxable year.

(3) *Taxable years beginning before and ending after December 31, 1970.* In the case of a taxable year which begins before January 1, 1971, and ends after December 31, 1970, property first placed in service after December 31, 1970, but treated as first placed in service before January 1, 1971, by application of a convention described in subparagraph (2) of this paragraph shall be treated as provided in this subparagraph. The depreciation allowed (or allowable) for the taxable year shall consist of the depreciation allowed (or allowable) for the period before January 1, 1971, determined without regard to this section plus the amount allowable for the period after December 31, 1970, determined under this section. However, neither the modified half-year convention described in subparagraph (2)(ii) of this paragraph, nor the half-year convention described in subparagraph (2)(iii) of this paragraph may for any such taxable year be applied with respect to property placed in service after December 31, 1970, to allow depreciation for any period prior to January 1, 1971, unless such convention is consistent with the convention applied by the taxpayer with respect to property placed in service in such taxable year prior to January 1, 1971.

(4) *Examples.* The principles of this paragraph may be illustrated by the following examples:

*Example (1).* Taxpayer A, a calendar year taxpayer, places new property in service in a trade or business as follows:

Asset	Placed in service	Unadjusted basis
W .....	Apr. 1, 1971 .....	\$5,000
X .....	June 30, 1971 .....	8,000
Y .....	July 15, 1971 .....	12,000

Taxpayer A adopts the modified half-year convention described in subparagraph (2) (ii) of this paragraph. Assets W, X, and Y are placed in a multiple asset account for which the asset depreciation range is 8 to 12 years. A selects 8 years, the minimum asset depreciation period with respect to such assets, and adopts the declining balance method of depreciation using a rate twice the straight line rate (computed without reduction for salvage). The annual rate under this method using a period of 8 years is 25 percent. The depreciation allowance for assets W and X

for 1971 is \$3,250, a full year's depreciation under the modified half-year convention (that is, basis of \$13,000 (unreduced by salvage) multiplied by 25 percent). The depreciation allowance for asset Y for 1971 is zero under the modified half-year convention.

*Example (2).* The facts are the same as in example (1), except that the taxpayer adopts the half-year convention described in subparagraph (2) (iii) of this paragraph. The depreciation allowance with respect to asset Y is \$1,500 (that is the basis of \$12,000 multiplied by 25 percent, then multiplied by 1/2). Assets W and X are also entitled to a depreciation allowance for only a half year. Thus, the depreciation allowance for assets W and X for 1971 is \$1,625 (that is, 1/2 of the \$3,250 allowance computed in example (1)).

*Example (3).* Asset Z is placed in service by a calendar year taxpayer on December 1, 1971. The taxpayer places asset Z in an item account and adopts the sum of the years-digits method and the half year convention described in subparagraph (2) (iii) of this paragraph. The asset depreciation range for such asset is 4 to 6 years and the taxpayer selects an asset depreciation period of 5 years. The depreciation allowance for asset Z in 1971 is \$10,000 (that is, basis of \$60,000 (unreduced by salvage) multiplied by 3/15, the appropriate fraction using the sum of the years-digits method then multiplied by 1/2, since only one half year's depreciation is allowable under the convention).

*Example (4).* A is a calendar year taxpayer. All taxpayer A's assets are placed in service in the first half of 1971. If the taxpayer selects the modified half-year convention described in subparagraph (2) (ii) of this paragraph, a full year's depreciation is allowable for all assets.

*Example (5).* (i) The taxpayer during his taxable year which begins April 1, 1970, and ends March 31, 1971, places new property in service in a trade or business as follows:

Asset	Placed in service	Unadjusted basis
A .....	Apr. 30, 1970 .....	\$10,000
B .....	Dec. 15, 1970 .....	10,000
C .....	Jan. 1, 1971 .....	10,000

The taxpayer adopted a convention under § 1.167(a)-10(b) with respect to assets placed in service prior to January 1, 1971, which treats assets placed in service during the first half of the year as placed in service on the first day of such year and assets placed in service in the second half of the year as placed in service on the first day of the following year. If the taxpayer selects the half-year convention described in subparagraph (2) (iii) of this paragraph, one year's depreciation is allowable on asset A determined without regard to this section. No depreciation is allowable for asset B. No depreciation is allowable for asset C for the period prior

to January 1, 1971. One-fourth year's depreciation is allowable on asset C determined under this section.

(ii) The facts are the same as in (i) of this example except that the taxpayer adopts the modified half-year convention described in subparagraph (2) (ii) of this paragraph for 1971. No depreciation is allowable for assets B and C which were placed in service in the second half of the taxable year.

*Example (6).* The taxpayer during his taxable year which begins August 1, 1970, and ends July 31, 1971, places new property in service in a trade or business as follows:

Asset	Placed in service
A .....	Aug. 1, 1970.
B .....	Jan. 15, 1971.
C .....	June 30, 1971.

The taxpayer adopted a convention under § 1.167(a)-10(b) with respect to assets placed in service prior to January 1, 1971, which treats all assets as placed in service at the mid-point of the taxable year. If the taxpayer selects the half-year convention described in subparagraph (2) (iii) of this paragraph, one-half year's depreciation is allowable for asset A determined without regard to this section. One-half year's depreciation is allowable for assets B and C determined under this section.

*Example (7).* X, a calendar year corporation, is incorporated on July 1, 1978, and begins engaging in a trade or business in September 1979. X purchases asset A and places it in service on November 20, 1979. Substantial expenditures were not paid or incurred by X with respect to asset A prior to November 15, 1979. For purposes of applying the conventions under this section to determine depreciation for asset A, the 1979 taxable year is treated as consisting of 4 months. The first half of the taxable year ends on October 31, 1979, and the second half begins on November 1, 1979. X adopts the half-year convention. Asset A is treated as placed in service on November 1, 1979.

*Example (8).* On January 20, 1982, A, B, and C enter an agreement to form partnership P for the purpose of purchasing and leasing a ship to a third party, Z. P uses the calendar year as its taxable year. On December 15, 1982, P acquires the ship and leases it to Z. For purposes of applying the conventions, P begins its leasing business in December 1982, and its taxable year begins on December 1, 1982. Assuming that P elects to apply this section and adopts the modified half-year convention, P depreciates the ship placed in service in 1982 for the 1-month period beginning December 1, 1982, and ending December 31, 1982.

*Example (9).* A and B form partnership P on December 15, 1981, to conduct a business of leasing small aircraft. P uses the calendar

year as its taxable year. On January 15, 1982, P acquires and places in service a \$25,000 aircraft. P begins engaging in business with only one aircraft for the purpose of obtaining a disproportionately large depreciation deduction for aircraft that P plans to acquire at the end of the year. On December 10, 1982, P acquires and places in service 4 aircraft, the total purchase price of which is \$250,000. For purposes of applying the conventions to the aircraft acquired in December, P begins its leasing business in December 1982, and P's taxable year begins December 1, 1982, and ends December 31, 1982. Assuming that P elects to apply this section and adopts the modified half-year convention, P depreciates the aircraft placed in service in December 1982, for the 1-month period beginning December 1, 1982, and ending December 31, 1982. P depreciates the aircraft placed in service in January 1982, for the 12-month period beginning January 1, 1982, and ending December 31, 1982.

(d) *Special rules for salvage, repairs and retirements—(1) Salvage value—(i) Definition of gross salvage value.* "Gross salvage" value is the amount which is estimated will be realized upon a sale or other disposition of the property in the vintage account when it is no longer useful in the taxpayer's trade or business or in the production of his income and is to be retired from service, without reduction for the cost of removal, dismantling, demolition or similar operations. If a taxpayer customarily sells or otherwise disposes of property at a time when such property is still in good operating condition, the gross salvage value of such property is the amount expected to be realized upon such sale or disposition, and under certain circumstances, as where such property is customarily sold at a time when it is still relatively new, the gross salvage value may constitute a relatively large proportion of the unadjusted basis of such property.

(ii) *Definition of salvage value.* "Salvage value" means gross salvage value less the amount, if any, by which the gross salvage value is reduced by application of section 167(f). Generally, as provided in section 167(f), a taxpayer may reduce the amount of gross salvage value of a vintage account by an amount which does not exceed 10 percent of the unadjusted basis of the personal property (as defined in section 167(f)(2)) in the account. See paragraph (b)(3)(ii) of this section for requirement

of separate vintage accounts for personal property described in section 167(f)(2).

(iii) *Estimation of salvage value.* The salvage value of each vintage account of the taxable year shall be estimated by the taxpayer at the time the election to apply this section is made, upon the basis of all the facts and circumstances existing at the close of the taxable year in which the account is established. The taxpayer shall specify the amount, if any, by which gross salvage value taken into account is reduced by application of section 167(f). See paragraph (f)(2) of this section for requirement that the election specify the estimated salvage value for each vintage account of the taxable year of election. The salvage value estimated by the taxpayer will not be redetermined merely as a result of fluctuations in price levels or as a result of other facts and circumstances occurring after the close of the taxable year of election. Salvage value for a vintage account need not be established or increased as a result of a property improvement as described in subparagraph (2) (vii) of this paragraph. The taxpayer shall maintain records reasonably sufficient to determine facts and circumstances taken into account in estimating salvage value.

(iv) *Salvage as limitation on depreciation.* In no case may a vintage account be depreciated below a reasonable salvage value after taking into account any reduction in gross salvage value permitted by section 167(f).

(v) *Limitation on adjustment of reasonable salvage value.* The salvage value established by the taxpayer for a vintage account will not be redetermined if it is reasonable. Since the determination of salvage value is a matter of estimation, minimal adjustments will not be made. The salvage value established by the taxpayer will be deemed to be reasonable unless there is sufficient basis in the facts and circumstances existing at the close of the taxable year in which the account is established for a determination of an amount of salvage value for the account which exceeds the salvage value established by the taxpayer for the account by an amount greater than 10 percent of the unadjusted basis of the

account at the close of the taxable year in which the account is established. If the salvage value established by the taxpayer for the account is not within the 10 percent range, or if the taxpayer follows the practice of understating his estimates of gross salvage value to take advantage of this subdivision, and if there is a determination of an amount of salvage value for the account which exceeds the salvage value established by the taxpayer for the account, an adjustment will be made by increasing the salvage value established by the taxpayer for the account by an amount equal to the difference between the salvage value as determined and the salvage value established by the taxpayer for the account. For the purposes of this subdivision, a determination of salvage value shall include all determinations at all levels of audit and appellate proceedings, and as well as all final determinations within the meaning of section 1313(a) (1). This subdivision shall apply to each such determination. (See example (3) of subdivision (vi) of this subparagraph.)

(vi) *Examples.* The principles of this subparagraph may be illustrated by the following examples in which it is assumed that the taxpayer has not followed a practice of understating his estimates of gross salvage value:

*Example (1).* Taxpayer B elects to apply this section to assets Y and Z, which are placed in a multiple asset vintage account of 1971 for which the taxpayer selects an asset depreciation period of 8 years. The unadjusted basis of asset Y is \$50,000 and the unadjusted basis of asset Z is \$30,000. B estimates a gross salvage value of \$55,000. The property qualifies under section 167(f) (2) and B reduces the amount of salvage taken into account by \$8,000 (that is, 10 percent of \$80,000 under section 167(f)). Thus, B establishes a salvage value of \$47,000 for the account. Assume that there is not sufficient basis for determining a salvage value for the account greater than \$52,000 (that is, \$60,000 minus the \$8,000 reduction under section 167(f)). Since the salvage value of \$47,000 established by B for the account is within the 10 percent range, it is reasonable. Salvage value for the account will not be redetermined.

*Example (2).* The facts are the same as in example (1) except that B estimates a gross salvage value of \$50,000 and establishes a salvage value of \$42,000 for the account (that is,

\$50,000 minus the \$8,000 reduction under section 167(f)). There is sufficient basis for determining an amount of salvage value greater than \$50,000 (that is, \$58,000 minus the \$8,000 reduction under section 167(f)). The salvage value of \$42,000 established by B for the account can be redetermined without regard to the limitation in subdivision (v) of this subparagraph, since it is not within the 10 percent range. Upon audit of B's tax return for a taxable year for which the redetermination would affect the amount of depreciation allowable for the account, salvage value is determined to be \$52,000 after taking into account the reduction under section 167(f). Salvage value for the account will be adjusted to \$52,000.

*Example (3).* The facts are the same as in example (1) except that upon audit of B's tax return for a taxable year the examining officer determines the salvage value to be \$58,000 (that is, \$66,000 minus the \$8,000 reduction under section 167(f)), and proposes to adjust salvage value for the vintage account to \$58,000 which will result in disallowing an amount of depreciation for the taxable year. B does not agree with the finding of the examining officer. After receipt of a "30-day letter", B waives a district conference and initiates proceedings before the Appellate Division. In consideration of the case by the Appellate Division it is concluded that there is not sufficient basis for determining an amount of salvage value for the account in excess of \$55,000 (that is \$63,000 minus the \$8,000 reduction under section 167(f)). Since the salvage of \$47,000 established by B for the account is within the 10 percent range, it is reasonable. Salvage value for the account will not be redetermined.

*Example (4).* Taxpayer C elects to apply this section to factory building X which is placed in an item vintage account of 1971. The unadjusted basis of factory building X is \$90,000. C estimates a gross salvage value for the account of \$10,000. The property does not qualify under section 167(f)(2). C establishes a salvage value of \$10,000 for the account. Assume that there is not sufficient basis for determining a salvage value for the account greater than \$18,000. Since the salvage value of \$10,000 established by B for the account is within the 10 percent range, it is reasonable. Salvage value for the account will not be redetermined.

(2) *Treatment of repairs*—(i) *In general.* (a) Sections 162, 212, and 263 provide general rules for the treatment of certain expenditures for the repair, maintenance, rehabilitation or improvement of property. In general, under those sections, expenditures which substantially prolong the life of an asset, or are made to increase its value or adapt it to a different use are capital

expenditures. If an expenditure is treated as a capital expenditure under section 162, 212, or 263, it is subject to the allowance for depreciation. On the other hand, in general, expenditures which do not substantially prolong the life of an asset or materially increase its value or adapt it for a substantially different use may be deducted as an expense in the taxable year in which paid or incurred. Expenditures, or a series of expenditures, may have characteristics both of deductible expenses and capital expenditures. Other expenditures may have the characteristics of capital expenditures, as in the case of an "excluded addition" (as defined in subdivision (vi) of this subparagraph). This subparagraph provides a simplified procedure for determining whether expenditures with respect to certain property are to be treated as deductible expenses or capital expenditures.

(b) [Reserved]

(ii) *Election of repair allowance.* In the case of an asset guideline class which consists of "repair allowance property" as defined in subdivision (iii) of this subparagraph, subject to the provisions of subdivision (v) of this subparagraph, the taxpayer may elect to apply the asset guideline class repair allowance described in subdivision (iii) of this subparagraph for any taxable year ending after December 31, 1970, for which the taxpayer elects to apply this section.

(iii) *Repair allowance for an asset guideline class.* For a taxable year for which the taxpayer elects to apply this section, the "repair allowance" for an asset guideline class which consists of "repair allowance property" is an amount equal to—

(a) The average of (1) the unadjusted basis of all "repair allowance property" in the asset guideline class at the beginning of the taxable year, less in the case of such property in a vintage account the unadjusted basis of all such property retired in an ordinary retirement (as described in subparagraph (3)(ii) of this paragraph) in prior taxable years, and (2) the unadjusted basis of all "repair allowance property" in the asset guideline class at the end of the taxable year, less in the case of such property in a vintage account the unadjusted basis of all such property

retired in an ordinary retirement (including ordinary retirements during the taxable year), multiplied by—

(b) The repair allowance percentage in effect for the asset guideline class for the taxable year.

In applying the assets guideline class repair allowance to buildings which are section 1250 property, for the purpose of this subparagraph each building shall be treated as in a separate asset guideline class. If two or more buildings are in the same asset guideline class determined without regard to the preceding sentence and are operated as an integrated unit (as evidenced by their actual operation, management, financing and accounting), they shall be treated as a single building for this purpose. The “repair allowance percentages” in effect for taxable years ending before the effective date of the first supplemental repair allowance percentages established pursuant to this section are set forth in Revenue Procedure 72-10. Repair allowance percentages will from time to time be established, supplemented and revised with express reference to this section. These repair allowance percentages will be published in the Internal Revenue Bulletin. The repair allowance percentages in effect on the last day of the taxable year shall apply for the taxable year, except that the repair allowance percentage for a particular taxable year shall not be less than the repair allowance percentage in effect on the first day of such taxable year (or as of such later time in such year as a repair allowance percentage first established during such year becomes effective). Generally, the repair allowance percentages for a taxable year shall not be changed to reflect any supplement or revision of the repair allowance percentages after the end of such taxable year. However, if expressly provided in such a supplement or revision of the repair allowance percentages, the taxpayer may, at his option in the manner specified therein, apply the revised or supplemented repair allowance percentages for such taxable year and succeeding taxable years. For the purposes of this section, “repair allowance property” means eligible property determined without regard to paragraph (b)(2)(ii) of this section (that is, with-

out regard to whether such property was first placed in service by the taxpayer before or after December 31, 1970) in an asset guideline class for which a repair allowance percentage is in effect for the taxable year. The determination whether property is repair allowance property shall be made without regard to whether such property is excluded, under paragraph (b)(5) of this section, from an election to apply this section. Property in an asset guideline class for which the taxpayer elects to apply the asset guideline class repair allowance described in this subdivision, which results from expenditures in the taxable year of election for the repair, maintenance, rehabilitation, or improvement of property in an asset guideline class shall not be “repair allowance property” for such taxable year but shall be for each succeeding taxable year provided such property is a property improvement as described in subdivision (vii) (a) of this subparagraph and is in an asset guideline class for which a repair allowance percentage is in effect for such succeeding taxable year.

(iv) *Application of asset guideline class repair allowance.* In accordance with the principles of sections 162, 212, and 263, if the taxpayer pays or incurs any expenditures during the taxable year for the repair, maintenance, rehabilitation or improvement of eligible property (determined without regard to paragraph (b)(2)(ii) of this section), the taxpayer must either—

(a) If such property is repair allowance property and if the taxpayer elects to apply the repair allowance for the asset guideline class, treat an amount of all such expenditures in such taxable year with respect to all such property in the asset guideline class which does not exceed in total the repair allowance for that asset guideline class as deductible repairs, and treat the excess of all such expenditures with respect to all such property in the asset guideline class in the manner described for a property improvement in subdivision (viii) of this subparagraph, or

(b) If such property is not repair allowance property or if the taxpayer does not elect to apply the repair allowance for the asset guideline class,

treat each of such expenditures in such taxable year with respect to all such property in the asset guideline class as either a capital expenditure or as a deductible repair in accordance with the principles of sections 162, 212, and 263 (without regard to (a) of this subdivision), and treat the expenditures which are required to be capitalized under sections 162, 212, and 263 (without regard to (a) of this subdivision) in the manner described for a property improvement in subdivision (viii) of this subparagraph.

For the purposes of (a) of this subdivision, expenditures for the repair, maintenance, rehabilitation or improvement of property do not include expenditures for an excluded addition or for which a deduction is allowed under section 167(k). (See subdivision (viii) of this subparagraph for treatment of an excluded addition.) The taxpayer shall elect each taxable year whether to apply the repair allowance and treat expenditures under (a) of this subdivision, or to treat expenditures under (b) of this subdivision. The treatment of expenditures under this subdivision for a taxable year for all asset guideline classes shall be specified in the books and records of the taxpayer for the taxable year. The taxpayer may treat expenditures under (a) of this subdivision with respect to property in one asset guideline class and treat expenditures under (b) of this subdivision with respect to property in some other asset guideline class. In addition, the taxpayer may treat expenditures with respect to property in an asset guideline class under (a) of this subdivision in one taxable year, and treat expenditures with respect to property in that asset guideline class under (b) of this subdivision in another taxable year.

(v) *Special rules for repair allowance.*

(a) The asset guideline class repair allowance described in subdivision (iii) of this subparagraph shall apply only to expenditures for the repair, maintenance, rehabilitation or improvement of repair allowance property (as described in subdivision (iii) of this subparagraph). The taxpayer may apply the asset guideline class repair allowance for the taxable year only if he maintains books and records reasonably sufficient to determine:

(1) The amount of expenditures paid or incurred during the taxable year for the repair, maintenance, rehabilitation or improvement of repair allowance property in the asset guideline class, and

(2) The expenditures (and the amount thereof) with respect to such property which are for excluded additions (such as whether the expenditure is for an additional identifiable unit of property, or substantially increases the productivity or capacity of an existing identifiable unit of property or adapts it for a substantially different use).

In general, such books and records shall be sufficient to identify the amount and nature of expenditures with respect to specific items of repair allowance property or groups of similar properties in the same asset guideline class. However, in the case of such expenditures with respect to property, part of which is in one asset guideline class and part in another, or part of which is repair allowance property and part of which is not, and in comparable circumstances involving property in the same asset guideline class, to the extent books and records are not maintained identifying such expenditures with specific items of property or groups of similar properties and it is not practicable to do so, the total amount of such expenditures which is not specifically identified may be allocated by any reasonable method consistently applied. In any case, the cost of repair, maintenance, rehabilitation or improvement of property performed by production personnel may be allocated by any reasonable method consistently applied and if performed incidental to production and not substantial in amount, no allocation to repair, maintenance, rehabilitation or improvement need be made. The types of expenditures for which specific identification would ordinarily be made include: Substantial expenditures such as for major parts or major structural materials for which a work order is or would customarily be written; expenditures for work performed by an outside contractor; or expenditures under a specific down time program. Types of expenditures for which specific identification would ordinarily be impractical include: General maintenance

costs of machinery, equipment, and plant in the case of a taxpayer having assets in more than one class (or different types of assets in the same class) which are located together and generally maintained by the same work crew; small supplies which are used with respect to various classes or types of property; labor costs of personnel who work on property in different classes, or different types of property in the same class, if the work is performed on a routine, as needed, basis and the only identification of the property repaired is by the personnel. Factors which will be taken into account in determining the reasonableness of the taxpayer's allocation of expenditures include prior experience of the taxpayer; relative bases of the assets in the guideline class; types of assets involved; and relationship to specifically identified expenditures.

(b) If for the taxable year the taxpayer elects to deduct under section 263(e) expenditures with respect to repair allowance property consisting of railroad rolling stock (other than a locomotive) in a particular asset guideline class, the taxpayer may not, for such taxable year, use the asset guideline class repair allowance described in subdivision (iii) of this subparagraph for any property in such asset guideline class.

(c)(1) If the taxpayer repairs, rehabilitates or improves property for sale or resale to customers, the asset guideline class repair allowance described in subdivision (iii) of this subparagraph shall not apply to expenditures for the repair, maintenance, rehabilitation or improvement of such property, or (2) if a taxpayer follows the practice of acquiring for his own use property (in need of repair, rehabilitation or improvement to be suitable for the use intended by the taxpayer) and of making expenditures to repair, rehabilitate or improve such property in order to take advantage of this subparagraph, the asset guideline class repair allowance described in subdivision (iii) of this subparagraph shall not apply to such expenditures. In either event, such property shall not be "repair allowance property" as described in subdivision (iii) of this subparagraph.

(vi) *Definition of excluded addition.* The term "excluded addition" means—

(a) An expenditure which substantially increases the productivity of an existing identifiable unit of property over its productivity when first acquired by the taxpayer;

(b) An expenditure which substantially increases the capacity of an existing identifiable unit of property over its capacity when first acquired by the taxpayer;

(c) An expenditure which modifies an existing identifiable unit of property for a substantially different use;

(d) An expenditure for an identifiable unit of property if (1) such expenditure is for an additional identifiable unit of property or (2) such expenditure (other than an expenditure described in (e) of this subdivision) is for replacement of an identifiable unit of property which was retired;

(e) An expenditure for replacement of a part in or a component or portion of an existing identifiable unit of property (whether or not such part, component or portion is also an identifiable unit of property) if such part, component or portion is for replacement of a part, component or portion which was retired in a retirement upon which gain or loss is recognized (or would be recognized but for a special non-recognition provision of the Code or § 1.1502-13).

(f) In the case of a building or other structure (in addition to (b), (c), (d), and (e) of this subdivision which also apply to such property), an expenditure for additional cubic or linear space; and

(g) In the case of those units of property of pipelines, electric utilities, telephone companies, and telegraph companies consisting of lines, cables and poles (in addition to (a) through (e) of this subdivision which also apply to such property), an expenditure for replacement of a material portion of the unit of property.

Except as provided in (d) and (e) of this subdivision, notwithstanding any other provision of this subdivision, the term "excluded addition" does not include any expenditure in connection with the repair, maintenance, rehabilitation or improvement of an identifiable unit of property which does not exceed \$100.

For this purpose all related expenditures with respect to the unit of property shall be treated as a single expenditure. For the purposes of (a), and (b) of this subdivision, an increase in productivity or capacity is substantial only if the increase is more than 25 percent. An expenditure which merely extends the productive life of an identifiable unit of property is not an increase in productivity within the meaning of (a) of this subdivision. Under (g) of this subdivision a replacement is material only if the portion replaced exceeds 5 percent of the unit of property with respect to which the replacement is made. For the purposes of this subdivision, a unit of property generally consists of each operating unit (that is, each separate machine or piece of equipment) which performs a discrete function and which the taxpayer customarily acquires for original installation and retires as a unit. The taxpayer's accounting classification of units of property will generally be accepted for purposes of this subdivision provided the classifications are reasonably consistent with the preceding sentence and are consistently applied. In the case of a building the unit of property generally consists of the building as well as its structural components; except that each building service system (such as an elevator, an escalator, the electrical system, or the heating and cooling system) is an identifiable unit for the purpose of (a), (b), (c), and (d) of this subdivision. However, both in the case of machinery and equipment and in the case of a building, for the purpose of applying (d)(1) of this subdivision a unit of property may consist of a part in or a component or portion of a larger unit of property. In the case of property described in (g) of this subdivision (such as a pipeline), a unit of property generally consists of each segment which performs a discrete function either as to capacity, service, transmission or distribution between identifiable points. Thus, for example, under this subdivision in the case of a vintage account of five automobiles each automobile is an identifiable unit of property (which is not merely a part in or a component or portion of larger unit of property within the meaning of (e) of this subdivision). Accordingly,

the replacement of one of the automobiles (which is retired) with another automobile is an excluded addition under (d)(2) of this subdivision. Also the purchase of a sixth automobile is an expenditure for an additional identifiable unit of property and is an excluded addition under (d)(1) of this subdivision. An automobile air conditioner is also an identifiable unit of property for the purposes of (d)(1) of this subdivision, but not for the purposes of (d)(2) of this subdivision. Accordingly, the addition of an air conditioner to an automobile is an excluded addition under (d)(1) of this subdivision, but the replacement of an existing air conditioner in an automobile is not an excluded addition under (d)(2) of this subdivision (since it is merely the replacement of a part in an existing identifiable unit of property). The replacement of the air conditioner may, however, be an excluded addition under (e) of this subdivision, if the air conditioner replaced was retired in a retirement upon which gain or loss was recognized. The principles of this subdivision may be further illustrated by the following examples in which it is assumed (unless otherwise stated) that (e) of this subdivision does not apply:

*Example (1).* For the taxable year, B pays or incurs only the following expenditures: (1) \$5,000 for general maintenance of repair allowance property (as described in subdivision (iii) of this subparagraph) such as inspection, oiling, machine adjustments, cleaning, and painting; (2) \$175 for replacement of bearings and gears in an existing lathe; (3) \$125 for replacement of an electric starter (of the same capacity) and certain electrical wiring in an automatic drill press; (4) \$300 for modification of a metal fabricating machine (including replacement of certain parts) which substantially increases its capacity; (5) \$175 for repair of the same metal fabricating machine which does not substantially increase its capacity; (6) \$800 for the replacement of an existing lathe with a new lathe; and (7) \$65 for the repair of a drill press. Expenditures (1) through (3) are expenditures for the repair, maintenance, rehabilitation or improvement of property to which B can elect to apply the asset guideline class repair allowance described in subdivision (iii) of this subparagraph. Expenditure (4) is an excluded addition under (b) of this subdivision. Expenditure (5) is not an excluded addition. Expenditure (6) is an excluded addition under (d)(2) of this subdivision. Without regard to

(a), (b), and (c) of this subdivision, expenditure (7) is not an excluded addition since the expenditure does not exceed \$100.

*Example (2).* Corporation M operates a steel plant which produces rails, blooms, billets, special bar sections, reinforcing bars, and large diameter line pipe. During the taxable year, corporation M: (1) relines an openhearth furnace; (2) places in service 20 new ingot molds; (3) replaces one reversing roll in the blooming mill; (4) overhauls the rail and billet mill with no increase in capacity; (5) replaces a roll stand in the 20-inch bar mill; and (6) overhauls the 11-inch bar mill and reducing stands increasing billet speed from 1,800 feet per minute to 2,300 feet per minute. Assume that each expenditure exceeds \$100. Expenditure (1) is not an excluded addition. Expenditure (2) is an excluded addition under (d)(1) of this subdivision. Expenditure (3) is not an excluded addition since the expenditure for the reversing roll merely replaces a part in an existing identifiable unit of property. Expenditure (4) is not an excluded addition. Expenditure (5) is an excluded addition under (d)(2) of this subdivision since the roll stand is not merely a part of an existing identifiable unit of property. Expenditure (6) is an excluded addition under (a) of this subdivision since it increases the billet speed by more than 25 percent.

*Example (3).* For the taxable year, corporation X pays or incurs the following expenditures: (1) \$1,000 for two new temporary partition walls in the company's offices; (2) \$1,400 for repainting the exterior of a terminal building; (3) \$300 for repair of the roof of a warehouse; (4) \$150 for replacement of two window frames and panes in the warehouse; and (5) \$100 for plumbing repair. Expenditure (1) is an excluded addition under (d)(1) of this subdivision. None of the other expenditures are excluded additions.

*Example (4).* For the taxable year, corporation Y pays or incurs the following expenditures: (1) \$10,000 for expansion of a loading dock from 600 square feet to 750 square feet; (2) \$600 for replacement of two roof girders in a factory building; and (3) \$9,500 for replacement of columns and girders supporting the floor of a second story loft storage area within the factory building in order to permit storage of supplies with a gross weight 50 percent greater than the previous capacity of the loft. Expenditure (1) is an excluded addition under (f) of this subdivision. Expenditure (2) is not an excluded addition. Expenditure (3) is an excluded addition under (b) of this subdivision.

*Example (5).* Corporation A has an office building with an unadjusted basis of \$10 million. The building has 10 elevators, five of which are manually operated and five of which are automatic. During 1971, corporation A:

(1) Replaces the five manually operated elevators with highspeed automatic elevators at a cost of \$400,000;

(2) Replaces the cable in one of the existing automatic elevators at a cost of \$1,700. The replacements of the elevators are excluded additions under (d)(2) of this subdivision. The replacement of the cable is not an excluded addition.

*Example (6).* Taxpayer W, a cement manufacturer, engages in the following modification and maintenance activities during the taxable year: (1) Replaces eccentric-bearing, spindle, and wearing surface in a gyratory crusher; (2) places in service a new apron feeder and hammer mill; (3) replaces four buckets on a chain bucket elevator; (4) relines refractory surface in the burning zone of a rotary kiln; (5) installs additional new dust collectors; and (6) Replaces two 16-inch × 90-foot belts on his conveyer system. Assume that there is no increase in productivity or capacity and that each expenditure exceeds \$100. Expenditure (1) is not an excluded addition. Expenditure (2) an excluded addition under (d)(1) of this subdivision. Expenditures (3) and (4) are not excluded additions. Expenditures (5) is an excluded addition under (d)(1) of this subdivision. Expenditure (6) is not an excluded addition.

*Example (7).* Corporation X, a gas pipeline company, has, in addition to others, the following units of property: (1) A gathering pipeline for a field consisting of 25 gas wells; (2) the main transmission line between compressor stations (that is, in the case of a 500-mile main transmission line with a compressor station every 100 miles, each one hundred miles section between compressor stations is a separate unit of property); (3) a lateral transmission line from the main transmission line to a city border station; (4) a medium pressure distribution line to the northern portion of the city; and (5) a low pressure distribution line serving a group of approximately 200 residential customers off the medium pressure distribution line. In 1971, corporation X pays or incurs the following expenditures in connection with the repair, maintenance, rehabilitation or improvement of repair allowance property: (1) replaces a meter on a gas well; (2) in connection with the repair and rehabilitation of a unit of property consisting of a 2-mile gathering pipeline, replaces a 3,000-foot section of the gathering line; (3) in connection with the repair of leaks in a unit of property consisting of a 100-mile gas transmission line (that is, the 100 miles between compressor stations), replaces a 2,000-foot section of pipeline at one point; and (4) at another point replaces a 7-mile section of the same 100-mile gas transmission line. Assume that none of these expenditures substantially increases capacity and that each expenditure exceeds \$100. Expenditure (1) is an excluded

addition under (d) of this subdivision. Expenditure (2) is an excluded addition under (g) of this subdivision since the portion replaced is more than 5 percent of the unit of property. Expenditure (3) is not an excluded addition. Expenditure (4) is an excluded addition under (g) of this subdivision.

*Example (8).* Taxpayer Y, an electric utility company, has in addition to others, the following units of property: (1) A high voltage transmission circuit from the switching station (at the generating station) to the transmission station; (2) a series of 100 poles (fully dressed) supporting the circuit in (1); (3) a high voltage circuit from the transmission station to the distribution substation; (4) a high voltage distribution circuit (either radial or looped) from the distribution substation; (5) a transformer on a distribution pole; (6) a circuit breaker on a distribution pole; and (7) all 220 (and lower) volt circuit (including customer service connections) off the distribution circuit in (4). In 1971, taxpayer Y pays or incurs the following expenditures for the repair, maintenance, rehabilitation or improvement of repair allowance property: (1) Replaces 25 adjacent poles in a unit of property consisting of the 300 poles supporting a radial distribution circuit from a distribution substation; (2) replaces a transformer on one of the poles in (1); (3) replaces a cross-arm on one of the poles in (1); (4) replaces a 200-foot section of a 2-mile radial distribution circuit serving 100 residential customers; and (5) replaces a 2,000-foot section on a 10-mile high voltage circuit from a transmission station to a distribution substation which was destroyed by a casualty which taxpayer Y treated as an extraordinary retirement under paragraph (d)(3)(ii) of this section. Expenditure (1) is an excluded addition under (g) of this subdivision. Expenditure (2) is an excluded addition under (d)(2) of this subdivision. Expenditures (3) and (4) are not excluded additions. Expenditure (5) is an excluded addition under (e) of this subdivision.

*Example (9).* Corporation Z, a telephone company, has in addition to others, the following units of property: (1) A buried feeder cable 3 miles in length off a local switching station; (2) a buried subfeeder cable 1 mile in length off the feeder cable in (1); (3) all the distribution cable (and customer service drops) off the subfeeder cable in (2); (4) the 300 poles (fully dressed) supporting the distribution cable in (3); (5) a 10-mile local trunk cable which interconnects two local tandem switching stations; (6) a toll connecting trunk cable from a local tandem switching station to a long distance tandem switching station; (7) a toll trunk cable 50 miles in length from the access point at one city to the access point at another city. In 1971, corporation Z pays or incurs the following expenditures in connection with the repair, maintenance, rehabilitation or im-

provement of repair allowance property: (1) replaces 100 feet of distribution cable in a unit of property consisting of 8 miles of local distribution cable (plus customer service drops); (2) replaces an amplifier in the distribution system; and (3) replaces 10 miles of a unit of property consisting of a toll trunk cable 50 miles in length. Expenditure (1) is not an excluded addition. Expenditure (2) is an excluded addition under (d)(2) of this subdivision. Expenditure (3) is an excluded addition under (g) of this subdivision.

(vii) *Definition of property improvement.* The term "property improvement" means—

(a) If the taxpayer treats expenditures for the asset guideline class under subdivision (iv) (a) of this subparagraph, the amount of all expenditures paid or incurred during the taxable year for the repair, maintenance, rehabilitation or improvement of repair allowance property in the asset guideline class, which exceeds the asset guideline class repair allowance for the taxable year; and

(b) If the taxpayer treats expenditures for the asset guideline class under subdivision (iv) (b) of this subparagraph, the amount of each expenditure paid or incurred during the taxable year for the repair, maintenance, rehabilitation or improvement of property which is treated under sections 162, 212, and 263 as a capital expenditure.

The term "property improvement" does not include any expenditure for an excluded addition.

(viii) *Treatment of property improvements and excluded additions.* If for the taxable year there is a property improvement as described in subdivision (vii) of this subparagraph or an excluded addition as described in subdivision (vi) of this subparagraph, the following rules shall apply—

(a) The total amount of any property improvement for the asset guideline class determined under subdivision (vii)(a) of this subparagraph shall be capitalized in a single "special basis vintage account" of the taxable year in accordance with the taxpayer's election to apply this section for the taxable year (applied without regard to paragraph (b)(5)(v)(a) of this section). See subparagraph (3)(vi) of this paragraph for definition and treatment of a "special basis vintage account".

(b) Each property improvement determined under subdivision (vii)(b) of this subparagraph, if it is eligible property, shall be capitalized in a vintage account of the taxable year in accordance with the taxpayer's election to apply this section for the taxable year (applied without regard to paragraph (b)(5)(v)(a) of this section).

(c) Each excluded addition, if it is eligible property, shall be capitalized in a vintage account of the taxable year in accordance with the taxpayer's election to apply this section for the taxable year.

For rule as to date on which a property improvement or an excluded addition is first placed in service, see paragraph (e)(1) (iii) and (iv) of this section.

(ix) *Examples.* The principles of this subparagraph may be illustrated by the following examples:

*Example (1).* For the taxable year 1972, B elects to apply this section. B has repair allowance property (as described in subdivision (iii) of this subparagraph) in asset guideline class 20.2 under Revenue Procedure 72-10 with an average unadjusted basis determined as provided in subdivision (iii) (a) of this subparagraph of \$100,000 and repair allowance property in asset guideline class 24.4 with an average unadjusted basis of \$300,000. The repair allowance percentage for asset guideline class 20.2 is 4.5 percent and for asset guideline class 24.4 is 6.5 percent. The two asset guideline class repair allowances for 1972 are \$4,500 and \$19,500, respectively, determined as follows:

Asset Guideline Class 20.2	
\$100,000 average unadjusted basis multiplied by 4.5 percent .....	\$4,500
Asset Guideline Class 24.4	
\$300,000 average unadjusted basis multiplied by 6.5 percent .....	\$19,500

*Example (2).* The facts are the same as in example (1). During the taxable year 1972, B pays or incurs the following expenditures for the repair, maintenance, rehabilitation or improvement of repair allowance property in asset guideline class 20.2

General maintenance (including primarily labor costs) .....	\$3,000
Replacement of parts in several machines (including labor costs of \$1,650) .....	4,000
	7,000

In addition, in connection with the rehabilitation and improvement of two other machines B pays or incurs \$6,000 (including labor costs of \$2,000) which is treated as an excluded addition because the capacity of the machines was substantially increased.

For 1972, B elects to apply this section and to apply the asset guideline class repair allowance to asset guideline class 20.2. Since the asset guideline class repair allowance is \$4,500, B can deduct \$4,500 in accordance with subdivision (iv) (a) of this subparagraph. B must capitalize \$2,500 in a special basis vintage account in accordance with subdivisions (vii) (a) and (viii) (a) of this subparagraph. Since the excluded addition is a capital item and is eligible property, B must also capitalize \$6,000 in a vintage account in accordance with subdivision (viii) (c) of this subparagraph. B selects from the asset depreciation range an asset depreciation period of 17 years for the special basis vintage account. B includes the excluded addition in a vintage account of 1972 for which he also selects an asset depreciation period of 17 years.

(3) *Treatment of retirements*—(i) *In general.* The rules of this subparagraph specify the treatment of all retirements from vintage accounts. The rules of § 1.167(a)-8 shall not apply to any retirement from a vintage account. An asset in a vintage account is retired when such asset is permanently withdrawn from use in a trade or business or in the production of income by the taxpayer. A retirement may occur as a result of a sale or exchange, by other act of the taxpayer amounting to a permanent disposition of an asset, or by physical abandonment of an asset. A retirement may also occur by transfer of an asset to supplies or scrap.

(ii) *Definitions of ordinary and extraordinary retirements.* The term “ordinary retirement” means any retirement of section 1245 property from a vintage account which is not treated as an “extraordinary retirement” under this subparagraph. The retirement of an asset from a vintage account in a taxable year is an “extraordinary retirement” if—

(a) The asset is section 1250 property;

(b) The asset is section 1245 property which is retired as the direct result of fire, storm, shipwreck, or other casualty and the taxpayer, at his option consistently applied (taking into account type, frequency, and the size of such casualties) treats such retirements as extraordinary; or

(c)(I) The asset is section 1245 property which is retired (other than by transfer to supplies or scrap) in a taxable year as the direct result of a cessation, termination, curtailment, or

disposition of a business, manufacturing, or other income producing process, operation, facility or unit, and (2) the unadjusted basis (determined without regard to subdivision (vi) of this subparagraph) of all such assets so retired in such taxable year from such account as a direct result of the event described in (c)(1) of this subdivision exceeds 20 percent of the unadjusted basis of such account immediately prior to such event.

For the purposes of (c) of this subdivision, all accounts (other than a special basis vintage account as described in subdivision (vi) of this subparagraph) containing section 1245 property of the same vintage in the same asset guideline class, and from which a retirement as a direct result of such event occurs within the taxable year, shall be treated as a single vintage account. See subdivision (xi) of this subparagraph for special rule for item accounts. The principles of this subdivision may be illustrated by the following examples:

*Example (1).* Taxpayer A is a processor and distributor of dairy products. Part of taxpayer A's operation is a bottle washing facility consisting of machines X, Y, and Z, each of which is in an item vintage account of 1971. Each item vintage account has an unadjusted basis of \$1,000. Taxpayer A also has a 1971 multiple asset vintage account consisting of machines E, S, and C. Machines E and S, used in processing butter, each has an unadjusted basis of \$10,000. Machine C used in capping bottles has an unadjusted basis of \$1,000. In 1975, taxpayer A changes to the use of paper milk cartons and disposes of all bottle washing machines (X, Y, and Z) as well as machine C which was used in capping bottles. The sales of machine C, X, Y, and Z are the direct result of the termination of a manufacturing process. However, since the total unadjusted basis of the eligible section 1245 property retired as a direct result of such event is only \$4,000 (which is less than 20 percent of the total unadjusted basis of machines E, S, C, X, Y, and Z, \$24,000) the sales are ordinary retirements. All the assets are in the same asset guideline class and are of the same vintage. Accordingly, machines E, S, C, X, Y, and Z are for this purpose treated as being in a single vintage account.

*Example (2).* The facts are the same as in example (1) except that in 1976, taxpayer A sells six of his 12 milk delivery trucks as a direct result of eliminating home deliveries to customers in the suburbs. Deliveries within the city require only six trucks. Each of the trucks has an unadjusted basis of \$3,000. Six of the taxpayer's delivery trucks are in a

multiple asset vintage account of 1974 and six are in a multiple asset vintage account of 1972. Neither account contains any other property. Four trucks are retired from the 1972 vintage account and two trucks are retired from the 1974 vintage account. The sales result from the curtailment of taxpayer A's home delivery operation. The unadjusted basis of the four trucks retired from the 1972 vintage exceeds 20 percent of the total unadjusted basis of the affected account. The same is true for the two trucks retired from the 1974 vintage account. The sales of the trucks are extraordinary retirements.

(d) The asset is section 1245 property which is retired after December 30, 1980 by a charitable contribution for which a deduction is allowable under section 170.

(iii) *Treatment of ordinary retirements.* No loss shall be recognized upon an ordinary retirement. Gain shall be recognized only to the extent specified in this subparagraph. All proceeds from ordinary retirements shall be added to the depreciation reserve of the vintage account from which the retirement occurs. See subdivision (vi) of this subparagraph for optional allocation of basis in the case of a special basis vintage account. See subdivision (ix) of this subparagraph for recognition of gain when the depreciation reserve exceeds the unadjusted basis of the vintage account. The amount of salvage value for a vintage account shall be reduced (but not below zero) as of the beginning of the taxable year by the excess of (a) the depreciation reserve for the account, after adjustment for depreciation allowable for such taxable year and all other adjustments prescribed by this section (other than the adjustment prescribed by subdivision (ix) of this subparagraph), over (b) the unadjusted basis of the account less the amount of salvage value for the account before such reduction. Thus, in the case of a vintage account with an unadjusted basis of \$1,000 and a salvage value of \$100, to the extent that proceeds from ordinary retirements increase the depreciation reserve above \$900, the salvage value is reduced. If the proceeds increase the depreciation reserve for the account to \$1,000, the salvage value is reduced to zero. The unadjusted basis of the asset retired in an ordinary retirement is not removed from the account and the depreciation

reserve for the account is not reduced by the depreciation allowable for the retired asset. The previously unrecovered basis of the retired asset will be recovered through the allowance for depreciation with respect to the vintage account. See subdivision (v)(a) of this subparagraph for treatment of retirements on which gain or loss is not recognized in whole or in part. See subdivision (v)(b) of this subparagraph for treatment of retirements by disposition to a member of an affiliated group as defined in section 1504(a). See subdivision (v)(c) of this subparagraph for treatment of transfers between members of an affiliated group of corporations or other related parties as extraordinary retirements.

(iv) *Treatment of extraordinary retirements.* (a) Unless the transaction is governed by a special nonrecognition section of the Code such as 1031 or 337 or is one to which subdivision (v)(b) of this subparagraph applies, gain or loss shall be recognized upon an extraordinary retirement in the taxable year in which such retirement occurs subject to section 1231, section 165, and all other applicable provisions of law such as sections 1245 and 1250. If the asset which is retired in an extraordinary retirement is the only or last asset in the account, the account shall terminate and no longer be an account to which this section applies. In all other cases, the unadjusted basis of the retired asset shall be removed from the unadjusted basis of the vintage account, and the depreciation reserve established for the account shall be reduced by the depreciation allowable for the retired asset computed in the manner prescribed in paragraph (c) (1)(v)(b) of this section for determination of the adjusted basis of the asset. See subdivision (ix) of this subparagraph for recognition of gain in the case of an account containing section 1245 property when the depreciation reserve exceeds the unadjusted basis of the vintage account. See subdivision (iii) of this subparagraph for reduction of salvage value for such an account when the depreciation reserve exceeds the unadjusted basis of the account minus salvage value. See subdivision (v)(b) of this subparagraph for treatment of retirements by disposition to a member

of an affiliated group as defined in section 1504(a).

(b) The principles of this subdivision may be illustrated by the following examples:

*Example (1).* Corporation X has a multiple asset vintage account of 1971 consisting of assets K, R, A, and P all of which are section 1245 property. The unadjusted basis of the account is \$40,000. The unadjusted basis of asset A is \$10,000. When the reserve for depreciation for the account is \$20,000, asset A is sold in an extraordinary retirement for \$8,000 in cash. The \$10,000 unadjusted basis of asset A is removed from the account and the \$5,000 depreciation allowable for asset A is removed from the reserve for depreciation. Gain in the amount of \$3,000 (to which section 1245 applies) is recognized upon the sale of asset A.

*Example (2).* Corporation X has an item vintage account of 1972 consisting of residential apartment unit A. Unit A is section 1250 property. It is residential rental property and meets the requirements of section 167(j)(2). Corporation X adopts the declining balance method of depreciation using a rate twice the straight line rate. The asset depreciation period is 40 years. Unit A has an unadjusted basis of \$200,000. On June 30, 1974, when the reserve for depreciation for the account is \$19,500, unit A is sold for \$220,000. Since unit A is section 1250 property, the sale is an extraordinary retirement in accordance with subdivision (ii)(a) of this subparagraph (without regard to subdivision (ii)(b) or (c) of this subparagraph). The adjusted basis of unit A is \$180,500. Gain in the amount of \$39,500 is recognized. The "additional depreciation" (as defined in section 1250(b)) for unit A is \$9,500. Accordingly, \$9,500 is in accordance with section 1250 treated as gain from the sale or exchange of an asset which is neither a capital asset nor property described in section 1231. The \$30,000 balance of the gain from the sale of unit A may be gain to which section 1231 applies.

(v) *Special rule for certain retirements.* (a) In the case of an ordinary retirement on which gain or loss is in whole or in part not recognized because of a special nonrecognition section of the Code, such as 1031 or 337, no part of the proceeds from such retirement shall be added to the depreciation reserve of the vintage account in accordance with subdivision (iii) of this subparagraph. Instead, such retirement shall for all purposes of this section be treated as an extraordinary retirement.

(b) The provisions of § 1.1502-13 shall apply to a retirement. In the case of an

ordinary retirement to which the provisions of § 1.1502-13 apply, no part of the proceeds from such retirement shall be added to the depreciation reserve of the vintage account in accordance with subdivision (iii) of this subparagraph. Instead, such retirement shall for all purposes of this section be treated as an extraordinary retirement.

(c) In a case in which property is transferred, in a transaction which would without regard to this subdivision be treated as an ordinary retirement, during the taxable year in which first placed in service to a person who bears a relationship described in section 179(d)(2) (A) or (B), such transfer shall for all purposes of this section be treated as an extraordinary retirement.

(d)(1) If, in the case of mass assets, it is impracticable for the taxpayer to maintain records from which he can establish the vintage of such assets as retirements occur, and if he adopts other reasonable recordkeeping practices, then the vintage of mass asset retirements may be determined by use of an appropriate mortality dispersion table. Such a mortality dispersion table may be based upon an acceptable sampling of the taxpayer's actual experience or other acceptable statistical or engineering techniques. Alternatively, the taxpayer may use a standard mortality dispersion table prescribed by the Commissioner for this purpose. If the taxpayer uses such standard mortality dispersion table for any taxable year of election, it must be used for all subsequent taxable years of election unless the taxpayer obtains the consent of the Commissioner to change to another dispersion table or to actual identification of retirements. For information requirements regarding mass assets, see paragraph (f)(5) of this section.

(2) For purposes of this section, the term "mass assets" has the same meaning as when used in paragraph (e)(4) of § 1.47-1.

(e) The principles of this subdivision may be illustrated by the following examples:

*Example (1).* Corporation X has a vintage account of 1971 consisting of machines A, B, and C, each with an unadjusted basis of \$1,000. The unadjusted basis of the account is

\$3,000 and at the end of 1977 the reserve for depreciation is \$2,100. On January 1, 1978, machine A is transferred to corporation Y solely for stock in the amount of \$1,400 in a transaction to which section 351 applies. Since the adjusted basis of machine A is \$300, a gain of \$1,100 is realized, but no gain is recognized under section 351. Even though machine A was transferred in an ordinary retirement in accordance with (a) of this subdivision the rules for an extraordinary retirement are applied. The proceeds are not added to the reserve for depreciation for the account. Machine A is removed from the account, the unadjusted basis of the account is reduced by \$1,000, and the reserve for depreciation for the account is reduced by \$700.

*Example (2).* The facts are the same as in example (1) except that the consideration received for machine A is stock of corporation Y in the amount of \$1,200 and cash in the amount of \$200. The result is the same as in example (1) except that gain is recognized in the amount of \$200 all of which is gain to which section 1245 applies.

*Example (3).* The facts are the same as in example (1) except that machine A is sold for \$1,400 cash in an ordinary retirement and corporation X and corporation Y are includible corporations in an affiliated group as defined in section 1504(a) which files a consolidated return for 1978. Accordingly, (b) of this subdivision applies. The retirement is treated as an extraordinary retirement. Machine A is removed from the account, the unadjusted basis of the account is reduced by \$1,000, and the reserve for depreciation for the account is reduced by \$700. The gain of \$1,100 is deferred gain to which § 1.1502-13 applies.

(vi) *Treatment of special basis vintage accounts.* A "special basis vintage account" is a vintage account for an amount of property improvement determined under subparagraph (2) (vii)(a) of this paragraph. In general, reference in this section to a "vintage account" shall include a special basis vintage account. The unadjusted basis of a special basis vintage account shall be recovered through the allowance for depreciation in accordance with this section over the asset depreciation period for the account. Except as provided in this subdivision, the unadjusted basis, adjusted basis and reserve for depreciation of such account shall not be allocated to any specific asset in the asset guideline class, and the provisions of this subparagraph shall not apply to such account. However, in the event of a sale, exchange or other disposition of "repair allowance

§ 1.167(a)-11

26 CFR Ch. I (4-1-06 Edition)

property” (as described in subparagraph (2)(iii) of this paragraph) in an extraordinary retirement as described in subdivision (ii) of this subparagraph (or if the asset is not in a vintage account, in an abnormal retirement as described in §1.167(a)-8), the taxpayer may, if consistently applied to all such retirements in the taxable year and adequately identified in the taxpayer’s books and records, elect to allocate the adjusted basis (as of the end of the taxable year) of all special basis vintage accounts for the asset guideline class to each such retired asset in the proportion that the adjusted basis of the retired asset (as of the beginning of the taxable year) bears to the adjusted basis of all repair allowance property in the asset guideline class at the beginning of the taxable year. The election to allocate basis in accordance with this subdivision shall be made on the tax return filed for the taxable year. The principles of this subdivision may be illustrated by the following example:

*Example.* In addition to other property, the taxpayer has machines A, B, and C all in the same asset guideline class and each with an adjusted basis on January 1, 1977, of \$10,000. The adjusted basis on January 1, 1977, of all repair allowance property (as described in subparagraph (2)(iii) of this paragraph) in the asset guideline class is \$90,000. The machines are sold in an extraordinary retirement in 1977. The taxpayer is entitled to and does elect to allocate basis in accordance with this subdivision. There is also a 1972 special basis vintage account for the asset guideline class, as follows:

	Unadjusted basis	Re-serve for de-precia-tion	Dec. 31, 1977, ad-justed basis
1972 special basis vintage account, for which the taxpayer selected an asset depreciation period of 10 years, adopted the straight line method, and used the half-year convention .....	\$2,000	\$1,100	\$900

By application of this subdivision, the adjusted basis of machines A, B, and C is increased to \$10,100 each (that is,  $\$10,000 + \$90,000 \times \$900 = \$100$ ). The unadjusted basis, reserve for depreciation and adjusted basis of the special basis vintage account are reduced, respectively, by one-third (that is,

$\$300 + \$900 = \frac{1}{3}$ ) in order to reflect the allocation of basis from the special basis vintage account.

(vii) *Reduction in the salvage value of a vintage account.* (a) A taxpayer may apply this section without reducing the salvage value for a vintage account in accordance with this subdivision or in accordance with subdivision (viii) of this subparagraph (relating to transfers to supplies or scrap). See subdivision (iii) of this subparagraph for reduction of salvage value in certain circumstances in the amount of proceeds from ordinary retirements.

(b) However, the taxpayer may, at his option, follow the consistent practice of reducing, as retirements occur, the salvage value for a vintage account by the amount of salvage value attributable to the retired asset, or the taxpayer may consistently follow the practice of so reducing the salvage value for a vintage account as extraordinary retirements occur while not reducing the salvage value for the account as ordinary retirements occur. If the taxpayer does not reduce the salvage value for a vintage account as ordinary retirements occur, the taxpayer may be entitled to a deduction in the taxable year in which the last asset is retired from the account in accordance with subdivision (ix) (b) of this subparagraph.

(c) For purposes of this subdivision, the portion of the salvage value for a vintage account attributable to a retired asset may be determined by multiplying the salvage value for the account by a fraction, the numerator of which is the unadjusted basis of the retired asset and the denominator of which is the unadjusted basis of the account, or any other method consistently applied which reasonably reflects that portion of the salvage value for the account originally attributable to the retired asset.

(d) In the case of ordinary retirements the taxpayer may—

(I) In the case of retirements (other than by transfer to supplies or scrap) follow the consistent practice of reducing the salvage value for the account by the amount of salvage value attributable to the retired asset and not adding the same amount to the depreciation reserve for the account, and

(2) In the case of retirements by transfer to supplies or scrap, follow the consistent practice of reducing the salvage value for the account by the amount of salvage value attributable to the retired asset and not adding the same amount to the depreciation reserve for the account (in which case the basis in the supplies or scrap account of the retired asset will be zero) or follow the consistent practice of reducing the salvage value for the account by the amount of salvage value attributable to the retired asset and adding the same amount to the depreciation reserve for the account (up to an amount which does not increase the depreciation reserve to an amount in excess of the unadjusted basis of the account) in which case the basis in the supplies or scrap account of the retired asset will be the amount added to the depreciation reserve for the account.

Thus, for example, in the case of an ordinary retirement by transfer of an asset to supplies or scrap, the basis of the asset in the supplies or scrap account would either be zero or the amount added to the depreciation reserve of the vintage account from which the retirement occurred. When the depreciation reserve for the account equals the unadjusted basis of the account no further adjustment to salvage value for the account will be made. See subdivision (viii) of this subparagraph for special optional rule for reduction of salvage value in the case of an ordinary retirement by transfer of an asset to supplies or scrap.

(e) In the event of a removal of property from a vintage account in accordance with paragraph (b)(4)(iii)(e), (5)(v)(b) or (6)(iii) of this section the salvage value for the account may be reduced by the amount of salvage value attributable to the asset removed determined as provided in (c) of this subdivision.

(viii) *Special optional adjustments for transfers to supplies or scrap.* If the taxpayer does not follow the consistent practice of reducing, as ordinary retirements occur, the salvage value for a vintage account in accordance with subdivision (vii) of this subparagraph, the taxpayer may (in lieu of the method described in subdivision (vii) (c) and (d) of this subparagraph) follow the

consistent practice of reducing salvage value as ordinary retirements occur by transfer of assets to supplies or scrap and of determining the basis (in the supplies or scrap account) as assets retired in an ordinary retirement by transfer to supplies or scrap, in the following manner—

(a) The taxpayer may determine the value of the asset (not to exceed its unadjusted basis) by any reasonable method consistently applied (such as average cost, conditioned cost, or fair market value) if such method is adequately identified in the taxpayer's books and records.

(b) The value attributable to the asset determined in accordance with (a) of this subdivision shall be subtracted from the salvage value for the account (to the extent thereof) and the greater of (1) the amount subtracted from the salvage value for the vintage account and (2) the value of the asset determined in accordance with (a) of this subdivision, shall be added to the reserve for depreciation of this vintage account.

(c) The amount added to the reserve for depreciation of the vintage account in accordance with (b) of this subdivision shall be treated as the basis of the retired asset in the supplies or scrap account.

If the taxpayer makes the adjustments in accordance with this subdivision, the reserve for depreciation of the vintage account may exceed the unadjusted basis of the account, and in that event gain will be recognized in accordance with subdivision (ix) of this subparagraph.

(ix) *Recognition of gain or loss in certain situations.* (a) In the case of a vintage account for section 1245 property, if at the end of any taxable year after adjustment for depreciation allowable for such taxable year and all other adjustments prescribed by this section, the depreciation reserve established for such account exceeds the unadjusted basis of the account, the entire amount of such excess shall be recognized as gain in such taxable year. Such gain—

(1) Shall constitute gain to which section 1245 applies to the extent that it does not exceed the total amount of

depreciation allowances in the depreciation reserve at the end of such taxable year, reduced by gain recognized pursuant to this subdivision with respect to the account previously treated as gain to which section 1245 applies, and

(2) May constitute gain to which section 1231 applies to the extent that it exceeds such total amount as so reduced.

In such event, the depreciation reserve shall be reduced by the amount of gain recognized, so that after such reduction the amount of the depreciation reserve is equal to the unadjusted basis of the account.

(b) In the case of an account for section 1245 property, if at the time the last asset in the vintage account is retired the unadjusted basis of the account exceeds the depreciation reserve for the account (after all adjustments prescribed by this section), the entire amount of such excess shall be recognized in such taxable year as a loss under section 165 or as a deduction for depreciation under section 167. If the retirement of such asset occurs by sale or exchange on which gain or loss is recognized, the amount of such excess may constitute a loss subject to section 1231. Upon retirement of the last asset in a vintage account, the account shall terminate and no longer be an account to which this section applies. See subdivision (xi) of this subparagraph for treatment of certain multiple asset and item accounts.

(c) The principles of this subdivision may be illustrated by the following example:

*Example.* The taxpayer has a vintage account for section 1245 property with an unadjusted basis of \$1,000 and a depreciation reserve of \$700 (of which \$600 represents depreciation allowances and \$100 represents the proceeds of ordinary retirements from the account). If \$500 is realized during the taxable year from ordinary retirements of assets from the account, the reserve is increased to \$1,200, gain is recognized to the extent of \$200 (the amount by which the depreciation reserve before further adjustment exceeds \$1,000) and the depreciation reserve is then decreased to \$1,000. The \$200 of gain constitutes gain to which section 1245 applies. If the amount realized from ordinary retirements during the year had been \$1,100 instead of \$500, the gain of \$800 would have consisted of \$600 of gain to which section 1245

applies and \$200 of gain to which section 1231 may apply.

(x) *Dismantling cost.* The cost of dismantling, demolishing, or removing an asset in the process of a retirement from the vintage account shall be treated as an expense deductible in the year paid or incurred, and such cost shall not be subtracted from the depreciation reserve for the account.

(xi) *Special rule for treatment of multiple asset and item accounts.* For the purposes of subdivision (ix)(b) of this subparagraph, all accounts (other than a special basis vintage account as described in subdivision (vi) of this subparagraph) of the same vintage in the same asset guideline class for which the taxpayer has selected the same asset depreciation period and adopted the same method of depreciation, and which contain only section 1245 property permitted by paragraph (b)(3)(ii) of this section to be included in the same vintage account, shall be treated as a single multiple asset vintage account.

(4) *Examples.* The principles of this paragraph may be illustrated by the following examples:

*Example (1).* (a) Taxpayer A has a multiple asset vintage account for section 1245 property with an unadjusted basis of \$1,000. All the assets were first placed in service by A on January 15, 1971. This account contains all of A's assets in a single asset guideline class. A elects to apply this section for 1971 and adopts the modified half-year convention. A estimates a salvage value for the account of \$100 and this estimate is determined to be reasonable. (See subparagraph (1)(v) of this paragraph for limitation on adjustment of reasonable salvage value.) A adopts the straight line method of depreciation with respect to the account and selects a 10-year asset depreciation period. A does not follow a practice of reducing the salvage value for the account in the amount of salvage value attributable to each retired asset in accordance with subparagraph (3)(vii) of this paragraph. The depreciation allowance for each of the first 4 years is \$100, that is  $\frac{1}{10}$  multiplied by the unadjusted basis of \$1,000, with reduction for salvage.

(b) In the fifth year of the asset depreciation period, three assets are sold in an ordinary retirement for \$300. Under paragraph (c)(1)(ii) of this section and subparagraph (3)(iii) of this paragraph, the proceeds of the retirement are added to the depreciation reserve as of the beginning of the fifth year. Accordingly, the reserve as of the beginning

of the fifth year is \$700, that is, \$400 of depreciation as of the beginning of the year plus \$300 proceeds from ordinary retirements. The depreciation allowance for the fifth year is \$100, that is  $\frac{1}{10}$  multiplied by the unadjusted basis of \$1,000, without reduction for salvage. Accordingly, the depreciation reserve at the end of the fifth year is \$800.

(c) In the sixth year, asset X is sold in an extraordinary retirement for \$30 and gain or loss is recognized. Under the first-year convention used by the taxpayer, the unadjusted basis of X, \$300, is removed from the unadjusted basis of the vintage account as of the beginning of the sixth year and the depreciation reserve as of the beginning of such year is reduced to \$650 by removing the depreciation applicable to asset X, \$150 (see subparagraph (3)(iv) of this paragraph). Since the depreciation reserve (\$650) exceeds the unadjusted basis of the account (\$700) minus salvage value (\$100) by \$50, under subparagraph (3)(iii) of this paragraph, salvage value is reduced by \$50. No depreciation is allowable for the sixth year.

(d) In the seventh year, an asset is sold in an ordinary retirement for \$110. This would increase the reserve as of the beginning of the seventh year to \$760 and under subparagraph (3)(iii) of this paragraph the salvage value is reduced to zero. Under subparagraph (3)(ix)(a) of this paragraph the depreciation reserve is then decreased to \$700 (the unadjusted basis of the account) and \$60 is reported as gain, without regard to the adjusted basis of the asset. No depreciation is allowable for the seventh year since the depreciation reserve (\$700) equals the unadjusted basis of the account (\$700).

(e)(1) In the eighth year, A elects to apply this section and to treat expenditures during the year for repair, maintenance, rehabilitation or improvement under subparagraph (2)(iii) and (iv)(a) of this paragraph (the "guideline class repair allowance"). This results in the treatment of \$300 as a property improvement for the asset guideline class. (See subparagraph (2)(vii) of this paragraph for definition of a property improvement.) The property improvement is capitalized in a special basis vintage account of the eighth taxable year (see subparagraph (2)(viii)(a) of this paragraph). A selects an asset depreciation period of 10 years and adopts the straight line method for the special basis vintage account. A adopts the modified half-year convention for the eighth year.

(2) In the eighth year, A sells asset Y in an ordinary retirement for \$175. Under paragraph (c)(1)(ii) of this section and subparagraph (3)(iii) of this paragraph, \$175 is added to the depreciation reserve for the account as of the beginning of the taxable year. Since the depreciation reserve for the account (\$875) exceeds the unadjusted basis of the account (\$700) by \$175, that amount of gain is recognized under subparagraph (3)(ix) of this

paragraph. Upon recognition of gain in the amount of \$175, the depreciation reserve for the account is reduced to \$700.

(3) No depreciation is allowable in the eighth year for the vintage account since the depreciation reserve (\$700) equals the unadjusted basis of the account (\$700). The depreciation allowable in the eighth year for the special basis vintage account is \$15, that is, unadjusted basis of \$300, multiplied by  $\frac{1}{10}$ , the asset depreciation period selected for the special basis vintage account, but limited to \$15 under the modified half-year convention. (See paragraph (e)(1)(iv) of this section for treatment of \$150 of the property improvement as first placed in service in the first half of the taxable year and \$150 of the property improvement as first placed in service in the last half of the taxable year.)

*Example (2).* Taxpayer B has a 1971 multiple asset vintage account for section 1245 property with an unadjusted basis of \$100,000. B selects from the asset depreciation range an asset depreciation period of 10 years and adopts the straight line method of depreciation and the modified half-year convention. B establishes a salvage value for the account of \$10,000. All the assets in the account are first placed in service on January 15, 1971. B follows the practice of reducing salvage value for the account as ordinary retirements occur in accordance with subparagraph (3)(vii) of this paragraph, but does not follow the optional practice of determining the basis of assets transferred to supplies or scrap in accordance with subparagraph (3)(vii) of this paragraph. No retirements occur during the first five years. The depreciation reserve at the beginning of the sixth year is \$50,000. In the sixth year an asset with an unadjusted basis of \$20,000 is transferred to supplies in an ordinary retirement. By application of subparagraph (3)(vii) (c) and (d)(2) of this paragraph B determines the reduction in salvage value for the account attributable to such asset to be \$2,000 (that is,  $\$20,000 \div \$100,000 \times \$10,000 = \$2,000$ ).

B reduces the salvage value for the account by \$2,000 and adds 2,000 to the depreciation reserve for the account. The basis of the retired asset in the supplies account is \$2,000. The depreciation allowable for the account for the sixth year is \$10,000. The depreciation reserve for the account at the beginning of the seventh year is \$62,000. At the mid-point of the seventh year all the remaining assets in the account are sold in an ordinary retirement for \$20,000, which is added to the depreciation reserve as of the beginning of the seventh year, thus increasing the reserve to \$82,000. The \$5,000 depreciation allowable for the account for the seventh year (one-half of a full-year's depreciation of \$10,000) increases the depreciation reserve to \$87,000. Under subparagraph (3)(ix)(b) of this paragraph, a

loss of \$13,000 subject to section 1231 is realized in the seventh year (that is, the excess of the unadjusted basis of \$100,000 over the depreciation reserve of \$87,000). No depreciation is allowable for the account after the mid-point of the seventh year since all the assets are retired and the account has terminated.

(e) *Accounting for eligible property*—(1) *Definition of first placed in service*—(i) *In general.* The term “first placed in service” refers to the time the property is first placed in service by the taxpayer, not to the first time the property is placed in service. Property is first placed in service when first placed in a condition or state of readiness and availability for a specifically assigned function, whether in a trade or business, in the production of income, in a tax-exempt activity, or in a personal activity. In general, the provisions of paragraph (d)(1)(ii) and (d)(2) of § 1.46-3 shall apply for the purpose of determining the date on which property is placed in service, but see subdivision (ii) of this subparagraph for special rule for certain replacement parts. In the case of a building which is intended to house machinery and equipment and which is constructed, reconstructed, or erected by or for the taxpayer and for the taxpayer’s use, the building will ordinarily be placed in service on the date such construction, reconstruction, or erection is substantially complete and the building is in a condition or state of readiness and availability. Thus, for example, in the case of a factory building, such readiness and availability shall be determined without regard to whether the machinery or equipment which the building houses, or is intended to house, has been placed in service. However, in an appropriate case, as for example where the building is essentially an item of machinery or equipment, or the use of the building is so closely related to the use of the machinery or equipment that it clearly can be expected to be replaced or retired when the property it initially houses is replaced or retired, the determination of readiness or availability of the building shall be made by taking into account the readiness and availability of such machinery or equipment. The date on which depreciation begins under a convention used by the taxpayer or under a particular method

of depreciation, such as the unit of production method or the retirement method, shall not determine the date on which the property is first placed in service. See paragraph (c)(2) of this section for application of a first-year convention to determine the allowance for depreciation of property in a vintage account.

(ii) *Certain replacement parts.* Property (such as replacement parts) the cost or other basis of which is deducted as a repair expense in accordance with the asset guideline repair allowance described in paragraph (d)(2)(iii) of this section shall not be treated as placed in service.

(iii) *Property improvements and excluded additions.* (a) Except as provided in (b) of this subdivision, a property improvement determined under paragraph (d)(2)(vii)(b) of this section, and an excluded addition (other than an excluded addition referred to in the succeeding sentence) is first placed in service when its cost is paid or incurred. The general rule in subdivision (i) of this subparagraph applies to an excluded addition described in paragraph (d)(2)(vi) (d), (e), (f), or (g) of this section.

(b) If a property improvement or an excluded addition to which the first sentence of (a) of this subdivision applies is paid or incurred in part in one taxable year and in part in the succeeding taxable year (or in part in the first half of a taxable year and in part in the last half of the taxable year) the taxpayer may at his option consistently treat such property improvements and excluded additions under the general rule in subdivision (i) of this subparagraph.

(iv) *Certain property improvements.* In the case of an amount of property improvement determined under paragraph (d)(2)(vii)(a) of this section, one-half of such amount is first placed in service in the first half of the taxable year in which the cost is paid or incurred and one-half is first placed in service in the last half of such taxable year.

(v) *Special rules for clearing accounts.* In the case of public utilities which consistently account for certain property through “clearing accounts,” the date on which such property is first placed in service shall be determined in

accordance with rules to be prescribed by the Commissioner.

(2) *Special rules for transferred property.* If eligible property is first placed in service by the taxpayer during a taxable year of election, and the property is disposed of before the end of the taxable year, the election for such taxable year shall include such property unless such property is excluded in accordance with paragraph (b)(5) (iii), (iv), (v), (vi), or (vii) of this section.

(3) *Special rules in the case of certain transfers—(i) Transaction to which section 381(a) applies.* (a) In general the acquiring corporation in a transaction to which section 381(a) applies is for the purposes of this section treated as if it were the distributor or transferor corporation.

(b) If the distributor or transferor corporation (including any distributor or transferor corporation of any distributor or transferor corporation) has made an election to apply this section to eligible property transferred in a transaction to which section 381(a) applies, the acquiring corporation must segregate such eligible property (to which the distributor or transferor corporation elected to apply this section) into vintage accounts as nearly coextensive as possible with the vintage accounts created by the distributor or transferor corporation identified by reference to the year the property was first placed in service by the distributor or transferor corporation. The asset depreciation period for the vintage account in the hands of the distributor or transferor corporation must be used by the acquiring corporation. The method of depreciation adopted by the distributor or transferor corporation, shall be used by the acquiring corporation unless such corporation obtains the consent of the Commissioner to use another method of depreciation in accordance with paragraph (e) of §1.446-1 or changes the method of depreciation under paragraph (c)(1)(iii) of this section.

(c) The acquiring corporation may apply this section to the property so acquired only if the distributor or transferor corporation elected to apply this section to such property.

(d) See paragraph (b)(7) of this section for special rule for certain prop-

erty where there is a mere change in the form of conducting a trade or business.

(ii) *Partnerships, trusts, estates, donees, and corporations.* Except as provided in subdivision (i) of this subparagraph with respect to transactions to which section 381(a) applies and subdivision (iv) of this subparagraph with respect to certain transfers between members of an affiliated group of corporations or other related parties, if eligible property is placed in service by an individual, trust, estate, partnership or corporation, the election to apply this section shall be made by the individual, trust, estate, partnership or corporation placing such property in service. For example, if a partnership places in service property contributed to the partnership by a partner, the partnership may elect to apply this section to such property. If the partnership does not make the election, this section will not apply to such property. See paragraph (b)(7) of this section for special rule for certain property where there is mere change in the form of conducting a trade or business.

(iii) *Leased property.* The asset depreciation range and the asset depreciation period for eligible property subject to a lease shall be determined without regard to the period for which such property is leased, including any extensions or renewals of such period. See paragraph (b)(5)(v) of this section for exclusion of property amortized under paragraph (b) of §1.162-11 from an election to apply this section. In the case of a lessor of property, unless there is an asset guideline class in effect for lessors of such property, the asset guideline class for such property shall be determined as if the property were owned by the lessee. However, in the case of an asset guideline class based upon the type of property (such as trucks or railroad cars) as distinguished from the activity in which used, the property shall be classified without regard to the activity of the lessee. Notwithstanding the preceding sentence, if a lease with respect to property, which would be includible in an asset guideline class based upon the type of property under the preceding sentence (such as trucks or railroad

cars), is entered into after March 12, 1971, and before April 23, 1973, or a written contract to execute such a lease is entered into during such period and such contract is binding on April 23, 1973, and at all times thereafter, and if the rent or rate of return is based on a classification of such property as if it were owned by the lessee, then such property shall be classified as if it were owned by the lessee. However, the preceding sentence shall not apply if pursuant to the terms or conditions of the lease or binding contract the rent or rate of return may be adjusted to take account of a change in the period for depreciation with respect to the property resulting from inclusion of the property in an asset guideline class based upon the type of property rather than in an asset guideline class based upon the activity of the lessee. Similarly, where the terms of such a lease or contract provide that the obligation of the taxpayer to enter into the lease is subject to a condition that the property be included in an asset guideline class based upon the activity of the lessee, the contract or lease will not be considered as binding upon the taxpayer, for purposes of this subdivision. See paragraph (b)(4)(iii)(b) of this section for general rule for classification of property according to primary use.

(iv) *Treatment of certain transfers between members of affiliated groups or other related persons.* If section 38 property in an asset guideline class (determined without regard to whether the taxpayer elects to apply this section) is transferred by the taxpayer to a person who bears a relationship described in section 179(d)(2) (A) or (B), such property is in the same asset guideline class in the hands of transferee, and the transfer is neither described in section 381(a) nor treated as a disposition or cessation within the meaning of section 47, then the asset guideline period for such property selected by the taxpayer under this section shall not be shorter than the period used for computing the qualified investment with respect to the property under section 46(c). In a case in which the asset depreciation range for the asset guideline class which includes such property does not include the period for depreciation used by the transferor in computing

the qualified investment with respect to such property, the transferee will not be permitted to include such property in an election under this section. However, in such a case, the transferor of the property may recompute the qualified investment for the year the property was placed in service using a period for depreciation which falls within the asset depreciation range.

(f) *Election with respect to eligible property—(1) Time and manner of election—(i) In general.* An election to apply this section to eligible property shall be made with the income tax return filed for the taxable year in which the property is first placed in service (see paragraph (e)(1) of this section) by the taxpayer. In the case of an affiliated group of corporations (as defined in section 1504(a)) which makes a consolidated return with respect to income tax in accordance with section 1502 and the regulations thereunder, each corporation which joins in the making of such return may elect to apply this section for a taxable year. An election to compute the allowance for depreciation under this section is a method of accounting but the consent of the Commissioner will be deemed granted to make an annual election. For election by a partnership see section 703 (b) and paragraph (e)(3)(ii) of this section. If the taxpayer does not file a timely return (taking into account extensions of the time for filing) for the taxable year in which the property is first placed in service, the election shall be filed at the time the taxpayer files his first return for that year. The election may be made with an amended return filed within the time prescribed by law (including extensions) for filing the original return for the taxable year of election. If an election is not made within the time and in the manner prescribed in this paragraph, no election may be made for such taxable year (by the filing of an amended return or in any other manner) with respect to any eligible property placed in service in the taxable year.

(ii) *Other elections under this section.* All other elections under this section may be made only within the time and

in the manner prescribed by subdivision (i) of this subparagraph with respect to an election to apply this section.

(iii) *Effective date.* See paragraph (f)(6) of this section for the effective date of this paragraph.

(2) *Information required.* A taxpayer who elects to apply this section must specify in the election:

(i) That the taxpayer makes such election and consents to and agrees to apply, all the provisions of this section;

(ii) The asset guideline class for each vintage account of the taxable year;

(iii) The first-year convention adopted by the taxpayer for the taxable year of election;

(iv) Whether the special 10 percent used property rule described in paragraph (b)(5)(iii) of this section has been applied to exclude used property from the election;

(v) Whether the taxpayer elects to apply the asset guideline class repair allowance described in paragraph (d)(2)(iii) of this section;

(vi) Whether the taxpayer elects for the taxable year to allocate the adjusted basis of a special basis vintage account in accordance with paragraph (d)(3)(vi) of this section;

(vii) Whether any eligible property for which the taxpayer was not required or permitted to make an election was excluded because of the special rules of paragraph (b)(5)(v) or (6), or paragraph (e)(3)(i) or (iv) of this section;

(viii) Whether any "section 38 property" was excluded under paragraph (b)(5)(iv) of this section from the election to apply this section;

(ix) If the taxpayer is an electric or gas utility, whether the taxpayer elects to apply this section on the basis of a composite asset guideline class in accordance with paragraph (b)(4)(iii)(a) of this section; and

(x) Such other information as may reasonably be required.

The information required under this subparagraph may be provided in accordance with rules prescribed by the Commissioner for reasonable grouping of assets or accounts. Form 4832 is provided for making an election and for submission of the information required. An election may be made and

the information submitted only in accordance with Form 4832. An election to apply this section will not be rendered invalid under this subparagraph so long as there is substantial compliance, in good faith, with the requirements of this subparagraph.

(3) *Irrevocable election.* An election to apply this section to eligible property for any taxable year may not be revoked or changed after the time for filing the election prescribed under subparagraph (1) of this paragraph has expired. No other election under this section may be revoked or changed after such time unless expressly provided for under this section. (See paragraph (b)(5)(v)(b) of this section for special rule.)

(4) *Special conditions to election to apply this section—*(i) *Maintenance of books and records.* The taxpayer may not elect to apply this section for a taxable year unless the taxpayer maintains the books and records required under this section. In addition to any other information required under this section, the taxpayer's books and records must specify—

(a) The asset depreciation period selected by the taxpayer for each vintage account;

(b) If the taxpayer applies the modified half-year convention, the total cost or other basis of all eligible property first placed in service in the first half of the taxable year and the total cost or other basis of all eligible property first placed in service in the last half of the taxable year;

(c) The unadjusted basis and salvage value for each vintage account, and the amount, if any, by which gross salvage value was decreased under section 167(f);

(d) Each asset guideline class for which the taxpayer elects to apply the asset guideline class repair allowance described in paragraph (d)(2)(iii) of this section;

(e) The amount of property improvement, determined under paragraph (d)(2)(vii)(a) of this section, for each asset guideline class for which the taxpayer elects to apply the asset guideline class repair allowance;

(f) A reasonable description of property excluded from an election to apply

§ 1.167(a)-11

26 CFR Ch. I (4-1-06 Edition)

this section and the basis for the exclusion;

(g) The total unadjusted basis of all assets retired during the taxable year from each asset guideline class, and the proceeds realized during the taxable year from such retirements; and

(h) The vintage (that is, the taxable year in which established) of the assets retired during the year from each asset guideline class.

For purposes of paragraph (f)(4)(i) (g) and (h) of this section, all accounts of the same vintage and asset guideline class may be treated as a single account. The taxpayer must specify the information required under paragraph (f)(4)(i) (g) and (h) without regard to the retirement of an asset by transfer to a supplies account for reuse.

(ii) *Response to survey.* Taxpayers who elect to apply this section must respond to infrequent data surveys conducted by the Treasury Department. These periodic surveys, which will be conducted on the basis of scientifically sound sampling methods, are designed to obtain data (including industry asset acquisitions and retirements) used to keep the asset guideline classes and periods up to date.

(iii) *Effect of noncompliance.* An election to apply this section will not be rendered invalid under this subparagraph so long as there is substantial compliance, in good faith, with the requirements of this subparagraph.

(5) *Mass assets.* In the case of mass assets, if the taxpayer assigns retirements to vintage accounts in the manner provided in paragraph (d)(3)(v)(c) of this section, the following information must be supplied with form 4832:

(i) Whether the taxpayer used the standard mortality dispersion curve or a curve based upon his own experience, and

(ii) Such other reasonable information as may be required by the Commissioner.

(6) *Effective date.* The rules in this paragraph apply to elections for taxable years ending on or after December 31, 1978. In the case of an election for a taxable year ending before December 31, 1978, the rules in paragraph (f) of this section, in effect before the amendments made by T.D. 7593 approved January 11, 1979, shall apply.

See 26 CFR § 1.167(a)-11(f) (1977) for paragraph (f) of this section as it appeared before the amendments made by T.D. 7593.

(g) *Relationship to other provisions—(1) Useful life—(i) In general.* Except as provided in subdivision (ii) of this subparagraph, an election to apply this section to eligible property constitutes an agreement under section 167(d) and this section to treat the asset depreciation period for each vintage account as the useful life of the property in such account for all purposes of the Code, including sections 46, 47, 48, 57, 163(d), 167(c), 167(f)(2), 179, 312(m), 514(a), and 4940(c). For example, since section 167(c) requires a useful life of at least 3 years and the asset depreciation period selected is treated as the useful life for purposes of section 167(c), the taxpayer may adopt a method of depreciation described in section 167(b) (2) or (3) for an account only if the asset depreciation period selected for the account is at least 3 years.

(ii) *Special rules.* (a) For the purposes of paragraph (d) of this section, the anticipated period of use (estimated at the close of the taxable year in which the asset is first placed in service) on the basis of which salvage value is estimated, shall be determined without regard to the asset depreciation period for the property.

(b) For the purposes of sections 162 and 263 and the regulations thereunder, whether an expenditure prolongs the life of an asset shall be determined on the basis of the anticipated period of use of the asset (estimated at the close of the taxable year in which the asset is first placed in service) without regard to the asset depreciation period for such asset.

(c) The determination whether a transaction with respect to qualified property constitutes a sale or a lease of such property shall be made without regard to the asset depreciation period for the property.

(d) The principles of this subdivision may be illustrated by the following example:

*Example.* Corporation X has assets in asset guideline class 32.3 which are used in the manufacture of stone and clay products. The asset depreciation range for assets in asset

guideline class 32.3 is from 12 to 18 years. Assume that corporation X selects 14 years as the asset depreciation period for all assets in asset guideline class 32.3. Under paragraph (d)(1)(i) of this section, corporation X must estimate salvage value on the basis of the anticipated period of use of the property (determined as of the close of the taxable year in which the property is first placed in service). The anticipated period of use must also be used for purposes of sections 162 and 263 in determining whether an expenditure materially prolongs the useful life of an asset. The anticipated period of use of an asset is determined without regard to the asset depreciation period of 14 years. Corporation X has, among other assets in the asset guideline class, machines A, B, and C. Corporation X estimates the anticipated period of use of machines A, B, and C as 8 years, 14 years, and 22 years, respectively. These estimates are reasonable and will be used for estimating salvage value and for purposes of sections 162 and 263.

(2) *Section 167(d) agreements.* If the taxpayer has, prior to January 1, 1971, entered into a section 167(d) agreement which applies to any eligible property, the taxpayer will be permitted to withdraw the eligible property from the agreement provided that an election is made to apply this section to such property. The statement of intent to withdraw eligible property from such an agreement must be made in an election filed for the taxable year in which the property is first placed in service. The withdrawal, in accordance with this subparagraph, of any eligible property from a section 167(d) agreement shall not affect any other property covered by such an agreement.

(3) *Relationship to the straight line method—(i) In general.* For purposes of determining the amount of depreciation which would be allowable under the straight line method of depreciation, such amount shall be computed with respect to any property in a vintage account using the straight line method in the manner described in paragraph (c)(1)(i) of this section and a rate based upon the period for the vintage account selected from the asset depreciation range. Thus, for example, section 57(a)(3) requires a taxpayer to compute an amount using the straight line method of depreciation if the taxpayer uses an accelerated method of depreciation. For purposes of section 57(a)(3), the amount for property in a

vintage account shall be computed using the asset depreciation period for the vintage account selected from the asset depreciation range. In the case of property to which the taxpayer does not elect to apply this section, such amount computed by using the straight line method shall be determined under § 1.167(b)-1 without regard to this section.

(ii) *Examples.* The principles of this subparagraph may be illustrated by the following example:

*Example. (a)* Corporation X places a new asset in service to which it elects to apply this section. The cost of the asset is \$200,000 and the estimated salvage value is zero. The taxpayer selects 9 years from the applicable asset depreciation range of 8 to 12 years. Corporation X adopts the double declining balance method of depreciation and thus the rate of depreciation is 22.2 percent (twice the applicable straight line rate). The depreciation allowance in the first year would be \$44,400, that is, 22.2 percent of \$200,000.

(b) Assume that the provisions of section 57(a)(3) apply to the property. The amount of the tax preference would be \$22,200, that is, the excess of the depreciation allowed under this section (\$44,400) over the depreciation which would have been allowable if the taxpayer had used the period selected from the asset depreciation range and the straight line rate (\$22,200).

(Secs. 167(m), 85 Stat. 508 (26 U.S.C. 167(m) and 7805, 68A Stat. 917, (26 U.S.C. 7805))

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 1.167(a)-11, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and on GPO Access.

**§ 1.167(a)-12 Depreciation based on class lives for property first placed in service before January 1, 1971.**

(a) *In general—(1) Summary.* This section provides an elective class life system for determining the reasonable allowance for depreciation of certain classes of assets for taxable years ending after December 31, 1970. The system applies only to assets placed in service before January 1, 1971. Depreciation for such assets during periods prior to January 1, 1971, may have been determined in accordance with Revenue Procedure 62-21. Accordingly, rules are provided which permit taxpayers to apply the system in taxable years ending after

December 31, 1970, to such assets without the necessity of changing or regrouping their depreciation accounts other than as previously required by Revenue Procedure 62-21. The system is designed to minimize disputes between taxpayers and the Internal Revenue Service as to the useful life of assets, salvage value, and repairs. See § 1.167(a)-11 for a similar system for property placed in service after December 31, 1970. See paragraph (d)(2) of § 1.167(a)-11 for treatment of expenditures for the repair, maintenance, rehabilitation or improvement of certain property. The system provided by this section is optional with the taxpayer. An election under this section applies only to qualified property in an asset guideline class for which an election is made and only for the taxable year of election. The taxpayer's election is made with the income tax return for the taxable year. This section also revokes the reserve ratio test for taxable years ending after December 31, 1970, and provides transitional rules for taxpayers who after January 11, 1971, adopt Revenue Procedure 62-21 for a taxable year ending prior to January 1, 1971.

(2) *Revocation of reserve ratio test and other matters.* Except as otherwise expressly provided in this section and in paragraph (b)(5)(vi) of § 1.167(a)-11, the provisions of Revenue Procedure 62-21 shall not apply to any property for any taxable year ending after December 31, 1970, whether or not the taxpayer elects to apply this section to any property. See paragraph (f) of this section for rules for the adoption of Revenue Procedure 62-21 for taxable years ending prior to January 1, 1971.

(3) *Definition of qualified property.* The term "qualified property" means tangible property which is subject to the allowance for depreciation provided by section 167(a), but only if—

(i) An asset guideline class and asset guideline period are in effect for such property for the taxable year, and

(ii) The property is first placed in service by the taxpayer before January 1, 1971,

(iii) The property is placed in service before January 1, 1971, but first placed in service by the taxpayer after December 31, 1970, and is not includible in an

election under § 1.167(a)-11 by reason of § 1.167(a)-11(b)(7) (property acquired as a result of a mere change in form) or § 1.167(a)-11(e)(3)(i) (certain property acquired in a transaction to which section 381(a) applies), or

(iv) The property is acquired and first placed in service by the taxpayer after December 31, 1970, pursuant to a binding written contract entered into prior to January 1, 1971, and is excluded in accordance with paragraph (b)(5)(iv) of § 1.167(a)-11 from an election to apply § 1.167(a)-11.

The provisions of paragraph (e)(1) of § 1.167(a)-11 apply in determining whether property is first placed in service before January 1, 1971. See subparagraph (4)(ii) of this paragraph for special rules for the exclusion of property from the definition of qualified property.

(4) *Requirements of election—(i) In general.* An election to apply this section to qualified property must be made within the time and in the manner specified in paragraph (e) of this section. The election must specify that the taxpayer consents to and agrees to apply all the provisions of this section. The election may be made separately for each asset guideline class. Thus, a taxpayer may for the taxable year elect to apply this section to one, more than one, or all asset guideline classes in which he has qualified property. An election to apply this section for a taxable year must include all qualified property in the asset guideline class for which the election is made.

(ii) *Special rules for exclusion of property from application of this section.* (a) If for the taxable year of election, the taxpayer computes depreciation under section 167(k) or computes amortization under sections 169, 185, 187, 188, or paragraph (b) of § 1.162-11 with respect to property, such property is not qualified property for such taxable year. If for the taxable year of election, the taxpayer computes depreciation under any method of depreciation (other than a method described in the preceding sentence) not permitted by subparagraph (5)(v) of this paragraph for any property in an asset guideline class (other than subsidiary assets excluded from an election under (b) of this subdivision), no property in such asset

guideline class is qualified property for such taxable year.

(b) The taxpayer may exclude from an election to apply this section all (but not less than all) subsidiary assets. Subsidiary assets so excluded are not qualified property for such taxable year. For purposes of this subdivision the term "subsidiary assets" includes jigs, dies, molds, returnable containers, glassware, silverware, textile mill cam assemblies, and other equipment includable in Group One, Class 5, of Revenue Procedure 62-21 which is usually and properly accounted for separately from other property and under a method of depreciation not expressed in terms of years.

(iii) *Special rule for certain public utility property.* (a) In the case of public utility property described in section 167(1)(3)(A)(iii) for which no guideline life was prescribed in Revenue Procedure 62-21 (or for which reference was made in Revenue Procedure 62-21 to lives or rates established by governmental regulatory agencies) of a taxpayer which—

(1) Is entitled to use a method of depreciation other than a "subsection (1) method" of depreciation (as defined in section 167(1)(3)(F)) only if it uses the "normalization method of accounting" (as defined in section 167(1)(3)(G)) with respect to such property, or

(2) Is entitled for the taxable year to use only a "subsection (1) method" of depreciation,

such property shall be qualified property (as defined in subparagraph (3) of this paragraph) only if the taxpayer normalizes the tax deferral resulting from the election to apply this section.

(b) The taxpayer will be considered to normalize the tax deferral resulting from the election to apply this section only if it computes its tax expense for purposes of establishing its cost of service for ratemaking purposes and for reflecting operating results in its regulated books of account using a period for depreciation no less than the period used for computing its depreciation expense for ratemaking purposes and for reflecting operating results in its regulated books of account for the taxable year, and the taxpayer makes adjustments to a reserve to reflect the deferral of taxes resulting from the use

of a period for depreciation under section 167 in accordance with an election to apply this section different from the period used for computing its depreciation expense for ratemaking purposes and for reflecting operating results in its regulated books of account for the taxable year. A determination whether the taxpayer is considered to normalize under this subdivision the tax deferral resulting from the election to apply this section shall be made in a manner consistent with the principles for determining whether a taxpayer is using the "normalization method of accounting" (within the meaning of section 167(1)(3)(G)). See § 1.167(1)-1(h).

(c) If a taxpayer, which has elected to apply this section to any qualified public utility property and is required under (a) of this subdivision to normalize the tax deferral resulting from the election to apply this section to such property, fails to normalize such tax deferral, the election to apply this section to such property shall terminate as of the beginning of the taxable year for which the taxpayer fails to normalize such tax deferral. Application of this section to such property for any period prior to the termination date will not be affected by this termination.

(5) *Determination of reasonable allowance for depreciation*—(i) *In general.* The allowance for depreciation of qualified property to which the taxpayer elects to apply this section shall be determined in accordance with this section. The annual allowance for depreciation is determined by using the method of depreciation adopted by the taxpayer and a rate based upon a life permitted by this section. In the case of the straight-line method of depreciation, the rate of depreciation shall be based upon the class life (or individual life if the taxpayer assigns individual depreciable lives in accordance with subdivision (iii) of this subparagraph) used by the taxpayer with respect to the assets in the asset guideline class. Such rate will be applied to the unadjusted basis of the asset guideline class (individual assets or depreciation accounts if the taxpayer assigns individual depreciable lives). In the case of the sum of the years-digits method of depreciation,

the rate of depreciation will be determined based upon the remaining life of the class (or individual remaining lives if the taxpayer assigns such lives in accordance with subdivision (iii) of this subparagraph) and is applied to the adjusted basis of the class (or individual accounts or assets) as of the beginning of the taxable year of election. The remaining life of a depreciation account is determined by dividing the unrecovered cost or other basis of the account, as computed by straight-line depreciation, by the gross cost or unadjusted basis of the account, and multiplying the result by the class life used with respect to the account. In the case of the declining balance method of depreciation, the rate of depreciation for the asset guideline class shall be based upon the class life (or individual life if the taxpayer assigns such lives in accordance with subdivision (iii) of this subparagraph). Such rate is applied to the adjusted basis of the class (or individual accounts or assets) as of the beginning of the taxable year of election.

(ii) *Reasonable allowance by reference to class lives.* The amount of depreciation for all qualified property in an asset guideline class to which the taxpayer elects to apply this section will constitute the reasonable allowance provided by section 167(a) and the depreciation for the asset guideline class will not be adjusted if—

(a) The taxpayer's qualified property is accounted for in one or more depreciation accounts which conform to the asset guideline class, and the depreciation for each such account is determined by using a rate based upon a life not less than the class life, or

(b) The taxpayer's qualified property is accounted for in one or more depreciation accounts (whether or not conforming to the asset guideline class) for which depreciation is determined at a rate based upon the taxpayer's estimate of the lives of the assets (instead of the class life) and the total amount of depreciation so determined for the asset guideline class for the taxable year of election is not more than would be permitted under (a) of this subdivision for such year using the method of depreciation adopted by the taxpayer for the property.

See subdivision (vii) of this subparagraph for determination of reasonable allowance if depreciation exceeds the amount permitted by this subdivision. See paragraph (b) of this section for rules regarding the determination of "class life". For rules for regrouping depreciation accounts to conform to the asset guideline class, see subdivision (iv) of this subparagraph.

(iii) *Consistency when individual lives are used.* If the taxpayer assigns individual depreciable lives to assets in accordance with subdivision (ii)(b) of this subparagraph, even though the total amount of depreciation for the asset guideline class will not be adjusted, the lives assigned to the various assets in the asset guideline class must be reasonably in proportion to their relative expected periods of use in the taxpayer's business. Thus, although the taxpayer who uses individual asset lives normally has latitude in thereby allocating the depreciation for the asset guideline class among the assets, if the lives are grossly disproportionate (as where a short life is assigned to one asset and a long life to another even though the expected periods of use are the same), the taxpayer's allocation of depreciation to particular assets or depreciation accounts may be adjusted. For example, the taxpayer's allocation may be adjusted for purposes of determining adjusted basis under section 1016(a) or in allocating depreciation to the 50-percent limitation on percentage depletion provided by section 613(a). See paragraph (d) of this section for rules regarding the use of individual asset lives for purposes of classifying retirements as normal or abnormal.

(iv) *Regrouping depreciation accounts.* Without the consent of the Commissioner, the taxpayer may for any taxable year for which he elects to apply this section to an asset guideline class, regroup his accounts for that and all succeeding taxable years to conform to the asset guideline class. Other changes in accounting, including a change from item accounts to multiple-asset accounting, may be made with the consent of the Commissioner. No depreciation accounts for which the straight line or sum of the years-digits method of depreciation is adopted may be combined under this section which

would not be permitted to be combined under part III of Revenue Procedure 65-13, as in effect on January 1, 1971. Accordingly, whether or not the taxpayer adopted the guideline system of Revenue Procedure 62-21 for a taxable year to which part III of Revenue Procedure 65-13 is applicable, the depreciation allowance for any taxable year of election under this section may not exceed that amount which would have been allowed for such year if the taxpayer had used item accounts or year of acquisition accounts. Thus, for example, if a calendar year taxpayer acquired a \$90 asset on the first day of each year from 1966 through 1970, placed such assets in a single multiple asset account, adopted the sum of the years-digits method of depreciation and used a 5-year depreciable life for such assets, and in 1971 uses the 5-year class life determined under paragraph (b) of this section, the depreciation allowance for such assets in 1971 under this section may not exceed \$60, that is, the amount which would be allowed if the taxpayer had used year of acquisition accounts for the assets for the years 1966 through 1970.

For purposes of this subparagraph, a taxpayer's depreciation accounts conform to the asset guideline class if each depreciation account includes only assets of the same asset guideline class.

(v) *Method of depreciation.* The same method of depreciation must be applied to all property in a single depreciation account. The method of depreciation is subject to the limitations of section 167 (c), (j), and (l). Except as otherwise provided in this subdivision, the taxpayer must apply a method of depreciation described in section 167(b) (1), (2), or (3) for qualified property to which the taxpayer elects to apply this section. A method of depreciation permitted under section 167(b)(4) may be used under this section if the method was used by the taxpayer with respect to the property for his last taxable year ending before January 1, 1971, the method is expressed in terms of years, the taxpayer establishes to the satisfaction of the Commissioner that the method is both a reasonable and consistent method, and if the taxpayer applies paragraph (b)(2) of this section (relating to class lives in special situa-

tions) to determine a class life, that the method of determining such class life is consistent with the principles of Revenue Procedure 62-21 as applied to such a method. If the taxpayer has applied a method of depreciation with respect to the property which is not described in section 167(b) (1), (2), (3), or (4) (as permitted under the preceding sentence), he must change under this section to a method of depreciation described in section 167(b) (1), (2), or (3) for the first taxable year for which an election is made under this section. Other changes in depreciation method may be made with the consent of the Commissioner (see sec. 446 and the regulations thereunder). (See also sec. 167(e).)

(vi) *Salvage value.* In applying the method of depreciation adopted by the taxpayer, the annual allowance for depreciation is determined without adjustment for the salvage value of the property, except that no depreciation account may be depreciated below a reasonable salvage value for the account. See paragraph (c) of this section for definition and treatment of salvage value.

(vii) *Reasonable allowance when depreciation exceeds amount based on class life.* In the event that the total amount of depreciation claimed by the taxpayer on his income tax return, in a claim for refund, or otherwise, for an asset guideline class with respect to which an election is made under this section for the taxable year, exceeds the maximum amount permitted under subdivision (ii)(a) of this subparagraph—

(a) If the excess is established to the satisfaction of the Commissioner to be the result of a good faith mistake by the taxpayer in determining the maximum amount permitted under subdivision (ii) (a) of this subparagraph, the taxpayer's election to apply this section will be treated as valid and only such excess will be disallowed, and

(b) In all other cases, the taxpayer's election to apply this section to the asset guideline class for the taxable year is invalid and the reasonable allowance for depreciation will be determined without regard to this section. (See § 1.167(a)-1 (b) for rules regarding the estimated useful life of property.)

(b) *Determination of class lives*—(1) *Class lives in general.* The class life determined under this paragraph (without regard to any range or variance permitted with respect to class lives under § 1.167(a)-11) will be applied for purposes of determining whether the allowance for depreciation for qualified property included in an election under this section is subject to adjustment. The taxpayer is not required to use the class life determined under this paragraph for purposes of determining the allowance for depreciation. Except as provided in subparagraph (2) of this paragraph, the class life of qualified property to which the taxpayer elects to apply this section is the shorter of—

(i) The asset guideline period for the asset guideline class as set forth in Revenue Procedure 72-10 as in effect on March 1, 1972 (applied without regard to any special provision therein with respect to property predominantly used outside the United States), or

(ii) The asset guideline period for the asset guideline class as set forth in any supplement or revision of Revenue Procedure 72-10, but only if and to the extent by express reference in such supplement or revision made applicable for the purpose of changing the asset guideline period or classification of qualified property to which this section applies.

See paragraph (e)(3)(iii) of this section for requirement that the election for the taxable year specify the class life for each asset guideline class. Generally, the applicable asset guideline class and asset guideline period for qualified property to which the taxpayer has elected to apply this section will not be changed for the taxable year of election to reflect any supplement or revision thereof after the taxable year. However, if expressly provided in such a supplement or revision, the taxpayer may, at his option in the manner specified therein, apply the revised or supplemented asset guideline classes or periods to such property for such taxable year and succeeding taxable years. The principles of this subparagraph may be illustrated by the following example:

*Example.* (i) Corporation X, a calendar year taxpayer, has assets in asset guideline class 20.4 of Revenue Procedure 72-10 which were

placed in service by corporation X in 1967, 1968, and 1970. Corporation X also has assets in asset guideline class 22.1 of Revenue Procedure 72-10 which were placed in service at various times prior to 1971. Corporation X has no other qualified property. Corporation X elects to apply this section for 1971 to both classes. Assume that the class lives are determined under this subparagraph and not under subparagraph (2) of this paragraph.

(ii) The class lives for asset guideline classes 20.4 and 22.1 are their respective asset guideline periods of 12 years and 9 years in Revenue Procedure 72-10.

(iii) Accordingly, in the election for the taxable year, in accordance with paragraph (e)(3)(iii) of this section, corporation X specifies a class life of 12 years for asset guideline class 20.4 and a class life of 9 years for asset guideline class 22.1

(2) *Class lives in special situations.* Notwithstanding subparagraph (1) of this paragraph, for the purposes of this section the class life for the asset guideline class determined under this subparagraph shall be used if such class life is shorter than the class life determined under subparagraph (1) of this paragraph. If property described in paragraph (a)(2)(iii) of this section in an asset guideline class is acquired by the taxpayer in a transaction to which section 381(a) applies, for purposes of this subparagraph such property shall be segregated from other property in the class and treated as in a separate asset guideline class, and the class life for that asset guideline class under this subparagraph shall be the shortest class life the transferor was entitled to use under this section for such property on the date of such transfer. In all other cases, the class life for the asset guideline class for purposes of this subparagraph shall be the shortest class life (within the meaning of sec. 4, part II, of Revenue Procedure 62-21) which can be justified by application of secs. 3.02(a), 3.03(a), or 3.05, part II, of Revenue Procedure 62-21 (other than the portion of such sec. 3.05 dealing with justification of a class life by reference to facts and circumstances) for the taxpayer's last taxable year ending prior to January 1, 1971.

A class life justified by application of section 3.03(a), Part II, of Revenue Procedure 62-21 shall not be shorter than can be justified under the Adjustment Table for Class Lives in Part III of such Revenue Procedure. For purposes of

this subparagraph and paragraph (f)(1)(iii) of this section, the reserve ratio test is met only if the taxpayer's reserve ratio does not exceed the upper limit of the appropriate reserve ratio range or in the alternative during the transitional period there provided does not exceed the appropriate "transitional upper limit" in section 3, Part II, of Revenue Procedure 65-13. References to Revenue Procedure 62-21 include all modifications, amendments, and supplements thereto as of January 1, 1971. The guideline form of the reserve ratio test, as described in Revenue Procedure 65-13, may be applied for purposes of this subparagraph in a manner consistent with the rules contained in section 7, Part II, of Revenue Procedure 65-13 and sections 3.02, 3.03, and 3.05, Part II, of Revenue Procedure 62-21. The principles of this subparagraph may be illustrated by the following examples:

*Example (1).* Corporation X, a calendar year taxpayer, has all its assets in asset guideline class 20.4 of Revenue Procedure 72-10 which were placed in service by corporation X prior to 1971. Corporation X elects to apply this section for 1971. For taxable years 1967 through 1969, corporation X had used a class life (within the meaning of section 4, Part II, of Revenue Procedure 62-21) for asset guideline class 20.4 of 12 years. The asset guideline period in Revenue Procedure 72-10 in effect for 1971 is also 12 years. Assume that for 1969 corporation X's reserve ratio was below the appropriate reserve ratio lower limit. However, corporation X could not justify a class life shorter than the asset guideline period of 12 years for 1970 since corporation X had not used the 12-year class life for a period at least equal to one-half of 12 years. (See section 3.03(a), Part II, of Revenue Procedure 62-21.) Accordingly, the class life for asset guideline class 20.4 in 1971 is the asset guideline period of 12 years in accordance with subparagraph (1) of this paragraph.

*Example (2).* The facts are the same as in example (1) except that corporation X had used a class life of 10 years for guideline class 20.4 since 1967. Corporation X had not used the class life of 10 years for a period at least equal to one-half of 10 years. However, in 1968 corporation X's 10-year class life was accepted on audit by the Internal Revenue Service and corporation X met the reserve ratio test in 1970 for guideline class 20.4 using a test life of 10 years. (See section 3.05, Part II, of Revenue Procedure 62-21.) Accordingly, the class life of 10 years is justified for 1970 and the class life for 1971 is 10 years in accordance with this subparagraph. If the

taxpayer's class life had not been audited and accepted for 1968, and in the absence of other circumstances, the taxpayer could not justify a class life shorter than the asset guideline period of 12 years since it had not used the 10-year class life for a period at least equal to one-half of 10 years. (See section 3.02, Part II, of Revenue Procedure 62-21.)

*Example (3).* Corporation Y, a calendar year taxpayer, has all its assets in asset guideline class 13.3 of Revenue Procedure 72-10 which were placed in service from 1960 through 1970. Corporation Y elects to apply this section for 1971. The asset guideline period in Revenue Procedure 72-10 in effect for 1971 is 16 years. Since 1963 corporation Y had used a class life of 16 years for asset guideline 13.3. At the end of 1969 corporation Y's reserve ratio for guideline class 13.3 was 36 percent. With a growth rate of 8 percent and a test life of 16 years the appropriate reserve ratio lower limit was 37 percent. Corporation Y's reserve ratio of 36 percent was below the lower limit of the appropriate reserve ratio range. Corporation Y had used the 16-year class life for at least eight years. A class life of 13.5 years for 1970 was justified by application of section 3.03(a), Part II, of Revenue Procedure 62-21 and the Adjustment Table for Class Lives in Part III, of Revenue Procedure 62-21. The class life for 1971 is 13.5 years in accordance with this subparagraph.

(3) *Classification of property*—(i) *In general.* Property to which this section applies shall be included in the asset guideline class for the activity in which the property is primarily used in the taxable year of election. See paragraph (d)(5) of this section for rule regarding the classification of leased property.

(ii) *Insubstantial activity.* The provisions of Revenue Procedure 62-21 with respect to classification of assets used in an activity which is insubstantial may be applied under this section.

(iii) *Special rule for certain public utilities.* An electric or gas utility which in accordance with Revenue Procedure 64-21 used a composite guideline class basis for applying Revenue Procedure 62-21 for its last taxable year prior to January 1, 1971, may apply Revenue Procedure 72-10 and this section on the basis of such composite asset guideline class determined as provided in Revenue Procedure 64-21. For the purposes of this section all property in the composite guideline class shall be treated as included in a single asset guideline class.

(c) *Salvage value*—(1) *In general*—(i) *Definition of gross salvage value.* “Gross salvage” value is the amount (determined at or as of the time of acquisition but without regard to the application of Revenue Procedure 62-21) which is estimated will be realized upon a sale or other disposition of qualified property when it is no longer useful in the taxpayer’s trade or business or in the production of his income and is to be retired from service, without reduction for the cost of removal, dismantling, demolition, or similar operations. “Net salvage” is gross salvage reduced by the cost of removal, dismantling, demolition, or similar operations. If a taxpayer customarily sells or otherwise disposes of property at a time when such property is still in good operating condition, the gross salvage value of such property is the amount expected to be realized upon such sale or disposition, and under certain circumstances, as where such property is customarily sold at a time when it is still relatively new, the gross salvage value may constitute a relatively large proportion of the unadjusted basis of such property.

(ii) *Definition of salvage value.* “Salvage value” for purposes of this section means gross or net salvage value less the amount, if any, by which reduced by application of section 167(f). Generally, as provided in section 167(f), a taxpayer may reduce the gross or net salvage value for an account by an amount which does not exceed 10 percent of the unadjusted basis of the personal property (as defined in section 167(f)(2)) in the account.

(2) *Estimation of salvage value*—(i) *In general.* For the first taxable year for which he elects to apply this section, the taxpayer must (in accordance with paragraph (e)(3)(iv)(c) of this section) establish salvage value for all qualified property to which the election applies. The taxpayer may (in accordance with subparagraph (1) of this paragraph) determine either gross or net salvage, but an election under this section does not constitute permission to change the manner of estimating salvage. Permission to change the manner of estimating salvage must be obtained by filing form 3115 with the Commissioner of Internal Revenue, Washington, D.C.

20224, within the time otherwise permitted for the taxable year or before September 6, 1973. Salvage value in succeeding taxable years of election will be determined by adjustments of such initial salvage value for the account, as retirements occur. This salvage value established by the taxpayer for the first taxable year of election will not be redetermined merely as a result of fluctuations in price levels or as a result of other circumstances occurring after the close of such taxable year. See paragraph (e)(3)(iv) of this section for requirements that the taxpayer specify in his election the aggregate amount of salvage value for an asset guideline class and that the taxpayer maintain records reasonably sufficient to identify the salvage value established for each depreciation account in the class.

(ii) *Salvage as limitation on depreciation.* In no case may an account be depreciated under this section below a reasonable salvage value, after taking into account any reduction in gross or net salvage value permitted by section 167(f). For example, if the salvage value of an account for 1971 is \$75, the unadjusted basis of the account is \$500, and the depreciation reserve is \$425, no depreciation is allowable for 1971.

(iii) *Special rule for first taxable year.* If for a taxable year ending prior to January 1, 1971, the taxpayer had adopted Revenue Procedure 62-21 prior to January 12, 1971 (see paragraph (f)(2) of this section), no adjustment in the amount of depreciation allowable for any taxable year ending prior to January 1, 1971, shall be made solely by reason of establishing salvage value under this paragraph for any taxable year ending after December 31, 1970. The principles of this subdivision may be illustrated by the following example:

*Example.* Taxpayer A had adopted Revenue Procedure 62-21 prior to January 12, 1971, for taxable years prior to 1971. Taxpayer A had not taken into account any salvage value for account No. 1 which is one of four depreciation accounts A has in the class. The reserve ratio test has been met for all years prior to 1971 and in accordance with Revenue Procedure 62-21 no adjustments in depreciable lives or salvage values were made. At the end of A’s taxable year 1970, the unadjusted basis of account No. 1 was \$10,000 and the reserve for depreciation was \$9,800. Pursuant to this

paragraph, A establishes a salvage value of \$400 for account No. 1 (determined at or as of the time of acquisition). This salvage value is determined to be correct. No depreciation is allowable for account No. 1 in 1971. No depreciation is disallowed for any taxable year prior to 1971, solely by reason of establishing salvage value under this paragraph.

(3) *Limitation on adjustment of reasonable salvage value.* The salvage value established by the taxpayer for a depreciation account will not be redetermined if it is reasonable. Since the determination of salvage value is a matter of estimation, minimal adjustments will not be made. The salvage value established by the taxpayer will be deemed to be reasonable unless there is sufficient basis for a determination of an amount of salvage value for the account which exceeds the salvage value established by the taxpayer for the account by an amount greater than 10 percent of the unadjusted basis of the account at the close of such taxable year. If the salvage value established by the taxpayer for the account is not within the 10-percent range or if the taxpayer follows the practice of understating his estimates of salvage to take advantage of this subdivision, and if there is a determination of an amount of salvage value for the account for the taxable year which exceeds the salvage value established by the taxpayer for the account for such taxable year, an adjustment will be made by increasing the salvage value established by the taxpayer for the account by an amount equal to the difference between the salvage value as determined and the salvage value established by the taxpayer for the account. For the purposes of this subdivision, a determination of salvage value shall include all determinations at all levels of audit and appellate proceedings, and as well as all final determinations within the meaning of section 1313(a)(1). This subparagraph shall apply to each such determination.

(4) *Examples.* The principles of this paragraph may be illustrated by the following examples in which it is assumed that the taxpayer has established salvage value in accordance with this paragraph and has not followed a practice of understating his estimates of salvage value:

*Example (1).* Taxpayer B elects to apply this section for 1971. Assets Y and Z are the only assets in a multiple asset account of 1967, the year in which the assets were acquired. The unadjusted basis of asset Y is \$50,000 and the unadjusted basis of asset Z is \$30,000. B estimated a gross salvage value of \$55,000 at the time of acquisition. The property qualified under section 167(f)(2) and B reduced the amount of salvage taken into account by \$8,000 (that is, 10 percent of \$80,000, under sec. 167(f)). Thus, in accordance with this paragraph and paragraph (e)(3)(iv)(c) of this section, B establishes a salvage value of \$47,000 for the account for 1971. Assume that there is not sufficient basis for determining a salvage value for the account greater than \$52,000 (that is \$60,000 minus the \$8,000 reduction under sec. 167(f)). Since the salvage value of \$47,000 established by B for the account is within the 10 percent range, it is reasonable. Salvage for the account will not be redetermined.

*Example (2).* The facts are the same as in example (1) except that B estimated a gross salvage value of \$50,000 and establishes a salvage value of \$42,000 for the account (that is, \$50,000 minus the \$8,000 reduction under section 167(f)). There is sufficient basis for determining an amount of salvage value greater than \$50,000 (that is, \$58,000 minus the \$8,000 reduction under section 167(f)). The salvage value of \$42,000 established by B for the account can be redetermined without regard to the limitation in subparagraph (3) of this paragraph, since it is not within the 10 percent range. Upon audit of B's tax return for 1971 (a year in which the redetermination would affect the amount of depreciation allowable for the account), salvage value is determined to be \$52,000 after taking into account the reduction under section 167(f). Salvage value for the account will be adjusted to \$52,000.

*Example (3).* The facts are the same as in example (1) except that upon audit of B's tax return for 1971 the examining officer determines the salvage value to be \$58,000 (that is, \$66,000 minus the \$8,000 reduction under section 167(f)), and proposes to adjust salvage value for the account to \$58,000 which will result in disallowing an amount of depreciation for the taxable year. B does not agree with the finding of the examining officer. After receipt of a "30-day letter," B waives a district conference and initiates proceedings before the Appellate Division. In consideration of the case by the Appellate Division it is concluded that there is not sufficient basis for determining an amount of salvage value for the account in excess of \$55,000 (that is, \$63,000 minus the \$8,000 reduction under section 167(f)). Since the salvage value of \$47,000 established by B for the account is within the 10 percent range, it is reasonable. Salvage value for the account will not be redetermined.

*Example (4).* For 1971, taxpayer C elects to apply this section to factory building X which is in an item account of 1965, the year in which the building was acquired. The unadjusted basis of factory building X is \$90,000. C estimated a gross salvage value for the account of \$10,000. The property did not qualify under section 167(f)(2). Thus, C establishes a salvage value of \$10,000 for the account for 1971. Assume that there is not sufficient basis for determining a salvage value for the account greater than \$14,000. Since the salvage value of \$10,000 established by C for the account is within the 10-percent range, it is reasonable. Salvage value for the account will not be redetermined.

(d) *Accounting for qualified property—*

(1) *In general.* Qualified property for which the taxpayer elects to apply this section may be accounted for in any number of item or multiple asset accounts.

(2) *Retirements of qualified property—*

(i) *In general.* The provisions of this subparagraph and § 1.167(a)-8 apply to retirements of qualified property to which the taxpayer elects to apply this section for the taxable year. See subdivision (iii) of this subparagraph for special rule for normal retirements.

(ii) *Adjusted basis of assets retired.* In the case of a taxpayer who depreciates qualified property in a multiple-asset account conforming to the asset guideline class at a rate based on the class life in accordance with paragraph (a)(5)(ii)(a) of this section, § 1.167(a)-8(c) (relating to basis of assets retired) shall be applied by assuming that the class life is the average expected useful life of the assets in the account. See § 1.167(a)-8, generally, for the basis of assets retired.

(iii) *Definition of normal retirements.* Notwithstanding § 1.167(a)-8(b), the determination whether a retirement of qualified property is normal or abnormal shall be made in light of all the facts and circumstances, primarily with reference to the expected period of use of the asset in the taxpayer's business without regard to paragraph (a)(5)(ii) of this section. A retirement is not abnormal unless the taxpayer can show that the withdrawal of the asset was not due to a cause which would customarily be contemplated (in light of the taxpayer's practice and experience) in setting a depreciation rate for the assets without regard to paragraph (a)(5)(ii) of this section. Thus, for ex-

ample, a retirement is normal if made within the range of years which would customarily be taken into account in setting such depreciation rate and if the asset has reached a condition at which, in the normal course of events, the taxpayer customarily retires similar assets from use in his business. A retirement may be abnormal if the asset is withdrawn at an earlier time or under other circumstances, as, for example, when the asset has been damaged by casualty or has lost its usefulness suddenly as the result of extraordinary obsolescence.

(3) *Special rules—*(i) *In general.* The provisions of this subparagraph shall apply to qualified property in a taxable year for which an election to apply this section is made.

(ii) *Repairs.* For the purpose of sections 162 and 263 and the regulations thereunder, whether an expenditure prolongs the life of an asset shall be determined by reference to the expected period of use of the asset in the taxpayer's business without regard to paragraph (a)(5)(ii) of this section.

(iii) *Sale and lease.* For the purpose of comparison with the term of a lease of such property, the remaining life of qualified property shall be determined by reference to the expected period of use of the asset in the taxpayer's business without regard to paragraph (a)(5)(ii) of this section.

(4) *Expected period of use.* For the purposes of subparagraphs (2) and (3) of this paragraph, the determination of the expected period of use of an asset shall be made in light of all the facts and circumstances. The expected period of use of a particular asset will not necessarily coincide with the class life used for depreciation (or with the individual asset life for depreciation under the alternative method in paragraph (a)(5)(ii)(b) of this section for applying the class life). Thus, for example, if the question is whether an asset has been leased for a period less than, equal to or greater than its remaining life, the determination shall be based on the remaining expected period of use of the individual asset without regard to the fact that the asset is depreciated at a rate based on the class life in accordance with paragraph (a)(5)(ii)(a) of this section.

(5) *Leased property.* In the case of a lessor of qualified property, unless there is an asset guideline class in effect for such lessors, the asset guideline class for such property shall be determined by reference to the activity in which such property is primarily used by the lessee. See paragraph (b)(3) of this section for general rule for classification of qualified property according to primary use. However, in the case of an asset guideline class based upon the type of property (such as trucks or railroad cars), as distinguished from the activity in which used, the property shall be classified without regard to the activity of the lessee.

(e) *Election under this section—(1) Consent to change in method of accounting.* An election to apply this section for a taxable year ending after December 31, 1970, is a method of accounting but the consent of the Commissioner will be deemed granted to make an annual election.

(2) *Election for taxable years ending after December 31, 1976.* For taxable years ending after December 31, 1976, the election to apply this section for a taxable year shall be made by attaching to the income tax return a statement that an election under this section is being made. If the taxpayer does not file a timely return (taking into account extensions of time for filing) for the taxable year, the election shall be made at the time the taxpayer files his first return for the taxable year. The election may be made with an amended return only if such amended return is filed no later than the time prescribed by law (including extensions thereof) for filing the return for the taxable year. A taxpayer who makes an election under this subparagraph must maintain books and records reflecting the information described in paragraph (e)(3) (ii) and (iii) of this section.

(3) *Election for taxable years ending on or before December 31, 1976.* (i) For taxable years ending on or before December 31, 1976, the election to apply this section for a taxable year may be made by filing Form 5006 with the income tax return for the taxable year. If the taxpayer does not file a timely return (taking into account extensions of time for filing) for the taxable year, the

election shall be filed at the time the taxpayer files his first return for the taxable year. The election may be made with an amended return only if such amended return is filed no later than the later of (a) the time prescribed by law (including extensions thereof) for filing the return for the taxable year, or (b) November 5, 1973.

(ii) The election to apply this section for a taxable year ending on or before December 31, 1976, will be deemed to be made if the tax return (filed within the periods referred to in paragraph (e)(3)(i) of this section) contains information sufficient to establish the following:

(a) Each asset guideline class for which the election is intended to apply;

(b) The class life for each such asset guideline class and whether the class life is determined under paragraph (b)(1) or (2) of this section;

(c) For each asset guideline class, as of the end of the taxable year of election, (1) the total unadjusted basis of all qualified property, (2) the aggregate of the reserves for depreciation of all accounts in the asset guideline class, and (3) the aggregate of the salvage value established for all accounts in the asset guideline class; and

(d) Whether the taxpayer is an electric or gas utility using a composite asset guideline class basis in accordance with paragraph (b)(3)(iii) of this section.

If an election is deemed to be made under this subdivision (ii), the taxpayer will be deemed to have consented to apply all the provisions of this section.

(iii) A taxpayer to whom the election applies shall maintain books and records for each asset guideline class reasonably sufficient to identify the unadjusted basis, reserve for depreciation and salvage value established for each depreciation account in such asset guidelines class.

(f) *Depreciation for taxable years ending before January 1, 1971—(1) Adoption of Revenue Procedure 62-21—(i) In general.* Except as provided in subdivision (ii) of this subparagraph, a taxpayer may elect to be examined under the provisions of Revenue Procedure 62-21 for a taxable year ending before January 1, 1971, only in accordance with the

rules of this paragraph. The election must specify:

(a) That the taxpayer makes such election and consents to, and agrees to apply, all the provisions of this paragraph;

(b) Each guideline class and taxable year for which the taxpayer elects to be examined under Revenue Procedure 62-21;

(c) The class life claimed for each such guideline class;

(d) The class life and the total amount of the depreciation for the guideline class claimed on the last income tax return for such taxable year filed prior to January 12, 1971 (or in case no income tax return was filed prior to January 12, 1971, on the first income tax return filed for such taxable year);

(e) The class life claimed and the total amount of depreciation for the guideline class under the election to apply Revenue Procedure 62-21, in accordance with this paragraph, for the taxable year; and

(f) If the class life or total amount of depreciation for the guideline class is different in (d) and (e) of this subdivision, a reasonable description of the computation of the class life in (e) of this subdivision, the amount of difference in tax liability resulting therefrom, and the amount of any refund or reduction in any deficiency in tax. The election shall be made in an amended tax return or claim for refund (or by a supplement to the tax return or claim) for the taxable year, and if the class life or total amount of depreciation for the guideline class is different in accordance with (f) of this subdivision, such difference shall be reflected in the amended tax return or claim for refund. Forms may be provided for making the election and submission of the information. In the case of an election made after issuance of such forms and more than 30 days after publication of notice thereof in the Internal Revenue Bulletin, the election may be made and the information submitted only in accordance with such forms. An election will not otherwise be invalid under this paragraph so long as there is substantial compliance, in good faith, with the requirements of this paragraph.

(ii) *Special rule.* The provisions of this subparagraph shall not apply to a guideline class in any taxable year for which the taxpayer has prior to January 12, 1971, adopted Revenue Procedure 62-21 for such class. See subparagraph (2) of this paragraph for determination of adoption of Revenue Procedure 62-21 prior to January 12, 1971.

(iii) *Justification of class life claimed and limitations on refunds.* If the taxpayer elects for a taxable year to be examined under the provisions of Revenue Procedure 62-21 in accordance with subdivision (i) of this subparagraph, any of the provisions of Revenue Procedure 62-21 may be applied to justify a class life claimed on the income tax return filed for such year or to offset an increase in tax liability for such year. Unless it meets the reserve ratio test, no class life will be accepted on audit which (after all other adjustments in tax liability for such year) results in a reduction (or further reduction) in the amount of tax liability shown on the income tax return (specified in subdivision (i)(d) of this subparagraph) for such taxable year, or results in an amount of loss carryback or carryover to any taxable year, but if it is justified under Revenue Procedure 62-21 and meets the reserve ratio test, a class life will be accepted on audit without regard to the foregoing limitations and, for example, may produce a refund or credit against tax. For example, if a class life of 9 years is otherwise justified under Revenue Procedure 62-21 for 1969, but the taxpayer does not meet the reserve ratio test for 1969 using a test life of 9 years, a class life of 9 years (or any class life justified under Revenue Procedure 62-21) will be accepted on audit under Revenue Procedure 62-21 pursuant to an election in accordance with this paragraph provided it does not result in the reduction or further reduction in tax liability or in an amount of loss carryback or carryover as described in the preceding sentence. On the other hand, for example, if a class life of 10 years is justified under Revenue Procedure 62-21 for 1969 and the taxpayer meets the reserve ratio test for 1969 using a test life of 10 years, a class life of 10 years will be accepted on audit under Revenue Procedure 62-21 pursuant to an

election in accordance with this paragraph even though it results in a reduction or further reduction in tax liability or in an amount of loss carryback or carryover as described above and produces a refund of tax. For purposes of this section, the term "audit" includes examination of claims for refund or credit against tax.

(iv) *Definitions.* For purposes of this paragraph, the determination whether the reserve ratio test is met shall be made in accordance with that portion of paragraph (b)(2) of this section which is by express reference therein made applicable to this paragraph. In addition, the guideline form of the reserve ratio test, as described in Revenue Procedure 65-13, may be applied. For purposes of this paragraph, references to Revenue Procedure 62-21 include all modifications, amendments, and supplements thereto as of January 11, 1971. The terms "class life" and "guideline class" have the same meaning as in Revenue Procedure 62-21.

(2) *Determination whether Revenue Procedure 62-21 adopted prior to January 12, 1971*—(i) *In general.* For the purposes of this paragraph, a taxpayer will be treated as having adopted prior to January 12, 1971, Revenue Procedure 62-21 for a guideline class for a taxable year ending before January 1, 1971, only if—

(a) For the guideline class and taxable year, the taxpayer adopted Revenue Procedure 62-21 by expressly so indicating on the income tax return filed for such taxable year prior to January 12, 1971;

(b) For the guideline class and taxable year, the taxpayer adopted Revenue Procedure 62-21 prior to January 12, 1971, by expressly so indicating in a proceeding before the Internal Revenue Service (such as upon examination of the income tax return for such taxable year) and there is reasonable evidence to that effect; or

(c) There is other reasonable evidence that prior to January 12, 1971, the taxpayer adopted Revenue Procedure 62-21 for the guideline class and taxable year.

If not treated under (b) or (c) of this subdivision as having done so for the last taxable year ending before January 1, 1971, and if the taxpayer files his first income tax return for such tax-

able year after January 11, 1971, the taxpayer will be treated as having adopted Revenue Procedure 62-21 prior to January 12, 1971, for a guideline class for such taxable year if he expressly so indicated on that return, or is treated under this subparagraph as having adopted Revenue Procedure 62-21 prior to January 12, 1971, for that guideline class for the immediately preceding taxable year.

(ii) *Examples.* The principles of this subparagraph may be illustrated by the following examples:

*Example (1).* Taxpayer A, an individual who uses the calendar year as his taxable year, has property in Group Three, Class 16(a), of Revenue Procedure 62-21. On A's income tax return for 1968, filed prior to January 12, 1971, he adopted Revenue Procedure 62-21 for the guideline class by so indicating under "Summary of Depreciation" in the appropriate schedule of Form 1040 for 1968. Under subdivision (i) (a) of this subparagraph, A is treated as having adopted Revenue Procedure 62-21 for the guideline class for 1968 prior to January 12, 1971.

*Example (2).* Taxpayer B, an individual who uses the calendar year as his taxable year, has property in Group Two, Class 5, of Revenue Procedure 62-21. B filed timely income tax returns for 1966 through 1968 but did not adopt Revenue Procedures 62-21 on any of such returns. In 1969 upon audit of B's taxable years 1966 through 1968, B exercised his option to be examined under the provisions of Revenue Procedure 62-21. The Revenue Agent's report shows that B was examined under Revenue Procedure 62-21 for taxable years 1966 through 1968. B will be treated under subdivision (ii)(b) of this subparagraph as having adopted Revenue Procedure 62-21 for such years prior to January 12, 1971.

*Example (3).* The facts are the same as in example (2) except that B did not upon examination by the Revenue Agent in 1969 exercise his option to be examined under Revenue Procedure 62-21. B has six accounts in the guideline class, Nos. 1 through 6. The Revenue Agent proposed to lengthen the depreciable lives on accounts Nos. 2 and 3 from 8 years to 12 years. In proceedings before the Appellate Division in 1970, B exercised his option to be examined under the provisions of Revenue Procedure 62-21. This is shown by correspondence between B and the Appellate Conferee as well as by other documents in the case before the Appellate Division. The case was settled on that basis before the Appellate Division without adjustment of the depreciable lives for B's accounts Nos. 2 and 3. B will be treated under subdivision (ii) (b)

## § 1.167(a)-13T

of this subparagraph as having adopted Revenue Procedure 62-21 for taxable years 1966 through 1968 prior to January 12, 1971.

*Example (4).* Corporation X uses the calendar year as its taxable year and has assets in Group Two, Class 5, of Revenue Procedure 62-21. Beginning in 1964, corporation X used the guideline life of 10 years as the depreciable life for all assets in the guideline class. In 1967, corporation X's taxable years 1964 through 1966 were examined and corporation X exercised its option to be examined under the provisions of Revenue Procedure 62-21. Corporation X did not adopt Revenue Procedure 62-21 on any of its income tax returns, for the years 1964 through 1970. Corporation X has not been examined since 1967, but has continued to use the guideline life of 10 years for all property in the guideline class including additions since 1966. Corporation X will be treated under subdivision (ii) (c) and (d) of this subparagraph as having adopted Revenue Procedure 62-21 prior to January 12, 1971, for taxable years 1964 through 1970.

*Example (5).* Corporation Y uses the calendar year as its taxable year and has asset in Group Two, Class 5, of Revenue Procedure 62-21. Since 1964, corporation Y has used various depreciable lives, based on the facts and circumstances, for different accounts in the guideline class. Corporation Y was examined in 1968 for taxable years 1965 through 1967. Corporation Y was also examined in 1970 for taxable years 1968 and 1969. Corporation Y did not exercise its option to be examined under the provisions of Revenue Procedure 62-21. Corporation Y has not adopted Revenue Procedure 62-21 on any income tax return. For taxable years 1964 through 1970, corporation Y's class life (within the meaning of section 4, Part II, of Revenue Procedure 62-21) was between 12 and 14 years. In August of 1971, corporation Y filed amended income tax returns for 1968 and 1969, and an income tax return for 1970, using a depreciable life of 10 years (equal to the guideline life) for all assets in the guideline class. Corporation Y will not be treated as having adopted Revenue Procedure 62-21 prior to January 12, 1971.

*Example (6).* Corporation Z uses the calendar year as its taxable year and has assets in group 2, class 5, of Revenue Procedure 62-21. Corporation Z adopted Revenue Procedure 62-21 for this guideline class by expressly so indicating on its tax return for 1966, which was filed before January 12, 1971. Corporation Z computed its allowable depreciation for 1966 as if it adopted Revenue Procedure 62-21 for this guideline class for its taxable years 1962 through 1965, although it had earlier filed its tax returns for those years without regard to Revenue Procedure 62-21. The depreciation thus claimed in 1966 was less than what would have been allowable if corporation Z first adopted Revenue

## 26 CFR Ch. I (4-1-06 Edition)

Procedure 62-21 in 1966. This was the result of certain accounts becoming fully depreciated through use of Revenue Procedure 62-21 in computing depreciation for 1962 through 1965. In addition, in deferred tax accounting procedures employed before January 12, 1971, for financial reporting purposes, corporation Z calculated its tax deferrals on the basis that it had adopted Revenue Procedure 62-21 for the years 1962 through 1965. Corporation Z will be treated under subdivision (i) (c) of this subparagraph as having adopted Revenue Procedure 62-21 for taxable years 1962 through 1965 prior to January 12, 1971.

(Sec. 167(m), 85 Stat. 508 (26 U.S.C. 167))

[T.D. 7278, 38 FR 14923, June 7, 1973, as amended by T.D. 7315, 39 FR 20195, June 7, 1974; T.D. 7517, 42 FR 58934, Nov. 14, 1977]

### § 1.167(a)-13T Certain elections for intangible property (temporary).

For rules applying the elections under section 13261(g) (2) and (3) of the Omnibus Budget Reconciliation Act of 1993 to intangible property described in section 167(f), see § 1.197-1T.

[59 FR 11922, Mar. 15, 1994]

### § 1.167(a)-14 Treatment of certain intangible property excluded from section 197.

(a) *Overview.* This section provides rules for the amortization of certain intangibles that are excluded from section 197 (relating to the amortization of goodwill and certain other intangibles). These excluded intangibles are specifically described in § 1.197-2(c) (4), (6), (7), (11), and (13) and include certain computer software and certain other separately acquired rights, such as rights to receive tangible property or services, patents and copyrights, certain mortgage servicing rights, and rights of fixed duration or amount. Intangibles for which an amortization amount is determined under section 167(f) and intangibles otherwise excluded from section 197 are amortizable only if they qualify as property subject to the allowance for depreciation under section 167(a).

(b) *Computer software—(1) In general.* [Reserved]. For further guidance, see § 1.167(a)-14T(b)(1).

(2) *Exceptions.* Paragraph (b)(1) of this section does not apply to the cost of computer software properly and consistently taken into account under

§1.162-11. The cost of acquiring an interest in computer software that is included, without being separately stated, in the cost of the hardware or other tangible property is treated as part of the cost of the hardware or other tangible property that is capitalized and depreciated under other applicable sections of the Internal Revenue Code.

(3) *Additional rules.* Rules similar to those in §1.197-2 (f)(1)(iii), (f)(1)(iv), and (f)(2) (relating to the computation of amortization deductions and the treatment of contingent amounts) apply for purposes of this paragraph (b).

(c) *Certain interests or rights not acquired as part of a purchase of a trade or business—(1) Certain rights to receive tangible property or services.* The amount of the deduction for a right (other than a right acquired as part of a purchase of a trade or business) to receive tangible property or services under a contract or from a governmental unit (as specified in section 167(f)(2) and §1.197-2(c)(6)) is determined as follows:

(i) *Amortization of fixed amounts.* The basis of a right to receive a fixed amount of tangible property or services is amortized for each taxable year by multiplying the basis of the right by a fraction, the numerator of which is the amount of tangible property or services received during the taxable year and the denominator of which is the total amount of tangible property or services received or to be received under the terms of the contract or governmental grant. For example, if a taxpayer acquires a favorable contract right to receive a fixed amount of raw materials during an unspecified period, the taxpayer must amortize the cost of acquiring the contract right by multiplying the total cost by a fraction, the numerator of which is the amount of raw materials received under the contract during the taxable year and the denominator of which is the total amount of raw materials received or to be received under the contract.

(ii) *Amortization of unspecified amount over fixed period.* The cost or other basis of a right to receive an unspecified amount of tangible property or services over a fixed period is amortized ratably over the period of the right. (See paragraph (c)(3) of this section regarding renewals).

(iii) *Amortization in other cases.* [Reserved]

(2) *Rights of fixed duration or amount.* The amount of the deduction for a right (other than a right acquired as part of a purchase of a trade or business) of fixed duration or amount received under a contract or granted by a governmental unit (specified in section 167(f)(2) and §1.197-2(c)(13)) and not covered by paragraph (c)(1) of this section is determined as follows:

(i) *Rights to a fixed amount.* The basis of a right to a fixed amount is amortized for each taxable year by multiplying the basis by a fraction, the numerator of which is the amount received during the taxable year and the denominator of which is the total amount received or to be received under the terms of the contract or governmental grant.

(ii) *Rights to an unspecified amount over fixed duration of less than 15 years.* The basis of a right to an unspecified amount over a fixed duration of less than 15 years is amortized ratably over the period of the right.

(3) *Application of renewals.* (i) For purposes of paragraphs (c) (1) and (2) of this section, the duration of a right under a contract (or granted by a governmental unit) includes any renewal period if, based on all of the facts and circumstances in existence at any time during the taxable year in which the right is acquired, the facts clearly indicate a reasonable expectancy of renewal.

(ii) The mere fact that a taxpayer will have the opportunity to renew a contract right or other right on the same terms as are available to others, in a competitive auction or similar process that is designed to reflect fair market value and in which the taxpayer is not contractually advantaged, will generally not be taken into account in determining the duration of such right provided that the bidding produces a fair market value price comparable to the price that would be obtained if the rights were purchased immediately after renewal from a person (other than the person granting the renewal) in an arm's-length transaction.

(iii) The cost of a renewal not included in the terms of the contract or

governmental grant is treated as the acquisition of a separate intangible asset.

(4) *Patents and copyrights.* If the purchase price of an interest (other than an interest acquired as part of a purchase of a trade or business) in a patent or copyright described in section 167(f)(2) and § 1.197-2(c)(7) is payable on at least an annual basis as either a fixed amount per use or a fixed percentage of the revenue derived from the use of the patent or copyright, the depreciation deduction for a taxable year is equal to the amount of the purchase price paid or incurred during the year. Otherwise, the basis of such patent or copyright (or an interest therein) is depreciated either ratably over its remaining useful life or under section 167(g) (income forecast method). If a patent or copyright becomes valueless in any year before its legal expiration, the adjusted basis may be deducted in that year.

(5) *Additional rules.* The period of amortization under paragraphs (c) (1) through (4) of this section begins when the intangible is placed in service, and rules similar to those in § 1.197-2(f)(2) apply for purposes of this paragraph (c).

(d) *Mortgage servicing rights—(1) In general.* The amount of the deduction for mortgage servicing rights described in section 167(f)(3) and § 1.197-2(c)(11) is determined by using the straight line method described in § 1.167(b)-1 (except that the salvage value is treated as zero) and an amortization period of 108 months beginning on the first day of the month that the rights are placed in service. Mortgage servicing rights are not depreciable to the extent the rights are stripped coupons under section 1286.

(2) *Treatment of rights acquired as a pool—(i) In general.* Except as provided in paragraph (d)(2)(ii) of this section, all mortgage servicing rights acquired in the same transaction or in a series of related transactions are treated as a single asset (the pool) for purposes of determining the depreciation deduction under this paragraph (d) and any gain or loss from the sale, exchange, or other disposition of the rights. Thus, if some (but not all) of the rights in a pool become worthless as a result of

prepayments, no loss is recognized by reason of the prepayment and the adjusted basis of the pool is not affected by the unrecognized loss. Similarly, any amount realized from the sale or exchange of some (but not all) of the mortgage servicing rights is included in income and the adjusted basis of the pool is not affected by the realization.

(ii) *Multiple accounts.* If the taxpayer establishes multiple accounts within a pool at the time of its acquisition, gain or loss is recognized on the sale or exchange of all mortgage servicing rights within any such account.

(3) *Additional rules.* Rules similar to those in § 1.197-2(f)(1)(iii), (f)(1)(iv), and (f)(2) (relating to the computation of amortization deductions and the treatment of contingent amounts) apply for purposes of this paragraph (d).

(e) *Effective dates—(1) In general.* This section applies to property acquired after January 25, 2000, except that § 1.167(a)-14(c)(2) (depreciation of the cost of certain separately acquired rights) and so much of § 1.167(a)-14(c)(3) as relates to § 1.167(a)-14(c)(2) apply to property acquired after August 10, 1993 (or July 25, 1991, if a valid retroactive election has been made under § 1.197-1T).

(2) *Change in method of accounting.* [Reserved]. For further guidance, see § 1.167(a)-14T(e)(2).

(3) *Qualified property, 50-percent bonus depreciation property, qualified New York Liberty Zone property, or section 179 property.* [Reserved]. For further guidance, see § 1.167(a)-14T(e)(3).

[T.D. 8867, 65 FR 3825, Jan. 25, 2000, as amended by T.D. 9091, 68 FR 52990, Sept. 8, 2003]

**§ 1.167(a)-14T Treatment of certain intangible property excluded from section 197 (temporary).**

(a) For further guidance, see § 1.167(a)-14(a).

(b) *Computer software—(1) In general.* The amount of the deduction for computer software described in section 167(f)(1) and § 1.197-2(c)(4) is determined by amortizing the cost or other basis of the computer software using the straight line method described in § 1.167(b)-1 (except that its salvage value is treated as zero) and an amortization period of 36 months beginning on the first day of the month that the

computer software is placed in service. Before determining the amortization deduction allowable under this paragraph (b), the cost or other basis of computer software that is section 179 property, as defined in section 179(d)(1)(A)(ii), must be reduced for any portion of the basis the taxpayer properly elects to treat as an expense under section 179. In addition, the cost or other basis of computer software that is qualified property under section 168(k)(2) or § 1.168(k)-1T, 50-percent bonus depreciation property under section 168(k)(4) or § 1.168(k)-1T, or qualified New York Liberty Zone property under section 1400L(b) or § 1.1400L(b)-1T, must be reduced by the amount of the additional first year depreciation deduction allowed or allowable, whichever is greater, under section 168(k) or section 1400L(b) for the computer software. If costs for developing computer software that the taxpayer properly elects to defer under section 174(b) result in the development of property subject to the allowance for depreciation under section 167, the rules of this paragraph (b) will apply to the unrecovered costs. In addition, this paragraph (b) applies to the cost of separately acquired computer software if the cost to acquire the software is separately stated and the cost is required to be capitalized under section 263(a).

(b)(2)-(e)(1) For further guidance, see § 1.167(a)-14(b)(2) through (e)(1).

(e)(2) *Change in method of accounting.* See § 1.197-2(l)(4) for rules relating to changes in method of accounting for property to which § 1.167(a)-14T applies. However, see § 1.168(k)-1T(g)(4) or 1.1400L(b)-1T(g)(4) for rules relating to changes in method of accounting for computer software to which the third sentence in § 1.167(a)-14T(b)(1) applies.

(3) *Qualified property, 50-percent bonus depreciation property, qualified New York Liberty Zone property, or section 179 property.* This section also applies to computer software that is qualified property under section 168(k)(2) or qualified New York Liberty Zone property under section 1400L(b) acquired by a taxpayer after September 10, 2001, and to computer software that is 50-percent bonus depreciation property under section 168(k)(4) acquired by a taxpayer after May 5, 2003. This section

also applies to computer software that is section 179 property placed in service by a taxpayer in a taxable year beginning after 2002 and before 2006. This section expires on September 4, 2006.

[T.D. 9091, 68 FR 52991, Sept. 8, 2003; 68 FR 63734, Nov. 10, 2003]

#### § 1.167(b)-0 Methods of computing depreciation.

(a) *In general.* Any reasonable and consistently applied method of computing depreciation may be used or continued in use under section 167. Regardless of the method used in computing depreciation, deductions for depreciation shall not exceed such amounts as may be necessary to recover the unrecovered cost or other basis less salvage during the remaining useful life of the property. The reasonableness of any claim for depreciation shall be determined upon the basis of conditions known to exist at the end of the period for which the return is made. It is the responsibility of the taxpayer to establish the reasonableness of the deduction for depreciation claimed. Generally, depreciation deductions so claimed will be changed only where there is a clear and convincing basis for a change.

(b) *Certain methods.* Methods previously found adequate to produce a reasonable allowance under the Internal Revenue Code of 1939 or prior revenue laws will, if used consistently by the taxpayer, continue to be acceptable under section 167(a). Examples of such methods which continue to be acceptable are the straight line method, the declining balance method with the rate limited to 150 percent of the applicable straight line rate, and under appropriate circumstances, the unit of production method. The methods described in section 167(b) and §§ 1.167(b)-1, 1.167(b)-2, 1.167(b)-3, and 1.167(b)-4 shall be deemed to produce a reasonable allowance for depreciation except as limited under section 167(c) and § 1.167(c)-1. See also § 1.167(e)-1 for rules relating to change in method of computing depreciation.

(c) *Application of methods.* In the case of item accounts, any method which results in a reasonable allowance for depreciation may be selected for each item of property, but such method

§ 1.167(b)-1

must thereafter be applied consistently to that particular item. In the case of group, classified, or composite accounts, any method may be selected for each account. Such method must be applied to that particular account consistently thereafter but need not necessarily be applied to acquisitions of similar property in the same or subsequent years, provided such acquisitions are set up in separate accounts. See, however, § 1.167(e)-1 and section 446 and the regulations thereunder, for rules relating to changes in the method of computing depreciation, and § 1.167(c)-1 for restriction on the use of certain methods. See also § 1.167(a)-7 for definition of account.

§ 1.167(b)-1 Straight line method.

(a) *In general.* Under the straight line method the cost or other basis of the property less its estimated salvage value is deductible in equal annual amounts over the period of the estimated useful life of the property. The allowance for depreciation for the taxable year is determined by dividing the adjusted basis of the property at the beginning of the taxable year, less salvage value, by the remaining useful life of the property at such time. For convenience, the allowance so determined may be reduced to a percentage or fraction. The straight line method may be used in determining a reasonable allowance for depreciation for any property which is subject to depreciation under section 167 and it shall be used in all cases where the taxpayer has not adopted a different acceptable method with respect to such property.

(b) *Illustrations.* The straight line method is illustrated by the following examples:

*Example (1).* Under the straight line method items may be depreciated separately:

Year and item	Cost or other basis less salaries	Useful life (years)	Depreciation allowable		
			1954	1955	1956
1954:					
Asset A .....	\$1,600	4	<sup>1</sup> \$200	\$400	\$400
Asset B .....	12,000	40	<sup>1</sup> 150	300	300

<sup>1</sup> In this example it is assumed that the assets were placed in service on July 1, 1954.

*Example (2).* In group, classified, or composite accounting, a number of assets with

the same or different useful lives may be combined into one account, and a single rate of depreciation, *i.e.*, the group, classified, or composite rate used for the entire account. In the case of group accounts, *i.e.*, accounts containing assets which are similar in kind and which have approximately the same estimated useful lives, the group rate is determined from the average of the useful lives of the assets. In the case of classified or composite accounts, the classified or composite rate is generally computed by determining the amount of one year's depreciation for each item or each group of similar items, and by dividing the total depreciation thus obtained by the total cost or other basis of the assets. The average rate so obtained is to be used as long as subsequent additions, retirements, or replacements do not substantially alter the relative proportions of different types of assets in the account. An example of the computation of a classified or composite rate follows:

Cost or other basis	Estimated useful life (years)	Annual depreciation
\$10,000	5	\$2,000
10,000	15	667
20,000		2,667

Average rate is 13.33 percent (\$2,667÷\$20,000) unadjusted for salvage. Assuming the estimated salvage value is 10 percent of the cost or other basis, the rate adjusted for salvage will be 13.33 percent minus 10 percent of 13.33 percent (13.33% - 1.33%), or 12 percent.

*Example (3).* The use of the straight line method for group, classified, or composite accounts is illustrated by the following example: A taxpayer filing his returns on a calendar year basis maintains an asset account for which a group rate of 20 percent has been determined, before adjustment for salvage. Estimated salvage is determined to be 6% percent, resulting in an adjusted rate of 18.67 percent. During the years illustrated, the initial investment, additions, retirements, and salvage recoveries, which were determined not to change the composition of the group sufficiently to require a change in rate, were assumed to have been made as follows:

- 1954—Initial investment of \$12,000.
- 1957—Retirement \$2,000, salvage realized \$200.
- 1958—Retirement \$2,000, salvage realized \$200.
- 1959—Retirement \$4,000, salvage realized \$400.
- 1959—Additions \$10,000.
- 1960—Retirement \$2,000, no salvage realized.
- 1961—Retirement \$2,000, no salvage realized.

DEPRECIABLE ASSET ACCOUNT AND DEPRECIATION COMPUTATION ON AVERAGE BALANCES

Year	Asset balance Jan. 1	Current additions	Current retirements	Asset balance Dec. 31	Average balance	Rate (per cent)	Allowable depreciation
1954		\$12,000		\$12,000	\$6,000	18.67	\$1,120
1955	\$12,000			12,000	12,000	18.67	2,240
1956	12,000			12,000	12,000	18.67	2,240
1957	12,000		\$2,000	10,000	11,000	18.67	2,054
1958	10,000		2,000	8,000	9,000	18.67	1,680
1959	8,000	10,000	4,000	14,000	11,000	18.67	2,054
1960	14,000		2,000	12,000	13,000	18.67	2,427
1961	12,000		2,000	10,000	11,000	18.67	2,054

CORRESPONDING DEPRECIATION RESERVE ACCOUNT

Year	Depreciation reserve Jan. 1	Depreciation allowable	Current retirements	Salvage realized	Depreciation reserve Dec. 31
1954		\$1,120			\$1,120
1955	\$1,120	2,240			3,360
1956	3,360	2,240			5,600
1957	5,600	2,054	\$2,000	\$200	5,854
1958	5,854	1,680	2,000	200	5,734
1959	5,734	2,054	4,000	400	4,188
1960	4,188	2,427	2,000		4,615
1961	4,615	2,054	2,000		4,669

§ 1.167(b)-2 Declining balance method.

(a) *Application of method.* Under the declining balance method a uniform rate is applied each year to the unrecovered cost or other basis of the property. The unrecovered cost or other basis is the basis provided by section 167(g), adjusted for depreciation previously allowed or allowable, and for all other adjustments provided by section 1016 and other applicable provisions of law. The declining balance rate may be determined without resort to formula. Such rate determined under section 167(b)(2) shall not exceed twice the appropriate straight line rate computed without adjustment for salvage. While salvage is not taken into account in determining the annual allowances under this method, in no event shall an asset (or an account) be depreciated below a reasonable salvage value. However, see section 167(f) and § 1.167(f)-1 for rules which permit a reduction in the amount of salvage value to be taken into account for certain personal property acquired after October 16, 1962. Also, see section 167(c) and § 1.167(c)-1 for restrictions on the use of the declining balance method.

(b) *Illustrations.* The declining balance method is illustrated by the following examples:

*Example (1).* A new asset having an estimated useful life of 20 years was purchased on January 1, 1954, for \$1,000. The normal straight line rate (without adjustment for salvage) is 5 percent, and the declining balance rate at twice the normal straight line rate is 10 percent. The annual depreciation allowances for 1954, 1955, and 1956 are as follows:

Year	Basis	Declining balance rate (per cent)	Depreciation allowance
1954	\$1,000	10	\$100
1955	900	10	90
1956	810	10	81

*Example (2).* A taxpayer filing his returns on a calendar year basis maintains a group account to which a 5 year life and a 40 percent declining balance rate are applicable. Original investment, additions, retirements, and salvage recoveries are the same as those set forth in example (3) of paragraph (b) of § 1.167(b)-1. Although salvage value is not taken into consideration in computing a declining balance rate, it must be recognized and accounted for when assets are retired.

DEPRECIABLE ASSET ACCOUNT AND DEPRECIATION COMPUTATION USING AVERAGE ASSET AND RESERVE BALANCES

Year	Asset balance Jan. 1	Current additions	Current retirements	Asset balance Dec. 31	Average	Average reserve before depreciation	Net depreciable balance	Rate (pct.)	Allowable depreciation
1954		\$12,000		\$12,000	\$6,000		\$6,000	40	\$2,400
1955	\$12,000			12,000	12,000	\$2,400	9,600	40	3,840
1956	12,000			12,000	12,000	6,240	5,760	40	2,304
1957	12,000		\$2,000	10,000	11,000	7,644	3,356	40	1,342
1958	10,000		2,000	8,000	9,000	7,186	1,814	40	726
1959	8,000	10,000	4,000	14,000	11,000	5,212	5,788	40	2,315
1960	14,000		2,000	12,000	13,000	4,727	8,273	40	3,309
1961	12,000		2,000	10,000	11,000	6,036	4,964	40	1,986

DEPRECIATION RESERVE

Year	Reserve Jan. 1	Current retirements	Salvage realized	Reserve Dec. 31, before depreciation	Average reserve before depreciation	Allowable depreciation	Reserve Dec. 31, after depreciation
1954						\$2,400	\$2,400
1955	\$2,400			\$2,400	\$2,400	3,840	6,240
1956	6,240			6,240	6,240	2,304	8,544
1957	8,544	\$2,000	\$200	6,744	7,644	1,342	8,086
1958	8,086	2,000	200	6,286	7,186	726	7,012
1959	7,012	4,000	400	3,412	5,212	2,315	5,727
1960	5,727	2,000		3,727	4,727	3,309	7,036
1961	7,036	2,000		5,036	6,036	1,986	7,022

Where separate depreciation accounts are maintained by year of acquisition and there is an unrecovered balance at the time of the last retirement, such unrecovered balance may be deducted as part of the depreciation allowance for the year of such retirement.

Thus, if the taxpayer had kept separate depreciation accounts by year of acquisition and all the retirements shown in the example above were from 1954 acquisitions, depreciation would be computed on the 1954 and 1959 acquisitions as follows:

1954 ACQUISITIONS

Year	Asset balance Jan. 1	Acquisitions	Current retirements	Asset balance Dec. 31	Average balance	Avg. reserve before depreciation	Net depreciable balance	Rate (per cent)	Allowable depreciation
1954		\$12,000		\$12,000	\$6,000		\$6,000	40	\$2,400
1955	\$12,000			12,000	12,000	\$2,400	9,600	40	3,840
1956	12,000			12,000	12,000	6,240	5,760	40	2,304
1957	12,000		\$2,000	10,000	11,000	7,644	3,356	40	1,342
1958	10,000		2,000	8,000	9,000	7,186	1,814	40	726
1959	8,000		4,000	4,000	6,000	5,212	788	40	315
1960	4,000		2,000	2,000	3,000	2,727	273	40	109
1961	2,000		2,000	1,000	1,000	836	164		164

<sup>1</sup> Balance allowable as depreciation in the year of retirement of the last survivor of the 1954 acquisitions.

DEPRECIATION RESERVE FOR 1954 ACQUISITIONS

Year	Reserve Jan. 1	Current retirements	Salvage realized	Reserve Dec. 31, before depreciation	Average reserve before depreciation	Allowable depreciation	Reserve Dec. 31, after depreciation
1954						\$2,400	\$2,400
1955	\$2,400			\$2,400	\$2,400	3,840	6,240
1956	6,240			6,240	6,240	2,304	8,544
1957	8,544	\$2,000	\$200	6,744	7,644	1,342	8,086
1958	8,086	2,000	200	6,286	7,186	726	7,012

DEPRECIATION RESERVE FOR 1954 ACQUISITIONS—Continued

Year	Reserve Jan. 1	Current retirements	Salvage realized	Reserve Dec. 31, before depreciation	Average reserve before depreciation	Allowable depreciation	Reserve Dec. 31, after depreciation
1959 .....	7,012	4,000	400	3,412	5,212	315	3,727
1960 .....	3,727	2,000	.....	1,727	2,727	109	1,836
1961 .....	1,836	2,000	.....	(164)	836	164	.....

1959 ACQUISITIONS

Year	Asset balance Jan. 1	Acquisition	Asset balance Dec. 31	Avg. balance	Reserve Dec. 31, before depreciation	Net depreciable balance	Rate percent	Allowable depreciation	Reserve Dec. 31, after depreciation
1959 .....	.....	\$10,000	\$10,000	\$5,000	None	\$5,000	40	\$2,000	\$2,000
1960 .....	\$10,000	.....	10,000	10,000	\$2,000	8,000	40	3,200	5,200
1961 .....	10,000	.....	10,000	10,000	5,200	4,800	40	1,920	7,120

In the above example, the allowable depreciation on the 1954 acquisitions totals \$11,200. This amount when increased by salvage realized in the amount of \$800, equals the entire cost or other basis of the 1954 acquisitions (\$12,000).

(c) *Change in estimated useful life.* In the declining balance method when a change is justified in the useful life estimated for an account, subsequent computations shall be made as though the revised useful life had been originally estimated. For example, assume that an account has an estimated useful life of ten years and that a declining balance rate of 20 percent is applicable. If, at the end of the sixth year, it is determined that the remaining useful life of the account is six years, computations shall be made as though the estimated useful life was originally determined as twelve years. Accordingly, the applicable depreciation rate will be 16⅔ percent. This rate is thereafter applied to the unrecovered cost or other basis.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6712, 29 FR 3653, Mar. 24, 1964]

**§ 1.167(b)-3 Sum of the years-digits method.**

(a) *Applied to a single asset—(1) General rule.* Under the sum of the years-digits method annual allowances for depreciation are computed by applying changing fractions to the cost or other basis of the property reduced by estimated salvage. The numerator of the

fraction changes each year to a number which corresponds to the remaining useful life of the asset (including the year for which the allowance is being computed), and the denominator which remains constant is the sum of all the years digits corresponding to the estimated useful life of the asset. See section 167(c) and § 1.167(c)-1 for restrictions on the use of the sum of the years-digits method.

(i) *Illustrations.* Computation of depreciation allowances on a single asset under the sum of the years-digits method is illustrated by the following examples:

*Example (1).* A new asset having an estimated useful life of five years was acquired on January 1, 1954, for \$1,750. The estimated salvage is \$250. For a taxpayer filing his returns on a calendar year basis, the annual depreciation allowances are as follows:

Year	Cost or other basis less salvage	Fraction <sup>1</sup>	Allowable depreciation	Depreciation reserve
1954 .....	\$1,500	5/15	\$500	\$500
1955 .....	1,500	4/15	400	900
1956 .....	1,500	3/15	300	1,200
1957 .....	1,500	2/15	200	1,400
1958 .....	1,500	1/15	100	1,500
Unrecovered value (salvage) .....	.....	.....	.....	\$250

<sup>1</sup>The denominator of the fraction is the sum of the digits representing the years of useful life, i.e., 5, 4, 3, 2, and 1, or 15.

*Example (2).* Assume in connection with an asset acquired in 1954 that three-fourths of a year's depreciation is allowable in that year.

§ 1.167(b)-3

The following illustrates a reasonable method of allocating depreciation:

	Depreciation for 12 months	Allowable depreciation		
		1954	1955	1956
1st year .....	\$500	( <sup>3</sup> / <sub>4</sub> ) \$375	( <sup>1</sup> / <sub>4</sub> ) \$125	
2d year .....	400	.....	( <sup>3</sup> / <sub>4</sub> ) 300	( <sup>1</sup> / <sub>4</sub> ) \$100
3d year .....	300	.....	.....	( <sup>3</sup> / <sub>4</sub> ) 225
Total .....		375	425	325

(ii) *Change in useful life.* Where in the case of a single asset, a change is justified in the useful life, subsequent computations shall be made as though the remaining useful life at the beginning of the taxable year of change were the useful life of a new asset acquired at such time and with a basis equal to the unrecovered cost or other basis of the asset at that time. For example, assume that a new asset with an estimated useful life of ten years is purchased in 1954. At the time of making out his return for 1959, the taxpayer finds that the asset has a remaining useful life of seven years from January 1, 1959. Depreciation for 1959 should then be computed as though 1959 were the first year of the life of an asset estimated to have a useful life of seven years, and the allowance for 1959 would be <sup>7</sup>/<sub>28</sub> of the unrecovered cost or other basis of the asset after adjustment for salvage.

(2) *Remaining life—(i) Application.* Under the sum of the years-digits method, annual allowances for depreciation may also be computed by applying changing fractions to the unrecovered cost or other basis of the asset reduced by estimated salvage. The numerator of the fraction changes each year to a number which corresponds to the remaining useful life of the asset (including the year for which the allowance is being computed), and the denominator changes each year to a number which represents the sum of the digits corresponding to the years of estimated remaining useful life of the asset. For decimal equivalents of such fractions, see Table I of subdivision (ii) of this subparagraph. For example, a new asset with an estimated useful life of 10 years is purchased January 1, 1954, for \$6,000. Assuming a salvage value of \$500, the depreciation allowance for 1954 is \$1,000 (\$5,500×0.1818, the applica-

ble rate from Table I). For 1955, the unrecovered balance is \$4,500, and the remaining life is 9 years. The depreciation allowance for 1955 would then be \$900 (\$4,500×0.2000, the applicable rate from Table I).

(ii) *Table I.* This table shows decimal equivalents of sum of the years-digits fractions corresponding to remaining lives from 1 to 100 years.

NOTE: For determination of decimal equivalents of remaining lives falling between those shown in the above table, the taxpayer may use the next longest life shown in the table, interpolate from the table, or use the following formula from which the table was derived.

$$D = 2R / (W + 2F)(W + 1)$$

where:

D=Decimal equivalent.

R=Remaining life.

§ 1.167(b)-3

26 CFR Ch. I (4-1-06 Edition)

W=Whole number of years in remaining life.  
F=Fractional part of a year in remaining life.

If the taxpayer desires to carry his calculations of decimal equivalents to a greater number of decimal places than is provided in the table, he may use the formula. The procedure adopted must be consistently followed thereafter.

(b) *Applied to group, classified, or composite accounts*—(1) *General rule.* The sum of the years-digits method may be applied to group, classified, or composite accounts in accordance with the plan described in subparagraph (2) of this paragraph or in accordance with other plans as explained in subparagraph (3) of this paragraph.

(2) *Remaining life plan.* The remaining life plan as applied to a single asset is described in paragraph (a)(2) of this section. This plan may also be applied to group, classified, or composite accounts. Under this plan the allowance for depreciation is computed by applying changing fractions to the unrecovered cost or other basis of the account reduced by estimated salvage. The numerator of the fraction changes each year to a number which corresponds to the remaining useful life of the account (including the year for which the allowance is being computed), and the denominator changes each year to a number which represents the sum of the years digits corresponding to the years of estimated remaining useful life of the account. Decimal equivalents of such fractions can be obtained by use of Table I under

paragraph (a)(2)(ii) of this section. The proper application of this method requires that the estimated remaining useful life of the account be determined each year. This determination, of course, may be made each year by analysis, *i.e.*, by determining the remaining lives for each of the components in the account, and averaging them. The estimated remaining life of any account, however, may also be determined arithmetically. For example, it may be computed by dividing the unrecovered cost or other basis of the account, as computed by straight line depreciation, by the gross cost or other basis of the account, and multiplying the result by the average life of the assets in the account. Salvage value is not a factor for the purpose of determining remaining life. Thus, if a group account with an average life of ten years had at January 1, 1958, a gross asset balance of \$12,600 and a depreciation reserve computed on the straight line method of \$9,450, the remaining life of the account at January 1, 1958, would be computed as follows:

$$\frac{\$12,600 - \$9,450}{\$12,600 \times 10} \text{ years equals } 2.50 \text{ years.}$$

*Example.* The use of the sum of the years-digits method with group, classified, or composite accounts under the remaining life plan is illustrated by the following example: A calendar year taxpayer maintains a group account to which a five-year life is applicable. Original investment, additions, retirements, and salvage recoveries are the same as those set forth in example (3) of paragraph (b) of § 1.167(b)-1.

DEPRECIATION COMPUTATIONS ON A GROUP ACCOUNT UNDER REMAINING LIFE PLAN

<sup>1</sup> 1/2 year's amount.  
<sup>2</sup> F=Rate based on average service life (0.3333 in this example).

**§ 1.167(b)-4**

(3) *Other plans for application of the sum of the years-digits method.* Taxpayers who wish to use the sum of the years-digits method in computing depreciation for group, classified, or composite accounts in accordance with a sum of the years digits plan other than the remaining life plan described herein may do so only with the consent of the Commissioner. Request for permission to use plans other than that described shall be addressed to the Commissioner of Internal Revenue, Washington, D.C. 20224.

**§ 1.167(b)-4 Other methods.**

(a) Under section 167(b)(4) a taxpayer may use any consistent method of computing depreciation, such as the sinking fund method, provided depreciation allowances computed in accordance with such method do not result in accumulated allowances at the end of any taxable year greater than the total of the accumulated allowances which could have resulted from the use of the declining balance method described in section 167(b)(2). This limitation applies only during the first two-thirds of the useful life of the property. For example, an asset costing \$1,000 having a useful life of six years may be depreciated under the declining balance method in accordance with § 1.167(b)-2, at a rate of 33⅓ percent. During the first four years or ⅔ of its useful life, maximum depreciation allowances under the declining balance method would be as follows:

	Current depreciation	Accumulated depreciation	Balance
Cost of asset .....	.....	.....	\$1,000
First year .....	\$333	\$333	667
Second year .....	222	555	445
Third year .....	148	703	297
Fourth year .....	99	802	198

An annual allowance computed by any other method under section 167(b)(4) could not exceed \$333 for the first year, and at the end of the second year the total allowances for the two years could not exceed \$555. Likewise, the total allowances for the three years could not exceed \$703 and for the four years could not exceed \$802. This limitation would not apply in the fifth and sixth years. See section 167(c) and

§ 1.167(c)-1 for restriction on the use of certain methods.

(b) It shall be the responsibility of the taxpayer to establish to the satisfaction of the Commissioner that a method of depreciation under section 167(b)(4) is both a reasonable and consistent method and that it does not produce depreciation allowances in excess of the amount permitted under the limitations provided in such section.

**§ 1.167(c)-1 Limitations on methods of computing depreciation under section 167(b) (2), (3), and (4).**

(a) *In general.* (1) Section 167(c) provides limitations on the use of the declining balance method described in section 167(b)(2), the sum of the years-digits method described in section 167(b)(3), and certain other methods authorized by section 167(b)(4). These methods are applicable only to tangible property having a useful life of three years or more. If construction, reconstruction, or erection by the taxpayer began before January 1, 1954, and was completed after December 31, 1953, these methods apply only to that portion of the basis of the property which is properly attributable to such construction, reconstruction, or erection after December 31, 1953. Property is considered as constructed, reconstructed, or erected by the taxpayer if the work is done for him in accordance with his specifications. The portion of the basis of such property attributable to construction, reconstruction, or erection after December 31, 1953, consists of all costs of the property allocable to the period after December 31, 1953, including the cost or other basis of materials entering into such work. It is not necessary that such materials be acquired after December 31, 1953, or that they be new in use. If construction or erection by the taxpayer began after December 31, 1953, the entire cost or other basis of such construction or erection qualifies for these methods of depreciation. In the case of reconstruction of property, these methods do not apply to any part of the adjusted basis of such property on December 31, 1953. For purposes of this section, construction, reconstruction, or erection by the taxpayer begins when physical work is

started on such construction, reconstruction, or erection.

(2) If the property was not constructed, reconstructed, or erected by the taxpayer, these methods apply only if it was acquired after December 31, 1953, and if the original use of the property commences with the taxpayer and commences after December 31, 1953. For the purpose of the preceding sentence, property shall be deemed to be acquired when reduced to physical possession, or control. The term "original use" means the first use to which the property is put, whether or not such use corresponds to the use of such property by the taxpayer. For example, a reconditioned or rebuilt machine acquired after December 31, 1953, will not be treated as being put to original use by the taxpayer even though it is put to a different use, nor will a horse acquired for breeding purposes be treated as being put to original use by the taxpayer if prior to the purchase the horse was used for racing purposes. See §§ 1.167(b)-2, 1.167(b)-3, and 1.167(b)-4 for application of the various methods.

(3) Assets having an estimated average useful life of less than three years shall not be included in a group, classified, or composite account to which the methods described in §§ 1.167(b)-2, 1.167(b)-3, and 1.167(b)-4 are applicable. However, an incidental retirement of an asset from such an account prior to the expiration of a useful life of three years will not prevent the application of these methods to such an account.

(4) See section 381(c)(6) and the regulations thereunder for rules covering the use of depreciation methods by acquiring corporations in the case of certain corporate acquisitions.

(5) See §§ 1.1502-12(g) and 1.1502-13 for provisions dealing with depreciation of property received by a member of an affiliated group from another member of the group during a consolidated return period.

(6) Except in the cases described in subparagraphs (4) and (5) of this paragraph, the methods of depreciation described in §§ 1.167(b)-2, 1.167(b)-3, and 1.167(b)-4 are not applicable to property in the hands of a distributee, vendee, transferee, donee, or grantee unless the original use of the property begins with such person and the conditions re-

quired by section 167(c) and this section are otherwise met. For example, these methods of depreciation may not be used by a corporation with respect to property which it acquires from an individual or partnership in exchange for its stock. Similarly, if an individual or partnership receives property in a distribution upon dissolution of a corporation, these methods of depreciation may not be used with respect to property so acquired by such individual or partnership. As a further example, these methods of depreciation may not be used by a partnership with respect to contributed property, nor by a partner with respect to partnership property distributed to him. Moreover, where a partnership is entitled to use these depreciation methods, and the optional adjustment to basis of partnership property provided by section 743 is applicable, (i) in the case of an increase in the adjusted basis of the partnership property under such section, the transferee partner with respect to whom such adjustment is applicable shall not be entitled to use such methods with respect to such increase, and (ii) in the case of a decrease in the adjusted basis of the partnership property under such section, the transferee partner with respect to whom such adjustment is applicable shall include in his income an amount equal to the portion of the depreciation deducted by the partnership which is attributable to such decrease.

(b) *Illustrations.* (1) The application of these methods to property constructed, reconstructed, or erected by the taxpayer after December 31, 1953, may be illustrated by the following examples:

*Example (1).* If a building with a total cost of \$100,000 is completed after December 31, 1953, and the portion attributable to construction after December 31, 1953, is determined by engineering estimates or by cost accounting records to be \$30,000, the methods referred to in paragraph (a)(1) of this section are applicable only to the \$30,000 portion of the total.

*Example (2).* In 1954, a taxpayer has an old machine with an unrecovered cost of \$1,000. If he contracts to have it reconditioned, or reconditions it himself, at a cost of an additional \$5,000, only the \$5,000 may be depreciated under the methods referred to in paragraph (a)(1) of this section, whether or not the materials used for reconditioning are new in use.

*Example (3).* A taxpayer who acquired a building in 1940 makes major maintenance or repair expenditures in 1954 of a type which must be capitalized. For these expenditures the taxpayer may use a method of depreciation different from that used on the building (for example, the methods referred to in paragraph (a)(1) of this section) only if he accounts for such expenditures separately from the account which contained the original building. In such case, the unadjusted basis on any parts replaced shall be removed from the asset account and shall be charged to the appropriate depreciation reserve account. In the alternative he may capitalize such expenditures by charging them to the depreciation reserve account for the building.

(2) The application of these methods to property which was not constructed, reconstructed, or erected by the taxpayer but which was acquired after December 31, 1953, may be illustrated by the following examples:

*Example (1).* A taxpayer contracted in 1953 to purchase a new machine which he acquired in 1954 and put into first use in that year. He may use the methods referred to in paragraph (a)(1) of this section, in recovering the cost of the new machine.

*Example (2).* A taxpayer instead of reconditioning his old machine buys a "factory reconditioned" machine in 1954 to replace it. He cannot apply the methods referred to in paragraph (a)(1) of this section, to any part of the cost of the reconditioned machine since he is not the first user of the machine.

*Example (3).* In 1954, a taxpayer buys a house for \$20,000 which had been used as a personal residence and thus had not been subject to depreciation allowances. He makes a capital addition of \$5,000 and rents the property to another. The taxpayer may use the methods referred to in paragraph (a)(1) of this section, only with respect to the \$5,000 cost of the addition.

(c) *Election to use methods.* Subject to the limitations set forth in paragraph (a) of this section, the methods of computing the allowance for depreciation specified in section 167(b) (2), (3), and (4) may be adopted without permission and no formal election is required. In order for a taxpayer to elect to use these methods for any property described in paragraph (a) of this section, he need only compute depreciation thereon under any of these methods for any taxable year ending after December 31, 1953, in which the property may first be depreciated by him. The election with respect to any property shall not be binding with respect to acqui-

sitions of similar property in the same year or subsequent year which are set up in separate accounts. If a taxpayer has filed his return for a taxable year ending after December 31, 1953, for which the return is required to be filed on or before September 15, 1956, an election to compute the depreciation allowance under any of the methods specified in section 167 (b) or a change in such an election may be made in an amended return or claim for refund filed on or before September 15, 1956.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 7244, 37 FR 28897, Dec. 30, 1972; T.D. 8560, 59 FR 41674, Aug. 15, 1994; T.D. 8597, 60 FR 36679, July 18, 1995]

**§ 1.167(d)-1 Agreement as to useful life and rates of depreciation.**

After August 16, 1954, a taxpayer may, for taxable years ending after December 31, 1953, enter into an agreement with respect to the estimated useful life, method and rate of depreciation and treatment of salvage of any property which is subject to the allowance for depreciation. An application for such agreement may be made to the district director for the internal revenue district in which the taxpayer's return is required to be filed. Such application shall be filed in quadruplicate and shall contain in such detail as may be practical the following information:

- (a) The character and location of the property.
- (b) The original cost or other basis and date of acquisition.
- (c) Proper adjustments to the basis including depreciation accumulated to the first taxable year to be covered by the agreement.
- (d) Estimated useful life and estimated salvage value.
- (e) Method and rate of depreciation.
- (f) Any other facts and circumstances pertinent to making a reasonable estimate of the useful life of the property and its salvage value.

The agreement must be in writing and must be signed by the taxpayer and by the district director. The agreement must be signed in quadruplicate, and two of the signed copies will be returned to the taxpayer. The agreement

shall set forth its effective date, the estimated remaining useful life, the estimated salvage value, and rate and method of depreciation of the property and the facts and circumstances taken into consideration in adoption of the agreement, and shall relate only to depreciation allowances for such property on and after the effective date of the agreement. Such an agreement shall be binding on both parties until such time as facts and circumstances which were not taken into account in making the agreement are shown to exist. The party wishing to modify or change the agreement shall have the responsibility of establishing the existence of such facts and circumstances. Any change in the useful life or rate specified in such agreement shall be effective only prospectively, that is, it shall be effective beginning with the taxable year in which notice of the intention to change, including facts and circumstances warranting the adjustment of useful life and rate, is sent by the party proposing the change to the other party and is sent by registered mail, if such notice is mailed before September 3, 1958, or is sent by certified mail or registered mail, if such notice is mailed after September 2, 1958. A copy of the agreement (and any modification thereof) shall be filed with the taxpayer's return for the first taxable year which is affected by the agreement (or any modification thereof). A signed copy should be retained with the permanent records of the taxpayer. For rules relating to changes in method of depreciation, see § 1.167(e)-1 and section 446 and the regulations thereunder.

**§ 1.167(e)-1 Change in method.**

(a) *In general.* [Reserved]. For further guidance, see § 1.167(e)-1T(a).

(b) *Declining balance to straight line.* In the case of an account to which the method described in section 167(b)(2) is applicable, a taxpayer may change without the consent of the Commissioner from the declining balance method of depreciation to the straight line method at any time during the useful life of the property under the following conditions. Such a change may not be made if a provision prohibiting such a change is contained in an

agreement under section 167(d). When the change is made, the unrecovered cost or other basis (less a reasonable estimate for salvage) shall be recovered through annual allowances over the estimated remaining useful life determined in accordance with the circumstances existing at the time. With respect to any account, this change will be permitted only if applied to all the assets in the account as defined in § 1.167(a)-7. If the method of depreciation described in section 167(b)(2) (the declining balance method of depreciation using a rate not exceeding 200 percent of the straight line rate) is an acceptable method of depreciation with respect to a particular account, the taxpayer may elect under this paragraph to change to the straight line method of depreciation even if with respect to that particular account the declining balance method is permitted under a provision other than section 167(b)(2). Thus, for example, in the case of section 1250 property to which section 167(j)(1) is applicable, section 167(b) does not apply, but the declining balance method of depreciation using 150 percent of the straight line rate is an acceptable method of depreciation under section 167(j)(1)(B). Accordingly, the taxpayer may elect under this paragraph to change to the straight line method of depreciation with respect to such property. Similarly, if the taxpayer acquired used property before July 25, 1969, and adopted the 150 percent declining balance method of depreciation permitted with respect to such property under § 1.167(b)-0(b), the taxpayer may elect under this paragraph to change to the straight line method of depreciation with respect to such property. The taxpayer shall furnish a statement with respect to the property which is the subject of the change showing the date of acquisition, cost or other basis, amounts recovered through depreciation and other allowances, the estimated salvage value, the character of the property, the remaining useful life of the property, and such other information as may be required. The statement shall be attached to the taxpayer's return for the taxable year in which the change is made. A change to the straight line method must be adhered to for the entire taxable year of

the change and for all subsequent taxable years unless, with the consent of the Commissioner, a change to another method is permitted.

(c) *Change with respect to section 1245 property.* (1) In respect of his first taxable year beginning after December 31, 1962, a taxpayer may elect, without the consent of the Commissioner, to change the method of depreciation of section 1245 property (as defined in section 1245(a)(3)) from any declining balance method or sum of the years-digits method to the straight line method. With respect to any account (as defined in § 1.167(a)-7), this change may be made notwithstanding any provision to the contrary in an agreement under section 167(d), but such change shall constitute (as of the first day of such taxable year) a termination of such agreement as to all property in such account. With respect to any account, this change will be permitted only if applied to all the section 1245 property in the account. The election shall be made by a statement on, or attached to, the return for such taxable year filed on or before the last day prescribed by law, including any extensions thereof, for filing such return.

(2) When an election under this paragraph is made in respect of section 1245 property in an account, the unrecovered cost or other basis (less a reasonable estimate for salvage) of all the section 1245 property in the account shall be recovered through annual allowances over the estimated remaining useful life determined in accordance with the circumstances existing at that time. If there is other property in such account, the other property shall be placed in a separate account and depreciated by using the same method as was used before the change permitted by this paragraph, but the estimated useful life of such property shall be redetermined in accordance with § 1.167(b)-2, or 1.167(b)-3, whichever is applicable. The taxpayer shall maintain records which permit specific identification of the section 1245 property in the account with respect to which the election is made, and any other property in such account. The records shall also show for all the property in the account the date of acquisition, cost or other basis, amounts re-

covered through depreciation and other allowances, the estimated salvage value, the character of the property, and the remaining useful life of the property. A change to the straight line method under this paragraph must be adhered to for the entire taxable year of the change and for all subsequent taxable years unless, with the consent of the Commissioner, a change to another method is permitted.

(d) *Change with respect to section 1250 property.* (1) In respect of his first taxable year beginning after July 24, 1969, a taxpayer may elect, without the consent of the Commissioner, to change the method of depreciation of section 1250 property (as defined in section 1250(c)) from any declining balance method or sum of the years-digits method to the straight line method. With respect to any account (as defined in § 1.167(a)-7) this change may be made notwithstanding any provision to the contrary in an agreement under section 167(d), but such change will constitute (as of the first day of such taxable year) a termination of such agreement as to all property in such account. With respect to any account, this change will be permitted only if applied to all the section 1250 property in the account. The election shall be made by a statement on, or attached to, the return for such taxable year filed on or before the last day prescribed by law, including extensions thereof, for filing such return.

(2) When an election under this paragraph is made in respect of section 1250 property in an account, the unrecovered cost or other basis (less a reasonable estimate for salvage) of all the section 1250 property in the account shall be recovered through annual allowances over the estimated remaining useful life determined in accordance with the circumstances existing at that time. If there is other property in such account, the other property shall be placed in a separate account and depreciated by using the same method as was used before the change permitted by this paragraph, but the estimated useful life of such property shall be redetermined in accordance with § 1.167(b)-2 or § 1.167(b)-3, whichever is applicable. The taxpayer shall maintain records which permit specific

identification of the section 1250 property in the account with respect to which the election is made and any other property in such account. The records shall also show for all the property in the account the date of the acquisition, cost or other basis, amounts recovered through depreciation and other allowances, the estimated salvage value, the character of the property, and the estimated remaining useful life of the property. A change to the straight line method under this paragraph must be adhered to for the entire taxable year of the change and for all subsequent taxable years unless, with the consent of the Commissioner, a change to another method is permitted.

(e) *Effective date.* [Reserved]. For further guidance, see the first two sentences of § 1.167(e)-1T(e).

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6832, 30 FR 8573, July 7, 1965; T.D. 7166, 37 FR 5245, Mar. 11, 1972; T.D. 9105, 69 FR 7, Jan. 2, 2004]

**§ 1.167(e)-1T Change in method (temporary).**

(a) *In general.* (1) Any change in the method of computing the depreciation allowances with respect to a particular account (other than a change in method permitted or required by reason of the operation of former section 167(j)(2) and § 1.167(j)-3(c)) is a change in method of accounting, and such a change will be permitted only with the consent of the Commissioner, except that certain changes to the straight line method of depreciation will be permitted without consent as provided in former section 167(e)(1), (2), and (3). Except as provided in paragraphs (c) and (d) of this section, a change in method of computing depreciation will be permitted only with respect to all the assets contained in a particular account as defined in § 1.167(a)-7. Any change in the percentage of the current straight line rate under the declining balance method, for example, from 200 percent of the straight line rate to any other percent of the straight line rate, or any change in the interest factor used in connection with a compound interest or sinking fund method, will constitute a change in method of depreciation. Any request for a change in method of de-

preciation shall be made in accordance with section 446(e) and the regulations under section 446(e). For rules covering the use of depreciation methods by acquiring corporations in the case of certain corporate acquisitions, see section 381(c)(6) and the regulations under section 381(c)(6).

(2) Paragraphs (b), (c), and (d) of this section apply to property for which depreciation is determined under section 167 (other than under section 168, section 1400I, section 1400L, or under section 168 prior to its amendment by the Tax Reform Act of 1986 (100 Stat. 2121)) of the Internal Revenue Code.

(b)-(d) [Reserved]. For further guidance, see § 1.167(e)-1(b) through (d).

(e) *Effective date.* This section applies on or after December 30, 2003. For the applicability of regulations before December 30, 2003, see § 1.167(e)-1 in effect prior to December 30, 2003 (§ 1.167(e)-1 as contained in 26 CFR part 1 edition revised as of April 1, 2003). The applicability of this section expires on or before December 29, 2006.

[T.D. 9105, 69 FR 7, Jan. 2, 2004; 69 FR 5273, Feb. 4, 2004]

**§ 1.167(f)-1 Reduction of salvage value taken into account for certain personal property.**

(a) *In general.* For taxable years beginning after December 31, 1961, and ending after October 16, 1962, a taxpayer may reduce the amount taken into account as salvage value in computing the allowance for depreciation under section 167(a) with respect to "personal property" as defined in section 167(f)(2) and paragraph (b) of this section. The reduction may be made in an amount which does not exceed 10 percent of the basis of the property for determining depreciation, as of the time as of which salvage value is required to be determined (or when salvage value is redetermined), taking into account all adjustments under section 1016 other than (1) the adjustment under section 1016(a)(2) for depreciation allowed or allowable to the taxpayer, and (2) the adjustment under section 1016(a)(19) for a credit earned by the taxpayer under section 38, to the extent such adjustment is reflected in the basis for depreciation. See paragraph (c) of § 1.167(a)-1 for the definition of

salvage value, the time for making the determination, the redetermination of salvage value, and the general rules with respect to the treatment of salvage value. See also section 167(g) and § 1.167(g)-1 for basis for depreciation. A reduction of the amount taken into account as salvage value with respect to any property shall not be binding with respect to other property. In no event shall an asset (or an account) be depreciated below a reasonable salvage value after taking into account the reduction in salvage value permitted by section 167(f) and this section.

(b) *Definitions and special rules.* The following definitions and special rules apply for purposes of section 167(f) and this section.

(1) *Personal property.* The term “personal property” shall include only depreciable—

(i) Tangible personal property (as defined in section 48 and the regulations thereunder) and

(ii) Intangible personal property which has an estimated useful life (determined at the time of acquisition) of 3 years or more and which is acquired after October 16, 1962. Such term shall not include livestock. The term “livestock” includes horses, cattle, hogs, sheep, goats, and mink and other furbearing animals, irrespective of the use to which they are put or the purpose for which they are held. The original use of the property need not commence with the taxpayer so long as he acquired it after October 16, 1962; thus, the property may be new or used. For purposes of determining the estimated useful life, the provisions of paragraph (b) of § 1.167(a)-1 shall be applied. For rules determining when property is acquired, see subparagraph (2) of this paragraph. For purposes of determining the types of intangible personal property which are subject to the allowance for depreciation, see § 1.167(a)-3.

(2) *Acquired.* In determining whether property is acquired after October 16, 1962, property shall be deemed to be acquired when reduced to physical possession, or control. Property which has not been used in the taxpayer’s trade or business or held for the production of income and which is thereafter converted by the taxpayer to such use shall be deemed to be acquired on the

date of such conversion. In addition, property shall be deemed to be acquired if constructed, reconstructed, or erected by the taxpayer. If construction, reconstruction, or erection by the taxpayer began before October 17, 1962, and was completed after October 16, 1962, section 167(f) and this section apply only to that portion of the basis of the property which is properly attributable to such construction, reconstruction, or erection after October 16, 1962. Property is considered as constructed, reconstructed, or erected by the taxpayer if the work is done for him in accordance with his specifications. The portion of the basis of such property attributable to construction, reconstruction, or erection after October 16, 1962, consists of all costs of the property allocable to the period after October 16, 1962, including the cost or other basis of materials entering into such work. It is not necessary that such materials be acquired after October 16, 1962, or that they be new in use. If construction or erection by the taxpayer began after October 16, 1962, the entire cost or other basis of such construction or erection qualifies for the reduction provided for by section 167(f) and this section. In the case of reconstruction of property, section 167(f) and this section do not apply to any part of the adjusted basis of such property on October 16, 1962. For purposes of this section, construction, reconstruction, or erection by the taxpayer begins when physical work is started on such construction, reconstruction, or erection.

(c) *Illustrations.* The provisions of paragraphs (a) and (b) of this section may be illustrated by the following examples:

*Example (1).* Taxpayer A purchases a new asset for use in his business on January 1, 1963, for \$10,000. The asset qualifies for the investment credit under section 38 and for the additional first-year depreciation allowance under section 179. A is entitled to an investment credit of \$700 (7%×\$10,000) and elects to take an additional first-year depreciation allowance of \$2,000 (20%×\$10,000). The basis for depreciation (determined in accordance with the provisions of section 167(g) and § 1.167(g)-1) is computed as follows:

Purchase price ..... \$10,000

**Internal Revenue Service, Treasury**

**§ 1.167(f)-1**

Less: Adjustment required for taxable years beginning before Jan. 1, 1964, under section 1016(a)(19), for the investment credit .....	\$700	
Adjustment required under section 1016(a)(2) for the additional first-year depreciation allowance .....	2,000	
	2,700	
Basis for depreciation for the taxable year 1963 ....		7,300

However, the basis of the property for determining depreciation as of the time as of which salvage value is required to be determined is \$10,000, the purchase price of the property. A files his income tax returns on a calendar year basis and uses the straight line method of depreciation. A estimates that he will use the asset in his business for 10 years after which it will have a salvage value of \$500, which is less than \$1,000 (10%×\$10,000, the basis of the property for determining depreciation as of the time as of which salvage value is required to be determined). For the taxable year 1963 A may deduct \$730 as the depreciation allowance. As of January 1, 1964, the basis of the asset is increased by \$700 in accordance with paragraph (d) of §1.48-7. In computing his total depreciation allowance on the asset, A may reduce the amount taken into account as salvage value to zero and may claim depreciation deductions (including the additional first-year depreciation allowance) totaling \$10,000. See paragraph (d) of §1.48-7 for the computation of depreciation for taxable years beginning after December 31, 1963, where there is an increase in basis of property subject to the investment credit.

*Example (2).* Assume the same facts as in example (1) except that A in a subsequent taxable year redetermines the estimate of the useful life of the asset and at the same time also redetermines the estimate of salvage value. Assume also that at such time the only reductions reflected in the basis are for depreciation allowed or allowable. Accordingly, the reduction under section 167(f) and this section will be computed with regard to the purchase price and not the unrecovered basis for depreciation at the time of the redetermination.

*Example (3).* Assume the same facts as in example (1) except that A estimates that the asset will have a salvage value of \$1,200 at the end of its useful life. In computing his depreciation for the asset, A may reduce the amount to be taken into account as salvage value to \$200 (\$1,200-\$1,000). Accordingly, A may claim depreciation deductions (including the additional first-year depreciation allowance) totaling \$9,800, i.e., the purchase price of the property (\$10,000) less the amount taken into account as salvage value (\$200).

*Example (4).* Assume the same facts as in example (1) except that the taxpayer had

taken into account salvage value of only \$200 but that the estimated salvage value had actually been \$700. The amount of salvage value taken into account by the taxpayer is permissible since the reduction of salvage value by \$500 (\$700-\$200) would be within the limit provided for in section 167 (f), i.e., \$1,000 (10%×\$10,000).

*Example (5).* On January 1, 1963, taxpayer B, a taxicab operator, traded his old taxicab plus cash for a new one, which had an estimated useful life of three years, in a transaction qualifying as a nontaxable exchange. The old taxicab had an adjusted basis of \$2,500. B was allowed \$3,000 for his old taxicab and paid \$1,000 in cash. The basis of the new taxicab for determining depreciation (as determined under section 167(g) and §1.167(g)-1) is the adjusted basis of the old taxicab at the time of trade-in (\$2,500) plus the additional cash paid out (\$1,000), or \$3,500. In computing his depreciation allowance on the new taxicab, B may reduce the amount taken into account as salvage value by \$350 (10% of \$3,500).

*Example (6).* Taxpayer C purchases a new asset for use in his business on January 1, 1963, for \$10,000. At the time of purchase, the asset has an estimated useful life of 10 years and an estimated salvage value of \$1,500. C elects to compute his depreciation allowance for the asset by the declining balance method of depreciation, using a rate of 20% which is twice the normal straight line rate of 10% (without adjustment for salvage value). C files his income tax returns on a calendar year basis. In computing his depreciation allowance for the year 1966, C changes his method of determining the depreciation allowance for the asset from the declining balance method to the straight line method (in which salvage value is accounted for in determining the annual depreciation allowances) in accordance with the provisions of section 167(e) and paragraph (b) of §1.167(e)-1. He also wishes to reduce the amount of salvage value taken into account in accordance with the provisions of section 167(f) and this section. At the close of the year 1966, the only reductions reflected in the basis of the asset are for depreciation allowances. Thus, C may reduce the amount of salvage value taken into account by \$1,000 (10%×\$10,000, the basis of the asset when it was acquired), and, therefore, will account for salvage value of only \$500 in computing his depreciation allowance for the asset in 1966 and subsequent years.

*Example (7).* Taxpayer D purchases a station wagon for his personal use on January 1, 1962, for \$4,500. On January 1, 1963, D converts the use of the station wagon to his business, and at that time it has an estimated useful life of 4 years, an estimated salvage value of \$500, and a basis of \$3,000 (as determined under section 167 (g) and §1.167 (g)-1). Thus,

**§ 1.167(g)-1**

for purposes of section 167 (f) and this section, D is deemed to have acquired the station wagon on January 1, 1963. D elects the straight line method of depreciation in computing the depreciation allowance for the station wagon and also wishes to reduce the amount of salvage value taken into account in accordance with the provisions of section 167(f) and this section. Accordingly, D may reduce the amount of salvage value taken into account by \$300 (10% of \$3,000). D files his income tax returns on a calendar year basis. His depreciation allowance for the year 1963 would be computed as follows:

Basis for depreciation .....	\$3,000	
Less:		
Salvage value .....	\$500	
Reduction permitted by section 167(f) .....	300	
		200
Amount to be depreciated over the useful life .....		2,800

D's depreciation allowance on the station wagon for the year 1963 would be \$700 (\$2,800 divided by 4, the remaining useful life).

[T.D. 6712, 29 FR 3654, Mar. 24, 1964, as amended by T.D. 6838, 30 FR 9064, July 20, 1965]

**§ 1.167(g)-1 Basis for depreciation.**

The basis upon which the allowance for depreciation is to be computed with respect to any property shall be the adjusted basis provided in section 1011 for the purpose of determining gain on the sale or other disposition of such property. In the case of property which has not been used in the trade or business or held for the production of income and which is thereafter converted to such use, the fair market value on the date of such conversion, if less than the adjusted basis of the property at that time, is the basis for computing depreciation.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960. Redesignated, T.D. 6712, 29 FR 3653, Mar. 24, 1964]

**§ 1.167(h)-1 Life tenants and beneficiaries of trusts and estates.**

(a) *Life tenants.* In the case of property held by one person for life with remainder to another person, the deduction for depreciation shall be computed as if the life tenant were the absolute owner of the property so that he will be entitled to the deduction during his life, and thereafter the deduction, if any, shall be allowed to the remainderman.

(b) *Trusts.* If property is held in trust, the allowable deduction is to be appor-

tioned between the income beneficiaries and the trustee on the basis of the trust income allocable to each, unless the governing instrument (or local law) requires or permits the trustee to maintain a reserve for depreciation in any amount. In the latter case, the deduction is first allocated to the trustee to the extent that income is set aside for a depreciation reserve, and any part of the deduction in excess of the income set aside for the reserve shall be apportioned between the income beneficiaries and the trustee on the basis of the trust income (in excess of the income set aside for the reserve) allocable to each. For example:

(1) If under the trust instrument or local law the income of a trust computed without regard to depreciation is to be distributed to a named beneficiary, the beneficiary is entitled to the deduction to the exclusion of the trustee.

(2) If under the trust instrument or local law the income of a trust is to be distributed to a named beneficiary, but the trustee is directed to maintain a reserve for depreciation in any amount, the deduction is allowed to the trustee (except to the extent that income set aside for the reserve is less than the allowable deduction). The same result would follow if the trustee sets aside income for a depreciation reserve pursuant to discretionary authority to do so in the governing instrument.

No effect shall be given to any allocation of the depreciation deduction which gives any beneficiary or the trustee a share of such deduction greater than his pro rata share of the trust income, irrespective of any provisions in the trust instrument except as otherwise provided in this paragraph when the trust instrument or local law requires or permits the trustee to maintain a reserve for depreciation.

(c) *Estates.* In the case of an estate the allowable deduction shall be apportioned between the estate and the heirs legatees, and devisees on the basis of income of the estate which is allocable to each.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960. Redesignated, T.D. 6712, 29 FR 3653, Mar. 24, 1964]

**§ 1.167(i)-1 Depreciation of improvements in the case of mines, etc.**

Property used in the trade or business or held for the production of income which is subject to the allowance for depreciation provided in section 611 shall be treated for all purposes of the Code as if it were property subject to the allowance for depreciation under section 167. The preceding sentence shall not limit the allowance for depreciation otherwise allowable under section 611.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960. Redesignated, T.D. 6712, 29 FR 3653, Mar. 24, 1964]

**§ 1.167(l)-1 Limitations on reasonable allowance in case of property of certain public utilities.**

(a) *In general*—(1) *Scope*. Section 167(l) in general provides limitations on the use of certain methods of computing a reasonable allowance for depreciation under section 167(a) with respect to “public utility property” (see paragraph (b) of this section) for all taxable years for which a Federal income tax return was not filed before August 1, 1969. The limitations are set forth in paragraph (c) of this section for “pre-1970 public utility property” and in paragraph (d) of this section for “post-1969 public utility property.” Under section 167(l), a taxpayer may always use a straight line method (or other “subsection (l) method” as defined in paragraph (f) of this section). In general, the use of a method of depreciation other than a subsection (l) method is not prohibited by section 167(l) for any taxpayer if the taxpayer uses a “normalization method of regulated accounting” (described in paragraph (h) of this section). In certain cases, the use of a method of depreciation other than a subsection (l) method is not prohibited by section 167(l) if the taxpayer used a “flow-through method of regulated accounting” described in paragraph (i) of this section) for its “July 1969 regulated accounting period” (described in paragraph (g) of this section) whether or not the taxpayer uses either a normalization or a flow-through method of regulated accounting after its July 1969 regulated accounting period. However, in no event may a method of depreciation other than a subsection (l) method be used in

the case of pre-1970 public utility property unless such method of depreciation is the “applicable 1968 method” (within the meaning of paragraph (e) of this section). The normalization requirements of section 167(l) with respect to public utility property defined in section 167(l)(3)(A) pertain only to the deferral of Federal income tax liability resulting from the use of an accelerated method of depreciation for computing the allowance for depreciation under section 167 and the use of straight line depreciation for computing tax expense and depreciation expense for purposes of establishing cost of services and for reflecting operating results in regulated books of account. Regulations under section 167(l) do not pertain to other book-tax timing differences with respect to State income taxes, F.I.C.A. taxes, construction costs, or any other taxes and items. The rules provided in paragraph (h)(6) of this section are to insure that the same time period is used to determine the deferred tax reserve amount resulting from the use of an accelerated method of depreciation for cost of service purposes and the reserve amount that may be excluded from the rate base or included in no-cost capital in determining such cost of services. The formula provided in paragraph (h)(6)(ii) of this section is to be used in conjunction with the method of accounting for the reserve for deferred taxes (otherwise proper under paragraph (h)(2) of this section) in accordance with the accounting requirements prescribed or approved, if applicable, by the regulatory body having jurisdiction over the taxpayer’s regulated books of account. The formula provides a method to determine the period of time during which the taxpayer will be treated as having received amounts credited or charged to the reserve account so that the disallowance of earnings with respect to such amounts through rate base exclusion or treatment as no-cost capital will take into account the factor of time for which such amounts are held by the taxpayer. The formula serves to limit the amount of such disallowance.

(2) *Methods of depreciation*. For purposes of section 167(l), in the case of a

declining balance method each different uniform rate applied to the unrecovered cost or other basis of the property is a different method of depreciation. For purposes of section 167(l), a change in a uniform rate of depreciation due to a change in the useful life of the property or a change in the taxpayer's unrecovered cost or other basis for the property is not a change in the method of depreciation. The use of "guideline lives" or "class lives" for Federal income tax purposes and different lives on the taxpayer's regulated books of account is not treated for purposes of section 167(l) as a different method of depreciation. Further, the use of an unrecovered cost or other basis or salvage value for Federal income tax purposes different from the basis or salvage value used on the taxpayer's regulated books of account is not treated as a different method of depreciation.

(3) *Application of certain other provisions to public utility property.* For rules with respect to application of the investment credit to public utility property, see section 46(e). For rules with respect to the application of the class life asset depreciation range system, including the treatment of the use of "class lives" for Federal income tax purposes and different lives on the taxpayer's regulated books of account, see § 1.167(a)-11 and § 1.167(a)-12.

(4) *Effect on agreements under section 167(d).* If the taxpayer has entered into an agreement under section 167(d) as to any public utility property and such agreement requires the use of a method of depreciation prohibited by section 167(l), such agreement shall terminate as to such property. The termination, in accordance with this subparagraph, shall not affect any other property (whether or not public utility property) covered by the agreement.

(5) *Effect of change in method of depreciation.* If, because the method of depreciation used by the taxpayer with respect to public utility property is prohibited by section 167(l), the taxpayer changes to a method of depreciation not prohibited by section 167(l), then when the change is made the unrecovered cost or other basis shall be recovered through annual allowances over the estimated remaining useful

life determined in accordance with the circumstances existing at that time.

(b) *Public utility property*—(1) *In general.* Under section 167(l)(3)(A), property is "public utility property" during any period in which it is used predominantly in a "section 167(l) public utility activity". The term "section 167(l) public utility activity" means the trade or business of the furnishing or sale of—

(i) Electrical energy, water, or sewage disposal services,

(ii) Gas or steam through a local distribution system,

(iii) Telephone services,

(iv) Other communication services (whether or not telephone services) if furnished or sold by the Communications Satellite Corporation for purposes authorized by the Communications Satellite Act of 1962 (47 U.S.C. 701), or

(v) Transportation of gas or steam by pipeline,

if the rates for such furnishing or sale, as the case may be, are regulated, *i.e.*, have been established or approved by a regulatory body described in section 167(l)(3)(A). The term "regulatory body described in section 167(l)(3)(A)" means a State (including the District of Columbia) or political subdivision thereof, any agency or instrumentality of the United States, or a public service or public utility commission or other body of any State or political subdivision thereof similar to such a commission. The term "established or approved" includes the filing of a schedule of rates with a regulatory body which has the power to approve such rates, even though such body has taken no action on the filed schedule or generally leaves undisturbed rates filed by the taxpayer involved.

(2) *Classification of property.* If property is not used solely in a section 167(l) public utility activity, such property shall be public utility property if its predominant use is in a section 167(l) public utility activity. The predominant use of property for any period shall be determined by reference to the proper accounts to which expenditures for such property are chargeable under the system of regulated accounts required to be used for the period for which the determination

is made and in accordance with the principles of §1.46-3(g)(4) (relating to credit for investment in certain depreciable property). Thus, for example, for purposes of determining whether property is used predominantly in the trade or business of the furnishing or sale of transportation of gas by pipeline, or furnishing or sale of gas through a local distribution system, or both, the rules prescribed in §1.46-3(g)(4) apply, except that accounts 365 through 371, inclusive (Transmission Plant), shall be added to the accounts enumerated in subdivision (i) of such paragraph (g)(4).

(c) *Pre-1970 public utility property*—(1) *Definition.* (i) Under section 167(l)(3)(B), the term “pre-1970 public utility property” means property which was public utility property at any time before January 1, 1970. If a taxpayer acquires pre-1970 public utility property, such property shall be pre-1970 public utility property in the hands of the taxpayer even though such property may have been acquired by the taxpayer in an arm’s-length cash sale at fair market value or in a tax-free exchange. Thus, for example, if corporation X which is a member of the same controlled group of corporations (within the meaning of section 1563(a)) as corporation Y sells pre-1970 public utility property to Y, such property is pre-1970 public utility property in the hands of Y. The result would be the same if X and Y were not members of the same controlled group of corporations.

(ii) If the basis of public utility property acquired by the taxpayer in a transaction is determined in whole or in part by reference to the basis of any of the taxpayer’s pre-1970 public utility property by reason of the application of any provision of the code, and if immediately after the transaction the adjusted basis of the property acquired is less than 200 percent of the adjusted basis of such pre-1970 public utility property immediately before the transaction, the property acquired is pre-1970 public utility property.

(2) *Methods of depreciation not prohibited.* Under section 167(l)(1), in the case of pre-1970 public utility property, the term “reasonable allowance” as used in section 167(a) means, for a taxable year for which a Federal income tax return

was not filed before August 1, 1969, and in which such property is public utility property, an allowance (allowable without regard to section 167(l)) computed under—

(i) A subsection (l) method, or  
(ii) The applicable 1968 method (other than a subsection (l) method) used by the taxpayer for such property, but only if—

(a) The taxpayer uses in respect of such taxable year a normalization method of regulated accounting for such property.

(b) The taxpayer used a flow-through method of regulated accounting for such property for its July 1969 regulated accounting period, or

(c) The taxpayer’s first regulated accounting period with respect to such property is after the taxpayer’s July 1969 regulated accounting period and the taxpayer used a flow-through method of regulated accounting for its July 1969 regulated accounting period for public utility property of the same kind (or if there is no property of the same kind, property of the most similar kind) most recently placed in service. See paragraph (e)(5) of this section for determination of same (or similar) kind.

(3) *Flow-through method of regulated accounting in certain cases.* See paragraph (e)(6) of this section for treatment of certain taxpayers with pending applications for change in method of accounting as being deemed to have used a flow-through method of regulated accounting for the July 1969 regulated accounting period.

(4) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

*Example (1).* Corporation X, a calendar-year taxpayer subject to the jurisdiction of a regulatory body described in section 167(l)(3)(A), used the straight line method of depreciation (a subsection (l) method) for all of its public utility property for which depreciation was allowable on its Federal income tax return for 1967 (the latest taxable year for which X, prior to August 1, 1969, filed a return). Assume that under paragraph (e) of this section, X’s applicable 1968 method is a subsection (l) method with respect to all of its public utility property. Thus, with respect to its pre-1970 public utility property, X may only use a straight line method (or any other subsection (l) method) of depreciation for all taxable years after 1967.

*Example (2).* Corporation Y, a calendar-year taxpayer subject to the jurisdiction of the Federal Power Commission, is engaged exclusively in the transportation of gas by pipeline. On its Federal income tax return for 1967 (the latest taxable year for which Y, prior to August 1, 1969, filed a return), Y used the declining balance method of depreciation using a rate of 150 percent of the straightline rate for all of its nonsection 1250 public utility property with respect to which depreciation was allowable. Assume that with respect to all of such property, Y's applicable 1968 method under paragraph (e) of this section is such 150 percent declining balance method. Assume that Y used a normalization method of regulated accounting for all relevant regulated accounting periods. If Y continues to use a normalization method of regulated accounting, Y may compute its reasonable allowance for purposes of section 167(a) using such 150 percent declining balance method for its nonsection 1250 pre-1970 public utility property for all taxable years beginning with 1968, provided the use of such method is allowable without regard to section 167(l). Y may also use a subsection (l) method for any of such pre-1970 public utility property for all taxable years beginning after 1967. However, because each different uniform rate applied to the basis of the property is a different method of depreciation, Y may not use a declining balance method of depreciation using a rate of twice the straight line rate for any of such pre-1970 public utility property for any taxable year beginning after 1967.

*Example (3).* Assume the same facts as in example (2) except that with respect to all of its nonsection 1250 pre-1970 public utility property accounted for in its July 1969 regulated accounting period Y used a flow-through method of regulated accounting for such period. Assume further that such property is the property on the basis of which the applicable 1968 method is established for pre-1970 public utility property of the same kind, but having a first regulated accounting period after the taxpayer's July 1969 regulated accounting period. Beginning with 1968, with respect to such property Y may compute its reasonable allowance for purposes of section 167(a) using the declining balance method of depreciation and a rate of 150 percent of the straight line rate, whether it uses a normalization or flow-through method of regulated accounting after its July 1969 regulated accounting period, provided the use of such method is allowable without regard to section 167(l).

(d) *Post-1969 public utility property*—(1) *In general.* Under section 167(l)(3)(C), the term “post-1969 public utility property” means any public utility prop-

erty which is not pre-1970 public utility property.

(2) *Methods of depreciation not prohibited.* Under section 167(l)(2), in the case of post-1969 public utility property, the term “reasonable allowance” as used in section 167(a) means, for a taxable year, an allowance (allowable without regard to section 167(l)) computed under—

(i) A subsection (l) method,

(ii) A method of depreciation otherwise allowable under section 167 if, with respect to the property, the taxpayer uses in respect of such taxable year a normalization method of regulated accounting, or

(iii) The taxpayer's applicable 1968 method (other than a subsection (l) method) with respect to the property in question, if the taxpayer used a flow-through method of regulated accounting for its July 1969 regulated accounting period for the property of the same (or similar) kind most recently placed in service, provided that the property in question is not property to which an election under section 167(l)(4)(A) applies. See § 1.167(l)(2) for rules with respect to an election under section 167(l)(4)(A). See paragraph (e)(5) of this section for definition of same (or similar) kind.

(3) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

*Example (1).* Corporation X is engaged exclusively in the trade or business of the transportation of gas by pipeline and is subject to the jurisdiction of the Federal Power Commission. With respect to all its public utility property, X's applicable 1968 method (as determined under paragraph (e) of this section) is the straight line method of depreciation. X may determine its reasonable allowance for depreciation under section 167(a) with respect to its post-1969 public utility property under a straight line method (or other subsection (l) method) or, if X uses a normalization method of regulated accounting, any other method of depreciation, provided that the use of such other method is allowable under section 167 without regard to section 167(l).

*Example (2).* Assume the same facts as in example (1) except that with respect to all of X's post-1969 public utility property the applicable 1968 method (as determined under paragraph (e) of this section) is the declining balance method using a rate of 150 percent of the straight line rate. Assume further that all of X's pre-1970 public utility property was

accounted for in its July 1969 regulated accounting period, and that X used a flow-through method of regulated accounting for such period. X may determine its reasonable allowance for depreciation under section 167 with respect to its post-1969 public utility property by using the straight line method of depreciation (or any other subsection (l) method), by using any method otherwise allowable under section 167 (such as a declining balance method) if X uses a normalization method of regulated accounting, or, by using the declining balance method using a rate of 150 percent of the straight line rate, whether or not X uses a normalization or a flow-through method of regulated accounting.

(e) *Applicable 1968 method*—(1) *In general.* Under section 167(1)(3)(D), except as provided in subparagraphs (3) and (4) of this paragraph, the term “applicable 1968 method” means with respect to any public utility property—

(i) The method of depreciation properly used by the taxpayer in its Federal income tax return with respect to such property for the latest taxable year for which a return was filed before August 1, 1969,

(ii) If subdivision (i) of this subparagraph does not apply, the method of depreciation properly used by the taxpayer in its Federal income tax return for the latest taxable year for which a return was filed before August 1, 1969, with respect to public utility property of the same kind (or if there is no property of the same kind, property of the most similar kind) most recently placed in service before the end of such latest taxable year, or

(iii) If neither subdivision (i) nor (ii) of this subparagraph applies, a subsection (l) method.

If, on or after August 1, 1969, the taxpayer files an amended return for the taxable year referred to in subdivisions (i) and (ii) of this subparagraph, such amended return shall not be taken into consideration in determining the applicable 1968 method. The term “applicable 1968 method” if such new method results to any public utility property, for the year of change and subsequent years, a method of depreciation otherwise allowable under section 167 to which the taxpayer changes from an applicable 1968 method if such new method results in a lesser allowance for depreciation for such property

under section 167 in the year of change and the taxpayer secures the Commissioner’s consent to the change in accordance with the procedures of section 446(e) and § 1.446-1.

(2) *Placed in service.* For purposes of this section, property is placed in service on the date on which the period for depreciation begins under section 167. See, for example, § 1.167(a)-10(b) and § 1.167(a)-11(c)(2). If under an averaging convention property which is placed in service (as defined in § 1.46-3(d)(ii)) by the taxpayer on different dates is treated as placed in service on the same date, then for purposes of section 167(1) the property shall be treated as having been placed in service on the date the period for depreciation with respect to such property would begin under section 167 absent such averaging convention. Thus, for example, if, except for the fact that the averaging convention used assumes that all additions and retirements made during the first half of the year were made on the first day of the year, the period of depreciation for two items of public utility property would begin on January 10 and March 15, respectively, then for purposes of determining the property of the same (or similar) kind most recently placed in service, such items of property shall be treated as placed in service on January 10 and March 15, respectively.

(3) *Certain section 1250 property.* If a taxpayer is required under section 167(j) to use a method of depreciation other than its applicable 1968 method with respect to any section 1250 property, the term “applicable 1968 method” means the method of depreciation allowable under section 167(j) which is the most nearly comparable method to the applicable 1968 method determined under subparagraph (1) of this paragraph. For example, if the applicable 1968 method on new section 1250 property is the declining balance method using 200 percent of the straight line rate, the most nearly comparable method allowable for new section 1250 property under section 167(j) would be the declining balance method using 150 percent of the straight line rate. If the applicable 1968 method determined under subparagraph (1) of this paragraph is the sum of the years-digits

method, the term “most nearly comparable method” refers to any method of depreciation allowable under section 167(j).

(4) *Applicable 1968 method in certain cases.* (i)(a) Under section 167(l)(3)(E), if the taxpayer evidenced within the time and manner specified in (b) of this subdivision (i) the intent to use a method of depreciation under section 167 (other than its applicable 1968 method as determined under subparagraph (1) or (3) of this paragraph or a subsection (1) method) with respect to any public utility property, such method of depreciation shall be deemed to be the taxpayer’s applicable 1968 method with respect to such public utility property and public utility property of the same (or most similar) kind subsequently placed in service.

(b) Under this subdivision (i), the intent to use a method of depreciation under section 167 is evidenced—

(1) By a timely application for permission for a change in method of accounting filed by the taxpayer before August 1, 1969, or

(2) By the use of such method of depreciation in the computation by the taxpayer of its tax expense for purposes of reflecting operating results in its regulated books of account for its July 1969 regulated accounting period, as established in the manner prescribed in paragraph (g)(1) (i), (ii), or (iii) of this section.

(ii)(a) If public utility property is acquired in a transaction in which its basis in the hands of the transferee is determined in whole or in part by reference to its basis in the hands of the transferor by reason of the application of any provision of the Code, or in a transfer (including any purchase for cash or in exchange) from a related person, then in the hands of the transferee the applicable 1968 method with respect to such property shall be determined by reference to the treatment in respect of such property in the hands of the transferor.

(b) For purposes of this subdivision (ii), the term “related person” means a person who is related to another person if either immediately before or after the transfer—

(1) The relationship between such persons would result in a disallowance

of losses under section 267 (relating to disallowance of losses, etc., between related taxpayers) or section 707(b) (relating to losses disallowed, etc., between partners and controlled partnerships) and the regulations thereunder, or

(2) Such persons are members of the same controlled group of corporations, as defined in section 1563(a) (relating to definition of controlled group of corporations), except that “more than 50 percent” shall be substituted for “at least 80 percent” each place it appears in section 1563(a) and the regulations thereunder.

(5) *Same or similar.* The classification of property as being of the same (or similar) kind shall be made by reference to the function of the public utility to which the primary use of the property relates. Property which performs the identical function in the identical manner shall be treated as property of the same kind. The determination that property is of a similar kind shall be made by reference to the proper account to which expenditures for the property are chargeable under the system of regulated accounts required to be used by the taxpayer for the period in which the property in question was acquired. Property, the expenditure for which is chargeable to the same account, is property of the most similar kind. Property, the expenditure for which is chargeable to an account for property which serves the same general function, is property of a similar kind. Thus, for example, if corporation X, a natural gas company, subject to the jurisdiction of the Federal Power Commission, had property properly chargeable to account 366 (relating to transmission plant structures and improvements) acquired an additional structure properly chargeable to account 366, under the uniform system of accounts prescribed for natural gas companies (class A and class B) by the Federal Power Commission, effective September 1, 1968, the addition would constitute property of the same kind if it performed the identical function in the identical manner. If, however, the addition did not perform the identical function in the identical manner, it would be property of the most similar kind.

**Internal Revenue Service, Treasury**

**§ 1.167(l)-1**

(6) *Regulated method of accounting in certain cases.* Under section 167(l)(4)(B), if with respect to any pre-1970 public utility property the taxpayer filed a timely application for change in method of accounting referred to in subparagraph (4)(i)(b)(I) of this paragraph and with respect to property of the same (or similar) kind most recently placed in service the taxpayer used a flow-through method of regulated accounting for its July 1969 regulated accounting period, then for purposes of section 167(l)(1)(B) and paragraph (c) of this section the taxpayer shall be deemed to have used a flow-through method of regulated accounting with respect to such pre-1970 public utility property.

(7) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

*Example (1).* Corporation X is a calendar-year taxpayer. On its Federal income tax return for 1967 (the latest taxable year for which X, prior to August 1, 1969, filed a return) X used a straight line method of depreciation with respect to certain public utility property placed in service before 1965 and used the declining balance method of depreciation using 200 percent of the straight line rate (double declining balance) with respect to the same kind of public utility property placed in service after 1964. In 1968 and 1970, X placed in service additional public utility property of the same kind. The applicable 1968 method with respect to the above described public utility property is shown in the following chart:

Property held in 1970	Placed in service	Method on 1967 return	Applicable 1968 method
Group 1 .....	Before 1965	Straight line ..	Straight line.
Group 2 .....	After 1964 and before 1968.	Double declining balance.	Double declining balance.
Group 3 .....	After 1967 and before 1969.	.....	Do.
Group 4 .....	After 1968 .....	.....	Do.

*Example (2).* Corporation Y is a calendar-year taxpayer engaged exclusively in the trade or business of the furnishing of electrical energy. In 1954, Y placed in service hydroelectric generators and for all purposes Y has taken straight line depreciation with respect to such generators. In 1960, Y placed in service fossil fuel generators and for all purposes since 1960 has used the declining balance method of depreciation using a rate of 150 percent of the straight line rate (computed without reduction for salvage) with respect to such generators. After 1960 and before 1970 Y did not place in service any gen-

erators. In 1970, Y placed in service additional hydroelectric generators. The applicable 1968 method with respect to the hydroelectric generators placed in service in 1970 would be the straight line method because it was the method used by Y on its return for the latest taxable year for which Y filed a return before August 1, 1969, with respect to property of the same kind (*i.e.*, hydroelectric generators) most recently placed in service.

*Example (3).* Assume the same facts as in example (2), except that the generators placed in service in 1970 were nuclear generators. The applicable 1968 method with respect to such generators is the declining balance method using a rate of 150 percent of the straight line rate because, with respect to property of the most similar kind (fossil fuel generators) most recently placed in service, Y used such declining balance method on its return for the latest taxable year for which it filed a return before August 1, 1969.

(f) *Subsection (l) method.* Under section 167(l)(3)(F), the term “subsection (l) method” means a reasonable and consistently applied ratable method of computing depreciation which is allowable under section 167(a), such as, for example, the straight line method or a unit of production method or machine-hour method. The term “subsection (l) method” does not include any declining balance method (regardless of the uniform rate applied), sum of the years-digits method, or method of depreciation which is allowable solely by reason of section 167(b)(4) or (j)(1)(C).

(g) *July 1969 regulated accounting period—(1) In general.* Under section 167(l)(3)(I), the term “July 1969 regulated accounting period” means the taxpayer’s latest accounting period ending before August 1, 1969, for which the taxpayer regularly computed, before January 1, 1970, its tax expense for purposes of reflecting operating results in its regulated books of account. The computation by the taxpayer of such tax expense may be established by reference to the following:

(i) The most recent periodic report of a period ending before August 1, 1969, required by a regulatory body described in section 167(l)(3)(A) having jurisdiction over the taxpayer’s regulated books of account which was filed with such body before January 1, 1970 (whether or not such body has jurisdiction over rates).

(ii) If subdivision (i) of this subparagraph does not apply, the taxpayer’s

most recent report to its shareholders for a period ending before August 1, 1969, but only if such report was distributed to the shareholders before January 1, 1970, and if the taxpayer's stocks or securities are traded in an established securities market during such period. For purposes of this subdivision, the term "established securities market" has the meaning assigned to such term in § 1.453-3(d)(4).

(iii) If subdivisions (i) and (ii) of this subparagraph do not apply, entries made to the satisfaction of the district director before January 1, 1970, in its regulated books of account for its most recent accounting period ending before August 1, 1969.

(2) *July 1969 method of regulated accounting in certain acquisitions.* If public utility property is acquired in a transaction in which its basis in the hands of the transferee is determined in whole or in part by reference to its basis in the hands of the transferor by reason of the application of any provision of the Code, or in a transfer (including any purchase for cash or in exchange) from a related person, then in the hands of the transferee the method of regulated accounting for such property's July 1969 regulated accounting period shall be determined by reference to the treatment in respect of such property in the hands of the transferor. See paragraph (e)(4)(ii) of this section for definition of "related person".

(3) *Determination date.* For purposes of section 167(l), any reference to a method of depreciation under section 167(a), or a method of regulated accounting, taken into account by the taxpayer in computing its tax expense for its July 1969 regulated accounting period shall be a reference to such tax expense as shown on the periodic report or report to shareholders to which subparagraph (1) (i) or (ii) of this paragraph applies or the entries made on the taxpayer's regulated books of account to which subparagraph (1)(iii) of this paragraph applies. Thus, for example, assume that regulatory body A having jurisdiction over public utility property with respect to X's regulated books of account requires X to reflect its tax expense in such books using the same method of depreciation which regulatory body B uses for determining X's cost of service

for ratemaking purposes. If in 1971, in the course of approving a rate change for X, B retroactively determines X's cost of service for ratemaking purposes for X's July 1969 regulated accounting period using a method of depreciation different from the method reflected in X's regulated books of account as of January 1, 1970, the method of depreciation used by X for its July 1969 regulated accounting period would be determined without reference to the method retroactively used by B in 1971.

(h) *Normalization method of accounting—(1) In general.* (i) Under section 167(l), a taxpayer uses a normalization method of regulated accounting with respect to public utility property—

(a) If the same method of depreciation (whether or not a subsection (l) method) is used to compute both its tax expense and its depreciation expense for purposes of establishing cost of service for ratemaking purposes and for reflecting operating results in its regulated books of account, and

(b) If to compute its allowance for depreciation under section 167 it uses a method of depreciation other than the method it used for purposes described in (a) of this subdivision, the taxpayer makes adjustments consistent with subparagraph (2) of this paragraph to a reserve to reflect the total amount of the deferral of Federal income tax liability resulting from the use with respect to all of its public utility property of such different methods of depreciation.

(ii) In the case of a taxpayer described in section 167(l) (1) (B) or (2) (C), the reference in subdivision (i) of this subparagraph shall be a reference only to such taxpayer's "qualified public utility property". See § 1.167(l)-2(b) for definition of "qualified public utility property".

(iii) Except as provided in this subparagraph, the amount of Federal income tax liability deferred as a result of the use of different method of depreciation under subdivision (i) of this subparagraph is the excess (computed without regard to credits) of the amount the tax liability would have been had a subsection (l) method been used over the amount of the actual tax liability. Such amount shall be taken into account for the taxable year in

which such different methods of depreciation are used. If, however, in respect of any taxable year the use of a method of depreciation other than a subsection (l) method for purposes of determining the taxpayer's reasonable allowance under section 167(a) results in a net operating loss carryover (as determined under section 172) to a year succeeding such taxable year which would not have arisen (or an increase in such carryover which would not have arisen) had the taxpayer determined his reasonable allowance under section 167(a) using a subsection (l) method, then the amount and time of the deferral of tax liability shall be taken into account in such appropriate time and manner as is satisfactory to the district director.

(2) *Adjustments to reserve.* (i) The taxpayer must credit the amount of deferred Federal income tax determined under subparagraph (1)(i) of this paragraph for any taxable year to a reserve for deferred taxes, a depreciation reserve, or other reserve account. The taxpayer need not establish a separate reserve account for such amount but the amount of deferred tax determined under subparagraph (1)(i) of this paragraph must be accounted for in such a manner so as to be readily identifiable. With respect to any account, the aggregate amount allocable to deferred tax under section 167(l) shall not be reduced except to reflect the amount for any taxable year by which Federal income taxes are greater by reason of the prior use of different methods of depreciation under subparagraph (1)(i) of this paragraph. An additional exception is that the aggregate amount allocable to deferred tax under section 167(l) may be properly adjusted to reflect asset retirements or the expiration of the period for depreciation used in determining the allowance for depreciation under section 167(a).

(ii) The provisions of this subparagraph may be illustrated by the following examples:

*Example (1).* Corporation X is exclusively engaged in the transportation of gas by pipeline subject to the jurisdiction of the Federal Power Commission. With respect to its post-1969 public utility property, X is entitled under section 167(l)(2)(B) to use a method of depreciation other than a subsection (l) method if it uses a normalization method of

regulated accounting. With respect to such property, X has not made any election under § 1.167(a)-11 (relating to depreciation based on class lives and asset depreciation ranges). In 1972, X places in service public utility property with an unadjusted basis of \$2 million, and an estimated useful life of 20 years. X uses the declining balance method of depreciation with a rate twice the straight line rate. If X uses a normalization method of regulated accounting, the amount of depreciation allowable under section 167(a) with respect to such property for 1972 computed under the double declining balance method would be \$200,000. X computes its tax expense and depreciation expense for purposes of determining its cost of service for rate-making purposes and for reflecting operating results in its regulated books of account using the straight line method of depreciation (a subsection (l) method). A depreciation allowance computed in this manner is \$100,000. The excess of the depreciation allowance determined under the double declining balance method (\$200,000) over the depreciation expense computed using the straight line method (\$100,000) is \$100,000. Thus, assuming a tax rate of 48 percent, X used a normalization method of regulated accounting for 1972 with respect to property placed in service that year if for 1972 it added to a reserve \$48,000 as taxes deferred as a result of the use by X of a method of depreciation for Federal income tax purposes different from that used for establishing its cost of service for rate-making purposes and for reflecting operating results in its regulated books of account.

*Example (2).* Assume the same facts as in example (1), except that X elects to apply § 1.167(a)-11 with respect to all eligible property placed in service in 1972. Assume further that all property X placed in service in 1972 is eligible property. One hundred percent of the asset guideline period for such property is 22 years and the asset depreciation range is from 17.5 years to 26.5 years. X uses the double declining balance method of depreciation, selects an asset depreciation period of 17.5 years, and applies the half-year convention (described in § 1.167(a)-11(c)(2)(iii)). In 1972, the depreciation allowable under section 167(a) with respect to property placed in service in 1972 is \$114,285 (determined without regard to the normalization requirements in § 1.167(a)-11(b)(6) and in section 167(l)). X computes its tax expense for purposes of determining its cost of service for ratemaking purposes and for reflecting operating results in its regulated books of account using the straight line method of depreciation (a subsection (l) method), an estimated useful life of 22 years (that is, 100 percent of the asset guideline period), and the half-year convention. A depreciation allowance computed in this manner is \$45,454. Assuming a tax rate of 48 percent, the amount

§ 1.167(l)-1

26 CFR Ch. I (4-1-06 Edition)

that X must add to a reserve for 1972 with respect to property placed in service that year in order to qualify as using a normalization method of regulated accounting under section 167(l) (3) (G) is \$27,429 and the amount in order to satisfy the normalization requirements of § 1.167(a)-11(b)(6) is \$5,610. X determined such amounts as follows:

(1) Depreciation allowance on tax return (determined without regard to section 167(l) and § 1.167(a)-11(b) (6)) .....	\$114,285
(2) Line (1), recomputed using a straight line method .....	57,142
<hr/>	
(3) Difference in depreciation allowance attributable to different methods (line (1) minus line (2)) .....	\$57,143
(4) Amount to add to reserve under this paragraph (48 percent of line (3)) .....	27,429
<hr/>	
(5) Amount in line (2) .....	\$57,142
(6) Line (5), recomputed by using an estimated useful life of 22 years and the half-year convention .....	45,454
<hr/>	
(7) Difference in depreciation allowance attributable to difference in depreciation periods .....	\$11,688
(8) Amount to add to reserve under § 1.167(a)-11(b) (6) (ii) (48 percent of line (7)) .....	5,610
<hr/>	

If, for its depreciation expense for purposes of determining its cost of service for rate-making purposes and for reflecting operating results in its regulated books of account, X had used a period in excess of the asset guideline period of 22 years, the total amount in lines (4) and (8) in this example would not be changed.

*Example (3).* Corporation Y, a calendar-year taxpayer which is engaged in furnishing electrical energy, made the election provided by section 167(l) (4) (a) with respect to its "qualified public utility property" (as defined in § 1.167(l)-2(b)). In 1971, Y placed in service qualified public utility property which had an adjusted basis of \$2 million, estimated useful life of 20 years, and no salvage value. With respect to property of the same kind most recently placed in service, Y used a flow-through method of regulated accounting for its July 1969 regulated accounting period and the applicable 1968 method is the declining balance method of depreciation using 200 percent of the straight line rate. The amount of depreciation allowable under the double declining balance method with respect to the qualified public utility property would be \$200,000. Y computes its tax expense and depreciation expense for purposes of determining its cost of service for ratemaking purposes and for reflecting operating results in its regulated books of account using the straight line method of depreciation. A depreciation allowance with respect to the qualified public utility property determined in this manner is \$100,000. The excess of the depreciation allowance determined under the double declining balance method (\$200,000) over the depreciation expense computed

using the straight line method (\$100,000) is \$100,000. Thus, assuming a tax rate of 48 percent, Y used a normalization method of regulated accounting for 1971 if for 1971 it added to a reserve \$48,000 as tax deferred as a result of the use by Y of a method of depreciation for Federal income tax purposes with respect to its qualified public utility property which method was different from that used for establishing its cost of service for ratemaking purposes and for reflecting operating results in its regulated books of account for such property.

*Example (4).* Corporation Z, exclusively engaged in a public utility activity did not use a flow-through method of regulated accounting for its July 1969 regulated accounting period. In 1971, a regulatory body having jurisdiction over all of Z's property issued an order applicable to all years beginning with 1968 which provided, in effect, that Z use an accelerated method of depreciation for purposes of section 167 and for determining its tax expenses for purposes of reflecting operating results in its regulated books of account. The order further provided that Z normalize 50 percent of the tax deferral resulting from the use of the accelerated method of depreciation and that Z flow-through 50 percent of the tax deferral resulting therefrom. Under section 167(l), the method of accounting provided in the order would not be a normalization method of regulated accounting because Z would not be permitted to normalize 100 percent of the tax deferral resulting from the use of an accelerated method of depreciation. Thus, with respect to its public utility property for purposes of section 167, Z may only use a subsection (l) method of depreciation.

*Example (5).* Assume the same facts as in example (4) except that the order of the regulatory body provided, in effect, that Z normalize 100 percent of the tax deferral with respect to 50 percent of its public utility property and flow-through the tax savings with respect to the other 50 percent of its property. Because the effect of such an order would allow Z to flow-through a portion of the tax savings resulting from the use of an accelerated method of depreciation, Z would not be using a normalization method of regulated accounting with respect to any of its properties. Thus, with respect to its public utility property for purposes of section 167, Z may only use a subsection (l) method of depreciation.

(3) *Establishing compliance with normalization requirements in respect of operating books of account.* The taxpayer may establish compliance with the requirement in subparagraph (l)(i) of this

paragraph in respect of reflecting operating results, and adjustments to a reserve, in its operating books of account by reference to the following:

(i) The most recent periodic report for a period beginning before the end of the taxable year, required by a regulatory body described in section 167(l)(3)(A) having jurisdiction over the taxpayer's regulated operating books of account which was filed with such body before the due date (determined with regard to extensions) of the taxpayer's Federal income tax return for such taxable year (whether or not such body has jurisdiction over rates).

(ii) If subdivision (i) of this subparagraph does not apply, the taxpayer's most recent report to its shareholders for the taxable year but only if (a) such report was distributed to the shareholders before the due date (determined with regard to extensions) of the taxpayer's Federal income tax return for the taxable year and (b) the taxpayer's stocks or securities are traded in an established securities market during such taxable year. For purposes of this subdivision, the term "established securities market" has the meaning assigned to such term in § 1.453-3(d)(4).

(iii) If neither subdivision (i) nor (ii) of this subparagraph applies, entries made to the satisfaction of the district director before the due date (determined with regard to extensions) of the taxpayer's Federal income tax return for the taxable year in its regulated books of account for its most recent period beginning before the end of such taxable year.

(4) *Establishing compliance with normalization requirements in computing cost of service for ratemaking purposes.* (i) In the case of a taxpayer which used a flow-through method of regulated accounting for its July 1969 regulated accounting period or thereafter, with respect to all or a portion of its pre-1970 public utility property, if a regulatory body having jurisdiction to establish the rates of such taxpayer as to such property (or a court which has jurisdiction over such body) issues an order of general application (or an order of specific application to the taxpayer) which states that such regulatory body (or court) will permit a class of tax-

payers of which such taxpayer is a member (or such taxpayer) to use the normalization method of regulated accounting to establish cost of service for ratemaking purposes with respect to all or a portion of its public utility property, the taxpayer will be presumed to be using the same method of depreciation to compute both its tax expense and its depreciation expense for purposes of establishing its cost of service for ratemaking purposes with respect to the public utility property to which such order applies. In the event that such order is in any way conditional, the preceding sentence shall not apply until all of the conditions contained in such order which are applicable to the taxpayer have been fulfilled. The taxpayer shall establish to the satisfaction of the Commissioner or his delegate that such conditions have been fulfilled.

(ii) In the case of a taxpayer which did not use the flow-through method of regulated accounting for its July 1969 regulated accounting period or thereafter (including a taxpayer which used a subsection (l) method of depreciation to compute its allowance for depreciation under section 167(a) and to compute its tax expense for purposes of reflecting operating results in its regulated books of account), with respect to any of its public utility property, it will be presumed that such taxpayer is using the same method of depreciation to compute both its tax expense and its depreciation expense for purposes of establishing its cost of service for ratemaking purposes with respect to its post-1969 public utility property. The presumption described in the preceding sentence shall not apply in any case where there is (a) an expression of intent (regardless of the manner in which such expression of intent is indicated) by the regulatory body (or bodies), having jurisdiction to establish the rates of such taxpayer, which indicates that the policy of such regulatory body is in any way inconsistent with the use of the normalization method of regulated accounting by such taxpayer or by a class of taxpayers of which such taxpayer is a member, or (b) a decision by a court having jurisdiction over such regulatory body which decision is in any way inconsistent with the use of

the normalization method of regulated accounting by such taxpayer or a class of taxpayers of which such taxpayer is a member. The presumption shall be applicable on January 1, 1970, and shall, unless rebutted, be effective until an inconsistent expression of intent is indicated by such regulatory body or by such court. An example of such an inconsistent expression of intent is the case of a regulatory body which has, after the July 1969 regulated accounting period and before January 1, 1970, directed public utilities subject to its ratemaking jurisdiction to use a flow-through method of regulated accounting, or has issued an order of general application which states that such agency will direct a class of public utilities of which the taxpayer is a member to use a flow-through method of regulated accounting. The presumption described in this subdivision may be rebutted by evidence that the flow-through method of regulated accounting is being used by the taxpayer with respect to such property.

(iii) The provisions of this subparagraph may be illustrated by the following examples:

*Example (1).* Corporation X is a calendar-year taxpayer and its "applicable 1968 method" is a straight line method of depreciation. Effective January 1, 1970, X began collecting rates which were based on a sum of the years-digits method of depreciation and a normalization method of regulated accounting which rates had been approved by a regulatory body having jurisdiction over X. On October 1, 1971, a court of proper jurisdiction annulled the rate order prospectively, which annulment was not appealed, on the basis that the regulatory body had abused its discretion by determining the rates on the basis of a normalization method of regulated accounting. As there was no inconsistent expression of intent during 1970 or prior to the due date of X's return for 1970, X's use of the sum of the years-digits method of depreciation for purposes of section 167 on such return was proper. For 1971, the presumption is in effect through September 30. During 1971, X may use the sum of the years-digits method of depreciation for purposes of section 167 from January 1 through September 30, 1971. After September 30, 1971, and for taxable years after 1971, X must use a straight line method of depreciation until the inconsistent court decision is no longer in effect.

*Example (2).* Assume the same facts as in example (1), except that pursuant to the order of annulment, X was required to refund

the portion of the rates attributable to the use of the normalization method of regulated accounting. As there was no inconsistent expression of intent during 1970 or prior to the due date of X's return for 1970, X has the benefit of the presumption with respect to its use of the sum of the years-digits method of depreciation for purposes of section 167, but because of the retroactive nature of the rate order X must file an amended return for 1970 using a straight line method of depreciation. As the inconsistent decision by the court was handed down prior to the due date of X's Federal income tax return for 1971, for 1971 and thereafter the presumption of subdivision (ii) of this subparagraph does not apply. X must file its Federal income tax returns for such years using a straight line method of depreciation.

*Example (3).* Assume the same facts as in example (2), except that the annulment order was stayed pending appeal of the decision to a court of proper appellate jurisdiction, X has the benefit of the presumption as described in example (2) for the year 1970, but for 1971 and thereafter the presumption of subdivision (ii) of this subparagraph does not apply. Further, X must file an amended return for 1970 using a straight line method of depreciation and for 1971 and thereafter X must file its returns using a straight line method of depreciation unless X and the district director have consented in writing to extend the time for assessment of tax for 1970 and thereafter with respect to the issue of normalization method of regulated accounting for as long as may be necessary to allow for resolution of the appeal with respect to the annulment of the rate order.

(5) *Change in method of regulated accounting.* The taxpayer shall notify the district director of a change in its method of regulated accounting, an order by a regulatory body or court that such method be changed, or an interim or final rate determination by a regulatory body which determination is inconsistent with the method of regulated accounting used by the taxpayer immediately prior to the effective date of such rate determination. Such notification shall be made within 90 days of the date that the change in method, the order, or the determination is effective. In the case of a change in the method of regulated accounting, the taxpayer shall recompute its tax liability for any affected taxable year and such recomputation shall be made in the form of an amended return where necessary unless the taxpayer and the district director have consented in

writing to extend the time for assessment of tax with respect to the issue of normalization method of regulated accounting.

(6) *Exclusion of normalization reserve from rate base.* (i) Notwithstanding the provisions of subparagraph (1) of this paragraph, a taxpayer does not use a normalization method of regulated accounting if, for ratemaking purposes, the amount of the reserve for deferred taxes under section 167(l) which is excluded from the base to which the taxpayer's rate of return is applied, or which is treated as no-cost capital in those rate cases in which the rate of return is based upon the cost of capital, exceeds the amount of such reserve for deferred taxes for the period used in determining the taxpayer's tax expense in computing cost of service in such ratemaking.

(ii) For the purpose of determining the maximum amount of the reserve to be excluded from the rate base (or to be included as no-cost capital) under subdivision (i) of this subparagraph, if solely an historical period is used to determine depreciation for Federal income tax expense for ratemaking purposes, then the amount of the reserve account for the period is the amount of the reserve (determined under subparagraph (2) of this paragraph) at the end of the historical period. If solely a future period is used for such determination, the amount of the reserve account for the period is the amount of the reserve at the beginning of the period and a pro rata portion of the amount of any projected increase to be credited or decrease to be charged to the account during such period. If such determination is made by reference both to an historical portion and to a future portion of a period, the amount of the reserve account for the period is the amount of the reserve at the end of the historical portion of the period and a pro rata portion of the amount of any projected increase to be credited or decrease to be charged to the account during the future portion of the period. The pro rata portion of any increase to be credited or decrease to be charged during a future period (or the future portion of a part-historical and part-future period) shall be determined by multiplying any such increase or de-

crease by a fraction, the numerator of which is the number of days remaining in the period at the time such increase or decrease is to be accrued, and the denominator of which is the total number of days in the period (or future portion).

(iii) The provisions of subdivision (i) of this subparagraph shall not apply in the case of a final determination of a rate case entered on or before May 31, 1973. For this purpose, a determination is final if all rights to request a review, a rehearing, or a redetermination by the regulatory body which makes such determination have been exhausted or have lapsed. The provisions of subdivision (ii) of this subparagraph shall not apply in the case of a rate case filed prior to June 7, 1974 for which a rate order is entered by a regulatory body having jurisdiction to establish the rates of the taxpayer prior to September 5, 1974, whether or not such order is final, appealable, or subject to further review or reconsideration.

(iv) The provisions of this subparagraph may be illustrated by the following examples:

*Example (1).* Corporation X is exclusively engaged in the transportation of gas by pipeline subject to the jurisdiction of the Z Power Commission. With respect to its post-1969 public utility property, X is entitled under section 167(l)(2)(B) to use a method of depreciation other than a subsection (l) method if it uses a normalization method of regulated accounting. With respect to X the Z Power Commission for purposes of establishing cost of service uses a recent consecutive 12-month period ending not more than 4 months prior to the date of filing a rate case adjusted for certain known changes occurring within a 9-month period subsequent to the base period. X's rate case is filed on January 1, 1975. The year 1974 is the recorded test period for X's rate case and is the period used in determining X's tax expense in computing cost of service. The rates are contemplated to be in effect for the years 1975, 1976, and 1977. The adjustments for known changes relate only to wages and salaries. X's rate base at the end of 1974 is \$145,000,000. The amount of the reserve for deferred taxes under section 167(l) at the end of 1974 is \$1,300,000, and the reserve is projected to be \$4,400,000 at the end of 1975, \$6,500,000 at the end of 1976, and \$9,800,000 at the end of 1977. X does not use a normalization method of regulated accounting if the Z Power Commission excludes more than \$1,300,000 from the rate base to which X's rate of return is

§ 1.167(l)-1

26 CFR Ch. I (4-1-06 Edition)

applied. Similarly, X does not use a normalization method of regulated accounting if, instead of the above, the Z Power Commission, in determining X's rate of return which is applied to the rate base, assigns to no-cost capital an amount that represents the reserve account for deferred tax that is greater than \$1,300,000.

*Example (2).* Assume the same facts as in example (1) except that the adjustments for known changes in cost of service made by the Z Power Commission include an additional depreciation expense that reflects the installation of new equipment put into service on January 1, 1975. Assume further that the reserve for deferred taxes under section 167(1) at the end of 1974 is \$1,300,000 and that the monthly net increases for the first 9 months of 1975 are projected to be:

January 1-31 .....	\$310,000
February 1-28 .....	300,000
March 1-31 .....	300,000
April 1-30 .....	280,000
May 1-31 .....	270,000
June 1-30 .....	260,000
July 1-31 .....	260,000
August 1-31 .....	250,000
September 1-30 .....	240,000
	\$2,470,000

For its regulated books of account X accrues such increases as of the last day of the month but as a matter of convenience credits increases or charges decreases to the reserve account on the 15th day of the month following the whole month for which such increase or decrease is accrued. The maximum amount that may be excluded from the rate base is \$2,470,879 (the amount in the reserve at the end of the historical portion of the period (\$1,300,000) and a pro rata portion of the amount of any projected increase for the future portion of the period to be credited to the reserve (\$1,170,879)). Such pro rata portion is computed (without regard to the date such increase will actually be posted to the account) as follows:

\$310,000×243/273 = .....	\$275,934
300,000×215/273 = .....	236,264
300,000×184/273 = .....	202,198
280,000×154/273 = .....	157,949
270,000×123/273 = .....	121,648
260,000×93/273 = .....	88,571
260,000×62/273 = .....	59,048
250,000×31/273 = .....	28,388
240,000×1/273 = .....	879
	\$1,170,879

*Example (3).* Assume the same facts as in example (1) except that for purposes of establishing cost of service the Z Power Commission uses a future test year (1975). The rates are contemplated to be in effect for 1975, 1976, and 1977. Assume further that plant additions, depreciation expense, and taxes are projected to the end of 1975 and that the reserve for deferred taxes under section 167(1) is \$1,300,000 for 1974 and is projected to be

\$4,400,000 at the end of 1975. Assume also that the Z Power Commission applies the rate of return to X's 1974 rate base of \$145,000,000. X and the Z Power Commission through negotiation arrive at the level of approved rates. X uses a normalization method of regulated accounting only if the settlement agreement, the rate order, or record of the proceedings of the Z Power Commission indicates that the Z Power Commission did not exclude an amount representing the reserve for deferred taxes from X's rate base (\$145,000,000) greater than \$1,300,000 plus a pro rata portion of the projected increases and decreases that are to be credited or charged to the reserve account for 1975. Assume that for 1975 quarterly net increases are projected to be:

1st quarter .....	\$910,000
2nd quarter .....	810,000
3rd quarter .....	750,000
4th quarter .....	630,000
	\$3,100,000

For its regulated books of account X will accrue such increases as of the last day of the quarter but as a matter of convenience will credit increases or charge decreases to the reserve account on the 15th day of the month following the last month of the quarter for which such increase or decrease will be accrued. The maximum amount that may be excluded from the rate base is \$2,591,480 (the amount of the reserve at the beginning of the period (\$1,300,000) plus a pro rata portion (\$1,291,480) of the \$3,100,000 projected increase to be credited to the reserve during the period). Such portion is computed (without regard to the date such increase will actually be posted to the account) as follows:

\$910,000×276/365= .....	\$688,110
810,000×185/365= .....	410,548
750,000×93/365= .....	191,096
630,000×1/365= .....	1,726
	\$1,291,480

(i) *Flow-through method of regulated accounting.* Under section 167(1)(3)(H), a taxpayer uses a flow-through method of regulated accounting with respect to public utility property if it uses the same method of depreciation (other than a subsection (l) method) to compute its allowance for depreciation under section 167 and to compute its tax expense for purposes of reflecting operating results in its regulated books of account unless such method is the same method used by the taxpayer to determine its depreciation expense for purposes of reflecting operating results in its regulated books of account. Except as provided in the preceding sentence, the method of depreciation used

by a taxpayer with respect to public utility property for purposes of determining cost of service for ratemaking purposes or rate base for ratemaking purposes shall not be considered in determining whether the taxpayer used a flow-through method of regulated accounting. A taxpayer may establish use of a flow-through method of regulated accounting in the same manner that compliance with normalization requirements in respect of operating books of account may be established under paragraph (h)(4) of this section.

[T.D. 7315, 39 FR 20195, June 7, 1974]

**§ 1.167(l)-2 Public utility property; election as to post-1969 property representing growth in capacity.**

(a) *In general.* Section 167(l)(2) prescribes the methods of depreciation which may be used by a taxpayer with respect to its post-1969 public utility property. Under section 167(l)(2) (A) and (B) the taxpayer may use a subsection (l) method of depreciation (as defined in section 167(l)(3)(F)) or any other method of depreciation which is otherwise allowable under section 167 if, in conjunction with the use of such other method, such taxpayer uses the normalization method of accounting (as defined in section 167(l)(3)(G)). Paragraph (2)(C) of section 167(l) permits a taxpayer which used the flow-through method of accounting for its July 1969 accounting period (as these terms are defined in section 167(l)(3) (H) and (I), respectively) to use its applicable 1968 method of depreciation with respect to certain property. Section 167(l)(3)(D) describes the term "applicable 1968 method". Accordingly, a regulatory agency is not precluded by section 167(l) from requiring such a taxpayer subject to its jurisdiction to continue to use the flow-through method of accounting unless the taxpayer makes the election pursuant to section 167(l)(4)(A) and this section. Whether or not the election is made, if such a regulatory agency permits the taxpayer to change from the flow-through method of accounting, subsection (l)(2) (A) or (B) would apply and such taxpayer could, subject to the provisions of section 167(e) and the regulations thereunder (relating to change in method), use a subsection (l) method of depreciation

or, if the taxpayer uses the normalization method of accounting, any other method of depreciation otherwise allowable under section 167.

(1) *Election.* Under subparagraph (A) of section 167(l)(4), if the taxpayer so elects, the provisions of paragraph (2)(C) of section 167(l) shall not apply to its qualified public utility property (as such term is described in paragraph (b) of this section). In such case the taxpayer making the election shall use a method of depreciation prescribed by section 167(l)(2) (A) or (B) with respect to such property.

(2) *Property to which election shall apply.* (i) Except as provided in subdivision (ii) of this subparagraph the election provided by section 167(l)(4)(A) shall apply to all of the qualified public utility property of the taxpayer.

(ii) In the event that the taxpayer wishes the election provided by section 167(l)(4)(A) to apply to only a portion of its qualified public utility property, it must clearly identify the property to be subject to the election in the statement of election described in paragraph (e) of this section. Where all property which performs a certain function is included within the election, the election shall apply to all future acquisitions of qualified public utility property which perform the same function. Where only certain property within a functional group of property is included within the election, the election shall apply only to property which is of the same kind as the included property.

(iii) The provisions of subdivision (ii) of this subparagraph may be illustrated by the following examples:

*Example (1).* Corporation A, an electric utility company, wishes to have the election provided by section 167(l)(4)(A) apply only with respect to its production plant. A statement that the election shall apply only with respect to production plant will be sufficient to include within the election all of the taxpayer's qualified production plant of any kind. All public utility property of the taxpayer other than production plant will not be subject to the election.

*Example (2).* Corporation B, an electric utility company, wishes to have the election provided by section 167(l)(4)(A) apply only with respect to nuclear production plant. A statement which clearly indicates that only nuclear production plant will be included in the election will be sufficient to exclude

from the election all public utility property other than nuclear production plant.

(b) *Qualified public utility property*—(1) *Definition.* For purposes of this section the term “qualified public utility property” means post-1969 public utility property to which section 167(l)(2)(C) applies, or would apply if the election described in section 167(l)(4)(A) had not been made, to the extent that such property constitutes property which increases the productive or operational capacity of the taxpayer with respect to the goods or services described in section 167(l)(3)(A) and does not represent the replacement of existing capacity. In the event that particular assets which are post-1969 public utility property both replace existing public utility property and increase the productive or operational capacity of the taxpayer, only that portion of each such asset which is properly allocable, pursuant to the provisions of subparagraph (3)(v) of this paragraph or paragraph (c)(2) of this section (as the case may be), to increasing the productive or operational capacity of the taxpayer shall be qualified public utility property.

(2) *Limitation on use of formula method.* A taxpayer which makes the election with respect to all of its post-1969 public utility property may determine the amount of its qualified public utility property by using the formula method described in paragraph (c) of this section or, where the taxpayer so chooses, it may use any other method based on engineering data which is satisfactory to the Commissioner. A taxpayer which chooses to include only a portion of its post-1969 public utility property in the election described in paragraph (a)(1) of this section shall, in a manner satisfactory to the Commissioner and consistent with the provisions of subparagraph (3) of this paragraph, use a method based on engineering data. If a taxpayer uses the formula method described in paragraph (c) of this section, it must continue to use such method with respect to additions made in subsequent taxable years. The taxpayer may change from an engineering method to the formula method described in paragraph (c) of this section by filing a statement described in

paragraph (h) of this section if it could have used such formula method for the prior taxable year.

(3) *Measuring capacity under an engineering method in the case of a general election.* (i) The provisions of this subparagraph apply in the case of an election made with respect to all of the post-1969 public utility property of the taxpayer.

(ii) A taxpayer which uses a method based on engineering data to determine the portion of its additions for a taxable year which constitutes qualified public utility property shall make such determination with reference to its “adjusted capacity” as of the first day of the taxable year during which such additions are placed in service. For purposes of this subparagraph, the term “adjusted capacity” means the taxpayer’s capacity as of January 1, 1970, adjusted upward in the manner described in subdivision (iii) of this subparagraph for each taxable year ending after December 31, 1969, and before the first day of the taxable year during which the additions described in the preceding sentence are placed in service.

(iii) The adjustment described in this subdivision for each taxable year shall be equal to the number of units of capacity by which additions for the taxable year of public utility property with respect to which the election had been made exceed the number of units of capacity of retirements for such taxable year of public utility property with respect to which the flow-through method of accounting was being used at the time of their retirement. If for any taxable year the computation in the preceding sentence results in a negative amount, such negative amount shall be taken into account as a reduction in the amount of the adjustment (computed without regard to this sentence) in succeeding taxable years.

(iv) The provisions of this subparagraph may be illustrated by the following table which assumes that the taxpayer’s adjusted capacity as of January 1, 1970, was 5,000 units:

1	2	3	4	5	6	7
Year	Additions	Flow-through retirements	Net additions	Adjusted capacity <sup>1</sup>	Actual capacity	Units of qualified additions <sup>1 2</sup>
1970 .....	1000	700	300	5000	5300	300
1971 .....	300	500	(200)	5300	5100	
1972 .....	500	200	300	5300	5400	100
1973 .....	400	800	(400)	5400	5000	
1974 .....	600	400	200	5400	5200	
1975 .....	800	300	500	5400	5700	300

<sup>1</sup> Capacity as of Jan. 1, 1970, plus amounts in column 7 for years prior to the year for which determination is being made.  
<sup>2</sup> Column 6 minus column 5.

(v) The qualified portion of the basis for depreciation (as defined in section 167(g)) of each asset or group of assets (if group or composite accounting is used by the taxpayer) subject to the election shall be determined using the following ratio:

Qualified portion of basis of asset ÷ Total basis of asset = Units of qualified additions computed in column 7 on chart ÷ Units of capacity of additions computed in column 2 on chart.

(c) *Formula method of determining amount of property subject to election*—(1) *In general.* The following formula method may be used to determine the amount of qualified public utility property:

*Step 1.* Find the total cost (within the meaning of section 1012) to the taxpayer of additions during the taxable year of all post-1969 public utility property with respect to which section 167(1)(2)(C) would apply if the election had not been made.

*Step 2.* Aggregate the cost (within the meaning of section 1012) to the taxpayer of all retirements during the taxable year of public utility property with respect to which the flow-through method of accounting was being used at the time of their retirement.

*Step 3.* Subtract the figure reached in step 2 from the figure reached in step 1.

In the event that the figure reached in step 2 exceeds the figure reached in step 1 such excess shall be carried forward to the next taxable year and shall be aggregated with the cost (within the meaning of section 1012) to the taxpayer of all retirements referred to in step 2 for such next taxable year.

(2) *Allocation of bases.* The amount of qualified public utility property as determined in accordance with the formula method described in subparagraph (1) of this paragraph shall be allocated to the basis for depreciation (as

defined in section 167(g)) of each asset or group of assets (if group or composite accounting is used by the taxpayer) subject to the election using the following ratio:

Amount of qualified additions computed in step 3 ÷ Amount of total additions computed in step 1 = Qualified portion of basis of asset ÷ Total basis of asset.

(d) *Examples.* The provisions of this section may be illustrated by the following examples:

*Example (1).* Corporation A, a telephone company subject to the jurisdiction of the Federal Communications Commission, elected, pursuant to the provisions of section 167(1)(4)(A) and this section, with respect to all of its qualified post-1969 public utility property to have the provisions of paragraph (2) (C) of section 167(1) not apply. In 1971 the Corporation added new underground cable with a cost (within the meaning of section 1012) to it of \$4 million to its underground cable account. In the same year it retired public utility property with a cost (within the meaning of section 1012) to Corporation A of \$1.5 million. The flow-through method of accounting was being used with respect to all of the retired property at the time of retirement. Using the formula method described in paragraph (c) of this section, the amount of qualified underground cable would be determined as follows:

	Million
<i>Step 1.</i> Aggregate cost of flow-through additions ...	\$4.0
<i>Step 2.</i> Cost of all flow-through retirements .....	1.5
<i>Step 3.</i> Figure reached in step 1 less figure reached in step 2 .....	2.5

The amount of qualified public utility property to which section 167(1)(2)(C) will not apply is \$2.5 million. Pursuant to the provisions of paragraph (c)(2) of this section, the amount of qualified public utility property would be allocated to the basis for depreciation (as defined in section 167(g)) of an asset with a total basis for depreciation of \$2 million as follows:

§ 1.167(l)-2

26 CFR Ch. I (4-1-06 Edition)

\$2.5 million (figure in step 3)/\$4 million (figure in step 1) = Qualified portion of basis of asset/\$2 million Qualified portion of basis of asset = \$1.25 million.

*Example (2).* In 1972 Corporation A (the corporation described in example (1)) added underground cable with a cost (within the meaning of section 1012) to it of \$1 million. In the same year the cost (within the meaning of section 1012) to the corporation of retirements of public utility property with respect to which the flow-through method of accounting was being used was \$3 million. There were no other additions or retirements. The amount of qualified public utility property would be determined as follows:

	Million
Step 1. Aggregate cost of flow-through additions	\$1.0
Step 2. Cost of all flow-through retirements .....	3.0
Step 3. Figure reached in step 1 less figure reached in step 2 .....	(2.0)

Since retirements of flow-through public utility property for the year 1972 exceeded additions made during such year, the excess retirements, \$2.0 million, must be carried forward to be aggregated with retirements for 1973.

*Example (3).* Corporation B, a gas pipeline company subject to the jurisdiction of the Federal Power Commission, made the election provided by section 167(l)(4)(A) and this section with respect to all of its post-1969 public utility property. Corporation B chose to use an engineering data method of determining which property was subject to the election provided by this section. In 1970, the corporation replaced a portion of its pipeline with respect to which the flow-through method of accounting was being used at the time of its retirement which had a peak capacity on January 1, 1970, of 100,000 thousand cubic feet (M c.f.) per day at a pressure of 14.73 pounds per square inch absolute (p.s.i.a.) with pipe with a capacity of 125,000 M c.f. per day at 14.73 p.s.i.a. Assuming that there were no other additions or retirements, using an engineering data method one-fifth of the new pipeline would be property subject to the election of this section effective for its taxable year beginning on January 1, 1971.

*Example (4).* In 1970 Corporation C (with the same characteristics as the corporation described in example (3)) extended its pipeline 5 miles further than it extended on January 1, 1970. Assuming that there were no other additions or retirements, the entire extension would be property subject to the election provided by this section effective for its taxable year beginning on January 1, 1971.

*Example (5).* As a result of a change of service areas between two corporations, in 1970 Corporation D (with the same characteristics as the corporation described in example (3)) retired a pipeline running north and south

and replaced it with a pipeline of equal length and capacity running east and west. No part of the pipeline running east and west is property subject to the election.

(e) *Manner of making election.* The election described in paragraph (a) of this section shall be made by filing, in duplicate, with the Commissioner of Internal Revenue, Washington, D.C. 20224, Attention, T:I:E, a statement of such election.

(f) *Content of statement.* The statement described in paragraph (e) of this section shall indicate that an election is being made under section 167(l) of the Internal Revenue Code of 1954, and it shall contain the following information:

(1) The name, address, and taxpayer identification number of the taxpayer,

(2) Whether the taxpayer will use the formula method of determining the amount of its qualified public utility property described in paragraph (c) of this section, or an engineering method, and

(3) Where the taxpayer wishes to include only a portion of its public utility property in the election pursuant to the provisions of paragraph (a)(2) of this section, a description sufficient to clearly identify the property to be included.

(g) *Time for making election.* The election permitted by this section shall be made by filing the statement described in paragraph (e) of this section not later than Monday, June 29, 1970.

(h) *Change of method of determining amount of qualified property.* Where a taxpayer which has elected pursuant to the provisions of section 167(l)(4)(A) wishes to change, pursuant to the provisions of paragraph (b)(2) of this section, from an engineering data method of determining which of its property is qualified public utility property to the formula method described in paragraph (c) of this section, it may do so by filing a statement to that effect at the time that it files its income tax return, with the district director or director of the regional service center, with whom the taxpayer's income tax return is required to be filed.

(i) *Revocability of election.* An election made under section 167(l) shall be irrevocable.

(j) *Effective date.* The election prescribed by section 167(l)(4)(A) and this section shall be effective for taxable years beginning after December 31, 1970.

[T.D. 7045, 35 FR 8933, June 10, 1970. Redesignated by T.D. 7315, 39 FR 20195, June 7, 1974]

**§ 1.167(l)-3 Multiple regulation, asset acquisitions, reorganizations, etc.**

(a) *Property not entirely subject to jurisdiction of one regulatory body—(1) In general.* If a taxpayer which uses a method of depreciation other than a subsection (l) method of depreciation is required by a regulatory body having jurisdiction over less than all of its property to use, or not to use, a method of regulated accounting (*i.e.*, normalization or flow-through), such taxpayer shall be considered as using, or not using, such method of regulated accounting only with respect to property subject to the jurisdiction of such regulatory body. In the case of property which is contained in a multiple asset account, the provisions of § 1.167(a)-7(c) and § 1.167 (a)-11(c)(1)(iv) apply to prohibit depreciating a single account by two or more different methods.

(2) *Jurisdiction of regulatory body.* For purposes of this paragraph, a regulatory body is considered to have jurisdiction over property of a taxpayer if expenses with respect to the property are included in cost of service as determined by the regulatory body for ratemaking purposes or for reflecting operating results in its regulated books of account. For example, if regulatory body A, having jurisdiction over 60 percent of an item of X corporation's public utility property, required X to use the flow-through method of regulated accounting in circumstances which would bar X from using a method of depreciation under section 167(a) other than a subsection (l) method, and if regulatory body B, having jurisdiction over the remaining 40 percent of such item of property does not so require X to use the flow-through method of regulated accounting (or if the remaining 40 percent is not subject to the jurisdiction of any regulatory body), then with respect to 60 percent of the adjusted basis of the property X is prohibited from using a method of depreciation for purposes of section 167(a)

other than a subsection (l) method. If in such example, A, having jurisdiction over 60 percent of X's public utility property, had jurisdiction over 100 percent of a particular generator, then with respect to the generator X would be prohibited from using a method of depreciation other than a subsection (l) method.

(3) *Public utility property subject to more than one regulatory body.* If a regulatory body having jurisdiction over public utility property with respect to the taxpayer's regulated books of account requires the taxpayer to reflect its tax expense in such books in the manner used by the regulatory body having jurisdiction over the public utility property for purposes of determining the taxpayer's cost of service for ratemaking purposes, the rules of subparagraphs (1) and (2) of this paragraph shall apply.

(b) *Leasing transactions—(1) Leased property.* Public utility property as defined in paragraph (b) of § 1.167(l)-1 includes property which is leased by a taxpayer where the leasing of such property is part of the lessor's section 167(l) public utility activity. Thus, such leased property qualifies as public utility property even though the predominant use of such property by the lessee is in other than a section 167(l) public utility activity. Further, leased property qualifies as public utility property under section 167(l) even though the leasing is not part of the lessor's public utility activity if the predominant use of such property by the lessee or any sublessee is in a section 167(l) public utility activity. However, the limitations of section 167(l) apply to a taxpayer only if such taxpayer is subject to the jurisdiction of a regulatory body described in a section 167(l)(3)(A). For example, if a financial institution purchases property which it then leases to a lessee which uses such property predominantly in a section 167(l) public utility activity, the property qualifies as public utility property. However, because the financial institution's rates for leasing the property are not subject to the jurisdiction of a regulatory body described in section 167(l)(3)(A), the provisions of section 167(l) do not apply to the depreciation deductions taken with respect to

**§ 1.167(l)-4**

the property by the financial institution. For possible application of section 167(l) to the lessee, see subparagraph (2) of this paragraph.

(2) *Certain rental payments.* Under section 167(l)(5), if a taxpayer leases property which is public utility property and the regulatory body having jurisdiction over such property for purposes of determining the taxpayer's operating results in its regulated books of account or for ratemaking purposes allows only an amount of such lessee's expenses with respect to the lease which is less than the amount which the taxpayer deducts for purposes of its Federal income tax liability, then a portion of the difference between such amounts shall not be allowed as a deduction by the taxpayer for purposes of its Federal income tax liability in such manner and time as the Commissioner or his delegate may determine consistent with the principles of § 1.167(l)-1 and this section applicable as to when a method of depreciation other than a subsection (l) method may be used for purposes of section 167(a).

(c) *Certain partnership arrangements.* Under section 167(l)(5), if property held by a partnership is not public utility property in the hands of the partnership but would be public utility property if an election was made under section 761 to be excluded from partnership treatment, then section 167(l) shall be applied by treating the partners as directly owning the property in proportion to their partnership interests.

(d) *Cross reference.* See § 1.167(l)-1(c)(1) for treatment of certain property as "pre-1970 public utility property" and § 1.167(l)-1(e)(4)(ii) for applicable 1968 method in the case of property acquired in certain transactions.

[T.D. 7315, 39 FR 20202, June 7, 1974]

**§ 1.167(l)-4 Public utility property; election to use asset depreciation range system.**

(a) *Application of section 167(l) to certain property subject to asset depreciation range system.* If the taxpayer elects to compute depreciation under the asset depreciation range system described in § 1.167(a)-11 with respect to certain public utility property placed in service

[T.D. 7272, 38 FR 9986, Apr. 23, 1973]

**§ 1.168-5 Special rules.**

(a) *Retirement-replacement-betterment (RRB) property*—(1) *RRB replacement property placed in service before January 1, 1985.* (i) Except as provided in paragraph (a)(1)(ii) of this section, the recovery deduction for the taxable year for retirement-replacement-betterment (RRB) replacement property (as defined in paragraph (a)(3) of this section) placed in service before January 1, 1985, shall be (in lieu of the amount determined under section 168(b)) an amount determined by applying to the unadjusted basis (as defined in section 168(d)(1) and the regulations thereunder) of such property the applicable percentage determined in accordance with the following table:

	And the year the property is placed in service is:			
	1981	1982	1983	1984
	The applicable percentage is:			
1 .....	100	50	33	25
2 .....	.....	50	45	38
3 .....	.....	.....	22	25
4 .....	.....	.....	.....	12

(ii) The provisions of paragraph (a)(1)(i) of this section do not apply to any taxpayer who did not use the RRB method of depreciation under section 167 as of December 31, 1980. In such case, RRB replacement property placed in service by the taxpayer after December 31, 1980, shall be treated as other 5-year recovery property under section 168.

(2) *RRB replacement property placed in service after December 31, 1984.* RRB replacement property placed in service

after December 31, 1984, is treated as other 5-year recovery property under section 168.

(3) *RRB replacement property defined.* RRB replacement property, for purposes of section 168, means replacement track material (including rail, ties, other track material, and ballast) installed by a railroad (including a railroad switching or terminal company) if—

(i) The replacement is made pursuant to a scheduled program for replacement.

(ii) The replacement is made pursuant to observations by maintenance-of-way personnel of specific track material needing replacement.

(iii) The replacement is made pursuant to the detection by a rail-test car of specific track material needing replacement, or

(iv) The replacement is made as a result of a casualty.

Replacements made as a result of a casualty shall be RRB replacement property only to the extent that, in the case of each casualty, the replacement cost with respect to the replacement track material exceeds \$50,000.

(4) *Recovery of adjusted basis of RRB property as of December 31, 1980.* The taxpayer shall recover the adjusted basis of RRB property (as defined in section 168(g)(6)) as of December 31, 1980, over a period of not less than 5 years and not more than 50 years, using a rate of recovery consistent with any method described in section 167(b), including the method described in section 167(b)(2), switching to the method described in section 167(b)(3) at a time to maximize the deduction. For purposes of determining the recovery allowance under this subparagraph, salvage value shall be disregarded and, in the case of a taxpayer that depreciated RRB property placed in service before January 1, 1981, using the RRB method consistently for all periods after February 28, 1913, the adjusted basis of RRB property is the adjusted basis for purposes of determining the deduction for retirements under the RRB method, with no adjustment for depreciation sustained prior to March 1, 1913.

(5) *RRB property (which is not RRB replacement property) placed in service after December 31, 1980.* Property placed

in service by the taxpayer after December 31, 1980, which is not RRB replacement property and which, under the taxpayer's method of depreciation as of December 31, 1980, would have been depreciated by the taxpayer under the RRB method, is treated as other property under section 168.

(b)-(f) [Reserved]

[T.D. 8116, 51 FR 46619, Dec. 24, 1986]

**§ 1.168(a)-1T Modified accelerated cost recovery system (temporary).**

(a) Section 168 determines the depreciation allowance for tangible property that is of a character subject to the allowance for depreciation provided in section 167(a) and that is placed in service after December 31, 1986 (or after July 31, 1986, if the taxpayer made an election under section 203(a)(1)(B) of the Tax Reform Act of 1986; 100 Stat. 2143). Except for property excluded from the application of section 168 as a result of section 168(f) or as a result of a transitional rule, the provisions of section 168 are mandatory for all eligible property. The allowance for depreciation under section 168 constitutes the amount of depreciation allowable under section 167(a). The determination of whether tangible property is property of a character subject to the allowance for depreciation is made under section 167 and the regulations under section 167.

(b) This section is applicable on and after February 27, 2004.

(c) The applicability of this section expires on or before February 26, 2007.

[T.D. 9115, 69 FR 9533, Mar. 1, 2004; 69 FR 17586, Apr. 5, 2004]

**§ 1.168(b)-1T Definitions (temporary).**

(a) *Definitions.* For purposes of section 168 and the regulations under section 168, the following definitions apply:

(1) *Depreciable property* is property that is of a character subject to the allowance for depreciation as determined under section 167 and the regulations under section 167.

(2) *MACRS property* is tangible, depreciable property that is placed in service after December 31, 1986 (or after July 31, 1986, if the taxpayer made an election under section 203(a)(1)(B) of

## § 1.168(d)-0

the Tax Reform Act of 1986; 100 Stat. 2143) and subject to section 168, except for property excluded from the application of section 168 as a result of section 168(f) or as a result of a transitional rule.

(3) *Unadjusted depreciable basis* is the basis of property for purposes of section 1011 without regard to any adjustments described in section 1016(a)(2) and (3). This basis reflects the reduction in basis for the percentage of the taxpayer's use of property for the taxable year other than in the taxpayer's trade or business (or for the production of income), for any portion of the basis the taxpayer properly elects to treat as an expense under section 179, and for any adjustments to basis provided by other provisions of the Internal Revenue Code and the regulations under the Code (other than section 1016(a)(2) and (3)) (for example, a reduction in basis by the amount of the disabled access credit pursuant to section 44(d)(7)). For property subject to a lease, see section 167(c)(2).

(4) *Adjusted depreciable basis* is the unadjusted depreciable basis of the property, as defined in § 1.168(b)-1T(a)(3), less the adjustments described in section 1016(a)(2) and (3).

(b) *Effective date.* (1) This section is applicable on February 27, 2004.

(2) The applicability of this section expires on or before February 26, 2007.

[T.D. 9115, 69 FR 9533, Mar. 1, 2004; 69 FR 17586, Apr. 5, 2004]

## § 1.168(d)-0 Table of contents for the applicable convention rules.

This section lists the major paragraphs in § 1.168(d)-1.

### § 1.168(d)-1 Applicable conventions—Half-year and mid-quarter conventions.

(a) In general.

(b) Additional rules for determining whether the mid-quarter convention applies and for applying the applicable convention.

(1) Property described in section 168(f).

(2) Listed property.

(3) Property placed in service and disposed of in the same taxable year.

(4) Aggregate basis of property.

(5) Special rules for affiliated groups.

(6) Special rule for partnerships and S corporations.

(7) Certain nonrecognition transactions.

(c) Disposition of property subject to the half-year or mid-quarter convention.

## 26 CFR Ch. I (4-1-06 Edition)

(1) In general.

(2) Example.

(d) Effective date.

[T.D. 8444, 57 FR 48981, Oct. 29, 1992]

### § 1.168(d)-1 Applicable convention—Half-year and mid-quarter conventions.

(a) *In general.* Under section 168(d), the half-year convention applies to depreciable property (other than certain real property described in section 168(d)(2)) placed in service during a taxable year, unless the mid-quarter convention applies to the property. Under section 168(d)(3)(A), the mid-quarter convention applies to depreciable property (other than certain real property described in section 168(d)(2)) placed in service during a taxable year if the aggregate basis of property placed in service during the last three months of the taxable year exceeds 40 percent of the aggregate basis of property placed in service during the taxable year (“the 40-percent test”). Thus, if the depreciable property is placed in service during a taxable year that consists of three months or less, the mid-quarter convention applies to the property. Under section 168(d)(3)(b)(i), the depreciable basis of nonresidential real property, residential rental property, and any railroad grading or tunnel bore is disregarded in applying the 40-percent test. For rules regarding property that is placed in service and disposed of in the same taxable year, see paragraph (b)(3) of this section. For the definition of “aggregate basis of property,” see paragraph (b)(4) if this section.

(b) *Additional rules for determining whether the mid-quarter convention applies and for applying the applicable convention—*(1) *Property described in section 168(f).* In determining whether the 40-percent test is testified for a taxable year, the depreciable basis of property described in section 168(f) (property to which section 168 does not apply) is not taken into account.

(2) *Listed property.* The depreciable basis of listed property (as defined in section 280F(d)(4) and the regulations thereunder) placed in service during a taxable year is taken into account (unless otherwise excluded) in applying the 40-percent test.

(3) *Property placed in service and disposed of in the same taxable year.* (i) and (ii) [Reserved] For further guidance, see § 1.168(d)-1T(b)(3)(i) and (ii).

(4) *Aggregate basis of property.* For purposes of the 40-percent test, the term “aggregate basis of property” means the sum of the depreciable bases of all items of depreciable property that are taken into account in applying the 40-percent test. “Depreciable basis” means the basis of depreciable property for purposes of determining gain under sections 1011 through 1024. The depreciable basis for the taxable year the property is placed in service reflects the reduction in basis for—

(i) Any portion of the basis the taxpayer properly elects to treat as an expense under section 179;

(ii) Any adjustment to basis under section 48(q); and

(iii) The percentage of the taxpayer’s use of the property for the taxable year other than in the taxpayer’s trade or business (or for the production of income), but is determined before any reduction for depreciation under section 167(a) for that taxable year.

(5) *Special rules for affiliated groups—*

(i) In the case of a consolidated group (as defined in § 1.1502-1(h)), all members of the group that are included on the consolidated return are treated as one taxpayer for purposes of applying the 40-percent test. Thus, the depreciable bases of all property placed in service by members of a consolidated group during a consolidated return year are taken into account (unless otherwise excluded) in applying the 40-percent test to determine whether the mid-quarter convention applies to property placed in service by the members during the consolidated return year. The 40-percent test is applied separately to the depreciable bases of property placed in service by any member of an affiliated group that is not included in a consolidated return of the taxable year in which the property is placed in service.

(ii) In the case of a corporation formed by a member or members of a consolidated group and that is itself a member of the consolidated group (“newly-formed subsidiary”), the depreciable bases of property placed in service by the newly-formed subsidiary

in the consolidated return year in which it is formed is included with the depreciable bases of property placed in service during the consolidated return year by the other members of the consolidated group in applying the 40-percent test. If depreciable property is placed in service by a newly-formed subsidiary during the consolidated return year in which it was formed, the newly-formed subsidiary is considered as being in existence for the entire consolidated return year for purposes of applying the applicable convention to determine when the recovery period begins.

(iii) The provisions of paragraph (b)(5)(ii) of this section are illustrated by the following example.

*Example.* Assume a member of a consolidated group that files its return on a calendar-year basis forms a subsidiary on August 1. The subsidiary places depreciable property in service on August 5. If the mid-quarter convention applies to property placed in service by the members of the consolidated group (including the newly-formed subsidiary), the property placed in service by the subsidiary on August 5 is deemed placed in service on the mid-point of the third quarter of the consolidated return year (*i.e.*, August 15). If the mid-quarter convention does not apply, the property is deemed placed in service on the mid-point of the consolidated return year (*i.e.*, July 1).

(iv) In the case of a corporation that joins or leaves a consolidated group, the depreciable bases of property placed in service by the corporation joining or leaving the group during the portion of the consolidated return year that the corporation is a member of the consolidated group is included with the depreciable bases of property placed in service during the consolidated return year by the other members in applying the 40-percent test. The depreciable bases of property placed in service by the joining or leaving member in the taxable year before it joins or after it leaves the consolidated group is not taken into account by the consolidated group in applying the 40-percent test for the consolidated return year. If a corporation leaves a consolidated group and joins another consolidated group, each consolidated group takes into account, in applying the 40-percent test, the depreciable bases of property placed in service by

the corporation while a member of the group.

(v) The provisions of paragraph (b)(5)(iv) of this section are illustrated by the following example.

*Example.* Assume Corporations A and B file a consolidated return on a calendar-year basis. Corporation C, also a calendar-year taxpayer, enters the consolidated group on July 1 and is included on the consolidated return for that taxable year. The depreciable bases of property placed in service by C during the period of July 1 to December 31 is included with the depreciable bases of property placed in service by A and B during the entire consolidated return year in applying the 40-percent test. The depreciable bases of property placed in service by C from January 1 to June 30 is not taken into account by the consolidated group in applying the 40-percent test. If C was a member of another consolidated group during the period from January 1 to June 30, that consolidated group would include the depreciable bases of property placed in service by C during that period.

(vi) A corporation that joins or leaves a consolidated group during a consolidated year is considered as being a member of the consolidated group for the entire consolidated return year for purposes of applying the applicable convention to determine when the recovery period begins for depreciable property placed in service by the corporation during the portion of the consolidated return year that the corporation is a member of the group.

(vii) If depreciable property is placed in service by a corporation in the taxable year ending immediately before it joins a consolidated group or beginning immediately after it leaves a consolidated group, the applicable convention is applied to the property under either the full taxable year rules or the short taxable year rules, as applicable.

(viii) The provisions of paragraphs (d)(5)(vi) and (vii) of this section are illustrated by the following example.

*Example.* Assume that on July 1, C, a calendar-return corporation, joins a consolidated group that files a return on a calendar-year basis. The short taxable year rules apply to C for the period of January 1 to June 30. However, in applying the applicable convention to determine when the recovery period begins for depreciable property placed in service for the period of July 1 to December 31, C is considered as being a member of the consolidated group for the entire consoli-

dated return year. Thus, if the half-year convention applies to depreciable property placed in service by the consolidated group (taking into account the depreciable bases of property placed in service by C after June 30), the property is deemed placed in service on the mid-point of the consolidated return year (*i.e.*, July 1, if the group did not have a short taxable year).

(ix) In the case of a transfer of depreciable property between members of a consolidated group, the following special rules apply for purposes of applying the 40-percent test. Property that is placed in service by one member of a consolidated group and transferred to another member of the same group is considered as placed in service on the date that it is placed in service by the transferor member, and the date it is placed in service by the transferee member is disregarded. In the case of multiple transfers of property between members of a consolidated group, the property is considered as placed in service on the date that the first member places the property in service, and the dates it is placed in service by other members are disregarded. The depreciable basis of the transferred property that is taken into account in applying the 40-percent test is the depreciable basis of the property in the hands of the transferor member (as determined under paragraph (b)(4) of this section), or, in the case of multiple transfers of property between members, the depreciable basis in the hands of the first member that placed the property in service.

(x) The provisions of paragraph (b)(5)(ix) of this section are illustrated by the following example.

*Example.* Assume the ABC consolidated group files its return on a calendar-year basis. A, a member of the consolidated group, purchases depreciable property costing \$50,000 and places the property in service on January 5, 1991. On December 1, 1991, the property is transferred for \$75,000 to B, another member of the consolidated group. In applying the 40-percent test to the members of the consolidated group for 1991, the property is considered as placed in service on January 5, the date that A placed the property in service, and the depreciable basis of the property that is taken into account is \$50,000.

(6) *Special rule for partnerships and S corporations.* In the case of property

placed in service by a partnership or an S corporation, the 40-percent test is generally applied at the partnership or corporate level. However, if a partnership or an S corporation is formed or availed of for the principal purpose of either avoiding the application of the mid-quarter convention or having the mid-quarter convention apply where it otherwise would not, the 40-percent test is applied at the partner, shareholder, or other appropriate level.

(7) *Certain nonrecognition transaction*—(i) Except as provided in paragraph (b)(6) of this section, if depreciable property is transferred in a transaction described in section 168(i)(7)(B)(i) (other than in a transaction between members of a consolidated group) in the same taxable year that the property is placed in service by the transferor, the 40-percent test is applied by treating the transferred property as placed in service by the transferee on the date of transfer. Thus, if the aggregate basis of property (including the transferred property) placed in service by the transferee during the last three months of its taxable year exceeds 40 percent of the aggregate basis of property (including the transferred property) placed in service by the transferee during the taxable year, the mid-quarter convention applies to the transferee's depreciable property, including the transferred property. The depreciable basis of the transferred property is not taken into account by the transferor in applying the 40-percent test for the taxable year that the transferor placed the property in service.

(ii) In applying the applicable convention to determine when the recovery period for the transferred property begins, the date on which the transferor placed the property in service must be used. Thus, for example, if the mid-quarter convention applies, the recovery period for the transferred property begins on the mid-point of the quarter of the taxable year that the transferor placed the property in service. If the transferor placed the transferred property in service in a short taxable year, then for purposes of applying the applicable convention and allocating the depreciation deduction between the transferor and the trans-

feree, the transferor is treated as having a full 12-month taxable year commencing on the first day of the short taxable year. The depreciation deduction for the transferor's taxable year in which the property was placed in service is allocated between the transferor and the transferee based on the number of months in the transferor's taxable year that each party held the property in service. For purposes of allocating the depreciation deduction, the transferor takes into account the month in which the property was placed in service but does not take into account the month in which the property was transferred. The transferee is allocated the remaining portion of the depreciation deduction for the transferor's taxable year in which the property was transferred. For the remainder of the transferee's current taxable year (if the transferee has a different taxable year than the transferor) and for subsequent taxable years, the depreciation deduction for the transferee is calculated by allocating to the transferee's taxable year the depreciation attributable to each recovery year, or portion thereof, that falls within the transferee's taxable year.

(iii) If the applicable convention for the transferred property has not been determined by the time the transferor files its income tax return for the year of transfer because the transferee's taxable year has not ended, the transferor may use either the mid-quarter or the half-year convention in determining the depreciation deduction for the property. However, the transferor must specify on the depreciation form filed for the taxable year that the applicable convention has not been determined for the property. If the transferee determines that a different convention applies to the transferred property, the transferor should redetermine the depreciation deduction on the property, and, within the period of limitation, should file an amended income tax return for the taxable year and pay any additional tax due plus interest.

(iv) The provisions of the paragraph (b)(7) are illustrated by the following example.

*Example.* (i) During 1991, C, a calendar-year taxpayer, purchases satellite equipment costing \$100,000, and computer equipment

costing \$15,000. The satellite equipment is placed in service in January, and the computer equipment in February. On October 1, C transfers the computer equipment to Z Partnership in a transaction described in section 721. During 1991, Z, a calendar-year partnership, purchases 30 office desks for a total of \$15,000. The desks are placed in service in June. These are the only items of depreciable property placed in service by C and Z during 1991.

(ii) In applying the 40-percent test, because C transferred the computer equipment in a transaction described in section 168(i)(7)(B)(i) in the same taxable year that C placed it in service, the computer equipment is treated as placed in service by the transferee, Z, on the date of transfer, October 1. The 40-percent test is satisfied with respect to Z, because the computer equipment is placed in service during the last three months of Z's taxable year and its basis (\$15,000) exceeds 40 percent of the aggregate basis of property placed in service by Z during the taxable year (desks and computer equipment with an aggregate basis of \$30,000).

(iii) In applying the mid-quarter convention to determine when the computer equipment is deemed to be placed in service, the date on which C placed the property in service is used. Accordingly, because C placed the computer equipment in service during the first quarter of its taxable year, the computer equipment is deemed placed in service on February 15, 1991, the mid-point of the first quarter of C's taxable year. The depreciation deduction allowable for C's 1991 taxable year, \$5,250 ( $\$15,000 \times 40 \text{ percent} \times 10.5/12$ ), is allocated between C and Z based on the number of months in C's taxable year that C and Z held the property in service. Thus, because the property was in service for 11 months during C's 1991 taxable year and C held it for 8 of those 11 months, C is allocated \$3,818 ( $8/11 \times \$5,250$ ). Z is allocated \$1,432, the remaining  $3/11$  of the \$5,250 depreciation deduction for C's 1991 taxable year. For 1992, Z's depreciation deduction for the computer equipment is \$3,900, the sum of the remaining 1.5 months of depreciation deduction for the first recovery year and 10.5 months of depreciation deduction for the second recovery year ( $(\$15,000 \times 40 \text{ percent} \times 1.5/12) + (\$9,000 \times 40 \text{ percent} \times 10.5/12)$ ).

(c) *Disposition of property subject to the half-year or mid-quarter convention—(1) In general.* If depreciable property is subject to the half-year (or mid-quarter) convention in the taxable year in which it is placed in service, it also is subject to the half-year (or mid-quarter) convention in the taxable year in which it is disposed of.

(2) *Example.* The provisions of paragraph (c)(1) of this section are illustrated by the following example.

*Example.* In October 1991, B, a calendar-year taxpayer, purchases and places in service a light general purpose truck costing \$10,000. B does not elect to expense any part of the cost of the truck, and this is the only item of depreciable property placed in service by B during 1991. The 40-percent test is satisfied and the mid-quarter convention applies, because the truck is placed in service during the last three months of the taxable year and no other assets are placed in service in that year. In April 1993 (prior to the end of the truck's recovery period), B sells the truck. The mid-quarter convention applies in determining the depreciation deduction for the truck in 1993, the year of disposition.

(d) *Effective dates—(1) In general.* This section applies to depreciable property placed in service in taxable years ending after January 30, 1991. For depreciable property placed in service after December 31, 1986, in taxable years ending on or before January 30, 1991, a taxpayer may use a method other than the method provided in this section in applying the 40-percent test and the applicable convention, provided the method is reasonable and is consistently applied to the taxpayer's property.

(2) *Qualified property, 50-percent bonus depreciation property, or qualified New York Liberty Zone property.* [Reserved]. For further guidance, see § 1.168(d)-1T(d).

(3) *Like-kind exchanges and involuntary conversions.* [Reserved]. For further guidance, see § 1.168(d)-1T(d)(3)(i).

[T.D. 8444, 57 FR 48981, Oct. 29, 1992, as amended by T.D. 9091, 68 FR 52991, Sept. 8, 2003; T.D. 9115, 69 FR 9533, Mar. 1, 2004]

**§ 1.168(d)-1T Applicable conventions—Half-year and mid-quarter conventions (temporary).**

(a) through (b)(2) [Reserved]. For further guidance, see § 1.168(d)-1(a) through (b)(2).

(b)(3) *Property placed in service and disposed of in the same taxable year—(i) Under section 168(d)(3)(B)(ii), the depreciable basis of property placed in service and disposed of in the same taxable year is not taken into account in determining whether the 40-percent test is satisfied. However, the depreciable*

basis of property placed in service, disposed of, subsequently reacquired, and again placed in service, by the taxpayer in the same taxable year must be taken into account in applying the 40-percent test, but the basis of the property is only taken into account on the later of the dates that the property is placed in service by the taxpayer during the taxable year. Further, *see* § 1.168(i)-6T(c)(4)(v)(B) and § 1.168(i)-6T(f) for rules relating to property placed in service and exchanged or involuntarily converted during the same taxable year.

(ii) The applicable convention, as determined under this section, applies to all depreciable property (except non-residential real property, residential rental property, and any railroad grading or tunnel bore) placed in service by the taxpayer during the taxable year, excluding property placed in service and disposed of in the same taxable year. However, *see* § 1.168(i)-6T(c)(4)(v)(A) and § 1.168(i)-6T(f) for rules relating to MACRS property that has a basis determined under section 1031(d) or section 1033(b). No depreciation deduction is allowed for property placed in service and disposed of during the same taxable year. However, *see* § 1.168(k)-1T(f)(1) for rules relating to qualified property or 50-percent bonus depreciation property, and § 1.1400L(b)-1T(f)(1) for rules relating to qualified New York Liberty Zone property, that is placed in service by the taxpayer in the same taxable year in which either a partnership is terminated as a result of a technical termination under section 708(b)(1)(B) or the property is transferred in a transaction described in section 168(i)(7).

(b)(3)(iii) through (d)(1) For further guidance, *see* § 1.168(d)-1(b)(3)(iii) through (d)(1).

(d)(2) *Qualified property, 50-percent bonus depreciation property, or qualified New York Liberty Zone property.* This section also applies to qualified property under section 168(k)(2) or qualified New York Liberty Zone property under section 1400L(b) acquired by a taxpayer after September 10, 2001, and to 50-percent bonus depreciation property under section 168(k)(4) acquired by a taxpayer after May 5, 2003. This section expires on September 4, 2006.

(3) *Like-kind exchanges and involuntary conversions.* (i) The last sentence in paragraph (b)(3)(i) and the second sentence in paragraph (b)(3)(ii) of this section apply to exchanges to which section 1031 applies, and involuntary conversions to which section 1033 applies, of MACRS property for which the time of disposition and the time of replacement both occur after February 27, 2004.

(ii) The applicability of this section expires on or before February 26, 2007.

[T.D. 9091, 68 FR 52991, Sept. 8, 2003; 68 FR 63734, Nov. 10, 2003, as amended by T.D. 9115, 69 FR 9533, Mar. 1, 2004; 69 FR 17586, Apr. 5, 2004]

**§ 1.168(f)(8)-1T Safe-harbor lease information returns concerning qualified mass commuting vehicles (temporary).**

*In general.* Form 6793, Safe Harbor Lease Information Return, is obsolete for safe harbor lease agreements executed after June 30, 1985. The parties to a safe harbor lease agreement under section 168(f)(8) executed after June 30, 1985 must file with their timely filed (including extensions) Federal income tax returns for the taxable year during which the lease term begins a statement containing the following information:

(a) The name, address, and taxpayer identification number of the lessor and the lessee;

(b) A description of the property with respect to which safe-harbor lease treatment is claimed;

(c) The date on which the lessee places the property in service, the date on which the lease begins, and the term of the lease;

(d) The recovery property class of the leased property under section 168(c)(2) (for example, 5-year);

(e) The terms of the payments between the parties to the lease transaction;

(f) The unadjusted basis of the property as defined in section 168(d)(1) and its adjusted basis as determined under § 5c.168(f)(8)-6(b)(3); and

(g) If the lessor is a partnership or grantor trust, the name, address, and taxpayer identification number of the

partners or beneficiaries and the service center at which the income tax return of each partner or beneficiary is filed.

The lessor's failure to file the above-described statement shall void such agreement as a safe-harbor lease under section 168(f)(8) as of the date of the execution of the lease agreement. For rules regarding extensions of time for filing elections, see § 1.9100-1.

[T.D. 8033, 50 FR 27224, July 2, 1985]

**§ 1.168(h)-1 Like-kind exchanges involving tax-exempt use property.**

(a) *Scope.* (1) This section applies with respect to a direct or indirect transfer of property among related persons, including transfers made through a qualified intermediary (as defined in § 1.1031(k)-1(g)(4)) or other unrelated person, (a transfer) if—

(i) Section 1031 applies to any party to the transfer or to any related transaction; and

(ii) A principal purpose of the transfer or any related transaction is to avoid or limit the application of the alternative depreciation system (within the meaning of section 168(g)).

(2) For purposes of this section, a person is related to another person if they bear a relationship specified in section 267(b) or section 707(b)(1).

(b) *Allowable depreciation deduction for property subject to this section—(1) In general.* Property (tainted property) transferred directly or indirectly to a taxpayer by a related person (related party) as part of, or in connection with, a transaction in which the related party receives tax-exempt use property (related tax-exempt use property) will, if the tainted property is subject to an allowance for depreciation, be treated in the same manner as the related tax-exempt use property for purposes of determining the allowable depreciation deduction under section 167(a). Under this paragraph (b), the tainted property is depreciated by the taxpayer over the remaining recovery period of, and using the same depreciation method and convention as that of, the related tax-exempt use property.

(2) *Limitations—(i) Taxpayer's basis in related tax-exempt use property.* The rules of this paragraph (b) apply only with respect to so much of the tax-

payer's basis in the tainted property as does not exceed the taxpayer's adjusted basis in the related tax-exempt use property prior to the transfer. Any excess of the taxpayer's basis in the tainted property over its adjusted basis in the related tax-exempt use property prior to the transfer is treated as property to which this section does not apply. This paragraph (b)(2)(i) does not apply if the related tax-exempt use property is not acquired from the taxpayer (e.g., if the taxpayer acquires the tainted property for cash but section 1031 nevertheless applies to the related party because the transfer involves a qualified intermediary).

(ii) *Application of section 168(i)(7).* This section does not apply to so much of the taxpayer's basis in the tainted property as is subject to section 168(i)(7).

(c) *Related tax-exempt use property.* (1) For purposes of paragraph (b) of this section, related tax-exempt use property includes—

(i) Property that is tax-exempt use property (as defined in section 168(h)) at the time of the transfer; and

(ii) Property that does not become tax-exempt use property until after the transfer if, at the time of the transfer, it was intended that the property become tax-exempt use property.

(2) For purposes of determining the remaining recovery period of the related tax-exempt use property in the circumstances described in paragraph (c)(1)(ii) of this section, the related tax-exempt use property will be treated as having, prior to the transfer, a lease term equal to the term of any lease that causes such property to become tax-exempt use property.

(d) *Examples.* The following examples illustrate the application of this section. The examples do not address common law doctrines or other authorities that may apply to recharacterize or alter the effects of the transactions described therein. Unless otherwise indicated, parties to the transactions are not related to one another.

*Example 1.* (i) X owns all of the stock of two subsidiaries, B and Z. X, B and Z do not file a consolidated federal income tax return. On May 5, 1995, B purchases an aircraft (FA) for \$1 million and leases it to a foreign airline whose income is not subject to United States

taxation and which is a tax-exempt entity as defined in section 168(h)(2). On the same date, Z owns an aircraft (DA) with a fair market value of \$1 million, which has been, and continues to be, leased to an airline that is a United States taxpayer. Z's adjusted basis in DA is \$0. The next day, at a time when each aircraft is still worth \$1 million, B transfers FA to Z (subject to the lease to the foreign airline) in exchange for DA (subject to the lease to the airline that is a United States taxpayer). Z realizes gain of \$1 million on the exchange, but that gain is not recognized pursuant to section 1031(a) because the exchange is of like-kind properties. Assume that a principal purpose of the transfer of DA to B or of FA to Z is to avoid the application of the alternative depreciation system. Following the exchange, Z has a \$0 basis in FA pursuant to section 1031(d). B has a \$1 million basis in DA.

(i) B has acquired property from Z, a related person; Z's gain is not recognized pursuant to section 1031(a); Z has received tax-exempt use property as part of the transaction; and a principal purpose of the transfer of DA to B or of FA to Z is to avoid the application of the alternative depreciation system. Accordingly, the transaction is within the scope of this section. Pursuant to paragraph (b) of this section, B must recover its \$1 million basis in DA over the remaining recovery period of, and using the same depreciation method and convention as that of, FA, the related tax-exempt use property.

(iii) If FA did not become tax-exempt use property until after the exchange, it would still be related tax-exempt use property and paragraph (b) of this section would apply if, at the time of the exchange, it was intended that FA become tax-exempt use property.

*Example 2.* (i) X owns all of the stock of two subsidiaries, B and Z. X, B and Z do not file a consolidated federal income tax return. B and Z each own identical aircraft. B's aircraft (FA) is leased to a tax-exempt entity as defined in section 168(h)(2) and has a fair market value of \$1 million and an adjusted basis of \$500,000. Z's aircraft (DA) is leased to a United States taxpayer and has a fair market value of \$1 million and an adjusted basis of \$10,000. On May 1, 1995, B and Z exchange aircraft, subject to their respective leases. B realizes gain of \$500,000 and Z realizes gain of \$990,000, but neither person recognizes gain because of the operation of section 1031(a). Moreover, assume that a principal purpose of the transfer of DA to B or of FA to Z is to avoid the application of the alternative depreciation system.

(ii) As in *Example 1*, B has acquired property from Z, a related person; Z's gain is not recognized pursuant to section 1031(a); Z has received tax-exempt use property as part of the transaction; and a principal purpose of the transfer of DA to B or of FA to Z is to avoid the application of the alternative de-

preciation system. Thus, the transaction is within the scope of this section even though B has held tax-exempt use property for a period of time and, during that time, has used the alternative depreciation system with respect to such property. Pursuant to paragraph (b) of this section, B, which has a substituted basis determined pursuant to section 1031(d) of \$500,000 in DA, must depreciate the aircraft over the remaining recovery period of FA, using the same depreciation method and convention. Z holds tax-exempt use property with a basis of \$10,000, which must be depreciated under the alternative depreciation system.

(iii) Assume the same facts as in paragraph (i) of this *Example 2*, except that B and Z are members of an affiliated group that files a consolidated federal income tax return. Of B's \$500,000 basis in DA, \$10,000 is subject to section 168(i)(7) and therefore not subject to this section. The remaining \$490,000 of basis is subject to this section. But see §1.1502-80(f) making section 1031 inapplicable to intercompany transactions occurring in consolidated return years beginning on or after July 12, 1995.

(e) *Effective date.* This section applies to transfers made on or after April 20, 1995.

[T.D. 8667, 61 FR 18676, Apr. 29, 1996]

**§ 1.168(i)-1 General asset accounts.**

(a) *Scope.* This section provides rules for general asset accounts under section 168(i)(4). The provisions of this section apply only to assets for which an election has been made under paragraph (k) of this section.

(b) *Definitions.* For purposes of this section, the following definitions apply:

(1) *Unadjusted depreciable basis* is the basis of an asset for purposes of section 1011 without regard to any adjustments described in section 1016(a)(2) and (3). This basis reflects the reduction in basis for the percentage of the taxpayer's use of property for the taxable year other than in the taxpayer's trade or business (or for the production of income), for any portion of the basis the taxpayer properly elects to treat as an expense under section 179, and for any adjustments to basis provided by other provisions of the Internal Revenue Code and the regulations under the Internal Revenue Code (other than section 1016(a)(2) and (3)) (for example, a reduction in basis by the amount of the

disabled access credit pursuant to section 44(d)(7)). For property subject to a lease, see section 167(c)(2).

(2) *Unadjusted depreciable basis of the general asset account* is the sum of the unadjusted depreciable bases of all assets included in the general asset account.

(3) *Adjusted depreciable basis of the general asset account* is the unadjusted depreciable basis of the general asset account less the adjustments to basis described in sections 1016(a)(2) and (3).

(4) *Expensed cost* is the amount of any allowable credit or deduction treated as a deduction allowable for depreciation or amortization for purposes of section 1245 (for example, a credit allowable under section 30 or a deduction allowable under section 179, 179A, or 190).

(c) *Establishment of general asset accounts*—(1) *Assets eligible for general asset accounts*—(i) *General rules*. Assets that are subject to either the general depreciation system of section 168(a) or the alternative depreciation system of section 168(g) may be accounted for in one or more general asset accounts. An asset may be included in a general asset account only to the extent of the asset's unadjusted depreciable basis (for example, if, in 1995, a taxpayer places in service an asset that costs \$20,000 and elects under section 179 to expense \$17,500 of that asset's cost, the unadjusted depreciable basis of the asset is \$2,500 and, therefore, only \$2,500 of the asset's cost may be included in a general asset account). However, an asset is not to be included in a general asset account if the asset is used both in a trade or business (or for the production of income) and in a personal activity at any time during the taxable year in which the asset is first placed in service by the taxpayer.

(ii) *Special rules for assets generating foreign source income*—(A) Assets that generate foreign source income, both United States and foreign source income, or combined gross income of a FSC (as defined in section 922), DISC (as defined in section 992(a)), or possessions corporation (as defined in section 936) and its related supplier, may be included in a general asset account if the requirements of paragraph (c)(2)(i) of this section are satisfied. If, however,

the inclusion of these assets in a general asset account results in a substantial distortion of income, the Commissioner may disregard the general asset account election and make any reallocations of income or expense necessary to clearly reflect income.

(B) A general asset account shall be treated as a single asset for purposes of applying the rules in §1.861-9T(g)(3) (relating to allocation and apportionment of interest expense under the asset method). A general asset account that generates income in more than one grouping of income (statutory and residual) is a multiple category asset (as defined in §1.861-9T(g)(3)(ii)), and the income yield from the general asset account must be determined by applying the rules for multiple category assets as if the general asset account were a single asset.

(2) *Grouping assets in general asset accounts*—(i) *General rules*. If a taxpayer makes the election under paragraph (k) of this section, assets that are subject to the election are grouped into one or more general asset accounts. Assets that are eligible to be grouped into a single general asset account may be divided into more than one general asset account. Each general asset account must include only assets that—

(A) Have the same asset class (for further guidance, see Rev. Proc. 87-56, 1987-2 C.B. 674, and §601.601(d)(2)(ii)(b) of this chapter);

(B) Have the same applicable depreciation method;

(C) Have the same applicable recovery period;

(D) Have the same applicable convention; and

(E) Are placed in service by the taxpayer in the same taxable year.

(ii) *Special rules*. In addition to the general rules in paragraph (c)(2)(i) of this section, the following rules apply when establishing general asset accounts—

(A) Assets without an asset class, but with the same characteristics described in paragraphs (c)(2)(i)(B), (C), (D), and (E) of this section, may be grouped into a general asset account;

(B) Assets subject to the mid-quarter convention may only be grouped into a general asset account with assets that

are placed in service in the same quarter of the taxable year;

(C) Assets subject to the mid-month convention may only be grouped into a general asset account with assets that are placed in service in the same month of the taxable year;

(D) Passenger automobiles for which the depreciation allowance is limited under section 280F(a) must be grouped into a separate general asset account; and

(E) Assets subject to paragraph (h)(2)(iii)(A) of this section (change in use results in a shorter recovery period and/or a more accelerated depreciation method) for which the depreciation allowance for the year of change (as defined in § 1.168(i)-4(a)) is not determined by using an optional depreciation table must be grouped into a separate general asset account.

(d) *Determination of depreciation allowance*—(1) *In general.* Depreciation allowances are determined for each general asset account by using the applicable depreciation method, recovery period, and convention for the assets in the account. The depreciation allowances are recorded in a depreciation reserve account for each general asset account. The allowance for depreciation under this section constitutes the amount of depreciation allowable under section 167(a).

(2) [Reserved]. For further guidance, see § 1.168(i)-1T(d)(2).

(e) *Disposition of an asset from a general asset account*—(1) *Scope.* This paragraph (e) provides rules applicable to dispositions of assets included in a general asset account. For purposes of this paragraph (e), an asset in a general asset account is disposed of when ownership of the asset is transferred or when the asset is permanently withdrawn from use either in the taxpayer's trade or business or in the production of income. A disposition includes the sale, exchange, retirement, physical abandonment, or destruction of an asset. A disposition also occurs when an asset is transferred to a supplies, scrap, or similar account. A disposition does not include, however, the retirement of a structural component of real property.

(2) *General rules for a disposition*—(i) *No immediate recovery of basis.* Imme-

diately before a disposition of any asset in a general asset account, the asset is treated as having an adjusted basis of zero for purposes of section 1011. Therefore, no loss is realized upon the disposition of an asset from the general asset account. Similarly, where an asset is disposed of by transfer to a supplies, scrap, or similar account, the basis of the asset in the supplies, scrap, or similar account will be zero.

(ii) *Treatment of amount realized.* Any amount realized on a disposition is recognized as ordinary income (notwithstanding any other provision of subtitle A of the Internal Revenue Code (Code)) to the extent the sum of the unadjusted depreciable basis of the general asset account and any expensed cost (as defined in paragraph (b)(4) of this section) for assets in the account exceeds any amounts previously recognized as ordinary income upon the disposition of other assets in the account. The recognition and character of any excess amount realized are determined under other applicable provisions of the Code (other than sections 1245 and 1250 or provisions of the Code that treat gain on a disposition as subject to section 1245 or 1250).

(iii) *Effect of disposition on a general asset account.* The unadjusted depreciable basis and the depreciation reserve of the general asset account are not affected as a result of a disposition of an asset from the general asset account.

(iv) *Coordination with nonrecognition provisions.* For purposes of determining the basis of an asset acquired in a transaction described in paragraph (e)(3)(iii)(B)(4) of this section (relating to certain nonrecognition provisions), the amount of ordinary income recognized under this paragraph (e)(2) is treated as the amount of gain recognized on the disposition.

(v) *Examples.* The following examples illustrate the application of this paragraph (e)(2).

*Example 1.* (i) R, a calendar-year corporation, maintains one general asset account for ten machines. The machines cost a total of \$10,000 and were placed in service in June 1995. Of the ten machines, one machine costs \$8,200 and nine machines cost a total of \$1,800. Assume this general asset account has a depreciation method of 200 percent declining balance, a recovery period of 5 years, and

a half-year convention. *R* does not make a section 179 election for any of the machines. As of January 1, 1996, the depreciation reserve of the account is \$2,000  $[(\$10,000 - \$0) \times 40\% / 2]$ .

(i) On February 8, 1996, *R* sells the machine that cost \$8,200 to an unrelated party for \$9,000. Under paragraph (e)(2)(i) of this section, this machine has an adjusted basis of zero.

(iii) On its 1996 tax return, *R* recognizes the amount realized of \$9,000 as ordinary income because such amount does not exceed the unadjusted depreciable basis of the general asset account (\$10,000), plus any expensed cost for assets in the account (\$0), less amounts previously recognized as ordinary income (\$0). Moreover, the unadjusted depreciable basis and depreciation reserve of the account are not affected by the disposition of the machine. Thus, the depreciation allowance for the account in 1996 is \$3,200  $(\$10,000 - \$2,000) \times 40\%$ .

*Example 2.* (i) The facts are the same as in *Example 1*. In addition, on June 4, 1997, *R* sells seven machines to an unrelated party for a total of \$1,100. In accordance with paragraph (e)(2)(i) of this section, these machines have an adjusted basis of zero.

(ii) On its 1997 tax return, *R* recognizes \$1,000 as ordinary income (the unadjusted depreciable basis of \$10,000, plus the expensed cost of \$0, less the amount of \$9,000 previously recognized as ordinary income). The recognition and character of the excess amount realized of \$100  $(\$1,100 - \$1,000)$  are determined under applicable provisions of the Code other than section 1245 (such as section 1231). Moreover, the unadjusted depreciable basis and depreciation reserve of the account are not affected by the disposition of the machines. Thus, the depreciation allowance for the account in 1997 is \$1,920  $(\$10,000 - \$5,200) \times 40\%$ .

(3) *Special rules.* (i) [Reserved]. For further guidance, see § 1.168(i)-1T(e)(3)(i).

(ii) *Disposition of all assets remaining in a general asset account—(A) Optional termination of a general asset account.* Upon the disposition of all of the assets, or the last asset, in a general asset account, a taxpayer may apply this paragraph (e)(3)(ii) to recover the adjusted depreciable basis of the general asset account (rather than having paragraph (e)(2) of this section apply). Under this paragraph (e)(3)(ii), the general asset account terminates and the amount of gain or loss for the general asset account is determined under section 1001(a) by taking into account the adjusted depreciable basis of the general asset account at the time of the

disposition. The recognition and character of the gain or loss are determined under other applicable provisions of the Code, except that the amount of gain subject to section 1245 (or section 1250) is limited to the excess of the depreciation allowed or allowable for the general asset account, including any expensed cost (or the excess of the additional depreciation allowed or allowable for the general asset account), over any amounts previously recognized as ordinary income under paragraph (e)(2) of this section.

(B) *Example.* The following example illustrates the application of this paragraph (e)(3)(ii).

*Example.* (i) *T*, a calendar-year corporation, maintains a general asset account for 1,000 calculators. The calculators cost a total of \$60,000 and were placed in service in 1995. Assume this general asset account has a depreciation method of 200 percent declining balance, a recovery period of 5 years, and a half-year convention. *T* does not make a section 179 election for any of the calculators. In 1996, *T* sells 200 of the calculators to an unrelated party for a total of \$10,000 and recognizes the \$10,000 as ordinary income in accordance with paragraph (e)(2) of this section.

(ii) On March 26, 1997, *T* sells the remaining calculators in the general asset account to an unrelated party for \$35,000. *T* chooses to apply paragraph (e)(3)(ii) of this section. As a result, the account terminates and gain or loss is determined for the account.

(iii) On the date of disposition, the adjusted depreciable basis of the account is \$23,040 (unadjusted depreciable basis of \$60,000 less the depreciation allowed or allowable of \$36,960). Thus, in 1997, *T* recognizes gain of \$11,960 (amount realized of \$35,000 less the adjusted depreciable basis of \$23,040). The gain of \$11,960 is subject to section 1245 to the extent of the depreciation allowed or allowable for the account (plus the expensed cost for assets in the account) less the amounts previously recognized as ordinary income  $(\$36,960 + \$0 - \$10,000 = \$26,960)$ . As a result, the entire gain of \$11,960 is subject to section 1245.

(iii) *Disposition of an asset in a qualifying disposition—(A) Optional determination of the amount of gain, loss, or other deduction.* In the case of a qualifying disposition of an asset (described in paragraph (e)(3)(iii)(B) of this section), a taxpayer may apply this paragraph (e)(3)(iii) (rather than having paragraph (e)(2) of this section apply). Under this paragraph (e)(3)(iii), general

asset account treatment for the asset terminates as of the first day of the taxable year in which the qualifying disposition occurs, and the amount of gain, loss, or other deduction for the asset is determined by taking into account the asset's adjusted basis. The adjusted basis of the asset at the time of the disposition equals the unadjusted depreciable basis of the asset less the depreciation allowed or allowable for the asset, computed by using the depreciation method, recovery period, and convention applicable to the general asset account in which the asset was included. The recognition and character of the gain, loss, or other deduction are determined under other applicable provisions of the Code, except that the amount of gain subject to section 1245 (or section 1250) is limited to the lesser of—

(1) The depreciation allowed or allowable for the asset, including any expensed cost (or the additional depreciation allowed or allowable for the asset); or

(2) The excess of—

(i) The original unadjusted depreciable basis of the general asset account plus, in the case of section 1245 property originally included in the general asset account, any expensed cost; over

(ii) The cumulative amounts of gain previously recognized as ordinary income under either paragraph (e)(2) of this section or section 1245 (or section 1250).

(B) *Qualifying dispositions.* A qualifying disposition is a disposition that does not involve all the assets, or the last asset, remaining in a general asset account and that is—

(1) A direct result of a fire, storm, shipwreck, or other casualty, or from theft;

(2) A charitable contribution for which a deduction is allowable under section 170;

(3) A direct result of a cessation, termination, or disposition of a business, manufacturing or other income producing process, operation, facility, plant, or other unit (other than by transfer to a supplier, scrap, or similar account); or

(4) [Reserved]. For further guidance, see § 1.168(i)-1T(e)(3)(iii)(B)(4).

(C) *Effect of a qualifying disposition on a general asset account.* If the taxpayer applies this paragraph (e)(3)(iii) to a qualifying disposition of an asset, then—

(1) The asset is removed from the general asset account as of the first day of the taxable year in which the qualifying disposition occurs;

(2) The unadjusted depreciable basis of the general asset account is reduced by the unadjusted depreciable basis of the asset as of the first day of the taxable year in which the disposition occurs;

(3) The depreciation reserve of the general asset account is reduced by the depreciation allowed or allowable for the asset as of the end of the taxable year immediately preceding the year of disposition, computed by using the depreciation method, recovery period, and convention applicable to the general asset account in which the asset was included; and

(4) For purposes of determining the amount of gain realized on subsequent dispositions that is subject to ordinary income treatment under paragraph (e)(2)(ii) of this section, the amount of any expensed cost with respect to the asset is disregarded.

(D) *Example.* The provisions of this paragraph (e)(3)(iii) are illustrated by the following example.

*Example.* (i) Z, a calendar-year corporation, maintains one general asset account for 12 machines. Each machine costs \$15,000 and was placed in service in 1995. Of the 12 machines, nine machines that cost a total of \$135,000 are used in Z's Kentucky plant, and three machines that cost a total of \$45,000 are used in Z's Ohio plant. Assume this general asset account has a depreciation method of 200 percent declining balance, a recovery period of 5 years, and a half-year convention. Z does not make a section 179 election for any of the machines. As of January 1, 1997, the depreciation reserve for the account is \$93,600.

(ii) On May 27, 1997, Z sells its entire manufacturing plant in Ohio to an unrelated party. The sales proceeds allocated to each of the three machines at the Ohio plant is \$5,000. Because this transaction is a qualifying disposition under paragraph (e)(3)(iii)(B)(3) of this section, Z chooses to apply paragraph (e)(3)(iii) of this section.

(iii) For Z's 1997 return, the depreciation allowance for the account is computed as follows. As of December 31, 1996, the depreciation allowed or allowable for the three machines at the Ohio plant is \$23,400. Thus, as of January 1, 1997, the unadjusted depreciable basis of the account is reduced from \$180,000 to \$135,000 (\$180,000 less the unadjusted depreciable basis of \$45,000 for the three machines), and the depreciation reserve of the account is decreased from \$93,600 to \$70,200 (\$93,600 less the depreciation allowed or allowable of \$23,400 for the three machines as of December 31, 1996). Consequently, the depreciation allowance for the account in 1997 is \$25,920 ((\$135,000 - \$70,200) × 40%).

(iv) For Z's 1997 return, gain or loss for each of the three machines at the Ohio plant is determined as follows. The depreciation allowed or allowable in 1997 for each machine is \$1,440 [(((\$15,000 - \$7,800) × 40%) / 2)]. Thus, the adjusted basis of each machine under section 1011 is \$5,760 (the adjusted depreciable basis of \$7,200 removed from the account less the depreciation allowed or allowable of \$1,440 in 1997). As a result, the loss recognized in 1997 for each machine is \$760 (\$5,000 - \$5,760), which is subject to section 1231.

(iv) *Transactions subject to section 168(i)(7)*. If an asset in a general asset account is transferred in a transaction described in section 168(i)(7)(B) (pertaining to treatment of transferees in certain nonrecognition transactions), the transferor must remove the transferred asset from the general asset account as of the first day of the taxable year in which the transaction occurs. In addition, the adjustments to the general asset account described in paragraph (e)(3)(iii)(C)(2) through (4) of

this section must be made. The transferee is bound by the transferor's election under paragraph (k) of this section with respect to so much of the asset's basis in the hands of the transferee as does not exceed the asset's adjusted basis in the hands of the transferor. If all of the assets, or the last asset, in a general asset account are transferred, the transferee's basis in the assets or asset transferred is equal to the adjusted depreciable basis of the general asset account as of the beginning of the transferor's taxable year in which the transaction occurs, decreased by the amount of depreciation allocable to the transferor for the year of the transfer.

(v) [Reserved]. For further guidance, see § 1.168(i)-1T(e)(3)(v).

(vi) *Anti-abuse rule* [Reserved]. For further guidance, see § 1.168(i)-1T(e)(3)(vi).

(f) *Assets generating foreign source income*—(1) *In general*. [Reserved]. For further guidance, see § 1.168(i)-1T(f)(1).

(2) *Source of ordinary income, gain, or loss*. (i) [Reserved]. For further guidance, see § 1.168(i)-1T(f)(2)(i).

(ii) *Formula for determining foreign source income, gain, or loss*. The amount of ordinary income, gain, or loss recognized on the disposition that shall be treated as foreign source income, gain, or loss must be determined under the formula in this paragraph (f)(2)(ii). For purposes of this formula, the allowed depreciation deductions are determined for the applicable time period provided in paragraph (f)(2)(i) of this section. The formula is:

$$\begin{array}{l} \text{Foreign Source Income,} \\ \text{Gain, or Loss} \\ \text{from the Disposition} \\ \text{of an Asset} \end{array} = \begin{array}{l} \text{Total Ordinary Income,} \\ \text{Gain, or Loss} \\ \text{from Disposition} \\ \text{of an Asset} \end{array} \times \begin{array}{l} \text{Allowed Depreciation Deductions} \\ \text{Allocated and Apportioned to} \\ \text{Foreign Source Income/Total} \\ \text{Allowed Depreciation Deductions} \\ \text{for the General Asset Account} \\ \text{or for the Disposed Asset} \\ \text{(as applicable)} \end{array}$$

(3) *Section 904(d) separate categories*. If the assets in the general asset account generate foreign source income in more than one separate category under section 904(d)(1) or another section of the Code (for example, income treated as

foreign source income under section 904(g)(10)), or under a United States income tax treaty that requires the foreign tax credit limitation to be determined separately for specified types of income, the amount of "foreign source

income, gain, or loss from the disposition of an asset'' (as determined under the formula in paragraph (f)(2)(ii) of this section) must be allocated and apportioned to the applicable separate category or categories under the for-

mula in this paragraph (f)(3). For purposes of this formula, the allowed depreciation deductions are determined for the applicable time period provided in paragraph (f)(2)(i) of this section. The formula is:

$$\begin{array}{l} \text{Foreign Source Income, Gain, or Loss} \\ \text{In a Separate Category} \end{array} = \begin{array}{l} \text{Foreign Source Income, Gain, or Loss} \\ \text{from the Disposition} \\ \text{of an Asset} \end{array} \times \begin{array}{l} \text{Allowed Depreciation Deductions} \\ \text{Allocated and Apportioned to a} \\ \text{Separate Category/Total} \\ \text{Allowed Depreciation Deductions} \\ \text{and Apportioned to} \\ \text{Foreign Source Income} \end{array}$$

(g) *Assets subject to recapture.* If the basis of an asset in a general asset account is increased as a result of the recapture of any allowable credit or deduction (for example, the basis adjustment for the recapture amount under section 30(d)(2), 50(c)(2), 179(d)(10), or 179A(e)(4)), general asset account treatment for the asset terminates as of the first day of the taxable year in which the recapture event occurs. Consequently, the taxpayer must remove the asset from the general asset account as of that day and must make the adjustments to the general asset account described in paragraph (e)(3)(iii)(C)(2) through (4) of this section.

(h) *Changes in use—(1) Conversion to personal use.* An asset in a general asset account becomes ineligible for general asset account treatment if a taxpayer uses the asset in a personal activity during a taxable year. Upon a conversion to personal use, the taxpayer must remove the asset from the general asset account as of the first day of the taxable year in which the change in use occurs (the year of change) and must make the adjustments to the general asset account described in paragraph (e)(3)(iii)(C)(2) through (4) of this section.

(2) *Change in use results in a different recovery period and/or depreciation method—(i) No effect on general asset account election.* A change in the use described in §1.168(i)-4(d) (change in use results in a different recovery period and/or depreciation method) of an asset in a general asset account shall not cause

or permit the revocation of the election made under this section.

(ii) *Asset is removed from the general asset account.* Upon a change in the use described in §1.168(i)-4(d), the taxpayer must remove the asset from the general asset account as of the first day of the year of change and must make the adjustments to the general asset account described in paragraphs (e)(3)(iii)(C)(2) through (4) of this section. If, however, the result of the change in use is described in §1.168(i)-4(d)(3) (change in use results in a shorter recovery period and/or a more accelerated depreciation method) and the taxpayer elects to treat the asset as though the change in use had not occurred pursuant to §1.168(i)-4(d)(3)(ii), no adjustment is made to the general asset account upon the change in use.

(iii) *New general asset account is established—(A) Change in use results in a shorter recovery period and/or a more accelerated depreciation method.* If the result of the change in use is described in §1.168(i)-4(d)(3) (change in use results in a shorter recovery period and/or a more accelerated depreciation method) and adjustments to the general asset account are made pursuant to paragraph (h)(2)(ii) of this section, the taxpayer must establish a new general asset account for the asset in the year of change in accordance with the rules in paragraph (c) of this section, except that the adjusted depreciable basis of the asset as of the first day of the year of change is included in the general

asset account. For purposes of paragraph (c)(2) of this section, the applicable depreciation method, recovery period, and convention are determined under § 1.168(i)-4(d)(3)(i).

(B) *Change in use results in a longer recovery period and/or a slower depreciation method.* If the result of the change in use is described in § 1.168(i)-4(d)(4) (change in use results in a longer recovery period and/or a slower depreciation method), the taxpayer must establish a separate general asset account for the asset in the year of change in accordance with the rules in paragraph (c) of this section, except that the unadjusted depreciable basis of the asset, and the greater of the depreciation of the asset allowed or allowable in accordance with section 1016(a)(2), as of the first day of the year of change are included in the newly established general asset account. Consequently, this general asset account as of the first day of the year of change will have a beginning balance for both the unadjusted depreciable basis and the depreciation reserve of the general asset account. For purposes of paragraph (c)(2) of this section, the applicable depreciation method, recovery period, and convention are determined under § 1.168(i)-4(d)(4)(ii).

(i) *Identification of disposed or converted asset.* [Reserved]. For further guidance, see § 1.168(i)-1T(i).

(j) *Effect of adjustments on prior dispositions.* [Reserved]. For further guidance, see § 1.168(i)-1T(j).

(k) *Election—(1) Irrevocable election.* If a taxpayer makes an election under this paragraph (k), the taxpayer consents to, and agrees to apply, all of the provisions of this section to the assets included in a general asset account. Except as provided in paragraph (c)(1)(ii)(A), (e)(3), (g), or (h) of this section, an election made under this section is irrevocable and will be binding on the taxpayer for computing taxable income for the taxable year for which the election is made and for all subsequent taxable years. An election under this paragraph (k) is made separately by each person owning an asset to which this section applies (for example, by each member of a consolidated group, at the partnership level (and not by the partner separately), or at the S

corporation level (and not by the shareholder separately)).

(2) *Time for making election.* The election to apply this section shall be made on the taxpayer's timely filed (including extensions) income tax return for the taxable year in which the assets included in the general asset account are placed in service by the taxpayer.

(3) *Manner of making election.* In the year of election, a taxpayer makes the election under this section by typing or legibly printing at the top of the Form 4562, "GENERAL ASSET ACCOUNT ELECTION MADE UNDER SECTION 168(i)(4)," or in the manner provided for on Form 4562 and its instructions. The taxpayer shall maintain records (for example, "General Asset Account #1 - all 1995 additions in asset class 00.11 for Salt Lake City, Utah facility") that identify the assets included in each general asset account, that establish the unadjusted depreciable basis and depreciation reserve of the general asset account, and that reflect the amount realized during the taxable year upon dispositions from each general asset account. (But see section 179(c) and § 1.179-5 for the record-keeping requirements for section 179 property.) The taxpayer's record-keeping practices should be consistently applied to the general asset accounts. If Form 4562 is revised or renumbered, any reference in this section to that form shall be treated as a reference to the revised or renumbered form.

(1) *Effective dates—(1)* [Reserved] For further guidance, see § 1.168(i)-1T(1)(1).

(2) *Exceptions—(i) In general.* (A) Paragraph (b)(1) of this section applies on or after June 17, 2004. For the applicability of § 1.168(i)-1(b)(1) before June 17, 2004, see § 1.168(i)-1(b)(1) in effect prior to June 17, 2004 (§ 1.168(i)-1(b)(1) as contained in 26 CFR part 1 edition revised as of April 1, 2004).

(B) Paragraphs (c)(2)(ii)(E) and (h)(2) of this section apply to any change in the use of depreciable assets pursuant to § 1.168(i)-4(d) in a taxable year ending on or after June 17, 2004. For any change in the use of depreciable assets as described in § 1.168(i)-4(d) after December 31, 1986, in a taxable year ending before June 17, 2004, the Internal

## § 1.168(i)-1T

## 26 CFR Ch. I (4-1-06 Edition)

Revenue Service will allow any reasonable method that is consistently applied to the taxpayer's general asset accounts or the taxpayer may choose, on an asset-by-asset basis, to apply paragraphs (c)(2)(ii)(E) and (h)(2) of this section.

(ii) *Change in method of accounting—*  
(A) *In general.* If a taxpayer adopted a method of accounting for general asset account treatment due to a change in the use of depreciable assets pursuant to § 1.168(i)-4(d) in a taxable year ending on or after December 30, 2003, and the method adopted is not in accordance with the method of accounting provided in paragraphs (c)(2)(ii)(E) and (h)(2) of this section, a change to the method of accounting provided in paragraphs (c)(2)(ii)(E) and (h)(2) of this section is a change in method of accounting to which the provisions of section 446(e) and the regulations under section 446(e) apply. However, if a taxpayer adopted a method of accounting for general asset account treatment due to a change in the use of depreciable assets pursuant to § 1.168(i)-4(d) after December 31, 1986, in a taxable year ending before December 30, 2003, and the method adopted is not in accordance with the method of accounting provided in paragraphs (c)(2)(ii)(E) and (h)(2) of this section, the taxpayer may treat the change to the method of accounting provided in paragraphs (c)(2)(ii)(E) and (h)(2) of this section as a change in method of accounting to which the provisions of section 446(e) and the regulations under section 446(e) apply.

(B) *Automatic consent to change method of accounting.* A taxpayer changing its method of accounting in accordance with this paragraph (1)(2)(ii) must follow the applicable administrative procedures issued under § 1.446-1(e)(3)(ii) for obtaining the Commissioner's automatic consent to a change in method of accounting (for further guidance, for example, see Rev. Proc. 2002-9 (2002-1 C.B. 327), as modified by Rev. Proc. 2004-11 (2004-3 I.R.B. 311) (see § 601.601(d)(2)(ii)(b) of this chapter)). Because this change does not change the adjusted depreciable basis of the asset, the method change is made on a cut-off basis and, therefore, no adjustment under section 481(a) is required or al-

lowed. For purposes of Form 3115, *Application for Change in Accounting Method*, the designated number for the automatic accounting method change authorized by this paragraph (1)(2)(ii) is "87." If Form 3115 is revised or renumbered, any reference in this section to that form is treated as a reference to the revised or renumbered form.

(3) [Reserved] For further guidance, see § 1.168(i)-1T(1)(3).

[T.D. 8566, 59 FR 51371, Oct. 11, 1994; 59 FR 64849, Dec. 16, 1994, as amended by T.D. 9115, 69 FR 9534, Mar. 1, 2004; T.D. 9132, 69 FR 33842, June 17, 2004]

### § 1.168(i)-1T General asset accounts (temporary).

(a) through (c)(2)(ii)(D) [Reserved]. For further guidance, see § 1.168(i)-1(a) through (c)(2)(ii)(D).

(c)(2)(ii)(E) [Reserved] For further guidance, see § 1.168(i)-1(c)(2)(ii)(E).

(d)(1) [Reserved]. For further guidance, see § 1.168(i)-1(d)(1).

(2) *Special rule for passenger automobiles.* For purposes of applying section 280F(a), the depreciation allowance for a general asset account established for passenger automobiles is limited for each taxable year to the amount prescribed in section 280F(a) multiplied by the excess of the number of automobiles originally included in the account over the number of automobiles disposed of during the taxable year or in any prior taxable year in a transaction described in paragraph (e)(3)(iii) (disposition of an asset in a qualifying disposition), (e)(3)(iv) (transactions subject to section 168(i)(7)), (e)(3)(v) (transactions subject to section 1031 or 1033), (e)(3)(vi) (anti-abuse rule), (g) (assets subject to recapture), or (h) (changes in use) of this section.

(e)(1) through (e)(2) [Reserved]. For further guidance, see § 1.168(i)-1(e)(1) through (e)(2).

(e)(3) *Special rules—(i) In general.* This paragraph (e)(3) provides the rules for terminating general asset account treatment upon certain dispositions. While the rules under paragraphs (e)(3)(ii) and (iii) of this section are optional rules, the rules under paragraphs (e)(3)(iv), (v), and (vi) of this section are mandatory rules. A taxpayer applies paragraph (e)(3)(ii) or (iii) of this section by reporting the gain,

loss, or other deduction on the taxpayer's timely filed Federal income tax return (including extensions) for the taxable year in which the disposition occurs. For purposes of applying paragraph (e)(3)(iii) through (vi) of this section, see paragraph (i) of this section for identifying the unadjusted depreciable basis of a disposed asset.

(e)(3)(ii) through (e)(3)(iii)(B)(3) [Reserved]. For further guidance, see § 1.168(i)-1(e)(3)(ii) through (e)(3)(iii)(B)(3).

(e)(3)(iii)(B)(4) A transaction, other than a transaction described in paragraph (e)(3)(iv) of this section (pertaining to transactions subject to section 168(i)(7)) and (e)(3)(v) of this section (pertaining to transactions subject to section 1031 or 1033), to which a non-recognition section of the Code applies (determined without regard to this section).

(e)(3)(iii)(C) through (e)(3)(iv) [Reserved]. For further guidance, see § 1.168(i)-1(e)(iii)(C) through (e)(3)(iv).

(e)(3)(v) *Transactions subject to section 1031 or section 1033*—(A) *Like-kind exchange or involuntary conversion of all assets remaining in a general asset account.* If all the assets, or the last asset, in a general asset account are transferred by a taxpayer in a like-kind exchange (as defined under § 1.168-6T(b)(11)) or in an involuntary conversion (as defined under § 1.168-6T(b)(12)), the taxpayer must apply this paragraph (e)(3)(v)(A) (instead of applying paragraph (e)(2), (e)(3)(ii), or (e)(3)(iii) of this section). Under this paragraph (e)(3)(v)(A), the general asset account terminates as of the first day of the year of disposition (as defined in § 1.168(i)-6T(b)(5)) and—

(1) The amount of gain or loss for the general asset account is determined under section 1001(a) by taking into account the adjusted depreciable basis of the general asset account at the time of disposition (as defined in § 1.168(i)-6T(b)(3)). The depreciation allowance for the general asset account in the year of disposition is determined in the same manner as the depreciation allowance for the relinquished MACRS property (as defined in § 1.168(i)-6T(b)(2)) in the year of disposition is determined under § 1.168(i)-6T. The recognition and character of gain or loss

are determined in accordance with paragraph (e)(3)(ii)(A) of this section (notwithstanding that paragraph (e)(3)(ii) of this section is an optional rule); and

(2) The adjusted depreciable basis of the general asset account at the time of disposition is treated as the adjusted depreciable basis of the relinquished MACRS property.

(B) *Like-kind exchange or involuntary conversion of less than all assets remaining in a general asset account.* If an asset in a general asset account is transferred by a taxpayer in a like-kind exchange or in an involuntary conversion and if paragraph (e)(3)(v)(A) of this section does not apply to this asset, the taxpayer must apply this paragraph (e)(3)(v)(B) (instead of applying paragraph (e)(2), (e)(3)(ii), or (e)(3)(iii) of this section). Under this paragraph (e)(3)(v)(B), general asset account treatment for the asset terminates as of the first day of the year of disposition (as defined in § 1.168(i)-6T(b)(5)), and—

(1) The amount of gain or loss for the asset is determined by taking into account the asset's adjusted basis at the time of disposition (as defined in § 1.168(i)-6T(b)(3)). The adjusted basis of the asset at the time of disposition equals the unadjusted depreciable basis of the asset less the depreciation allowed or allowable for the asset, computed by using the depreciation method, recovery period, and convention applicable to the general asset account in which the asset was included. The depreciation allowance for the asset in the year of disposition is determined in the same manner as the depreciation allowance for the relinquished MACRS property (as defined in § 1.168(i)-6T(b)(2)) in the year of disposition is determined under § 1.168(i)-6T. The recognition and character of the gain or loss are determined in accordance with paragraph (e)(3)(iii)(A) of this section (notwithstanding that paragraph (e)(3)(iii) of this section is an optional rule); and

(2) As of the first day of the year of disposition, the taxpayer must remove the relinquished asset from the general

asset account and make the adjustments to the general asset account described in paragraph (e)(3)(iii)(C)(2) through (4) of this section.

(e)(3)(vi) *Anti-abuse rule*—(A) *In general*. If an asset in a general asset account is disposed of by a taxpayer in a transaction described in paragraph (e)(3)(vi)(B) of this section, general asset account treatment for the asset terminates as of the first day of the taxable year in which the disposition occurs. Consequently, the taxpayer must determine the amount of gain, loss, or other deduction attributable to the disposition in the manner described in paragraph (e)(3)(iii)(A) of this section (notwithstanding that paragraph (e)(3)(iii)(A) of this section is an optional rule) and must make the adjustments to the general asset account described in paragraph (e)(3)(iii)(C)(1) through (4) of this section.

(B) *Abusive transactions*. A transaction is described in this paragraph (e)(3)(vi)(B) if the transaction is not described in paragraph (e)(3)(iv) or (e)(3)(v) of this section and the transaction is entered into, or made, with a principal purpose of achieving a tax benefit or result that would not be available absent an election under this section. Examples of these types of transactions include—

(1) A transaction entered into with a principal purpose of shifting income or deductions among taxpayers in a manner that would not be possible absent an election under this section in order to take advantage of differing effective tax rates among the taxpayers; or

(2) An election made under this section with a principal purpose of disposing of an asset from a general asset account in order to utilize an expiring net operating loss or credit. The fact that a taxpayer with a net operating loss carryover or a credit carryover transfers an asset to a related person or transfers an asset pursuant to an arrangement where the asset continues to be used (or is available for use) by the taxpayer pursuant to a lease (or otherwise) indicates, absent strong evidence to the contrary, that the transaction is described in this paragraph (e)(3)(vi)(B).

(f) *Assets generating foreign source income*—(1) *In general*. This paragraph (f)

provides the rules for determining the source of any income, gain, or loss recognized, and the appropriate section 904(d) separate limitation category or categories for any foreign source income, gain, or loss recognized, on a disposition (within the meaning of paragraph (e)(1) of this section) of an asset in a general asset account that consists of assets generating both United States and foreign source income. These rules apply only to a disposition to which paragraph (e)(2) (general disposition rules), (e)(3)(ii) (disposition of all assets remaining in a general asset account), (e)(3)(iii) (disposition of an asset in a qualifying disposition), (e)(3)(v) (transactions subject to section 1031 or 1033), or (e)(3)(vi) (anti-abuse rule) of this section applies.

(2) *Source of ordinary income, gain or loss*—(i) *Source determined by allocation and apportionment of depreciation allowed*. The amount of any ordinary income, gain, or loss that is recognized on the disposition of an asset in a general asset account must be apportioned between United States and foreign sources based on the allocation and apportionment of the—

(A) Depreciation allowed for the general asset account as of the end of the taxable year in which the disposition occurs if paragraph (e)(2) of this section applies to the disposition;

(B) Depreciation allowed for the general asset account as of the time of disposition if the taxpayer applies paragraph (e)(3)(ii) of this section to the disposition of all assets, or the last asset, in the general asset account, or if all the assets, or the last asset, in the general asset account are disposed of in a transaction described in paragraph (e)(3)(v)(A) of this section; or

(C) Depreciation allowed for the disposed asset for only the taxable year in which the disposition occurs if the taxpayer applies paragraph (e)(3)(iii) of this section to the disposition of the asset in a qualifying disposition, if the asset is disposed of in a transaction described in paragraph (e)(3)(v)(B) of this section (like-kind exchange or involuntary conversion), or if the asset is disposed in a transaction described in paragraph (e)(3)(vi) of this section (anti-abuse rule).

**Internal Revenue Service, Treasury**

**§ 1.168(i)-2**

(f)(2)(ii) through (h) [Reserved]. For further guidance, see § 1.168(i)-1(f)(2)(ii) through (h).

(i) *Identification of disposed or converted asset.* A taxpayer may use any reasonable method that is consistently applied to the taxpayer's general asset accounts for purposes of determining the unadjusted depreciable basis of a disposed or converted asset in a transaction described in paragraph (e)(3)(iii) (disposition of an asset in a qualifying disposition), (e)(3)(iv) (transactions subject to section 168(i)(7)), (e)(3)(v) (transactions subject to section 1031 or 1033), (e)(3)(vi) (anti-abuse rule), (g) (assets subject to recapture), or (h) (changes in use) of this section.

(j) *Effect of adjustments on prior dispositions.* The adjustments to a general asset account under paragraph (e)(3)(iii), (e)(3)(iv), (e)(3)(v), (e)(3)(vi), (g), or (h) of this section have no effect on the recognition and character of prior dispositions subject to paragraph (e)(2) of this section.

(k) [Reserved]. For further guidance, see § 1.168(i)-1(k).

(1) *Effective date*—(1) *In general.* Except as provided in paragraphs (1)(2) and (1)(3) of this section, this section applies to depreciable assets placed in service in taxable years ending on or after October 11, 1994. For depreciable assets placed in service after December 31, 1986, in taxable years ending before October 11, 1994, the Internal Revenue Service will allow any reasonable method that is consistently applied to the taxpayer's general asset accounts.

(2) [Reserved] For further guidance, see § 1.168(i)-1(1)(2).

(3) *Like-kind exchanges and involuntary conversions.* (i) This section applies for an asset transferred by a taxpayer in a like-kind exchange (as defined under § 1.168-6T(b)(11)) or in an involuntary conversion (as defined under § 1.168-6T(b)(12)) for which the time of disposition (as defined in § 1.168(i)-6T(b)(3)) and the time of replacement (as defined in § 1.168(i)-6T(b)(4)) both occur after February 27, 2004. For an asset transferred by a taxpayer in a like-kind exchange or in an involuntary conversion for which the time of disposition, the time of replacement, or both occur on or before February 27, 2004, see § 1.168(i)-1 in effect prior to

February 27, 2004, (§ 1.168(i)-1 as contained in 26 CFR part 1 edition revised as of April 1, 2003).

(ii) The applicability of this section expires on or before February 26, 2007.

[T.D. 9115, 69 FR 9535, Mar. 1, 2004; 69 FR 17586, Apr. 5, 2004; T.D. 9132, 69 FR 33843, June 17, 2004]

**§ 1.168(i)-2 Lease term.**

(a) *In general.* For purposes of section 168, a lease term is determined under all the facts and circumstances. Paragraph (b) of this section and § 1.168(j)-1T, Q&A 17, describe certain circumstances that will result in a period of time not included in the stated duration of an original lease (additional period) nevertheless being included in the lease term. These rules do not prevent the inclusion of an additional period in the lease term in other circumstances.

(b) *Lessee retains financial obligation*—(1) *In general.* An additional period of time during which a lessee may not continue to be the lessee will nevertheless be included in the lease term if the lessee (or a related person)—

(i) Has agreed that one or both of them will or could be obligated to make a payment of rent or a payment in the nature of rent with respect to such period; or

(ii) Has assumed or retained any risk of loss with respect to the property for such period (including, for example, by holding a note secured by the property).

(2) *Payments in the nature of rent.* For purposes of paragraph (b)(1)(i) of this section, a payment in the nature of rent includes a payment intended to substitute for rent or to fund or supplement the rental payments of another. For example, a payment in the nature of rent includes a payment of any kind (whether denominated as supplemental rent, as liquidated damages, or otherwise) that is required to be made in the event that—

(i) The leased property is not leased for the additional period;

(ii) The leased property is leased for the additional period under terms that do not satisfy specified terms and conditions;

(iii) There is a failure to make a payment of rent with respect to such additional period; or

(iv) Circumstances similar to those described in paragraph (b)(2) (i), (ii), or (iii) of this section occur.

(3) *De minimis rule.* For the purposes of this paragraph (b), obligations to make de minimis payments will be disregarded.

(c) *Multiple leases or subleases.* If property is subject to more than one lease (including any sublease) entered into as part of a single transaction (or a series of related transactions), the lease term includes all periods described in one or more of such leases. For example, if one taxable corporation leases property to another taxable corporation for a 20-year term and, as part of the same transaction, the lessee subleases the property to a tax-exempt entity for a 10-year term, then the lease term of the property for purposes of section 168 is 20 years. During the period of tax-exempt use, the property must be depreciated under the alternative depreciation system using the straight line method over the greater of its class life or 25 years (125 percent of the 20-year lease term).

(d) *Related person.* For purposes of paragraph (b) of this section, a person is related to the lessee if such person is described in section 168(h)(4).

(e) *Changes in status.* Section 168(i)(5) (changes in status) applies if an additional period is included in a lease term under this section and the leased property ceases to be tax-exempt use property for such additional period.

(f) *Example.* The following example illustrates the principles of this section. The example does not address common law doctrines or other authorities that may apply to cause an additional period to be included in the lease term or to recharacterize a lease as a conditional sale or otherwise for federal income tax purposes. Unless otherwise indicated, parties to the transactions are not related to one another.

*Example* Financial obligation with respect to an additional period—(i) *Facts.*

X, a taxable corporation, and Y, a foreign airline whose income is not subject to United States taxation, enter into a lease agreement under which X agrees to lease an aircraft to Y for a period of 10 years. The lease agreement provides that, at the end of the lease period, Y is obligated to find a subsequent lessee (replacement lessee) to enter into a subsequent lease (replacement lease)

of the aircraft from X for an additional 10-year period. The provisions of the lease agreement require that any replacement lessee be unrelated to Y and that it not be a tax-exempt entity as defined in section 168(h)(2). The provisions of the lease agreement also set forth the basic terms and conditions of the replacement lease, including its duration and the required rental payments. In the event Y fails to secure a replacement lease, the lease agreement requires Y to make a payment to X in an amount determined under the lease agreement.

(i) *Application of this section.* The lease agreement between X and Y obligates Y to make a payment in the event the aircraft is not leased for the period commencing after the initial 10-year lease period and ending on the date the replacement lease is scheduled to end. Accordingly, pursuant to paragraph (b) of this section, the term of the lease between X and Y includes such additional period, and the lease term is 20 years for purposes of section 168.

(iii) *Facts modified.* Assume the same facts as in paragraph (i) of this *Example*, except that Y is required to guarantee the payment of rentals under the 10-year replacement lease and to make a payment to X equal to the present value of any excess of the replacement lease rental payments specified in the lease agreement between X and Y, over the rental payments actually agreed to be paid by the replacement lessee. Pursuant to paragraph (b) of this section, the term of the lease between X and Y includes the additional period, and the lease term is 20 years for purposes of section 168.

(iv) *Changes in status.* If, upon the conclusion of the stated duration of the lease between X and Y, the aircraft either is returned to X or leased to a replacement lessee that is not a tax-exempt entity as defined in section 168(h)(2), the subsequent method of depreciation will be determined pursuant to section 168(i)(5).

(g) *Effective date*—(1) *In general.* Except as provided in paragraph (g)(2) of this section, this section applies to leases entered into on or after April 20, 1995.

(2) *Special rules.* Paragraphs (b)(1)(ii) and (c) of this section apply to leases entered into after April 26, 1996.

[T.D. 8667, 61 FR 18677, Apr. 29, 1996]

**§ 1.168(i)-4 Changes in use.**

(a) *Scope.* This section provides the rules for determining the depreciation allowance for MACRS property (as defined in § 1.168(b)-1T(a)(2)) for which the use changes in the hands of the same

taxpayer (change in the use). The allowance for depreciation under this section constitutes the amount of depreciation allowable under section 167(a) for the year of change and any subsequent taxable year. For purposes of this section, the year of change is the taxable year in which a change in the use occurs.

(b) *Conversion to business or income-producing use*—(1) *Depreciation deduction allowable.* This paragraph (b) applies to property that is converted from personal use to use in a taxpayer's trade or business, or for the production of income, during a taxable year. This conversion includes property that was previously used by the taxpayer for personal purposes, including real property (other than land) that is acquired before 1987 and converted from personal use to business or income-producing use after 1986, and depreciable property that was previously used by a tax-exempt entity before the entity changed to a taxable entity. Except as otherwise provided by the Internal Revenue Code or regulations under the Internal Revenue Code, upon a conversion to business or income-producing use, the depreciation allowance for the year of change and any subsequent taxable year is determined as though the property is placed in service by the taxpayer on the date on which the conversion occurs. Thus, except as otherwise provided by the Internal Revenue Code or regulations under the Internal Revenue Code, the taxpayer must use any applicable depreciation method, recovery period, and convention prescribed under section 168 for the property in the year of change, consistent with any election made under section 168 by the taxpayer for that year (see, for example, section 168(b)(5)). See §§1.168(k)-1T(f)(6)(iii) and 1.1400L(b)-1T(f)(6) for the additional first year depreciation deduction rules applicable to a conversion to business or income-producing use. The depreciable basis of the property for the year of change is the lesser of its fair market value or its adjusted depreciable basis (as defined in §1.168(b)-1T(a)(4)), as applicable, at the time of the conversion to business or income-producing use.

(2) *Example.* The application of this paragraph (b) is illustrated by the following example:

*Example.* A, a calendar-year taxpayer, purchases a house in 1985 that she occupies as her principal residence. In February 2004, A ceases to occupy the house and converts it to residential rental property. At the time of the conversion to residential rental property, the house's fair market value (excluding land) is \$130,000 and adjusted depreciable basis attributable to the house (excluding land) is \$150,000. Pursuant to this paragraph (b), A is considered to have placed in service residential rental property in February 2004 with a depreciable basis of \$130,000. A depreciates the residential rental property under the general depreciation system by using the straight-line method, a 27.5-year recovery period, and the mid-month convention. Pursuant to §§1.168(k)-1T(f)(6)(iii)(B) or 1.1400L(b)-1T(f)(6), this property is not eligible for the additional first year depreciation deduction provided by section 168(k) or section 1400L(b). Thus, the depreciation allowance for the house for 2004 is \$4,137, after taking into account the mid-month convention ((\$130,000 adjusted depreciable basis multiplied by the applicable depreciation rate of 3.636% (1/27.5)) multiplied by the mid-month convention fraction of 10.5/12). The amount of depreciation computed under section 168, however, may be limited under other provisions of the Internal Revenue Code, such as, section 280A.

(c) *Conversion to personal use.* The conversion of MACRS property from business or income-producing use to personal use during a taxable year is treated as a disposition of the property in that taxable year. The depreciation allowance for MACRS property for the year of change in which the property is treated as being disposed of is determined by first multiplying the adjusted depreciable basis of the property as of the first day of the year of change by the applicable depreciation rate for that taxable year (for further guidance, for example, see section 6 of Rev. Proc. 87-57 (1987-2 C. B. 687, 692) (see §601.601(d)(2)(ii)(b) of this chapter)). This amount is then multiplied by a fraction, the numerator of which is the number of months (including fractions of months) the property is deemed to be placed in service during the year of change (taking into account the applicable convention) and the denominator of which is 12. No depreciation deduction is allowable for MACRS property placed in service and disposed of in the

same taxable year. See §§1.168(k)-1T(f)(6)(ii) and 1.1400L(b)-1T(f)(6) for the additional first year depreciation deduction rules applicable to property placed in service and converted to personal use in the same taxable year. Upon the conversion to personal use, no gain, loss, or depreciation recapture under section 1245 or section 1250 is recognized. However, the provisions of section 1245 or section 1250 apply to any disposition of the converted property by the taxpayer at a later date. For listed property (as defined in section 280F(d)(4)), see section 280F(b)(2) for the recapture of excess depreciation upon the conversion to personal use.

(d) *Change in the use results in a different recovery period and/or depreciation method*—(1) *In general.* This paragraph (d) applies to a change in the use of MACRS property during a taxable year subsequent to the placed-in-service year, if the property continues to be MACRS property owned by the same taxpayer and, as a result of the change in the use, has a different recovery period, a different depreciation method, or both. For example, this paragraph (d) applies to MACRS property that—

- (i) Begins or ceases to be used predominantly outside the United States;
- (ii) Results in a reclassification of the property under section 168(e) due to a change in the use of the property; or
- (iii) Begins or ceases to be tax-exempt use property (as defined in section 168(h)).

(2) *Determination of change in the use*—

(i) *In general.* Except as provided in paragraph (d)(2)(ii) of this section, a change in the use of MACRS property occurs when the primary use of the MACRS property in the taxable year is different from its primary use in the immediately preceding taxable year. The primary use of MACRS property may be determined in any reasonable manner that is consistently applied to the taxpayer's MACRS property.

(ii) *Alternative depreciation system property*—(A) *Property used within or outside the United States.* A change in the use of MACRS property occurs when a taxpayer begins or ceases to use MACRS property predominantly outside the United States during the taxable year. The determination of whether MACRS property is used predomi-

nantly outside the United States is made in accordance with the test in §1.48-1(g)(1)(i) for determining predominant use.

(B) *Tax-exempt bond financed property.* A change in the use of MACRS property occurs when the property changes to tax-exempt bond financed property, as described in section 168(g)(1)(C) and (g)(5), during the taxable year. For purposes of this paragraph (d), MACRS property changes to tax-exempt bond financed property when a tax-exempt bond is first issued after the MACRS property is placed in service. MACRS property continues to be tax-exempt bond financed property in the hands of the taxpayer even if the tax-exempt bond (including any refunding issue) is no longer outstanding or is redeemed.

(C) *Other mandatory alternative depreciation system property.* A change in the use of MACRS property occurs when the property changes to, or changes from, property described in section 168(g)(1)(B) (tax-exempt use property) or (D) (imported property covered by an Executive order) during the taxable year.

(iii) *Change in the use deemed to occur on first day of the year of change.* If a change in the use of MACRS property occurs under this paragraph (d)(2), the depreciation allowance for that MACRS property for the year of change is determined as though the use of the MACRS property changed on the first day of the year of change.

(3) *Change in the use results in a shorter recovery period and/or a more accelerated depreciation method*—(i) *Treated as placed in service in the year of change*—

(A) *In general.* If a change in the use results in the MACRS property changing to a shorter recovery period and/or a depreciation method that is more accelerated than the method used for the MACRS property before the change in the use, the depreciation allowances beginning in the year of change are determined as though the MACRS property is placed in service by the taxpayer in the year of change.

(B) *Computation of depreciation allowance.* The depreciation allowances for the MACRS property for any 12-month taxable year beginning with the year of change are determined by multiplying the adjusted depreciable basis of the

MACRS property as of the first day of each taxable year by the applicable depreciation rate for each taxable year. In determining the applicable depreciation rate for the year of change and subsequent taxable years, the taxpayer must use any applicable depreciation method and recovery period prescribed under section 168 for the MACRS property in the year of change, consistent with any election made under section 168 by the taxpayer for that year (see, for example, section 168(b)(5)). If there is a change in the use of MACRS property, the applicable convention that applies to the MACRS property is the same as the convention that applied before the change in the use of the MACRS property. However, the depreciation allowance for the year of change for the MACRS property is determined without applying the applicable convention, unless the MACRS property is disposed of during the year of change. See paragraph (d)(5) of this section for the rules relating to the computation of the depreciation allowance under the optional depreciation tables. If the year of change or any subsequent taxable year is less than 12 months, the depreciation allowance determined under this paragraph (d)(3)(i) must be adjusted for a short taxable year (for further guidance, for example, see Rev. Proc. 89-15 (1989-1 C.B. 816) (see § 601.601(d)(2)(ii)(b) of this chapter)).

(C) *Special rules.* MACRS property affected by this paragraph (d)(3)(i) is not eligible in the year of change for the election provided under section 168(f)(1), 179, or 1400L(f), or for the additional first year depreciation deduction provided in section 168(k) or 1400L(b). See §§ 1.168(k)-1T(f)(6)(iv) and 1.1400L(b)-1T(f)(6) for other additional first year depreciation deduction rules applicable to a change in the use of MACRS property subsequent to its placed-in-service year. For purposes of determining whether the mid-quarter convention applies to other MACRS property placed in service during the year of change, the unadjusted depreciable basis (as defined in § 1.168(b)-1T(a)(3)) or the adjusted depreciable basis of MACRS property affected by this paragraph (d)(3)(i) is not taken into account.

(ii) *Option to disregard the change in the use.* In lieu of applying paragraph (d)(3)(i) of this section, the taxpayer may elect to determine the depreciation allowance as though the change in the use had not occurred. The taxpayer elects this option by claiming on the taxpayer's timely filed (including extensions) Federal income tax return for the year of change the depreciation allowance for the property as though the change in the use had not occurred. See paragraph (g)(2) of this section for the manner for revoking this election.

(4) *Change in the use results in a longer recovery period and/or a slower depreciation method—*(i) *Treated as originally placed in service with longer recovery period and/or slower depreciation method.* If a change in the use results in a longer recovery period and/or a depreciation method for the MACRS property that is less accelerated than the method used for the MACRS property before the change in the use, the depreciation allowances beginning with the year of change are determined as though the MACRS property had been originally placed in service by the taxpayer with the longer recovery period and/or the slower depreciation method. MACRS property affected by this paragraph (d)(4) is not eligible in the year of change for the election provided under section 168(f)(1), 179, or 1400L(f), or for the additional first year depreciation deduction provided in section 168(k) or 1400L(b). See §§ 1.168(k)-1T(f)(6)(iv) and 1.1400L(b)-1T(f)(6) for other additional first year depreciation deduction rules applicable to a change in the use of MACRS property subsequent to its placed-in-service year.

(ii) *Computation of the depreciation allowance.* The depreciation allowances for the MACRS property for any 12-month taxable year beginning with the year of change are determined by multiplying the adjusted depreciable basis of the MACRS property as of the first day of each taxable year by the applicable depreciation rate for each taxable year. If there is a change in the use of MACRS property, the applicable convention that applies to the MACRS property is the same as the convention that applied before the change in the use of the MACRS property. If the year of change or any subsequent taxable

year is less than 12 months, the depreciation allowance determined under this paragraph (d)(4)(ii) must be adjusted for a short taxable year (for further guidance, for example, see Rev. Proc. 89-15 (1989-1 C.B. 816) (see § 601.601(d)(2)(ii)(b) of this chapter)). See paragraph (d)(5) of this section for the rules relating to the computation of the depreciation allowance under the optional depreciation tables. In determining the applicable depreciation rate for the year of change and any subsequent taxable year—

(A) The applicable depreciation method is the depreciation method that would apply in the year of change and any subsequent taxable year for the MACRS property had the taxpayer used the longer recovery period and/or the slower depreciation method in the placed-in-service year of the property. If the 200- or 150-percent declining balance method would have applied in the placed-in-service year but the method would have switched to the straight line method in the year of change or any prior taxable year, the applicable depreciation method beginning with the year of change is the straight line method; and

(B) The applicable recovery period is either—

(1) The longer recovery period resulting from the change in the use if the applicable depreciation method is the 200- or 150-percent declining balance method (as determined under paragraph (d)(4)(ii)(A) of this section) unless the recovery period did not change as a result of the change in the use, in which case the applicable recovery period is the same recovery period that applied before the change in the use; or

(2) The number of years remaining as of the beginning of each taxable year (taking into account the applicable convention) had the taxpayer used the longer recovery period in the placed-in-service year of the property if the applicable depreciation method is the straight line method (as determined under paragraph (d)(4)(ii)(A) of this section) unless the recovery period did not change as a result of the change in the use, in which case the applicable recovery period is the number of years remaining as of the beginning of each taxable year (taking into account the

applicable convention) based on the recovery period that applied before the change in the use.

(5) *Using optional depreciation tables—*  
 (i) *Taxpayer not bound by prior use of table.* If a taxpayer used an optional depreciation table for the MACRS property before a change in the use, the taxpayer is not bound to use the appropriate new table for that MACRS property beginning in the year of change (for further guidance, for example, see section 8 of Rev. Proc. 87-57 (1987-2 C.B. 687, 693) (see § 601.601(d)(2)(ii)(b) of this chapter)). If a taxpayer did not use an optional depreciation table for MACRS property before a change in the use and the change in the use results in a shorter recovery period and/or a more accelerated depreciation method (as described in paragraph (d)(3)(i) of this section), the taxpayer may use the appropriate new table for that MACRS property beginning in the year of change. If a taxpayer chooses not to use the optional depreciation table, the depreciation allowances for the MACRS property beginning in the year of change are determined under paragraph (d)(3)(i) or (4) of this section, as applicable.

(ii) *Taxpayer chooses to use optional depreciation table after a change in the use.* If a taxpayer chooses to use an optional depreciation table for the MACRS property after a change in the use, the depreciation allowances for the MACRS property for any 12-month taxable year beginning with the year of change are determined as follows:

(A) *Change in the use results in a shorter recovery period and/or a more accelerated depreciation method.* If a change in the use results in a shorter recovery period and/or a more accelerated depreciation method (as described in paragraph (d)(3)(i) of this section), the depreciation allowances for the MACRS property for any 12-month taxable year beginning with the year of change are determined by multiplying the adjusted depreciable basis of the MACRS property as of the first day of the year of change by the annual depreciation rate for each recovery year (expressed as a decimal equivalent) specified in the appropriate optional depreciation table. The appropriate optional depreciation table for the MACRS property

is based on the depreciation system, depreciation method, recovery period, and convention applicable to the MACRS property in the year of change as determined under paragraph (d)(3)(i) of this section. The depreciation allowance for the year of change for the MACRS property is determined by taking into account the applicable convention (which is already factored into the optional depreciation tables). If the year of change or any subsequent taxable year is less than 12 months, the depreciation allowance determined under this paragraph (d)(5)(ii)(A) must be adjusted for a short taxable year (for further guidance, for example, see Rev. Proc. 89-15 (1989-1 C.B. 816) (see § 601.601(d)(2)(ii)(b) of this chapter)).

(B) *Change in the use results in a longer recovery period and/or a slower depreciation method—(1) Determination of the appropriate optional depreciation table.* If a change in the use results in a longer recovery period and/or a slower depreciation method (as described in paragraph (d)(4)(i) of this section), the depreciation allowances for the MACRS property for any 12-month taxable year beginning with the year of change are determined by choosing the optional depreciation table that corresponds to the depreciation system, depreciation method, recovery period, and convention that would have applied to the MACRS property in the placed-in-service year had that property been originally placed in service by the taxpayer with the longer recovery period and/or the slower depreciation method. If there is a change in the use of MACRS property, the applicable convention that applies to the MACRS property is the same as the convention that applied before the change in the use of the MACRS property. If the year of change or any subsequent taxable year is less than 12 months, the depreciation allowance determined under this paragraph (d)(5)(ii)(B) must be adjusted for a short taxable year (for further guidance, for example, see Rev. Proc. 89-15 (1989-1 C.B. 816) (see § 601.601(d)(2)(ii)(b) of this chapter)).

(2) *Computation of the depreciation allowance.* The depreciation allowances for the MACRS property for any 12-month taxable year beginning with the year of change are computed by first

determining the appropriate recovery year in the table identified under paragraph (d)(5)(ii)(B)(I) of this section. The appropriate recovery year for the year of change is the year that corresponds to the year of change. For example, if the recovery year for the year of change would have been Year 4 in the table that applied before the change in the use of the MACRS property, then the recovery year for the year of change is Year 4 in the table identified under paragraph (d)(5)(ii)(B)(I) of this section. Next, the annual depreciation rate (expressed as a decimal equivalent) for each recovery year is multiplied by a transaction coefficient. The transaction coefficient is the formula  $(1 / (1 - x))$  where  $x$  equals the sum of the annual depreciation rates from the table identified under paragraph (d)(5)(ii)(B)(I) of this section (expressed as a decimal equivalent) for the taxable years beginning with the placed-in-service year of the MACRS property through the taxable year immediately prior to the year of change. The product of the annual depreciation rate and the transaction coefficient is multiplied by the adjusted depreciable basis of the MACRS property as of the beginning of the year of change.

(6) *Examples.* The application of this paragraph (d) is illustrated by the following examples:

*Example 1. Change in the use results in a shorter recovery period and/or a more accelerated depreciation method and optional depreciation table is not used.* (i) *X*, a calendar-year corporation, places in service in 1999 equipment at a cost of \$100,000 and uses this equipment from 1999 through 2003 primarily in its *A* business. *X* depreciates the equipment for 1999 through 2003 under the general depreciation system as 7-year property by using the 200-percent declining balance method (which switched to the straight-line method in 2003), a 7-year recovery period, and a half-year convention. Beginning in 2004, *X* primarily uses the equipment in its *B* business. As a result, the classification of the equipment under section 168(e) changes from 7-year property to 5-year property and the recovery period of the equipment under the general depreciation system changes from 7 years to 5 years. The depreciation method does not change. On January 1, 2004, the adjusted depreciable basis of the equipment is \$22,311. *X* depreciates its 5-year recovery property placed in service in 2004 under the general depreciation system by using the 200-percent declining balance method and a 5-year recovery period.

*X* does not use the optional depreciation tables.

(ii) Under paragraph (d)(3)(i) of this section, *X*'s allowable depreciation deduction for the equipment for 2004 and subsequent taxable years is determined as though *X* placed the equipment in service in 2004 for use primarily in its *B* business. The depreciable basis of the equipment as of January 1, 2004, is \$22,311 (the adjusted depreciable basis at January 1, 2004). Because *X* does not use the optional depreciation tables, the depreciation allowance for 2004 (the deemed placed-in-service year) for this equipment only is computed without taking into account the half-year convention. Pursuant to paragraph (d)(3)(i)(C) of this section, this equipment is not eligible for the additional first year depreciation deduction provided by section 168(k) or section 1400L(b). Thus, *X*'s allowable depreciation deduction for the equipment for 2004 is \$8,924 (\$22,311 adjusted depreciable basis at January 1, 2004, multiplied by the applicable depreciation rate of 40% (200/5)). *X*'s allowable depreciation deduction for the equipment for 2005 is \$5,355 (\$13,387 adjusted depreciable basis at January 1, 2005, multiplied by the applicable depreciation rate of 40% (200/5)).

(iii) Alternatively, under paragraph (d)(3)(ii) of this section, *X* may elect to disregard the change in the use and, as a result, may continue to treat the equipment as though it is used primarily in its *A* business. If the election is made, *X*'s allowable depreciation deduction for the equipment for 2004 is \$8,924 (\$22,311 adjusted depreciable basis at January 1, 2004, multiplied by the applicable depreciation rate of 40% (1/2.5 years remaining at January 1, 2004)). *X*'s allowable depreciation deduction for the equipment for 2005 is \$8,925 (\$13,387 adjusted depreciable basis at January 1, 2005, multiplied by the applicable depreciation rate of 66.67% (1/1.5 years remaining at January 1, 2005)).

*Example 2. Change in the use results in a shorter recovery period and/or a more accelerated depreciation method and optional depreciation table is used.* (i) Same facts as in *Example 1*, except that *X* used the optional depreciation tables for computing depreciation for 1999 through 2003. Pursuant to paragraph (d)(5) of this section, *X* chooses to continue to use the optional depreciation table for the equipment. *X* does not make the election provided in paragraph (d)(3)(ii) of this section to disregard the change in use.

(ii) In accordance with paragraph (d)(5)(ii)(A) of this section, *X* must first identify the appropriate optional depreciation table for the equipment. This table is table 1 in Rev. Proc. 87-57 because the equipment will be depreciated in the year of change (2004) under the general depreciation system using the 200-percent declining balance method, a 5-year recovery period, and the half-year convention (which is the conven-

tion that applied to the equipment in 1999). Pursuant to paragraph (d)(3)(i)(C) of this section, this equipment is not eligible for the additional first year depreciation deduction provided by section 168(k) or section 1400L(b). For 2004, *X* multiplies its adjusted depreciable basis in the equipment as of January 1, 2004, of \$22,311, by the annual depreciation rate in table 1 for recovery year 1 for a 5-year recovery period (.20), to determine the depreciation allowance of \$4,462. For 2005, *X* multiplies its adjusted depreciable basis in the equipment as of January 1, 2004, of \$22,311, by the annual depreciation rate in table 1 for recovery year 2 for a 5-year recovery period (.32), to determine the depreciation allowance of \$7,140.

*Example 3. Change in the use results in a longer recovery period and/or a slower depreciation method.* (i) *Y*, a calendar-year corporation, places in service in January 2002, equipment at a cost of \$100,000 and uses this equipment in 2002 and 2003 only within the United States. *Y* elects not to deduct the additional first year depreciation under section 168(k). *Y* depreciates the equipment for 2002 and 2003 under the general depreciation system by using the 200-percent declining balance method, a 5-year recovery period, and a half-year convention. Beginning in 2004, *Y* uses the equipment predominantly outside the United States. As a result of this change in the use, the equipment is subject to the alternative depreciation system beginning in 2004. Under the alternative depreciation system, the equipment is depreciated by using the straight line method and a 9-year recovery period. The adjusted depreciable basis of the equipment at January 1, 2004, is \$48,000.

(ii) Pursuant to paragraph (d)(4) of this section, *Y*'s allowable depreciation deduction for 2004 and subsequent taxable years is determined as though the equipment had been placed in service in January 2002, as property used predominantly outside the United States. Further, pursuant to paragraph (d)(4)(i) of this section, the equipment is not eligible in 2004 for the additional first year depreciation deduction provided by section 168(k) or section 1400L(b). In determining the applicable depreciation rate for 2004, the applicable depreciation method is the straight line method and the applicable recovery period is 7.5 years, which is the number of years remaining at January 1, 2004, for property placed in service in 2002 with a 9-year recovery period (taking into account the half-year convention). Thus, the depreciation allowance for 2004 is \$6,398 (\$48,000 adjusted depreciable basis at January 1, 2004, multiplied by the applicable depreciation rate of 13.33% (1/7.5 years)). The depreciation allowance for 2005 is \$6,398 (\$41,602 adjusted depreciable basis at January 1, 2005, multiplied by the applicable depreciation rate of 15.38% (1/6.5 years remaining at January 1, 2005)).

*Example 4. Change in the use results in a longer recovery period and/or a slower depreciation method and optional depreciation table is used—(i)* Same facts as in *Example 3*, except that Y used the optional depreciation tables for computing depreciation in 2002 and 2003. Pursuant to paragraph (d)(5) of this section, Y chooses to continue to use the optional depreciation table for the equipment. Further, pursuant to paragraph (d)(4)(i) of this section, the equipment is not eligible in 2004 for the additional first year depreciation deduction provided by section 168(k) or section 1400L(b).

(ii) In accordance with paragraph (d)(5)(ii)(B) of this section, Y must first determine the appropriate optional depreciation table for the equipment pursuant to paragraph (d)(5)(ii)(B)(I) of this section. This table is table 8 in Rev. Proc. 87-57, which corresponds to the alternative depreciation system, the straight line method, a 9-year recovery period, and the half-year convention (because Y depreciated 5-year property in 2002 using a half-year convention). Next, Y must determine the appropriate recovery year in table 8. Because the year of change is 2004, the depreciation allowance for the equipment for 2004 is determined using recovery year 3 of table 8. For 2004, Y multiplies its adjusted depreciable basis in the equipment as of January 1, 2004, of \$48,000, by the product of the annual depreciation rate in table 8 for recovery year 3 for a 9-year recovery period (.1111) and the transaction coefficient of 1.200  $[1/(1 - (.0556 \text{ (table 8 for recovery year 1 for a 9-year recovery period)} + .1111 \text{ (table 8 for recovery year 2 for a 9-year recovery period))}]$ , to determine the depreciation allowance of \$6,399. For 2005, Y multiplies its adjusted depreciable basis in the equipment as of January 1, 2004, of \$48,000, by the product of the annual depreciation rate in table 8 for recovery year 4 for a 9-year recovery period (.1111) and the transaction coefficient (1.200), to determine the depreciation allowance of \$6,399.

(e) *Change in the use of MACRS property during the placed-in-service year—(1) In general.* Except as provided in paragraph (e)(2) of this section, if a change in the use of MACRS property occurs during the placed-in-service year and the property continues to be MACRS property owned by the same taxpayer, the depreciation allowance for that property for the placed-in-service year is determined by its primary use during that year. The primary use of MACRS property may be determined in any reasonable manner that is consistently applied to the taxpayer's MACRS property. For purposes of this paragraph (e), the determination of whether

the mid-quarter convention applies to any MACRS property placed in service during the year of change is made in accordance with § 1.168(d)-1.

(2) *Alternative depreciation system property—(i) Property used within and outside the United States.* The depreciation allowance for the placed-in-service year for MACRS property that is used within and outside the United States is determined by its predominant use during that year. The determination of whether MACRS property is used predominantly outside the United States during the placed-in-service year shall be made in accordance with the test in § 1.48-1(g)(1)(i) for determining predominant use.

(ii) *Tax-exempt bond financed property.* The depreciation allowance for the placed-in-service year for MACRS property that changes to tax-exempt bond financed property, as described in section 168(g)(1)(C) and (g)(5), during that taxable year is determined under the alternative depreciation system. For purposes of this paragraph (e), MACRS property changes to tax-exempt bond financed property when a tax-exempt bond is first issued after the MACRS property is placed in service. MACRS property continues to be tax-exempt bond financed property in the hands of the taxpayer even if the tax-exempt bond (including any refunding issue) is not outstanding at, or is redeemed by, the end of the placed-in-service year.

(iii) *Other mandatory alternative depreciation system property.* The depreciation allowance for the placed-in-service year for MACRS property that changes to, or changes from, property described in section 168(g)(1)(B) (tax-exempt use property) or (D) (imported property covered by an Executive order) during that taxable year is determined under—

(A) The alternative depreciation system if the MACRS property is described in section 168(g)(1)(B) or (D) at the end of the placed-in-service year; or

(B) The general depreciation system if the MACRS property is not described in section 168(g)(1)(B) or (D) at the end of the placed-in-service year, unless

other provisions of the Internal Revenue Code or regulations under the Internal Revenue Code require the depreciation allowance for that MACRS property to be determined under the alternative depreciation system (for example, section 168(g)(7)).

(3) *Examples.* The application of this paragraph (e) is illustrated by the following examples:

*Example 1.* (i) *Z*, a utility and calendar-year corporation, acquires and places in service on January 1, 2004, equipment at a cost of \$100,000. *Z* uses this equipment in its combustion turbine production plant for 4 months and then uses the equipment in its steam production plant for the remainder of 2004. *Z*'s combustion turbine production plant assets are classified as 15-year property and are depreciated by *Z* under the general depreciation system using a 15-year recovery period and the 150-percent declining balance method of depreciation. *Z*'s steam production plant assets are classified as 20-year property and are depreciated by *Z* under the general depreciation system using a 20-year recovery period and the 150-percent declining balance method of depreciation. *Z* uses the optional depreciation tables. The equipment is 50-percent bonus depreciation property for purposes of section 168(k).

(ii) Pursuant to this paragraph (e), *Z* must determine depreciation based on the primary use of the equipment during the placed-in-service year. *Z* has consistently determined the primary use of all of its MACRS properties by comparing the number of full months in the taxable year during which a MACRS property is used in one manner with the number of full months in that taxable year during which that MACRS property is used in another manner. Applying this approach, *Z* determines the depreciation allowance for the equipment for 2004 is based on the equipment being classified as 20-year property because the equipment was used by *Z* in its steam production plant for 8 months in 2004. If the half-year convention applies in 2004, the appropriate optional depreciation table is table 1 in Rev. Proc. 87-57, which is the table for MACRS property subject to the general depreciation system, the 150-percent declining balance method, a 20-year recovery period, and the half-year convention. Thus, the depreciation allowance for the equipment for 2004 is \$51,875, which is the total of \$50,000 for the 50-percent additional first year depreciation deduction allowable (the unadjusted depreciable basis of \$100,000 multiplied by .50), plus \$1,875 for the 2004 depreciation allowance on the remaining adjusted depreciable basis of \$50,000 [(the unadjusted depreciable basis of \$100,000 less the additional first year depreciation deduction of \$50,000) multiplied by the annual deprecia-

tion rate of .0375 in table 1 for recovery year 1 for a 20-year recovery period].

*Example 2.* *T*, a calendar year corporation, places in service on January 1, 2004, several computers at a total cost of \$100,000. *T* uses these computers within the United States for 3 months in 2004 and then moves and uses the computers outside the United States for the remainder of 2004. Pursuant to § 1.48-1(g)(1)(i), the computers are considered as used predominantly outside the United States in 2004. As a result, for 2004, the computers are required to be depreciated under the alternative depreciation system of section 168(g) with a recovery period of 5 years pursuant to section 168(g)(3)(C). *T* uses the optional depreciation tables. If the half-year convention applies in 2004, the appropriate optional depreciation table is table 8 in Rev. Proc. 87-57, which is the table for MACRS property subject to the alternative depreciation system, the straight line method, a 5-year recovery period, and the half-year convention. Thus, the depreciation allowance for the computers for 2004 is \$10,000, which is equal to the unadjusted depreciable basis of \$100,000 multiplied by the annual depreciation rate of .10 in table 8 for recovery year 1 for a 5-year recovery period. Because the computers are required to be depreciated under the alternative depreciation system in their placed-in-service year, pursuant to section 168(k)(2)(C)(i) and § 1.168(k)-1T(b)(2)(ii), the computers are not eligible for the additional first year depreciation deduction provided by section 168(k).

(f) *No change in accounting method.* A change in computing the depreciation allowance in the year of change for property subject to this section is not a change in method of accounting under section 446(e). See § 1.446-1T(e)(2)(ii)(d)(3)(ii).

(g) *Effective dates—(1) In general.* This section applies to any change in the use of MACRS property in a taxable year ending on or after June 17, 2004. For any change in the use of MACRS property after December 31, 1986, in a taxable year ending before June 17, 2004, the Internal Revenue Service will allow any reasonable method of depreciating the property under section 168 in the year of change and the subsequent taxable years that is consistently applied to any property for which the use changes in the hands of the same taxpayer or the taxpayer may choose, on a property-by-property basis, to apply the provisions of this section.

(2) *Change in method of accounting—(i) In general.* If a taxpayer adopted a

method of accounting for depreciation due to a change in the use of MACRS property in a taxable year ending on or after December 30, 2003, and the method adopted is not in accordance with the method of accounting for depreciation provided in this section, a change to the method of accounting for depreciation provided in this section is a change in the method of accounting to which the provisions of sections 446(e) and 481 and the regulations under sections 446(e) and 481 apply. Also, a revocation of the election provided in paragraph (d)(3)(ii) of this section to disregard a change in the use is a change in method of accounting to which the provisions of sections 446(e) and 481 and the regulations under sections 446(e) and 481 apply. However, if a taxpayer adopted a method of accounting for depreciation due to a change in the use of MACRS property after December 31, 1986, in a taxable year ending before December 30, 2003, and the method adopted is not in accordance with the method of accounting for depreciation provided in this section, the taxpayer may treat the change to the method of accounting for depreciation provided in this section as a change in method of accounting to which the provisions of sections 446(e) and 481 and the regulations under sections 446(e) and 481 apply.

(ii) *Automatic consent to change method of accounting.* A taxpayer changing its method of accounting in accordance with this paragraph (g)(2) must follow the applicable administrative procedures issued under § 1.446-1(e)(3)(ii) for obtaining the Commissioner's automatic consent to a change in method of accounting (for further guidance, for example, see Rev. Proc. 2002-9 (2002-1 C.B. 327), as modified by Rev. Proc. 2004-11 (2004-3 I.R.B. 311) (see § 601.601(d)(2)(ii)(b) of this chapter)). Any change in method of accounting made under this paragraph (g)(2) must be made using an adjustment under section 481(a). For purposes of Form 3115, *Application for Change in Accounting Method*, the designated number for the automatic accounting method change authorized by this paragraph (g)(2) is "88." If Form 3115 is revised or renumbered, any reference in this section to that form is treated as a ref-

erence to the revised or renumbered form.

[T.D. 9132, 69 FR 33843, June 17, 2004]

**§ 1.168(i)-5T Table of contents (temporary).**

This section lists the major paragraphs contained in § 1.168(i)-6T.

*§ 1.168(i)-6T Like-kind exchanges and involuntary conversions (temporary).*

- (a) Scope.
- (b) Definitions.
  - (1) Replacement MACRS property.
  - (2) Relinquished MACRS property.
  - (3) Time of disposition.
  - (4) Time of replacement.
  - (5) Year of disposition.
  - (6) Year of replacement.
  - (7) Exchanged basis.
  - (8) Excess basis.
  - (9) Depreciable exchanged basis.
  - (10) Depreciable excess basis.
  - (11) Like-kind exchange.
  - (12) Involuntary conversion.
- (c) Determination of depreciation allowance.
  - (1) Computation of the depreciation allowance for depreciable exchanged basis beginning in the year of replacement.
    - (i) In general.
    - (ii) Applicable recovery period, depreciation method, and convention.
  - (2) Effect of depreciation treatment of the replacement MACRS property by previous owners of the acquired property.
  - (3) Recovery period and/or depreciation method of the properties are the same, or both are not the same.
    - (i) In general.
    - (ii) Both the recovery period and the depreciation method are the same.
    - (iii) Either the recovery period or the depreciation method is the same, or both are not the same.
    - (4) Recovery period or depreciation method of the properties is not the same.
      - (i) Longer recovery period.
      - (ii) Shorter recovery period.
      - (iii) Less accelerated depreciation method.
      - (iv) More accelerated depreciation method.
      - (v) Convention.
        - (A) In general.
        - (B) Mid-quarter convention.
  - (5) Year of disposition and year of replacement.
    - (i) Relinquished MACRS property.
    - (ii) Replacement MACRS property.
      - (A) Year of replacement is 12 months.
      - (B) Year of replacement is less than 12 months.
    - (iii) Deferred transactions.
      - (A) In general.
      - (B) Allowable depreciation for a qualified intermediary.

§ 1.168(i)-6T

26 CFR Ch. I (4-1-06 Edition)

- (iv) Remaining recovery period.
- (6) Examples.
- (d) Special rules for determining depreciation allowances.
  - (1) Excess basis.

    - (i) In general.
    - (ii) Order in which limitations on depreciation under section 280F(a) are applied.
    - (iii) Depreciation allowance for depreciable excess basis.
    - (iv) Examples.
  - (4) Replacement MACRS property acquired and placed in service before disposition of relinquished MACRS property.
  - (e) Use of optional depreciation tables.
  - (1) Taxpayer not bound by prior use of table.
  - (2) Determination of the depreciation deduction.
    - (i) Relinquished MACRS property.
    - (ii) Replacement MACRS property.
    - (A) Determination of the appropriate optional depreciation table.
    - (B) Calculating the depreciation deduction for the replacement MACRS property.
    - (iii) Unrecovered basis.
  - (3) Excess basis.
  - (4) Examples.
    - (f) Mid-quarter convention.
  - (1) Exchanged basis.
  - (2) Excess basis.
  - (3) Depreciable property acquired for nondepreciable property.
  - (g) Section 179 election.
  - (h) Additional first year depreciation deduction.
    - (i) Election not to apply this section.
    - (j) Time and manner of making elections.
      - (1) In general.
      - (2) Time for making election.
      - (3) Manner of making election.
      - (4) Revocation.
    - (k) Effective date.
      - (1) In general.
      - (2) Application to pre-effective date like-kind exchanges and involuntary conversions.

[T.D. 9115, 69 FR 9536, Mar. 1, 2004; 69 FR 17586, Apr. 5, 2004]

**§ 1.168(i)-6T Like-kind exchanges and involuntary conversions (temporary).**

(a) *Scope.* This section provides the rules for determining the depreciation allowance for MACRS property acquired in a like-kind exchange or an involuntary conversion, including a like-kind exchange or an involuntary con-

version of MACRS property that is exchanged or replaced with other MACRS property in a transaction between members of the same affiliated group. The allowance for depreciation under this section constitutes the amount of depreciation allowable under section 167(a) for the year of replacement and any subsequent taxable year for the replacement MACRS property and for the year of disposition of the relinquished MACRS property. The provisions of this section apply only to MACRS property to which § 1.168(h)-1 (like-kind exchanges of tax-exempt use property) does not apply. Additionally, paragraphs (c) through (f) of this section apply only to MACRS property for which an election has not been made under paragraph (i) of this section.

(b) *Definitions.* For purposes of this section, the following definitions apply:

(1) *Replacement MACRS property* is MACRS property (as defined in § 1.168(b)-1T(a)(2)) in the hands of the acquiring taxpayer that is acquired for other MACRS property in a like-kind exchange or an involuntary conversion.

(2) *Relinquished MACRS property* is MACRS property that is transferred by the taxpayer in a like-kind exchange, or in an involuntary conversion.

(3) *Time of disposition* is when the disposition of the relinquished MACRS property takes place under the convention, as determined under § 1.168(d)-1T, that applies to the relinquished MACRS property.

(4) *Time of replacement* is the later of:

(i) When the replacement MACRS property is placed in service under the convention, as determined under this section, that applies to the replacement MACRS property; or

(ii) The time of disposition of the exchanged or involuntarily converted property.

(5) *Year of disposition* is the taxable year that includes the time of disposition.

(6) *Year of replacement* is the taxable year that includes the time of replacement.

(7) *Exchanged basis* is determined after the depreciation deductions for the year of disposition are determined under paragraph (c)(5)(i) of this section and is the lesser of—

(i) The basis in the replacement MACRS property, as determined under section 1031(d) and the regulations under section 1031(d) or section 1033(b) and the regulations under section 1033(b); or

(ii) The adjusted depreciable basis (as defined in § 1.168(b)-1T(a)(4)) of the relinquished MACRS property.

(8) *Excess basis* is any excess of the basis in the replacement MACRS property, as determined under section 1031(d) and the regulations under section 1031(d) or section 1033(b) and the regulations under section 1033(b), over the exchanged basis as determined under paragraph (b)(7) of this section.

(9) *Depreciable exchanged basis* is the exchanged basis as determined under paragraph (b)(7) of this section reduced by—

(i) The percentage of such basis attributable to the taxpayer's use of property for the taxable year other than in the taxpayer's trade or business (or for the production of income); and

(ii) Any adjustments to basis provided by other provisions of the Internal Revenue Code and the regulations under the Code (including section 1016(a)(2) and (3), for example, depreciation deductions in the year of replacement allowable under section 168(k) or 1400L(b)).

(10) *Depreciable excess basis* is the excess basis as determined under paragraph (b)(8) of this section reduced by—

(i) The percentage of such basis attributable to the taxpayer's use of property for the taxable year other than in the taxpayer's trade or business (or for the production of income);

(ii) Any portion of the basis the taxpayer properly elects to treat as an expense under section 179; and

(iii) Any adjustments to basis provided by other provisions of the Internal Revenue Code and the regulations under the Code (including section 1016(a)(2) and (3), for example, depreciation deductions in the year of replacement allowable under section 168(k) or 1400L(b)).

(11) *Like-kind exchange* is an exchange of property for other property (or money) in a transaction to which section 1031(a)(1), (b), or (c) applies.

(12) *Involuntary conversion* is a transaction described in section 1033(a)(1) or (2) that resulted in the nonrecognition of any part of the gain realized as the result of the conversion.

(c) *Determination of depreciation allowance*—(1) *Computation of the depreciation allowance for depreciable exchanged basis beginning in the year of replacement*—(i) *In general.* This paragraph (c) provides rules for determining the applicable recovery period, the applicable depreciation method, and the applicable convention used to determine the depreciation allowances for the depreciable exchanged basis beginning in the year of replacement. *See* paragraph (c)(5) of this section for rules relating to the computation of the depreciation allowance for the year of disposition and for the year of replacement. *See* paragraph (d)(1) of this section for rules relating to the computation of the depreciation allowance for depreciable excess basis. *See* paragraph (d)(4) of this section if the replacement MACRS property is acquired before disposition of the relinquished MACRS property in a transaction to which section 1033 applies. *See* paragraph (e) of this section for rules relating to the computation of the depreciation allowance using the optional depreciation tables.

(ii) *Applicable recovery period, depreciation method, and convention.* The recovery period, depreciation method, and convention determined under this paragraph (c) are the only permissible methods of accounting for MACRS property within the scope of this section unless the taxpayer makes the election under paragraph (i) of this section not to apply this section.

(2) *Effect of depreciation treatment of the replacement MACRS property by previous owners of the acquired property.* If replacement MACRS property is acquired by a taxpayer in a like-kind exchange or an involuntary conversion, the depreciation treatment of the replacement MACRS property by previous owners has no effect on the determination of depreciation allowances for the replacement MACRS property in the hands of the acquiring taxpayer. For example, a taxpayer exchanging, in a like-kind exchange, MACRS property for property that was depreciated under ACRS by the previous owner

must use this section because the replacement property will become MACRS property in the hands of the acquiring taxpayer. In addition, elections made by previous owners in determining depreciation allowances for the replacement MACRS property have no effect on the acquiring taxpayer. For example, a taxpayer exchanging, in a like-kind exchange, MACRS property that the taxpayer depreciates under the general depreciation system for other MACRS property that the previous owner elected to depreciate under the alternative depreciation system (ADS) pursuant to section 168(g)(7) does not have to continue using the ADS for the replacement MACRS property.

(3) *Recovery period and/or depreciation method of the properties are the same, or both are not the same*—(i) *In general.* For purposes of paragraphs (c)(3) and (c)(4) of this section in determining whether the recovery period and the depreciation method prescribed under section 168 for the replacement MACRS property are the same as the recovery period and the depreciation method prescribed under section 168 for the relinquished MACRS property, the recovery period and the depreciation method for the replacement MACRS property are considered to be the recovery period and the depreciation method that would have applied, taking into account any elections made by the acquiring taxpayer under section 168(b)(5) or 168(g)(7), had the replacement MACRS property been placed in service by the acquiring taxpayer at the same time as the relinquished MACRS property.

(ii) *Both the recovery period and the depreciation method are the same.* If both the recovery period and the depreciation method prescribed under section 168 for the replacement MACRS property are the same as the recovery period and the depreciation method prescribed under section 168 for the relinquished MACRS property, the depreciation allowances for the replacement MACRS property beginning in the year of replacement are determined by using the same recovery period and depreciation method that were used for the relinquished MACRS property. Thus, the replacement MACRS property is depreciated over the remaining

recovery period (taking into account the applicable convention), and by using the depreciation method, of the relinquished MACRS property. Except as provided in paragraph (c)(5) of this section, the depreciation allowances for the depreciable exchanged basis for any 12-month taxable year beginning with the year of replacement are determined by multiplying the depreciable exchanged basis by the applicable depreciation rate for each taxable year (for further guidance, for example, see section 6 of Rev. Proc. 87-57 (1987-2 C.B. 687, 692) and § 601.601(d)(2)(ii)(b) of this chapter).

(iii) *Either the recovery period or the depreciation method is the same, or both are not the same.* If either the recovery period or the depreciation method prescribed under section 168 for the replacement MACRS property is the same as the recovery period or the depreciation method prescribed under section 168 for the relinquished MACRS property, the depreciation allowances for the depreciable exchanged basis beginning in the year of replacement are determined using the recovery period or the depreciation method that is the same as the relinquished MACRS property. See paragraph (c)(4) of this section to determine the depreciation allowances when the recovery period or the depreciation method of the replacement MACRS property is not the same as that of the relinquished MACRS property.

(4) *Recovery period or depreciation method of the properties is not the same.* If the recovery period prescribed under section 168 for the replacement MACRS property (as determined under paragraph (c)(3)(i) of this section) is not the same as the recovery period prescribed under section 168 for the relinquished MACRS property, the depreciation allowances for the depreciable exchanged basis beginning in the year of replacement are determined under this paragraph (c)(4). Similarly, if the depreciation method prescribed under section 168 for the replacement MACRS property (as determined under paragraph (c)(3)(i) of this section) is not the same as the depreciation method prescribed under section 168 for the relinquished MACRS property, the depreciation

method used to determine the depreciation allowances for the depreciable exchanged basis beginning in the year of replacement is determined under this paragraph (c)(4).

(i) *Longer recovery period.* If the recovery period prescribed under section 168 for the replacement MACRS property (as determined under paragraph (c)(3)(i) of this section) is longer than that prescribed for the relinquished MACRS property, the depreciation allowances for the depreciable exchanged basis beginning in the year of replacement are determined as though the replacement MACRS property had originally been placed in service by the acquiring taxpayer in the same taxable year the relinquished MACRS property was placed in service by the acquiring taxpayer, but using the longer recovery period of the replacement MACRS property (as determined under paragraph (c)(3)(i) of this section) and the convention determined under paragraph (c)(4)(v) of this section. Thus, the depreciable exchanged basis is depreciated over the remaining recovery period (taking into account the applicable convention) of the replacement MACRS property.

(ii) *Shorter recovery period.* If the recovery period prescribed under section 168 for the replacement MACRS property (as determined under paragraph (c)(3)(i) of this section) is shorter than that of the relinquished MACRS property, the depreciation allowances for the depreciable exchanged basis beginning in the year of replacement are determined using the same recovery period as that of the relinquished MACRS property. Thus, the depreciable exchanged basis is depreciated over the remaining recovery period (taking into account the applicable convention) of the relinquished MACRS property.

(iii) *Less accelerated depreciation method—(A)* If the depreciation method prescribed under section 168 for the replacement MACRS property (as determined under paragraph (c)(3)(i) of this section) is less accelerated than that of the relinquished MACRS property at the time of disposition, the depreciation allowances for the depreciable exchanged basis beginning in the year of replacement are determined as though the replacement MACRS property had

originally been placed in service by the acquiring taxpayer at the same time the relinquished MACRS property was placed in service by the acquiring taxpayer, but using the less accelerated depreciation method. Thus, the depreciable exchanged basis is depreciated using the less accelerated depreciation method.

(B) Except as provided in paragraph (c)(5) of this section, the depreciation allowances for the depreciable exchanged basis for any 12-month taxable year beginning in the year of replacement are determined by multiplying the adjusted depreciable basis by the applicable depreciation rate for each taxable year. If, for example, the depreciation method of the replacement MACRS property in the year of replacement is the 150-percent declining balance method and the depreciation method of the relinquished MACRS property in the year of replacement is the 200-percent declining balance method, and neither method had been switched to the straight line method in the year of replacement or any prior taxable year, the applicable depreciation rate for the year of replacement and subsequent taxable years is determined by using the depreciation rate of the replacement MACRS property as if the replacement MACRS property was placed in service by the acquiring taxpayer at the same time the relinquished MACRS property was placed in service by the acquiring taxpayer, until the 150-percent declining balance method has been switched to the straight line method. If, for example, the depreciation method of the replacement MACRS property is the straight line method, the applicable depreciation rate for the year of replacement is determined by using the remaining recovery period at the beginning of the year of disposition (as determined under this paragraph (c)(4) and taking into account the applicable convention).

(iv) *More accelerated depreciation method—(A)* If the depreciation method prescribed under section 168 for the replacement MACRS property (as determined under paragraph (c)(3)(i) of this section) is more accelerated than that of the relinquished MACRS property at

the time of disposition, the depreciation allowances for the replacement MACRS property beginning in the year of replacement are determined using the same depreciation method as the relinquished MACRS property.

(B) Except as provided in paragraph (c)(5) of this section, the depreciation allowances for the depreciable exchanged basis for any 12-month taxable year beginning in the year of replacement are determined by multiplying the adjusted depreciable basis by the applicable depreciation rate for each taxable year. If, for example, the depreciation method of the relinquished MACRS property in the year of replacement is the 150-percent declining balance method and the depreciation method of the replacement MACRS property in the year of replacement is the 200-percent declining balance method, and neither method had been switched to the straight line method in the year of replacement or any prior taxable year, the applicable depreciation rate for the year of replacement and subsequent taxable years is the same depreciation rate that applied to the relinquished MACRS property in the year of replacement, until the 150-percent declining balance method has been switched to the straight line method. If, for example, the depreciation method is the straight line method, the applicable depreciation rate for the year of replacement is determined by using the remaining recovery period at the beginning of the year of disposition (as determined under this paragraph (c)(4) and taking into account the applicable convention).

(v) *Convention*—(A) *In general*. The applicable convention for the exchanged basis is determined under this paragraph (c)(4)(v). The applicable convention for the exchanged basis is deemed to be the mid-month convention for replacement MACRS property that is nonresidential real property, residential rental property, or any railroad grading or tunnel bore. Thus, if the relinquished MACRS property was depreciated using the mid-month convention, then the replacement MACRS property is deemed to have been placed in service by the acquiring taxpayer in the same month as the relinquished MACRS property and must continue to

be depreciated using the mid-month convention. If nonresidential real property, residential rental property, or any railroad grading or tunnel bore is received as a result of an exchange or an involuntary conversion of MACRS property that was depreciated using the mid-quarter convention, the replacement MACRS property is deemed to have been placed in service by the acquiring taxpayer in the month that includes the mid-point of the quarter that the relinquished MACRS property was placed in service and must be depreciated using the mid-month convention. If nonresidential real property, residential rental property, or any railroad grading or tunnel bore is received as a result of an exchange or an involuntary conversion of MACRS property that was depreciated using the half-year convention, the replacement MACRS property is deemed to have been placed in service by the acquiring taxpayer in the month that includes the mid-point of the placed-in-service year and must be depreciated using the mid-month convention (for example, for a calendar-year taxpayer with a full 12-month taxable year, the mid-point is the first day of the second half of the taxable year (the seventh month)). For all other replacement MACRS property, the applicable convention is the half-year convention, unless the applicable convention for the relinquished MACRS property is the mid-quarter convention, in which case the mid-quarter convention is applied to the replacement MACRS property.

(B) *Mid-quarter convention*. See paragraph (f) of this section for purposes of applying the 40-percent test of section 168(d)(3) to any replacement MACRS property.

(5) *Year of disposition and year of replacement*. No depreciation deduction is allowable for MACRS property disposed of by a taxpayer in a like-kind exchange or involuntary conversion in the same taxable year that such property was placed in service by the taxpayer. If replacement MACRS property is disposed of by a taxpayer during the same taxable year that the relinquished MACRS property is placed in service by the taxpayer, no depreciation deduction is allowable for either

MACRS property. Otherwise, the depreciation allowances for the year of disposition and for the year of replacement are determined as follows:

(i) *Relinquished MACRS property.* Except as provided in paragraphs (e) and (i) of this section, the depreciation allowance in the year of disposition for the relinquished MACRS property is computed by multiplying the allowable depreciation deduction for the property for that year by a fraction, the numerator of which is the number of months (including fractions of months) the property is deemed to be placed in service during the year of disposition (taking into account the applicable convention of the relinquished MACRS property), and the denominator of which is 12. However, if the year of disposition is less than 12 months, the depreciation allowance determined under this paragraph (c)(5)(i) must be adjusted for a short taxable year (for further guidance, for example, see Rev. Proc. 89-15 (1989-1 C.B. 816) and § 601.601(d)(2)(ii)(b) of this chapter). In the case of termination under § 1.168(i)-1T(e)(3)(v) of general asset account treatment of an asset, or of all the assets remaining, in a general asset account, the allowable depreciation deduction in the year of disposition for the asset or assets for which general asset account treatment is terminated is determined using the depreciation method, recovery period, and convention of the general asset account. This allowable depreciation deduction is adjusted to account for the period the asset or assets is deemed to be in service in accordance with this paragraph (c)(5)(i).

(ii) *Replacement MACRS property—(A) Year of replacement is 12 months.* Except as provided in paragraphs (c)(5)(iii), (e), and (i) of this section, the depreciation allowance in the year of replacement for the depreciable exchanged basis is determined by—

(1) Calculating the applicable depreciation rate for that taxable year by taking into account the recovery period and depreciation method prescribed for the replacement MACRS property under paragraph (c)(3) or (4) of this section;

(2) Calculating the depreciable exchanged basis of the replacement

MACRS property, and adding to that amount the amount determined under paragraph (c)(5)(i) of this section for the year of disposition; and

(3) Multiplying the product of the amounts determined under § 1.168(i)-6T(c)(5)(ii)(A)(1) and (A)(2) by a fraction, the numerator of which is the number of months (including fractions of months) the property is deemed to be in service during the year of replacement (in the year of replacement the replacement MACRS property is deemed to be placed in service by the acquiring taxpayer at the time of replacement under the convention determined under paragraph (c)(4)(v) of this section), and the denominator of which is 12.

(B) *Year of replacement is less than 12 months.* If the year of replacement is less than 12 months, the depreciation allowance determined under paragraph (c)(5)(ii)(A) of this section must be adjusted for a short taxable year (for further guidance, for example, see Rev. Proc. 89-15 (1989-1 C.B. 816) and § 601.601(d)(2)(ii)(b) of this chapter).

(iii) *Deferred transactions—(A) In general.* If the replacement MACRS property is not acquired until after the disposition of the relinquished MACRS property, taking into account the applicable convention of the relinquished MACRS property and replacement MACRS property, depreciation is not allowable during the period between the disposition of the relinquished MACRS property and the acquisition of the replacement MACRS property. The recovery period for the replacement MACRS property is suspended during this period. For purposes of paragraph (c)(5)(ii) of this section, only the depreciable exchanged basis of the replacement MACRS property is taken into account for calculating the amount in paragraph (c)(5)(ii)(A)(2) of this section if the year of replacement is a taxable year subsequent to the year of disposition.

(B) *Allowable depreciation for a qualified intermediary.* [Reserved].

(iv) *Remaining recovery period.* The remaining recovery period of the replacement MACRS property is determined as of the beginning of the year of disposition of the relinquished MACRS property. For purposes of determining

the remaining recovery period of the replacement MACRS property, the replacement MACRS property is deemed to have been originally placed in service under the convention determined under paragraph (c)(4)(v) of this section but at the time the relinquished MACRS property was deemed to be placed in service under the convention that applied to it when it was placed in service.

(6) *Examples.* The application of this paragraph (c) is illustrated by the following examples:

*Example 1.* A1, a calendar-year taxpayer, exchanges Building M, an office building, for Building N, a warehouse in a like-kind exchange. Building M is relinquished in July 2004 and Building N is acquired and placed in service in October 2004. A1 did not make any elections under section 168 for either Building M or Building N. The unadjusted depreciable basis of Building M was \$4,680,000 when placed in service in July 1997. Since the recovery period and depreciation method prescribed under section 168 for Building N (39 years, straight line method) are the same as the recovery period and depreciation method prescribed under section 168 for Building M (39 years, straight line method), Building N is depreciated over the remaining recovery period of, and using the same depreciation method and convention as that of, Building M. Thus, Building N will be depreciated using the straight line method over a remaining recovery period of 32 years beginning in October 2004 (the remaining recovery period of 32 years and 6.5 months at the beginning of 2004, less the 6.5 months of depreciation taken prior to the disposition of the exchanged MACRS property (Building M) in 2004). For 2004, the year in which the transaction takes place, the depreciation allowance for Building M is  $(\$120,000)(6.5/12)$  which equals \$65,000. The depreciation allowance for Building N for 2004 is  $(\$120,000)(2.5/12)$  which equals \$25,000. For 2005 and subsequent years, Building N is depreciated over the remaining recovery period of, and using the same depreciation method and convention as that of, Building M. Thus, the depreciation allowance for Building N is the same as Building M, namely \$10,000 per month.

*Example 2.* B, a calendar-year taxpayer, placed in service Bridge P in January 1998. Bridge P is depreciated using the half-year convention. In January 2004, B exchanges Bridge P for Building Q, an apartment building, in a like-kind exchange. B did not make any elections under section 168 for either Bridge P or Building Q. Since the recovery period prescribed under section 168 for Building Q (27.5 years) is longer than that of Bridge P (15 years), Building Q is depreciated

as if it had originally been placed in service in July 1998 and disposed of in July 2004 using a 27.5-year recovery period. Additionally, since the depreciation method prescribed under section 168 for Building Q (straight line method) is less accelerated than that of Bridge P (150-percent declining balance method), then the depreciation allowance for Building Q is computed using the straight line method. Thus, when Building Q is acquired and placed in service in 2004, its basis is depreciated over the remaining 21.5-year recovery period using the straight line method of depreciation and the mid-month convention beginning in July 2004.

*Example 3.* C, a calendar-year taxpayer, placed in service Building R, a restaurant, in January 1996. In January 2004, C exchanges Building R for Tower S, a radio transmitting tower, in a like-kind exchange. C did not make any elections under section 168 for either Building R or Tower S. Since the recovery period prescribed under section 168 for Tower S (15 years) is shorter than that of Building R (39 years), Tower S is depreciated over the remaining recovery period of Building R. Additionally, since the depreciation method prescribed under section 168 for Tower S (150% declining balance method) is more accelerated than that of Building R (straight line method), then the depreciation allowance for Tower S is also computed using the same depreciation method as Building R. Thus, Tower S is depreciated over the remaining 31-year recovery period of Building R using the straight line method of depreciation and the mid-month convention. Alternatively, C may elect under paragraph (i) of this section to treat Tower S as though it is placed in service in January 2004. In such case, C uses the applicable recovery period, depreciation method, and convention prescribed under section 168 for Tower S.

*Example 4.* (i) In February 2001, D, a calendar-year taxpayer and manufacturer of rubber products, acquired for \$60,000 and placed in service Asset T (a special tool) and depreciated Asset T using the straight line method election under section 168(b)(5) and the mid-quarter convention over its 3-year recovery period. In June 2004, D exchanges Asset T for Asset U (not a special tool) in a like-kind exchange. D elected not to deduct the additional first year depreciation for 7-year property placed in service in 2004. Since the recovery period prescribed under section 168 for Asset U (7 years) is longer than that of Asset T (3 years), Asset U is depreciated as if it had originally been placed in service in February 2001 using a 7-year recovery period. Additionally, since the depreciation method prescribed under section 168 for Asset U (200-percent declining balance method) is more accelerated than that of Asset T (straight line method) at the time of disposition, the depreciation allowance is computed using

the straight line method. Asset U is depreciated over its remaining recovery period of 3.75 years using the straight line method of depreciation and the mid-quarter convention.

(ii) The 2004 depreciation allowance for Asset T is \$938 (\$2,500 allowable depreciation deduction (\$60,000 original basis minus \$17,500 depreciation deduction for 2001 minus \$20,000 depreciation deduction for 2002 minus \$20,000 depreciation deduction for 2003)  $\times$  4.5 months  $\div$  12).

(iii) The depreciation rate in 2004 for Asset U is 0.2424 ( $1 \div 4.125$  years (the length of the applicable recovery period remaining as of the beginning of 2004)). Therefore, the depreciation allowance in 2004 is \$379 ( $0.2424 \times$  \$2,500 (the sum of the \$1,562 depreciable exchanged basis of Asset U (\$2,500 basis at the beginning of 2004 for Asset T, less the \$938 depreciation allowance for Asset T for 2004) and the \$938 depreciation allowance for Asset T for 2004)  $\times$  7.5 months  $\div$  12).

*Example 5.* On January 1, 2004, E, a calendar-year taxpayer, acquired and placed in service Canopy V, a gas station canopy. The purchase price of Canopy V was \$60,000. On August 1, 2004, Canopy V was destroyed in a hurricane and was therefore no longer usable in E's business. On October 1, 2004, as part of the involuntary conversion, E acquired and placed in service Canopy W with the insurance proceeds E received due to the loss of Canopy V. E elected not to deduct the additional first year depreciation for 5-year property placed in service in 2004. E depreciates both canopies under the general depreciation system of section 168(a) by using the 200-percent declining balance method of depreciation, a 5-year recovery period, and the half-year convention. No depreciation deduction is allowable for Canopy V. The depreciation deduction allowable for Canopy W for 2004 is \$12,000 ( $\$60,000 \times$  the annual depreciation rate of  $.40 \times \frac{1}{2}$  year).

*Example 6.* Same facts as in *Example 5*, except that E did not make the election out of the additional first year depreciation for 5-year property placed in service in 2004. E depreciates both canopies under the general depreciation system of section 168(a) by using the 200-percent declining balance method of depreciation, a 5-year recovery period, and the half-year convention. No depreciation deduction is allowable for Canopy V. For 2004, E is allowed a 50-percent additional first year depreciation deduction of \$30,000 for Canopy W (the unadjusted depreciable basis of \$60,000 multiplied by .50), and a regular MACRS depreciation deduction of \$6,000 for Canopy W (the depreciable exchanged basis of \$30,000 multiplied by the annual depreciation rate of  $.40 \times \frac{1}{2}$  year). For 2005, E is allowed a regular MACRS depreciation deduction of \$9,600 for Canopy W (the depreciable exchanged basis of \$24,000 (\$30,000 minus regular 2003 depreciation of \$6,000)

multiplied by the annual depreciation rate of .40).

(d) *Special rules for determining depreciation allowances*—(1) *Excess basis*—(i) *In general.* Any excess basis in the replacement MACRS property is treated as property that is placed in service by the acquiring taxpayer in the year of replacement. Thus, the depreciation allowances for the depreciable excess basis are determined by using the applicable recovery period, depreciation method, and convention prescribed under section 168 for the property at the time of replacement. However, if replacement MACRS property is disposed of during the same taxable year the relinquished MACRS property is placed in service by the acquiring taxpayer, no depreciation deduction is allowable for either MACRS property. See paragraph (g) of this section regarding the application of section 179. See paragraph (h) of this section regarding the application of section 168(k) or 1400L(b).

(ii) *Example.* The application of this paragraph (d)(1) is illustrated by the following example:

*Example.* In 1989, G placed in service a hospital. On January 16, 2004, G exchanges this hospital plus \$2,000,000 cash for an office building in a like-kind exchange. On January 16, 2004, the hospital has an adjusted depreciable basis of \$1,500,000. After the exchange, the basis of the office building is \$3,500,000. The depreciable exchanged basis of the office building is depreciated in accordance with paragraph (c) of this section. The depreciable excess basis of \$2,000,000 is treated as being placed in service by G in 2004 and, as a result, is depreciated using the applicable depreciation method, recovery period, and convention prescribed for the office building under section 168 at the time of replacement.

(2) *Depreciable and nondepreciable property*—(i) If land or other nondepreciable property is acquired in a like-kind exchange for, or as a result of an involuntary conversion of, depreciable property, the land or other nondepreciable property is not depreciated. If both MACRS and nondepreciable property are acquired in a like-kind exchange for, or as part of an involuntary conversion of, MACRS property, the basis allocated to the nondepreciable property (as determined under section 1031(d) and the regulations under section 1031(d) or section 1033(b) and the

regulations under section 1033(b) is not depreciated and the basis allocated to the replacement MACRS property (as determined under section 1031(d) and the regulations under section 1031(d) or section 1033(b) and the regulations under section 1033(b)) is depreciated in accordance with this section.

(ii) If MACRS property is acquired, or if both MACRS and nondepreciable property are acquired, in a like-kind exchange for, or as part of an involuntary conversion of, land or other nondepreciable property, the basis in the replacement MACRS property that is attributable to the relinquished nondepreciable property is treated as though the replacement MACRS property is placed in service by the acquiring taxpayer in the year of replacement. Thus, the depreciation allowances for the replacement MACRS property are determined by using the applicable recovery period, depreciation method, and convention prescribed under section 168 for the replacement MACRS property at the time of replacement. See paragraph (g) of this section regarding the application of section 179. See paragraph (h) of this section regarding the application of section 168(k) or 1400L(b).

(3) *Depreciation limitations for automobiles*—(i) *In general.* Depreciation allowances under section 179 and section 167 (including allowances under sections 168 and 1400L(b)) for a passenger automobile, as defined in section 280F(d)(5), are subject to the limitations of section 280F(a). The depreciation allowances for a passenger automobile that is replacement MACRS property (replacement MACRS passenger automobile) generally are limited in any taxable year to the replacement automobile section 280F limit for the taxable year. The taxpayer's basis in the replacement MACRS passenger automobile is treated as being comprised of two separate components. The first component is the exchanged basis and the second component is the excess basis, if any. The depreciation allowances for a passenger automobile that is relinquished MACRS property (relinquished MACRS passenger automobile) for the taxable year generally are limited to the relinquished automobile section 280F limit for that taxable

year. For purposes of this paragraph (d)(3), the following definitions apply:

(A) *Replacement automobile section 280F limit* is the limit on depreciation deductions under section 280F(a) for the taxable year based on the time of replacement of the replacement MACRS passenger automobile (including the effect of any elections under section 168(k) or section 1400L(b), as applicable).

(B) *Relinquished automobile section 280F limit* is the limit on depreciation deductions under section 280F(a) for the taxable year based on when the relinquished MACRS passenger automobile was placed in service by the taxpayer.

(ii) *Order in which limitations on depreciation under section 280F(a) are applied.* Generally, depreciation deductions allowable under section 280F(a) reduce the basis in the relinquished MACRS passenger automobile and the exchanged basis of the replacement MACRS passenger automobile, before the excess basis of the replacement MACRS passenger automobile is reduced. The depreciation deductions for the relinquished MACRS passenger automobile in the year of disposition and the replacement MACRS passenger automobile in the year of replacement and each subsequent taxable year are allowable in the following order:

(A) The depreciation deduction allowable for the relinquished MACRS passenger automobile as determined under paragraph (c)(5)(i) of this section for the year of disposition to the extent of the smaller of the replacement automobile section 280F limit and the relinquished automobile section 280F limit, if the year of disposition is the year of replacement. If the year of replacement is a taxable year subsequent to the year of disposition, the depreciation deduction allowable for the relinquished MACRS passenger automobile for the year of disposition is limited to the relinquished automobile section 280F limit.

(B) The additional first year depreciation allowable on the remaining exchanged basis (remaining carryover basis as determined under § 1.168(k)-1T(f)(5) or § 1.1400L(b)-1T(f)(5), as applicable) of the replacement MACRS passenger automobile, as determined

under § 1.168(k)-1T(f)(5) or § 1.1400L(b)-1T(f)(5), as applicable, to the extent of the excess of the replacement automobile section 280F limit over the amount allowable under paragraph (d)(3)(ii)(A) of this section.

(C) The depreciation deduction allowable for the taxable year on the depreciable exchanged basis of the replacement MACRS passenger automobile determined under paragraph (c) of this section to the extent of any excess over the sum of the amounts allowable under paragraphs (d)(3)(ii)(A) and (B) of this section of the smaller of the replacement automobile section 280F limit and the relinquished automobile section 280F limit.

(D) Any section 179 deduction allowable in the year of replacement on the excess basis of the replacement MACRS passenger automobile to the extent of the excess of the replacement automobile section 280F limit over the sum of the amounts allowable under paragraphs (d)(3)(ii)(A), (B), and (C) of this section.

(E) The additional first year depreciation allowable on the remaining excess basis of the replacement MACRS passenger automobile, as determined under § 1.168(k)-1T(f)(5) or § 1.1400L(b)-1T(f)(5), as applicable, to the extent of the excess of the replacement automobile section 280F limit over the sum of the amounts allowable under paragraphs (d)(3)(ii)(A), (B), (C), and (D) of this section.

(F) The depreciation deduction allowable under paragraph (d) of this section for the depreciable excess basis of the replacement MACRS passenger automobile to the extent of the excess of the replacement automobile section 280F limit over the sum of the amounts allowable under paragraphs (d)(3)(ii)(A), (B), (C), (D), and (E) of this section.

(iii) *Examples.* The application of this paragraph (d)(3) is illustrated by the following examples:

*Example 1.* H, a calendar-year taxpayer, acquired and placed in service Automobile X in January 2000 for \$30,000 to be used solely for H's business. In December 2003, H exchanges, in a like-kind exchange, Automobile X plus \$15,000 cash for new Automobile Y that will also be used solely in H's business. Automobile Y is 50-percent bonus depreciation property for purposes of section 168(k)(4).

Both automobiles are depreciated using the double declining balance method, the half-year convention, and a five-year recovery period. The relinquished automobile section 280F limit for 2003 for Automobile X is \$1,775. The replacement automobile section 280F limit for Automobile Y is \$10,710. The exchanged basis for Automobile Y is \$17,315 (\$30,000 less total depreciation allowable of \$12,685 (\$3,060 for 2000, \$4,900 for 2001, \$2,950 for 2002, and \$1,775 for 2003)). Without taking section 280F into account, the additional first year depreciation deduction for the remaining exchanged basis is \$8,658 ( $\$17,315 \times 0.5$ ). Because this amount is less than \$8,935 (\$10,710 (the replacement automobile section 280F limit for 2003 for Automobile Y) \$1,775 (the depreciation allowable for Automobile X for 2003)) the additional first year depreciation deduction for the exchanged basis is \$8,658. No depreciation deduction is allowable in 2003 for the depreciable exchanged basis because the depreciation deductions taken for Automobile X and the remaining exchanged basis exceed the exchanged automobile section 280F limit. An additional first year depreciation deduction of \$277 is allowable for the excess basis of \$15,000 in Automobile Y. Thus at the end of 2003 the adjusted depreciable basis in Automobile Y is \$23,379 comprised of adjusted depreciable exchanged basis of \$8,657 (\$17,315 (exchanged basis) - \$8,658 (additional first year depreciation for exchanged basis)) and of an adjusted depreciable excess basis of \$14,723 (\$15,000 (excess basis) - \$277 (additional first year depreciation for 2003)).

*Example 2.* Same facts as in *Example 1*, except that H placed in service Automobile X in January 2002, and H elected not to claim the additional first year depreciation deduction for 5-year property placed in service in 2002 and 2003. The relinquished automobile section 280F limit for Automobile X for 2003 is \$4,900. Because the replacement automobile section 280F limit for 2003 for Automobile Y (\$3,060) is less than the relinquished automobile section 280F limit for Automobile X for 2003 and is less than \$5,388 ( $(\$30,000 \text{ (cost)} - \$3,060 \text{ (depreciation allowable for 2002)}) \times 0.4 \times 6/12$ ), the depreciation that would be allowable for Automobile X (determined without regard to section 280F) in the year of disposition, the depreciation for Automobile X in the year of disposition is limited to \$3,060. For 2003 no depreciation is allowable for the excess basis and the exchanged basis in Automobile Y.

*Example 3.* AB, a calendar-year taxpayer, purchased and placed in service Automobile X1 in February 2000 for \$10,000. X1 is a passenger automobile subject to section 280F(a) and is used solely for AB's business. AB depreciated X1 using a five-year recovery period, the double declining balance method and the half-year convention. As of January 1, 2003, the adjusted basis of X1 was \$2,880

(\$10,000 original cost minus \$2,000 depreciation deduction for 2000, minus \$3,200 depreciation deduction for 2001, and \$1,920 depreciation deduction for 2002). In November 2003, AB exchanges, in a like-kind exchange, Automobile X1 plus \$14,000 cash for new Automobile Y1 that will be used solely in AB's business. Automobile Y1 is 50-percent bonus depreciation property for purposes of section 168(k)(4) and qualifies for the expensing election under section 179. Pursuant to paragraph §1.168(k)-1T(g)(3)(ii) and paragraph (k)(2)(i) of this section, AB decided to apply §1.168(i)-6T to the exchange of Automobile X1 for Automobile Y1, the replacement MACRS property. AB also makes the election under section 179 for the excess basis of Automobile Y1. AB depreciates Y1 using a five-year recovery period, the double declining balance method and the half-year convention. For 2003, the relinquished automobile section 280F limit for Automobile X1 is \$1,775 and the replacement automobile section 280F limit for 2003 for Automobile Y1 is \$10,710.

(i) The 2003 depreciation deduction for Automobile X1 is \$576. The depreciation deduction calculated for X1 is \$576 (the adjusted depreciable basis of Automobile X1 at the beginning of 2003 of  $\$2,880 \times 40\% \times \frac{1}{2}$  year), which is less than the relinquished automobile section 280F limit and the replacement automobile section 280F limit.

(ii) The additional first year depreciation deduction for the exchanged basis is \$1,152. The additional first year depreciation deduction of \$1,152 (remaining exchanged basis of \$2,304 (\$2,880 adjusted basis of Automobile X1 at the beginning of 2003 minus \$576)  $\times$  0.5) is less than the replacement automobile section 280F limit minus \$576.

(iii) AB's MACRS depreciation deduction allowable in 2003 for the remaining exchanged basis of \$1,152 is \$47 (the relinquished automobile section 280F limit of \$1,775 less the depreciation deduction of \$576 taken for Automobile X1 less the additional first year depreciation deduction of \$1,152 taken for the exchanged basis) which is less than the depreciation deduction calculated for the depreciable exchanged basis.

(iv) For 2003, AB takes a \$1,400 section 179 deduction for the excess basis of Automobile Y1. AB must reduce the excess basis of \$14,000 by the section 179 deduction of \$1,400 to determine the remaining excess basis of \$12,600.

(v) For 2003, AB is allowed a 50-percent additional first year depreciation deduction of \$6,300 (the remaining excess basis of \$12,600 multiplied by .50).

(vi) For 2003, AB's depreciation deduction for the depreciable excess basis is limited to \$1,235. The depreciation deduction computed without regard to the replacement automobile section 280F limit is \$1,260 ( $\$6,300$  depreciable excess basis  $\times$  0.4  $\times$  6/12). However

the depreciation deduction for the depreciable excess basis is limited to \$1,235 (\$10,710 (replacement automobile section 280F limit) - \$576 (depreciation deduction for Automobile X1) - \$1,152 (additional first year depreciation deduction for the exchanged basis) - \$47 (depreciation deduction for exchanged basis) - \$1,400 (section 179 deduction) - \$6,300 (additional first year depreciation deduction for remaining excess basis)).

(4) *Replacement MACRS property acquired and placed-in-service before disposition of relinquished MACRS property.* If, in an involuntary conversion, a taxpayer acquires and places in service the replacement MACRS property before the date of disposition of the relinquished MACRS property, the taxpayer depreciates the unadjusted depreciable basis of the replacement MACRS property under section 168 beginning in the taxable year when the replacement MACRS property is placed in service by the taxpayer and by using the applicable depreciation method, recovery period, and convention prescribed under section 168 for the replacement MACRS property at the placed-in-service date. However, at the time of disposition of the relinquished MACRS property, the taxpayer determines the exchanged basis and the excess basis of the replacement MACRS property and begins to depreciate the depreciable exchanged basis of the replacement MACRS property in accordance with paragraph (c) of this section. The depreciable excess basis of the replacement MACRS property continues to be depreciated by the taxpayer in accordance with the first sentence of this paragraph (d)(4). Further, in the year of disposition of the relinquished MACRS property, the taxpayer must include in taxable income the excess of the depreciation deductions allowable on the unadjusted depreciable basis of the replacement MACRS property over the depreciation deductions that would have been allowable to the taxpayer on the depreciable excess basis of the replacement MACRS property from the date the replacement MACRS property was placed in service by the taxpayer (taking into account the applicable convention) to the time of disposition of the relinquished MACRS property.

(e) *Use of optional depreciation tables—*  
(1) *Taxpayer not bound by prior use of*

*table.* If a taxpayer used an optional depreciation table for the relinquished MACRS property, the taxpayer is not required to use an optional table for the depreciable exchanged basis of the replacement MACRS property. Conversely, if a taxpayer did not use an optional depreciation table for the relinquished MACRS property, the taxpayer may use the appropriate table for the depreciable exchanged basis of the replacement MACRS property. If a taxpayer decides not to use the table for the depreciable exchanged basis of the replacement MACRS property, the depreciation allowance for this property for the year of replacement and subsequent taxable years is determined under paragraph (c) of this section. If a taxpayer decides to use the optional depreciation tables, no depreciation deduction is allowable for MACRS property placed in service by the acquiring taxpayer and subsequently exchanged or involuntarily converted by such taxpayer in the same taxable year, and, if, during the same taxable year, MACRS property is placed in service by the acquiring taxpayer, exchanged or involuntarily converted by such taxpayer, and the replacement MACRS property is disposed of by such taxpayer, no depreciation deduction is allowable for either MACRS property.

(2) *Determination of the depreciation deduction*—(i) *Relinquished MACRS property.* In the year of disposition, the depreciation allowance for the relinquished MACRS property is computed by multiplying the unadjusted depreciable basis (less the amount of the additional first year depreciation deduction allowed or allowable, whichever is greater, under section 168(k) or section 1400L(b), as applicable) of the relinquished MACRS property by the annual depreciation rate (expressed as a decimal equivalent) specified in the appropriate table for the recovery year corresponding to the year of disposition. This product is then multiplied by a fraction, the numerator of which is the number of months (including fractions of months) the property is deemed to be placed in service during the year of the exchange or involuntary conversion (taking into account the applicable convention) and the denominator of which is 12. However, if

the year of disposition is less than 12 months, the depreciation allowance determined under this paragraph (e)(2)(i) must be adjusted for a short taxable year (for further guidance, for example, see Rev. Proc. 89-15 (1989-1 C.B. 816) and § 601.601(d)(2)(ii)(b) of this chapter).

(ii) *Replacement MACRS property*—(A) *Determination of the appropriate optional depreciation table.* If a taxpayer chooses to use the appropriate optional depreciation table for the depreciable exchanged basis, the depreciation allowances for the depreciable exchanged basis beginning in the year of replacement are determined by choosing the optional depreciation table that corresponds to the recovery period, depreciation method, and convention of the replacement MACRS property determined under paragraph (c) of this section.

(B) *Calculating the depreciation deduction for the replacement MACRS property*—(1) The depreciation deduction for the taxable year is computed by first determining the appropriate recovery year in the table identified under paragraph (e)(2)(ii)(A) of this section. The appropriate recovery year for the year of replacement is the same as the recovery year for the year of disposition, regardless of the taxable year in which the replacement property is acquired. For example, if the recovery year for the year of disposition would have been Year 4 in the table that applied before the disposition of the relinquished MACRS property, then the recovery year for the year of replacement is Year 4 in the table identified under paragraph (e)(2)(ii)(A) of this section.

(2) Next, the annual depreciation rate (expressed as a decimal equivalent) for each recovery year is multiplied by a transaction coefficient. The transaction coefficient is the formula  $1/(1-x)$  where  $x$  equals the sum of the annual depreciation rates from the table identified under paragraph (e)(2)(ii)(A) of this section (expressed as a decimal equivalent) corresponding to the replacement MACRS property (as determined under paragraph (e)(2)(ii)(A) of this section) for the taxable years beginning with the placed-in-service year of the relinquished MACRS property through the taxable year immediately prior to the year of

disposition. The product of the annual depreciation rate and the transaction coefficient is multiplied by the depreciable exchanged basis (taking into account paragraph (e)(2)(i) of this section). In the year of replacement, this product is then multiplied by a fraction, the numerator of which is the number of months (including fractions of months) the property is deemed to be placed in service by the acquiring taxpayer during the year of replacement (taking into account the applicable convention) and the denominator of which is 12. However, if the year of replacement is the year the relinquished MACRS property is placed in service by the acquiring taxpayer, the preceding sentence does not apply. In addition, if the year of replacement is less than 12 months, the depreciation allowance determined under paragraph (e)(2)(ii) of this section must be adjusted for a short taxable year (for further guidance, for example, see Rev. Proc. 89-15 (1989-1 C.B. 816) and § 601.601(d)(2)(ii)(b) of this chapter).

(iii) *Unrecovered basis.* If the replacement MACRS property would have unrecovered depreciable basis after the final recovery year (for example, due to a deferred exchange), the unrecovered basis is an allowable depreciation deduction in the taxable year that corresponds to the final recovery year unless the unrecovered basis is subject to a depreciation limitation such as section 280F.

(3) *Excess basis.* As provided in paragraph (d)(1) of this section, any excess basis in the replacement MACRS property is treated as property that is placed in service by the acquiring taxpayer at the time of replacement. Thus, if the taxpayer chooses to use the appropriate optional depreciation table for the depreciable excess basis in the replacement MACRS property, the depreciation allowances for the depreciable excess basis are determined by multiplying the depreciable excess basis by the annual depreciation rate (expressed as a decimal equivalent) specified in the appropriate table for each taxable year. The appropriate table for the depreciable excess basis is based on the depreciation method, recovery period, and convention applicable to the depreciable excess basis

under section 168 at the time of replacement. However, if the year of replacement is less than 12 months, the depreciation allowance determined under this paragraph (e)(3) must be adjusted for a short taxable year (for further guidance, for example, see Rev. Proc. 89-15 (1989-1 C.B. 816) and § 601.601(d)(2)(ii)(b) of this chapter).

(4) *Examples.* The application of this paragraph (e) is illustrated by the following examples:

*Example 1.* J, a calendar-year taxpayer, acquired 5-year property for \$10,000 and placed it in service in January 2001. J uses the optional tables to depreciate the property. J uses the half-year convention and did not make any elections for the property. In December 2003, J exchanges the 5-year property for used 7-year property in a like-kind exchange. The depreciable exchanged basis of the 7-year property equals the adjusted depreciable basis of the 5-year property at the time of disposition of the relinquished MACRS property, namely \$3,840 (\$10,000 less \$2,000 depreciation in 2001, \$3,200 depreciation in 2002, and \$960 depreciation in 2003). J must first determine the appropriate optional depreciation table pursuant to paragraph (c) of this section. Since the replacement MACRS property has a longer recovery period and the same depreciation method as the relinquished MACRS property, J uses the optional depreciation table corresponding to a 7-year recovery period, the 200% declining balance method, and the half-year convention (because the 5-year property was depreciated using a half-year convention). Had the replacement MACRS property been placed in service in the same taxable year as the placed-in-service year of the relinquished MACRS property, the depreciation allowance for the replacement MACRS property for the year of replacement would be determined using recovery year 3 of the optional table. The depreciation allowance equals the depreciable exchanged basis (\$3,840) multiplied by the annual depreciation rate for the current taxable year (.1749 for recovery year 3) as modified by the transaction coefficient  $[1 / (1 - (.1429 + .2449))]$  which equals 1.6335. Thus, J multiplies \$3,840, its depreciable exchanged basis in the replacement MACRS property, by the product of .1749 and 1.6335, and then by one-half, to determine the depreciation allowance for 2003, \$549. For 2004, J multiplies its depreciable exchanged basis in the replacement MACRS property determined at the time of replacement of \$3,840 by the product of the modified annual depreciation rate for the current taxable year (.1249 for recovery year 4) and the transaction coefficient (1.6335) to determine its depreciation allowance of \$783.

*Example 2.* K, a calendar-year taxpayer, acquired used Asset V for \$100,000 and placed it in service in January 1999. K depreciated Asset V under the general depreciation system of section 168(a) by using a 5-year recovery period, the 200-percent declining balance method of depreciation, and the half-year convention. In December 2003, as part of the involuntary conversion, Asset V is involuntarily converted due to an earthquake. In October 2005, K purchases used Asset W with the insurance proceeds from the destruction of Asset V and places Asset W in service to replace Asset V. If Asset W had been placed in service when Asset V was placed in service, it would have been depreciated using a 7-year recovery period, the 200-percent declining balance method, and the half-year convention. K uses the optional depreciation tables to depreciate Asset V and Asset W. For 2003 (recovery year 5 on the optional table), the depreciation deduction for Asset V is \$5,760  $((0.1152)(\$100,000)(1/2))$ . Thus, the adjusted depreciable basis of Asset V at the time of replacement is \$11,520 (\$100,000 less \$20,000 depreciation in 1999, \$32,000 depreciation in 2000, \$19,200 depreciation in 2001, \$11,520 depreciation in 2002, and \$5,760 depreciation in 2003). Under the table that applied to Asset V, the year of disposition was recovery year 5 and the depreciation deduction was determined under the straight line method. The table that applies for Asset W is the table that applies the straight line depreciation method, the half-year convention, and a 7-year recovery period. The appropriate recovery year under this table is recovery year 5. The depreciation deduction for Asset W for 2005 is \$1,646  $((\$11,520)(0.1429)(1/(1-0.5))(1/2))$ . Thus, the depreciation deduction for Asset W in 2006 (recovery year 6) is \$3,290  $(\$11,520)(0.1428)(1/(1-0.5))$ . The depreciation deduction for 2007 (recovery year 7) is \$3,292  $((\$11,520)(.1429)(1/(1-.5)))$ . The depreciation deduction for 2008 (recovery year 8) is \$3,292 (\$11,520 less allowable depreciation for Asset W for 2005 through 2007 (\$1,646 + \$3,290 + \$3,292)).

*Example 3.* L, a calendar-year taxpayer, placed in service used Computer X in January 2002 for \$5,000. L depreciated Computer X under the general depreciation system of section 168(a) by using the 200-percent declining balance method of depreciation, a 5-year recovery period, and the half-year convention. Computer X is destroyed in a fire in March 2004. For 2004, the depreciation deduction allowable for Computer X equals \$480  $([(\$5,000)(.1920)] \times (1/2))$ . Thus, the adjusted depreciable basis of Computer X was \$1,920 when it was destroyed (\$5,000 unadjusted depreciable basis less \$1,000 depreciation for 2002, \$1,600 depreciation for 2003, and \$480 depreciation for 2004). In April 2004, as part of the involuntary conversion, L acquired and placed in service used Computer Y with insurance proceeds received due to the loss of

Computer X. Computer Y will be depreciated using the same depreciation method, recovery period, and convention as Computer X. L elected to use the optional depreciation tables to compute the depreciation allowance for Computer X and Computer Y. The depreciation deduction allowable for 2004 for Computer Y equals \$384  $([\$1,920 \times (.1920)(1/(1-.52))] \times (1/2))$ .

(f) *Mid-quarter convention.* For purposes of applying the 40-percent test under section 168(d) and the regulations under section 168(d), the following rules apply:

(1) *Exchanged basis.* If, in a taxable year, MACRS property is placed in service by the acquiring taxpayer (but not as a result of a like-kind exchange or involuntary conversion) and—

(i) In the same taxable year, is disposed of by the acquiring taxpayer in a like-kind exchange or an involuntary conversion and replaced by the acquiring taxpayer with replacement MACRS property, the exchanged basis (determined without any adjustments for depreciation deductions during the taxable year) of the replacement MACRS property is taken into account in the year of replacement in the quarter the relinquished MACRS property was placed in service by the acquiring taxpayer; or

(ii) In the same taxable year, is disposed of by the acquiring taxpayer in a like-kind exchange or an involuntary conversion, and in a subsequent taxable year is replaced by the acquiring taxpayer with replacement MACRS property, the exchanged basis (determined without any adjustments for depreciation deductions during the taxable year) of the replacement MACRS property is taken into account in the year of replacement in the quarter the replacement MACRS property was placed in service by the acquiring taxpayer; or

(iii) In a subsequent taxable year, disposed of by the acquiring taxpayer in a like-kind exchange or involuntary conversion, the exchanged basis of the replacement MACRS property is not taken into account in the year of replacement.

(2) *Excess basis.* Any excess basis is taken into account in the quarter the replacement MACRS property is placed in service by the acquiring taxpayer.

(3) *Depreciable property acquired for nondepreciable property.* Both the exchanged basis and excess basis of the replacement MACRS property described in paragraph (d)(2)(ii) of this section (depreciable property acquired for nondepreciable property), are taken into account for determining whether the mid-quarter convention applies in the year of replacement.

(g) *Section 179 election.* In applying the section 179 election, only the excess basis, if any, in the replacement MACRS property is taken into account. If the replacement MACRS property is described in paragraph (d)(2)(ii) of this section (depreciable property acquired for nondepreciable property), only the excess basis in the replacement MACRS property is taken into account.

(h) *Additional first year depreciation deduction.* See § 1.168(k)-1T(f)(5) (for qualified property or 50-percent bonus depreciation property) and § 1.1400L(b)-1T(f)(5) (for qualified New York Liberty Zone property).

(i) *Election not to apply this section.* A taxpayer may elect not to apply this section for any MACRS property involved in a like-kind exchange or involuntary conversion. An election under this paragraph (i) applies only to the taxpayer making the election and the election applies to both the relinquished MACRS property and the replacement MACRS property. If an election is made under this paragraph (i), the depreciation allowances for the replacement MACRS property beginning in the year of replacement and for the relinquished MACRS property in the year of disposition are not determined under this section. Instead, for depreciation purposes, the exchanged basis and excess basis, if any, in the replacement MACRS property are treated as being placed in service by the taxpayer at the time of replacement and the adjusted depreciable basis of the relinquished MACRS property is treated as being disposed of by the taxpayer at the time of disposition. Paragraphs (c)(5)(i) (determination of depreciation for relinquished MACRS property in the year of disposition), (c)(5)(iii) (rules for deferred transactions), (g) (section 179 election), and (h) (additional first year depreciation deduction) of this

section apply to property to which this paragraph (i) applies. See paragraph (j) of this section for the time and manner of making the election under this paragraph (i).

(j) *Time and manner of making elections—(1) In general.* The election provided in paragraph (i) of this section is made separately by each person acquiring replacement MACRS property. The election is made for each member of a consolidated group by the common parent of the group, by the partnership (and not by the partners separately) in the case of a partnership, or by the S corporation (and not by the shareholders separately) in the case of an S corporation. A separate election under paragraph (i) of this section is required for each like-kind exchange or involuntary conversion. The election provided in paragraph (i) of this section must be made within the time and manner provided in paragraph (j)(2) and (3) of this section and may not be made by the taxpayer in any other manner (for example, the election cannot be made through a request under section 446(e) to change the taxpayer's method of accounting), except as provided in paragraph (k)(2) of this section.

(2) *Time for making election.* The election provided in paragraph (i) of this section is made by the due date (including extensions) of the taxpayer's Federal tax return for the year of replacement.

(3) *Manner of making election.* The election provided in paragraph (i) of this section is made by typing or legibly printing at the top of Form 4562, *Depreciation and Amortization*, "ELECTION MADE UNDER SECTION 1.168(i)-6T(i)," or in the manner provided for on Form 4562 and its instructions. If Form 4562 is revised or renumbered, any reference in this section to that form is treated as a reference to the revised or renumbered form.

(4) *Revocation.* The election provided in paragraph (i) of this section, once made, may be revoked only with the consent of the Commissioner of Internal Revenue. Such consent will be granted only in extraordinary circumstances. Requests for consent are requests for a letter ruling and must be

filed with the Commissioner of Internal Revenue, Washington, DC 20224. Requests for consent may not be made in any other manner (for example, through a request under section 446(e) to change the taxpayer's method of accounting).

(k) *Effective date*—(1) *In general.* (i) This section applies to a like-kind exchange or an involuntary conversion of MACRS property for which the time of disposition and the time of replacement both occur after February 27, 2004.

(ii) The applicability of this section expires on or before February 26, 2007.

(2) *Application to pre-effective date like-kind exchanges and involuntary conversions.* For a like-kind exchange or an involuntary conversion of MACRS property for which the time of disposition, the time of replacement, or both occur on or before February 27, 2004, a taxpayer may:

(i) Apply the provisions of this section. If a taxpayer's applicable federal income tax return has been filed on or before February 27, 2004, and the taxpayer has treated the replacement MACRS property as acquired, and the relinquished MACRS property as disposed of, in a like-kind exchange or an involuntary conversion, the taxpayer changes its method of accounting for depreciation of the replacement MACRS property and relinquished MACRS property in accordance with this paragraph (k)(2)(i) by following the applicable administrative procedures issued under § 1.446-1T(e)(3)(ii) for obtaining the Commissioner's automatic consent to a change in method of accounting (for further guidance, see Rev. Proc. 2002-9 (2002-1 C.B. 327) and § 601.601(d)(2)(ii)(b) of this chapter); or

(ii) Rely on prior guidance issued by the Internal Revenue Service for determining the depreciation deductions of replacement MACRS property and relinquished MACRS property (for further guidance, for example, see Notice 2000-4 (2001-1 C.B. 313) and § 601.601(d)(2)(ii)(b) of this chapter). In relying on such guidance, a taxpayer may use any reasonable, consistent method of determining depreciation in the year of disposition and the year of replacement. If a taxpayer's applicable federal income tax return has been

filed on or before February 27, 2004, and the taxpayer has treated the replacement MACRS property as acquired, and the relinquished MACRS property as disposed of, in a like-kind exchange or an involuntary conversion, the taxpayer changes its method of accounting for depreciation of the replacement MACRS property and relinquished MACRS property in accordance with this paragraph (k)(2)(ii) by following the applicable administrative procedures issued under § 1.446-1T(e)(3)(ii) for obtaining the Commissioner's automatic consent to a change in method of accounting (for further guidance, see Rev. Proc. 2002-9 (2002-1 C.B. 327) and § 601.601(d)(2)(ii)(b) of this chapter).

[T.D. 9115, 69 FR 9537, Mar. 1, 2004; 69 FR 17586, Apr. 5, 2004]

**§ 1.168(j)-1T Questions and answers concerning tax-exempt entity leasing rules (temporary).**

The following questions and answers concern tax-exempt entity leasing under section 168(j) of the Internal Revenue Code of 1954, as enacted by section 31 of the Tax Reform Act of 1984 ("TRA") (Pub. L. 98-369):

CONSEQUENCES OF TAX-EXEMPT USE STATUS

**Q-1.** If recovery property is subject to the tax-exempt entity leasing provisions of section 168(j), how must the taxpayer compute the property's recovery deductions?

**A-1.** The taxpayer must compute the property's recovery deductions in accordance with section 168(j) (1) and (2); that is, the taxpayer must use the straight line method and the specified recovery period. For property other than 18-year real property, the applicable recovery percentages for the specified recovery period are to be determined with reference to the tables contained in Prop. Treas. Reg. § 1.168-2(g)(3)(iv)(A). For 18-year real property for which a 40-year recovery period is required, the applicable recovery percentages are to be determined under the following table:

40-YEAR STRAIGHT LINE METHOD (ASSUMING MID-MONTH CONVENTION)

If the recovery year is—	And the month in the first recovery year the property is placed in service is—											
	1	2	3	4	5	6	7	8	9	10	11	12
	The applicable recovery percentage is—

Q-2. If recovery property that was placed in service after December 31, 1980 by a taxable entity subsequently becomes tax-exempt use property, how are such property's cost recovery deductions under section 168 affected?

A-2. A change to tax-exempt use property, as defined in section 168(j)(3), will cause the cost recovery deductions under the accelerated cost recovery system (ACRS) to be recomputed. The allowable recovery deduction for the taxable year in which the change occurs (and for subsequent taxable years) must be determined as if the property had originally been tax-exempt use property. Proper adjustment must be made under the principles of Prop.

Treas. Reg. §1.168-2(j)(3)(i)(B) to account for the difference between the deductions allowable with respect to the property prior to the year of change and those which would have been allowable had the taxpayer used the recovery period and method for tax-exempt use property under section 168(j) (1) and (2). However, no adjustment is made pursuant to the provisions of this A-2 if section 168(j)(2)(C) applies, that is, if the taxpayer had selected a longer recovery period in the year the property was placed in service than the recovery period prescribed for such property under section 168(j)(1).

*Example (1).* On July 1, 1983, X, a calendar year taxpayer, places in service 5-year recovery property with an unadjusted basis of \$100. For 1983, X's allowable deduction is \$15 (i.e., .15 × \$100). In 1984, the property becomes tax-exempt use property. Under section 168(j), assume the prescribed recovery period is 12 years. For 1984 (and subsequent taxable years), X's allowable deduction is determined as if the property had been tax-exempt use property since 1983, that is, the year it was placed in service. Thus, taxable year 1984 is the property's second recovery year of its 12-year recovery period. Additionally, X must account for the excess allowable recovery deduction of \$11 (i.e., the difference between the recovery allowance for 1983 (\$15) and the allowance for that year had the property been tax-exempt use property (\$4)) in accordance with the principles of Prop. Treas. Reg. § 1.168-2(j)(3)(i)(B). Thus, the recovery allowances in 1984 and 1985 are \$7.97, determined as follows:

Unadjusted basis multiplied by the applicable recovery percentage for second recovery year (\$100×.09) .....	\$9.00
Excess allowable recovery deduction multiplied by the applicable recovery percentage for second recovery year divided by the sum of the remaining unused applicable percentages for tax-exempt use property existing as of the taxable year of change (1984) ((\$11×.09)/.96) .....	-1.03
Difference—allowable deduction for 1984 .....	<u>\$7.97</u>
Unadjusted basis multiplied by the applicable recovery percentage for third recovery year (\$100×.09) .....	\$9.00
Excess allowable recovery deduction multiplied by the applicable recovery percentage for third recovery year divided by the sum of the remaining unused applicable percentages for tax-exempt use property existing as of the taxable year of change (1984) ((\$11×.09)/.96) .....	-1.03
Difference—allowable deduction for 1985 .....	<u>\$7.97</u>

Additionally, X must make a similar adjustment for the taxable years 1986 through 1995, that is, his fourth through thirteenth recovery years.

*Example (2).* Assume the same facts as in *Example (1)* except that in 1983, X elected under section 168 (b) (3) with respect to the 5-year property to use the optional recovery percentages over a 25-year recovery period. Based on these facts, the provisions of this A-2 do not apply.

DEFINITION OF TAX-EXEMPT USE PROPERTY

*Mixed Leases of Real and Personal Property*

Q-3. How is a mixed lease of real property and personal property (e.g., a building with furniture) to be treated for purposes of applying the rules of section 168(j)(3) defining which prop-

erty constitutes tax-exempt use property?

A-3. The general rule is that 18-year real property and property other than 18-year real property are tested separately to determine whether each constitutes tax-exempt use property. However, if a lease of section 1245 class property is incidental to a lease of 18-year real property, and the 18-year real property is not tax-exempt use property, then the section 1245 class property also does not constitute tax-exempt use property. A lease of section 1245 class property will be considered incidental if the adjusted basis of all section 1245 class property leased in the same transaction is 1 percent or less of the adjusted basis of all 18-year real property leased in such transaction.

*Buildings Which Are Partially Tax-Exempt Use Property*

Q-4. If part of a building is leased to a tax-exempt entity in a disqualified lease and part of the building is leased other than to a tax-exempt entity in a disqualified lease, to what extent do the tax-exempt entity leasing rules apply to such building?

A-4. The taxpayer must determine the amount of the building's unadjusted basis that is properly allocable to the portion of the building that is tax-exempt use property; the section 168(j) rules apply to the allocated amount. Solely for purposes of determining what percentage of the building's basis is subject to the tax-exempt entity leasing rules, no part of the basis is allocated to common areas.

*Example.* A constructs a 3-story building in 1984 at a cost of \$900,000. Each floor consists of 30,000 square feet. The only common area (10,000 square feet) in the building is on the first floor. A leases the first floor (other than the common areas) to a firm that is not a tax-exempt entity. A leases the top two floors to a tax-exempt entity in a 25-year lease. The top two floors constitute tax-exempt use property. Assume that square footage is the appropriate method for allocating basis in this case. Thus, A must allocate \$675,000 of the \$900,000 basis to the tax-exempt use portion, determined as follows:

$$\frac{\text{square footage of building which is tax-exempt use property (excluding common areas)}}{\text{total square footage in the building (excluding common areas)}} = \frac{60,000 \text{ sq. feet}}{80,000 \text{ sq. feet}} = 3/4$$

$$3/4 \times \$900,000 = \$675,000$$

A must compute his recovery deductions on this portion of the basis (\$675,000) in accordance with the rules of section 168(j) (1) and (2).

*Requirement of a Lease*

Q-5. Can the use of property by a party other than a tax-exempt entity result in the property being treated as tax-exempt use property within the meaning of section 168(j)(3)?

A-5. Yes, if based on all the facts and circumstances it is more appropriate to characterize the transaction as a lease to a tax-exempt entity. A transaction can be characterized as a lease to a tax-exempt entity under section 168(j)(6)(A), which provides that “the term ‘lease’ includes any grant of a right to use property”; or under the service contract rules of section 7701(e). See Q&A #18 for rules regarding service contracts.

*Example.* A trust is executed on January 1, 1984, to create a pooled income fund (P) that meets the requirements of section 642(c)(5). A university (U) that is tax-exempt under section 501(c)(3) is the remainderman of the pooled income fund. P’s purpose is to construct and operate an athletic center on land adjacent to U’s campus. Construction of the athletic center, which has a 50-year useful life, was completed and the center was placed in service on February 1, 1985. The athletic center is managed for a fee by M, an unrelated taxable organization which operates athletic facilities open to the public. Office space at the facility is occupied rent-free by both the U athletic department and M. Scheduling of activities at the center is handled jointly by members of U’s athletic department and M. General operating expenses of the athletic center are paid by P. Although the athletic center is open to the public for a membership fee, the majority of members are U’s students who pay membership fees as part of their tuition. These fees are remitted by U to P. This arrangement is in substance a grant to U of a right to use the facility, and therefore a lease to U under section 168(j)(6)(A). U, as remainderman, will have obtained title to the entire building when the last pooled income fund donor dies.

This arrangement is a disqualified lease because either (1) U has the equivalent of a fixed price purchase option under section 168(j)(3)(B)(ii)(II) (if U receives title as remainderman before the end of the useful life of the building), or (2) the lease has a term in excess of 20 years under section 168(j)(3)(B)(ii)(III) (if U does not receive title as remainderman until 20 years have elapsed), or both. Therefore, the allowable recovery deductions (without regard to salvage value) must be computed in accordance with section 168(j) (1) and (2). In addition, because this arrangement is treated as a lease under section 168(j), the facility is used by U for purposes of section 48(a)(4), and thus no investment tax credit is permitted with respect to any portion of the facility. This arrangement also may be treated as a lease to U for all purposes of chapter 1 of the Internal Revenue Code under section 7701 (e).

*“More Than 35 Percent of the Property” Test*

Q-6. How is the percentage of 18-year real property leased to a tax-exempt entity in a disqualified lease to be determined for purposes of the “more than 35 percent of the property” test of section 168(j)(3)(B)(iii)?

A-6. The phrase “more than 35 percent of the property” means more than 35 percent of the net rentable floor space of the property. The net rentable floor space in a building does not include the common areas of the building, regardless of the terms of the lease. For purposes of the “more than 35 percent of the property” rule, two or more buildings will be treated as separate properties unless they are part of the same project, in which case they will be treated as one property. Two or more buildings will be treated as part of the same project if the buildings are constructed, under a common plan, within a reasonable time of each other on the same site and will be used in an integrated manner.

Q-7. Are disqualified leases to different tax-exempt entities (regardless of whether they are related) aggregated

in determining whether 18-year real property is tax-exempt use property?

A-7. Yes.

*Example.* A tax-exempt entity participates in industrial development bond financing for the acquisition of a new building by a taxable entity. The tax-exempt entity leases 60 percent of the net rentable floor space in the building for 5 years. Sixty percent of the building is tax-exempt use property. If the same tax-exempt entity leased only 19 percent of the net rentable floor space in the building for 5 years, no portion of the building would be tax-exempt use property because not more than 35 percent of the property is leased to a tax-exempt entity pursuant to a disqualified lease. If such tax-exempt entity leased only 19 percent of the net rentable floor space in the building for 5 years and another tax-exempt entity leased 20 percent of the net rentable floor space in the building for a term in excess of 20 years (or a related entity leased 20 percent of the building for 5 years), 39 percent of the building would be tax-exempt use property. See A-4 regarding the determination of the amount of the building's unadjusted basis that is properly allocable to the portion of the building that is tax-exempt use property.

*“Predominantly Used” Test*

Q-8. What does the term “predominantly used” mean for purposes of the section 168(j)(3)(D) exception to the tax-exempt use property rules?

A-8. “Predominantly used” means that for more than 50 percent of the time used, as determined for each taxable year, the real or personal property is used in an unrelated trade or business the income of which is subject to tax under section 511 (determined without regard to the debt-financed income rules of section 514). If only a portion of property is predominantly used in an unrelated trade or business, the remainder may nevertheless be tax-exempt use property.

Q-9. How is the “predominantly used” test of section 168(j)(3)(D) to be applied to a building?

A-9. The “predominantly used” test is to be applied to a building in the following manner:

(i) Identify the discrete portions (excluding common areas) of the building which are leased to a tax-exempt entity in a disqualified lease under section 168(j)(3)(B)(ii). A discrete portion of a building is an area physically separated from other areas. An area is

physically separated from other areas if separated by permanent walls or by partitions serving as room dividers if such partitions remain in place throughout the taxable year. A discrete portion can be the entire building, floors, wings, offices, rooms, or a combination thereof. For example, a building whose entire internal space consists of a single large room used as a gymnasium has only one discrete portion. On the other hand, if the building has 3 stories with 10 offices on each floor, each of the 30 offices is a discrete portion.

(ii) Determine whether each discrete portion is predominantly used in an unrelated trade or business subject to tax under section 511. See A-8 for the rules regarding how to make this determination.

(iii) Once the discrete portions of the building that constitute tax-exempt use property have been identified, an appropriate allocation of basis must be made to such discrete portions. See A-4 for rules regarding how to make such allocation.

(iv) The application of these rules is illustrated by the following example:

*Example.* A building, constructed in 1985, is leased in its entirety to a tax-exempt entity (E) pursuant to a 25-year lease. The building has 25,000 square feet of net rentable floor space and consists of an auditorium (15,000 square feet), a retail shop (10,000 square feet), plus common area of 5,000 square feet. E uses the auditorium 80 percent of the time in its exempt activity and 20 percent of the time in an unrelated trade or business subject to tax under section 511. The retail shop is used 90 percent of the time in an unrelated trade or business subject to tax under section 511 and 10 percent of the time in an exempt activity. Thus, the auditorium is tax-exempt use property; the retail shop is not. An appropriate allocation of basis to the auditorium must be made. See A-4.

DEFINITION OF TAX-EXEMPT ENTITY

Q-10. What elections must be made in order to avoid the “5-year lookback” rule of section 168(j)(4)(E)(i)?

A-10. Only organizations which were exempt from tax under section 501(a) as organizations described in section 501(c)(12) (and which are no longer tax-exempt) may avoid the 5-year lookback rule of section 168(j)(4)(E)(i). In order to avoid the 5-year lookback rule with

respect to any property, two elections are required. First, the organization must elect not to be exempt from tax under section 501(a) during the tax-exempt use period (as defined in section 168(j)(4)(E)(ii)(II)) with respect to the property. Second, the organization must elect to be taxed on the exempt arbitrage profits as provided in section 31(g)(16) of the Tax Reform Act of 1984. See Temp. Treas. Reg. §301.9100-6T(a) for the time and manner of making these elections. These elections, once made, are irrevocable.

Q-11. Does the term "tax-exempt entity" include tax-exempt plans of deferred compensation and similar arrangements?

A-11. Yes. For purposes of section 168(j), the term "tax-exempt entity" includes trusts or other entities that are tax-qualified under section 401(a), individual retirement accounts, simplified employee pensions, and other tax-exempt arrangements described in subchapter D of chapter 1 of the Internal Revenue Code.

SPECIAL RULES FOR HIGH TECHNOLOGY EQUIPMENT

Q-12. What effect do the tax-exempt entity leasing provisions have on "qualified technological equipment"?

A-12. "Qualified technological equipment" which is leased to a tax-exempt entity for a term of 5 years or less shall not constitute tax-exempt use property. If "qualified technological equipment" which is leased to a tax-exempt entity for a term of more than 5 years constitutes tax-exempt use property (as defined in section 168(j)(3)) and is not used predominantly outside the United States, the rules of section 168(j)(1) and (2) apply except that the recovery period to be used for such equipment shall be 5 years regardless of the length of the lease term. For purposes of section 168(j)(5), "qualified technological equipment" means (1) any computer or peripheral equipment, (2) any high technology telephone station equipment installed on the customer's premises, and (3) any high technology medical equipment. For definitions of these terms, see A-13 through A-16.

Q-13. What is a "computer" as that term is used in section 168(j)(5)(C)(i)(I)?

A-13. Computers are electronically activated devices that are programmable by the user and that are capable of accepting information, applying prescribed processes to it, and supplying the results of those processes with or without human intervention. Computers consist of a central processing unit containing extensive storage, logic, arithmetic, and control capabilities. A computer does not include any equipment which is an integral part of property that is not a user-programmable device, any video games or other devices used by the user primarily for amusement or entertainment purposes, or any typewriters, calculators, adding or accounting machines, copiers, duplicating equipment, or similar equipment. A computer does not include any equipment that is not tangible personal property.

Q-14. What is "peripheral equipment" as that term is used in section 168(j)(5)(C)(i)(I)?

A-14. Peripheral equipment means tangible personal property such as auxiliary machines, whether on-line or off-line, that are designed to be placed under the control of the central processing unit of the computer. Some examples of peripheral equipment are: card readers, card punches, magnetic tape feeds, high speed printers, optical character readers, tape cassettes, mass storage units, paper tape equipment, keypunches, data entry devices, teleprinters, terminals, tape drives, disc drives, disc files, disc packs, visual image projector tubes, card sorters, plotters, and collators. Peripheral equipment does not include equipment not included in Asset Depreciation Range (ADR) 00.12 listed in section 3 of Rev. Proc. 83-35, 1983-1 C.B. 745, 746. Peripheral equipment also does not include any equipment that is an integral part of property that is not a user-programmable device, any video games or other devices used by the user primarily for amusement or entertainment purposes, or any typewriters, calculators, adding or accounting machines, copiers, duplicating equipment, or similar equipment.

Q-15. What does "high technology telephone station equipment" mean as that term is used in section 168(j)(5)(C)(i)(II)?

A-15. High technology telephone station equipment includes only tangible personal property described in asset depreciation range (ADR) class 48.13 listed in section 3 of Rev. Proc. 83-35, 1983-1 C.B. 745, 758 that has a high technology content and which, because of such high technology content, can reasonably be expected to become obsolete before the expiration of its physical useful life. For example, telephone booths and telephones which include only a standard dialing feature are not high technology equipment. However, telephones with features such as an abbreviated dialing short program, an automatic callback, or conference call feature may qualify as high technology equipment. High technology telephone station equipment may include terminal equipment including such extra features but not terminal equipment used in conjunction with features offered through central office capacity. There are no current plans to utilize the regulatory authority provided in section 168(j)(5)(C)(iv).

Q-16. What is "high technology medical equipment" as that term is used in section 168 (j)(5)(C)(i)(III)?

A-16. High technology medical equipment is any electronic, electromechanical, or computer-based high technology equipment which is tangible personal property used in the screening, monitoring, observation, diagnosis, or treatment of human patients in a laboratory, medical, or hospital environment. High technology medical equipment includes only equipment that has a high technology content and which, because of such high technology content, can reasonably be expected to become obsolete before the expiration of its physical useful life. High technology medical equipment may include computer axial tomography (C.A.T.) scanners, nuclear magnetic resonance equipment, clinical chemistry analyzers, drug monitors, diagnostic ultrasound scanners, nuclear cameras, radiographic and fluoroscopic systems, Holter monitors, and bedside monitors. Incidental use of any such equipment for other purposes, such as research, will not prevent it from qualifying as high technology medical equipment. There are no current plans to utilize the regulatory au-

thority provided in section 168(j)(5)(C)(iv).

## LEASE TERM

Q-17. What is included in determining the length of a lease term?

A-17. (i) The lease term starts when the property is first made available to the lessee under the lease. The lease term includes not only the stated duration, but also any additional period of time which is within the "realistic contemplation of the parties at the time the property is first put into service. *Hokanson v. Commissioner*, 730 F.2d 1245, 1248 (9th Cir. 1984). A subsequent period of time is included in the term of the original lease if the circumstances indicate that the parties, upon entering into the original lease, had informally agreed that there would be an extension of the original lease.

(ii) With respect to personal property, the lease term includes all periods for which the tax-exempt lessee or a related party (as defined under section 168(j)(7)) has a legally enforceable option to renew the lease, or the lessor has a legally enforceable option to compel its renewal by the tax-exempt entity or a related party. This is true regardless of the renewal terms of the lease agreement or whether the lease is in fact renewed.

(iii) With respect to real property, the lease term includes all periods for which the tax-exempt lessee or a related party (as defined under section 168(j)(7)) has a legally enforceable option to renew the lease, or the lessor has a legally enforceable option to compel its renewal by the tax-exempt entity or a related party, unless the option to renew is at fair market value, determined at the time of renewal. The *Hokanson* facts and circumstances test (see (i) above) may cause the term of a fair market value renewal option to be treated as part of the original lease term.

(iv) Successive leases that are part of the same transaction or a series of related transactions concerning the same or substantially similar property shall be treated as one lease. This rule applies if at substantially the same time or as part of one arrangement the parties enter into multiple leases covering

the same or substantially similar property, each having a different term. If so, then the original lease term will be treated as running through the term of the lease that has the last expiration date of the multiple leases. The multiple lease rule will not apply merely because the parties enter into a new lease at fair market rental value at the end of the original lease term.

(v) The application of the above rules is illustrated by the following examples:

*Example (1).* On December 30, 1984, X, a taxable corporation, and Y, a tax-exempt entity, enter into a requirements contract for a period of 3 years. The requirements contract sets the terms and conditions under which X and Y will do business on those occasions when X actually leases items of personal property to Y. The requirements contract imposes no obligation on either party to actually enter into a lease agreement. Pursuant to this requirements contract, on January 1, 1985, X and Y enter into three separate leases. Under the leases, Y obtained the use of three identical items of personal property, each for a term of six months beginning on January 1, 1985. On March 1, 1985, Y entered into a fourth lease for the use of a fourth item of personal property substantially similar to the other three items for a term of 20 months beginning on that date. The mere fact that all 4 leases were entered into pursuant to the same requirements contract and involved the same or substantially similar property does not require aggregation of the terms of such leases under section 168(j)(6)(B).

*Example (2).* Assume the same facts as in *example (1)* except that, instead of the 4 leases entered into in *example (1)*, on January 1, 1985, pursuant to the requirements contract, X and Y enter into a lease for an item of personal property for one year. On January 10, 1986, after the end of the one-year lease term, X and Y enter into a second lease with respect to the same or substantially similar equipment. Assuming that the requirements contract itself is not a lease and assuming that the parties did not have any informal or implicit understanding (other than the general expectation of doing some business in the future) to enter into the second lease when the first lease was entered into, these two leases are not aggregated. The mere fact that the parties entered into two leases under the requirements contract does not result in the application of the section 168(j)(6)(B) rules for successive leases.

*Example (3).* The facts are the same as in *example (2)* except that the parties did have an understanding, informal or otherwise, at

the time of the first lease that they would enter into a second lease of the same personal property. The terms of the leases are aggregated.

*Example (4).* The facts are the same as in *example (2)* except that, instead of the leases entered into in *example (2)*, on January 1, 1985, X and Y enter into two separate leases, each for a term of one year. One lease is for the period beginning on January 1, 1985 and ending on December 31, 1985. The other lease is for the period beginning on January 1, 1986 and ending on December 31, 1986. Both leases involve the same or substantially similar personal property. Under the successive lease rule, the terms of both leases are aggregated for purposes of determining the term of either lease under section 168(j)(6)(B). This result occurs because the two leases were entered into as part of the same transaction, and they relate to the same or substantially similar personal property.

SERVICE CONTRACT ISSUES

Q-18. How is the treatment of service contracts affected by the service contract rules set forth in section 7701(e)?

A-18. If a contract which purports to be a service contract is treated as a lease under section 7701(e), such contract is to be treated as a lease for all purposes of Chapter 1 of the Internal Revenue Code (including, for example, section 168(j) and section 48(a) (4) and (5)).

Q-19. Does a contract to provide heating, maintenance, etc. services in low-income housing come within the low-income housing exception in section 7701(e)(5) to the service contract rules set forth in section 7701(e)?

A-19. No. Although certain low-income housing operated by or for an organization described in paragraphs (3) or (4) of section 501(c) is not subject to the service contract rules in section 7701(e), a contract, for instance, to provide heating services to low-income housing units, such as by installing and operating a furnace, does not constitute "low-income housing" within the meaning of section 7701(e)(5). Thus, the rules of section 7701(e) apply to such contracts in determining whether they are properly treated as leases.

PARTNERSHIP ISSUES

Q-20. Do the provisions applicable to property leased to partnerships, set forth in section 168(j)(8), and the provisions applicable to property owned by

partnerships, set forth in section 168(j)(9), apply to pass-through entities other than partnerships?

A-20. Yes. Rules similar to those provided in paragraphs (8), (9)(A), (9)(B), and (9)(C) of section 168(j) and those provided in Q & A's 21-26 apply to pass-through entities other than partnerships.

Q-21. What rules apply to property owned by a partnership in which one or more partners is a tax-exempt entity?

A-21. If property is owned by a partnership having both taxable and tax-exempt entities as partners, and any allocation to a tax-exempt entity partner is not a "qualified allocation" under section 168(j)(9)(B), then such entity's proportionate share of the property is to be treated as tax-exempt use property for all purposes. However, the property will not be tax-exempt use property if it is predominantly used by the partnership in an activity which, with respect to the tax-exempt entity, is an unrelated trade or business. An activity is an unrelated trade or business with respect to a tax-exempt entity if such entity's distributive share of the partnership's gross income from the activity is includible in computing its unrelated business taxable income under section 512(c) (determined without regard to the debt-financed income rules of section 514). A tax-exempt entity partner's proportionate share of property of a partnership equals such partner's share of that item of the partnership's income or gain (excluding income or gain allocated under section 704(c)) in which the tax-exempt entity has the highest share. If the tax-exempt entity partner's share of any item of income or gain (excluding income or gain allocated under section 704(c)) may vary during the period it is a partner, the previous sentence shall be applied with reference to the highest share of any such item that it may receive at any time during such period. The application of these rules is illustrated by the following example:

*Example.* A partnership (P) operates a factory, which consists of a building and various items of machinery. P has one tax-exempt entity (E) as a partner, and E's proportionate share is 10 percent (*i.e.*, 10 percent is the largest share of any item of income or gain that E may receive during the time E is a partner). Unless P's allocations to E are

qualified under section 168(j)(9)(B), 10 percent of each item of partnership property (including the building) is tax-exempt use property, notwithstanding the 35 percent threshold test of section 168(j)(3)(B)(iii) that is otherwise applicable to 18-year real property. However, the property will not be tax-exempt use property if it is predominantly used by the partnership in an activity which, with respect to E, is an unrelated trade or business (determined without regard to the debt-financed income rules of section 514).

Q-22. What constitutes a "qualified allocation" under section 168(j)(9)(B)?

A-22. (i) A "qualified allocation" means any allocation to a tax-exempt entity which is consistent with such entity's being allocated the same share (*i.e.*, the identical percentage) of each and every item of partnership income, gain, loss, deduction, credit, and basis during the entire period such entity is a partner. Except as provided in A-23, an allocation is not qualified if it does not have substantial economic effect under section 704(b). However, for purposes of the two preceding sentences, items allocated under section 704(c) (relating to contributed property) are not taken into account. An allocation is not a "qualified allocation" under section 168(j)(9)(B) if the partnership agreement provides for, or the partners have otherwise formally or informally agreed to, any change (regardless of whether such change is contingent upon the happening of one or more events) in the tax-exempt entity's distributive share of income, gain, loss, deduction, credit, or basis at any time during the entire period the tax-exempt entity is a partner.

(ii) A change in a tax-exempt entity's distributive share of income, gain, loss, deduction, credit, or basis which occurs as a result of a sale or redemption of a partnership interest (or portion thereof) or a contribution of cash or property to the partnership shall be disregarded in determining whether the partnership allocations are qualified, provided that such transaction is based on fair market value at the time of the transaction and that the allocations are qualified after the change. For this purpose, the consideration determined by the parties dealing at arm's length and with adverse interests normally will be deemed to satisfy the fair market value requirement. In addition, a

change in a tax-exempt entity's distributive share which occurs as a result of a partner's default (other than a pre-arranged default) under the terms of the partnership agreement will be disregarded, provided that the allocations are qualified after the change, and that the change does not have the effect of avoiding the restrictions of section 168(j)(9). Any of the above-described transactions between existing partners (and parties related to them) will be closely scrutinized.

*Example (1).* A, a taxable entity, and B, a tax-exempt entity, form a partnership in 1985. A contributes \$800,000 to the partnership; B contributes \$200,000. The partnership agreement allocates 95 percent of each item of income, gain, loss, deduction, credit, and basis to A; B's share of each of these items is 5 percent. Liquidation proceeds are, throughout the term of the partnership, to be distributed in accordance with the partner's capital account balances, and any partner with a deficit in his capital account following the distribution of liquidation proceeds is required to restore the amount of such deficit to the partnership. Assuming that these allocations have substantial economic effect within the meaning of section 704(b)(2), they are qualified because B's distributive share of each item of income, gain, loss, deduction, credit, and basis will remain the same during the entire period that B is a partner. The fact that the liquidation proceeds may be distributed in a ratio other than 95 percent/5 percent does not cause the allocations not to be qualified.

*Example (2).* A, B, and E are members of a partnership formed on July 1, 1984. On that date the partnership places in service a building and section 1245 class property. A and B are taxable entities; E is a tax-exempt entity. The partnership agreement provides that during the first 5 years of the partnership, A and B are each allocated 40 percent of each item of income, gain, loss, deduction, credit, and basis; E is allocated 20 percent. Thereafter, A, B, and E are each allocated 33⅓ percent of each item of income, gain, loss, deduction, credit, and basis. Assume that these allocations meet the substantial economic effect test of section 704(b)(2) and E's distributive share of the partnership's income is not unrelated trade or business income subject to tax under section 511. The allocations to E are not qualified allocations under section 168(j)(9)(B) because E's distributive share of partnership items does not remain the same during the entire period that E is a partner in the partnership. Thus, 33⅓ percent of the building and 33⅓ percent of the section 1245 class property are tax-exempt use property from the time each is

placed in service by the partnership and are thus subject to the cost recovery rules of section 168(j) (1) and (2). In addition, no investment tax credit is allowed for 33⅓ percent of the section 1245 class property because of section 48(a)(4).

**Q-23.** In determining whether allocations constitute qualified allocations, what rules are applied to test allocations that are not governed by the substantial economic effect rules?

**A-23.** A-22 provides the general rules to be used in determining whether an allocation is a qualified allocation, including the rule that the allocation must have substantial economic effect. However, certain allocations are not governed by the substantial economic effect rules (e.g., an allocation of basis of an oil and gas property is generally governed by section 613A(c)(7)(D), rather than section 704(b)), and other allocations cannot satisfy the substantial economic effect rules (e.g., allocations of credits, allocations of deduction and loss attributable to nonrecourse debt, and allocations of percentage depletion in excess of basis). Since allocations in either of these categories cannot be tested under the substantial economic effect test, these allocations, in order to be qualified, must comply with the relevant Code or regulation section that governs the particular allocation (e.g., in the case of an allocation of basis of an oil and gas property, section 613A(c)(7)(D)).

**Q-24.** Will the Internal Revenue Service issue letter rulings on the issue of whether an allocation is a "qualified allocation" for purposes of section 168(j)(9)?

**A-24.** The Internal Revenue Service will accept requests for rulings on the question of whether an allocation is a "qualified allocation" for purposes of section 168(j)(9). Such requests should be submitted in accordance with the appropriate revenue procedure. One requirement of a qualified allocation is that such allocation must have substantial economic effect under section 704(b)(2). Currently, the Service will not rule on the question of whether an allocation has substantial economic effect under section 704(b)(2). Therefore, unless and until this policy is changed, a ruling request regarding a qualified

allocation must contain a representation that the subject allocation has substantial economic effect (or complies with A-23, if applicable).

Q-25. Do priority cash distributions which constitute guaranteed payments under section 707(c) disqualify an otherwise qualified allocation?

A-25. Priority cash distributions to partners which constitute guaranteed payments will not disqualify an otherwise qualified allocation if the priority cash distributions are reasonable in amount (e.g., equal to the Federal short-term rate described in section 1274(d)) and are made in equal priorities to all partners in proportion to their capital in the partnership. Other guaranteed payments will be closely scrutinized and, in appropriate cases, will disqualify an otherwise qualified allocation.

*Example.* A and B form Partnership AB to operate a manufacturing business. A is a tax-exempt entity; B is a taxable person. A contributes \$500,000 to the partnership; B contributes \$100,000. The partnership agreement provides that A and B are each entitled to cash distributions each year, in equal priority, in an amount equal to 8 percent of their capital contribution. Assume that these payments are reasonable in amount and constitute guaranteed payments under section 707(c). Without taking into consideration the guaranteed payments, all allocations constitute qualified allocations under section 168(j)(9)(B) and A-22. These guaranteed payments will not disqualify such allocations.

Q-26. Can property be treated as tax-exempt use property under both the general rule of section 168(j)(3) and the partnership provisions of section 168(j)(9)?

A-26. Yes. For example, a tax-exempt entity may be a partner in a partnership that owns a building 60 percent of which is tax-exempt use property because it is leased to an unrelated tax-exempt entity under a 25-year lease. The status of the remaining 40 percent depends on whether or not allocations under the partnership agreement are qualified under section 168(j)(9). If the allocations are not qualified under section 168(j)(9), the tax-exempt entity's proportionate share (as determined under section 168(j)(9)(C)) of the remaining 40 percent will be tax-exempt use property. For example, if the tax-

exempt entity's proportionate share is 30 percent, then 12 percent of the remaining 40 percent (*i.e.*, .30 times .40) is tax-exempt use property and a total of 72 percent of the property (60 percent + 12 percent) is tax-exempt use property.

#### EFFECTIVE DATE QUESTIONS

Q-27. Does an amendment to a lease (or sublease) to a tax-exempt entity of property which, pursuant to the effective date provisions of section 31(g) of TRA, is not subject to section 168(j) cause such property to be subject to the provisions of section 168(j)?

A-27. An amendment to such a lease (or sublease) does not cause such property to be subject to the provisions of section 168(j) unless the amendment increases the term of the lease (or sublease). However, if the amendment increases the amount of property subject to the lease, the additional property must be tested independently under the effective date provisions of section 31(g) of TRA. See A-31 for special rules regarding improvements to property.

*Example.* On May 1, 1983, X, a taxable entity, and E, a tax-exempt entity, enter into a lease whereby X will lease to E the top 4 floors of a ten-story building for a lease term of 25 years. In 1985, the lease is amended to provide that E will lease an additional floor for the balance of the lease term. At that time the annual rent due under the lease is increased. Pursuant to the provisions of section 31(g)(2)(A) of TRA, section 168(j) does not apply to the lease to E of the top 4 floors of the building. Assuming that no other provision of section 31(g) of TRA provides otherwise, the floor added to the lease in 1985 is subject to the provisions of section 168(j).

Q-28. If property which is not subject to section 168(j) by virtue of the effective date provisions of section 31(g) of TRA is sold, subject to the lease to the tax-exempt entity, what are the consequences?

A-28. Property to which section 168(j) does not apply by virtue of the effective date provisions set forth in section 31(g) (2), (3), and (4) of TRA will not become subject to section 168(j) merely by reason of a transfer of the property subject to the lease by the lessor (or a transfer of the contract to acquire, construct, reconstruct, or rehabilitate the property), so long as the lessee (or party obligated to lease) does not

change. For purposes of the preceding sentence, the term “transfer” includes the sale-leaseback by a taxable lessor of its interest in the property, subject to the underlying lease to the tax-exempt entity. However, if property is transferred to a partnership or other pass-through entity after the effective date of section 168(j)(9) (see section 31(g) of TRA), such property is subject to the provisions of section 168(j)(9).

Q-29. Can property which was leased to a tax-exempt entity after May 23, 1983 and acquired by a partnership before October 22, 1983 be tax-exempt use property?

A-29. Yes. Because the property was leased to a tax-exempt entity after May 23, 1983, it may be tax-exempt use property under section 168(j)(3) and section 31(g)(1) of TRA. However, if the partnership included a tax-exempt entity as a partner, section 168(j)(9) would be inapplicable under section 31(g)(3)(B) of TRA because the partnership acquired the property before October 22, 1983.

Q-30. What is a binding contract for purposes of the transitional rules in section 31(g) of TRA?

A-30. (i) A contract is binding only if it is enforceable under State law against the taxpayer or a predecessor and does not limit damages to a specified amount, as for example, by a liquidated damages provision. A contract that limits damages to an amount equal to at least 5 percent of the total contract price will not be treated as limiting damages for this purpose. In determining whether a contract limits damages, the fact that there may be little or no damages because the contract price does not significantly differ from fair market value will not be taken into account. For example, if a taxpayer entered into an irrevocable contract to purchase an asset for \$100 and the contract contained no provision for liquidated damages, the contract is considered binding notwithstanding the fact that the property had a fair market value of \$99 and under local law the seller would only recover the difference in the event the purchaser failed to perform. If the contract provided for a refund of the purchase price in lieu of any damages allowable by law in the event of breach

or cancellation, the contract is not considered binding.

(ii) A contract is binding even if subject to a condition, so long as the condition is not within the control of either party or a predecessor in interest. A contract will not be treated as ceasing to be binding merely because the parties make insubstantial changes in its terms or because any term is to be determined by a standard beyond the control of either party. A contract which imposes significant obligations on the taxpayer (or a predecessor) will be treated as binding notwithstanding the fact that insubstantial terms remain to be negotiated by the parties to the contract.

(iii) A binding contract to acquire a component part of a larger piece of property will not be treated as a binding contract to acquire the larger piece of property. For example, if a tax-exempt entity entered into a binding contract on May 1, 1983 to acquire a new aircraft engine, there would be a binding contract to acquire only the engine, not the entire aircraft.

Q-31. If an improvement is made to a property that is “grandfathered” (*i.e.*, property that is not subject to section 168(j) because of the effective date provisions of section 31(g) of TRA), to what extent will such improvement be grandfathered?

A-31. Section 31(g)(20)(B) provides that a “substantial improvement” to property is treated as a separate property for purposes of the effective date provisions of section 31(g) of TRA. As a result, a “substantial improvement” will not be grandfathered unless such “substantial improvement” is grandfathered under a provision other than section 31(g)(20)(B). A property that is grandfathered will not become subject to section 168(j) merely because an improvement is made to such property, regardless of whether the improvement is a “substantial improvement”. If an improvement other than a “substantial improvement” is made to property (other than land) that is grandfathered, that improvement also will be grandfathered. The determination of whether new construction constitutes an improvement to property or the creation of a new separate property will be based on all facts and circumstances.

Furthermore, any improvement to land will be treated as a separate property.

*Example.* On January 3, 1983, T, a taxable entity, entered into a lease of a parking lot to E, a tax-exempt entity. On January 1, 1985, T begins construction of a building for use by E on the site of the parking lot. The building is completed and placed in service in November 1985. The building is treated as a separate property, and is thus subject to the provisions of section 168(j), unless the building is grandfathered under a provision other than section 31(g)(20)(B) of TRA.

Q-32. What is "significant official governmental action" for purposes of the section 31(g)(4) transitional rule of TRA?

A-32. (i) "Significant official governmental action" involves three separate requirements. First, the action must be an official action. Second, the action must be specific action with respect to a particular project. Third, the action must be taken by a governmental entity having authority to commit the tax-exempt entity to the project, to provide funds for it, or to approve the project under State or local law.

(ii) The first requirement of official action means that the governing body must adopt a resolution or ordinance, or take similar official action, on or before November 1, 1983. The action qualifies only if it conforms with Federal, State, and local law (as applicable) and is a proper exercise of the powers of the governing body. Moreover, the action must not have been withdrawn. There must be satisfactory written evidence of the action that was in existence on or before November 1, 1983. Satisfactory written evidence includes a formal resolution or ordinance, minutes of meetings, and binding contracts with third parties pursuant to which third parties are to render services in furtherance of the project.

(iii) The second requirement of specific action is directed at the substance of the action taken. The action must be a specific action with respect to a particular project in which the governing body indicates an intent to have the project (or the design work for it) proceed. This requires that a specific project have been formulated and that the significant official action be a step toward consummation of the project. If the action does not relate to a specific

project or merely directs that a proposal or recommendation be formulated, it will not qualify. The following set of actions with respect to a particular project constitute specific action: the hiring of bond counsel or bond underwriters necessary to assist in the issuance and sale of bonds to finance a particular project or the adoption of an inducement resolution relating to bonds to be issued for such a project; applying for an Urban Development Action Grant on behalf of the project described in the application, receiving such a grant concerning the project, or the recommendation of a city planning authority to proceed with a project; the enactment of a State law authorizing the sale, lease, or construction of the property; the appropriation of funds for the property or authorization of a feasibility study or a development services contract with respect to it; the approval of financing arrangements by a regulatory agency; the enactment of a State law designed to provide funding for a project; the certification of a building as a historic structure by a State agency and the Department of the Interior; or the endorsement of the application for a certification of need with respect to a medical facility by a regulatory agency other than the agency empowered to issue such a certificate.

(iv) The third requirement for significant official governmental action is that the action must be taken by a Federal, State, or local governing body having authority to commit the tax-exempt entity to the project, to provide funds for it, or to approve the project under applicable law.

If the chief executive or another representative of a governing body has such authority, action by such representative would satisfy the requirement of this (iv). A governing body may have the authority to commit the tax-exempt entity to a project notwithstanding the fact that the project cannot be consummated without other governmental action being taken. For example, a city council will be treated as having authority to commit a city to do a sale-leaseback of its city hall notwithstanding the fact that State law needs to be amended to permit such a transaction. Similarly, if a local

## § 1.168(k)-0T

## 26 CFR Ch. I (4-1-06 Edition)

project cannot be completed without Federal approval, either legislative or administrative, the obtaining of such approval satisfies the requirements of this (iv).

(v) Routine governmental action at a local level will not qualify as significant official governmental action. Routine governmental action includes the granting of building permits or zoning changes and the issuance of environmental impact statements.

(vi) In order to qualify under the transitional rule of TRA section 31(g)(4), a sale and leaseback pursuant to a binding contract entered into before January 1, 1985 must be part of the project as to which there was significant official governmental action. Except as provided in the following sentence, where there has been significant official governmental action on or before November 1, 1983 with respect to the construction, reconstruction or rehabilitation of a property, the sale and leaseback of such property pursuant to a binding contract entered into before January 1, 1985 will be treated as part of the project which was the subject of the significant official governmental action. However, if the construction, reconstruction or rehabilitation was substantially completed prior to January 1, 1983, the sale and leaseback of such property will be treated as a separate project, unless the sale and leaseback was contemplated at the time of the significant official governmental action. Nevertheless, where the sale and leaseback is treated as a separate project, section 31(g)(4) may apply if there was significant official governmental action on or before November 1, 1983, with respect to such sale and leaseback. The application of this provision is illustrated by the following example:

*Example.* In the summer of 1927, the Board of Aldermen of City C passed a resolution authorizing the design and construction of a new city hall and appropriated the funds necessary for such project. Construction was completed in 1928. At the time of the significant official governmental action, City C had no plan to enter into a sale-leaseback arrangement with respect to the facility. On December 15, 1984, City C entered into a binding sale-leaseback arrangement concerning the city hall. This transaction will not qualify for exclusion from section 168(j) under the

section 31(g)(4) of TRA since construction of the facility in question was substantially completed before January 1, 1983. If, however, there had been significant official governmental action on or before November 1, 1983 with respect to the sale-leaseback project, then the transitional rule of section 31(g)(4) of TRA would apply.

[T.D. 8033, 50 FR 27224, July 2, 1985, as amended by T.D. 8435, 57 FR 43896, Sept. 23, 1992]

### § 1.168(k)-0T Table of contents (temporary).

This section lists the headings that appear in § 1.168(k)-1T.

#### § 1.168(k)-1T Additional first year depreciation deduction (temporary).

- (a) Scope and definitions.
  - (1) Scope.
  - (2) Definitions.
- (b) Qualified property or 50-percent bonus depreciation property.
  - (1) In general.
  - (2) Description of qualified property or 50-percent bonus depreciation property.
    - (i) In general.
    - (ii) Property not eligible for additional first year depreciation deduction.
      - (A) Property that is not qualified property.
      - (B) Property that is not 50-percent bonus depreciation property.
    - (3) Original use.
      - (i) In general.
      - (ii) Conversion to business or income-producing use.
      - (iii) Sale-leaseback and syndication transactions.
        - (A) Sale-leaseback transaction.
        - (B) Syndication transaction.
        - (C) Sale-leaseback transaction followed by a syndication transaction.
        - (iv) Fractional interests in property.
      - (v) Examples.
    - (4) Acquisition of property.
      - (i) In general.
      - (A) Qualified property.
      - (B) 50-percent bonus depreciation property.
      - (ii) Definition of binding contract.
        - (A) In general.
        - (B) Conditions.
        - (C) Options.
        - (D) Supply agreements.
        - (E) Components.
      - (iii) Self-constructed property.
        - (A) In general.
        - (B) When does construction begin.
        - (C) Components of self-constructed property.
          - (1) Acquired components.
          - (2) Self-constructed components.
        - (iv) Disqualified transactions.
          - (A) In general.
          - (B) Related party defined.
        - (v) Examples.
        - (5) Placed-in-service date.

taxpayer's use of property for the taxable year other than in the taxpayer's trade or business (or for the production of income), for any portion of the basis the taxpayer properly elects to treat as an expense under section 179, and for any adjustments to basis provided by other provisions of the Internal Revenue Code and the regulations thereunder (other than section 1016(a)(2) and (3)) (for example, a reduction in basis by the amount of the disabled access credit pursuant to section 44(d)(7)). For property subject to a lease, see section 167(c)(2).

(iv) *Adjusted depreciable basis* is the unadjusted depreciable basis of the property, as defined in § 1.168(k)-1T(a)(2)(iii), less the adjustments described in section 1016(a)(2) and (3).

(b) *Qualified property or 50-percent bonus depreciation property*—(1) *In general.* Qualified property or 50-percent bonus depreciation property is depreciable property that—

(i) Meets the requirements in § 1.168(k)-1T(b)(2) (description of property);

(ii) Meets the requirements in § 1.168(k)-1T(b)(3) (original use);

(iii) Meets the requirements in § 1.168(k)-1T(b)(4) (acquisition of property); and

(iv) Meets the requirements in § 1.168(k)-1T(b)(5) (placed-in-service date).

(2) *Description of qualified property or 50-percent bonus depreciation property*—

(i) *In general.* Depreciable property will meet the requirements of this paragraph (b)(2) if the property is—

(A) MACRS property (as defined in § 1.168(k)-1T(a)(2)(ii)) that has a recovery period of 20 years or less. For purposes of this paragraph (b)(2)(i)(A) and section 168(k)(2)(B)(i)(II) and 168(k)(4)(C), the recovery period is determined in accordance with section 168(c) regardless of any election made by the taxpayer under section 168(g)(7);

(B) Computer software as defined in, and depreciated under, section 167(f)(1) and the regulations thereunder;

(C) Water utility property as defined in section 168(e)(5) and depreciated under section 168; or

(D) Qualified leasehold improvement property as defined in paragraph (c) of

this section and depreciated under section 168.

(ii) *Property not eligible for additional first year depreciation deduction*—(A) *Property that is not qualified property.* For purposes of the 30-percent additional first year depreciation deduction, depreciable property will not meet the requirements of this paragraph (b)(2) if the property is—

(1) Described in section 168(f);

(2) Required to be depreciated under the alternative depreciation system of section 168(g) pursuant to section 168(g)(1)(A) through (D) or other provisions of the Internal Revenue Code (for example, property described in section 263A(e)(2)(A) or section 280F(b)(1));

(3) Included in any class of property for which the taxpayer elects not to deduct the 30-percent additional first year depreciation (for further guidance, see paragraph (e) of this section); or

(4) Qualified New York Liberty Zone leasehold improvement property as defined in section 1400L(c)(2).

(B) *Property that is not 50-percent bonus depreciation property.* For purposes of the 50-percent additional first year depreciation deduction, depreciable property will not meet the requirements of this paragraph (b)(2) if the property is—

(1) Described in paragraph (b)(2)(ii)(A)(1), (2), or (4) of this section; or

(2) Included in any class of property for which the taxpayer elects the 30-percent, instead of the 50-percent, additional first year depreciation deduction or elects not to deduct any additional first year depreciation (for further guidance, see paragraph (e) of this section).

(3) *Original use*—(i) *In general.* For purposes of the 30-percent additional first year depreciation deduction, depreciable property will meet the requirements of this paragraph (b)(3) if the original use of the property commences with the taxpayer after September 10, 2001. For purposes of the 50-percent additional first year depreciation deduction, depreciable property will meet the requirements of this paragraph (b)(3) if the original use of

the property commences with the taxpayer after May 5, 2003. Except as provided in paragraph (b)(3)(iii) and (iv) of this section, original use means the first use to which the property is put, whether or not that use corresponds to the use of the property by the taxpayer. Thus, additional capital expenditures incurred by a taxpayer to recondition or rebuild property acquired or owned by the taxpayer satisfies the original use requirement. However, the cost of reconditioned or rebuilt property acquired by the taxpayer does not satisfy the original use requirement. The question of whether property is reconditioned or rebuilt property is a question of fact. For purposes of this paragraph (b)(3)(i), property that contains used parts will not be treated as reconditioned or rebuilt if the cost of the used parts is not more than 20 percent of the total cost of the property.

(ii) *Conversion to business or income-producing use.* If a taxpayer initially acquires new property for personal use and subsequently uses the property in the taxpayer's trade or business or for the taxpayer's production of income, the taxpayer is considered as the original user of the property. If a person initially acquires new property for personal use and a taxpayer subsequently acquires the property from the person for use in the taxpayer's trade or business or for the taxpayer's production of income, the taxpayer is not considered the original user of the property.

(iii) *Sale-leaseback and syndication transactions—(A) Sale-leaseback transaction.* If new property is originally placed in service by a person after September 10, 2001 (for qualified property), or after May 5, 2003 (for 50-percent bonus depreciation property), and is sold to a taxpayer and leased back to the person by the taxpayer within three months after the date the property was originally placed in service by the person, the taxpayer-lessor is considered the original user of the property.

(B) *Syndication transaction.* If new property is originally placed in service by a lessor (including by operation of paragraph (b)(5)(ii)(A) of this section) after September 10, 2001 (for qualified property), or after May 5, 2003 (for 50-percent bonus depreciation property),

and is sold by the lessor or any subsequent purchaser within three months after the date the property was originally placed in service by the lessor, and the user of the property after the last sale during the three-month period remains the same as when the property was originally placed in service by the lessor, the purchaser of the property in the last sale during the three-month period is considered the original user of the property.

(C) *Sale-leaseback transaction followed by a syndication transaction.* If a sale-leaseback transaction that satisfies the requirements in paragraph (b)(3)(iii)(A) of this section is followed by a syndication transaction that satisfies the requirements in paragraph (b)(3)(iii)(B) of this section, the original user of the property is determined in accordance with paragraph (b)(3)(iii)(B) of this section.

(iv) *Fractional interests in property.* If, in the ordinary course of its business, a taxpayer sells fractional interests in property to unrelated third parties, each first fractional owner of the property is considered as the original user of its proportionate share of the property. Furthermore, if the taxpayer uses the property before all of the fractional interests of the property are sold but the property continues to be held primarily for sale by the taxpayer, the original use of any fractional interest sold to an unrelated third party subsequent to the taxpayer's use of the property begins with the first purchaser of that fractional interest. For purposes of this paragraph (b)(3)(iv), persons are not related if they do not have a relationship described in section 267(b) or 707(b) and the regulations thereunder.

(v) *Examples.* The application of this paragraph (b)(3) is illustrated by the following examples:

*Example 1.* On August 1, 2002, A buys from B for \$20,000 a machine that has been previously used by B in B's trade or business. On March 1, 2003, A makes a \$5,000 capital expenditure to recondition the machine. The \$20,000 purchase price does not qualify for the additional first year depreciation deduction because the original use requirement of this paragraph (b)(3) is not met. However, the \$5,000 expenditure satisfies the original use requirement of this paragraph (b)(3) and, assuming all other requirements are met, qualifies for the 30-percent additional first

year depreciation deduction, regardless of whether the \$5,000 is added to the basis of the machine or is capitalized as a separate asset.

*Example 2.* C, an automobile dealer, uses some of its automobiles as demonstrators in order to show them to prospective customers. The automobiles that are used as demonstrators by C are held by C primarily for sale to customers in the ordinary course of its business. On September 1, 2002, D buys from C an automobile that was previously used as a demonstrator by C. D will use the automobile solely for business purposes. The use of the automobile by C as a demonstrator does not constitute a “use” for purposes of the original use requirement and, therefore, D will be considered the original user of the automobile for purposes of this paragraph (b)(3). Assuming all other requirements are met, D’s purchase price of the automobile qualifies for the 30-percent additional first year depreciation deduction for D, subject to any limitation under section 280F.

*Example 3.* On April 1, 2000, E acquires a horse to be used in E’s thoroughbred racing business. On October 1, 2003, F buys the horse from E and will use the horse in F’s horse breeding business. The use of the horse by E in its racing business prevents the original use of the horse from commencing with F. Thus, F’s purchase price of the horse does not qualify for the additional first year depreciation deduction.

*Example 4.* In the ordinary course of its business, G sells fractional interests in its aircraft to unrelated parties. G holds out for sale eight equal fractional interests in an aircraft. On January 1, 2003, G sells five of the eight fractional interests in the aircraft to H, an unrelated party, and H begins to use its proportionate share of the aircraft immediately upon purchase. On June 1, 2003, G sells to I, an unrelated party to G and H, the remaining unsold 3/8 fractional interests in the aircraft. H is considered the original user as to its 5/8 fractional interest in the aircraft and I is considered the original user as to its 3/8 fractional interest in the aircraft. Thus, assuming all other requirements are met, H’s purchase price for its 5/8 fractional interest in the aircraft qualifies for the 30-percent additional first year depreciation deduction and I’s purchase price for its 3/8 fractional interest in the aircraft qualifies for the 50-percent additional first year depreciation deduction.

(4) *Acquisition of property*—(i) *In general*—(A) *Qualified property.* For purposes of the 30-percent additional first year depreciation deduction, depreciable property will meet the requirements of this paragraph (b)(4) if the property is—

(1) Acquired by the taxpayer after September 10, 2001, and before January 1, 2005, but only if no written binding contract for the acquisition of the property was in effect before September 11, 2001; or

(2) Acquired by the taxpayer pursuant to a written binding contract that was entered into after September 10, 2001, and before January 1, 2005.

(B) *50-percent bonus depreciation property.* For purposes of the 50-percent additional first year depreciation deduction, depreciable property will meet the requirements of this paragraph (b)(4) if the property is acquired by the taxpayer after May 5, 2003, and before January 1, 2005, but only if no written binding contract for the acquisition of the property was in effect before May 6, 2003.

(ii) *Definition of binding contract*—(A) *In general.* A contract is binding only if it is enforceable under State law against the taxpayer or a predecessor, and does not limit damages to a specified amount (for example, by use of a liquidated damages provision). For this purpose, a contractual provision that limits damages to an amount equal to at least 5 percent of the total contract price will not be treated as limiting damages to a specified amount. In determining whether a contract limits damages, the fact that there may be little or no damages because the contract price does not significantly differ from fair market value will not be taken into account. For example, if a taxpayer entered into an irrevocable written contract to purchase an asset for \$100 and the contract contained no provision for liquidated damages, the contract is considered binding notwithstanding the fact that the asset had a fair market value of \$99 and under local law the seller would only recover the difference in the event the purchaser failed to perform. If the contract provided for a full refund of the purchase price in lieu of any damages allowable by law in the event of breach or cancellation by the seller, the contract is not considered binding.

(B) *Conditions.* A contract is binding even if subject to a condition, as long as the condition is not within the control of either party or a predecessor. A contract will continue to be binding if

the parties make insubstantial changes in its terms and conditions or because any term is to be determined by a standard beyond the control of either party. A contract that imposes significant obligations on the taxpayer or a predecessor will be treated as binding notwithstanding the fact that insubstantial terms remain to be negotiated by the parties to the contract.

(C) *Options.* An option to either acquire or sell property is not a binding contract.

(D) *Supply agreements.* A binding contract does not include a supply or similar agreement if the amount and design specifications of the property to be purchased have not been specified. The contract will not be a binding contract for the property to be purchased until both the amount and the design specifications are specified. For example, if the provisions of a supply or similar agreement state the design specifications of, and the pricing for, the property to be purchased, a purchase order under the agreement for a specific number of assets is treated as a binding contract.

(E) *Components.* A binding contract to acquire one or more components of a larger property will not be treated as a binding contract to acquire the larger property. If a binding contract to acquire the component does not satisfy the requirements of this paragraph (b)(4), the component does not qualify for the 30-percent or 50-percent additional first year depreciation deduction, as applicable.

(iii) *Self-constructed property*—(A) *In general.* If a taxpayer manufactures, constructs, or produces property for use by the taxpayer in its trade or business (or for its production of income), the acquisition rules in paragraph (b)(4)(i) of this section are treated as met for qualified property if the taxpayer begins manufacturing, constructing, or producing the property after September 10, 2001, and before January 1, 2005, and for 50-percent bonus depreciation property if the taxpayer begins manufacturing, constructing, or producing the property after May 5, 2003, and before January 1, 2005. Property that is manufactured, constructed, or produced for the taxpayer by another person under a writ-

ten binding contract (as defined in paragraph (b)(4)(ii) of this section) that is entered into prior to the manufacture, construction, or production of the property for use by the taxpayer in its trade or business (or for its production of income) is considered to be manufactured, constructed, or produced by the taxpayer.

(B) *When does construction begin.* For purposes of paragraph (b)(4)(iii) of this section, construction of property begins when physical work of a significant nature begins. Physical work does not include preliminary activities such as planning or designing, securing financing, exploring, or researching. The determination of when physical work of a significant nature begins depends on the facts and circumstances. For purposes of this paragraph (b)(4)(iii)(B), physical work of a significant nature will not be considered to begin before the taxpayer incurs (in the case of an accrual basis taxpayer) or pays (in the case of a cash basis taxpayer) more than 10 percent of the total cost of the property (excluding the cost of any land and preliminary activities such as planning or designing, securing financing, exploring, or researching). For example, if a retail motor fuels outlet is to be constructed on-site, construction begins when physical work of a significant nature commences at the site; that is, when work begins on the excavation for footings, pouring the pads for the outlet, or the driving of foundation pilings into the ground. Preliminary work, such as clearing a site, test drilling to determine soil condition, or excavation to change the contour of the land (as distinguished from excavation for footings) does not constitute the beginning of construction. However, if a retail motor fuels outlet is to be assembled on-site from modular units constructed off-site and delivered to the site where the outlet will be used, construction begins when physical work of a significant nature commences at the off-site location.

(C) *Components of self-constructed property*—(1) *Acquired components.* If a binding contract (as defined in paragraph (b)(4)(ii) of this section) to acquire a component does not satisfy the requirements of paragraph (b)(4)(i) of this section, the component does not

qualify for the 30-percent or 50-percent additional first year depreciation deduction, as applicable. A binding contract (as defined in paragraph (b)(4)(ii) of this section) to acquire one or more components of a larger self-constructed property will not preclude the larger self-constructed property from satisfying the acquisition rules in paragraph (b)(4)(iii)(A) of this section. Accordingly, the unadjusted depreciable basis of the larger self-constructed property that is eligible for the 30-percent or 50-percent additional first year depreciation deduction, as applicable (assuming all other requirements are met), must not include the unadjusted depreciable basis of any component that does not satisfy the requirements of paragraph (b)(4)(i) of this section. If the manufacture, construction, or production of the larger self-constructed property begins before September 11, 2001, for qualified property, or before May 6, 2003, for 50-percent bonus depreciation property, the larger self-constructed property and any acquired components related to the larger self-constructed property do not qualify for the 30-percent or 50-percent additional first year depreciation deduction, as applicable. If a binding contract to acquire the component is entered into after September 10, 2001, for qualified property, or after May 5, 2003, for 50-percent bonus depreciation property, and before January 1, 2005, but the manufacture, construction, or production of the larger self-constructed property does not begin before January 1, 2005, the component qualifies for the additional first year depreciation deduction (assuming all other requirements are met) but the larger self-constructed property does not.

(2) *Self-constructed components.* If the manufacture, construction, or production of a component does not satisfy the requirements of paragraph (b)(4)(iii)(A) of this section, the component does not qualify for the 30-percent or 50-percent additional first year depreciation deduction, as applicable. However, if the manufacture, construction, or production of a component does not satisfy the requirements of paragraph (b)(4)(iii)(A) of this section, but the manufacture, construction, or production of the larger self-con-

structed property satisfies the requirements of paragraph (b)(4)(iii)(A) of this section, the larger self-constructed property qualifies for the 30-percent or 50-percent additional first year depreciation deduction, as applicable (assuming all other requirements are met) even though the component does not qualify for the 30-percent or 50-percent additional first year depreciation deduction. Accordingly, the unadjusted depreciable basis of the larger self-constructed property that is eligible for the 30-percent or 50-percent additional first year depreciation deduction, as applicable (assuming all other requirements are met), must not include the unadjusted depreciable basis of any component that does not qualify for the 30-percent or 50-percent additional first year depreciation deduction. If the manufacture, construction, or production of the larger self-constructed property began before September 11, 2001, for qualified property, or before May 6, 2003, for 50-percent bonus depreciation property, the larger self-constructed property and any self-constructed components related to the larger self-constructed property do not qualify for the 30-percent or 50-percent additional first year depreciation deduction, as applicable. If the manufacture, construction, or production of a component begins after September 10, 2001, for qualified property, or after May 5, 2003, for 50-percent bonus depreciation property, and before January 1, 2005, but the manufacture, construction, or production of the larger self-constructed property does not begin before January 1, 2005, the component qualifies for the additional first year depreciation deduction (assuming all other requirements are met) but the larger self-constructed property does not.

(iv) *Disqualified transactions*—(A) *In general.* Property does not satisfy the requirements of this paragraph (b)(4) if the user of the property as of the date on which the property was originally placed in service (including by operation of paragraph (b)(5)(ii), (iii), and (iv) of this section), or a related party to the user, acquired, or had a written binding contract (as defined in paragraph (b)(4)(ii) of this section) in effect for the acquisition of, the property at any time before September 11, 2001 (for

qualified property), or before May 6, 2003 (for 50-percent bonus depreciation property). In addition, property manufactured, constructed, or produced for the taxpayer or a related party does not satisfy the requirements of this paragraph (b)(4) if the manufacture, construction, or production of the property for the taxpayer or a related party began at any time before September 11, 2001 (for qualified property), or before May 6, 2003 (for 50-percent bonus depreciation property).

(B) *Related party defined.* For purposes of this paragraph (b)(4)(iv), persons are related if they have a relationship specified in section 267(b) or 707(b) and the regulations thereunder.

(v) *Examples.* The application of this paragraph (b)(4) is illustrated by the following examples:

*Example 1.* On September 1, 2001, *J*, a corporation, entered into a written agreement with *K*, a manufacturer, to purchase 20 new lamps for \$100 each within the next two years. Although the agreement specifies the number of lamps to be purchased, the agreement does not specify the design of the lamps to be purchased. Accordingly, the agreement is not a binding contract pursuant to paragraph (b)(4)(ii)(D) of this section.

*Example 2.* Same facts as *Example 1*. On December 1, 2001, *J* placed a purchase order with *K* to purchase 20 new model XPC5 lamps for \$100 each for a total amount of \$2,000. Because the agreement specifies the number of lamps to be purchased and the purchase order specifies the design of the lamps to be purchased, the purchase order placed by *J* with *K* on December 1, 2001, is a binding contract pursuant to paragraph (b)(4)(ii)(D) of this section. Accordingly, the cost of the 20 lamps qualifies for the 30-percent additional first year depreciation deduction.

*Example 3.* Same facts as *Example 1* except that the written agreement between *J* and *K* is to purchase 100 model XPC5 lamps for \$100 each within the next two years. Because this agreement specifies the amount and design of the lamps to be purchased, the agreement is a binding contract pursuant to paragraph (b)(4)(ii)(D) of this section. Accordingly, because the agreement was entered into before September 11, 2001, any lamp acquired by *J* under this contract does not qualify for the additional first year depreciation deduction.

*Example 4.* On September 1, 2001, *L* began constructing an electric generation power plant for its own use. On November 1, 2002, *L* ceases construction of the power plant prior to its completion. Between September 1, 2001, and November 1, 2002, *L* incurred \$3,000,000 for the construction of the power

plant. On May 6, 2003, *L* resumed construction of the power plant and completed its construction on August 31, 2003. Between May 6, 2003, and August 31, 2003, *L* incurred another \$1,600,000 to complete the construction of the power plant and, on September 1, 2003, *L* placed the power plant in service. None of *L*'s total expenditures of \$4,600,000 qualify for the additional first year depreciation deduction because, pursuant to paragraph (b)(4)(iii)(A) of this section, *L* began constructing the power plant before September 11, 2001.

*Example 5.* Same facts as *Example 4* except that *L* began constructing the electric generation power plant for its own use on October 1, 2001. *L*'s total expenditures of \$4,600,000 qualify for the additional first year depreciation deduction because, pursuant to paragraph (b)(4)(iii)(A) of this section, *L* began constructing the power plant after September 10, 2001, and placed the power plant in service before January 1, 2005. Accordingly, the additional first year depreciation deduction for the power plant will be \$1,380,000, computed as \$4,600,000 multiplied by 30 percent.

*Example 6.* On August 1, 2001, *M* entered into a written binding contract to acquire a new turbine. The new turbine is a component part of a new electric generation power plant that is being constructed on *M*'s behalf. The construction of the new electric generation power plant commenced in November 2001, and the new electric generation power plant was completed in November 2002. Because *M* entered into a written binding contract to acquire a component part (the new turbine) prior to September 11, 2001, pursuant to paragraph (b)(4)(iii)(C) of this section, the component part does not qualify for the additional first year depreciation deduction. However, pursuant to paragraphs (b)(4)(iii)(A) and (C) of this section, the new plant constructed for *M* will qualify for the 30-percent additional first year depreciation deduction because construction of the new plant began after September 10, 2001, and before May 6, 2003. Accordingly, the unadjusted depreciable basis of the new plant that is eligible for the 30-percent additional first year depreciation deduction must not include the unadjusted depreciable basis of the new turbine.

*Example 7.* Same facts as *Example 6* except that *M* entered into the written binding contract to acquire the new turbine on September 30, 2002, and construction of the new plant commenced on August 1, 2001. Because *M* began construction of the new plant prior to September 11, 2001, pursuant to paragraphs (b)(4)(iii)(A) and (C) of this section, neither the new plant constructed for *M* nor the turbine will qualify for the additional first year depreciation deduction because self-construction of the new plant began prior to September 11, 2001.

*Example 8.* On September 1, 2001, *N* began constructing property for its own use. On October 1, 2001, *N* sold its rights to the property to *O*, a related party under section 267(b). Pursuant to paragraph (b)(4)(iv) of this section, the property is not eligible for the additional first year depreciation deduction because *N* and *O* are related parties and construction of the property by *N* began prior to September 11, 2001.

*Example 9.* On September 1, 2001, *P* entered into a written binding contract to acquire property. On October 1, 2001, *P* sold its rights to the property to *Q*, a related party under section 267(b). Pursuant to paragraph (b)(4)(iv) of this section, the property is not eligible for the additional first year depreciation deduction because *P* and *Q* are related parties and a written binding contract for the acquisition of the property was in effect prior to September 11, 2001.

*Example 10.* Prior to September 11, 2001, *R* began constructing an electric generation power plant for its own use. On May 1, 2003, prior to the completion of the power plant, *R* transferred the rights to own and use this power plant to *S*, an unrelated party, for \$6,000,000. Between May 6, 2003, and June 30, 2003, *S*, a calendar-year taxpayer, incurred another \$1,200,000 to complete the construction of the power plant and, on August 1, 2003, *S* placed the power plant in service. Because *R* and *S* are not related parties, the transaction between *R* and *S* will not be a disqualified transaction pursuant to paragraph (b)(4)(iv) of this section. Accordingly, *S*'s total expenditures of \$7,200,000 for the power plant qualify for the additional first year depreciation deduction. *S*'s additional first year depreciation deduction for the power plant will be \$2,400,000, computed as \$6,000,000 multiplied by 30 percent, plus \$1,200,000 multiplied by 50 percent. The \$6,000,000 portion of the total \$7,200,000 unadjusted depreciable basis qualifies for the 30-percent additional first year depreciation deduction because that portion of the total unadjusted depreciable basis was acquired by *S* after September 10, 2001, and before May 6, 2003. However, because *S* began construction to complete the power plant after May 5, 2003, the \$1,200,000 portion of the total \$7,200,000 unadjusted depreciable basis qualifies for the 50-percent additional first year depreciation deduction.

*Example 11.* On September 1, 2001, *T* acquired and placed in service equipment. On October 15, 2001, *T* sells the equipment to *U*, an unrelated party, and leases the property back from *U* in a sale-leaseback transaction. Pursuant to paragraph (b)(4)(iv) of this section, the equipment does not qualify for the additional first year depreciation deduction because *T*, the user of the equipment, acquired the equipment prior to September 11, 2001.

(5) *Placed-in-service date*—(i) *In general.* Depreciable property will meet the requirements of this paragraph (b)(5) if the property is placed in service by the taxpayer before January 1, 2005, or, in the case of property described in section 168(k)(2)(B), is placed in service by the taxpayer before January 1, 2006.

(ii) *Sale-leaseback and syndication transactions*—(A) *Sale-leaseback transaction.* If qualified property is originally placed in service after September 10, 2001, or 50-percent bonus depreciation property is originally placed in service after May 5, 2003, by a person and sold to a taxpayer and leased back to the person by the taxpayer within three months after the date the property was originally placed in service by the person, the property is treated as originally placed in service by the taxpayer-lessor not earlier than the date on which the property is used by the lessee under the leaseback.

(B) *Syndication transaction.* If qualified property is originally placed in service after September 10, 2001, or 50-percent bonus depreciation property is originally placed in service after May 5, 2003, by a lessor (including by operation of paragraph (b)(5)(ii)(A) of this section) and is sold by the lessor or any subsequent purchaser within three months after the date the property was originally placed in service by the lessor, and the user of the property after the last sale during this three-month period remains the same as when the property was originally placed in service by the lessor, the property is treated as originally placed in service by the purchaser of the property in the last sale during the three-month period but not earlier than the date of the last sale.

(C) *Sale-leaseback transaction followed by a syndication transaction.* If a sale-leaseback transaction that satisfies the requirements in paragraph (b)(5)(ii)(A) of this section is followed by a syndication transaction that satisfies the requirements in paragraph (b)(5)(ii)(B) of this section, the placed-in-service date of the property is determined in accordance with paragraph (b)(5)(ii)(B) of this section.

(iii) *Technical termination of a partnership.* For purposes of this paragraph

(b)(5), in the case of a technical termination of a partnership under section 708(b)(1)(B), qualified property or 50-percent bonus depreciation property placed in service by the terminated partnership during the taxable year of termination is treated as originally placed in service by the new partnership on the date the qualified property or the 50-percent bonus depreciation property is contributed by the terminated partnership to the new partnership.

(iv) *Section 168(i)(7) transactions.* For purposes of this paragraph (b)(5), if qualified property or 50-percent bonus depreciation property is transferred in a transaction described in section 168(i)(7) in the same taxable year that the qualified property or the 50-percent bonus depreciation property is placed in service by the transferor, the transferred property is treated as originally placed in service on the date the transferor placed in service the qualified property or the 50-percent bonus depreciation property, as applicable. In the case of multiple transfers of qualified property or 50-percent bonus depreciation property in multiple transactions described in section 168(i)(7) in the same taxable year, the placed in service date of the transferred property is deemed to be the date on which the first transferor placed in service the qualified property or the 50-percent bonus depreciation property, as applicable.

(c) *Qualified leasehold improvement property*—(1) *In general.* For purposes of section 168(k), qualified leasehold improvement property means any improvement, which is section 1250 property, to an interior portion of a building that is nonresidential real property if—

(i) The improvement is made under or pursuant to a lease by the lessee (or any sublessee) of the interior portion, or by the lessor of that interior portion;

(ii) The interior portion of the building is to be occupied exclusively by the lessee (or any sublessee) of that interior portion; and

(iii) The improvement is placed in service more than 3 years after the date the building was first placed in service by any person.

(2) *Certain improvements not included.* Qualified leasehold improvement property does not include any improvement for which the expenditure is attributable to:

- (i) The enlargement of the building;
- (ii) Any elevator or escalator;
- (iii) Any structural component benefiting a common area; or
- (iv) The internal structural framework of the building.

(3) *Definitions.* For purposes of this paragraph (c), the following definitions apply:

(i) *Building* has the same meaning as that term is defined in §1.48-1(e)(1).

(ii) *Common area* means any portion of a building that is equally available to all users of the building on the same basis for uses that are incidental to the primary use of the building. For example, stairways, hallways, lobbies, common seating areas, interior and exterior pedestrian walkways and pedestrian bridges, loading docks and areas, and rest rooms generally are treated as common areas if they are used by different lessees of a building.

(iii) *Elevator* and *escalator* have the same meanings as those terms are defined in §1.48-1(m)(2).

(iv) *Enlargement* has the same meaning as that term is defined in §1.48-12(c)(10).

(v) *Internal structural framework* has the same meaning as that term is defined in §1.48-12(b)(3)(i)(D)(iii).

(vi) *Lease* has the same meaning as that term is defined in section 168(h)(7). In addition, a commitment to enter into a lease is treated as a lease, and the parties to the commitment are treated as lessor and lessee. However, a lease between related persons is not considered a lease. For purposes of the preceding sentence, related persons are—

(A) Members of an affiliated group (as defined in section 1504 and the regulations thereunder); and

(B) Persons having a relationship described in section 267(b) and the regulations thereunder. For purposes of applying section 267(b), the language “80 percent or more” is used instead of “more than 50 percent.”

(vii) *Nonresidential real property* has the same meaning as that term is defined in section 168(e)(2)(B).

(viii) *Structural component* has the same meaning as that term is defined in § 1.48-1(e)(2).

(d) *Computation of depreciation deduction for qualified property or 50-percent bonus depreciation property*—(1) *Additional first year depreciation deduction*—

(i) *In general.* Except as provided in paragraph (f)(5) of this section, the allowable additional first year depreciation deduction for qualified property is determined by multiplying the unadjusted depreciable basis (as defined in § 1.168(k)-1T(a)(2)(iii)) of the qualified property by 30 percent. Except as provided in paragraph (f)(5) of this section, the allowable additional first year depreciation deduction for 50-percent bonus depreciation property is determined by multiplying the unadjusted depreciable basis (as defined in § 1.168(k)-1T(a)(2)(iii)) of the 50-percent bonus depreciation property by 50 percent. Except as provided in paragraph (f)(1) of this section, the 30-percent or 50-percent additional first year depreciation deduction is not affected by a taxable year of less than 12 months. See paragraph (f)(1) of this section for qualified property or 50-percent bonus depreciation property placed in service and disposed of in the same taxable year. See paragraph (f)(5) of this section for qualified property or 50-percent bonus depreciation property acquired in a like-kind exchange or as a result of an involuntary conversion.

(ii) *Property having a longer production period.* For purposes of paragraph (d)(1)(i) of this section, the unadjusted depreciable basis (as defined in § 1.168(k)-1T(a)(2)(iii)) of qualified property or 50-percent bonus depreciation property described in section 168(k)(2)(B) is limited to the property's unadjusted depreciable basis attributable to the property's manufacture, construction, or production after September 10, 2001 (for qualified property), or May 5, 2003 (for 50-percent bonus depreciation property), and before January 1, 2005.

(iii) *Alternative minimum tax.* The 30-percent or 50-percent additional first year depreciation deduction is allowed for alternative minimum tax purposes for the taxable year in which the qualified property or the 50-percent bonus depreciation property is placed in serv-

ice by the taxpayer. The 30-percent or 50-percent additional first year depreciation deduction for alternative minimum tax purposes is based on the unadjusted depreciable basis of the property for alternative minimum tax purposes.

(2) *Otherwise allowable depreciation deduction.* (i) *In general.* Before determining the amount otherwise allowable as a depreciation deduction for the qualified property or the 50-percent bonus depreciation property for the placed-in-service year and any subsequent taxable year, the taxpayer must determine the remaining adjusted depreciable basis of the qualified property or the 50-percent bonus depreciation property. This remaining adjusted depreciable basis is equal to the unadjusted depreciable basis of the qualified property or the 50-percent bonus depreciation property reduced by the amount of the additional first year depreciation allowed or allowable, whichever is greater. The remaining adjusted depreciable basis of the qualified property or the 50-percent bonus depreciation property is then depreciated using the applicable depreciation provisions under the Internal Revenue Code for the qualified property or the 50-percent bonus depreciation property. The remaining adjusted depreciable basis of the qualified property or the 50-percent bonus depreciation property that is MACRS property is also the basis to which the annual depreciation rates in the optional depreciation tables apply (for further guidance, see section 8 of Rev. Proc. 87-57 (1987-2 C.B. 687) and § 601.601(d)(2)(ii)(b) of this chapter). The depreciation deduction allowable for the remaining adjusted depreciable basis of the qualified property or the 50-percent bonus depreciation property is affected by a taxable year of less than 12 months.

(ii) *Alternative minimum tax.* For alternative minimum tax purposes, the depreciation deduction allowable for the remaining adjusted depreciable basis of the qualified property or the 50-percent bonus depreciation property is based on the remaining adjusted depreciable basis for alternative minimum tax purposes. The remaining adjusted depreciable basis of the qualified

property or the 50-percent bonus depreciable property for alternative minimum tax purposes is depreciated using the same depreciation method, recovery period (or useful life in the case of computer software), and convention that apply to the qualified property or the 50-percent bonus depreciation property for regular tax purposes.

(3) *Examples.* This paragraph (d) is illustrated by the following examples:

*Example 1.* On March 1, 2003, V, a calendar-year taxpayer, purchased and placed in service qualified property that costs \$1 million and is 5-year property under section 168(e). V depreciates its 5-year property placed in service in 2003 using the optional depreciation table that corresponds with the general depreciation system, the 200-percent declining balance method, a 5-year recovery period, and the half-year convention. For 2003, V is allowed a 30-percent additional first year depreciation deduction of \$300,000 (the unadjusted depreciable basis of \$1 million multiplied by .30). Next, V must reduce the unadjusted depreciable basis of \$1 million by the additional first year depreciation deduction of \$300,000 to determine the remaining adjusted depreciable basis of \$700,000. Then, V's depreciation deduction allowable in 2003 for the remaining adjusted depreciable basis of \$700,000 is \$140,000 (the remaining adjusted depreciable basis of \$700,000 multiplied by the annual depreciation rate of .20 for recovery year 1).

*Example 2.* On June 1, 2003, W, a calendar-year taxpayer, purchased and placed in service 50-percent bonus depreciation property that costs \$126,000. The property qualifies for the expensing election under section 179 and is 5-year property under section 168(e). W did not purchase any other section 179 property in 2003. W makes the election under section 179 for the property and depreciates its 5-year property placed in service in 2003 using the optional depreciation table that corresponds with the general depreciation system, the 200-percent declining balance method, a 5-year recovery period, and the half-year convention. For 2003, W is first allowed a \$100,000 deduction under section 179. Next, W must reduce the cost of \$126,000 by the section 179 deduction of \$100,000 to determine the unadjusted depreciable basis of \$26,000. Then, for 2003, W is allowed a 50-percent additional first year depreciation deduction of \$13,000 (the unadjusted depreciable basis of \$26,000 multiplied by .50). Next, W must reduce the unadjusted depreciable basis of \$26,000 by the additional first year depreciation deduction of \$13,000 to determine the remaining adjusted depreciable basis of \$13,000.

Then, W's depreciation deduction allowable in 2003 for the remaining adjusted depreciable basis of \$13,000 is \$2,600 (the remaining adjusted depreciable basis of \$13,000 multiplied by the annual depreciation rate of .20 for recovery year 1).

(e) *Election not to deduct additional first year depreciation—(1) In general.* If a taxpayer makes an election under this paragraph (e), the election applies to all qualified property or 50-percent bonus depreciation property, as applicable, that is in the same class of property and placed in service in the same taxable year. The rules of this paragraph (e) apply to the following elections provided under section 168(k):

(i) *Qualified property.* A taxpayer may make an election not to deduct the 30-percent additional first year depreciation for any class of property that is qualified property placed in service during the taxable year. If this election is made, no additional first year depreciation deduction is allowable for the property placed in service during the taxable year in the class of property.

(ii) *50-percent bonus depreciation property.* For any class of property that is 50-percent bonus depreciation property placed in service during the taxable year, a taxpayer may make an election—

(A) To deduct the 30-percent, instead of the 50-percent, additional first year depreciation. If this election is made, the allowable additional first year depreciation deduction is determined as though the class of property is qualified property under section 168(k)(2); or

(B) Not to deduct any additional first year depreciation. If this election is made, no additional first year depreciation deduction is allowable for the class of property.

(2) *Definition of class of property.* For purposes of this paragraph (e), the term class of property means:

(i) Except for the property described in paragraphs (e)(2)(ii) and (iv) of this section, each class of property described in section 168(e) (for example, 5-year property);

(ii) Water utility property as defined in section 168(e)(5) and depreciated under section 168;

(iii) Computer software as defined in, and depreciated under, section 167(f)(1) and the regulations thereunder; or

(iv) Qualified leasehold improvement property as defined in paragraph (c) of this section and depreciated under section 168.

(3) *Time and manner for making election*—(i) *Time for making election*. Except as provided in paragraph (e)(4) of this section, any election specified in paragraph (e)(1) of this section must be made by the due date (including extensions) of the Federal tax return for the taxable year in which the qualified property or the 50-percent bonus depreciation property, as applicable, is placed in service by the taxpayer.

(ii) *Manner of making election*. Except as provided in paragraph (e)(4) of this section, any election specified in paragraph (e)(1) of this section must be made in the manner prescribed on Form 4562, “Depreciation and Amortization,” and its instructions. The election is made separately by each person owning qualified property or 50-percent bonus depreciation property (for example, for each member of a consolidated group by the common parent of the group, by the partnership, or by the S corporation). If Form 4562 is revised or renumbered, any reference in this section to that form shall be treated as a reference to the revised or renumbered form.

(4) *Special rules for 2000 or 2001 returns*. For the election specified in paragraph (e)(1)(i) of this section for qualified property placed in service by the taxpayer during the taxable year that included September 11, 2001, the taxpayer should refer to the guidance provided by the Internal Revenue Service for the time and manner of making this election on the 2000 or 2001 Federal tax return for the taxable year that included September 11, 2001 (for further guidance, see sections 3.03(3) and 4 of Rev. Proc. 2002-33 (2002-1 C.B. 963), Rev. Proc. 2003-50 (2003-29 I.R.B. 119), and § 601.601(d)(2)(ii)(b) of this chapter).

(5) *Failure to make election*. If a taxpayer does not make the applicable election specified in paragraph (e)(1) of this section within the time and in the manner prescribed in paragraph (e)(3) or (4) of this section, the amount of depreciation allowable for that property under section 167(f)(1) or under section 168, as applicable, must be determined for the placed-in-service year and for

all subsequent taxable years by taking into account the additional first year depreciation deduction. Thus, any election specified in paragraph (e)(1) of this section shall not be made by the taxpayer in any other manner (for example, the election cannot be made through a request under section 446(e) to change the taxpayer’s method of accounting).

(f) *Special rules*—(1) *Property placed in service and disposed of in the same taxable year*—(i) *In general*. Except as provided in paragraphs (f)(1)(ii) and (iii) of this section, the additional first year depreciation deduction is not allowed for qualified property or 50-percent bonus depreciation property placed in service and disposed of during the same taxable year.

(ii) *Technical termination of a partnership*. In the case of a technical termination of a partnership under section 708(b)(1)(B), the additional first year depreciation deduction is allowable for any qualified property or 50-percent bonus depreciation property placed in service by the terminated partnership during the taxable year of termination and contributed by the terminated partnership to the new partnership. The allowable additional first year depreciation deduction for the qualified property or the 50-percent bonus depreciation property shall not be claimed by the terminated partnership but instead shall be claimed by the new partnership for the new partnership’s taxable year in which the qualified property or the 50-percent bonus depreciation property was contributed by the terminated partnership to the new partnership. However, if qualified property or 50-percent bonus depreciation property is both placed in service and contributed to a new partnership in a transaction described in section 708(b)(1)(B) by the terminated partnership during the taxable year of termination, and if such property is disposed of by the new partnership in the same taxable year the new partnership received such property from the terminated partnership, then no additional first year depreciation deduction is allowable to either partnership.

(iii) *Section 168(i)(7) transactions*. If any qualified property or 50-percent

bonus depreciation property is transferred in a transaction described in section 168(i)(7) in the same taxable year that the qualified property or the 50-percent bonus depreciation property is placed in service by the transferor, the additional first year depreciation deduction is allowable for the qualified property or the 50-percent bonus depreciation property. The allowable additional first year depreciation deduction for the qualified property or the 50-percent bonus depreciation property for the transferor's taxable year in which the property is placed in service is allocated between the transferor and the transferee on a monthly basis. This allocation shall be made in accordance with the rules in § 1.168(d)-1(b)(7)(ii) for allocating the depreciation deduction between the transferor and the transferee. However, if qualified property or 50-percent bonus depreciation property is both placed in service and transferred in a transaction described in section 168(i)(7) by the transferor during the same taxable year, and if such property is disposed of by the transferee (other than by a transaction described in section 168(i)(7)) during the same taxable year the transferee received such property from the transferor, then no additional first year depreciation deduction is allowable to either party.

(iv) *Examples.* The application of this paragraph (f)(1) is illustrated by the following examples:

*Example 1.* X and Y are equal partners in Partnership XY, a general partnership. On February 1, 2002, Partnership XY purchased and placed in service new equipment at a cost of \$30,000. On March 1, 2002, X sells its entire 50 percent interest to Z in a transfer that terminates the partnership under section 708(b)(1)(B). As a result, terminated Partnership XY is deemed to have contributed the equipment to new Partnership XY. Pursuant to paragraph (f)(1)(ii) of this section, new Partnership XY, not terminated Partnership XY, is eligible to claim the 30-percent additional first year depreciation deduction allowable for the equipment for the taxable year 2002 (assuming all other requirements are met).

*Example 2.* On January 5, 2002, BB purchased and placed in service new office desks for a total amount of \$8,000. On August 20, 2002, BB transferred the office desks to Partnership BC in a transaction described in section 721. BB and Partnership BC are calendar-

year taxpayers. Because the transaction between BB and Partnership BC is a transaction described in section 168(i)(7), pursuant to paragraph (f)(1)(iii) of this section the 30-percent additional first year depreciation deduction allowable for the desks is allocated between BB and Partnership BC in accordance with the rules in § 1.168(d)-1(b)(7)(ii) for allocating the depreciation deduction between the transferor and the transferee. Accordingly, the 30-percent additional first year depreciation deduction allowable for the desks for 2002 of \$2,400 (the unadjusted depreciable basis of \$8,000 multiplied by .30) is allocated between BB and Partnership BC based on the number of months that BB and Partnership BC held the desks in service. Thus, because the desks were held in service by BB for 7 of 12 months, which includes the month in which BB placed the desks in service but does not include the month in which the desks were transferred, BB is allocated \$1,400 ( $\frac{7}{12} \times \$2,400$  additional first year depreciation deduction). Partnership BC is allocated \$1,000, the remaining  $\frac{5}{12}$  of the \$2,400 additional first year depreciation deduction allowable for the desks.

(2) *Redetermination of basis.* If the unadjusted depreciable basis (as defined in § 1.168(k)-1T(a)(2)(iii)) of qualified property or 50-percent bonus depreciation property is redetermined (for example, due to contingent purchase price or discharge of indebtedness) by January 1, 2005 (or January 1, 2006, for property described in section 168(k)(2)(B)), the additional first year depreciation deduction allowable for the qualified property or the 50-percent bonus depreciation property is redetermined as follows:

(i) *Increase in basis.* For the taxable year in which an increase in basis of qualified property or 50-percent bonus depreciation property occurs, the taxpayer shall claim an additional first year depreciation deduction for qualified property by multiplying the amount of the increase in basis for this property by 30 percent or, for 50-percent bonus depreciation property, by multiplying the amount of the increase in basis for this property by 50 percent. For purposes of this paragraph (f)(2)(i), the 30-percent additional first year depreciation deduction applies to the increase in basis if the underlying property is qualified property and the 50-percent additional first year depreciation deduction applies to the increase in basis if the underlying property is 50-percent bonus depreciation property.

To determine the amount otherwise allowable as a depreciation deduction for the increase in basis of qualified property or 50-percent bonus depreciation property, the amount of the increase in basis of the qualified property or the 50-percent bonus depreciation property must be reduced by the additional first year depreciation deduction allowed or allowable, whichever is greater, for the increase in basis and the remaining increase in basis of—

(A) Qualified property or 50-percent bonus depreciation property (except for computer software described in paragraph (b)(2)(i)(B) of this section) is depreciated over the recovery period of the qualified property or the 50-percent bonus depreciation property, as applicable, remaining as of the beginning of the taxable year in which the increase in basis occurs, and using the same depreciation method and convention applicable to the qualified property or 50-percent bonus depreciation property, as applicable, that applies for the taxable year in which the increase in basis occurs; and

(B) Computer software (as defined in paragraph (b)(2)(i)(B) of this section) that is qualified property or 50-percent bonus depreciation property is depreciated ratably over the remainder of the 36-month period (the useful life under section 167(f)(1)) as of the beginning of the first day of the month in which the increase in basis occurs.

(ii) *Decrease in basis.* For the taxable year in which a decrease in basis of qualified property or 50-percent bonus depreciation property occurs, the taxpayer shall include in the taxpayer's income the excess additional first year depreciation deduction previously claimed for the qualified property or the 50-percent bonus depreciation property. This excess additional first year depreciation deduction for qualified property is determined by multiplying the amount of the decrease in basis for this property by 30 percent. The excess additional first year depreciation deduction for 50-percent bonus depreciation property is determined by multiplying the amount of the decrease in basis for this property by 50 percent. For purposes of this paragraph (f)(2)(ii), the 30-percent additional first year depreciation deduction applies to the de-

crease in basis if the underlying property is qualified property and the 50-percent additional first year depreciation deduction applies to the decrease in basis if the underlying property is 50-percent bonus depreciation property. Also, if the taxpayer establishes by adequate records or other sufficient evidence that the taxpayer claimed less than the additional first year depreciation deduction allowable for the qualified property or the 50-percent bonus depreciation property before the decrease in basis, the excess additional first year depreciation deduction is determined by multiplying the amount of the decrease in basis by the additional first year depreciation deduction percentage actually claimed by the taxpayer for the qualified property or the 50-percent bonus depreciation property, as applicable, before the decrease in basis. To determine the amount includible in the taxpayer's income for the excess depreciation previously claimed (other than the additional first year depreciation deduction) resulting from the decrease in basis of the qualified property or the 50-percent bonus depreciation property, the amount of the decrease in basis of the qualified property or the 50-percent bonus depreciation property must be adjusted by the excess additional first year depreciation deduction includible in the taxpayer's income (as determined under this paragraph) and the remaining decrease in basis of—

(A) Qualified property or 50-percent bonus depreciation property (except for computer software described in paragraph (b)(2)(i)(B) of this section) is included in the taxpayer's income over the recovery period of the qualified property or the 50-percent bonus depreciation property, as applicable, remaining as of the beginning of the taxable year in which the decrease in basis occurs, and using the same depreciation method and convention of the qualified property or 50-percent bonus depreciation property, as applicable, that applies in the taxable year in which the decrease in basis occurs; and

(B) Computer software (as defined in paragraph (b)(2)(i)(B) of this section) that is qualified property or 50-percent bonus depreciation property is included in the taxpayer's income ratably over the remainder of the 36-month period (the useful life under section 167(f)(1)) as of the beginning of the first day of the month in which the decrease in basis occurs.

(iii) *Definition.* For purposes of this paragraph (f)(2)—

(A) An increase in basis occurs in the taxable year an amount is taken into account under section 461; and

(B) A decrease in basis occurs in the taxable year an amount would be taken into account under section 451.

(iv) *Examples.* The application of this paragraph (f)(2) is illustrated by the following examples:

*Example 1.* (i) On May 15, 2002, CC, a cash-basis taxpayer, purchased and placed in service qualified property that is 5-year property at a cost of \$200,000. In addition to the \$200,000, CC agrees to pay the seller 25 percent of the gross profits from the operation of the property in 2002. On May 15, 2003, CC paid to the seller an additional \$10,000. CC depreciates the 5-year property placed in service in 2002 using the optional depreciation table that corresponds with the general depreciation system, the 200-percent declining balance method, a 5-year recovery period, and the half-year convention.

(ii) For 2002, CC is allowed a 30-percent additional first year depreciation deduction of \$60,000 (the unadjusted depreciable basis of \$200,000 multiplied by .30). In addition, CC's depreciation deduction for 2002 for the remaining adjusted depreciable basis of \$140,000 (the unadjusted depreciable basis of \$200,000 reduced by the additional first year depreciation deduction of \$60,000) is \$28,000 (the remaining adjusted depreciable basis of \$140,000 multiplied by the annual depreciation rate of .20 for recovery year 1).

(iii) For 2003, CC's depreciation deduction for the remaining adjusted depreciable basis of \$140,000 is \$44,800 (the remaining adjusted depreciable basis of \$140,000 multiplied by the annual depreciation rate of .32 for recovery year 2). In addition, pursuant to paragraph (f)(2)(i) of this section, CC is allowed an additional first year depreciation deduction for 2003 for the \$10,000 increase in basis of the qualified property. Consequently, CC is allowed an additional first year depreciation deduction of \$3,000 (the increase in basis of \$10,000 multiplied by .30). Also, CC is allowed a depreciation deduction for 2003 attributable to the remaining increase in basis of \$7,000 (the increase in basis of \$10,000 reduced by the additional first year depreciation de-

duction of \$3,000). The depreciation deduction allowable for 2003 attributable to the remaining increase in basis of \$7,000 is \$3,111 (the remaining increase in basis of \$7,000 multiplied by .4444, which is equal to 1/remaining recovery period of 4.5 years at January 1, 2003, multiplied by 2). Accordingly, for 2003, CC's total depreciation deduction allowable for the qualified property is \$50,911.

*Example 2.* (i) On May 15, 2002, CC purchased and placed in service qualified property that is 5-year property at a cost of \$400,000. To purchase the property, DD borrowed \$250,000 from Bank2. On May 15, 2003, Bank2 forgives \$50,000 of the indebtedness. DD makes the election provided in section 108(b)(5) to apply any portion of the reduction under section 1017 to the basis of the depreciable property of the taxpayer. DD depreciates the 5-year property placed in service in 2002 using the optional depreciation table that corresponds with the general depreciation system, the 200-percent declining balance method, a 5-year recovery period, and the half-year convention.

(ii) For 2002, DD is allowed a 30-percent additional first year depreciation deduction of \$120,000 (the unadjusted depreciable basis of \$400,000 multiplied by .30). In addition, DD's depreciation deduction allowable for 2002 for the remaining adjusted depreciable basis of \$280,000 (the unadjusted depreciable basis of \$400,000 reduced by the additional first year depreciation deduction of \$120,000) is \$56,000 (the remaining adjusted depreciable basis of \$280,000 multiplied by the annual depreciation rate of .20 for recovery year 1).

(iii) For 2003, DD's deduction for the remaining adjusted depreciable basis of \$280,000 is \$89,600 (the remaining adjusted depreciable basis of \$280,000 multiplied by the annual depreciation rate of .32 for recovery year 2). However, pursuant to paragraph (f)(2)(ii) of this section, DD must include in its taxable income for 2003 the excess depreciation previously claimed for the \$50,000 decrease in basis of the qualified property. Consequently, DD must include in its taxable income for 2003 the excess additional first year depreciation of \$4,500 (the decrease in basis of \$50,000 multiplied by .30). Also, DD must include in its taxable income for 2003 the excess depreciation attributable to the remaining decrease in basis of \$45,500 (the decrease in basis of \$50,000 reduced by the excess additional first year depreciation of \$4,500). The amount includible in taxable income for 2003 for the remaining decrease in basis of \$45,500 is \$20,222 (the remaining decrease in basis of \$45,500 multiplied by .4444, which is equal to 1/remaining recovery period of 4.5 years at January 1, 2003, multiplied by 2). Accordingly, for 2003, DD's total depreciation deduction allowable for the qualified property is \$64,878 (\$89,600 minus \$4,500 minus \$20,222).

(3) *Section 1245 and 1250 depreciation recapture.* For purposes of section 1245 and the regulations thereunder, the additional first year depreciation deduction is an amount allowed or allowable for depreciation. Further, for purposes of section 1250(b) and the regulations thereunder, the additional first year depreciation deduction is not a straight line method.

(4) *Coordination with section 169.* The additional first year depreciation deduction is allowable in the placed-in-service year of a certified pollution control facility (as defined in §1.169-2(a)) that is qualified property or 50-percent bonus depreciation property, even if the taxpayer makes the election to amortize the certified pollution control facility under section 169 and the regulations thereunder in the certified pollution control facility's placed-in-service year.

(5) *Like-kind exchanges and involuntary conversions*—(i) *Scope.* The rules of this paragraph (f)(5) apply to acquired MACRS property or acquired computer software that is eligible for the additional first year depreciation deduction under section 168(k) at the time of replacement provided the time of replacement is after September 10, 2001, and before January 1, 2005, or, in the case of acquired MACRS property or acquired computer software that is qualified property, or 50-percent bonus depreciation property, described in section 168(k)(2)(B), the time of replacement is after September 10, 2001, and before January 1, 2006.

(ii) *Definitions.* For purposes of this paragraph (f)(5), the following definitions apply:

(A) *Acquired MACRS property* is MACRS property in the hands of the acquiring taxpayer that is acquired in a transaction described in section 1031(a), (b), or (c) for other MACRS property or that is acquired in connection with an involuntary conversion of other MACRS property in a transaction to which section 1033 applies.

(B) *Exchanged or involuntarily converted MACRS property* is MACRS property that is transferred by the taxpayer in a transaction described in section 1031(a), (b), or (c), or that is converted as a result of an involuntary

conversion to which section 1033 applies.

(C) *Acquired computer software* is computer software (as defined in paragraph (b)(2)(i)(B) of this section) in the hands of the acquiring taxpayer that is acquired in a like-kind exchange under section 1031 or as a result of an involuntary conversion under section 1033.

(D) *Exchanged or involuntarily converted computer software* is computer software (as defined in paragraph (b)(2)(i)(B) of this section) that is transferred by the taxpayer in a like-kind exchange under section 1031 or that is converted as a result of an involuntary conversion under section 1033.

(E) *Time of disposition* is when the disposition of the exchanged or involuntarily converted MACRS property or the exchanged or involuntarily converted computer software, as applicable, takes place.

(F) *Time of replacement* is the later of:

(1) When the property received in the exchange or involuntary conversion is placed in service; or

(2) The time of disposition of the exchanged or involuntarily converted property.

(G) *Carryover basis* is the lesser of:

(1) The basis in the acquired MACRS property or acquired computer software, as applicable and as determined under section 1031(d) or 1033(b) and the regulations thereunder; or

(2) The adjusted depreciable basis of the exchanged or involuntarily converted MACRS property or the exchanged or involuntarily converted computer software, as applicable.

(H) *Excess basis* is any excess of the basis in the acquired MACRS property or acquired computer software, as applicable and as determined under section 1031(d) or 1033(b) and the regulations thereunder, over the carryover basis as determined under paragraph (f)(5)(ii)(G) of this section.

(I) *Remaining carryover basis* is the carryover basis as determined under paragraph (f)(5)(ii)(G) of this section reduced by—

(1) The percentage of the taxpayer's use of property for the taxable year other than in the taxpayer's trade or business (or for the production of income); and

(2) Any adjustments to basis provided by other provisions of the Code and the regulations thereunder (including section 1016(a)(2) and (3)) for periods prior to the disposition of the exchanged or involuntarily converted property.

(J) *Remaining excess basis* is the excess basis as determined under paragraph (f)(5)(ii)(H) of this section reduced by—

(1) The percentage of the taxpayer's use of property for the taxable year other than in the taxpayer's trade or business (or for the production of income);

(2) Any portion of the basis the taxpayer properly elects to treat as an expense under section 179; and

(3) Any adjustments to basis provided by other provisions of the Code and the regulations thereunder.

(iii) *Computation*—(A) *In general.* Assuming all other requirements are met, the remaining carryover basis for the year of replacement and the remaining excess basis, if any, for the year of replacement for the acquired MACRS property or the acquired computer software, as applicable, are eligible for the additional first year depreciation deduction. The 30-percent additional first year depreciation deduction applies to the remaining carryover basis and the remaining excess basis, if any, of the acquired MACRS property or the acquired computer software if the time of replacement is after September 10, 2001, and before May 6, 2003, or if the taxpayer made the election provided in paragraph (e)(1)(ii)(A) of this section. The 50-percent additional first year depreciation deduction applies to the remaining carryover basis and the remaining excess basis, if any, of the acquired MACRS property or the acquired computer software if the time of replacement is after May 5, 2003, and before January 1, 2005, or before January 1, 2006, for 50-percent bonus depreciation property described in section 168(k)(2)(B). The additional first year depreciation deduction is computed separately for the remaining carryover basis and the remaining excess basis. Rules similar to the rules provided in paragraph (d) of this section apply to property described in section 168(k)(2)(B) and for alternative minimum tax purposes (for example, use

the remaining carryover basis as determined for alternative minimum tax purposes).

(B) *Year of disposition and year of replacement.* The additional first year depreciation deduction is allowable for the acquired MACRS property or acquired computer software in the year of replacement. However, the additional first year depreciation deduction is not allowable for the exchanged or involuntarily converted MACRS property or the exchanged or involuntarily converted computer software if the MACRS property or computer software, as applicable, is placed in service and disposed of in an exchange or involuntary conversion in the same taxable year.

(iv) *Sale-leaseback transaction.* For purposes of this paragraph (f)(5), if MACRS property or computer software is sold to a taxpayer and leased back to a person by the taxpayer within three months after the time of disposition of the MACRS property or computer software, as applicable, the time of replacement for this MACRS property or computer software, as applicable, shall not be earlier than the date on which the MACRS property or computer software, as applicable, is used by the lessee under the leaseback.

(v) *Examples.* The application of this paragraph (f)(5) is illustrated by the following examples:

*Example 1.* (i) In December 2002, EE, a calendar-year corporation, acquired for \$200,000 and placed in service Canopy V1, a gas station canopy. Canopy V1 is qualified property under section 168(k)(1) and is 5-year property under section 168(e). EE depreciated Canopy V1 under the general depreciation system of section 168(a) by using the 200-percent declining balance method of depreciation, a 5-year recovery period, and the half-year convention. EE elected to use the optional depreciation tables to compute the depreciation allowance for Canopy V1. On January 1, 2003, Canopy V1 was destroyed in a fire and was no longer usable in EE's business. On June 1, 2003, in an involuntary conversion, EE acquired and placed in service Canopy W1 with all of the \$160,000 of insurance proceeds EE received due to the loss of Canopy V1. Canopy W1 is 50-percent bonus depreciation property under section 168(k)(4) and is 5-year property under section 168(e). Pursuant to paragraph (g)(3)(ii) of this section and § 1.168(i)-6T(k)(2)(i), EE decided to apply § 1.168(i)-6T to the involuntary conversion of

Canopy V1 with the replacement of Canopy W1, the acquired MACRS property.

(i) For 2002, EE is allowed a 30-percent additional first year depreciation deduction of \$60,000 for Canopy V1 (the unadjusted depreciable basis of \$200,000 multiplied by .30), and a regular MACRS depreciation deduction of \$28,000 for Canopy V1 (the remaining adjusted depreciable basis of \$140,000 multiplied by the annual depreciation rate of .20 for recovery year 1).

(iii) For 2003, EE is allowed a regular MACRS depreciation deduction of \$22,400 for Canopy V1 (the remaining adjusted depreciable basis of \$140,000 multiplied by the annual depreciation rate of .32 for recovery year  $2 \times \frac{1}{2}$  year).

(iv) Pursuant to paragraph (f)(5)(iii)(A) of this section, the additional first year depreciation deduction allowable for Canopy W1 equals \$44,800 (.50 of Canopy W1's remaining carryover basis at the time of replacement of \$89,600 (Canopy V1's remaining adjusted depreciable basis of \$140,000 minus 2002 regular MACRS depreciation deduction of \$28,000 minus 2003 regular MACRS depreciation deduction of \$22,400)).

*Example 2.* (i) Same facts as in *Example 1*, except EE elected not to deduct the additional first year depreciation for 5-year property placed in service in 2002. EE deducted the additional first year depreciation for 5-year property placed in service in 2003.

(ii) For 2002, EE is allowed a regular MACRS depreciation deduction of \$40,000 for Canopy V1 (the unadjusted depreciable basis of \$200,000 multiplied by the annual depreciation rate of .20 for recovery year 1).

(iii) For 2003, EE is allowed a regular MACRS depreciation deduction of \$32,000 for Canopy V1 (the unadjusted depreciable basis of \$200,000 multiplied by the annual depreciation rate of .32 for recovery year  $2 \times \frac{1}{2}$  year).

(iv) Pursuant to paragraph (f)(5)(iii)(A) of this section, the additional first year depreciation deduction allowable for Canopy W1 equals \$64,000 (.50 of Canopy W1's remaining carryover basis at the time of replacement of \$128,000 (Canopy V1's unadjusted depreciable basis of \$200,000 minus 2002 regular MACRS depreciation deduction of \$40,000 minus 2003 regular MACRS depreciation deduction of \$32,000)).

*Example 3.* (i) In December 2001, FF, a calendar-year corporation, acquired for \$10,000 and placed in service Computer X2. Computer X2 is qualified property under section 168(k)(1) and is 5-year property under section 168(e). FF depreciated Computer X2 under the general depreciation system of section 168(a) by using the 200-percent declining balance method of depreciation, a 5-year recovery period, and the half-year convention. FF elected to use the optional depreciation tables to compute the depreciation allowance for Computer X2. On January 1, 2002, FF acquired Computer Y2 by exchanging Computer

X2 and \$1,000 cash in a like-kind exchange. Computer Y2 is qualified property under section 168(k)(1) and is 5-year property under section 168(e). Pursuant to paragraph (g)(3)(ii) of this section and § 1.168(i)-6T(k)(2)(i), FF decided to apply § 1.168(i)-6T to the exchange of Computer X2 for Computer Y2, the acquired MACRS property.

(ii) For 2001, FF is allowed a 30-percent additional first year depreciation deduction of \$3,000 for Computer X2 (unadjusted basis of \$10,000 multiplied by .30), and a regular MACRS depreciation deduction of \$1,400 for Computer X2 (the remaining adjusted depreciable basis of \$7,000 multiplied by the annual depreciation rate of .20 for recovery year 1).

(iii) For 2002, FF is allowed a regular MACRS depreciation deduction of \$1,120 for Computer X2 (the remaining adjusted depreciable basis of \$7,000 multiplied by the annual depreciation rate of .32 for recovery year  $2 \times \frac{1}{2}$  year).

(iv) Pursuant to paragraph (f)(5)(iii)(A) of this section, the 30-percent additional first year depreciation deduction for Computer Y2 is allowable for the remaining carryover basis at the time of replacement of \$4,480 (Computer X2's unadjusted depreciable basis of \$10,000 minus additional first year depreciation deduction allowable of \$3,000 minus 2001 regular MACRS depreciation deduction of \$1,400 minus 2002 regular MACRS depreciation deduction of \$1,120) and for the remaining excess basis at the time of replacement of \$1,000 (cash paid for Computer Y2). Thus, the 30-percent additional first year depreciation deduction for the remaining carryover basis at the time of replacement equals \$1,344 (\$4,480 multiplied by .30) and for the remaining excess basis at the time of replacement equals \$300 (\$1,000 multiplied by .30), which totals \$1,644.

*Example 4.* (i) In September 2002, GG, a June 30 year-end corporation, acquired for \$20,000 and placed in service Equipment X3. Equipment X3 is qualified property under section 168(k)(1) and is 5-year property under section 168(e). GG depreciated Equipment X3 under the general depreciation system of section 168(a) by using the 200-percent declining balance method of depreciation, a 5-year recovery period, and the half-year convention. GG elected to use the optional depreciation tables to compute the depreciation allowance for Equipment X3. In December 2002, GG acquired Equipment Y3 by exchanging Equipment X3 and \$5,000 cash in a like-kind exchange. Equipment Y3 is qualified property under section 168(k)(1) and is 5-year property under section 168(e). Pursuant to paragraph (g)(3)(ii) of this section and § 1.168(i)-6T(k)(2)(i), GG decided to apply § 1.168(i)-6T to the exchange of Equipment X3 for Equipment Y3, the acquired MACRS property.

(ii) Pursuant to paragraph (f)(5)(iii)(B) of this section, no additional first year depreciation deduction is allowable for Equipment X3 and, pursuant to § 1.168(d)-1T(b)(3)(ii), no regular depreciation deduction is allowable for Equipment X3, for the taxable year ended June 30, 2003.

(iii) Pursuant to paragraph (f)(5)(iii)(A) of this section, the 30-percent additional first year depreciation deduction for Equipment Y3 is allowable for the remaining carryover basis at the time of replacement of \$20,000 (Equipment X3's unadjusted depreciable basis of \$20,000) and for the remaining excess basis at the time of replacement of \$5,000 (cash paid for Equipment Y3). Thus, the 30-percent additional first year depreciation deduction for the remaining carryover basis at the time of replacement equals \$6,000 (\$20,000 multiplied by .30) and for the remaining excess basis at the time of replacement equals \$1,500 (\$5,000 multiplied by .30), which totals \$7,500.

*Example 5.* (i) Same facts as in *Example 4*. GG depreciated Equipment Y3 under the general depreciation system of section 168(a) by using the 200-percent declining balance method of depreciation, a 5-year recovery period, and the half-year convention. GG elected to use the optional depreciation tables to compute the depreciation allowance for Equipment Y3. On July 1, 2003, GG acquired Equipment Z1 by exchanging Equipment Y3 in a like-kind exchange. Equipment Z1 is 50-percent bonus depreciation property under section 168(k)(4) and is 5-year property under section 168(e). Pursuant to paragraph (g)(3)(ii) of this section and § 1.168(i)-6T(k)(2)(i), GG decided to apply § 1.168(i)-6T to the exchange of Equipment Y3 for Equipment Z1, the acquired MACRS property.

(ii) For the taxable year ending June 30, 2003, the regular MACRS depreciation deduction allowable for the remaining carryover basis at the time of replacement (after taking into account the additional first year depreciation deduction) of Equipment Y3 is \$2,800 (the remaining carryover basis at the time of replacement of \$20,000 minus the additional first year depreciation deduction of \$6,000, multiplied by the annual depreciation rate of .20 for recovery year 1) and for the remaining excess basis at the time of replacement (after taking into account the additional first year depreciation deduction) of Equipment Y3 is \$700 (the remaining excess basis at the time of replacement of \$5,000 minus the additional first year depreciation deduction of \$1,500, multiplied by the annual depreciation rate of .20 for recovery year 1), which totals \$3,500.

(iii) For the taxable year ending June 30, 2004, the regular MACRS depreciation deduction allowable for the remaining carryover basis (after taking into account the additional first year depreciation deduction) of Equipment Y3 is \$2,240 (the remaining carry-

over basis at the time of replacement of \$20,000 minus the additional first year depreciation deduction of \$6,000, multiplied by the annual depreciation rate of .32 for recovery year 2  $\times$   $\frac{1}{2}$  year) and for the remaining excess basis (after taking into account the additional first year depreciation deduction) of Equipment Y3 is \$560 (the remaining excess basis at the time of replacement of \$5,000 minus the additional first year depreciation deduction of \$1,500, multiplied by the annual depreciation rate of .32 for recovery year 2  $\times$   $\frac{1}{2}$  year), which totals \$2,800.

(iv) For the taxable year ending June 30, 2004, pursuant to paragraph (f)(5)(iii)(A) of this section, the 50-percent additional first year depreciation deduction for Equipment Z1 is allowable for the remaining carryover basis at the time of replacement of \$11,200 (Equipment Y3's unadjusted depreciable basis of \$25,000 minus the total additional first year depreciation deduction of \$7,500 minus the total 2003 regular MACRS depreciation deduction of \$3,500 minus the total 2004 regular depreciation deduction (taking into account the half-year convention) of \$2,800). Thus, the 50-percent additional first year depreciation deduction for the remaining carryover basis at the time of replacement equals \$5,600 (\$11,200 multiplied by .50).

(6) *Change in use*—(i) *Change in use of depreciable property.* The determination of whether the use of depreciable property changes is made in accordance with section 168(i)(5) and regulations thereunder.

(ii) *Conversion to personal use.* If qualified property or 50-percent bonus depreciation property is converted from business or income-producing use to personal use in the same taxable year in which the property is placed in service by a taxpayer, the additional first year depreciation deduction is not allowable for the property.

(iii) *Conversion to business or income-producing use*—(A) *During the same taxable year.* If, during the same taxable year, property is acquired by a taxpayer for personal use and is converted by the taxpayer from personal use to business or income-producing use, the additional first year depreciation deduction is allowable for the property in the taxable year the property is converted to business or income-producing use (assuming all of the requirements in paragraph (b) of this section are met). See paragraph (b)(3)(ii) of this section relating to the original use rules for a conversion of property to business or income-producing use.

(B) *Subsequent to the acquisition year.* If property is acquired by a taxpayer for personal use and, during a subsequent taxable year, is converted by the taxpayer from personal use to business or income-producing use, the additional first year depreciation deduction is allowable for the property in the taxable year the property is converted to business or income-producing use (assuming all of the requirements in paragraph (b) of this section are met). For purposes of paragraphs (b)(4) and (5) of this section, the property must be acquired by the taxpayer for personal use after September 10, 2001 (for qualified property), or after May 5, 2003 (for 50-percent bonus depreciation property), and converted by the taxpayer from personal use to business or income-producing use by January 1, 2005. See paragraph (b)(3)(ii) of this section relating to the original use rules for a conversion of property to business or income-producing use.

(iv) *Depreciable property changes use subsequent to the placed-in-service year—*  
(A) If the use of qualified property or 50-percent bonus depreciation property changes in the hands of the same taxpayer subsequent to the taxable year the qualified property or the 50-percent bonus depreciation property, as applicable, is placed in service and, as a result of the change in use, the property is no longer qualified property or 50-percent bonus depreciation property, as applicable, the additional first year depreciation deduction allowable for the qualified property or the 50-percent bonus depreciation property, as applicable, is not redetermined.

(B) If depreciable property is not qualified property or 50-percent bonus depreciation property in the taxable year the property is placed in service by the taxpayer, the additional first year depreciation deduction is not allowable for the property even if a change in the use of the property subsequent to the taxable year the property is placed in service results in the property being qualified property or 50-percent bonus depreciation property in the taxable year of the change in use.

(v) *Examples.* The application of this paragraph (f)(6) is illustrated by the following examples:

*Example 1.* (i) On January 1, 2002, HH, a calendar year corporation, purchased and placed in service several new computers at a total cost of \$100,000. HH used these computers within the United States for 3 months in 2002 and then moved and used the computers outside the United States for the remainder of 2002. On January 1, 2003, HH permanently returns the computers to the United States for use in its business.

(ii) For 2002, the computers are considered as used predominantly outside the United States in 2002 pursuant to § 1.48-1(g)(1)(i). As a result, the computers are required to be depreciated under the alternative depreciation system of section 168(g). Pursuant to paragraph (b)(2)(ii)(A)2 of this section, the computers are not qualified property in 2002, the placed-in-service year. Thus, pursuant to (f)(6)(iv)(B) of this section, no additional first year depreciation deduction is allowed for these computers, regardless of the fact that the computers are permanently returned to the United States in 2003.

*Example 2.* (i) On February 8, 2002, II, a calendar year corporation, purchased and placed in service new equipment at a cost of \$1,000,000 for use in its California plant. The equipment is 5-year property under section 168(e) and is qualified property under section 168(k). II depreciates its 5-year property placed in service in 2002 using the optional depreciation table that corresponds with the general depreciation system, the 200-percent declining balance method, a 5-year recovery period, and the half-year convention. On June 4, 2003, due to changes in II's business circumstances, II permanently moves the equipment to its plant in Mexico.

(ii) For 2002, II is allowed a 30-percent additional first year depreciation deduction of \$300,000 (the adjusted depreciable basis of \$1,000,000 multiplied by .30). In addition, II's depreciation deduction allowable in 2002 for the remaining adjusted depreciable basis of \$700,000 (the unadjusted depreciable basis of \$1,000,000 reduced by the additional first year depreciation deduction of \$300,000) is \$140,000 (the remaining adjusted depreciable basis of \$700,000 multiplied by the annual depreciation rate of .20 for recovery year 1).

(iii) For 2003, the equipment is considered as used predominantly outside the United States pursuant to § 1.48-1(g)(1)(i). As a result of this change in use, the adjusted depreciable basis of \$560,000 for the equipment is required to be depreciated under the alternative depreciation system of section 168(g) beginning in 2003. However, the additional first year depreciation deduction of \$300,000 allowed for the equipment in 2002 is not redetermined.

(7) *Earnings and profits.* The additional first year depreciation deduction is not allowable for purposes of computing earnings and profits.

(8) *Limitation of amount of depreciation for certain passenger automobiles.* For a passenger automobile as defined in section 280F(d)(5), the limitation under section 280F(a)(1)(A)(i) is increased by—

(i) \$4,600 for qualified property acquired by a taxpayer after September 10, 2001, and before May 6, 2003; and

(ii) \$7,650 for qualified property or 50-percent bonus depreciation property acquired by a taxpayer after May 5, 2003.

(9) *Section 754 election.* In general, for purposes of section 168(k) any increase in basis of qualified property or 50-percent bonus depreciation property due to a section 754 election is not eligible for the additional first year depreciation deduction. However, if qualified property or 50-percent bonus depreciation property is placed in service by a partnership in the taxable year the partnership terminates under section 708(b)(1)(B), any increase in basis of the qualified property or the 50-percent bonus depreciation property due to a section 754 election is eligible for the additional first year depreciation deduction.

(g) *Effective date—(1)(i) In general.* Except as provided in paragraphs (g)(2) and (3) of this section, this section applies to qualified property under section 168(k)(2) acquired by a taxpayer after September 10, 2001, and to 50-percent bonus depreciation property under section 168(k)(4) acquired by a taxpayer after May 5, 2003.

(ii) Except as provided in paragraph (g)(3)(ii) of this section, the applicability of this section expires on or before September 4, 2006.

(2) *Technical termination of a partnership or section 168(i)(7) transactions.* If qualified property or 50 percent bonus depreciation property is transferred in a technical termination of a partnership under section 708(b)(1)(B) or in a transaction described in section 168(i)(7) for a taxable year ending on or before September 8, 2003, and the additional first year depreciation deduction allowable for the property was not determined in accordance with paragraph (f)(1)(ii) or (iii) of this section, as applicable, the Internal Revenue Service will allow any reasonable method of determining the additional first year

depreciation deduction allowable for the property in the year of the transaction that is consistently applied to the property by all parties to the transaction.

(3)(i) *Like-kind exchanges and involuntary conversions.* If a taxpayer did not claim on a federal tax return for a taxable year ending on or before September 8, 2003, the additional first year depreciation deduction for the remaining carryover basis of qualified property or 50-percent bonus depreciation property acquired in a transaction described in section 1031(a), (b), or (c), or in a transaction to which section 1033 applies and the taxpayer did not make an election not to deduct the additional first year depreciation deduction for the class of property applicable to the remaining carryover basis, the Internal Revenue Service will treat the taxpayer's method of not claiming the additional first year depreciation deduction for the remaining carryover basis as a permissible method of accounting and will treat the amount of the additional first year depreciation deduction allowable for the remaining carryover basis as being equal to zero, provided the taxpayer does not claim the additional first year depreciation deduction for the remaining carryover basis in accordance with paragraph (g)(4)(ii) of this section.

(ii) Paragraph (f)(5)(ii)(F)(2) of this section and paragraph (f)(5)(v) of this section apply to a like-kind exchange or an involuntary conversion of MACRS property and computer software for which the time of disposition and the time of replacement both occur after February 27, 2004. For a like-kind exchange or an involuntary conversion of MACRS property for which the time of disposition, the time of replacement, or both occur on or before February 27, 2004, see §1.168(i)-6T(k)(2)(ii). For a like-kind exchange or involuntary conversion of computer software for which the time of disposition, the time of replacement, or both occur on or before February 27, 2004, a taxpayer may rely on prior guidance issued by the Internal Revenue Service for determining the depreciation deductions of the acquired computer software and the exchanged or involuntarily converted

computer software (for further guidance, see § 1.168(k)-1T(f)(5) published in the FEDERAL REGISTER on September 8, 2003 (68 FR 53000)). In relying on such guidance, a taxpayer may use any reasonable, consistent method of determining depreciation in the year of disposition and the year of replacement. The applicability of paragraph (f)(5) of this section expires on or before February 26, 2007.

(4) *Change in method of accounting*—(i) *Special rules for 2000 or 2001 returns.* If a taxpayer did not claim on the Federal tax return for the taxable year that included September 11, 2001, any additional first year depreciation deduction for a class of property that is qualified property and did not make an election not to deduct the additional first year depreciation deduction for that class of property, the taxpayer should refer to the guidance provided by the Internal Revenue Service for the time and manner of claiming the additional first year depreciation deduction for the class of property (for further guidance, see section 4 of Rev. Proc. 2002-33 (2002-1 C.B. 963), Rev. Proc. 2003-50 (2003-29 I.R.B. 119), and § 601.601(d)(2)(ii)(b) of this chapter).

(ii) *Like-kind exchanges and involuntary conversions.* If a taxpayer did not claim on a federal tax return for any taxable year ending on or before September 8, 2003, the additional first year depreciation deduction allowable for the remaining carryover basis of qualified property or 50-percent bonus depreciation property acquired in a transaction described in section 1031(a), (b), or (c), or in a transaction to which section 1033 applies and the taxpayer did not make an election not to deduct the additional first year depreciation deduction for the class of property applicable to the remaining carryover basis, the taxpayer may claim the additional first year depreciation deduction allowable for the remaining carryover basis in accordance with paragraph (f)(5) of this section either:

(A) By filing an amended return (or a qualified amended return, if applicable (for further guidance, see Rev. Proc. 94-69 (1994-2 C.B. 804) and § 601.601(d)(2)(ii)(b) of this chapter)) on or before December 31, 2003, for the

year of replacement and any affected subsequent taxable year; or,

(B) By following the applicable administrative procedures issued under § 1.446-1(e)(3)(ii) for obtaining the Commissioner's automatic consent to a change in method of accounting (for further guidance, see Rev. Proc. 2002-9 (2002-1 C.B. 327) and § 601.601(d)(2)(ii)(b) of this chapter).

[T.D. 9091, 68 FR 52992, Sept. 8, 2003; 68 FR 63734, Nov. 10, 2003, as amended by T.D. 9115, 69 FR 9546, Mar. 1, 2004; 69 FR 17586, 17587, Apr. 5, 2004]

#### § 1.168A-1 Amortization of emergency facilities; general rule.

(a) A person (including an estate or trust (see section 642(f) and § 1.642(f)-1) and a partnership (see section 703 and § 1.703-1)) is entitled, by election, to a deduction with respect to the amortization of the adjusted basis (for determining gain) of an emergency facility, such amortization to be based on a period of 60 months. As to the adjusted basis of an emergency facility, see § 1.168A-5. The taxpayer may elect to begin the 60-month amortization period with (1) the month following the month in which such facility was completed or acquired, or (2) the taxable year succeeding that in which such facility was completed or acquired (see § 1.168A-2). The date on which, or the month within which, an emergency facility is completed or acquired is to be determined upon the facts in the particular case. Ordinarily, the taxpayer is in possession of all the facts and, therefore, in a position to ascertain such date. A statement of the date ascertained by the taxpayer, together with a statement of the pertinent facts relied upon, should be filed with the taxpayer's election to take amortization deductions with respect to such facility.

(b) Generally, an amortization deduction will not be allowed with respect to an emergency facility for any taxable year unless such facility has been certified before the date of filing of the taxpayer's income tax return for such taxable year. However, this limitation does not apply in the case of a certificate made after August 22, 1957, for an emergency facility to provide primary processing for uranium ore or uranium concentrate under a program of the

Atomic Energy Commission for the development of any sources of uranium ore or uranium concentrate, if application for such certificate was filed either (1) before September 2, 1958, and before the expiration of six months after the beginning of construction, reconstruction, erection, or installation or the date of acquisition of the facility, or (2) after September 1, 1958, and on or before December 2, 1958.

(c) In general, with respect to each month of the 60-month period which falls within the taxable year, the amortization deduction is an amount equal to the adjusted basis of the facility at the end of each month divided by the number of months (including the particular month for which the deduction is computed) remaining in the 60-month period. The adjusted basis at the end of any month shall be computed without regard to the amortization deduction for such month. The total amortization deduction with respect to an emergency facility for a particular taxable year is the sum of the amortization deductions allowable for each month of the 60-month period which falls within such taxable year. The amortization deduction taken for any month is in lieu of the deduction for depreciation which would otherwise be allowable under section 167. See, however, §1.168A-6, relating to depreciation with respect to any portion of the emergency facility not subject to amortization.

(d) This section may be illustrated by the following examples:

*Example (1).* On July 1, 1954, the X Corporation, which makes its income tax returns on the calendar year basis, begins the construction of an emergency facility which is completed on September 30, 1954, at a cost of \$240,000. The certificate covers the entire construction. The X Corporation elects to take amortization deductions with respect to the facility and to begin the 60-month amortization period with October, the month following its completion. The adjusted basis of the facility at the end of October is \$240,000. The allowable amortization deduction with respect to such facility for the taxable year 1954 is \$12,000, computed as follows:

Monthly amortization deductions:	
October: \$240,000 divided by 60 .....	\$4,000
November: \$236,000 (\$240,000 minus \$4,000) divided by 59 .....	4,000
December: \$232,000 (\$236,000 minus \$4,000) divided by 58 .....	4,000

Total amortization deduction for 1954 ..... 12,000

*Example (2).* The Y Corporation, which makes its income tax returns on the basis of a fiscal year ending November 30, purchases an emergency facility (No. 1) on July 29, 1955. On June 15, 1955, it begins the construction of an emergency facility (No. 2) which is completed on August 2, 1955. The entire acquisition and construction of such facilities are covered by the certificate. The Y Corporation elects to take amortization deductions with respect to both facilities and to begin the 60-month amortization period in each case with the month following the month of acquisition or completion. At the end of the first month of the amortization period the adjusted basis of facility No. 1 is \$300,000 and the adjusted basis of facility No. 2 is \$54,000. In September 1955, facility No. 1 is damaged by fire, as a result of which its adjusted basis is properly reduced by \$25,370. The allowable amortization deduction with respect to such facilities for the taxable year ending November 30, 1955, is \$21,410, computed as follows:

<i>Facility No. 1</i>	
Monthly amortization deductions:	
August: \$300,000 divided by 60 .....	\$5,000
September: \$269,630 (\$300,000 minus \$5,000 and \$25,370) divided by 59 .....	4,570
October: \$265,060 (\$269,630 minus \$4,570) divided by 58 .....	4,570
November: \$260,490 (\$265,060 minus \$4,570) divided by 57 .....	4,570
Amortization deduction for 1955 .....	18,710
<i>Facility No. 2</i>	
Monthly amortization deductions:	
September: \$54,000 divided by 60 .....	\$900
October: \$53,100 divided by 59 .....	900
November: \$52,200 divided by 58 .....	900
Amortization deduction for 1955 .....	2,700
Total amortization deduction for 1955 .....	21,410

*Example (3).* On June 15, 1954, the Z Corporation, which makes its income tax returns on the calendar year basis, completes the construction of an emergency facility at a cost of \$110,000. In its income tax return for 1954, filed on March 15, 1955, the Z Corporation elects to take amortization deductions with respect to such facility and to begin the 60-month amortization period with July 1954, the month following its completion. No certificate with respect to such facility is made until April 10, 1955, and therefore no amortization deduction with respect to such facility is allowable for any month in the taxable year 1954. The Z Corporation is entitled, however, to take a deduction for depreciation of such facility for the taxable year 1954, such deduction being assumed, for the purposes of this example, to be \$2,000. Accordingly, the adjusted basis of such facility at the end of January 1955 (without regard to the amortization deduction for such month)

§ 1.168A-2

is \$108,000 (\$110,000 minus \$2,000). For the taxable year 1955, the Z Corporation is, with respect to such facility, entitled to an amortization deduction of \$24,000, computed as follows:

Monthly amortization deductions:	
January: \$108,000 divided by 54 .....	\$2,000
February: \$106,000 (\$108,000 minus \$2,000) divided by 53 .....	2,000
March: \$104,000 (\$106,000 minus \$2,000) divided by 52 .....	2,000
For the remaining nine months (similarly computed) .....	18,000
<b>Total amortization deduction for 1955 .....</b>	<b>24,000</b>

Since the Z Corporation elected in its return for 1954 to take amortization deductions with respect to such facility and to begin the 60-month amortization period with July 1954, it must compute its amortization deductions for the 12 months in the taxable year 1955 on the basis of the remaining months of the established 60-month amortization period, as indicated in the above computation.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 21, 1960. Redesignated and amended by T.D. 8116, 51 FR 46618, Dec. 24, 1986]

§ 1.168A-2 Election of amortization.

(a) *General rule.* An election by the taxpayer to take amortization deductions with respect to an emergency facility and to begin the 60-month amortization period either with the month following the month in which such facility was completed or acquired, or with the taxable year succeeding the taxable year in which such facility was completed or acquired, shall be made by a statement to that effect in its return for the taxable year in which falls the first month of the 60-month amortization period so elected. However, if the facility is described in section 168(e)(2)(C) and an application for a certificate is filed within the period prescribed by section 9(c) of the Technical Amendments Act of 1958 (72 Stat. 1609) and paragraph (b) of § 1.168A-1, the election may be made by a statement in an amended income tax return for the taxable year in which falls the first month of the 60-month amortization period so elected. The statement and amended return in such case must be filed not later than 90 days after the date the certificate is made or not later than April 4, 1960, whichever is later. Amended income tax returns or claims for credit or refund should also be filed for other taxable years which are within such amortization period and which

precede the taxable year in which the election is made. Nothing in this paragraph should be construed as extending the time specified in section 6511 within which a claim for credit or refund may be filed.

(b) *Election not made, in prescribed manner.* If the statement of election is not made by the taxpayer as prescribed in paragraph (a) of this section, it may, in the discretion of the Commissioner and for good cause shown, be made in such manner and form and within such time as may be approved by the Commissioner.

(c) *Other requirements and considerations.* No method of making such election other than those prescribed in this section and corresponding sections of prior regulations is permitted. Any statement of election should contain a description clearly identifying each emergency facility for which an amortization deduction is claimed. A taxpayer which does not elect, in the manner prescribed in this section or corresponding sections of prior regulations, to take amortization deductions with respect to an emergency facility shall not be entitled to such deductions.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 21, 1960. Redesignated and amended by T.D. 8116, 51 FR 46618, Dec. 24, 1986]

§ 1.168A-3 Election to discontinue amortization.

(a) If a taxpayer has elected to take amortization deductions with respect to an emergency facility, it may, after such election and prior to the expiration of the 60-month amortization period, discontinue the amortization deductions for the remainder of the 60-month period. An election to discontinue the amortization deductions shall be made by a notice in writing filed with the district director for the internal revenue district in which the return of the taxpayer is required to be filed, specifying the month as of the beginning of which the taxpayer elects to discontinue such deductions. Such notice shall be filed before the beginning of the month specified therein, and shall contain a description clearly identifying the emergency facility with respect to which the taxpayer elects to

## Internal Revenue Service, Treasury

## § 1.168A-4

discontinue the amortization deductions. If the taxpayer so elects to discontinue the amortization deductions, it shall not be entitled to any further amortization deductions with respect to such facility.

(b) A taxpayer which thus elects to discontinue amortization deductions with respect to an emergency facility is entitled, if such facility is depreciable property under section 167 and the regulations thereunder, to a deduction for depreciation with respect to such facility. The deduction for depreciation shall begin with the first month as to which the amortization deduction is not applicable, and shall be computed on the adjusted basis of the property as of the beginning of such month (see section 1011 and the regulations thereunder).

(c) This section may be illustrated by the following example:

*Example.* On July 1, 1954, the X Corporation, which makes its income tax returns on the calendar year basis, purchases an emergency facility, consisting of land with a building thereon, at a cost of \$306,000 of which \$60,000 is allocable to the land and \$246,000 to the building. The certificate covers the entire acquisition. The corporation elects to take amortization deductions with respect to the facility and to begin the 60-month amortization period with the taxable year 1955. Depreciation of the building in the amount of \$6,000 is deducted and allowed for the taxable year 1954. On March 25, 1956, the corporation files notice with the district director of its election to discontinue the amortization deductions beginning with the month of April 1956. The adjusted basis of the facility on January 31, 1955, is \$300,000, or the cost of the facility (\$306,000) less the depreciation allowed for 1954 (\$6,000). The amortization deductions for the taxable year 1955 and the months of January, February, and March 1956, amount to \$75,000, or \$5,000 per month for 15 months. Since, at the beginning of the amortization period (January 1, 1955), the adjusted basis of the land (\$60,000) is one-fifth of the adjusted basis of the entire facility (\$300,000) and since there are no adjustments to basis other than on account of amortization during the period, the adjusted basis of the land should be reduced by \$15,000, or one-fifth of the entire amortization deduction, and the adjusted basis of the building should be reduced by \$60,000, or four-fifths of the entire amortization deduction. Accordingly, the adjusted basis of the facility as of April 1, 1956, is \$225,000, of which \$180,000 is allocable to the building for the purpose of

depreciation deductions under section 167, and \$45,000 is allocable to the land.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 21, 1960. Redesignated by T.D. 8116, 51 FR 46619, Dec. 24, 1986]

### § 1.168A-4 Definitions.

As used in the regulations under section 168, the term—

(a) “Certifying authority” means the certifying authority designated by the President by Executive order.

(b) “Emergency facility” means any facility, land, building, machinery, or equipment, or any part thereof, the acquisition of which occurred after December 31, 1949, or the construction, reconstruction, erection, or installation of which was completed after such date, and with respect to which a certificate under section 168(e) has been made. In the case of an application for a certificate under section 168(e) which is filed after March 23, 1951, only the part of any such facility which is constructed, reconstructed, erected, or installed by any person not earlier than six months prior to the filing of such application, and which is certified in accordance with section 168(e), shall be deemed to be an emergency facility, notwithstanding that the other part of such facility was constructed, reconstructed, erected, or installed earlier than six months prior to the filing of such application. However, if the facility is one described in section 168(e)(2)(C) and the application was filed after September 1, 1958, and on or before December 2, 1958, the preceding sentence shall not apply. The term “emergency facility,” as so defined, may include, among other things, improvements of land, such as the construction of roads, bridges, and airstrips, and the dredging of channels.

(c) “Emergency period” means the period beginning on January 1, 1950, and ending on the date on which the President proclaims that the utilization of a substantial portion of the certified emergency facilities is no longer required in the interest of national defense.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 21, 1960. Redesignated by T.D. 8116, 51 FR 46619, Dec. 24, 1986]

**§ 1.168A-5 Adjusted basis of emergency facility.**

(a) *In general.* (1) The adjusted basis of an emergency facility for the purpose of computing the amortization deduction may differ from what would otherwise constitute the adjusted basis of such emergency facility in that it shall be the adjusted basis for determining gain (see Part II (section 1011 and following), Subchapter O, Chapter 1 of the Code) and in that it may be only a portion of what would otherwise constitute the adjusted basis. It will be only a portion of such other adjusted basis if only a portion of the basis (unadjusted) is attributable to certified construction, reconstruction, erection, installation, or acquisition taking place after December 31, 1949. Also, it will be only a portion of what would otherwise constitute the adjusted basis of the emergency facility if only a portion of the basis (unadjusted) is certified as attributable to defense purposes or, in the case of a certification after August 22, 1957, if only a portion of the basis (unadjusted) is certified as attributable to the national defense program. It is therefore necessary first to determine the unadjusted basis of the emergency facility from which the adjusted basis for amortization purposes is derived.

(2) The unadjusted basis for amortization purposes is the same as the unadjusted basis otherwise determined only when the entire construction, reconstruction, erection, installation, or acquisition takes place after December 31, 1949, and is certified in its entirety by the certifying authority.

(3) In cases in which only a portion of the construction, reconstruction, erection, installation, or acquisition takes place after December 31, 1949, and that portion is certified in its entirety by the certifying authority, the unadjusted basis for the purpose of amortization is so much of the entire unadjusted basis as is attributable to the certified construction, reconstruction, erection, installation, or acquisition which takes place after December 31, 1949. For example, the X Corporation begins the construction of a facility on November 15, 1949, and such facility is completed on April 1, 1952, at a cost of \$5,000,000, of which \$4,600,000 is

attributable to construction after December 31, 1949. The entire construction after December 31, 1949, is certified by the certifying authority. The unadjusted basis of the emergency facility for amortization purposes is therefore \$4,600,000. For depreciation of the remaining portion (\$400,000) of the cost see § 1.168A-6.

(4) If the certifying authority certifies only a portion of the construction, reconstruction, erection, installation, or acquisition of property which takes place after December 31, 1949, the unadjusted basis for amortization purposes is limited to such portion so certified. Assuming the same facts as in the example in subparagraph (3) of this paragraph, except that only 50 percent of the construction, reconstruction, erection, installation, or acquisition after December 31, 1949, is certified, the unadjusted basis for amortization purposes is 50 percent of \$4,600,000, or \$2,300,000.

(5) The adjusted basis of an emergency facility for amortization purposes is the unadjusted basis for amortization purposes less the adjustments properly applicable thereto. Such adjustments are those specified in sections 1016 and 1017, except that no adjustments are to be taken into account which increase the adjusted basis. (See paragraph (b) of this section.) If the taxpayer constructs, reconstructs, erects, installs, or acquires an emergency facility pursuant to a cost reimbursement contract with an obligation for reimbursement by the United States of all or a part of the cost of such facility, the unadjusted basis of such facility for amortization purposes shall not include that part of the cost for which the taxpayer is entitled to reimbursement, and the amount received as reimbursement shall be treated as a capital receipt. However, amounts received by a taxpayer which represent in fact compensation by reason of termination of a government contract or payment for articles under such a contract, though denominated reimbursements for all or a part of the cost of an emergency facility, are not to be treated as capital receipts but are to be taken into account in computing

**Internal Revenue Service, Treasury**

**§ 1.168A-5**

income, and are therefore not to be applied in reduction of the basis of such facility.

(6) The following examples will illustrate the computation of the adjusted basis of an emergency facility for amortization purposes:

*Example (1).* The X Corporation completes an emergency facility on July 1, 1954, the entire unadjusted basis of which is \$500,000, and the unadjusted basis of which for the purpose of amortization is \$300,000. The X Corporation elects to begin amortization as of January 1, 1955. The only adjustment to basis for the period July 1, 1954, to January 31, 1955, other than depreciation or amortization for January 1955, is \$5,000 for depreciation for the last six months of 1954. The adjusted

basis for the purpose of amortization is therefore \$300,000 less \$3,000 ( $300,000/500,000 \times \$5,000$ ), or \$297,000.

*Example (2).* On July 31, 1956, the Y Corporation has an emergency facility (a building) which was completed on July 1, 1952, the entire basis of which is \$500,000 and the unadjusted basis of which for the purpose of amortization is \$300,000. The corporation elected to begin amortization as of January 1, 1953, at which time it was entitled to \$5,000 depreciation for the last six months of 1952. On July 1, 1956, the facility was damaged by fire, as the result of which its adjusted basis is properly reduced by \$200,000. The adjusted basis of the emergency facility as of July 1956 for the purpose of amortization and depreciation, and the adjusted basis for other purposes, are \$23,849.18, \$49,250.82, and \$73,100.00, respectively, computed as follows:

	For amortization	For depreciation	For other purposes
Unadjusted basis .....	\$300,000.00	\$200,000.00	\$500,000
Less depreciation to Jan. 1, 1953 .....	3,000.00	2,000.00	5,000
Adjusted basis January 1953 .....	297,000.00	198,000.00	495,000
Less amortization for 42 months .....	207,900.00	.....	207,900
Less depreciation for 42 months .....	.....	14,000.00	14,000
Adjusted basis at time of fire .....	89,100.00	184,000.00	273,100
Less fire loss (apportioned as explained below) .....	65,250.82	134,749.18	200,000
Adjusted basis after fire loss .....	23,849.18	49,250.82	73,100

The \$200,000 fire loss is applied against the adjusted basis for the purpose of amortization and the adjusted basis for the purpose of depreciation in the proportion that each such adjusted basis at the time of the fire bears to their sum, *i.e.*,  $89,100/273,100 \times \$200,000$  or \$65,250.82, against the amortization basis, and  $184,000/273,100 \times \$200,000$ , or \$134,749.18 against the depreciation basis.

(b) *Capital additions.* (1) If, after the completion or acquisition of an emergency facility which has been certified by the certifying authority, further expenditures are made for construction, reconstruction, erection, installation, or acquisition attributable to such facility but not covered by such certification, such expenditures shall not be added to the adjusted basis of the emergency facility for amortization purposes under such certification. If such further expenditures are separately certified in accordance with the provisions of section 168(e) (1) or (2) and this section, they are treated as certified expenditures in connection with a new and separate emergency facility and, if proper election is made, will be

taken into account in computing the adjusted basis of such new and separate emergency facility for the purpose of amortization.

(2) The application of subparagraph (1) of this paragraph may be illustrated by the following example:

*Example.* On March 1, 1954, the certifying authority certifies as an emergency facility a heating plant proposed to be constructed by the Z Corporation. Such facility is completed on July 1, 1954. The Z Corporation, on August 1, 1954, begins the installation in the plant of an additional boiler, which is not included in the certification for the plant but is certified as a new and separate emergency facility. For amortization purposes, the adjusted basis of the heating plant is determined without including the cost of the additional boiler. Such cost is taken into account in computing the adjusted basis of the new and separate emergency facility (the boiler), as to which the taxpayer has a separate election for amortization purposes and a separate amortization period.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 21, 1960. Redesignated and amended by T.D. 8116, 51 FR 46619, Dec. 24, 1986]

**§ 1.168A-6**

**26 CFR Ch. I (4-1-06 Edition)**

**§ 1.168A-6 Depreciation of portion of emergency facility not subject to amortization.**

(a) The rule that an amortization deduction with respect to an emergency facility is in lieu of any deduction for depreciation which would otherwise be allowable under section 167 is subject to the exception provided in section 168(f). Under this exception, if the property constituting such facility is depreciable property under section 167 and the regulations thereunder and if the adjusted basis of such facility as computed under section 1011 for purposes other than the amortization deductions is in excess of the adjusted basis computed for the purpose of the amortization deductions, then the excess shall be charged off over the useful life of the facility and recovered through depreciation deductions. Thus, if the construction of an emergency facility is begun on or before December 31, 1949, and completed after such date, no amortization deductions are allowable with respect to the amount attributable to such construction on or before such date (see § 1.168A-5). However, if the property constituting such facility is depreciable property under section 167 and the regulations thereunder, then the depreciation deduction provided by such section and regulations is allowable with respect to the amount attributable to such construction on or before December 31, 1949.

(b) Similarly, if only a portion of the construction, reconstruction, erection, installation, or acquisition after December 31, 1949, of an emergency facility has been certified by the certifying authority, and if such facility is depreciable property under section 167 and the regulations thereunder, then the depreciation deduction provided by such section and regulations is allowable with respect to the portion which has not been so certified.

(c) For illustration of the treatment of a depreciable portion of an emergency facility, see example (2) in paragraph (a)(6) of § 1.168A-5.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 21, 1960. Redesignated and amended by T.D. 8116, 51 FR 46619, Dec. 24, 1986]

**§ 1.168A-7 Payment by United States of unamortized cost of facility.**

(a) Section 168(g) contemplates that certain payments may be made by the United States to a taxpayer as compensation for the unamortized cost of an emergency facility. If any such payment is properly includible in gross income and has been certified, as provided in section 168(g), as having been paid under the circumstances described therein, a taxpayer which is recovering the adjusted basis of an emergency facility through amortization rather than depreciation may elect to take an amount equal to such payment as an amortization deduction with respect to such facility for the month in which such payment is so includible. Such amortization deduction shall be in lieu of the amortization deduction otherwise allowable with respect to such facility for such month, but it shall not in any case exceed the adjusted basis of such facility (see § 1.168A-5) as of the end of such month (computed without regard to any amortization deduction for such month). The election referred to in this paragraph shall be made in the return for the taxable year in which the amount of such payment is includible in gross income.

(b) If a taxpayer is recovering the adjusted basis of an emergency facility through depreciation rather than amortization, the depreciation deduction allowable under section 167 for the month in which the amount of any such payment is includible in gross income shall, at the taxpayer's election, be increased by such amount; but the total deduction with respect to the certified portion of such facility shall not in any case exceed the adjusted basis of such facility (computed as provided in section 168(e) and § 1.168A-5 for amortization purposes) as of the end of such month (computed without regard to any amount allowable for such month under section 167 or 168(g)(2)). The election referred to in this paragraph shall be made in the return for the taxable year in which the amount of such payment is includible in gross income.

(c) This section may be illustrated by the following examples:

*Example (1).* On January 31, 1954, the X Corporation purchases an emergency facility at a cost of \$600,000. The certificate covers the

entire acquisition. The X Corporation elects to take amortization deductions with respect to such facility and to begin the 60-month amortization period with February 1954, the month following the month of acquisition. On July 15, 1955, as a result of the cancellation of certain contracts with the X Corporation, the United States makes a payment of \$300,000 to the corporation as compensation for the unamortized cost of such facility. The \$300,000 payment is includible in the X Corporation's gross income for July 1955. The adjusted basis of such facility for amortization purposes as of the end of July 1955, computed without regard to any amortization deduction for such month, is \$430,000. Accordingly, the corporation is entitled to take an amortization deduction of \$300,000 for such month, in lieu of the \$10,000 amortization deduction which is otherwise allowable.

*Example (2).* On November 30, 1954, the Y Corporation purchases an emergency facility, consisting of land with a building thereon, at a cost of \$500,000, of which \$200,000 is allocable to the land and \$300,000 to the building. The certificate covers the entire acquisition. The Y Corporation does not elect to take amortization deductions with respect to such facility, but is entitled to a depreciation deduction with respect to the building at the rate of 3 percent per annum, or \$750 per month. On August 12, 1956, as a result of cancellation of certain contracts, the United States makes a payment of \$400,000 to the corporation as compensation for the unrecovered cost of such facility. The \$400,000 is includible in the Y Corporation's gross income for August 1956. The adjusted basis of the facility as of the end of August 1956, computed without regard to depreciation for such month, is \$485,000, of which amount \$200,000 is allocable to the land and \$285,000 to the building. Accordingly, the corporation is entitled to increase the \$750 depreciation deduction for August 1956 by the full amount of the \$400,000 payment.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 21, 1960. Redesignated and amended by T.D. 8116, 51 FR 46619, Dec. 24, 1986]

#### § 1.169-1 Amortization of pollution control facilities.

(a) *Allowance of deduction*—(1) *In general.* Under section 169(a), every person, at his election, shall be entitled to a deduction with respect to the amortization of the amortizable basis (as defined in § 1.169-3) of any certified pollution control facility (as defined in § 1.169-2), based on a period of 60 months. Under section 169(b) and paragraph (a) of § 1.169-4, the taxpayer may further elect to begin such 60-month period either with the month following

the month in which the facility is completed or acquired or with the first month of the taxable year succeeding the taxable year in which such facility is completed or acquired. Under section 169(c), a taxpayer who has elected under section 169(b) to take the amortization deduction provided by section 169(a) may, at any time after making such election and prior to the expiration of the 60-month amortization period, elect to discontinue the amortization deduction for the remainder of the 60-month period in the manner prescribed in paragraph (b)(1) of § 1.169-4. In addition, if on or before May 18, 1971, an election under section 169(a) has been made, consent is hereby given to revoke such election without the consent of the Commissioner in the manner prescribed in (b)(2) of § 1.169-4.

(2) *Amount of deduction.* With respect to each month of such 60-month period which falls within the taxable year, the amortization deduction shall be an amount equal to the amortizable basis of the certified pollution control facility at the end of such month divided by the number of months (including the month for which the deduction is computed) remaining in such 60-month period. The amortizable basis at the end of any month shall be computed without regard to the amortization deduction for such month. The total amortization deduction with respect to a certified pollution control facility for a taxable year is the sum of the amortization deductions allowable for each month of the 60-month period which falls within such taxable year. If a certified pollution control facility is sold or exchanged or otherwise disposed of during 1 month, the amortization deduction (if any) allowable to the original holder in respect of such month shall be that portion of the amount to which such person would be entitled for a full month which the number of days in such month during which the facility was held by such person bears to the total number of days in such month.

(3) *Effect on other deductions.* (i) The amortization deduction provided by section 169 with respect to any month

shall be in lieu of the depreciation deduction which would otherwise be allowable under section 167 or a deduction in lieu of depreciation which would otherwise be allowable under paragraph (b) of § 1.162-11 for such month.

(ii) If the adjusted basis of such facility as computed under section 1011 for purposes other than the amortization deduction provided by section 169 is in excess of the amortizable basis, as computed under § 1.169-3, such excess shall be recovered through depreciation deductions under the rules of section 167. See section 169(g).

(iii) See section 179 and paragraph (e)(1)(ii) of § 1.179-1 and paragraph (b)(2) of § 1.169-3 for additional first-year depreciation in respect of a certified pollution control facility.

(4) [Reserved]

(5) *Special rules.* (i) In the case of a certified pollution control facility held by one person for life with the remainder to another person, the amortization deduction under section 169(a) shall be computed as if the life tenant were the absolute owner of the property and shall be allowable to the life tenant during his life.

(ii) If the assets of a corporation which has elected to take the amortization deduction under section 169(a) are acquired by another corporation in a transaction to which section 381 (relating to carryovers in certain corporate acquisitions) applies, the acquiring corporation is to be treated as if it were the distributor or transferor corporation for purposes of this section.

(iii) For the right of estates and trusts to amortize pollution control facilities see section 642(f) and § 1.642(f)-1. For the allowance of the amortization deduction in the case of pollution control facilities of partnerships, see section 703 and § 1.703-1.

(6) *Depreciation subsequent to discontinuance or in the case of revocation of amortization.* A taxpayer which elects in the manner prescribed under paragraph (b) (1) of § 1.169-4 to discontinue amortization deductions or under paragraph (b) (2) of § 1.169-4 to revoke an election under section 169(a) with respect to a certified pollution control facility is entitled, if such facility is of

a character subject to the allowance for depreciation provided in section 167, to a deduction for depreciation (to the extent allowable) with respect to such facility. In the case of an election to discontinue an amortization deduction, the deduction for depreciation shall begin with the first month as to which such amortization deduction is not applicable and shall be computed on the adjusted basis of the property as of the beginning of such month (see section 1011 and the regulations thereunder). Such depreciation deduction shall be based upon the remaining portion of the period authorized under section 167 for the facility as determined, as of the first day of the first month as of which the amortization deduction is not applicable. If the taxpayer so elects to discontinue the amortization deduction under section 169(a), such taxpayer shall not be entitled to any further amortization deduction under this section and section 169(a) with respect to such pollution control facility. In the case of a revocation of an election under section 169(a), the deduction for depreciation shall begin as of the time such depreciation deduction would have been taken but for the election under section 169(a). See paragraph (b)(2) of § 1.169-4 for rules as to filing amended returns for years for which amortization deductions have been taken.

(7) *Definitions.* Except as otherwise provided in § 1.169-2, all terms used in section 169 and the regulations thereunder shall have the meaning provided by this section and §§ 1.169-2 through 1.169-4.

(b) *Examples.* This section may be illustrated by the following examples:

*Example (1).* On September 30, 1970, the X Corporation, which uses the calendar year as its taxable year, completes the installation of a facility all of which qualifies as a certified pollution control facility within the meaning of paragraph (a) of § 1.169-2. The cost of the facility is \$120,000 and the period referred to in paragraph (a)(6) of § 1.169-2 is 10 years in accordance with the rules set forth in paragraph (a) of § 1.169-4, on its income tax return filed for 1970, X elects to take amortization deductions under section 169(a) with respect to the facility and to begin the 60-month amortization period with October 1970, the month following the month in which it was completed. The amortizable basis at the end of October 1970 (determined

without regard to the amortization deduction under section 169(a) for that month) is \$120,000. The allowable amortization deduction with respect to such facility for the taxable year 1970 is \$6,000, computed as follows:

Monthly amortization deductions:	
October: \$120,000 divided by 60 .....	\$2,000
November: \$118,000 (that is, \$120,000 minus \$2,000) divided by 59 .....	2,000
December: \$116,000 (that is, \$118,000 minus \$2,000) divided by 58 .....	2,000
<b>Total amortization deduction for 1970</b> .....	<b>6,000</b>

*Example (2).* Assume the same facts as in example (1). Assume further that on May 20, 1972, X properly files notice of its election to discontinue the amortization deductions with the month of June 1972. The adjusted basis of the facility as of June 1, 1972, is \$80,000, computed as follows:

Yearly amortization deductions:	
1970 (as computed in example (1)) .....	\$6,000
1971 (computed in accordance with example (1)) .....	24,000
1972 (for the first 5 months of 1972 computed in accordance with example (1)) .....	10,000
<b>Total amortization deductions for 20 months</b> .....	<b>40,000</b>
Adjusted basis as beginning of amortization period .....	120,000
Less: Amortization deductions .....	40,000
<b>Adjusted basis as of June 1, 1972</b> .....	<b>80,000</b>

Beginning as of June 1, 1972, the deduction for depreciation under section 167 is allowable with respect to the property on its adjusted basis of \$80,000.

[T.D. 7116, 36 FR 9012, May 18, 1971; 36 FR 9770, May 28, 1971, as amended by T.D. 7203, 37 FR 17133, Aug. 25, 1972]

### § 1.169-2 Definitions.

(a) *Certified pollution control facility*—  
(1) *In general.* Under section 169 (d), the term “certified pollution control facility” means a facility which—

(i) The Federal certifying authority certifies, in accordance with the rules prescribed in paragraph (c) of this section, is a “treatment facility” described in subparagraph (2) of this paragraph, and

(ii) Is “a new identifiable facility” (as defined in paragraph (b) of this section).

For profitmaking abatement works limitation, see paragraph (d) of this section.

(2) *Treatment facility.* For purposes of subparagraph (1)(i) of this paragraph, a “treatment facility” is a facility which (i) is used to abate or control water or

atmospheric pollution or contamination by removing, altering, disposing, or storing of pollutants, contaminants, wastes, or heat and (ii) is used in connection with a plant or other property in operation before January 1, 1969. Determinations under subdivision (i) of this subparagraph shall be made solely by the Federal certifying authority. See subparagraph (3) of this paragraph. For meaning of the phrases “plant or other property” and “in operation before January 1, 1969,” see subparagraphs (4) and (5), respectively, of this paragraph.

(3) *Facilities performing multiple functions or used in connection with several plants, etc.* (i) If a facility is designed to perform or does perform a function in addition to abating or controlling water or atmospheric pollution or contamination by removing, altering, disposing or storing pollutants, contaminants, wastes, or heat, such facility shall be a treatment facility only with respect to that part of the cost thereof which is certified by the Federal certifying authority as attributable to abating or controlling water or atmospheric pollution or contamination. For example, if a machine which performs a function in addition to abating water pollution is installed at a cost of \$100,000 in, and is used only in connection with, a plant which was in operation before January 1, 1969, and if the Federal certifying authority certifies that \$30,000 of the cost of such machine is allocable to its function of abating water pollution, such \$30,000 will be deemed to be the adjusted basis for purposes of determining gain for purposes of paragraph (a) of § 1.169-3.

(ii) If a facility is used in connection with more than one plant or other property, and at least one such plant or other property was not in operation before January 1, 1969, such facility shall be a treatment facility only to the extent of that part of the cost thereof certified by the Federal certifying authority as attributable to abating or controlling water or atmospheric pollution in connection with plants or other property in operation before January 1, 1969. For example, if a machine is constructed after December 31, 1968, at a cost of \$100,000 and is used in connection with a number of plants only some

of which were in operation before January 1, 1969, and if the Federal certifying authority certifies that \$20,000 of the cost of such machine is allocable to its function of abating or controlling water pollution in connection with the plants or other property in operation before January 1, 1969, such \$20,000 will be deemed to be the adjusted basis for purposes of determining gain for purposes of paragraph (a) of § 1.169-3. In a case in which the Federal certifying authority certifies the percentage of a facility which is used in connection with plants or other property in operation before January 1, 1969, the adjusted basis for the purposes of determining gain for purposes of paragraph (a) of § 1.169-3 of the portion of the facility so used shall be the adjusted basis for determining gain of the entire facility multiplied by such percentage.

(4) *Plant or other property.* As used in subparagraph (2) of this paragraph, the phrase "plant or other property" means any tangible property whether or not such property is used in the trade or business or held for the production of income. Such term includes, for example, a papermill, a motor vehicle, or a furnace in an apartment house.

(5) *In operation before January 1, 1969.*

(i) For purposes of subparagraph (2) of this paragraph and section 169 (d), a plant or other property will be considered to be in operation before January 1, 1969, if prior to that date such plant or other property was actually performing the function for which it was constructed or acquired. For example, a papermill which is completed in July 1968, but which is not actually used to produce paper until 1969 would not be considered to be in operation before January 1, 1969. The fact that such plant or other property was only operating at partial capacity prior to January 1, 1969, or was being used as a standby facility prior to such date, shall not prevent its being considered to be in operation before such date.

(ii)(a) A piece of machinery which replaces one which was in operation prior to January 1, 1969, and which was a part of the manufacturing operation carried on by the plant but which does not substantially increase the capacity of the plant will be considered to be in

operation prior to January 1, 1969. However, an additional machine that is added to a plant which was in operation before January 1, 1969, and which represents a substantial increase in the plant's capacity will not be considered to have been in operation before such date. There shall be deemed to be a substantial increase in the capacity of a plant or other property as of the time its capacity exceeds by more than 20 percent its capacity on December 31, 1968.

(b) In addition, if the total replacements of equipment in any single taxable year beginning after December 31, 1968, represents the replacement of a substantial portion of a manufacturing plant which had been in operation before such date, such replacement shall be considered to result in a new plant which was not in operation before such date. Thus, if a substantial portion of a plant which was in existence before January 1, 1969, is subsequently destroyed by fire and such substantial portion is replaced in a taxable year beginning after that date, such replacement property shall not be considered to have been in operation before January 1, 1969. The replacement of a substantial portion of a plant or other property shall be deemed to have occurred if, during a single taxable year, the taxpayer replaces manufacturing or production facilities or equipment which comprises such plant or other property and which has an adjusted basis (determined without regard to the adjustments provided in section 1016(a) (2) and (3)) in excess of 20 percent of the adjusted basis (so determined) of such plant or other property determined as of the first day of such taxable year.

(6) *Useful life.* For purposes of section 169 and the regulations thereunder, the terms "useful life" and "actual useful life" shall mean the shortest period authorized under section 167 and the regulations thereunder if an election were not made under section 169.

(b) *New identifiable facility*—(1) *In general.* For purposes of paragraph (a)(1)(ii) of this section, the term "new identifiable facility" includes only tangible property (not including a building and its structural components referred to

in subparagraph (2)(i) of this paragraph, other than a building and its structural components which under subparagraph (2)(ii) of this paragraph is exclusively a treatment facility) which—

(i) Is of a character subject to the allowance for depreciation provided in section 167,

(ii)(a) Is property the construction, reconstruction, or erection (as defined in subparagraph (2)(iii) of this paragraph) of which is completed by the taxpayer after December 31, 1968, or

(b) Is property acquired by the taxpayer after December 31, 1968, if the original use of the property commences with the taxpayer and commences after such date (see subparagraph (2)(iii) of this paragraph), and

(iii) Is placed in service (as defined in subparagraph (2)(v) of this paragraph) prior to January 1, 1975.

(2) *Meaning of terms.* (i) For purposes of subparagraph (1) of this paragraph, the terms “building” and “structural component” shall be construed in a manner consistent with the principles set forth in paragraph (e) of §1.48-1. Thus, for example, the following rules are applicable:

(a) The term “building” generally means any structure or edifice enclosing a space within its walls, and usually covered by a roof, the purpose of which is, for example, to provide shelter or housing, or to provide working, office, parking, display, or sales space. The term includes, for example, structures such as apartment houses, factory and office buildings, warehouses, barns, garages, railway or bus stations, and stores. Such term includes any such structure constructed by, or for, a lessee even if such structure must be removed, or ownership of such structure reverts to the lessor, at the termination of the lease. Such term does not include (1) a structure which is essentially an item of machinery or equipment, or (2) an enclosure which is so closely combined with the machinery or equipment which it supports, houses, or serves that it must be replaced, retired, or abandoned contemporaneously with such machinery or equipment, and which is depreciated over the life of such machinery or equipment. Thus, the term “building”

does not include such structures as oil and gas storage tanks, grain storage bins, silos, fractioning towers, blast furnaces, coke ovens, brick kilns, and coal tipples.

(b) The term “structural components” includes, for example, chimneys, and other components relating to the operating or maintenance of a building. However, the term “structural components” does not include machinery or a device which serves no function other than the abatement or control of water or atmospheric pollution.

(ii) For purposes of subparagraph (1) of this paragraph, a building and its structural components will be considered to be exclusively a treatment facility if its only function is the abatement or control of air or water pollution. However, the incidental recovery of profits from wastes or otherwise shall not be deemed to be a function other than the abatement or control of air or water pollution. A building and its structural components which serve no function other than the treatment of wastes will be considered to be exclusively a treatment facility even if it contains areas for employees to operate the treatment facility, rest rooms for such workers, and an office for the management of such treatment facility. However, for example, if a portion of a building is used for the treatment of sewage and another portion of the building is used for the manufacture of machinery, the building is not exclusively a treatment facility. The Federal certifying authority will not certify as to what is a building and its structural components within the meaning of subdivision (i) of this subparagraph.

(iii) For purposes of subparagraph (1)(ii) (a) and (b) of this paragraph (relating to construction, reconstruction, or erection after December 31, 1968, and original use after December 31, 1968) and paragraph (b)(1) of §1.169-3 (relating to definition of amortizable basis), the principles set forth in paragraph (a) (1) and (2) of §1.167(c)-1 and in paragraphs (b) and (c) of §1.48-2 shall be applied. Thus, for example, the following rules are applicable:

(a) Property is considered as constructed, reconstructed, or erected by

the taxpayer if the work is done for him in accordance with his specifications.

(b) The portion of the basis of property attributable to construction, reconstruction, or erection after December 31, 1968, consists of all costs of construction, reconstruction, or erection allocable to the period after December 31, 1968, including the cost or other basis of materials entering into such work (but not including, in the case of reconstruction of property, the adjusted basis of the property as of the time such reconstruction is commenced).

(c) It is not necessary that materials entering into construction, reconstruction or erection be acquired after December 31, 1968, or that they be new in use.

(d) If construction or erection by the taxpayer began after December 31, 1968, the entire cost or other basis of such construction or erection may be taken into account for purposes of determining the amortizable basis under section 169.

(e) Construction, reconstruction, or erection by the taxpayer begins when physical work is started on such construction, reconstruction, or erection.

(f) Property shall be deemed to be acquired when reduced to physical possession or control.

(g) The term "original use" means the first use to which the property is put, whether or not such use corresponds to the use of such property by the taxpayer. For example, a reconditioned or rebuilt machine acquired by the taxpayer after December 31, 1968, for pollution control purposes will not be treated as being put to original use by the taxpayer regardless of whether it was used for purposes other than pollution control by its previous owner. Whether property is reconditioned or rebuilt property is a question of fact. Property will not be treated as reconditioned or rebuilt merely because it contains some used parts.

(iv) For purposes of subparagraph (1)(iii) of this paragraph (relating to property placed in service prior to January 1, 1975), the principles set forth in paragraph (d) of § 1.46-3 are applicable. Thus, property shall be considered

placed in service in the earlier of the following taxable years:

(a) The taxable year in which, under the taxpayer's depreciation practice, the period for depreciation with respect to such property begins or would have begun; or

(b) The taxable year in which the property is placed in a condition or state of readiness and availability for the abatement or control of water or atmospheric pollution.

Thus, if property meets the conditions of (b) of this subdivision in a taxable year, it shall be considered placed in service in such year notwithstanding that the period for depreciation with respect to such property begins or would have begun in a succeeding taxable year because, for example, under the taxpayer's depreciation practice such property is or would have been accounted for in a multiple asset account and depreciation is or would have been computed under an "averaging convention" (§ 1.167(a)-10), or depreciation with respect to such property would have been computed under the completed contract method, the unit of production method, or the retirement method. In the case of property acquired by a taxpayer for use in his trade or business (or in the production of income), property shall be considered in a condition or state of readiness and availability for the abatement or control of water or atmospheric pollution if, for example, equipment is acquired for the abatement or control of water or atmospheric pollution and is operational but is undergoing testing to eliminate any defects. However, materials and parts acquired to be used in the construction of an item of equipment shall not be considered in a condition or state of readiness and availability for the abatement or control of water or atmospheric pollution.

(c) *Certification*—(1) *In general*. For purposes of paragraph (a)(1) of this section, a facility is certified in accordance with the rules prescribed in this paragraph if—

(i) The State certifying authority (as defined in subparagraph (2) of this paragraph) having jurisdiction with respect to such facility has certified to

the Federal certifying authority (as defined in subparagraph (3) of this paragraph) that the facility was constructed, reconstructed, erected, or acquired in conformity with the State program or requirements for the abatement or control of water or atmospheric pollution or contamination applicable at the time of such certification, and

(ii) The Federal certifying authority has certified such facility to the Secretary or his delegate as (a) being in compliance with the applicable regulations of Federal agencies (such as, for example, the Atomic Energy Commission's regulations pertaining to radiological discharge (10 CFR Part 20)) and (b) being in furtherance of the general policy of the United States for cooperation with the States in the prevention and abatement of water pollution under the Federal Water Pollution Control Act, as amended (33 U.S.C. 1151-1175) or in the prevention and abatement of atmospheric pollution and contamination under the Clean Air Act, as amended (42 U.S.C. 1857 *et seq.*).

(2) *State certifying authority.* The term "state certifying authority" means—

(i) In the case of water pollution, the State water pollution control agency as defined in section 23(a) of the Federal Water Pollution Control Act, as amended (33 U.S.C. 1173(a)),

(ii) In the case of air pollution, the air pollution control agency designated pursuant to section 302(b)(1) of the Clean Air Act, as amended (42 U.S.C. 1857h(b)), and

(iii) Any interstate agency authorized to act in place of a certifying authority of a State. See section 23(a) of the Federal Water Pollution Control Act, as amended (33 U.S.C. 1173(b)) and section 302(c) of the Clean Air Act, as amended (42 U.S.C. 1857h(c)).

(3) *Federal certifying authority.* The term "Federal certifying authority" means the Administrator of the Environmental Protection Agency (see Reorganization Plan No. 3 of 1970, 35 FR 15623).

(d) *Profitmaking abatement works, etc.—*(1) *In general.* Section 169(e) provides that the Federal certifying authority shall not certify any property to the extent it appears that by reason of estimated profits to be derived

through the recovery of wastes or otherwise in the operation of such property its costs will be recovered over the period referred to in paragraph (a) (6) of this section for such property. The Federal certifying authority need not certify the amount of estimated profits to be derived from such recovery of wastes or otherwise with respect to such facility. Such estimated profits shall be determined pursuant to subparagraph (2) of this paragraph. However, the Federal certifying authority shall certify—

(i) Whether, in connection with any treatment facility so certified, there is potential cost recovery through the recovery of wastes or otherwise, and

(ii) A specific description of the wastes which will be recovered, or the nature of such cost recovery if otherwise than through the recovery of wastes.

For effect on computation of amortizable basis, see paragraph (c) of §1.169-3.

(2) *Estimated profits.* For purpose of this paragraph, the term "estimated profits" means the estimated gross receipts from the sale of recovered wastes reduced by the sum of the (i) estimated average annual maintenance and operating expenses, including utilities and labor, allocable to that portion of the facility which is certified as a treatment facility pursuant to paragraph (a)(1)(i) of this section which produces the recovered waste from which the gross receipts are derived, and (ii) estimated selling expenses. However, in determining expenses to be subtracted neither depreciation nor amortization of the facility is to be taken into account. Estimated profits shall not include any estimated savings to the taxpayer by reason of the taxpayer's reuse or recycling of wastes or other items recovered in connection with the operation of the plant or other property served by the treatment facility.

(3) *Special rules.* The estimates of cost recovery required by subparagraph (2) of this paragraph shall be based on the period referred to in paragraph (a)(6) of this section. Such estimates shall be made at the time the election provided for by section 169 is made and shall also be set out in the application for

certification made to the Federal certifying authority. There shall be no re-determination of estimated profits due to unanticipated fluctuations in the market price for wastes or other items, to an unanticipated increase or decrease in the costs of extracting them from the gas or liquid released, or to other unanticipated factors or events occurring after certification.

[T.D. 7116, 36 FR 9013, May 18, 1971; 36 FR 9770, May 28, 1971]

**§ 1.169-3 Amortizable basis.**

(a) [Reserved]. For further guidance, see § 1.169-3T(a).

(b) *Limitation to post-1968 construction, reconstruction, or erection.* (1) If the construction, reconstruction, or erection was begun before January 1, 1969, there shall be included in the amortizable basis only so much of the adjusted basis of such facility for purposes of determining gain (referred to in paragraph (a) of this section) as is properly attributable under the rules set forth in paragraph (b)(2)(iii) of § 1.169-2 to construction, reconstruction, or erection after December 31, 1968. See section 169 (d)(4). For example, assume a certified pollution control facility for which the shortest period authorized under section 167 is 10 years has a cost of \$500,000, of which \$450,000 is attributable to construction after December 31, 1968. Further, assume such facility does not perform a function in addition to pollution control and is used only in connection with a plant in operation before January 1, 1969. The facility would have an amortizable basis of \$450,000 (computed without regard to paragraphs (c) and (d) of this section). For depreciation of the remaining portion (\$50,000) of the cost, see section 169(g) and paragraph (a)(3)(ii) of § 1.169-1. For the definition of the term "certified pollution control facility" see paragraph (a) of § 1.169-2.

(2) [Reserved]. For further guidance, see § 1.169-3T(b)(2).

(c) *Modification for profitmaking abatement works, etc.* If it appears that by reason of estimated profits to be derived through the recovery of wastes or otherwise (as determined by applying the rules prescribed in paragraph (d) of § 1.169-2) a portion or all of the total costs of the certified pollution control

facility will be recovered over the period referred to in paragraph (a)(b) of § 1.169-2, its amortizable basis (computed without regard to this paragraph and paragraph (d) of this section) shall be reduced by an amount equal to (1) its amortizable basis (so computed) multiplied by (2) a fraction the numerator of which is such estimated profits and the denominator of which is its adjusted basis for purposes of determining gain. See section 169(e).

(d) *Cases in which the period referred to in paragraph (a)(6) of § 1.169-2 exceeds 15 years.* If as to a certified pollution control facility the period referred to in paragraph (a)(6) of § 1.169-2 exceeds 15 years (determined as of the first day of the first month for which a deduction is allowable under the election made under the section 169(b) and paragraph (a) of § 1.169-4), the amortizable basis of such facility shall be an amount equal to (1) its amortizable basis (computed without regard to this paragraph) multiplied by (2) a fraction the numerator of which is 15 years and the denominator of which is the number of years of such period. See section 169(f) (2)(A).

(e) *Examples.* This section may be illustrated by the following example:

*Example (1).* The X Corporation, which uses the calendar year as its taxable year, began the installation of a facility on November 1, 1968, and completed the installation on June 30, 1970, at a cost of \$400,000. All of the facility qualifies as a certified pollution control facility within the meaning of paragraph (a) of § 1.169-2. \$40,000 of such cost is attributable to construction prior to January 1, 1969. The X Corporation elects to take amortization deductions under section 169(a) with respect to the facility and to begin the 60-month amortization period with January 1, 1971. The corporation takes a depreciation deduction under sections 167 and 179 of \$10,000 (the amount allowable, of which \$2,000 is for additional first year depreciation under section 179) for the last 6 months of 1970. It is estimated that over the period referred to in paragraph (a) (6) of § 1.169-2 (20 years) as to such facility, \$80,000 in profits will be realized from the sale of wastes recovered in its operation. The amortizable basis of the facility for purposes of computing the amortization deduction as of January 1, 1971, is \$210,600, computed as follows:

(1) Portion of \$400,000 cost attributable to post-1968 construction, reconstruction, or erection ... \$360,000

**Internal Revenue Service, Treasury**

**§ 1.169-3T**

(2) Reduction for portion of depreciation deduction taken for the taxable year in which the facility was completed:		
(a) \$10,000 depreciation deduction taken for last 6 months of 1970 including \$2,000 for additional first year depreciation under section 179 .....	\$10,000	
(b) Multiplied by the amount in line (1) and divided by the total cost of the facility (\$360,000/ \$400,000) .....	0.9	\$9,000
(3) Subtotal .....		\$351,000
(4) Modification for profitmaking abatement works: Multiply line (3) by estimated profits through waste recovery (\$80,000) and divide by the adjusted basis for determining gain of the facility (\$400,000).		
(5) Reduction .....		\$70,200
(6) Subtotal .....		\$280,800
(7) Modification for period referred to in paragraph (a)(6) of § 1.169-2 exceeding 15 years: Multiply by 15 years and divide by such period (determined in accordance with paragraph (d) of this section) (20 years) .....		0.75
(8) Amortizable basis .....		\$210,600

*Example (2).* Assume the same facts as in example (1) except that the facility is used in connection with a number of separate plants some of which were in operation before January 1, 1969, that the Federal certifying authority certifies that 80 percent of the capacity of the facility is allocable to the plants which were in operation before such date, and that all of the waste recovery is allocable to the portion of the facility used in connection with the plants in operation before January 1, 1969. The amortizable basis of such facility, for purposes of computing the amortization deduction as of January 1, 1971, is \$157,950 computed as follows:

(1) Adjusted basis for purposes of determining gain: Multiply percent certified as allocable to plants in operation before January 1, 1969 (80 percent) by cost of entire facility (\$400,000) .....		\$320,000
(2) Portion of adjusted basis for determining gain attributable to post-1968 construction, reconstruction, or rection: Multiply line (1) by portion of total cost of facility attributable to post-1968 construction, reconstruction, or erection (\$360,000) and divide by the total cost of the facility (\$400,000) .....		\$288,000
(3) Reduction for portion of depreciation deduction taken for the taxable year in which the facility was completed:		
(a) \$10,000 depreciation deduction taken for last 6 months of 1970 including \$2,000 for additional first year depreciation under section 170 .....	\$10,000	
(b) Multiplied by the amount in line (2) and divided by the total cost of the facility (\$288,000/\$400,000) .....	0.72	\$7,200
(4) Subtotal .....		\$280,800

(5) Modification for profitmaking abatement works: Multiply line (4) by estimated profits through waste recovery (\$80,000) and divide by the amount in line (1) (\$320,000).		
(6) Reduction .....		\$70,200
(7) Subtotal .....		\$210,600
(8) Modification for period referred to in paragraph (a)(6) of § 1.169-2 exceeding 15 years: Multiply by 15 years and divide by such period (determined in accordance with paragraph (d) of this section) (20 years) .....		0.75
(9) Amortizable basis .....		\$157,950

(f) *Additions or improvements.* (1) If after the completion or acquisition of a certified pollution control facility further expenditures are made for additional construction, reconstruction, or improvements, the cost of such additions or improvements made prior to the beginning of the amortization period shall increase the amortizable basis of such facility, but the cost of additions or improvements made after the amortization period has begun, shall not increase the amortizable basis. See section 169(f)(2)(B).

(2) If expenditures for such additional construction, reconstruction, or improvements result in a facility which is new and is separately certified as a certified pollution control facility as defined in section 169(d)(1) and paragraph (a) of § 1.169-2, and, if proper election is made, such expenditures shall be taken into account in computing under paragraph (a) of this section the amortizable basis of such new and separately certified pollution control facility.

(g) *Effective date for qualified property, 50-percent bonus depreciation property, and qualified New York Liberty Zone property.* [Reserved]. For further guidance, see § 1.169-3T(g).

[T.D. 7116, 36 FR 9015, May 18, 1971; 36 FR 9770, May 28, 1971, as amended by T.D. 9091, 68 FR 53004, Sept. 8, 2003]

**§ 1.169-3T Amortizable basis (temporary).**

(a) *In general.* The amortizable basis of a certified pollution control facility for the purpose of computing the amortization deduction under section 169 is the adjusted basis of the facility for purposes of determining gain (see part II (section 1011 and following), subchapter O, chapter 1 of the Internal Revenue Code), in conjunction with paragraphs (b), (c), and (d) of this section. The adjusted basis for purposes of

determining gain (computed without regard to paragraphs (b), (c), and (d) of this section) of a facility that performs a function in addition to pollution control, or that is used in connection with more than one plant or other property, or both, is determined under § 1.169-2(a)(3). For rules as to additions and improvements to such a facility, see paragraph (f) of this section. Before computing the amortization deduction allowable under section 169, the adjusted basis for purposes of determining gain for a facility that is placed in service by a taxpayer after September 10, 2001, and that is qualified property under section 168(k)(2) or § 1.168(k)-1T, 50-percent bonus depreciation property under section 168(k)(4) or § 1.168(k)-1T, or qualified New York Liberty Zone property under section 1400L(b) or § 1.1400L(b)-1T must be reduced by the amount of the additional first year depreciation deduction allowed or allowable, whichever is greater, under section 168(k) or section 1400L(b), as applicable, for the facility.

(b) *Limitation on post-1968 construction, reconstruction, or erection.* (1) For further guidance, see § 1.169-3(b)(1).

(2) If the taxpayer elects to begin the 60-month amortization period with the first month of the taxable year succeeding the taxable year in which the facility is completed or acquired and a depreciation deduction is allowable under section 167 (including an additional first-year depreciation allowance under former section 179; for a facility that is acquired by the taxpayer after September 10, 2001, and that is qualified property under section 168(k)(2) or § 1.168(k)-1T or qualified New York Liberty Zone property under section 1400L(b) or § 1.1400L(b)-1T, the additional first year depreciation deduction under section 168(k)(1) or 1400L(b), as applicable; and for a facility that is acquired by the taxpayer after May 5, 2003, and that is 50-percent bonus depreciation property under section 168(k)(4) or § 1.168(k)-1T, the additional first year depreciation deduction under section 168(k)(4) with respect to the facility for the taxable year in which it is completed or acquired, the amount determined under paragraph (b)(1) of this section shall be reduced by an amount equal to the amount of the

depreciation deduction allowed or allowable, whichever is greater, multiplied by a fraction the numerator of which is the amount determined under paragraph (b)(1) of this section, and the denominator of which is the facility's total cost. The additional first-year allowance for depreciation under former section 179 will be allowable only for the taxable year in which the facility is completed or acquired and only if the taxpayer elects to begin the amortization deduction under section 169 with the taxable year succeeding the taxable year in which such facility is completed or acquired. For a facility that is acquired by a taxpayer after September 10, 2001, and that is qualified property under section 168(k)(2) or § 1.168(k)-1T or qualified New York Liberty Zone property under section 1400L(b) or § 1.1400L(b)-1T, see § 1.168(k)-1T(f)(4) or § 1.1400L(b)-1T(f)(4), as applicable, with respect to when the additional first year depreciation deduction under section 168(k)(1) or 1400L(b) is allowable. For a facility that is acquired by a taxpayer after May 5, 2003, and that is 50-percent bonus depreciation property under section 168(k)(4) or § 1.168(k)-1T, see § 1.168(k)-1T(f)(4) with respect to when the additional first year depreciation deduction under section 168(k)(4) is allowable.

(c) through (f) For further guidance, see § 1.169-3(c) through (f).

(g) *Effective date for qualified property, 50-percent bonus depreciation property, and qualified New York Liberty Zone property.* This section applies to a certified pollution control facility. This section also applies to a certified pollution control facility that is qualified property under section 168(k)(2) or qualified New York Liberty Zone property under section 1400L(b) acquired by a taxpayer after September 10, 2001, and to a certified pollution control facility that is 50-percent bonus depreciation property under section 168(k)(4) acquired by a taxpayer after May 5, 2003. This section expires on September 4, 2003.

[T.D. 9091, 68 FR 53004, Sept. 8, 2003; 68 FR 63734, Nov. 10, 2003]

**§ 1.169-4 Time and manner of making elections.**

(a) *Election of amortization*—(1) *In general.* Under section 169(b), an election by the taxpayer to take an amortization deduction with respect to a certified pollution control facility and to begin the 60-month amortization period (either with the month following the month in which the facility is completed or acquired, or with the first month of the taxable year succeeding the taxable year in which such facility is completed or acquired) shall be made by a statement to that effect attached to its return for the taxable year in which falls the first month of the 60-month amortization period so elected. Such statement shall include the following information (if not otherwise included in the documents referred to in subdivision (ix) of this subparagraph):

(i) A description clearly identifying each certified pollution control facility for which an amortization deduction is claimed;

(ii) The date on which such facility was completed or acquired (see paragraph (b)(2)(iii) of § 1.169-2);

(iii) The period referred to in paragraph (a)(6) of § 1.169-2 for the facility as of the date the property is placed in service;

(iv) The date as of which the amortization period is to begin;

(v) The date the plant or other property to which the facility is connected began operating (see paragraph (a)(5) of § 1.169-2);

(vi) The total costs and expenditures paid or incurred in the acquisition, construction, and installation of such facility;

(vii) A description of any wastes which the facility will recover during the course of its operation, and a reasonable estimate of the profits which will be realized by the sale of such wastes whether pollutants or otherwise, over the period referred to in paragraph (a)(6) of § 1.169-2 as to the facility. Such estimate shall include a schedule setting forth a detailed computation illustrating how the estimate was arrived at including every element prescribed in the definition of estimated profits in paragraph (d)(2) of § 1.169-2;

(viii) A computation showing the amortizable basis (as defined in § 1.169-3) of the facility as of the first month for which the amortization deduction provided for by section 169(a) is elected; and

(ix)(a) A statement that the facility has been certified by the Federal certifying authority, together with a copy of such certification, and a copy of the application for certification which was filed with and approved by the Federal certifying authority or (b), if the facility has not been certified by the Federal certifying authority, a statement that application has been made to the proper State certifying authority (see paragraph (c)(2) of § 1.169-2) together with a copy of such application and (except in the case of an election to which subparagraph (4) of this paragraph applies) a copy of the application filed or to be filed with the Federal certifying authority.

If subdivision (ix)(b) of this subparagraph applies, within 90 days after receipt by the taxpayer, the certification from the Federal certifying authority shall be filed by the taxpayer with the district director, or with the director of the internal revenue service center, with whom the return referred to in this subparagraph was filed.

(2) *Special rule.* If the return for the taxable year in which falls the first month of the 60-month amortization period to be elected is filed before November 16, 1971, without making the election for such year, then on or before December 31, 1971 (or if there is no State certifying authority in existence on November 16, 1971, on or before the 90th day after such authority is established), the election may be made by a statement attached to an amended income tax return for the taxable year in which falls the first month of the 60-month amortization period so elected. Amended income tax returns or claims for credit or refund must also be filed at this time for other taxable years which are within the amortization period and which are subsequent to the taxable year for which the election is made. Nothing in this paragraph should be construed as extending the time specified in section 6511 within which a claim for credit or refund may be filed.

(3) *Other requirements and considerations.* No method of making the election provided for in section 169(a) other than that prescribed in this section shall be permitted on or after May 18, 1971. A taxpayer which does not elect in the manner prescribed in this section to take amortization deductions with respect to a certified pollution control facility shall not be entitled to such deductions. In the case of a taxpayer which elects prior to May 18, 1971, the statement required by subparagraph (1) of this paragraph shall be attached to its income tax return for either its taxable year in which December 31, 1971, occurs or its taxable year preceding such year.

(4) *Elections filed before February 29, 1972.* If a statement of election required by subparagraph (1) of this paragraph is attached to a return (including an amended return referred to in subparagraph (2) of this paragraph) filed before February 29, 1972, such statement of election need not include a copy of the Federal application to be filed with the Federal certifying authority but a copy of such application must be filed no later than February 29, 1972, by the taxpayer with the district director, or with the director of the internal revenue service center, with whom the return or amended return referred to in this subparagraph was filed.

(b) *Election to discontinue or revoke amortization—*(1) *Election to discontinue.* An election to discontinue the amortization deduction provided by section 169(c) and paragraph (a)(1) of § 1.169-1 shall be made by a statement in writing filed with the district director, or with the director of the internal revenue service center, with whom the return of the taxpayer is required to be filed for its taxable year in which falls the first month for which the election terminates. Such statement shall specify the month as of the beginning of which the taxpayer elects to discontinue such deductions. Unless the election to discontinue amortization is one to which subparagraph (2) of this paragraph applies, such statement

shall be filed before the beginning of the month specified therein. In addition, such statement shall contain a description clearly identifying the certified pollution control facility with respect to which the taxpayer elects to discontinue the amortization deduction, and, if a certification has previously been issued, a copy of the certification by the Federal certifying authority. If at the time of such election a certification has not been issued (or if one has been issued it has not been filed as provided in paragraph (a)(1) of this section), the taxpayer shall file, with respect to any taxable year or years for which a deduction under section 169 has been taken, a copy of such certification within 90 days after receipt thereof. For purposes of this paragraph, notification to the Secretary or his delegate from the Federal certifying authority that the facility no longer meets the requirements under which certification was originally granted by the State or Federal certifying authority shall have the same effect as a notice from the taxpayer electing to terminate amortization as of the month following the month such facility ceased functioning in accordance with such requirements.

(2) *Revocation of elections made prior to May 18, 1971.* If on or before May 18, 1971, an election under section 169(a) has been made, such election may be revoked (see paragraph (a)(1) of § 1.169-1) by filing on or before August 16, 1971, a statement of revocation of an election under section 169(a) in accordance with the requirements in subparagraph (1) of this paragraph for filing a notice to discontinue an election. If such election to revoke is for a period which falls within one or more taxable years for which an income tax return has been filed, amended income tax returns shall be filed for any such taxable years in which deductions were taken under section 169 on or before August 16, 1971.
