§ 25.2512-2

ACTUARIAL TABLES APPLICABLE BEFORE MAY 1, 1999

§ 25.2512-5A Valuation of annuities, unitrust interests, interests for life or term of years, and remainder or reversionary interests transferred before May 1, 1999.

[T.D. 8819, 64 FR 23223, Apr. 30, 1999, as amended by T.D. 8886, 65 FR 36940, June 12, 2000]

§ 25.2512-1 Valuation of property; in general.

Section 2512 provides that if a gift is made in property, its value at the date of the gift shall be considered the amount of the gift. The value of the property is the price at which such property would change hands between a willing buyer and a willing seller, neither being under any compulsion to buy or to sell, and both having reasonable knowledge of relevant facts. The value of a particular item of property is not the price that a forced sale of the property would produce. Nor is the fair market value of an item of property the sale price in a market other than that in which such item is most commonly sold to the public, taking into account the location of the item wherever appropriate. Thus, in the case of an item of property made the subject of a gift, which is generally obtained by the public in the retail market, the fair market value of such an item of property is the price at which the item or a comparable item would be sold at retail. For example, the value of an automobile (an article generally obtained by the public in the retail market) which is the subject of a gift, is the price for which an automobile of the same or approximately the same description, make, model, age, condition, etc., could be purchased by a member of the general public and not the price for which the particular automobile of the donor would be purchased by a dealer in used automobiles. Examples of items of property which are generally sold to the public at retail may be found in § 25.2512-6. The value is generally to be determined by ascertaining as a basis the fair market value at the time of the gift of each unit of the property. For example, in the case of shares of stocks or bonds, such unit of property is generally a share or a bond. Property shall not be returned at the

value at which it is assessed for local tax purposes unless that value represents the fair market value thereof on the date of the gift. All relevant facts and elements of value as of the time of the gift shall be considered. Where the subject of a gift is an interest in a business, the value of items of property in the inventory of the business generally should be reflected in the value of the business. For valuation of interests in businesses, see § 25.2512-3. See § 25.2512-2 and §§ 25.2512-4 through 25.2512-6 for further information concerning the valuation of other particular kinds of property. See § 25.2702-6 for an adjustment to the total amount of an individual's taxable gifts where the individual's current taxable gifts include the transfer of certain interests in trust that were previously valued under the provisions of section 2702.

[T.D. 6826, 30 FR 7709, June 15, 1965; as amended by T.D. 8395, 57 FR 4254, Feb. 4, 1992]

§ 25.2512-2 Stocks and bonds.

(a) *In general.* The value of stocks and bonds is the fair market value per share or bond on the date of the gift.

(b) *Based on selling prices.* (1) In general, if there is a market for stocks or bonds, on a stock exchange, in an over-the-counter market or otherwise, the mean between the highest and lowest quoted selling prices on the date of the gift is the fair market value per share or bond. If there were no sales on the date of the gift but there were sales on dates within a reasonable period both before and after the date of the gift, the fair market value is determined by taking a weighted average of the means between the highest and lowest sales on the nearest date before and the nearest date after the date of the gift. The average is to be weighted inversely by the respective numbers of trading days between the selling dates and the date of the gift. If the stocks or bonds are listed on more than one exchange, the records of the exchange where the stocks or bonds are principally dealt in should be employed if such records are available in a generally available listing or publication of general circulation. In the event that such records are not so available and such stocks or bonds are listed on a composite listing

of combined exchanges available in a generally available listing or publication of general circulation, the records of such combined exchanges should be employed. In valuing listed securities, the donor should be careful to consult accurate records to obtain values as of the date of the gift. If quotations of unlisted securities are obtained from brokers, or evidence as to their sale is obtained from the officers of the issuing companies, copies of letters furnishing such quotations or evidence of sale should be attached to the return.

(2) If it is established with respect to bonds for which there is a market on a stock exchange, that the highest and lowest selling prices are not available for the date of the gift in a generally available listing or publication of general circulation but that closing prices are so available, the fair market value per bond is the mean between the quoted closing selling price on the date of the gift and the quoted closing selling price on the trading day before the date of the gift. If there were no sales on the trading day before the date of the gift but there were sales on dates within a reasonable period before the date of the gift, the fair market value is determined by taking a weighted average of the quoted closing selling prices on the date of the gift and the nearest date before the date of the gift. The closing selling price for the date of the gift is to be weighted by the respective number of trading days between the previous selling date and the date of the gift. If there were no sales within a reasonable period before the date of the gift but there were sales on the date of the gift, the fair market value is the closing selling price on the date of the gift. If there were no sales on the date of the gift but there were sales within a reasonable period both before and after the date of the gift, the fair market value is determined by taking a weighted average of the quoted closing selling prices on the nearest date before and the nearest date after the date of the gift. The average is to be weighed inversely by the respective numbers of trading days between the selling dates and the date of the gift. If the bonds are listed on more than one exchange, the records of the exchange where the bonds are principally dealt

in should be employed. In valuing listed securities, the donor should be careful to consult accurate records to obtain values as of the date of the gift.

(3) The application of this paragraph may be illustrated by the following examples:

Example (1). Assume that sales of stock nearest the date of the gift (Friday, June 15) occurred two trading days before (Wednesday, June 13) and three trading days after (Wednesday, June 20) and on these days the mean sale prices per share were \$10 and \$15, respectively. The price of \$12 is taken as representing the fair market value of a share of stock as of the date of the gift

$$[(3 \times 10) + (2 \times 15)] / 5$$

Example (2). Assume the same facts as in example 1 except that the mean sale prices per share on June 13 and June 20 were \$15 and \$10 respectively. The price of \$13 is taken as representing the fair market value of a share of stock as of the date of the gift

$$[(3 \times 15) + (2 \times 10)] / 5$$

Example (3). Assume that on the date of the gift (Tuesday, April 3, 1973) the closing selling price of certain listed bonds was \$25 per bond and that the highest and lowest selling prices are not available in a generally available listing or publication of general circulation for that date. Assume further, that the closing selling price of such bonds was \$21 per bond on the day before the date of the gift (Monday, April 2, 1973). Thus, under paragraph (b)(2) of this section, the price of \$23 is taken as representing the fair market value per bond as of the date of the gift

$$[(25 + 21)] / 2$$

Example (4). Assume the same facts as in example 3 except that there were no sales on the day before the date of the gift. Assume further, that there were sales on Thursday, March 29, 1973, and that the closing selling price on that day was \$23. The price of \$24.50 is taken as representing the fair market value per bond as of the date of the gift

$$[(1 \times 23) + (3 \times 25)] / 4$$

Example (5). Assume that no bonds were traded on the date of the gift (Friday, April 20). Assume further, that sales of bonds nearest the date of the gift occurred two trading days before (Wednesday, April 18) and three trading days after (Wednesday, April 25) the date of the gift and that on these two days the closing selling prices per bond were \$29 and \$22, respectively. The highest and lowest selling prices are not available for these dates in a generally available listing or publication of general circulation. Thus, under paragraph (b)(2) of this section the price of \$26.20 is taken as representing the fair market value of a bond as of the date of the gift

$$[(3 \times 29) + (2 \times 22)] / 5$$

(c) *Based on bid and asked prices.* If the provisions of paragraph (b) of this section are inapplicable because actual sales are not available during reasonable period beginning before and ending after the date of the gift, the fair market value may be determined by taking the mean between the bona fide bid and asked prices on the date of the gift, or if none, by taking a weighted average of the means between the bona fide bid and asked prices on the nearest trading date before and the nearest trading date after the date of the gift, if both such nearest dates are within a reasonable period. The average is to be determined in the manner described in paragraph (b) of this section.

(d) *Where selling prices and bid and asked prices are not available for dates both before and after the date of gift.* If the provisions of paragraphs (b) and (c) of this section are inapplicable because no actual sale prices or quoted bona fide bid and asked prices are available on a date within a reasonable period before the date of the gift, but such prices are available on a date within a reasonable period after the date of the gift, or vice versa, then the mean between the highest and lowest available sale prices or bid and asked prices may be taken as the value.

(e) *Where selling prices or bid and asked prices do not represent fair market value.* In cases in which it is established that the value per bond or share of any security determined on the basis of the selling or bid and asked prices as provided under paragraphs (b), (c), and (d) of this section does not represent the fair market value thereof, then some reasonable modification of the value determined on that basis or other relevant facts and elements of value shall be considered in determining fair market value. Where sales at or near the date of the gift are few or of a sporadic nature, such sales alone may not indicate fair market value. In certain exceptional cases, the size of the block of securities made the subject of each separate gift in relation to the number of shares changing hands in sales may be relevant in determining whether selling prices reflect the fair market value of the block of stock to be valued. If the donor can show that the block of stock to be valued, with ref-

erence to each separate gift, is so large in relation to the actual sales on the existing market that it could not be liquidated in a reasonable time without depressing the market, the price at which the block could be sold as such outside the usual market, as through an underwriter, may be a more accurate indication of value than market quotations. Complete data in support of any allowance claimed due to the size of the block of stock being valued should be submitted with the return. On the other hand, if the block of stock to be valued represents a controlling interest, either actual or effective, in a going business, the price at which other lots change hands may have little relation to its true value.

(f) *Where selling prices or bid and asked prices are unavailable.* If the provisions of paragraphs (b), (c), and (d) of this section are inapplicable because actual sale prices and bona fide bid and asked prices are lacking, then the fair market value is to be determined by taking the following factors into consideration:

(1) In the case of corporate or other bonds, the soundness of the security, the interest yield, the date of maturity, and other relevant factors; and

(2) In the case of shares of stock, the company's net worth, prospective earning power and dividend-paying capacity, and other relevant factors.

Some of the "other relevant factors" referred to in subparagraphs (1) and (2) of this paragraph are: The goodwill of the business; the economic outlook in the particular industry; the company's position in the industry and its management; the degree of control of the business represented by the block of stock to be valued; and the values of securities of corporations engaged in the same or similar lines of business which are listed on a stock exchange. However, the weight to be accorded such comparisons or any other evidentiary factors considered in the determination of a value depends upon the facts of each case. Complete financial and other data upon which the valuation is based should be submitted with the return, including copies of reports of any examinations of the company made by accountants, engineers,

§ 25.2512-3

or any technical experts as of or near the date of the gift.

[T.D. 6334, 23 FR 8904, Nov. 15, 1958; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 7327, 39 FR 35355, Oct. 1, 1974; T.D. 7432, 41 FR 38769, Sept. 13, 1976]

§ 25.2512-3 Valuation of interest in businesses.

(a) Care should be taken to arrive at an accurate valuation of any interest in a business which the donor transfers without an adequate and full consideration in money or money's worth. The fair market value of any interest in a business, whether a partnership or a proprietorship, is the net amount which a willing purchaser, whether an individual or a corporation, would pay for the interest to a willing seller, neither being under any compulsion to buy or to sell and both having reasonable knowledge of the relevant facts. The net value is determined on the basis of all relevant factors including—

(1) A fair appraisal as of the date of the gift of all the assets of the business, tangible and intangible, including good will;

(2) The demonstrated earning capacity of the business; and

(3) The other factors set forth in paragraph (f) of § 25.2512-2 relating to the valuation of corporate stock, to the extent applicable.

Special attention should be given to determining an adequate value of the good will of the business. Complete financial and other data upon which the valuation is based should be submitted with the return, including copies of reports of examinations of the business made by accountants, engineers, or any technical experts as of or near the date of the gift.

(b) [Reserved]

§ 25.2512-4 Valuation of notes.

The fair market value of notes, secured or unsecured, is presumed to be the amount of unpaid principal, plus accrued interest to the date of the gift, unless the donor establishes a lower value. Unless returned at face value, plus accrued interest, it must be shown by satisfactory evidence that the note is worth less than the unpaid amount (because of the interest rate, or date of maturity, or other cause), or that the

26 CFR Ch. I (4-1-08 Edition)

note is uncollectible in part (by reason of the insolvency of the party or parties liable, or for other cause), and that the property, if any, pledged or mortgaged as security is insufficient to satisfy it.

§ 25.2512-5 Valuation of annuities, unitrust interests, interests for life or term of years, and remainder or reversionary interests.

(a) *In general.* Except as otherwise provided in paragraph (b) of this section and § 25.7520-3(b), the fair market value of annuities, unitrust interests, life estates, terms of years, remainders, and reversions transferred by gift is the present value of the interests determined under paragraph (d) of this section. Section 20.2031-7 of this chapter (Estate Tax Regulations) and related sections provide tables with standard actuarial factors and examples that illustrate how to use the tables to compute the present value of ordinary annuity, life, and remainder interests in property. These sections also refer to standard and special actuarial factors that may be necessary to compute the present value of similar interests in more unusual fact situations. These factors and examples are also generally applicable for gift tax purposes in computing the values of taxable gifts.

(b) *Commercial annuities and insurance contracts.* The value of life insurance contracts and contracts for the payment of annuities issued by companies regularly engaged in their sale is determined under § 25.2512-6.

(c) *Actuarial valuations.* The present value of annuities, unitrust interests, life estates, terms of years, remainders, and reversions transferred by gift after April 30, 1999, is determined under paragraph (d) of this section. The present value of annuities, unitrust interests, life estates, terms of years, remainders, and reversions transferred by gift before May 1, 1999, is determined under the following sections:

	Transfers		Applicable regulations
	After	Before	
		01-01-52	25.2512-5A(a)
12-31-51		01-01-71	25.2512-5A(b)
12-31-70		12-01-83	25.2512-5A(c)
11-30-83		05-01-89	25.2512-5A(d)
