

Federal Emergency Management Agency, DHS

§ 72.3

- 72.2 Definitions.
- 72.3 Fee schedule.
- 72.4 Submittal/payment procedures and FEMA response.
- 72.5 Exemptions.
- 72.6 Unfavorable response.
- 72.7 Resubmittals.

AUTHORITY: 42 U.S.C. 4001 *et seq.*; Reorganization Plan No. 3 of 1978, 43 FR 41943, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

§ 72.1 Purpose of part.

This part provides administrative and cost-recovery procedures for the engineering review and administrative processing associated with FEMA's response to requests for Conditional Letters of Map Amendment (CLOMAs), Conditional Letters of Map Revision (CLOMRs), Conditional Letters of Map Revision Based on Fill (CLOMR-Fs), Letters of Map Revision Based on Fill (LOMR-Fs), Letters of Map Revision (LOMRs), and Physical Map Revisions (PMRs). Such requests are based on proposed or actual manmade alterations within the floodplain, such as the placement of fill; modification of a channel; construction or modification of a bridge, culvert, levee, or similar measure; or construction of single or multiple residential or commercial structures on single or multiple lots.

§ 72.2 Definitions.

Except as otherwise provided in this part, the definitions in 44 CFR part 59 are applicable to this part. For the purposes of this part, the products are defined as follows:

CLOMA. A CLOMA is FEMA's comment on a proposed structure or group of structures that would, upon construction, be located on existing natural ground above the base (1-percent-annual-chance) flood elevation on a portion of a legally defined parcel of land that is partially inundated by the base flood.

CLOMR. A CLOMR is FEMA's comment on a proposed project that would, upon construction, affect the hydrologic or hydraulic characteristics of a flooding source and thus result in the modification of the existing regulatory floodway, the effective base flood ele-

vations, or the Special Flood Hazard Area (SFHA).

CLOMR-F. A CLOMR-F is FEMA's comment on a proposed project that would, upon construction, result in a modification of the SFHA through the placement of fill outside the existing regulatory floodway.

LOMR. A LOMR is FEMA's modification to an effective Flood Insurance Rate Map (FIRM), or Flood Boundary and Floodway Map (FBFM), or both. LOMRs are generally based on the implementation of physical measures that affect the hydrologic or hydraulic characteristics of a flooding source and thus result in the modification of the existing regulatory floodway, the effective base flood elevations, or the SFHA. The LOMR officially revises the FIRM or FBFM, and sometimes the Flood Insurance Study (FIS) report, and, when appropriate, includes a description of the modifications. The LOMR is generally accompanied by an annotated copy of the affected portions of the FIRM, FBFM, or FIS report.

LOMR-F. A LOMR-F is FEMA's modification of the SFHA shown on the FIRM based on the placement of fill outside the existing regulatory floodway.

PMR. A PMR is FEMA's physical revision and republication of an effective FIRM, FBFM, or FIS report. PMRs are generally based on physical measures that affect the hydrologic or hydraulic characteristics of a flooding source and thus result in the modification of the existing regulatory floodway, the effective base flood elevations, or the SFHA.

§ 72.3 Fee schedule.

(a) For requests for CLOMRs, LOMRs, and PMRs based on structural measures on alluvial fans, an initial fee of \$5,000, subject to the provisions of § 72.4, shall be paid to FEMA before FEMA begins its review of the request. The initial fee represents the minimum cost for reviewing these requests and is based on the prevailing private-sector labor rate. A revision to this initial fee, if necessary, will be published as a notice in the FEDERAL REGISTER.

(b) For requests for CLOMRs, LOMRs, and PMRs based on structural
