Fmt 8010

Sfmt 8010

Y:\SGML\214022.XXX

214022


(ii) The traffic capacity for all interoffice trunks shall be based on full availability, even though the distant office itself is not engineered to provide full availability access.

(iii) The traffic Table may also be used to determine the approximate traffic capacity of high-usage intertoll trunks. The traffic offered to high-usage groups may be read at B.10, signifying that 10 percent of the traffic overflows to the alternate route. This approximates the HU12 table used by AT&T.

(iv) In reading the trunk quantity from the table, the higher quantity shall be used when the CCS load is three or more CCS over the lower quantity. For example, the number of trunks justified for 294 CCS at B.005 is 16, but for 295 CCS 17 trunks are justified.

(v) Limited availability is not permitted.

(vi) The traffic capacity in the following table should be used for small trunk groups such as pay station, special service trunks, intercept, and PBX trunks, unless otherwise specified in appendix A of this section:

<table>
<thead>
<tr>
<th>Number of Circuits</th>
<th>Permissible CCS</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>10</td>
</tr>
<tr>
<td>2</td>
<td>20</td>
</tr>
<tr>
<td>3</td>
<td>30</td>
</tr>
<tr>
<td>4</td>
<td>40</td>
</tr>
</tbody>
</table>

(vii) The percentage of lines equipped for pushbutton dialing is to be used to determine the number of tone receivers. Local registers, if required, shall be supplied on the basis of all dial pulse.

(2) Grade of service. (i) Grade of service specifies the expected performance when there are adequate service facilities for an assumed volume of traffic. It is expressed as a portion of the total traffic during a busy hour that cannot be terminated immediately or within a predetermined time period due to congestion. This places responsibility on the traffic engineers to specify facilities which will be entirely satisfactory to the users and which can be equipped at a price which will be accepted as reasonable.

(ii) The number of calls encountering dial tone delay in excess of 3 seconds, measured over the busy hour of the four high-consecutive week (4HW) period, shall not be more than 1.5 percent.

(iii) The average post dialing delay objective for an intraoffice call shall not exceed 1 second. This includes all connect, operate, and translation time.

(iv) The line to line (intraoffice) network matching loss objective shall be 0.02 or less.

(v) The blocking probabilities related to trunks include both “mismatch” probability and probability of “all trunks busy.” It is likely that the “mismatch” will be negligible in that many digital central offices have essentially nonblocking switching characteristics. The objectives for trunk connections are as follows:

(A) Subscriber to outgoing trunk objective 0.01 or less;

(B) Incoming trunk to subscriber objective 0.02 or less; and

(C) Local trunk tandem objective 0.01 or less.

(vi) Groups of common service circuits are to be engineered utilizing the full availability traffic tables that appear in paragraph (p)(1)(i) of this section at the following stipulated probabilities:

(A) Outgoing trunks to 26 MF or dial pulse senders at B.001;

(B) Incoming trunks to 26 MF receivers at B.001;

(C) Incoming nondelay dial trunks to receivers at B.001; and

(D) Incoming trunks with start dial at B.01.

(vii) Remote Switching Terminals (RST’s) shall meet the same grade of service objectives as the host.

(3) Holding times. For the purpose of estimating the quantity of common control circuits, the following average holding times may be used. These holding times are conservative and represent the average effective and ineffective call. If these holding times are to be used, it must be so stated in appendix A of this section.

(i) The following average call holding times (HT) may be used.
§ 1755.522

Intraoffice 120
EAS 150
Special Service, Intercept, Verification 60
Toll, CLR 300
Toll, S-S 24
Toll, PPCS 270

(ii) The following average subscriber dialing holding times may be used (times used to dial digits do not include machine time).

<tr>
<td>Crossbar Tandem</td>
<td>4.9</td>
<td>4</td>
</tr>
</tbody>
</table>

Without Overlap Pulsing | 4.6 | 4 | 1.2 |

*Add 1.3 seconds for ANI outpulsing on special toll (0+) calls and on DDD calls if AMA is not provided.

*Assumes overlap outpulsing starting on receiving of third digit applies only to calls handled on direct trunk groups.

1No reduction for fewer digits.

1Add 1.3 seconds for ANI outpulsing on special toll (0+) calls and on DDD calls if AMA is not provided.

2Assumes overlap outpulsing starting on receiving of third digit; applies only to calls handled on direct trunk groups.

(4) Traffic data requirements. (i) Traffic measurements are composed of primarily two types—counts and usage. The following types of traffic data recording are required:

(A) Peg count registers shall be incremented when a successful network connection is established to a particular circuit group such as trunks, senders, digital receivers, etc.

(B) Overflow count registers shall be incremented when access to a particular circuit group is denied due to all resource busy condition.

(C) Network blockage count registers shall be incremented due to an unavailability of a path in an access or switching matrix network.

(D) Usage measurements of the length of time associated with a particular setup event or network connection shall be made. Usage data measurements are normally collected by scanning circuit groups resources every 10 or 100 seconds to determine busy/idle states. Measurements are accumulated and read directly in CCS (hundred call seconds).

(E) Service delay measurements shall provide percentage counts of the calls for a particular service that are delayed beyond a specified interval of time, e.g., calls not receiving dial tone within 3 seconds after call origination.

(ii) Traffic data shall be stored in electronic storage registers or block of memory consisting of one or more traffic counters for each item to be measured. The registers listed in paragraph (p)(4)(i) of this section shall be associated with the interoffice trunks, switching network and central control equipment in such a manner that the register readings can be used to determine the traffic load and flow to, from and within the system. Two-way trunks shall be metered to indicate inward and outward seizures. The bidder
shall indicate what registers are to be supplied and their purpose.

(iii) The measured data shall be shown on a printout. It should be possible to have local or remote printout, or both. Arrangement shall be made for automatic data printout on command for 15-, 30-, or 60-minute intervals as required, and be arranged for automatic start-stop and in accordance with revenue separation procedures current at the time of contract.

(iv) All traffic records shall have dates and times and office identification.

(q) Transmission—(1) General. The transmission characteristics will be governed by the fact that the switching matrix will be based on digital operation. Unless otherwise stated, the requirements are in terms of analog measurements made from Main Distributing Frame (MDF) to MDF terminals, excluding cabling loss.

(2) Impedance. For the purpose of this section, the nominal input impedance of analog ports in an end office shall be 900 ohms for 2-wire ports and 600 ohms for 4-wire ports. Where the connecting facility or equipment is other than this impedance, suitable impedance matching shall be provided by the bidder when specified by the owner.

(3) Insertion loss. The insertion loss in both directions of transmission at 1004 Hz shall be specified when measured with a 0 dBm input signal at 900 ohms (or 600 ohms, when required) at a temperature of 77 °F ± 9 °F (25 °C ± 5 °C).

(i) Trunk-to-trunk or trunk-to-line. The loss shall be set between 0 and 0.5 dB for 2-wire to 2-wire, 2-wire to 4-wire, or 4-wire to 4-wire voice frequency connections.

(ii) Line-to-line. The loss shall be set between 0 and 2 dB.

(iii) Direct digital interface. On a direct digital interface, the loss through the office shall be adjusted to the proper level in the receive side.

(iv) Stability. The long-term allowable variation in loss through the office shall be ±0.5 dB from the loss specified by the bidder.

(4) Frequency response (loss relative to 1004 Hz) shall meet the following requirements.

(i) Trunk-to-trunk.

<table>
<thead>
<tr>
<th>Frequency (Hz)</th>
<th>2-Wire to 2-Wire</th>
<th>4-Wire to 4-Wire</th>
</tr>
</thead>
<tbody>
<tr>
<td>60</td>
<td>20 dB Min.</td>
<td>16 dB Min.</td>
</tr>
<tr>
<td>200</td>
<td>0 to 5 dB</td>
<td>0 to 3 dB</td>
</tr>
<tr>
<td>300–3000</td>
<td>−0.5 dB to 1 dB</td>
<td>−0.3 to +0.3 dB</td>
</tr>
<tr>
<td>3300</td>
<td>1.5 dB Max.</td>
<td>1.5 dB Max.</td>
</tr>
<tr>
<td>3400</td>
<td>0 to 3 dB</td>
<td>0 to 3 dB</td>
</tr>
</tbody>
</table>

*(−) means less loss and (+) means more loss.

(2) Transmission End

(ii) Line-to-line.

<table>
<thead>
<tr>
<th>Frequency (Hz)</th>
<th>Loss at 0 dBm0 Input</th>
</tr>
</thead>
<tbody>
<tr>
<td>60</td>
<td>20 dB Min.</td>
</tr>
<tr>
<td>300</td>
<td>−1 to +3 dB</td>
</tr>
<tr>
<td>600–2400</td>
<td>≤1 dB</td>
</tr>
<tr>
<td>3200</td>
<td>−1 to +3 dB</td>
</tr>
</tbody>
</table>

*(−) means less loss and (+) means more loss.

(2) Transmission End

(iii) Trunk-to-line. The trunk-to-line frequency response requirements shall be a compromise between those values specified in paragraphs (q)(4)(i) and (q)(4)(ii) of this section.

(5) Overload level. The overload level at 900 ohm impedance shall be +3 dBm0.

(6) Gain tracking (linearity) shall meet the following requirements.

<table>
<thead>
<tr>
<th>Input Signal Level</th>
<th>Maximum Gain Deviation</th>
</tr>
</thead>
<tbody>
<tr>
<td>+3 to −37 dBm0</td>
<td>±0.5 dB</td>
</tr>
<tr>
<td>−37 to −50 dBm0</td>
<td>±1 dB</td>
</tr>
</tbody>
</table>

*(004 Hz reference at 0 dBm0.

(7) Return loss. (i) The specified return loss values are determined by the service and type of port at the measuring (near) end. Two-wire ports are measured (near end) at 900 ohms in series with 2.16 microfarads and 4-wire ports are measured at 600 ohms resistive.

(ii) Far end test terminations shall be as follows:

(A) Loaded line circuit—1650 ohms in parallel with the series combination of .005 microfarads and 100 ohms;

(B) Nonloaded line circuit—800 ohms in parallel with the series combination of .05 microfarads and 100 ohms;

(C) Special service line circuit including electronic lines and carrier lines—900 ohms in series with 2.16 microfarads;

(D) Two-wire trunk—900 ohms in series with 2.16 microfarads; and

(E) Four-wire trunk—600 ohms.

(iii) For trunk-to-trunk (2-wire or 4-wire) connections the echo return loss (ERL) shall be 27 dB, minimum and the
§ 1755.522

singing return loss (SRL) shall be 20 dB, minimum low and 23 dB, minimum high.

(iv) For trunk-to-line (2-wire or 4-wire) connections the ERL shall be 24 dB, minimum and the SRL shall be 17 dB, minimum low and 20 dB, minimum high.

(v) For line-to-line or line-to-trunk (2-wire or 4-wire) connections the ERL shall be 18 dB, minimum and the SRL shall be 12 dB, minimum low and 15 dB, minimum high.

(8) Longitudinal balance. The minimum longitudinal balance, with dc loop currents of 20 to 70 mA, shall be 60 dB at all frequencies between 60 and 2000 Hz, 55 dB at 2700 Hz and 50 dB at 3400 Hz. The method of measurement shall be as specified in the IEEE Std 455–1985, IEEE Standard Test Procedure for Measuring Longitudinal Balance of Telephone Equipment Operating in the Voice Band. Source voltage level shall be 10 volts root-mean-square (rms).

(9) 60 hz longitudinal current immunity. Under test conditions with 60 Hz, the system noise shall be no greater than 23 dBnC0 as measured using the configuration in Figure 1.

LONGITUDINAL BALANCE

The minimum longitudinal balance, with dc loop currents of 20 to 70 mA, shall be 60 dB at all frequencies between 60 and 2000 Hz, 55 dB at 2700 Hz and 50 dB at 3400 Hz. The method of measurement shall be as specified in the IEEE Std 455–1985, IEEE Standard Test Procedure for Measuring Longitudinal Balance of Telephone Equipment Operating in the Voice Band. Source voltage level shall be 10 volts root-mean-square (rms).

(9) 60 hz longitudinal current immunity. Under test conditions with 60 Hz, the system noise shall be no greater than 23 dBnC0 as measured using the configuration in Figure 1.

FIGURE 1—MEASURING THE EFFECTS OF LOW FREQUENCY INDUCTION

NOTES:
1. 900 ohm termination, C-message weighting, hold coil off
2. SNC Noise Choke 35 W, or equivalent
3. Test at 0.020 Adc and 0.070 Adc
4. 2 ±0.001 microfarad, 150 Vdc

(10) Steady noise (idle channel at 900 ohms impedance) measured on a terminated call shall be 23 dBnC0 maximum and average 18 dBnC0 or less. The 3K Hz Flat noise should be less than 35 dBnC0 as an objective.

(11) Impulse noise. The central office switching equipment shall be capable of meeting an impulse noise limit of not more than five counts exceeding 54
Rural Utilities Service, USDA § 1755.522

dBmC0 voice band weighted in a 5-minute period on six such measurements made during the busy hour. A Northeast Electronics Company TTS 4002 Impulse Noise Counter, Wilcom T194C, Hewlett Packard 4945, or equivalent, should be used for the measurements. The measurement shall be made by establishing a normal connection from the noise counter through the switching equipment in its off-hook condition to a quiet termination of 900 ohms impedance. Office battery and signaling circuit wiring shall be suitably segregated from voice and carrier circuit wiring, and frame talking battery filters provided, if and as required, in order to meet these impulse noise limits.

(12) Crosstalk coupling. Worst case equal level crosstalk is to be 75 dB minimum in the range 200–3400 Hz. This is to be measured between any two paths through the system connecting a 0 dBm0 level tone to the disturbing pair.

(13) Quantizing distortion. (i) The switching system shall meet the following requirements.

<table>
<thead>
<tr>
<th>Input Level (dBm0)</th>
<th>Minimum Signal to Distortion with C-Message Weighting</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 to –30</td>
<td>33 dB</td>
</tr>
<tr>
<td>–30 to –40</td>
<td>27 dB</td>
</tr>
<tr>
<td>–40 to –45</td>
<td>22 dB</td>
</tr>
</tbody>
</table>

(ii) Due to the possible loss of the least significant bit on direct digital connections, a signal to distortion degradation of up to 2 dB may be allowed where adequately justified by the bidder.

(14) Absolute delay. The absolute one-way delay through the switching system, excluding delays associated with RST switching, shall not exceed 1000 microseconds analog-to-analog measured at 1800 Hz.

(15) Envelope delay distortion. On any properly established connection, the envelope delay distortion shall not exceed the following limits.

<table>
<thead>
<tr>
<th>Frequency Range (Hz)</th>
<th>Microseconds</th>
</tr>
</thead>
<tbody>
<tr>
<td>1000 to 2600</td>

</tbody>
</table>

(16) Digital error rate. The digital switching system shall not introduce an error into digital connections which is worse than one error in 10^8 bits averaged over a 5-minute period.

(17) Battery noise. Noise across battery at power board distribution bus terminals shall not exceed 35 dBmC during the busy hour.

(18) Radio and television interference. The central office switching equipment shall be designed and installed so that radiation of high frequency noise will be limited so as not to interfere with radio and television receivers.

(i) Timing intervals—(1) Type of equipment required. The equipment for providing the specified timing intervals shall be solid-state.

(2) Tolerance. Where a range of time is specified as minimum and maximum, the lower limits shall be considered as controlling and the variation between this minimum and the actual maximum shall be kept as small as practicable. In no case shall the quoted upper limit be exceeded.

(3) Permanent signal timing. Lockout shall occur after an interval of 20 to 30 seconds after receipt of dial tone if a “permanent” condition occurs prior to the transmission of dial pulses or push-button dialing signals. This interval may be reduced appreciably during periods of heavy traffic.

(4) Partial dial timing. Partial dial timing shall be within 15 to 37 seconds. This timing may be reduced appreciably during periods of heavy traffic.

(5) Charge delay timing. Charge delay timing shall be within 2 seconds.

(6) Called party disconnect timing. Timed disconnect of a terminating path under control of the called party shall be 10 to 32 seconds.

(7) Timing intervals for signals involved in distance dialing. Timing intervals shall be provided to meet the requirements for distance dialing equipment, which have been established in Bellcore document SR-TSV-002275, BOC Notes on the LEC Networks—1990. Some of the more important times which this document specifies are for:

(i) Disconnect signal;
(ii) Wink signal;
(iii) Start dialing signal;
(iv) Pulse delay signal;
(v) Go signal;
(vi) Digit timing; and
(vii) Sender, register, and link attachment timing.

(s) Power requirements and equipment—

(1) Operating voltage. The nominal operating voltage of the central office shall be 48 volts dc, provided by a battery with the positive side tied to system ground.

(2) Batteries. (i) When battery cells of the lead antimony type are specified, the pasted plate type shall be considered adequate.

(ii) When lead calcium cells are specified, no cell shall differ from the average voltage of the string of fully charged cells by more than ±0.03 volt when measured at a charging rate in amperes equivalent to 10 percent of the ampere hour capacity of the cells. Similarly, when cells are fully charged and floating between 2.30 and 2.33 volts per cell in a given string shall not differ more than ±0.03 volt from the average. These requirements are for test purposes only and do not apply to operating conditions.

(iii) Voltage readings shall be corrected by a temperature coefficient of 0.0033 volt per degree F (0.006 per degree C), whenever temperature variations exist between cells in a given string. This correction factor shall also be applied when comparing cell voltages taken at different times and at different temperatures. The correction factor shall be added to the measured voltage when the temperature is above 77 °F (25 °C) and subtracted when the temperature is below 77 °F (25 °C).

(iv) The specific gravity readings of lead antimony cells at full charge shall be 1.210 ± 0.010 at 77 °F (25 °C) at maximum electrolyte height.

(v) When counter cells are supplied by the bidder, they shall be the dry counter electromotive force (CEMF) type.

(vi) When lead antimony batteries are specified, they shall be designed to last a minimum of 10 years when maintained on a full float operation between 2.15 and 2.17 volts per cell. When lead calcium batteries are specified, they shall be designed to last a minimum of 20 years when maintained on full float operation between 2.17 and 2.25 volts per cell. The battery shall be clearly designated as “antimony” or “calcium” by means of stencils, decals or other devices.

(vii) Each battery cell shall be equipped with an explosion control device.

(viii) The battery size shall be calculated in accordance with standard procedures. The battery in no case shall have a reserve capacity in ampere hours less than four times the current capacity of the largest charger.

(3) Charging equipment. (i) Charging shall be on a full float basis. The rectifiers shall be of the full wave, self-regulating, constant voltage, solid-state type and shall be capable of being turned on and off manually.

(ii) When charging batteries, the voltage at the battery terminals shall be adjustable and shall be set at the value recommended for the particular battery being charged, providing it is not above the maximum operating voltage of the switching system equipment. The voltage shall not vary more than plus or minus 0.02 volt per cell between 10 percent load and 100 percent load. Between 3 percent and 10 percent load, the output voltage shall not vary more than plus or minus 0.04 volt per cell. Beyond full load current, the output voltage shall drop sharply. The output voltage shall be maintained with the line voltage variations of plus or minus 10 percent. Provision shall be made to change the output voltage of the rectifier manually to 2.25 volts per cell to provide an equalization charge on the battery.

(iii) The charger noise shall not exceed 22 dBnC when measured with a suitable noise measuring set and under the rated battery capacitance and load conditions as determined in Figure 2.
The manufacturer may elect to eliminate the capacitor C from the measurement.

A. Capacitance in \( \mu F = 30,000 \mu F \) per amper-hour per cell. For example, 25 cells at 100 amper-hour would be equivalent to a capacitance of:

\[
(30,000 \times 100)/25 = 120,000 \mu F
\]

B. The value of the resistive load \( R \) is determined by the nominal battery voltage in volts divided by the full load rating in amperes. For example, for a 48 volt battery and a full load current of 24 amperes, the load resistance \( R \) is \( 48/24 = 2 \) ohms of appropriate power handling capacity.

(iv) The charging equipment shall indicate a failure of charging current, whether due to ac power failure, an internal failure in the charger, or to other circumstances which might cause the output voltage of the charger to drop below the battery voltage. Where a supplementary constant current charger is used, an alarm shall be provided to indicate a failure of the charger.

(v) Audible noise developed by the charging equipment shall be kept to a minimum. Acoustic noise resulting from operation of the rectifier shall be expressed in terms of dB indicated on a sound level meter conforming to ANSI S1.4–1983, Specification for Sound Level Meters, and shall not exceed 65 dB (A-weighting) measured at any point 5 feet (152.4 cm) from any vertical surface of the rectifier.

(vi) The charging equipment shall be designed so that neither the charger nor the central office switching equipment is subject to damage in case the battery circuit is opened for any value of load within the normal limits.

(vii) The charging equipment shall have a capacity to meet the requirements of central office size and special requirements of the owner in appendix A of this section.

(viii) Minimum equipment requirement for chargers is one of the following:

(A) Two chargers either capable of carrying the full office load as specified in Item 12 of appendix A of this section; or

(B) Three chargers each capable of carrying half the office load as specified in Item 12 of appendix A of this section.

(4) Miscellaneous voltage supplies. (1) Any power supply required for voltages other than the primary battery voltage shall be provided by either a solid-state dc-to-dc converter or dc-to-ac inverter,
operating from the central office battery or from a separate battery and charger. These power supplies shall meet the noise limit specified for chargers in paragraph (s)(3)(iii) of this section, except the capacitor “C” shall be eliminated and the resistive load “R” shall be determined by the nominal output voltage in volts divided by the full load current rating in amperes. This requirement does not preclude the use of commercial ac power to operate input/output devices.

(ii) Power converters required for the purpose of providing various operating voltages to printed circuit boards or similar equipment employing electronic components shall be provided in duplicate with each unit capable of immediately assuming the full operating load upon failure of a unit. An exception to the duplicate power converter requirement permits nonduplicated power converter(s) to be utilized where there is full compliance with the following criteria.

(A) The failure of any single nonduplicated power converter shall not reduce the grade of service of common control and service circuits to any individual line or trunk by more than 50 percent.

(B) The failure of any single nonduplicated power converter shall not reduce the traffic carrying capacity of any interoffice trunk group by more than 50 percent.

(C) In central office switching systems of 400 or more equipped lines, any single nonduplicated power converter failure shall not cause a complete loss of service to more than 100 equipped lines.

(D) In central office switching systems of less than 400 equipped lines, any single nonduplicated power converter failure shall not cause a complete loss of service to more than 25 percent of the total equipped lines.

(5) Ringing generators. Ringing generators supplied on an ancillary basis shall be selected from RUS Bulletin 1755I-100, List of Materials Acceptable for Use on Telephone Systems of RUS Borrowers. Regardless of whether the ringing is generated on an ancillary basis or is generated integrally to the switching system, the ringing equipment shall meet the requirements of this section.

(i) Ringing equipment provisioning. (A) Redundant ringing equipment shall be provided. There shall be automatic transfer to the redundant equipment within the period of one ringing cycle, in case of failure of the equipment in use (either regular or standby). Automatic transfer shall not take place under any other conditions. Manual transfer in each direction shall be provided.

(B) An exception to the redundant ringing equipment requirement permits nonduplicated ringing equipment to be utilized where there is full compliance with the following service criteria.

(1) In a central office switching system of 400 or more equipped lines, a single nonduplicated ringing source failure shall not cause the complete loss of ringing capability to more than 100 lines.

(2) In a central office switching system of less than 400 equipped lines, a single nonduplicated ringing source failure shall not cause the complete loss of ringing capability to more than 25 percent of the total equipped lines.

(ii) Output voltage. (A) The ringing generators shall have an output voltage which approximates a sine wave and, as a minimum, shall be suitable for ringing straight-line ringers. Although not a requirement for RUS listing, decimonic, synchromonic, or harmonic ringing may also be specified in appendix A of this section.

(B) The ringing generator shall obtain its energy from the nominal 48-volt office battery.

(C) The output of each generator shall have three or more voltage taps or a single tap with associated variable control. Taps or control shall be easily accessible as installed in the field. Software control of ringing generator outputs via I/O devices may be provided in lieu of taps. The taps, or equivalent, shall be designated L, M, and H. The variable control shall have a locking device to prevent accidental readjustment. The outputs at the terminals of the generators with a voltage input of 52.1 volts and rated full resistive load shall be as follows for the ringing frequencies provided:
(D) No voltages in excess of the values in column H of the table in paragraph (s)(5)(ii)(C) of this section shall be provided at the output taps. Additional intermediate and/or lower taps may be provided without restriction.

(iii) Voltage regulation. (A) The output voltage for resistive, capacitive power factor of 0.8, and inductive power factor of 0.5 loads from no load to full rated output with 52.1 volts input battery shall not vary more than ±3 percent from the output voltage measured at 1/2 rated output, 1.0 power factor with 52.1 volts dc input applied.

(B) The output voltage for resistive, capacitive power factor of 0.8, and inductive power factor of 0.5 loads from no load to full rated output with input battery variations between 48-56 volts dc shall not vary more than ±10 percent from the output voltage measured at 1/2 rated output and 1.0 power factor with 52.1 volts dc input applied.

(C) The output voltage for resistive, capacitive power factor of 0.8, and inductive power factor of 0.5 loads from no load to full rated output and with input battery variations between 44-56 volts dc shall not vary more than +10/15 percent from the output voltage measured at 1/2 rated output and 1.0 power factor with 52.1 volts dc input applied.

(iv) Cross ringing. Unwanted voltage caused by harmonic distortion or intermodulation distortion shall not exceed 15 volts rms when measured within ±5 Hz of any other assigned ringing frequency under any condition of load or input battery specified by paragraph (s)(5)(iii) of this section.

(v) Frequency stability. At ambient temperature of 70 °C ±5 °F (21 °C ±0.3 °C), for any combination of capacitive power factor of 0.8, inductive power factor of 0.5, and resistive loads with variations in input battery ranging from 44 to 56 volts, the output frequency shall not vary more than ±1/3 Hz or ±1 percent, whichever is less stringent. At temperatures between 15 °F (4 °C) to 130 °F (54 °C), and for any combination of resistive load and variations in input battery ranging from 44-56 volts, the output frequency shall not vary more than ±1/3 Hz or ±1 percent, whichever is less stringent.

(vi) Self-protection on overloads. The ringing generator equipment shall be capable of withstanding a short circuit across any pair of output terminals for a period of 5 minutes without fuse operation or damage.

(6) Interrupter equipment. (i) The interrupter shall be an integral part of the switching system and shall be controlled by any call processor or equivalent.

(ii) The ringing cycle provided by the interrupter equipment shall not exceed 6 seconds in length. The ringing period shall be 2 seconds.

(7) Power panels. (i) Battery and charger control switches, dc voltmeters, dc ammeters, fuses and circuit breakers, supervisory and timer circuits shall be provided as required. Voltmeters shall be provided as specified by the owner.

(ii) Portable or panel mounted frequency meters shall be provided as specified by the owner unless the system is equipped to measure actual ringing generator voltage and frequency outputs internally. If the system is equipped to make such measurements and print the results, the bidder is not required to provide a frequency meter.

(iii) Power panels, cabinets and shelves, and associated wiring shall be designed initially to handle the exchange when it reaches its ultimate capacity as specified by the owner.

(iv) The power panel shall be of the “dead front” type.

(t) Main distributing frames. (1) The main distributing frame shall provide terminals for terminating all incoming cable pairs. Arresters shall be provided for all incoming cable pairs, or for a smaller number of pairs if specified, provided an acceptable means of temporarily grounding all terminated pairs which are not equipped with arresters is furnished.

(2) The current carrying capacity of each arrester and its associated mounting shall coordinate with a #22 gauge
copper conductor without causing a self-sustaining fire or permanently damaging other arrester positions. Where all cable pairs entering the central office are #24 gauge or finer, the arresters and mountings need only coordinate with #24 gauge cable conductors. Item 13 of appendix A of this section designates the gauge of the cable conductors serving the host office. Item 7 of appendix B of this section designates the gauge of the cable conductors serving the RST(s).

(3) Central office protectors shall be mounted and arranged so that outside cable pairs may be terminated on the left side of protectors (when facing the vertical side of the MDF) or on the back surface of the protectors. Means for easy identification of pairs shall be provided.

(4) Protectors shall have a “dead front” (either insulated or grounded) whereby live metal parts are not readily accessible.

(5) Protectors shall be provided with an accessible terminal of each incoming conductor which is suitable for the attachment of a temporary test lead. They shall also be constructed so that auxiliary test fixtures may be applied to open and test the subscriber’s circuit in either direction. Terminals shall be tinned or plated and shall be suitable for wire wrapped, insulation displacement or connectorized connections.

(6) If specified in appendix A of this section, each protector group shall be furnished with a factory assembled tip cable for splicing to the entrance cable; the tip cable to be 20 feet (610 cm) in length unless otherwise specified. Factory assembled tip cable shall be #22 gauge or selected from RUS Bulletin 17551-100, List of Materials Acceptable for Use on Telephone Systems of RUS Borrowers. Tip cable requirements are provided in RUS Bulletin 345-87, PE-87, RUS Specification for Terminating (TIP) Cable. Cables having other kinds of insulation and jackets which have equivalent resistance to fire and which produce less smoke and toxic fumes may be used if specifically approved by RUS.

(7) Protectors shall be mounted on vertical supports, with centers not exceeding 9 inches (22.9 cm). The space between protector units shall be adequate for terminating conductors.

(8) Cable supporting framework shall be provided between the cable entrance and the MDF when overhead cable entrance is specified in Item 14.3.3 of appendix A of this section.

(9) The main distributing frame shall be equipped with a copper ground bus bar having the conductivity of a #6 American Wire Gauge (AWG) copper conductor or a greater conductivity, or may consist of another metal if specifically approved, provided it has adequate cross-sectional area to provide conductivity equivalent to, or better than, bare copper. A guardrail or equivalent shall also be furnished.

(10) Other features not specified in paragraph (t) of this section may be required at the option of the owner, if checked in Item 13.4 of appendix A of this section.

(11) Main frame protector makes and types shall be selected only from RUS Bulletin 1755I-100, List of Materials Acceptable for Use on Telephone Systems of RUS Borrowers. Protectors shall be capable of easy removal.

(u) Electrical protection—(1) Surge protection. (i) Adequate electrical protection of central office switching equipment shall be included in the design of the system. The characteristics and application of protection devices shall be such that they enable the central office switching equipment to withstand, without damage or excessive protector maintenance, the dielectric stresses and currents that are produced in line-to-ground and tip-to-ring circuits through the equipment as a result of induced or conducted lightning or power system fault-related surges. All wire terminals connected to outside plant wire or cable pairs shall be protected from voltage and current surges.

(ii) Central office switching equipment shall pass laboratory tests, simulating the hostile electrical environment, before being placed in the field for the purpose of obtaining field experience. There are five basic types of laboratory tests which shall be applied to exposed terminals in an effort to determine if the equipment will survive. Figure 3 summarizes these tests and the minimum acceptable levels of protection for equipment to pass them.
(iii) **Two categories of surge tests.** (A) Current surge tests simulate the stress to which a relatively low impedance path may be subjected before main frame protectors break down. Paths with a 100 Hz impedance of 50 ohms or less shall be subjected to current surges, employing a $10 \times 1000$ microseconds waveshape as defined in Figure 4. For the purpose of determining this impedance, arresters which are mounted within the equipment are to be considered zero impedance. The crest current shall not exceed 500A; however, depending on the impedance of the test specimen this value of current may be lower. The crest current through the sample, multiplied by the sample’s 100 Hz impedance, shall not exceed 1000 volts (V). Where sample impedance is less than two ohms, crest current shall be limited to 500A as shown in Figure 5.
Surge Waveshape is defined as follows:
Rise Time × Time to Decay to Half Crest Value
(For example, 10 × 1000 μs)

Notes:

$T_1$ = Time to determine the rate of rise.
The rate of rise is determined as the slope between 10% and 90% of peak voltage or current.

$T_2$ = Time to 50% of peak voltage (decay to half value).
FIGURE 5—EXPLANATION OF SURGE WAVESHAPE

350 V gas tube

(B) Sixty Hertz (60 Hz) current-carrying tests should be applied to simulate an ac power fault which is conducted to the unit over the cable pairs. The test should be limited to 10 amperes rms at 60 Hz for a period of 11 cycles (0.1835 seconds) and should be applied longitudinally from line to ground (see Figures 3 and 6 of this section).

V_L = Not to exceed 1000V
V_B = Charging Voltage
Z_{100} = Test Specimen Impedance to be measured at 100 Hz.
R_P = Parallel Resistance (Wave shape)
R_S = Series Resistance (Current Limiting)

(C) AC power service surge voltage tests should be applied to the power input terminals of ac powered devices to simulate switching surges or lightning-induced transients on the ac power system. The test shall employ a 1.2 x 50 microseconds waveshape with a crest voltage of 2500V. Communications line protectors may be left in place for this test. Borrowers are urged to install commercially available surge protectors at the ac service entrance as part of their COE building program.

(D) Voltage surge tests simulate the voltage stress to which a relatively high impedance path may be subjected before primary protectors break down and protect the circuit. To assure coordination with the primary protection while reducing testing to the minimum, voltage surge tests should be conducted at a 1000 volts with primary arrester removed for devices protected by carbon blocks, or the +3 sigma dc breakdown of other primary arrester. Surge waveshape should be 10 x 1000 microseconds.

(E) Arrester response delay tests are designed to stress the equipment in a manner similar to that caused by the delayed breakdown of gap type arresters when subjected to rapidly rising voltages. Arresters shall be removed for these tests, the peak surge voltage should be the +3 sigma breakdown of the arrester in question on a voltage rising at 100V per microsecond and the time for the surge to decay to half voltage shall equal at least the delay time of the tube, as explained in Figure 7.
The delay time is that period of time when the potential across an arrester exceeds its dc firing level.

(iv) Five applications of each polarity for the surge tests and three for the 60 Hz Current Carrying Test are the minimum required. All tests should be conducted with not more than 1 minute between consecutive applications in each series of three or five to a specific configuration so that heating effects will be cumulative. As not all tests are required in every application, non-applicable tests should be omitted. Tests should be conducted in the following sequence.

(A) Current Impulse Test.
(B) Sixty Hertz (60 Hz) Current Carrying Test.
(C) AC Power Service Impulse Voltage Test.
(D) Voltage Impulse Test.
(E) Arrester Response Delay Test.

(v) Tests should be applied between each of the following terminal combinations for all line operating conditions.

(A) Line tip to ring.
(B) Line ring to ground.
(C) Line tip to ground.
(D) Line tip to ring tied together to ground.

(2) Extraordinary surge protection. A central office or RST may be located in an area where ground conditions prevent the reasonable economic achievement of a low resistance to ground and/or there exists a greater than average probability of surge damage. Such an unusually hostile operating environment shall be recognized and taken into consideration by the bidder in the engineering and specification of the central office switching system and line protection. This subject of operating environment, ground conditions, etc., should be discussed at the time of technical presentation to assure the owner that adequate system protection will be provided by the bidder.

(3) Dielectric strength. Arresters shall be removed for all dielectric strength tests. The duration of all dielectric strength tests shall be at least 1 second. The applied potential shall equal or exceed the +3 sigma dc breakdown voltage of the arrester, provided by the
COE manufacturer. Direct current potentials shall be applied between all line terminals and equipment chassis and between these terminals and grounded equipment housings in all instances where the circuitry is dc open circuit from the chassis, or connected to the chassis through a capacitor.

(4) **Insulation resistance.** Following the dielectric tests, the insulation resistance of the installed electrical circuits between wires and ground, with the normal equipment grounds removed, shall not be less than 10 megohms at 500 volts dc at approximately room temperature (68 °F (20 °C)) and at a relative humidity of approximately 50 percent. The measurement shall be made after the meter stabilizes, unless the requirement is met sooner. Arresters shall be removed for these tests.

(5) **Self-protection.**
   (i) All components shall be of the self-protecting type, capable of being continuously energized at rated voltage without injurious results.

   (ii) The unit equipment shall not be permanently damaged by accidental short circuits of any duration across either the central office side tip and ring or the line side tip and ring. A test is to be made with the unit energized at the highest recommended voltages.

(6) **Static discharge.** Assemblies subject to damage by static discharge shall be identified and special handling instructions shall be supplied.

   (v) **Miscellaneous—**
       (1) **Office wire.** All office wire shall be of soft annealed tinned copper wire meeting the requirements of ASTM Specification B 33-91, Standard Specification for Tinned Soft or Annealed Copper Wire for Electrical Purposes, and of suitable cross-section to provide safe current carrying capacity and mechanical strength. The insulation of installed wire, connected to its equipment and frames, shall be capable of withstanding the same insulation resistance and dielectric strength requirements as given in paragraphs (u)(3) and (u)(4) of this section at a temperature of 120 °F (49 °C) and a relative humidity of 90 percent.

       (2) **Wire wrapped terminals.** These terminals are preferred and where used shall be made with a wire wrapping tool with the following minimum number of successive nonoverlapping turns of bare tinned copper wire in contact with each terminal.

          (i) 6 Turns of 30 Gauge.
          (ii) 6 Turns of 26 Gauge.
          (iii) 6 Turns of 24 Gauge.
          (iv) 5 Turns of 22 Gauge.

(3) **Protection against corrosion.** All metal parts of equipment frames, distributing frames, cable supporting framework, and other exposed metal parts shall be constructed of corrosion resistant materials or materials plated or painted to render them adequately corrosion resistant.

(4) **Screws and bolts.** Screw threads for all threaded securing devices shall be of American National Standard form in accordance with Federal Standard H28, Screw-Thread Standards for Federal Services, unless exceptions are granted to the manufacturer of the switching equipment. All bolts, nuts, screws, and washers shall be of nickel-copper alloy, steel, brass or bronze.

(5) **Temperature and humidity range.** The supplier shall furnish the operating temperature and humidity ranges of the equipment being provided in order that adequate heating and cooling may be supplied (see Items 5.2.1 and 5.2.2 of appendix C of this section).

(6) **Stenciling.** Equipment units and terminal jacks shall be adequately designated and numbered. They shall be stenciled so that identification of equipment units and leads for testing or traffic analysis can be made without unnecessary reference to prints or descriptive literature.

(7) **Equipment frame design.** For newly designed systems, consideration should be given to the desirability of providing frames which can be installed in rooms of normal ceiling height [up to 10 feet (305 cm)]. Where feasible, frames and equipment units shall be designed for ready portability and high salvage value.

(8) **Quantity of equipment bays.** Consistent with system arrangements and ease of maintenance, space shall be provided on the floor plan for an orderly layout of future equipment bays that will be required for anticipated traffic when the office reaches its ultimate size. Readily accessible terminals
shall be provided for connection to interbay and frame cables to future bays. All cables, interbay and intrabay (excluding power), if technically feasible, shall be terminated at both ends by use of connectors.

(w) Remote switching terminal (RST)—

(1) General. The RST is a remotely located digital switching terminal which is placed at a subordinate wire center for subscriber lines and is a part of the host central office from a switching standpoint, and has hardware interchangeable with the host office, except for items that are applicable only to RST control and associated peripheral equipment. This does not preclude the use of existing in-service remote units on a new or upgraded host central office of the latest series generic or release.

(2) Span line. The RST is to be connected to the host central office via a means compatible with T1 type span lines using a DS-1 interface. This connection will be for control supervision and subscriber communication. The RUS equipment specification for a span line is PE-60.

(3) Switching. (i) The RST may have its switching functions controlled either by the host central office stored program control processors or by local subordinate processors which communicate with the host office processors.

(ii) As long as the connecting span line is intact, the subscribers served by the RST shall have all features, traffic capacity, and services including busy verification, available to all other subscribers in the system.

(iii) The RST shall have available an emergency call processing option which permits calling among all subscribers and from subscribers to emergency numbers within the RST if control link connections to the host central office are severed or otherwise disabled. The RST shall be capable of rerouting normally used emergency numbers, such as 911, to predetermined line terminations in this emergency stand-alone operating condition. This RST emergency call processing option shall be provided only when specified by the owner in Item 6.1 of appendix B of this section.

(4) Subscriber line test. (i) Means shall be available on an optional basis to the maintenance personnel to make subscriber line tests from a common location for all subscriber lines including the RST.

(ii) If tests in paragraph (w)(4)(i) of this section are not requested by the owner for a particular installation, a subscriber loop test set (see paragraph (o)(2)(iii)(A) of this section) shall be supplied at the RST with a means to access all lines.

(5) Housing. When housed in a building supplied by the owner, a complete floor plan including ceiling height, power outlets, cable entrances, equipment entry and travel, type of construction, and other pertinent dimensions shall be supplied with this section.

(6) Power—(i) Chargers. A single charger meeting the requirements of paragraph (s)(3) of this section (with the exception of paragraph (s)(3)(viii) of this section) is required. An additional charger capable of carrying the full load or a combination of three chargers each capable of carrying half the load shall be supplied if redundant chargers are specified in appendix B of this section.

(ii) Ringing equipment provisioning. (A) Ringing sources shall be supplied in duplicate.

(B) An exception to the duplicated ringing source requirement permits nonduplicated ringing source(s) to be utilized where there is full compliance with the following service criteria.

(1) In a remote switching terminal (RST) of 400 or more equipped lines, a single nonduplicated ringing source failure shall not cause the complete loss of ringing capability to more than 100 lines.

(2) In a remote switching terminal (RST) of less than 400 equipped lines, a single nonredundant ringing source failure shall not cause the complete loss of ringing capability to more than 25 percent of the total equipped lines.

(iii) Power converter. (A) Power converters required for the purpose of providing various operating voltages to printed circuit boards or similar equipment employing electronic components shall be provided in duplicate with each unit capable of immediately assuming the full operating load upon failure of a unit.
(B) An exception to the duplicate power converter requirement permits nonduplicated power converter(s) to be utilized where there is full compliance with the following criteria.

(1) The failure of any single nonduplicated power converter shall not reduce the grade of service of common control and service circuits to any individual line or trunk by more than 50 percent.

(2) The failure of any single nonduplicated power converter shall not reduce the traffic carrying capacity of any trunk group or service links to a host office by more than 50 percent.

(3) In a remote switching terminal (RST) of 400 or more equipped lines, any single nonduplicated power converter failure shall not cause a complete loss of service to more than 100 equipped lines.

(4) In a remote switching terminal (RST) of less than 400 equipped lines, any single nonduplicated power converter failure shall not cause a complete loss of service to more than 25 percent of the total equipped lines.

(7) Alarm. Sufficient system alarm points shall be provided from the RST to report conditions to the host alarm system.

(x) Responsibilities of the bidder—(1) Central office layout. (i) The successful bidder shall furnish tentative floor plan layout drawings showing the arrangement of the equipment and the dimensions of major equipment units. These drawings shall include minimum door dimensions and ceiling heights required for installation, maintenance and ventilation. If requested by the owner, the floor plan shall be such that the battery, charger, power board, main distributing frame and wire chief’s test equipment are isolated from the other equipment by a partition.

(ii) The layout drawings shall also show provision for the ultimate capacity of the central office as specified by the owner.

(iii) After approval by the owner of the tentative floor plan, and within 10 calendar days after approval of the contract by the Administrator, the owner shall furnish the bidder the necessary data on the actual floor plan. Within 20 calendar days after receiving the necessary building data, the bidder shall then supply floor plan drawings showing exact locations of all equipment, both initial and ultimate, including points where connection to commercial power are required, with voltage and wattage indicated at each point. Within 20 calendar days after receiving the floor plan drawings from the bidder, the owner shall approve these drawings or take the necessary steps to have the drawings changed to meet his approval. The layout planning must be so coordinated between the owner and the bidder as not to delay the scheduled equipment installation date.

(2) Shipment of main distributing frame (MDF). The bidder shall ship the MDF equipment, with all necessary instructions to permit its installation by the owner, at the time requested by the owner in writing, provided such time is not earlier than 90 days prior to the date specified for the shipment of the rest of the central office equipment. If the owner or the owner’s agent installs the main distributing frame, the owner shall assume the responsibility and the expense of proper installation according to information furnished by the bidder.

(3) Drawings and printed material. (i) The bidder shall supply instructional material for each exchange involved at the time of delivery of the equipment. It is not the intent of this section to require system documentation necessary for the repair of individual circuit boards. The bidder shall supply three complete sets of legible drawings, each set to include all of the following drawings and documentation:

(A) A floor plan showing exact dimensions and location of each equipment frame or item to a convenient scale;

(B) A block schematic drawing showing the various equipment components in the system, and their identifying circuit number (e.g., MDF, line circuits, memory, trunks, etc.);

(C) Drawings of major equipment items such as frames, with the location of major component items of equipment shown;

(D) Individual functional drawings for electrical circuits in the system;
(E) A detailed description of the operation of each circuit down to a circuit package level;
(F) Wiring diagrams indicating the specific method of wiring used on each item of equipment and interconnection wiring between items of equipment;
(G) Sufficient software documentation to maintain and service the system, including drawings showing principal aspects of the software architecture;
(H) Individual maintenance drawings covering each equipment item that contains replaceable parts, appropriately identifying each part by name and part number, or, complete ordering instructions for all replaceable parts if individual item drawings are not provided; and
(I) Job drawings including all drawings that are individual to the particular office involved, such as main frame, power panel, test board, etc.

(ii) The following information shall also be furnished:
(A) Complete index of the required drawings;
(B) Explanation of electrical principles of operation of the overall switching system;
(C) List of tests which can be performed with each piece of test equipment furnished, and explanation of the method of performing each test;
(D) Sample of each form recommended for use in keeping records of tests;
(E) Criteria for analyzing results of tests and determining appropriate corrective action;
(F) General notes on the methods of isolating equipment faults to specific printed circuit cards in the equipment;
(G) List of typical troubles which might be encountered, together with general indications as to the probable location of each trouble;
(H) Special office grounding requirements;
(I) A site specific central office ground system acceptance checklist that is consistent with industry practice; and
(J) A site specific layout of the master ground bar (MGB) showing assignment of P, A, N, and I equipment areas.

(4) Distributing frame wire. The bidder shall provide sufficient tinned copper conductor distributing frame wire for the initial installation. The insulation of this wire shall be such that it will not support combustion. The insulation shall have good abrasion resistance and cut-through properties, exhibit good solder heat resistance, and be suitable for wire wrap connections or insulation displacement connections.

(5) Technical assistance service. A technical assistance service shall be made available to assist the owner and its maintenance personnel on a 24-hour, 7 days a week basis. There is to be assistance available for both hardware and software problems. The necessary interface devices shall be supplied by the bidder.

(6) Spare parts. (i) The spare parts bid price shall be based upon the required quantities of spares shown in Item 6.2 of appendix C of this section, and shall be added to the base bid for comparison purposes in awarding the bid. It is the supplier’s responsibility to provide all spares required by this section. If the supplier neglects to list certain spare parts in Item 6.2 of appendix C of this section, but they are necessary to comply with this section, they shall be provided by the supplier at no additional cost to the owner.

(A) “Units” are defined as user replaceable components used in the central office equipment. “Spare Parts” are direct replacements for units. Spare parts are necessary for the maintenance and diagnostic operations where the suspected faulty unit may be removed and a spare part substituted in anticipation that the trouble will be cleared.

(B) Examples of units for which spare parts should be furnished are printed circuit cards; circuit pack assemblies; fuses; and power supplies.

(C) Spare parts are not required as part of this addendum for items such as connectorized cables, nuts, bolts, and similar hardware; nor for items which can be obtained from sources other than the bidder such as battery cells, chargers, powerboards, magnetic tape transport assemblies, disk drives, ringing machines, recorded announcement machines, loop extenders and voice frequency repeaters, fire bars, teletype writers, and video monitors.
(D) When 100 or more like units are used in the hosts and RST's to be bid, the quantity of spares to be furnished is determined by multiplying the total number of like units in the contract by .05 or .03, as applicable, and rounding off to the next lowest integer. For example, 119 Class 1 units require five spares; 120 require six.

(E) When alternates are required, the price of the spare parts for the alternates shall be included with the price of the alternate.

(F) For equipment in which the line cards consist of a number of plug-in "daughter" boards on a "mother" board, the line card is defined as the "daughter" board unit. In a similar manner for those designs which have line cards backed up by a "control card," the "control card" is not, by definition, a line card.

(G) The quantities of spare parts determined in paragraph (x)(6)(vi) of this section are a minimum quantity. The bidder may add quantities of spare parts to bring the number of spare parts up to the bidder's list of spare parts necessary for proper operation in the field.

(ii) A Class 1 unit does not have automatic transfer to a redundant or standby pool of identical units, and provides any function for 24 or more lines or trunks or for all trunks in a group. Nonredundant digital trunk interfaces are included in this category.

(iii) A Class 2 unit has automatic transfer to a redundant or standby pool of identical units, and provides any function for 24 or more lines or trunks or for all trunks in a group. Redundant digital trunk interfaces and units of a redundant stored program processor are included in this category.

(iv) A Class 3 unit does not have automatic transfer to a redundant or standby pool of identical units and provides any function for no more than 23 lines or trunks or for less than all trunks in a group. Nonredundant analog trunks are included in this category. Excluded from this category are line cards, which are in Class 4.

(v) A Class 4 unit has automatic transfer to a redundant or standby pool of identical units and provides any function for no more than 23 lines or trunks or for less than all trunks in a group. Also, any line cards are in Class 4.

(vi) The spare parts for all of the hosts and the RST's included in this contract shall be provided as follows:

<table>
<thead>
<tr>
<th>Quantity of Units used in the CO's &amp; RST's To Be Bid</th>
<th>Required Quantity of Spares By Class of Unit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Class --- &gt; 1 2 3 4</td>
<td>1   2   3   4</td>
</tr>
<tr>
<td>1 through 9</td>
<td>1   1   0   0</td>
</tr>
<tr>
<td>10 through 24</td>
<td>2   2   1   0</td>
</tr>
<tr>
<td>25 through 49</td>
<td>3   2   2   0</td>
</tr>
<tr>
<td>50 through 99</td>
<td>4   3   2   0</td>
</tr>
<tr>
<td>100 or More</td>
<td>5%  3%  3%  0</td>
</tr>
</tbody>
</table>

(vii) As a part of the response to the bid, the supplier shall furnish a list of units used by class and a list of spare parts to be furnished with this contract. This list shall be placed in Item 6.2 of appendix C of this section for only one of the host specifications included in the entire contract.

(7) Environmental requirements. The bidder shall specify the environmental conditions necessary for safe storage and satisfactory operation of the equipment being bid. If requested, the bidder shall assist the owner in planning how to provide the necessary environment for the equipment.

(8) Unit costs for cost separation purposes. The successful bidder shall present a cost breakdown of the central office equipment on a discrete element basis 90 days after installation completion. This shall include the various frames, switching and transmission components, and software.

(9) Single-point grounding system acceptance. Qualified representatives of the central office system supplier and the owner are to conduct a thorough joint acceptance audit of the grounding system prior to the central office being placed into service. A grounding system acceptance checklist provided by RUS, which is consistent with standard industry practice, will be used in conducting this audit. All required grounding system corrections are to be made prior to placing the central office system into full service operation. The successful completion of this grounding system audit will constitute an acceptance on the part of both parties, the owner and the central office supplier (refer to paragraph (y)(5) of this
§ 1755.522

Installation. The following responsibilities apply to the central office equipment installation and Remote Switching Terminal (RST) installations, unless otherwise noted.

(1) Responsibilities of owner. The owner shall:

(i) Allow the bidder and its employees free access to the premises and facilities at all hours during the progress of the installation;

(ii) Take such action as necessary to ensure that the premises are dry and free from dust and in such condition as not to be hazardous to the installation personnel or the material to be installed (not required for an RST installed in a self-contained environmentally controlled cabinet);

(iii) Provide heat or air conditioning when required and general illumination in rooms in which work is to be performed or materials stored (not required for an RST installed in a self-contained environmentally controlled cabinet);

(iv) Provide suitable openings in buildings to allow material to be placed in position (not required for an RST installed in a self-contained environmentally controlled cabinet);

(v) Provide the necessary conduit and commercial and dc-ac inverter output power to the locations shown on the approved floor plan drawings; provide 120 volts, 60 Hz commercial power equipped with a secondary arrester and a reasonable number of outlets for test, maintenance and installation equipment; provide suitable openings or channels and ducts for cables and conductors, from floor to floor and from room to room; provide an acceptable central office grounding system and at a ground resistance level that is reasonable for office site conditions (not required for an RST installed in a self-contained environmentally controlled cabinet);

(vi) Provide the necessary wiring, central office grade ground and commercial power service, with a secondary arrester, to the location of an exterior RST installation based on the voltage and load requirements furnished by the bidder;

(vii) Test at the owner’s own expense all lines and trunks for continuity, leakage and loop resistance and ensure that all lines and trunks are suitable for operation with the central office equipment specified;

(viii) Make alterations and repairs to buildings necessary for proper installation of material, except to repair damage for which the bidder or its employees are responsible;

(ix) Connect outside cable pairs on the distributing frame and run all line and trunk jumpers (those connected to protectors);

(x) Furnish all trunk, line, and party assignment information to permit the bidder to program the data base memory within a reasonable time prior to final testing;

(xi) Release for the bidder’s use such portions of the existing plant as are necessary for the proper completion of such tests as require coordination with existing facilities including facilities for T1 span lines with properly installed repeaters between the central office and the RST installations;

(xii) Make prompt inspections as it deems necessary when notified by the bidder that the equipment, or any part of the equipment, is ready for acceptance;

(xiii) Provide and install adequate fire protection apparatus, including one or more fire extinguishers or fire extinguishing systems of the gaseous type that has low toxicity and effect on equipment; and

(xiv) Provide necessary access ports for cable, if underfloor cable is selected.

(2) Responsibilities of bidder. The bidder shall:

(i) Allow the owner and its representatives access to all parts of the buildings at all times during the installation;

(ii) Obtain the owner’s permission before cutting into or through any part of the building structure such as girders, beams, concrete or tile floors, partitions or ceilings (not applicable to the installation of lag screws, expansion bolts, and similar devices used for fastening equipment to floors, columns, walls and ceilings);

(iii) Be responsible for reporting to the owner any damage to the building.
which may exist or may occur during its occupancy of the building, repairing all damage to the building due to carelessness of the bidder’s workforce, and exercising reasonable care to avoid any damage to the owner’s property;

(iv) Consult with the owner before cutting into or through any part of the building structure where the fire-proothing or moisture proofing may be impaired;

(v) Take necessary steps to ensure that all fire fighting apparatus is accessible at all times and all flammable materials are kept in suitable places outside the building;

(vi) Not use gasoline, benzene, alcohol, naphtha, carbon tetrachloride or turpentine for cleaning any part of the equipment;

(vii) Install the equipment in accordance with the specifications for the office;

(viii) Run all jumpers, except line and trunk jumpers (those connected to protectors);

(ix) Establish and update all data base memories with subscriber and trunk information as supplied by the owner until an agreed turnover time;

(x) Give the owner notice of completion of the installation at least 1 week prior to completion;

(xi) Permit the owner or its representative to conduct tests and inspections after installation has been completed in order that the owner may be assured that the requirements for installation are met;

(xii) Allow access, before turnover, by the owner or its representative, upon request, to the test equipment which is to be turned over as a part of the office equipment, to permit the checking of the circuit features which are being tested and to permit the checking of the amount of connected equipment to which the test circuits have access;

(xiii) Make final charger adjustments using the manufacturer’s recommended procedure;

(xiv) Notify the owner promptly of the completion of work of the central office, or such portions as are ready for inspection;

(xv) Correct promptly all defects for which the bidder is responsible;

(xvi) Provide the owner with one set of marked prints, or strapping prints, showing which of the various options and figures are in use on each switching system as specified in paragraph (x)(3)(i) of this section;

(xvii) Place the battery in service in compliance with the recommendations of the battery manufacturer; and

(xviii) Furnish the owner with a record of the cell voltages and specific gravity readings made at the completion of the installation of the switching system and before it is placed in commercial service.

(3) Installation requirements. (i) All work shall be done in a neat, workmanlike manner. Equipment frames or cabinets shall be correctly located, carefully aligned, anchored and firmly braced. Cables shall be carefully laid with sufficient radius of curvature and protected at corners and bends to ensure against damage from handling or vibration. Exterior cabinet installations for RST’s shall be made in a permanent, eye-pleasing manner.

(ii) All multiple and associated wiring shall be continuous, free from crosses, reverses and grounds and shall be correctly wired at all points.

(iii) An inspection shall be made by the owner or its representatives prior to performing operational and performance tests on the equipment. However, this inspection shall be made after all installing operations which might disturb apparatus adjustments have been completed. The inspection shall be of such character and extent as to disclose with reasonable certainty any unsatisfactory condition of apparatus or equipment. During these inspections, or inspections for apparatus adjustments, or soldering, or in testing of equipment, a sufficiently detailed examination shall be made throughout the portion of the equipment within which such condition is observed, or is likely to occur, to disclose the full extent of its existence, where any of the following conditions are observed:

(A) Apparatus or equipment units failing to compare in quantity and code with that specified for the installation;

(B) Apparatus or equipment units damaged or incomplete;

(C) Apparatus or equipment affected by rust, corrosion or marred finish; or
(D) Other adverse conditions resulting from failure to meet generally accepted standards of good workmanship.

(4) Operational test requirements. (i) Operational tests shall be performed on all circuits and circuit components to ensure their proper functioning in accordance with appropriate applicable documents supplied by the bidder.

(ii) A sufficient quantity of overall tests shall be made to ensure proper operation of all specified features.

(iii) A sufficient quantity of locally originating and incoming calls shall be made to prove the switching system can accept and process calls to completion.

(5) Grounding system audit. (i) A grounding system audit shall be performed to ensure that a viable single-point grounding system is in place prior to the time the switching system is placed into full service operation. It is suggested that such an audit be conducted at the time the switching system is ready for turnover to the owner.

(ii) This single-point grounding system audit is to be conducted by authorized representatives of the supplier and owner, and with the RUS general field representative participating at his discretion.

(iii) The single-point grounding system audit is to be conducted using the checklist contained in appendix D of this section.

(iv) Appendix D of this section shall be the principal single-point grounding system audit guideline document. A supplemental checklist may be prepared and provided by the switching system supplier which recognizes unique grounding requirements related to their particular switching system. The scope of this supplier checklist is to be confined to unique and specific switching system requirements only. Acceptable supplier supplemental grounding checklist must have prior approval of and be on file with the Central Office Equipment Branch of the Telecommunications Standards Division of RUS.

(v) It is the responsibility of the central office supplier to ensure that the grounding system evaluation criteria contained in the combination of the appendix D checklist of this section and their optional supplemental checklist adequately fulfill requirements for warranty coverage.

(vi) All deficiencies in the single-point grounding system are to be corrected prior to the switching system being placed into full service operation. Exceptions are permitted only by mutual agreement of the owner and supplier and with written approval of the RUS general field representative.

(vii) The acceptance statement facesheet of the audit checklist in appendix D of this section shall be signed by authorized representatives of the supplier and owner to indicate mutual approval of the single-point grounding system. Copies of all completed grounding system audit documents are to be provided to the supplier, owner and appropriate RUS telephone program regional offices.

(Appendix A to §1755.522—Specification for Digital, Stored Program Controlled Central Office Equipment Detailed Requirements (Host)

(information to be supplied by owner)

Telephone Company Name ______________________

Location ______________________

Central Office Name (By Location) ______________________

Town ______________________

County ______________________

State ______________________

______ Attended

______ Unattended

______ Remotes

1. General

1.1 Notwithstanding the bidder’s equipment lists, the equipment and materials furnished by the bidder must meet the requirements of paragraphs (a) through (x), Appendix A and Appendix B of §1755.522.

1.2 Paragraphs (a) through (x) of §1755.522 cover the minimum general requirements for digital, stored program controlled central office switching equipment.

1.3 Paragraph (y) of §1755.522 covers requirements for installation, inspection, and testing when such service is included as part of the contract.)
1.4 Appendices A and B of §1755.522 cover the technical data for application engineering and detailed equipment requirements insofar as they can be established by the owner. These appendices are to be filled in by the owner.

1.5 Appendix C of §1755.522 covers detailed information on the switching network equipment and the common control equipment, and information as to system reliability and heavy traffic delays as proposed by the bidder. This appendix is to be filled in by the bidder and must be presented with the bid.

1.6 Appendix D of §1755.522 is the single-point grounding system audit checklist.

2. Numbering Scheme

2.1 This office shall be arranged to serve the following area and office code(s):

<table>
<thead>
<tr>
<th>Connecting office</th>
<th>Code</th>
<th>Connecting office</th>
<th>Code</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

If more than one code is to be served, discrimination shall be determined by the following:

Number Translation
Separate Trunk Groups
Both (Explain in Item 16, Appendix A)

2.2 This office shall be arranged to provide EAS service to the following:

<table>
<thead>
<tr>
<th>Connecting office</th>
<th>Code</th>
<th>Connecting office</th>
<th>Code</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

2.2.1 Seven digits shall be dialed for all local and EAS calls.

2.3 Additional dialing procedures to be provided include the following:

<table>
<thead>
<tr>
<th>Feature</th>
<th>Required</th>
</tr>
</thead>
<tbody>
<tr>
<td>Station Paid Toll (Including Coin):</td>
<td></td>
</tr>
<tr>
<td>Home Numbering Plan Area (HNPA):</td>
<td></td>
</tr>
<tr>
<td>&quot;1&quot; + 7 Digits</td>
<td></td>
</tr>
<tr>
<td>&quot;1&quot; + 10 Digits</td>
<td></td>
</tr>
<tr>
<td>Other (Explain in Item 16, Appendix A)</td>
<td></td>
</tr>
<tr>
<td>Foreign Numbering Plan Area (FNPA):</td>
<td></td>
</tr>
<tr>
<td>&quot;1&quot; + 10 Digits</td>
<td></td>
</tr>
<tr>
<td>Other (Explain in Item 16, Appendix A)</td>
<td></td>
</tr>
</tbody>
</table>

10XXX Dialing to Interexchange Carriers:

<table>
<thead>
<tr>
<th>Name</th>
<th>Access code</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

2.4 Assistance calls are answered: (Check appropriate items)

2.4.1 At the operator office in

2.4.1.1 By means of the regular interoffice toll trunks

2.4.1.2 By means of the regular interoffice EAS trunks

2.4.1.3 By means of a separate special service trunk group

2.4.1.4 Locally

Explain:
3. Office Clock

3.1 This office is to be slave clock synchronized with another office:

   Yes  No

(Explain details in Appendix A, Item 16 if “Yes”.)

3.2 This office is to be a master clock office to provide synchronization timing for other offices:

   Yes  No

(Explain details in Appendix A, Item 16 if “Yes”.)

4. Interoffice Trunking Diagram

4.1 A sketch showing relative location of exchanges, RST’s, and number of circuits shall be included, also the office and area codes of the direct trunk points. The diagram should indicate whether toll or EAS trunk groups are “High Usage” or “Final.” Alternate routes should be included. Indicate whether the trunk termination is direct digital or analog.

5. Translator Function Chart

6. Line Circuit Requirements (Includes all lines associated with RST’s.)

6.1 Types of Lines

<table>
<thead>
<tr>
<th>No. of lines</th>
<th>No. of EAS areas</th>
<th>Total No. of lines required</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local service only</td>
<td>both local and EAS service</td>

</table>

* Furnish translation information under Item 5.
§ 1755.522

6.1.13 Line Concentrator

6.1.13.1 Supplied by Owner (see Item 16, Appendix A, for details)

Yes ☐ No ☐

6.1.13.2 Supplied by Bidder (If “Yes”, attach REA Form 397g, Performance Specification for Line Concentrators)

Yes ☐ No ☐

6.2. Data on Lines Required Range Extension

6.2.1 Number of non-pay station lines having a loop resistance, including the telephone set, as follows:

<table>
<thead>
<tr>
<th>No. of lines</th>
<th>1901–3200 ohms</th>
<th>3201–3600 ohms</th>
</tr>
</thead>
</table>

6.2.2 Number of pay station lines having loop resistance, excluding the telephone set, greater than:

<table>
<thead>
<tr>
<th>No. of lines</th>
<th>1200 ohms (For Prepay)</th>
<th>1000 ohms (For Semi-Postpay Operation)</th>
</tr>
</thead>
</table>

6.2.3 Range extension equipment is to be provided:

6.2.3.1 Loop Extenders: Total Quantity

By Bidder—Quantity ☐
By Owner—Quantity ☐

(Explain in Item 16, Appendix A)

6.2.3.2 VF Repeaters: Total Quantity ☐

By Bidder—Quantity ☐
By Owner—Quantity ☐

(Bidder must have information on loading and cable size.)

(Explain in Item 16, Appendix A)

6.2.3.3 Range extension may be furnished as an extended range line circuit at the option of the supplier. If this option is used, the quantities of loop extenders and VF repeaters will be different from the quantities listed above (see Item 6.1.a, Appendix C).

Yes ☐ No ☐

7.2 Average Originating CCS per Line per Busy Hour

\[
\text{CES/Line} = \frac{\text{(d)/(e)}}{\text{(d)}}
\]

This office shall be engineered to handle an initial average originating busy hour traffic of ____ CCS per line. It is anticipated that the average originating busy hour traffic will increase to ____ CCS per line.

Originating Traffic Attributed to Host Only ____ CCS/Line

7.3 Terminating Traffic—Estimated CCS per Busy Hour

It is assumed that the total CCS for terminating traffic is the same as for originating traffic. Since digital switch networks are on a terminal per line basis, the terminating CCS per line will be the same as the originating CCS per line as shown in Item 7.2, Appendix A.

Terminating Traffic Attributed to Host Only ____ CCS/Line

9.5 Pollable Systems

9.5.1 Polling device to be provided on this contract

   Required
   Not Required

(Provide details in Item 16, Appendix A)

9.5.2 Pollable system to be backed up by tape or disc standby

   Required
   Not Required

9.6 AMA Format

9.6.1 Bellcore Format

   Required
   Not Required

(Provide details in Item 16, Appendix A)

10. Miscellaneous Operating Features

10.1 Busy Verification

10.1.1 By dedicated trunk from toll operator:

10.1.1.1 One-Way, Inward

10.1.1.2 Two-Way (Busy verification inward, intercept outward)

10.1.2 By prefix digit over intertoll trunk

   (Indicate digit(s) dialed)

10.1.3 Access by switchman

10.1.3.1 Dedicated Trunk

10.1.3.2 Multiple of Operator Trunk

10.2 Intercept Facilities

10.2.1 Vacant code, disconnected number, and unassigned number intercept shall be: (Check One)

   By recorded announcement:
   Without cut-through to operator
   With cut-through to operator

   By operator

10.2.2 Changed number intercept shall be: (Check One)

   By recorded announcement:
   Without cut-through to operator
   With cut-through to operator

   By operator

10.2.3 Method of Reaching Operator, if required:

   Separate trunk group

   Regular interoffice toll trunks with idle trunk selecting over at least three trunks when three or more toll trunks are equipped

10.2.4 Number of separate intercept trunk circuits

10.3 Line Load Control

10.3.1 Line load control facilities are:

   Required
   Not Required

(Explain in Item 16, Appendix A)

10.4 Service Observing Facilities
10.4.1 Service observing facilities are:
   Required  Not Required
   (Explain in Item 16, Appendix A)

10.5 Hotel-Motel Arrangements
10.5.1 Hotel-motel arrangements for operation of message registers at the sub-
  scriber's premises are:
   Required  Not Required
   (Explain in Item 16, Appendix A)

10.5.1.1 How are message registers to be ac-
   tivated?
   Line Reversal
   Third Wire
   Other

10.5.1.2 Hotel-Motel Arrangements
   (Explain in Item 16, Appendix A)

10.6 Nailed-Up Connections
   Required  Not Required
   (Explain in Item 16, Appendix A)

10.7 Vertical Services: (RST Lines are In-
   cluded)
   10.7.1 Call Waiting—No. of Lines .................................
   10.7.2 Call Forwarding—No. of Lines ............................
   10.7.3 Abbreviated Dialing No. of Lines .......................
   10.7.4 Three-Way Calling—No. of Lines .......................
11.5.1 Remote control of the system shall be provided.

Yes __

No ___

If required, explain in Item 16, Appendix A, including number, type and location.

12. Power Equipment Requirements (Host Office Only)

12.1 Central Office Battery

12.1.1 A battery reserve of ___ busy hours shall be provided for this office when it reaches ___ lines at the ultimate anticipated traffic rates specified in Item 7.2, Appendix A.

12.1.1.1 The owner will furnish a standby generator, permanently installed in this office, with capacity sufficient to power air conditioning equipment required for cooling of the central office equipment and to maintain an adequate dc supply in the event of a failure of the commercial ac supply.

Yes ___

No ___

12.1.2 Type of battery: (Check One)

Lead Calcium ___

Lead Antimony ___

12.1.3 Voltmeter (portable 3–60–150 volt scale, 1% accuracy) shall be furnished.

Yes ___

No ___

12.1.4 Hydrometer in a hydrometer holder with glass or plastic drop cup shall be furnished.

Yes ___

No ___

12.1.5 Type of battery rack required: (Check One)

Two Tier ___

Other ___

Explain: ___

12.1.6 Special equipment power requirements (carrier, voice frequency repeaters, etc.). Drain in amperes ___.

12.1.6.1 Supply all necessary equipment to provide the following 48-volt battery taps:

<table>
<thead>
<tr>
<th>Number of circuits</th>
<th>Fuse (or circuit breaker) size</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

12.2 Charging Equipment

12.2.1 Charging equipment shall be provided capable of charging the office battery on a full float basis when the office reaches ___ lines at the ultimate anticipated traffic rates specified in Item 7.2, Appendix A.

12.2.2 Charger input rating shall be:

<table>
<thead>
<tr>
<th>Voltage</th>
<th>3-Wire</th>
<th>4-Wire</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

12.3 Ringing Equipment

12.3.1 Solid-state ringing equipment in accordance with paragraph (s)(5)(i) of §1755.522 shall be provided for generating the frequencies specified by check marks in the following table. Ringing generator sets serving the entire office shall each be sized to carry the full office ringing load when the office size reaches ___ lines at the ultimate anticipated traffic rates specified in Item 7.2, Appendix A.

12.3.2 Ringing frequencies to be supplied:

<table>
<thead>
<tr>
<th>Frequency in Hz</th>
<th>Maximum No. of telephones</th>
</tr>
</thead>
<tbody>
<tr>
<td>Single Frequency</td>
<td>20</td>
</tr>
<tr>
<td>Decimonic</td>
<td>20</td>
</tr>
<tr>
<td>Harmonic</td>
<td>16%</td>
</tr>
<tr>
<td>Synchrononic</td>
<td>20</td>
</tr>
</tbody>
</table>

12.3.3 Furnish frequency meter (accurate within 1.3 Hz) and voltmeter (5% accuracy) for ringing measurements (see paragraph (s)(7)(ii) of §1755.522). Check One:

Panel Mounted ___

Portable ___

Not Required ___

12.4 Power Board

The power panel and associated wiring shall be of ample size to meet the load requirements when this office reaches ___ lines at the ultimate anticipated traffic rates specified in Item 7.2, Appendix A.

13. Distributing Frame Requirements (Host Office Only)

13.1 Total number of outside plant cable pairs to be terminated ___

13.1.1 Gauge of outside plant cable pairs ___

13.2 Number of outside plant cable pairs to be protected ___

13.3 Number of additional protector pair units to be provided on MDF ___

Explain: ___

13.4 Main Frame Details

Is present MDF to be reused?

Yes ___

No ___

If “Yes,” Type ___

Reused protectors are: ___

12 CFR Ch. XVII (1–1–08 Edition)
Rural Utilities Service, USDA § 1755.522

13.4.1 Number of pairs of arrester units (switching equipment) __ (Mfr.) (Type)

13.4.2 Number of pairs of gas tube arrester units (special equipment) __

13.4.2.1 Gas tubes to be: __ light, __ medium, __ heavy, __ max. duty units

13.4.2.2 Fail shorted/low breakdown failure mode required __ Yes __ No

13.4.2.3 Breakdown voltage of gas tube arresters __

13.4.3 Number of terminated pairs to be grounded __

13.4.4 Factory assembled tip cable __ Yes __ No

13.4.4.1 Tip cable length (if other than 20 feet (610 cm)) __

13.4.4.2 Tip cable formed __ Up __ Down __

13.4.5 Pairs per vertical __

13.4.6 Height of vertical __ feet __

14. Building and Floor Plan Information (Host Office Only)

14.1 Equipment is to be installed in an existing building (Attach detailed plan.) __

14.2 A new building is planned __

14.2.1 Tentative plan (Note to Engineer: Show sketch without dimensions.) __

14.3 Detailed Arrangements __

14.3.1 Partition required (to isolate space containing battery, charger, power board, test panel, main distributing frame and subscriber's loop test circuit (wire chief's test desk) from that of the remaining equipment). __ Yes __ No __

14.3.2 Vestibule required __ Yes __ No __

14.3.3 Cable entrance __

14.3.4 Additional floor space will be required for the following equipment which is being furnished by the owner or by the connecting company: __

14.3.5 The office will be arranged for __

14.3.6 Is earthquake bracing required? __ Yes __

14.3.7 Office ground will be __ ohms or less (Refer to Item 4.6.3 of RUS TE&CM 810.)

14.3.8 The office is considered to be in the following category for lightning damage probability based on the Figure 1 map of RUS TE&CM 823 (see paragraph (u)(2) of 1755.522).

14.3.9 The following is additional information regarding operating environment conditions which should be considered in determining system protection requirements (tower in vicinity, high exposure, etc.):

15. Alternate Requests

16. Explanatory Notes (Include a detailed description of any equipment to be reused, or otherwise supplied by the owner, loop extenders, subscriber carrier, VF repeaters, etc.)

APPENDIX B TO 7 CFR 1755.522—DETAILED INFORMATION ON REMOTE SWITCHING TERMINALS (RST’s) (Complete One Form For Each RST)

1. Number of Subscriber Lines (These lines included in totals in Item 6, Appendix A).

1.1 Single-Party: ______ Flat Rate Message Rate.

1.2 Semi-Postpay Pay Station ______.

1.3 Prepay Pay Station ______.

1.4 PABX Lines ______ Loop Start ______ Ground Start ______ Restricted at Office ______ (Describe in Item 12, Appendix B)

1.5 Number of lines to be pushbutton ______

1.6 911 Emergency Lines ______

1.7 Anticipated ultimate capacity (20-Year) ______

2. Traffic

2.1 Originating traffic per line—CCS/BH: ______ Initial ______ Ultimate.

2.2 Terminating traffic per line—CCS/BH: ______ Initial ______ Ultimate

2.2.1 Terminating will be made equal to originating if it is not known to be different.

3. Subscriber Loop Resistance

3.1 Number of subscriber lines having loop resistance, including the telephone set of: __

<table>
<thead>
<tr>
<th>No. of Lines</th>
<th>1501-1900 Ohms</th>
<th>1901-3200 Ohms</th>
</tr>
</thead>
<tbody>
<tr>

4. Range Extension

4.1 If no standby power is available at the site, loop extenders may be required on 1501 to 1900 ohms loops.

4.2 Loop extenders: Total Quantity By Bidder—Quantity By Owner—Quantity

(Explain in Item 12, Appendix B)

4.3 VF repeaters: Total Quantity By Bidder—Quantity By Owner—Quantity

(Explain in Item 12, Appendix B)

5. Power Supply

5.1 Power Board.

5.1.1 The power board and associated wiring shall be of ample size to meet the load requirements when this RST reaches lines at the ultimate anticipated traffic rates specified in Item 2, Appendix B.

5.2 Charger input rating shall be Voltage Phase Frequency

3-Phase Connection:

3-Wire
4-Wire
Delta

Y

5.2.1 Charger shall be capable of charging the RST battery on a full float basis when the RST reaches lines at ultimate traffic rate specified in Item 2, Appendix B.

5.2.2 Charger shall be redundant

5.3 Battery reserve shall be ______ busy hours when the RST reaches lines at the ultimate anticipated traffic specified in Item 2, Appendix B.

5.4 Standby power is available. Yes No

5.5 Special equipment power requirements

amps.

5.6 Ringing.

5.6.1 Type of Ringing.

5.6.2 Frequency

<table>
<thead>
<tr>

</tbody>
</table>

5.6.3 Wattage to be sized for lines.

5.6.4 Frequency Meter (see Item 12.3.3, Appendix A). Panel Mounted ______ Not Required ______

6. Emergency Operation

6.1 If path to central office is opened, the RST shall be able to complete calls between subscribers in its own system: Yes No

Further requirements should be listed under Item 12, Appendix B.

7. RST Distribution Frame Requirements

7.1 Total number of outside plant cable pairs to be terminated ______.

7.1.1 Gauge of outside plant cable pairs ______.

7.2 Number of outside plant cable pairs to be protected ______.

7.3 Number of additional protector pair units to be provided on MDF ______.

(Explain:)

7.4 Main Frame Details

7.4.1 Present MDF to be reused Yes No ______.

If "Yes", Type ______.

If "Yes", Reused protectors are: ______ (Mfr.) (Type).

7.4.2 Number of pairs of arrester units (switching equipment) ______.

7.4.3 Number of pairs of gas tube arrester units (special equipment) ______.

7.4.3.1 Gas tubes to be: ______ light, medium, heavy, maximum duty units.

7.4.3.2 Fail shorted/low breakdown failure mode required Yes No ______.

7.4.3.3 Breakdown voltage of gas tube arresters ______.

7.4.4 Number of terminated pairs to be grounded ______.

7.4.5 Factory assembled tip cable Yes No ______.

7.4.5.1 Tip cable length (if other than 20 feet (610 cm)) ______.

7.4.5.2 Tip cable formed Up Down ______.

7.4.6 Pairs per vertical ______.

7.4.7 Height of vertical feet inches ______.

8. Building and Floor Plan Information

8.1 RST to be mounted in building ______.

8.1.1 Earthquake bracing required Yes No ______ (see Item 14.3.6, Appendix A).

8.1.2 Supply building floor plan ______.

8.2 RST to be mounted in cabinet out of doors ______.

8.2.1 Cabinet to be mounted ______ on pole ______ on ground ______.

9. Subscriber Line Test

9.1 Remote testing of subscriber lines is required Yes No ______.

9.2 Subscriber loop test set ______.

10. Span Lines to Host Central Office

10.1 To be supplied by Owner ______.

10.2 To be supplied by Bidder ______.

10.2.1 When the bidder is to supply the span lines, an RUS Form 397b, Trunk Carrier
Rural Utilities Service, USDA § 1755.522

Systems, with the applicable parts completed must be attached with a physical layout of the span line.

11. Grounding Considerations

11.1 The RST ground will be _ohms or less. (Refer to Item 4.6.3 of RUS TE&CM 810.)

11.2 This RST is considered to be in the following category for lightning damage probability based on the Figure 1 map of RUS TE&CM 823. 
- Very High
- Higher than Average
- Average
- Lower than Average
- Very Low

11.3 The following is additional information regarding operating environment conditions which should be considered in determining system protection requirements (tower in vicinity, high exposure, etc.):

12. Explanatory Notes

APPENDIX C TO 7 CFR 1755.522—SPECIFICATIONS FOR DIGITAL, STORED PROGRAM CONTROLLED CENTRAL OFFICE EQUIPMENT DETAILED REQUIREMENTS—BIDDER SUPPLIED INFORMATION

Telephone Company
Name
Location

Central Office Name (By Location)
Town
County
State

Attended Unattended

1. General

1.1 The equipment and materials furnished by the bidder must meet the requirements of paragraphs (a) through (x), Appendix A, and Appendix B of §1755.522.

1.2 Paragraphs (a) through (x) of §1755.522 cover the minimum general requirements for digital, stored program controlled central office switching equipment.

1.3 Paragraph (y) of §1755.522 covers requirements for installation, inspection, and testing when such service is included as part of the contract.

1.4 Appendices A and B of §1755.522 cover the technical data for application engineering and detailed equipment requirements insofar as they can be established by the owner. These appendices are to be filled in by the owner.

1.5 Appendix C of §1755.522 covers detailed information on the switching network equipment and the stored program controlled equipment, and information as to system reliability and heavy traffic delays as proposed by the bidder. This appendix is to be filled in by the bidder and must be presented with the bid.

1.6 Appendix D of §1755.522 is the single-point grounding system audit checklist.

2. Performance Objectives

2.1 Reliability (see paragraph (b) of §1755.522).

2.2 Busy Hour Load Capacity and Traffic Delay (see paragraph (e)(10) of §1755.522. Describe basis for traffic analysis).

3. Equipment Quantities Dependent on System Design

3.1 Switch Frames and Circuits.

3.1.1 Number of Lines.

3.1.1.1 The number of lines to be provided shall include the number required for the termination of subscriber lines, Item 7, Appendix A, plus the number required for routine testing plus any additional to meet the minimum switch increment of the selected system.

3.1.1.2 The number of lines provided for this office will be _

3.1.2 Number of Ports Used for Trunks

3.1.2.1 The number of trunk ports to be provided shall be based on the trunk quantities required (Item 8, Appendix A) as modified by the minimum increment of the selected system. Provision shall be made for at least 5 percent additional inlet and outlet ports over those required initially. The additional ports shall be used for connecting additional trunks that may be required in the future.

3.1.2.2 The number of trunk ports provided for this office will be _

3.1.3 Number of Subscriber Directory Numbers

3.1.3.1 The number of directory numbers provided shall be based on the total directory numbers required (Item 6.1.11, appendix A), as modified by the memory increment of the proposed system.

3.1.3.2 The number of subscriber directory numbers provided for this office will be _

4. RST

4.1 Information for RST’s must be supplied for each RST to be furnished.

4.2 Number of line terminals for this RST will be _

4.3 Number of span line terminations to the central office being supplied _
4.4 If the emergency operation option is required, it will provide the following service when connection to the main office is severed:

4.5 The ac power drain at the remote end will be:

<table>
<thead>
<tr>
<th>Voltage</th>
<th>Single-Phase</th>
<th>Three-Phase</th>
</tr>
</thead>
<tbody>
<tr>
<td>Initial</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Ultimate</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

4.6 Special environmental requirements for the remote end:

5. Power

5.1 AC Power Drain Watts

<table>
<thead>
<tr>
<th>Initial</th>
<th>Ultimate</th>
</tr>
</thead>
</table>

5.2 Heat Dissipation Watts

Provide the initial and ultimate equipment dissipation for each equipment room.

5.2.1 Operating Temperature Range

<table>
<thead>
<tr>
<th>Minimum</th>
<th>Maximum</th>
</tr>
</thead>
</table>

5.2.2 Operating Humidity Range

<table>
<thead>
<tr>
<th>Minimum</th>
<th>Maximum</th>
</tr>
</thead>
</table>

6. Additional Information to be Furnished by Bidder

6.1 The bidder shall accompany its bid with the following information:

<table>
<thead>
<tr>
<th>Unit No.</th>
<th>Unit name</th>
<th>Quantity of units in the CO's and RST's which are bid</th>
<th>Quantity of spare parts furnished with this bid</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>Class 1</td>
<td>Class 2</td>
</tr>
</tbody>
</table>

7. Explanatory Notes

</tr>
<tr>
<td>Very Low</td>
<td>No</td>
</tr>
</tbody>
</table>

2.2 Central office ground field (COGF) to be inspected for proper bonding of conductors to ground rods, etc. COGF to earth grounding reading is ___ ohms. (Refer to RUS TE&CM 802, Appendices C and D, Measurement Techniques.) Is this resistance reading acceptable? (Refer to RUS TE&CM 810, Items 1.6, 4.6.2 and 4.6.3 for protection considerations.)

Acceptable: ___ Yes ___ No

Comments: __________________________

2.3 Ground connection to be inspected from the master ground bar (MGB) to the central office ground field (COGF) to ensure it is properly sized and installed by most direct route with no sharp bends. (Refer to RUS TE&CM 810, Item 4.3.2 and section 8.1.)

Acceptable: ___ Yes ___ No

Comments: __________________________

2.4 Building structure grounds (steel rebar in footings, ironwork, etc.) are to be properly bonded and connected to the MGB. (Refer to RUS TE&CM 810, Item 4.3.4.)

Acceptable: ___ Yes ___ No

Comments: __________________________

2.5 Metallic central office door(s) are to be painted with metallic paint with door-knobs left bare. Door(s) and frames are to be bonded to the building structural ground or the MGB.

Acceptable: ___ Yes ___ No

Comments: __________________________

2.6 Metallic fences within 6 feet (183 cm) of the exchange building, storage facilities ground field, etc. are to be properly bonded to the COGF outside of the central office building. Handhole enclosure is to be used for the COGF connection to permit inspection and disconnect for earth resistance testing. (Refer to RUS TE&CM 810, Appendix C, Item 4.6.1.)

Acceptable: ___ Yes ___ No

Comments: __________________________

2.7 Lightning rod systems are to be grounded by a separate dedicated ground field. A bond should be provided between the COGF and the lightning rod ground field. Handhole enclosure is to be used for the COGF connection to permit inspection and disconnect for earth resistance testing. (Refer to RUS TE&CM 810, Item 4.3.2.1.)

Acceptable: ___ Yes ___ No

Comments: __________________________

2.8 Radio/microwave tower ground grid is to be properly bonded to the COGF by a direct outside connection. Handhole enclosure is to be used for the COGF connection to permit inspection and disconnect for earth resistance testing. (Refer to RUS TE&CM 810, Item 4.3.2 and section 10.)

Acceptable: ___ Yes ___ No

Comments: __________________________

2.9 If a qualified metallic water system is present, inspect the MGB connecting conductor to ensure that it is properly sized and installed by the most direct route with no sharp bends and that it is clamped solidly on the water pipes. (Refer to RUS TE&CM 810, Item 4.3.3 for details on metallic water system grounding.)

Acceptable: ___ Yes ___ No

Comments: __________________________

2.10 All power and grounding conductors are to be continuous, end to end, with no splices, size discontinuity or intermediate terminations. If an exception is necessary, unusual care must be taken to assure proper bonding between the two sections. (Refer to RUS TE&CM 810, Appendix C, section 5.)

Acceptable: ___ Yes ___ No

Comments: __________________________

2.11 All ground conductors should be void of sharp bends along their entire lengths. (Refer to RUS TE&CM 810, Item 8.2.2.)

Acceptable: ___ Yes ___ No

Comments: __________________________

2.12 Ground conductors should only be placed in nonmetallic conduit. Those routed through metallic conduit require that both ends of the conduit be bonded to the ground conductor. (Refer to RUS TE&CM 810, Item 8.2.4.)

Acceptable: ___ Yes ___ No

Comments: __________________________
2.13 Ground conductors should not be encircled by metallic clamp. Metallic straps are to be removed and replaced with non-metallic clamps. (Refer to RUS TE&CM 810, Item 8.2.4.)

Acceptable: Yes No

Comments:

2.14 If metallic conduit is used, it is to be insulated from all ironwork.

Acceptable: Yes No

Comments:

2.15 Inspect to determine if the required central office supplier electrostatic discharge plates, wrist wraps, antistatic floor mats, etc. are available and properly installed. (Refer to RUS TE&CM 810, Item 12.3.)

Acceptable: Yes No

Comments:

2.16 Ground conductors, except green wires, should not be routed close and parallel to other conductors so as to minimize induction on surges into equipment wiring. It is also better not to route these ground conductors through cable racks or troughs, or within the confines of any iron work. (Refer to RUS TE&CM 810, Item 8.2.3.)

Acceptable: Yes No

Comments:

3. Master Ground Bar (MGB)

3.1 The designated P, A, N, and I segments of the master ground bar (MGB) should be clearly identified. (Refer to RUS TE&CM 810, Figure 1 for MGB segmentation arrangement.)

Acceptable: Yes No

Comments:

3.2 Check for appearance and proper location of following on MGB:
(a) R—Interior radio equipment
(b) C—Cable entrance ground bar
(c) M—MDF ground bar
(d) G—Standby power equipment frame ground

Acceptable: Yes No

Comments:

3.3 All connections to MGB are to be two-hole bolted down copper crimped or compression type terminal lugs. (NOTE: No solder connections are permitted.)

Acceptable: Yes No

Comments:

3.4 MGB is to be properly insulated from the mounting surface.

Acceptable: Yes No

Comments:

3.5 All connections are to be tight.

Acceptable: Yes No

Comments:

3.6 The MGB is to have an anticorrosion coating of the type which enhances conductivity.

Acceptable: Yes No

Comments:

3.7 Bar is to be clearly stenciled or legibly labeled "MGB."

Acceptable: Yes No

Comments:

3.8 All ground leads are to be properly sized and labeled as to point of origin. (Refer to RUS TE&CM 810, Item 8.3.1 and section 8.1.)

Acceptable: Yes No

Comments:

1 Surge Producer—(P)

2 Surge Absorber—(A)

3 Grounds to non-IGZ Equipment—(N)

4 Grounds to IGZ Equipment (GWB’s)—(I)
Rural Utilities Service, USDA § 1755.522

4. Ground Window Bar (GWB)

4.1 All equipment grounds that originate inside of an Isolated Ground Zone (IGZ) are to be terminated on the GWB which is preferably located physically inside the IGZ and insulated from its support. (Refer to RUS TE&CM 810, Item 5.1.)

Acceptable:  Yes  No
Comments:

4.2 Each GWB is to be connected to the MGB by the most direct route with a conductor of 2/0-gauge or coarser, or resistance of less than 0.005 ohms. Parallel conductors for redundancy if required by the supplier. (Refer to RUS TE&CM 810, Item 8.1.2.)

Acceptable:  Yes  No
Comments:

4.3 The metal framework grounds of only that switching equipment and associated electrical equipment located inside of the IGZ should be connected to the GWB as required by the central office equipment supplier. (Refer to RUS TE&CM 810, Item 5.5.)

Acceptable:  Yes  No
Comments:

4.4 GWB is to be clearly stenciled or labeled “GWB.”

Acceptable:  Yes  No
Comments:

4.5 All connections are to be tight.

Acceptable:  Yes  No
Comments:

5. Isolated Ground Zone (IGZ)

5.1 IGZ areas are to be clearly marked on the floor or in some other easily recognizable manner. (Refer to RUS TE&CM 810, Item 6.1.1)

Acceptable:  Yes  No
Comments:

5.2 Confirm that all framework, cabinets, etc., within the IGZ are ground connected only to the GWB. (Refer to RUS TE&CM 810, Item 5.5.)

Acceptable:  Yes  No
Comments:

5.3 All cable racks, ground mats, switching and transmission equipment within the IGZ are to have ground leads only to the GWB. (Refer to RUS TE&CM 810, Item 5.5.2.)

Acceptable:  Yes  No
Comments:

5.4 Review ac power feed arrangement within the IGZ for acceptable receptacle type and confirm that all green wires are properly connected. (Refer to RUS TE&CM 810, Item 5.5.4.)

Acceptable:  Yes  No
Comments:

5.5 All ironwork, metallic conduit, and other equipment associated with the switch are to be properly insulated at the IGZ boundary as stipulated by the supplier. (Refer to RUS TE&CM 810, Item 6.2.)

Acceptable:  Yes  No
Comments:

5.6 With the GWB disconnected from the MGB, the resistance reading of ______ ohms between the GWB and the MGB indicates adequate isolation. (CAUTION: Test is to be conducted only with the approval and under the direction of the central office supplier.)

Acceptable:  Yes  No
Comments:

6. Entrance and Tip Cables

6.1 When neither a cable vault nor a splicing trough exists, the outside plant cable should be brought into the central office and spliced to tip cables with a PVC outer jacket (ALVYN®) or equivalent as close as practical to the cable entrance. (Refer to RUS TE&CM 810, Item 7.3.4.)

Acceptable:  Yes  No
Comments:

6.2 All outside entrance cables and all tip cable shields are to be separated by at least a 3-inch (7.6 cm) gap between shield ends.

Acceptable:  Yes  No
Comments:

6.3 All entrance cable shields are to be bonded separately to #6 AWG or larger insulated wire or bonding ribbon and connected
§ 1755.522

7 CFR Ch. XVII (1–1–08 Edition)

7. Cable Entrance Ground Bar (CEGB)

7.1 The CEGB is to be properly insulated from the mounting surface. (Refer to TE&CM 810, Item 4.2.1.)
Acceptable: ____ Yes  ____ No
Comments: ____________________________________________________________________________________________

7.2 The CEGB is to be located as close as possible to the physical ends of the entrance cable shields.
Acceptable: ____ Yes  ____ No
Comments: ____________________________________________________________________________________________

7.3 All connections are to use two-hole bolted down copper crimped or compression type terminal lugs. (NOTE: No solder connections are permitted.)
Acceptable: ____ Yes  ____ No
Comments: ____________________________________________________________________________________________

7.4 All connections are to be tight.
Acceptable: ____ Yes  ____ No
Comments: ____________________________________________________________________________________________

7.5 Bar is to be clearly stenciled or legibly labeled “CEGB.”
Acceptable: ____ Yes  ____ No
Comments: ____________________________________________________________________________________________

7.6 All ground leads are to be properly sized and labeled.
Acceptable: ____ Yes  ____ No
Comments: ____________________________________________________________________________________________

7.7 The CEGB is to have an anticorrosion coating of the type which enhances conductivity.
Acceptable: ____ Yes  ____ No
Comments: ____________________________________________________________________________________________

8. Main Distributing Frame (MDF)

8.1 RUS strongly recommends that MDF protectors be furnished without heat coils. (Refer to RUS TE&CM 810, section 7.6.)
Acceptable: ____ Yes  ____ No
Comments: ____________________________________________________________________________________________

8.2 Incoming cable pairs terminated on MDF protector assemblies should be protected with protector modules. These modules should contain white coded carbon blocks or orange coded gas tube arrestors that are included in the RUS List of Materials. (Refer to RUS TE&CM 810, Item 7.4)
Acceptable: ____ Yes  ____ No
Comments: ____________________________________________________________________________________________

8.3 All incoming subscriber cable pairs are to be properly terminated at either a protector equipped terminal or connected to ground.
Acceptable: ____ Yes  ____ No
Comments: ____________________________________________________________________________________________

8.4 MDF protector assemblies may be mounted directly on the vertical frame ironwork. Protector assemblies on each vertical are interconnected with each other and the Main Distributing Frame Bar (MDFB) with a #6 copper grounding conductor. Alternative means of connecting to the MDFB are also acceptable which do not rely on the frame ironwork for conducting surge currents to ground. (Refer to RUS TE&CM 810, section 7.)
Acceptable: ____ Yes  ____ No
Comments: ____________________________________________________________________________________________

8.5 Protective “ground connections” should be provided between the MDFBs and the frame ironwork for personnel protection regardless of the type of protector assembly used. Protective ground leads should be 14-gauge, less than 12 inches (30.5 cm) in length with paint thoroughly removed at point of
§ 1755.522

9. Power Service Protection and Grounding

9.1 The ground conductor between the ac power system multigrounded neutral (MGN) at the main ac disconnect panel and the master ground bar (MGB) is to be properly sized and connected. (Refer to RUS TE&CM 810, Items 2.19, 4.3.1 and 8.1.3.)
Acceptable: ___ Yes ___ No
Comments:

9.2 If there is a non-MGN ac power system, there is to be a properly sized and connected insulated conductor bond between the power service ground electrode and the MGB. (Refer to RUS TE&CM 810, Item 4.3.1.1.)
Acceptable: ___ Yes ___ No
Comments:

9.3 AC conductors including ground conductors serving 120-volt ac electric convenience receptacles and all direct wire peripheral equipment, located in the IGZ, should be sized in accordance with normal "green wire" criteria. (Refer to RUS TE&CM 810, Items 5.5.4, 5.5.5, and 5.5.6.)
Acceptable: ___ Yes ___ No
Comments:

9.4 Minimum protection for ac power serving the central office buildings should consist of an RUS accepted secondary arrester at the service entrance. (Refer to RUS TE&CM 810, section 9.)
Acceptable: ___ Yes ___ No
Comments:

9.5 A properly sized conductor for ground bonding between the standby power plant framework (not separately derived) and the MGB is to be provided to equalize framework voltages for personnel safety reasons. (Refer to RUS TE&CM 810, Item 4.2.4.)
Acceptable: ___ Yes ___ No
Comments:

10. Miscellaneous

10.1 All non-IGZ equipment frames, relay racks, cable racks and other ironwork are to be properly connected to the MGB. (Refer to TE&CM 810, Item 4.4.)
Acceptable: ___ Yes ___ No
Comments:

10.2 Shields on high frequency intra-office cables are to be properly isolated and connected only to an isolation ground bar in the relay rack. All shielded cables entering the IGZ should only be referenced at the IGZ termination point as given by the manufacturer. (Refer to RUS TE&CM 810, Item 7.2.1.2.)
Acceptable: ___ Yes ___ No
Comments:
§ 1755.523–1755.699

Comments: __

10.3 Isolation ground bars in the relay racks are to be properly connected to the MGB with appropriate sized conductor with no sharp bends.

Acceptable: __ Yes __ No

Comments: __

10.4 All radio equipment cabinet(s) are to be at least 10 feet (305 cm) from the IGZ.

Acceptable: __ Yes __ No

Comments: __

10.5 The metal spare parts cabinet is to be grounded with a #6 AWG or larger insulated wire to non-IGZ cable rack, etc. or directly to the MGB.

Acceptable: __ Yes __ No

Comments: __

§§ 1755.523–1755.699 [Reserved]

§ 1755.700 RUS specification for aerial service wires.

§ 1755.701 through 1755.704 cover the requirements for aerial service wires.

[61 FR 26074, May 24, 1996]

§ 1755.701 Scope.

(a) This section covers the requirements for aerial service wires intended for aerial subscriber drops.

(b) The aerial service wires can be either copper coated steel reinforced or nonmetallic reinforced designs.

(c) For the copper coated steel reinforced design, the reinforcing members are the conductors.

(1) The conductors are solid copper-covered steel wires.

(2) The wire structure is completed by insulting the conductors with an overall extruded plastic insulating compound.

(d) For the nonmetallic reinforced design, the conductors are solid copper individually insulated with an extruded solid insulating compound.

[61 FR 26074, May 24, 1996]

§ 1755.702 Copper coated steel reinforced (CCSR) aerial service wire.

(2) Factory joints in conductors shall comply with the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 2.1.6.

(b) Conductor insulation. (1) The raw materials used for the conductor insulation shall comply with the requirements specified in ANSI/ICEA S-89-648-1993, paragraph 3.1.1.

(2) The raw materials shall be accepted by RUS prior to their use.

(3) The finished conductor insulation shall be free from holes, splits, blisters, or other imperfections and shall be as smooth as is consistent with best commercial practice.

(4) The finished conductor insulation shall comply with the requirements specified in ANSI/ICEA S-89-648-1993, paragraphs 3.1.5 through 3.1.5.4.

(5) The insulation shall have a minimum spot thickness of not less than 0.9 millimeters (mm) (0.03 inches (in.)) at any point.

(c) Wire assembly. (1) The two conductors shall be insulated in parallel to form an integral configuration.

(2) The finished wire assembly shall be either a flat or a notched oval. Other finished wire assemblies may be used provided that they are accepted by RUS prior to their use.

(3) The overall dimensions of the finished wire assembly shall be in accordance with the following requirements:

<table>
<thead>
<tr>
<th>Diameter</th>
<th>Minimum Dimensions</th>
<th>Maximum Dimensions</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>mm (in.)</td>
<td>mm (in.)</td>
</tr>
<tr>
<td>Major</td>
<td>5.5 (0.22)</td>
<td>8.0 (0.31)</td>
</tr>
<tr>
<td>Minor</td>
<td>3.0 (0.12)</td>
<td>5.0 (0.19)</td>
</tr>
</tbody>
</table>

(d) Conductor marking. The insulated conductors of a finished wire shall be marked in accordance with the requirements specified in ANSI/ICEA S-89-648-1993, paragraph 3.1.4.

(e) Electrical requirements—(1) Conductor resistance. The direct current (dc) resistance of each conductor in a completed CCSR aerial service wire shall comply with the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 7.1.2.

(2) Wet mutual capacitance. The wet mutual capacitance of the completed CCSR aerial service wire shall comply with the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 7.1.3.

(3) Wet attenuation. The wet attenuation of the completed CCSR aerial service wire shall comply with the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 7.1.4.

(4) Wet insulation resistance. The wet insulation resistance of the completed CCSR aerial service wire shall comply with the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 7.1.5.

(5) Dielectric strength. (i) The wet dielectric strength between conductors and between each conductor of the completed CCSR aerial service wire and the surrounding water shall comply with the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 7.1.6.

(ii) The dry dielectric strength between conductors of the completed CCSR aerial service wire shall comply with the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 7.1.7.

(6) Fusing coordination. The completed CCSR aerial service wire shall comply with the fusing coordination requirement specified in ANSI/ICEA S-89-648-1993, paragraph 7.1.8.

(7) Insulation imperfections. Each length of completed CCSR aerial service wire shall comply with the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 7.1.9.

(1) Mechanical requirements—(1) Impact test. (i) All CCSR aerial service wires manufactured in accordance with this section shall comply with the unaged impact test specified in ANSI/ICEA S-89-648-1993, paragraph 8.1.2.

(ii) All CCSR aerial service wires manufactured in accordance with this section shall comply with the aged impact test specified in ANSI/ICEA S-89-648-1993, paragraph 8.1.3.

(2) Abrasion resistance test. All CCSR aerial service wires manufactured in accordance with this section shall comply with the abrasion resistance test specified in ANSI/ICEA S-89-648-1993, paragraph 8.1.4.

(3) Static load test. All CCSR aerial service wires manufactured in accordance with this section shall comply with the static load test specified in

VerDate Aug<31>2005 14:49 Feb 05, 2008 Jkt 214022 PO 00000 Frm 00679 Fmt 8010 Sfmt 8010 Y:\SGML\214022.XXX 214022rfrederick on PROD1PC67 with CFR
§ 1755.703 Nonmetallic reinforced (NMR) aerial service wire.

(2) Factory joints made in the conductors during the manufacturing process shall comply with the requirements specified in ANSI/ICEA S–89–648–1993, paragraph 2.2.2.

(b) Conductor insulation. (1) The raw materials used for the conductor insulation shall comply with the requirements specified in ANSI/ICEA S–89–648–1993, paragraphs 3.2 through 3.2.2.

(2) The finished conductor insulation shall comply with the requirements specified in ANSI/ICEA S–89–648–1993, paragraph 3.2.3.

(3) The dimensions of the insulated conductors shall comply with the requirements specified in ANSI/ICEA S–89–648–1993, paragraph 3.2.3.1.

(4) The colors of the insulation shall comply with the requirements specified in ANSI/ICEA S–89–648–1993, paragraph 3.2.4.

(c) Wire listing. All CCSR aerial service wires manufactured in accordance with this section shall comply with the listing requirements specified in ANSI/ICEA S–89–648–1993, paragraph 3.2.5.

(d) Identification marker. Each length of CCSR aerial service wire shall be identified in accordance with ANSI/ICEA S–89–648–1993, paragraph 9.1.4. When surface marking is employed, the color of the initial marking shall be either white or silver.

(i) Length marking (optional). (1) Sequentially numbered length marking of the completed CCSR aerial service wire may be used at the option of the manufacturer unless specified by the end user.

(2) When sequentially numbered length markings are used, the length markings shall be in accordance with ANSI/ICEA S–89–648–1993, paragraph 9.1.5. The color of the initial marking shall be either white or silver.

[61 FR 26075, May 24, 1996, as amended at 69 FR 18803, Apr. 9, 2004]
in ANSI/ICEA S-89-648-1993, paragraph 3.2.3.2.

(5) A permissible overall performance level of faults in conductor insulation shall comply with the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 3.2.4.6. The length count and number of faults shall be recorded. The information shall be retained for a period of 6 months and be available for review by RUS when requested.

(6) Repairs to the conductor insulation during manufacture are permissible. The method of repair shall be accepted by RUS prior to its use. The repaired insulation shall comply with the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 3.2.3.3.

(7) All repaired sections of insulation shall be retested in the same manner as originally tested for compliance with paragraph (b)(5) of this section.

(8) The colored insulating material removed from or tested on the conductor, from a finished wire shall comply with the requirements specified in ANSI/ICEA S-89-648-1993, paragraphs 3.2.4 through 3.2.4.5.

(c) Identification of pairs and layup of pairs. (1) The insulation shall be colored coded to identify:

(i) The tip and ring conductor of each pair; and

(ii) Each pair in the completed wire.

(2) The colors to be used in the pairs together with the pair numbers shall be in accordance with the table specified in ANSI/ICEA S-89-648-1993, paragraph 4.1.1.

(3) The insulated conductors shall be either layed parallel (two conductor design only) or twisted into pairs.

(4) When using parallel conductors for the two conductor design, the parallel conductors shall be designed to enable the wire to meet the electrical requirements specified in paragraph (g) of this section.

(5) When twisted pairs are used, the following requirements shall be met:

(i) The pair twists shall be designed to enable the wire to meet the electrical requirements specified in paragraph (g) of this section; and

(ii) The average length of pair twists in any pair in the finished wire, when measured on any 3 meter (10 foot) length, shall not exceed the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 4.1.1.

(6) An alternative method of forming the two-pair wire is the use of a star-quad configuration.

(i) The assembly of the star-quad shall be such as to enable the wire to meet the electrical requirements specified in paragraph (g) of this section.

(ii) The star-quad configuration shall be assembled in accordance with ANSI/ICEA S-89-648-1993, paragraph 4.1.2.

(iii) The average length of twist for the star-quad in the finished wire, when measured on any 3 meter (10 foot) length, shall not exceed the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 4.1.1.

(iv) The color scheme used to provide identification of the tip and ring conductors of each pair in the star-quad shall comply with the table specified in ANSI/ICEA S-89-648-1993, paragraph 4.1.2.

(d) Strength members. The strength members shall comply with the requirements specified in ANSI/ICEA S-89-648-1993, paragraphs 6.1 and 6.1.1.

(e) Wire jacket. (1) The jacket shall comply with the requirements specified in ANSI/ICEA S-89-648-1993, paragraphs 5.1 and 5.1.1.

(2) The jacket raw materials shall be accepted by RUS prior to their use.

(f) Wire assembly. The finished wire assembly shall be in accordance with ANSI/ICEA S-89-648-1993, paragraph 5.1.3 and Figure 5–1.

(g) Electrical requirements—(1) Conductor resistance. The dc resistance of each conductor in a completed NMR aerial service wire shall comply with the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 7.2.2.

(2) Resistance unbalance. (i) The dc resistance unbalance between the two conductors of any pair in a completed NMR aerial service wire and the average resistance unbalance of all pairs in a Quality Control Lot shall comply with the requirements specified in ANSI/ICEA S-89-648-1993, paragraph 7.2.3.

(ii) The resistance unbalance between tip and ring conductors shall be random with respect to the direction of unbalance. That is, the resistance of
§ 1755.703

7 CFR Ch. XVII (1–1–08 Edition)

the tip conductors shall not be consistently higher with respect to the ring conductors and vice versa.

(3) **Dry mutual capacitance.** The dry mutual capacitance of the completed NMR aerial service wire shall comply with the requirements specified in ANSI/ICEA S–89–648–1993, paragraph 7.2.4, Type 1.

(4) **Pair-to-pair capacitance unbalance.**

The pair-to-pair capacitance unbalance as measured on the completed NMR aerial service wire shall comply with the requirements specified in ANSI/ICEA S–89–648–1993, paragraph 7.2.5.

(5) **Attenuation.** (i) The dry attenuation of the completed NMR aerial service wire shall comply with the requirement specified in ANSI/ICEA S–89–648–1993, paragraph 7.2.7.

(ii) The wet attenuation of the completed NMR aerial service wire shall comply with the requirement specified in ANSI/ICEA S–89–648–1993, paragraph 7.2.8.

(6) **Insulation resistance.** (i) The dry insulation resistance of the completed NMR aerial service wire shall comply with the requirement specified in ANSI/ICEA S–89–648–1993, paragraph 7.2.9.

(ii) The wet insulation resistance of the completed NMR aerial service wire shall comply with the requirement specified in ANSI/ICEA S–89–648–1993, paragraph 7.2.10.

(7) **Wet dielectric strength.** The wet dielectric strength between conductors and between each conductor of the completed NMR aerial service wire and the surrounding water shall comply with the requirement specified in ANSI/ICEA S–89–648–1993, paragraph 7.2.11.

(8) **Fusing coordination.** The completed NMR aerial service wire shall comply with the fusing coordination requirement specified in ANSI/ICEA S–89–648–1993, paragraph 7.2.13.

(9) **Crosstalk loss.** (i) The output-to-output far-end crosstalk loss (FEXT) for any pair of completed NMR aerial service wire shall comply with the requirement specified in ANSI/ICEA S–89–648–1993, paragraph 7.2.14.

(ii) The input-to-input near-end crosstalk loss (NEXT) for any pair of completed NMR aerial service wire shall comply with the requirement specified in ANSI/ICEA S–89–648–1993, paragraph 7.2.15.

(10) **Environmental requirements.**

(1) **Impact test.** (i) All NMR aerial service wires manufactured in accordance with this section shall comply with the unaged impact test specified in §1755.702(f)(1)(i).

(ii) All NMR aerial service wires manufactured in accordance with this section shall comply with the aged impact test specified in §1755.702(f)(1)(ii).

(2) **Abrasion resistance test.** All NMR aerial service wires manufactured in accordance with this section shall comply with the abrasion resistance test specified in §1755.702(f)(2).

(3) **Static load test.** All NMR aerial service wires manufactured in accordance with this section shall comply with the static load test specified in §1755.702(f)(3).

(4) **Elongation test.** All NMR aerial service wires manufactured in accordance with this section shall comply with the elongation test specified in ANSI/ICEA S–89–648–1993, paragraph 8.1.7.

(5) **Plasticizer compatibility test.** All NMR aerial service wires manufactured in accordance with this section shall comply with the plasticizer compatibility test specified in §1755.702(f)(4).

(i) **Environmental requirements.**

(1) **Cold temperature handling test.** (i) All NMR aerial service wires manufactured in accordance with this section shall comply with the unaged cold temperature handling test specified in §1755.702(g)(1)(i).

(ii) All NMR aerial service wires manufactured in accordance with this section shall comply with the aged cold temperature handling test specified in §1755.702(g)(1)(ii).

(2) **Light absorption test.** All NMR aerial service wires manufactured in accordance with this section shall comply with the light absorption test specified in §1755.702(g)(2).

(3) **Flammability test.** All NMR aerial service wires manufactured in accordance with this section shall comply with the flammability test specified in §1755.702(g)(4).

(4) **Wire listing.** All NMR aerial service wires manufactured in accordance with this section shall comply with the
listing requirements specified in §1755.702(g)(5).

(j) Ripcord (optional). (1) A ripcord may be used in the NMR aerial service wire structure at the option of the manufacturer unless specified by the end user.

(2) When a ripcord is used it shall comply with the requirements specified in ANSI/ICEA S–89–648–1993, paragraphs 4.2 through 4.2.3.

(k) Identification marker. Each length of NMR aerial service wire shall be identified in accordance with ANSI/ICEA S–89–648–1993, paragraphs 9.1 through 9.1.4. When surface marking is employed, the color of the initial marking shall be either white or silver.

(l) Length marking (optional). (1) Sequentially numbered length marking of the completed NMR aerial service wire may be used at the option of the manufacturer unless specified by the end user.

(2) When sequentially numbered length markings are used, the length markings shall be in accordance with §1755.702(i)(2).

(m) Durability of marking. The durability of the marking of the NMR aerial service wire shall comply with the requirements specified in §1755.702(j).

[61 FR 26076, May 24, 1996, as amended at 69 FR 18803, Apr. 9, 2004]

§1755.704 Requirements applicable to both CCSR and NMR aerial service wires.

(a) Acceptance testing. (1) The tests described in §§1755.700 through 1755.704 are intended for acceptance of wire designs and major modifications of accepted designs. What constitutes a major modification is at the discretion of RUS. These tests are intended to show the inherent capability of the manufacturer to produce wire products having long life and stability.

(2) For initial acceptance, the manufacturer shall:

(i) Certify that the product fully complies with each paragraph in §§1755.700 through 1755.704;

(ii) Agree to periodic plant inspections by RUS;

(iii) Certify whether the product complies with the domestic origin manufacturing provisions of the “Buy American” requirements of the Rural Electrification Act of 1938 (7 U.S.C. 903 note), as amended (the “REA Buy-American provision”);

(iv) Submit at least three written user testimonials concerning field performance of the product; and

(v) Provide any other nonproprietary data deemed necessary by the Chief, Outside Plant Branch (Telecommunications).

(3) In order for RUS to consider a manufacturer’s request that a product be requalified, the manufacturer shall certify not later than June 30 of the year in which requalification is required, that the product:

(i) Fully complies with each paragraph in §§1755.700 through 1755.704; and

(ii) Does or does not comply with the domestic origin manufacturing provisions of the REA Buy American provisions. The required certifications shall be dated within 90 days of the submission.

(4) Initial and requalification acceptance requests should be addressed to: Chairman, Technical Standards Committee “A” (Telecommunications), Telecommunications Standards Division, Rural Utilities Service, AG Box 1598, Washington, DC 20250–1598.

(ii) Each conductor in the completed CCSR and NMR aerial service wire shall be tested for shorts in accordance with ANSI/ICEA S–89–648–1993, paragraphs 7.1.1 and 7.2.1, respectively.

(iii) Each length of completed CCSR and NMR aerial service wire shall be tested for insulation imperfections in accordance with §1755.702(e)(7) and §1755.703(b)(5), respectively.

(2) Capability tests. Tests on a quality assurance basis shall be made as frequently as is required for each manufacturer to determine and maintain compliance with:

(i) Performance of the conductors;

(ii) Performance of the conductor insulation and jacket material;

(iii) Sequential marking and lettering;

(iv) Mutual capacitance, capacitance unbalance, attenuation, and crosstalk;

(v) Conductor resistance, resistance unbalance, and insulation resistance;

(vi) Dielectric strength and fusing coordination;

(vii) Impact, abrasion, static load, elongation, and plasticizer compatibility tests; and

(viii) Cold temperature handling, light absorption, low temperature separation, and flammability tests.

(c) Summary of records of electrical and physical tests. (1) Each manufacturer shall maintain suitable summary records for a period of at least 3 years of all electrical and physical tests required on completed wire as set forth in paragraph (b) of this section. The test data for a particular lot of aerial service wire shall be in a form such that it may be readily available to the purchaser or to RUS upon request.

(2) Measurements and computed values shall be rounded off to the number of places or figures specified for the requirement according to ANSI/ICEA S–89–648–1993, paragraph 1.3.

(d) Manufacturing irregularities. (1) Repairs to the insulation of CCSR aerial service wires are not permitted in wires supplied to end users under §§1755.700 through 1755.704.

(2) Repairs to the jacket of NMR aerial service wires are not permitted in wires supplied to end users under §§1755.700 through 1755.704.

(e) Splicing. Splicing of completed CCSR and NMR aerial service wires shall comply with the requirement specified in ANSI/ICEA S–89–648–1993, paragraph 8.1.1.

(f) Preparation for shipment. (1) CCSR and NMR aerial service wire shall be shipped either in coils or on reels.

(2) When CCSR and NMR aerial service wires are shipped on reels the following provisions shall apply:

(i) The diameter of the drum shall be large enough to prevent damage to the wire from reeling or unreeling. The reels shall be substantial and so constructed as to prevent damage to the wire during shipment and handling;

(ii) A waterproof corrugated board or other suitable means of protection accepted by RUS prior to its use may be applied to the reel. If the waterproof corrugated board or other suitable material is used for protection, it shall be suitably secured in place to prevent damage to the wire during storage and handling. The use of the waterproof corrugated board or other suitable means of protection shall be at the option of the manufacturer unless specified by the end user;

(iii) The outer end of the wire shall be securely fastened to the reel head so as to prevent the wire from becoming loose in transit. The inner end of the wire shall be securely fastened in such a way as to make it readily available if required for electrical testing. Spikes, staples, or other fastening devices which penetrate the conductor insulation of the CCSR aerial service wire and the jacket of the NMR aerial service wire shall not be used. The method of fastening the wire ends shall be accepted by RUS prior to their use;

(iv) Each length of wire shall be wound on a separate reel;

(v) Each reel shall be plainly marked to indicate the direction in which it should be rolled to prevent loosening of the wire on the reel; and

(vi) Each reel shall be stenciled or labeled on either one or both sides with the following information:

(A) Customer order number;

(B) Manufacturer’s name and product code;

(C) Factory reel number and year of manufacture;

(D) Gauge of conductors and pair size of wire;

(E) Length of wire; and
(F) RUS designation letter “K.”

(3) When CCSR and NMR aerial service wires are shipped in coils the following provisions shall apply:

(i) The diameter of the coil shall be large enough to prevent damage to the wire from coiling or uncoiling;

(ii) The nominal length of the wire in a coil shall be 305 meters (1,000 feet). No coil shall be less than 290 meters (950 feet) long; however, 25 percent of the total number of coils may be less than 305 meters (1,000 feet);

(iii) The coils of wire shall be wound securely with strong tape in four separate evenly spaced places;

(iv) The coils may be protected from damage by wrapping the coil with heavy paper, burlap, or other suitable material accepted by RUS prior to its use. The use of the heavy paper, burlap, or other suitable means of protection shall be at the option of the manufacturer unless specified by the end user; and

(v) Each coil shall be tagged with the following information:

(A) Customer order number;

(B) Manufacturer’s name and product code;

(C) Year of manufacture;

(D) Gauge of conductors and pair size of wire;

(E) Length of wire; and

(F) RUS designation letter “K.”

(4) In lieu of wrapping the coil with heavy paper, burlap, or other suitable material, the coil may be packaged in a moisture resistant carton.

(5) When the coils are shipped in moisture resistant cartons, each carton shall be marked with the information specified in paragraphs (f)(3)(v)(A) through (f)(3)(v)(F) of this section.

(6) Other methods of shipment may be used if accepted by RUS prior to their use.

(7) When NMR aerial service wire is shipped, the ends of the wire shall be sealed in accordance with ANSI/ICEA S–89–648–1993, paragraph 9.2.

[61 FR 26077, May 24, 1996, as amended at 69 FR 18803, Apr. 9, 2004]

$\S$ 1755.705–1755.859 [Reserved]

$\S$ 1755.860 RUS specification for filled buried wires.

(a) Scope. (1) This section covers the requirements for filled buried wires intended for direct burial as a subscriber drop and/or distribution wire.

(i) The conductors are solid copper, individually insulated with an extruded solid insulating compound.

(ii) The insulated conductors are twisted into pairs (a star-quad configuration is permitted for the two pair wires) which are then stranded or oscillated to form a cylindrical core.

(iii) A moisture resistant filling compound is applied to the stranded conductors completely covering the insulated conductors and filling the interstices between the pairs.

(iv) The wire structure is completed by the application of an optional core wrapping material, an inner jacket, a flooding compound, a shield, a flooding compound, and an overall plastic jacket.

(2) The number of pairs and gauge size of conductors which are used within the RUS program are provided in the following table:

<table>
<thead>
<tr>
<th>American Wire Gauge (AWG)</th>
<th>Pairs</th>
</tr>
</thead>
<tbody>
<tr>
<td>22</td>
<td>2</td>
</tr>
<tr>
<td>2</td>
<td>3</td>
</tr>
<tr>
<td>3</td>
<td>3</td>
</tr>
</tbody>
</table>

(3) All wires sold to RUS borrowers for projects involving RUS loan funds under this section must be accepted by RUS Technical Standards Committee “A” (Telephone). For wires manufactured to the specification of this section, all design changes to an accepted design must be submitted for acceptance. RUS will be the sole authority on what constitutes a design change.

(4) Materials, manufacturing techniques, or wire designs not specifically addressed by this section may be allowed if accepted by RUS. Justification for acceptance of modified materials, manufacturing techniques, or wire designs must be provided to substantiate product utility and long term stability and endurance.

(5) The American National Standards Institute/Electronic Industries Association (ANSI/EIA) 359-A-84, EIA Standard...
§ 1755.860

Colors for Color Identification and Coding, referenced in this section is incorporated by reference by RUS. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies of ANSI/EIA 359-A-84 are available for inspection during normal business hours at RUS, room 2845, U.S. Department of Agriculture, Washington, DC 20250–1500, or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html. Copies are available from EIA, 2001 Pennsylvania Avenue, NW., suite 900, Washington, DC 20006, telephone number (202) 457–4966.

(b) Conductors and conductor insulation. (1) Each conductor must be a solid round wire of commercially pure annealed copper. Conductors must meet the requirements of the American Society for Testing and Materials (ASTM) B 3–90 except that requirements for Dimensions and Permissible Variations are waived and elongation requirements are superseded by this section.

(2) The minimum conductor elongation in the final wire must comply with the following limits when tested in accordance with ASTM E 8–91.
§ 1755.860

Conductor—AWG Minimum Elongation—Percent

<table>
<thead>
<tr>
<th>AWG</th>
<th>Nominal Diameter (Millimeters (mm) (Inches (in.)))</th>

</tbody>
</table>

(3) Joints made in conductors during the manufacturing process may be brazed, using a silver alloy solder and nonacid flux, or they may be welded using either an electrical or cold welding technique. In joints made in uninsulated conductors, the two conductor ends must be butted. Splices made in insulated conductors need not be butted but may be joined in a manner acceptable to RUS.

(4)(i) The tensile strength of any section of a conductor containing a factory joint must not be less than 85 percent of the tensile strength of an adjacent section of the solid conductor of equal length without a joint.

(ii) **Engineering Information:** The sizes of wire used and their nominal diameters shall be as shown in the following table:

<table>
<thead>
<tr>
<th>AWG</th>
<th>Direct Current Voltages (Kilo-volts)</th>
</tr>
</thead>
<tbody>
<tr>
<td>22</td>
<td>6.0</td>

<td>5.0</td>
</tr>
</tbody>
</table>

(5) Each conductor must be insulated with either a colored, solid, insulating grade, high density polyethylene or crystalline propylene/ethylene copolymer or with a solid natural primary layer and a colored, solid outer skin using one of the insulating materials listed in paragraphs (b)(5)(i) through (b)(5)(ii) of this section.

(i) The polyethylene raw material selected to meet the requirements of this section must be Type III, Class A, Category 4 or 5, Grade E9, in accordance with ASTM D 1248–84(1989).

(ii) The crystalline propylene/ethylene raw material selected to meet the requirements of this section must be Class PP 200B 40003 E11 in accordance with ASTM D 4101–82(1988).

(iii) Raw materials intended as conductor insulation furnished to these requirements must be free from dirt, metallic particles, and other foreign matter.

(iv) All insulating raw materials must be accepted by RUS prior to their use.

(6) All conductors in any single length of wire must be insulated with the same type of material.

(7) A permissible overall performance level of faults in conductor insulation must average not greater than one fault per 12,000 conductor meters (40,000 conductor feet) for each gauge of conductor.

(1) All insulated conductors must be continuously tested for insulation faults during the twinning operation with the method of test acceptable to RUS. The length count and number of faults must be recorded. The information must be retained for a period of 6 months and be available for review by RUS when requested.

(ii) The voltages for determining compliance with the requirements of this section are as follows:

<table>
<thead>
<tr>
<th>AWG</th>
<th>Poly-ethylene</th>
<th>Crystalline Propylene/Ethylene Copolymer</th>
</tr>
</thead>
<tbody>
<tr>
<td>22</td>
<td>50</td>
<td>—</td>
</tr>
<tr>
<td>24</td>
<td>25</td>
<td>—</td>
</tr>
</tbody>
</table>

(8) Repairs to the conductor insulation during manufacturing are permissible. The method of repair must be accepted by RUS prior to its use. The repaired insulation must be capable of meeting the relevant electrical requirements of this section.

(9) All repaired sections of insulation must be retested in the same manner as originally tested for compliance with paragraph (b)(7) of this section.

(10) Colored insulating material removed from or tested on the conductor, from a finished wire, must be capable of meeting the following performance requirements:

<table>
<thead>
<tr>
<th>Property</th>
<th>Poly-ethylene</th>
<th>Crystalline Propylene/Ethylene Copolymer</th>
</tr>
</thead>
<tbody>
<tr>
<td>Melt Flow Rate Percent increase from raw material, Maximum.</td>
<td>50</td>

<td>25</td>
<td>—</td>
</tr>
<tr>
<td>0.5–2.00 (Initial Melt Index).</td>
<td>25</td>
<td>—</td>
</tr>
</tbody>
</table>
§ 1755.860  7 CFR Ch. XVII (1–1–08 Edition)

Property | Polyethylene | Crystalline Propylene/Ethylene Copolymer
--- | --- | ---
\( \leq 5.0 \) (Initial Melt Index) | — | 110
Tensile Strength—Minimum
Megapascals (MPa)
(Pounds per Square Inch (psi)) | 16.5 (2,400) | 21.0 (3,000)
Ultimate Elongation Minimum, Percent. | 300 | 300
Cold Bend Failures, Maximum
Shrinkback Maximum, mm (in.) | 0/10 | 0/10
10 (0.375) | 10 (0.375)
Oxygen Induction Time Minimum, Minutes. | 20 | 20

\( \leq 5.0 \) (Initial Melt Index).

\( (v) \) *Oxygen induction time.* Samples of insulation, which have been conditioned in accordance with paragraph 17.3 of ASTM D 4565–90a, must be tested in accordance with the procedures of ASTM D 4565–90a using copper pans and a test temperature of 199 ± 1 °C.

\( (12) \) Other methods of testing may be used if acceptable to RUS.

\( (c) \) Identification of pairs and twisting of pairs. (1) The insulation must be colored to identify:

\( (i) \) The tip and ring conductor of each pair; and

\( (ii) \) Each pair in the completed wire.

(2) The colors to be used to provide identification of the tip and ring conductor of each pair are shown in the following table:

<table>
<thead>
<tr>
<th>Pair No.</th>
<th>Tip</th>
<th>Ring</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>White</td>
<td>Blue</td>
</tr>
<tr>
<td>2</td>
<td>White</td>
<td>Orange</td>
</tr>
<tr>
<td>3</td>
<td>White</td>
<td>Green</td>
</tr>
</tbody>
</table>

\( (3) \) Standards of color. The colors of the insulated conductors supplied in accordance with this section are specified in terms of the Munsell Color System (ASTM D 1535–89) and must comply with the “Table of Wire and Cable Limit Chips” as defined in ANSI/EIA-359-A-84. (Visual color standards meeting these requirements may be obtained directly from the Munsell Color Company, Inc., 2441 North Calvert Street, Baltimore, Maryland 21218).

(4) Positive identification of the tip and ring conductors of each pair by marking each conductor of a pair with...
the color of its mate is permissible. The method of marking must be accepted by RUS prior to its use.

(5) Other methods of providing positive identification of the tip and ring conductors of each pair may be employed if accepted by RUS prior to its use.

(6) The insulated conductors must be twisted into pairs.

(7) In order to provide sufficiently high crosstalk isolation, the pair twists must be designed to enable the wire to meet the capacitance unbalance and the crosstalk loss requirements of paragraphs (m)(2), (m)(3), and (m)(4) of this section.

(8) The average length of pair twists in any pair in the finished wire, when measured on any 3 meter (m) (10 foot(ft)) length, must not exceed 152 mm (6 in.).

(9) An alternative method of forming the two pair wire is the use of a star-quad configuration.

(i) The assembly of the star-quad must be such as to enable the wire to meet the capacitance unbalance and the crosstalk loss requirements of paragraphs (m)(2), (m)(3), and (m)(4) of this section.

(ii) The four individual insulated conductors must be twisted together to form a star-quad configuration with the tip and ring conductors of each pair diagonally opposite each other in the quad.

(iii) The average length of twist for the star-quad in the finished wire, when measured on any 3 m (10 ft) length, must not exceed 152 mm (6 in.).

(iv) The following color scheme must be used to provide identification of the tip and ring conductor of each pair in the star-quad:

<table>
<thead>
<tr>
<th>Pair No.</th>
<th>Color</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tip</td>
<td>Ring</td>
</tr>
<tr>
<td>1</td>
<td>White with blue stripe.</td>
</tr>
<tr>
<td>2</td>
<td>White with orange stripe.</td>
</tr>
</tbody>
</table>

(v) If desired, the blue and orange conductors may contain a white stripe. The stripes in this case must be narrow enough so that the tip and ring identification is obvious.

(d) Forming of the wire core. (1) Twisted pairs or star-quad configuration must be assembled in such a way as to form a substantially cylindrical group.

(2) The filling compound must be applied to the wire core in such a way as to provide a completely filled core as is commercially practical.

(3) If desired for manufacturing reasons, white or colored binders of nonhygroscopic and nonwicking material may be applied over the core.

(e) Filling compound. (1) After or during the stranding operation and prior to application of the optional core wrap and inner jacket, a homogeneous filling compound free of agglomerates must be applied to the wire core. The compound must be as nearly colorless as is commercially feasible and consistent with the end product requirements and pair identification.

(2) The filling compound must be free from dirt, metallic particles, and other foreign matter. It must be applied in such a way as to fill the space within the wire core.

(3) The filling compound must be nontoxic and present no dermal hazards.

(4) The filling compound must exhibit the following dielectric properties at a temperature of 23 ± 3 °C when measured in accordance with ASTM D 150–87 or ASTM D 4872–88.

(i) The dissipation factor must not exceed 0.0015 at a frequency of 1 megahertz (MHz).

(ii) The dielectric constant must not exceed 2.30.

(5) The volume resistivity must not be less than \(10^{12}\) ohm-cm at a temperature of 23 ± 3 °C when measured in accordance with ASTM D 257–81 or ASTM D 4872–88.

(6) The individual wire manufacturer must satisfy RUS that the filling compound selected for use is suitable for its intended application. The filling compound must be compatible with the wire components when tested in accordance with ASTM D 4568–86 at a temperature of 80 °C.

(f) Core wrap (optional). (1) When a core wrap is used, it must consist of a layer of nonhygroscopic and nonwicking dielectric material. The wrap must be applied with an overlap.
(2) The core wrap must provide a sufficient heat barrier to prevent visible evidence of conductor insulation deformation or adhesion between conductors, caused by adverse heat transfer during the inner jacketing operation.

(3) If required for manufacturing reasons, white or colored binders of non-hygroscopic and nonwicking material may be applied over the core wrap.

(4) Sufficient filling compound must be applied to the core wrap that voids or air spaces existing between the core and inner side of the core wrap are minimized.

(g) Inner jacket. (1) An inner jacket must be applied over the core and/or core wrap.

(2) The jacket must be free from holes, splits, blisters, or other imperfections and must be as smooth and concentric as is consistent with the best commercial practice.

(3) The inner jacket material and test requirements must be as specified for the outer jacket material per paragraphs (j)(3) through (j)(5)(iv) of this section.

(4) The inner jacket thickness at any point must not be less than 0.5 mm (0.020 in.). The thickness must be determined from measurements on 50 mm (2 in.) samples taken not less than 0.3 m (1 ft) from either end of the wire. The average must be determined from 4 readings taken approximately 90° apart on any cross section of the samples. The maximum and minimum points must be determined by exploratory measurements. The maximum thickness minus the minimum thickness at any cross section must not exceed 43 percent of the average thickness at that cross section.

(h) Flooding compound. (1) Sufficient flooding compound must be applied on all sheath interfaces so that voids and air spaces in these areas are minimized.

(2) The flooding compound must be compatible with the jacket when tested in accordance with ASTM D 4568-86 at a temperature of 80 °C. The floodant must exhibit adhesive properties sufficient to prevent jacket slip when tested in accordance with the requirements of appendix A, paragraph (III)(5), of this section.

(3) The individual wire manufacturer must satisfy RUS that the flooding compound selected for use is acceptable for the application.

(i) Shield. (1) A shield must be applied either longitudinally or helically over the inner jacket.

(1) If the shield is applied longitudinally, it must be corrugated.

(2) The overlap for longitudinally applied shields must be a minimum of 2 mm (0.075 in.) The overlap for helically applied shields must be a minimum of 23 percent of the tape width.

(3) General requirements for application of the shielding material are as follows:

(i) Successive lengths of shielding tapes may be joined during the manufacturing process by means of cold weld, electric weld, soldering with a nonacid flux, or other acceptable means.

(ii) Where two ends of a metal shield are to be joined together, care shall be taken to clean the metal surfaces in order to provide for a good mechanical and electrical connection.

(iii) The shields of each length of wire must be tested for continuity. A one meter (3 ft) section of shield containing a factory joint must exhibit not more than 110 percent of the resistance of a shield of equal length without a joint.

(iv) The breaking strength of any section of a shield tape containing a factory joint must not be less than 80 percent of the breaking strength of an adjacent section of the shield of equal length without a joint;

(v) The reduction in thickness of the shielding material due to the corrugating or application process must be kept to a minimum and must not exceed 10 percent at any spot; and

(vi) The shielding material must be applied in such a manner as to enable the wire to pass the bend test as specified in paragraph (n)(3) of this section.

(4) The following materials are acceptable for use as wire shielding:

<table>
<thead>

</tr>
</tbody>
</table>

(ii) Copper alloy 220. The shielding material, prior to application to the wire, must be in the fully annealed condition and shall conform to the requirements of ASTM B 694–86 for C22000 commercial bronze.

(iii) Copper-clad stainless steel. In addition to meeting the requirements of paragraph (i)(4)(i) of this section, the shielding material, prior to application to the wire, must be in the fully annealed condition and must conform to the requirements of ASTM B 694–86, with a cladding ratio of 16/68/16 and must have a minimum electrical conductivity of 28 percent IACS when measured in accordance with ASTM B 193–87.

(iv) Copper alloy 664. In addition to meeting the requirements of paragraph (i)(4)(i) of this section, the shielding material, prior to application to the wire, must be annealed temper and must conform to the requirements of ASTM B 694–86 and must have a minimum electrical conductivity of 28 percent IACS when measured in accordance with ASTM B 193–87.

(v) Copper-clad alloy steel. In addition to meeting the requirements of paragraph (i)(4)(i) of this section, the shielding material, prior to application to the wire, must be in the fully annealed condition and the copper component must conform to the requirements of ASTM B 224–91 and the alloy steel component must conform to the requirements of ASTM A 505–87, with a cladding ratio of 16/68/16, and must have a minimum electrical conductivity of 28 percent IACS when measured in accordance with ASTM B 193–87.

(j) Outer jacket. (1) The outer jacket must provide the wire with a tough, flexible, protective covering which can withstand exposure to sunlight, atmospheric temperatures and stresses reasonably expected in normal installation and service.

(ii) The jacket must be free from holes, splits, blisters, or other imperfections and must be as smooth and concentric as is consistent with the best commercial practice.

(3) The raw material used for the outer jacket must be one of the five types listed in paragraphs (j)(3)(i) through (j)(3)(v) of this section. The raw material must contain an antioxidant to provide long term stabilization and the materials must contain a 2.60 ±0.25 percent concentration of furnace black to provide ultraviolet shielding. Both the antioxidant and furnace black must be compounded into the material by the raw material supplier.

(i) Low density, high molecular weight polyethylene (LDHMW) must conform to the requirements of ASTM D 1248–84(1989), Type I, Class C, Category 4 or 5, Grade J3.

(ii) Low density, high molecular weight ethylene copolymer (LDHMW) must conform to the requirements of ASTM D 1248–84 (1989), Type I, Class C, Category 4 or 5, Grade J3.

(iii) Linear low density, high molecular weight polyethylene (LLDHMW) must conform to the requirements of ASTM D 1248–84(1989), Type I, Class C, Category 4 or 5, Grade J3.

(iv) High density polyethylene (HD) must conform to the requirements of ASTM D 1248–84(1989), Type III, Class C, Category 4 or 5, Grade J4.

(v) Medium density polyethylene (MD) must conform to the requirements of ASTM D 1248–84(1989), Type II, Class C, Category 4 or 5, Grade J4.
(vi) Particle size of the carbon selected for use must not average greater than 20 nanometers.

(vii) Absorption coefficient must be a minimum of 400 in accordance with the procedures of ASTM D 3349–86.

(4) The outer jacketing material removed from or tested on the wire must be capable of meeting the following performance requirements:

<table>

(5) Testing procedures. The procedures for testing the jacket samples for compliance with paragraph (j)(4) of this section must be as follows:

(i) Melt flow rate. The melt flow rate must be as determined by ASTM D 1238–90a, Condition E. Jacketing material must be free from flooding and filling compound.

(ii) Tensile strength and ultimate elongation. Test in accordance with ASTM D 4565–90a, using a jaw separation speed of 500 mm/min (20 in./min) for low density material and 50 mm/min (2 in./min) for high and medium density materials.

(iii) Shrinkback. Test in accordance with the procedures specified in ASTM D 4565–90a using a test temperature of 100 ± 1 °C for low density material and a test temperature of 115 ± 1 °C for high and medium density materials.

(iv) Impact. The test must be performed in accordance with ASTM D 4565–90a using an impact force of 4 newton-meter (3 pound force-foot) at a temperature of −20 ± 2 °C. The cylinder must strike the sample at the shield overlap. A crack or split in the jacket constitutes failure.

(6) Jacket thickness. The minimum jacket thickness must be 0.64 mm (0.025 in.) except that the minimum thickness over the sheath slitting cord, if present, must be 0.46 mm (0.018 in.). The minimum point must be determined by exploratory measurements. The average thickness at any cross section must be determined from four readings including the minimum point, taken approximately 90 ° apart. The thickness measurement must exclude any jacket material that has formed into the corrugation. The maximum thickness at any cross section must not be greater than 155 percent of the minimum thickness.

(7) Eccentricity. The eccentricity of the jacket must not exceed 43 percent when calculated using the formula as follows:

\[
\frac{\text{Maximum Thickness}}{\text{Minimum Thickness}} \times 100 \text{ Percent}
\]

(8) Sheath slitting cord (optional). (1) Sheath slitting cords may be used in the wire structure at the option of the manufacturer.

(2) When a sheath slitting cord is used it must be nonhygroscopic and nonwicking, continuous throughout a length of wire, and of sufficient strength to open the sheath without breaking the cord.

(3) Sheath slitting cords must be capable of consistently slitting the jacket(s) and/or shield for a continuous length of 0.6 m (2 ft) when tested in accordance with the procedure specified in appendix B of this section.

(1) Identification marker and length marker. (1) Each length of wire must be permanently identified as to manufacturer and year of manufacture.

(2) The number of conductor pairs and their gauge size must be marked on the jacket.
(3) The marking must be printed on the jacket at regular intervals of not more than 1.5 m (5 ft).

(4) An alternative method of marking may be used if accepted by RUS prior to its use.

(5) The completed wire must have sequentially numbered length markers in FEET OR METERS at regular intervals of not more than 1.5 m (5 ft) along the outside of the jacket.

(6) The method of length marking must be such that for any single length of wire, continuous sequential numbering must be employed.

(7) The numbers must be dimensioned and spaced to produce good legibility and must be approximately 3 mm (0.125 in.) in height. An occasional illegible marking is permissible if there is a legible marking located not more than 1.5 m (5 ft) from it.

(8) The method of marking must be by means of suitable surface markings producing a clear, distinguishable, contrasting marking acceptable to RUS. Where direct or transverse printing is employed, the characters should be indented to produce greater durability of marking. Any other method of length marking must be acceptable to RUS as producing a marker suitable for the field. Size, shape and spacing of numbers, durability, and overall legibility of the marker will be considered in acceptance of the method.

(9) The accuracy of the length marking must be such that the actual length of any wire section is never less than the length indicated by the marking and never more than one percent greater than the length indicated by the marking.

(10) The color of the initial marking must be white or silver. If the initial marking fails to meet the requirements of the preceding paragraphs, it will be permissible to either remove the defective marking and re-mark with the white or silver color or leave the defective marking on the wire and re-mark with yellow. No further re-marking is permitted. Any re-marking must be on a different portion of the wire circumference than any existing marking when possible and have a numbering sequence differing from any other existing marking by at least 5,000.

(11) Any reel of wire which contains more than one set of sequential markings must be labeled to indicate the color and sequence of marking to be used. The labeling must be applied to the reel and also to the wire.

(m) Electrical requirements—

(1) Mutual capacitance and conductance. (i) The average mutual capacitance (corrected for length) of all pairs in any reel must not exceed 52 ± 4 nanofarad/kilometer (nF/km) (83 ± 7 nanofarad/mile (nF/mile)) when tested in accordance with ASTM D 4566-90 at a frequency of 1.0 ± 0.1 kilohertz (kHz) and a temperature of 23 ± 3 °C.

(ii) The mutual conductance (corrected for length and gauge) of any pair must not exceed 2 micromhos/kilometer (micromhos/km) (3.3 micromhos/mile) when tested in accordance with ASTM D 4566-90 at a frequency of 1.0 ± 0.1 kHz and a temperature of 23 ± 3 °C.

(2) Pair-to-pair capacitance unbalance. The capacitance unbalance between any pair of the completed wire must not exceed 145 picofarad/kilometer (pF/km) (80 picofarad/1000 ft) when tested in accordance with ASTM D 4566-90 at a frequency of 1.0 ± 0.1 kHz and a temperature of 23 ± 3 °C.

(3) Pair-to-ground capacitance unbalance—

(i) Pair-to-ground. The capacitance unbalance as measured on the individual pairs of the completed wire must not exceed 2625 pF/km (800 pF/1000 ft) when tested in accordance with ASTM D 4566-90 at a frequency of 1.0 ± 0.1 kHz and a temperature of 23 ± 3 °C.

(ii) When measuring pair-to-ground capacitance unbalance, all pairs, except the pair under test, are grounded to the shield.

(iii) Pair-to-ground capacitance unbalance may vary directly with the length of the wire.

(4) Far-end crosstalk loss. (i) The output-to-output far-end crosstalk loss (FEXT) between any pair combination of a completed wire when measured in accordance with ASTM D 4566-90 at a test frequency of 150 kHz must not be less than 58 decibel/kilometer (dB/km) (63 decibel/1000 ft). If the loss K₀ at a frequency F₀ for length L₀ is known, then Kₓ can be determined for any other frequency Fₓ or length Lₓ by:
FEXT loss \( K_X = K_O - 20 \log \frac{F_X}{F_O} - 10 \log \frac{L_X}{L_O} \)

(5) **Attenuation.** The attenuation of any individual pair on any reel of wire must not exceed the following limits when measured at or corrected to a temperature of 20 ± 1 °C and a test frequency of 150 kHz. The test must be conducted in accordance with ASTM D 4566-90.

<table>
<thead>
<tr>
<th>Conductor AWG</th>
<th>Individual Pair Attenuation dB/km (decibel/mile (dB/mile))</th>
</tr>
</thead>
<tbody>
<tr>
<td>22</td>
<td>6.8 (11.0)</td>
</tr>
<tr>
<td>24</td>
<td>8.7 (14.0)</td>
</tr>
</tbody>
</table>

(6) **Insulation resistance.** Each insulated conductor in each length of completed wire, when measured with all other insulated conductors and the shield grounded, must have an insulation resistance of not less than 1600 megohm-kilometer (1000 megohm-mile) at 20 ± 1 °C. The measurement must be made in accordance with the procedures of ASTM D 4566-90.

(7) **High voltage test.** (i) In each length of completed wire, the insulation between conductors when tested in accordance with ASTM D 4566-90 must withstand for 3 seconds a direct current (dc) potential whose value is not less than:

- (A) 5.0 kilovolts for 22-gauge conductors; and
- (B) 4.0 kilovolts for 24-gauge conductors.

(ii) In each length of completed wire, the dielectric strength between the shield and all conductors in the core must be tested in accordance with ASTM D 4566-90 and must withstand, for 3 seconds, a dc potential whose value is not less than 20 kilovolts.

(8) **Conductor resistance.** The dc resistance of any conductor must be measured in the completed wire in accordance with ASTM D 4566-90 and must not exceed the following values when measured at or corrected to a temperature of 20 ± 1 °C:

<table>
<thead>
<tr>
<th>AWG</th>
<th>Maximum Resistance</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>ohms/kilometer</td>
</tr>
<tr>
<td></td>
<td>(ohms/1000 ft)</td>
</tr>
<tr>
<td>22</td>
<td>57.1</td>
</tr>
<tr>
<td>24</td>
<td>90.2</td>
</tr>
</tbody>
</table>

(9) **Resistance unbalance.** (i) The difference in dc resistance between the two conductors of any pair in the completed wire must not exceed 5.0 percent when measured in accordance with the procedures of ASTM D 4566-90.

(ii) The resistance unbalance between tip and ring conductors shall be random with respect to the direction of unbalance. That is, the resistance of the tip conductors shall not be consistently higher with respect to the ring conductors and vice versa.

(n) **Mechanical requirements**—(1) **Defective wire.** Pairs in each length of wire will not be permitted to have either a ground, cross, short or open circuit condition.

(2) **Wire breaking strength.** The breaking strength of the completed wire must not be less than 890 newtons (200 pound-force) when tested in accordance with ASTM D 4565-90a using a jaw separation speed of 25 mm/min (1.0 in./min).

(3) **Wire bending test.** The completed wire must be capable of meeting the requirements of ASTM D 4565-90a after conditioning at 20 ± 2 °C and at 23 ± 2 °C.

(4) **Water penetration test.** (i) A one meter (3 ft) length of completed wire must be stabilized at 23 ± 2 °C and tested in accordance with ASTM D 4565-90a using a one meter (3 ft) water head over the sample or placed under the equivalent continuous pressure for one hour.

(ii) After the one hour period, there must be no water leakage in the sheath interfaces, under the core wrap or between any insulated conductors in the core.

(iii) If water leakage is detected in the first sample, one 3 m (10 ft) additional adjacent sample from the same reel of wire must be tested in accordance with paragraph (n)(4)(ii) of this section. If the second sample exhibits water leakage, the entire reel of wire is to be rejected. If the second sample exhibits no leakage, the entire reel of wire is considered acceptable.
(5) **Compound flow test.** The completed wire must be capable of meeting the compound flow test specified in ASTM D 4565–90a when exposed for a period of 24 hours at a temperature of 80 ± 1 °C. At the end of this test period, there must be no evidence of flowing or dripping of compound from either the core or sheath interfaces.

(o) **Acceptance testing and extent of testing.** (1) The tests described in appendix A of this section are intended for acceptance of wire designs and major modifications of accepted designs. RUS decides what constitutes a major modification. These tests are intended to show the inherent capability of the manufacturer to produce wire products having long life and stability.

(2) For initial acceptance, the manufacturer must submit:

(i) An original signature certification that the product fully complies with each requirement of this section;

(ii) Qualification Test Data, per appendix A of this section;

(iii) To periodic plant inspections;

(iv) A certification that the product does or does not comply with the domestic origin manufacturing provisions of the “Buy American” requirements of the Rural Electrification Act of 1938 (7 U.S.C. 901 et seq.);

(v) Written user testimonials concerning performance of the product; and

(vi) Other nonproprietary data deemed necessary by the Chief, Outside Plant Branch (Telephone).

(3) For requalification acceptance, the manufacturer must submit an original signature certification that the product fully complies with each section of the specification, excluding the Qualification Section, and a certification that the product does or does not comply with the domestic origin manufacturing provisions of the “Buy American” requirements of the Rural Electrification Act of 1938 (7 U.S.C. 901 et seq.) for acceptance by June 30 every three years. The required data and certification must have been gathered within 90 days of the submission.

(4) Initial and requalification acceptance requests should be addressed to: Chairman, Technical Standards, Committee “A” (Telephone), Telecommunications Standards Division, Rural Utilities Service, Washington, DC 20250–1500.

(p) **Summary of records of electrical and physical tests.** (1) Each manufacturer must maintain suitable summary of records for a period of at least 3 years for all electrical and physical tests required on completed wire by this section as set forth in paragraphs (o)(5) and (o)(6) of this section. The test data for a particular reel shall be in a form that it may be readily available to the purchaser or to RUS upon request.

(2) Measurements and computed values must be rounded off to the number
§1755.860  7 CFR Ch. XVII (1–1–08 Edition)  

Wire Designation  
BFW  
Wire Construction  
Pair Count  
Conductor Gauge  
N = Copper Alloy 220 (Bronze) Shield  
Y = Gopher Resistant Shields  
Example: BFWY 3–24  
Buried Filled Wire, Gopher Resistant Shield, 3 pair, 24 AWG  

(q) Manufacturing irregularities. (1) Repairs to the inner jacket and shield are not permitted in wire supplied to the end user under this section.  
(2) Minor defects in the outer jackets (defects having a dimension of 3 mm (0.125 in.) or less in any direction) may be repaired by means of heat fusing in accordance with good commercial practices utilizing sheath grade compound.  
(r) Preparation for shipment. (1) The wire must be stored on reels. The diameter of the drum must be large enough to prevent damage to the wire from reeling or unreeling. The reels must be substantial and so constructed as to prevent damage to the wire during shipment and handling.  
(2) The thermal wrap must comply with the requirements of appendix C of this section. When a thermal reel wrap is supplied, the wrap must be applied to the reel and must be suitably secured in place to minimize thermal exposure to the wire during storage and shipment. The use of the thermal reel wrap as a means of reel protection will be at the option of the manufacturer unless specified by the end user.  
(3) The outer end of the wire must be securely fastened to the reel head so as to prevent the wire from becoming loose in transit. The inner end of the wire must be securely fastened in such a way as to make it readily available if required for electrical testing. Spikes, staples, or other fastening devices which penetrate the wire jacket must not be used. The method of fastening the wire ends must be accepted by RUS prior to it being used.  
(4) Each length of wire must be wound on a separate reel unless otherwise specified or agreed to by the purchaser.  
(5) Each reel must be plainly marked to indicate the direction in which it should be rolled to prevent loosening of the wire on the reel.  
(6) Each reel must be stenciled or labeled on either one or both sides with the name of the manufacturer, year of manufacture, actual shipping length, an inner and outer end sequential length marking, description of the wire, reel number and the RUS wire designation:

Data Reference Temperature. Unless otherwise specified, all measurements shall be made at 23 ±3 °C.
Environmental Tests.—(1) Heat Aging Test—(a) Test Samples. Place one sample each of lengths B, C, D, and E in an oven or environmental chamber. The ends of sample B must exit from the chamber or oven for electrical tests. Securely seal the oven exit holes.

(b) Sequence of Tests. After conditioning the samples are to be subjected to the following tests:

(i) Water Immersion Test outlined in (III)(2) of this appendix;

(ii) Water Penetration Test outlined in (III)(3) of this appendix;

(iii) Insulation Compression Test outlined in (III)(4) of this appendix; and

(iv) Jacket Slip Strength Test outlined in (III)(5) of this appendix.

(c) Initial Measurements. (i) For sample B, measure the open circuit capacitance and conductance for each pair at 1 and 150 kilohertz and the attenuation at 150 kilohertz after conditioning the sample at the data reference temperature for 24 hours. Calculate the average and standard deviation for the data of the 3 pairs on a per kilometer (per mile) basis.

(ii) The attenuation at 150 kilohertz may be calculated from open circuit admittance (YoC) and short circuit impedance (Zsc) or may be obtained by direct measurement of attenuation.

(iii) Record on suggested formats attached in (V) of this appendix or on other easily readable formats.

(d) Heat Conditioning. (i) Immediately after completing the initial measurements, condition the sample for 14 days at a temperature of 65 °C.

(ii) At the end of this period note any exudation of filling compound. Measure and calculate the parameters given in (III)(1)(c) of this appendix. Record on suggested formats attached in (V) of this appendix or on other easily readable formats.

(iii) Cut away and discard a one meter (3 foot) section from each end of length B.

(e) Overall Electrical Deviation. (i) Calculate the percent change in all average parameters between the final parameters after conditioning with the initial parameters in (III)(1)(c) of this appendix.

(ii) The stability of the electrical parameters after completion of this test must be within the following prescribed limits:

(A) Capacitance. The average mutual capacitance must be less than 5 percent over the frequency range of 1 to 150 kilohertz;

(B) Conductance. The average mutual conductance must not exceed 2 micromhos/kilometer (3.3 micromhos/mile) at a frequency of 1 kilohertz; and

(D) Attenuation. The attenuation must not have increased by more than 5 percent over its original value.

(2) Water Immersion Electrical Test—(a) Test Sample Selection. The 10 meter (33 foot) section of length B must be tested.

(b) Test Sample Preparation. Prepare the sample by removing the inner and outer jacket, shield, and core wrap, if present, for a sufficient distance to allow one end to be accessed for test connections. Cut out a series of 2.5 millimeter by 13 millimeter (0.1 inch by 0.5 inch) rectangular slots along the test sample, at 300 millimeter (1 foot) intervals progressing successively 90 degrees around the circumference of the wire. Ensure that the wire core is exposed at each slot by slitting the inner jacket and core wrap if present. Place the prepared sample in a dry vessel which when filled will maintain a one meter (3 foot) head of water over 6 meters (20 feet) of uncoiled wire. Extend and fasten the ends of the wire so they will be above the water line and the pairs are rigidly held for the duration of the test.

(c) Capacitance and Conductance Testing. Measure the initial values of mutual capacitance and conductance of all pairs in each wire at a frequency of 1 kilohertz before filling the vessel with water. Be sure the wire shield is grounded to the test equipment. Fill the vessel until there is a one meter (3 foot) head of water on the wires.

(i) Remeasure the mutual capacitance and conductance after the wires have been submerged for 24 hours and again after 30 days.

(ii) Record each sample separately on the suggested formats attached in (V) of this appendix or on other easily readable formats.

(d) Overall Electrical Deviation. (i) Calculate the percent change in all average parameters between the initial parameters after conditioning with the initial parameters in (III)(2)(c) of this appendix.

(ii) The stability of the electrical parameters after of the test must be within the following prescribed limits:

(A) Capacitance. The average mutual capacitance must be within 5 percent of its original value; and

(B) Conductance. The average mutual conductance must not exceed 2 micromhos/kilometer (3.3 micromhos/mile) at a frequency of 1 kilohertz.

(3) Water Penetration Testing. (a) A watertight closure must be placed over the jacket of length C. The closure must not be placed over the jacket so tightly that the flow of water through preexisting voids or air spaces is restricted. The other end of the sample must remain open.

(b) Test per Option A or Option B. (i) Option A. Weigh the sample and closure prior to testing. Fill the closure with water and place under a continuous pressure of 10 ± 0.7 kilopascals (1.5 ± 0.1 pounds per square inch
§ 1755.860  7 CFR Ch. XVII (1–1–08 Edition)

gauge) for one hour. Collect the water leakage from the end of the test sample during the test and weigh to the nearest 0.1 gram. Immediately after the one hour test, seal the ends of the wire with a thin layer of grease and remove all visible water from the closure, being careful not to remove water that penetrated into the core during the test. Remove the core and determine the weight of water that penetrated into the core. The weight of water that penetrated into the core must not exceed 1 gram.

(ii) Option B. Fill the closure with a 0.2 gram sodium fluorescein per liter water solution and apply a continuous pressure of 10 ± 0.7 kilopascals (1.5 ± 0.1 pounds per square inch gauge) for one hour. Catch and weigh any water that leaks from the end of the wire during the one hour period. If no water leaks from the sample, carefully remove the water from the closure. Then carefully remove the outer jacket, shield, inner jacket and core wrap, if present, one at a time, examining with an ultraviolet light source for water penetration. After removal of the inner jacket and core wrap, if present, carefully dissect the core and examine for water penetration within the core. Where water penetration is observed, measure the penetration distance. The distance of water penetration into the core must not exceed 127 millimeters (5.0 inches).

(A) Insulation Compression Test. (a) Test Sample D. Remove inner and outer jacket, shield, and core wrap, if present, being careful not to damage the conductor insulation. Remove one pair from the core and carefully separate, wipe off core filler and straighten the insulated conductors. Retwist the two insulated conductors together under sufficient tension to form 10 evenly spaced 360 degree twists in a length of 100 millimeters (4 inches).

(b) Sample Testing. Center the mid 50 millimeters (2 inches) of the twisted pair between two smooth rigid parallel metal plates measuring 30 millimeters (2 inches) in length or diameter. Apply a 1.5 volt direct current potential between the conductors, using a light or buzzer to indicate electrical contact between the conductors. Apply a constant load of 67 newtons (15 pound-force) on the sample for one minute and monitor for evidence of contact between the conductors. Record results on suggested formats attached in (V) of this appendix or on other easily readable formats.

(b) Jacket Slip Strength Test. (a) Sample Selection. Test sample E from (III)(1)(a) of this appendix.

(b) Sample Preparation. Prepare test sample in accordance with the procedures specified in ASTM D 4565–90a. A minimum outer jacket slip strength of 67 newtons (15 pound-force) is required. Record the load attained.

(6) Humidity Exposure. (a) Repeat steps (III)(1)(a) through (III)(1)(c)(iii) of this appendix for separate set of samples B, C, D and E which have not been subjected to prior environmental conditioning.

(b) Immediately after completing the measurements, expose the test sample to 100 temperature cyclings. Relative humidity within the chamber must be maintained at 90 ± 2 percent. One cycle consists of beginning at a stabilized chamber and test sample temperature of 52 ± 1 °C, increasing the temperature to 57 ± 1 °C, allowing the chamber and test samples to stabilize at this level, then dropping the temperature back to 52 ± 1 °C.

(c) Repeat steps (III)(1)(d)(ii) through (III)(5)(c) of this appendix.

(7) Temperature Cycling. (a) Repeat steps (III)(1)(a) through (III)(1)(c)(iii) of this appendix for separate set of samples B, C, D and E which have not been subjected to prior environmental conditioning.

(b) Immediately after completing the measurements, subject the test sample to 10 cycles of temperature between –40 °C and +60 °C. The test sample must be held at each temperature extreme for a minimum of 1 1/2 hours during each cycle of temperature. The air within the temperature cycling chamber must be circulated throughout the duration of the cycling.

(c) Repeat steps (III)(1)(d)(ii) through (III)(5)(c) of this appendix.

(IV) Control Sample—(1) Test Samples. A separate set of lengths for samples A, C, D, and E must be maintained at 23 ± 3 °C and at least 48 hours before the testing.

(2) Repeat steps (III)(2) through (III)(5)(c) of this appendix except use length A instead of length B.

(3) Surge Test. (a) One length of sample F must be used to measure the breakdown between conductors while the other length of F must be used to measure core to shield breakdown.

(b) The samples must be capable of withstanding, without damage, a single surge voltage of 20 kilovolts peak between conductors, and 35 kilovolts peak between conductors and the shield as hereinafter described. The surge voltage must be developed from a capacitor bank charged to the test voltage in ASTM D 4565–90a. A minimum outer jacket slip strength of 67 newtons (15 pound-force) is required. Record the load attained.

(c) The shape of the generated wave must be determined at a reduced voltage by connecting an oscilloscope across the forming resistor with the wire sample connected in parallel with the forming resistor. The capacitor bank is charged to the test voltage
and then discharged through the forming resistor and test sample. The test sample will be considered to have passed the test if there is no distinct change in the wave shape obtained with the initial reduced voltage compared to that obtained after the application of the test voltage.

(V) The following suggested formats may be used in submitting the test results to RUS:

APPENDIX B TO § 1755.860—SHEATH SLITTING CORD QUALIFICATION

(1) The test procedures described in this appendix are for qualification of initial and subsequent changes in sheath slitting cords.

(II) Sample Selection. All testing must be performed on two 1.2 meters (4 feet) lengths of wire removed sequentially from the same 3 pair, 22 gauge jacketed wire. This wire must not have been exposed to temperatures in excess of 38 °C since its initial cool down after sheathing.

(III) Test Procedure. (1) Using a suitable tool, expose enough of sheath slitting cord to permit grasping with needle nose pliers.

(2) The prepared test specimens must be maintained at a temperature of 25 ± 1 °C for at least 4 hours immediately prior to and during the test.

(3) Wrap the sheath slitting cord around the plier jaws to ensure a good grip.

(4) Grasp and hold the wire in a convenient position while gently and firmly pulling the sheath slitting cord longitudinally in the direction away from the wire end. The angle of pull may vary to any convenient and functional degree. A small starting notch is permissible.

(5) The sheath slitting cord is considered acceptable if the cord can slit the jacket and/or shield for a continuous length of 0.6 meter (2 feet) without breaking the cord.

APPENDIX C TO § 1755.860—THERMAL REEL WRAP QUALIFICATION

(1) The test procedures described in this appendix are for qualification of initial and subsequent changes in thermal reel wraps.

(II) Sample Selection. All testing must be performed on two 450 millimeter (18 inch) lengths of wire removed sequentially from the same 3 pair, 22 gauge jacketed wire. This wire must not have been exposed to temperatures in excess of 38 °C since its initial cool down after sheathing.

(III) Test Procedure. (1) Place the two samples on an insulating material such as wood, etc.

(2) Tape thermocouples to the jackets of each sample to measure the jacket temperature.

(3) Cover one sample with the thermal reel wrap.

(4) Expose the samples to a radiant heat source capable of heating the uncovered jacket sample to a minimum of 71 °C. A 600 watt photoflood lamp or an equivalent lamp having the light spectrum approximately that of the sun shall be used.

(5) The height of the lamp above the jacket shall be 380 millimeters (15 inches) or a height that produces the 71 °C jacket temperature on the unwrapped sample.

(6) After the samples have stabilized at the temperature, the jacket temperatures of the samples must be recorded after one hour of exposure to the heat source.

(7) Compute the temperature difference between the jackets.

(8) For the thermal reel wrap to be acceptable to RUS, the temperature differences between the jacket with the thermal reel wrap
§ 1755.870 RUS specification for terminating cables.

(a) Scope. (1) This section establishes the requirements for terminating cables used to connect incoming outside plant cables to the vertical side of the main distributing frame in a telephone central office.

(i) The conductors are solid tinned copper, individually insulated with extruded solid dual insulating compounds.

(ii) The insulated conductors are twisted into pairs which are then stranded or oscillated to form a cylindrical core.

(iii) The cable structure is completed by the application of a core wrap, a shield, and a polyvinyl chloride jacket.

(2) The number of pairs and gauge size of conductors which are used within the RUS program are provided in the following table:

<table>

NOTE: Cables larger in pair sizes than those shown in this table shall meet all the requirements of this section.

(3) All cables sold to RUS borrowers for projects involving RUS loan funds under this section must be accepted by RUS Technical Standards Committee "A" (Telephone). For cables manufactured to the specification of this section, all design changes to an accepted design must be submitted for acceptance. RUS will be the sole authority on what constitutes a design change.

(4) Materials, manufacturing techniques, or cable designs not specifically addressed by this section may be allowed if accepted by RUS. Justification for acceptance of modified materials, manufacturing techniques, or cable designs shall be provided to substantiate product utility and long term stability and endurance.

(5) The American National Standard Institute/Electronic Industries Association (ANSI/EIA) 359–A–84, EIA Standard Colors for Color Identification and Coding, referenced in this section is incorporated by reference by RUS. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies of ANSI/EIA 359–A–84 are available for inspection during normal business hours at RUS, room 2845, U.S. Department of Agriculture, Washington, DC 20250–1500, or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030, or go to: http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html. Copies are available from Global Engineering Documents, 15 Inverness Way East, Englewood, CO 80112, telephone number (303) 792–2181.

§ 1755.870  7 CFR Ch. XVII (1–1–08 Edition)  

and ASTM E 29–90, Standard Practice for Using Significant Digits in Test Data to Determine Conformance with Specifications, referenced in this section are incorporated by reference by RUS. These incorporations by reference were approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies of the ASTM standards are available for inspection during normal business hours at RUS, room 2845, U.S. Department of Agriculture, Washington, DC 20250–1500, or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html. Copies are available from ASTM, 1916 Race Street, Philadelphia, Pennsylvania 19103–1187, telephone number (215) 299–5585.

(7) American National Standards Institute/National Fire Protection Association (ANSI/NFPA), NFPA 70–1993 National Electrical Code referenced in this section is incorporated by reference by RUS. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. A copy of the ANSI/NFPA standard is available for inspection during normal business hours at RUS, room 2845, U.S. Department of Agriculture, Washington, DC 20250–1500, or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html. Copies are available from NFPA, Batterymarch Park, Quincy, Massachusetts 02269, telephone number 1 (800) 344–3555.

(8) Underwriters Laboratories Inc. (UL) 1666, Standard Test for Flame Propagation Height of Electrical and Optical-Fiber Cables Installed Vertically in Shafts, dated January 22, 1991, referenced in this section is incorporated by reference by RUS. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. A copy of the UL standard is available for inspection during normal business hours at RUS, room 2845, U.S. Department of Agriculture, Washington, DC 20250–1500, or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html. Copies are available from UL Inc., 333 Pfingsten Road, Northbrook, Illinois 60062–2096, telephone number (708) 272–8800.

(b) Conductor and conductor insulation. (1) Each conductor shall be a solid round wire of commercially pure annealed tin coated copper. Conductors shall meet the requirements of the American Society for Testing and Materials (ASTM) B 33–91 except that requirements for Dimensions and Permissible Variations are waived.

(2) Joints made in conductors during the manufacturing process may be brazed, using a silver alloy solder and nonacid flux, or they may be welded using either an electrical or cold welding technique. In joints made in uninsulated conductors, the two conductor ends shall be butted. Splices made in insulated conductors need not be butted but may be joined in a manner acceptable to RUS.

(3) The tensile strength of any section of a conductor, containing a factory joint, shall not be less than 85 percent of the tensile strength of an adjacent section of the solid conductor of equal length without a joint.

(4) Engineering Information: The sizes of wire used and their nominal diameters shall be as shown in the following table:

<table>
<thead>
<tr>
<th>AWG</th>
<th>Nominal diameter</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Millimeters</td>
</tr>
<tr>
<td>22</td>
<td>0.643</td>
</tr>
<tr>
<td>24</td>
<td>0.511</td>
</tr>
</tbody>
</table>

(5) Each conductor shall be insulated with a primary layer of natural or white solid, insulating grade, high density polyethylene or crystalline propylene/ethylene copolymer and an outer skin of colored, solid, insulating grade, polyvinyl chloride (PVC) using one of the insulating materials listed.
§ 1755.870

in paragraphs (b)(5)(i) through (iii) of this section.

(i) The polyethylene raw material selected to meet the requirements of this section shall be Type III, Class A, Category 4 or 5, Grade E9, in accordance with ASTM D 1248–84 (1989).

(ii) The crystalline propylene/ethylene raw material selected to meet the requirements of this section shall be Class PP 200B 40003 E11 in accordance with ASTM D 4101–82 (1988).

(iii) The PVC raw material selected to meet the requirements of this section shall be either Type PVC–64751E3XO, Type PVC–77751E3XO, or Type PVC–77751E3XO in accordance with ASTM D 2287–81 (1988).

(iv) Raw materials intended as conductor insulation furnished to these requirements shall be free from dirt, metallic particles, and other foreign matter.

(v) All insulating raw materials shall be accepted by RUS prior to their use.

(6) All conductors in any single length of cable shall be insulated with the same type of material.

(7) A permissible overall performance level of faults in conductor insulation when using the test procedures in paragraph (b)(8) of this section shall average not greater than one fault per 12,000 conductor meters (40,000 conductor feet) for each gauge of conductor.

(8) The test used to determine compliance with paragraph (b)(7) of this section shall be conducted as follows:

(i) Samples tested shall be taken from finished cables selected at random from standard production cable. The samples tested shall contain a minimum of 300 conductor meters (1,000 conductor feet) for cables sizes less than 50 pairs and 1,500 conductor meters (5,000 conductor feet) for cables sizes greater than or equal to 50 pairs. No further sample need be taken from the same cable production run within 6,000 cable meters (20,000 cable feet) of the original test sample from that run.

(ii) The cable sample shall have its jacket, shield, and core wrap removed and its core shall be immersed in tap water for a minimum period of 6 hours. In lieu of removing the jacket, shield, and core wrap from the core, the entire cable may be tested. In this case, the core shall be completely filled with tap water, under pressure; then the cable assembly shall be immersed for a minimum period of 6 hours. With the cable core still fully immersed, except for end connections, the insulation resistance (IR) of all conductors to water shall be measured using a direct current (dc) voltage of 100 volts to 550 volts.

(iii) An IR value of less than 500 megohms for any individual insulated conductor tested at or corrected to a temperature of 23 °C is considered a failure. If the cable sample is more than 7.5 meters (25 feet) long, all failing conductors shall be retested and reported in 7.5 meter (25 foot) segments.

(iv) The pair count, gauge, footage, and number of insulation faults shall be recorded. This information shall be retained on a 6 month running basis for review by RUS when requested.

(v) A fault rate, in a continuous length in any one reel, in excess of one fault per 3,000 conductor meters (10,000 conductor feet) due to manufacturing defects is cause for rejection. A minimum of 6,000 conductor meters (20,000 conductor feet) is required to develop a noncompliance in a reel.

(9) Repairs to the conductor insulation during manufacturing are permissible. The method of repair shall be accepted by RUS prior to its use. The repaired insulation shall be capable of meeting the relevant electrical requirements of this section.

(10) All repaired sections of insulation shall be retested in the same manner as originally tested for compliance with paragraph (b)(7) of this section.

(11) The colored composite insulating material removed from or tested on the conductor, from a finished cable, shall be capable of meeting the following performance requirements:

<table>
<thead>
<tr>
<th>Property</th>
<th>Composite insulation</th>
</tr>
</thead>
<tbody>

</tbody>
</table>
(12) **Testing procedures.** The procedures for testing the composite insulation samples for compliance with paragraph (b)(11) of this section shall be as follows:

(1) **Tensile strength and ultimate elongation.** Samples of the insulation material, removed from the conductor, shall be tested in accordance with ASTM D 2833–82(1989), except that the speed of jaw separation shall be 50 millimeters/minute (50 mm/min) (2 inches/minute (2 in./min)).

*Note:* Quality assurance testing at a jaw separation speed of 500 mm/min (20 in./min) is permissible. Failures at this rate shall be retested at the 50 mm/min (2 in./min) rate to determine specification compliance.

(ii) **Cold bend.** Samples of the insulation material on the conductor shall be tested in accordance with ASTM D 4565–90a with a crosshead speed of 50 mm/min (2 in./min).

(v) **Compression.** Samples of the insulation material on the conductor shall be tested in accordance with ASTM D 4565–90a with a crosshead speed of 50 mm/min (2 in./min) (50 mm/min (2 in./min)).

(13) Other methods of testing may be employed if acceptable to RUS.

(c) **Identification of pairs and twisting of pairs.** (1) The PVC skin shall be colored to identify:

(i) The tip and ring conductor of each pair; and

(ii) Each pair in the completed cable.

(2) The colors used to provide identification of the tip and ring conductor of each pair shall be as shown in the following table:

<table>

</tbody>
</table>

(3) **Standards of color.** The colors of the insulated conductors supplied in accordance with this section are specified in terms of the Munsell Color System (ASTM D 1535–89) and shall comply with the “Table of Wire and Cable Limit Chips” as defined in ANSI/EIA–309–A–84. (Visual color standards meeting these requirements may be obtained directly from the Munsell Color Company, Inc., 2441 North Calvert Street, Baltimore, Maryland 21218).

(4) **Positive identification of the tip and ring conductors of each pair by marking each conductor of a pair with the color of its mate is permissible.** The method of marking shall be accepted by RUS prior to its use.

(5) **Other methods of providing positive identification of the tip and ring conductors of each pair may be employed if accepted by RUS prior to its use.**

(6) The insulated conductors shall be twisted into pairs.

(7) **In order to provide sufficiently high crosstalk isolation, the pair twists shall be designed to enable the cable to meet the capacitance unbalance and the crosstalk loss requirements of paragraphs (h)(2), (h)(3), and (h)(4) of this section.**

(8) **The average length of pair twists in any pair in the finished cable, when measured on any 3 meter (m) (10 foot (ft)) length, shall not exceed 152 mm (6 in.).**

(d) **Forming of the cable core.** (1) Twisted pairs shall be assembled in such a way as to form a substantially cylindrical group.
(2) When desired for lay-up reasons, the basic group may be divided into two or more subgroups called units.

(3) Each group, or unit in a particular group, shall be enclosed in bindings of the colors indicated for its particular pair count. The pair count, indicated by the color of insulation, shall be consecutive as indicated in paragraph (d) of this section through units in a group.

(4) Threads or tapes used as binders shall be nonhygroscopic and nonwicking. The threads shall consist of a suitable number of ends of each color arranged as color bands. When tapes are used as binders, they shall be colored. Binders shall be applied with a lay of not more than 100 mm (4 in.). The colored binders shall be readily recognizable as the basic intended color and shall be distinguishable from all other colors.

(5) The colors of the bindings and their significance with respect to pair count shall be as shown in the following table:

<table>

</tbody>
</table>

(6) The use of the white unit binder in cables of 100 pair or less is optional.

(7) When desired for manufacturing reasons, two or more 25 pair groups may be bound together with nonhygroscopic and nonwicking threads or tapes into super-units. The group binders and the super-unit binders shall be colored such that the combination of the two binders shall positively identify each 25 pair group from every other 25 pair group in the cable.

(8) Super-unit binders shall be of the colors shown in the following table:

<table>
<thead>
<tr>
<th>Super-Unit Binder Colors</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pair No.</td>
</tr>
<tr>
<td>1–600</td>

<tr>
<td>601–1200</td>
</tr>
</tbody>
</table>

(e) Core wrap. (1) The core shall be completely covered with a layer of nonhygroscopic and nonwicking dielectric material. The core wrap shall be applied with an overlap.

(2) The core wrap shall provide a sufficient heat barrier to prevent visible evidence of conductor insulation deformation or adhesion between conductors, caused by adverse heat transfer during the jacketing operation.

(3) Engineering Information: If required for manufacturing reasons, white or uncolored binders of nonhygroscopic and nonwicking material may be applied over the core and/or core wrap.

(f) Shield. (1) An aluminum shield, plastic coated on one side, shall be applied longitudinally over the core wrap.

(2) The shield may be applied over the core wrap with or without corrugations (smooth) and shall be bonded to the outer jacket.

(3) The shield overlap shall be a minimum of 3 mm (0.125 in.) for cables with core diameters of 15 mm (0.625 in.) or less and a minimum of 6 mm (0.25 in.) for cables with core diameters greater than 15 mm (0.625 in.). The core diameter is defined as the diameter under the core wrap and binding.

(4) General requirements for application of the shielding material shall be as follows:

(i) Successive lengths of shielding tapes may be joined during the manufacturing process by means of cold weld, electric weld, soldering with a nonacid flux, or other acceptable means;

(ii) The metal shield with the plastic coating shall have the coating removed prior to joining the metal ends together. After joining, the plastic coating shall be restored without voids using good manufacturing techniques;

(iii) The shields of each length of cable shall be tested for continuity. A
§ 1755.870

7 CFR Ch. XVII (1–1–08 Edition)

one meter (3 ft) section of shield containing a factory joint shall exhibit not more than 110 percent of the resistance of a shield of equal length without a joint;

(iv) The breaking strength of any section of a shield tape containing a factory joint shall not be less than 80 percent of the breaking strength of an adjacent section of the shield of equal length without a joint;

(v) The reduction in thickness of the shielding material due to the corrugating or application process shall be kept to a minimum and shall not exceed 10 percent at any spot; and

(vi) The shielding material shall be applied in such a manner as to enable the cable to pass the bend test as specified in paragraph (1)(v) of this section.

(5) The dimensions of the uncoated aluminum tape shall be 0.2030±0.0254 mm (0.0080±0.0010 in.).

(6) The aluminum tape shall conform to either Alloy AA–1100–0, AA–1145–0, or AA–1235–0 as covered in the latest edition of Aluminum Standards and Data, issued by the Aluminum Association, except that requirements for tensile strength are waived.

(7) The single-sided plastic coated aluminum shield tape shall conform to the requirements of ASTM B 736–92a, Type I Coating, Class 1 or 2, or Type II Coating, Class 1. The minimum thickness of the Type I Coating shall be 0.038 mm (0.0015 in.). The minimum thickness of the Type II Coating shall be 0.008 mm (0.0003 in.).

(8) The plastic coated aluminum shield shall be tested for resistance to water migration by immersing a one meter (3 ft) length of tape under a one meter (3 ft) head of water containing a soluble dye plus 0.25 percent (%) wetting agent.

(i) After a minimum of 5 minutes, no dye shall appear between the interface of the shield tape and the plastic coating.

(ii) The actual test method shall be acceptable to RUS.

(9) The bond between the plastic coated shield and the jacket shall conform to the following requirements:

(i) Prepare test strips approximately 200 mm (8 in.) in length. Slit the jacket and shield longitudinally to produce 4 strips evenly spaced and centered in 4 quadrants on the jacket circumference. One of the strips shall be centered over the overlapped edge of the shielding tape. The strips shall be 13 mm (0.5 in.) wide. For cable diameters less than 19 mm (0.75 in.) make two strips evenly spaced.

(ii) Separate the shield and jacket for a sufficient distance to allow the shield and jacket to be fitted in the upper and lower jaws of a tensile machine. Record the maximum force required to separate the shield and jacket to the nearest newton (pound-force). Repeat this action for each test strip.

(iii) The force required to separate the joint from the shield shall not be less than 9 N (2 lbf) for any individual strip when tested in accordance with paragraph (f)(9)(ii) of this section. The average force for all strips of any cable shall not be less than 18 N (4 lbf).

(g) Cable jacket and extraneous material.

(1) The jacket shall provide the cable with a tough, flexible, protective covering which can withstand stresses reasonably expected in normal installation and service.

(2) The jacket shall be free from holes, splits, blisters, or other imperfections and shall be as smooth and concentric as is consistent with the best commercial practice.

(3) The raw material used for the cable jacket shall be one of the following four types:

(i) Type PVC–55554EOXO in accordance with ASTM D 2287–81(1988);

(ii) Type PVC–65554EOXO in accordance with ASTM D 2287–81(1988);

(iii) Type PVC–55556EOXO in accordance with ASTM D 2287–81(1988); or

(iv) Type PVC–66554EOXO in accordance with ASTM D 2287–81(1988).

(4) The jacketing material removed from or tested on the cable shall be capable of meeting the following performance requirements:

<table>
<thead>
<tr>
<th>Property</th>

</table>
(5) Testing procedures. The procedures for testing the jacket samples for compliance with paragraph (g)(4) of this section shall be as follows:

(i) Tensile strength and ultimate elongation-unaged. The test shall be performed in accordance with ASTM D 2833–82(1989), using a jaw separation speed of 50 mm/min (2 in./min).

NOTE: Quality assurance testing at a jaw separation speed of 500 mm/min (20 in./min) is permissible. Failures at this rate shall be retested at the 50 mm/min (2 in./min) rate to determine specification compliance.

(ii) Tensile strength and ultimate elongation-aged. The test shall be performed in accordance with paragraph (g)(5)(i) of this section after being aged for 7 days at a temperature of 100±1 °C in a circulating air oven conforming to ASTM D 2436–85.

(iii) Impact. The test shall be performed in accordance with ASTM D 4565–90a using an impact force of 4 newton-meter (3 pound force-foot) at a temperature of −10±1 °C. The cylinder shall strike the sample at the shield overlap. A crack or split in the jacket constitutes failure.

(6) Jacket thickness. The nominal jacket thickness shall be as specified in the following table. The test method used shall be either the End Sample Method (paragraph (g)(6)(i) of this section) or the Continuous Uniformity Thickness Gauge Method (paragraph (g)(6)(ii) of this section):

<table>
<thead>
<tr>
<th>No. of pairs</th>
<th>Nominal jacket thickness mm (in.)</th>
</tr>
</thead>
<tbody>
<tr>
<td>25 or less</td>
<td>1.4 (0.055)</td>
</tr>
<tr>
<td>50</td>
<td>1.5 (0.060)</td>

<tr>
<td>800 and over</td>
<td>3.3 (0.130)</td>
</tr>
</tbody>
</table>

(i) End sample method. The jacket shall be capable of meeting the following requirements:

Minimum Average Thickness—90% of nominal thickness
Minimum Thickness—70% of nominal thickness

(ii) Continuous uniformity thickness gauge method. (A) The jacket shall be capable of meeting the following requirements:

Minimum Average Thickness—90% of nominal thickness
Minimum (Min.) Thickness—70% of nominal thickness
Maximum (Max.) Eccentricity—55%
Eccentricity=Max. Thickness−Min. Thickness/Average Thickness×100

(B) Maximum and minimum thickness values. The maximum and minimum thickness values shall be based on the average of each axial section.

(7) The color of the jacket shall be either black or dark grey in conformance with the Munsell Color System specified in ASTM D 1535–89.

(8) There shall be no water or other contaminants in the finished cable which would have a detrimental effect on its performance or its useful life.

(h) Electrical requirements—(1) Mutual capacitance and conductance. (i) The average mutual capacitance (corrected for length) of all pairs in any reel shall not exceed the following when tested in accordance with ASTM D 4566–90 at a frequency of 1.0±0.1 kilohertz (kHz) and a temperature of 23±3 °C:

The capacitance unbalance as measured on the completed cable shall not exceed 3.7 micromhos/kilometer (micromhos/km) (6.0 micromhos/mile) when tested in accordance with ASTM D 4566–90 at a frequency of 1.0±0.1 kHz and a temperature of 23±3 °C.

(ii) The root mean square (rms) deviation of the mutual capacitance of all pairs from the average mutual capacitance of that reel shall not exceed 3.0 % when calculated in accordance with ASTM D 4566–90.

(iii) The mutual conductance (corrected for length and gauge) of any pair shall not exceed 3.7 2 ±4 micromhos/kilometer (micromhos/mile) when tested in accordance with ASTM D 4566–90 at a frequency of 1.0±0.1 kHz and a temperature of 23±3 °C.

(2) Pair-to-pair capacitance unbalance. The capacitance unbalance as measured on the completed cable shall not exceed 45.3 picofarad/kilometer (pF/km) (25 picofarad/1000 ft (pF/1000 ft)) when tested in accordance with ASTM D 4566–90 at a frequency of 1.0±0.1 kHz and a temperature of 23±3 °C.

(3) Pair-to-ground capacitance unbalance. (i) The average capacitance unbalance as measured on the completed
§ 1755.870

7 CFR Ch. XVII (1–1–08 Edition)

cable shall not exceed 574 pF/km (175 pF/1000 ft) when tested in accordance with ASTM D 4566–90 at a frequency of 1±0.1 kHz and a temperature of 23±3 °C.

(ii) When measuring pair-to-ground capacitance unbalance all pairs except the pair under test are grounded to the shield except when measuring cable containing super-units in which case all other pairs in the same super-unit shall be grounded to the shield.

(iii) Pair-to-ground capacitance unbalance may vary directly with the length of the cable.

(4) Crosstalk loss. (i) The rms output-to-output far-end crosstalk loss (FEXT) measured on the completed cable in accordance with ASTM D 4566–90 at a test frequency of 150 kHz shall not be less than 68 decibel/kilometer (dB/km) (73 decibel/1000 ft (dB/1000 ft)). The rms calculation shall be based on the combined total of all adjacent and alternate pair combinations within the same layer and center to first layer pair combinations.

(ii) The FEXT crosstalk loss between any pair combination of a cable shall not be less than 58 dB/km (63 dB/1000 ft) at a frequency of 150 kHz. If the loss $K_o$ at a frequency $F_o$ for length $L_o$ is known, then $K_x$ can be determined for any other frequency $F_x$ or length $L_x$ by:

$$FEXT \ loss \ (K_x) = K_o - 20 \log_{10} \frac{F_x}{F_o} - 10 \log_{10} \frac{L_x}{L_o}$$

(iii) The near-end crosstalk loss (NEXT) as measured within and between units of a completed cable in accordance with ASTM D 4566–90 at a frequency of 772 kHz shall not be less than the following mean minus sigma (M-S) crosstalk requirement for any unit within the cable:

<table>
<thead>
<tr>
<th>Unit size</th>
<th>M-S decibel (dB)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Within Unit:</td>
<td></td>
</tr>
<tr>
<td>12 and 13 pairs</td>
<td>56</td>
</tr>
<tr>
<td>18 and 25 pairs</td>
<td>60</td>
</tr>
<tr>
<td>Between Unit:</td>
<td></td>
</tr>
<tr>
<td>Adjacent 13 pairs</td>
<td>65</td>
</tr>
<tr>
<td>Adjacent 25 pairs</td>
<td>66</td>
</tr>
<tr>
<td>Nonadjacent (all)</td>
<td>81</td>
</tr>
</tbody>
</table>

Where M-S is the Mean near-end coupling loss based on the combined total of all pair combinations, less one Standard Deviation, Sigma, of the mean value.

(5) Insulation resistance. Each insulated conductor in each length of completed cable, when measured with all other insulated conductors and the shield grounded, shall have an insulation resistance of not less than 152 megohm-kilometer (500 megohm-mile) at 20±1 °C. The measurement shall be made in accordance with the procedures of ASTM D 4566–90.

(6) High voltage test. (i) In each length of completed cable, the dielectric strength of the insulation between conductors shall be tested in accordance with ASTM D 4566–90 and shall withstand, for 3 seconds, a direct current (dc) potential whose value is not less than:

(A) 3.6 kilovolts for 22-gauge conductors; or
(B) 3.0 kilovolts for 24-gauge conductors.

(ii) In each length of completed cable, the dielectric strength between the shield and all conductors in the core shall be tested in accordance with ASTM D 4566–90 and shall withstand, for 3 seconds, a dc potential whose value is not less than 10 kilovolts.

(7) Conductor resistance. The dc resistance of any conductor shall be measured in the completed cable in accordance with ASTM D 4566–90 and shall not exceed the following values when measured at or corrected to a temperature of 20±1 °C:

<table>
<thead>
<tr>
<th>AWG</th>
<th>Maximum resistance</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>ohms/kilometer</td>
</tr>
<tr>
<td>22</td>
<td>60.7</td>
</tr>
<tr>
<td>24</td>
<td>95.1</td>
</tr>
</tbody>
</table>

(8) Resistance unbalance. (i) The difference in dc resistance between the
two conductors of a pair in the completed cable shall not exceed the values listed in this paragraph when measured in accordance with the procedures of ASTM D 4566-90:

<table>
<thead>
<tr>
<th>AWG</th>
<th>Resistance unbalance</th>
<th>Maximum for any reel</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Average percent</td>
<td>Individual pair percent</td>
</tr>
<tr>
<td>22</td>
<td>1.5</td>
<td>4.0</td>
</tr>
<tr>
<td>24</td>
<td>1.5</td>
<td>5.0</td>
</tr>
</tbody>
</table>

(ii) The resistance unbalance between tip and ring conductors shall be random with respect to the direction of unbalance. That is, the resistance of the tip conductors shall not be consistently higher with respect to the ring conductors and vice versa.

(9) Electrical variations. (i) Pairs in each length of cable having either a ground, cross, short, or open circuit condition shall not be permitted.

(ii) The maximum number of pairs in a cable which may vary as specified in paragraph (h)(9)(iii) of this section from the electrical parameters given in this section are listed in this paragraph. These pairs may be excluded from the arithmetic calculation:

<table>
<thead>
<tr>
<th>Nominal pair count</th>
<th>Maximum No. of pairs with allowable electrical variation</th>
</tr>
</thead>
<tbody>
<tr>
<td>12–100</td>
<td>1</td>
</tr>
<tr>
<td>101–300</td>
<td>2</td>
</tr>
<tr>
<td>301–400</td>
<td>3</td>
</tr>
<tr>
<td>401–600</td>
<td>4</td>
</tr>
<tr>
<td>601 and above</td>
<td>6</td>
</tr>
</tbody>
</table>

(iii) Parameter variations—(A) Capacitance unbalance-to-ground. If the cable fails either the maximum individual pair or average capacitance unbalance-to-ground requirement and all individual pairs are 3280 pF/km (1000 pF/1000 ft) or less the number of pairs specified in paragraph (h)(9)(ii) of this section may be eliminated from the average and maximum individual calculations.

(B) Resistance unbalance. Individual pair of not more than 7 percent for all gauges.

(C) Far end crosstalk. Individual pair combination of not less than 52 dB/km (37 dB/1000 ft).

Notes: RUS recognizes that in large pair count cables (600 pair and above) a cross, short, or open circuit condition occasionally may develop in a pair which does not affect the performance of the other cable pairs. In these circumstances rejection of the entire cable may be economically unsound or repairs may be impractical. In such circumstances the manufacturer may desire to negotiate with the customer for acceptance of the cable. No more than 0.5 percent of the pairs may be involved.

(i) Mechanical requirements—(1) Cable cold bend test. The completed cable shall be capable of meeting the requirements of ASTM D 4566-90a after conditioning at -20 ± 2 °C except the mandrel diameters shall be as specified below:

<table>
<thead>
<tr>
<th>Cable outside diameter</th>
<th>Mandrel diameter</th>
</tr>
</thead>
<tbody>
<tr>
<td>&lt;40 mm (1.5 in.)</td>
<td>15x</td>
</tr>
<tr>
<td>≥40 mm (1.5 in.)</td>
<td>20x</td>
</tr>
</tbody>
</table>

(2) Cable flame test. The completed cable shall be capable of meeting a maximum flame height of 3.7 m (12.0 ft) when tested in accordance with Underwriters Laboratories (UL) 1666 dated January 22, 1991.

(3) Cable listing. All cables manufactured to the specification of this section at a minimum shall be listed as Communication Riser Cable (Type CMR) in accordance with Sections 800-50 and 800-51(b) of the 1993 National Electrical Code.

(j) Sheath slitting cord (optional). (1) Sheath slitting cords may be used in the cable structure at the option of the manufacturer.

(2) When a sheath slitting cord is used it shall be nonhygroscopic and nonwicking, continuous throughout a length of cable, and of sufficient strength to open the sheath without breaking the cord.

(3) Sheath slitting cords shall be capable of consistently slitting the jacket and/or shield for a continuous length of 0.6 m (2 ft) when tested in accordance with the procedure specified in appendix B of this section.

(k) Identification marker and length marker. (1) Each length of cable shall be permanently identified as to manufacturer and year of manufacture.

(2) The number of conductor pairs and their gauge size shall be marked on the jacket.

(3) The marking shall be printed on the jacket at regular intervals of not more than 1.5 m (5 ft).
(4) An alternative method of marking may be used if accepted by RUS prior to its use.

(5) The completed cable shall have sequentially numbered length markers in FEET OR METERS at regular intervals of not more than 1.5 m (5 ft) along the outside of the jacket.

(6) The method of length marking shall be such that for any single length of cable, continuous sequential numbering shall be employed.

(7) The numbers shall be dimensioned and spaced to produce good legibility and shall be approximately 3 mm (0.125 in.) in height. An occasional illegible marking is permissible if there is a legible marking located not more than 1.5 m (5 ft) from it.

(8) The method of marking shall be by means of suitable surface markings producing a clear, distinguishable, contrasting marking acceptable to RUS. Where direct or transverse printing is employed, the characters should be indented to produce greater durability of marking. Any other method of length marking shall be acceptable to RUS as producing a marker suitable for the field, size, shape and spacing of numbers, durability, and overall legibility of the marker shall be considered in acceptance of the method.

(9) The accuracy of the length marking shall be such that the actual length of any cable section is never less than the length indicated by the marking and never more than one percent greater than the length indicated by the marking.

(10) The color of the initial marking for a black colored jacket shall be either white or silver. The color of the initial marking for a dark grey colored jacket shall be either red or black. If the initial marking of the black colored jacket fails to meet the requirements of the preceding paragraphs, it will be permissible to either remove the defective marking and re-mark with the white or silver color or leave the defective marking on the cable and re-mark with yellow. No further re-marking is permitted. Any re-marking shall be on a different portion of the cable circumference than any existing marking when possible and have a numbering sequence differing from any other existing marking by at least 5,000.

(11) Any reel of cable which contains more than one set of sequential markings shall be labeled to indicate the color and sequence of marking to be used. The labeling shall be applied to the reel and also to the cable.

(l) Preconnectorized cable (optional).

(1) At the option of the manufacturer and upon request by the purchaser, cables 100 pairs and larger may be factory terminated in 25 pair splicing modules.

(2) The splicing modules shall meet the requirements of RUS Bulletin 345-54, PE-52, RUS Specification for Telephone Cable Splicing Connectors (Incorporated by Reference at §1755.97), and be accepted by RUS prior to their use.

(m) Acceptance testing and extent of testing. (1) The tests described in appendix A of this section are intended for acceptance of cable designs and major modifications of accepted designs. RUS decides what constitutes a major modification. These tests are intended to show the inherent capability of the manufacturer to produce cable products having long life and stability.

(2) For initial acceptance, the manufacturer shall submit:

(i) An original signature certification that the product fully complies with each section of the specification;

(ii) Qualification Test Data, per appendix A of this section;

(iii) To periodic plant inspections;

(iv) A certification that the product does or does not comply with the domestic origin manufacturing provisions of the “Buy American” requirements of the Rural Electrification Act of 1938 (7 U.S.C. 901 et seq.);

(v) Written user testimonials concerning performance of the product; and

(vi) Other nonproprietary data deemed necessary by the Chief, Outside Plant Branch (Telephone).

(3) For requalification acceptance, the manufacturer shall submit an original signature certification that
the product fully complies with each section of the specification, excluding the Qualification Section, and a certification that the product does or does not comply with the domestic origin manufacturing provisions of the “Buy American” requirements of the Rural Electrification Act of 1938 (7 U.S.C. 901 et seq.) for acceptance by June 30 every three years. The required data and certification shall have been gathered within 90 days of the submission.

(4) Initial and requalification acceptance requests should be addressed to: Chairman, Technical Standards Committee “A” (Telephone), Telecommunications Standards Division, Rural Utilities Service, Washington, DC 20250–1500.

(5) Tests on 100 percent of completed cable. (i) The shield of each length of cable shall be tested for continuity using the procedures of ASTM D 4566–90.

(ii) Dielectric strength between all conductors and the shield shall be tested to determine freedom from grounds in accordance with paragraph (h)(6)(ii) of this section.

(iii) Each conductor in the completed cable shall be tested for continuity using the procedures of ASTM D 4566–90.

(iv) Dielectric strength between conductors shall be tested to ensure freedom from shorts and crosses in accordance with paragraph (h)(6)(i) of this section.

(v) Each conductor in the completed preconnectorized cable shall be tested for continuity.

(vi) Each length of completed preconnectorized cable shall be tested for split pairs.

(vii) The average mutual capacitance shall be measured on all cables. If the average mutual capacitance for the first 100 pairs tested from randomly selected groups is between 50 and 53 nF/km (80 to 85 nF/mile), the remainder of the pairs need not to be tested on the 100 percent basis. (See paragraph (h)(1) of this section).

(6) Capability tests. Tests on a quality assurance basis shall be made as frequently as is required for each manufacturer to determine and maintain compliance with:

(i) Performance requirements for conductor insulation and jacket material;

(ii) Bonding properties of coated or laminated shielding materials;

(iii) Sequential marking and lettering;

(iv) Capacitance unbalance and crosstalk;

(v) Insulation resistance;

(vi) Conductor resistance and resistance unbalance;

(vii) Cable cold bend and cable flame tests; and

(viii) Mutual conductance.

(n) Summary of records of electrical and physical tests. (1) Each manufacturer shall maintain a suitable summary of records for a period of at least 3 years for all electrical and physical tests required on completed cable by this section as set forth in paragraphs (m)(5) and (m)(6) of this section. The test data for a particular reel shall be in a form that it may be readily available to the purchaser or to RUS upon request.

(2) Measurements and computed values shall be rounded off to the number of places of figures specified for the requirement according to ASTM E 29–90.

(o) Manufacturing irregularities. (1) Repairs to the shield are not permitted in cable supplied to the end user under this section.

(2) No repairs or defects in the jacket are allowed.

(p) Preparation for shipment. (1) The cable shall be shipped on reels unless otherwise specified or agreed to by the purchaser. The diameter of the drum shall be large enough to prevent damage to the cable from reeling or unreeling. The reels shall be substantial and so constructed as to prevent damage to the cable during shipment and handling.

(2) A waterproof corrugated board or other means of protection acceptable to RUS shall be applied to the reel and shall be suitably secured in place to prevent damage to the cable during storage and shipment.

(3) The outer end of the cable shall be securely fastened to the reel head so as to prevent the cable from becoming loose in transit. The inner end of the cable shall be securely fastened in such a way as to make it readily available if required for electrical testing. Spikes,
§ 1755.870
7 CFR Ch. XVII (1–1–08 Edition)

staples, or other fastening devices which penetrate the cable jacket shall not be used. The method of fastening the cable ends shall be accepted by RUS prior to it being used.

(4) Each length of cable shall be wound on a separate reel unless otherwise specified or agreed to by the purchaser.

(5) The arbor hole shall admit a spindle 63 mm (2.5 in.) in diameter without binding. Steel arbor hole liners may be used but shall be acceptable to RUS prior to their use.

(6) Each reel shall be plainly marked to indicate the direction in which it should be rolled to prevent loosening of the cable on the reel.

(7) Each reel shall be stenciled or labeled on either one or both sides with the name of the manufacturer, year of manufacture, actual shipping length, an inner and outer end sequential length marking, description of the cable, reel number and the RUS cable designation:

Cable Designation
CT
Cable Construction
Pair Count
Conductor Gauge
A = Coated Aluminum Shield
P = Preconnectorized Cable
Example: CTAP 100–22
Terminating Cable, Coated Aluminum Shield, Preconnectorized, 100 pairs, 22 AWG.

(8) When preconnectorized cable is shipped, the splicing modules shall be protected to prevent damage during shipment and handling. The protection method shall be acceptable to RUS prior to its use.

(The information collection and record-keeping requirements of this section have been approved by the Office of Management and Budget (OMB) under control number 0572–0059)

APPENDIX A TO §1755.870—QUALIFICATION TEST METHODS

(1) The test procedures described in this appendix are for qualification of initial designs and major modifications of accepted designs. Included in paragraph (V) of this appendix are suggested formats that may be used in submitting test results to RUS.

(II) Sample Selection and Preparation. (1) All testing shall be performed on lengths removed sequentially from the same 25 pair, 22 gauge jacketed cable. This cable shall not have been exposed to temperatures in excess of 38 °C since its initial cool down after sheathing. The lengths specified are minimum lengths and if desirable from a laboratory testing standpoint longer lengths may be used.

(a) Length A shall be 12 ±0.2 meters (40 ±0.5 feet) long. Prepare the test sample by removing the jacket, shield, and core wrap for a sufficient distance on both ends to allow the insulated conductors to be flared out. Remove sufficient conductor insulation so that appropriate electrical test connections can be made at both ends. Coil the sample with a diameter of 15 to 20 times its sheath diameter. Two lengths are required.

(b) Length B shall be 300 millimeters (1 foot) long. Three lengths are required.

(c) Length C shall be 3 meters (10 feet) long and shall be maintained at 23 ±2 °C for the duration of the test. Two lengths are required.

(2) Data Reference Temperature. Unless otherwise specified, all measurements shall be made at 23 ±2 °C.

(III) Environmental Tests—(1) Heat Aging Test—(a) Test Samples. Place one sample each of lengths A and B in an oven or environmental chamber. The ends of sample A shall exit from the chamber or oven for electrical tests. Securely seal the oven exit holes.

(b) Sequence of Tests. Sample B referenced in paragraph (III)(1)(a) of this appendix shall be subjected to the insulation compression test outlined in paragraph (III)(2) of this appendix.

(c) Initial Measurements. (i) Calculate the parameters given in paragraph (V) of this appendix or on other easily readable formats.

(d) Heat Conditioning. (i) Immediately after completing the initial measurements, condition the sample for 14 days at a temperature of 65 ±2 °C.

(ii) At the end of this period. Measure and calculate the parameters given in paragraph (III)(1)(c) of this appendix. Record on suggested formats in paragraph (V) of this appendix or on other easily readable formats.

(e) Overall Electrical Deviation. (i) Calculate the percent change in all average parameters between the final parameters after conditioning with the initial parameters in paragraph (III)(1)(c) of this appendix.

(ii) The stability of the electrical parameters after completion of this test shall be within the following prescribed limits:
(A) Capacitance. The average mutual capacitance shall be within 10 percent of its original value;
(B) The change in average mutual capacitance shall be less than 10 percent over the frequency range of 1 to 150 kilohertz; and
(C) Conductance. The average mutual conductance shall not exceed 3.7 micromhos/kilometer (6 micromhos/mile) at a frequency of 1 kilohertz.

(2) Insulation Compression Test—(a) Test Sample B. Remove jacket, shield, and core wrap being careful not to damage the conductor insulation. Remove one pair from the core and carefully separate and straighten the insulated conductors. Retwist the two insulated conductors together under sufficient tension to form 10 evenly spaced 360 degree twists in a length of 100 millimeters (4 inches).

(b) Sample Testing. Center the mid 50 millimeters (2 inches) of the twisted pair between two smooth rigid parallel metal plates measuring 50 millimeters (2 inches) in length or diameter. Apply a 1.5 volt direct current potential between the conductors, using a light buzzer to indicate electrical contact between the conductors. Apply a constant load of 67 newtons (15 pound-force) on the sample for one minute and monitor for evidence of contact between the conductors. Record results on suggested formats in paragraph (V) of this appendix or on other easily readable formats.

(3) Temperature Cycling. (a) Repeat paragraphs (III)(1)(a) through (III)(1)(c)(ii) of this appendix for a separate set of samples A and B which have not been subjected to prior environmental conditioning.

(b) Immediately after completing the measurements, subject the test samples to 10 cycles of temperature between −40 °C and +60 °C. The test samples shall be held at each temperature extreme for a minimum of 1.5 hours during each cycle of temperature. The air within the temperature cycling chamber shall be circulated throughout the duration of the cycling.

(c) Repeat paragraphs (III)(1)(d)(i) through (III)(2)(b) of this appendix.

(IV) Control Sample—(1) Test Samples. One length of sample B shall have been maintained at 23 ± 3 °C for at least 48 hours before the testing.

(2) Repeat paragraphs (III)(2) through (III)(2)(b) of this appendix.

(3) Surge Test. (a) One length of sample C shall be used to measure the breakdown between conductors while the other length of C shall be used to measure core to shield breakdown.

(b) The samples shall be capable of withstanding, without damage, a single surge voltage of 20 kilovolts peak between conductors, and 35 kilovolts peak between conductors and the shield as hereinafter described. The surge voltage shall be developed from a capacitor discharge through a forming resistor connected in parallel with the dielectric of the test sample. The surge generator constants shall be such as to produce a surge of 1.5 × 40 microseconds wave shape.

(c) The shape of the generated wave shall be determined at a reduced voltage by connecting an oscilloscope across the forming resistor with the cable sample connected in parallel with the forming resistor. The capacitor bank is charged to the test voltage and then discharged through the forming resistor and test sample. The test sample shall be considered to have passed the test if there is no distinct change in the wave shape obtained with the initial reduced voltage compared to that obtained after the application of the test voltage.

(V) The following suggested formats may be used in submitting the test results to RUS:

Environmental Conditioning

Rural Utilities Service, USDA

§ 1755.890

of 38 °C since its initial cool down after sheathing.

(III) Test procedure. (1) Using a suitable tool, expose enough of the sheath slitting cord to permit grasping with needle nose pliers.

(2) The prepared test specimens shall be maintained at a temperature of 23 ± 1 °C for at least 4 hours immediately prior to and during the test.

(3) Wrap the sheath slitting cord around the plier jaws to ensure a good grip.

(4) Grasp and hold the cable in a convenient position while gently and firmly pulling the sheath slitting cord longitudinally in the direction away from the cable end. The angle of pull may vary to any convenient and functional degree. A small starting notch is permissible.

(5) The sheath slitting cord is considered acceptable if the cord can slit the jacket and/or shield for a continuous length of 0.6 m (2 ft) without breaking the cord.

§§ 1755.871–1755.889 [Reserved]

§ 1755.890 RUS specification for filled telephone cables with expanded insulation.

(a) Scope. (1) This section covers the requirements for filled telephone cables intended for direct burial installation either by trenching or by direct plowing, for underground application by placement in a duct, or for aerial installation by attachment to a support strand.

(i) The conductors are solid copper, individually insulated with an extruded cellular insulating compound which may be either totally expanded or expanded with a solid skin coating.

(ii) The insulated conductors are twisted into pairs which are then stranded or oscillated to form a cylindrical core.

(iii) For high frequency applications, the cable core may be separated into compartments with screening shields.

(iv) A moisture resistant filling compound is applied to the stranded conductors completely covering the insulated conductors and filling the interstices between pairs and units.

(v) The cable structure is completed by the application of suitable core wrapping material, a flooding compound, a shield or a shield/armor, and an overall plastic jacket.

(2) The number of pairs and gauge size of conductors which are used within the RUS program are provided in the following table:

<table>

NOTE: Cables larger in pair sizes than those shown in this table must meet all requirements of this section.

(3) Screened cable, when specified, must meet all requirements of this section. The pair sizes of screened cables used within the RUS program are referenced in paragraph (e)(2)(i) of this section.

(4) All cables sold to RUS borrowers for projects involving RUS loan funds under this section must be accepted by RUS Technical Standards Committee “A” (Telephone). For cables manufactured to the specification of this section, all design changes to an accepted design must be submitted for acceptance. RUS will be the sole authority on what constitutes a design change.

(5) Materials, manufacturing techniques, or cable designs not specifically addressed by this section may be allowed if accepted by RUS. Justification for acceptance of modified materials, manufacturing techniques, or cable designs must be provided to substantiate product utility and long-term stability and endurance.

(6) The American National Standard Institute/Insulated Cable Engineers Association, Inc. (ANSI/ICEA) S-84–608–1988, Standard For Telecommunications Cable, Filled, Polyolefin Insulated, Copper Conductor Technical Requirements referenced throughout this section is incorporated by reference by
§ 1755.890

RUS. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies of ANSI/ICEA S-84–608–1988 are available for inspection during normal business hours at RUS, room 2845, U.S. Department of Agriculture, Washington, DC 20250, or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html. Copies are available from ICEA, P. O. Box 440, South Yarmouth, MA 02664, telephone number (508) 394–4424.

(b) Conductors and conductor insulation.

(1) The gauge sizes of the copper conductors covered by this section must be 19, 22, 24, and 26 American Wire Gauge (AWG).

(2) Each conductor must comply with the requirements specified in ANSI/ICEA S-84–608–1988, paragraph 2.1.

(3) Factory joints made in conductors during the manufacturing process must comply with the requirements specified in ANSI/ICEA S-84–608–1988, paragraph 2.2.

(4) The raw materials used for conductor insulation must comply with the requirements specified in ANSI/ICEA S-84–608–1988, paragraphs 3.1 through 3.1.3.

(5) The finished conductor insulation must comply with the requirements specified in ANSI/ICEA S-84–608–1988, paragraphs 3.2.2, 3.2.3, and 3.3.

(6) Insulated conductor must not have an overall diameter greater than 2 millimeters (mm) (0.081 inch (in.)).

(7) A permissible overall performance level of faults in conductor insulation must average not greater than one fault per 12,000 conductor meters (40,000 conductor feet) for each gauge of conductor.

(i) All insulated conductors must be continuously tested for insulation faults during the twinning operation with a method of testing acceptable to RUS. The length count and number of faults must be recorded. The information must be retained for a period of 6 months and be available for review by RUS when requested.

(ii) The voltages for determining compliance with the requirements of this section are as follows:

<table>
<thead>
<tr>
<th>AWG</th>
<th>Direct Current Voltages (kilo-volts)</th>
</tr>
</thead>
<tbody>
<tr>
<td>19</td>
<td>4.5</td>
</tr>
<tr>
<td>22</td>
<td>3.6</td>
</tr>
<tr>
<td>24</td>
<td>3.0</td>
</tr>
<tr>
<td>26</td>
<td>2.4</td>
</tr>
</tbody>
</table>

(8) Repairs to the conductor insulation during manufacture are permissible. The method of repair must be accepted by RUS prior to its use. The repaired insulation must be capable of meeting the relevant electrical requirements of this section.
(9) All repaired sections of insulation must be retested in the same manner as originally tested for compliance with paragraph (b)(7) of this section.

(10) The colored insulating material removed from or tested on the conductor, from a finished cable, must meet the performance requirements specified in ANSI/ICEA S-84–608–1988, paragraphs 3.4.1 through 3.4.6.

(c) Identification of pairs and twisting of pairs. (1) The insulation must be colored to identify:

(i) The tip and ring conductor of each pair; and

(ii) Each pair in the completed cable.

(2) The colors to be used in the pairs in the 25 pair group, together with the pair numbers must be in accordance with the table specified in ANSI/ICEA S-84–608–1988, paragraph 3.5.

(3) Positive identification of the tip and ring conductors of each pair by marking each conductor of a pair with the color of its mate is permissible. The method of marking must be accepted by RUS prior to its use.

(4) Other methods of providing positive identification of the tip and ring conductors of each pair may be employed if accepted by RUS prior to its use.

(5) The insulated conductors must be twisted into pairs.

(6) In order to provide sufficiently high crosstalk isolation, the pair twists must be designed to enable the cable to meet the capacitance unbalance and crosstalk loss requirements of paragraphs (k)(5), (k)(6), and (k)(8) this section.

(7) The average length of pair twists in any pair in the finished cable, when measured on any 3 meter (10 foot) length, must not exceed the requirement specified in ANSI/ICEA S-84–608–1988, paragraph 3.5.

(d) Forming of the cable core. (1) Twisted pairs must be assembled in such a way as to form a substantially cylindrical group.

(2) When desired for lay-up reasons, the basic group may be divided into two or more subgroups called units.

(3) Each group, or unit in a particular group, must be enclosed in bindings of the colors indicated for its particular pair count. The pair count, indicated by the colors of insulation, must be consecutive as indicated in paragraph (d)(6) of this section through units in a group.

(4) The filling compound must be applied to the cable core in such a way as to provide as near a completely filled core as is commercially practical.

(5) Threads and tapes used as binders must comply with the requirements specified in ANSI/ICEA S-84–608–1988, paragraphs 4.2 and 4.2.1.

(6) The colors of the bindings and their significance with respect to pair count must be as follows:

<table>
<thead>
<tr>
<th>Group No.</th>
<th>Color of Bindings</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>White-Blue</td>

<td>Violet-Brown</td>
</tr>
</tbody>
</table>

(7) The use of the white unit binder in cables of 100 pairs or less is optional.

(8) When desired for manufacturing reasons, two or more 25 pair groups may be bound together with nonhygroscopic and nonwicking threads or tapes into a super-unit. Threads or tapes must meet the requirements specified in paragraph (d)(5) of this section. The group binders and the super-unit binders must be color coded such that the combination of the two binders must positively identify each 25 pair group from every other 25 pair group in the cable. Super-unit binders must be of the color shown in the following table:
Super-Unit Binder Colors

<table>
<thead>
<tr>
<th>Pair Numbers</th>

</tr>
<tr>
<td>4801–5400</td>
<td>Brown</td>
</tr>
<tr>
<td>5401–6000</td>
<td>Slate</td>
</tr>
</tbody>
</table>

(9) Color binders must not be missing for more than 90 meters (300 feet) from any 25 pair group or from any subgroup used as part of a super-unit. At any cable cross-section, no adjacent 25 pair groups and no more than one subgroup of any super-unit may have missing binders. In no case must the total number of missing binders exceed three. Missing super-unit binders must not be permitted for any distance.

(10) Any reel of cable which contains missing binders must be labeled indicating the colors and location of the binders involved. The labeling must be applied to the reel and also to the cable.

(e) Screened cable. (1) Screened cable must be constructed such that a metallic, internal screen(s) must be provided to separate and provide sufficient isolation between the compartments to meet the requirements of this section.

(2) At the option of the user or manufacturer, identified service pairs providing for voice order and fault location may be placed in screened cables.

(i) The number of service pairs provided must be one per twenty-five operating pairs plus two for a cable size up to and including 400 pairs, subject to a minimum of four service pairs. The pair counts for screened cables are as follows:

<table>
<thead>
<tr>
<th>Screened Cable Pair Counts</th>
</tr>
</thead>
<tbody>
<tr>
<td>Carrier Pair Count</td>
</tr>
<tr>
<td>24</td>
</tr>
<tr>
<td>50</td>
</tr>
<tr>

</tr>
<tr>
<td>150</td>
</tr>
<tr>
<td>200</td>
</tr>
<tr>
<td>300</td>
</tr>
<tr>
<td>400</td>
</tr>
</tbody>
</table>

(ii) The service pairs must be equally divided among the compartments. The color sequence must be repeated in each compartment.

(iii) The electrical and physical characteristics of each service pair must meet all the requirements set forth in this section.

(iv) The colors used for the service pairs must be in accordance with the requirements of paragraph (b)(5) of this section. The color code used for the service pairs together with the service pair number are shown in the following table:

<table>
<thead>
<tr>
<th>COLOR CODE FOR SERVICE PAIRS</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
<tr>
<td>9</td>
</tr>
</tbody>
</table>

(3) The screen tape must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraphs 5.1 through 5.4.

(4) The screen tape must be tested for dielectric strength by completely removing the protective coating from one end to be used for grounding purposes.

(i) Using an electrode, over a 30 centimeter (1 foot) length, apply a direct current (dc) voltage at the rate of rise of 500 volts/second until failure.

(ii) No breakdown should occur below 8 kilovolts.

(f) Filling compound. (1) After or during the stranding operation and prior to application of the core wrap, filling compound must be applied to the cable core. The compound must be as nearly colorless as is commercially feasible and consistent with the end product requirements and pair identification.

(2) The filling compound must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraphs 4.4 through 4.4.4.

(3) The individual cable manufacturer must satisfy RUS that the filling compound selected for use is suitable for its intended application. The filling compound must be applied to the cable.
Rural Utilities Service, USDA

§ 1755.890

in such a manner that the cable components will not be degraded.

(g) Core wrap. (1) The core wrap must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 4.3.

(2) If required for manufacturing reasons, white or colored binders of nonhygroscopic and nonwicking material may be applied over the core and/or wrap. When used, binders must meet the requirements specified in paragraph (d)(5) of this section.

(3) Sufficient filling compound must have been applied to the core wrap so that voids or air spaces existing between the core and the inner side of the core wrap are minimized.

(h) Flooding compound. (1) Sufficient flooding compound must be applied on all sheath interfaces so that voids and air spaces in these areas are minimized. When the optional armored design is used, the flooding compound must be applied between the core wrap and shield, between the shield and armor, and between the armor and the jacket so that voids and air spaces in these areas are minimized. The use of floodant over the outer metallic substrate is not required if uniform bonding, per paragraph (1)(7) of this section, is achieved between the plastic-clad metal and the jacket.

(2) The flooding compound must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 4.5 and the jacket slip test requirements of appendix A, paragraph (III)(5) of this section.

(3) The individual cable manufacturer must satisfy RUS that the flooding compound selected for use is acceptable for the application.

(i) Shield and optional armor. (1) A single corrugated shield must be applied longitudinally over the core wrap.

(2) For unarmored cable the shield overlap must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 6.3.2. Core diameter is defined as the diameter under the core wrap and binding.

(3) For cables containing the coated aluminum shield/coated steel armor (CAGS) sheath design, the coated aluminum shield must be applied in accordance with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 6.3.2, Dual Tape Shielding System.

(4) General requirements for application of the shielding material are as follows:

(i) Successive lengths of shielding tapes may be joined during the manufacturing process by means of cold weld, electric weld, soldering with a nonacid flux or other acceptable means.

(ii) Shield splices must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 6.3.3.

(iii) The corrugations and the application process of the coated aluminum and copper bearing shields must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 6.3.1.

(iv) The shielding material must be applied in such a manner as to enable the cable to pass the cold bend test specified in paragraph (1)(3) of this section.

(5) The following is a list of acceptable materials for use as cable shielding. Other types of shielding materials may also be used provided they are accepted by RUS prior to their use.

1 Dimensions of uncoated metal.

(i) The 8-mil aluminum tape must be plastic coated on both sides and must comply with the requirements of ANSI/ICEA S-84-608-1988, paragraph 6.2.2.

(ii) The 5-mil copper tape must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 6.2.3.

(iii) The 10-mil copper tape must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 6.2.4.

(iv) The 6-mil copper clad stainless steel tape must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 6.2.5.
The 5-mil copper clad stainless steel tape must be in the fully annealed condition and must conform to the requirements of American Society for Testing and Materials (ASTM) B 694–86, with a cladding ratio of 16/68/16.

(A) The electrical conductivity of the clad tape must be a minimum of 28 percent of the International Annealed Copper Standard (IACS) when measured per ASTM B 193–87.

(B) The thickness of the clad tape must be nominally 0.13 millimeter (0.005 inch) thick with a minimum thickness of 0.11 millimeter (0.0045 inch).

The 5-mil copper clad alloy steel tape must be in the fully annealed condition and the copper component must conform to the requirements of ASTM B 224–80 and the alloy steel component must conform to the requirements of ASTM A 505–87, with a cladding ratio of 16/68/16.

(A) The electrical conductivity of the copper clad alloy steel tape must comply with the requirement specified in (5)(v)(A) of this section.

(B) The thickness of the copper clad alloy steel tape must comply with the requirements specified in (5)(v)(B) of this section.

The 6-mil and 7-mil 194 copper alloy tapes must comply with the requirements specified in ANSI/ICEA S-84–608–1988, paragraph 6.2.6.

The corrugation extensibility of the coated aluminum shield must comply with the requirements specified in ANSI/ICEA S-84–608–1988, paragraph 6.2.

When the jacket is bonded to the plastic coated steel armor, the bond between the jacket and armor must comply with the requirement specified in ANSI/ICEA-S-84–608–1988, paragraph 7.2.6.

Cable jacket.

(1) The jacket must comply with the requirements specified in ANSI/ICEA S-84–608–1988, paragraph 7.2.

(2) The raw materials used for the cable jacket must comply with the requirements specified in ANSI/ICEA S-84–608–1988, paragraph 7.2.1.

(3) Jacketing material removed from or tested on the cable must meet the performance requirements specified in ANSI/ICEA S-84–608–1988, paragraphs 7.2.3 and 7.2.4.

(4) The thickness of the jacket must comply with the requirements specified in ANSI/ICEA S-84–608–1988, paragraph 7.2.2.

Electrical requirements—(1) Conductor resistance. The direct current resistance of any conductor in a completed cable and the average resistance of all conductors in a Quality Control Lot must comply with the requirements specified in ANSI/ICEA S-84–608–1988, paragraph 8.1.

(2) Resistance unbalance. (i) The direct current resistance unbalance between the two conductors of any pair in a
completed cable and the average resistance unbalance of all pairs in a completed cable must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 8.2.

(ii) The resistance unbalance between tip and ring conductors shall be random with respect to the direction of unbalance. That is, the resistance of the tip conductors shall not be consistently higher with respect to the ring conductors and vice versa.

(3) Mutual capacitance. The average mutual capacitance of all pairs in a completed cable and the individual mutual capacitance of any pair in a completed cable must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 8.3.

(4) Capacitance difference. (i) The capacitance difference for completed cables having 75 pairs or greater must comply with the requirement specified in ANSI/ICEA S-84-608-1988, paragraph 8.4.

(ii) When measuring screened cable, the inner and outer pairs must be selected from both sides of the screen.

(5) Pair-to-pair capacitance unbalance—(i) Pair-to-pair. The capacitance unbalance as measured on the completed cable must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 8.5.

(ii) Screened cable. In cables with 25 pairs or less and within each group of multigroup cables, the pair-to-pair capacitance unbalance between any two pairs in an individual compartment must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 8.5. The pair-to-pair capacitance unbalances to be considered must be:

(A) Between pairs adjacent in a layer in an individual compartment;
(B) Between pairs in centers of 4 pairs or less in an individual compartment; and
(C) Between pairs in adjacent layers in an individual compartment when the number of pairs in the inner (smaller) layer is 6 or less. The center is counted as a layer.

(iii) In cables with 25 pairs or less, the root-mean-square (rms) value is to include all the pair-to-pair unbalances measured for each compartment separately.

(iv) In cables containing more than 25 pairs, the rms value must include the pair-to-pair unbalances in the separate compartments.

(6) Pair-to-ground capacitance unbalance—(i) Pair-to-ground. The capacitance unbalance as measured on the completed cable must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 8.6.

(ii) When measuring pair-to-ground capacitance unbalance all pairs except the pair under test are grounded to the shield and/or shield/armor except when measuring cables containing super units in which case all other pairs in the same super unit must be grounded to the shield.

(iii) The screen tape must be left floating during the test.

(iv) Pair-to-ground capacitance unbalance may vary directly with the length of the cable.

(7) Attenuation. (i) For nonscreened and screened cables, the average attenuation of all pairs on any reel when measured at 150 and 772 kilohertz must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 8.7, Foam and/or Foam-Skin Column.

(ii) For T1C type cables over 12 pairs, the maximum average attenuation of all pairs on any reel must not exceed the values listed below when measured at a frequency of 1576 kilohertz at or corrected to a temperature of 20 ± 1 °C. The test must be conducted in accordance with ASTM D 4566-90.

(8) Crosstalk loss. (i) The equal level far-end power sum crosstalk loss (FEXT) as measured on the completed cable must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 8.8, FEXT Table.

(ii) The near-end power sum crosstalk loss (NEXT) as measured on completed cable must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 8.9, NEXT Table.
(iii) Screened cable. (A) For screened cables the NEXT as measured on the completed cable must comply with the requirements specified in ANSI/ICEA S-84–608–1988, paragraphs 8.9 and 8.9.1.

(B) For T1C screened cable the NEXT as measured on the completed cable must comply with the requirements specified in ANSI/ICEA S-84–608–1988, paragraphs 8.9 and 8.9.2.

(9) Insulation resistance. The insulation resistance of each insulated conductor in a completed cable must comply with the requirement specified in ANSI/ICEA S-84–608–1988, paragraph 8.11.

(10) High voltage test. (i) In each length of completed cable, the insulation between conductors must comply with the requirements specified in ANSI/ICEA S-84–608–1988, paragraph 8.12, Foam and/or Foam-Skin Column.

(ii) In each length of completed cable, the dielectric between the shield and/or armor and conductors in the core must comply with the requirements specified in ANSI/ICEA S-84–608–1988, paragraph 8.13, Single Jacketed, Foam and/or Foam-Skin Column. In screened cable the screen tape must be left floating.

(iii) Screened cable. (A) In each length of completed screened cable, the dielectric between the screen tape and the conductors in the core must comply with the requirement specified in ANSI/ICEA S-84–608–1988, paragraph 8.14.

(B) In this test, the cable shield and/or armor must be left floating.

(11) Electrical variations. (i) Pairs in each length of cable having either a ground, cross, short, or open circuit condition will not be permitted.

(ii) The maximum number of pairs in a cable which may vary as specified in paragraph (k)(11)(ii) of this section from the electrical parameters given in this section are listed below. These pairs may be excluded from the arithmetic calculation.

<table>

NOTE: RUS recognizes that in large pair count cable (600 pair and above) a cross, short, or open circuit condition occasionally may develop in a pair which does not affect the performance of the other cable pairs. In such circumstances rejection of the entire cable may be economically unsound or repairs may be impractical. In such circumstances the manufacturer may desire to negotiate with the customer for acceptance of the cable. No more than 0.5 percent of the pairs may be involved.

(1) Mechanical requirements—(1) Compound flow test. All cables manufactured in accordance with the requirements of this section must be capable of meeting the compound flow test specified in ANSI/ICEA S-84–608–1988, paragraph 9.1 using a test temperature of 80 ± 1°C.

(2) Water penetration test. All cables manufactured in accordance with the requirements of this section must be capable of meeting the water penetration test specified in ANSI/ICEA S-84–608–1988, paragraph 9.2.

(3) Cable cold bend test. All cables manufactured in accordance with the requirements of this section must be capable of meeting the cable cold bend test specified in ANSI/ICEA S-84–608–1988, paragraph 9.3.
(4) Cable impact test. All cables manufactured in accordance with the requirements of this section must be capable of meeting the cable impact test specified in ANSI/ICEA S-84-608-1988, paragraph 9.4.

(5) Jacket notch test (CACSP sheath only). All cables utilizing the coated aluminum/coated steel sheath (CACSP) design manufactured in accordance with the requirements of this section must be capable of meeting the jacket notch test specified in ANSI/ICEA S-84-608-1988, paragraph 9.5.

(6) Cable torsion test (CACSP sheath only). All cables utilizing the coated aluminum/coated steel sheath (CACSP) design manufactured in accordance with the requirements of this section must be capable of meeting the cable torsion test specified in ANSI/ICEA S-84-608-1988, paragraph 9.6.

(m) Sheath slitting cord (optional). (1) Sheath slitting cord may be used in the cable structure at the option of the manufacturer unless specified by the end user.

(2) When a sheath slitting cord is used it must be nonhygroscopic and nonwicking, continuous throughout a length of cable and of sufficient strength to open the sheath without breaking the cord.

(n) Identification marker and length marker. (1) Each length of cable must be identified in accordance with ANSI/ICEA S-84-608-1988, paragraphs 10.1 through 10.1.4. The color of the ink used for the initial outer jacket marking must be either white or silver.

(2) The markings must be printed on the jacket at regular intervals of not more than 0.6 meter (2 feet).

(3) The completed cable must have sequentially numbered length markers in accordance with ANSI/ICEA S-84-608-1988, paragraph 10.1.5. The color of the ink used for the initial outer jacket marking must be either white or silver.

(o) Preconnectorized cable (optional). (1) At the option of the manufacturer and upon request by the purchaser, cables 100 pairs and larger may be factory terminated in 25 pair splicing modules.

(2) The splicing modules must meet the requirements of RUS Bulletin 345–54, PE-52, RUS Specification for Telephone Cable Splicing Connectors (Incorporated by Reference at §1755.97), and be accepted by RUS prior to their use.

(p) Acceptance testing and extent of testing. (1) The tests described in appendix A of this section are intended for acceptance of cable designs and major modifications of accepted designs. What constitutes a major modification is at the discretion of RUS. These tests are intended to show the inherent capability of the manufacturer to produce cable products having long life and stability.

(2) For initial acceptance, the manufacturer must submit:

(i) An original signature certification that the product fully complies with each section of the specification;

(ii) Qualification Test Data, per appendix A of this section;

(iii) To periodic plant inspections;

(iv) A certification that the product does or does not comply with the domestic origin manufacturing provisions of the “Buy American” requirements of the Rural Electrification Act of 1938 (7 U.S.C. 901 et seq.);

(v) Written user testimonials concerning field performance of the product; and

(vi) Other nonproprietary data deemed necessary by the Chief, Outside Plant Branch (Telephone).

(3) For requalification acceptance, the manufacturer must submit an original signature certification that the product fully complies with each section of the specification, excluding the Qualification Section, and a certification that the product does or does not comply with the domestic origin manufacturing provisions of the “Buy American” requirements of the Rural Electrification Act of 1938 (7 U.S.C. 901 et seq.), for acceptance by August 30 of each year. The required data must have been gathered within 90 days of the submission. If the initial acceptance of a product to this specification was within 180 days of August 30, then requalification for that product will not be required for that year.

(4) Initial and requalification acceptance requests should be addressed to:

Chairman, Technical Standards Committee “A” (Telephone), Telecommunications Standard Division, Rural Utilities Service, Washington, DC 20250–1500.
(5) Tests on 100 percent of completed cable. (i) The shield and/or armor of each length of cable must be tested for continuity in accordance with ANSI/ICEA S-84-608-1988, paragraph 8.16.

(ii) The screen tape of each length of screened cable must be tested for continuity in accordance with ANSI/ICEA S-84-608-1988, paragraph 8.16.

(iii) Dielectric strength between conductors and shield and/or armor must be tested to determine freedom from grounds in accordance with paragraph (k)(10)(ii) of this section.

(iv) Dielectric strength between conductors and screen tape must be tested to determine freedom from grounds in each length of completed cable in accordance with paragraph (k)(10)(iii) of this section.

(v) Each conductor in the completed cable must be tested for continuity in accordance with ANSI/ICEA S-84-608-1988, paragraph 8.16.

(vi) Dielectric strength between conductors and screen tape must be tested to determine freedom from shorts and crosses in each length of completed cable in accordance with paragraph (k)(10)(i) of this section.

(vii) Each conductor in the completed preconnectorized cable must be tested for continuity.

(viii) Each length of completed preconnectorized cable must be tested for split pairs.

(ix) The average mutual capacitance must be measured on all cables. If the average mutual capacitance for the first 100 pairs tested from randomly selected groups is between 50 and 53 nanofarads/kilometer (nF/km) (80 and 85 nanofarad/mile), the remainder of the pairs need not be tested on the 100 percent basis (See paragraph (k)(3) of this section).

(6) Capability tests. Tests on a quality assurance basis must be made as frequently as is required for each manufacturer to determine and maintain compliance with:

(i) Performance requirements for conductor insulation, jacketing material, and filling and flooding compounds;

(ii) Bonding properties of coated or laminated shielding and armoring materials and performance requirements for screen tape;

(iii) Sequential marking and lettering;

(iv) Capacitance difference, capacitance unbalance, crosstalk, and attenuation;

(v) Insulation resistance, conductor resistance, and resistance unbalance;

(vi) Cable cold bend and cable impact tests;

(vii) Water penetration and compound flow tests; and

(viii) Jacket notch and cable torsion tests.

(q) Summary of records of electrical and physical tests. (1) Each manufacturer must maintain suitable summary records for a period of at least 3 years of all electrical and physical tests required on completed cable by this section as set forth in paragraphs (p)(5) and (p)(6) of this section. The test data for a particular reel must be in a form that it may be readily available to the purchaser or to RUS upon request.

(2) Measurements and computed values must be rounded off to the number of places or figures specified for the requirement according to ANSI/ICEA S-84-608-1988, paragraph 1.3.

(r) Manufacturing irregularities. (1) Repairs to the shield and/or armor are not permitted in cable supplied to end users under this section.

(2) Minor defects in jackets (defects having a dimension of 3 millimeters (0.125 inch.) or less in any direction) may be repaired by means of heat fusing in accordance with good commercial practices utilizing sheath grade compounds.

(s) Preparation for shipment. (1) The cable must be shipped on reels. The diameter of the drum must be large enough to prevent damage to the cable from reeling or unreeling. The reels must be substantial and so constructed as to prevent damage to the cable during shipment and handling.

(2) The thermal wrap must comply with the requirements of ANSI/ICEA S-84-608-1988, paragraph 10.3. When a thermal reel wrap is supplied, the wrap must be applied to the reel and must be suitably secured in place to minimize thermal exposure to the cable during storage and shipment. The use of the thermal reel wrap as a means of reel protection will be at the option of the

714
manufacturer unless specified by the end user.

(3) The outer end of the cable must be securely fastened to the reel head so as to prevent the cable from becoming loose in transit. The inner end of the cable must be securely fastened in such a way as to make it readily available if required for electrical testing. Spikes, staples, or other fastening devices which penetrate the cable jacket must not be used. The method of fastening the cable ends must be acceptable to RUS and accepted prior to its use.

(4) Each length of cable must be wound on a separate reel unless otherwise specified or agreed to by the purchaser.

(5) The arbor hole must admit a spindle 63 millimeters (2.5 inches) in diameter without binding. Steel arbor hole liners may be used but must be accepted by RUS prior to their use.

(6) Each reel must be plainly marked to indicate the direction in which it should be rolled to prevent loosening of the cable on the reel.

(7) Each reel must be stenciled or labeled on either one or both sides with the information specified in ANSI/ICEA S-84–608–1988, paragraph 10.4 and the RUS cable designation:

Cable Designation
BFCE
Cable Construction
Pair Count
Conductor Gauge
E = Expanded Insulation
A = Coated Aluminum Shield
C = Copper Shield
Y = Gopher Resistant Shield
X = Armored, Separate Shield
H = T1 Screened Cable
HIC = TIC Screened Cable
P = Preconnectorized

Example: BFCEXH100–22
Buried Filled Cable, Expanded Insulation, Armored (w/ separate shield), T1 Screened Cable, 100 pair, 22 AWG.

(8) When cable manufactured to the requirements of this specification is shipped, both ends must be equipped with end caps acceptable to RUS.

(9) When preconnectorized cables are shipped, the splicing modules must be protected to prevent damage during shipment and handling. The protection method must be acceptable to RUS and accepted prior to its use.

(10) All cables ordered for use in underground duct applications must be equipped with a factory-installed pulling-eye on the outer end in accordance with ANSI/ICEA S-84–608–1988, paragraph 10.5.2.

(The information and recordkeeping requirements of this section have been approved by the Office of Management and Budget (OMB) under the control number 0572–0059)

APPENDIX A TO § 1755.890—QUALIFICATION

Test Methods

(I) The test procedures described in this appendix are for qualification of initial cable designs and major modifications of accepted designs. Included in (V) of this appendix are suggested formats that may be used in submitting test results to RUS.

(II) Sample selection and preparation. (1) All testing must be performed on lengths removed sequentially from the same 25 pair, 22 gauge jacketed cable. This cable must not have been exposed to temperatures in excess of 38 °C since its initial cool down after sheathing. The lengths specified are minimum lengths and if desirable from a laboratory testing standpoint longer lengths may be used.

(a) Length A must be 10 ± 0.2 meters (33 ± 0.5 feet) long and must be maintained at 23 ± 3 °C. One length is required.

(b) Length B must be 12 ± 0.2 meters (40 ± 0.5 feet) long. Prepare the test sample by removing the jacket, shield or shield/armor, and core wrap for a sufficient distance on both ends to allow the insulated conductors to be flared out. Remove sufficient conductor insulation so that appropriate electrical test connections can be made at both ends. Coil the sample with a diameter of 15 to 20 times its sheath diameter. Three lengths are required.

(c) Length C must be one meter (3 feet) long. Four lengths are required.

(d) Length D must be 300 millimeters (1 foot) long. Four lengths are required.

(e) Length E must be 600 millimeters (2 feet) long. Four lengths are required.

(f) Length F must be 3 meters (10 feet) long and must be maintained at 23 ± 3 °C for the duration of the test. Two lengths are required.

(2) Data reference temperature. Unless otherwise specified, all measurements must be made at 23 ± 3 °C.

(III) Environmental tests—(1) Heat aging test—(a) Test samples. Place one sample each of lengths B, C, D, and E in an oven or environmental chamber. The ends of Sample B must exit from the chamber or oven for electrical tests. Securely seal the oven exit holes.
§ 1755.890 7 CFR Ch. XVII (1–1–08 Edition)

(b) Sequence of tests. The samples are to be subjected to the following tests after conditioning:

(i) Water Immersion Test outlined in (III)(5) of this appendix;

(ii) Water Penetration Test outlined in (III)(3) of this appendix;

(iii) Insulation Compression Test outlined in (III)(4) of this appendix; and

(iv) Jacket Slip Strength Test outlined in (III)(5) of this appendix.

(c) Initial Measurements. (i) For Sample B measure the open circuit capacitance for each odd numbered pair at 1, 150, and 772 kilohertz, and the attenuation at 150 and 772 kilohertz after conditioning the sample at the data reference temperature for 24 hours. Calculate the average and standard deviation for the data of the 13 pairs on a per kilometer or (on a per mile) basis.

(ii) The attenuation at 150 and 772 kilohertz may be calculated from open circuit admittance (Yoc) and short circuit impedance (Zsc) or may be obtained by direct measurement of attenuation.

(iii) Record on suggested formats in (V) of this appendix or on other easily readable formats.

(d) Heat conditioning. (i) Immediately after completing the initial measurements, condition the sample for 14 days at a temperature of 65 ± 2 °C.

(ii) At the end of this period note any exudation of cable filler. Measure and calculate the parameters given in (III)(1)(c) of this appendix. Record on suggested formats in (V) of this appendix or on other easily readable formats.

(e) Overall electrical deviation. (i) Calculate the percent change in all average parameters between the final parameters after conditioning with the initial parameters in (III)(2)(c) of this appendix.

(ii) The average mutual capacitance must be within 5 percent of its original value.

(3) Water penetration testing. (a) A watertight closure must be placed over the jacket of length C. The closure must not be placed over the jacket so tightly that the flow of water through pre-existing voids of air spaces is restricted. The other end of the sample must remain open.

(b) Test per Option A or Option B—(i) Option A. Weigh the sample and closure prior to testing. Fill the closure with water and place under a continuous pressure of 10 ± 0.7 kilopascals (1.5 ± 0.1 pounds per square inch gauge) for one hour. Collect the water leakage from the end of the test sample during the test and weigh to the nearest 0.1 gram. Immediately after the one hour test, seal the ends of the cable with a thin layer of grease and remove all visible water from the closure, being careful not to remove water that penetrated into the core. The weight of water that penetrated into the core must not exceed 6 grams.

(ii) Option B. Fill the closure with a 0.2 gram sodium fluorescein per liter water solution and apply a continuous pressure 10 ± 0.7 kilopascals (1.5 ± 0.1 pounds per square inch gauge) for one hour. Catch and weigh any water that leaks from the end of the cable during the one hour period. If no water leaks from the sample, carefully remove the water from the closure. Then carefully remove the jacket, shield or shield armor, and core wrap...
§ 1755.890

one at a time, examining with an ultraviolet light source for water penetration. After removal of the core wrap, carefully dissect the core and examine for water penetration within the core. Where water penetration is observed, measure the penetration distance. The distance of water penetration into the core must not exceed 127 millimeters (5.0 inches).

(a) Insulation compression test. (a) Test sample D. Remove jacket, shield or shield/armor, and core wrap being careful not to damage the conductor insulation. Remove one pair from the core and carefully separate, wipe off core filler and straighten the insulated conductors. Retwist the two insulated conductors together under sufficient tension to form 10 evenly spaced 360 degree twists in a length of 10 centimeters (4 inches).

(b) Sample testing. Center the mid 50 millimeters (2 inches) of the twisted pair between 2 smooth rigid parallel metal plates that are 50 millimeters × 50 millimeters (2 inches × 2 inches). Apply a 1.5 volt direct current potential between the conductors, using a light or buzzer to indicate electrical contact between the conductors. Apply a constant load of 67 newtons (15 pound-force) on the sample for one minute and monitor for evidence of contact between the conductors. Record results on suggested formats in (V) of this appendix or on other easily readable formats.

(b) Sample preparation. Prepare test sample in accordance with the procedures specified in ASTM D 4565–90a.

(c) Sample conditioning and testing. Remove the sample from the tensile tester prior to testing and conditioning for one hour at 50 ± 2 °C. Test immediately in accordance with the procedures specified in ASTM D 4565–90a. A minimum jacket slip strength of 67 newtons (15 pound-force) is required. Record the highest load attained.

(d) Humidity exposure. (a) Repeat steps (III)(1)(a) through (III)(1)(c)(ii) of this appendix for separate set of samples B, C, D, and E which have not been subjected to prior environmental conditioning.

(b) Immediately after completing the measurements, subject the test sample to the 10 cycles of temperature between a minimum of −40 °C and +60 °C. The test sample must be held at each temperature extreme for a minimum of 1 1/2 hours during each cycle of temperature. The air within the temperature cycling chamber must be circulated throughout the duration of the cycling.

(c) Repeat steps (III)(1)(d)(ii) through (III)(5)(c) of this appendix.

(d) Control sample. (1) Test samples. A separate set of lengths A, C, D, E, and F must have been maintained at 23 ± 3 °C for at least 48 hours before the testing.

(2) Repeat steps (III)(2) through (III)(5)(c) of this appendix except use length A instead of length B.

(3) Surge test. (a) One length of sample F must be used to measure the breakdown between conductors while the other length of F must be used to measure the core to shield breakdown.

(b) The samples must be capable of withstand without damage, a single surge voltage of 15 kilovolts peak between conductors, and a 25 kilovolts peak surge voltage between conductors and the shield or shield/armor as hereinafter described. The surge voltage must be developed from a capacitor discharged through a forming resistor connected in parallel with the dielectric of the test sample. The surge generator constants must be such as to produce a surge of 1.5 × 40 microsecond wave shape.

(c) The shape of the generated wave must be determined at a reduced voltage by connecting an oscilloscope across the forming resistor with the cable sample connected in parallel with the dielectric of the test sample. The surge generator constants obtained with the initial reduced voltage compared to that obtained after the application of the test voltage.

(V) The following suggested formats may be used in submitting the test results to RUS:

(7) American Society for Testing and Materials Specifications (ASTM) A 640–91, Standard Specification for Zinc-Coated Steel Strand for Messenger Support of Figure 8 Cable; ASTM B 736–92a, Standard Specification for Aluminum, Aluminum Alloy, and Aluminum-Clad Steel Cable Shielding
§ 1755.900  

§ 1755.900

(10) RUS intends that the optical fibers contained in the cables manufactured in accordance with this section have characteristics that will allow signals, having a range of wavelengths, to be carried simultaneously.

(b) Optical fibers. (1) The solid glass optical fibers must consist of a cylindrical core and cladding covered by either an ultraviolet-cured acrylate or other suitable coating.

(2) The optical fiber types must be one of the following:

(i) Dispersion-unshifted single mode fiber EIA Class IVa;

(ii) Dispersion-shifted single mode fiber EIA Class IVb;

(iii) 50/125 micrometer multimode fiber EIA Class Ia; or

(iv) 62.5/125 micrometer multimode fiber EIA Class Ia.

(3) The dispersion-unshifted single mode fiber core must have either a matched or depressed clad step refractive index profile with a mode-field diameter of 9.0±1.0 micrometers when measured at 1300 nanometers and 10.5+1.0 micrometers/¥1.5 micrometers when measured at 1550 nanometers in accordance with any one of the following test methods:

(i) EIA/TIA–455–164A;

(ii) EIA/TIA–455–165A;

(iii) EIA/TIA–455–167A; or

(iv) EIA–455–174.

(4) The dispersion-shifted single mode fiber core must have either a segmented core design or depressed clad step refractive index profile with a mode-field diameter of 7.5+1.5 micrometers/–1.3 micrometers when measured at 1550 nanometers in accordance with any one of the test procedures specified in paragraph (b)(3) of this section.

(5) The core clad off-set of the dispersion-unshifted and dispersion-shifted single mode fibers must not be greater than 1.0 micrometer when measured in accordance with either EIA/TIA–455–45B or EIA/TIA–455–176.

(6) The multimode fiber cores must have graded (parabolic) refractive index profiles with core diameters of
50.0±3.0 micrometers or 62.5±3.0 micrometers when measured in accordance with either EIA/TIA–455–58A, or EIA/TIA–455–176.

7. The core noncircularity of multimode fibers must not exceed 6 percent when measured in accordance with either EIA/TIA–455–45B or EIA/TIA–455–176.

8. The outside diameter of the glass fiber for both single mode and multimode fibers must be 125±2.0 micrometers when measured in accordance with any one of the following test methods:
   (i) EIA/TIA–455–45B;
   (ii) EIA/TIA–455–176; or
   (iii) EIA/TIA–455–48B. Methods A or B.

9. The outside diameter of the glass fiber must be nominally concentric with the fiber core as is consistent with the best commercial practice.

10. The individual fibers must be proof tested at a minimum tensile stress of 0.35 gigapascal for approximately one second when measured in accordance with EIA/TIA–455–31B.

11. Factory splices of fibers are allowed provided that prior acceptance from RUS is obtained for the splice technique, that all splices are documented and reported to the customer and that the spliced fiber meets all requirements of this section.

12. The optical fiber must be coated with a suitable material to preserve the intrinsic strength of the glass having an outside diameter of 250±15 micrometers when measured in accordance with either EIA/TIA–455–55B or EIA/TIA–455–173.

13. The maximum force required to remove 25 millimeters of protective fiber coating must not exceed 13 newtons when measured in accordance with EIA/TIA–455–178.

14. All optical fibers in any single length of cable must be of the same type.

(c) Buffer/coating. (1) The optical fibers contained in a tube buffer (loose tube), an inner jacket (unit core), a channel or otherwise loosely packaged must have a clearance between the fibers and the inside of the container sufficient to allow for thermal expansions without constraining the fibers. The protective container must be manufactured from a material having a coefficient of friction sufficiently low to allow the fibers free movement.

(2) Optical fibers covered in near contact with an extrusion (tight tube) must have an intermediate soft buffer to allow for thermal expansions and minor pressures.

(3) All protective coverings in any single length of cable must be continuous and be of the same material except at splice locations.

(4) The protective coverings must be free from holes, splits, blisters, and other imperfections and must be as smooth and concentric as is consistent with the best commercial practice.

(5) Repairs to the fiber coatings are not allowed except at splice locations.

(6) Both loose tube and tight tube coverings of each color and other fiber package types removed from the finished cable must meet the following shrinkback and cold bend performance requirements. The fibers may be left in the tubes.

   (i) Shrinkback. Testing must be conducted in accordance with ASTM D 4565–90a, paragraph 14.1, using a talc bed at a temperature of 95 °C. Shrinkback must not exceed 5 percent of the original 150 millimeter length of the specimen. The total shrinkage of the specimen must be measured.

   (ii) Cold bend. Testing must be conducted on at least one tube from each color in the cable. Stabilize the specimen to −20±1 °C for a minimum of four hours. While holding the specimen and mandrel at the test temperature, wrap the tube in a tight helix ten times around a mandrel with a diameter not greater than five times the tube diameter. The tube must show no evidence of cracking when observed with normal or corrected-to-normal vision.

   NOTE: Channel cores and similar slotted single component core designs need not be tested for cold bend.

(d) Fiber and buffer tube identification.

(1) The colors designated for identification of loose buffer tubes, tight tube buffer fibers and individual fibers in multifiber tubes, slots or bundles are shown in the following table:

<table>
<thead>
<tr>

(2) Standards of color. Except for the aqua color, the colors of fibers and tubes supplied in accordance with this section are specified in terms of the Munsell Color System (ASTM D 1535–89) and must comply with the color limits as defined in EIA/TIA-598. (A visual color standard meeting these requirements and entitled “Munsell Color Charts for Color Coding,” may be obtained from the Munsell Color Company, Inc., 2441 North Calvert Street, Baltimore, Maryland 21218. The latest edition of the color standard should be used.)

(i) The aqua color limits using the Munsell Color System must be as follows:

MUNSELL NOTATION

(ii) Other coloring schemes used for providing identification of buffer tubes and optical fibers which deviate from the requirements of paragraph (d)(1) of this section will not be accepted by RUS.

(e) Strength members. (1) Strength members must be an integral part of the cable construction, but are not considered part of the support messenger for self-supporting optical cable.

(2) The combined strength of all the strength members must be sufficient to support the stress of installation and to protect the cable in service.

(3) Strength members may be incorporated into the core as a central support member or filler, as fillers between the fiber packages, as an annular serving over the core, as an annular serving over the intermediate jacket, embedded in the outer jacket or as a combination of any of these methods.

(4) The central support member or filler must contain no more than one splice per kilometer of cable. Individual fillers placed between the fiber packages and placed as annular servings over the core must contain no more than one splice per kilometer of cable. Cable sections having central member or filler splices must meet the same physical requirements as unspliced cable sections.

(5) Strength member materials and splicing techniques must be accepted by RUS prior to their use.

(6) In each length of completed cable having a metallic central member, the dielectric strength between the armor and the metallic center member must withstand at least 15 kilovolts direct current for 3 seconds.

(f) Forming the cable core. (1) Protected fibers must be assembled with the optional central support member, fillers and strength members in such a way as to form a cylindrical group.

(2) The standard cylindrical group or core designs shall consist of 4, 6, 8, 10, 12, 16, 18, 20, or 24 fibers. Cylindrical groups or core designs larger than the sizes shown above must meet all the requirements of this section.

(3) When threads or tapes are used as core binders, they must be colored either white or natural and must be a nonhygroscopic and nonwicking dielectric material.

(4) When threads or tapes are used as unit binders to define optical fiber units in loose tube, tight tube, slotted, or bundled cored designs, they must be colored in accordance with the table listed below and must be a nonhygroscopic and nonwicking dielectric material or be rendered such by the filling compound. The colors of the binders must be in accordance with paragraphs...
(d)(2) introductory text and (d)(2)(i) of this section.

(g) Filling compound. (1) To prevent the ingress of water into the core, a filling compound must be applied into the interior of the loose fiber tubes and into the interstices of the core. When a core wrap is used, the filling compound must also be applied to the core wrap, over the core wrap and between the core wrap and inner jacket when required.

(2) The materials must be homogeneous and uniformly mixed; free from dirt, metallic particles and other foreign matter; easily removed; nontoxic and present no dermal hazards.

(3) The individual cable manufacturer must satisfy RUS that the filling compound selected for use is suitable for its intended application. The filling compound must be compatible with the cable components when tested in accordance with ASTM D 4568-86 at a temperature of 80 °C.

(h) Core wrap (optional). (1) At the option of the manufacturer, one or more layers of nonhygroscopic and nonwicking dielectric material may be applied over the core.

(2) The core wrap(s) can be used to provide a heat barrier to prevent deformation or adhesion between the fiber tubes or can be used to contain the core.

(3) When core wraps are used, sufficient filling compound must be applied to the core wraps so that voids or air spaces existing between the core wraps and between the core and the inner side of the core wrap are minimized.

(i) Inner jacket. (1) Inner jackets may be applied directly over the core or over the strength members.

(1) For armored cable an inner jacket is optional but recommended. The inner jacket may absorb stresses in the cable core that may be introduced by armor application or by armored cable installation.

(2) For unarmored cable an inner jacket is optional.

(2) The inner jacket material and test requirements must be as for the outer jacket material per paragraphs (m)(3) introductory text through (m)(3)(v) of this section, except that either black or natural polyethylene may be used.

In the case of natural polyethylene, the requirements for absorption coefficient and the inclusion of furnace black are waived.

(j) Flooding compound. (1) Sufficient flooding compound must be applied between the inner jacket and armor and between the armor and outer jacket so that voids and air spaces in these areas are minimized. The use of floodant between the armor and outer jacket is not required when uniform bonding, per paragraph (k)(10) of this section, is achieved between the plastic-clad armor and the outer jacket.

(2) The flooding compound must be compatible with the jacket when tested in accordance with ASTM D 4568-86 at a temperature of 80 °C. The floodant must exhibit adhesive properties sufficient to prevent jacket slip when tested in accordance with the requirements of appendix A, paragraph (III)(3), of this section.

(3) The individual cable manufacturer must satisfy RUS that the flooding compound selected for use is acceptable for the application.

(4) In lieu of a flooding compound, water blocking tapes may be applied between the inner jacket and armor and between the armor and outer jacket to prevent water migration. The use of the water blocking tape between the armor and outer jacket is not required when uniform bonding, per paragraph
(k)(10) of this section, is achieved between the plastic-clad armor and the outer jacket.

(k) Armor. (1) A steel armor, plastic coated on both sides, is required for direct buried cable manufactured under the provisions of this section. An armor is optional for duct and aerial cable as required by the purchaser. The plastic coated steel armor must be applied longitudinally directly over the core wrap or the intermediate jacket and have a minimum overlap of 3.0 millimeters.

(2) The uncoated steel tape must be electrolytic chrome coated steel (ECCS) with a thickness of 0.155 ± 0.015 millimeters.

(3) The reduction in thickness of the armor material due to the corrugating or to the application process must be kept to a minimum and must not exceed 10 percent at any spot.

(4) The armor of each length of cable must be electrically continuous with no more than one joint or splice allowed per kilometer of cable. This requirement does not apply to a joint or splice made in the raw material by the raw material manufacturer.

(5) The breaking strength of any section of an armor tape, containing a factory splice joint, must not be less than 80 percent of the breaking strength of an adjacent section of the armor of equal length without a joint.

(6) For cables containing no floodant over the armor, the overlap portions of the armor tape must be bonded in cables having a flat, noncorrugated armor to meet the requirements of paragraphs (q)(1) through (q)(7)(ii) of this section. If the tape is corrugated, the overlap portions of the armor tape must be sufficiently bonded and the corrugations must be sufficiently in register to meet the requirements of paragraphs (q)(1) through (q)(7)(ii) of this section.

(7) The armor tape must be so applied as to enable the cable to pass the bend test as specified in paragraph (q)(1) of this section.

(8) The protective coating on the steel armor must meet the Bonding-to-Metal, Heat Sealability, Lap-Shear and Moisture Resistance requirements of Type I, Class 2 coated metals in accordance with ASTM B 736-92a.

(9) The ability of the plastic-clad metal to resist the flooding compound must be determined as required by ASTM D 4568-86 using a one meter length of coated steel which must be aged for 7 days at 68±1 °C. There must be no delamination of the coating from the steel at the conclusion of the test.

(10) When the jacket is bonded to the plastic coated armor, the bond between the plastic coated armor and the outer jacket must not be less than 525 newtons per meter over at least 90 percent of the cable circumference when tested in accordance with ASTM D 4565-90a. For cables with strength members embedded in the jacket, and residing directly over the armor, the area of the armor directly under the strength member is excluded from the 90 percent calculation.

(l) Optional support messenger (aerial cable). (1) When a self-supporting aerial cable containing an integrated support messenger is supplied, the support messenger must comply with the requirements specified in paragraphs (l)(2) introductory text through (l)(6) of this section.

(2) The fully flooded, stranded support messenger must be 6.35 millimeters diameter, 7 wire, extra high strength grade, Class A galvanized steel strand conforming to ASTM A 640-91 with exceptions and additional provisions as follows:

(i) The maximum lay of the individual wires of the strand must be 140 millimeters.

(ii) Any section of a completed strand containing a joint must have minimum tensile strength and elongation of 29,500 newtons and 3.5 percent, respectively, when tested in accordance with the procedures specified ASTM A 640-91.

(iii) The individual wires from a completed strand which contain joints must not fracture when tested according to the “Ductility of Steel” procedures specified in ASTM A 640-91 except that the mandrel diameter must be equal to 5 times the nominal diameter of the individual wires.

(3) The support strand must be completely covered with a corrosion protective floodant. The floodant must be homogeneous and uniformly mixed.
§ 1755.900  

(4) The floodant must be nontoxic and present no dermal hazard.
(5) The floodant must be free from dirt, metallic particles, and other foreign matter that may interfere with the performance of the cable.
(6) The floodant must be compatible with the polyethylene outer jacket and must be acceptable to RUS.
(7) Other methods of providing self-supporting cable specifically not addressed in this section may be allowed if accepted by RUS. Justification for acceptance of a modified design must be provided to substantiate product utility and long term stability and endurance.

(m) Outer jacket. (1) The outer jacket must provide the cable with a tough, flexible, protective covering which can withstand exposure to sunlight, to atmosphere temperatures and to stresses reasonably expected in normal installation and service.
(2) The jacket must be free from holes, splits, blisters, or other imperfections and shall be as smooth and concentric as is consistent with the best commercial practice.
(3) The raw material used for the outer jacket must be one of the five types listed in paragraphs (m)(3)(i) through (m)(3)(v) of this section. The raw material must contain an antioxidant to provide long term stabilization and the materials must contain a 2.60 ± 0.25 percent concentration of furnace black to provide ultraviolet shielding. Both the antioxidant and furnace black must be compounded into the material by the raw material supplier.

(i) Low density, high molecular weight polyethylene (LDHMW) must conform to the requirements of ASTM D 1248-84(1989), Type I, Class C, Category 4 or 5, Grade J3.
(ii) Low density, high molecular weight ethylene copolymer (LDHMW) must conform to the requirements of ASTM D 1248-84(1989), Type I, Class C, Category 4 or 5, Grade J3.
(iii) Linear low density, high molecular weight polyethylene (LLDHMW) must conform to the requirements of ASTM D 1248-84(1989), Type I, Class C, Category 4 or 5, Grade J3.
(iv) High density polyethylene (HD) must conform to the requirements of ASTM D 1248-84(1989), Type III, Class C, Category 4 or 5, Grade J4.
(v) Medium density polyethylene (MD) must conform to the requirements of ASTM D 1248-84(1989), Type II, Class C, Category 4 or 5, Grade J4.
(vi) Particle size of the carbon selected for use must not average greater than 20 nanometers.
(vii) Absorption coefficient must be a minimum of 400 in accordance with the procedures of ASTM D 3349-86.

(4) The outer jacketing material removed from or tested on the cable must be capable of meeting the following performance requirements:

<table>

(5) Testing procedures. The procedures for testing jacket specimens for compliance with paragraph (m)(4) of this section must be as follows:

(i) Melt flow rate. The melt flow rate must be determined by ASTM D 1238–90b, Condition E. Jacketing material
must be free from flooding and filling compound.

(ii) *Tensile strength and ultimate elongation.* Test in accordance with EIA-455-89A, using a jaw separation speed of 500 millimeters per minute for low density material and 50 millimeters per minute for high and medium density materials.

(iii) *Environmental stress cracking.* Test in accordance with ASTM D 4565–90a.

(iv) *Shrinkback.* Test in accordance with the procedures specified in EIA–455–86 using a temperature of 100 ± 1 °C for a 4 hour period for low density material and a test temperature of 115 ± 1 °C for a 4 hour period for high and medium density materials.

(v) *Impact.* The test must be performed in accordance with ASTM D 4565–90a using an impact force of 4 newton-meters at a temperature of −20 ± 2 °C. A cracked or split jacket constitutes failure.

(6) **Jacket thickness.** The nominal outer jacket thickness must not be less than 1.3 millimeters. The test method used must either be the End Sample Method (paragraph (m)(6)(i) of this section) or the Continuous Uniformity Thickness Gauge Method (paragraph (m)(6)(ii) of this section).

(i) **End sample method.** The jacket must be capable of meeting the following requirements:

- Minimum Average Thickness: 90 percent (%) of nominal thickness
- Minimum Spot Thickness: 70 % of nominal thickness

(ii) **Continuous uniformity thickness gauge.**

- Minimum Average Thickness: 75 % of nominal thickness
- Minimum Thickness: 70 % of nominal thickness
- Maximum Eccentricity: 40 % of nominal thickness

\[
\text{Eccentricity} = \left( \frac{\text{Max. Thickness} - \text{Min. Thickness}}{\text{Average Thickness}} \right) \times 100
\]

(B) The maximum and minimum thickness values shall be based on the average of each axial section.

(7) For jackets having embedded strength members, the jacket thickness must meet the requirements of paragraph (m)(6) of this section except that the jacket thickness over the strength members must not be less than 0.50 millimeters.

(8) The minimum jacket thickness at any point over the support messenger for self-supporting aerial cable utilizing such an element must be 1.1 millimeters.

(9) The web dimension for self-supporting aerial cable utilizing such a feature must be as follows:

- Height: 2.29 ± 0.750 millimeters
- Width: 1.52 ±0.51 millimeters −0.25 millimeters

(n) **Sheath slitting cord (optional).** (1) A sheath slitting cord is optional.

(2) When a sheath slitting cord is used it must be nonhygroscopic and nonwicking or be rendered such by the filling or flooding compound, continuous throughout a length of cable and of sufficient strength to open the sheath over at least a one meter length without breaking the cord at a temperature of 23±5 °C.

(o) **Identification marker and length marker.** (1) Each length of cable must be permanently labeled either Optical Cable, OC, Optical Fiber Cable, or OF on the outer jacket and identified as to manufacturer and year of manufacture.

(3) Mark the number of fibers on the jacket.

(4) The markings must be printed on the jacket at regular intervals of not more than 2 meters.
§ 1755.900

(5) An alternative method of marking may be used if acceptable to RUS.

(6) The completed cable must have sequentially numbered length markers in Meters or Feet at regular intervals of not more than 2 meters along the outside of the jacket.

(7) Continuous sequential numbering must be employed in a single length of cable.

(8) The numbers must be dimensioned and spaced to produce good legibility and must be approximately 3 millimeters in height. An occasional illegible marking is permissible if there is a legible marking located not more than 2 meters from it.

(9) The method of marking must be by means of suitable surface markings producing a clear distinguishable contrasting marking acceptable to RUS. Where direct or transverse printing is employed, the characters should be indented to produce greater durability of marking. Any other method of length marking must be acceptable to RUS as producing a marker suitable for the field. Size, shape and spacing of numbers, durability and overall legibility of the marker will be considered in acceptance of the method.

(10) Agreement between the actual length of the cable and the length marking on the cable jacket must be within the limits of +1 percent, −0 percent.

(11) The color of the initial marking must be white or silver. If the initial marking fails to meet the requirements of the preceding paragraphs, it will be permissible to either remove the defective marking and re-mark with the white or silver color or leave the defective marking on the cable and re-mark with yellow. No further re-marking is permitted. Any re-marking must be on a different portion of the cable circumference than any existing marking when possible and have a numbering sequence differing from any other existing marking by at least 3,000.

(12) Any reel of cable that contains more than one set of sequential markings must be labeled to indicate the color and sequence of marking to be used. The labeling must be applied to the reel and also to the cable.

(p) Optical performance. (1) The optical performance of the single mode fibers must be in accordance with the requirements specified in paragraphs (p)(1)(i) through (p)(1)(viii) of this section.

(i) The attenuation values of the single mode fibers within the cable must not exceed 0.5 decibel per kilometer (dB/km) for dispersion-unshifted single mode fiber at 1310 and 1550 nanometers and must not exceed 0.5 dB/km for dispersion-shifted single mode fiber at 1550 nanometers. The test method used for measuring the attenuation must be in accordance with either:

(A) EIA/TIA–455–78A; or

(B) EIA/TIA–455–61.

(ii) The attenuation values for wavelengths between 1285 and 1330 nanometers and between 1525 and 1575 nanometers for dispersion-unshifted fibers must not exceed the attenuation at 1310 and 1550 nanometers by more than 0.1 dB/km. The attenuation values for wavelengths between 1325 and 1575 nanometers for dispersion-shifted fibers must not exceed the attenuation at 1550 nanometers by more than 0.1 dB/km. The test method used for measuring the attenuation must be in accordance with any one of the methods specified in paragraph (p)(1)(i) of this section.

(iii) Attenuation discontinuities in the fiber’s length must not exceed 0.1 decibel (dB) for dispersion-unshifted fiber at 1310±20 and 1550±20 nanometers and must not exceed 0.1 dB for dispersion-shifted fiber at 1550±20 nanometers when measured in accordance with EIA/TIA–455–59.

(iv) Measurement of the attenuation must be conducted at the wavelength specified for application and must be expressed in decibels per kilometer.

(v) Because the accuracy of attenuation measurements for single mode fibers becomes questionable when measured on short cable lengths, attenuation measurements are to be made utilizing characterization cable lengths. If the ship length of cable is less than one kilometer, the attenuation values measured on longer lengths of cable (characterization length of cable) before cutting to the ship lengths of cable may be applied to the ship lengths.
(vi) For dispersion-unshifted fiber the zero dispersion wavelength must be between 1300 and 1322 nanometers, and the value of the dispersion slope at the zero-dispersion wavelength must not be greater than 0.092 picosecond per nanometer squared times kilometer (ps/(nm²-km)) when measured in accordance with either:
(A) EIA/TIA–455–168A;
(B) EIA/TIA–455–169A; or
(C) EIA/TIA–455–175A.

(vii) For dispersion-shifted fiber, the dispersion over the wavelength range between 1525 and 1575 nanometers must not exceed 3.5 picosecond per nanometer times kilometer (ps/(nm-km)) and must have a maximum dispersion slope of 0.095 ps/(nm²-km) at the zero dispersion wavelength when measured in accordance with any one of the test procedures specified in paragraph (p)(1)(vi) of this section.

(viii) The cut off wavelength of the dispersion-unshifted and dispersion-shifted fibers in a cable must be less than 1260 nanometers when measured in accordance with EIA/TIA–455–170.

(2) The optical performance of the multimode fibers must be in accordance with the requirements specified in paragraphs (p)(2)(i) through (p)(2)(vi) of this section.

(i) The attenuation values of the 50/125 and 62.5/125 micrometer multimode fibers within the cable must not exceed 1.5 dB/km at 1300 nanometers when measured in accordance with either:
(A) EIA/TIA–455–46A;
(B) EIA/TIA–455–53A; or
(C) EIA/TIA–455–61.

(ii) Attenuation discontinuities in the fiber's length must not exceed 0.2 dB for both multimode fiber types at 1300±20 nanometers when measured in accordance with EIA/TIA–455–59.

(iii) Measurement of the attenuation must be conducted at the wavelength specified for application and must be expressed in decibels per kilometer.

(iv) Because the accuracy of attenuation measurements for multimode fibers becomes questionable when measured on short cable lengths, attenuation measurements are to be made utilizing characterization cable lengths. If the ship length of cable is less than one kilometer, the attenuation values measured on longer lengths of cable (characterization length of cable) before cutting to the ship lengths of cable may be applied to the ship lengths.

(v) The bandwidth of the multimode fibers at the –3 dB optical power of the optical fibers within the cable must be within the limits prescribed in the purchase order.

(vi) The test methods used to measure bandwidth must be in accordance with either EIA/TIA–455–30B or EIA/TIA–455–51A.

(3) Numerical aperture (NA) for each multimode optical fiber in the cable must be 0.20±0.015 for the 50/125 micrometer design and 0.275±0.015 for the 62.5/125 micrometer design when measured in accordance with EIA/TIA–455–177A.

(q) Mechanical requirements—(1) Cable bend test. (i) All cables manufactured in accordance with the requirements of this section must be capable of meeting the following bend test without exhibiting an increase in fiber attenuation greater than 0.10 dB for single mode fibers and 0.40 dB for multimode fibers.

(ii) Measure the attenuation of dispersion-unshifted single mode fibers at 1310±20 and 1550±20 nanometers, dispersion-shifted single mode fibers at 1550±20 nanometers and multimode fibers at 1300±20 nanometers.

(iii) After measuring the attenuation of the optical fibers, test the cable sample in accordance with EIA/TIA–455–37A, Test Condition E, Turns Test Level 3. The following detailed test conditions shall apply:
(A) Section 4.2—Mandrel diameter must be 20 times the cable diameter.
(B) Section 4.5—Measure the attenuation increase of the wound sample at the test temperature and specified wavelengths in accordance with EIA–455–37A, Test Condition E, Turns Test Level 3.
(C) For armored cable, the armor overlap must be on the outside of the bend.

(D) For self-supporting cable, the jacketed support messenger and connection web must be removed prior to testing.

(iv) The cable may be allowed to warm to room temperature before visual inspection. The bent area of the
cable must show neither visible evidence of fracture of the jacket nor delamination of the bond at the overlap and to the outer jacket in nonflooded cable. After removal of the jacket, there must be no visible evidence of fracture of the armor, when present, and of the components in the core.

(2) **Cable impact test.** (i) All cables manufactured in accordance with the requirements of this section must be capable of meeting the following impact test without exhibiting an increase in fiber attenuation greater than 0.10 dB for single mode fibers and 0.40 dB for multimode fibers, and without cracking or splitting of the cable jacket.

(ii) Measure the attenuation of the optical fibers in accordance with paragraph (q)(1)(ii) of this section.

(iii) After measuring the attenuation of the optical fibers, test the cable in accordance with EIA/TIA–455–85A.

(3) **Cable compression test.** (i) All cables manufactured in accordance with the requirements of this section must be capable of meeting the following compressive strength test without exhibiting an increase in fiber attenuation greater than 0.10 dB for single mode fibers and 0.4 dB for multimode and without cracking or splitting of the cable jacket when subjected to a minimum compressive load of 440 newtons per centimeter for armored cable and 220 newtons per centimeter for nonarmored cable.

(ii) Measure the attenuation of the optical fibers in accordance with paragraph (q)(1)(ii) of this section.

(iii) After measuring the attenuation of the optical fibers, test the cable in accordance with EIA–455–41 using a rate of 3 millimeters to 20 millimeters per minute and maintaining the load for 10 minutes.

(4) **Cable twist test.** (i) All cables manufactured in accordance with the requirements of this section must be capable of meeting the following twist test without exhibiting an increase in fiber attenuation greater than 0.10 dB for single mode fibers and 0.40 dB for multimode fibers, and without cracking or splitting of the cable jacket.

(ii) Measure the attenuation of the optical fibers in accordance with paragraph (q)(1)(ii) of this section.

(iii) After measuring the attenuation of the optical fibers, test the cable in accordance with EIA/TIA–455–85A, using a maximum cable twisting length of 4 meters.

(5) **Cable flex test.** (i) All cables manufactured in accordance with the requirements of this section must be capable of meeting the following flex test without exhibiting an increase in fiber attenuation greater than 0.10 dB for single mode fibers and 0.40 dB for multimode fibers.

(ii) Measure the attenuation of the optical fibers in accordance with paragraph (q)(1)(ii) of this section.

(iii) After measuring the attenuation of the optical fibers, test the cable in accordance with EIA/TIA–455–104A, Test Conditions I and II, flexed for 25 cycles using a sheave diameter not less than 20 times the cable diameter (Test condition letter B).

(iv) After completion of the test, the bent area of the cable must show neither visible evidence of fracture of the jacket nor delamination of the bond at the overlap and to the outer jacket in nonflooded cable. After removal of the jacket, there must be no visible evidence of fracture of the armor, when present, and of the components in the core.

(6) **Water penetration test.** (i) A one meter length of completed fiber optic cable must be preconditioned for 24 hours at 23°C ± 5°C and then tested in accordance with EIA/TIA–455–82B using a one meter water head over the sample or placed under the equivalent continuous pressure for one hour.

(ii) After the one hour period, there must be no water leakage through the sheath interfaces, under the core wrap, between the cable core interstices or through the fiber buffers.

(iii) If water leakage is detected in the first sample, one additional 3 meter sample from EACH END of the same reel must be tested in accordance with paragraph (q)(6)(i) of this section. If either sample exhibits water leakage, the entire reel of cable is to be rejected. If the samples exhibit no leakage, the entire reel of cable is considered acceptable.
Rural Utilities Service, USDA § 1755.900

(7) Compound flow test. (i) Three 300 millimeter long test samples must be preconditioned for 24 hours at 23±5 °C and then tested in accordance with EIA/TIA–455–81A using a test temperature of 80 ±1 °C.

(ii) The amount of filling or flooding compounds that flowed or dripped from any of the suspended cable specimens must be less than or equal to 0.5 grams of material. The measurement of an amount greater than 0.5 grams for any of the suspended cable specimens constitutes failure.

(8) Preconnectorized cable (optional). (1) At the option of the manufacturer and upon request by the purchaser, the cable may be factory terminated with connectors acceptable to RUS.

(2) All connectors must be accepted by RUS prior to their use.

(9) Acceptance testing and extent of testing. (1) The tests described in appendix A of this section are intended for acceptance of cable designs and major modifications of accepted designs. What constitutes a major modification is at the discretion of RUS. These tests are intended to show the inherent capability of the manufacturer to produce cable products that have satisfactory performance characteristics, long life and long-term optical stability but are not intended as field tests.

(2) For initial acceptance, the manufacturer must submit:

(i) An original signature certification that the product fully complies with each section of the specification;

(ii) Qualification Test Data, per appendix A of this section;

(iii) A set of instructions for handling the cable;

(iv) OSHA Material Safety Data Sheets for all components;

(v) Agree to periodic plant inspections;

(vi) A certification that the product does or does not comply with the domestic origin manufacturing provisions of the “Buy American” requirements of the Rural Electrification Act of 1938 (52 Stat. 818), for acceptance by September 30 every three years. The required data and certification must have been gathered within 90 days of the submission.

(4) Initial and requalification acceptance requests should be addressed to: Chairman, Technical Standards Committee “A” (Telephone), Telecommunications Standards Division, Rural Utilities Service, Washington, DC 20250–1500.

(5) Tests on 100 percent of completed cable. (i) The armor for each length of cable must be tested for continuity using the procedures of ASTM D 4566–90.

(ii) Attenuation for each optical fiber in the cable must be measured.

(iii) Optical discontinuities must be isolated and their location and amplitude recorded.

(6) Capability tests. Tests on a quality assurance basis must be made as frequently as is required for each manufacturer to determine and maintain compliance with:

(i) Numerical aperture and bandwidth of multimode fibers;

(ii) Cut off wavelength of single mode fibers;

(iii) Dispersion of single mode fibers;

(iv) Shrinkback and cold testing of loose tube and tight tube buffers;

(v) Adhesion properties of the protective fiber coating;

(vi) Dielectric strength between the armor and the metallic central member;

(vii) Performance requirements for the inner and outer jacketing materials;

(viii) Performance requirements for the filling and flooding compounds;

(ix) Bonding properties of the coated armoring material;
(x) Sequential marking and lettering;
(xii) Cable bend and cable impact tests;
(xii) Water penetration and compound flow tests;
(xiii) Cable twist, cable flex, and cable compression tests; and
(xiv) Performance requirements of support messenger.

(t) Records of optical and physical tests.
(1) Each manufacturer must maintain suitable summary records for a period of at least 3 years of all optical and physical tests required on completed cable by this section as set forth in paragraphs (s)(5) and (s)(6) of this section. The test data for a particular reel must be in a form that it may be readily available to RUS upon request. The optical data must be furnished to the purchaser on a suitable and easily readable form.

(2) Measurements and computed values must be rounded off to the number of places or figures specified for the requirement according to ASTM E 29–90.

(u) Manufacturing irregularities.
(1) Repairs to the armor, when present, are not permitted in cable supplied to end users under this section.

(2) Minor defects in the inner and outer jacket (defects having a dimension of 3 millimeter or less in any direction) may be repaired by means of heat fusing in accordance with good commercial practices utilizing sheath grade compounds.

(3) Buffer tube repair is permitted only in conjunction with fiber splicing.

(v) Packaging and preparation for shipment.
(1) The cable must be shipped on reels. The diameter of the drum must be large enough to prevent damage to the cable from reeling and unreeling. The reels must be substantial and so constructed as to prevent damage during shipment and handling.

(2) A circumferential thermal wrap or other means of protection complying with the requirements of appendix B of this section must be secured between the outer edges of the reel flange to protect the cable against damage during storage and shipment.

(3) Cable manufactured to the requirements of this section must be sealed at the ends to prevent entrance of moisture. The method of sealing must be accepted by RUS prior to its use.

(4) The end-of-pull (outer end) of the cable must be securely fastened to prevent the cable from coming loose during transit. The start-of-pull (inner end) of the cable must project through a slot in the flange of the reel, around an inner riser, or into a recess on the reel flange near the drum and fastened in such a way to prevent the cable from becoming loose during installation.

(5) Spikes, staples or other fastening devices must be used in a manner which will not result in penetration of the cable.

(6) The arbor hole must admit a spindle 63.5 millimeters in diameter without binding. Steel arbor hole liners may be used but must be accepted by RUS prior to their use.

(7) Each reel must be plainly marked to indicate the direction in which it should be rolled to prevent loosening of the cable on the reel.

(8) Each reel must be stenciled or lettered with the name of the manufacturer.

(9) The following information must be either stenciled on the reel or on a tag firmly attached to the reel:

- Optical Cable
- Number of Fibers
- Armored or Nonarmored
- Year of Manufacture
- Name of Cable Manufacturer
- Length of Cable
- Reel Number
- RUS 7 CFR 1755.900

Example:

- Optical Cable
- 4 fiber
- Armored
- 1988
- XYZ Company
- 1050 meters
- Reel Number 3
- RUS 7 CFR 1755.900

(10) When preconnectorized cable is shipped, the splicing modules must be protected to prevent damage during shipment and handling. The protection method must be accepted by RUS prior to its use.

(The information collection and record-keeping requirements of this section have been approved by the Office of Management and Budget (OMB) under control number 0572–0059)
APPENDIX A TO §1755.900—QUALIFICATION TEST METHODS

(1) The test procedures described in this appendix are for qualification of initial cable designs and major modifications of accepted designs. Included in (V) of this appendix are suggested formats that may be used in submitting test results to RUS.

(II) Sample selection and preparation. (1) All testing must be performed on lengths removed sequentially from any of the same cables listed below. The cables must not have been exposed to temperatures in excess of 38 °C since their initial cool downs after sheathing. The lengths specified are minimum lengths and if desirable from a laboratory testing standpoint longer lengths may be used:
   (a) 12 single mode fiber jacketed cable consisting of 6 single mode dispersion-shifted fibers and 6 single mode dispersion-shifted fibers.
   (b) 12 multimode fiber jacketed cable consisting of 6 50/125 micrometer multimode fibers and 6 62.5/125 micrometer multimode fibers.
   (c) 24 fiber jacketed combination cable consisting of 6 50/125 micrometer multimode fibers; 6 50/125 micrometer multimode fibers; and 6 62.5/125 micrometer multimode fibers.

(2) Length A shall be a minimum of 50 meters long. Coil the sample with a diameter of 50 to 75 times its sheath diameter. Three lengths are required if only requesting acceptance for either single mode fiber cable (a), multimode fiber cable (b), or using the combination fiber cable (c). Six lengths, 3 lengths of single mode fiber cable (a), and 3 lengths of multimode fiber cable (b), are required if requesting acceptance for both single mode and multimode fiber cables.

(b) Length B shall be one meter long. Four lengths of either single mode fiber cable (a), multimode fiber cable (b) or the combination fiber cable (c) are required.

(c) Length C shall be 600 millimeters long. Four lengths of either single mode fiber cable (a), multimode fiber cable (b) or the combination fiber cable (c) are required.

(d) Data reference temperature. Unless otherwise specified, all measurement shall be made at 23±5 °C.

(III) Environmental tests—(1) Heat aging test.
   (a) Test samples. Place one or two samples of length A and one sample each of lengths B and C in an oven or environmental chamber. The ends of sample A must exit from the chamber or oven for optical tests. Securely seal the oven exit holes.
   (b) Sequence of tests. The samples are to be subjected to the following tests after conditioning:
      (i) Water Penetration Test outlined in paragraph (III)(2) of this appendix; and
      (ii) Jacket Slip Strength Test outlined in paragraph (III) (3) of this appendix. (For Flooded Designs Only)
   (c) Initial measurements. (i) For sample(s) A measure the attenuation for the single mode dispersion-shifted fibers at 1310 and 1550 nanometers, for single mode dispersion-shifted fibers at 1310 nanometers and/or for multimode fibers at 1310 nanometers at a temperature of 23±5 °C. Also measure the bandwidth of the multimode fibers. Calculate the attenuation data on a per kilometer basis. Calculate the bandwidth data on a megahertz-kilometer (MHz-km) basis.
      (ii) Record on suggested formats in (V) of this appendix or on other easily readable formats.
   (d) Heat conditioning. (i) Immediately after completing the initial measurements, condition the sample(s) for 14 days at a temperature of 65±2 °C.
      (ii) At the end of this period note any exudation of cable filler. Measure the parameters given in paragraph (III)(1)(c) of this appendix. Record on suggested formats in (V) of this appendix or on other easily readable formats.
   (e) Overall optical deviation. (i) Calculate the change in all parameters between the final parameters after conditioning with initial parameters in paragraph (III)(1)(c) of this appendix.
      (ii) The stability of the optical parameters after completion of this test must be within the following prescribed limits:
         (A) Attenuation. The attenuation of each multimode fiber must not change by more than 0.3 dB/km and the attenuation of each single mode fiber must not change by more than 0.3 dB/km.
         (B) Bandwidth. The bandwidth of each multimode fiber must not change by more than 15 percent from their original values.
   (2) Water penetration testing. (a) A watertight closure must be placed over the jacket of length B from paragraph (III)(1)(a) of this appendix. The closure must not be placed over the jacket so tightly that the flow of water through existing voids or air spaces is restricted. The other end of the sample must remain open.
      (b) Test per Option A or Option B. (1) Option A. Weigh the sample and closure prior to testing. Fill the closure with water and place under a continuous pressure of 10 ± 0.7 kilopascals for one hour. Collect the water leakage from the end of the test sample during the test and weigh to the nearest 0.1 gram. Immediately after the one hour test, seal the ends of the cable with a thin layer of grease and remove all visible water from the closure, being careful not to remove water that penetrated into the core during the test. Reweight the sample and determine the weight of water that penetrated into the core.
(ii) Option B. Fill the closure with a 0.2 gram sodium fluorescein per liter water solution and apply a continuous pressure of 10 ±0.7 kilopascals for one hour. Catch and weigh any water that leaks from the end of the cable during the one hour period. If no water leaks from the sample, carefully remove the water from the closure. Then carefully remove the outer jacket, armor, if present, inner jacket, if present, and core wrap one at a time, examining with an ultraviolet light source for water penetration. After removal of the core wrap, carefully dissect the core and examine for water penetration within the core. Where water penetration is observed, measure the penetration distance.

(3) Jacket slip strength test. (For Flooded Design Only) (a) Sample selection. Test sample C from paragraph (III)(1)(a) of this appendix.

(b) Sample preparation. Prepare test sample in accordance with the procedures specified in ASTM D 4565–90a.

(c) Sample conditioning and testing. Remove the sample from the tensile tester prior to testing and condition for one hour at 50 ±2 °C. Test immediately in accordance with the procedures specified in ASTM D 4565–90a. A minimum jacket slip strength of 67 newtons is required. Record the load attained on the suggested formats in (V) of this appendix or on other easily readable formats.

(4) Temperature and humidity exposure. (a) Repeat paragraphs (III)(1)(a) through (III)(1)(c)(ii) of this appendix for separate set of samples A, B, and C which have not been subjected to prior environmental conditioning.

(b) Immediately after completing the measurements, expose the test sample to 100 temperature cyclings. Relative humidity within the chamber shall be maintained at 90 ±2 percent. One cycle consists of beginning at a stabilized chamber and test sample temperature of 52 ±2 °C, increasing the temperature to 57 ±2 °C, allowing the chamber and test samples to stabilize at this level, then dropping the temperature back to 52 ±2 °C.

(c) Repeat paragraphs (III)(1)(d)(ii) through (III)(3)(c) of this appendix.

(5) Temperature cycling. (a) Repeat paragraphs (III)(1)(a) through (III)(1)(c)(ii) of this appendix for separate set of samples A, B, and C which have not been subjected to prior environmental conditioning.

(b) Immediately after completing the measurements, subject the test sample to 10 cycles of temperature between −40 °C and +60 °C. The test sample must be held at each temperature extreme for a minimum of 1 1⁄2 hours during each cycle of temperature. The air within the temperature cycling chamber must be circulated throughout the duration of the cycling.

(c) Repeat paragraphs (III)(1)(d)(ii) through (III)(3)(c) of this appendix.

(IV) Control sample—(a) Test samples. A separate set of lengths B and C must have been maintained at 23 ±5 °C for at least 48 hours before the testing.

(b) Repeat paragraphs (III)(2) through (III)(3)(c) of this appendix for these samples.

(V) The following suggested formats may be used in submitting the test results to RUS:

§ 1755.910 RUS specification for outside plant housings and serving area interface systems.

(a) Scope. (1) The purpose of this specification is to inform manufacturers and users of outside plant housings and serving area interface (SAI) systems of the engineering and technical requirements that are considered necessary for satisfactory performance in outside plant environments. Included are the mechanical, electrical, and environmental requirements, desired design features, and test methods for evaluation of the product.

(2) The housing and terminal requirements reflect the best engineering judgment available at the present time and may be subject to change due to advances in technology, economic conditions, or other factors.

APPENDIX B TO 7 CFR 1755.900—THERMAL REEL WRAP QUALIFICATION

(I) The test procedures described in this appendix are only for qualification of initial and subsequent changes in thermal reel wraps.

(II) Sample selection. All testing must be performed on two 450 millimeter lengths of cable removed sequentially from the same fiber jacketed cable. This cable must not have been exposed to temperatures in excess of 38 °C since its initial cool down after sheathing.

(III) Test procedure. (1) Place the two samples on an insulating material such as wood.

(2) Tape thermocouples to the jackets of each sample to measure the jacket temperature.

(3) Cover one sample with the thermal reel wrap.

(4) Expose the samples to a radiant heat source capable of heating the uncovered jacket sample to a minimum of 71 °C. A GE 600 watt photoflood lamp or an equivalent lamp having the light spectrum approximately that of the sun shall be used.

(5) The height of the lamp above the jacket shall be 380 millimeters or an equivalent height that produces the 71 °C jacket temperature on the unwrapped sample shall be used.

(6) After the samples have stabilized at the temperature, the jacket temperatures of the samples shall be recorded after one hour of exposure to the heat source.

(7) Compute the temperature difference between jackets.

(8) For the thermal reel wrap to be acceptable to RUS, the temperature difference between the jacket with the thermal reel wrap and the jacket without the reel wrap shall be greater than or equal to 17 °C.

(3) The test procedures described in this section are required by RUS to demonstrate the functional reliability of the product. However, other standard or unique test procedures may serve the same function. In such cases, RUS shall evaluate the test procedures and results on an individual basis.

(4) The test procedures specified herein satisfy the requirements of housings as well as the requirements of terminals that may be installed within housings. Some of the requirements are interrelated to several tests designed to determine the performance aspects of terminals and are directly affected by testing required for housings. Therefore, the manufacturer should carefully review all the test requirements in order to develop a testing schedule that is comprehensive, efficient in terms of the number of test specimens required and can be accomplished in an orderly and logical sequence.

(5) The specified tests may require special facilities to comply with Federal, State, or local regulatory requirements. Some test procedures are potentially hazardous to personnel because of the high voltages and mechanical forces involved. Safety precautions are necessary to prevent injury.

(6) Underwriters Laboratories, Inc. (UL) 94, Tests for Flammability of Plastic Materials for Parts in Devices and Appliances, fourth edition, dated June 18, 1991, referenced in this section is incorporated by reference by RUS. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. A copy of the UL standard is available for inspection during normal business hours at RUS, room 2845–S, U.S. Department of Agriculture, Washington, DC 20250–1500, or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html. Copies are available from UL Inc., 333 Pfingsten Road, Northbrook, Illinois 60062–2096, telephone number (708) 272–8800.

§ 1755.910  

(b) General information. (1) Outside plant housings are fabricated of either metallic or nonmetallic materials in different sizes and configurations to suit a variety of applications. The purpose of a housing is to protect its contents from environmental elements, rodents, insects, or vandalism and unauthorized access. Housings are designed with internal brackets for accommodating splicing, bonding and grounding connections, cable terminals, cross-connect facilities, load coils, and optical and electronic equipment.

(2) Pedestals are housings primarily intended to house, organize, and protect cable terminations incorporating terminal blocks, splice connectors and modules, ground lugs and load coils. Activities typically performed in a pedestal are cable splicing, shield bonding and grounding, inductive loading, and connection of subscriber drops.

(3) Serving area interface (SAI) cabinets are housings intended to perform some of the same functions as pedestals but are primarily intended to serve as the connecting terminal between feeder cable and distribution cables.

(4) Outside plant housings shall be manufactured in accordance with National Electrical Code (NEC) requirements, Underwriters’ Laboratories (UL) requirements, Department of Labor, Occupational Safety and Health Administration Standards (OSHA), and all other applicable Federal, State, and local requirements including, but not limited to, statutes, rules, regulations, orders, or ordinances otherwise imposed by law.

(c) General documentation requirements—(1) Installation and maintenance instructions. (i) Each product shall have available a set of instructions designed to provide sufficient information for the successful installation of the housing, cables, auxiliary equipment, and the associated splice preparation. The instructions shall be of sufficient size to be easily read and shall be printed using waterproof ink. Pedestal instruction sheets shall include a list of miscellaneous replacement parts that may be purchased locally. SAI systems shall be supplied with complete instructions for installation and use.

(ii) When requested by RUS, or an RUS borrower, the manufacturer shall prepare a training package for the purpose of training technicians in the use and installation of the product and its auxiliary equipment.

(iii) The manufacturer shall provide ordering information for repair parts. Repair parts shall be obtainable through a local distributor or shall be easily obtainable. Information describing equivalent parts and their sources should be provided for those parts that may also be obtained from other sources.

(2) Quality assurance. The manufacturer shall demonstrate the existence of an ongoing quality assurance program that includes controls, procedures, and standards used for vendor certification, source inspection, incoming inspection, manufacture, in process
testing, calibration and maintenance of tools and test equipment, final product inspection and testing, periodic qualification testing and control of nonconforming materials and products. The manufacturer shall maintain quality assurance records for five years.

(ii) For initial acceptance the manufacturer shall:

(A) Submit an original signature certification that the product complies with each section of the specification;
(B) Provide qualification test data;
(C) Provide OSHA Material Safety Data Sheets for the product;
(D) Provide a detailed explanation concerning the intended use and capacity of the product;
(E) Provide a complete set of instructions, recommendations for equipment organization and splicing;
(F) Agree to periodic plant inspections;
(G) Provide a certification that the product does or does not comply with the domestic origin manufacturing provisions of the “Buy American” requirements of the Rural Electrification Act of 1938 (52 Stat. 818);
(H) Provide user testimonials concerning field performance of the product;
(I) Provide product samples if requested by RUS; and
(J) Provide any other data required by the Chief, Outside Plant Branch (Telephone).

(iii) Each requirement of this section must be addressed in submissions for acceptance. The designation N/A may be entered when the requirements do not apply.

(iv) Acceptance requests should be addressed to: Chairman, Technical Standards, Committee “A” (Telephone), Telecommunications Standards Division, Rural Utilities Service, Washington, DC 20250-1500.

(d) Functional design criteria for housings—(1) General requirements. (i) The functional requirements for housings concern materials, finishes, environmental factors, and design features that are applicable to most above ground housings used in the outside plant.

(ii) Housings shall be of sufficient size to permit easily managed installation, operational, testing, and maintenance operations. The general shape of outside plant housings is usually comparable to that of a rectangular column or cylinder, with the shape of any particular housing being left to the manufacturer’s discretion. Each design is subject to acceptance by RUS.

(2) Housing types and capacities. (i) Housings used in outside plant are either the smaller housings generally known as pedestals or larger housings known as equipment or splice cabinets. Both categories may have designs intended for stake mounting, pole mounting, or pad mounting.

(ii) The classifications of pedestals are the general purpose channel Type (H) and the dome Type (M). The Type H pedestal has either front only access or back and front access while the Type M pedestal has top only access. Pedestals are further designated as follows:

<table>
<thead>
<tr>
<th>Stake mount- ed</th>
<th>Type</th>
<th>Pole mount- ed</th>
<th>Pole mount- ed (extra high)</th>
</tr>
</thead>
<tbody>
<tr>
<td>BD3</td>
<td>H</td>

<td>38,000</td>
<td>(2,300)</td>
</tr>
</tbody>
</table>

NOTE 1: Housings designed for unique purposes will be evaluated on a case-by-case basis.
(iv) Equipment cabinets intended for use as SAI housings shall be assigned size designations according to their maximum pair termination capacities. The capacity will vary depending on the type of terminating equipment used. SAI cabinets shall be suffix designated with an “A” for pole mounting, “X” for pad mounting, and “S” for stake mounting.

(v) Large pair count splice cabinets are classified according to their splice capacity. Approximately 48 cm³ (3.0 in.³) of splice area per pair straight spliced shall be permitted.

(vi) The minimum volume associated with large pair count splice cabinets shall be as shown in the following table:

<table>
<thead>
<tr>
<th>Splice cabinet designation</th>
<th>Minimum volume</th>
<th>Maximum splice capacity (pairs)</th>
</tr>
</thead>
<tbody>
<tr>
<td>BD6000</td>
<td>295,000 (18,000)</td>

<tr>
<td>BD8000</td>
<td>393,000 (24,000)</td>
<td>8,000</td>
</tr>
<tr>
<td>BD10000</td>
<td>491,000 (30,000)</td>
<td>10,000</td>
</tr>
</tbody>
</table>

NOTE 1: Additional sizes of splice cabinets shall be considered by RUS on a case-by-case basis.

(3) Design and fabrication requirements for housings. (i) Type H pedestal housings may consist of an enclosed channel incorporating an integrally mounted stake that serves as a backplate, or they may be designed for universal mounting on stakes or poles. The body of the housing shall have two major components; an upper cover and a base cover. The upper cover shall have a top, front and back plate with the front cover removable to permit entry and provide increased work space. The base cover shall consist of a front plate and back plate. The base cover back plate may be an extension of the upper back plate cover.

(ii) Type M pedestal housings shall consist of a one piece upper sleeve designed to fit over the base cover trapping air to prohibit water from entering the splice area when installed in locations prone to temporary flooding. Pedestals designed to be mounted extra high on poles for locations susceptible to deep snow shall have a bottom close-off option available to prohibit the ingress of birds, rodents and insects.

(iii) The external housing components on all outside plant housings shall provide reasonable protection against accidental removal or vandalism. housings shall be equipped with a cover plate retaining bolt and cup washer that may be opened only with an industry accepted socket type wrench. Housings may be equipped with provisions to allow the purchaser to install a padlock.

(iv) Installed housings shall resist the disassembling force of frost heaving applied to the bottom of ground line cover plates. The base cover must remain stationary to stabilize the contents of the housing cavity.

(v) In an effort to provide protection against dust penetration, blowing snow, rain, and ultraviolet light degradation of internal components, all mechanical gaps shall be restricted. The use of seals, overlaps, gaskets, and/or dovetailing is required to assure satisfactory protection of housed equipment.

(vi) Knockouts, cutouts, or notches designed to accommodate aerial service drops shall not be permitted. A design option for housings intended to accommodate service drops shall include a separate channel or equivalent in the base cover to allow future additions of service drops without the removal of gravel or the moisture barrier in the base of the housing. Service wire channels must be designed to prevent the entry of birds, reptiles, rodents and insects.

(vii) Minimal venting of SAI housings may be necessary to relieve internal pressure and condensation.

(viii) There shall be no aluminum housing components that will become buried in the soil when the housing is properly installed.

(ix) Housing components may be assembled using rivets, welds, glue, bolts and nuts, or other techniques suitable for the materials involved.

(x) Housings and their components that require field assembly must be capable of being assembled with tools normally available to outside plant technicians.
(xi) Hinged doors on SAI housings and large pair count splice housings shall be equipped with a device that restrains the doors in the open position.

(xii) Outside plant housings shall be free of sharp edges, burrs, etc., that could present a safety hazard to personnel involved in installation and use of the product or to the general public. Surfaces inside housings must not allow pinching of conductors during installation of cover plates or the opening and closing of doors.

(xiii) A ground line mark shall be provided, approximately 15 cm (6 in.) below the top edge of the housing base cover plate on housings intended for ground level mounting. Base cover plates shall have a minimum height of 31 cm (12 in.).

(xiv) Any housing, which weighs in excess of 91 kilograms (kg) (200 pounds (lb)), including its contents, shall be equipped with lifting brackets for attaching hoisting cables or chains.

(xv) Housing stakes shall be a minimum of 107 cm (42 in.) in length. If fabricated from steel, they shall have a minimum thickness of No. 13 gauge as measured according to American Society for Testing and Materials (ASTM) A 525–91b. Stakes shall be formed into a “U” channel with a minimum depth of 2 cm (0.75 in.). The stake shall be a single part of suitable design strength for driving 91 cm (36 in.) into the soil with hand tools without damage such as bending or warping. The stake shall have adequate mounting holes having a minimum separation of 15 cm (6 in.) for mounting the housing baseplate. The stake material must resist corrosion and deterioration when exposed to soil and atmospheric conditions.

(xvi) The housing design must permit a logical progression of installation steps that would normally be encountered in typical field installations.

(xvii) Provisions for attaching housings to stakes, poles, walls, other housings, or pads shall be provided for each design intended for those purposes. Locations of holes for mounting attachments may be provided by knockouts on above ground components. Mounting hole locations for below ground components may be predrilled.

(xviii) Pole mounting hardware shall provide at least 1.3 cm (0.5 in.) clearance from the pole to the housing. Pole mounting brackets shall accommodate the wide range of pole sizes used in the telephone industry.

(xix) Pad-mounted housings shall have hardware available for anchoring the housing base to the pad. A template may be provided to assist in the location of mounting attachment details for pad preparation.

(xx) Housings equipped with stub cables shall have strain relief devices to permit shipping and handling of the housing without damage to the housing or stub cables. Only RUS accepted cable shall be used for stub cables. The cable manufacturer’s recommendations concerning minimum bend radius shall be observed. The minimum bend radius for most copper cables is 10 times the cable diameter.

(xxii) Cable supports shall be provided near the top of the ground line cover and other appropriate locations within the housing to provide cable stability consistent with the intended use and capacity of the housing. Cable supports shall be capable of holding a minimum load of 23 kg (50 lb).

(xxii) An adequate supply of nonmetallic retainer clips or tie wraps capable of supporting a minimum load of 23 kg (50 lb) shall be provided with the housing. Adequate spaces for installation of the clips or tie wraps must be provided on the housing backplate and cable supports.

(xxiii) Housing chambers designed for splicing operations shall be equipped with insulated supporting straps or rods suitable for supporting splice bundles. The insulation on the straps or rods shall extend for the entire length of the device and shall have a dielectric strength of 15 kilovolts (kv) direct current (dc) minimum. Housings having an “H” frame design where both front and rear covers may be removed may incorporate insulated tie bars to be used as cable supports.

(xxiv) Housings designed to contain equipment in addition to splices shall be equipped with a device for physically separating the splice area from the service area of the housing.

(xxv) A dielectric shield rated at 15 kv dc shall be provided to enclose the
cable splice area. The shield shall extend from the lower cable supports to within 2.5 cm (1 in.) of the top of the housing. The shield shall be equipped with Velcro or equivalent fastening devices designed to hold the shield in both the open or closed positions. The fastening devices shall extend along the entire vertical edge of the dielectric shield.

(xxvi) Mounting arrangements for a variety of terminal blocks and other equipment shall be provided by means of good housekeeping panels or other devices that may enhance the service aspect of the housing.

(xxvii) Housings designed for SAI cabinets may be shipped with terminal blocks installed and stub cables attached. If this option is exercised, the stub cables and terminal blocks must be RUS accepted. In all cases, SAI cabinets must be equipped with appropriate mounting devices for installing the peripheral equipment required for a serving area interface.

(xxviii) SAI cabinets shall be designed to provide physical separation between the splicing area and the area provided for running cross-connect jumpers.

(xxix) SAI cabinets and large splice housings must have an external feature for attaching a padlock to prevent unauthorized entry.

(XXX) Each housing shall have a tinned or zinc electroplated copper alloy or equivalent connector plate or bar to be used for terminating ground and cable shield bond connections. The device shall be equipped with captive studs and nuts with captive lock washers designed for attaching 6 American Wire Gauge (AWG) copper bonding harness wire or braid and a 6 AWG copper ground wire. Connector plates shall be equipped with enough studs and nuts to provide individual connections equivalent to the maximum number of cable sheaths recommended for the housing. Housings shall incorporate design features that enable the field installation of at least one additional connector plate for service conditions that require numerous connections. A bonding and grounding system capable of providing support and strain relief for service wires shall be provided for housings intended for use as distribution points. The bonding system shall be designed to provide sheath continuity as cable and service wires are installed, and prior to any other operation being performed. The bonding arrangement shall provide electrical continuity between all bonds and the ground connector plate. The bonding and grounding arrangement shall permit the lifting of individual cable ground connections for testing and cable locating activities without jeopardizing the grounding potential of other cables that may enter the housing. The bonding and grounding system shall be capable of conducting a current of 1000 amperes for at least 20 seconds.

(4) Warning sign. (i) A buried cable warning sign shall be securely attached to the outside of each housing. The lettering information on the sign shall be permanent.

(ii) For pedestals, the sign shall be centered horizontally on the front cover and the top of the sign shall be not more than 10 cm (4 in.) from the top of the housing.

(iii) For SAI cabinets, the sign shall be centered horizontally and vertically on the door. If there are two doors, the sign shall be mounted on the left door.

(iv) Deviations from warning sign location requirements are permitted only for housing design constraints. Alternate sign locations will be considered by RUS.

(v) The RUS standard sign design is shown in Figure 1.

(5) Housing materials. (i) Materials used in housings shall present no environmental or safety hazard as defined by industry standards or Federal, State, or local laws and regulations.

Figure 1 is as follows:
(ii) All materials are required to have fire resistance ratings consistent with recognized industry standards. External materials must be flame resistant. 

(iii) All materials used in the manufacture of housings or component parts must achieve the required strength properties, resist deterioration when exposed to outdoor conditions, and be
acceptable to RUS for the specific application. New materials or materials not familiar to the RUS staff shall be supported by test and performance data which demonstrates their suitability for the intended use.

(iv) Nonmetallic housing materials shall have a fungus growth rating no greater than one according to ASTM G 21–90.

(v) Metallic components shall be either corrosion resistant or protected against corrosion and must not produce galvanic corrosion in wet or humid conditions on other metals that may be present in the housing environment.

(vi) Mill galvanized steel used in the manufacture of housings shall comply with the appropriate requirements of one of the following standards:

(A) ASTM A 109–91;
(B) ASTM A 366/A 366M–91;
(C) ASTM A 525–91b; or
(D) ASTM A 526/A 526M–90.

(vii) Hot rolled steel shall comply with the appropriate requirements of one of the following standards:

(A) ASTM A 569/A 569M–91a; or
(B) ASTM A 621/A 621M–92.

(viii) Cold rolled steel shall comply with the appropriate requirements of one of the following standards:

(A) ASTM A 109–91; or
(B) ASTM A 366/A 366M–91.

(ix) Steel parts used for internal housing brackets shall be hexavalent chromate coated or zinc plated in accordance with ASTM B 633–85.

(x) Hardware items used for assembling or fastening housing components shall be 300 series or passivated 400 series stainless steel or hot dip galvanized in accordance with ASTM A 523–85.

(xi) Painted metal housings shall have a minimum gloss of 60 (60° specular) in accordance with ASTM D 523–89.

(ii) All painted surfaces shall have a uniform color and texture in accordance with ASTM D 3928–89. Nonmetallic housings shall meet recognized industry standards concerning optical appearance for gloss and haze as applicable for the material.

(iii) The colors of housings that RUS will consider for acceptance shall be as follows:

<table>

(7) Installation requirements. (i) The design of the housing must provide for a logical and normal installation sequence, i.e., excavation, installation of
§ 1755.910

Description of test housing—

(i) Each distinctly designed and configured family of housings intended to perform a particular function shall be tested.

(ii) The typical test sample shall consist of the exterior housing components such as covers, backplates, good housekeeping panels, cap assembly, anchor posts, decals, etc. Interior components must include the bonding and grounding hardware for cables and service wires and the dielectric shield. The housing may include terminal blocks or cross-connect modules, cable splices, or the typical outside plant equipment the housing is designed to contain and protect.

(3) Environmental requirement for housings—

(i) Thermal shock. The test housing shall be placed in a test chamber and exposed to the temperature cycle of Figure 2 for five complete cycles. The step function nature of the temperature changes may be achieved by insertion and removal of the test housing from the chamber. The soak time at each temperature shall be four hours. The housing shall be removed from the test chamber at the conclusion of the five-cycle period. After the test housing temperature has stabilized to room temperature, the housing must be inspected for deterioration of materials and satisfactory operation of mechanical functions. Figure 2 is as follows:
(ii) Thermal shock and humidity. The test housing shall be placed in an environmental test chamber at 95 ±3 percent (%) relative humidity (RH) and temperature cycled per Figure 3 for a period of 30 days. At the end of the test there shall be no rust or corrosion of any closure components. Minor corrosion due to surface scratches, nicks, etc. is permitted. If the closure is made of a nonmetallic material, there shall be no signs of degradation. Figure 3 is as follows:
(iii) **Humidity and condensation.** Test panels shall be placed in an environmental chamber and subjected to 1,008 hours (42 cycles) of exposure per ASTM D 2247–92. One cycle consists of 24 hours of 100% humidity (with condensation on the panels) at a cabinet temperature of 38±1 °C (100±2 °F) and an ambient temperature of 25±1 °C (77±2 °F) without heat input. Upon completion of cycling, the test panels shall be subjected to an 11 newton-meter (N-m) (100 pound-inches (lb-in.)) impact test using the Gardner-Impact Tester or equivalent. Test panels shall show no substrate or coating cracking or loss of coating adhesion on either side.

(iv) **Weatherability.** Three test panels shall be tested for weatherability in accordance with the appropriate procedures of either ASTM D 222-89 or ASTM G 23-90. Total exposure time shall be a minimum of 800 hours. Failure is defined as fading, cracking, blistering, or delamination on any of the three test panels.

(v) **Low temperature durability.** Low temperature durability shall be proven by exposing the three test panels from (e)(3)(iv) of this section to at least 25 continuous cycles of the following test sequence:

(A) To insure complete saturation of the three test panels, soak them for 96 hours in a container of distilled water 22±2 °C (71.6±4 °F);

(B) Lower the temperature of the water and the immersed test panels to −28±2 °C (−18.4±4 °F) and stabilize for 24 hours;

(C) Thaw the water with the samples to 22±2 °C (71.6±4 °F) and stabilize for 24 hours;

Note: Relative Humidity = 95% ± 3%
(D) Repeat the procedure 24 times. Any cracking, crazing, deforming, or delaminating on any of the three test panels shall be considered a failure; and

(E) Remove the samples from the water and impact test the three panels by delivering a force of 11.3 N-m (100 lb-in.) using a Gardner-Impact Tester to each specimen at 71, 22, and $-28 \pm 2^\circ$ C ($159.8, 71.6, \text{and} -18.4 \pm 3.6^\circ$ F), after stabilizing them at those temperatures for at least two hours. Visual inspection shall reveal no deformation or perforations on any of the test panels.

(vi) Corrosion resistance. Corrosivity shall be tested in accordance with the requirements of ASTM B 117–90. Both scribed and unscribed panels shall be evaluated following the procedures of ASTM D 1654–92. Scribed panels shall have a rating of at least six, following 500 hours of exposure to salt fog, and the unscribed panels shall have a rating no lower than 10, after 1,000 hours exposure. Visual rust inspection shall confirm no more than 0.03% rusting (rust grade 9) of the surface area of the test sample when evaluated in accordance with ASTM D 610–85(1989). The unscribed samples shall be impacted with an 11.3 N-m (100 lb-in.) force, using a Gardner-Impact Tester or equivalent. Visual inspection of the impacted samples shall reveal no loss of adhesion between the base material and the coating or cracking at the finish on the test panels.

(vii) Fungi resistance. Fungi resistance of nonmetallic housing materials shall be tested according to the procedures of ASTM G 21–90. Any rating greater than one shall be considered a failure.

(viii) Stress crack resistance. The stress cracking characteristics of nonmetallic housing components shall be tested in accordance with ASTM D 1693–70 (Reapproved 1988). The tests shall be performed at $492\frac{1}{2}^\circ$ C ($120\frac{3}{4}^\circ$ F) for 14 days and exposed to the following materials:

(A) Industry recognized filling compounds;
(B) Isopar M;
(C) Industry recognized solvents;
(D) Industry recognized encapsulants; and
(E) Commonly used insect, pest, and weed control products and agricultural fertilizers.

(ix) Chemical resistance. (A) Chemical resistance shall be determined by immersing representative nonmetallic material samples in each of the following solutions for 72 hours at 22±2$^\circ$ C (71.6±3.8$^\circ$ F):

1. 3% sulfuric acid;
2. 100 parts per million (ppm) trichloroethane in water;
3. 0.2 N sodium hydroxide; and
4. Unleaded high octane gasoline.

(B) There shall be no swelling, deformation, or softening of the material samples or any discoloration of the solution.

(x) Ultraviolet resistance. Test panels of metallic and nonmetallic outer housing materials shall be subjected to 700 hours exposure per ASTM D 2565–92 using the type BH apparatus. The panels shall not exhibit fading, blistering, checking, or delamination.

(xi) Weather tightness. The housing shall be mounted in its typical field installation position and sprayed with water. The temperature of the water shall be adjusted to be equal to or warmer than the temperature of the cabinet interior to avoid the possibility of condensation. A water spray head shall be used to direct water at the housing so that the water stream will strike the assembly at a downward angle of 45 degrees. The flow of the water shall be 3.8 liters per minute (one gallon per minute), with 276 kilopascals (40 pounds per square inch) head of pressure. The spray head shall be held 1.8 meters (6 feet (ft)) from the test cabinet. The spray head shall be adjusted so that water impinges uniformly over the housing surface. The duration of the test shall be five minutes. All vertical cabinet surfaces shall be tested by this procedure. The exterior of the cabinet shall be thoroughly dried with towels (no heat drying) prior to examination of the housing interior. The interior of the housing shall be checked for presence of water. Wetting of over-lapping surfaces is permitted. There shall be no presence of water inside the housing.

(xii) Wind Resistance. (A)(1) Stub pole or wall mounted SAI and large pair
count splice housings shall be subjected to a load \((F)\) as shown in Figure 4 and the following table to simulate the turning moment equivalent to a uniform wind load of 161 kilometers per hour \((\text{km/h})\) \((100 \text{ miles per hour} \ (\text{mi/h})\)) perpendicular to the largest surface area.

<table>
<thead>
<tr>

</tr>
</thead>
<tbody>
<tr>
<td>5,200 ((800)) or less</td>
<td>18 ((40))</td>
</tr>
</tbody>
</table>

\[(2)\] The procedures for housings with larger surface area will be evaluated by RUS on a case-by-case basis.

\[(3)\] Figure 4 is as follows:
(B)(1) Pad or ground mounted SAI or splice housings shall be subjected to a load (F) as shown in Figure 5 and the following table to simulate the overturning moment equivalent to a uniform wind load of 161 km/h (100 mi/h) perpendicular to the largest surface area.
### § 1755.910

<table>
<thead>

<td>14,300 (2,200) or less</td>
<td>109 (240)</td>
</tr>
</tbody>
</table>

Note: The procedures for housings with larger surface areas will be evaluated by RUS on a case-by-case basis.

(2) The housing shall remain in its original mounting position throughout the test and exhibit no mechanical deformation.

(3) Figure 5 is as follows:
(xiii) **Fire resistance.** (A) The test housing shall be installed in a manner typical of field installation. U.S. No. 1 wheat straw shall be placed on the ground around the housing base in an one meter (3 ft) radius at an approximate depth of 10 cm (4 in.). The straw shall be ignited and permitted to burn fully. After the housing has cooled, its contents shall be inspected for evidence of ignition, melting, burning, or structural damage. Damage sufficient to impair service constitutes failure.

Notes:

1. The load "F" shall be applied perpendicular to the cabinet width where the width is greater than the depth.

2. If a foundation is used, the load "F" shall be applied toward the edge nearest to the cabinet.
(B) Polymeric materials shall be tested in accordance with the Underwriters Laboratories Publication (UL) 94, dated June 18, 1991. Materials used in housing components shall have a rating of 94V–0 or 94V–1 and shall not sustain combustion when an open flame source is removed.

(4) Mechanical requirements for housings—(i) Impact resistance. The test housing shall be subjected to the following impacts according to its minimum volume or minimum width and depth as shown in the following table:

<table>
<thead>
<tr>
<th>Minimum volume cm³ (in.³)</th>
<th>Minimum width or depth cm (in.)</th>
<th>Impact force N-m (lb-ft)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Less than 35,000 (2,100)</td>
<td>Less than 13 (5) ....</td>
<td>68 (50)</td>
</tr>
<tr>
<td>35,000 (2,100) or greater</td>
<td>13 (5) or greater ....</td>
<td>136 (100)</td>
</tr>
</tbody>
</table>

(A) The impact force shall be delivered to the front, back, and top surfaces. Circular housings shall be impacted on side surfaces 180° apart and on the top. The device used to deliver the force shall be spherical and approximately 25 to 31 cm (10 to 12 in.) in diameter. A typical test procedure may include the use of a hard rubber bowling ball, weighing 6 to 7 kg (13 to 16 lb), enclosed in a mesh bag, attached to a rope with a metal ring. The load shall be dropped vertically on the top surface and applied to the sides with a pendulum motion using the appropriate height and extension arm to achieve the required impact force. The housing must be impacted at the approximate mid-point of the surface area.

(B) Housings shall be conditioned for a minimum of eight hours at −40 °C (−40 °F) in an environmental chamber prior to testing. If the chamber is insufficient in size to conduct tests within the chamber, the housing may be removed and shall be tested within 10 minutes after removal.

(C) After impact testing, the housing shall not exhibit fractured or ruptured surfaces sufficient to allow the ingress of moisture or dust. The housing shall not exhibit mechanical damage that would impair the functioning of hinges, latches, locks, etc.

(ii) Load deflection. Free standing buried plant housings shall be tested for load deflection in accordance with Figure 6. The assembled housing shall be rigidly held in place by a mechanical means to simulate a normal field installation. A length of wire or cable, or other suitable material, shall be placed around the top section of the housing and deadended. The wire or cable shall be initially tensioned to 23 kg (50 lb). A measurement shall then be taken of the deflection of the housing at the top as shown in Figure 6. The deflection shall be recorded at incremental loads of 23 kg (50 lb) until destruction of the housing occurs. The average load for the three directions shall not be less than 136 kg (300 lb) and the minimum load in any direction shall be 113 kg (250 lb). Failure is defined as housing component fracture or crazing of the housing’s surface finish. Figure 6 is as follows:
(iii) **Vibration requirements.** The test housing and its contents shall be subjected to acceleration at a sine wave frequency sweep rate as shown in Figure 7 for a housing packaged for shipment and Figure 8 for an unpackaged housing. The frequency sweep may be performed continually or sequentially. The test shall be conducted once along each of three mutually perpendicular axes of the housing. There shall be no mechanical or electrical degradation of the housing or its contents. Noticeable damage to the housing constitutes failure. Figure 7 and Figure 8 are as follows:

Notes:

1. One pedestal-mounted housing of each BD classification shall be tested to failure in each of the directions shown above.
2. A total of three pedestal-mounted housings of each BD classification shall be subjected to the required loads in each direction.
3. The average load for the three directions shall not be less than 136 kilograms (300 pounds). The minimum load shall be 113 kilograms (250 pounds).
4. Pole mounted housings shall be subjected to the same loading criteria.
FIGURE 7
VIBRATION TEST FOR PACKAGED HOUSINGS

Acceleration (m/s²)

4.9 m/s²

Sweep Rate
0.1 Octave/Min.

Frequency (Hz)
(iv) **Drop test requirements.** Housings shall be subjected to appropriate drop tests according to their weight. The drop tests shall be performed on housings and their contents as normally packaged as well as on unpackaged housings. The tests shall be conducted on a smooth level concrete floor or similar unyielding surface. For corner drops, the packaged housing and its contents shall be oriented at impact such that a straight line drawn through the struck corner and package geometric center is approximately perpendicular to the impact surface.

(A) Packaged housings and their contents weighing 91 kg (200 lb) or less...
shall be capable of enduring a single drop on each face or corner without damage from a height specified as follows:

<table>
<thead>
<tr>
<th>Packaged housing including contents weight kg (lb)</th>
<th>Drop height cm (in.)</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 to 9 (0 to 20)</td>
<td>76 (30)</td>
</tr>
<tr>
<td>10 to 23 (21 to 50)</td>
<td>61 (24)</td>
</tr>
<tr>
<td>24 to 45 (51 to 100)</td>
<td>53 (21)</td>
</tr>
<tr>
<td>46 to 91 (101 to 200)</td>
<td>46 (18)</td>
</tr>
</tbody>
</table>

(B) Packaged housings and their contents weighing more than 91 kg (200 lb) shall be capable of enduring a single drop on each of two diagonally opposite corners of the package without significant damage from a height specified as follows:

І) The packaged housing and contents shall be placed on its normal shipping base with one corner supported 15 cm (6 in.) above the floor and the other corner of the same end supported 30 cm (12 in.) above the floor as shown in Figure 9. The unsupported end of the package shall be raised so that the lowest corner reaches the height listed above and then allowed to fall freely. Figure 9 is as follows:

**FIGURE 9**

CORNER DROP TESTS FOR PACKAGED HOUSINGS WEIGHING MORE THAN 91 KILOGRAMS (200 POUNDS)
(2) The procedure of paragraph (e)(4)(iv)(B)(1) of this section shall be repeated for the diagonally opposite corner.

(3) The packaged housing and contents shall be capable of enduring a single drop on each edge of the base of its normal shipping position from the required height without damage and shall remain operational without function impairment. The packaged housing and contents shall be placed on its base with one edge supported on a sill 15 cm (6 in.) high and the unsupported edge raised to the required height as shown in Figure 10 and allowed to fall freely. Figure 10 is as follows:

---

![Figure 10: Edge Drop Test for Packaged housings Weighing More Than 91 Kilograms (200 Pounds)](image)

(4) The procedure of (e)(4)(iv)(B)(3) of this section shall be repeated for all edges of the base.

(C) Unpackaged housings and their contents weighing 23 kg (50 lb) or less shall be capable of enduring a single drop on each face and adjacent corners without significant damage from a height specified as follows:

<table>
<thead>
<tr>
<th>Packaged housing including contents weight kg (lb)</th>
<th>Drop height cm (in.)</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 to 9 (0 to 20)</td>
<td>10 (4)</td>
</tr>
<tr>
<td>10 to 23 (21 to 50)</td>
<td>8 (3)</td>
</tr>
</tbody>
</table>

(D)(1) Unpackaged housings and their contents weighing more than 23 kg (50 lb) shall be capable of enduring a single drop without significant damage when lifted by its normal hoisting supports as shown in Figure 11 and with its lowest point at a height specified as follows:

<table>
<thead>
<tr>
<th>Packaged housing including contents weight kg (lb)</th>
<th>Drop height cm (in.)</th>
</tr>
</thead>
<tbody>
<tr>
<td>23 to 45 (51 to 100)</td>
<td>5 (2)</td>
</tr>
</tbody>
</table>

(2) Figure 11 is as follows:
(v) **Firearms resistance.** All housings shall be tested for resistance to penetration by direct impact from a 12 gauge shotgun equipped with a modified choke and the use of a 3¾ dram equivalent powder charge and 35 grams #6 lead shot fired from a distance of 15 m (50 ft). The 12 gauge shotgun shall be fired from a normal standing position at the front side of the housing. Penetration through the housing wall by the lead shot shall constitute failure.

(vi) **Lifting hardware requirements.** The lifting hardware on housings and their contents that weigh more than 91 kg (200 lb) shall be tested. The housing shall be fastened to a restraining device such as a concrete slab and subjected to loading through the lifting attachments to simulate the lifting
load. For the first test a lifting line equiped with a dynamometer shall be attached to the housing lifting hardware and a load applied equal to three times the weight of a fully equipped housing. Deformation or damage to the housing or lifting hardware constitutes failure. A second test shall be conducted with the same arrangements as for the first except that a load shall be applied equal to six times the weight of a fully equipped housing. There shall be no catastrophic failure of the lifting hardware or housing.

(vi) Stabilized door restraining evaluation. Each door, restrained by a door restraining device, shall be evaluated by lifting a test housing, with the maximum length and weight of cable orderable, in a manner causing the full weight of the cable to be supported by the cabinet. Examination of the cable sheath after lifting shall reveal no tearing, rupturing, or other damage. The cable conductors and shield shall be tested for shorts and opens. Electrical defects to the stub cable or damage to the housing constitutes failure.

(vii) Stub cable strain relief tests. Housings equipped with cable stubs and cable shipping retainer shall be tested by lifting a test housing, with the maximum length and weight of cable orderable, in a manner causing the full weight of the cable to be supported by the cabinet. Examination of the cable sheath after lifting shall reveal no tearing, rupturing, or other damage. The cable conductors and shield shall be tested for shorts and opens. Electrical defects to the stub cable or damage to the housing constitutes failure.

(viii) Door restrainer evaluation. (A) The housing shall be positioned with the door held in the open position by the door restraining device. A load, determined in accordance with the following table, shall be applied to the center of the door, perpendicular to the door and in each of the opening and closing directions.

<table>
<thead>
<tr>
<th>Maximum area of door surface cm² (in²)</th>
<th>Load kg (lb)</th>
</tr>
</thead>
<tbody>
<tr>
<td>5,200 (800) or less</td>
<td>72 (160)</td>
</tr>
<tr>
<td>5,201 to 9,100 (801 to 1,400)</td>
<td>127 (280)</td>
</tr>
<tr>
<td>9,101 to 13,000 (1,401 to 2,000)</td>
<td>181 (400)</td>
</tr>
</tbody>
</table>

NOTE: Test procedures for housings with larger doors will be evaluated by RUS on a case-by-case basis.

(B) There shall be no functional failure of the restraining device nor mechanical damage to the housing.

(ix) Security evaluation. The security locking device shall be capable of withstanding a maximum torque of 2.8 N-m (25 lb-in.) without incurring physical damage to the closure, thereby resulting in a condition where the closure cannot be either accessed or locked.

(5) Electrical requirements for housings. Each bonding stud and nut location shall be evaluated by attaching one lead from a dc or alternating current (ac) power source to a bonding stud with the nut torqued as specified by its manufacturer and the other power source lead connected to the closure grounding conductor connector. The current path thus established must be capable of sustaining a current of 1,000 amperes root-mean-square for at least 20 seconds without fusing or causing any damage to the closure or its contents.

(6) Finish requirements—(i) Impact resistance. The finish on painted metal surfaces shall not exhibit radial cracking on the impact surface (intrusion) when indented at 18 N-m (160 lb-in.) with a 1.6 cm (0.6 in.) diameter spherical indenter. This test shall be performed in accordance with ASTM D 2794–92 with the exception that the test panel shall be of the same material, thickness, and finish as the pedestal housing being evaluated.

(ii) Finish adhesion. Painted finishes shall be tested for adhesion of finish in accordance with ASTM D 2197–86 (Reapproved 1991), Method A. There shall be no gouging in the top coat when tested with an 8 kg (17.7 lb) load. Gouging is defined as removal or separation of paint particles or breaking of the finish by the scraping loop to the extent of exposing base metal.

(iii) Color evaluation. The color of the housing finish should be compared against the Munsell system of color notation, as described in ASTM D 1535–89 to determine color consistency with that desired.

(iv) Gloss evaluation. The finish on painted housings shall be tested on two approximately 20 cm × 20 cm (8 in. × 8 in.) samples for each color used in accordance with the procedures of ASTM D 523–89. The finish shall have a minimum gloss of 60 (60 ° Specular).

(7) Functional design criteria for binding post terminal blocks used in SAI cabinets—(1) General description. A conventional binding post terminal consists of a metallic element or post, one end of which is configured for the permanent connection of 22, 24, or 26 AWG solid copper conductors and the opposite end
is configured for recurring connections and disconnections of solid copper cross-connect wire using a threaded screw or stud and nut combination for gripping the wire. The terminal is usually housed in a SAI cabinet. However, the terminal may receive limited use in smaller pedestal-type housings and pole mounted cabinets in the outside plant environment.

(2) **Design and fabrication requirements.**

(i) Terminal blocks used in outside plant housings are expected to perform satisfactorily for a nominal design life of 30 years.

(ii) All individual terminals or terminal fields must be enclosed and the terminal enclosure must be totally filled with an encapsulating grease or gel which prevents connection degradation caused by moisture and corrosion. The encapsulant must provide complete encapsulation of terminal metallic connections and surfaces and totally fill all voids and cavities within individual terminal enclosures or terminal field enclosures to prevent ingress of moisture. The encapsulant must not restrict access to the terminal or restrict craft personnel from making connections. The encapsulant must be compatible with the standard materials used in cross-connect hardware and wiring.

(iii) Binding post terminals shall not be susceptible to damage under normal use of standard tools used by outside plant technicians such as screwdrivers and test set clips. In addition, use of other tools such as scissors, diagonal cutters and long nose pliers for tightening and loosening screws shall not result in damage to the terminal.

(iv) Terminals shall be designed so that a typical technician using customary tools shall be able to terminate cross-connect wire on a pair of terminals, or to remove it, without causing an electrical short between any two terminals or any other adjacent terminals.

(v) The terminal count sequence shall be indicated using numerals of at least 0.25 cm (0.10 in.) in height.

(vi) A means shall be provided to distinguish feeder terminals from distribution terminals.

(vii) A means shall be provided to identify tip terminals and ring terminals in a terminal field. The identification convention shall indicate tip on the left with ring on the right for horizontal spacing and tip on the top with ring on the bottom for vertical spacing.

(viii) The preferred height of the highest terminal in the connector field in a ground mounted SAI unit shall be 168 cm (66 in.) or less as measured from the top surface of the mounting pad. The bottom or lowest terminals in the connector field shall be at least 46 cm (18 in.) from the top surface of the pad.

(ix) Pole mounted aerial units shall be 84 cm (33 in.) or less in width. The maximum allowable height of the highest terminals in a pole mounted aerial unit is 168 cm (66 in.) as measured from the top surface of the standard balcony seat used with the interface. For computation purposes, 15 cm (6 in.) shall be allowed for the distance between the bottom of the interface and the top of the balcony seat.

(3) **Auxiliary features.**

(i) SAI cabinets with terminal designs which do not permit direct attachment of common test instrument clips to terminal pairs without the occurrence of shorts shall be equipped with single pair auxiliary test contacts. The auxiliary test contacts shall attach to a terminal pair and provide a set of secondary terminals which will accept typical test instrument clips without the occurrence of shorts. Wire used to connect the auxiliary test contacts to the secondary terminals shall be 20 gauge minimum stranded conductor copper wire with a minimum dielectric strength between conductors of 15 kv. The test connector shall be functional on all terminal pairs.

(ii) A 25 or 50 pair test connector shall be available which can be used to make reliable electrical contact to terminals associated with discrete 25 pair binder groups. The multi-pair test connector shall be provided with a minimum of 1.8 m (6 ft) of suitable cabling terminated to a connector, for interfacing with test sets common to the industry. The multi-pair test connector shall be functional on all terminal groups.

(iii) A special service marker shall be available which must attach to a binding post terminal to identify special circuits and insulate exposed metal.
parts from accidental shorts from tools and wires. A supply of 25 special service markers shall be provided with each SAI cabinet. The color of special service markers shall be red.

(iv)(A) A supply of twisted pair cross-connect wire shall be supplied with housings that are equipped with cross-connect terminals or that have provisions for mounting cross-connect terminals. The minimum length of cross-connect wire supplied is dependent on the SAI cabinet terminal capacity as follows:

<table>
<thead>
<tr>
<th>Cabinet termination capacity (pairs)</th>
<th>Wire length</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 to 600</td>
<td>60 m (200 ft)</td>
</tr>
<tr>
<td>601 to 1200</td>
<td>120 m (400 ft)</td>
</tr>
<tr>
<td>Over 1200</td>
<td>180 m (600 ft)</td>
</tr>
</tbody>
</table>

(B) The cabinet shall be equipped to store the length of wire in a manner designed for convenient dispensing. The cross-connect wire supply shall be easily replaceable.

(g) Performance criteria and test procedures for binding post terminal blocks used in SAI cabinets—(1) General. Many of the tests described in this section require that the terminal block be installed in an appropriate housing in its typical field configuration.

(2) Environmental requirements—(1) Insulation resistance/high humidity and salt fog exposure. A test specimen shall consist of a standard ground or pole mounted housing equipped with a full complement of binding post terminals equipped with 25 special service markers. The minimum number of terminals to be tested shall be 100 pair (100 tips and 100 associated rings). The test terminals shall be selected to form a terminal array of approximate square dimensions. A 1 cm (36 in.) length of cross-connect wire shall be installed on each test terminal. All tips shall be joined together and all rings shall be joined together with a 48 volt dc potential applied as shown in Figure 12 during the high humidity/salt fog and simulated rain exposures. The 48 volt dc may be temporarily removed from the test samples during the measurement process and the ring terminal being measured shall be isolated from the remaining ring terminals. The terminal insulation resistance shall be measured at a potential of 100 volts dc using suitable instrumentation with a minimum measurement range of $10^4$ to $10^{12}$ ohms. Figure 12 is as follows:
(A) High humidity. The test housing shall be placed in an environmental test chamber at 95±3% RH and the temperature cycled as shown in Figure 3 in paragraph (e)(3)(ii) of this section for a period of 30 days. The cabinet doors shall remain in the fully open position. The insulation resistance between the ring terminal of each sample and all the common tip terminals shall be measured each 24 hours when the temperature is between 38 and 57 °C (100 and 135 °F) and increasing. The minimum insulation resistance when measured in accordance with paragraph (g)(2)(i) of this section shall not be less than 1×10⁶ ohms.

(B) Salt fog. A test housing with its doors closed shall be placed in a salt fog 35 °C (95 °F) test chamber and exposed to a salt fog spray per ASTM B 117-90 for a period of 30 days. The insulation resistance should be measured every 24 hours as indicated in paragraph (g)(2)(i) of this section and shall not be less than 1×10⁶ ohms. The special service markers shall exhibit no sign of fading, corrosion, swelling, warping, running color, or other signs of deterioration.

(ii) Insulation resistance/simulated rain exposure. (A) A test housing as described in paragraph (g)(2)(i) of this section shall be tested for water infiltration. The test shall be conducted using the method described in paragraph (e)(3)(xi) of this section. The cabinet doors shall remain closed for the duration of the test. The insulation resistance between the ring terminals and the common tip terminals shall be measured during and immediately following the spray application as indicated in paragraph (g)(2)(i) of this section and shall not be less than 1×10⁶ ohms.

(B) With the cabinet doors open, a spray of tap water at a rate of 3.8 liters per minute (1 gallon per minute) at 276 kilo-pascals (40 pounds per square inch)
shall be directed on the terminal array for a period of 1 minute saturating all of the terminals. The test shall consist of eight-hour temperature cycles with one-hour dwell at extreme temperatures of −40 °C to +60 °C (−40 °F to +140 °F), and temperature changes at an average rate of 16 °C (60 °F) per hour between the extremes. The relative humidity shall be maintained at 95±3%. The eight-hour test shall be conducted for 512 cycles. Millivolt drop measurements shall be made initially and after 2, 8, 16, 32, 64, 256, and 512 cycles with the samples at room temperature. The resistance measurement technique must conform to ASTM B 539–90. The measurement method must have an accuracy of at least ±30 microhms for resistances less than 50 millihioms. The change in contact resistance shall not exceed 2 millihioms.

(B) A minimum of 100 terminals equipped with cross-connect wire installed in a manner typical of the industry shall be temperature cycled. The test shall consist of eight-hour temperature cycles with one-hour dwell at extreme temperatures of 26 to 28 °C (78 to 82 °F) at 95±3% RH for 6 hours. The insulation resistance shall then be measured as specified in paragraph (g)(2)(i) of this section. The minimum insulation resistance shall not be less than 1×10^9 ohms.

(iii) Contact resistance. A minimum of 100 terminals equipped with cross-connect wire that has been installed in a manner typical of that used in the industry shall be temperature cycled.

(A) The test shall consist of eight-hour temperature cycles with one-hour dwell at extreme temperatures of −40 °C to +60 °C (−40 °F to +140 °F), and temperature changes at an average rate of 16 °C (60 °F) per hour between the extremes. The relative humidity shall be maintained at 95±3%. The eight-hour test shall be conducted for 512 cycles. Millivolt drop measurements shall be made initially and after 2, 8, 16, 32, 64, 256, and 512 cycles with the samples at room temperature. The resistance measurement technique must conform to ASTM B 539–90. The measurement method must have an accuracy of at least ±30 microhms for resistances less than 50 millihioms. The change in contact resistance shall not exceed 2 millihioms.

(B) A minimum of 100 terminals equipped with cross-connect wire installed in a manner typical of the industry shall be maintained at 118 °F (41 °C) during the test period, except during disturbance measurement periods where each wire connection to the terminals shall have a 0.23 kg (0.5 lb) force momentarily applied in a manner to stress the connection. Initial millivolt measurements shall be made without disturbing the joints in accordance with paragraph (g)(2)(ii)(A) of this section with the samples at room temperature. After initial measurement each sample shall be disturbed followed by a millivolt drop measurement after 1, 2, 4, 8, 16, and 33 days. The change in contact resistance should be less than 2 millihioms when compared to the initial measurement.
±0.17 N-m (±1.5 lb-in.) or better. The torque indicating device shall be used to tighten a screw or nut until failure of the screw or nut is achieved. Tests shall be conducted while the test specimen is stabilized at temperatures of −40 °C, 20 °C, and 71 °C (−40 °F, +68 °F, and at +160 °F). Record the torques at terminal failure. At least 10 test specimens shall be tested at each temperature. The failure torque shall not be less than 2.8 N-m (25.0 lb-in.) for each temperature.

(B) The post or stud of the binding post terminal shall not fail before the screw or nut when increasing torque. The faceplate or receptacle restraining the post or stud shall not fail before the screw or nut when increasing torque.

(iii) Lateral loading capacity of binding posts. A minimum of three sets of 25 terminals shall be tested with the test specimens stabilized at temperatures of −40 °C, 20 °C and 71 °C (−40 °F, +68 °F, and 100 °F). The test arrangement shall include the terminals along the matrix edge at mid-span locations as well as centrally located terminals. A force measuring device, such as a dynamometer, shall be attached to the end of a binding post terminal and a 16 kg (35 lb) force applied orthogonally to the terminal axis in 4 perpendicular directions as shown in Figure 13. Permanent deformation in excess of 0.08 cm (0.03 in.) or any structural damage in either the terminal or faceplate constitutes a failure. Figure 13 is as follows:
(iv) Axial pullout resistance. A minimum of three sets of 25 terminals shall be tested with the test specimens stabilized at temperatures of −40 °C, 20 °C, and 71 °C (−40 °F, +68 °F, and 100 °F). The test arrangement shall include the terminals along the matrix edge at mid-span locations as well as centrally located terminals. A force measuring device, such as a dynamometer, shall be attached to a terminal and a force of 16 kg (35 lb) applied on axis as shown in Figure 14. There shall be no permanent deformation in excess of 0.08 cm (0.03 in.), any structural damage, or terminal pull-out in either the terminal or the faceplate. Figure 14 is as follows:
(v) Test connector reliability. (A) A single pair connector shall be capable of making a minimum of 100 successive connections to binding post terminals without the occurrence of an open circuit. The test shall include terminals along the matrix edge, center, top, and bottom.

(B) A multi-pair test connector shall be attached to the binding post terminal field and tests for opens between the binding post terminals and the test

\[ P = 16 \text{ kg (35 lb)} \]
connector shall be conducted. All circuits must prove good. The test shall be repeated along the terminal matrix edges, center, top, and bottom.

(vi) Service cycle reliability. A torque indicating device or wrench with an accuracy of ±0.17 N-m (±1.5 lb-in.) or better shall be used to tighten the terminal screw or nut as appropriate to 1.7 N-m (15.0 lb-in.). The terminal nut or screw is then loosened and retightened to 1.7 N-m (15 lb-in.). After 50 repeated connections and disconnections, the terminal shall be placed in an environmental chamber at 95% RH where the temperature shall be cycled as indicated in Figure 3 in paragraph (e)(3)(ii) of this section for a duration of 72 hours. The terminal shall then be momentarily removed from the chamber and the test procedure repeated. After a total of 250 loosening and retightening cycles have accumulated, the terminal must be capable of withstanding a torque of 1.7 N-m (15 lb-in.).

(4) Dielectric strength. All housing components in the vicinity of unsheathed field cable conductors, unsheathed housing stub cable or harness conductors, terminals, or cross-connect wire paths shall have a minimum dielectric strength of 500 volts ac to the cabinet grounding and bonding bracket. Dielectric strength is tested by connecting one lead from a 500-volt ac at 0.5 ampere source to the cabinet ground connector and the other lead is passed along the surfaces of all cabinet components in the vicinity of unsheathed cable or harness conductors, cross-connect wire paths, and in the splice area where unsheathed field cable conductors may be located. Sparkover constitutes failure.

(5) Operational requirements—(i) Durability. In order to verify the durability requirements while minimizing the number of test housings required to complete the test program, the binding posts selected for tests shall be separately identified and then checked to establish compliance after the various tests have been conducted.

(ii) Twenty-five jumper connections shall be made on each of two binding post connectors chosen at random from a representative sample in an assembled interface unit. After exposure to this test, these and adjacent connectors shall be inspected for damage such as cracks or chips in metal or plastic parts. Failure consists of structural damage, open circuits through the connector, or inability to pass the torsional, lateral loading, or axial pullout tests described in paragraphs (g)(3)(ii) through (g)(3)(iv) of this section.

(iii) Select six binding posts at random in a representative interface. On each connector, attach any test cord included with the unit and then remove the test cord as follows. On binding post sample 1, remove the cord normally ten times. On binding post sample 2, remove the cord ten times by jerking the test leads straight out. In these and the remaining tests, do this without releasing any manual attachment mechanisms. On sample 3, remove ten times by jerking downward at 45° from horizontal; sample 4, upward at 45° ten times; sample 5, left 45° ten times; sample 6, right 45° ten times. Check for opens and damage in the test cord, clips, and connectors. Failure consists of structural damage, open circuits through the connector, or inability of the terminal blocks to pass the torsional, lateral loading, axial pullout, test connector reliability, or dielectric strength tests described in paragraphs (g)(3)(ii) through (g)(3)(v)(B), and paragraph (g)(4) of this section.

(iv) Use craft tools such as scissors, diagonal cutters, and long nose pliers to loosen and tighten screws where the binding post design does not prohibit the possibility. Failure consists of severe structural damage.

(h) Functional design criteria for insulation displacement type cross-connect modules used in SAI cabinets—(1) General description. Cross-connect modules normally consist of multiple metallic contact elements that are retained by nonmetallic fixtures. The contact elements are spliced with permanent wire leads compatible for splicing to 22, 24, or 26 gauge cable on one side and configured for the acceptance of recurring connections and disconnections of plastic insulated cross-connect wire on the other side. Cross-connect modules are usually housed in a SAI cabinet. However, modules may receive limited usage in smaller pedestal-type
(2) Design and fabrication requirements.  
(i) All individual terminals or terminal fields must be enclosed and the terminal enclosures must be totally filled with an encapsulating grease or gel which prevents connection degradation caused by moisture and corrosion. The encapsulant must provide complete encapsulation of terminal metallic connections and surfaces and totally fill all voids and cavities within individual terminal enclosures or terminal field enclosures to prevent ingress of moisture. The encapsulant must not restrict access to the terminal or restrict craft personnel from making connections. The encapsulant must be compatible with the standard materials used in cross-connect hardware and wiring.  
(ii) The cross-connect module manufacturer shall make available any non-standard tools and test apparatus which are required for splicing, placing of jumpers, and the performance of maintenance operations.  
(iii) The module shall be designed so that a typical outside plant technician using tools shall be able to terminate cross-connect wire on terminals, or to remove them without causing electrical shorts between any other terminals.  
(iv) The pair count sequence terminated on a module shall be easily visible and shall have numerals of at least 0.25 cm (0.10 in.) in height.  
(v) Feeder terminations shall be easily distinguished from distribution terminations.  
(vi) Tip and ring terminations shall be easily visible and shall be identifiable as described in paragraph (f)(2)(vi) of this section.  
(vii) The preferred locations for cross-connect modules to be mounted inside a housing is the same as those for terminals and are described in paragraphs (f)(2)(vii) and (f)(2)(viii) of this section.  

(3) Auxiliary features.  
(i) Housings equipped with cross-connect modules shall be equipped with auxiliary test contacts as described in paragraphs (f)(3)(i) and (f)(3)(ii) of this section.  
(ii) Special service markers shall be available for cross-connect modules as described in paragraph (f)(3)(iii) of this section.  
(iii) Housings equipped with, or designed for, cross-connect modules shall contain a supply of cross-connect wire as described in paragraph (f)(3)(iv) of this section.  
(i) Performance criteria and test procedures for insulation displacement type cross-connect modules—(1) General. Many of the tests described in this section require that the cross-connect module be installed in an appropriate housing in its typical field configuration for testing. Resistance measurements should be made with an electrical device which measures changes in resistance for each test parameter measured. The tests specified provide an indication of the stability of the electrical connections under the test conditions encountered.  
(2) Environmental requirements.  
(i) A fully equipped arrangement of cross-connect modules having approximately 25 special service markers shall successfully complete environmental testing in accordance with paragraphs (e)(3) introductory text through (e)(3)(xiii)(B) of this section.  
(ii) Insulation resistance/high humidity and salt fog exposure. Insulation resistance measurements shall not be less than $1 \times 10^6$ ohms when cross-connect modules are tested by a procedure similar to that described in paragraphs (g)(2)(i) introductory text through (g)(2)(ii)(B) of this section.  
(iii) Insulation resistance/simulated rain exposure. Insulation resistance measurements shall not be less than $1 \times 10^6$ ohms when cross-connect modules are tested by a procedure similar to that described in and paragraphs (g)(2)(ii) introductory text through (g)(2)(ii)(B) of this section.  
(iv) Contact resistance. The change in contact resistance should not exceed 2 milliohms when cross-connect modules are tested by a procedure similar to that described in paragraphs (g)(2)(ii)(I) introductory text through (g)(2)(ii)(B) of this section.  
(v) Fire resistance. A housing fully equipped with cross-connect modules and jumper wiring shall be tested for fire resistance by a procedure similar to that described in paragraph (g)(2)(iv) of this section.
(vi) Encapsulant material compatibility. Cross-connect wire insulation and cross-connect hardware shall exhibit no visible material degradation when tested by the procedure described in paragraph (g)(2)(v) of this section.

(vii) Encapsulant flow test. The cross-connect contact encapsulant shall drip no more than 0.5 gram when tested by the procedure described in paragraph (g)(2)(vi) of this section.

(3) Mechanical requirements—(i) Vibration. A housing fully equipped with cross-connect modules shall be vibration tested in accordance with paragraph (g)(3)(i) of this section.

(ii) Test connector reliability. The test connectors supplied with housings intended for cross-connect modules shall successfully complete 100 successive connections as described in paragraphs (g)(3)(v) introductory text through (g)(3)(v)(B) of this section.

(iii) Service cycle reliability. A combination of multiple insertions of jumper wires, vibration, and temperature cycling shall be performed on cross-connect modules. The multiple insertions on approximately 100 connections shall be accomplished by 300 operations consisting of insertion, removal and reinsertion of new jumper wire. Contact resistance shall be measured and the final insertion of jumper wire shall not be removed from the connectors but must be subjected to vibration testing in accordance with paragraph (g)(3)(i) of this section and temperature cycled as indicated in Figure 3 in paragraph (e)(3)(ii) of this section for a duration of 72 hours. After vibration and temperature cycling, the average change in contact resistance shall be no greater than 2 milliohms.

(iv) Jumper wire pull-out resistance. Test modules that have received no prior conditioning shall be equipped with 100 38 cm (15 in.) jumper connections of the gauges recommended for use with the module using the insertion tool recommended by the cross-connect module manufacturer. With the test samples suitably supported, wires from each sample shall be pulled, one at a time, by a tensile machine at a cross-head speed of 6 centimeters per minute (2.4 inches per minute (in./min)). Wires shall be pulled both perpendicular and parallel to the plane of the face of the splice module and shall withstand a load of at least 1.1 kg (2.5 lb) before pulling out.

(v) Cable conductor pull-out resistance. Test modules that have received no prior conditioning shall be equipped with 100 26, 24, and 22 AWG 38 cm (15 in.) cable conductors using the insertion tool recommended by the cross-connect module manufacturer. With the test samples suitably supported, conductors from each sample shall be pulled, one at a time, by a tensile machine at a cross-head speed of 6 centimeters per minute (2.4 in./min). Wires shall be pulled both perpendicular and parallel to the plane of the cross-connect field and shall withstand a load of at least 1.1 kg (2.5 lb) before pulling out.

(4) Electrical requirements—(i) Dielectric strength. A housing fully equipped with cross-connect modules shall be tested for dielectric strength in accordance with (g)(4) of this section.

(ii) The dielectric strength of a contact within the cross-connect module to contacts on either side shall be tested. The module shall be tested in a dry environment with an ac power source capable of supplying 8 kv at a rate of increase of 500 volts per second, a circuit breaker to open at breakdown, and a voltmeter to record the breakdown potential. Cross-connect modules shall be prepared in accordance with industry accepted splicing techniques with leads trimmed to approximately 38 cm (15 in.). The dielectric strength of each contact to the contacts on either side shall have an average dielectric strength of approximately 5.0 kv.

(5) Operational requirements—(i) Durability. In order to verify the durability requirements while minimizing the number of test housings required to complete the test program, the contacts selected for tests shall be separately identified and then checked to establish compliance after the various tests have been conducted.

(ii) Twenty-five jumper connections shall be made on each of two contacts chosen at random from a representative sample in an assembled interface unit. After this test, these and surrounding contacts shall be inspected for damage such as cracks or chips in metal or plastic parts. Failure consists of structural damage, open circuits...
through the connector, or inability to pass the jumper wire pullout tests described in paragraph (i)(3)(iv) of this section.

(iii) Select six contacts at random in a representative interface. On each of these contacts attach any test cord included with the unit as specified under normal use of that cord and then remove the test cord as follows. On sample 1, remove the cord normally ten times. On sample 2, remove the clip ten times by jerking the test leads straight out. In these and the remaining tests, do this without releasing any manual attachment mechanisms. On sample 3, remove ten times by jerking downward at 45° from horizontal; sample 4, upward 45° ten times; sample 5, left 45° ten times; sample 6, right 45° ten times. Check for opens and damage in the test cord, clips, and cross-connect modules. Failure consists of structural damage, open circuits through the connector, or inability of module to pass the test connector reliability, jumper wire pullout, and dielectric strength tests described in paragraphs (i)(3)(ii), (i)(3)(iv), and (i)(4)(ii) of this section.

(j) Packaging and identification requirements—(1) Product identification. (i) Each housing, terminal block, or cross-connect module shall be permanently marked with the manufacturer’s name or trademark.

(ii) The date of manufacture, model number, serial number and RUS assigned designations shall be placed on a decal inside housings. The product identification nomenclature must correspond with the nomenclature used in the manufacturer’s quality assurance program.

(2) Packaging requirements. (i) Buried plant housings shall be packaged securely in an environmentally safe container to prevent either deterioration or physical damage to the unit during shipment, handling and storage.

(ii) The product with all the necessary parts shall be shipped in one container unless significant advantages to the user can be obtained otherwise. Packaging of parts in the carton shall be such that the parts become available in the order in which they are needed. The package shall be clearly marked as to which end to open. Packages shall be clearly labeled, and correspond to the names given in the instructions.

(iii) Products packed in shipping containers shall be cushioned, blocked, braced, and anchored to prevent movement and damage.

(iv) All products shall be secured to pallets with non-metallic strapping. The strapping and the manner employed shall be of sufficient quantity, width, and thickness to preclude failure during transit and handling.

(v) The use of shrink or stretch film to secure the load to the pallet is permitted. However, such film must be applied over the required strapping.

(vi) Containers that are too large or heavy to be palletized, such as crates, shall be shipped in their own containers. When practical, these containers shall be provided with skids to facilitate fork-lift handling.

(vii) When packaged, the outer cartons shall meet the requirements of the Uniform Freight Classification and the National Motor Freight Classification.

(3) Container marking requirements. (i) The package shall be readily identifiable as to the manufacturer, model number, date of manufacture, and serial number.

(ii) The RUS assigned housing designation shall be stamped or marked on the outside of the package container with letter and number sizes large enough for easy identification.

(iii) Each package shall be marked with its approximate gross weight.

(iv) All containers carrying delicate or fragile items shall be marked to clearly identify this condition.

(v) All marking shall be clear, legible, and as large as space permits.

(The information and recordkeeping requirements of this section have been approved by the Office of Management and Budget under control number 0572-00069)

PART 1767—ACCOUNTING REQUIREMENTS FOR RUS ELECTRIC BORROWERS

Subpart A—General [Reserved]

Sec. 1767.1–1767.9 [Reserved]

Subpart B—Uniform System of Accounts

§ 1767.10 Definitions.

As used in this part:

Accounting borrower is an RUS borrower.

Accounts are the accounts prescribed in this system of accounts.

Actually issued as applied to securities issued or assumed by the utility, are those which have been sold to bona fide purchasers for a valuable consideration, those issued as dividends on stock, and those which have been issued in accordance with contractual requirements direct to trustees of sinking funds.

Actually outstanding as applied to securities issued or assumed by the utility, are those which have been actually issued and are neither retired nor held by or for the utility; provided, however, that securities held by trustees shall be considered as actually outstanding.

Amortization is the gradual extinguishment of an amount in an account by distributing such amount over a fixed period, over the life of the asset or liability to which it applies, or over the period during which it is anticipated the benefit will be realized.

Associated (affiliated) companies are companies or persons that directly, or indirectly through one or more intermediaries, control, or are controlled by, or under common control with, the accounting company.

Book Cost means the amount at which property is recorded in these accounts without deduction of related provisions for accrued depreciation, amortization, or for other purposes.

Capital lease is a lease of property used in utility or nonutility operations, which meets one or more of the criteria stated in §1767.15 (a).

CFC is the National Rural Utilities Cooperative Finance Corporation.

Continuing Property Records are company plant records for retirement units and mass property that provide, as either a single record, or in separate records readily obtainable by references made in a single record, the following information:
(1) For each retirement unit:
   (i) The name or description of the unit, or both;
   (ii) The location of the unit;
   (iii) The date the unit was placed in service;
   (iv) The cost of the unit as set forth in §1767.16 (b) and (c); and
   (v) The plant control account to which the cost of the unit is charged.

(2) For each category of mass property:
   (i) A general description of the property and quantity;
   (ii) The quantity placed in service by vintage year;
   (iii) The average cost as set forth in §1767.16 (b) and (c); and
   (iv) The plant control account to which the costs are charged.

Control (including the terms controlling, controlled by, and under common control with) is the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of a company, whether such power is exercised through one or more intermediary companies, or alone, or in conjunction with, or pursuant to an agreement, and whether such power is established through a majority or minority ownership or through voting of securities; common directors, officers, or stockholders; voting trusts; holding trusts; associated companies; contracts; or any other direct or indirect means.

Cost is the amount of money actually paid for property or services. When the consideration given is other than cash in a purchase and sale transaction, as distinguished from a transaction involving the issuance of common stock in a merger or a pooling of interest, the value of such consideration shall be determined on a cash basis.

Cost of removal is the cost of demolishing, dismantling, tearing down or otherwise removing electric plant, including the cost of transportation and handling incidental thereto.

Customer is a consumer or patron.

Debt expense includes all expenses incurred in connection with the issuance and initial sale of evidence of debt, such as fees for drafting mortgages and trust deeds; fees and taxes for issuing or recording evidences of debt; costs of engraving and printing bonds and certificates of indebtedness; fees paid to trustees; specific costs of obtaining governmental authority; fees for legal services; fees and commissions paid underwriters, brokers, and salesmen for marketing such evidences of debt; fees and expenses of listing on exchanges; and other like costs.

Depreciation, as applied to depreciable electric plant, is the loss in service value, not restored by current maintenance, incurred in connection with the consumption or prospective retirement of electric plant in the course of service from causes which are known to be in current operation and against which the utility is not protected by insurance. Among the causes to be given consideration are wear and tear, decay, action of the elements, inadequacy, obsolescence, changes in the art, changes in demand and requirements of public authorities.

Discount, as applied to the securities issued or assumed by the utility, is the excess of the par (stated value of no-par stocks) or face value of the securities plus interest or dividends accrued at the date of the sale over the cash value of the consideration received from their sale.

FASB is the Financial Accounting Standards Board.

G&T is a generation and transmission cooperative.

Investment advances are advances, represented by notes or by book accounts only, with respect to which it is mutually agreed or intended between the creditor and debtor that they shall be settled by the issuance of securities or shall not be subject to current settlement.

Minor items of property are the associated parts or items of which retirement units are composed.

Net salvage value is the salvage value of property retired less the cost of removal.

Nominally issued, as applied to securities issued or assumed by the utility, are those which have been signed, certified, or otherwise executed, and placed with the proper officer for sale and delivery, or pledged, or otherwise placed in some special funds of the utility, but which have not been sold, or issued direct to trustees of sinking
funds in accordance with contractual requirements.

Nominally outstanding, as applied to securities issued or assumed by the utility, are those which, after being actually issued, have been reacquired by or for the utility under circumstances which require them to be considered as held alive and not retired, provided, however, that securities held by trustees shall be considered as actually outstanding.

NRECA is the National Rural Electric Cooperative Association.

Operating lease is a lease of property used in utility or nonutility operations, which does not meet any of the criteria stated in §1767.15 (s).

Original cost, as applied to electric plant, is the cost of such property to the person first devoting it to public service.

Person is an individual, a corporation, a partnership, an association, a joint stock company, a business trust, or any organized group of persons, whether incorporated or not, or any receiver or trustee.

Premium, as applied to securities issued or assumed by the utility, is the excess of the cash value of the consideration received from their sale over the sum of their par (stated value of no-par stocks) or face value and interest or dividends accrued at the date of sale.

Project is a complete unit of improvement or development, consisting of a power house, all water conduits, all dams and appurtenant works and structures (including navigation structures) which are a part of said unit, and all storage, diverting, or forebay reservoirs directly connected therewith, the primary line or lines transmitting power therefrom to the point of junction with the distribution system or with the interconnected primary transmission system, all miscellaneous structures used and useful in connection with said unit or any part thereof, and all water rights, rights of way, ditches, dams, reservoirs, lands, or interest in lands the use and occupancy of which are necessary or appropriate in the maintenance and operation of such unit.

Property retired, as applied to electric plant, is property which has been removed, sold, abandoned, destroyed, or which for any cause has been withdrawn from service.

REA means the Rural Electrification Administration formerly an agency of the United States Department of Agriculture and predecessor agency to RUS with respect to administering certain electric and telephone loan programs.

Regulatory Assets and Liabilities are assets and liabilities that result from rate actions of regulatory agencies. Regulatory assets and liabilities arise from specific revenues, expenses, gains, or losses that would have been included in net income determinations in one period under the general requirements of the Uniform System of Accounts but for it being probable:

1. That such items will be included in a different period(s) for purposes of developing the rates the utility is authorized to charge for its utility services; or
2. In the case of regulatory liabilities, that refunds to customers, not provided for in the other accounts, will be required.

Replacing (including replacement) when not otherwise indicated in the context, is the construction or installation of electric plant in place of property retired, together with the removal of the property retired.

Research, Development, and Demonstration (RD&D) includes all expenditures incurred by borrowers either directly or through another person or organization (such as a research institute, industry association, foundation, university, engineering company or similar contractor) in pursuing research, development, and demonstration activities including experiment, design, installation, construction, or operation. This definition includes expenditures for the implementation or development of new and/or existing concepts until technically feasible and commercially feasible operations are verified. Such research, development, and demonstration costs should be reasonably related to the existing or future utility business, broadly defined, of the borrower or in the environment in which it operates or expects to operate. The term includes, but is not limited to, all such costs incidental to the
design, development or implementation of an experimental facility, a plant process, a product, a formula, an invention, a system or similar items, and the improvement of already existing items of a like nature; amounts expended in connection with the proposed development and/or proposed delivery of alternate sources of electricity; and the costs of obtaining its own patent, such as attorney’s fees expended in making and perfecting a patent application. The term includes preliminary investigations and detailed planning of specific projects for securing for customers non-conventional electric power supplies that rely on technology that has not been verified previously to be feasible. The term does not include expenditures for efficiency surveys; studies of management, management techniques, and organization; or consumer surveys, advertising, promotions, or items of a like nature.

Retirement units are those items of electric plant which, when retired with or without replacement, are accounted for by crediting the book cost thereof to the electric plant accounts in which included.

RUS Form 7 is the August 1988 revision (or the revision of any other date which may be specified) of such RUS Form 7, Financial and Statistical Report, or any later revision which shall have been at the time prescribed for use by RUS.

RUS Form 12 is the November 1979 revision (or the revision of any other date which may be specified) of such RUS Form 12, Operating Report—Financial, or any later revision which shall have been at the time prescribed for use by RUS.

RUS USoA is the USoA prescribed in this subpart.

Salvage value is the amount received for property retired, less any expenses incurred in connection with the sale or in preparing the property for sale; or, if retained, the amount at which the material recovered is chargeable to materials and supplies, or other appropriate accounts.

Service life is the time between the date electric plant is includible in electric plant in service, or electric plant leased to others, and the date of its retirement. If depreciation is accounted for on a production basis rather than on a time basis, service life should be measured in terms of the appropriate unit of production.

Service value is the difference between original cost and net salvage value of electric plant.

State is a State admitted to the Union, the District of Columbia, and any organized Territory of the United States.

Subsidiary company is a company which is controlled by the utility through ownership of voting stock. (See the definition of control in §1767.10.) A corporate joint venture in which a corporation is owned by a small group of businesses as a separate and specific business or project for the mutual benefit of the members of the group is a subsidiary company for the purposes of this system of accounts.

Utility is an RUS borrower.

Work order is an order authorizing the construction of utility plant. It serves as the basis for the accounts or subaccounts in which costs are recorded.

§ 1767.11 Purpose.

(a) The standard form of RUS loan documents for electric borrowers requires that the borrower keep books, records, and accounts in which full and true entries will be made of all of the dealings, business and affairs of the borrower in accordance with the methods and principles of accounting of this part.

(b) This subpart implements these provisions of the RUS loan documents by prescribing the RUS USoA for electric borrowers and by providing accounting methodologies and procedures which are applicable to particular situations.
§ 1767.12 Accounting system requirements.

(a) Each RUS electric borrower must maintain and keep its books of accounts and all other books and records that support the entries in such books of accounts in accordance with §§1767.18–1767.31.

(b) Each RUS electric borrower shall maintain and keep its books of accounts and all other books and records which support the entries in such books of accounts in accordance with §1767.41, Accounting Methods and Procedures Required of All RUS Borrowers, herein, which prescribes accounting principles to be applied to specific factual circumstances.

§ 1767.13 Departures from the prescribed RUS Uniform System of Accounts.

(a) No departures are to be made to the prescribed RUS USoA without the prior written approval of RUS. RUS grants a departure to any borrower electing to delay implementation of the functional (activity-based) accounting requirements of this part through December 31, 1997. Requests for departures from the RUS USoA shall be addressed, in writing, to the Director, Program Accounting Services Division (PASD).

(b) RUS borrowers subject to the jurisdiction of a state regulatory authority with jurisdiction over rates and/or accounting for electric utilities will not:

(1) Request approval of such authority to use accounting methodologies and principles that depart from the provisions herein; or

(2) File with such authority, any documents or information, including without limitation, any filings associated with the borrower’s rates, based upon accounting methods and principles inconsistent with the provisions of this part.

(c) If any state regulatory authority with jurisdiction over an RUS borrower prescribes accounting methods or principles for the borrower that are inconsistent with the provisions of this part, the borrower must immediately notify the Director, BAD, and provide such documents, information, and reports as RUS may request to evaluate the impact that such accounting methods or principles may have on the interests of RUS.

(1) If RUS determines that the accounting methods and principles do not adversely impact RUS interests, RUS will permit the borrower to use the accounting methods and principles as prescribed by the state regulatory authority to comply with the provisions of the RUS loan documents.

(2) If RUS determines that the accounting methods and principles may adversely impact RUS’s interests, RUS may require that, for the purposes of complying with provisions of RUS loan documents, including, without limitation, those provisions relating to financial coverage standards (e.g. “TIER”), the borrower continue to maintain books, records, and accounts in accordance with this subpart.

(i) RUS may, however, approve requests by the borrower to maintain such additional books, records, and accounts as necessary to comply with the requirements of the state regulatory authority.

(ii) Such approval will not waive, modify or amend the requirements of the RUS loan documents or of this subpart.

(d) RUS borrowers will not implement the provisions of Statement of Financial Accounting Standards (SFAS) No. 71, Accounting for the Effects of Certain Types of Regulation, SFAS No. 90, Regulated Enterprises—Accounting for Abandonments and Disallowances of Plant Costs, SFAS No. 92, Regulated Enterprises—Accounting for Phase-in Plans, without the prior written approval of RUS except as provided for in paragraphs (d)(1) through (d)(5) of this section. Requests for approval shall be addressed, in writing, to the Director, PASD. The specific deferrals set forth in paragraphs (d)(1) through (d)(5) of this section may be implemented without the prior written approval of RUS provided that the deferrals comply with Statement No. 71 and that the RUS borrowers implementing such deferrals continue to meet the requirements set forth in Statement No. 71 for doing so:

(1) The deferral and amortization of prior service pension costs (See
§ 1767.15 General instructions.

(a) Records. (1) Each utility shall keep its books of account, and all other books, records, and memoranda which support the entries in such books of account so as to be able to furnish readily full information as to any item included in any account.

(2) Each entry shall be supported by such detailed information as will permit ready identification, analysis, and verification of all facts relevant thereto.

(3) The books and records referred to herein include not only accounting records in a limited technical sense, but all other records, such as minute books, stock books, reports, correspondence, memoranda, etc., which may be useful in developing the history of or facts regarding any transaction.

(4) No utility shall destroy any such books or records unless the destruction thereof is permitted by the rules and regulations of RUS in 7 CFR chapter XVII.

(5) In addition to the prescribed accounts, clearing accounts, temporary or experimental accounts, and subdivisions of any accounts, may be kept, provided the integrity of the prescribed accounts is not impaired.

(6) All amounts included in the accounts prescribed herein for electric plant and operating expenses shall be just and reasonable and any payments or accruals by the utility in excess of just and reasonable charges shall be included in Account 426.5, Other Deductions.
(7) The arrangement or sequence of the accounts prescribed herein shall not be controlling as to the arrangement or sequence in report forms which may be prescribed by RUS.

(b) **Numbering system.** (1) The account numbering plan used herein consists of a system of three-digit whole numbers as follows:

- **100–199** Assets and other debits.
- **200–299** Liabilities and other credits.
- **300–399** Plant accounts.
- **400–432, 434–435** Income accounts.
- **433, 436–439** Retained earnings accounts.
- **440–459** Revenue accounts.
- **500–599** Production, transmission, and distribution expenses.
- **900–949** Customer accounts, customer service and informational, sales, and general and administrative expenses.

(2) In certain instances, numbers have been skipped in order to allow for possible later expansion or to permit better coordination with the numbering system for other utility departments.

(3) The numbers prefixed to account titles are to be considered as parts of the titles.

(i) Each utility, however, may adopt, for its own purposes, a different system of account numbers provided that the numbers herein prescribed shall appear in the descriptive headings of the ledger accounts and in the various sources of original entry.

(ii) If a utility uses a different group of account numbers and it is not practicable to show the prescribed account numbers in the various sources of original entry, such reference to the prescribed account numbers may be omitted from the various sources of original entry.

(iii) Each utility using different account numbers for its own purposes shall keep readily available, a list of such account numbers which it uses and a reconciliation of such account numbers with the account numbers provided herein.

(iv) The utility's records shall be so kept as to permit ready analysis by prescribed accounts (by direct reference to sources of original entry to the extent practicable) and to permit preparation of financial and operating statements directly from such records at the end of each accounting period according to the prescribed accounts.

(c) **Accounting period.** (1) Each utility shall keep its books on a monthly basis so that for each month, all transactions applicable thereto, as nearly as may be ascertained, shall be entered in the books of the utility.

(2) Amounts applicable or assignable to specific utility departments shall be so segregated monthly.

(3) Each utility shall close its books at the end of each fiscal year unless otherwise authorized by RUS.

(d) **Submission of questions.** To maintain uniformity of accounting, utilities shall submit questions of doubtful interpretation to RUS for consideration and decision.

(e) **Item lists.** (1) Lists of “items” appearing in the texts of the accounts or elsewhere herein are for the purpose of more clearly indicating the application of the prescribed accounting.

(2) The lists are intended to be representative, but not exhaustive.

(3) The appearance of an item in a list warrants the inclusion of the item in the account mentioned only when the text of the account also indicates inclusion inasmuch as the same item frequently appears in more than one list.

(4) The proper entry in each instance must be determined by the texts of the accounts.

(f) **Extraordinary items.** (1) Net income shall reflect all items of profit and loss during the period with the exception of prior period adjustments as described in §1767.15 (g) and long-term debt as described in §1767.15 (q).

(2) Those items related to the effects of events and transactions which have occurred during the current period and which are not typical or customary business activities of the company shall be considered extraordinary items.

(3) They will be events and transactions of significant effect which would not be expected to recur frequently and which would not be considered as recurring factors in any evaluation of the ordinary operating processes of business.

(i) In determining significance, items of a similar nature should be considered in the aggregate.

(ii) Dissimilar items should be considered individually; however, if they
are few in number, they may be considered in the aggregate.

(iii) To be considered as extraordinary under the above guidelines, an item should be more than approximately 5 percent of income, computed before extraordinary items.

(iv) RUS approval must be obtained to treat an item of less than 5 percent, as extraordinary. (See Accounts 434 and 435.)

(g) Prior period items. (1) Items of profit and loss related to the following shall be accounted for as prior period adjustments and excluded from the determination of net income for the current year:

(i) Correction of an error in the financial statements of a prior year

(ii) Adjustments that result from realization of income tax benefits of preacquisition operating loss carryforwards of purchased subsidiaries.

(2) All other items of profit and loss recognized during the year shall be included in the determination of net income for that year.

(h) Unaudited items. (1) Whenever a financial statement is required by RUS, if it is known that a transaction has occurred which affects the accounts but the amount involved in the transaction and its effect upon the accounts cannot be determined with absolute accuracy, the amount shall be estimated and such estimated amount included in the proper accounts.

(2) The utility is not required to anticipate minor items which would not appreciably affect the accounts.

(i) Distribution of pay and expenses of employees. Charges to electric plant, operating expense, and other accounts for services and expenses of employees engaged in activities chargeable to various accounts, such as construction, maintenance, and operations, shall be based upon the actual time engaged in the respective classes of work, or in cases that method is impracticable, upon the basis of a study of the time actually engaged during a representative period.

(j) Payroll distribution. (1) Underlying accounting data shall be maintained so that the distribution of the cost of labor charged direct to the various accounts will be readily available.

(2) Such underlying data shall permit a reasonably accurate distribution to be made of the cost of labor charged initially to clearing accounts so that the total labor cost may be classified among construction, cost of removal, electric operating functions (steam generation, nuclear generation, hydraulic generation, transmission, distribution, etc.) and nonutility operations.

(k) Accounting on an accrual basis. (1) The utility is required to keep its accounts on the accrual basis.

(i) This requires the inclusion, in its accounts, of all known transactions of appreciable amount which affect the accounts.

(ii) If bills covering such transactions have not been received or rendered, the amounts shall be estimated and appropriate adjustments made when the bills are received.

(2) When payments are made in advance for items such as insurance, rents, taxes, or interest, the amount applicable to future periods shall be charged to Account 165, Prepayments, and spread over the periods to which applicable, by credits to Account 165, and charges to the accounts appropriate for the expenditure.

(l) Records for each plant. (1) Separate records shall be maintained by electric plant accounts of the book cost of each plant owned, including additions by the utility to plant leased from others, and of the cost of operating and maintaining each plant owned or operated.

(2) The term “plant” as used herein includes each generating station and each transmission line or appropriate group of transmission lines.

(m) Accounting for other departments.

(1) If the utility also operates other utility departments, such as gas or water, it shall keep such accounts for the other departments as may be prescribed by proper authority and in the absence of prescribed accounts, it shall keep such accounts as are proper or necessary to reflect the results of operating each such department.

(2) It is not intended that proprietary and similar accounts which apply to the utility as a whole shall be departmentalized.
(n) **Transactions with associated companies.** (1) Each utility shall keep its accounts and records so as to be able to furnish accurately and expeditiously statements of all transactions with associated companies.

(2) The statements may be required to show the general nature of the transactions, the amounts involved therein and the amounts included in each account prescribed herein with respect to such transactions. Transactions with associated companies shall be recorded in the appropriate accounts for transactions of the same nature. Nothing herein contained, however, shall be construed as restraining the utility from subdividing accounts for the purpose of recording separately transactions with associated companies.

(o) **Contingent assets and liabilities.**

(1) Contingent assets represent a possible source of value to the utility contingent upon the fulfillment of conditions regarded as uncertain.

(2) Contingent liabilities include items which may, under certain conditions, become obligations of the utility but which are neither direct nor assumed liabilities at the date of the balance sheet. The utility shall be prepared to give a complete statement of significant contingent assets and liabilities (including cumulative dividends on preference stock) in its audited financial statements; its RUS Form 7, Financial and Statistical Report, or its RUS Form 12, Operating Report—Financial; and at such other times as may be requested by RUS.

(p) **Separate accounts or records for each licensed project.** The accounts or records of each borrower shall be so kept as to show for each project (including pumped storage) under license:

(1) The actual legitimate original cost of the project, including the original cost of the original project, the original cost of additions thereto and betterments thereof, and credits for property retired from service, as determined under RUS’s regulations in 7 CFR chapter XVII;

(2) The charges for operation and maintenance of the project property directly assignable to the project;

(3) The credits and debits to the depreciation and amortization accounts, and the balances in such accounts; and

(4) The credits and debits to the operating revenue, income, and retained earnings accounts that can be identified with and directly assigned to the project.

Note: The purpose of this instruction is to insure that accounts or records are currently maintained by each borrower from which reports may be made to RUS for use in determining the net investment in each licensed project. The instruction covers only the debit and credit items appearing in the borrower’s accounts which may be identified with and assigned directly to any project. In the determination of the net investment, allocations of items affecting the net investment may be required where direct assignment is not practicable.

(q) **Long-term debt: premium, discount and expense, and gain or loss on reacquisition—(1) Premium, discount and expense.**

(i) A separate premium, discount and expense account shall be maintained for each class and series of long-term debt (including receivers’ certificates) issued or assumed by the utility.

(ii) The premium will be recorded in Account 225, Unamortized Premium on Long-Term Debt, the discount will be recorded in Account 226, Unamortized Discount on Long-Term Debt—Debit, and the expense of issuance shall be recorded in Account 181, Unamortized Debt Expense.

(iii) The premium, discount and expense shall be amortized over the life of the respective issues under a plan which will distribute the amounts equitably over the life of the securities.

(A) The amortization shall be charged or credited on a monthly basis with the amounts relating to discount and expense charged to Account 428, Amortization of Debt Discount and Expense.

(B) The amounts relating to premium shall be credited to Account 429, Amortization of Premium on Debt—Credit.

(2) **Reacquisition, without refunding.**

(i) When long-term debt is reacquired or redeemed without being converted into another form of long-term debt and when the transaction is not in connection with a refunding operation (primarily redemptions for sinking fund purposes), the difference between the amount paid upon reacquisition and the face value; plus any unamortized
premium less any related unamortized debt expense and reacquisition costs; or less any unamortized discount, related debt expense and reacquisition costs applicable to the debt redeemed, retired and cancelled, shall be included in Account 189, Unamortized Loss on Reacquired Debt, or Account 257, Unamortized Gain on Reacquired Debt, as appropriate.

(ii) The utility shall amortize the recorded amounts equally on a monthly basis over the remaining life of the respective security issues (old original debt).

(iii) The amount so amortized shall be charged to Account 428.1, Amortization of Loss on Reacquired Debt, or credited to Account 429.1, Amortization of Gain on Reacquired Debt—Credit, as appropriate.

(3) Reacquisition, with refunding. (i) When the redemption of one issue or series of bonds or other long-term obligations is financed by another issue or series before the maturity date of the first issue, the difference between the amount paid upon refunding and the face value; plus any unamortized premium less related debt expense or less any unamortized discount and related debt expense, applicable to the debt refunded, shall be included in Account 189, Unamortized Loss on Reacquired Debt, or Account 257, Unamortized Gain on Reacquired Debt, as appropriate.

(ii) The utility may elect to account for such amounts as follows:

(A) Write them off immediately when the amounts are insignificant;
(B) Amortize them by equal monthly amounts over the remainder of the original life of the issue retired; or
(C) Amortize them by equal monthly amounts over the life of the new issue.

(iii) Once an election is made, it shall be applied on a consistent basis.

(iv) The amounts in paragraphs (q)(3)(i)(A), (B), or (C) of this section shall be charged to Account 428.1, Amortization of Loss on Reacquired Debt, or credited to Account 429.1, Amortization of Gain on Reacquired Debt—Credit, as appropriate.

(4) Under methods in paragraphs (q)(3)(i)(B) and (C) of this section, the increase or reduction in current income taxes resulting from the reacquisition should be apportioned over the remainder of the original life of the issued retired or over the life of the new issue, as appropriate, as directed more specifically in paragraphs (q)(5) and (6) of this section.

(5) When the utility recognizes the loss in the year of reacquisition as a tax deduction, Account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, shall be debited and Account 283, Accumulated Deferred Income Taxes—Other, shall be credited with the amount of the related tax effect, such amount to be allocated to the periods affected in accordance with the provisions of Account 283.

(6) When the utility chooses to recognize the gain in the year of reacquisition as a taxable gain, Account 411.1, Provision for Deferred Income Taxes—Credit, Utility Operating Income, shall be debited with the amount of the related tax effect, such amount to be allocated to the periods affected in accordance with the provisions of Accounts 190, Accumulated Deferred Income Taxes.

(7) When the utility chooses to use the optional privilege of deferring the tax on the gain attributable to the reacquisition of debt by reducing the depreciable basis of utility property for tax purposes, pursuant to Section 108 of the Internal Revenue Code (26 U.S.C. 108), the related tax effects shall be deferred as the income is recognized for accounting purposes, and the deferred amounts shall be amortized over the life of the associated property on a vintage year basis.

(i) Account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, shall be debited, and Account 282, Accumulated Deferred Income Taxes—Other Property, shall be credited with an amount equal to the estimated income tax effect applicable to the portion of the income, attributable to reacquired debt, recognized for accounting purposes during the period.

(ii) Account 282 shall be debited and Account 411.1, Provision for Deferred Income Taxes—Credit, Utility Operating Income, shall be credited with an amount equal to the estimated income tax effects, during the life of the property, attributable to the reduction in the depreciable basis for tax purposes.
§ 1767.15  7 CFR Ch. XVII (1–1–08 Edition)

(8) The tax effects relating to gain or loss shall be allocated as above to utility operations except in cases where a portion of the debt reacquired is directly applicable to nonutility operations.

(i) In that event, the related portion of the tax effects shall be allocated to nonutility operations.

(ii) Where it can be established that reacquired debt is generally applicable to both utility and nonutility operations, the tax effects shall be allocated between utility and nonutility operations based on the ratio of net investment in utility plant to net investment in nonutility plant.

(9) Premium, discount, or expense on debt shall not be included as an element in the cost of construction or acquisition of property (tangible or intangible), except under the provisions of Account 432, Allowance for Borrowed Funds Used During Construction—Credit.

(10) Alternate method. Where a regulatory authority or a group of regulatory authorities having prime rate jurisdiction over the utility specifically disallows the rate principle of amortizing gains or losses on reacquisition of long-term debt without refunding, and does not apply the gain or loss to reduce interest charges in computing the allowed rate of return for rate purposes, the following alternate method may be used to account for gains or losses relating to reacquisition of long-term debt, with or without refunding:

(i) The difference between the amount paid upon reacquisition of any long-term debt and the face value, adjusted for unamortized discount, expenses or premium, as the case may be, applicable to the debt redeemed shall be recognized currently in income and recorded in Account 421, Miscellaneous Nonoperating Income, or Account 426.5, Other Deductions.

(ii) When this alternate method of accounting is used, the utility shall include a footnote to each financial statement, prepared for public use, explaining why this method is being used along with the treatment given for ratemaking purposes.

1 Comprehensive interperiod income tax allocation. (1) Where there are timing differences between the periods in which transactions affect taxable income and the periods in which they enter into the determination of pretax accounting income, the income tax effects of such transactions are to be recognized in the periods in which the differences between book accounting income and taxable income arise and in the periods in which the differences reverse using the deferred tax method.

2 Comprehensive interperiod tax allocation should be followed whenever transactions enter into the determination of pretax accounting income for the period even though some transactions may affect the determination of taxes payable in a different period.

(3) Utilities are not required to utilize comprehensive interperiod income tax allocation until the deferred income taxes are included as an expense in the rate level by the regulatory authority having rate jurisdiction over the utility.

(4) Where comprehensive interperiod tax allocation accounting is not practiced the utility shall include as a note to each financial statement, prepared for public use, a footnote explanation setting forth the utility’s accounting policies with respect to interperiod tax allocation and describing the treatment for ratemaking purposes of the tax timing differences by regulatory authorities having rate jurisdiction.

(5) Should the utility be subject to more than one agency having rate jurisdiction, its accounts shall appropriately reflect the ratemaking treatment (deferral or flow through) of each jurisdiction.

(6) Once comprehensive interperiod tax allocation has been initiated either in whole or in part it shall be practiced on a consistent basis and shall not be changed or discontinued without prior RUS approval.

(7) Tax effects deferred currently will be recorded as deferred debits or deferred credits in Accounts 190, Accumulated Deferred Income Taxes; 281, Accumulated Deferred Income Taxes—Accelerated Amortization Property; 282, Accumulated Deferred Income Taxes—Other Property, and 283, Accumulated Deferred Taxes—Other, as appropriate.

(8) The resulting amounts recorded in these accounts shall be disposed of as
prescribed in this system of accounts or as otherwise authorized by RUS.

(s) Criteria for classifying leases. (1) If, at its inception, a lease meets one or more of the following criteria, the lease shall be classified as a capital lease:

(i) The lease transfers ownership of the property to the lessee by the end of the lease term.

(ii) The lease contains a bargain purchase option.

(iii) The lease term is equal to 75 percent or more of the estimated economic life of the leased property. However, if the beginning of the lease term falls within the last 25 percent of the total estimated economic life of the leased property, including earlier years of use, this criterion shall not be used for purposes of classifying the lease.

(iv) The present value at the beginning of the lease term of the minimum lease payments, excluding that portion of the payments representing executory costs such as insurance, maintenance, and taxes to be paid by the lessor, including any profit thereon, equals or exceed 90 percent of the excess of the fair value of the leased property to the lessor at the inception of the lease over any related investment tax credit retained by the lessor and expected to be realized by the lessee.

(A) However, if the beginning of the lease term falls within the last 25 percent of the total estimated economic life of the leased property, including earlier years of use, this criterion shall not be used for purposes of classifying the lease.

(B) The lessee utility shall compute the present value of the minimum lease payments using its incremental borrowing rate, unless it is practicable for the utility to learn the implicit rate computed by the lessee, and the implicit rate computed by the lessee is less than the lessee’s incremental borrowing rate. If both of those conditions are met, the lessee shall use the implicit rate.

(2) If, at any time, the lessee and lessor agree to change the provisions of the lease, other than by renewing the lease or extending its term, in a manner that would have resulted in a different classification of the lease under the criteria in paragraph (s)(1) of this section had the changed terms been in effect at the inception of the lease, the revised agreement shall be considered as a new agreement over its term, and the criteria in paragraph (s)(1) of this section shall be applied for purposes of the expiration of the existing lease term, such as the exercise of a lease renewal option other than those already included in the lease term, shall be considered as a new agreement and shall be classified according to the above provision. Changes in estimates (for example, changes in estimates of the economic life or of the residual value of the leased property) or changes in circumstances (for example, default by the lessee) shall not give rise to a new classification of a lease for accounting purposes.

(t) Accounting for leases. (1) All leases shall be classified as either capital or operating leases.

(2) The utility shall record a capital lease as an asset in Account 101.1, Property Under Capital Leases, and Account 120.6, Nuclear Fuel Under Capital Leases; as appropriate, and an obligation in Account 227, Obligations Under Capital Leases—Noncurrent, or Account 243, Obligations Under Capital Leases—Current, at an amount equal to the present value at the beginning of the lease term of minimum lease payments during the lease term, excluding that portion of the payments representing executory costs such as insurance, maintenance, and taxes to be paid by the lessor, together with any profit thereon. However, if the amount so determined exceeds the fair value of the leased property at the inception of the lease, the amount recorded as the asset and obligation shall be the fair value.

(3) Rental payments on all leases shall be charged to rent expense, fuel expense, construction work in progress, or other appropriate accounts as they become payable.

(4) For a capital lease, for each period during the lease term, the amounts recorded for the asset and obligation shall be reduced by an amount equal to the portion of each lease payment that would have been treated as a payment on an installment obligation (liability) and
allocated between interest expense and a reduction of the obligation so as to produce a constant periodic rate of interest on the remaining balance.

(u) Allowances. (1) Title IV of the Clean Air Act Amendments of 1990, Pub. L. 101–549, 104 Stat. 2399, 2584 (42 U.S.C. 7407 and 42 U.S.C. 7651), provides for the issuance of allowances as a means to limit the emissions of certain airborne pollutants by various entities, including utilities. Utilities owning allowances, other than those acquired for speculative purposes, shall account for such allowances at cost in Account 158.1, Allowance Inventory, or Account 158.2, Allowances Withheld, as appropriate. Allowances acquired for speculative purposes and identified as such in contemporaneous records at the time of purchase shall be accounted for in Account 124, Other Investments.

(2) When purchased, allowances become eligible for use in different years, and the allocation of the purchase cost cannot be determined by fair value, the purchase cost allocated to allowances of each vintage shall be determined through use of a present-value based measurement. The interest rate used in the present-value measurement shall be the utility’s incremental borrowing rate, in the month in which the allowances are acquired, for a loan with a term similar to the period that it will hold the allowances and in an amount equal to the purchase price.

(3) The underlying records supporting Account 158.1 and Account 158.2 shall be maintained in sufficient detail so as to provide the number of allowances and the related cost by vintage year.

(4) Issuances from inventory included in Account 158.1 and Account 158.2 shall be accounted for on a vintage basis using a monthly weighted-average method of cost determination. The cost of eligible allowances not used in the current year shall be transferred to the vintage for the immediately following year.

(5) Account 158.1 shall be credited and Account 509, Allowances, debited so that the cost of the allowances to be remitted for the year is charged to expense monthly based on each month’s emissions. This may, in certain circumstances, require allocation of the cost of an allowance between months on a fractional basis.

(6) In any period in which actual emissions exceed the amount allowable based on eligible allowances owned, the utility shall estimate the cost to acquire the additional allowances needed and charge Account 158.1 with the estimated cost. This estimated cost of future allowance acquisitions shall be credited to Account 158.1 and charged to Account 509 in the same accounting period as the related charge to Account 158.1. Should the actual cost of these allowances differ from the estimated cost, the differences shall be recognized in the then-current period’s inventory issuance cost.

(7) Any penalties assessed by the Environmental Protection Agency for the emission of excess pollutants shall be charged to Account 426.3, Penalties.

(8) Gains on dispositions of allowances, other than allowances held for speculative purposes, shall be accounted for as follows. First, if there is uncertainty as to the regulatory treatment, the gain shall be deferred in Account 254, Other Regulatory Liabilities, pending resolution of the uncertainty. Second, if there is certainty as to the existence of a regulatory liability, the gain will be credited to Account 254, with subsequent recognition in income when reductions in charges to customers occur or the liability is otherwise satisfied. Third, all other gains will be credited to Account 411.8, Gains from Disposition of Allowances. Losses on disposition of allowances, other than allowances held for speculative purposes, shall be accounted for as follows. Losses that qualify as regulatory assets shall be charged directly to Account 182.3, Other Regulatory Assets. All other losses shall be charged to Account 411.9, Losses from Disposition of Allowances. (See the definition of regulatory assets and liabilities.) Gains or losses on disposition of allowances held for speculative purposes shall be recognized in Account 421, Miscellaneous Nonoperating Income, or Account 426.5, Other Deductions, as appropriate.

(9) The costs and benefits of exchange-traded allowance futures contracts used to protect the utility from the risk of unfavorable price changes
§ 1767.16 Electric plant instructions.

(a) Classification of electric plant at effective date of system of accounts. (1) The electric plant accounts provided herein are the same as those contained in the prior system of accounts except for inclusion of accounts for nuclear production plant and some changes in classification in the general equipment accounts. Except for these changes, the balances in the various plant accounts, as determined under the prior system of accounts, should be carried forward. Any remaining balance of plant which has not yet been classified, pursuant to the requirements of the prior system, shall be classified in accordance with the following instructions.

(2) The cost to the utility of its unclassified plant shall be ascertained by analysis of the utility’s records. Adjustments shall not be made to record in utility plant accounts amounts previously charged to operating expenses or to income deductions in accordance with the USoA in effect at the time or in accordance with the discretion of management as exercised under a USoA, or under accounting practices previously followed.

(3) The detailed electric plant accounts (301 to 399, inclusive) shall be stated on the basis of cost to the utility of plant constructed by it and the original cost, estimated if not known, of plant acquired as an operating unit or system. The difference between the original cost, as above, and the cost to the utility of electric plant after giving effect to any accumulated provision for depreciation or amortization shall be recorded in Account 114, Electric Plant Acquisition Adjustments. The original cost of electric plant shall be determined by analysis of the utility’s records or those of the predecessor or vendor companies with respect to electric plant previously acquired as operating units or systems and the difference between the original cost so determined, less accumulated provisions for depreciation and amortization and the cost to the utility with necessary adjustments for retirements from date of acquisition, shall be entered in Account 114, Electric Plant Acquisition Adjustments. Any difference between the cost of electric plant and its book cost, when not properly includible in other accounts, shall be recorded in Account 116, Other Electric Plant Adjustments.

(b) Electric plant to be recorded at cost. (1) All amounts included in the accounts for electric plant acquired as an operating unit or system, except as otherwise provided in the texts of the intangible plant accounts, shall be stated at the cost incurred by the person who first devoted the property to utility service. All other electric plant shall be included in the accounts at the cost incurred by the utility except for property acquired by lease which qualifies as capital lease property under § 1767.15 (s), Criteria for Classifying Leases, and is recorded in Account 101.1, Property Under Capital Lease, or Account 120.6, Nuclear Fuel Under Capital Leases. Where the term “cost” is used in the detailed plant accounts, it shall have the meaning stated in this paragraph (b).

(2) When the consideration given for property is other than cash, the value of such consideration shall be determined on a cash basis (see, however, the definition of cost in § 1767.10). In the entry recording such transition, the actual consideration shall be described with sufficient particularity to identify it. The utility shall be prepared to furnish RUS the particulars of its determination of the cash value of the consideration if other than cash.

(3) When property is purchased under a plan involving deferred payments, no
charge shall be made to the electric plant accounts for interest, insurance, or other expenditures occasioned solely by such form of payment.

(4) The electric plant accounts shall not include the cost or other value of electric plant contributed to the company. Contributions in the form of money or its equivalent toward the construction of electric plant shall be credited to accounts charged with the cost of such construction. Plant constructed from contributions of cash or its equivalent shall be shown as a reduction to gross plant constructed when assembling cost data in work orders for posting to plant ledgers of accounts. The accumulated gross costs of plant constructed in the work order shall be recorded as a debit in the plant ledger of accounts along with the related amount of contributions concurrently recorded as a credit.

(c) Components of construction cost. The cost of construction properly includible in the electric plant accounts shall include, where applicable, the direct and overhead costs as listed and defined hereunder:

(1) Contract work includes amounts paid for work performed under contract by other companies, firms, or individuals, costs incident to the award of such contracts, and the inspection of such work.

(2) Labor includes the pay and expenses of employees of the utility engaged on construction work, and related workmen’s compensation insurance, payroll taxes, and similar items of expense. It does not include the pay and expenses of employees which are distributed to construction through clearing accounts nor the pay and expenses included in other items hereunder.

(3) Materials and supplies includes the purchase price at the point of free delivery plus customs duties, excise taxes, the cost of inspection, loading and transportation, the related stores expenses, and the cost of fabricated materials from the utility’s shop. In determining the cost of materials and supplies used for construction, proper allowance shall be made for unused materials and supplies, for materials recovered from temporary structures used in performing the work involved, and for discounts allowed and realized in the purchase of materials and supplies.

Note: The cost of individual items of equipment of small value (for example, $500 or less) or of short life, including small portable tools and implements, shall not be charged to utility plant accounts unless the correctness of the accounting thereof is verified by current inventories. The cost shall be charged to the appropriate operating expense or clearing accounts, according to the use of such items, or, if such items are consumed directly in construction work, the cost shall be included as part of the cost of the construction.

(4) Transportation includes the cost of transporting employees, materials and supplies, tools, purchased equipment, and other work equipment (when not under own power) to and from points of construction. It includes amounts paid to others as well as the cost of operating the utility’s own transportation equipment. (See Item in paragraph (c)(5) of this section.)

(5) Special machine service includes the cost of labor (optional), materials and supplies, depreciation, and other expenses incurred in the maintenance, operation and use of special machines, such as steam shovels, pile drivers, derricks, ditchers, scrapers, material unloaders, and other labor saving machines; also expenditures for rental, maintenance and operation of machines of others. It does not include the cost of small tools and other individual items of small value or short life which are included in the cost of materials and supplies. (See Item in paragraph (c)(3) of this section.) When a particular construction job requires the use for an extended period of time of special machines, transportation or other equipment, the net book cost thereof, less the appraised or salvage value at time of release from the job, shall be include in the cost of construction.

(6) Shop service includes the proportion of the expense of the utility’s shop department assignable to construction work except that the cost of fabricated materials from the utility’s shop shall be included in “materials and supplies.”

(7) Protection includes the cost of protecting the utility’s property from fire or other casualties and the cost of preventing damages to others, or to the
property of others, including payments for discovery or extinguishment of fires, cost of apprehending and prosecuting incendiaries, witness fees in relation thereto, amounts paid to municipalities and others for fire protection, and other analogous items of expenditures in connection with construction work.

(8) Injuries and damages includes expenditures or losses in connection with construction work on account of injuries to persons and damages to the property of others; also the cost of investigation of and defense against actions for such injuries and damages. Insurance recovered or recoverable on account of compensation paid for injuries to persons incident to construction shall be credited to the account or accounts to which such compensation is charged. Insurance recovered or recoverable on account of property damages incident to construction shall be credited to the account or accounts charged with the cost of the damages.

(9) Privileges and permits includes payments for and expenses incurred in securing temporary privileges, permits or rights in connection with construction work, such as for the use of private or public property, streets, or highways, but it does not include rents, or amounts chargeable as franchises and consents for which see Account 302, Franchises and Consents.

(10) Rents includes amounts paid for the use of construction quarters and office space occupied by construction forces and amounts properly includible in construction costs for such facilities jointly used.

(11) Engineers and supervision includes the portion of the pay and expenses of engineers, surveyors, draftsmen, inspectors, superintendents and their assistants applicable to construction work.

(12) General administration capitalized includes the portion of the pay and expenses of the general officers and administrative and general expenses applicable to construction work.

(13) Engineering services includes amounts paid to other companies, firms, or individuals engaged by the utility to plan, design, prepare estimates, supervise, inspect, or give general advice and assistance in connection with construction work.

(14) Insurance includes premiums paid or amounts provided or reserved as self-insurance for the protection against loss and damages in connection with construction, by fire or other casualty, injuries or deaths of persons other than employees, damages to property of others, defalcation of employees and agents, and the non-performance of contractual obligations of others. It does not include workmen’s compensation or similar insurance on employees included as “labor” in Item in paragraph (c)(2) of this section.

(15) Law expenditures includes the general law expenditures incurred in connection with construction and the court and legal costs directly related thereto, other than law expenses included in “Protection,” Item in paragraph (c)(7) of this section, and in Injuries and damages, Item in paragraph (c)(8) of this section.

(16) Taxes includes taxes on physical property (including land) during the period of construction and other taxes properly includible in construction costs before the facilities become available for service.

(17) Allowance for funds used during construction includes the net cost for the period of construction of borrowed funds used for construction purposes and a reasonable rate on other funds when so used, not to exceed, without prior approval of RUS, allowances computed in accordance with the formula prescribed in Item in paragraph (c)(17)(i) of this section. No allowance for funds used during construction charges shall be included in these accounts upon expenditures for construction projects which have been abandoned.

(i) The formula and elements for the computation of the allowance for funds used during construction shall be:
§ 1767.16  Earnings and expenses during construction. The earnings and expenses during construction shall constitute a component of construction costs.

(i) The earnings shall include revenues received or earned for power produced by generating plants during the construction period and sold or used by the utility.

(A) Where such power is sold to an independent purchaser before intermingling with power generated by other plants, the credit shall consist of the selling price of the energy.

(B) Where the power generated by a plant under construction is delivered to the utility’s electric system for distribution and sale, or is delivered to an associated company, or is delivered to and used by the utility for purposes other than distribution and sale (for manufacturing or industrial use, for example), the credit shall be the fair value of the energy so delivered.

(C) Revenue shall also include rentals for lands, buildings, and other property, and miscellaneous receipts not properly includible in other accounts.

(ii) Expenses shall consist of the cost of operating the power plant, and other costs incident to the production and delivery of the power for which construction is credited under paragraph (c)(18)(i) of this section, including the cost of repairs and other expenses of operating and maintaining lands, buildings, and other property, and other miscellaneous and like expenses not properly includible in other accounts.

(19) Training costs. (i) When it is necessary that employees be trained to operate or maintain plant facilities that are being constructed and such facilities are not conventional in nature, or are new to the company’s operations,
these costs may be capitalized as a component of construction cost.

(ii) Once plant is placed in service, the capitalization of training costs shall cease and subsequent training costs shall be expensed. (See §1767.17 (d).)

(20) Studies. (i) Studies include the costs of studies such as nuclear operational, safety, or seismic studies, or environmental studies mandated by regulatory bodies relative to plant under construction.

(ii) Studies relative to facilities in service shall be charged to Account 183, Preliminary Survey and Investigation Charges.

(d) Overhead construction costs. (1) All overhead construction costs, such as engineering, supervision, general office salaries and expenses, construction engineering and supervision performed by others than the accounting utility, law expenses, insurance, injuries and damages, relief and pensions, taxes and interest, shall be charged to particular jobs or units on the basis of the amounts of such overheads reasonably applicable thereto, to the end that each job or unit shall bear its equitable proportion of such costs and that the entire cost of the unit, both direct and overhead, shall be deducted from the plant accounts as the time the property is retired.

(2) As far as practicable, the determination of payroll charges includible in construction overheads shall be based on time card distributions thereof.

(i) Where this procedure is impractical, special studies shall be made periodically of the time of supervisory employees devoted to construction activities to the end that only such overhead costs as have a definite relation to construction shall be capitalized.

(ii) The addition to direct construction cost of arbitrary percentages or amounts to cover assumed overhead costs is not permitted.

(3) The records supporting the entries for overhead construction costs shall be so kept as to show:

(i) The total amount of each overhead for each year;

(ii) The nature and amount of each overhead expenditure charged to each construction work order and to each electric plant account; and

(iii) The bases of distribution of such costs.

(e) Electric plant purchased or sold. (1) When electric plant constituting an operating unit or system is acquired by purchase, merger, consolidation, liquidation, or otherwise, after the effective date of this system of accounts, the costs of acquisition, including expenses incidental thereto properly includible in electric plant, shall be charged to Account 102, Electric Plant Purchased or Sold.

(2) The accounting for the acquisition shall then be completed as follows:

(i) The original cost of plant, estimated if not known, shall be credited to Account 102, Electric Plant Purchased or Sold, and concurrently charged to the appropriate electric plant in service accounts and to Account 104, Electric Plant Leased to Others; Account 105, Electric Plant Held for Future Use; and Account 107, Construction Work in Progress—Electric, as appropriate.

(ii) The depreciation and amortization applicable to the original cost of the properties purchased shall be charged to Account 102, Electric Plant Purchased or Sold, and concurrently credited to the appropriate account for accumulated provision for depreciation or amortization.

(iii) The cost to the utility of any property includible in Account 121, Nonutility Property, shall be transferred thereto.

(iv) The amount remaining in Account 102, Electric Plant Purchased or Sold, shall then be closed to Account 114, Electric Plant Acquisition Adjustments.

(3) If property acquired in the purchase of an operating unit or system is in such physical condition when acquired that it is necessary to substantially rehabilitate it in order to bring the property up to the standards of the utility, the cost of such work, except replacements, shall be accounted for as a part of the purchase price of the property.

(4) When any property acquired as an operating unit or system includes duplicate or other plant which will be retired by the accounting utility in the
reconstruction of the acquired property or its consolidation with previously owned property, the proposed accounting for such property shall be presented to RUS.

(5) In connection with the acquisition of electric plant constituting an operating unit or system, the utility shall procure, if possible, all existing records relating to the property acquired or certified copies thereof, and shall preserve such records in conformity with regulations or practices governing the preservation of records of its own construction.

(6) When electric plant constituting an operating unit or system is sold, conveyed, or transferred to another by sale, merger, consolidation, or otherwise, the book cost of the property sold or transferred to another shall be credited to the appropriate utility plant accounts, including amounts carried in Account 114, Electric Plant Acquisition Adjustments, and the amounts (estimated if not known) carried with respect thereto in the accounts for accumulated provision for depreciation and amortization and in Account 252, Customer Advances for Construction, shall be charged to such accounts and contra entries made to Account 102, Electric Plant Purchased or Sold. Unless otherwise ordered by RUS, the difference, if any, between:

(i) The net amount of debits and credits, and

(ii) The consideration received for the property (less commissions and other expenses of making the sale) shall be included in Account 421.1, Gain on Disposition of Property, or Account 421.2, Loss on Disposition of Property. (See Account 102, Electric Plant Purchased or Sold.)

Note: In cases where existing utilities merge or consolidate because of financial or operating reasons or statutory requirements rather than as a means of transferring title of purchased properties to a new owner, the accounts of the constituent utilities, with the approval of RUS, may be combined. In the event original cost has not been determined, the resulting utility shall proceed to determine such cost as outlined herein.

(f) Expenditures on leased property. (1) The cost of substantial initial improvements (including repairs, rearrangements, additions, and betterments) made in the course of preparing for utility service property leased for a period of more than one year, and the cost of subsequent substantial additions, replacements, or betterments to such property, shall be charged to the electric plant account appropriate for the class of property leased.

(i) If the service life of the improvements is terminable by action of the lease, the cost, less net salvage, of the improvements shall be spread over the life of the lease by charges to Account 404, Amortization of Limited-Term Electric Plant.

(ii) If the service life is not terminable by action of the lease but by depreciation proper, the cost of the improvements, less net salvage, shall be accounted for as depreciable plant. The provisions of (1) are applicable to property leased under either capital leases or operating leases.

(2) If improvements made to property leased for a period of more than one year are of relatively minor cost, or if the lease is for a period of not more than one year, the cost of the improvements shall be charged to the account in which the rent is included, either directly or by amortization thereof.

(g) Land and land rights. (1) The accounts for land and land rights shall include the cost of land owned in fee by the utility and rights, interests, and privileges held by the utility in land owned by others, such as leaseholds, easements, water and water power rights, diversion rights, submersion rights, rights-of-way, and other like interests in land.

(i) Do not include in the accounts for land and land rights and rights-of-way costs incurred in connection with first clearing and grading of land and rights-of-way and the damage costs associated with the construction and installation of plant.

(ii) Such costs shall be included in the appropriate plant accounts directly benefited.

(2) Where special assessments for public improvements provide for deferred payments, the full amount of the assessments shall be charged to the appropriate land account and the unpaid balance shall be carried in an appropriate liability account.
(i) Interest on unpaid balances shall be charged to the appropriate interest account.

(ii) If any part of the cost of public improvements is included in the general tax levy, the amount thereof shall be charged to the appropriate tax account.

(3) The net profit from the sale of timber, cord wood, sand, gravel, other resources or other property acquired with the rights-of-way or other lands shall be credited to the appropriate plant accounts to which related. Where land is held for a considerable period of time and timber and other natural resources on the land at the time of purchase increase in value, the net profit (after giving effect to the cost of the natural resources) from the sale of timber or its products or other natural resources shall be credited to the appropriate utility operating income account when such land has been recorded in Account 105, Electric Plant Held for Future Use, otherwise to Account 421, Miscellaneous Nonoperating Income.

(4) Separate entries shall be made for the acquisition, transfer, or retirement of each parcel of land, and each land right (except rights-of-way for distribution lines), or water right, having a life of more than one year.

(i) A record shall be maintained showing the nature of ownership, full legal description, area, map reference, purpose for which used, city, county, and tax district on which situated, from whom purchased or to whom sold, payment given or received, other costs, contract date and number, date of recording of deed, and book and page of record.

(ii) Entries transferring or retiring land or land rights shall refer to the original entry recording its acquisition.

(5) Any difference between the amount received from the sale of land or land rights, less agents’ commissions and other costs incident to the sale, and the book cost of such land or rights, shall be included in Account 411.6, Gains from Disposition of Utility Plant, or 411.7, Losses from Disposition of Utility Plant, when such property has been recorded in Account 105, Electric Plant Held for Future Use, otherwise to Account 421.1, Gain on Disposition of Property, or 421.2, Loss on Disposition of Property, as appropriate, unless a reserve therefor has been authorized and provided. Appropriate adjustments of the accounts shall be made with respect to any structures or improvements located on land sold.

(6) The cost of buildings and other improvements (other than public improvements) shall not be included in the land accounts. If, at the time of acquisition of an interest in land, such interest extends to buildings or other improvements (other than public improvements) which are then devoted to utility operations, the land and improvements shall be separately appraised and a cost allocated to land and buildings or improvements on the basis of the appraisals. If the improvements are removed or wrecked without being used in operations, the cost of removing or wrecking shall be charged and the salvage credited to the account in which the cost of land is recorded.

(7) When the purchase of land for electric operations requires the purchase of more land than needed for such purposes, the charge to the specific land account shall be based upon the cost of the land purchased, less the fair market value of that portion of the land which is not to be used in utility operations. The portion of the cost measured by the fair market value of the land not to be used shall be included in Account 105, Electric Plant Held for Future Use, or Account 121, Nonutility Property, as appropriate.

(8) Provisions shall be made for amortizing amounts carried in the accounts for limited-term interest in land so as to apportion equitably the cost of each interest over the life thereof. (See Account 111, Accumulated Provision for Amortization of Electric Utility Plant, and Account 404, Amortization of Limited-Term Electric Plant.)

(9) The items of cost to be included in the accounts for land and land rights are as follows:

(i) Bulkheads, buried, not requiring maintenance or replacement;

(ii) First cost of acquisition including mortgages and other liens assumed (but not subsequent interest thereon);
(iii) Condemnation proceedings, including court and counsel costs;
(iv) Consents and abutting damages;
(v) Conveyancers’ and notaries’ fees;
(vi) Fees, commissions, and salaries to brokers, agents, and other in connection with the acquisition of the land or land rights;
(vii) Leases, cost of voiding upon purchase to secure possession of land;
(viii) Removing, relocating, or reconstructing property of others, such as buildings, highways, railroads, bridges, cemeteries, churches, telephone and power lines, etc., in order to acquire quiet possession;
(ix) Retaining walls unless identified with structures;
(x) Special assessments levied by public authorities for public improvements on the basis of benefits for new roads, new bridges, new sewers, new curbing, new pavements, and other public improvements, but not taxes levied to provide for the maintenance of such improvements;
(xi) Surveys in connection with the acquisition, but not amounts paid for topographical surveys and maps where such costs are attributable to structures or plant equipment erected or to be erected or installed on such land;
(xii) Taxes assumed, accrued to date of transfer of title;
(xiii) Title, examining, clearing, insuring, and registering in connection with the acquisition and defending against claims relating to the period prior to the acquisition;
(xiv) Appraisals prior to closing title;
(xv) Cost of dealing with distributees or legatees residing outside of the state or county, such as recording power of attorney, recording will or exemplification of will, recording satisfaction of state tax;
(xvi) Filing satisfaction of mortgage;
(xvii) Documentary stamps;
(xviii) Photographs of property at acquisition;
(xix) Fees and expenses incurred in the acquisition of water rights and grants;
(xx) Cost of fill to extend bulkhead line over land under water, where riparian rights are held, which is not occasioned by the erection of a structure;
(xxii) Sidewalks and curbs constructed by the utility on public property; and
(xxiii) Labor and expenses in connection with securing rights of way, where performed by company employees and company agents.

(h) Structures and improvements. (1) The accounts for structures and improvements shall include the cost of all buildings and facilities to house, support, or safeguard property or persons, including all fixtures permanently attached to and made a part of buildings and which cannot be removed therefrom without cutting into the walls, ceilings, or floors, or without in some way impairing the buildings, and improvements of a permanent character on or to land.
(2) Also include those costs incurred in connection with the first clearing and grading of land and rights-of-way and the damage costs associated with construction and installation of plant.
(3) The cost of specially provided foundations not intended to outlast the machinery or apparatus for which provided, and the cost of angle irons, and castings installed at the base of an item of equipment, shall be charged to the same account as the cost of the machinery, apparatus, or equipment.
(4) Minor buildings and structures, such as valve towers, patrolmen’s towers, telephone stations, fish and wildlife, and recreation facilities which are used directly in connection with or form a part of a reservoir, dam or waterway shall be considered a part of the facility in connection with which constructed or operated and the cost thereof accounted for accordingly.
(5) Where furnaces and boilers are used primarily for furnishing steam for some particular department and only incidentally for furnishing steam for heating a building and operating the equipment therein, the entire cost of such furnaces and boilers shall be charged to the appropriate plant account, and no part to the building account.
(6) Where the structure of a dam forms also the foundation of the power plant building, such foundation shall be considered a part of the dam.
(7) The cost of disposing of materials excavated in connection with construction of structures shall be considered as a part of the cost of such work, except when such material is used for filling, the cost of loading, hauling, and dumping shall be equitably apportioned between the work in connection with which the removal occurs and the work in connection with which the material is used; and when such material is sold, the net amount realized from such sales shall be credited to the work in connection with which the removal occurs. If the amount realized from the sale of excavated materials exceeds the removal costs and the costs in connection with the sale, the excess shall be credited to the land account in which the site is carried.

(8) Lighting or other fixtures temporarily attached to building for purposes of display or demonstration shall not be included in the cost of the building but in the appropriate equipment account.

(9) The items of cost to be included in the accounts for structures and improvements are as follows:

(i) Architects' plans and specifications including supervision;
(ii) Ash pits (when located within the building);
(iii) Athletic field structures and improvements;
(iv) Boilers, furnaces, piping, wiring, fixtures, and machinery for heating, lighting, signaling, ventilating, and air conditioning systems, plumbing, vacuum cleaning systems, incinerator and smoke pipe, flues, etc.;
(v) Bulkheads, including dredging, riprap fill, piling, decking, concrete, fenders, etc., when exposed and subject to maintenance and replacement;
(vi) Chimneys;
(vii) Coal bins and bunkers;
(viii) Commissions and fees to brokers, agents, architects and others;
(ix) Conduit (not to be removed) with its contents;
(x) Damages to abutting property during construction;
(xi) Docks;
(xii) Door checks and door stops;
(xiii) Drainage and sewerage systems;
(xiv) Elevators, cranes, hoists, etc., and the machinery for operating them;
(xv) Excavation, including shoring, bracing, bridging, refill and disposal of excess excavated material, cofferdams around foundation, pumping water from cofferdams during construction and test borings;
(xvi) Fences and fence curbs (not including protective fences isolating items of equipment, which shall be charged to the appropriate equipment accounts);
(xvii) Fire protection systems when forming a part of a structure;
(xviii) Flagpole;
(xix) Floor covering (permanently attached);
(xx) Foundations and piers for machinery, constructed as a permanent part of a building or other item listed herein;
(xxi) Grading and clearing when directly occasioned by the building of a structure;
(xxii) Intrasite communication system, poles, pole fixtures, wires, and cable;
(xxiii) Landscaping, lawns, shrubbery, etc.;
(xxiv) Leases, voiding upon purchase to secure possession of structures;
(xxv) Leased property, expenditures on;
(xxvi) Lighting fixtures and outside lighting system;
(xxvii) Mailchutes when part of a building;
(xxviii) Marquee, permanently attached to the building;
(xxix) Painting, first cost;
(xxx) Permanent paving, concrete, brick, flagstone, asphalt, etc., within the property lines;
(xxxi) Partitions, including movable;
(xxxii) Permits and privileges;
(xxxiii) Platforms, railings and gratings when constructed as a part of a structure;
(xxxiv) Power boards for services to a building;
(xxxv) Refrigerating systems for general use;
(xxxvi) Retaining walls except when identified with land;
(xxxvii) Roadways, railroads, bridges, and trestles intrasite except railroads provided for in equipment accounts;
(xxxviii) Roofs;
(xxxix) Scales, connected to and forming a part of a structure;
(xl) Screens;
(xli) Sewer systems, for general use;
(xlii) Sidewalks, culverts, curbs and streets constructed by the utility on its property;
(xliii) Sprinkling systems;
(xliv) Sump pumps and pits;
(xlv) Stacks—brick, steel, or concrete, when set on foundation forming part of general foundation and steelwork of a building;
(xlvi) Steel inspection during construction;
(xlvii) Storage facilities constituting a part of a building;
(xlviii) Storm doors and windows;
(xlix) Subways, areaways, and tunnels, directly connected to and forming part of a structure;
(l) Tanks, constructed as part of a building or as a distinct structural unit;
(li) Temporary heating during construction (net cost);
(lii) Temporary water connection during construction (net cost);
(liii) Temporary shanties and other facilities used during construction (net cost);
(liv) Topographical maps;
(lv) Tunnels, intake and discharge, when constructed as part of a structure, including sluice gates, and those constructed to house mains;
(lvi) Vaults constructed as part of a building;
(lvii) Watchmen’s sheds and clock systems (net cost when used during construction only);
(lviii) Water basins or reservoirs;
(ix) Water front improvements;
(ix) Water meters and supply system for a building or for general company purposes;
(xi) Water supply piping, hydrants, and wells;
(xii) Wharves;
(xiii) Window shades and ventilators;
(xiv) Yard drainage system;
(xv) Yard lighting system; and
(xvi) Yard surfacing, gravel, concrete, or oil (First cost only).

Note: Structures and improvements accounts shall be credited with the cost of coal bunkers, stacks, foundations, subways, and tunnels, the use of which has terminated with the removal of the equipment with which they are associated even though they have not been physically removed.

(i) Equipment.
(1) The cost of equipment chargeable to the electric plant accounts, unless otherwise indicated in the text of an equipment account, includes the net purchase price thereof, sales taxes, investigation and inspection expenses necessary to such purchase, expenses of transportation when borne by the utility, labor employed, materials, and supplies consumed, and expenses incurred by the utility in unloading and placing the equipment in readiness to operate.
(2) Also include those costs incurred in connection with the first clearing and grading of land and rights-of-way and the damage costs associated with construction and installation of plant.
(3) Exclude from equipment accounts hand and other portable tools, which are likely to be lost or stolen or which have relatively small value (for example, $500 or less) or short life, unless the correctness of the accounting therefor as electric plant is verified by current inventories.
(4) Special tools acquired and included in the purchase price of equipment shall be included in the appropriate plant accounts.
(5) Portable drills and similar tool equipment when used in connection with the operation and maintenance of a particular plan or department, such as production, transmission, or distribution or in “stores”, shall be charged to the plant accounts appropriate for their use.
(6) The equipment accounts shall include angle irons and similar items which are installed at the base of an item of equipment, but piers and foundations which are designed to be as permanent as the buildings which house the equipment, or which are constructed as a part of the building and which cannot be removed without cutting into the walls, ceilings, or floors or, without in some way impairing the building, shall be included in the building accounts.
(7) The equipment accounts shall include the necessary costs of testing or running a plant or parts thereof during an experimental or test period prior to such plant becoming ready for or placed in service.
(i) The utility shall furnish RUS with full particulars of and justification for
any test or experimental run extending beyond a period of 120 days for nuclear plant, and a period of 90 days for all other plant.

(ii) Such particulars shall include a detailed operational and downtime log showing days of production, gross kilowatts generated by hourly increments, types, and periods of outages by hours with explanation thereof, beginning with the first date the equipment was either tested or synchronized on the line to the end of the test period.

(iii) The cost of efficiency or other tests made subsequent to the date equipment becomes available for service shall be charged to the appropriate expense accounts, except that tests to determine whether equipment meets the specifications and requirements as to efficiency, or performance guaranteed by manufacturers, made after operations have commenced and within the period specified in the agreement or contract of purchase, may be charged to the appropriate electric plant accounts.

(j) Additions and retirements of electric plant. (1) For the purpose of avoiding undue refinement in accounting for additions to and retirements and replacements of electric plant, all property shall be considered as consisting of retirement units and minor items of property.

(2) The addition and retirement of retirement units shall be accounted for as follows:

(i) When a retirement unit is added to electric plant, the cost thereof shall be added to the appropriate electric plant account, except that when units are acquired in the acquisition of any electric plant constituting an operating system, they shall be accounted for as provided in paragraph (e) of this section.

(ii) When a retirement unit is retired from electric plant, with or without replacement, the book cost thereof shall be credited to the electric plant account in which it is included, determined in the manner set forth in Item in paragraph (j)(2)(i) of this section. If the retirement unit is of a depreciable class, the book cost of the unit retired and credited to electric plant shall be charged to the accumulated provision for depreciation applicable to such property. The cost of removal and the salvage shall be charged or credited, as appropriate, to such depreciation account.

(3) The addition and retirement of minor items of property shall be accounted for as follows:

(i) When a minor item of property which did not previously exist is added to plant, the cost thereof shall be accounted for in the same manner as for the addition of a retirement unit, as set forth in Item in paragraph (j)(2)(i) of this section, if a substantial addition results, otherwise the charge shall be to the appropriate maintenance expense account.

(ii) When a minor item of property is retired and not replaced, the book cost thereof shall be credited to the electric plant account in which it is included; and, in the event the minor item is a part of depreciable plant, the account for accumulated provision for depreciation shall be charged with the book cost and cost of removal and credited with the salvage. If, however, the book cost of the minor item retired and not replaced has been or will be accounted for by its inclusion in the retirement unit of which it is a part when such unit is retired, no separate credit to the property account is required when such minor item is retired.

(iii) When a minor item of depreciable property is replaced independently of the retirement unit of which it is a part, the cost of replacement shall be charged to the maintenance account appropriate for the item, except that if the replacement effects a substantial betterment (the primary aim of which is to make the property affected more useful, more efficient, of greater durability, or of greater capacity), the excess cost of the replacement over the estimated cost at current prices of replacing without betterment shall be charged to the appropriate electric plant accounts.

(4) The book cost of electric plant retired shall be the amount at which such property is included in the electric plant accounts, including all components of construction costs. The book cost shall be determined from the utility’s records and if this cannot be done, it shall be estimated. When it is impracticable to determine the book
cost of each unit, due to the relatively large number or small cost thereof, an appropriate average book cost of the units with due allowance for any differences in size and character, shall be used as the book cost of the units retired.

(5) The book cost of land retired shall be credited to the appropriate land accounts. If the land is sold, the difference between the book cost (less any accumulated provision for depreciation or amortization therefore which has been authorized and provided) and the sale price of the land (less commissions and other expenses of making the sale) shall be recorded in Account 411.6, Gains from Disposition of Utility Plant, or Account 411.7, Losses from Disposition of Utility Plant, when the property has been recorded in Account 105, Electric Plant Held for Future Use, otherwise to Accounts 421.1, Gain on Disposition of Property, or 421.2, Loss on Disposition of Property, as appropriate. If the land is not used in utility service but is retained by the utility, the book cost shall be charged to Account 105, Electric Plant Held for Future Use, or Account 121, Nonutility Property, as appropriate.

(6) The book cost less net salvage of depreciable electric plant retired shall be charged in its entirety to Account 108, Accumulated Provision for Depreciation of Electric Utility Plant in Service. Any amounts which, by approval or order of RUS, are charged to Account 182.1, Extraordinary Property Losses, shall be credited to Account 108.

(7) The accounting for the retirement of amounts included in Account 302, Franchises and Consents, and Account 303, Miscellaneous Intangible Plant, and the items of limited-term interest in land included in the accounts for land and land rights, shall be as provided for in the text of Account 111, Accumulated Provision for Amortization of Electric Utility Plant in Service; Account 404, Amortization of Limited-Term Electric Plant; and Account 405, Amortization of Other Electric Plant.

(k) Work order and property record system required. (1) Each utility shall record all construction and retirements of electric plant by means of work orders or job orders. Separate work orders may be opened for additions to and retirements of electric plant or the retirements may be included with the construction work order, provided, however, that all items relating to the retirements shall be kept separate from those relating to construction and provided, further, that any maintenance costs involved in the work shall likewise be segregated.

(2) Each utility shall keep its work order system so as to show the nature of each addition to or retirement of electric plant, the total cost thereof, the source or sources of costs, and the electric plant account or accounts to which charged or credited. Work orders covering jobs of short duration may be cleared monthly.

(3) Each utility shall maintain records in which, for each plant account, the amounts of the annual additions and retirements are classified so as to show the number and cost of the various record units or retirement units.

(l) Transfers of property. When property is transferred from one electric plant account to another, from one utility department to another, such as from electric to gas, from one operating division or area to another, to or from Account 101, Electric Plant in Service; Account 104, Electric Plant Leased to Others; Account 105, Electric Plant Held for Future Use, and Account 121, Nonutility Property, the transfer shall be recorded by transferring the original cost thereof from the one account, department, or location to the other. Any related amounts carried in the accounts for accumulated provision for depreciation or amortization shall be transferred in accordance with the segregation of such accounts.

(m) Common utility plant. (1) If the utility is engaged in more than one utility service, such as electric, gas, and water, and any of its utility plant is used in common for several utility services or for other purposes to such an extent and in such manner that it is impracticable to segregate it by utility services currently in the accounts, such property, with the approval of RUS, may be designated and classified as "common utility plant."

(2) The book amount of utility plant designated as common plant shall be
included in Account 118, Other Utility Plant, and if applicable in part to the electric department, shall be segregated and accounted for in sub-accounts as electric plant is accounted for in Accounts 101 to 107, inclusive, and electric plant adjustments in Account 116, Other Electric Plant Adjustments; any amounts classifiable as common plant acquisition adjustments or common plant adjustments shall be subject to disposition as provided in Paragraphs C and B of Accounts 114 and 116, respectively, for amounts classified in those accounts. The original cost of common utility plant in service shall be classified according to the detailed utility plant accounts appropriate for the property.

(3) The utility shall be prepared to show, at any time, and to report to RUS annually, or more frequently, if required, and by utility plant accounts (301 to 399) the book cost of common utility plant, the allocation of such cost to the respective departments using the common utility plant, and the basis of the allocation.

(4) The accumulated provision for depreciation and amortization of the utility shall be segregated so as to show the amount applicable to the property classified as common utility plant.

(5) The expenses of operation, maintenance, rents, depreciation and amortization of common utility plant shall be recorded in the accounts prescribed herein, but designated as common expenses, and the allocation of such expenses to the departments using the common utility plant shall be supported in such manner as to reflect readily the basis of allocation used.

(n) Transmission and distribution plant. For the purpose of this system of accounts:

(1) Transmission system is all land, conversion structures, and equipment employed at a primary source of supply (i.e. generating station, or point of receipt in the case of purchased power) to change the voltage or frequency of electricity for the purpose of its more efficient or convenient transmission; all land, structures, lines, switching and conversion stations, high tension apparatus, and their control and protective equipment between a generating or receiving point and the entrance to a distribution center or wholesale point; and all lines and equipment whose primary purpose is to augment, integrate or tie together the sources of power supply.

(2) Distribution system is all land, structures, conversion equipment, lines, line transformers, and other facilities employed between the primary source of supply (i.e. generating station, or point of receipt in the case of purchased power) and of delivery to customers, which are not includible in transmission system, as defined in Item in paragraph (n)(1) of this section, whether or not such land, structures, and facilities are operated as part of a transmission system or as part of a distribution system.

NOTE: Stations which change electricity from transmission to distribution voltage shall be classified as distribution stations.

(3) Where poles or towers support both transmission and distribution conductors, the poles, towers, anchors, guys, and rights-of-way shall be classified as transmission system. The conductors, cross-arms, braces, grounds, tie-wire, and insulators shall be classified as transmission or distribution facilities, according to the purpose for which used.

(4) Where underground conduit contains both transmission and distribution conductors, the underground conduit and right-of-way shall be classified as distribution system. The conductors shall be classified as transmission or distribution facilities according to the purpose for which used.

(5) Land (other than rights-of-way) and structures used jointly for transmission and distribution purposes shall be classified as transmission or distribution according to the major use thereof.

(o) Hydraulic production plant. For purpose of this system of accounts hydraulic production plant is all land and land rights, structures and improvements used in connection with hydraulic power generation, reservoirs, dams and waterways, water wheels, turbines, generators, accessory electric equipment, roads, railroads, and bridges and structures and improvements used in connection with fish and wildlife, and recreation.
§ 1767.17 Operating expense instructions.

(a) Supervision and engineering. The supervision and engineering includible in the operating expense accounts shall consist of the salary, employee pensions and benefits, social security and other payroll taxes, injuries and damages, and other expenses of superintendents, engineers, clerks, other employees, and consultants engaged in supervising and directing the operation and maintenance of each utility function. Whenever allocations are necessary in order to arrive at the amount to be included in any account, the method and basis of allocation shall be reflected by underlying records.

(1) Labor items:
(i) Special tests to determine efficiency of equipment operation;
(ii) Preparing or reviewing budgets, estimates, and drawings relating to operation or maintenance for departmental approval;
(iii) Preparing instructions for operations and maintenance activities;
(iv) Reviewing and analyzing operating results;
(v) Establishing organizational setup of departments and executing changes therein;
(vi) Formulating and reviewing routines of departments and executing changes therein;
(vii) General training and instruction of employees by supervisors whose pay is chargeable hereto. Specific instructions and training in a particular type of work is chargeable to the appropriate functional account (See paragraph (c)(19) of this section); and
(viii) Secretarial work for supervisory personnel, but not general clerical and stenographic work chargeable to other accounts.

(2) Expense items:
(i) Employee pensions and benefits;
(ii) Social security and other payroll taxes;
(iii) Injuries and damages;
(iv) Consultants’ fees and expenses; and
(v) Meals, traveling, and incidental expenses.

(b) Maintenance. (1) The cost of maintenance chargeable to the various operating expense and clearing accounts includes labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials, overheads, and other expenses incurred in maintenance work. A list of work operations applicable generally to utility plant is included in this paragraph (b). Other work operations applicable to specific classes of plant are listed in functional maintenance expense accounts.

(2) Materials recovered in connection with the maintenance of property shall be credited to the same account to which the maintenance cost was charged.

(3) If the book cost of any property is carried in Account 102, Electric Plant Purchased or Sold, the cost of maintaining such property shall be charged to the accounts for maintenance of property of the same class and use, the book cost of which is carried in other electric plant in service accounts. Maintenance of property leased from others shall be treated as provided in paragraph (c) of this section.

(4) Items:
(i) Direct field supervision of maintenance;
(ii) Inspecting, testing, and reporting on condition of plant specifically to determine the need for repairs, replacements, rearrangements, and changes and inspecting and testing the adequacy of repairs which have been made;
(iii) Work performed specifically for the purpose of preventing failure, restoring serviceability or maintaining life of plant;
(iv) Rearranging and changing the location of plant not retired;
(v) Repairing for reuse materials recovered from plant;
(vi) Testing for, locating, and clearing trouble;

(p) Nuclear fuel records required. Each utility shall keep all the necessary records to support the entries to the various nuclear fuel plant accounts classified under “Assets and Other Debits,” Utility Plant Accounts 120.1 through 120.5, inclusive; Account 518, Nuclear Fuel Expense; and Account 157, Nuclear Materials Held for Sale. These records shall be so kept as to readily furnish the basis of the computation of the net nuclear fuel costs.
(vii) Net cost of installing, maintaining, and removing temporary facilities to prevent interruptions in service; and
(viii) Replacing or adding minor items of plant which do not constitute a retirement unit.

(c) Rents. (1) The rent expense accounts provided under the several functional groups of expense accounts shall include all rents, including taxes paid by the lessee on leased property, for property used in utility operations, except minor amounts paid for occasional or infrequent use of any property or equipment and all amounts paid for use of equipment that, if owned, would be includible in plant Accounts 391 to 398 inclusive, which shall be treated as an expense item and included in the appropriate function account and rents which are chargeable to clearing accounts, and distributed therefrom to the appropriate account.

(2) If rents cover property used for more than one function such as production and transmission, or by more than one department, the rents shall be apportioned to the appropriate rent expense or clearing accounts of each department on an actual, or if necessary, an estimated basis.

(3) When a portion of property or equipment rented from others for use in connection with utility operations is subleased, the revenue derived from such subleasing shall be credited to the rent revenue account in operating revenues; provided, however, that in case the rent was charged to a clearing account, amounts received from subleasing the property shall be credited to such clearing account.

(4) The cost, when incurred by the lessee, of operating and maintaining leased property, shall be charged to the accounts appropriate for the expense if the property were owned.

(5) The cost incurred by the lessee of additions and replacements to electric plant leased from others shall be accounted for as provided in §1767.16 (f).

(d) Training costs. (1) When it is necessary that employees be trained to specifically operate or maintain plant facilities that are being constructed, the related costs shall be accounted for as a current operating and maintenance expense.

(2) These expenses shall be charged to the appropriate functional accounts currently as they are incurred.

(3) When the training costs involved relate to facilities which are not conventional in nature, or are new to the company’s operations, see §1767.16 (c)(19), for the accounting.

§ 1767.18  

120.1 Nuclear Fuel in Process of Refinement, Conversion, Enrichment, and Fabrication  
120.2 Nuclear Fuel Materials and Assemblies—Stock Account  
120.3 Nuclear Fuel Assemblies in Reactor  
120.4 Spent Nuclear Fuel  
120.5 Accumulated Provision for Amortization of Nuclear Fuel Assemblies  
120.6 Nuclear Fuel Under Capital Leases

Assets and Other Debts

Utility Plant

101 Electric Plant in Service  
A. This account shall include the original cost of electric plant, included in Accounts 301 to 399, prescribed herein, owned and used by the utility in its electric utility operations, and having an expectation of life in
service of more than one year from date of installation, including such property owned by the utility but held by nominees.

B. (See also Account 106 for unclassified construction costs of completed plant actually in service.)

C. The cost of additions to and betterments of property leased from others, which are includible in this account, shall be recorded in subdivisions separate and distinct from those relating to owned property. (See §1767.16(f).)

101.1 Property Under Capital Leases

A. This account shall include the amount recorded under capital leases for plant leased from others and used by the utility in its utility operations.

B. The electric property included in this account shall be classified separately according to the detailed accounts (301 to 399) prescribed for electric plant in service.

C. Records shall be maintained with respect to each capital lease reflection: (1) name of lessor, (2) basic details of lease, (3) terminal date, (4) original cost or fair market value of property leased, (5) future minimum lease payments, (6) executory costs, (7) present value of minimum lease payments, (8) the amount representing interest and the interest rate used, and (9) expenses paid.

102 Electric Plant Purchased or Sold

A. This account shall be charged with the cost of electric plant acquired as an operating unit or system by purchase, merger, consolidation liquidation, or otherwise, and shall be credited with the selling price of like property transferred to others pending the distribution to appropriate accounts in accordance with §1767.16(e).

B. Within 6 months from the date of acquisition or sale of property recorded herein, the borrower shall file with RUS the proposed journal entries to clear from this account the amounts recorded herein.

103 Experimental Electric Plant

Unclassified

A. This account shall include the cost of electric plant which was constructed as a research, development, and demonstration plant under the provisions of Paragraph C, Account 107, Construction Work in Progress—Electric, and due to the nature of the plant, it is desirous to operate it for a period of time in an experimental status.

B. Amounts in this account shall be transferred to Account 101, Electric Plant in Service, or Account 121, Nonutility Property, as appropriate when the project is no longer considered as experimental.

C. The depreciation on property in this account shall be charged to Account 403, Depreciation Expense, and credited to Account 108, Accumulated Provision for Depreciation of Electric Utility Plant. The amounts here-in shall be depreciated over a period which would correspond to the estimated useful life of the relevant project considering the characteristics involved. However, when projects are transferred to Account 101, Electric Plant in Service, a new depreciation rate based upon the remaining service life and undepreciated amounts, will be established.

D. Records shall be maintained with respect to each unit of experiment so that full details may be obtained as to the cost, depreciation, and the experimental status.

E. Should it be determined that experimental plant recorded in this account will fail to satisfactorily perform its function, the costs thereof shall be accounted for as directed or authorized by RUS.

104 Electric Plant Leased to Others

A. This account shall include the original cost of electric plant owned by the utility, but leased to others as operating units or systems, where the lessee has exclusive possession.

B. The property included in this account shall be classified according to the detailed accounts (301 to 399) prescribed for electric plant in service and this account shall be maintained in such detail as though the property were used by the owner in its utility operations.

105 Electric Plant Held for Future Use

A. This account shall include the original cost of electric plant (except land and land rights) owned and held for future use in electric service under a definite plan for such use, to include: (1) Property acquired (except land and land rights) but never used by the utility in electric service, but held for such service in the future under a definite plan, and (2) property (except land and land rights) previously used by the utility in service but retired from such service and held pending its reuse in the future, under a definite plan, in electric service.

B. This account shall also include the original cost of land and land rights owned and held for future use in electric service under a plan for such use, to include land and land rights: (1) Acquired but never used by the utility in electric service, but held for such service in the future under a plan, and (2) previously held by the utility in service, but retired from such service and held pending its reuse in the future under a plan, in electric service. (See §1767.16(g).)

C. In the event that property recorded in this account shall no longer be needed or appropriate for future utility operations, the borrower shall notify RUS of such condition and request approval of journal entries to remove such property from this account.

D. Gains or losses from the sale of land and land rights or other disposition of such property previously recorded in this account and
not placed in utility service shall be recorded directly in Accounts 411.6 or 411.7, as appropriate, except when determined to be significant by RUS. Upon such a determination, the amounts shall be transferred to Account 256, Deferred Gains from Disposition of Utility Plant, or Account 187, Deferred Losses from Disposition of Utility Plant, and amortized to Account 411.6, Gains from Disposition of Utility Plant, or Account 411.7, Losses from Disposition of Utility Plant, as appropriate.

B. The property included in this account shall be classified according to the detail accounts (301 to 399) prescribed for electric plant in service and the account shall be maintained in such detail as though the property were in service.

C. Expenditures on research, development, and demonstration projects for construction of utility facilities are to be included in a separate subdivision in this account. Records must be maintained to show separately each project along with complete detail of the nature and purpose of the research, development, and demonstration project together with the related costs.

D. Account 107 shall be subaccounted as follows:

107.1 Construction Work in Progress—Contract
107.2 Construction Work in Progress—Force Account
107.3 Construction Work in Progress—Special Equipment

E. The property included in this account shall include the total of the balances of work orders for electric plant which has been completed and placed in service but which work orders have not been classified for transfer to the detailed electric plant accounts.

F. The purpose of this provision is to avoid any significant omissions in reported amounts of electric plant in service.

A. This account shall be credited with the following:

1. Amounts charged to Account 403, Depreciation Expense, or to clearing accounts for current depreciation expense for electric plant in service.
2. Amounts charged to Account 421, Miscellaneous Nonoperating Income, for depreciation expense on property included in Account 105, Electric Plant Held for Future Use. Include, also, the balance of accumulated provision for depreciation on property when transferred to Account 105, Electric Plant Held for Future Use, from other property accounts. Normally, Account 108 will not be used for current depreciation provision because, as provided herein, the service life during which depreciation is computed commences with the date property is included in electric plant in service; however, if special circumstances indicate the propriety of current accruals for depreciation, such charges shall be made to Account 421, Miscellaneous Nonoperating Income.
3. Amounts charged to Account 413, Expenses of Electric Plant Leased to Others, for electric plant included in Account 104, Electric Plant Leased to Others.
4. Amounts charged to Account 416, Costs and Expenses of Merchandising, Jobbing, and Contract Work, or to clearing accounts for current depreciation expense.
5. Amounts of depreciation applicable to electric properties acquired as operating units or systems. (See §1767.18(e).)
6. Amounts charged to Account 182.1, Extraordinary Property Losses, when authorized by RUS.
7. Amounts of depreciation applicable to electric plant donated to the utility. The utility shall maintain separate subaccounts for depreciation applicable to electric plant in service, electric plant leased to others, and electric plant held for future use.)

B. At the time of retirement of depreciable electric utility plant, this account shall be charged with the book cost of the property.
retired and the cost of removal and shall be credited with the salvage value and any other amounts recovered, such as insurance. When retirement, costs of removal and salvage are credits and debits to this account in sufficient detail to show separately for each such functional classification: (1) the amount of accrual for depreciation, (2) the book cost of property retired, (3) cost of removal, (4) salvage, and (5) other items, including recoveries from insurance.

D. When transfers of plant are made from one electric plant account to another, or from or to another utility department, or from or to nonutility property accounts, the accounting for depreciation shall be as provided in §1767.16 (I).

E. The utility is restricted in its use of the accumulated provision for depreciation to the purposes set forth above. It shall not transfer any portion of this account to retained earnings or make any other use thereof without authorization by RUS.

109–110 [Reserved]

111 Accumulated Provision for Amortization of Electric Utility Plant
A. This account shall be credited with the following:
1. Amounts charged to Account 404, Amortization of Limited-Term Electric Plant, for the current amortization of limited-term electric plant investments.
2. Amounts charged to Account 421, Miscellaneous Nonoperating Income, for amortization expense on property included in Account 105, Electric Plant Held for Future Use. Include also the balance of accumulated provision for amortization on property when transferred to Account 105, Electric Plant Held for Future Use, from other property accounts. See also Paragraph A(2), Account 108, Accumulated Provision for Depreciation of Electric Utility Plant.
3. Amounts charged to Account 405, Amortization of Other Electric Plant.
4. Amounts charged to Account 413, Expenses of Electric Plant Leased to Others, for the current amortization of limited-term or other investments subject to amortization included in Account 104, Electric Plant Leased to Others.
5. Amounts charged to Account 425, Miscellaneous Amortization, for the amortization of intangible or other electric plant which does not have a definite or terminable life and is not subject to charges for depreciation expense, with RUS approval.

The utility shall maintain subaccounts of this account for the amortization applicable to electric plant in service, electric plant leased to others and electric plant held for future use.)

B. When any property to which this account applies is sold, relinquished, or otherwise retired from service, this account shall be charged with the amount previously credited in respect to such property. The book cost of the property so retired less the amount chargeable to this account and less the net proceeds realized at retirement shall be included in Account 421.1, Gain on Disposition of Property, or Account 421.2, Loss on Disposition of Property, as appropriate.

C. For general ledger and balance sheet purposes, this account shall be regarded and treated as a single composite provision for amortization. For purposes of analysis, however, each utility shall maintain subsidiary records in which this account is segregated according to the following functional classification for electric plant: (1) Steam production, (2) Nuclear production, (3) Hydraulic production, (4) Other production, (5) Transmission, (6) Distribution, and (7) General. These subsidiary records shall reflect the current credits and debits to this account in sufficient detail to show separately for each such functional classification: (1) the amount of accrual for amortization, (2) the book cost of property retired, (3) cost of removal, (4) salvage, and (5) other items, including recoveries from insurance.

D. The utility is restricted in its use of the accumulated provision for amortization to the purposes set forth above. It shall not transfer any portion of this account to retained earnings or make any other use thereof without authorization by RUS.

112–113 [Reserved]

114 Electric Plant Acquisition Adjustments
A. This account shall include the difference between the cost to the accounting
utility of electric plant acquired as an operating unit or system by purchase, merger, consolidation, liquidation, or otherwise, and the original cost, estimated, if not known, of such property, less the amount or amounts credited by the accounting utility at the time of acquisition to accumulated provisions for depreciation and amortization and contributions in aid of construction with respect to such property.

B. With respect to acquisitions after the effective date of this system of accounts, this account shall be subdivided so as to show the amounts included herein for each property acquisition and to electric plant in service, electric plant held for future use, and electric plant leased to others. (See §1767.16 (e).)

C. Debit amounts recorded in this account related to plant and land acquisition may be amortized to Account 425, Miscellaneous Amortization, over a period not longer than the estimated remaining life of the properties to which such amounts relate. Amounts related to the acquisition of land only may be amortized to Account 425 over a period of not more than 15 years. Should a utility wish to account for debit amounts in this account in any other manner, it shall petition RUS for authority to do so. Credit amounts recorded in this account shall be accounted for as directed by RUS.

115 Accumulated Provision for Amortization of Electric Plant Acquisition Adjustments

This account shall be credited or debited with amounts which are includible in Account 406, Amortization of Electric Plant Acquisition Adjustments, or Account 425, Miscellaneous Amortization, for the purpose of providing for the extinguishment of amounts in Account 114, Electric Plant Acquisition Adjustments, in instances where the amortization of Account 114 is not being made by direct write-off of the account.

116 Other Electric Plant Adjustments

A. This account shall include the difference between the original cost, estimated if not known, and the book cost of electric plant to the extent that such difference is not properly includible in Account 114, Electric Plant Acquisition Adjustments. (See §1767.16 (a)(3))

B. Amounts included in this account shall be classified in such manner as to show the origin of each amount and shall be disposed of as RUS may approve or direct.

Note: The provisions of this account shall not be construed as approving or authorizing the recording of appreciation of electric plant.

118 Other Utility Plant

This account shall include the balances in accounts for utility plant, other than electric plant, such as gas, or railway.

119 Accumulated Provision for Depreciation and Amortization of Other Utility Plant

This account shall include the accumulated provision for depreciation and amortization applicable to utility property other than electric plant.

120 Nuclear Fuel in Process of Refinement, Conversion, Enrichment, and Fabrication

A. This account shall include the original cost to the utility of nuclear fuel materials while in process of refinement, conversion, enrichment, and fabrication into nuclear fuel assemblies and components, including processing, fabrication, and necessary shipping costs. This account shall also include the salvage value of nuclear materials which are actually being reprocessed for use and were transferred from Account 120.5, Accumulated Provision for Amortization of Nuclear Fuel Assemblies, (See §1767.10 (a)(27).)

B. This account shall be credited and Account 120.2, Nuclear Fuel Materials and Assemblies—Stock Account, shall be debited for the cost of completed fuel assemblies delivered for use in refueling or to be held as spares. In the case of the initial core loading, the transfer shall be made directly to Account 120.3, Nuclear Fuel Assemblies in Reactor, upon the conclusion of the experimental or test period of the plant prior to its becoming available for service.

Items

1. Cost of natural uranium, uranium ores concentrates or other nuclear fuel sources, such as thorium, plutonium, and U–233.
2. Value of recovered nuclear materials being reprocessed for use.
3. Milling process costs.
4. Sampling and weighing, and assaying costs.
5. Purification and conversion process costs.
6. Costs of enrichment by gaseous diffusion or other methods.
7. Costs of fabrication into fuel forms suitable for insertion in the reactor.
8. All shipping costs of materials and components, including shipping of fabricated fuel assemblies to the reactor site.
9. Use charges on leased nuclear materials while in process of refinement, conversion, enrichment, and fabrication.
120.2 Nuclear Fuel Materials and Assemblies—Stock Account
A. This account shall be debited and Account 120.1, Nuclear Fuel in Process of Refinement, Conversion, Enrichment and Fabrication, shall be credited with the cost of fabricated fuel assemblies purchased in completed form. This account shall also include the original cost of partially irradiated fuel assemblies being held in stock for reinsertion in a reactor which had been transferred from Account 120.3, Nuclear Fuel Assemblies in Reactor.

B. When fuel assemblies included in this account are inserted in a reactor, this account shall be credited and Account 120.3, Nuclear Fuel Assemblies in Reactor, debited for the cost of such assemblies.

C. This account shall also include the cost of nuclear materials and byproduct materials being held for future use and not actually in process, in Account 120.1, Nuclear Fuel in Process of Refinement, Conversion, Enrichment and Fabrication.

120.3 Nuclear Fuel Assemblies in Reactor
A. This account shall include the cost of nuclear fuel assemblies when inserted in a reactor for the production of electricity. The amounts included herein shall be transferred from Account 120.2, Nuclear Fuel Materials and Assemblies—Stock Account, except for the initial core loading which will be transferred directly from Account 120.1, Nuclear Fuel in Process of Refinement, Conversion, Enrichment and Fabrication.

B. Upon removal of fuel assemblies from a reactor, the original cost of the assemblies removed shall be transferred to Account 120.4, Spent Nuclear Fuel, or Account 120.2, Nuclear Fuel Materials and Assemblies—Stock Account, as appropriate.

120.4 Spent Nuclear Fuel
A. This account shall include the original cost of nuclear fuel assemblies, in the process of cooling, transferred from Account 120.3, Nuclear Fuel Assemblies in Reactor, upon removal from a reactor pending reprocessing.

B. This account shall be credited and Account 120.5, Accumulated Provision for Amortization of Nuclear Fuel Assemblies, debited for fuel assemblies, after the cooling period is over, at the cost recorded in this account.

120.5 Accumulated Provision for Amortization of Nuclear Fuel Assemblies
A. This account shall be credited and Account 518, Nuclear Fuel Expense, shall be debited for the amortization of the net cost of nuclear fuel assemblies used in the production of energy. The net cost of nuclear fuel assemblies subject to amortization shall be the original cost of nuclear fuel assemblies, plus or less the expected net salvage value of uranium, plutonium, and other byproducts.

B. This account shall be credited with the net salvage value of uranium, plutonium, and other nuclear by-products when such items are sold, transferred or otherwise disposed. Account 120.1, Nuclear Fuel in Process of Refinement, Conversion, Enrichment and Fabrication, shall be debited with the net salvage value of nuclear materials to be reprocessed. Account 157, Nuclear Materials Held for Sale, shall be debited for the net salvage value of nuclear materials not to be reprocessed but to be sold or otherwise disposed of and Account 120.2, Nuclear Fuel Materials and Assemblies—Stock Account, will be debited with the net salvage value of nuclear materials that will be held for future use and not actually in process, in Account 120.1, Nuclear Fuel in Process of Refinement, Conversion, Enrichment, and Fabrication.

C. This account shall be debited and Account 120.4, Spent Nuclear Fuel, shall be credited with the cost of fuel assemblies at the end of the cooling period.

120.6 Nuclear Fuel Under Capital Leases
A. This account shall include the amount recorded under capital leases for nuclear fuel leased from others for use by the utility in its utility operations.

B. Records shall be maintained with respect to each capital lease reflecting: (1) name of lessor, (2) basic details of lease, (3) terminal date, (4) original cost or fair market value of property leased, (5) future minimum lease payments, (6) the amount representing interest and the interest rate used, and (7) expenses paid.

Other Property and Investments
121 Nonutility Property
A. This account shall include the book cost of land, structures, equipment, or other tangible or intangible property owned by the utility, but not used in utility service and not properly includable in Account 105, Electric Plant Held for Future Use.

B. This account shall also include the amount recorded under capital leases for property leased from others and used by the utility in its nonutility operations. Records shall be maintained with respect to each lease reflecting: (1) name of lessor, (2) basic details of lease, (3) terminal date, (4) original cost or fair market value of property leased, (5) future minimum lease payments, (6) executory costs, (7) present value of minimum lessee payments, (8) the amount representing interest and the interest rate used, and (9) expenses paid.
§ 1767.18  

C. This account shall be subdivided so as to show the amount of property used in operations which are nonutility in character but nevertheless constitute a distinct operating activity of the company (such as operation of an ice department where such activity is not classed as a utility) and the amount of miscellaneous property not used in operations but necessary in support of each subsidiary company. The account shall be maintained so as to show an appropriate classification of the property.

NOTE: The gain from the sale or other disposition of property included in this account which had been previously recorded in Account 105, Electric Plant Held for Future Use, shall be accounted for in accordance with Paragraph C of Account 105.

122  Accumulated Provision for Depreciation and Amortization of Nonutility Property

This account shall include the accumulated provision for depreciation and amortization applicable to nonutility property.

123  Investment in Associated Companies

A. This account shall include the book cost of investments in securities issued or assumed by associated companies and investment advances to such companies, including interest accrued thereon when such interest is not subject to current settlement, provided that the investment does not relate to a subsidiary company. (If the investment relates to a subsidiary company, it shall be included in Account 123.1, Investment in Subsidiary Companies.) Include herein the offsetting entry to the recording of amortization of discount or premium on interest bearing investments. (See Account 419, Interest and Dividend Income.)

B. This account shall be maintained in such manner as to show the investment in securities of, and advances to, each associated company together with full particulars regarding any of such investments that are pledged.

NOTE A: Securities and advances of associated companies owned and pledged shall be included in this account, but such securities, if held in special deposits or in special funds, shall be included in the appropriate deposit or fund account. A complete record of securities pledged shall be maintained.

NOTE B: Securities of associated companies held as temporary cash investments are includible in Account 136, Temporary Cash Investments.

NOTE C: Balances in open accounts with associated companies, which are subject to current settlement, are includible in Account 146, Accounts Receivable from Associated Companies.

NOTE D: The utility may write down the cost of any security in recognition of a decline in the value thereof. Securities shall be written off or written down to a nominal value if there is no reasonable prospect of substantial value. Fluctuations in market value shall not be recorded but a permanent impairment in the value of securities shall be recognized in the accounts. When securities are written off or written down, the amount of the adjustment shall be charged to Account 426.5, Other Deductions, or to an appropriate account for accumulated provisions for loss in value established as a separate subdivision of this account.

C. Account 123 shall be subaccounted as follows:

123.1  Patronage Capital from Associated Cooperatives

123.3  Investment in Associated Organizations—Federal Economic Development Loans

123.4  Investment in Associated Organizations—Non-Federal Economic Development Loans

123.11  Investment in Subsidiary Companies

123.21  Subscriptions to Capital Term Certificates—Supplemental Financing

123.22  Investment in Capital Term Certificates—Supplemental Financing

123.23  Other Investments in Associated Organizations

123.1  Patronage Capital from Associated Cooperatives

This account shall include patronage capital credits allocated to the accounting borrower by G&T cooperatives. It shall also include capital credits, deferred patronage refunds, or like items from other associated cooperatives. The account shall be maintained so as to reflect separately, the allocations of patronage capital and patronage refunds from each organization that makes such allocations to the borrower.

123.3  Investment in Associated Organizations—Federal Economic Development Loans

This account shall include investment advances of Federal funds received from a Rural Economic Development Grant to associated organizations for authorized federal economic development projects.

123.4  Investment in Associated Organizations—Non-Federal Economic Development Loans

This account shall include investment advances of non-Federal funds from the Rural Economic Development Grant revolving fund to associated organizations for authorized rural economic development projects.

123.11  Investment in Subsidiary Companies

A. This account shall include the cost of investments in securities issued or assumed by subsidiary companies and investment advances to such companies, including interest
accrued thereon when such interest is not subject to current settlement, plus the equity in undistributed earnings or losses of such subsidiary companies since acquisition. This account shall be credited with any dividends declared by such subsidiaries.

B. This account shall be maintained in such a manner as to show separately for each subsidiary: the cost of such investments in the securities of the subsidiary at the time of acquisition; the amount of equity in the subsidiary’s undistributed net earnings or net losses since acquisition; advances or loans to such subsidiary; and full particulars regarding any such investments that are pledged.

123.21 Subscriptions to Capital Term Certificates—Supplemental Financing

This account shall include the total subscriptions to capital term certificates of CFC. When subscriptions are paid, this account shall be credited and Account 123.22, Investments in Capital Term Certificates—Supplemental Financing, debited.

123.22 Investments in Capital Term Certificates—Supplemental Financing

This account shall include paid subscriptions in capital term certificates of CFC or other supplemental lenders.

123.23 Other Investments in Associated Organizations

This account shall include investments in capital stock, securities, membership fees, and investment advances to associated organizations other than provided for elsewhere. This account shall be maintained in such a manner as to show the investment in stock and securities of and advances to each associated organization.

Items

1. Investments in capital stock of associated organizations.
2. Investments in securities issued by associated organizations.
3. Membership fees in associated organizations, including NRECA, and Statewide associations of RUS-financed borrowers.
4. Investment advances to associated organizations.

124 Other Investments

A. This account shall include the book cost of investments in securities issued or assumed by nonassociated companies, investment advances to such companies, and any investments not accounted for elsewhere. Include also the offsetting entry to the recording of amortization of discount or premium on interest bearing investments. (See Account 419, Interest and Dividend Income.)

B. The records shall be maintained in such manner as to show the amount of each investment and the investment advances to each person.

C. Account 124 shall be subaccounted as follows:

124.1 Other Investments—Federal Economic Development Loans

This account shall include investment advances of Federal funds received from a Rural Economic Development Grant to non-associated organizations for authorized rural economic development projects.

124.2 Other Investments—Non-Federal Economic Development Loans

This account shall include investment advances of non-Federal funds from the Rural Economic Development Grant revolving fund to nonassociated organizations for authorized rural economic development projects.

125 Sinking Funds

This account shall include the amount of cash and book cost of investments held in sinking funds. A separate account, with appropriate title, shall be kept for each sinking fund. Transfers from this account to special deposit accounts, may be made as necessary for the purpose of paying matured sinking fund obligations, or obligations called for redemption but not presented, or the interest thereon.

126 Depreciation Fund

This account shall include the amount of cash and the book cost of investments which have been segregated in a special fund for the purpose of identifying such assets with the accumulated provisions for depreciation.

128 Other Special Funds

This account shall include the amount of cash and book cost of investments which have been segregated in special funds for insurance, employee pensions, savings, relief, hospital, and other purposes not provided for elsewhere. A separate account, with appropriate title, shall be kept for each fund.

Note: Amounts deposited with a trustee under the terms of an irrevocable trust agreement for pensions or other employee...
benefits shall not be included in this account.

**Current and Accrued Assets**

Current and accrued assets are cash, those assets which are readily convertible into cash or are held for current use in operations or construction, current claims against others, payment of which is reasonably assured, and amounts accruing to the utility which are subject to current settlement, except such items for which accounts other than those designated as current and accrued assets are provided. There shall not be included in the category of accounts designated as current and accrued assets any item, the amount or collectibility of which is not reasonably assured, unless an adequate provision for possible loss has been made therefor. Items of current character but of doubtful value may be written down, and for record purposes carried in these accounts at nominal value.

### 131 Cash

A. This account shall include the amount of current cash funds except working funds.

B. Account 131 shall be subaccounted as follows:

- **131.1 Cash—General**
- **131.2 Cash—Construction Fund—Trustee**
- **131.3 Cash—Installation Loan and Collection Fund**
- **131.4 Transfer of Cash**
- **131.12 Cash—General—Economic Development Loan Funds**
- **131.13 Cash—General—Economic Development Grant Funds**
- **131.14 Cash—General—Economic Development Non-Federal Revolving Funds**
  - **131.1 Cash—General**
  - **131.12 Cash—General—Economic Development Loans**
  - **131.13 Cash—General—Economic Development Grant Funds**
  - **131.14 Cash—General—Economic Development Non-Federal Revolving Funds**

This account shall include all cash of the organization not provided for elsewhere. Separate subaccounts may be maintained for each bank account in which general cash is maintained. Funds held by others for current obligations shall be recorded in Account 134, Other Special Deposits.

- **131.2 Cash—Construction Fund—Trustee**
  - This account shall include the cash received from the Rural Utilities Service, CFC, and any other source of supplemental financing for the construction, purchase, and operation of electric facilities. RUS construction loan fund advances shall be charged to this account and credited to Account 224.4, RUS Notes Executed—Construction—Debit. CFC and other supplemental lender construction loan fund advances shall be charged to this account and credited to Account 224.13, Supplemental Financing Notes Executed—Debit.

### 131.3 Cash—Installation Loan and Collection Fund

A. This account shall include the cash advanced on installation loans made subsequent to September 13, 1957. Such advances shall be debited to this account as received and credited to Account 224.10, RUS Notes Executed—Installation—Debit. This account shall also include interest and principal collections received on consumers' loans financed from RUS loans made subsequent to September 13, 1957.

B. Payments shall be made from this account solely for financing consumers' loans for the purpose of wiring of consumers' premises, and the acquisition and installation of electrical and plumbing appliances and equipment by consumers. The cash in this account is also used for the payment of principal and interest on installation loans made by RUS, subsequent to September 13, 1957, in accordance with the terms of the loan agreement.

### 131.4 Transfer of Cash

This account shall be used in transferring funds from one bank account to another. This account is charged when the check is drawn for the transfer and entered in the check register, and credited when the amount transferred is entered in the cash receipts book. This account is to be used as a clearing account and should not have a balance at the end of an accounting period.

### 131.12 Cash—General—Economic Development Loans

This account shall include the cash received from the Rural Utilities Service for Rural Economic Development Loans. Economic development loan advances shall be charged to this account and credited to Account 224.17, RUS Notes Executed—Economic Development—Debit.

### 131.13 Cash—General—Economic Development Grant Funds

This account shall include cash received from the Rural Utilities Service for Rural Economic Development Loans. Economic development grant funds shall be charged to this account and credited to Account 224.18, Other Long-Term Debt—Grant Funds; Account 208, Donated Capital; or Account 421, Miscellaneous Nonoperating Income, as appropriate. This account shall be credited and either Account 123.3, Investment in Associated Organizations—Federal Economic Development Loans, or Account 124.1, Other Investments—Federal Economic Development Loans, shall be debited, as appropriate, with the amount of an economic development revolving fund loan.
§ 1767.18

131.14 Cash—General—Economic Development Non-Federal Revolving Funds
This account shall include all non-Federal funds comprising the economic development revolving fund. It shall include all funds supplied by the borrower as well as all cash received from the repayment of loans made from the economic development revolving fund. This account shall be credited and either Account 123.4, Investment in Associated Organizations—Non-Federal Economic Development Loans, or Account 124.2, Other Investments—Non-Federal Economic Development Loans, shall be debited, as appropriate, with the amount of an economic development revolving fund loan.

132 Interest Special Deposits
This account shall include special deposits with fiscal agents or others for the payment of interest.

133 Dividend Special Deposits
This account shall include special deposits with fiscal agents or others for the payment of dividends.

134 Other Special Deposits
This account shall include deposits with fiscal agents or others for special purposes other than the payment of interest and dividends. Such special deposits may include cash deposited with Federal, state, or municipal authorities as a guaranty for the fulfillment of obligations; cash deposited with trustees to be held until mortgaged property sold, destroyed, or otherwise disposed of is replaced; and cash realized from the sale of the accounting utility’s securities and deposited with trustees to be held until invested in property of the utility. Entries to this account shall specify the purpose for which the deposit is made.

Note: Assets available for general corporate purposes shall not be included in this account. Further, deposits for more than one year, which are not offset by current liabilities, shall not be charged to this account but to Account 128, Other Special Funds.

135 Working Funds
This account shall include cash advanced to officers, agents, employees, and others as petty cash or working funds.

136 Temporary Cash Investments
A. This account shall include the book cost of investments, such as demand and time loans, bankers’ acceptances, United States Treasury certificates, marketable securities, and other similar investments, acquired for the purpose of temporarily investing cash.
B. This account shall be so maintained as to show separately temporary cash investments in securities of associated companies and of others. Records shall be kept of any pledged investments.

141 Notes Receivable
A. This account shall include the book cost, not includible elsewhere, of all collectible obligations in the form of notes receivable and similar evidences (except interest coupons) of money due on demand or within one year from the date of issue, except, however, notes receivable from associated companies. (See Account 136, Temporary Cash Investments, and Account 145, Notes Receivable from Associated Companies.)

Note: The face amount of notes receivable discounted, sold, or transferred without releasing the utility from liability as endorser thereon, shall be credited to a separate subdivision of this account and appropriate disclosure shall be made in the financial statements of any contingent liability arising from such transactions.

B. Account 141 shall be subaccounted as follows:

141.1 Accumulated Provision for Uncollectible Notes—Credit

This account shall be credited with amounts provided for losses on notes receivable which may become uncollectible, and also with collections on notes previously charged hereto. Concurrent charges shall be made to Account 904, Uncollectible Accounts.

142 Customer Accounts Receivable
A. This account shall include amounts due from customers for utility service and for merchandising, jobbing, and contract work. This account shall not include amounts due from associated companies.

B. This account shall be maintained so as to permit ready segregation of the amounts due for merchandising, jobbing, and contract work.

C. Account 142 shall be subaccounted as follows:

142.1 Customer Accounts Receivable—Electric

142.2 Customer Accounts Receivable—Other

142.1 Customer Accounts Receivable—Electric
This account shall include amounts due from customers for utility service.

142.2 Customer Accounts Receivable—Other
This account shall include amounts due from customers for merchandising, jobbing, and contract work.
143 Other Accounts Receivable

A. This account shall include amounts due the utility upon open accounts, other than amounts due from associated companies and from customers for utility services and merchandising, jobbing and contract work.

B. This account shall be maintained so as to show separately amounts due on subscriptions to capital stock and from officers and employees. The account shall not include amounts advanced to officers or others as working funds. (See Account 135, Working Funds.)

144 Accumulated Provision for Uncollectible Accounts—Credit

A. This account shall include amounts provided for losses on accounts receivable which may become uncollectible, and also with collections on accounts previously charged hereto. Concurrent charges shall be made to Account 904, Uncollectible Accounts, for amounts applicable to utility operations, and to corresponding accounts for other operations. Records shall be maintained so as to show the write-offs of accounts receivable for each utility department.

B. Account 144 shall be subaccounted as follows:

144.1 Accumulated Provision for Uncollectible Customer Accounts—Credit

144.2 Accumulated Provision for Uncollectible Merchandising Accounts—Credit

144.3 Accumulated Provision for Uncollectible Accounts, Officers and Employees—Credit

144.4 Accumulated Provision for Other Uncollectible Accounts—Credit

144.1 Accumulated Provision for Uncollectible Customer Accounts—Credit

This account shall be credited with amounts provided for losses on accounts receivable which may become uncollectible, and also with collections on accounts previously charged hereto. Concurrent charges shall be made to Account 904, Uncollectible Accounts.

144.2 Accumulated Provision for Uncollectible Merchandising Accounts—Credit

This account shall be credited with amounts provided for losses on merchandising, jobbing, and contract work which may become uncollectible, and also with collections on accounts previously charged hereto. Concurrent charges shall be made to Account 904, Uncollectible Accounts, for amounts applicable to utility operations, and to corresponding accounts for other operations.

144.3 Accumulated Provision for Uncollectible Accounts, Officers and Employees—Credit

This account shall be credited with amounts provided for losses on accounts receivable from officers and employees which may become uncollectible and also with collections on accounts previously charged hereto. Concurrent charges shall be made to Account 904, Uncollectible Accounts.

144.4 Accumulated Provision for Other Uncollectible Accounts—Credit

This account shall be credited with amounts provided for losses on accounts receivable which may become uncollectible and for which the recording of this credit has not been provided for elsewhere. This account shall also be credited with collections on accounts previously charged hereto. Concurrent charges shall be made to Account 904, Uncollectible Accounts, for amounts applicable to utility operations and to corresponding accounts for other operations.

145 Notes Receivable from Associated Companies

This account shall include notes upon which associated companies are liable, and which mature and are expected to be paid in full not later than one year from the date of issue, together with any interest thereon, and debit balances subject to current settlement in open accounts with associated companies. Items which do not bear a specified due date but which have been carried for more than twelve months and items which are not paid within twelve months from due date shall be transferred to Account 123, Investment in Associated Companies.

NOTE: The face amount of notes receivable discounted, sold or transferred without releasing the utility from liability as endorser thereon, shall be credited to a separate subdivision of this account and appropriate disclosure shall be made in the financial statements of any contingent liability arising from such transactions.

146 Accounts Receivable from Associated Companies

This account shall include drafts upon which associated companies are liable, and which mature and are expected to be paid in full not later than one year from the date of issue, together with any interest thereon, and debit balances subject to current settlement in open accounts with associated companies. Items which do not bear a specified due date but which have been carried for more than twelve months and items which are not paid within twelve months from due date shall be transferred to Account 123, Investment in Associated Companies.

NOTE: On the balance sheet, accounts receivable from an associated company may be
Rural Utilities Service, USDA § 1767.18

151 Fuel Stock
This account shall include the book cost of fuel on hand.

Items
1. Invoice price of fuel less any cash or other discounts.
2. Freight, switching, demurrage, and other transportation charges, not including, however, any charges for unloading from the shipping medium.
3. Excise taxes, purchasing agents’ commissions, insurance, and other expenses directly assignable to cost of fuel.
4. Operating, maintenance and depreciation expenses, and ad valorem taxes on utility-owned transportation equipment used to transport fuel from the point of acquisition to the unloading point.
5. Lease or rental costs of transportation equipment used to transport fuel from the point of acquisition to the unloading point.

152 Fuel Stock Expenses Undistributed
A. This account may include the cost of labor and of supplies used and expenses incurred in unloading fuel from the shipping medium and in the handling thereof prior to its use, if such expenses are sufficiently significant in amount to warrant being treated as a part of the cost of fuel inventory rather than being charged direct to expense as incurred.
B. Amounts included herein shall be charged to expense as the fuel is used to the end that the balance herein shall not exceed the expenses attributable to the inventory of fuel on hand.

Items
Labor:
1. Procuring and handling of fuel.
2. All routine fuel analyses.
3. Unloading from shipping facility and placing in storage.
4. Moving of fuel in storage and transferring from one station to another.
5. Handling from storage or shipping facility to first bunker, hopper, bucket, tank, or holder of boiler house structure.
6. Operation of mechanical equipment such as locomotives, trucks, cars, boats, barges, and cranes.

Supplies and Expenses:
1. Tools, lubricants and other supplies.
2. Operating supplies for mechanical equipment.
3. Transportation and other expenses in moving fuel.
4. Stores expenses applicable to fuel.

153 Residuals
This account shall include the book cost of any residuals produced in the production or manufacturing processes.

154 Plant Materials and Operating Supplies
A. This account shall include the cost of materials purchased primarily for use in the utility business for construction, operation and maintenance purposes. It shall also include the book cost of materials recovered in connection with construction, maintenance, or the retirement of property, such materials being credited to construction, maintenance, or accumulated depreciation provision, respectively, and included herein as follows:
1. Reusable materials consisting of large individual items shall be included in this account at original cost, estimated if not known. The cost of repairing such items shall be charged to the maintenance account appropriate for the previous use.
2. Reusable materials consisting of relatively small items, the identity of which (from the date of original installation to the final abandonment or sale thereof) cannot be ascertained without undue refinement in accounting, shall be included in this account at current prices new for such items. The cost of repairing such items shall be charged to the appropriate expense account as indicated by previous use.
3. Scrap and nonusable materials included in this account shall be carried at the estimated net amount realizable therefrom. The difference between the amounts realized for scrap and nonusable materials sold and the net amount at which the materials were carried in this account, as far as practicable, shall be adjusted to the accounts credited when the materials were charged to this account.
B. Materials and supplies issued shall be credited hereto and charged to the appropriate construction, operating expense, or other account on the basis of a unit price determined by the use of cumulative average, first-in-first-out, or such other method of inventory accounting as conforms with accepted accounting standards consistently applied.

Items
1. Invoice price of materials less any cash or other discounts.
2. Freight, switching, or other transportation charges when practicable to include as part of the cost of particular materials to which they relate.
3. Customs duties and excise taxes.
4. Costs of inspection and special tests prior to acceptance.
5. Insurance and other directly assignable charges.

Note: Where expenses applicable to materials purchased cannot be directly assigned
to particular purchases, they shall be charged to Account 163, Stores Expense Undistributed.

155 Merchandise
This account shall include the book cost of materials and supplies and appliances and equipment held primarily for merchandising, jobbing, and contract work. The principles prescribed in accounting for utility materials and supplies shall be observed with respect to items carried in this account.

156 Other Materials and Supplies
This account shall include the book cost of materials and supplies held primarily for nonutility purposes. The principles prescribed in accounting for utility materials and supplies shall be observed with respect to items carried in this account.

157 Nuclear Materials Held for Sale
This account shall include the net salvage value of uranium, plutonium, and other nuclear materials held by the company for sale or other disposition that are not to be reused by the company in its electric utility operations. This account shall be debited and Account 120.5, Accumulated Provision for Amortization of Nuclear Fuel Assemblies, credited for such net salvage value. Any difference between the amount recorded in this account and the actual amount realized from the sale of materials shall be debited or credited, as appropriate, to Account 518, Nuclear Fuel Assemblies, at the time of such sale.

158.1 Allowance Inventory
A. This account shall include the cost of allowances owned by the utility and not withheld by the Environmental Protection Agency. See §1767.15 (u) and Account 158.2, Allowances Withheld. B. This account shall be credited and Account 509, Allowances, shall be debited concurrent with the monthly emission of sulfur dioxide. C. Separate subdivisions of this account shall be maintained so as to separately account for those allowances usable in the current year and in each subsequent year. The underlying records of these subdivisions shall be maintained in sufficient detail so as to identify each allowance included; the origin of each allowance; and the acquisition cost, if any, of the allowance.

158.2 Allowances Withheld
A. This account shall include the cost of allowances owned by the utility but withheld by the Environmental Protection Agency. (See §1767.15 (u).) B. The inventory cost of the allowances released by the Environmental Protection Agency for use by the utility shall be transferred to Account 158.1, Allowance Inventory. C. The underlying records of this account shall be maintained in sufficient detail so as to identify each allowance included; the origin of each allowance; and the acquisition cost, if any, of the allowances.

163 Stores Expense Undistributed
A. This account shall include the cost of supervision, labor, and expenses incurred in the operation of general storerooms, including purchasing, storage, handling, and distribution of materials and supplies. B. This account shall be cleared by adding to the cost of materials and supplies issued, a suitable loading charge which will distribute the expense equitably over stores issues. The balance in the account at the close of the year shall not exceed the amount of stores expenses reasonably attributable to the inventory of materials and supplies, exclusive of fuel, as any amount applicable to fuel costs should be included in Account 152, Fuel Stock Expenses Undistributed.

Items
Labor:
1. Inspecting and testing materials and supplies when not assignable to specific items.
2. Unloading from shipping facility and placing in storage.
3. Supervision of purchasing and stores department to extent assignable to materials handled through stores.
4. Getting materials from stock and in readiness to go out.
5. Inventorying stock received or stock on hand by stores employees but not including inventories by general department employees as part of internal or general audits.
6. Purchasing department activities in checking material needs, investigating sources of supply, analyzing prices, preparing and placing orders, and related activities to extent applicable to materials handled through stores. (Optional: Purchasing department expenses may be included in administrative and general expenses.)
7. Maintaining stores equipment.
8. Cleaning and tidying storerooms and stores offices.
9. Keeping stock records, including the recording and posting of material receipts and issues and maintaining inventory records of stock.
10. Collecting and handling scrap materials in stores.

Supplies and Expenses:
1. Adjustments of inventories of materials and supplies but not including large differences which can readily be assigned to important classes of materials and equitably distributed among the accounts to which
Rural Utilities Service, USDA

§ 1767.18

such classes of materials have been charged since the previous inventory.
2. Cash and other discounts not practically assignable to specific materials.
3. Freight and express charges when not assignable to specific items.
4. Heat, light, and power for storerooms and store offices.
5. Brooms, brushes, sweeping compounds and other supplies used in cleaning and tidying storerooms and store offices.
6. Injuries and damages.
7. Insurance on materials and supplies and on stores equipment.
8. Losses due to breakage, leakage, evaporation, fire or other causes, less credits for amounts received from insurance, transportation companies, or others in compensation of such losses.
10. Rent of storage space and facilities.
11. Communication service.
12. Excise and other similar taxes not assignable to specific materials.
13. Transportation expense on inward movement of stores and on transfer between storerooms but not including charges on materials recovered from retirements which shall be accounted for as part of the cost of removal.

NOTE: A physical inventory of each class of materials and supplies shall be made at least every two years.

165 Prepayments
A. This account shall include amounts representing prepayments of insurance, rents, taxes, interest, and miscellaneous items, and shall be kept or supported in such manner as to disclose the amount of each class of prepayment.
B. Account 165 shall be subaccounted as follows:
165.1 Prepayments—Insurance
165.2 Other Prepayments

171 Interest and Dividends Receivable
This account shall include the amount of interest on bonds, mortgages, notes, commercial paper, loans, open accounts, and deposits, the payment of which is reasonably assured, and the amount of dividends declared or guaranteed on stocks owned.
NOTE A: Interest which is not subject to current settlement shall not be included herein but in the account in which the associated principle is recorded.
NOTE B: Interest and dividends receivable from associated companies shall be included in Account 146, Accounts Receivable from Associated Companies.

172 Rents Receivable
This account shall include rents receivable or accrued on property rented or leased by the utility to others.
NOTE: Rents receivable from associated companies shall be included in Account 146, Accounts Receivable from Associated Companies.

173 Accrued Utility Revenues
At the option of the utility, the estimated amount accrued for service rendered, but not billed at the end of any accounting period, may be included herein. If accruals are made for unbilling revenues, accruals shall also be made for unbillable expenses, such as the purchase of energy.

174 Miscellaneous Current and Accrued Assets
This account shall include the book cost of all other current and accrued assets, appropriately designated and supported so as to show the nature of each asset included herein.

Deferred Debits

181 Unamortized Debt Expense
This account shall include expenses related to the issuance or assumption of debt securities. Amounts recorded in this account shall be amortized over the life of each respective issue under a plan which will distribute the amount equitably over the life of the security. The amortization shall be on a monthly basis, and the amounts thereof shall be charged to Account 428, Amortization of Debt Discount and Expense. Any unamortized amounts outstanding at the time that the related debt is prematurely reacquired shall be accounted for as indicated in §1767.15 (q).

182.1 Extraordinary Property Losses
A. When authorized or directed by RUS, this account shall include extraordinary losses which could not reasonably have been anticipated and which are not covered by insurance or other provisions, such as unforeseen damages to property.
B. Application to RUS for permission to use this account shall be accompanied by a statement giving a complete explanation with respect to the items which it is proposed to include herein, the period over which, and the accounts to which it is proposed to write off the charges, and other pertinent information.

182.2 Unrecovered Plant and Regulatory Study Costs
A. This account shall include: (1) nonrecurring costs of studies and analyses mandated by regulatory bodies related to plants
in service, transferred from Account 183, Preliminary Survey and Investigations Charges, and not resulting in construction; and (2) when authorized by RUS, significant unrecovered costs of plant facilities where construction has been cancelled or which have been prematurely retired.

B. This account shall be credited and Account 407.4, Amortization of Property Losses, Unrecovered Plant and Regulatory Study Costs, shall be debited over the period specified by RUS.

C. Any additional costs incurred, relative to the cancellation or premature retirement, may be included in this account and amortized over the remaining period of the original amortization period. Should any gains or recoveries be realized relative to the cancelled or prematurely retired plant, such amounts shall be used to reduce the unamortized amount of the costs recorded herein.

D. In the event that the recovery of costs included herein is disallowed in the rate proceedings, the disallowed costs shall be charged to Account 426.5, Other Deductions, in the year of such disallowance.

182.3 Other Regulatory Assets

A. This account shall include the amounts of regulatory-created assets, not includable in other accounts, resulting from the rate-making actions of regulatory agencies. (See the definition of regulatory assets and liabilities.)

B. The amounts included in this account are to be established by those charges which would have been included in net income determinations in the current period under the general requirements of the Uniform System of Accounts but for it being probable that such items will be included in a different period(s) for purposes of developing the rates that the utility is authorized to charge for its utility services. When specific identification of the particular source of a regulatory asset cannot be made, such as in plant phase-ins, rate moderation plans, or rate levelization plans, Account 407.4, Regulatory Credits, shall be credited. The amounts recorded in this account are generally to be charged, concurrently with the recovery of the amounts in rates, to the same account that would have been charged if included in income when incurred, except all regulatory assets established through the use of Account 407.4 shall be charged to Account 407.3, Regulatory Debits, concurrent with the recovery of the amounts in rates.

C. If rate recovery of all or part of an amount included in this account is disallowed, the disallowed amount shall be charged to Account 426.5, Other Deductions, or Account 435, Extraordinary Deductions, in the year of the disallowance.

D. The records supporting the entries to this account shall be kept so that the utility can furnish full information as to the nature and amount of each regulatory asset included in this account, including justification for inclusion of such amounts in this account.

183 Preliminary Survey and Investigation Charges

A. This account shall be charged with all expenditures for preliminary surveys, plans, and investigations made for the purpose of determining the feasibility of utility projects under contemplation. If construction results, this account shall be credited and the appropriate utility plant account charged with an equitable portion of such study costs directly attributable to new construction. The portion of such study costs not attributable to new construction or the entire cost if construction does not result shall be charged to Account 182.2, Unrecovered Plant and Regulatory Study Costs, or the appropriate operating expense account. The costs of such studies relative to plant under construction shall be included directly in Account 107, Construction Work in Progress—Electric.

B. This account shall also include costs of studies and analyses mandated by regulatory bodies related to plant in service. If construction results from such studies, this account shall be credited and the appropriate utility plant account charged with an equitable portion of such study costs directly attributable to new construction. The portion of such study costs not attributable to new construction or the entire cost if construction does not result shall be charged to Account 182.2, Unrecovered Plant and Regulatory Study Costs, or the appropriate operating expense account. The costs of such studies related to plant under construction shall be included directly in Account 107, Construction Work in Progress—Electric.

C. The records supporting the entries to this account shall be so kept that the utility can furnish complete information as to the nature and purpose of the survey, plans, or investigations, and the nature and amounts of the several charges.

Note: The amount of preliminary survey and investigation charges transferred to utility plant shall not exceed the expenditures which may reasonably be determined to contribute directly and immediately and without duplication to utility plant.

184 Clearing Accounts

A. This caption shall include undistributed balances in clearing accounts at the date of the balance sheet. Balances in clearing account shall be substantially cleared not later than the end of the calendar year unless items held therein relate to a future period.

B. Account 184 shall be subaccounted as follows:

184.1 Transportation Expense—Clearing

184.2 Clearing Accounts—Other

185 Temporary Facilities

This account shall include amounts shown by work orders for plant installed for temporary use in utility service for periods of less than one year. Such work orders shall be
charged with the cost of temporary facilities and credited with payments received from customers and net salvage realized on removal of the temporary facilities. Any net credit or debit resulting shall be cleared to Account 451, Miscellaneous Service Revenues.

186 Miscellaneous Deferred Debits

This account shall include all debits not elsewhere provided for, such as miscellaneous work in progress, and unusual or extraordinary expenses, not included in other accounts, which are in process of amortization and items the proper final disposition of which is uncertain.

187 Deferred Losses from Disposition of Utility Plant

This account shall include losses from the sale or other disposition of property previously recorded in Account 105, Electric Plant Held for Future Use, under the provisions of Paragraphs B, C, and D thereof, where such losses are significant and are to be amortized over a period of 5 years, unless otherwise authorized by RUS. The amortization of the amounts in this account shall be made by debits to Account 411.7, Losses from Disposition of Utility Plant. (See Account 105, Electric Plant Held for Future Use.)

188 Research, Development, and Demonstration Expenditures

A. This account shall be charged with the cost of all expenditures coming within the meaning of Research, Development, and Demonstration (R&D) of this USOA (See § 1767.10 (a)(34)) except those expenditures properly chargeable to Account 107, Construction Work in Progress—Electric.

B. Costs that are minor or of a general or recurring nature shall be transferred from this account to the appropriate operating expense function or if such costs are common to the overall operations or cannot be feasibly allocated to the various operating accounts, such costs shall be recorded in Account 930.2, Miscellaneous General Expenses.

C. In certain instances, a company may incur large and significant research, development, and demonstration expenditures which are nonrecurring and which would distort the annual research, development, and demonstration charges for the period. In such a case, the portion of such amounts that cause the distortion may be amortized to the appropriate operating expense account over a period not to exceed 5 years unless otherwise authorized by RUS.

D. The entries in this account must be so maintained as to show separately each project along with complete detail of the nature and purpose of the research, development, and demonstration project together with the related costs.

189 Unamortized Loss on Reacquired Debt

This account shall include the losses on long-term debt reacquired or redeemed. The amounts in this account shall be amortized in accordance with §1767.15 (q).

190 Accumulated Deferred Income Taxes

A. This account shall be debited and Account 411.1, Provision for Deferred Income Taxes—Credit, Utility Operating Income, or Account 410.2, Provision for Deferred Income Taxes—Credit, Other Income and Deductions, as appropriate, while be credited with an amount equal to that by which income taxes payable for the year are higher because of the inclusion of certain items in income for tax purposes, which items for general accounting purposes will not be fully reflected in the utility’s determination of annual net income until subsequent years.

B. This account shall be credited and Account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, or Account 410.2, Provision for Deferred Income Taxes, Other Income and Deductions, as appropriate, shall be debited with an amount equal to that by which income taxes payable for the year are lower because of prior payment of taxes as provided by Paragraph A above, because of difference in timing for tax purposes of particular items of income or income deductions from that recognized by the utility for general accounting purposes. Such credit to this account and debit to Account 410.1 or Account 410.2 shall, in general, represent the effect on taxes payable in the current year of the smaller amount of book income recognized for tax purposes as compared to the amount recognized in the utility’s current accounts with respect to the item or class of items for which deferred tax accounting by the utility was authorized by RUS.

C. Vintage year records with respect to entries to this account, as described above, and the account balance, shall be so maintained as to show the factor of calculation with respect to each annual amount of the item or class of items for which deferred tax accounting by the utility is utilized.

D. The utility is restricted in its use of this account to the purpose set forth above. It shall not make use of the balance in this account or any portion thereof except as provided in the text of this account, without prior approval of RUS. Any remaining deferred tax account balance with respect to an amount for any prior year’s tax deferral, the amortization of which or other recognition in the utility’s income accounts has been completed, or other disposition made, shall
§ 1767.19 Liabilities and other credits.  

The liabilities and other credit accounts identified in this section shall be used by all RUS borrowers.

LIABILITIES AND OTHER CREDITS

Margins and Equities

200 Memberships
A. This account shall include the total amount of memberships issued and subscribed.
B. Account 200 shall be subaccounted as follows:
200.1 Memberships Issued
200.2 Memberships Subscribed But Unissued

200.1 Memberships Issued
A. This account shall include the face value of membership certificates outstanding. A detailed record shall be maintained to show for each member, the name, address, date of payment, amount paid, and certificate number.
B. If membership fees are applied against energy bills, this account shall be debited for the full amount of the membership with the offsetting credit to the appropriate accounts receivable, and to accounts payable for any refundable amounts. Any balances that cannot be refunded, due to inability to locate the member or because of bylaw restrictions, shall be credited to Account 208, Donated Capital. If determination of the ultimate disposition of the fees cannot be made immediately, the amount involved should be transferred to Account 255, Other Deferred Credits, until the determination is made.

C. When a transfer fee is collected, the transaction shall be recorded by debiting Account 131.1, Cash—General, and crediting Account 451, Miscellaneous Service Revenues, with the fee collected.

200.2 Memberships Subscribed But Unissued
This account shall include the face value of memberships subscribed for but not issued. When certificates are issued, the amount of the memberships shall be transferred to Account 200.1, Memberships Issued.

201 Patronage Capital
A. This account shall include the total amount of patronage capital assignable and assigned.
B. Account 201 shall be subaccounted as follows:
201.1 Patronage Capital Credits
201.2 Patronage Capital Assignable

201.1 Patronage Capital Credits
A. This account shall include the amounts of patronage capital which have been assigned to individual patrons. A subsidiary record, “patronage capital ledger,” shall be maintained, containing an account for each patron who has furnished capital under a capital credits plan.
B. When the return of patrons’ capital to individual patrons has been authorized by the board of directors (or trustees), the amounts authorized shall be transferred to Account 238.1, Patronage Capital Payable. (See also Account 217, Retired Capital Credits-Gain.)

201.2 Patronage Capital Assignable
A. This account shall include all amounts transferred from Account 219.1, Operating Margins; Account 219.2, Nonoperating Margins; Account 219.3, Other Margins; and Account 219.4, Other Margins and Equities—Prior Periods, which are assignable to individual patrons’ capital accounts.
B. Entries to this account shall be made so as to clearly disclose the nature and source of each transaction. Amounts so assigned shall be transferred to Account 201.1, Patronage Capital Credits.

202-207 [Reserved]

208 Donated Capital
This account shall include credits arising from forfeiture of membership fees and from donations of capital not otherwise provided for. Entries to this account shall be made so as to clearly disclose the nature and source of each transaction.
210–210 [Reserved]

211 Consumers’ Contributions for Debt Service
This account shall include the amounts billed to consumers as “amortization charges” for the purpose of servicing long-term debt.

212–214 [Reserved]

215 Appropriated Margins
This account shall include all amounts appropriated as reserves from margins. The account shall be so maintained as to show the amount of each separate reserve and the nature and amounts of the debits and credits thereto.

215.1 Unrealized Gains and Losses—Debt and Equity Securities
This account shall include the unrealized holding gains and losses for available-for-sale securities.

216 [Reserved]

216.1 Unappropriated Undistributed Subsidiary Earnings
This account shall include the balances, either debit or credit, of undistributed retained earnings of subsidiary companies since their acquisition. When dividends are received from subsidiary companies relating to amounts included in this account, this account shall be debited and Account 219.2, Nonoperating Margins, credited.

217 Retired Capital Credits—Gain
A. This account shall include credits resulting from the retirement of patronage capital through settlement of individual patrons’ capital credits at less than 100 percent of the capital assigned to the patron. The portion of patronage capital not returned to the patrons, under such settlements, shall be debited to Account 201.1, Patronage Capital Credits, and credited to this account.
B. This account shall also include amounts representing patronage capital authorized to be retired to patrons who cannot be located. Returned checks issued for retirements of patronage capital, after an appropriate waiting period, shall be credited to this account, and a record maintained adequate to enable the cooperative to make payment to the patron if and when a claim has been established by the consumer.

218 Capital Gains and Losses
No entries shall be made to this account without the prior approval of RUS unless it is to distribute past capital gains and losses as capital credits or to eliminate accumulated capital losses in conformance with the bylaws of the cooperative.

219 Other Margins and Equities
A. This account shall include total amount of margins and equities from all sources.
B. Account 219 shall be subaccounted as follows:
  219.1 Operating Margins
  219.2 Nonoperating Margins
  219.3 Other Margins
  219.4 Other Margins and Equities—Prior Periods

219.1 Operating Margins
This account shall be debited or credited with the balances arising from transactions, the details of which have been recorded in Accounts 400, 401, 402, 403, 404, 405, 406, 407, 408, 412, 413, 414, 423, 424, 425, 426, 427, 428, and 431. Accounts 400, 401, and 402 are control accounts and, at the option of the borrower may or may not be used. If they are not used, the detailed revenue and expense accounts shall be closed directly to this account.

219.2 Nonoperating Margins
This account shall be debited or credited with the balances arising from transactions, the details of which have been recorded in Accounts 415, 416, 417, 417.1, 418, 419, 419.1, 421, 421.1, 421.2, 422, 434, and 435.

219.3 Other Margins
No entries shall be made to this account unless it is to distribute or eliminate prior balances in conformance with the bylaws of the cooperative.

219.4 Other Margins and Equities—Prior Periods
A. This account shall include significant nonrecurring transactions relating to prior periods. To be significant, the transaction must be of sufficient magnitude to justify redistribution of patronage capital credits already allocated for such prior periods.
B. All entries to this account must receive RUS prior approval.
C. These transactions are limited to items to (1) correct an error in the financial statements of a prior year, and (2) make adjustments that result from realization of income tax benefits of preacquisition operating loss carryforwards. This account shall also include the related income taxes (state and Federal) on items included herein.
D. Amounts in this account shall be transferred at the end of the year to Account 219.1, Operating Margins, or Account 219.2, Nonoperating Margins, as appropriate. Also, at the end of the year, these amounts should be transferred from Account 219.1, or Account 219.2 to Account 201.2, Patronage Capital Assignable, when appropriate.
§ 1767.19

Long-Term Debt

221 Bonds

This account shall include, in a separate subdivision for each class and series of bonds, the face value of the actually issued and unmatured bonds which have not been retired or cancelled; also the face value of such bonds issued by others, the payment of which has been assumed by the utility.

222 Reacquired Bonds

A. This account shall include the face value of bonds actually issued or assumed by the utility and reacquired by it and not retired or cancelled. The account for reacquired debt shall not include securities which are held by trustees in sinking or other funds.

B. When bonds are reacquired, the difference between face value, adjusted for unamortized discount, expenses or premium, and the amount paid upon reacquisition, shall be included in Account 189, Unamortized Loss on Reacquired Debt, or Account 257, Unamortized Gain on Reacquired Debt, as appropriate. (See §1767.15(q)).

223 Advances from Associated Companies

A. This account shall include the face value of notes payable to associated companies and the amount of open book accounts representing advances from associated companies. It does not include notes and open accounts representing indebtedness subject to current settlement which are includible in Account 233, Notes Payable to Associated Companies, or Account 234, Accounts Payable to Associated Companies.

B. The records supporting the entries to this account shall be so kept that the utility can furnish complete information concerning each note and open account.

224 Other Long-Term Debt

A. This account shall include, until maturity, all long-term debt not otherwise provided for. This covers such items as receivers’ certificates, real estate mortgages executed or assumed, assessments for public improvements, notes and unsecured certificates of indebtedness not owned by associated companies, receipts outstanding for long-term debt, and other obligations maturing more than one year from the date of issue or assumption.

B. Account 224 shall be subaccounted as follows:

224.1 Long-Term Debt—RUS Construction Loan Contract

224.2 RUS Loan Contract—Construction—Debit

224.3 Long-Term Debt—RUS Construction Notes Executed

224.4 RUS Notes Executed—Construction—Debit

224.5 Interest Accrued—Deferred—RUS Construction

224.6 Advance Payments Unapplied—RUS Long-Term Debt—Debit

224.7 Long-Term Debt—Installation Loan Contract

224.8 RUS Loan Contract—Installation—Debit

224.9 Long-Term Debt—Installation Notes Executed

224.10 RUS Notes Executed—Installation—Debit

224.11 Other Long-Term Debt—Subscriptions

224.12 Other Long-Term Debt—Supplemental Financing

224.13 Supplemental Lender Notes Executed—Debit

224.14 Other Long-Term Debt—Miscellaneous

224.15 Notes Executed—Other—Debit

224.16 Long-Term Debt—RUS Economic Development Notes Executed

224.17 RUS Notes Executed—Economic Development—Debit

224.1 Long-Term Debt—RUS Construction Loan Contract

A. This account shall include the contractual obligation to RUS on construction loans covered by loan contract but not by executed notes.

B. This account is to be used at the option of the borrower.

224.2 RUS Loan Contract—Construction—Debit

A. This account shall include the total loans (for construction purposes) which are covered by loan contract but not by executed notes.

B. This account is to be used at the option of the borrower.

224.3 Long-Term Debt—RUS Construction Notes Executed

This account shall include the contractual liability to RUS on construction notes executed. Records shall be maintained to show separately for each class of obligation all details as to the date of obligation, date of maturity, interest date and rate, and securities for the obligation.

224.4 RUS Notes Executed—Construction—Debit

This account shall include the total amount of the unadvanced RUS loans for construction purposes, which are covered by executed notes. When advances are received from the RUS for construction, this account shall be credited and Account 131.2, Cash—Construction Fund—Trustee, debited with the amount of cash advanced.
224.5 Interest Accrued—Deferred—RUS Construction

This account shall include interest on RUS construction obligations deferred by the terms of mortgage notes or extension agreements.

224.6 Advance Payments Unapplied—RUS Long-Term Debt—Debit

A. This account shall include principal payments on mortgage notes paid in advance of the date due and not applied to a specific note. Also, include in this account interest savings which are accrued and added to the advance payment unapplied.

B. At such time as these payments are applied to a specific note or loan balances, this account shall be credited and the long-term debt account debited with the amount so applied.

224.7 Long-Term Debt—Installation Loan Contract

A. This account shall include the contractual obligation to RUS on installation loans covered by loan contract but not covered by executed notes.

B. This account is to be used at the option of the borrower.

224.8 RUS Loan Contract—Installation—Debit

A. This account shall include the total loans for installation purposes which are covered by loan contract but not by executed notes.

B. This account is to be used at the option of the borrower.

224.9 Long-Term Debt—Installation Notes Executed

This account shall include the contractual liability to RUS on installation notes executed.

224.10 RUS Notes Executed—Installation—Debit

This account shall include the total amount of unadvanced loans for installation purposes, which are covered by executed notes. When advances are received from RUS, this account shall be credited and Account 131.3, Cash—Installation Loan and Collection Fund, debited with the amount of cash advanced.

224.11 Other Long-Term Debt—Subscriptions

This account shall include the contractual obligation to purchase CFC Capital Term Certificates and any other similar obligation relating to supplemental financing.

224.12 Other Long-Term Debt—Supplemental Financing

This account shall include the contractual liability to CFC or other supplemental lenders for that portion of funds borrowed which mature in more than one year.

224.13 Supplemental Financing Notes Executed—Debit

This account shall include the total amount of the unadvanced loans for construction purposes, which are covered by executed notes to CFC or other supplemental lender. This account shall be debited with the face amount of notes executed. When advances are received from a supplemental lender for construction, this account shall be credited and Account 131.2, Cash—Construction Fund—Trustee, debited with the amount of cash advanced.

224.14 Other Long-Term Debt—Miscellaneous

This account shall include the amount of other long-term debt not provided for elsewhere.

224.15 Notes Executed—Other—Debit

This account shall include the total amount of the unadvanced loans for construction purposes, which are covered by executed notes to others not included in the foregoing accounts. When advances are received from such supplemental lender, this account shall be credited and Account 131.2, Cash—Construction Fund—Trustee, debited with the amount of cash so advanced.

224.16 Long-Term Debt—RUS Economic Development Notes Executed

This account shall include the contractual liability to RUS on rural economic development notes executed. Records shall be maintained to show separately for each class of obligation all details as to the date of obligation, date of maturity, interest date and rate, and securities for the obligation.

224.17 RUS Notes Executed—Economic Development—Debit

This account shall include the total amount of the unadvanced RUS loans for rural economic development purposes, which are covered by executed notes. When advances are received from the RUS for rural economic development projects, this account shall be credited and Account 131.12, Cash—General—Economic Development Funds, debited with the amount of cash advanced.

224.18 Unamortized Premium on Long-Term Debt

A. This account shall include the excess of the cash value of consideration received over
§ 1767.19

Rural Utilities Service, USDA

the face value upon the issuance or assumption of long-term debt securities.

B. Amounts recorded in this account shall be amortized over the life of each respective issue under a plan which will distribute the amount equitably over the life of the security. The amortization shall be on a monthly basis, with the amounts thereof to be credited to Account 428, Amortization of Premium on Debt—Credit. (See § 1767.15 (q).)

226 Unamortized Discount on Long-Term Debt—Debit

A. This account shall include the excess of the face value of long-term debt securities over the cash value of consideration received therefor, related to the issue or assumption of all types and classes of debt.

B. Amounts recorded in this account shall be amortized over the life of the respective issues under a plan which will distribute the amount equitably over the life of the securities. The amortization shall be on a monthly basis, with the amounts thereof charged to Account 428, Amortization of Debt Discount and Expense. (See § 1767.15 (q).)

Other Noncurrent Liabilities

227 Obligations Under Capital Leases—Noncurrent

This account shall include the portion not due within one year, of the obligations recorded for the amounts applicable to leased property recorded as assets in Account 101.1, Property Under Capital Leases; Account 120.6, Nuclear Fuel Under Capital Leases; or Account 121, Nonutility Property.

SPECIAL INSTRUCTIONS

No amounts shall be credited to Accounts 228.1 through 228.4 unless authorized by a regulatory authority or authorities to be collected in the utility’s rates.

228.2 Accumulated Provision for Injuries and Damages

A. This account shall be credited with amounts charged to Account 925, Injuries and Damages, or other appropriate accounts, to meet the probable liability, not covered by insurance, for deaths or injuries to employees and others and for damages to property neither owned nor held under lease by the utility.

B. When liability for any injury or damage is admitted by the utility either voluntarily or because of the decision of a court or other lawful authority, such as a workmen’s compensation board, the admitted liability shall be charged to this account and credited to the appropriate current liability account. Details of these charges shall be maintained according to the year the casualty occurred which gave rise to the loss.

NOTE: Recoveries or reimbursements for losses charged to this account shall be credited hereto; the cost of repairs to property of others, if provided for herein, shall be charged to this account.

228.3 Accumulated Provision for Pensions and Benefits

A. This account shall include provisions made by the utility and amounts contributed by employees for pensions, accident and death benefits, savings, relief, hospital, and other provident purposes, where the funds are included in the assets of the utility either in general or in segregated fund accounts.

B. Amounts paid by the utility for the purpose for which this liability is established shall be charged hereto.

C. A separate account shall be kept for each kind of provision included herein.

NOTE: If employee pension or benefit plan funds are not included among the assets of the utility but are held by outside trustees, payments into such funds, or accruals therefor, shall not be included in this account.

228.4 Accumulated Miscellaneous Operating Provisions

A. This account shall include all operating provisions which are not provided for elsewhere.

B. This account shall be maintained in such a manner as to show the amount of each separate provision and the nature and amounts of the debits and credits thereto.

NOTE: This account includes only provisions as may be created for operating purposes and does not include any reservations of income, the credits for which should be recorded in Account 215, Appropriated Margins.
Accumulated Provision for Rate Refunds

A. This account shall be credited with amounts charged to Account 449.1, Provision for Rate Refunds, to provide for estimated refunds where the utility is collecting amounts in rates subject to refund.

B. When a refund of any amount recorded in this account is ordered by a regulatory authority, such amount shall be charged hereto and credited to Account 242, Miscellaneous Current and Accrued Liabilities.

C. Records supporting the entries to this account shall be kept so as to identify each amount recorded by the respective rate filing docket number.

Current and Accrued Liabilities

Current and accrued liabilities are those obligations which have either matured or which become due within 1 year from the date thereof; except however, bonds, receivers' certificates, and similar obligations which shall be classified as long-term debt until date of maturity; accrued taxes, such as income taxes, which shall be classified as accrued liabilities even though payable more than one year from date; compensation awards, which shall be classified as current liabilities regardless of date due; and minor amounts payable in installments which may be classified as current liabilities. If a liability is due more than 1 year from the date of issuance or assumption by the utility, it shall be credited to a long-term debt account appropriate for the transaction; except however, the current liabilities previously mentioned.

Notes Payable

This account shall include the face value of all notes, drafts, acceptances, or other similar evidences of indebtedness, payable on demand or within a time not exceeding 1 year from the date of issue, to other than associated companies.

Accounts Payable

A. This account shall include all amounts payable by the utility within 1 year, which are not provided for in other accounts.

B. Account 232 shall be subaccounted as follows:

232.1 Accounts Payable—General

232.2 Accounts Payable—RUS Construction

232.3 Accounts Payable—Other

Notes Payable to Associated Companies

This account shall include amounts owing to associated companies on notes, drafts, acceptances, or other similar evidences of indebtedness payable on demand or not more than 1 year from the date of issue or creation.

Taxes Accrued

A. This account shall be credited with the amount of taxes accrued during the accounting period, corresponding debits being made to the appropriate accounts for tax charges. Such credits may be based upon estimates, but from time to time during the year as the facts become known, the amount of the periodic credits shall be adjusted so as to include, as nearly as can be determined in each year, the taxes applicable thereto. Any amount representing a prepayment of taxes applicable to the period subsequent to the date of the balance sheet, shall be shown under Account 165, Prepayments.

B. If accruals for taxes are found to be insufficient or excessive, correction therefor shall be made through current tax accruals.

C. Accruals for taxes shall be based upon the net amounts payable after credit for any discounts, and shall not include any amounts for interest on tax deficiencies or refunds.

D. Account 236 shall be subaccounted as follows:

236.1 Accrued Property Taxes

236.2 Accrued U.S. Social Security Tax—Unemployment

236.3 Accrued U.S. Social Security Tax—F.I.C.A.

236.4 Accrued State Social Security Tax—Unemployment

236.5 Accrued State Sales Tax—Consumers

236.6 Accrued Gross Revenue or Gross Receipts Tax

236.7 Accrued Taxes—Other

Interest Accrued

This account shall include the amount of interest accrued but not matured on all liabilities of the utility not including, however, interest which is added to the principal of the debt on which incurred. Supporting records shall be maintained so as to show the
amount of interest accrued on each obligation.

238 Patronage Capital and Patronage Refunds Payable

A. This account shall include the total amount of patronage capital authorized to be returned and paid to patrons.

B. Account 238 shall be subaccounted as follows:

238.1 Patronage Capital Payable

238.2 Patronage Refunds Payable

238.1 Patronage Capital Payable

This account shall include the amount of patronage capital which has been authorized to be returned to the patron.

238.2 Patronage Refunds Payable

This account shall include the amount of patronage refunds which have been authorized to be paid to patrons.

239 Matured Long-Term Debt

This account shall include the amount of long-term debt (including any obligation for premiums) matured and unpaid, without specific agreement for extension of the time of payment and bonds called for redemption but not presented.

240 Matured Interest

This account shall include the amount of matured interest on long-term debt or other obligations of the utility at the date of the balance sheet unless such interest is added to the principal of the debt on which incurred.

241 Tax Collections Payable

This account shall include the amount of taxes collected by the utility through payroll deductions or otherwise, pending transmittal of such taxes to the proper taxing authority.

NOTE: Do not include liabilities for taxes assessed directly against the utility which are accounted for as part of the utility's own tax expense.

242 Miscellaneous Current and Accrued Liabilities

A. This account shall include the amount of all other current and accrued liabilities not provided for elsewhere appropriately designated and supported so as to show the nature of each liability.

B. Account 242 shall be subaccounted as follows:

242.1 Accrued Rentals

242.2 Accrued Payroll

242.3 Accrued Employees' Vacations and Holidays

242.4 Accrued Insurance

242.5 Other Current and Accrued Liabilities

242.1 Accrued Rentals

This account shall include unpaid joint use pole rentals and other rentals. The records supporting the entries to this account shall be maintained so as to show for each class of rental, the amount accrued, the basis for the accrual, the accounts to which charged, and the amount of rentals paid.

242.2 Accrued Payroll

This account shall include the accrued liability for salaries and wages at the end of an accounting period for which the appropriate expense or other accounts have been charged. This account is to be used whether salaries and wages are paid on a weekly, semimonthly, or monthly basis.

242.3 Accrued Employees' Vacations and Holidays

This account shall include the liability for accrued wages for employees' vacation, holidays, and sick leave.

242.4 Accrued Insurance

A. This account shall most commonly be used in case of workmen's compensation and public liability insurance for recording the excess amounts of earned premium over the advance premiums. Earned premiums are computed each month by applying the insurance rates to the actual payrolls.

B. Until the amount of the advance premiums is exhausted, the earned premium is credited to Account 165, Prepayments. Earned premiums in excess of the advance premiums are credited to this account.

242.5 Other Current and Accrued Liabilities

This account shall include current and accrued liabilities not provided for elsewhere.

243 Obligations Under Capital Leases—Current

This account shall include the portion, due within 1 year, of the obligations recorded for the amounts applicable to leased property recorded as assets in Account 101.1, Property Under Capital Leases; Account 120.6, Nuclear Fuel Under Capital Leases; or Account 121, Nonutility Property.

Deferred Credits

251 [Reserved]

252 Customer Advances for Construction

This account shall include consumer advances for construction which are to be refunded either wholly or in part. When a customer is refunded the entire amount to which he is entitled, according to the agreement or rule under which the advance was made, the balance, if any, remaining in this
§ 1767.19

A. This account shall be credited with all investment tax credits deferred by companies which have elected to follow deferral accounting, partial or full, rather than recognizing, in the income statement, the total benefits of the tax credit as realized. After such election, a company may not transfer amounts from this account, except as authorized herein and in Account 411.4, Investment Tax Credit Adjustments, Utility Operations; Account 411.5, Investment Tax Credit Adjustments, Nonutility Operations; and Account 420, Investment Tax Credits, or with approval of RUS.

B. Where the company's accounting provides that investment tax credits are to be passed on to customers, this account shall be debited and Account 411.4 credited with a proportionate amount determined in relation to the average useful life of electric utility property to which the tax credits relate or such lesser period of time as allowed by a regulatory agency having rate jurisdiction. If, however, the deferral procedure provides that investment tax credits are not to be passed on to customers, the proportionate restorations to income shall be credited to Account 420.

C. Subdivisions of this account, by department, shall be maintained for deferred investment tax credits that are related to non-electric utility or other operations. Contra entries affecting such account subdivisions shall be appropriately recorded in Account 413, Expenses of Electric Plant Leased to Others; or Account 414, Other Utility Operating Income. Use of deferral or nondeferral accounting procedures adopted for nonelectric utility or other operations are to be followed on a consistent basis.

D. Separate records for electric and nonelectric utility or other operations shall be maintained identifying the properties giving rise to the investment tax credits for each year with the weighted-average service life of such properties and any unused balances of such credits. Such records are not necessary unless the tax credits are deferred.

246 Deferred Gains from Disposition of Utility Plant

This account shall include gains from the sale or other disposition of property previously recorded in Account 166, Electric Plant Held for Future Use, under the provisions of Paragraphs B, C, and D thereof, where such gains are significant and are to be amortized over a period of 5 years, unless otherwise authorized by RUS. The amortization of the amounts in this account shall be made by credits to Account 411.6, Gains from Disposition of Utility Plant. (See Account 166, Electric Plant Held for Future Use.)
§ 1767.19

257 Unamortized Gain on Reacquired Debt

This account shall include the amounts of discount realized upon reacquisition or redemption of long-term debt. The amounts in this account shall be amortized in accordance with §1767.15 (q).

SPECIAL INSTRUCTIONS
Accumulated Deferred Income Taxes

Before using the deferred tax accounts provided below, refer to §1767.15 (r), Comprehensive Interperiod Income Tax Allocation. The text of these accounts are designed primarily to cover deferrals of Federal income taxes. However, they are also to be used when making deferrals of state and local income taxes. Utilities and licensees which, in addition to an electric utility department, have another utility department, gas or water and nonutility property, and which have deferred taxes on income with respect thereto shall separately classify such deferrals in the accounts provided below so as to allow ready identification of items relating to each utility deduction.

261 Accumulated Deferred Income Taxes—Accelerated Amortization Property

A. This account shall include tax deferrals resulting from adoption of the principles of comprehensive interperiod tax allocation described in §1767.15 (a) that relate to property for which the utility has availed itself of the use of accelerated (5-year) amortization of (1) certified defense facilities as permitted by Section 168 of the Internal Revenue Code, and (2) certified pollution control facilities as permitted by Section 169 of the Internal Revenue Code.

B. This account shall be credited and Account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, or Account 410.2, Provision for Deferred Income Taxes, Other Income and Deductions, as appropriate, shall be debited with tax effects related to property described in Paragraph A above where taxable income is lower than pretax accounting income and the periods in which they enter into the determination of pretax accounting income.

C. This account shall be debited and Account 411.1, Provision for Deferred Income Taxes—Credit, Utility Operating Income, or Account 411.2, Provision for Deferred Income Taxes—Credit, Other Income and Deductions, as appropriate, shall be credited with taxes related to property described in Paragraph A above where taxable income is higher than pretax accounting income due to differences between the periods in which revenue and expense transactions affect taxable income and the periods in which they enter into the determination of pretax accounting income.

D. The utility is restricted in its use of this account to the purposes set forth above. It shall not transfer the balance in this account or any portion thereof to retained earnings or make any use thereof except as provided in the text of this account without prior approval of RUS. Upon the disposition by sale, exchange, transfer, abandonment, or premature retirement of plant on which there is a related balance therein, this account shall be charged with an amount equal to the related income tax expense, if any, arising from such disposition and Account 411.1, Provision for Deferred Income Taxes—Credit, Utility Operating Income, or Account 411.2, Provision for Deferred Income Taxes—Credit, Other Income and Deductions, as appropriate, shall be credited. When the remaining balance, after consideration of any related income tax expense, is less than $25,000, this account shall be charged and Account 411.1 or Account 411.2, as appropriate, credited with such balance. If after consideration of any related income tax expense, there is a remaining amount of $25,000 or more, RUS shall authorize or direct how such amount shall be accounted for at the time approval for the disposition of accounting is granted. When plant is disposed of by transfer to a wholly owned subsidiary, the related balance in this account shall also be transferred. When the disposition relates to retirement of an item or items under a group method of depreciation where there is no tax effect in the year of retirement, no entries are required in this account if it can be determined that the related balances would be necessary to be retained to offset future group item tax deficiencies.

262 Accumulated Deferred Income Taxes—Other Property

A. This account shall include the tax deferrals resulting from adoption of the principle of comprehensive interperiod income tax allocation described in §1767.15 (r) which are related to all property other than accelerated amortization property.

B. This account shall be credited and Account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, or Account 410.2, Provision for Deferred Income Taxes, Other Income and Deductions, as appropriate, shall be debited with tax effects related to property described in Paragraph A above where taxable income is lower than pretax accounting income due to differences between the periods in which revenue and expense transactions affect taxable income and the periods in which they enter into the determination of pretax accounting income.

C. This account shall be debited and Account 411.1, Provision for Deferred Income Taxes—Credit, Utility Operating Income, or Account 411.2, Provision for Deferred Income Taxes—Credit, Other Income and Deductions, as appropriate, shall be credited with taxes related to property described in Paragraph A above where taxable income is higher than pretax accounting income due to differences between the periods in which revenue and expense transactions affect taxable income and the periods in which they enter into the determination of pretax accounting income.
§ 1767.19

Taxes—Credit, Other Income and Deductions, as appropriate, shall be credited with tax effects related to property described in Paragraph A above where taxable income is higher than pretax accounting income due to differences between the periods in which revenue and expense transactions affect taxable income and the periods in which they enter into the determination of pretax accounting income.

D. The utility is restricted in its use of this account to the purposes set forth above. It shall not transfer the balance in this account or any portion thereof to retained earnings or make any use thereof except as provided in the text of this account without prior approval of RUS. Upon the disposition by sale, exchange, transfer, abandonment, or premature retirement of plant on which there is a related balance herein, this account shall be charged with an amount equal to the related income tax expense, if any, arising from such disposition and Account 411.1, Provision for Deferred Income Taxes—Credit, Utility Operating Income, or Account 411.2, Provision for Deferred Income Taxes—Credit, Other Income and Deductions, shall be credited. When the remaining balance, after consideration of any related tax expenses, is less than $25,000, this account shall be charged and Account 411.1 or Account 411.2, as appropriate, credited with such balance. If after consideration any related income tax expense, there is a remaining amount of $25,000 or more, RUS shall authorize or direct how such amount shall be accounted for at the time approval for the disposition of accounting is granted. When plant is disposed of by transfer to a wholly owned subsidiary, the related balance in this account shall also be transferred. When the disposition relates to retirement of an item or items under a group method of depreciation where there is no tax effect in the year of retirement, no entries are required in this account if it can be determined that the related balance would be necessary to be retained to offset future group item tax deficiences.

283 Accumulated Deferred Income Taxes—Other

A. This account shall include all credit tax deferrals resulting from the adoption of the principles of comprehensive interperiod income tax allocation described in §1767.15 (r) other than those deferrals which are includible in Account 281, Accumulated Deferred Income Taxes—Accelerated Amortization Property, and Account 282, Accumulated Deferred Income Taxes—Other Property.

B. This account shall be credited and Account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, or Account 410.2, Provision for Deferred Income Taxes, Other Income and Deductions, as appropriate, shall be debited with tax effects related to items described in Paragraph A above where taxable income is lower than pretax accounting income due to differences between the periods in which revenue and expense transactions affect taxable income and the periods in which they enter into the determination of pretax accounting income.

C. This account shall be debited and Account 411.1, Provision for Deferred Income Taxes—Credit, Utility Operating Income or Account 411.2, Provision for Deferred Income Taxes—Credit, Other Income and Deductions, as appropriate, shall be credited with tax effects related to items described in Paragraph A above where taxable income is higher than pretax accounting income due to differences between the periods in which revenue and expense transactions affect taxable income and the periods in which they enter into the determination of pretax accounting income.

D. Records with respect to entries to this account, as described above, and the account balance, shall be so maintained as to show the factors of calculation with respect to each annual amount of the item or class of items.

E. The utility is restricted in its use of this account to the purposes set forth above. It shall not transfer the balance in the account or any portion thereof to retained earnings or to any other account or make any use thereof except as provided in the text of this account, without prior approval of RUS. Upon the disposition by sale, exchange, transfer, abandonment, or premature retirement of items on which there is a related balance herein, this account shall be charged with an amount equal to the related income tax expense, if any, arising from such disposition and Account 411.1, Provision For Deferred Income Taxes—Credit, Utility Operating Income, or Account 411.2, Provision For Deferred Income Taxes—Credit, Other Income and Deductions, as appropriate, shall be credited. When the remaining balance, after consideration of any related tax expenses, is less than $25,000, this account shall be charged and Account 411.1 or Account 411.2, as appropriate, credited with such balance. If after consideration of any related income tax expense, there is a remaining amount of $25,000 or more, RUS shall authorize or direct how such amount shall be accounted for at the time approval for the disposition of accounting is granted.

When plant is disposed of by transfer to a wholly owned subsidiary, the related balance in this account shall also be transferred. When the disposition relates to retirement of an item or items under a group method of depreciation where there is no tax effect in the year of retirement, no entries are required in this account if it can be determined that the
related balance would be necessary to be retained to offset future group item tax deficiencies.

[58 FR 59825, Nov. 10, 1993, as amended at 59 FR 27436, May 27, 1994; 60 FR 55430, Nov. 1, 1995]

§ 1767.20 Plant accounts.

NOTE A: This account shall not include any discounts upon securities issued or assumed; nor shall it include any costs incident to negotiating loans, selling bonds or other evidences of debt or expenses in connection with the authorization, issuance, or sale of capital stock.

NOTE B: Exclude from this account and include in the appropriate expense account the cost of preparing and filing papers in connection with the extension of the term of incorporation unless the first organization costs have been written off. When charges are
§ 1767.20

made to this account for expenses incurred in mergers, consolidations, or reorganizations, amounts previously included herein or in similar accounts in the books of the companies concerned shall be excluded from this account.

302 Franchises and Consents

A. This account shall include amounts paid to the Federal Government, to a state or to a political subdivision thereof in consideration for franchises, consents, water power licenses, or certificates, running in perpetuity or for a specified term of more than one year, together with necessary and reasonable expenses incident to procuring such franchises, consents, water power licenses, or certificates of permission and approval, including expenses of organizing and merging separate corporations, where statutes require, solely for the purpose of acquiring franchises.

B. If a franchise, consent, water power license, or certificate is acquired by assignment, the charge to this account in respect thereof shall not exceed the amount paid therefor by the utility to the assignor, nor shall it exceed the amount paid by the original grantee, plus the expense of acquisition to such grantee. Any excess of the amount actually paid by the utility over the amount above specified shall be charged to Account 426.5, Other Deductions.

C. When any franchise has expired, the book cost thereof shall be credited hereto and charged to Account 426.5, Other Deductions, or to Account 111, Accumulated Provision for Amortization of Electric Utility Plant, as appropriate.

D. Records supporting this account shall be kept so as to show separately the book cost of each franchise or consent.

NOTE: Annual or other periodic payments made to this account for expenses incurred in mergers, consolidations, or reorganizations, amounts previously included herein or in similar accounts in the books of the companies concerned shall be excluded from this account.

303 Miscellaneous Intangible Plant

A. This account shall include the cost of patent rights, licenses, privileges, and other intangible property necessary or valuable in the conduct of utility operations and not specifically chargeable to any other account.

B. When any item included in this account is retired or expires, the book cost thereof shall be credited hereto and charged to Account 426.5, Other Deductions, or to Account 111, Accumulated Provision for Amortization of Electric Utility Plant, as appropriate.

C. This account shall be maintained in such a manner that the utility can furnish full information with respect to the amounts included herein.

7 CFR Ch. XVII (1–1–08 Edition)

PRODUCTION PLANT

Steam Production

310 Land and Land Rights

This account shall include the cost of land and land rights used in connection with steam-power generation. (See §1767.16 (g).)

311 Structures and Improvements

This account shall include the cost, in place, of structures and improvements used in connection with steam-power generation. (See §1767.16 (h).)

NOTE: Include steam production roads and railroads in this account.

312 Boiler Plant Equipment

This account shall include the cost installed of furnaces, boilers, coal and ash handling and coal preparing equipment, steam and feed water piping, boiler apparatus, and accessories used in the production of steam, mercury, or other vapor, to be used primarily for generating electricity.

Items

1. Ash handling equipment, including hoppers, gates, cars, conveyors, hoists, sluicing equipment, including pumps and motors, sluicing water pipe and fittings, sluicing trenches and accessories, except sluices which are a part of a building.

2. Boiler feed system, including feed water heaters, evaporator condensers, heater drain pumps, heater drainers, deaerators, and vent condensers, boiler feed pumps, surge tanks, feed water regulators, feed water measuring equipment, and all associated drives.

4. Boilers and equipment, including boilers and baffles, economizers, superheaters, soot blowers, foundations and settings, water walls, arches, grates, insulation, blowdown system, drying out of new boilers, also associated motors or other power equipment.

5. Breeching and accessories, including breeching, dampers, soot spouts, hoppers and gates, cinder eliminators, breeching insulation, soot blowers and associated motors.

6. Coal handling and storage equipment, including coal towers, coal lorries, coal cars, locomotives and tracks when devoted principally to the transportation of coal, hoppers, downtakes, unloading and hoisting equipment, skip hoists and conveyors, weighing equipment, magnetic separators, cable ways, and housings and supports for coal handling equipment.

7. Draft equipment, including air preheaters and accessories, induced and forced draft fans, air ducts, combustion control mechanisms, and associated motors or other power equipment.
| 8. | Gas-burning equipment, including holders, burner equipment and piping, and control equipment. |
| 9. | Instruments and devices, including all measuring, indicating, and recording equipment for boiler plant service together with mountings and supports. |
| 10. | Lighting systems. |
| 11. | Oil-burning equipment, including tanks, heaters, pumps with drive, burner equipment and piping, and control equipment. |
| 12. | Pulverized fuel equipment, including pulverizers, accessory motors, primary air fans, cyclones and ducts, dryers, pulverized fuel bins, pulverized fuel conveyors and equipment, burners, burner piping, priming equipment, air compressors, and motors. |
| 13. | Stacks, including foundations and supports, stack steel and ladders, stack brickwork, stack concrete, stack lining, stack painting (first), when set on separate foundations, independent of substructures or superstructures of building. |
| 14. | Station piping, including pipe, valves, fittings, separators, traps, desuperheaters, hangers, excavation, and covering for station piping system, including all steam, condensate, boiler feed and water supply piping, but not condensing water, plumbing, building heating, oil, gas, air piping or piping specifically provided for in Account 313. |
| 15. | Stoker or equivalent feeding equipment, including stokers and accessory motors, clinker grinders, fans and motors. |
| 16. | Ventilating equipment. |
| 17. | Water purification equipment, including softeners and accessories, evaporators and accessories, heat exchanges, filters, tanks for filtered or softened water, pumps, and motors. |
| 18. | Water-supply systems, including pumps, motors, strainers, raw-water storage tanks, boiler wash pumps, intake and discharge pipes, and tunnels not a part of a building. |
| 19. | Wood fuel equipment, including hoppers, fuel hogs and accessories, elevators and conveyors, bins and gates, spouts, measuring equipment and associated drives. |

**Note:** When the system for supplying boiler or condenser water is elaborate, and when it includes a dam, reservoir, canal, pipe line, cooling ponds, or where gas or oil is used as a fuel for producing steam and is supplied through a pipe line system owned by the utility, the cost of such special facilities shall be charged to a subdivision of Account 311, Structures and Improvements.

### 313 Engines and Engine Driven Generators

This account shall include the cost installed of steam engines, reciprocating or rotary, and their associated auxiliaries; and engine-driven main generators, except turbogenerator units.

### 314 Turbogenerator Units

This account shall include the cost installed of main turbine-driven units and accessory equipment used in generating electricity by steam.

§ 1767.20 7 CFR Ch. XVII (1–1–08 Edition)

1. Auxiliary generators, including boards, compartments, switching equipment, control equipment, and connections to auxiliary power bus.
2. Excitation system, including motor, turbine and dual-drive exciter sets and rheostats, storage batteries and charging equipment, circuit breakers, panels and accessories, knife switches and accessories, surge arresters, instrument shunts, conductors and conduit, special supports for conduit, generator field and exciter switch panels, exciter bus tie panels, generator and exciter rheostats and special housing and protective screens.
3. Generator main connections, including oil circuit breakers and accessories, disconnecting switches and accessories, operating mechanisms and interlocks, current transformers, potential transformers, protective relays, isolated panels and equipment, conductors and conduit, special supports for generator main leads, grounding switch, and special housings and protective screens.
4. Station buses including main, auxiliary, transfer, synchronizing and fault ground buses, including oil circuit breakers and accessories, disconnecting switches and accessories, protective relays and accessories, voltage regulators and accessories, compensators, resistors, starting transformers, current transformers, potential transformers, protective relays, storage batteries and charging equipment, isolated panels and equipment, conductors and conduit, special supports, special housings, concrete pads, general station grounding system, special fire-extinguishing system, and test equipment.
5. Station control system, including station switchboards with panel wiring, panels with instruments and control equipment only, panels with switching equipment mounted or mechanically connected, truck-type boards complete, cubicles, station supervisory control boards, generator and exciter signal stands, temperature recording devices, frequency-control equipment, master clocks, watt-hour meters and synchronoscope in the turbine room, station totalizing wattmeter, boiler-room load indicator equipment, storage batteries, panels and charging sets, instrument transformers for supervisory metering, conductors and conduit, special supports for conduit, switchboards, batteries, special housing for batteries, protective screens, and doors.

NOTE A: Do not include in this account transformers and other equipment used for changing the voltage or frequency of electricity for the purposes of transmission or distribution.

NOTE B: When any item of equipment listed herein is used wholly to furnish power to equipment included in another account, its cost shall be included in such other account.

316 Miscellaneous Power Plant Equipment

This account shall include the cost installed of miscellaneous equipment in and about the steam generating plant devoted to

valves and vacuum breakers, expansion devices, and screens.
4. Generator hydrogen, gas piping, and deaeration equipment.
5. Cooling system, including towers, pumps, tanks, and piping.
6. Cranes and hoists, including items wholly identified with items listed herein.
7. Excitation system, when identified with main generating units.
8. Fire-extinguishing systems.
9. Foundations and settings, especially constructed for and not expected to outlast the apparatus for which provided.
10. Governors.
11. Lighting systems.
12. Lubricating systems, including gauges, filters, water separators, tanks, pumps, piping, and motors.
13. Mechanical meters, including gauges, recording instruments, sampling and testing equipment.
14. Piping-main exhaust, including connections between turbogenerator and condenser and between condenser and hotwell.
15. Piping-main steam, including connections from main throttle valve to turbine inlet.
16. Platforms, railings, steps, and gratings appurtenant to apparatus listed herein.
17. Pressure oil systems, including accumulators, pumps, and piping motors.
18. Steelwork, specially constructed for apparatus listed herein.
19. Throttle and inlet valve.
20. Tunnels, intake and discharge, for condenser system, when not a part of structure, and water screens.
21. Turbogenerators-main, including turbine and generator, field rheostats and electric connections for self-excited units.
22. Water screens and motors.
23. Moisture separator for turbine steam.
24. Turbine lubricating oil (initial charge).

315 Accessory Electric Equipment

This account shall include the cost installed of auxiliary generating apparatus, conversion equipment, and equipment used primarily in connection with the control and switching of electric energy produced by steam power, and the protection of electric circuits and equipment, except electric motors used to drive equipment included in other accounts. Such motors shall be included in the account in which the equipment with which they are associated is included.

Items
1. Auxiliary generators, including boards, compartments, switching equipment, control equipment, and connections to auxiliary power bus.
2. Excitation system, including motor, turbine and dual-drive exciter sets and rheostats, storage batteries and charging equipment, circuit breakers, panels and accessories, knife switches and accessories, surge arresters, instrument shunts, conductors and conduit, special supports for conduit, generator field and exciter switch panels, exciter bus tie panels, generator and exciter rheostats and special housing and protective screens.
general station use, and which is not properly includible in any of the foregoing steam-power production accounts.

**Items**

1. Compressed air and vacuum cleaning systems, including tanks, compressors, exhausters, air filters, and piping.
2. Cranes and hoisting equipment, including cranes, crane rails, monorails, and hoists with electric and mechanical connections.
3. Fire-extinguishing equipment for general station use.
4. Foundations and settings specially constructed for and not expected to outlast the apparatus for which provided.
5. Locomotive cranes not includible elsewhere.
7. Marine equipment, including boats and barges.
8. Miscellaneous belts, pulleys, and countershafts.
9. Miscellaneous equipment, including atmospheric and weather indicating devices, intrasite communication equipment, laboratory equipment, signal systems, callophones, intrasite communication equipment, labor.
10. Railway cars not includible elsewhere.
11. Refrigerating systems, including tanks, pumps, heat exchangers, immersion heaters.
12. Station maintenance equipment, including tanks, pumps, heat exchangers, includible pressurizing tanks and coolers, initial charge.
13. Reactor coolant or moderator circulation charging, purification, and discharging equipment, radioactive waste treatment and disposal equipment, boilers, steam and feed water piping, reactor and boiler apparatus and accessories and other reactor plant equipment used in the production of steam to be used primarily for generating electricity, including auxiliary superheat boilers and associated equipment in systems which change temperatures or pressure of steam from the reactor system.

**Items**

1. Auxiliary superheat boilers and associated fuel storage handling preparation and burning equipment. (See Account 312, Boiler Plant Equipment. For items, but exclude water supply, water flow lines, and steam lines, as well as other equipment not strictly within the superheat function.)
2. Boiler feed system, including feed water heaters, evaporator condensers, heater drain pumps, heater drainers, and vent condensers, boiler feed pumps, surge tanks, feed water regulators, feed water measuring equipment, and all associated drivers.
4. Instruments and devices, including all measuring, indicating, and recording equipment for reactor and boiler plant service together with mountings and supports.
5. Lighting systems.
6. Moderators, such as heavy water, and graphite, initial charge.
7. Reactor coolant; primary and secondary systems, initial charge.
8. Radioactive waste treatment and disposal equipment, including tanks, ion exchangers, incinerators, condensers, chimneys, and diluting fans and pumps.
9. Foundations and settings, especially constructed for and not expected to outlast the apparatus for which provided.
10. Reactor including shielding, control rods and mechanisms.
11. Reactor fuel handling equipment, including manipulating and extraction tools, underwater viewing equipment, seal cutting and welding equipment, fuel transfer equipment, and fuel disassembly machinery.
12. Reactor fuel element failure detection system.
13. Reactor emergency poison container and injection system.
14. Reactor pressurizing and pressure relief equipment, including pressurizing tanks and immersion heaters.
15. Reactor coolant or moderator circulation charging, purification, and discharging equipment, including tanks, pumps, heat exchangers, demineralizers, and storage.
16. Station piping, including pipes, valves, fittings, separators, traps, desuperheaters, hangers, excavation, and covering for station piping system, including all-reactor coolant,
steam, condensate, boiler feed and water supply piping, but not condensing water, plumbing, building heating, oil, gas, or air piping.
17. Ventilating equipment.
18. Water purification equipment, including softeners, demineralizers and accessories, evaporators and accessories, heat exchangers, filters, tanks for filtered or softened water, pumps, and motors.
19. Water supply systems, including pumps, motors, strainers, raw-water storage tanks, boiler wash pumps, intake and discharge pipes and tunnels not a part of a building.
20. Reactor plant cranes and hoists, and associated drives.

NOTE: When the system for supplying boiler or condenser water is elaborate, as when it includes a dam, reservoir, canal, pipe lines, or cooling ponds, the cost of such special facilities shall be charged to a subdivision of Account 321, Structures and Improvements.

323 Turbogenerator Units

This account shall include the cost installed of main turbine-driven units and accessory equipment used in generating electricity by steam.

Items
1. Air cleaning and cooling apparatus, including blowers, drive equipment, air ducts, not a part of building, louvers, pumps, and hoists.
2. Circulating pumps, including connections between condensers, and intake and discharge tunnels.
3. Condensers, including condensate pumps, air and vacuum pumps, ejectors, unloading valves and vacuum breakers, expansion devices, and screens.
4. Generator hydrogen gas piping system and hydrogen detrainment equipment, and bulk hydrogen gas storage equipment.
5. Cooling system, including towers, pumps, tanks, and piping.
6. Cranes and hoists, including items wholly identified with items listed herein.
7. Excitation system, when identified with main generating units.
8. Fire extinguishing systems.
9. Foundations and settings, especially constructed for and not expected to outlast the apparatus for which provided.
10. Governors.
11. Lighting systems.
12. Lubricating systems, including gauges, filters, water separators, tanks, pumps, piping, and motors.
13. Mechanical meters, including gauges, recording instruments, sampling and testing equipment.
14. Piping-main steam, including connections between turbogenerator and condenser and between condenser and hotwell.
15. Piping-main steam, including connections from main throttle valve to turbine inlet.
16. Platforms, railings, steps, and gratings appurtenant to apparatus listed herein.
17. Pressure oil systems, including accumulators, pumps, piping, and motors.
18. Steamwork, specially constructed for apparatus listed herein.
19. Throttle and inlet valve.
20. Tunnels, intake and discharge, for condenser system, when not a part of structure, and water screens.
21. Turbogenerators-main, including turbine and generator, field rheostats and electric connections for self-excited units.
22. Water screens and motors.
23. Moisture separators for turbine steam.
24. Turbine lubricating oil, initial charge.

324 Accessory Electric Equipment

This account shall include the cost installed of auxiliary generating apparatus, conversion equipment, and equipment used primarily in connection with the control and switching of electric energy produced by nuclear power, and the protection of electric circuits and equipment, except electric motors used to drive equipment included in other accounts. Such motors shall be included in the account in which the equipment with which they are associated is included.

NOTE: Do not include in this account transformers and other equipment used for changing the voltage or frequency of electric energy for the purpose of transmission or distribution.

Items
1. Auxiliary generators, including boards, compartments, switching equipment, control equipment, and connections to auxiliary power bus.
2. Excitation system, including motor, turbine and dual-drive exciter sets and rheostats, storage batteries, and charging equipment, circuit breakers, panels and accessories, knife switches and accessories, surge arresters, instrument shunts, conductors and conduit, special supports for conduit, generator field and exciter switch panels, exciter bus tie panels, generator and exciter rheostats and special housing and protective screens.
3. Generator main connections, including oil circuit breakers and accessories, disconnecting switches and accessories, operating mechanisms and interlocks, current transformers, potential transformers, protective relays, isolated panels and equipment, conductors and conduit, special supports for generator main leads, grounding switch, special housings and protective screens.
4. Station buses, including main, auxiliary, transfer, synchronizing and fault ground
§ 1767.20

Miscellaneous Power Plant Equipment

This account shall include the cost installed of miscellaneous equipment in and about the nuclear generating plant devoted to general station use, which is not properly includible in any of the foregoing nuclear power production accounts.

Items

1. Compressed air and vacuum cleaning systems, including tanks, compressors, exhausters, air filters, and piping.
2. Cranes and hoisting equipment, including cranes, cars, crane rails, monorails, and hoists with electric and mechanical connections.
3. Fire-extinguishing equipment for general station and site use.
4. Foundations and settings specially constructed for and not expected to outlast the apparatus for which provided.
5. Locomotive cranes not included elsewhere.
6. Locomotives not included elsewhere.
7. Marine equipment, including boats and barges.
8. Miscellaneous belts, pulleys, and countershafts.
9. Miscellaneous equipment, including atmospheric and weather recording devices, intrasite communication equipment, laboratory equipment, signal systems, callophones, emergency whistles and sirens, fire alarms, insect-control equipment, and other similar equipment.
10. Railway cars or special shipping containers not includible elsewhere.
11. Refrigerating systems, including compressors, pumps, and cooling coils.
12. Station maintenance equipment, including lathes, shapers, planers, drill presses, hydraulic presses, and grinders with motors, shafting, hangers, and pulleys.
13. Ventilating equipment, including items wholly identified with apparatus listed herein.
14. Station and area radiation monitoring equipment.

Note: When any item of equipment listed herein is wholly used in connection with equipment included in another account, its cost shall be included in such other account.

Hydraulic Production

330 Land and Land Rights

This account shall include the cost of land and land rights used in connection with hydraulic power generation. (See §1767.16 (g).) It shall also include the cost of land and land rights used in connection with (1) the conservation of fish and wildlife, and (2) recreation. Separate subaccounts shall be maintained for each of the above.

331 Structures and Improvements

This account shall include the cost, in place, of structures and improvements used in connection with hydraulic power generation. (See §1767.16 (h).) It shall also include the cost, in place, of structures and improvements used in connection with (1) the conservation of fish and wildlife, and (2) recreation. Separate subaccounts shall be maintained for each of the above.

332 Reservoirs, Dams, and Waterways

This account shall include the cost in place of facilities used for impounding, collecting, storage, diversion, regulation, and delivery of water used primarily for generating electricity. It shall also include the cost in place of facilities used in connection with (1) the conservation of fish and wildlife, and (2) recreation. Separate subaccounts shall be maintained for each of the above. (See §1767.16 (h)(3).)

Items

1. Bridges and culverts, when not a part of roads or railroads.
2. Clearing and preparing land.
3. Dams, including wasteways, spillways, flash boards, spillway gates with operating and control mechanisms, tunnels, gate houses, and fish ladders.
4. Dikes and embankments.
§ 1767.20 7 CFR Ch. XVII (1–1–08 Edition)

5. Electric system, including conductors, control system, transformers, and lighting fixtures.
6. Excavation, including shoring, bracing, bridging, refill, and disposal of excess excavated material.
7. Foundations and settings specially constructed for and not expected to outlast the appurtenance limited on other accounts, such motors being included in the account in which the equipment with which they are associated is included.

Items
1. Auxiliary generators, including boards, compartments, switching equipment, control equipment, and connections to auxiliary power bus.
2. Excitation system, including motor, turbine, and dual-drive exciter sets and rheostats, storage batteries and charging equipment, circuit breakers, panels and accessories, knife switches and accessories, surge arresters, instrument shunts, conductors and conduit, special supports for conduit, generator field and exciter switch panels, exciter bus tie panels, generator and exciter rheostats and special housings and protective screens.
3. Generator main connections, including oil circuit breakers and accessories, disconnecting switches and accessories, operating mechanisms and interlocks, current transformers, potential transformers, protective relays, isolated panels and equipment, conductors and conduit, special supports for generator main leads, grounding switch, and special housings and protective screens.
4. Station buses, including main, auxiliary, transfer, synchronizing, and fault ground bases, including oil circuit breakers and accessories, disconnecting switches and accessories, operating mechanisms and interlocks, reactors and accessories, voltage regulators and accessories, compensators, resistors
starting transformers, current transformers, potential transformers, protective relays, storage batteries, and charging equipment, isolated panels and equipment, conductors and conduit, special supports, special fire-extinguishing system, and test equipment.

5. Station control system, including station switchboards with panel wiring, panels with instruments and control equipment only, panels with switching equipment mounted for mechanically connected, truck-type boards complete, cubicles, station supervisory control devices, frequency control equipment, master clocks, watt-hour meter, station totalizing watt-meter, storage batteries, panels and charging sets, instrument transformers for supervisory metering, conductors and conduit, special supports for conduit, switchboards, batteries, special housings for batteries, protective screens, and doors.

NOTE A: Do not include in this account transformers and other equipment used for changing the voltage or frequency of electricity for the purpose of transmission or distribution.

NOTE B: When any item of equipment listed herein is used wholly to furnish power to equipment, it shall be included in such equipment account.

335 Miscellaneous Power Plant Equipment

This account shall include the cost installed of miscellaneous equipment in and about the hydroelectric generating plant which is devoted to general station use and is not properly includible in other hydraulic production accounts. It shall also include the cost of equipment used in connection with (1) the conservation of fish and wildlife, and (2) recreation. Separate subaccounts shall be maintained for each of the above.

Items

1. Compressed air and vacuum cleaning systems, including tanks, compressors, exhausters, air filters, and piping.
2. Cranes and hoisting equipment, including cranes, cars, crane rails, monorails, and hoists with electric and mechanical connections.
3. Fire-extinguishing equipment for general station use.
4. Foundations and settings, specially constructed for and not expected to outlast the apparatus for which provided.
5. Locomotive cranes not includible elsewhere.
7. Marine equipment, including boats and barges.
8. Miscellaneous belts, pulleys, and countershafts.
9. Miscellaneous equipment, including atmospheric and weather indicating devices. Intrastate communication equipment, laboratory equipment, insect control equipment, signal systems, callphones, emergency whistles and sirens, fire alarms, and other similar equipment.
10. Railway cars, not includible elsewhere.
11. Refrigerating system, including compressors, pumps, and cooling coils.
12. Station maintenance equipment, including lathes, shapers, planers, drill presses, hydraulic presses, and grinders with motors, shafting, hangers, and pulleys.
13. Ventilating equipment, including items wholly identified with apparatus listed herein.

NOTE: When any item of equipment, listed herein, is used wholly in connection with equipment included in another account, its cost shall be included in such other account.

336 Roads, Railroads, and Bridges

This account shall include the cost of roads, railroads, trails, bridges, and trestles used primarily as production facilities. It also includes those roads necessary to connect the plant with highway transportation systems, except when such roads are dedicated to public use and maintained by public authorities.

Items

1. Bridges, including foundations, piers, girders, trusses, and flooring.
2. Clearing land.
3. Railroads, including grading, ballast, ties, rails, culverts, and hoists.
4. Roads, including grading, surfacing, and culverts.
5. Structures, constructed and maintained in connection with items listed herein.
6. Trails, including grading, surfacing, and culverts.
7. Trestles, including foundations, piers, girders, trusses, and flooring.

NOTE A: Roads intended primarily for connecting employees’ houses with the power plant, and roads used primarily in connection with fish and wildlife, and recreation activities, shall not be included herein but in Account 331, Structures and Improvements.

NOTE B: The cost of temporary roads and bridges necessary during the period of construction but abandoned or dedicated to public use upon completion of the plant, shall not be included herein but shall be charged to the accounts appropriate for the construction.

Other Production

340 Land and Land Rights

This account shall include the cost of land and land rights used in connection with other power generation. (See §1767.16 (g).)
§ 1767.20

341 Structures and Improvements
This account shall include the cost in place of structures and improvements used in connection with other power generation. (See §1767.16 (h).)

342 Fuel Holders, Producers, and Accessories
This account shall include the cost installed of fuel handling and storage equipment used between the point of fuel delivery to the station and the intake pipe through which fuel is directly drawn to the engine, also the cost of gas producers and accessories devoted to the production of gas for use in prime movers driving main electric generators.

Items
1. Blower and fans.
2. Boilers and pumps.
3. Economizers.
4. Exhauster outfits.
5. Flues and piping.
6. Pipe system.
7. Producers.
8. Regenerators.
10. Steam injectors.
11. Tanks for storage of oil and gasoline.
12. Vaporizers.

343 Prime Movers
This account shall include the cost installed of Diesel or other prime movers devoted to the generation of electric energy, together with their auxiliaries.

Items
1. Air-filtering system.
2. Belting, shafting, pulleys, and reduction gearing.
3. Cooling system, including towers, pumps, tanks, and piping.
4. Cranes and hoists, including items wholly identified with apparatus listed herein.
5. Engines, Diesel, gasoline, gas, or other internal combustion.
6. Foundations and settings specially constructed for and not expected to outlast the apparatus for which provided.
7. Governors.
8. Ignition system.
9. Inlet valve.
10. Lighting systems.
11. Lubricating systems, including filters, tanks, pumps, and piping.
12. Mechanical meters, including gauges, recording instruments, sampling, and testing equipment.
15. Starting systems, compressed air, or other, including compressors and drives, tanks, piping, motors, boards and connections, and storage tanks.

7 CFR Ch. XVII (1–1–08 Edition)

16. Steelwork, specially constructed for apparatus listed herein.
17. Waste heat boilers and antifluctuators.

344 Generators
This account shall include the cost installed of Diesel or other power driven main generators.

Items
1. Cranes and hoists, including items wholly identified with such apparatus.
2. Fire-extinguishing equipment.
3. Foundations and settings, specially constructed for and not expected to outlast the apparatus for which provided.
4. Generator cooling system, including air cooling and washing apparatus, air fans and accessories, and air ducts.
5. Generators-main, a.c. or d.c., including field rheostats and connections for self-excited units and excitation system when identified with the generating unit.
6. Lighting systems.
7. Lubricating system, including tanks, filters, strainers, pumps, piping, and coolers.
8. Mechanical meters and recording instruments.
9. Platforms, railings, steps, and gratings appurtenant to apparatus listed herein.

Note: If prime movers and generators are so integrated that it is not practical to classify them separately, the entire unit may be included in Account 344, Generators.

345 Accessory Electric Equipment
This account shall include the cost installed of auxiliary generating apparatus, conversion equipment, and equipment used primarily in connection with the control and switching of electric energy produced in other power generating stations, and the protection of electric circuits and equipment, except electric motors used to drive equipment included in other accounts. Such motors shall be included in the account in which the equipment with which it is associated is included.

Items
1. Auxiliary generators, including boards, compartments, switching equipment, control equipment, and connections to auxiliary power bus.
2. Excitation system, including motor, turbine and dual-drive exciter sets and rheostats, storage batteries and charging equipment, circuit breakers, panels and accessories, knife switches and accessories, surge arresters, instrument shunts, conductors and conduit, special supports for conduit, generator field and exciter switch panels, exciter bus tie panels, generator and exciter rheostats and special housings and protective screens.
3. Generator main connections, including oil circuit breakers and accessories, disconnecting switches and accessories, operating mechanisms and interlocks, current transformers, potential transformers, protective relays, isolated panels and equipment, conductors and conduit, special supports for generator main leads, ground switch, and special housing and protective screens.

4. Station control system, including station switchboards with panel wiring, panels with instruments and control equipment only, panels with switching equipment mounted or mechanically connected, trunk-type boards complete, cubicles, station supervisory control boards, generator and exciter signal stands, temperature-recording devices, frequency control equipment, master clocks, watt-hour meter, station totalizing wattmeter, storage batteries, panels and charging sets, instrument transformers for supervisory metering, conductors and conduit, special supports for conduit, switchboards, batteries, special housing for batteries, protective screens, and doors.

5. Station buses, including main, auxiliary, transfer, synchronizing and fault ground buses, including oil circuit breakers and accessories, operating mechanisms and interlocks, reactors and accessories, voltage regulators and accessories, compensators, resistors, starting transformers, current transformers, potential transformers, protective relays, storage batteries and charging equipment, isolated panels and equipment, conductors and conduit, special supports, special housings, concrete pads, general station ground system, special fire-extinguishing system, and test equipment.

6. Station buses, including main, auxiliary, transfer, synchronizing and fault ground buses, including oil circuit breakers and accessories, operating mechanisms and interlocks, reactors and accessories, voltage regulators and accessories, compensators, resistors, starting transformers, current transformers, potential transformers, protective relays, storage batteries and charging equipment, isolated panels and equipment, conductors and conduit, special supports, special housings, concrete pads, general station ground system, special fire-extinguishing system, and test equipment.

7. Refrigerating systems including compressors, pumps, and cooling coils.

8. Station maintenance equipment, including lathes, shapers, planters, drill presses, hydraulic presses, and grinders with motors, shafting, hangers, or pulleys.

9. Ventilating equipment, including items wholly identified with apparatus listed herein.

NOTE: When any item of equipment, listed herein, is used wholly in connection with equipment included in another account, its cost shall be included in such other account.

TRANSMISSION PLANT

350 Land and Land Rights

This account shall include the cost of land and land rights used in connection with transmission operations. (See §1767.16 (g).)

351 [Reserved]

352 Structures and Improvements

This account shall include the cost, in place, of structures and improvements used in connection with transmission operations. (See §1767.16 (h).)

353 Station Equipment

This account shall include the cost installed of transforming, conversion, and switching equipment used for the purpose of changing the characteristics of electricity in connection with its transmission or for controlling transmission circuits.

Items

1. Bus compartments, concrete, brick, and sectional steel, including items permanently attached thereto.

2. Conduit, including concrete and iron duct runs not a part of a building.

3. Control equipment, including batteries, battery charging equipment, transformers, remote relay boards, and connections.

4. Conversion equipment, including transformers, indoor and outdoor, frequency changers, motor generator sets, rectifiers, synchronous converters, motors, cooling equipment, and associated connections.

5. Fences.
§ 1767.20

6. Fixed and synchronous condensers, including transformers, switching equipment, blowers, motors and connections.
7. Foundations and settings, specially constructed for and not expected to outlast the apparatus for which provided.
8. General station equipment, including air compressors, motors, hoists, cranes, test equipment, and ventilating equipment.
9. Platforms, railings, steps, and gratings appurtenant to apparatus listed herein.
10. Primary and secondary voltage connections, including bus runs and supports, insulators, potheads, lightning arresters, cable and wire runs from and to outdoor connections or to manholes and the associated regulators, reactors, resistors, surge arresters, and accessory equipment.
11. Switchboards, including meters, relays, and control wiring.
12. Switching equipment, indoor and outdoor, including oil circuit breakers and operating mechanisms, truck switches, and disconnect switches.

354 Towers and Fixtures

This account shall include the cost installed of towers and appurtenant fixtures used for supporting overhead transmission conductors.

Items
1. Anchors, guys, and braces.
2. Brackets.
3. Crossarms, including braces.
4. Excavation, backfill, and disposal of excess excavated material.
5. Foundations.
7. Insulator pins and suspension bolts.
8. Ladder and steps.
9. Railings.
10. Towers.

355 Poles and Fixtures

This account shall include the cost installed of towers and appurtenant fixtures used for supporting overhead transmission conductors.

Items
1. Anchors, head arm and other guys, including guy guards, guy clamps, strain insulators, and pole plates.
2. Brackets.
3. Crossarms and braces.
4. Excavation and backfill, including disposal of excess excavated material.
5. Extension arms.
6. Gaining, roofing, stenciling, and tagging.
7. Insulator pins and suspension belts.
8. Paving.
9. Pole steps.

10. Poles, wood, steel, concrete, or other material.
11. Racks complete with insulators.
12. Reinforcing and stubbing.

356 Overhead Conductors and Devices

This account shall include the cost installed of overhead conductors and devices used for transmission purposes.

Items
1. Circuit breakers.
2. Conductors, including insulated and bare wires and cables.
3. Ground wires and ground clamps.
4. Insulators, including pin, suspension, and other types.
5. Lightning arresters.
7. Other line devices.

357 Underground Conduit

This account shall include the cost installed of underground conduit and tunnels used for housing transmission cables or wires. (See §1767.16 (n).)

Items
1. Conduit, concrete, brick or tile, including iron pipe, fiber pipe, Murray duct, and standpipe on pole or tower.
2. Excavation, including shoring, bracing, bridging, backfill, and disposal of excess excavated material.
3. Foundations and settings specially constructed for and not expected to outlast the apparatus for which provided.
4. Lighting systems.
5. Manholes, concrete or brick, including iron or steel, frames and covers, hatchways, gratings, ladders, cable racks and hangers, permanently attached to manholes.
6. Municipal inspection.
7. Pavement disturbed, including cutting and replacing pavement, pavement base and sidewalks.
8. Permits.
10. Removal and relocation of subsurface obstructions.
11. Sewer connections, including drains, traps, tide valves, and check valves.
12. Sumps, including pumps.
13. Ventilating equipment.

358 Underground Conductors and Devices

This account shall include the cost installed of underground conductors and devices used for transmission purposes.

Items
1. Armored conductors, buried, including insulators, insulating materials, splices, potheads, and trenching.
2. Armored conductors, submarine, including insulators, insulating materials, splices in terminal chambers, and potheads.
3. Cables in standpipe, including pothead and connection from terminal chamber of manhole to insulators on pole.
5. Fireproofing, in connection with any items listed herein.
6. Hollow-core oil-filled cable, including straight or stop joints, pressure tanks, auxiliary air tanks, feeding tanks, terminals, potheads and connections, and ventilating equipment.
7. Lead and fabric covered conductors, including insulators, compound filled, oil filled, or vacuum splices, and potheads.
8. Lightning arresters.
9. Municipal inspection.
11. Protection of street openings.
12. Racking of cables.
14. Other line devices.
359 Roads and Trails
This account shall include the cost of roads, trails, and bridges used primarily as transmission facilities.
Items
1. Bridges, including foundation piers, girders, trusses, and flooring.
2. Clearing land.
3. Roads, including grading, surfacing, and culverts.
4. Structures, constructed and maintained in connection with items included herein.
5. Trails, including grading, surfacing, and culverts.

NOTE: The cost of temporary roads and bridges necessary during the period of construction but abandoned or dedicated to public use upon completion of the plant, shall be charged to the accounts appropriate for the construction.
361 Structures and Improvements
This account shall include the cost, in place, of structures and improvements used in connection with distribution operations. (See §1767.18 (h).)
§ 1767.20

3. Battery room flooring, when specially laid for supporting batteries.
4. Charging equipment, including motor generator sets and other charging equipment and connections, and cable runs from generator or station bus to battery room connections.
5. Miscellaneous equipment, including instruments, and water stills.
6. Switching equipment, including endcell switches and connections, boards and panels, used exclusively for battery control, not part of general station switchboard.
7. Ventilating equipment, including fans and motors, louvers, and ducts not part of building.

Note: Storage batteries used for control and general station purposes shall not be included in this account but in the account appropriate for their use.

364 Poles, Towers and Fixtures

This account shall include the cost installed of poles, towers, and appurtenant fixtures used for supporting overhead distribution conductors and service wires.

Items
1. Anchors, head arm, and other guys, including guy guards, guy clamps, strain insulators, and pole plates.
2. Brackets.
3. Crossarms and braces.
4. Excavation and backfill, including disposal of excess excavated material.
5. Extension arms.
7. Guards.
8. Insulator pins and suspension bolts.
9. Paving.
11. Pole steps and ladders.
12. Poles, wood, steel, concrete, or other material.
13. Racks complete with insulators.
15. Reinforcing and stubbing.
17. Shaving, painting, gaining, roofing, stenciling, and tagging.
18. Towers.
19. Transformer racks and platforms.

365 Overhead Conductors and Devices

This account shall include the cost installed of overhead conductors and devices used for distribution purposes.

Items
1. Circuit breakers.
2. Conductors, including insulated and bare wires and cables.
3. Ground wires and clamps.
4. Insulators, including pin, suspension, and other types, and tie wire or clamps.
5. Lightning arresters.
6. Railroad and highway crossing guards.
7. Splices.
8. Switches.
9. Tree trimming, initial cost including the cost of permits therefor.
10. Other line devices.
11. Oil circuit reclosers (OCR).
12. Sectionalizers.
13. Labor costs for installation of OCRs and Sectionalizers, first only.

Note: The cost of conductors used solely for street lighting or signal systems shall not be included in this account but in Account 373, Street Lighting and Signal Systems.

366 Underground Conduit

This account shall include the cost installed of underground conduit and tunnels used for housing distribution cables or wires.

Items
1. Conduit, concrete, brick and tile, including iron pipe, fiber pipe, Murray duct, and standpipe on pole or tower.
2. Excavation, including shoring, bracing, bridging, backfill, and disposal of excess excavated material.
3. Foundations and settings specially constructed for and not expected to outlast the apparatus for which constructed.
4. Lighting systems.
5. Manholes, concrete or brick, including iron or steel frames and covers, hatchways, gratings, ladders, cable racks, and hangers permanently attached to manholes.
6. Municipal inspection.
7. Pavement disturbed, including cutting and replacing pavement, pavement base, and sidewalks.
8. Permits.
10. Removal and relocation of subsurface obstructions.
11. Sewer connections, including drains, traps, tide valves, and check valves.
12. Sumps, including pumps.
13. Ventilating equipment.

Note: The cost of underground conduit used solely for street lighting or signal systems shall be included in Account 373, Street Lighting and Signal Systems.

367 Underground Conductors and Devices

This account shall include the cost installed of underground conductors and devices used for distribution purposes.

Items
1. Armored conductors, buried, including insulators, insulating materials, splices, potheads, and trenching.
2. Armored conductors, submarine, including insulators, insulating materials, splices in terminal chamber, and potheads.
3. Cables in standpipe, including pothead and connection from terminal chamber or manhole to insulators on pole.
5. Fireproofing, in connection with any items listed herein.
6. Hollow-core oil-filled cable, including straight or stop joints, pressure tanks, auxiliary air tanks, feeding tanks, terminals, potheads and connections.
7. Lead and fabric covered conductors, including insulators, compound-filled, oil-filled or vacuum splices, and potheads.
8. Lightning arresters.
9. Municipal inspection.
11. Protection of street openings.
12. Racking of cables.
14. Other line devices.

NOTE: The cost of underground conductors and devices used solely for street lighting or signal systems shall be included in Account 373, Street Lighting and Signal Systems.

368 Line Transformers

A. This account shall include the cost installed of overhead and underground distribution line transformers and pole-type and underground voltage regulators owned by the utility, for use in transforming electricity to the voltage at which it is to be used by the customer, whether actually in service or held in reserve.
B. When a transformer is permanently retired from service, the original installed cost thereof shall be credited to this account.
C. The records covering line transformers shall be so kept that the utility can furnish the number of transformers of various capacities in service and those in reserve, and the location and the use of each transformer.

Items
1. Installation, labor of (first installation only).
2. Transformer cut-out boxes.
3. Transformer lightning arresters.
4. Transformers, line and network.
5. Capacitors.
7. Voltage regulators.

NOTE: The cost of removing and resetting line transformers shall not be charged to this account but to Account 583, Overhead Line Expenses, or Account 584, Underground Line Expenses, as appropriate. The cost of line transformers used solely for street lighting or signal systems shall be included in Account 373, Street Lighting and Signal Systems.

369 Services

This account shall include the cost installed of overhead and underground conductors leading from a point where wires leave the last pole of the overhead system or the distribution box or manhole, or the top of the pole of the distribution line, to the point of connection with the customer’s outlet or wiring. Conduit used for underground service conductors shall be included herein.

Items
1. Brackets.
2. Cables and wires.
3. Conduit.
4. Insulators.
5. Municipal inspection.
6. Overhead to underground, including conduit or standpipe and conductor from last splice on pole to connection with customer’s wiring.
7. Pavement disturbed, including cutting and replacing pavement, pavement base, and sidewalks.
8. Permits.
10. Service switch.
11. Suspension wire.

370 Meters

A. This account shall include the cost installed of meters or devices and appurtenances thereto, for use in measuring the electricity delivered to its users, whether actually in service or held in reserve.
B. When a meter is permanently retired from service, the installed cost included herein shall be credited to this account.
C. The records covering meters shall be so kept that the utility can furnish information as to the number of meters of various capacities in service and in reserve as well as the location of each meter owned.

Items
1. Alternate current, watt-hour meters.
2. Current limiting devices.
3. Demand indicators.
4. Demand meters.
5. Direct current watt-hour meters.
6. Graphic demand meters.
7. Installation, labor of (first installation only).
8. Instrument transformers.
10. Meter badges and their attachments.
11. Meter boards and boxes.
12. Meter fittings, connections, and shelves (first set).
13. Meter switches and cut-outs.
15. Protective devices.

NOTE A: This account shall not include meters for recording output of a generating station, or substation meters. It includes only those meters used to record energy delivered to customers.
NOTE B: The cost of removing and resetting meters shall be charged to Account 586, Meter Expenses.

371 Installations on Customers' Premises

This account shall include the cost installed of equipment on the customer's side of a meter when the utility incurs such cost and when the utility retains title to and assumes full responsibility for maintenance and replacement of such property. This account shall not include leased equipment. (See Account 372, Leased Property on Customers' Premises.)

Items

1. Cable vaults.
2. Commercial lamp equipment.
3. Foundations and settings specially provided for equipment included herein.
4. Frequency changer sets.
5. Motor generator sets.
6. Motors.
7. Switchboard panels, high or low tension.
8. Wire and cable connections to incoming cables.

NOTE: Do not include in this account any costs incurred in connection with merchandising, jobbing, or contract work activities.

372 Leased Property on Customers' Premises

This account shall include the cost of electric motors, transformers, and other equipment on customers' premises (including municipal corporations), leased or loaned to customers, but not including property held for sale.

NOTE A: The cost of setting and connecting such appliances or equipment on the premises of customers and the cost of resetting or removal shall not be charged to this account but to operating expenses, Account 587, Customer Installations Expenses.

NOTE B: Do not include in this account any costs incurred in connection with merchandising, jobbing, or contract work activities.

373 Street Lighting and Signal Systems

This account shall include the cost installed of equipment used wholly for public street and highway lighting or traffic, fire alarm, police, and other signal systems.

Items

1. Armored conductors, buried or submarine, including insulators, insulating materials, splices, and trenching.
2. Automatic control equipment.
3. Conductors, overhead or underground, including lead or fabric covered, parkway cables, including splices, and insulators.
4. Lamps, arc, incandescent, or other types, including glassware, suspension fixtures, and brackets.
5. Municipal inspection.

6. Ornamental lamp posts.
7. Pavement disturbed, including cutting and replacing pavement, pavement base, and sidewalks.
8. Permits.
11. Relays or time clocks.
12. Series contactors.
14. Transformers, pole or underground.

GENERAL PLANT

389 Land and Land Rights

This account shall include the cost of land and land rights used for utility purposes, the cost of which is not properly includible in other land and land rights accounts. (See §1767.16 (g).)

390 Structures and Improvements

This account shall include the cost, in place, of structures and improvements used for utility purposes, the cost of which is not properly includible in other structures and improvements accounts. (See §1767.16 (h).)

391 Office Furniture and Equipment

This account shall include the cost of office furniture and equipment owned by the utility and devoted to utility service, and not permanently attached to buildings, except the cost of such furniture and equipment which the utility elects to assign to other plant accounts on a functional basis.

Items

1. Bookcases and shelves.
2. Desks, chairs, and desk equipment.
3. Drafting-room equipment.
4. Filing, storage, and other cabinets.
5. Floor covering.
6. Library and library equipment.
7. Mechanical office equipment, such as accounting machines, and typewriters.
8. Safes.
9. Tables.

392 Transportation Equipment

This account shall include the cost of transportation vehicles used for utility purposes.

Items

1. Airplanes.
2. Automobiles.
4. Electrical vehicles.
5. Motor trucks.
7. Repair cars or trucks.
8. Tractors and trailers.
9. Other transportation vehicles.
§ 1767.20

393 Stores Equipment

This account shall include the cost of equipment used for the receiving, shipping, handling, and storage of materials and supplies.

_Items_

1. Chain falls.
2. Counters.
4. Elevating and stacking equipment (portable).
5. Hoists.
7. Scales.
8. Shelving.
10. Trucks, hand and power driven.
11. Wheelbarrows.

394 Tools, Shop and Garage Equipment

This account shall include the cost of tools, implements, and equipment used in construction, repair work, general shops and garages and not specifically provided for or includible in other accounts.

_Items_

1. Air compressors.
2. Anvils.
3. Automobile repair shop equipment.
4. Battery charging equipment.
5. Belts, shafts and countershafts.
7. Cable pulling equipment.
8. Concrete mixers.
10. Derricks.
11. Electric equipment.
12. Engines.
13. Forges.
14. Furnaces.
15. Foundations and settings specially constructed for and not expected to outlast the equipment for which provided.
17. Gasoline pumps, oil pumps, and storage tanks.
18. Greasing tools and equipment.
20. Ladders.
21. Lathes.
23. Motor-driven tools.
24. Motors.
25. Pipe threading and cutting tools.
26. Pneumatic tools.
27. Pumps.
28. Riveters.
29. Smithing equipment.
30. Tool racks.
31. Vises.
32. Welding apparatus.
33. Work benches.

395 Laboratory Equipment

This account shall include the cost installed of laboratory equipment used for general laboratory purposes and not specifically provided for or includible in other departmental or functional plant accounts.

_Items_

1. Ammeters.
2. Current batteries.
3. Frequency changers.
5. Inductometers.
6. Laboratory standard millivolt meters.
7. Laboratory standard volt meters.
8. Meter-testing equipment.
10. Motor generator sets.
11. Panels.
13. Portable graphic ammeters, voltmeters, and wattmeters.
15. Potential batteries.
17. Rotating standards.
20. Synchronous timers.
22. Testing resistors.
23. Transformers.
24. Voltmeters.
25. Other testing, laboratory, or research equipment not provided for elsewhere.

396 Power Operated Equipment

This account shall include the cost of power operated equipment used in construction or repair work exclusive of equipment includible in other accounts. Include, also, the tools and accessories acquired for use with such equipment and the vehicle on which such equipment is mounted.

_Items_

1. Air compressors, including driving unit and vehicle.
2. Back filling machines.
5. Cranes and hoists.
6. Diggers.
7. Engines.
8. Pile drivers.
10. Pipe coating or wrapping machines.
11. Tractors-Crawler type.
12. Trenchers.
13. Other power operated equipment.

_Note:_ It is intended that this account include only such large units as are generally self-propelled or mounted on movable equipment.
§ 1767.21 Operating income.

The operating income accounts identified in this section shall be used by all RUS borrowers.

UTILITY OPERATING INCOME

Rural Utilities Service, USDA § 1767.21

413 Expenses of Electric Plant Leased to Others

414 Other Utility Operating Income

UTILITY OPERATING INCOME

400 Operating Revenues

There shall be shown under this caption the total amount included in the electric operating revenue accounts provided herein.

401 Operation Expense

There shall be shown under this caption the total amount included in the electric operation expense accounts provided herein. (See note to §1767.17 (c).)

402 Maintenance Expense

There shall be shown under this caption the total amount included in the electric maintenance expense accounts provided herein.

403 Depreciation Expense

A. This account shall include the amount of depreciation expense for all classes of depreciable electric plant in service except such depreciation expense as is chargeable to clearing accounts or to Account 416, Costs and Expenses of Merchandising, Jobbing and Contract Work.

B. The utility shall keep such records of property and property retirements as will reflect the service life of property which has been retired and aid in estimating probable service life by mortality, turnover, or other appropriate methods; and also such records as will reflect the percentage of salvage and costs of removal for property retired from each account, or subdivision thereof, for depreciable electric plant.

Note A: Depreciation expense applicable to property included in Account 104, Electric Plant Leased to Others, shall be charged to Account 413, Expenses of Electric Plant Leased to Others.

Note B: Depreciation expenses applicable to transportation equipment, shop equipment, tools, work equipment, power operated equipment, and other general equipment may be charged to clearing accounts as necessary in order to obtain a proper distribution of expenses between construction and operation.

Note C: Depreciation expense applicable to transportation equipment used for transportation of fuel from the point of acquisition to the unloading point shall be charged to Account 151, Fuel Stock.

C. Account 403 shall be subaccounted as follows:

403.1 Depreciation Expense—Steam Production Plant

403.2 Depreciation Expense—Nuclear Production Plant

403.3 Depreciation Expense—Hydraulic Production Plant

403.4 Depreciation Expense—Other Production Plant

403.5 Depreciation Expense—Transmission Plant

403.6 Depreciation Expense—Distribution Plant

403.7 Depreciation Expense—General Plant

404 Amortization of Limited-Term Electric Plant

This account shall include amortization charges applicable to amounts included in the electric plant accounts for limited-term franchises, licenses, patent rights, limited-term interests in land, and expenditures on leased property where the service life of the improvements is terminable by action of the lease. The charges to this account shall be such as to distribute the book cost of each investment as evenly as may be over the period of its benefit to the utility. (See Account 111, Accumulated Provision for Amortization of Electric Utility Plant.)

405 Amortization of Other Electric Plant

A. When authorized by RUS, this account shall include charges for amortization of intangible or other electric utility plant which does not have a definite or terminable life and which is not subject to charges for depreciation expense.

B. This account shall be supported in such detail as to show the amortization applicable to each investment being amortized, together with the book cost of the investment and the period over which it is being written off.

406 Amortization of Electric Plant Acquisition Adjustments

This account shall be debited or credited, as appropriate, with amounts includible in operating expenses, pursuant to approval or order of RUS, for the purpose of providing for the extinguishment of the amount in Account 114, Electric Plant Acquisition Adjustments.

407 Amortization of Property Losses, Uncovered Plant and Recovery Study Costs

This account shall be charged with amounts credited to Account 182.1, Extraordinary Property Losses, when RUS has authorized the amount in the latter account to be amortized by charges to electric operations.

407.3 Regulatory Debits

This account shall be debited, when appropriate, with the amounts credited to Account 254, Other Regulatory Liabilities, to record regulatory liabilities imposed on the utility by the ratemaking actions of regulatory agencies. This account shall also be

§ 1767.21

408 Other Utility Operating Income

There shall be shown under this caption the total amount included in the electric operating revenue accounts provided herein.
§ 1767.21  7 CFR Ch. XVII (1–1–08 Edition)

debited, when appropriate, with the amounts credited to Account 182.3, Other Regulatory Assets, concurrent with the recovery of such amounts in rates.

407.4 Regulatory Credits

This account shall be credited, when appropriate, with the amounts debited to Account 182.3, Other Regulatory Assets, to establish regulatory assets. This account shall also be credited, when appropriate, with the amounts debited to Account 254, Other Regulatory Liabilities, concurrent with the return of such amounts to customers through rates.

408 Taxes Other Than Income Taxes

A. This account shall include the amounts of ad valorem, gross revenue, or gross receipts taxes, state unemployment insurance, franchise taxes, Federal excise taxes, social security taxes, and all other taxes assessed by Federal, state, county, municipal, or other local governmental authorities, except income taxes.

B. These accounts shall be charged in each accounting period with the amounts of taxes which are applicable thereto, with concurrent credits to Account 236, Taxes Accrued, or Account 165, Prepayments, as appropriate. When it is not possible to determine the exact amounts of taxes, the amounts shall be estimated and adjustments made in current accruals as the actual tax levies become known.

C. The charges to these accounts shall be made or supported so as to show the amount of each tax and the basis upon which each charge is made. In the case of a utility rendering more than one utility service, taxes of the kind includible in these accounts shall be assigned directly to the utility department, the operation of which gave rise to the tax, insofar as practicable. Where the tax is not attributable to a specific utility department, it shall be distributed among the utility departments or nonutility operations on an equitable basis after appropriate study to determine such basis.

Note: A: Special assessments for street and similar improvements shall be included in the appropriate utility plant or nonutility property account.

Note B: Taxes specifically applicable to construction and retirement activities shall be included in the cost of construction or the retirement.

Note C: Gasoline and other sales taxes shall be charged as far as practicable to the same account as the materials on which the tax is levied.

Note D: Social security and other forms of payroll taxes shall be charged to nonutility operations, the specific functional operations, maintenance, and administrative expense accounts, and to construction and retirement activities on a basis related to payroll either directly or by transfers from this account.

Note E: Property taxes applicable to the various utility functions shall be charged to the specific functional operations and administrative expense accounts either directly or by transfers from this account.

Note F: Interest on tax refunds or deficiencies shall not be included in these accounts but in Account 419, Interest and Dividend Income, or Account 431, Other Interest Expense, as appropriate.

D. Account 408 shall be subaccounted as follows:

408.1 Taxes—Property
408.2 Taxes—U.S. Social Security—Unemployment
408.3 Taxes—U.S. Social Security—F.I.C.A.
408.4 Taxes—State Social Security—Unemployment
408.5 Taxes—State Sales—Consumers
408.6 Taxes—Gross Revenue or Gross Receipts Tax
408.7 Taxes—Other

409 [Reserved]

SPECIAL INSTRUCTIONS

Accounts 409.1, 409.2, and 409.3

A. These accounts shall include the amount of local, state, and Federal income taxes on income properly accruable during the period covered by the income statement to meet the actual liability for such taxes. Concurrent credits for the tax accruals shall be made to Account 236, Taxes Accrued, and as the exact amounts of taxes become known, the current tax accruals shall be adjusted by charges or credits to these accounts.

B. The accruals for income taxes shall be apportioned among utility departments and to Other Income and Deductions so that, as nearly as practicable, each tax shall be included in the expenses of the utility department or Other Income and Deductions, the income from which gave rise to the tax. The tax effects relating to interest charges shall be allocated between utility and nonutility operations. The basis for this allocation shall be the ratio of net investment in utility plant to net investment in nonutility plant.

Note A: Taxes assumed by the utility on interest shall be charged to Account 431, Other Interest Expense.

Note B: Interest on tax refunds or deficiencies shall not be included in these accounts but in Account 419, Interest and Dividend Income, or Account 431, Other Interest Expense, as appropriate.
409.1 Income Taxes, Utility Operating Income
This account shall include the amount of those local, state, and Federal income taxes which relate to utility operating income. This account shall be maintained so as to allow ready identification of tax effects (both positive and negative) relating to Utility Operating Income (by department), Utility Plant Leased to Others, and Other Utility Operating Income.

409.2 Income Taxes, Other Income and Deductions
This account shall include the amount of those local, state, and Federal income taxes (both positive and negative), which relate to Other Income and Deductions.

409.3 Income Taxes, Extraordinary Items
This account shall include the amount of those local, state, and Federal income taxes (both positive and negative), which relate to Extraordinary Items.

410 [Reserved]

411 [Reserved]

411.1 Provision for Deferred Income Taxes—Credit, Utility Operating Income
This account shall include the amounts of those allocations of deferred taxes and deferrals of taxes, credit, which relate to Utility Operating Income (by department).

411.2 Provision for Deferred Income Taxes—Credit, Other Income and Deductions
This account shall include the amounts of those allocations of deferred taxes and deferrals of taxes, credit, which relate to Other Income and Deductions.

411.3 [Reserved]

SPECIAL INSTRUCTIONS

Accounts 411.4 and 411.5

A. Account 411.4 shall be debited with the amounts of investment tax credits related to electric utility property that are credited to Account 255, Accumulated Deferred Investment Tax Credits, by companies which do not apply the entire amount of the benefits of the investment credit as a reduction of the overall income tax expense in the year in which such credit is realized. (See Account 255).

B. Account 411.4 shall be credited with the amounts debited to Account 255 for proportionate amounts of tax credit deferrals allocated over the average useful life of electric utility property to which the tax credits relate or such lesser period of time as may be adopted and consistently followed by the company.

C. Account 411.5 shall be debited and credited as directed in paragraphs A and B, for investment tax credits related to nonutility property.

411.4 Investment Tax Credit Adjustments, Utility Operations
This account shall include the amount of those investment tax credit adjustments related to property used in Utility Operations (by department).

411.5 Investment Tax Credit Adjustments, Nonutility Operations
This account shall include the amount of those investment tax credit adjustments related to property used in Nonutility Operations.

411.6 Gains from Disposition of Utility Plant
This account shall include, as approved by RUS, amounts relating to gains from the disposition of future use utility plant including amounts which were previously recorded in and transferred from Account 166, Electric
§ 1767.22

Plant Held for Future Use, under the Provisions of Paragraphs B, C, and D thereof. Income taxes relating to gains recorded in this account shall be recorded in Account 409.1, Income Taxes, Utility Operating Income.

411.7 Losses from Disposition of Utility Plant

This account shall include, as approved by RUS, amounts relating to losses from the disposition of future use utility plant including amounts which were previously recorded in and transferred from Account 118, Electric Plant Held for Future Use, under the provisions of Paragraphs B, C, and D thereof. Income taxes relating to losses recorded in this account shall be recorded in Account 409.1, Income Taxes, Utility Operating Income.

411.8 Gains from Disposition of Allowances

This account shall be credited with the gain on the sale, exchange, or other disposition of allowances in accordance with § 1767.15(u)(8). Income taxes relating to gains recorded in this account shall be recorded in Account 409.1, Income Taxes, Utility Operating Income.

411.9 Losses from Disposition of Allowances

This account shall be debited with the loss on the sale, exchange, or other disposition of allowances in accordance with § 1767.15(u)(8). Income taxes relating to losses recorded in this account shall be recorded in Account 409.1, Income Taxes, Utility Operating Income.

412 Revenues from Electric Plant Leased to Others

This account shall include revenues from electric property constituting a distinct operating unit or system leased by the utility to others, and which property is properly includible in Account 104, Electric Plant Leased to Others.

Note: Related taxes shall be recorded in Account 408, Taxes Other Than Income Taxes, or Account 409.1, Income Taxes, Utility Operating Income, as appropriate.

413 Expenses of Electric Plant Leased to Others

A. This account shall include expenses from electric property constituting a distinct operating unit or system leased by the utility to others, and which property is properly includible in Account 104, Electric Plant Leased to Others.

B. The detail of expenses shall be kept or supported so as to show separately the following:

1. Operation.
3. Depreciation.
4. Amortization.

Note: Related taxes shall be recorded in Account 408, Taxes Other Than Income Taxes, or Account 409.1, Income Taxes, Utility Operating Income, as appropriate.

414 Other Utility Operating Income

A. This account shall include the revenues received and expenses incurred in connection with the operations of utility plant, the book cost of which is included in Account 118, Other Utility Plant.

B. The expenses shall include every element of cost incurred in such operations, including depreciation, rents, and insurance.

Note: Related taxes shall be recorded in Account 408, Taxes Other Than Income Taxes, or Account 409.1, Income Taxes, Utility Operating Income, as appropriate.

jobbing or contract work, including any profit or commission accruing to the utility on jobbing work performed by it as agent under contracts whereby it does jobbing work for another for a stipulated profit or commission. Interest related income from installment sales shall be recorded in Account 419, Interest and Dividend Income.

B. Records in support of this account shall be so kept as to permit ready summarization of revenues by such major items as are feasible.

NOTE: The classification of revenues of merchandising, jobbing, and contract work as nonoperating, and thus included in this account, is for accounting purposes. It does not preclude consideration of justification to the contrary for ratemaking or other purposes.

**Items**

1. Revenues from sale of merchandise and from jobbing and contract work.
2. Discounts and allowances made in settlement of bills for merchandise and jobbing work.

### 416 Costs and Expenses of Merchandising, Jobbing and Contract Work

A. This account shall include all expenses derived from the sale of merchandise and jobbing or contract work.

B. Records in support of this account shall be so kept as to permit ready summarization of costs and expenses by such major items as are feasible.

NOTE: The classification of costs and expenses of merchandising, jobbing, and contract work as nonoperating, and thus included in this account, is for accounting purposes. It does not preclude consideration of justification to the contrary for ratemaking or other purposes.

**Items**

**Labor:**

1. Canvassing and demonstrating appliances in homes and other places for the purpose of selling appliances.
2. Demonstrating and selling activities in sales rooms.
3. Installing appliances on customer premises where such work is done only for purchasers of appliances from the utility.
4. Installing wire, piping, or other property work, on a jobbing or contract basis.
5. Preparing advertising materials for appliance sales purposes.
6. Receiving and handling customer orders for merchandise or for jobbing services.
7. Cleaning and tidying sales rooms.
8. Maintaining display counters and other equipment used in merchandising.
9. Arranging merchandise in sales rooms and decorating display windows.
11. Bookkeeping and other clerical work in connection with merchandise and jobbing activities.
12. Supervising merchandise and jobbing operations.
14. Cost of merchandise sold and of materials used in jobbing work.
15. Stores expenses on merchandise and jobbing stocks.
16. Fees and expenses of advertising and commercial artists’ agencies.
17. Printing booklets, dodgers, and other advertising data.
18. Premiums given as inducement to buy appliances.
19. Light, heat, and power.
20. Depreciation on equipment used primarily for merchandise and jobbing operations.
21. Rent of sales rooms or of equipment.
22. Transportation expense in delivery and pick-up of appliances by utility’s facilities or by others.
23. Stationery and office supplies and expenses.
24. Losses from uncollectible merchandise and jobbing accounts.

### 417 Revenues from Nonutility Operations

This account shall include revenues applicable to operations which are nonutility in character but nevertheless constitute a distinct operating activity of the enterprise as a whole, such as the operation of an ice department where applicable statutes do not define such operation as a utility, or the operation of a servicing organization for furnishing supervision, management, engineering, and similar services to others.

NOTE: Related taxes shall be recorded in Account 408, Taxes Other Than Income Taxes, or Account 409.2, Income Taxes, Other Income and Deductions, as appropriate.

### 417.1 Expenses of Nonutility Operations

A. This account shall include expenses applicable to operations which are nonutility in character but nevertheless constitute a distinct operating activity of the enterprise as a whole, such as the operation of an ice department where applicable statutes do not define such operation as a utility, or the operation of a servicing organization for furnishing supervision, management, engineering, and similar services to others.

B. The expenses shall include all elements of costs incurred in such operations, and the accounts shall be maintained so as to permit ready summarization as follows:

1. Operation.
3. Rents.
4. Depreciation.
5. Amortization.
NOTE: Related taxes shall be recorded in Account 408, Taxes Other Than Income Taxes, or Account 409.2, Income Taxes, Other Income and Deductions, as appropriate.

418 Nonoperating Rental Income

A. This account shall include all rent revenues and related expenses of land, buildings, or other property included in Account 121, Nonutility Property, which is not used in operations covered by Account 417 or Account 417.1.

B. The expenses shall include all elements of costs incurred in the ownership and rental of property and the accounts shall be maintained so as to permit ready summarization as follows:

1. Operation.
3. Rents.
4. Depreciation.
5. Amortization.

NOTE: Related taxes shall be recorded in Account 408, Taxes Other Than Income Taxes, or Account 409.2, Income Taxes, Other Income and Deductions, as appropriate.

418.1 Equity in Earnings of Subsidiary Companies

This account shall include the utility's equity in the earnings or losses of subsidiary companies for the year.

419 Interest and Dividend Income

A. This account shall include interest revenues on securities, loans, notes, advances, special deposits, tax refunds, and all other interest-bearing assets, and dividends on stocks of other companies, whether the securities on which the interest and dividends are received are carried as investments or included in sinking or other special fund accounts.

NOTE A: Related taxes shall be recorded in Account 408, Taxes Other Than Income Taxes, or Account 409.2, Income Taxes, Other Income and Deductions, as appropriate.

NOTE B: Interest accrued, the payment of which is not reasonably assured, dividends receivable which have not been declared or guaranteed, and interest or dividends upon reacquired securities issued or assumed by the utility shall not be credited to this account.

419.1 Allowance for Funds Used During Construction

This account shall include concurrent credits for allowance for funds other than borrowed funds used for construction purposes during the period of construction, based upon a reasonable rate. (See §1767.16 (c)(17).)

420 Investment Tax Credits

This account shall be credited as follows with investment tax credit amounts not passed on to customers:

1. By amounts equal to debits to Account 411.4, Investment Tax Credit Adjustments, Utility Operations, and Account 411.5, Investment Tax Credit Adjustments, Nonutility Operations, for investment tax credits used in calculating income taxes for the year when the company’s accounting provides for non-deferral of all or a portion of such credits.

2. By amounts equal to debits to Account 255, Accumulated Deferred Investment Tax Credits, for proportionate amounts of tax credit deferrals allocated over the average useful life of the property to which the tax credits relate, or such lesser period of time as may be adopted and consistently used by the company.

421 Miscellaneous Nonoperating Income

This account shall include all revenue and expense items, except taxes properly includible in the income account, not provided for elsewhere. Related taxes shall be recorded in Account 408, Taxes Other Than Income Taxes, or Account 409.2, Income Taxes, Other Income and Deductions, as appropriate.

Items

1. Profit on sale of timber. (See §1767.16 (g)(3).)

2. Profits from operations of others realized by the utility under contracts.

3. Gains on disposition of investments. Also, gains on reacquisition and resale or retirement of the utility’s debt securities when the gain is not amortized or used by a jurisdictional regulatory agency to reduce embedded debt cost in establishing rates. (See §1767.15 (q).)

421.1 Gain on Disposition of Property

This account shall be credited with the gain on the sale, conveyance, exchange, or transfer of utility or other property to another. Amounts relating to gains on land and land rights held for future use recorded in Account 105, Electric Plant Held for Future Use, will be accounted for as prescribed in Paragraphs B, C, and D thereof. (See §1767.16 (e)(6), (g)(5), and (j)(5).) Income taxes on gains recorded in this account shall be recorded in Account 409.2, Income Taxes, Other Income and Deductions.

421.2 Loss on Disposition of Property

This account shall be charged with the loss on the sale, conveyance, exchange, or transfer of utility or other property to another. Amounts relating to losses on land and land rights held for future use recorded in Account 105, Electric Plant Held for Future Use, will be accounted for as prescribed in Paragraphs B, C, and D thereof. (See §1767.16 (e)(6), (g)(5), and (j)(5).) Income taxes on losses recorded in this account shall be recorded in Account 409.2, Income Taxes, Other Income and Deductions.
Rural Utilities Service, USDA

§ 1767.22

Use, will be accounted for as prescribed in Paragraphs B, C, and D thereof. (See §1767.16 (e)(6), (g)(5), and (j)(5).) The reduction in income taxes relating to losses recorded in this account shall be recorded in Account 499.2, Income Taxes, Other Income and Deductions.

422 Nonoperating Taxes

This account shall be charged with taxes relating to nonoperating income.

423 Generation and Transmission Cooperative Capital Credits

This account shall be credited with the annual capital furnished the power supply cooperative through payment of power bills. The amount of capital furnished the power supply cooperative should be recorded in the applicable year even though, in most cases, the power supplier’s notice of the allocation will not have been received until after the close of the year to which it relates.

424 Other Capital Credits and Patronage Capital Allocations

This account shall be credited with the capital furnished in connection with patronage of cooperative or mutual-type service organization such as CFC and other financing cooperatives, and insurance, oil product, telephone, and data processing cooperatives. This account should be credited in the year in which the notice of the capital credit or patronage capital allocation is received.

425 Miscellaneous Amortization

This account shall include amortization charges not includible in other accounts which are properly deductible in determining the income of the utility before interest charges. Charges includible herein, if significant in amount, must be in accordance with an orderly and systematic amortization program.

Items

1. Amortization of utility plant acquisition adjustments, or of intangibles included in utility plant in service when not authorized to be included in utility operating expenses by RUS.

2. Other miscellaneous amortization charges allowed to be included in this account by RUS.

426 [Reserved]

SPECIAL INSTRUCTIONS

Accounts 426.1, 426.2, 426.3, 426.4, and 426.5

These accounts shall include miscellaneous expense items which are nonoperating in nature but which are properly deductible before determining total income before interest charges.

NOTE: The classification of expenses as nonoperating and their inclusion in these accounts is for accounting purposes. It does not preclude RUS consideration of proof to the contrary for ratemaking or other purposes.

426.1 Donations

This account shall include all payments or donations for charitable, social, or community welfare purposes.

426.2 Life Insurance

This account shall include all payments for life insurance of officers and employees where the company is the beneficiary (net premiums less the increase in the cash surrender value of policies.)

426.3 Penalties

This account shall include payments by the company for penalties or fines for violation of any regulatory statutes by the company or its officials.

426.4 Expenditures for Certain Civic, Political, and Related Activities

This account shall include expenditures for the purpose of influencing public opinion with respect to the election or appointment of public officials, referenda, legislation, or ordinances (either with respect to the possible adoption of new referenda, legislation or ordinances or repeal or modification of existing referenda, legislation or ordinances) or approval, modification, or revocation of franchises; or for the purpose of influencing the decisions of public officials, but shall not include such expenditures which are directly related to appearances before regulatory or other governmental bodies in connection with the reporting utility’s existing or proposed operations.

426.5 Other Deductions

This account shall include other miscellaneous expenses which are nonoperating in nature, but which are properly deductible before determining total income before interest charges.

Items

1. Loss relating to investments in securities written-off or written-down.

2. Loss on sale of investments.

3. Loss on reacquisition, resale, or retirement of the utility’s debt securities, when the loss is not amortized and used by a jurisdictional regulatory agency to increase embedded debt cost in establishing rates. (See §1767.15 (q).)

4. Preliminary survey and investigation expenses related to abandoned projects, when not written-off to the appropriate operating expense account.

855
§ 1767.23 Interest charges.

The interest charges accounts identified in this section shall be used by all RUS borrowers.

Interest Charges

427 Interest on Long-Term Debt
427.3 Interest Charged to Construction—Credit
428 Amortization of Debt Discount and Expense
428.1 Amortization of Loss on Reacquired Debt
429 Amortization of Premium on Debt—Credit
429.1 Amortization of Gain on Reacquired Debt—Credit
430 Interest on Debt to Associated Companies
431 Other Interest Expense
432 Allowance for Borrowed Funds Used During Construction—Credit

Interest Charges

427 Interest on Long-Term Debt
A. This account shall include the amount of interest on outstanding long-term debt issued or assumed by the utility, the liability for which included in Account 221, Bonds, or Account 224, Other Long-Term Debt.
B. This account shall be so kept or supported as to show the interest accruals on each class and series of long-term debt.

Note: This account shall not include interest on nominally issued or nominally outstanding long-term debt, including securities assumed.

427.3 Interest Charged to Construction—Credit

This account shall include concurrent credits for interest charged to construction based upon the net cost for the period of construction of borrowed funds used for construction purposes.

428 Amortization of Debt Discount and Expense
A. This account shall include the amortization of unamortized debt discount and expense on outstanding long-term debt. Amounts charged to this account shall be credited concurrently to Account 181, Unamortized Debt Expense, and Account 226, Unamortized Discount on Long-Term Debt—Debit.

B. This account shall be so kept or supported as to show the debt discount and expense on each class and series of long-term debt.

428.1 Amortization of Loss on Reacquired Debt
A. This account shall include the amortization of the losses on reacquisition of debt. Amounts charged to this account shall be credited concurrently to Account 189, Unamortized Loss on Reacquired Debt.
B. This account shall be maintained so as to allow ready identification of the loss amortized applicable to each class and series of long-term debt reacquired. (See §1767.15 (q).)

429 Amortization of Premium on Debt—Credit
A. This account shall include the amortization of unamortized net premium on outstanding long-term debt. Amounts credited to this account shall be charged concurrently to Account 225, Unamortized Premium on Long-Term Debt.
B. This account shall be so kept or supported as to show the premium on each class and series of long-term debt.

429.1 Amortization of Gain on Reacquired Debt—Credit
A. This account shall include the amortization of gains realized from reacquisition of debt. Amounts credited to this account shall be charged concurrently to Account 257, Unamortized Gain on Reacquired Debt.
B. This account shall be maintained so as to allow ready identification of the amortized gains applicable to each class and series of long-term debt reacquired. (See §1767.15 (q).)

430 Interest on Debt to Associated Companies
A. This account shall include the interest accrued on amounts included in Account 223, Advances from Associated Companies, and on all other obligations to associated companies.
B. The records supporting the entries to this account shall be so kept as to show to whom the interest is to be paid, the period covered by the accrual, the rate of interest, and the principal amount of the advances or other obligations on which the interest is accrued.

431 Other Interest Expense
A. This account shall include interest charges not provided for elsewhere.

Items

1. Interest on notes payable on demand or maturing one year or less from date and on
open accounts, except notes and accounts with associated companies.
2. Interest on customers’ deposits.
3. Interest on claims and judgments, tax assessments, and assessments for public improvements past due.
4. Income and other taxes levied upon bondholders of the utility and assumed by it.
322 Allowance for Borrowed Funds Used During Construction—Credit
This account shall include concurrent credits for allowance for borrowed funds used during construction, not to exceed amounts computed in accordance with the formula prescribed in §1767.16 (c)(17).

§ 1767.24 Extraordinary items.
The extraordinary items accounts identified in this section shall be used by all RUS borrowers.

EXTRAORDINARY ITEMS
434 Extraordinary Income
435 Extraordinary Deductions
435.1 Cumulative Effect on Prior Years of a Change in Accounting Principle

EXTRAORDINARY ITEMS
434 Extraordinary Income
This account shall be credited with non-typical, noncustomary, infrequently recurring gains which would significantly distort the current year’s income computed before extraordinary items, if reported other than as extraordinary items. Income tax relating to the amounts recorded in this account shall be recorded in Account 409.3, Income Taxes, Extraordinary Items. (See §1767.15 (g).)

435 Extraordinary Deductions
This account shall be debited with nontypical, noncustomary, infrequently recurring losses which would significantly distort the current year’s income computed before extraordinary items, if reported other than as extraordinary items. Income tax relating to the amounts recorded in this account shall be recorded in Account 409.3, Income Taxes, Extraordinary Items. (See §1767.15 (f).)

435.1 Cumulative Effect on Prior Years of a Change in Accounting Principle
This account shall include the cumulative effect on margins of prior periods as a result of a change in accounting principle from one that is no longer generally accepted to one that is generally accepted.

§ 1767.25 Retained earnings.
The retained earnings accounts identified in this section shall be used by all RUS borrowers.

RETAINED EARNINGS
433–439 [Reserved]

RETAINED EARNINGS
433–439 [Reserved]

§ 1767.26 Operating revenue.
The operating revenue accounts identified in this section shall be used by all RUS borrowers.

OPERATING REVENUE
Sales of Electricity
440 Residential Sales
440.1 Residential Sales—Excluding Seasonal
440.2 Residential Sales—Seasonal
441 Irrigation Sales
442 Commercial and Industrial Sales
442.1 Commercial and Industrial Sales—1000 kVA or Less
442.2 Commercial and Industrial Sales—Over 1000 kVA
443 Public Street and Highway Lighting
445 Other Sales to Public Authorities
446 Sales to Railroads and Railways
447 Sales for Resale—Other
448 Interdepartmental Sales
449.1 Provision for Rate Refunds

Other Operating Revenues
450 Forfeited Discounts
451 Miscellaneous Service Revenues
453 Sales of Water and Water Power
454 Rent from Electric Property
455 Interdepartmental Rents
456 Other Electric Revenues

OPERATING REVENUE
Sales of Electricity
440 Residential Sales

A. This account shall include the net billing for electricity supplied for residential or domestic purposes.

NOTE: When electricity supplied through a single meter is used for both residential and commercial purposes, the total revenue shall be included in this account, or Account 442, Commercial and Industrial Sales, according to the rate schedule that is applied. If the same rate schedules apply to residential and commercial and industrial service, classification shall be made according to principal use.

B. Account 440 shall be subaccounted as follows:
§ 1767.26 7 CFR Ch. XVII (1–1–08 Edition)

440.1 Residential Sales—Excluding Seasonal

440.2 Residential Sales—Seasonal

440.1 Residential Sales—Excluding Seasonal

A. This account shall include the net billing for electricity supplied for residential and domestic purposes.

B. This account shall also include net billings for single phase service to schools, churches, lodges, and other public buildings.

C. Records shall be maintained so that the quantity of electricity sold and the revenue received under each rate schedule shall be readily available.

NOTE: Net billings for multiphase service to schools, churches, lodges, and other public buildings shall be included in the appropriate subaccount of Account 442, Commercial and Industrial Sales.

440.2 Residential Sales—Seasonal

This account shall include the net billings for electricity supplied for residential and domestic purposes to seasonal consumers.

441 Irrigation Sales

This account shall include the net billings for electricity supplied for irrigation pumping. It need not be used unless such service is provided under a special irrigation rate.

442 Commercial and Industrial Sales

A. This account shall include the net billing for electricity supplied to customers for commercial and industrial purposes.

NOTE A: If the utility classifies large commercial and industrial customers and related revenues on a lesser basis than 1000 kilowatts of demand, or segregates industrial customers and related revenues according to a recognized definition of an industrial customer, such classifications are acceptable in lieu of those otherwise required by the text of this account on the basis of 1000 kilowatts of demand.

NOTE B: When electricity supplied through a single meter is used for both commercial and residential purposes, the total revenue shall be included in this account, or Account 440, Residential Sales, according to the rate schedule that is applied. If the same rate schedules apply to residential and commercial and industrial service, classification shall be made according to principal use.

B. Account 442 shall be subaccounted as follows:

442.1 Commercial and Industrial Sales—1000 kVA or Less

442.2 Commercial and Industrial Sales—Over 1000 kVA

442.1 Commercial and Industrial Sales—1000 kVA or Less

A. This account shall include the net billing for electricity supplied to consumers for commercial and industrial purposes requiring transformer capacity of 1000 kVA or less.

B. Records shall be maintained so that the quantity of electricity sold and the revenue received under each rate schedule shall be readily available.

NOTE: When electricity supplied through a single meter is used for both commercial and residential purposes, the total revenue shall be included in this account or in Account 440, Residential Sales, based upon primary use.

442.2 Commercial and Industrial Sales—Over 1000 kVA

A. This account shall include the net billing for electricity supplied to consumers for commercial and industrial purposes requiring transformer capacity in excess of 1000 kVA.

B. Records shall be maintained so that the quantity of electricity sold and the revenue received under each rate schedule shall be readily available.

444 Public Street and Highway Lighting

A. This account shall include the net billing for electricity supplied and services rendered for the purposes of lighting streets, highways, parks, and other public places or for traffic or signal system service, for municipalities or other divisions or agencies of state of Federal Governments.

B. Records shall be maintained so that the quantity of electricity sold and the revenue received from each customer shall be readily available. In addition, the records shall be maintained so as to show the revenues from (1) contracts which include both electricity and services, and (2) contracts which include sales of electricity only.

445 Other Sales to Public Authorities

A. This account shall include the net billing for electricity supplied to municipalities or divisions or agencies of Federal or state governments, under special contracts or agreements or service classifications applicable only to public authorities, except such revenues as are includible in Account 444 and Account 447.

B. Records shall be maintained so as to show the quantity of electricity sold and the revenues received from each customer.

446 Sales to Railroads and Railways

A. This account shall include the net billing for electricity supplied to railroads and interurban and street railways, for general railroad use, including the propulsion of cars or locomotives, where such electricity is supplied under separate and distinct rate schedules.

B. Records shall be maintained so that the quantity of electricity sold and the revenue
received from each customer shall be readily available.

Note: Revenues from incidental use of electricity furnished under a contract for propulsion of cars or locomotives shall be included herein.

447 Sales for Resale
A. This account shall include the net billing for electricity supplied to other electric utilities or to public authorities for resale purposes.

Note: Revenues from electricity supplied to other utilities for use by them and not for distribution, shall be included in Account 442, Commercial and Industrial Sales, unless supplied under the same contracts as and not readily separable from revenues includable in this account.

B. Account 447 shall be subaccounted as follows:

447.1 Sales for Resale—RUS Borrowers
447.2 Sales for Resale—Other

447.1 Sales for Resale—RUS Borrowers
A. This account shall include the net billing for electricity supplied to RUS borrowers for resale.

B. Records shall be maintained so as to show the quantity of electricity sold and the revenue received from each customer.

Note: Revenues from electricity supplied to other utilities for use by them and not for distribution, shall be included in Account 442, Commercial and Industrial Sales, unless supplied under the same contract as and not readily separable from revenues includable in this account.

447.2 Sales for Resale—Other
A. This account shall include the net billing for electricity supplied to utilities not financed by RUS.

B. Records shall be maintained so as to show the quantity of electricity sold and the revenue received from each customer.

Note: Revenues from electricity supplied to other utilities for use by them and not for distribution, shall be included in Account 442, Commercial and Industrial Sales, unless supplied under the same contract as and not readily separable from revenues includable in this account.

448 Interdepartmental Sales
A. This account shall include amounts charged by the electric department at tariff or other specified rates for electricity supplied by it to other utility departments.

B. Records shall be maintained so that the quantity of electricity supplied each other department and the charges therefor shall be readily available.

449.1 Provision for Rate Refunds
A. This account shall be charged with provisions for the estimated pretax effects on net income of the portions of amounts being collected subject to refund which are estimated to be required to be refunded. Such provisions shall be credited to Account 229, Accumulated Provision for Rate Refunds.

B. This account shall also be charged with amounts refunded when such amounts had not been previously accrued.

C. Income tax effects relating to the amounts recorded in this account shall be recorded in Account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, or Account 411.1, Provision for Deferred Income Taxes—Credit, Utility Operating Income, as appropriate.

Other Operating Revenues

450 Forfeited Discounts
This account shall include the amount of discounts forfeited or additional charges imposed because of the failure of customers to pay their electric bills on or before a specified date.

451 Miscellaneous Service Revenues
This account shall include revenues for all miscellaneous services and charges billed to customers which are not specifically provided for in other accounts.

Items

1. Fees for changing, connecting, or disconnecting service.

2. Profit on maintenance of appliances, wiring, piping, or other installations on customers' premises.

3. Net credit or debit (cost less net salvage and less payment from customers) on closing of work orders for plant installed for temporary service of less than one year. (See Account 185, Temporary Facilities.)

4. Recovery of expenses in connection with current diversion cases (billing for the electricity consumed shall be included in the appropriate electric revenue account).

453 Sales of Water and Water Power
A. This account shall include revenues derived from the sale of water for irrigation, domestic, industrial, or other uses or for the development by others of water power or for headwater benefits; also, revenues derived from furnishing water power for mechanical purposes when the investment in the property used in supplying such water or water power is carried as electric plant in service.

B. The records for this account shall be kept in such manner as to permit an analysis of the rates charged and the purposes for which the water was used.
§ 1767.27

Rent from Electric Property

A. This account shall include rents received for the use by others of land, buildings, and other property devoted to electric operations by the utility.

B. When property owned by the utility is operated jointly with others under a definite arrangement for apportioning the actual expenses among the parties to the arrangement, any amount received by the utility for interest or return or in reimbursement of taxes or depreciation on the property shall be credited to this account.

Note: Do not include in this account rents from property constituting an operating unit or system. (See Account 412, Revenues from Electric Plant Leased to Others.)

455 Interdepartmental Rents

This account shall include rents credited to the electric department on account of rental charges made against other departments (gas, water, etc.) of the utility. In the case of property operated under a definite arrangement to allocate the costs among the departments using the property, any reimbursement to the electric department for interest or return and depreciation and taxes shall be credited to this account.

456 Other Electric Revenues

This account shall include revenues derived from electric operations not includible in any of the foregoing accounts. It shall also include, in a separate subaccount, revenues received from operation of fish and wildlife and recreation facilities whether operated by the company or by contract concessionaires, such as revenues from leases or rentals of land for cottages, homes, or campsites.

Items

1. Commission on sale or distribution of electricity of others when sold under rates filed by such others.
2. Compensation for minor or incidental services provided for others such as customer billing, and engineering.
3. Profit or loss on the sale of material and supplies not ordinarily purchased for resale and not handled through merchandising and jobbing accounts.
4. Sale of steam, but not including sales made by a steamheating department or transfers of steam under joint facility operations.
5. Revenues from transmission of electricity of others over transmission facilities of the utility.
6. Include in a separate subaccount, revenues in payment for rights and/or benefits received from others which are realized through research, development, and demonstration ventures. In the event the amounts received are so large as to distort revenues for the year in which received (5 percent of net income before application of the benefit), the amounts shall be credited to Account 253, Other Deferred Credits, and amortized by credits to this account over a period not to exceed 5 years.

§ 1767.27 Operation and maintenance expenses.

The operation and maintenance expense accounts identified in this section shall be used by all RUS borrowers.

POWER PRODUCTION EXPENSES

- 596 Maintenance of Street Lighting and Signal Systems
- 597 Maintenance of Meters
- 598 Maintenance of Miscellaneous Distribution Plant

### Operation and Maintenance Expense Accounts

### Power Production Expenses

**Steam Power Generation**

**Operation**
- 500 Operation Supervision and Engineering

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, and expenses incurred in the general supervision and direction of the operation of steam power generating stations. Direct supervision of specific activities, such as fuel handling, boiler-room operations, and generator operations shall be charged to the appropriate account. (See §1767.17(a).)

- 501 Fuel

A. This account shall include the cost of fuel used in the production of steam for the generation of electricity, including expenses in unloading fuel from the shipping media and handling thereof up to the point where the fuel enters the first boiler plant bunker, hopper, bucket, tank, or holder of the boiler-house structure. Records shall be maintained to show the quantity, B.t.u. content and cost of each type of fuel used.

B. The cost of fuel shall be charged initially to Account 151, Fuel Stock, and cleared to this account on the basis of the fuel used. Fuel handling expenses may be charged to this account as incurred or charged initially to Account 152, Fuel Stock.
Expenses Undistributed. In the latter event, they shall be cleared to this account on the basis of the fuel used. Respective amounts of fuel stock and fuel stock expenses shall be readily available.

Items

Labor:
1. Supervising, purchasing, and handling of fuel.
2. All routine fuel analyses.
3. Unloading from shipping facility and placing in storage.
4. Moving of fuel in storage and transferring fuel from one station to another.
5. Handling from storage or shipping facility to first bunker, hopper, bucket, tank, or holder of boiler-house structure.
6. Operation of mechanical equipment, such as locomotives, trucks, cars, boats, barges, and cranes.

Taxes:
1. Federal and state unemployment. 
2. F.I.C.A. 
3. Property.

Employee Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees’ labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:
1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.

Insurance:
1. Premiums payable to insurance companies for fire, storm, burglary, boiler explosion, lightning, fidelity, riot, and similar insurance.
2. Amounts credited to Account 228.1, Accumulated Provision for Property Insurance, for similar protection.
3. Special costs incurred in procuring insurance.
4. Insurance inspection service.
5. Insurance counsel, brokerage fees, and expenses.
6. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
7. Losses not covered by insurance or reserved accruals on account of injuries or deaths to employees or others and damages to the property of others.
8. Fees and expenses of claim investigators.
9. Payment of awards to claimants for court costs and attorneys’ services.
10. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.
11. Compensation payments under workmen’s compensation laws.
12. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)
13. Cost of safety, accident prevention, and similar educational activities.

Materials and Expenses:
1. Operating, maintenance, and depreciation expenses and ad valorem taxes on utility-owned transportation equipment used to transport fuel from the point of acquisition to the unloading point.
2. Lease or rental costs of transportation equipment used to transport fuel from the point of acquisition to the unloading point.
3. Cost of fuel including freight, switching, demurrage, and other transportation charges.
4. Excise taxes, insurance, purchasing commissions, and similar items.
5. Stores expenses to extent applicable to fuel.
6. Transportation and other expenses in moving fuel in storage.
7. Tools, lubricants, and other supplies.
8. Operating supplies for mechanical equipment.
9. Residual disposal expenses less any proceeds from sale of residuals.

NOTE: Abnormal fuel handling expenses occasioned by emergency conditions shall be charged to expense as incurred.

502 Steam Expenses
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, property insurance, property taxes, materials used, and expenses incurred in production of steam for electric generation. This includes all expenses of handling and preparing fuel beginning at the point where the fuel enters the first boiler plant bunker,
hopper, tank, or holder of the boiler-house structure.

**Items**

**Labor:**
1. Supervising steam production.
2. Operating fuel conveying, storage, weighing, and processing equipment within boiler plant.
3. Operating boiler and boiler auxiliary equipment.
4. Operating boiler feed water purification and treatment equipment.
5. Operating ash-collecting and disposal equipment located inside the plant.
6. Operating boiler plant electrical equipment.
7. Keeping boiler plant log and records and preparing reports on boiler plant operations.
8. Testing boiler water.
9. Testing, checking, and adjusting meters, gauges, and other instruments and equipment in boiler plant.
10. Cleaning boiler plant equipment when not incidental to maintenance work.
11. Repacking glands and replacing gauge glasses where the work involved is of a minor nature and is performed by regular operating crews. Where the work is of a major character, such as that performed on high-pressure boilers, the item should be considered as maintenance.

**Taxes:**
1. Federal and state unemployment.
2. F.I.C.A.
3. Property.

**Employee Pensions and Benefits:** The portion of employee pensions and benefits specifically identifiable with employees’ labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:
1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.

**Insurance:**
1. Premiums payable to insurance companies for fire, storm, burglary, boiler explosion, lightning, fidelity, riot, and similar insurance.
2. Amounts credited to Account 228.1, Accumulated Provision for Property Insurance, for similar protection.
3. Special costs incurred in procuring insurance.
4. Insurance inspection service.
5. Insurance counsel, brokerage fees, and expenses.
6. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
7. Losses not covered by insurance or reserved accruals on account of injuries or deaths to employees or others and damages to the property of others.
8. Fees and expenses of claim investigators.
9. Payment of awards to claimants for court costs and attorneys’ services.
10. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.
11. Compensation payments under workmen’s compensation laws.
12. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)
13. Cost of safety, accident prevention, and similar educational activities.

**Materials and Expenses:**
1. Chemicals and boiler inspection fees.
2. Lubricants.
3. Boiler feed water purchased and pumping supplies.

503 Steam from Other Sources

This account shall include the cost of steam purchased or transferred from another department of the utility or from others under a joint facility operating arrangement for use in prime movers devoted to the production of electricity.

**Note:** The records shall be so kept as to show separately for each company from which steam is purchased, the point of delivery, the quantity, the price, and the total charge. When steam is transferred from another department or from others under a joint operating arrangement, the utility shall be prepared to show full details of the cost of producing such steam, the basis of the charge to electric generation, and the extent and manner of use by each department or party involved.
§ 1767.27

504 Steam Transferred—Credit

A. This account shall include credits for expenses of producing steam which are charged to others or to other utility departments under a joint operating arrangement. Include also credits for steam expenses chargeable to other electric accounts outside of the steam generation group. Full details of the basis of determination of the cost of steam transferred shall be maintained.

B. If the charges to others or to other departments of the utility include an amount for depreciation, taxes, and return on the joint steam facilities, such portion of the charge shall be credited, in the case of others, to Account 454, Rent from Electric Property, and in the case of other departments of the utility, to Account 455, Interdepartmental Rents.

505 Electric Expenses

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, property insurance, property taxes, and materials used, and expenses incurred in operating prime movers, generators, and their auxiliary apparatus, switch gear, and other electric equipment to the points where electricity leaves for conversion for transmission or distribution.

Items

Labor:
1. Supervising electric production.
2. Operating turbines, engines, generators, and exciters.
3. Operating condensers, circulating water systems, and other auxiliary apparatus.
4. Operating generator cooling system.
5. Operating lubrication and oil control system, including oil purification.
6. Operating switchboards, switch gear and electric control, and protective equipment.
7. Keeping electric plant log and records and preparing reports on electric plant operations.
8. Testing, checking, and adjusting meters, gauges, and other instruments, relays, controls, and other equipment in the electric plant.
9. Cleaning electric plant equipment when not incidental to maintenance work.
10. Repacking glands and replacing gauge glasses.

Taxes:
1. Federal and state unemployment.
2. F.I.C.A.
3. Taxes.

Employee Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees’ labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:
1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.

Insurance:
1. Premiums payable to insurance companies for fire, storm, burglary, boiler explosion, lightning, fidelity, riot, and similar insurance.
2. Amounts credited to Account 228.1, Accumulated Provision for Property Insurance, for similar protection.
3. Special costs incurred in procuring insurance.
4. Insurance inspection service.
5. Insurance counsel, brokerage fees, and expenses.
6. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
7. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.
8. Fees and expenses of claim investigators.
9. Payment of awards to claimants for court costs and attorneys’ services.
10. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.
12. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)
13. Cost of safety, accident prevention, and similar educational activities.

Materials and Expenses:
1. Lubricants and control system oils.
2. Generator cooling gases.
3. Circulating water purification supplies.
5. Motor and generator brushes.

**§ 1767.27**

506 Miscellaneous Steam Power Expenses

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, and materials used and expenses incurred which are not specifically provided for or not readily assignable to other steam generation operation expense accounts.

*Items*

**Labor:**
1. General clerical and stenographic work.
2. Guarding and patrolling plant and yard.
3. Building service.
4. Care of grounds including snow removal, and grass cutting.
5. Miscellaneous labor.

**Taxes:**
1. Federal and state unemployment.
2. F.I.C.A.

**Employee Pensions and Benefits:** The portion of employee pensions and benefits specifically identifiable with employees' labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:
1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.

**Insurance:**
1. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
2. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.
3. Fees and expenses of claim investigators.
4. Payment of awards to claimants for court costs and attorneys' services.
5. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.
7. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)
8. Cost of safety, accident prevention, and similar educational activities.

**Materials and Expenses:**
1. General operating supplies, such as tools, gaskets, packing waste, gauge glasses, hose, indicating lamps, record and report forms.
2. First-aid supplies and safety equipment.
3. Employees' service facilities expenses.
4. Building service supplies.
5. Communication service.
7. Transportation expenses.
8. Meals, traveling, and incidental expenses.
9. Research, development, and demonstration expenses.

**507 Rents**

This account shall include all rents of property of others used, occupied or operated in connection with steam power generation. (See §1767.17 (c).)

**509 Allowances**

This account shall include the cost of allowances expensed concurrent with the monthly emission of sulfur dioxide. (See §1767.15 (u).)

**510 Maintenance Supervision and Engineering**

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, and expenses incurred in the general supervision and direction of maintenance of steam generation facilities. Direct field supervision of specific jobs shall be charged to the appropriate maintenance account. (See §1767.17(a).)

**511 Maintenance of Structures**

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, and materials used and expenses incurred in the maintenance of steam structures, the book cost of which is includible in Account 311, Structures and Improvements. (See §1767.17(b).)
§ 1767.27

512 Maintenance of Boiler Plant

A. This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, and materials used and expenses incurred in the maintenance of steam plant, the book cost of which is includible in Account 312, Boiler Plant Equipment. (See §1767.17(b).)

B. For the purpose of making charges here-to and to Account 513, Maintenance of Electric Plant, the point at which steam plant is distinguished from electric plant is defined as follows:

1. Inlet flange of throttle valve on prime mover.
2. Flange of all steam extraction lines on prime mover.
3. Hotwell pump outlet on condensate lines.
4. Inlet flange of all turbine-room auxiliaries.
5. Connection to line side of motor starter for all boiler-plant equipment.

513 Maintenance of Electric Plant

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, and materials used and expenses incurred in the maintenance of electric plant, the book cost of which is includible in Account 313, Engines and Engine-Driven Generators; Account 314, Turbogenerator Units; and Account 315, Accessory Electric Equipment. (See §1767.17(b) and Paragraph B of Account 512.)

514 Maintenance of Miscellaneous Steam Plant

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, and materials used and expenses incurred in maintenance of miscellaneous steam generation plant, the book cost of which is includible in Account 316, Miscellaneous Power Plant Equipment. (See §1767.17(b).)

517 Operation Supervision and Engineering

518 Nuclear Fuel Expense

A. This account shall be debited and Account 120.5, Accumulated Provision for Amortization of Nuclear Fuel Assemblies, credited for the amortization of the net cost of nuclear fuel assemblies used in the production of energy. The net cost of nuclear fuel assemblies subject to amortization shall be the cost of nuclear fuel assemblies plus or less the expected net salvage of uranium, plutonium, and other byproducts and unburned fuel. The utility shall adopt the necessary procedures to assure that charges to this account are distributed according to the thermal energy produced in such periods.

B. This account shall also include the costs involved when fuel is leased.

C. This account shall also include the cost of other fuels, used for ancillary steam facilities, including superheat.

D. This account shall be debited or credited as appropriate for significant changes in the amounts estimated as the net salvage value of uranium, plutonium, and other byproducts contained in Account 157. Nuclear Materials Held for Sale, and the amount realized upon the final disposition of the materials. Significant declines in the estimated realizaiton value of items carried in Account 157 may be recognized at the time of market price declines by charging this account and crediting Account 157. When the declining change occurs while the fuel is recorded in Account 120.3, Nuclear Fuel Assemblies in Reactor, the effect shall be amortized over the remaining life of the fuel.

519 Coolants and Water

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, property insurance, property taxes, and materials used and expenses incurred for heat transfer materials and water used for steam and cooling purposes.

**Items**

**Labor:**

1. Operation of water supply facilities.
2. Handling of coolants and heat transfer materials.

**Taxes:**

1. Federal and state unemployment.
2. F.I.C.A.
3. Taxes.

**Employee Pensions and Benefits:** The portion of employee pensions and benefits specifically identifiable with employees' labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:
1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.

**Insurance:**
1. Premiums payable to insurance companies for fire, storm, burglary, boiler explosion, lightning, fidelity, riot, and similar insurance.
2. Amounts credited to Account 228.1, Accumulated Provision for Property Insurance, for similar protection.
3. Special costs incurred in procuring insurance.
4. Insurance inspection service.
5. Insurance counsel, brokerage fees, and expenses.
6. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
7. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.
8. Fees and expenses of claim investigators.
9. Payment of awards to claimants for court costs and attorneys’ services.
10. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.
11. Compensation payments under workmen’s compensation laws.
12. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)
13. Cost of safety, accident prevention, and similar educational activities.

**Materials and Expenses:**
1. Chemicals.
2. Additions to or refining of fluids used in reactor systems.
3. Lubricants.
4. Pumping supplies and expenses.
5. Miscellaneous supplies and expenses.
6. Purchased water.

Note: Do not include in this account water for general station use or the initial charge for coolants, heat transfer, or moderator fluids, chemicals, or other supplies capitalized.

520 Steam Expenses
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, property insurance, property taxes, and materials used and expenses incurred in production of steam through nuclear processes, and similar expenses for operation of any auxiliary superheat facilities.

**Items**

**Labor:**
1. Supervising steam production.
2. Fuel handling including removal, insertion, disassembly, and preparation for cooling operations and shipment.
3. Testing instruments and gauges.
4. Health, safety, monitoring, and decontamination activities.
5. Waste disposal.
6. Operating steam boilers and auxiliary steam, superheat facilities.

**Taxes:**
1. Federal and state unemployment.
2. F.I.C.A.
3. Property.

**Employee Pensions and Benefits:** The portion of employee pensions and benefits specifically identifiable with employees’ labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:

1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.

**Insurance:**
1. Premiums payable to insurance companies for fire, storm, burglary, boiler explosion, lightning, fidelity, riot, and similar insurance.
2. Amounts credited to Account 228.1, Accumulated Provision for Property Insurance, for similar protection.
3. Special costs incurred in procuring insurance.
4. Insurance inspection service.
5. Insurance counsel, brokerage fees, and expenses.
6. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
7. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.
8. Fees and expenses of claim investigators.
9. Payment of awards to claimants for court costs and attorneys' services.
10. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.
12. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)
13. Cost of safety, accident prevention, and similar educational activities.

Materials and Expenses:
1. Chemical supplies.
2. Charts and logs.
3. Health, safety, monitoring, and decontamination supplies.
4. Boiler inspection fees.
5. Lubricants.

521 Steam from Other Sources
This account shall include the cost of steam purchased or transferred from another department of the utility or from others under a joint facility operating arrangement for use in prime movers devoted to the production of electricity.

NOTE: The records shall be so kept as to show separately for each company from which steam is purchased, the point of delivery, the quantity, the price, and the total charge. When steam is transferred from another operating department, the utility shall be prepared to show full details of the cost of producing such steam, the basis of the charges to electric generation, and the extent and manner of use by each department involved.

522 Steam Transferred—Credit
A. This account shall include credits for expenses of producing steam which are charged to others or to other utility departments under a joint operating arrangement. Include also credits for steam expenses chargeable to other electric accounts outside of the steam generation group. Full details of the basis of determination of the cost of steam transferred shall be maintained.
B. If the charges to others or to other departments of the utility include an amount for depreciation, taxes, and return on the joint steam facilities, such portion of the charge shall be credited in the case of others, to Account 454, Rent from Electric Property, and in the case of other departments of the utility, to Account 455, Interdepartmental Rents.

523 Electric Expenses
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, property insurance, property taxes, materials used, and expenses incurred in operating turbogenerators, steam turbines and their auxiliary apparatus, switch gear, and other electric equipment to the points where electricity leaves for conversion for transmission or distribution.

Items

Labor:
1. Supervising electric production.
2. Operating turbines, engines, generators, and exciters.
3. Operating condensers, circulating water systems, and other auxiliary apparatus.
4. Operating generator cooling system.
5. Operating lubrication and oil control system, including oil purification.
6. Operating switchboards, switch gear, and electric control and protective equipment.
7. Keeping plant log and records and preparing reports on electric plant operations.
8. Testing, checking and adjusting meters, gauges, and other instruments, relays, controls, and other equipment in the electric plant.
9. Cleaning electric plant equipment when not incidental to maintenance.
10. Repacking glands and replacing gauge glasses.

Taxes:
1. Federal and state unemployment.
2. F.I.C.A.
3. Property

Employees Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees' labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:
1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
5. Expenses in connection with educational and recreational activities for the benefit of employees.

Insurance:
1. Premiums payable to insurance companies for fire, storm, burglary, boiler explosion, lightning, fidelity, riot, and similar insurance.
2. Amounts credited to Account 228.1, Accumulated Provision for Property Insurance, for similar protection.
3. Special costs incurred in procuring insurance.
4. Insurance inspection service.
5. Insurance counsel, brokerage fees, and expenses.
6. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
7. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.
8. Fees and expenses of claim investigators.
9. Payment of awards to claimants for court costs and attorneys’ services.
10. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.
11. Compensation payments under workmen’s compensation laws.
12. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)
13. Cost of safety, accident prevention, and similar educational activities.

Materials and Expenses:
1. Lubricants and control system oils.
2. Generator cooling gases.
3. Log sheets and charts.
4. Motor and generator brushes.

524 Miscellaneous Nuclear Power Expenses
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials used, and expenses incurred which are not specifically provided for or are not readily assignable to other nuclear generation operation accounts.

Items

Labor:
1. General clerical and stenographic work.
2. Plant security.
3. Building service.
4. Care of grounds, including snow removal, and grass cutting.
5. Miscellaneous labor.

Taxes:
1. Federal and state unemployment.
2. F.I.C.A.

Employee Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees’ labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:
1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.

Insurance:
1. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
2. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.
3. Fees and expenses of claim investigators.
4. Payment of awards to claimants for court costs and attorneys’ services.
5. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.
6. Compensation payments under workmen’s compensation laws.
7. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)

8. Cost of safety, accident prevention, and similar educational activities.

Materials and Expenses:
1. General operating supplies, such as tools, gaskets, hose, indicating lamps, records and reports forms.
2. First-aid supplies and safety equipment.
3. Employees’ service facilities expenses.
4. Building service supplies.
5. Communication service.
6. Miscellaneous office supplies and expenses, printing and stationery.
7. Transportation expenses.
8. Meals, traveling, and incidental expenses.
9. Research, development, and demonstration expenses.

525 Rents
This account shall include all rents of property of others used, occupied, or operated in connection with nuclear generation. (See §1767.17(c).)

(Maintenance)

526 Maintenance Supervision and Engineering
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, and expenses incurred in the general supervision and direction of maintenance of nuclear generation facilities. Direct field supervision of specific jobs shall be charged to the appropriate maintenance account. (See §1767.17(a).)

529 Maintenance of Structures
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials used, and expenses incurred in the maintenance of structures, the book cost of which is includible in Account 321, Structures and Improvements. (See §1767.17(b).)

530 Maintenance of Reactor Plant Equipment
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials used, and expenses incurred in the maintenance of reactor plant, the book cost of which is includible in Account 322, Reactor Plant Equipment. (See §1767.17(b).)

531 Maintenance of Electric Plant
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials used, and expenses incurred in the maintenance of electric plant, the book cost of which is includible in Account 323, Turbogenerator Units, and Account 324, Accessory Electric Equipment. (See §1767.17(b).)

532 Maintenance of Miscellaneous Nuclear Plant
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials used, and expenses incurred in maintenance of miscellaneous nuclear generating plant, the book cost of which is includible in Account 325, Miscellaneous Power Plant Equipment. (See §1767.17(b).)

Hydraulic Power Generation
(Operation)

535 Operation Supervision and Engineering
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, and expenses incurred in the general supervision and direction of the operation of hydraulic power generating stations. Direct supervision of specific activities, such as hydraulic operation, and generator operation shall be charged to the appropriate account. (See §1767.17(a).)

536 Water for Power
This account shall include the cost of water used for hydraulic power generation.

Items
1. Cost of water purchased from others, including water tolls paid reservoir companies.
2. Periodic payments for licenses or permits from any governmental agency for water rights, or payments based on the use of the water.
3. Periodic payments for riparian rights.
4. Periodic payments for headwater benefits or for detriments to others.
5. Cloud seeding.

537 Hydraulic Expenses
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, property insurance, property taxes, materials used, and expenses incurred in operating hydraulic works including reservoirs, dams, and waterways, and in activities directly relating to the hydroelectric development outside the generating station. It shall also include the cost of labor, materials used, and other expenses incurred in connection with the operation of (1) fish and wildlife, and (2) recreation facilities. Separate
subaccounts shall be maintained for each of the above.

Items

Labor:
1. Supervising hydraulic operation.
2. Removing debris and ice from trash racks, reservoirs, and waterways.
3. Patrolling reservoirs and waterways.
4. Operating intakes, spillways, sluiceways, and outlet works.
5. Operating bubbler, heater, or other deicing systems.
6. Ice and log jam work.
7. Operating navigation facilities.
8. Operations relating to conservation of game, fish, and forests.
9. Insect control activities.

Taxes:
1. Federal and state unemployment.
2. F.I.C.A.
3. Property.

Employee Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees’ labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:
1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.

Insurance:
1. Premiums payable to insurance companies for fire, storm, burglary, boiler explosion, lightning, fidelity, riot, and similar insurance.
2. Amounts credited to Account 228.1, Accumulated Provision for Property Insurance, for similar protection.
3. Special costs incurred in procuring insurance.
4. Insurance inspection service.
5. Insurance counsel, brokerage fees, and expenses.
6. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
7. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.
8. Fees and expenses of claim investigators.
9. Payment of awards to claimants for court costs and attorneys’ services.
10. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.
12. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)
13. Cost of safety, accident prevention, and similar educational activities.

Materials and Expenses:
1. Insect control materials.
2. Lubricants, packing, and other supplies used in the operation of hydraulic equipment.
3. Transportation expense.

538 Electric Expenses

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, property insurance, property taxes, materials used, and expenses incurred in operating prime movers, generators, and their auxiliary apparatus, switchgear, and other electric equipment, to the point where electricity leaves for conversion for transmission or distribution.

Items

Labor:
1. Supervising electric production.
2. Operating prime movers, generators, and auxiliary equipment.
3. Operating generator cooling system.
4. Operating lubrication and oil control systems, including oil purification.
5. Operating switchboards, switchgear, and electric control and protection equipment.
6. Keeping plant log and records and preparing reports on plant operations.
7. Testing, checking and adjusting meters, gauges, and other instruments, relays, controls, and other equipment in the plant.
8. Cleaning plant equipment when not incidental to maintenance work.

Taxes:
1. Federal and state unemployment.
2. F.I.C.A.
3. Property.
Employee Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees’ labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:

1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.

Insurance:
1. Premiums payable to insurance companies for fire, storm, burglary, boiler explosion, lightning, fidelity, riot, and similar insurance.
2. Amounts credited to Account 228.1, Accumulated Provision for Property Insurance, for similar protection.
3. Special costs incurred in procuring insurance.
4. Insurance inspection service.
5. Insurance counsel, brokerage fees, and expenses.
6. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
7. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.
8. Fees and expenses of claim investigators.
9. Payment of awards to claimants for court costs and attorneys’ services.
10. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.
11. Compensation payments under workmen’s compensation laws.
12. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)

Materials and Expenses:
1. Lubricants and control system oils.
2. Motor and generator brushes.

Miscellaneous Hydraulic Power Generation Expenses
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials used, and expenses incurred which are not specifically provided for or are not readily assignable to other hydraulic generation operation expense accounts.

Items

Labor:
1. General clerical and stenographic work.
2. Guarding and patrolling plant and yard.
3. Building service.
4. Care of grounds including snow removal, and grass cutting.
5. Snow removal from roads and bridges.
6. Miscellaneous labor.

Taxes:
1. Federal and state unemployment.
2. F.I.C.A.

Employee Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees’ labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:

1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.

Insurance:
1. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and
amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.

2. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.

3. Fees and expenses of claim investigators.

4. Payment of awards to claimants for court costs and attorneys’ services.

5. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.

6. Compensation payments under workmen’s compensation laws.

7. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)

8. Cost of safety, accident prevention, and similar educational activities.

Materials and Expenses:

1. General operating supplies, such as tools, gaskets, packing, waste, hose, indicating lamps, record and report forms.

2. First-aid supplies and safety equipment.

3. Employees’ service facilities expenses.

4. Building service supplies.

5. Communication service.

6. Office supplies, printing and stationery.

7. Transportation expenses.

9. Meals, traveling, and incidental expenses.

10. Research, development, and demonstration expenses.

540 Rents

This account shall include all rents of property of others used, occupied, or operated in connection with hydraulic power generation, including amounts payable to the United States for the occupancy of public lands and reservations for reservoirs, dams, flumes, forebays, penstocks, and power houses but not including transmission right-of-way. (See §1767.17 (c).)

(Maintenance)

541 Maintenance Supervision and Engineering

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials used, and expenses incurred in maintenance of hydraulic structures, the book cost of which is includible in Account 331, Structures and Improvements. (See §1767.17 (b).) However, the cost of labor, materials used, and expenses incurred in the maintenance of fish and wildlife and recreation facilities, the book cost of which is includible in Account 331, Structures and Improvements, shall be charged to Account 545, Maintenance of Miscellaneous Hydraulic Plant.

543 Maintenance of Reservoirs, Dams, and Waterways

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials used, and expenses incurred in maintenance of plant includable in Account 332, Reservoirs, Dams, and Waterways. (See §1767.17(b).) However, the cost of labor, materials used, and expenses incurred in the maintenance of fish and wildlife and recreation facilities, the book cost of which is includible in Account 332, Reservoirs, Dams, and Waterways, shall be charged to Account 545, Maintenance of Miscellaneous Hydraulic Plant.

544 Maintenance of Electric Plant

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials used, and expenses incurred in maintenance of plant includible in Account 333, Water Wheels, Turbines and Generators, and Account 334, Accessory Electric Equipment. (See §1767.17(b).)

545 Maintenance of Miscellaneous Hydraulic Plant

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials used, and expenses incurred in maintenance of plant, the book cost of which is includible in Account 335, Miscellaneous Power Plant Equipment, and Account 336, Roads Railroads and Bridges. (See §1767.17(b).) It shall also include the cost of labor, materials used, and other expenses incurred in the maintenance of (1) fish and wildlife, and (2) recreation facilities. Separate subaccounts shall be maintained for each of the above.

Other Power Generation

(Repair)

546 Operation Supervision and Engineering

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and
§ 1767.27

7 CFR Ch. XVII (1–1–08 Edition)

Damages, and expenses incurred in the general supervision and direction of the operation of other power generating stations. Direct supervision of specific activities, such as fuel handling and engine and generator operation shall be charged to the appropriate account. (See §1767.17(a).)

547 Fuel

This account shall include the cost delivered at the station (See Account 151, Fuel Stock) of all fuel, such as gas, oil, kerosene, and gasoline used in other power generation.

548 Generation Expenses

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, property insurance, property taxes, materials used, and expenses incurred in operating prime movers, generators, and electric equipment in other power generating stations, to the point where electricity leaves for conversion for transmission or distribution.

Items

Labor:

1. Supervising other power generation operation.
2. Operating prime movers, generators, and auxiliary apparatus and switching and other electric equipment.
3. Keeping plant log and records and preparing reports on plant operations.
4. Testing, checking, cleaning, oiling, and adjusting equipment.

Taxes:

1. Federal and state unemployment.
2. F.I.C.A.
3. Property.

Employee Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees' labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:

1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.

Insurance:

1. Premiums payable to insurance companies for fire, storm, burglary, boiler explosion, lightning, fidelity, riot, and similar insurance.
2. Amounts credited to Account 228.1, Accumulated Provision for Property Insurance, for similar protection.
3. Special costs incurred in procuring insurance.
4. Insurance inspection service.
5. Insurance counsel, brokerage fees, and expenses.
6. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
7. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.
8. Fees and expenses of claim investigators.
9. Payment of awards to claimants for court costs and attorneys' services.
10. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.
12. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)
13. Cost of safety, accident prevention, and similar educational activities.

Materials and Expenses:

1. Dynamo, motor, and generator brushes.
2. Lubricants and control system oils.
3. Water for cooling engines and generators.

549 Miscellaneous Other Power Generation Expenses

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials used, and expenses incurred in the operation of other power generating stations which are not specifically provided for or are not readily assignable to other generation expense accounts.

Items

Labor:

1. General clerical and stenographic work.
2. Guarding and patrolling plant and yard.
3. Building service.
4. Care of grounds, including snow removal, and grass cutting.
5. Miscellaneous labor.

**Taxes:**
1. Federal and state unemployment.
2. F.I.C.A.

**Employee Pensions and Benefits:** The portion of employee pensions and benefits specifically identifiable with employees' labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:
1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.

**Insurance:**
1. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
2. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.
3. Fees and expenses of claim investigators.
4. Payment of awards to claimants for court costs and attorneys' services.
5. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.
7. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)
8. Cost of safety, accident prevention, and similar educational activities.

**Materials and Expenses:**
1. Building service supplies.
2. First-aid supplies and safety equipment.
3. Communication service.
4. Employees' service facilities expenses.
5. Office supplies, printing and stationery.
6. Transportation expense.
7. Meals, traveling, and incidental expenses.
9. Water for fire protection or general use.
10. Miscellaneous supplies, such as hand tools, drills, saw blades, and files.
11. Research, development, and demonstration expenses.

550 Rents
This account shall include all rents of property of others used, occupied, or operated in connection with other power generation. (See §1767.17(c).)

551 Maintenance Supervision and Engineering
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, and expenses incurred in the general supervision and direction of the maintenance of other power generating stations. Direct field supervision of specific jobs shall be charged to the appropriate maintenance account. (See §1767.17(a).)

552 Maintenance of Structures
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials used, and expenses incurred in maintenance of facilities used and expenses incurred in maintenance of facilities used in other power generation, the book cost of which is includible in Account 341, Structures and Improvements, and Account 342, Fuel Holders, Producers and Accessories. (See §1767.17(b).)

553 Maintenance of Generating and Electric Equipment
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials used, and expenses incurred in maintenance of plant, the book cost of which is includible in Account 343, Prime Movers; Account 344, Generators; and Account 345, Accessory Electric Equipment. (See §1767.17(b).)

554 Maintenance of Miscellaneous Other Power Generation Plant
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and
Plant Equipment. (See §1767.17(b).)

**Other Power Supply Expenses**

555 Purchased Power

A. This account shall include the cost at point of receipt by the utility of electricity purchased for resale. It shall also include, net settlements for exchange of electricity or power, such as economy energy, off-peak energy for on-peak energy, and spinning reserves capacity. In addition, the account shall include the net settlements for transactions under pooling or interconnection agreements wherein there is a balancing of debits and credits for energy, or capacity. Distinct purchases and sales shall not be recorded as exchanges and net amounts only recorded merely because debit and credit amounts are combined in the voucher settlement.

B. The records supporting this account shall show, by months, the demands and demand charges, kilowatt-hours and prices thereof under each purchase contract and the charges and credits under each exchange or power pooling contract.

556 System Control and Load Dispatching

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, property insurance, property taxes, and expenses incurred in load dispatching activities for system control. Utilities having an interconnected electric system or operating under a central authority which controls the production and dispatching of electricity may apportion these costs to this account and Account 561, Load Dispatching, and Account 581, Load Dispatching.

**Items**

**Labor:**
1. Allocating loads to plants and interconnections with others.
2. Directing switching.
3. Arranging and controlling clearances for construction, maintenance, test, and emergency purposes.
4. Controlling system voltages.
5. Recording loadings, and water conditions.
6. Preparing operating reports and data for billing and budget purposes.
7. Obtaining reports on the weather and special events.

**Taxes:**
1. Federal and state unemployment.
2. F.I.C.A.
3. Property.

**Employee Pensions and Benefits:** The portion of employee pensions and benefits specifically identifiable with employees’ labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:

1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.

**Insurance:**

1. Premiums payable to insurance companies for fire, storm, burglary, boiler explosion, lightning, fidelity, riot, and similar insurance.
2. Amounts credited to Account 228.1, Accumulated Provision for Property Insurance, for similar protection.
3. Special costs incurred in procuring insurance.
4. Insurance inspection service.
5. Insurance counsel, brokerage fees, and expenses.
6. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
7. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.
8. Fees and expenses of claim investigators.
9. Payment of awards to claimants for court costs and attorneys’ services.
10. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.
11. Compensation payments under workmen’s compensation laws.
12. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)
13. Cost of safety, accident prevention, and similar educational activities.

**Expenses:**

</tbody>
</table>
1. Communication service provided for system control purposes.
2. System record and report forms.
3. Meals, traveling, and incidental expenses.
4. Obtaining weather and special events reports.

557 Other Expenses
A. This account shall be charged with any production expenses including expenses incurred directly in connection with the purchase of electricity, which are not specifically provided for in other production expense accounts. Charges to this account shall be supported so that a description of each type of charge will be readily available.
B. Recoveries from insurance companies, under use and occupancy provisions of policies, of amounts in reimbursement of excessive or added productions costs for which the insurance company is liable under the terms of the policy shall be credited to this account.

TRANSMISSION EXPENSES
(Operation)

560 Operation Supervision and Engineering
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, and expenses incurred in the general supervision and direction of the operation of the transmission system as a whole. Direct supervision of specific activities, such as station operation and line operation shall be charged to the appropriate account. (See §1767.17(a).)

561 Load Dispatching
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, property insurance, property taxes, materials used, and expenses incurred in load dispatching operations pertaining to the transmission of electricity.

Items

Labor:
1. Direct switching.
2. Arranging and controlling clearances for construction, maintenance, test, and emergency purposes.
3. Controlling system voltages.
4. Obtaining reports on the weather and special events.
5. Preparing operating reports and data for billing and budget purposes.

Taxes:
1. Federal and state unemployment.
2. F.I.C.A.
3. Property.

Employee Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees’ labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:
1. Accruals or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.

Insurance:
1. Premiums payable to insurance companies for fire, storm, burglary, boiler explosion, lightning, fidelity, riot, and similar insurance.
2. Amounts credited to Account 228.1, Accumulated Provision for Property Insurance, for similar protection.
3. Special costs incurred in procuring insurance.
4. Insurance inspection service.
5. Insurance counsel, brokerage fees, and expenses.
6. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
7. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.
8. Fees and expenses of claim investigators.
9. Payment of awards to claimants for court costs and attorneys’ services.
10. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.
11. Compensation payments under workmen’s compensation laws.
12. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)
§ 1767.27

13. Cost of safety, accident prevention, and similar educational activities.

Expenses:
1. Communication service provided for system control purposes.
2. System record and report forms.
3. Meals, traveling, and incidental expenses.
4. Obtaining weather and special events reports.

562 Station Expenses

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, property insurance, property taxes, materials used, and expenses incurred in operating transmission substations and switching stations. If transmission station equipment is located in or adjacent to a generating station, the expenses applicable to transmission station operations shall nevertheless be charged to this account.

Items

Labor:
1. Supervising station operation.
2. Adjusting station equipment where such adjustment primarily affects performance, such as regulating the flow of cooling water, adjusting current in fields of a machine or changing voltage of regulators, changing station transformer taps.
3. Inspecting, testing, and calibrating station equipment for the purpose of checking its performance.
4. Keeping station log and records and preparing records on station operation.
5. Operating switching and other station equipment.
6. Standing watch, guarding, and patrolling station and station yard.
7. Sweeping, mopping, and tidying station.
8. Care of grounds, including snow removal, and grass cutting.

Taxes:
1. Federal and state unemployment.
2. F.I.C.A.
3. Property.

Employee Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees’ labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:
1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.

Insurance:
1. Premiums payable to insurance companies for fire, storm, burglary, boiler explosion, lightning, fidelity, riot, and similar insurance.
2. Amounts credited to Account 228.1, Accumulated Provision for Property Insurance, for similar protection.
3. Special costs incurred in procuring insurance.
4. Insurance inspection service.
5. Insurance counsel, brokerage fees, and expenses.
6. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
7. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.
8. Fees and expenses of claim investigators.
9. Payment of awards to claimants for court costs and attorneys’ services.
10. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.
11. Compensation payments under workmen’s compensation laws.
12. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)
13. Cost of safety, accident prevention, and similar educational activities.

Materials and Expenses:
1. Building service expenses.
2. Operating supplies, such as lubricants, commutator brushes, water, and rubber goods.
3. Station meter and instrument supplies, such as ink and charts.
4. Station record and report forms.
5. Tool expense.
6. Transportation expenses.
7. Meals, traveling, and incidental expenses.
563 Overhead Line Expenses

564 Underground Line Expenses

A. These accounts shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, property insurance, property taxes, materials used, and expenses incurred in the operation of transmission lines.

B. If the expenses are not substantial for both overhead and underground lines, these accounts may be combined.

Items

Labor:
1. Supervising line operation.
2. Inspecting and testing lightning arresters, circuit breakers, switches, and grounds.
3. Load tests of circuits.
4. Routine line patrolling.
5. Routine voltage surveys made to determine the condition or efficiency of transmission system.
6. Transferring loads, switching and reconnecting circuits and equipment for operating purposes. (Switching for construction or maintenance purposes is not includable in this account.)
7. Routine inspection and cleaning of manholes, conduit, network, and transformer vaults.
8. Electrolysis surveys.
9. Inspecting and adjusting line-testing equipment, such as voltmeters, ammeters, and wattmeters.
10. Regulation and addition of oil or gas in high-voltage cable systems.

Taxes:
1. Federal and state unemployment.
2. F.I.C.A.
3. Property.

Employee Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees' labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:
1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.

Insurance:
1. Premiums payable to insurance companies for fire, storm, burglary, boiler explosion, lightning, fidelity, riot, and similar insurance.
2. Amounts credited to Account 228.1, Accumulated Provision for Property Insurance, for similar protection.
3. Special costs incurred in procuring insurance.
4. Insurance inspection service.
5. Insurance counsel, brokerage fees, and expenses.
6. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
7. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.
8. Fees and expenses of claim investigators.
9. Payment of awards to claimants for court costs and attorneys' services.
10. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.
12. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924. Note A.)
13. Cost of safety, accident prevention, and similar educational activities.

Materials and Expenses:
1. Transportation expenses.
2. Meals, traveling, and incidental expenses.
3. Tool expenses.
4. Operating supplies, such as instrument charts, and rubber goods.

565 Transmission of Electricity by Others

This account shall include amounts payable to others for the transmission of the utility's electricity over transmission facilities owned by others.

566 Miscellaneous Transmission Expenses

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damage, materials used, and expenses incurred in transmission map and record work, transmission office expenses, and other transmission expenses not provided for elsewhere.
§ 1767.27

Items

Labor:
1. General records of physical characteristics of lines and stations, such as capacities.
2. Ground resistance records.
3. Janitor work at transmission office buildings, including care of grounds, snow removal, and grass cutting.
4. Joint pole maps and records.
5. Line load and voltage records.
6. Preparing maps and prints.
7. General clerical and stenographic work.
8. Miscellaneous labor.

Taxes:
1. Federal and state unemployment.
2. F.I.C.A.

Employee Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees’ labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:
1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.

Insurance:
1. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
2. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.
3. Fees and expenses of claim investigators.
4. Payment of awards to claimants for court costs and attorneys’ services.
5. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.
6. Compensation payments under workmen’s compensation laws.
7. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)
8. Cost of safety, accident prevention, and similar educational activities.

Materials and Expenses:
1. Communication service.
2. Building service supplies.
3. Map and record supplies.
4. Transmission office supplies and expenses, printing and stationery.
5. First-aid supplies.
6. Research, development, and demonstration expenses.

567 Rents
This account shall include rents of property of others used, occupied, or operated in connection with the transmission system, including payments to the United States and others for use of public or private lands and reservations for transmission line rights-of-way. (See §1767.17 (c).)

(Maintenance)

568 Maintenance Supervision and Engineering
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, and expenses incurred in the general supervision and direction of maintenance of the transmission system. Direct field supervision of specific jobs shall be charged to the appropriate maintenance account. (See §1767.17(a).)

569 Maintenance of Structures
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials used, and expenses incurred in the maintenance of structures, the book cost of which is includible in Account 352, Structures and Improvements. (See §1767.17(b).)

570 Maintenance of Station Equipment
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials used, and expenses incurred in maintenance of station equipment, the book cost of which is includible in Account 353, Station Equipment. (See §1767.17(b).)

571 Maintenance of Overhead Lines
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and

880
§ 1767.27

Rural Utilities Service, USDA

Section 1767.27. Cost of Safety, Accident Prevention, and Maintenance

(a) The portion of employee pensions and benefits specifically identifiable with employees’ labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:

1. Accruals for or payments to pension funds or to insurance companies for pension purposes.

2. Group and life insurance premiums (credit dividends received).

3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.

4. Payments for accident, sickness, hospital, and death benefits or insurance.

5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.

6. Expenses in connection with educational and recreational activities for the benefit of employees.

(b) Insurance:

1. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.

2. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.

3. Fees and expenses of claim investigators.

4. Payment of awards to claimants for court costs and attorneys’ services.

5. Medical and hospital services and expenses for employees as the result of occupational injuries or resulting from claims of others.

6. Compensation payments under workmen’s compensation laws.

7. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)

8. Cost of safety, accident prevention, and similar educational activities.

572 Maintenance of Underground Lines

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and

d. Maintenance work on publicly owned roads and trails when done by utility at its expense.

Taxes:

1. Federal and state unemployment.

2. F.I.C.A.

Employee Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees’ labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:

1. Accruals for or payments to pension funds or to insurance companies for pension purposes.

2. Group and life insurance premiums (credit dividends received).

3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.

4. Payments for accident, sickness, hospital, and death benefits or insurance.

5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.

6. Expenses in connection with educational and recreational activities for the benefit of employees.

Insurance:

1. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.

2. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.

3. Fees and expenses of claim investigators.

4. Payment of awards to claimants for court costs and attorneys’ services.

5. Medical and hospital services and expenses for employees as the result of occupational injuries or resulting from claims of others.

6. Compensation payments under workmen’s compensation laws.

7. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)

8. Cost of safety, accident prevention, and similar educational activities.

572 Maintenance of Underground Lines

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and

d. Maintenance work on publicly owned roads and trails when done by utility at its expense.

Taxes:

1. Federal and state unemployment.

2. F.I.C.A.

Employee Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees’ labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:

1. Accruals for or payments to pension funds or to insurance companies for pension purposes.

2. Group and life insurance premiums (credit dividends received).

3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.

4. Payments for accident, sickness, hospital, and death benefits or insurance.

5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.

6. Expenses in connection with educational and recreational activities for the benefit of employees.

Insurance:

1. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.

2. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.

3. Fees and expenses of claim investigators.

4. Payment of awards to claimants for court costs and attorneys’ services.

5. Medical and hospital services and expenses for employees as the result of occupational injuries or resulting from claims of others.

6. Compensation payments under workmen’s compensation laws.

7. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)

8. Cost of safety, accident prevention, and similar educational activities.

572 Maintenance of Underground Lines

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and

d. Maintenance work on publicly owned roads and trails when done by utility at its expense.

Taxes:

1. Federal and state unemployment.

2. F.I.C.A.

Employee Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees’ labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:

1. Accruals for or payments to pension funds or to insurance companies for pension purposes.

2. Group and life insurance premiums (credit dividends received).

3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.

4. Payments for accident, sickness, hospital, and death benefits or insurance.

5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.

6. Expenses in connection with educational and recreational activities for the benefit of employees.

Insurance:

1. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.

2. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.

3. Fees and expenses of claim investigators.

4. Payment of awards to claimants for court costs and attorneys’ services.

5. Medical and hospital services and expenses for employees as the result of occupational injuries or resulting from claims of others.

6. Compensation payments under workmen’s compensation laws.

7. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)

8. Cost of safety, accident prevention, and similar educational activities.

572 Maintenance of Underground Lines

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and
damages, materials used, and expenses incurred in maintenance of transmission plant, 
the book cost of which is includible in Accounts 357, Underground Conduit, and Ac-
count 358, Underground Conductors and De-
vices. (See §1767.17(b).)

Items

1. Work of the following character on un-
derground conduit:
   a. Cleaning ducts, manholes, and sewer 
      connections.
   b. Minor alterations of handholes, man-
      holes, or vaults.
   c. Refastening, repairing, or moving racks, 
ladders, hangers in manholes, or vaults.
   d. Plugging and shelving or replugging 
      ducts.
   e. Repairs to sewers and drains, walls and 
      floors, rings and covers.

2. Work of the following character on un-
derground conductors and devices:
   a. Repairing oil circuit breakers, switches, 
cutouts, and control wiring.
   b. Repairing grounds.
   c. Retraining and reconnecting cables in 
      manholes, including transfer of cables from 
one duct to another.
   d. Repairing conductors and splices.
   e. Repairing or moving junction boxes and 
      potheads.
   f. Refireproofing of cables and repairing 
supports.
   g. Repairing electrolysis preventive de-
      vices for cables.
   h. Repairing cable bonding systems.
   i. Sampling, testing, changing, purifying, 
      and replenishing insulating oil.
   j. Transferring loads, switching and recon-
      necting circuits, and equipment for mainte-
nance purposes.
   k. Repairing line testing equipment.
   l. Repairs to oil or gas equipment in high-
voltage cable system and replacement of oil 
or gas.

Taxes:
1. Federal and state unemployment.
2. F.I.C.A.

Employee Pensions and Benefits: The portion 
of employee pensions and benefits specifi-
cally identifiable with employees’ labor 
costs charged herein or, in the absence of 
specific employee identification, the portion 
of employee pensions and benefits, allocated 
on the more equitable basis of either direct 
labor dollars or direct labor hours, applica-
tible to the labor items detailed above, includ-
ing:
1. Accruals for or payments to pension 
funds or to insurance companies for pension 
purposes.
2. Group and life insurance premiums 
(credit dividends received).
3. Payments for medical and hospital serv-
ices and expenses of employees when not the 
result of occupational injuries.

4. Payments for accident, sickness, hos-
pital, and death benefits or insurance.
5. Payments to employees incapacitated 
for service or on leave of absence beyond pe-
riods normally allowed when not the result 
of occupational injuries or in excess of statu-
tory awards.
6. Expenses in connection with educational 
and recreational activities for the benefit of 
employees.

Insurance:
1. Premiums payable to insurance compa-
nies for protection against claims from inju-
ries and damages by employees or others, 
such as public liability, property damages, 
casualty, employee liability, etc., and 
amounts credited to Account 228.2, Accumu-
lated Provision for Injuries and Damage, for 
similar protection.
2. Losses not covered by insurance or re-
serve accruals on account of injuries or 
deaths to employees or others and damages 
to the property of others.
3. Fees and expenses of claim investigators.
4. Payment of awards to claimants for 
court costs and attorneys’ services.
5. Medical and hospital service and ex-
penses for employees as the result of occupa-
tional injuries or resulting from claims of 
others.
6. Cost of safety, accident prevention, and 
similar educational activities.

573 Maintenance of Miscellaneous 
Transmission Plant

This account shall include the cost of 
labor, employee pensions and benefits, social 
security and other payroll taxes, injuries and 
damages, materials used, and expenses in-
curred in maintenance of owned or leased 
plant which is assignable to transmission op-
erations and is not provided for elsewhere. 
(See §1767.17(b).)

Distribution Expenses
(Operation)

580 Operation Supervision and Engineering

This account shall include the cost of 
labor, employee pensions and benefits, social 
security and other payroll taxes, injuries and 
damages, materials used, and expenses in-
curred in maintenance of owned or leased 
plant which is assignable to transmission op-
erations and is not provided for elsewhere. 
(See §1767.17(a).)
883

Rural Utilities Service, USDA

§ 1767.27

581 Load Dispatching

This account (the keeping of which is optional with the utility) shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, property insurance, property taxes, materials used, and expenses incurred in load dispatching operations pertaining to the distribution of electricity.

Items

Labor:
1. Direct switching.
2. Arranging and controlling clearances for construction, maintenance, test, and emergency purposes.
3. Controlling system voltages.
4. Preparing operating reports.
5. Obtaining reports on the weather and special events.

Taxes:
1. Federal and state unemployment.
2. F.I.C.A.
3. Property.

Employee Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees’ labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:
1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated as the result of occupational injuries or resulting from claims of others.
6. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
7. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.
8. Fees and expenses of claim investigators.
9. Payment of awards to claimants for court costs and attorneys’ services.
10. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.
11. Compensation payments under workmen’s compensation laws.
12. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)
13. Cost of safety, accident prevention, and similar educational activities.

Expenses:
1. Communication service provided for system control purposes.
2. System record and report forms.
3. Meals, traveling, and incidental expenses.

582 Station Expenses

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, property insurance, property taxes, materials used, and expenses incurred in the operation of distribution substations.

Items

Labor:
1. Supervising station operation.
2. Adjusting station equipment where such adjustment primarily affects performance, such as regulating the flow of cooling water, adjusting current in fields of a machine, changing voltage of regulators, or changing station transformer taps.
3. Keeping station log and records and preparing reports on station operation.
4. Inspecting, testing, and calibrating station equipment for the purpose of checking its performance.
5. Operating switching and other station equipment.
6. Standing watch, guarding, and patrolling station and station yard.
7. Sweeping, mopping, and tidying station.
8. Care of grounds, including snow removal, and grass cutting.

Taxes:
1. Federal and state unemployment.
2. F.I.C.A.
3. Property.

   Employee Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees’ labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:

   1. Accruals for or payments to pension funds or to insurance companies for pension purposes.

   2. Group and life insurance premiums (credit dividends received).

   3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.

   4. Payments for accident, sickness, hospital, and death benefits or insurance.

   5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.

   6. Expenses in connection with educational and recreational activities for the benefit of employees.

   Insurance:

   1. Premiums payable to insurance companies for fire, storm, burglary, boiler explosion, lighting, fidelity, riot, and similar insurance.

   2. Amounts credited to Account 228.1, Accumulated Provision for Property Insurance, for similar protection.

   3. Special costs incurred in procuring insurance.

   4. Insurance inspection service.

   5. Insurance counsel, brokerage fees, and expenses.

   6. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.

   7. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.

   8. Fees and expenses of claim investigators.

   9. Payment of awards to claimants for court costs and attorneys’ services.

   10. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.

   11. Compensation payments under workmen’s compensation laws.

   12. Compensation paid while incapacitated as the result of occupational injuries. (See Account 824, Note A.)

   13. Cost of safety, accident prevention, and similar educational activities.

Materials and Expenses:

1. Building service expenses.

2. Operating, supplies, such as lubricants, commutator brushes, water, and rubber goods.

3. Station meter and instrument supplies, such as ink and charts.

4. Station record and report forms.

5. Tool expense.

6. Transportation expense.

7. Meals, traveling, and incidental expenses.

Note: If the utility owns storage battery equipment used for supplying electricity to customers in periods of emergency, the cost of operating labor and of supplies, such as acid, gloves, hydrometers, thermometers, soda, automatic cell fillers, and acid proof shoes shall be included in this account. If significant in amount, a separate subdivision shall be maintained for such expenses.

583 Overhead Line Expenses

584 Underground Line Expenses

These accounts shall include, respectively, the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, property insurance, property taxes, materials used, and expenses incurred in the operation of overhead and underground distribution lines.

   Items

   Labor:

   1. Supervising line operation.

   2. Changing line transformer taps.

   3. Inspecting and testing lightning arresters, line circuit breakers, switches, and grounds.

   4. Inspecting and testing line transformers for the purpose of determining load, temperature, or operation performance.

   5. Patrolling lines.

   6. Load tests and voltage surveys of feeders, circuits, and line transformers.

   7. Removing line transformers and voltage regulators with or without replacement.

   8. Installing line transformers or voltage regulators with or without change in capacity provided that the cost of first installation of these items is included in Account 368, Line Transformers.

   9. Voltage surveys, either routine or upon request of customers, including voltage tests at customer’s main switch.

   10. Transferring loads, switching and re-connecting circuits and equipment for operation purpose.

   11. Electrolysis surveys.

   12. Inspecting and adjusting line testing equipment.

   Taxes:
1. Federal and State unemployment.
2. F.I.C.A.
3. Property.

Employee Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees’ labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:

1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
5. Expenses in connection with educational and recreational activities for the benefit of employees.

Insurance:
1. Premiums payable to insurance companies for fire, storm, burglary, boiler explosion, lightning, fidelity, riot, and similar insurance.
2. Amounts credited to Account 228.1, Accumulated Provision for Property Insurance, for similar protection.
3. Special costs incurred in procuring insurance.
4. Insurance inspection service.
5. Insurance counsel, brokerage fees, and expenses.
6. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
7. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.
8. Fees and expenses of claim investigators.
9. Payment of awards to claimants for court costs and attorneys’ services.
10. Medical and hospital service and expenses for employees in the result of occupational injuries or resulting from claims of others.
11. Compensation payments under workmen’s compensation laws.
12. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)
13. Cost of safety, accident prevention, and similar educational activities.

Materials and Expenses:
1. Tool expense.
2. Transportation expense.
3. Meals, traveling, and incidental expenses.
4. Operating supplies, such as instrument charts, and rubber goods.

Street Lighting and Signal System Expenses
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, property insurance, property taxes, materials used, and expenses incurred: (1) The operation of street lighting and signal system plant which is owned or leased by the utility; and (2) the operation and maintenance of such plant owned by customers where such work is done regularly as a part of the street lighting and signal system service.

Items

Labor:
1. Supervising street lighting and signal systems operation.
2. Replacing lamps and incidental cleaning of glassware and fixtures in connection therewith.
3. Routine patrolling for lamp outages, extraneous nuisances, or encroachments.
4. Testing lines and equipment including voltage and current measurement.
5. Winding and inspection of time switch and other controls.

Taxes:
1. Federal and state unemployment.
2. F.I.C.A.
3. Property.

Employee Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees’ labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:

1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
§ 1767.27

5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.

Insurance:
1. Premiums payable to insurance companies for fire, storm, burglary, boiler explosion, lightning, fidelity, riot, and similar insurance.
2. Amounts credited to Account 228.1, Accumulated Provision for Property Insurance, for similar protection.
3. Special costs incurred in procuring insurance.
4. Insurance inspection service.
5. Insurance counsel, brokerage fees, and expenses.
6. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
7. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.
8. Fees and expenses of claim investigators.
9. Payment of awards to claimants for court costs and attorneys' services.
10. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.
12. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)
13. Cost of safety, accident prevention, and similar educational activities.

Materials and Expenses:
1. Street lamp renewals.
2. Transportation and tool expense.
3. Meals, traveling, and incidental expenses.

586 Meter Expenses
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, property insurance, property taxes, materials used, and expenses incurred in the operation of customer meters and associated equipment.

Items

Labor:
1. Supervising meter operation.
2. Clerical work on meter history and associated equipment record cards, test cards, and reports.
3. Disconnecting and reconnecting, removing and reinstalling, sealing and unsealing meters and other metering equipment in connection with initiating or terminating services including the cost of obtaining meter readings, if incidental to such operation.
4. Consolidating meter installations due to elimination of separate meters for different rates of service.
5. Changing or relocating meters, instrument transformers, time switches, and other metering equipment.
6. Resetting time controls, checking operation of demand meters and other metering equipment, when done as an independent operation.
7. Inspecting and adjusting meter testing equipment.
8. Inspecting and testing meters, instrument transformers, time switches, and other metering equipment on premises or in shops excluding inspecting and testing incidental to maintenance.

Taxes:
1. Federal and state unemployment.
2. F.I.C.A.
3. Property.

Employee Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees' labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:
1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.

Insurance:
1. Premiums payable to insurance companies for fire, storm, burglary, boiler explosion, lightning, fidelity, riot, and similar insurance.
2. Amounts credited to Account 228.1, Accumulated Provision for Property Insurance, for similar protection.
3. Special costs incurred in procuring insurance.
4. Insurance inspection service.
5. Insurance counsel, brokerage fees, and expenses.
6. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
7. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.
8. Fees and expenses of claim investigators.
9. Payment of awards to claimants for court costs and attorneys’ services.
10. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.
11. Compensation payments under workmen’s compensation laws.
12. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)
13. Cost of safety, accident prevention, and similar educational activities.

Materials and Expenses
1. Meter seals and miscellaneous meter supplies.
2. Transportation expenses.
3. Meals, traveling, and incidental expenses.
4. Tool expenses.

NOTE: The cost of the first setting and testing of a meter is chargeable to utility plant, Account 370, Meters.

587 Customer Installations Expenses
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, property insurance, property taxes, materials used, and expenses incurred in work on customer installations in inspecting premises and in rendering services to customers of the nature of those indicated by the list of items hereunder.

Items

Labor:
1. Supervising customer installations work.
2. Inspecting premises, including the check of wiring for code compliance.
3. Investigating, locating, and clearing grounds on customers’ wiring.

4. Investigating service complaints, including load tests of motors and lighting and power circuits on customers’ premises; field investigations of complaints on bills or of voltage.
5. Installing, removing, renewing, and changing lamps and fuses.
6. Radio, television, and similar interference work including erection of new aerials on customers’ premises and patrolling of lines, testing of lightning arresters, inspection of pole hardware, and examination on or off premises of customers’ appliances, wiring, or equipment to locate cause of interference.
7. Installing, connecting, reinstalling, or removing leased property on customers’ premises.
8. Testing, adjusting, and repairing customers’ fixtures and appliances in the shop or on premises.
9. Cost of changing customers’ equipment due to changes in service characteristics.
10. Investigation of current diversion including setting and removal of check meters and securing special readings thereon; special calls by employees in connection with discovery and settlement of current diversion; changes in customer wiring; and any other labor cost identifiable as caused by current diversion.

Taxes:
1. Federal and state unemployment.
2. F.I.C.A.
3. Property.

Employee Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees’ labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:
1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.

Insurance:
1. Premiums payable to insurance companies for fire, storm, burglary, boiler explosion, lightning, fidelity, riot, and similar insurance.
2. Amounts credited to Account 228.1, Accumulated Provision for Property Insurance, for similar protection.
3. Special costs incurred in procuring insurance.
4. Insurance inspection service.
5. Insurance counsel, brokerage fees, and expenses.
6. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
7. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.
8. Fees and expenses of claim investigators.
9. Payment of awards to claimants for court costs and attorneys' services.
10. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.
12. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)
13. Cost of safety, accident prevention, and similar educational activities.

Materials and Expenses:
1. Lamp and fuse renewals.
2. Materials used in servicing customers' fixtures, appliances, and equipment.
3. Power, light, heat, telephone, and other expenses of the appliance repair department.
4. Tool expense.
5. Transportation expense, including pick-up and delivery charges.
6. Meals, traveling, and incidental expenses.
7. Rewards paid for discovery of current diversion.

NOTE A: Amounts billed customers for any work, the cost of which is charged to this account, shall be credited to this account. Any excess over costs resulting therefrom, shall be transferred to Account 451, Miscellaneous Service Revenues.

NOTE B: Do not include in this account expenses incurred in connection with merchandising, jobbing, and contract work.

588 Miscellaneous Distribution Expenses

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials used, and expenses incurred in distribution system operation not provided for elsewhere.

Items

Labor:
1. General records of physical characteristics of lines and substations, such as capacities.
2. Ground resistance records.
3. Joint pole maps and records.
4. Distribution system voltage and load records.
5. Preparing maps and prints.
6. Service interruption and trouble records.
7. General clerical and stenographic work except that chargeable to Account 386, Meter Expenses.

Taxes:
1. Federal and state unemployment.
2. F.I.C.A.

Employee Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees' labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:
1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.

Insurance:
1. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
2. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.
3. Fees and expenses of claim investigators.
4. Payment of awards to claimants for court costs and attorneys' services.
5. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.
6. Compensation payments under workmen’s compensation laws.
7. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)
8. Cost of safety, accident prevention, and similar educational activities.

Expenses:
1. Operating records covering poles, transformers, manholes, cables, and other distribution facilities. Exclude meter records chargeable to Account 586, Meter Expenses, and station records chargeable to Account 582, Station Expenses, and stores records chargeable to Account 163, Stores Expense Undistributed.
2. Janitor work at distribution office buildings including snow removal and grass cutting.
3. Communication service.
4. Building service expenses.
5. Miscellaneous office supplies and expenses, printing and stationery, maps and records, and first-aid supplies.
6. Research, development, and demonstration expenses.

589 Rents
This account shall include rents of property of others used, occupied, or operated in connection with the distribution system, including payments to the United States and others for the use and occupancy of public lands and reservations for distribution line rights of way. (See §1767.17 (c).)

(Maintenance)

590 Maintenance Supervision and Engineering
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials used, and expenses incurred in the general supervision and direction of maintenance of the distribution system. Direct field supervision of specific jobs shall be charged to the appropriate maintenance account. (See §1767.17(a).)

591 Maintenance of Structures
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials used, and expenses incurred in maintenance of structures, the book cost of which is includible in Account 361, Structures and Improvements. (See §1767.17(b).)

592 Maintenance of Station Equipment
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials used, and expenses incurred in the maintenance of overhead distribution line facilities, the book cost of which is includible in Account 364, Poles, Towers and Fixtures; Account 365, Overhead Conductors and Devices; and Account 369, Services. (See §1767.17(b).)

Items
1. Work of the following character on poles, towers, and fixtures:
   a. Installing additional clamps or removing clamps or strain insulators on guys in place.
   b. Moving line or guy pole in relocation of pole or section of line.
   c. Painting poles, towers, crossarms, or pole extensions.
   d. Readjusting and changing position of guys or braces.
   e. Realigning and straightening poles, crossarms, braces, pins, racks, brackets, and other pole fixtures.
   f. Reconditioning reclaimed pole fixtures.
   g. Relocating crossarms, racks, brackets, and other fixtures on poles.
   h. Repairing pole supported platform.
   i. Repairs by others to jointly owned poles.
   j. Shaving, cutting rot, or treating poles or crossarms in use or salvaged for reuse.
   k. Stubbing poles already in service.
   l. Supporting conductors, transformers, and other fixtures and transferring them to new poles during pole replacements.
   m. Maintaining pole signs, stencils, and tags.
2. Work of the following character on overhead conductors and devices:
   a. Overhauling and repairing line cutouts, line switches, line breakers, and capacitor installations.
   b. Cleaning insulators and bushings.
   c. Refusing line cutouts.
   d. Repairing line oil circuit breakers and associated relays and control wiring.
   e. Repairing grounds; Account 365, Overhead Conductors and Devices; and Account 369, Services.
   f. Resagging, retying, or rearranging position or spacing of conductors.
   g. Standing by phones, going to calls, cutting faulty lines clear, or similar activities at times of emergency.
§ 1767.27

7 CFR Ch. XVII (1–1–08 Edition)

b. Sampling, testing, changing, purifying, and replenishing insulating oil.
   i. Transferring loads, switching, and reconnecting circuits and equipment for maintenance purposes.
   j. Repairing line testing equipment.
   k. Trimming trees and clearing brush.
   l. Chemical treatment of right-of-way area when occurring subsequent to construction of line.

3. Work of the following character on overhead services:
   a. Moving position of service either on pole or on customers’ premises.
   b. Pulling slack in service wire.
   c. Retying service wire.
   d. Refastening or tightening service brackets.

Taxes:
1. Federal and state unemployment.
2. F.I.C.A.

Employee Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees’ labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:
1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated for service on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.

Insurance:
1. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
2. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.
3. Fees and expenses of claim investigators.
4. Payment of awards to claimants for court costs and attorneys’ services.
5. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.
6. Compensation payments under workmen’s compensation laws.
7. Compensation paid while incapacitated as the result of occupational injuries. (See Account 524, Note A.)
8. Cost of safety, accident prevention, and similar educational activities.

594 Maintenance of Underground Lines

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials used, and expenses incurred in the maintenance of underground distribution line facilities, the book cost of which is includible in Account 366, Underground Conduit; Account 367, Underground Conductors and Devices; and Account 369, Services. (See §1767.17(b).)

Items

1. Work of the following character on underground conduit:
   a. Cleaning ducts, manholes, and sewer connections.
   b. Moving or changing position of conduit or pipe.
   c. Minor alterations of handholes, manholes, or vaults.
   d. Refastening, repairing, or moving racks, ladders, or hangers in manholes or vaults.
   e. Plugging and shelving ducts.
   f. Repairs to sewers, drains, walls, and floors, rings, and covers.
2. Work of the following character on underground conductors and devices:
   a. Repairing circuit breakers, switches, cutouts, network protectors, and associated relays and control wiring.
   b. Repairing grounds.
   c. Retraining and reconnecting cables in manholes including transfer of cables from one duct to another.
   d. Repairing conductors and splices.
   e. Repairing or moving junction boxes and potheads.
   f. Refireproofing cables and repairing supports.
   g. Repairing electrolysis preventive devices for cables.
   h. Repairing cable bonding systems.
   i. Sampling, testing, changing, purifying, and replenishing insulating oil.
   j. Transferring loads, switching and reconnecting circuits and equipment for maintenance purposes.
   k. Repairing line testing equipment.
   l. Repairing oil or gas equipment in high voltage cable systems and replacement of oil or gas.
3. Work of the following character on underground services:
a. Cleaning ducts.
b. Repairing any underground service plant.

Taxes:
1. Federal and state unemployment.
2. F.I.C.A.

Employee Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees’ labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:
1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.

Insurance:
1. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
2. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.
3. Fees and expenses of claim investigators.
4. Payment of awards to claimants for court costs and attorneys’ services.
5. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.
7. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)
8. Cost of safety, accident prevention, and similar educational activities.

595 Maintenance of Line Transformers
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials used, and expenses incurred in maintenance of distribution line transformers, the book cost of which is includible in Account 368, Line Transformers. (See §1767.17(b).)

596 Maintenance of Street Lighting and Signal Systems
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials used, and expenses incurred in maintenance of plant, the book cost of which is includible in Account 373, Street Lighting and Signal Systems. (See §1767.17(b).)

597 Maintenance of Meters
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials used, and expenses incurred in the maintenance of meters and meter testing equipment, the book cost of which is includible in Account 370, Meters, and Account 395, Laboratory Equipment, respectively. (See §1767.17(b).)

598 Maintenance of Miscellaneous Distribution Plant
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials used, and expenses incurred in maintenance of plant, the book cost of which is includible in Accounts 371, Installations on Customers’ Premises, and Account 372, Leased Property on Customers’ Premises, and any other plant the maintenance of which is assignable to the distribution function and is not provided for elsewhere. (See §1767.17(b).)

Items
1. Work of similar nature to that listed in other distribution maintenance accounts.
2. Maintenance of office furniture and equipment used by distribution system department.

Taxes:
1. Federal and state unemployment.
2. F.I.C.A.

Employee Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees’ labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:
1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
§ 1767.28  

2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.

Insurance:
1. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
2. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.
3. Fees and expenses of claim investigators.
4. Payment of awards to claimants for court costs and attorneys' services.
5. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.
7. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)
8. Cost of safety, accident prevention, and similar educational activities.

§ 1767.28 Customer accounts expenses.

The customer accounts expense accounts identified in this section shall be used by all RUS borrowers.

CUSTOMER ACCOUNTS EXPENSES

(Operation)

901 Supervision
902 Meter Reading Expenses
903 Customer Records and Collection Expenses
904 Uncollectible Accounts
905 Miscellaneous Customer Accounts Expenses

7 CFR Ch. XVII (1–1–08 Edition)

CUSTOMER ACCOUNTS EXPENSES

(Operation)

901 Supervision

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, and expenses incurred in the general direction and supervision of customer accounting and collecting activities. Direct supervision of a specific activity shall be charged to Account 902, Meter Reading Expenses, or Account 903, Customer Records and Collection Expenses, as appropriate. (See §1767.17(a).)

902 Meter Reading Expenses

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials used, and expenses incurred in reading customer meters, and determining consumption when performed by employees engaged in reading meters.

Items

Labor:
1. Addressing forms for obtaining meter readings by mail.
2. Changing and collecting meter charts used for billing purposes.
3. Inspecting time clocks and checking seals when performed by meter readers and the work represents a minor activity incidental to regular meter reading routine.
4. Reading meters, including demand meters, and obtaining load information for billing purposes. Exclude and charge to Account 586, Meter Expenses, or to Account 903, Customer Records and Collection Expenses, as applicable, the cost of obtaining meter readings, first and final, if incidental to the operation of removing or resetting, sealing or locking, and disconnecting or reconnecting meters.
5. Computing consumption from meter reader's book or from reports by mail when done by employees engaged in reading meters.
6. Collecting from prepayment meters when incidental to meter reading.
7. Maintaining record of customers' keys.
8. Computing estimated or average consumption when performed by employees engaged in reading meters.

Taxes:
1. Federal and state unemployment.
2. F.I.C.A.

Employee Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees' labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct
Rural Utilities Service, USDA  § 1767.28

Labor dollars or direct labor hours, applicable to the labor items detailed above, including:

1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.

Insurance:

1. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
2. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others to the property of others.
3. Fees and expenses of claim investigators.
4. Payment of awards to claimants for court costs and attorneys’ services.
5. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.
6. Compensation payments under workmen’s compensation laws.
7. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)
8. Cost of safety, accident prevention, and similar educational activities.

Materials and Expenses:

1. Badges, lamps, and uniforms.
2. Demand charts, meter books and binders and forms for recording readings, but not the cost of preparation.
3. Postage and supplies used in obtaining meter readings by mail.
4. Transportation, meals, and incidental expenses.

903 Customer Records and Collection Expenses

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials used, and expenses incurred in work on customer applications, contracts, orders, credit investigations, billing and accounting, collections and complaints.

Items

Labor:

1. Receiving, preparing, recording, and handling routine orders for service, disconnections, transfers or meter tests initiated by the customer, excluding the cost of carrying out such orders, which is chargeable to the account appropriate for the work called for by such orders.
2. Investigations of customers’ credit and keeping of records pertaining thereto, including records of uncollectible accounts written off.
3. Receiving, refunding, or applying customer deposits and maintaining customer deposit, line extension, and other miscellaneous records.
4. Checking consumption shown by meter readers’ reports where incidental to preparation of billing data.
5. Preparing address plates and addressing bills and delinquent notices.
6. Preparing billing data.
7. Operating billing and bookkeeping machines.
8. Verifying billing records with contracts or rate schedules.
9. Preparing bills for delivery and mailing or delivering bills.
10. Collecting revenues, including collection from prepayment meters, unless incidental to meter-reading operations.
11. Balancing collections, preparing collections for deposit, and preparing cash reports.
12. Posting collections and other credits or charges to customer accounts and extending unpaid balances.
14. Preparing, mailing, or delivering delinquent notices and preparing reports of delinquent accounts.
15. Final meter reading of delinquent accounts when done by collectors incidental to regular activities.
16. Disconnecting and reconnecting service because of nonpayment bills.
17. Receiving, recording, and handling of inquiries, complaints, and requests for investigations from customers, including preparation of necessary orders, but excluding the cost of carrying out such orders, which is chargeable to the account appropriate for the work called for by such orders.
18. Statistical and tabulating work on customer accounts and revenues, but not including special analyses for sales department, rate department, or other general purposes, unless incidental to regular customer accounting routines.
19. Preparing and periodically rewriting meter reading sheets.
20. Determining consumption and computing estimated or average consumption when performed by employees other than those engaged in reading meters.

Taxes:
1. Federal and state unemployment.
2. F.I.C.A.

Employee Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees' labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:
1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.

Insurance:
1. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
2. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.
3. Fees and expenses of claim investigators.
4. Payment of awards to claimants for court costs and attorneys' services.
5. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.
7. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)
8. Cost of safety, accident prevention, and similar educational activities.

Materials and Expenses:
1. Address plates and supplies.
2. Cash overages and shortages.
3. Commissions or fees to others for collecting.
4. Payments to credit organizations for investigations and reports.
5. Postage.
6. Transportation expenses, including transportation of customer bills and meter books under centralized billing procedures.
7. Transportation, meals expenses, and incidental expenses.
8. Bank charges, exchange, and other fees for cashing and depositing customers' checks.
9. Forms for recording orders for services, or removals.
10. Rent of mechanical equipment.

Note: The cost of work on meter history and meter location records in chargeable to Account 586, Meter Expenses.

904 Uncollectible Accounts

This amount shall be charged with amounts sufficient to provide for losses from uncollectible utility revenues. Concurrent credits shall be made to Account 144, Accumulated Provision for Uncollectible Accounts—Credit. Losses from uncollectible accounts shall be charged to Account 144.

905 Miscellaneous Customer Accounts Expenses

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, property insurance, property taxes, materials used, and expenses incurred not provided for in other accounts.

Items

Labor:
1. General clerical and stenographic work.
2. Miscellaneous labor.

Taxes:
1. Federal and state unemployment.
2. F.I.C.A.
3. Property.

Employee Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees' labor costs charged herein, or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:
1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.

**Insurance:**
1. Premiums payable to insurance companies for fire, storm, burglary, boiler explosion, lightning, fidelity, riot, and similar insurance.
2. Amounts credited to Account 228.1, Accumulated Provision for Property Insurance, for similar protection.
3. Special costs incurred in procuring insurance.
4. Insurance inspection service.
5. Insurance counsel, brokerage fees, and expenses.
6. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
7. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.
8. Fees and expenses of claim investigators.
9. Payment of awards to claimants for court costs and attorneys' services.
10. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.
12. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)
13. Cost of safety, accident prevention, and similar educational activities.

**Materials and Expenses:**
1. Communication service.
2. Miscellaneous office supplies and expenses and stationery and printing other than those specifically provided for in Account 902 and Account 903.

---

**CUSTOMER SERVICE AND INFORMATIONAL EXPENSES**

**Operations**

907 Supervision
908 Customer Assistance Expenses
909 Informational and Instructional Advertising Expenses
910 Miscellaneous Customer Service and Informational Expenses

**CUSTOMER SERVICE AND INFORMATIONAL EXPENSES**

**Operation**

907 Supervision

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, and expenses incurred in the general direction and supervision of customer service activities, the object of which is to encourage safe, efficient, and economical use of the utility's service. Direct supervision of a specific activity within customer service and informational expense classification shall be charged to the account wherein the costs of such activity are included. (See §1767.17(a).)

908 Customer Assistance Expenses

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials used, and expenses incurred in providing instructions or assistance to customers, the object of which is to encourage safe, efficient, and economical use of the utility's service.

**Items**

**Labor:**
1. Direct supervision of department.
2. Processing customer inquiries relating to the proper use of electric equipment, the replacement of such equipment, and information related to such equipment.
3. Advice directed to customers as to how they may achieve the most efficient and safest use of electric equipment.
4. Demonstrations, exhibits, lectures, and other programs designed to instruct customers in the safe, economical, or efficient use of electric service, and/or oriented toward conservation of energy.
5. Engineering and technical advice to customers, the object of which is to promote safe, efficient, and economical use of the utility's service.

**Taxes:**
1. Federal and state unemployment.
2. F.I.C.A.

**Employee Pensions and Benefits:** The portion of employee pensions and benefits specifically identifiable with employees' labor.
costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:

1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.

**Insurance:**

1. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
2. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.
3. Fees and expenses of claim investigators.
4. Payment of awards to claimants for court costs and attorneys’ services.
5. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.

**Employee Pensions and Benefits:**

1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. F.I.C.A.
3. Federal and state unemployment.
4. Preparing informational materials for newspapers, periodicals, and billboards and preparing and conducting informational motion pictures, radio and television programs.
5. Preparing informational materials for newspapers, periodicals, and billboards and preparing and conducting informational motion pictures, radio and television programs.
6. Preparing informational window and other displays.
7. Employing agencies, selecting media, and conducting negotiations in connection with the placement and subject matter of information programs.

**Taxes:**

1. Federal and state unemployment.
2. F.I.C.A.
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.

**Informational and Instructional Advertising Expenses**

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials used, and expenses incurred in activities which primarily convey information as to what the utility urges or suggests customers should do in utilizing electric service to protect health and safety, to encourage environmental protection, to utilize their electric equipment safely and economically, or to conserve electric energy.

**Items**

**Labor:**

1. Direct supervision of information activities.
2. Preparing informational materials for newspapers, periodicals, and billboards and preparing and conducting informational motion pictures, radio and television programs.
3. Preparing informational materials for newspapers, periodicals, and billboards and preparing and conducting informational motion pictures, radio and television programs.
4. Preparing informational window and other displays.
5. Employing agencies, selecting media, and conducting negotiations in connection with the placement and subject matter of information programs.

**Taxes:**

2. F.I.C.A.
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.

**Insurance:**

1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.
1. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.

2. Losses not covered by insurance or reserved accruals on account of injuries or deaths to employees or others and damages to the property of others.

3. Fees and expenses of claim investigators.

4. Payment of awards to claimants for court costs and attorneys' services.

5. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.

7. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)

8. Cost of safety, accident prevention, and similar educational activities.

Materials and Expenses:

1. Use of newspapers, periodicals, billboards, and radio for informational purposes.

2. Postage on direct mailings to customers exclusive of postage related to billings.

3. Printing of informational booklets, dodgers, and bulletins.

4. Supplies and expenses in preparing informational materials by the utility.

5. Office supplies and expenses.

NOTE A: Exclude from this account and charge to Account 930.2, Miscellaneous General Expenses, the cost of publication of stockholder reports, dividend notices, bond redemption notices, financial statements, and other notices of a general corporate character. Also exclude all expenses of a promotional, institutional, goodwill, or political nature, which are includible in such accounts as 913, Advertising Expenses; 930.1, General Advertising Expenses; and 426.4, Expenditures for Certain Civic, Political and Related Activities.

NOTE B: Entries relating to informational advertising included in this account shall contain or refer to supporting documents which identify the specific advertising message. If references are used, copies of the advertising message shall be readily available.

910 Miscellaneous Customer Service and Informational Expenses

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, property insurance, property taxes, materials used, and expenses incurred in connection with customer service and informational activities which are not includible in other customer information expense accounts.

Items

Labor:

1. General clerical and stenographic work not assigned to specific customer service and informational programs.

2. Miscellaneous labor.

Taxes:

1. Federal and state unemployment.

2. F.I.C.A.

3. Property.

Employee Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees’ labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:

1. Accruals for or payments to pension funds or to insurance companies for pension purposes.

2. Group and life insurance premiums (credit dividends received).

3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.

4. Payments for accident, sickness, hospital, and death benefits or insurance.

5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries.

6. Expenses in connection with educational and recreational activities for the benefit of employees.

Insurance:

1. Premiums payable to insurance companies for fire, storm, burglary, boiler explosion, lightning, fidelity, riot, and similar insurance.

2. Amounts credited to Account 228.1, Accumulated Provision for Property Insurance, for similar protection.

3. Special costs incurred in procuring insurance.

4. Insurance inspection service.

5. Insurance counsel, brokerage fees, and expenses.

6. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.

7. Losses not covered by insurance or reserved accruals on account of injuries or
§ 1767.30 Sales expenses.

The sales expense accounts identified in this section shall be used by all RUS borrowers.

**SALES EXPENSES**

(Operation)

911 Supervision

912 Demonstrating and Selling Expenses

913 Advertising Expenses

914 Miscellaneous Sales Expenses

**SALES EXPENSES**

(Operation)

911 Supervision

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, and expenses incurred in the general direction and supervision of sales activities, except merchandising. Direct supervision of a specific activity, such as demonstrating, selling, or advertising shall be charged to the account wherein the costs of such activity are included. (See §1767.17(a).)

912 Demonstrating and Selling Expenses

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials used, and expenses incurred in promotional, demonstrating, and selling activities, except by merchandising, the object of which is to promote or retain the use of utility services by present and prospective customers.

**Items**

**Labor:**

1. Demonstrating uses of utility services.
2. Conducting cooking schools, preparing recipes, and related home service activities.
3. Exhibitions, displays, lectures, and other programs designed to promote use of utility services.
4. Experimental and development work in connection with new and improved appliances and equipment, prior to general public acceptance.
5. Solicitation of new customers or of additional business from old customers, including commissions paid employees.
6. Engineering and technical advice to present or prospective customers in connection with promoting or retaining the use of utility services.
7. Special customer canvasses when their primary purpose is the retention of business or the promotion of new business.

**Taxes:**

1. Federal and state unemployment.
2. F.I.C.A.

**Employee Pensions and Benefits:** The portion of employee pensions and benefits specifically identifiable with employees’ labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:

   1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
   2. Group and life insurance premiums (credit dividends received).
   3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
   4. Payments for accident, sickness, hospital, and death benefits or insurance.
   5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
   6. Expenses in connection with educational and recreational activities for the benefit of employees.

**Insurance:**

1. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
2. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.
3. Fees and expenses of claim investigators.
4. Payment of awards to claimants for court costs and attorneys’ services.
5. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.
6. Compensation payments under workmen’s compensation laws.
7. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)
8. Cost of safety, accident prevention, and similar educational activities.

Materials and Expenses:
1. Supplies and expenses pertaining to demonstration, experimental, and development activities.
2. Booth and temporary space rental.
3. Loss in value on equipment and appliances used for demonstration purposes.
4. Transportation, meals, and incidental expenses.

913 Advertising Expenses
This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials used, and expenses incurred in advertising designed to promote or retain the use of utility service, except advertising the sale of merchandise by the utility.

Items

Labor:
1. Direct supervision of department.
2. Preparing advertising material for newspapers, periodicals, and billboards, and preparing and conducting motion pictures, radio, and television programs.
3. Preparing booklets and bulletins used in direct mail advertising.
4. Preparing window and other displays.
5. Clerical and stenographic work.
6. Investigating advertising agencies and media and conducting negotiations in connection with the placement and subject matter of sales advertising.

Taxes:
1. Federal and state unemployment.
2. F.I.C.A.

Employee Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees’ labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:
1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.

Insurance:
1. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
2. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.
3. Fees and expenses of claim investigators.
4. Payment of awards to claimants for court costs and attorneys’ services.
5. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.
6. Compensation payments under workmen’s compensation laws.
7. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)
8. Cost of safety, accident prevention, and similar educational activities.

Materials and Expenses:
1. Advertising in newspapers, periodicals, billboards, and radio for sales promotion purposes, but not including institutional or goodwill advertising includible in Account 930.1, General Advertising Expenses.
2. Materials and services given as prizes or otherwise in connection with civic lighting contests, canning, or cooking contests, and bazaars in order to publicize and promote the use of utility services.
3. Fees and expenses of advertising agencies and commercial artists.
5. Postage on direct mail advertising.
6. Premiums distributed generally, such as recipe books when not offered as inducement to purchase appliances.
7. Printing booklets, dodgers, and bulletins.
8. Supplies and expenses in preparing advertising material.
9. Office supplies and expenses.
§ 1767.30

NOTE A: The cost of advertisements which set forth the value or advantages of utility service without reference to specific appliances, or, if reference is made to appliances, invites the reader to purchase appliances from his dealer or refer to appliances not carried for sale by the utility, shall be considered as merchandise advertising and not a part of the regular customer account and shall be charged to this account. However, advertisements which are limited to specific makes of appliances sold by the utility and price and terms, thereof, without referring to the value or advantages of utility service, shall be considered as merchandise advertising and the cost shall be charged to Costs and Expenses of Merchandising, Jobbing and Contract Work, Account 416.

NOTE B: Advertisements which substantially mention or refer to the value or advantages of utility service, together with specific reference to makes of appliance sold by the utility and the price, and terms, thereof, and designed for the joint purpose of increasing the use of utility service and the sales of appliances, shall be considered as a combination advertisement and the costs shall be distributed between this account and Account 416 on the basis of space, time, or other proportional factors.

NOTE C: Exclude from this account and charge to Account 930.2, Miscellaneous General Expenses, the cost of publication of stockholder reports, dividend notices, bond redemption notices, financial statements, and other notices of a general corporate character. Also exclude all institutional or goodwill advertising. (See Account 930.1, General Advertising Expenses.)

916 Miscellaneous Sales Expenses

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, property insurance, property taxes, materials used, and expenses incurred in connection with sales activities, except merchandising, which are not includable in other sales expense accounts.

Items

Labor:
1. General clerical and stenographic work not assigned to specific functions.
2. Special analysis of customer accounts and other statistical work for sales purposes not a part of the regular customer accounting and billing routine.
3. Miscellaneous labor.

Taxes:
1. Federal and state unemployment.
2. F.I.C.A.
3. Property.

Employee Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees’ labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:
1. Accruals for or payments to pension funds or to insurance companies for pension purposes.
2. Group and life insurance premiums (credit dividends received).
3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
4. Payments for accident, sickness, hospital, and death benefits or insurance.
5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
6. Expenses in connection with educational and recreational activities for the benefit of employees.

Insurance:
1. Premiums payable to insurance companies for fire, storm, burglary, boiler explosion, lightning, fidelity, riot, and similar insurance.
2. Amounts credited to Account 228.1, Accumulated Provision for Property Insurance, for similar protection.
3. Special costs incurred in procuring insurance.
4. Insurance inspection service.
5. Insurance counsel, brokerage fees, and expenses.
6. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
7. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.
8. Fees and expenses of claim investigators.
9. Payment of awards to claimants for court costs and attorneys’ services.
10. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.
11. Compensation payments under workmen’s compensation laws.
12. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)
13. Cost of safety, accident prevention, and similar educational activities.

Materials and Expenses:
1. Communication service.
§ 1767.31 Administrative and general expenses.

The administrative and general expense accounts identified in this section shall be used by all RUS borrowers.

**ADMINISTRATIVE AND GENERAL**

(Operation)

920 Administrative and General Salaries
921 Office Supplies and Expenses
922 Administrative Expenses Transferred—Credit
923 Outside Services Employed
924 Property Insurance
925 Injuries and Damages
926 Employee Pensions and Benefits
927 Franchise Requirements
928 Regulatory Commission Expenses
929 Duplicate Charges—Credit
930.1 General Advertising Expenses
930.2 Miscellaneous General Expenses
931 Rents

(Maintenance)

935 Maintenance of General Plant

**ADMINISTRATIVE AND GENERAL**

(Operation)

920 Administrative and General Salaries
A. This account shall include the compensation (salaries, bonuses, employee pensions and benefits, social security and other payroll taxes, injuries and damages, and other consideration for services, but not including directors’ fees) of officers, executives, and other employees of the utility properly chargeable to utility operations and not chargeable directly to a particular operating function.
B. This account may be subdivided in accordance with a classification appropriate to the departmental or other functional organization of the utility.

921 Office Supplies and Expenses
A. This account shall include office supplies and expenses incurred in connection with the general administration of the utility’s operations which are assignable to specific administrative or general departments and are not specifically provided for in other accounts. This includes the expenses of the various administrative and general departments, the salaries and wages of which are includible in Account 920.
B. This account may be subdivided in accordance with a classification appropriate to the departmental or other functional organization of the utility.

**Items**

1. Automobile service, including charges through clearing account.
2. Bank messenger and service charges.
3. Books, periodicals, bulletins, and subscriptions to newspapers, newsletters, and tax services.
4. Building service expenses for customer accounts, sales, and administrative and general purposes.
5. Communication service expenses.
6. Cost of individual items of office equipment used by general departments which are of small value or short life.
7. Membership fees and dues in trade, technical, and professional associations paid by a utility for employees. (Company memberships are includible in Account 930.2.)
8. Office supplies and expenses.
9. Payment of court costs, witness fees, and other expenses of legal department.
11. Meals, traveling, and incidental expenses.

922 Administrative Expenses Transferred—Credit
This account shall be credited with administrative expenses recorded in Account 920 and Account 921 which are transferred to construction costs or to nonutility accounts. (See § 1767.16 (d).)

923 Outside Services Employed
A. This account shall include the fees and expenses of professional consultants and others for general services which are not applicable to a particular operating function or other accounts. It shall include also the pay and expenses of persons engaged for a special or temporary administrative or general purpose in circumstances where the person so engaged is not considered as an employee of the utility.
B. This account shall be so maintained as to permit ready summarization according to the nature of service and the person furnishing the same.
§ 1767.31

Items

1. Fees, pay, and expenses of accountants and auditors, actuaries, appraisers, attorneys, engineering consultants, management consultants, negotiators, public relations counsel, and tax consultants.
2. Supervision fees and expenses paid under contracts for general management services.

NOTE: Do not include inspection and brokerage fees and commissions chargeable to other accounts or fees and expenses in connection with security issues which are includible in the expenses of issuing securities.

924 Property Insurance

A. This account shall include the cost of insurance or reserve accruals to protect the utility against losses and damages to owned or leased property used in its utility operations. It shall also include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, and the related supplies and expenses incurred in property insurance activities.

B. Recoveries from insurance companies or others for property damages shall be credited to the account charged with the cost of the damage. If the damaged property has been retired, the credit shall be to the appropriate account for accumulated provision for depreciation.

C. Records shall be kept so as to show the amount of coverage for each class of insurance carried, the property covered, and the applicable premiums. Any dividends distributed by mutual insurance companies shall be credited to the accounts to which the insurance premiums were charged.

Items

1. Premiums payable to insurance companies for fire, storm, burglary, boiler explosion, lightning, fidelity, riot, and similar insurance.
2. Amounts credited to Account 228.1, Accumulated Provision for Property Insurance, for similar protection.
3. Special costs incurred in procuring insurance.
4. Insurance inspection service.
5. Insurance counsel, brokerage fees, and expenses.

NOTE A: The cost of insurance or reserve accruals capitalized, shall be charged to construction and retirement either directly or by transfers to construction and retirement work orders from this account.

NOTE B: The cost of insurance or reserve accruals for the following classes of property shall be charged as indicated:
1. Materials, supplies, and stores equipment to Account 163, Stores Expense Undistributed, or appropriate materials account.
2. Transportation and other general equipment to appropriate clearing accounts that may be maintained.
3. Electric plant leased to others to Account 413, Expenses of Electric Plant Leased to Others.
4. Nonutility property to the appropriate nonutility income account.

NOTE C: The cost of labor, employee pensions and benefits, social security and other payroll taxes, and the related supplies and expenses of administrative and general employees who are only incidentally engaged in property insurance work may be included in Account 920 and Account 921, as appropriate.

NOTE D: The cost of insurance or reserve accruals applicable to the various utility functions shall be charged to the specific functional operations and the appropriate miscellaneous administrative expense accounts either directly or by transfers from this account.

925 Injuries and Damages

A. This account shall include the cost of insurance or reserve accruals to protect the utility against injuries and damages claims of employees or others, losses of such character not covered by insurance, and expenses incurred in settlement of injuries and damages claims. It shall also include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, related supplies, and expenses incurred in injuries and damages activities.

B. Reimbursements from insurance companies or others for expenses charged hereto on account of injuries, damages, and insurance dividends or refunds shall be credited to this account.

Items

1. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.
2. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.
3. Fees and expenses of claim investigators.
4. Payment of awards to claimants for court costs and attorneys' services.
5. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.
§ 1767.31  Employee Pensions and Benefits

1. Payment of pensions to retirees on a nonaccrual basis.
2. Accruals for or payments to pension funds or to insurance companies for pension purposes.
3. Group and life insurance premiums (credit dividends received).
4. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
5. Payments for accident, sickness, hospital, and death benefits or insurance.
6. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
7. Expenses in connection with educational and recreational activities for the benefit of employees.

A. This account shall include pensions paid to or on behalf of retired employees or accrued to provide for pensions or payments for the purchase of annuities for this purpose, when the utility has definitely, by contract, committed itself to a pension plan under which the pension funds are irrevocably devoted to pension purposes and payments for employee accident, sickness, hospital, and death benefits, or insurance therefor. Include also, expenses incurred in medical, educational, or recreational activities for the benefit of employees and administrative expenses in connection with employee pensions and benefits.

B. The utility shall maintain a complete record of accruals or payments for pensions and be prepared to furnish full information to RUS of the plan under which it has created or proposes to create a pension fund and a copy of the declaration of trust or resolution under which the pension plan is established.

C. There shall be credited to this account, the portion of pensions and benefits expenses which is applicable to nonutility operations, the specific functional operations, maintenance, and administrative expense accounts, and to construction and retirement activities unless such amounts are distributed directly to the accounts involved and are not included herein in the first instance.

D. Records in support of this account shall be so kept that the total pensions expense, the total benefits expense, the administrative expenses included herein, and the amounts of pensions and benefits expenses transferred to the operations, maintenance, administrative, construction or retirement accounts will be readily available.

Items

1. Payment of pensions to retirees on a nonaccrual basis.
2. Accruals for or payments to pension funds or to insurance companies for pension purposes.
3. Group and life insurance premiums (credit dividends received).
4. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
5. Payments for accident, sickness, hospital, and death benefits or insurance.
6. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
7. Expenses in connection with educational and recreational activities for the benefit of employees.

A. This account shall include pensions paid to or on behalf of retired employees or accrued to provide for pensions or payments for the purchase of annuities for this purpose, when the utility has definitely, by contract, committed itself to a pension plan under which the pension funds are irrevocably devoted to pension purposes and payments for employee accident, sickness, hospital, and death benefits, or insurance therefor. Include also, expenses incurred in medical, educational, or recreational activities for the benefit of employees and administrative expenses in connection with employee pensions and benefits.

B. The utility shall maintain a complete record of accruals or payments for pensions and be prepared to furnish full information to RUS of the plan under which it has created or proposes to create a pension fund and a copy of the declaration of trust or resolution under which the pension plan is established.

C. There shall be credited to this account, the portion of pensions and benefits expenses which is applicable to nonutility operations, the specific functional operations, maintenance, and administrative expense accounts, and to construction and retirement activities unless such amounts are distributed directly to the accounts involved and are not included herein in the first instance.

D. Records in support of this account shall be so kept that the total pensions expense, the total benefits expense, the administrative expenses included herein, and the amounts of pensions and benefits expenses transferred to the operations, maintenance, administrative, construction or retirement accounts will be readily available.

Items

1. Payment of pensions to retirees on a nonaccrual basis.
2. Accruals for or payments to pension funds or to insurance companies for pension purposes.
3. Group and life insurance premiums (credit dividends received).
4. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.
5. Payments for accident, sickness, hospital, and death benefits or insurance.
6. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.
7. Expenses in connection with educational and recreational activities for the benefit of employees.

A. This account shall include pensions paid to or on behalf of retired employees or accrued to provide for pensions or payments for the purchase of annuities for this purpose, when the utility has definitely, by contract, committed itself to a pension plan under which the pension funds are irrevocably devoted to pension purposes and payments for employee accident, sickness, hospital, and death benefits, or insurance therefor. Include also, expenses incurred in medical, educational, or recreational activities for the benefit of employees and administrative expenses in connection with employee pensions and benefits.

B. The utility shall maintain a complete record of accruals or payments for pensions and be prepared to furnish full information to RUS of the plan under which it has created or proposes to create a pension fund and a copy of the declaration of trust or resolution under which the pension plan is established.

C. There shall be credited to this account, the portion of pensions and benefits expenses which is applicable to nonutility operations, the specific functional operations, maintenance, and administrative expense accounts, and to construction and retirement activities unless such amounts are distributed directly to the accounts involved and are not included herein in the first instance.

D. Records in support of this account shall be so kept that the total pensions expense, the total benefits expense, the administrative expenses included herein, and the amounts of pensions and benefits expenses transferred to the operations, maintenance, administrative, construction or retirement accounts will be readily available.
§ 1767.31

C. The account shall be maintained so as to readily reflect the amounts of cash outlays, utility service supplied without charge, and other items furnished without charge.

Note A: Franchise taxes shall not be charged to this account, but to Account 408.1, Taxes Other Than Income Taxes, Utility Operating Income.

Note B: Any amount paid as initial consideration for a franchise running for more than one year shall be charged to Account 302, Franchises and Consents.

928 Regulatory Commission Expenses

A. This account shall include all expense (except pay of regular employees only incidentally engaged in such work) properly includible in utility operating expenses, incurred by the utility in connection with formal cases before regulatory commissions or other regulatory bodies or cases in which a body is a party, including payments made to a regulatory commission for fees assessed against the utility for pay and expenses of such commission, its officers, agents, and employees, and also including payments made to the United States for the administration of the Federal Power Act.

B. Amounts of regulatory commission expenses which, by approval or direction of RUS, are to be spread over future periods shall be charged to Account 182.3, Other Regulatory Assets, and amortized by charges to this account.

C. The utility shall be prepared to show the cost of each formal case.

Items

1. Salaries, fees, retainers, and expenses of counsel, solicitors, attorneys, accountants, engineers, clerks, attendants, witnesses, and others engaged in the prosecution of or defence against petitions or complaints presented to regulatory bodies or in the valuation of property owned or used by the utility in connection with such cases.

2. Office supplies and expenses, payments to public service or other regulatory commissions, stationery and printing, traveling expenses, and other expenses incurred directly in connection with formal cases before regulatory commissions.

Note A: Exclude from this account and include in other appropriate operating expense accounts, expenses incurred in the improvement of service, additional inspection, or rendering reports which are made necessary by the rules and regulations, or orders, of regulatory bodies.

Note B: Do not include in this account amounts includible in Account 302, Franchises and Consents; Account 181, Unamortized Debt Expense; or Account 214, Capital Stock Expense.

929 Duplicate Charges—Credit

This account shall include concurrent credits for charges which may be made to operating expenses or to other accounts for the use of utility service from its own supply. Include, also, offsetting credits for any other charges made to operating expenses for which there is no direct money outlay.

930.1 General Advertising Expenses

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials used, and expenses incurred in advertising and related activities, the cost of which by their content and purpose are not provided for elsewhere.

Items

Labor:

1. Supervision.

2. Preparing advertising material for newspapers, periodicals, and billboards and preparing or conducting motion pictures, radio, and television programs.

3. Preparing booklets and bulletins used in direct mail advertising.

4. Preparing window and other displays.

5. Clerical and stenographic work.

6. Investigating and employing advertising agencies, selecting media, and conducting negotiations in connection with the placement and subject matter of advertising.

Taxes:

1. Federal and state unemployment.

2. F.I.C.A.

Employee Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees’ labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:

1. Accruals for or payments to pension funds or to insurance companies for pension purposes.

2. Group and life insurance premiums (credit dividends received).

3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.

4. Payments for accident, sickness, hospital, and death benefits or insurance.

5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.

6. Expenses in connection with educational and recreational activities for the benefit of employees.

Insurance:
1. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.

2. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.

3. Fees and expenses of claim investigators.

4. Payment of awards to claimants for court costs and attorneys' services.

5. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.

7. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)

8. Cost of safety, accident prevention, and similar educational activities.

Materials and Expenses:

1. Advertising in newspapers, periodicals, billboards, and radios.

2. Advertising matter such as posters, bulletins, booklets, and related items.

3. Fees and expenses of advertising agencies and commercial artists.

4. Postage and direct mail advertising.

5. Printing of booklets, dodgers, and bulletins.

6. Supplies and expenses in preparing advertising materials.

7. Office supplies and expenses.

Note A: Properly includible in this account is the cost of advertising activities on a local or national basis of a goodwill or institutional nature, which is primarily designed to improve the image of the utility or the industry, including advertisements which inform the public concerning matters affecting the company's operations, such as, the cost of providing service, the company's efforts to improve the quality of service, and the company's efforts to improve and protect the environment. Entries relating to advertising included in this account shall contain or refer to supporting documents which identify the specific advertising message. If references are used, copies of the advertising message shall be readily available.

Note B: Exclude from this account and include in Account 436.4, Expenditures for Certain Civic, Political and Related Activities, expenses for advertising activities, which are designed to solicit public support or the support of public officials in matters of a political nature.

930.2 Miscellaneous General Expenses

This account shall include the cost of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, property insurance, property taxes, and expenses incurred in connection with the general management of the utility not provided for elsewhere.

Items

Labor:

1. Miscellaneous labor not elsewhere provided for.

Taxes:

1. Federal and state unemployment.

2. F.I.C.A.

3. Property.

Employee Pensions and Benefits: The portion of employee pensions and benefits specifically identifiable with employees' labor costs charged herein or, in the absence of specific employee identification, the portion of employee pensions and benefits, allocated on the more equitable basis of either direct labor dollars or direct labor hours, applicable to the labor items detailed above, including:

1. Accruals for or payments to pension funds or to insurance companies for pension purposes.

2. Group and life insurance premiums (credit dividends received).

3. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.

4. Payments for accident, sickness, hospital, and death benefits or insurance.

5. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.

6. Expenses in connection with educational and recreational activities for the benefit of employees.

Insurance:

1. Premiums payable to insurance companies for fire, storm, burglary, boiler explosion, lightning, fidelity, riot, and similar insurance.

2. Amounts credited to Account 228.1, Accumulated Provision for Property Insurance, for similar protection.

3. Special costs incurred in procuring insurance.

4. Insurance inspection service.

5. Insurance counsel, brokerage fees, and expenses.

6. Premiums payable to insurance companies for protection against claims from injuries and damages by employees or others, such as public liability, property damages, casualty, employee liability, etc., and...
amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.

7. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.

8. Fees and expenses of claim investigators.

9. Payment of awards to claimants for court costs and attorneys' services.

10. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.

12. Compensation paid while incapacitated as the result of occupational injuries. (See Account 924, Note A.)

13. Cost of safety, accident prevention, and similar educational activities.

Expenses:

1. Industry association dues for company memberships.

2. Contributions for conventions and meetings of the industry.

3. Research, development, and demonstration expenses not charged to other operation and maintenance expense accounts on a functional basis.

4. Communication service not chargeable to other accounts.

5. Trustee, registrar, and transfer agent fees and expenses.

6. Stockholders meeting expenses.

7. Dividend and other financial notices.

8. Printing and mailing dividend checks.

9. Directors' fees and expenses.

10. Publishing and distributing annual reports to stockholders.

11. Public notices of financial, operating, and administrative functions of the utility. (See §1767.17(c).)

931 Rents

This account shall include rents properly includible in utility operating expenses for the property of others used, occupied, or operated in connection with the customer accounts, customer service and informational, sales, general, and administrative functions of the utility. (See §1767.17(c).)

(Maintenance)

935 Maintenance of General Plant

A. This account shall include the cost assignable to customer accounts, sales, administrative, and general functions of labor, employee pensions and benefits, social security and other payroll taxes, injuries and damages, materials used, and expenses incurred in the maintenance of property, the book cost of which is includible in Account 390, Structures and Improvements; Account 391, Office Furniture and Equipment; Account 397, Communication Equipment; and Account 398, Miscellaneous Equipment. (See §1767.17(b).)

B. Maintenance expenses on office furniture and equipment used elsewhere than in general, commercial, and sales offices shall be charged to the following accounts:

4. Other Power Generation, Account 554.

5. Transmission, Account 573.

6. Distribution, Account 598.

7. Merchandise and Jobbing, Account 416.

8. Garages, Shops, etc., Appropriate clearing account, if used.

Note: Maintenance of plant included in other general equipment accounts shall be included herein unless charged to clearing accounts or to the particular functional maintenance expense account indicated by the use of the equipment.

§§ 1767.32–1767.40 [Reserved]

§ 1767.41 Accounting methods and procedures required of all RUS borrowers.

All RUS borrowers shall maintain and keep their books of accounts and all other books and records which support the entries in such books of accounts in accordance with the accounting principles prescribed in this section. Interpretations Nos. 133, 134, 137, 403, 404, 602, 606, 618, 627, 628, and 629 adopt and implement the provisions of standards issued by the Financial Accounting Standards Board (FASB). Each interpretation includes a synopsis of the requirements of the standard as well as specific accounting requirements and interpretations required by RUS. The synopsis provides general information to assist borrowers in determining whether the standard applies to an individual cooperative’s operations. The synopsis is not intended to change the requirements of the FASB standards unless it is set forth in the section entitled RUS Accounting Requirements in each interpretation. If a particular borrower believes a conflict exists between the FASB standard and an RUS interpretation, the borrower shall contact the Director, PASD, to seek resolution of the issue.

</tbody>
</table>

101 Work Order Procedures

When a minor item of property is removed from service and not replaced, a retirement work order is not required except in the case of a conductor. The cost of the minor item shall remain in the appropriate plant account until the retirement unit, of which it is a part, is retired. However, as conductor is recorded in feet and is not part of any specific retirement unit, conductor shall be retired even though the amount taken down and not replaced is less than a retirement unit (two spans).

When minor items of plant are removed and not replaced, material salvaged shall be recorded on a material salvage ticket. Items of material recorded on this ticket shall be charged to the materials and supplies account and credited in the miscellaneous columns of the Materials Register to the
Accumulated Provision for Depreciation. In this example, it is assumed that the cost of removal is nil. If, however, costs are incurred during the removal of minor items of plant, these costs shall reduce the credit to the Accumulated Provision for Depreciation.

When a staking sheet supporting a single work order reflects a combination of new construction and replacements, or system improvements, the predominant cost shall be the governing factor in determining the amount of cost RUS will finance. To illustrate, assume that a service is to be run to a new home near the end of an existing line. On inspection, the pole from which the service is to be run is found to be in very poor physical condition and must be replaced. In addition, a single span of wire and a service are presently connected to this pole which serve no purpose. The home originally served has been demolished and the existing span, pole, and service were retired. In other words, what started out to be simply the installation of a new service now includes the retirement of a span of wire, a pole, and a service; the replacement of a pole; and the running of a new service. Assuming the replacement of the pole is the costliest part of this project, the construction and retirement activity shall be classified as an ordinary replacement even though the work includes new construction and retirements without replacement.

102 Line Conversion

If it is necessary to move a conductor from one location to another on a pole assembly during the conversion of a line from one phase to another phase, the cost of moving the conductor is capitalizable as a system improvement.

103 Sacrificial Anodes and the Replacement of a Neutral

Many utilities conduct studies to determine whether sacrificial anodes are needed to protect underground cable against corrosion. The following procedures shall be followed to account for sacrificial anodes and the replacement of a neutral:

1. If the study results in the installation of sacrificial anodes, the cost of the study shall be capitalized to Account 367, Underground Conductors and Devices. If the study does not result in the installation of anodes, the cost shall be charged to Account 594, Maintenance of Underground Lines.

2. Costs incurred in the first installation are capitalizable even though anodes are considered minor items of property. However, only the first costs of installation shall be capitalized. All subsequent replacements of anodes shall be expensed.

3. Sacrificial anodes do not constitute a record unit; therefore, the cost of anodes shall be added to the cost of the underground cable unit.

4. Because a neutral is part of an underground cable record unit, and is not, in and of itself, a record unit, the cost to replace a corroded neutral shall be charged to Account 594, Maintenance of Underground Lines.

104 Terminal Facilities

Borrowers are sometimes required to construct terminal facilities in the transmission line of another utility in order to receive power from their power supplier. The document executed between the borrower and the utility is normally referred to as a “License Agreement”. The license agreement may stipulate that certain items of the terminal facilities are to be transferred to, and become the property of, the other utility upon completion of the construction. The accounting for this type of transaction shall be as follows:

1. All construction costs incurred shall be charged to a work order. Upon completion of the construction and accumulation of all costs, the cost of the facilities that become the property of another utility shall be transferred from construction work-in-progress to Account 303, Miscellaneous Intangible Plant. The cost of the plant for which the borrower retains title shall be charged to the appropriate plant accounts.

2. The cost of the facilities recorded in Account 303 shall be amortized to Account 405, Amortization of Other Electric Plant, over the contract term or the estimated useful service life of the plant, whichever is shorter. If the related contract or contracts for this power supply are terminated, the
unamortized balance shall be expensed, in the current period, in Account 557.

105 Pole Top Disconnect Switch

The installation of pole top service disconnect switches, where title is retained by the utility, shall be capitalized in Account 371, Installations on Customers' Premises. If a switch cabinet is purchased with a current transformer included as an integral part of the cabinet, the entire cost of the switch shall be charged to Account 371. If the current transformer is installed outside of the switch cabinet, the transformer, meter, and meter base, together with the first installation costs, shall be capitalized, upon purchase, in Account 370, Meters.

Payments received from the customer toward construction costs shall be credited to Account 371, Installations on Customers' Premises. The associated maintenance costs shall be charged to Account 587, Customer Installations Expenses, or to Account 597, Maintenance of Meters, as appropriate.

When pole top disconnect switches are installed and title is held by the customer, the cost of the material shall be charged to Account 456, Other Electric Revenues and the receipts from the sale of line material shall be credited to Account 456. The portion of the receipts for resale material as well as that for installation shall be credited to Account 415, Revenues from Merchandising, Jobbing, and Contract Work. The cost of resale material sold and the cost of installation shall be charged to Account 416, Costs and Expenses of Merchandising, Jobbing and Contract Work.

Future maintenance costs incurred by the cooperative that are not billed to the customer shall be charged to Account 587, Customer Installations Expenses.

106 Steel Pole Reinforcers

The cost associated with the purchase and installation of steel pole reinforcement shall be charged to Account 593, Maintenance of Overhead Lines.

107 Mobile Substations

Mobile substations shall be accounted for in a manner similar to that for a spare and are, therefore, included as part of transmission or distribution station equipment, depending upon the use of the mobile substation. The mobile substation, together with the trailer on which it is permanently mounted, shall be capitalized upon purchase. A general purpose truck or tractor used to relocate a mobile substation and trailer shall be classified as transportation equipment.

The composite depreciation rate used for transmission plant or distribution plant, as appropriate, shall be applied to the mobile substation.

108 Security Lights

Where a pole supports both a secondary wire and a security light, the cost of the pole shall be charged to Account 364, Poles, Towers, and Fixtures, even though the plant investment in security lights is recorded in Account 371, Installations on Customers' Premises.

109 Joint Use

There are many cases in which an electric utility and a communications utility enter into an agreement that provides for joint use of poles. Under the terms of these agreements, either utility may occupy the poles of the other upon payment of a stipulated annual rental. If such joint occupancy necessitates the use of a higher than standard pole, the new pole shall be provided at the expense of the utility having the need for the higher pole.

When an electric utility replaces, at its own expense, a standard pole belonging to the communications utility with a higher pole, the cost of the higher pole, less net salvage (if any) of the pole replaced, shall be charged to the account in which the pole rental is included.

Contributions made to an electric utility by a communications utility for the costs incurred in stubbing joint use electric poles shall be credited to Account 593, Maintenance of Overhead Lines. The cost of pole stubbing on electric plant distribution facilities shall be charged to Account 593.
An investment in outside plant that is held in joint ownership shall be recorded in the appropriate plant accounts at its cost to the utility. For continuing property record purposes, jointly owned property units shall be priced at their cost to the utility and shall be appropriately segregated in the CPRs to indicate joint ownership.

110 First Clearing and Grading of Land and Rights of Way

Utility accounting practice requires the costs associated with the first clearing and grading of land and rights of way and any resulting damage there to, to be included in the accounts for structures and improvements or equipment to which such costs relate. Since the first clearing, as well as clearing which is "directly occasioned by the building of a structure," is done, not for the purpose of enhancing the value of the land or the rights of way, but for the purpose of constructing plant, these costs are more directly related to the construction of plant than to the purchase of land or rights of way. The accounts shall be charged as follows:

1. For overhead transmission pole lines, Account 356, Overhead Conductors and Devices;
2. For overhead distribution lines, Account 365, Overhead Conductors and Devices; and
3. For underground distribution lines, Account 366, Underground Conduit, for a conduit installation; or Account 367, Underground Conductors and Devices, for a direct burial installation.

111 Engineering Contracts for System Planning

Engineering costs for long-range system plans shall be charged to Account 183, Preliminary Survey and Investigation Charges, as incurred. The cost of engineering services incurred in preparing a long-range system plan represents a legitimate component of the total cost of construction of all system improvements detailed in the plan. The amount of engineering costs to be associated with any specific system improvement is the annual costs incurred up to the time of the allocation (not previously allocated), plus that portion of the initial cost which relates to the particular construction in question. If any major system improvement included in the engineering plan is not constructed, or if the study is superseded by another complete study, the cost of that portion of the original study not resulting in construction shall be charged to Account 182.2, Unrecovered Plant and Regulatory Study Costs, if the costs are to be recovered through future rates. Costs recorded in Account 182.2 shall be amortized to Account 407, Amortization of Property Losses, Unrecovered Plant and Regulatory Study Costs, as the costs are recovered through the rates. Any costs included in Account 182.2 that are disallowed for rate-making purposes shall be charged to Account 426.5, Other Deductions.

The allocation of engineering services to the various construction projects requires the exercise of judgment. In some cases, system improvements are continuous over a period of months or years, thus permitting the engineering cost to be spread monthly as overhead in relation to the direct costs incurred in construction. (If a substantial amount of retirement work is performed in connection with system improvements, a proportionate share of the engineering cost shall be allocated on the basis of direct retirement labor.) If the system improvements detailed in the plan are not performed in a continuous manner, the engineering cost shall be allocated on the basis of the estimated costs of the various larger system improvement projects which result from the long-range plan.

If construction is performed by contract, the engineering cost applicable thereto shall be transferred from Account 183 to Account 107, Construction Work-in-Progress—Electric, and thereby spread to the appropriate plant accounts on the basis of contract costs.

In the case of system improvement construction performed on the basis of work orders, engineering costs shall be transferred to Account 107, Construction Work-in-Progress—Electric, and included in total work order costs as either overhead or special services. If engineering services are not readily identifiable with individual work orders, they shall be capitalized as overhead. If engineering costs for each
work order are readily separable from the engineering costs for all other work orders, they shall be capitalized as special services.

In summarizing system improvement work orders on the RUS Form 219, Inventory of Work Orders, the amount of engineering costs previously approved for advance on the long range plan, if any, shall be deducted to determine the balance of loan funds subject to advance by RUS.

112 Determination of Availability of Service

Costs relating to the determination of availability of service, rates, and similar items for individual applicants shall be charged to Account 912, Demonstrating and Selling Expenses. If it is expected that construction will result, the costs incurred to provide service, including staking, shall be charged to Account 107, Construction Work-in-Progress—Electric. If construction does not result, Account 107 shall be credited and Account 426.5, Other Deductions, shall be charged.

113 Temporary Facilities (Services)

Plant installed for temporary use, a period of less than 1 year, shall be recorded in Account 185, Temporary Facilities, net of any payments received from customers. Upon retirement, this net cost plus cost of removal, less any salvage value, shall be cleared to Account 451, Miscellaneous Service Revenues.

When a temporary service is installed at the site of a building under construction, the location of the permanent service entrance and the load and its characteristics are usually known. The temporary service is of the proper capacity and is so located or has sufficient slack, that it can be relocated to serve the new building as a permanent service. Under these conditions, the service shall be charged to Account 369, Services, when first installed. The cost of moving and attaching the service to the permanent service entrance shall be charged to Account 593, Maintenance of Overhead Lines or Account 594, Maintenance of Underground Lines, as appropriate.

114 Construction Work-in-Progress Damaged or Destroyed by Storm

When installed plant, not yet completed or completed but not yet placed in service, has been damaged or destroyed by storm, the cost of the repair and restoration shall be added to the cost of construction and capitalized if the plant was constructed under force account or work order construction, and the utility paid for the cost of the repairs. If the plant was constructed under contract, the contractor is required to deliver the plant in new condition. Therefore, any repairs required prior to the completion of construction and acceptance by the utility, are ordinarily borne by the contractor.

115 Liquidated Damages

Liquidated damages are amounts paid by or assessed against contractors for the completion of construction after an agreed upon date. Liquidated damages shall be credited to Account 107, Construction Work-in-Progress—Electric. Since these damages accrue during the construction period, they become one of the components of construction cost. Even though a portion of these damages may compensate the utility for costs which are not “identifiable,” no portion of the damages shall be credited to revenue or expense.

When a contractor has been paid in full from loan funds or from funds to be reimbursed by loan funds without a deduction for liquidated damages, the amount of liquidated damages received shall be deposited in the Construction Fund. This amount shall be reflected by a decrease in column 5, “Total Expenditures to Date,” of the RUS Form 595, Financial Requirement and Expenditure Statement, and as an increase in column 6, “Cash Balance.” If liquidated damages are obtained by withholding an equivalent amount from the contractor’s payment, the net result will be the same.

116 Nonrefundable Payments for Construction

Nonrefundable payments (contributions) from customers and developers for underground construction shall
first be credited to Account 107.2, Construction Work-in-Progress—Force Account. When the constructed plant is unitized and distributed to the individual plant accounts, the contributions shall be credited to those plant accounts which gave rise to the contribution.

When a customer or developer furnishes a trench or other service in connection with buried plant, the cooperative shall debit Account 107.2 with the actual or estimated cost of the service performed, and account for the credit as set forth above.

117 Refunds of Overpayments for Materials and Equipment

Refunds of overpayments for materials and equipment previously purchased are occasionally received as the result of legal action brought against electrical suppliers for price fixing in violation of antitrust laws. Such refunds shall be accounted for as follows:

1. The refund shall first be applied to any litigation costs that were incurred.
2. Refunds for special equipment items shall be accounted for, in detail, on the Summary of Special Equipment Costs and credited against the appropriate plant accounts.
3. Other material or equipment items that were installed through work orders or a materials furnished contract shall be adjusted on an amended work order. The amended work order shall include full details of the refund.
4. Continuing property records shall be adjusted to reflect the above transactions.
5. Amounts approved for advance on the RUS Form 595, Financial Requirement and Expenditure Statement, and on the loan budget records, shall be adjusted. For special equipment items, the adjustment shall be requested in a letter to RUS. For materials installed by work order or contract, the adjustments shall be made through credits shown on the RUS Form 219, Inventory of Work Orders.
6. Refunds for material currently in stock shall be credited to Account 154, Plant Materials and Operating Supplies.
7. If the material was used in maintenance activities or operations, the refund shall be credited to the appropriate maintenance or operations expense account.
8. Refunds for materials or equipment financed from loan funds shall be deposited in the Construction Fund—Trustee Account or remitted to RUS as a special payment on a note. Other refunds shall be deposited in the general funds.

118 Load Control Equipment

The primary purpose of a Load Management System is to optimize load dispatch and to reduce or minimize system peaks in order to reduce purchases of power or to delay or eliminate the need for construction of new plant. A Load Management System may be used on integrated systems, or on generation, transmission, or distribution systems separately. The telemetry equipment used for data acquisition and interpretation may be included at various points on a system, such as generation, transmission, or distribution substation, switchyards or on consumers' premises.

An effective load control program should be coordinated with the G&T and requires full participation of all member distribution systems. The G&T monitors the power load of the total member distribution system to predict the time of the system's peak load. An optimal load control strategy is developed by the G&T and is passed on from the G&T computer system to the load control computer systems of the member distribution cooperatives.

The equipment at the member distribution system level is the type actually being used by an integrated power system to operate a load control program. The equipment used may vary from one integrated power system to another. The selection of equipment used is determined by the information needs of the integrated power system, and the method selected to operate the load control system.

Some equipment performs only SCADA-type functions. This equipment is included with the equipment that performs only load control functions because SCADA-type equipment is an integral part of a load control program. An effective load control strategy requires current information on loads so that member distribution systems can
determine the actual loads to be shed and the duration of the load control.

The function and location of the load control equipment are the primary factors in determining the account in which the equipment shall be recorded. The following example depicts a common load control system and the associated accounting. Equipment type may vary, thereby necessitating the use of accounts not prescribed below. In all instances, however, the function and location of the equipment shall dictate the appropriate account classification.

**G&T Borrower**

1. **Coordinating System Equipment**

   Coordinating System Equipment is the data acquisition, processing and control hardware and software used to coordinate the load control efforts of the member distribution system. Generally, this equipment is dedicated to load control use and is not shared with other electric utility activities.

   The purpose of the G&T load control computer system is to reduce or minimize the peak power requirements of the entire member distribution system. This involves load dispatching to control transmission circuits and breakers. The computer system for load control shall, therefore, be recorded in Account 353, Station Equipment, with the associated operating expenses recorded in Account 561, Load Dispatching, and maintenance expenses recorded in Account 570, Maintenance of Station Equipment.

2. **Coordinating System Communications Link**

   The G&T load control computer system is usually linked to the load control computer system for each member distribution system by a radio or telephone link that is dedicated to that purpose and is not shared with other communication activities. Under such circumstances, communications equipment shall be classified in Account 353, Station Equipment. If the communications equipment is shared with general use or voice communications equipment, however, the equipment shall be classified in Account 397, Communication Equipment.

3. **Depreciation**

   Load control equipment shall be recorded in separate subaccounts of the primary plant accounts detailed above and shall be depreciated based upon the owner’s estimate of the equipment’s useful service life.

**Distribution Borrower**

1. **Member System Equipment**

   Member system equipment is the data acquisition, processing and control hardware and software used as a subset to the overall load control efforts by the integrated power system.

   The member system computer for each distribution member system accepts the control strategy from the G&T coordinating system and develops the tables that determine the control loads that are to be shed and the duration of the load control. The member system computer monitors the usage at each of its delivery points. This usage data is then transmitted to the G&T coordinating system for use in developing load projects and evaluating control strategies for the integrated power system. The member system computer is generally dedicated to load control use and is not shared with other electric utility operations.

   The member computer system shall be recorded in Account 362, Station Equipment. The associated operating expenses shall be recorded in Account 581, Load Dispatching, and maintenance expenses shall be recorded in Account 592, Maintenance of Station Equipment.

2. **Substation Remote Controllers**

   Substation Remote Controllers are located at the distribution substation. They accept control signals from the member system computer and couple the signal to the portion of the distribution system to which it is connected. Substation Remote Controllers also serve as a receiver of inbound signals from transponders located in the distribution system. They also send data back to the member system computer.

   Substation Remote Controllers shall be recorded in Account 362, Station Equipment. The associated operating expenses shall be recorded in Account 592, Maintenance of Station Equipment.
§ 1767.41

582. Station Expenses, and maintenance expenses shall be recorded in Account 592, Maintenance of Station Equipment.

3. Substation Injection Units

Substation Injection Units are used only in power line based systems and are located in distribution substations. A major function of the Substation Injection Unit is to receive load control signals from the member system computer and inject them into the power line based system to be transmitted to the Load Control Receivers. Substation Injection Units can also perform control and SCADA functions similar to those performed by Substation Remote Controllers.

Substation Injection Units shall be recorded in Account 362, Station Equipment. The associated operating expenses shall be recorded in Account 582, Station Expenses, and maintenance expenses shall be recorded in Account 592, Maintenance of Station Equipment.

4. Remote Terminal Units

Remote Terminal Units perform electric utility SCADA functions in a distribution substation or delivery point. These functions include monitoring equipment for abnormal operating conditions, monitoring analog quantities such as conductor voltage or substation load, and controlling of certain equipment within the substation.

Remote Terminal Units shall be recorded in Account 362, Station Equipment. The associated operating expenses shall be recorded in Account 582, Station Expenses, and maintenance expenses shall be recorded in Account 592, Maintenance of Station Equipment.

5. Line Device Transponder

A Line Device Transponder directly controls a piece of distribution apparatus, such as a voltage regulator or a power factor correction capacitor, located on a distribution feeder and not accessible to a Remote Terminal Unit. The Line Device Transponder acts on the control functions and reports back to the member system computer upon completion of the requested action. This transponder is located at the site of the distribution apparatus being controlled.

Line Device Transponders shall be recorded in Account 368, Line Transformers. The associated operating expense shall be recorded in Account 583, Overhead Line Expenses, or Account 584, Underground Line Expenses, as appropriate, and maintenance expenses shall be recorded in Account 595, Maintenance of Line Transformers.

6. Communications Verification Transponders

Communication Verification Transponders are used to respond to inquiries from Substation Remote Controllers. In power line based systems, these transponders are used to verify the performance of the communications system. They are also used during adverse system operations to isolate sections of the distribution system that are experiencing an outage.

Communication Verification Transponders shall be recorded in Account 362, Station Equipment. The associated operating expenses shall be recorded in Account 582, Station Expenses, and maintenance expenses shall be recorded in Account 592, Maintenance of Station Equipment.

7. Load Control Receivers

The Load Control Receiver, also known as a load control switch, is located at the site of the consumer’s load. These receivers directly control the electric supply to an end-use appliance, such as an electric water heater, central air conditioning compressor, or irrigation pump. The amount of time that an appliance will be turned off by the load control receiver is preset. When the member system computer determines that load shedding is necessary, it sends a signal to the communication link which then sends signals directly to the Load Control Receivers. In a power line based system, the signal from the communications link is sent by radio or telephone line to the Substation Injection Units, which then signals the Load Control Receivers to shut down the appliances for the present time. In nonpower line based systems, the signal from the communications link is sent by radio directly to the Load Control Receivers.

Load Control Receivers are located on the consumer’s side of the meter. When the member distribution system retains title to the Load Control Receivers and assumes full responsibility.
for maintenance and replacement of the equipment, it shall be classified in Account 371, Installations on Customer’s Premises. Load Control Receivers that are donated or given to consumers shall be charged to Account 908, Customer Assistance Expenses.

Operating and maintenance expenses applicable to Load Control Receivers recorded in Account 371 shall be charged to Account 587, Customer Installations Expenses, and Account 598, Maintenance of Miscellaneous Distribution Plant, respectively. Expenses applicable to Load Control Receivers donated or given to consumers shall be recorded in Account 908, Customer Assistance Expenses.

Load Control Receivers may be moved on a continual basis from one customer location to another and are, therefore, considered to be special equipment items. When ownership is maintained by the member distribution cooperative, Load Control Receivers shall be accounted for in accordance with the special equipment procedures outlined in Accounting Interpretation No. 119 of this section.

8. Communication Links

The communication link in the member distribution systems between the Member System Computer, the Substation Remote Controllers or Substation Injection Units, Remote Terminal Units, Line Device Transponders, Communication Verification Transponders, and Load Control Receivers is usually accomplished by radio, telephone line, or power line based system. The communication links are normally dedicated to the SCADA and load control functions being served. Under such circumstances, communication equipment shall be recorded in Account 362, Station Equipment. If, however, the communication equipment used is shared with general use or voice communications equipment, the equipment shall be charged to Account 397, Communication Equipment.

9. Depreciation

Load control equipment shall be recorded in separate subaccounts of the primary plant accounts detailed above and shall be depreciated based upon the manufacturer’s estimate of the equipment’s useful service life.

119 Special Equipment

Special Equipment items are classified as such because they are continually being moved from one location to another due to load changes and maintenance practices. The USoA provides accounting that differs from that used for other types of materials. The cost, new, of special equipment items shall be capitalized at the time of purchase; it shall not be charged to Account 154 as is the case with other materials. The first installation cost, as well as all incidental costs necessary to prepare the equipment for use, shall be capitalized with the material upon purchase. All subsequent costs of removing, resetting, changing, renewing oil, and repairing constitute operations and maintenance expenses. The capitalized cost of special equipment items, including the first installation, shall be removed from the electric plant accounts only when the items are abandoned or retired from the system.

Meters, line-type transformers, oil circuit reclosers, sectionalizers, current and potential transformers, meter sockets, and other metering equipment listed in Account 370, Meters, as well as pole-type and underground voltage regulators in Account 368, Line Transformers, are considered to be special equipment items. Similarly, load control receivers (load control switches) recorded in Account 371, Installations on Customers’ Premises, are considered to be items of special equipment. (See Interpretation No. 118.) Transformers, voltage regulators, metering equipment, and current and potential transformers for substations are not.

Special equipment items which are classified as nonusable shall be segregated in the warehouse and retired from service. The Summary of Special Equipment Costs shall be retitled Summary of Special Equipment Costs Retired and used for this purpose. A journal entry reflecting this information shall be prepared and posted to the books. Since loan funds for special equipment, including first installation costs, are approved for advance by RUS upon receipt of the borrower’s written estimate of funds required, and not on
the basis of an Inventory of Work Orders, it is improper to take a credit for any salvage involved in the retirement of special equipment on the Inventory of Work Orders.

120 Meter Sockets and Meters

When a utility furnishes meter sockets, ownership by the utility of the meter socket or base, as well as the meter itself, is established by virtue of them being furnished without cost to the consumer by the cooperative. While no agreement as to ownership between the cooperative and the property owner exists, cooperative ownership is implied by long standing practice and tradition in the electric utility industry.

121 Minimum—Maximum Voltmeters

A minimum—maximum voltmeter is used to record the minimum and maximum voltages at a specific line location over a period of time. It is normally installed on a pole in connection with a 1½ kVA transformer, a meter base and connecting wires, and other small items of materials. Meter bases are ordinarily set for these voltmeters throughout the system, and a lesser number of voltmeters are rotated among them periodically to obtain voltage readings. An average system may have one voltmeter to two installations, with a maximum of 20 or 25 voltmeters for the whole system.

Minimum—maximum voltmeters shall be recorded, through work orders, in Account 370, Meters, when installed. The cost of the transformers shall remain in Account 368, Line Transformers, with the cost of the meter bases remaining in Account 370, Meters. The miscellaneous material used in installing the transformer and the meter base shall be charged to Account 370, Meters.

Maintenance expense shall be charged to either Account 595, Maintenance of Line Transformers, or Account 597, Maintenance of Meters, as appropriate. Costs associated with reading the voltmeters shall be charged to Account 583, Overhead Line Expenses, and the cost of relocating or changing the complete installation or any part thereof, other than retirement of the meter base, shall be charged to Account 583, Overhead Line Expenses, or Account 586, Meter Expenses.

122 Retrofitting Demand Meters

A demand meter measures the amount of electricity used over a period of time in kilowatt-hours (kWh) and indicates the maximum kilowatts (kW) required at any one time by means of a pointer.

Electronic or solid state demand meters have a direct readout which reads kilowatt demand to two decimal places. The use of a direct readout demand meter may result in increased revenues as pointer readings tend to register lower than actual usages.

The process of retrofitting a demand meter replaces the pointer with a direct readout. The cost of such a replacement is usually expensed as a minor item of property; however, since the use of a direct readout results in a substantial betterment, the excess cost of the replacement over the estimated cost, at current prices, of replacing the pointer without the betterment is capitalized.

123 Transformer Conversions

The conversion of an overhead transformer to an underground transformer constitutes a betterment and shall, therefore, be capitalized.

124 Transclosures

Transclosures are enclosures or cabinets in which line transformers are mounted. The cost of transclosures that are purchased separately from the transformer shall be charged to Account 368, Line Transformers, when received, and capitalized, upon installation, to Account 368, Line Transformers, as a separate unit of property. If the case and the transformer are inseparable, the unit is considered a transformer and shall be capitalized upon purchase.

125 Retirement Units

Services

A retirement unit shall consist of a complete service rather than the individual wires comprising that service. If each separate wire of a service were
treated as a retirement unit, the retirement unit would represent a comparatively small cost. Such a small unit of property would substantially increase the number of retirement work orders. The complete service shall, therefore, be considered a retirement unit.

Minor Items

When minor items of property are added separately from complete retirement units, the costs of these items shall be included in work orders, and by unitizing all costs of completed construction for a month, these minor items shall be spread to the retirement units of which they normally form a part. For example, to convert a two-phase line to a three-phase line requires the addition of a conductor, an insulator and a pole-top pin. A pole-top pin is typically capitalized as a component of the cost of the pole to which it is attached. Assuming this is the only work order for the month, the cost of this pin shall be charged to the conductor, so that its cost is included in the total cost of the project. In actual practice, however, this does not happen as it is normal to have a number of work orders for a given month, which include the setting of poles. In allocating the cost of all construction projects for the month, part of the cost of pole-top pins shall be allocated to poles even though the work orders on which they were capitalized did not include poles.

The retirement and replacement of isolated single retirement units cannot be charged to maintenance; a retirement and construction work order shall be used.

126 Establishment of Continuing Property Records

The costs of installing a system of continuing property records shall be charged to Account 930.2, Miscellaneous General Expenses, and may include:

1. Labor and expenses incurred in developing an inventory of property;
2. Labor and material costs incurred in connection with developing pole records including map preparation and pole cards; and
3. Labor and material costs (ledger sheets, etc.) incurred in connection with the installation of the record system.

127 Continuing Property Records for Buildings

When establishing continuing property records for a building where there is no detailed breakdown of contract costs, it is necessary to estimate the cost of the each component part. It should be noted that the establishment of continuing property records is not required for buildings; however, if CPRs are not maintained, all repairs including the replacement of major component parts shall be expensed in the period incurred.

128 Sale of Property

All proceeds deposited in the Construction Fund account from the sale of property, regardless of materiality, shall be reflected on the RUS Form 595, Financial Requirement and Expenditure Statement. Proceeds from the sale of property shall be reported on the Form 595, by budget purpose, as a reduction in total expenditures to date, column 5; and an increase in the cash balance, column 6.

Proceeds from the sale of property shall not be used to maintain an “Employee Fund.” A utility may, pursuant to board policy, use general funds for employee welfare equivalent in amount to proceeds received from the sale of scrap property. If general funds, in an amount equivalent to proceeds received from the sale of scrap property, are used for employee welfare, Account 926, Employee Pensions and Benefits, shall be charged.

129 Gain or Loss on the Sale of an Office Building

A gain on the sale of an office building shall be recorded in Account 421.1, Gain on the Disposition of Property, with a loss recorded in Account 421.2, Loss on the Disposition of Property. If the gain or loss will materially distort current year’s net margins, such gain or loss is reportable as an extraordinary item in Account 434, Extraordinary Income, or Account 435, Extraordinary Deductions.
§ 1767.41

130 Salvage and Obsolete Material

The value of material salvaged from the retirement of units of property reduces the loss on the retirement and shall be so applied. The value assigned to salvage shall be credited to Account 108, Retirement Work-in-Progress, which results in reducing net charges to the provision for depreciation when the work order is completed and cleared.

If salvage is sold, any difference between the realized value and the estimated value of the salvaged material shall be charged or credited to the appropriate provision for depreciation.

Salvage resulting from maintenance where no retirement units are involved shall be debited to the materials and supplies account, and credited to the appropriate maintenance account.

Occasionally a utility will have a loss due to obsolescence of materials on hand. If the loss is due to obsolescence of new material, the loss shall be charged to Account 428.5, Other Deductions. If the loss is due to obsolescence of used material, the loss shall be charged to the appropriate subaccount of Account 108, Accumulated Provision for Depreciation.

131 Plant Acquisition Adjustments

Plant acquisition adjustments shall be amortized to the operating expense accounts. These adjustments are recorded in Account 114, Electric Plant Acquisition Adjustments, and amortized to Account 406, Amortization of Electric Plant Acquisition Adjustments, or Account 425, Miscellaneous Amortization, as required by the regulatory commission having jurisdiction. Accounts 406 and 425 shall be closed to operating margins.

132 General Plant

When the unit method of depreciation is used for general plant items, gains and losses on sales, trades or disposals of equipment shall be recorded as such. If the composite method of depreciation is used, gains or losses on the disposal of general plant items shall be recorded in the appropriate depreciation reserve account.

A truck which is used only for transporting power operated equipment mounted thereon shall be charged, together with the installed equipment, to Account 396, Power Operated Equipment. If the same type of truck is used for transporting materials and supplies, tools and work equipment, personnel, or other items, the cost of the truck shall be charged to Account 392, Transportation Equipment.

Depreciation and other expenses relating to power operated equipment shall be accumulated in a subaccount of Account 184, Clearing Accounts, and distributed monthly on an equitable basis to the accounts properly chargeable.

Depreciation expense on vehicles and other work equipment, furniture and office equipment, and other such plant used in the construction of utility plant, is a proper component of construction cost. To avoid a duplicate advance of funds, however, the amount of depreciation on such items that has previously been financed from loan funds shall be deducted from Inventories of Work Orders submitted to RUS. This amount shall be specifically identified, and shown either monthly or annually as a single item in column 9 on the RUS Form 219, Inventory of Work Orders.

133 Plant Abandonments and Disallowances of Plant Costs

In December 1986, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 90, Regulated Enterprises—Accounting for Abandonments (Statement No. 90) and Disallowances of Plant Costs. This section provides an overview of the requirements outlined in Statement No. 90 together with the specific accounts that shall be used to record a plant abandonment or a disallowance of plant costs.

Plant Abandonments

When an abandonment becomes probable, the cost of the abandoned asset shall be removed from Construction Work-in-Progress or Plant-in-Service, as applicable. Before making this transfer, however, a determination must be made as to whether recovery of the allowed cost is likely to be provided with a full return on the investment during the period from the time
the abandonment becomes probable, to the time when recovery is completed, or with a partial or no return on the investment. This determination shall be made based upon the facts and circumstances of the specific abandonment, and past practices and current policies of regulatory jurisdiction.

If a full return on the investment is likely to be provided, any disallowance of all or part of the cost of abandoned plant that is both probable and reasonably estimated shall be recognized as a loss in the current year with the carrying basis of the asset reduced by an equal amount. The remaining cost of abandoned plant shall be recorded as a separate new asset.

If partial or no return on the investment is likely to be provided, any disallowance of abandoned plant costs that is both probable and reasonably estimated shall be recognized as a loss. The present value of the future revenues expected to be provided to recover the allowable cost of the abandoned plant and return on the investment, if any, shall be reported as a separate new asset. The discount rate used to compute the present value shall be the borrower's incremental borrowing rate, which is the rate that the borrower would have to pay to borrow an equivalent amount for a period equal to the expected recovery period. In determining the value of expected future revenues, the borrower shall consider the probable time period before the recovery is expected to begin and the probable time period over which recovery is expected to be provided.

The amount of the new asset shall be adjusted from time to time, as necessary, if new information indicates that the estimates used to record the new asset have changed. The carrying value of the new asset, however, shall not be adjusted for changes in the incremental borrowing rate. The amount of any adjustments shall be recorded as a gain or loss.

During the period between the date on which a new asset is recognized and the date on which recovery begins, the carrying amount shall be increased by accruing a carrying charge. The rate used to accrue the carrying charge shall be:

1. If a full return on the investment is likely, a rate equal to the allowed overall cost of capital in the jurisdiction in which recovery is expected to be provided shall be used.

2. If partial or no return is likely, the asset shall be amortized in a manner that will produce a constant return on the unamortized investment in the new asset equal to the rate at which the expected revenues were discounted.

Due to the nonprofit environment in which electric cooperatives operate, full recovery of interest expense on plant related long-term debt equates to full recovery of the rate of return for an investor-owned utility. Therefore, if a cooperative is permitted full recovery of the interest expense incurred on the long-term debt borrowed to finance construction of an abandoned plant, no discounting of the asset is required nor is accrual of the carrying charge permitted.

If, at the time the provisions of Statement No. 90 are first applied, the borrower elects to restate the financial statements, the financial statements for all periods presented shall be restated and the financial statements shall disclose the nature of the restatement and its effect on margins before extraordinary items, net margins, and patronage capital at the beginning of the earliest period presented. If the borrower elects not to restate the financial statements, the effect of applying Statement No. 90 shall be reported as a change in accounting principle and the financial statements shall disclose the nature of the change and the effect of applying Statement No. 90 on margins before extraordinary items and net margins.

The specific accounts that shall be used to record transactions involving plant abandonments are as follows:

1. In the year of the abandonment, the unrecoverable portion of the cost of abandoned plant included in construction work-in-progress shall be recognized as a loss by a charge to Account 426.5, Other Deductions, and a credit to Account 107, Construction Work-in-Progress.

2. The balance of the cost remaining in the construction work-in-progress account shall be credited to Account
107 and charged to Account 182.2, Unrecovered Plant and Regulatory Study Costs.

3. The difference between the charge to Account 182.2 and the present value of expected future revenues for recovery of the new asset, shall be recorded as a credit to Account 182.2 and a debit to Account 426.5. The credit to Account 182.2 shall be segregated from the amount charged to Account 182.2 by the use of a separate subaccount. Statement No. 90 does not require this segregation; however, it is necessary under the USoA to provide for the appropriate segregation of operating and nonoperating income.

4. During the waiting period for recovery of the new asset to begin, carrying charges shall be accrued by a debit to Account 182.2 with a concurrent credit to Account 421, Miscellaneous Nonoperating Income. Debits to Account 182.2 shall be treated as reductions to the credit subaccount of Account 182.2.

5. The borrower shall amortize the amount debited to Account 182.2 by charges to operating income, consistent with the way the amortized amounts are recovered through rates. These charges to income shall be recorded in Account 407, Amortization of Property Losses, Unrecovered Plant and Regulatory Study Costs.

6. As the recoverable amount recorded in Account 182.2 is recovered through rates, the borrower shall accrue income by charges to Account 182.2 and credits to Account 421, Miscellaneous Nonoperating Income. Accruals shall be computed by applying the same rate used to derive the present value of the asset established in Account 182.2, to the unamortized balance in that account. Accrued amounts charged to Account 182.2 shall be treated as reductions to the credit subaccount within Account 182.2.

Prior to implementing the accounting prescribed above, the borrower shall submit the details of each plant abandonment to RUS for approval.

Disallowances of Costs of Recently Completed Plant

When it becomes probable that a portion of the cost of recently completed plant will be disallowed for rate making purposes and a reasonable estimate of the amount of the disallowance can be made, the estimated amount of the probable disallowance shall be deducted from the reported cost of the plant and recognized as a loss. If a portion of the costs is explicitly, but indirectly disallowed, the equivalent amount of the cost shall be deducted from the reported cost of the plant and recognized as a loss. The specific accounts that shall be used to record transactions involving the disallowance of plant costs are as follows:

1. Estimated disallowed plant costs which the borrower records as a credit to Account 101, Electric Plant-in-Service, shall be charged to Account 426.5, Other Deductions.

2. If the loss qualifies as an extraordinary item under the criteria set forth in General Instruction No. 7 of the USoA, the borrower shall record the loss in Account 435, Extraordinary Deductions. To be considered extraordinary, an item shall be more than five percent of income computed before extraordinary items. If a borrower believes that a loss of less than five percent should be treated as an extraordinary item; the borrower shall, with commission approval, record the loss in Account 435 and report the loss as an extraordinary item. If the borrower is not subject to state commission jurisdiction, RUS approval is required.

134 Utility Plant Phase-in Plans

In August 1987, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 92, Regulated Enterprises—Accounting for Phase-in Plans (Statement No. 92). This section provides an overview of the requirements outlined in Statement No. 92.

The term phase-in plan is used to refer to any method of recognition of allowable costs in rates that meets all of the following criteria:

1. The method was adopted by the regulator in connection with a major, newly completed plant of the regulated enterprise or one of its suppliers or a major plant scheduled for completion in the near future.
2. The method defers the rates intended to recover allowable costs beyond the period in which those allowable costs would be charged to expense under generally accepted accounting principles applicable to enterprises in general.

3. The method defers the rates intended to recover allowable costs beyond the period in which those rates would have been ordered under the rate-making methods routinely used prior to 1982 by that regulator for similar allowable costs of that regulated enterprise.

If a phase-in plan is ordered by a regulator in connection with a plant on which no substantial physical construction had been performed before January 1, 1988, none of the allowable costs that are deferred for future recovery by the regulator under the plan for rate-making purposes, shall be capitalized for general-purpose financial reporting purposes (financial reporting).

If a phase-in plan is approved prior to 1982 that contains provisions contrary to those detailed above is not subject to the provisions of Statement No. 92. This exemption, however, only relates to a specific utility and a specific regulator. For example, a utility cannot use a phase-in plan approved by its regulator for a different utility as justification for its phase-in plan exceeding the 10-year limit imposed by Statement No. 92.

A phase-in plan is a method of rate making intended to moderate a sudden increase in rates while providing the regulated enterprise with recovery of its investment and a return on that investment during the recovery period. A disallowance is a rate-making action that prevents the regulated enterprise from recovering either some amount of its investment or some amount of return on its investment. Statement No. 90 specifies the accounting for disallowances of plant costs (see item 133 of this regulation). If a method of rate making that meets the criteria for a phase-in plan includes an indirect disallowance of plant costs, that disallowance shall be accounted for in accordance with Statement No. 90. Cumulative amounts capitalized under phase-in plans shall be reported as a separate asset in the balance sheet. The net amount capitalized in each period or the net amount of previously capitalized allowable costs recovered during each period shall be reported as a separate item of other income or expense in the income statement. Allowable costs capitalized shall not be reported as reductions of other expenses.

The terms of any phase-in plan in effect during the year or ordered for future years shall be disclosed in the financial statements. Statement No. 92 does not permit capitalization for financial reporting of allowable costs deferred for future recovery by the regulator pursuant to a phase-in plan that does not meet the criteria or a phase-
in plan related to plant on which substantial physical construction was not completed before January 1, 1988. Nevertheless, the financial statements shall include disclosures of the net amount deferred at the balance sheet date for rate-making purposes, and the net change in deferrals for rate-making purposes during the year for those plans.

If the provisions of Statement No. 92 are applied retroactively, the financial statements of all periods presented shall be restated. In addition, the restated financial statements shall, in the year that Statement No. 92 is first applied, disclose the nature of any restatement and its effect on margins before extraordinary items, net margins, and on patronage capital at the beginning of the earliest period presented. If the financial statements for prior years are not restated, the effects of applying Statement No. 92 to existing phase-in plans shall be reported as a change in accounting principle and the financial statements shall disclose the effect of adopting Statement No. 92 on margins before extraordinary items and net margins.

The application of Statement No. 92 to an existing phase-in plan shall be delayed if both of the following conditions are met:

1. The enterprise has filed a rate application to have the plan amended to meet the criteria of Statement No. 92 or intends to do so as soon as practicable; and
2. It is reasonably possible that the regulator will change the terms of the phase-in plan so that it will meet the criteria of Statement No. 92.

If the above conditions are met, the provisions of Statement No. 92 shall be applied to the existing phase-in plan on the earlier of the date when one of the conditions ceases to be met or the date when the final rate order is received, amending or refusing to amend the phase-in plan. However, if the enterprise delays filing its application for the amendment or the regulator does not process the application in the normal period of time, the application of Statement No. 92 shall not be further delayed.

In applying the criteria of Statement No. 92 to a plan that was in existence prior to the first fiscal year beginning after December 15, 1987, and that was revised to meet that criteria, the 10-year criterion and the requirement concerning the percentage increase shall be measured from the date of the amendment rather than from the date of the first scheduled deferrals under the original plan. All phase-in plans must receive RUS approval prior to implementation.

135 Accounting for Removal or Relocation of Electric Facilities Resulting from the Action of Others

Under arrangements with another party, a borrower agrees, or is obliged, to remove, relocate, rearrange, or otherwise make changes in utility property, other than for the purpose of rendering utility service to the other party, for which the utility is reimbursed for all or a portion of the costs incurred.

Plant Accounting

The relocation of the line shall be accounted for as follows:

1. If all of the assemblies in the line are retired or completely removed and later reinstalled or if the line is constructed in a new location before the old line is removed, construction and retirement work orders shall be prepared except for the costs relating to special equipment items (transformers, oil circuit reclosers, etc.) which shall be charged to operations expense.
2. If a line is moved in its entirety to a new location except for isolated retirement units (such as at the end of the line) or poles not suitable for resetting, the cost of moving the portion of line that is moved intact shall be charged to maintenance expense while the cost related to the change in isolated retirement units or the replacement of poles not suitable for resetting shall be accounted for through use of construction and retirement work orders.
3. If a line is moved intact without any change in assemblies, the cost shall be charged to maintenance expense.
Reimbursement

If the borrower receives reimbursement for the costs related to the relocation of the line, the reimbursement shall be accounted for by crediting operation and maintenance expenses to the extent of actual expenses occasioned by the plant changes and crediting the remainder to the accumulated provision for depreciation, unless contractual terms definitely characterize residual or specific amounts as applicable to the cost of replacement. In the latter event, appropriate credits shall be entered in the plant accounts.

Reimbursement received from a telephone company for adding a pole or replacing a present pole with a taller pole under joint use contracts falls within this latter category. In this instance, appropriate credits are charged against the plant accounts.

Financing

The total reimbursement, less any portion for operations and maintenance costs, shall be entered in the “Contributions in Aid of Construction” section at the bottom of the Construction Work Order. When the Inventory of Work Orders (RUS Form 219) is prepared, enter only enough of the contribution in column 9 to reduce to zero the amount in column 10, “Loan Funds Subject to Advance by RUS.” This entry is made although none of the reimbursement received is recorded in the accounting records as a contribution in aid of construction.

136 Storm Damage

As a result of recent hurricane, flood, and ice storm damage, the Rural Utilities Service (RUS) has received several inquiries concerning the proper accounting for storm damage costs and the associated funds received from the Federal Emergency Management Administration (FEMA).

Storm damage costs should be accounted for under the work order procedure. Units of property destroyed or otherwise removed from service must be reflected on retirement work orders and units of property installed must be shown on construction work orders. To ensure that the accounting for construction and retirement costs is as accurate as possible, an effort should be made to accurately accumulate material, labor, and overhead costs. Even when extreme care has been exercised, however, it may still be necessary to use estimates to develop the appropriate cost figures.

When a storm occurs, a utility typically incurs a large retirement loss, all or a part of which should be charged to the accumulated provision for depreciation. Storm damage costs over and above construction and retirement costs represent maintenance expense. Maintenance costs include the costs of resagging lines, straightening poles, and replacing minor items of property. When extensive damage has occurred, the need to restore the property to an operating condition without delay usually results in excessive costs being incurred. Standard property unit costs may be used as a guide in determining the amount to be capitalized. It should be noted, however, that when standard property unit costs are used, all excess costs are charged to maintenance expense.

Because of the storm’s destruction, property is retired prematurely and as a result, extraordinary retirement losses occur. When such extraordinary losses occur, they should be recorded in the year in which the losses are incurred. If the recording of such losses will materially distort the income statement, such losses may be charged to Account 455, Extraordinary Deductions. These costs may be deferred and amortized to future periods only if the provisions of Statement of Financial Accounting Standards No. 71, Accounting for the Effects of Certain Types of Regulation (Statement No. 71), are applied. Under the provisions of Statement No. 71, a utility may defer certain costs, provided such costs are included in the utility’s rate base and recovered through future rates. If an RUS borrower elects to apply the provisions of Statement No. 71, RUS approval is required. To obtain RUS approval, a borrower must submit:

a. A detailed description of the plan including the nature of the expense item, the amount of the deferral, the specific time period for rate recovery, and justifying support for the time period selected;
b. The accounting journal entries being used by the cooperative to record the expense deferral and amortization of the deferred costs;

c. A copy of the state Commission order authorizing recovery of the deferred costs through future rates, or in the absence of commission jurisdiction, a resolution from the cooperative’s board of directors authorizing such recovery; and

d. A statement from the borrower’s certified public accountant (CPA) or CPA firm indicating that the deferral and amortization of these costs is in accordance with generally accepted accounting principles.

To assist in the restoration of the damaged facilities, the Federal government often provides assistance through FEMA. Under current FEMA procedures, FEMA provides funds for the restoration of facilities based upon the cost estimates submitted by the entity requesting assistance. If the FEMA grant is for less than 100 percent of the cost estimates, FEMA does not specify which costs are to be reimbursed. When the funds are received, therefore, they should be accounted for by crediting construction, retirement, maintenance expense, and administrative expense in direct proportion to the total costs incurred. For example, if total storm damage costs are $1,000,000 with $450,000 incurred for maintenance, $300,000 for retirement, $200,000 for construction, and $50,000 for administrative costs, the FEMA reimbursement should be accounted for by applying 45 percent of the funds received as a credit to maintenance expense, 30 percent as a credit to retirement costs, 20 percent as a credit to construction, and 5 percent as a credit to administrative and general costs.

Dr. 108.8X, Retirement Work in Progress—Storm Damage .......... $2,384.00
Cr. 107.4, Construction Work in Progress—Storm Damage ........ $2,384.00
To transfer the removal costs associated with the retirement of old transmission lines ($1,966) and substations ($418) to Account 107.4. This cost is shown in Column 11 of Retirement Work Order #4400X.

Dr. 107.4, Construction Work in Progress—Storm Damage ........ $1,939.74
Cr. 108.8X, Retirement Work in Progress—Storm Damage ........ $1,939.74
To remove material salvaged from transmission lines ($1,545.74) and substations ($394.00) from Account 107.4. The original entry debited Account 154 and credited Account 107.4. (See Column 12 of Retirement Work Order #4400X.)

Dr. 108.8X, Retirement Work in Progress—Storm Damage .......... $162,172.06
Cr. 355, Poles and Fixtures ......................................................... $47,738.45
Cr. 356, Overhead Conductors & Devices ..................................... 80,304.11
Cr. 362, Station Equipment ........................................................ 34,129.50
To remove the original cost of transmission lines and substations destroyed and retired from the classified plant accounts. (See Retirement Work Order #4400X.) (New substations were built and separately accounted for on Work Order #4406.)

Dr. 108.5, Accumulated Provision for Depreciation of Transmission Plant .......................................................... $128,462.82
Dr. 108.6, Accumulated Provision for Depreciation of Distribution Plant .......................................................... 34,153.50
Cr. 108.8X, Retirement Work in Progress—Storm Damage ........ $162,616.32
To record the net loss due to the retirement of transmission lines ($128,462.82) and substations ($34,153.50). (See Retirement Work Order #4400X):

137 Impairment of Long-Lived Assets

Statement of Financial Accounting Standards No. 121, Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed of (Statement No. 121), requires reporting entities to review all long-lived assets and certain identifiable intangibles that are to be held, used, or disposed of by that entity for impairment whenever events and changes in circumstances indicate that the carrying amount of the asset may not be recoverable. If the sum of the expected future cash flows (undiscounted and without interest charges) is less than the carrying value of the asset, the entity must recognize an impairment loss. The impairment loss is measured as the amount by which the carrying amount of the asset exceeds the fair value of the asset. The impairment loss is reported as a component of income from continuing operations before income taxes for entities presenting an income statement and in the statement of activities of not-for-profit organizations. Statement No. 121 does not apply to assets included in the scope of Statement of Financial Accounting Standards No. 90, Regulated Enterprises—Accounting for Abandonments and Disallowances of Plant Costs.

Assets To Be Held or Used

Entities are required to review long-lived assets and certain identifiable intangibles whenever events or changes in circumstances indicate that the carrying value of the asset may not be recoverable. For example:

1. A significant decrease in the market value of an asset;
2. A significant change in the extent or manner in which an asset is used;
3. A significant physical change in an asset;
4. A significant adverse change in legal factors or in the business climate that could affect the value of an asset;
5. An adverse action or assessment by a regulator;
6. An accumulation of costs significantly in excess of the amount originally expected to acquire or construct an asset; and
7. A current period operating or cash flow loss combined with a history of operating or cash flow losses or a projection or forecast that demonstrates continued losses associated with an asset used for the purpose of producing revenue.

The impairment of the asset is measured by estimating the future cash flows expected to result from the use of the asset and its disposition. Assets are grouped at the lowest level for which there are identifiable cash flows that are largely independent of the cash flows of other groups of assets. Future cash flows are those cash inflows that are expected to be generated by the asset less the cash outflows expected to be necessary to maintain those inflows. If the future cash flows (undiscounted and without interest charges) are less than the carrying value of the asset, an impairment loss must be recognized. If the expected future cash flows are greater than the carrying value of the asset, no impairment loss exists.

The impairment loss is the amount by which the carrying amount (acquisition cost less accumulated depreciation) of the asset exceeds the fair value of the asset. The fair value of the asset is the amount for which the asset could be bought or sold in an arms-length transaction between willing parties. A quoted market price is the best evidence of fair value. If this information is not available, the fair value should be based upon the best information available. Consideration should be given to the price of similar assets and valuation techniques such as the present value of the expected future cash flows discounted at a rate representative of the risk involved, option-pricing models, matrix pricing, option-adjusted spread models, and fundamental analysis. All available information should be considered when using the above pricing techniques.

If an impairment is recognized, the carrying value of the asset is reduced to the lower of its fair value or its carrying value and, if depreciable, depreciated over the remaining useful life. Previously recognized impairment losses cannot be restored. If the asset was acquired in a business combination and there is goodwill resulting from

Rural Utilities Service, USDA

§ 1767.41

VerDate Aug<31>2005 14:49 Feb 05, 2008 Jkt 214022 PO 00000 Frm 00941 Fmt 8010 Sfmt 8010 Y:\SGML\214022.XXX 214022rfrederick on PROD1PC67 with CFR
the transaction, the goodwill is included in the asset grouping and reduced or eliminated before any adjustment is made to the carrying value of the asset.

The following financial statement disclosures are required in the period in which the impairment is recognized:
1. A description of the impaired assets and the facts and circumstances surrounding the impairment;
2. The amount of the impairment and how fair value was determined;
3. The caption in the income statement or the statement of activities in which the impairment loss is aggregated if that loss has not been presented as a separate caption or reported parenthetically on the face of the statement; and
4. If applicable, the business segment(s) affected.

Assets To Be Disposed

Statement No. 121 also applies to all long-lived assets and certain identifiable intangibles for which management, having the authority to approve the action, has committed to a plan of disposal except those assets covered by APB No. 30, Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions. An asset to be disposed of is carried at the lower of its carrying amount (acquisition cost less accumulated depreciation) or its fair value less cost to sell.

The fair value of the asset to be disposed of is computed in the same manner as that for an asset to be held or used by the entity. Selling costs include the incremental direct cost to transact the sale—broker commissions, legal fees, title transfer, and other closing costs that must be incurred before legal title can be transferred. Costs such as insurance, security service, and utilities are generally excluded unless these costs are part of a contractual agreement that obligates the entity to incur such costs in the future. If the asset’s fair value is based upon current market price or the current selling price for a similar asset, the fair value is considered a current amount and is not discounted. However, if the fair value is based upon discounted expected future cash flows and if the sale is to occur beyond one year, the cost to sell must also be discounted. Assets covered by this statement are not depreciated (amortized) while being held for disposal. Subsequent revisions in estimates of fair value less cost to sell are reported as adjustments to the carrying amount of the asset to be disposed of as long as the carrying amount of the asset does not exceed the original carrying amount.

The following financial statement disclosures are required in the period in which the impairment is recognized:
1. A description of the assets to be disposed of including the facts and circumstances leading to the expected disposal, the expected disposal date, and the carrying amount of those assets;
2. If applicable, the business segment(s) in which the assets to be disposed of are held;
3. The amount, if any, of the impairment loss resulting from the adoption of this statement;
4. The gain or loss, if any, resulting from subsequent revisions in the estimates of fair value less cost to sell;
5. The caption in the income statement or statement of activities in which the gains or losses are aggregated if those gains or losses have not been presented as a separate caption or reported parenthetically on the face of the statement; and
6. The results of operations for assets to be disposed of to the extent that those results are included in the entity’s results of operations for the period and can be identified.

Accounting Requirements

All borrowers must adopt the accounting prescribed by Statement No. 121.

Effective Date and Implementation

Statement No. 121 is effective for financial statements for fiscal years beginning after December 15, 1995. Impairment losses resulting from the application of this statement to assets that are held or used by the entity must be reported in the period in which
the recognition criteria are first applied and met. Impairment losses attributable to assets to be disposed of must be reported as the cumulative effect of a change in accounting principle as prescribed in Accounting Principles Board Opinion No. 20, Accounting Changes.

Accounting Journal Entries—Implementation Date

If a borrower has impaired assets that are held or used at the implementation date, the following entry should be recorded:

Dr. 426.5, Other Deductions
Cr. 300 Series of Accounts, Plant Accounts
To record the adoption of Statement No. 121 for the impairment of assets that are held or used.

If a borrower has impaired assets to be disposed of at the implementation date, the following entry should be recorded:

Dr. 435.1, Cumulative Effect on Prior Years of a Change in Accounting Principle
Cr. 300 Series—Plant Accounts
To record the adoption of Statement No. 121 for assets that are to be disposed.

Accounting Journal Entries—Subsequent to Implementation Date

If an asset that is either held, used or to be disposed of becomes impaired, the following entry should be recorded:

Dr. 426.5, Other Deductions
Cr. 300 Series—Plant Accounts
To record the impairment of a plant asset.

If a borrower makes a subsequent revision in the estimate of the fair value less the cost to sell of an asset to be disposed of, the following entry should be recorded:

Dr. 300 Series—Plant Accounts
Cr. 421, Miscellaneous Nonoperating Income
To revise the fair value of an asset to be disposed.

§ 1767.41

138 Automatic Meter Reading Systems—Turtles

Automatic meter reading systems were developed from technology called power line carrier communication systems. One such system, developed by Hunt Technologies, Inc., is called by its brand name, the Turtle system. In addition to its function as an automated reading device, the Turtle can provide outage detection, power failure counts, and other potential applications. The current Turtle system does not have the capability for applications such as collection of load survey or interval data. A Turtle system consists of:

1. A meter reader mounted (retrofitted) inside the meter;
2. A receiver located in each substation; and
3. Monitoring and programming equipment (software and personal computer) usually located in the headquarters building.

The system transmits continuous information one way from the meter to a receiver located in the substation. The receiver constantly monitors every Turtle meter served by the substation. The substation receiver can be sized to monitor up to 3,000 Turtle meter readers at the same time. The data is then transmitted to the headquarters monitoring equipment via telephone line or an equivalent communication system.

The technical literature and other information provided by the manufacturer indicates that this system can only be used for remote meter reading, outage detection, power failure counts, and phase identification. At this time, there is no indication that the system supports other functions such as home security. Therefore, the accounting prescribed for the Turtle meter reading devices and support equipment relates only to electric utility operations.

Accounting Requirements

The function of the equipment is the primary factor in determining the account in which the equipment shall be recorded. The components of the Turtle automatic meter reading system shall be recorded in Account 370, Meters. The cost of the meter reader encoding device and retrofitting the meter with
§ 1767.41  

Accounting Requirements

The function and location of the equipment are the primary factors in determining the account in which the equipment shall be recorded. The components of the GPS shall be accounted for as follows:

1. Remote and Base Station Equipment. The cost of the equipment, both remote and fixed, shall be capitalized in a subaccount of Account 391, Office Furniture and Equipment.

2. GPS Program and Conversion Software for Mapping. The cost of GPS program and conversion software shall be capitalized in a subaccount of Account 391, Office Furniture and Equipment.

3. GPS/GIS Field Inventory of System. The cost of performing a GPS/GIS survey and field inventory of the existing system, by either a consultant or the utility’s own forces, shall be charged to Account 588, Miscellaneous Distribution Expenses.

140 Radio-Based Automatic Meter Reading Systems

Radio-based automatic meter reading technology allows meters equipped with a low-power radio device called an ERT (Encoder, Receiver, Transmitter) to be read from a remote location. The ERT device can either be retrofitted to an existing meter or purchased installed in a new meter. The ERT device “encodes” energy consumption and transmits this information to a radio transceiver equipped handheld computer. The data collected and stored in the handheld computer is then uploaded to a billing computer using specialized software for that purpose.

Accounting Requirements

The function of the equipment is the primary factor in determining the account in which the equipment shall be recorded. The components of the radio-based automatic meter reading system shall be recorded in Account 370, Meters. The cost of the meter reader encoding device and retrofitting the meter with the meter reader unit shall be capitalized to the cost of the existing meter. Any associated operating expenses shall be charged to Account 586, Meter Expenses, with maintenance...
expenses charged to Account 597, Maintenance of Meters.

Separate continuing property records shall be established for the meters, either fitted or retrofitted with the device; the handheld computer; and the upload software. The meters and handheld computer shall be depreciated over the manufacturer’s estimated useful service life. The upload software shall be depreciated over the estimated useful service life of the program not to exceed 5 years.

201 Supplemental Financing

Many borrowers secure additional financing from sources other than RUS. CFC was established to provide a source of supplemental financing. Although the accounting provided in this section refers to CFC, it is applicable to other sources of supplemental financing as well.

1. Membership Fees

When a membership fee is paid to CFC, the payment shall be recorded as a debit to Account 123.23, Other Investments in Associated Organizations.

2. Subscriptions

The subscription agreement to purchase Capital Term Certificates (CTCs) is a binding obligation to pay an initial subscription in equal annual payments over the first three years and an additional annual subscription payable in the fourth through fifteenth years.

The annual subscriptions to CFC for the fourth through fifteenth years is 2.0 percent of total operating revenues after deducting the cost of power. Using the best data available, each borrower shall estimate the amount of CTCs that are required to be purchased. Estimates are not expected to be precise and adjustments shall be made when future projections indicate a change is needed. When the agreement to purchase CTCs is made, an entry shall be recorded debiting Account 123.21, Subscriptions to Capital Term Certificates—Supplemental Financing, and crediting Account 224.11, Other Long-Term Debt—Subscriptions. When the CTCs are actually purchased, the following entries shall be recorded:

Dr. 224.11, Other Long-Term Debt—Subscriptions
Cr. 131.1, Cash—General

Cr. 123.22, Investments in Capital Term Certificates—Supplemental Financing
Cr. 123.21, Subscriptions to Capital Term Certificates—Supplemental Financing

3. Interest Receipts

Interest accrues monthly to the holder of CTCs at a rate in accordance with the terms of the CFC Invitation to Subscribe. The accrual of interest and the receipt of interest proceeds shall be recorded as follows:

Dr. 171, Interest and Dividends Receivable
Cr. 419, Interest and Dividend Income

To record the monthly accrual of interest.

Dr. 131.1, Cash—General
Cr. 171, Interest and Dividends Receivable

To record the receipt of interest proceeds from the investment in CTCs.

NOTE: Any amounts received in excess of the previous accruals shall be credited to Account 419.

Interest penalties may be charged by CFC for late payments on any subscription from the date that the payment was due to the date that the payment was actually received. Such charges shall be expensed to Account 431, Other Interest Expense.

4. Notes

If a note is due more than one year after the date of the note, the appropriate subaccount of Account 224, Other Long-Term Debt, shall be credited. If the note is due less than one year from the date of the note, Account 231, Notes Payable, shall be credited.

When a loan from CFC has been consummated and a note is executed, Account 224.13, Supplemental Financing Notes Executed—Debit, shall be debited; and Account 224.12, Other Long-Term Debt—Supplemental Financing, credited. When a loan from another source has been consummated, Account 224.15, Notes Executed—Other—Debit, shall be debited; and Account 224.14, Other Long-Term Debt—Miscellaneous, credited.

5. Loan Proceeds

Cash proceeds from unsecured short-term loans shall be deposited into the General Fund Account. Cash proceeds
from all secured loans shall be deposited into the Construction Fund Trustee Account.

From two to seven percent, depending upon the class of borrower and its debt-equity ratio, of each CFC loan is applied to the purchase of Capital Term Certificates. At the time of a borrower’s first requisition under the CFC loan, the following entry shall be recorded:

Dr. 131.2, Cash—Construction Fund—Trustee
Dr. 123.22, Investments in Capital Term Certificates—Supplemental Financing
Cr. 224.13, Supplemental Financing Notes Executed—Debit
To record the requisition of funds from CFC.

6. Capital Credits
As a result of borrowing from CFC or other lenders organized on a cooperative basis, a borrower may receive capital credit allocations. These allocations are usually based upon the borrower’s participation in the lending program with participation measured by the amount of interest expense and conversion costs incurred.

To account for patronage capital allocations from cooperative lenders, the following journal entries shall be recorded:

Dr. 123.1, Patronage Capital from Associated Cooperatives
Cr. 424, Other Capital Credits and Patronage Capital Allocations
To record the allocation of capital credits from a cooperative lender.

NOTE: If any portion of the interest expense was capitalized as a component of construction cost, a similar portion of the capital credit allocation shall be credited to construction rather than to Account 424. The portion credited to construction shall be determined by applying the percentage of interest expense charged to construction for that particular lender to the interest expense incurred for that lender.

Dr. 131.1, Cash—General
Cr. 123.1, Patronage Capital from Associated Cooperatives
To record the cash receipt of patronage capital credits from cooperative lenders.

301 Forfeited Customers’ Deposits
Customers may be required to make deposits to guarantee payment of amounts billed for electric service. When a customer discontinues service, the customer’s deposit shall first be applied to unpaid energy bills, with the balance remitted by check to the customer. If the check is returned, it shall be voided and the original entry that was made when the check was issued shall be reversed.

Unclaimed balances of customer deposits shall remain in Account 235, Customer Deposits, until the legal liability of the cooperative to make such a refund has elapsed. When there is no further legal liability to refund the deposit and if it does not escheat to the state, it shall be transferred to Account 144, Accumulated Provision for Uncollectible Customer Accounts—Credit, retaining full information of all particulars.

401 Computer Software Costs
Computer software consists of programs and routines (sets of computer instructions) which direct the operation of the computer. Software may refer to generalized routines useful in computer operations or to programs for specific applications such as payroll.

The distinction between generalized software and application software is important. Generalized software provides operating support for individual applications. This would include programs for such tasks as making printouts of machine-readable records, sorting records, organizing and maintaining files, translating programs written in a symbolic language into machine language instructions, and scheduling jobs through the computer. These programs are generally furnished by the manufacturer.

Application software consists of a set of instructions for performing a particular data processing task. Application programs are generally written by the user installation, but are frequently obtained as prewritten packages from software vendors. Application software includes programs such as payroll, billing, general ledger, as well as engineering or managerial applications.
Costs incurred with the purchase or development of computer software shall be accounted for as follows:

1. Capitalize in a subaccount of Account 391, Office Furniture and Equipment, all costs for generalized software. Depreciate the cost over the service life (or remaining life) of the main hardware (i.e., containing central processor). If the purchase invoice does not break out or assign a cost to the “generalized software,” it is appropriate to include the full amount in hardware costs. Capitalize in a separate subaccount of Account 391, all costs for applications software determined to have a service life of over one year. Depreciate the cost over the estimated useful service life of the program. This depreciation period shall not exceed five (5) years. RUS realizes, however, that there may be circumstances that justify a useful life longer than 5 years. When this is the case and it is management’s intent to utilize these programs over an extended period, written justification shall be submitted to RUS for approval.

2. Expense in Account 921, Office Supplies and Expenses, in the period incurred, all costs associated with the maintenance, updating, and conversion of files or revision of all software, and all costs for software with a useful life of less than 1 year. Also expense in Account 921, the unamortized cost of all software determined, during the year, to be no longer used by or useful to the cooperative. Such costs that are clearly applicable to any category of operating expenses other than the administrative and general category, however, shall be included in the appropriate account in such category. In accordance with the USoA, no portion of such costs shall be capitalized to construction or retirement activities.

In determining the total cost of purchased or internally developed software, the following items shall be included:

a. Costs incurred for feasibility studies if they result in the purchase or development of software;

b. All costs related to the actual purchase or development of the software. These costs must be specifically identifiable with the software and properly supported by time cards, invoices, or other documents; and

c. All costs incurred in “testing and debugging” the software.

Computer software costs are properly chargeable to Account 107, Construction Work in Progress, provided that the following criteria are met:

1. The computer program is specifically dedicated to performing a construction related activity, and

2. The cost of the software is itemized separate and apart from other hardware and software costs.

The cost of software programs meeting the above requirements and having an estimated useful service life in excess of 1 year shall be recorded in Account 186, Miscellaneous Deferred Debts, and amortized to Account 107, Construction Work in Progress, over the estimated service life of the program not to exceed 5 years.

All costs related to training personnel in the use of software shall be expensed as incurred.

The accounting in this section is not intended to apply to immaterial amounts. When it is deemed that the costs of the recordkeeping necessary to amortize these costs outweigh the benefits to the members, software costs shall be expensed in the year incurred.

For computer costs relating to load control equipment, refer to Item 118 of this section.

402 Legal Expenses

Utilities may incur legal expenses which pertain to construction activities, loan activities, or general services. The proper accounting treatment for legal expenses is as follows:

1. Legal fees incurred in connection with a construction project, including the court costs directly related thereto, which can be identified and supported as such, shall be capitalized in Account 107, Construction Work-in-Progress, as a cost of construction.

2. Legal fees specifically identified and properly supported as resulting from activities designed to obtain long-term debt, shall be deferred in Account 181, Unamortized Debt Expense.

3. Legal fees for all other services and fees which cannot be properly identified will require expensing to either Account 417.1, Expenses of Nonutility
Operations, or Account 923, Outside Services Employed, as appropriate.

To properly support the capitalization or deferral of legal fees, the attorney shall provide an itemization of services performed and the corresponding costs. Only those costs specifically identified by the attorney as being related to construction or loan activities shall be capitalized or deferred as described above.

403 Leases

Lease transactions shall be accounted for as either a capital lease or an operating lease depending upon whether or not the lease meets the criteria for classification as a capital lease. The definitions for capital and operating leases and the criteria used to determine which method shall be used are as follows:

Definitions

1. Capital Lease: A lease that transfers substantially all of the benefits and risks inherent in the ownership of the property to the lessee, who accounts for the lease as an acquisition of an asset and the incurrence of a liability.

2. Operating Lease: An operating lease is a simple rental agreement which does not meet the criteria for a capital lease. Under the terms of an operating lease, the lessee records the rental payments due over the term of the lease as rent expense.

Criteria

A lease agreement shall be classified as a capital lease if one or more of the following criteria is met:

1. Ownership of the property is transferred to the lessee by the end of the lease term;
2. The lease contains a bargain purchase option;
3. The lease term is equal to 75 percent or more of the estimated useful life of the leased property; or
4. The present value of the lease payments at the inception of the lease equals or exceeds 90 percent of the fair market value of the leased property.

A lease agreement qualifying as a capital lease shall be recorded in either Account 101.1, Property Under Capital Leases; Account 120.6, Nuclear Fuel Under Capital Leases; or Account 121, Nonutility Property, as appropriate, at the present value (at the beginning of the lease term) of the minimum lease payments. If, however, this amount exceeds the fair value of the leased property at the inception of the lease, the asset shall be recorded at its fair market value. An offsetting credit shall be recorded in Account 227, Obligations Under Capital Leases—Noncurrent, with the current portion recorded in Account 243, Obligations Under Capital Leases—Current. Assets recorded in Account 101.1 shall be classified separately according to the detailed accounts (301–399) provided for electric plant in service.

Monthly payments made under the lease obligation shall be charged to rent expense, fuel expense, or construction work-in-progress as they become payable. Similarly, the leased asset and the associated obligation shall be reduced by the current amount due.

The following journal entries shall be used by the lessee to record capital lease transactions:

Dr. 101.1, Property Under Capital Leases
Cr. 243, Obligations Under Capital Leases—Current
Cr. 227, Obligations Under Capital Leases—Noncurrent
To record the capital lease agreement.

Dr. 550, Rents
Cr. 232, Accounts Payable
Dr. 243, Obligations Under Capital Leases—Current
Cr. 101.1, Property Under Capital Leases
To record the monthly rental payment due.

Dr. 232, Accounts Payable
Cr. 131.1, Cash—General
To record the monthly lease payment. Operating leases which are simple rental agreements do not require the recording of an asset or a liability. The entries that are required to record an operating lease by the lessee are as follows:

Dr. 550, Rents
Cr. 232, Accounts Payable
To record the monthly rental payment due.

Dr. 232, Accounts Payable
Rural Utilities Service, USDA

§ 1767.41

Cr. 131.1, Cash—General
To record the monthly lease payment.

For purposes of illustration, the journal entries presented in this interpretation debit Account 550, Rents. However, Account 507, Rents (steam power generation); Account 540, Rents (nuclear power generation); Account 550, Rents (other power production); Account 567, Rents (transmission expense); Account 589, Rents (distribution expense); and Account 931, Rents (general and administrative), should be charged, as appropriate, depending upon the function of the equipment being leased.

404 Consolidated Financial Statements

In October 1987, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 94, Consolidation of All Majority-Owned Subsidiaries (Statement No. 94). For purposes of reporting to RUS, Statement No. 94 shall be applied as follows:

1. An RUS borrower that is a subsidiary of another entity shall prepare and submit to RUS separate financial statements even though this financial information is presented in the parent’s consolidated statements.
2. In those cases in which an RUS borrower has a majority-ownership in a subsidiary, the borrower must prepare consolidated financial statements in accordance with the requirements of Statement No. 94. For purposes of reporting to RUS, Statement No. 94 shall be applied as follows:
   1. An RUS borrower that is a subsidiary of another entity shall prepare and submit to RUS separate financial statements even though this financial information is presented in the parent’s consolidated statements.
   2. In those cases in which an RUS borrower has a majority-ownership in a subsidiary, the borrower must prepare consolidated financial statements in accordance with the requirements of Statement No. 94. These consolidated statements must also include supplementary schedules presenting a Balance Sheet and Income Statement for each majority-owned subsidiary included in the consolidated statements.

Although Statement No. 94 requires the consolidation of majority-owned subsidiaries, RUS Forms 7 and 12 must be prepared on an unconsolidated basis.

501 Patronage Capital Assignments

Accounting for patronage capital and margins may vary depending upon the individual cooperative’s bylaws. The comments contained in this section relate to the application of the standard bylaw provisions.

The entries required, at year’s end, to record patronage capital transactions where there is no major merchandising program are as follows:

Dr. 219.1, Operating Margins
Dr. 219.2, Nonoperating margins
Cr. 201.2, Patronage Capital Assignable

To record the amount of patronage capital assignable.

Dr. 201.2, Patronage Capital Assignable
Cr. 201.1, Patronage Capital Credits

To record the allocation of patronage capital to the patrons’ accounts.

The procedure for determining the amount of patronage capital assignable to the individual patron on a total dollar basis is as follows:

1. Determine the total amount to be assigned for the year (Account 201.2).
2. Determine patronage from electric service, the total of consumers’ billings (Accounts 440–447).
3. Determine the percentage factor to be used in calculating patronage capital to be credited to each consumer account. Divide “1” by “2”.
4. Determine the amount of capital to be credited to each consumer. Multiply the individual consumer’s billings for the year by the percentage factor obtained in “3” above.

The procedure for determining the amount of patronage capital assignable to the individual patron on a dollar basis, less the cost of power, is as follows:

1. Determine the total amount to be assigned for the year.
2. Determine the total amount of revenue received from each classification of customers.
3. Determine the total cost of power for each classification of customers. (For example, use cost per kWh sold).
4. For each classification of customers subtract the amount obtained in “3” from the amount obtained in “2,” to obtain the total amount received, less cost of power, by classification of customers.
5. Add the amounts obtained in “4” to obtain the total amount of revenue, less cost of power.
6. Divide the total amount received, less cost of power for each classification of customers (amounts obtained in “4”), by the total amount received, less
cost of power for all customers (amount obtained in “5”) to obtain the prorata percentage for each classification of customers.

7. Multiply the total amount to be allocated (amount obtained in “1”) by the prorata percentage for each classification of customers (obtained in “6”) to obtain the amount to be assigned each classification of customers.

8. Divide the amount to be assigned each classification of customers (amount obtained in “7”) by the total amount received from the classification of customers (amount obtained in “2”) to obtain the percentage factor for each classification of customers.

9. Determine the total amount received from each individual customer.

10. Multiply the total amount received from each individual customer (amount obtained in “9”) by the percentage factor for his classification (amount obtained in “8”) to obtain the amount of capital to be assigned each individual customer.

After calculating the patronage capital to be credited to each customer, there is usually a small balance remaining. This small balance shall remain in Account 201.2, Patronage Capital Assignable, and shall be added to the amount to be assigned in the following year.

Proper records shall be maintained to support all capital credit transactions. As a minimum, these records shall show, for each patron, the amount of capital credited for each year as well as the amount and date retired for each year.

The process of transferring capital credits from the Patronage Capital Assignable accounts to the Patrons’ Capital Credits Assigned accounts or to the Patrons’ Capital Credits accounts and the making of entries to individual patron’s records constitutes an assignment of capital credits. This holds true for recordkeeping purposes as well as from a legal point of view. This assignment shall be followed by formal notification to patrons within a reasonable period of time.

In the event that a distribution cooperative incurs a net loss, that loss shall not be allocated to its members (patrons). The loss shall be accumulated and offset by future nonoperating margins.

502 Patronage Capital Retirements

As the board of directors has the responsibility for determining whether the financial condition of the cooperative will permit retirement of capital credits and whether the proposed retirement complies with mortgage and bylaw provisions, the authorization for the retirement shall be set forth in the board minutes. The entries to record the general retirement of capital credits shall be as follows:

Dr. 201.1, Patronage Capital Credits
Cr. 238.1, Patronage Capital Payable
To record the board of directors’ authorization to make payments of capital credits.

Dr. 238.1, Patronage Capital Payable
Cr. 131.1, Cash—General.
To record actual cash payments of capital credits.

Note: To provide better control over the payment of patronage capital credits, a special checking account should be established in an amount equal to the authorized general retirement. Special prenumbered checks shall be used for each general retirement of patronage capital.

To strengthen internal control and to facilitate the settlement of estates, the board should adopt a policy specifying exactly how payments of capital credits shall be made to the estates of deceased patrons. Payments made to estates shall be recorded as follows:

Dr. 201.1, Patronage Capital Credits
Cr. 131.1, Cash—General
To record the payment of capital credits when an estate is settled by refunding 100 cents on the dollar.

Dr. 201.1, Patronage Capital Credits
Cr. 131.1, Cash—General
Cr. 217, Retired Capital Credits—Gain
To record the payment of capital credits when an estate is settled for less than the full amount of capital credited to the deceased customer’s account.

Dr. 217, Retired Capital Credits—Gain
Cr. 201.2, Patronage Capital Assignable
To record the reallocation to current patrons of the amount of the discount, if provided for in the bylaws.
If a capital credit check is returned due to an inability to locate the patron, it shall be held pending a recheck of available records to ascertain the correct address of the patron. If it is determined that the patron cannot be located, the check shall be cancelled and the amount of the check debited to Account 131.1, Cash—General, and credited to Account 217, Retired Capital Credits—Gain. If the state, however, has unclaimed property laws to which the amount is subject, the amount shall be credited to Account 253, Other Deferred Credits, until final disposition has been made. A notation shall be made in the records of the former patron to facilitate payment if his or her whereabouts is subsequently determined.

If the records show that a number of former patrons have moved and left no forwarding address, it is not necessary to prepare a capital credit retirement check for these patrons when a general retirement of capital credits is made. When setting funds aside to make a general retirement, however, appropriate amounts shall be included to cover payments due these patrons. The cooperative shall then make a reasonable effort to locate these patrons through publication of their names in the newsletter or local newspaper. If the patrons are not located, the amounts set aside and the credits to their accounts shall be handled in a manner similar to those for whom payment checks are returned.

Under the standard bylaw provisions recommended by RUS, it is not proper to use capital credits that were assigned to former patrons to liquidate their delinquent bills. When the standard bylaws are in effect and collection efforts have failed, the balance of an uncollectible bill, after application of customers deposits and membership fees, shall be charged against the accumulated provision for uncollectible accounts. If the patron has capital credits assigned to him or her, these remain untouched except for a notation to indicate the amount of the unpaid bill. When a general retirement of capital credits is made at some future date, amounts which would otherwise be due the patron may be applied to satisfy the unpaid bill with the balance refunded to him or her.

503 Operating and Nonoperating Margins

Occasionally questions arise concerning the accounting for the balances in Accounts 218, Capital Gains and Losses; 219.3, Other Margins; 219.4, Other Margins and Equities—Prior Periods; 434, Extraordinary Income; and 435, Extraordinary Deductions. The balance in these accounts shall be accounted for as follows:

1. The balance in Account 219.4, Other Margins and Equities—Prior Periods, shall be transferred, at year’s end, to Account 219.1 or 219.2, as appropriate. Accounts 219.1 and 219.2 are then closed to Account 201.2, Patronage Capital Assignable, unless otherwise provided for in the bylaws.

2. The balances in Account 434, Extraordinary Income, and Account 435, Extraordinary Deductions, shall be cleared to Account 219.2 at year’s end.

3. The balances in Account 219.3, Other Margins, and Account 218, Capital Gains and Losses, shall remain in these accounts unless they are allocated to patrons or used to absorb future losses as provided for in the bylaws of the cooperative.

When a cooperative is engaged in a major merchandising activity, all costs properly chargeable to the merchandising activity shall be allocated as such to offset the associated revenue. Nonoperating margins generated from this source shall be prorated annually on a patronage basis and credited to those patrons accounts from whom such amounts were obtained. Merchandising activities of this nature may require a bylaw provision allowing for the allocation of margins generated by a major merchandising activity separate from other operating or nonoperating margins.

If, at the time of the adoption of the bylaw provisions for the allocation of nonoperating margins, there are prior years’ losses resulting in debit balances in Accounts 218, Capital Gains and Losses; 219.1, Operating Margins; 219.2, Nonoperating Margins; or 219.3, Other Margins; the credit balances in Accounts 218, 219.2, or 219.3 resulting from
prior years' operations shall be transferred, to the extent necessary, to offset such deficits. If the board determines that amounts shall be allocated to prior years' patrons, the credit balances remaining in these accounts shall be transferred to Account 201.2, Patronage Capital Assignable.

If there are current year's losses resulting in debit balances in either Account 219.1 or 219.2, credit balances in Accounts 219.2, 219.3, and 218 shall be transferred, to the extent necessary, to offset such deficits. Remaining credit balances allocable to patrons shall be transferred to Account 1.2.

504 Patronage Capital from G&T Cooperatives

When a cooperative receives capital credits from a G&T cooperative, the transaction shall be recorded by a debit to Account 123.1, Patronage Capital from Associated Cooperatives, and a credit to Account 423, Generation and Transmission Cooperative Capital Credits. This entry shall be made prior to the closing of the cooperative's books even though, in most cases, the notice of the G&T allocation is not received until after the close of the year to which it relates. If precise information cannot be obtained from the G&T within a reasonable time, capital credits shall be recorded on an estimated basis. The difference between the estimated amount and the actual shall be recognized in the following year unless the difference is material.

A distribution cooperative shall not recognize its proportionate share of losses incurred by the G&T. G&T losses shall be accumulated and offset as provided for in the bylaws. Unlike distribution cooperatives, a G&T has the option to offset accumulated losses with future operating and/or nonoperating margins.

505 Patronage Capital Furnished by Other Cooperative Service Organizations

Utilities may obtain long-term and short-term loans, telephone or data processing services, or may purchase oil, gasoline, materials, insurance, and various items from cooperative or mutual enterprises. These enterprises often make patronage refunds or provide evidence that an amount equal to such a refund has been credited to the utility as an investment of capital. The refund may be in the form of cash in the year following the purchase or it may be deducted from the next invoice. The notice of patronage credited to the borrower's account may indicate that such capital may be retired at some future date upon certain conditions having been met. The following provides the accounting journal entries for these types of transactions:

1. Insurance policy refunds from mutual companies, in cash or as credits against subsequent purchases, shall be credited to the appropriate expense account. If sufficient information is not available to credit the refunds to the appropriate expense accounts, they shall be credited to Account 165, Prepayments, and reduce premiums for the current year.

2. Patronage capital allocations from cooperatives, other than mutual insurance companies, shall be credited, in the year that the allocation notice is received, to Account 424, Other Capital Credits and Patronage Allocations, or to construction work-in-progress, as appropriate. The allocation of patronage capital credits between Account 424 and construction work-in-progress shall be made on an equitable basis. For example, patronage capital allocations received from a cooperative money lender are allocated between Account 424 and construction work-in-progress based upon the ratio of interest charged to construction for that particular lender to total interest expense incurred for that lender. Patronage capital allocations received from a material supplier are allocated based upon the ratio of materials charged to construction to total materials purchased.

3. The face amount of patronage capital certificates received by the cooperative from the purchase of goods or services from cooperative money lenders (CFC), oil dealers, material suppliers, pole treating plants, communications services, and others shall be charged to either Account 123.1, Patronage Capital from Associated Cooperatives, or Account 124, Other Investments, as appropriate. Account 123.1 shall include investments in only
those cooperatives, or enterprises, that are directly related to the electric utility industry and controlled by the electric cooperatives. These include statewide cooperatives, power cooperatives, and NRECA. Other investments in oil cooperatives and insurance companies shall be charged to Account 124.

506 Forfeited Membership Fees

The bylaws of each cooperative prescribe certain rules and regulations concerning membership in the cooperative. Among these are provisions for forfeiture of membership fees. Some bylaws provide for application of membership fees against any unpaid accounts at the time of termination of service. Any remaining balance may be refunded to the member. Balances that cannot be refunded to the member due to an inability to locate the member or due to bylaw restriction, shall be credited to Account 208, Donated Capital, provided they do not escheat to the state. If disposition of the fees cannot be determined immediately, the amount involved shall be transferred to Account 253, Other Deferred Credits, until the determination is made.

601 Employee Benefits

The costs of employees’ fringe benefits (hospitalization, retirement, holiday, sick and vacation pay, etc.) shall be accumulated in an appropriate clearing account and allocated monthly on the basis of payroll. Vacation costs shall be accrued monthly by appropriate credits to an accrual account. These monthly accruals shall be allocated on the basis of direct payroll costs to construction, retirement, and the applicable operations, maintenance, and administrative expense accounts.

Sick leave costs are not normally accrued unless the employee is entitled to be paid for accumulated sick leave at the termination of employment. Salary payments and the associated employee pensions and benefits and social security and other payroll taxes for an employee who is actually sick shall be charged to the same account or accounts to which his or her salary is normally charged.

602 Compensated Absences

Statement of Financial Accounting Standards No. 43, Accounting for Compensated Absences (Statement No. 43), requires employers to accrue a liability as an employee earns the right to be paid for future absences. Four criteria were established for this accrual:

1. The employer’s obligation for payment for future absences is attributable to employees’ services already performed.
2. The obligation relates to employee rights which vest or accumulate. Vested rights are considered those for which the employer is obligated to make payment even if the employee terminates. Rights which accumulate are those earned but unused rights to compensated absences which may be carried forward to one or more periods, subsequent to the period in which they are earned.
3. Payment of the compensation is probable.
4. The amount can be reasonably estimated.

A company’s liability shall be estimated based upon payments it expects to make as a result of employees’ work already performed. If a reasonable estimate cannot be made, the company shall disclose that fact in the financial statements.

Statement No. 43 does not apply to severance or termination pay, post-retirement benefits, deferred compensation, stock or stock options, group insurance, or other long-term fringe benefits.

The entries required to account for the accrual of compensated absences are as follows:

Dr. 435.1, Cumulative Effect on Prior Years of a Change in Accounting Principle
Cr. 242.3, Accrued Employees’ Vacation and Holidays
To record the liability for benefits earned in prior years.
Dr. 107, Construction Work in Progress
Dr. 108.8, Retirement Work in Progress
Dr. Various Operations, Maintenance, and Administrative Expense Accounts
Cr. 242.3, Accrued Employees Vacation and Holidays
To record the liability for benefits earned in the current period.

603 Employee Retirement and Group Insurance

Some borrowers have group insurance or retirement plans or both for their employees. As a general rule the cost of these programs is borne partially by the cooperative and partially by its employees. The cooperative may pay the full cost in advance and recover the employee's share through payroll deductions. The accounting for these transactions is as follows:

1. The cooperative's advanced payment of premiums on insurance and retirement agreements shall be charged to Account 165, Prepayments, for the employer's portion, and Account 143, Other Accounts Receivable, for the employee's portion.

2. The cost of the employer's portion of a retirement and group insurance program shall be charged to construction and retirement activities and the applicable operations, maintenance, and administrative expense accounts based upon a specific identification with employees' labor costs charged therein or, in the absence of specific employee identification, based upon direct labor dollars or direct labor hours depending upon which allocation technique provides the most equitable distribution of costs.

604 Deferred Compensation

Many utilities participate in the NRECA Deferred Compensation Program. Based upon the provisions of the program, the following accounting entries shall be made:

Dr. 186.XX, Miscellaneous Deferred Debits—Deferred Compensation
Cr. 228.3, Accumulated Provision for Pensions and Benefits
To increase the deferred compensation provision by the amount of the annual deposit to NRECA's Deferred Compensation Fund.

Dr. 128, Other Special Funds—Deferred Compensation
Cr. 131.1, Cash—General
To record the annual deposit to NRECA's Deferred Compensation Fund.

Dr. Construction Work in Progress, Retirement Work in Progress, or the Various Operations, Maintenance, and Administrative Expense Accounts, as appropriate.

Cr. 186.XX, Miscellaneous Deferred Debits—Deferred Compensation
To record monthly accrual of deferred compensation.

Note: If an employee joins the deferred compensation program during the year, use entry #1 to record the additional deposit to the NRECA Deferred Compensation Fund and increase the monthly accrual in entry #2 to reflect this deposit.

NRECA provides borrowers that participate in the deferred compensation program with an annual account statement disclosing the activity for each Homestead Fund investment including the number of shares owned, interest income, dividend income, capital gains/losses, and the value of the shares owned at statement date. Funds may be invested in the Short-term Bond Fund, the Value Fund, the Short-term Government Securities Fund, and the Daily Income Fund. Depending upon the Homestead Fund selected, invested funds may earn interest and dividend income and may experience unrealized holding gains or losses. Based upon the information provided on the annual statement, the following journal entries shall be recorded to recognize the increase or decrease in the fund assets:

Dr. 128, Other Special Funds—Deferred Compensation
Cr. 419, Interest and Dividend Income
Cr. 421, Miscellaneous Nonoperating Income
To record an increase in the fund value as of December 31, 19xx, resulting from interest and dividend income and from unrecognized holding gains on trading securities.

Dr. Various Operations, Maintenance, and Administrative Expense Accounts
Cr. 228.3, Accumulated Provision for Pensions and Benefits
To record an increase in the liability to the employee resulting from an increase in the investment account.

Dr. 426.5, Other Deductions
Cr. 128, Other Special Funds—Deferred Compensation
To record a decrease in fund value as of December 31, 19xx, resulting from unrecognized holding losses on trading securities.

Dr. 228.3, Accumulated Provision for Pensions and Benefits
Cr. Various Operations, Maintenance, and Administrative Expense Accounts
To record a decrease in the liability to the employee resulting from a decrease in the investment account.

Payments made to participating employees because of retirement or separation for other reasons shall be recorded using the following entries:

Dr. 131.1, Cash—General
Cr. 128, Other Special Funds—Deferred Compensation
To record the receipt of funds from NRECA.

Dr. 228.3, Accumulated Provision for Pensions and Benefits
Cr. 131.1, Cash—General
To record payment to employee for deferred compensation.

If the borrower has elected to bear the market risk of the funds which guarantee that the amount of money an employee receives will not be less than the amount of salary deferred, the following entry shall be recorded if total payment(s) from NRECA are less than the amount of salary deferred:

Dr. Various Operations, Maintenance, and Administrative Expense Accounts
Cr. 131.1, Cash—General
To record payment to employee for deferred compensation. Payment was made because amount returned did not equal salary deferred.

Appropriate disclosure of the terms of the program shall be made in the notes to the financial statements.

Life Insurance Premium on Life of a Borrower Employee

Some borrowers insure the life of the manager and/or key employees with the borrower being named as the beneficiary. Such arrangements shall be accounted for as follows:

1. Charge Account 426.2, Life Insurance, for the net amount of the premium paid each year on the insurance policy.

2. At the anniversary date of the policy each year, charge Account 124, Other Investments, and credit Account 426.2, Life Insurance, with the amount of the annual increase in the cash surrender value of the policy; provided such increase is less than the net premium paid for that year. If the annual increase in the surrender value exceeds the net premium paid for the same year, only that portion of the surrender value increase equal to the net premium paid shall be credited to Account 426.2. The remainder is to be credited to Account 419, Interest and Dividend Income.

3. Upon retirement of the insured employee and surrender of the insurance policy, charge Account 131.1, Cash—General, and credit Account 124, Other Investments, for the amount received from the insurance company. If it is decided to grant to the retiring insured employee all, or any portion, of the cash received upon surrender of the policy, Account 926, Employee Pensions and Benefits, shall be charged and Account 131.1 credited for the amount paid to the retiring employee.

4. If the insured employee dies within his term of service, charge Account 131.1, Cash—General, for the face amount of the policy paid by the insurance company. Credit Account 124, Other Investments, for the cash surrender value previously charged there to, and credit the remainder to Account 421, Miscellaneous Nonoperating Income.

Pension Costs

With the issuance of Statement of Financial Accounting Standards No. 87, Employers’ Accounting for Pensions (Statement No. 87), there have been significant changes in the accounting and reporting requirements relating to pension costs. This section will highlight the accounting and reporting requirements for the major types of pension plans. It should be noted, however, that the definitions and accounting procedures outlined in this section relate to financial accounting and they may differ from those used for tax accounting.
Defined Benefit Pension Plans

A defined benefit pension plan is a plan that defines an amount of pension benefit to be provided, usually as a function of one or more factors such as age, years of service, or compensation. In a defined benefit plan, the employer promises to provide, in addition to current wages, retirement income payments in future years after the employee retires or terminates service. Generally, the amount of benefit to be paid depends upon a number of future events that are incorporated into the plan’s benefit formula, after including how long the employee and any survivors live, how many years of service the employee renders, and the employee’s compensation in the years immediately before retirement or termination.

Under a defined benefit plan, the determination of pension costs, assets, liabilities, and the disclosures in the financial statements require many calculations and assumptions to be made. This section provides a general overview of the accounting and reporting requirements associated with a defined benefit pension plan. Consult Statement No. 87 for guidance in making the necessary calculations and assumption.

The accounting and reporting requirements related to a defined benefit pension plan are as follows:

1. The following components shall be included in the periodic recognition of net pension cost by an employer sponsoring a defined benefit pension plan:
   a. The service cost component recognized in a period shall be determined as the actuarial present value of benefits attributed by the pension plan formula to employee service during that period. The measurement of the service cost component requires use of an attribution method and assumptions.
   b. The interest cost component recognized in a period shall be determined as the increase in the projected benefit obligation due to the passage of time. Measuring the projected benefit obligation as a present value requires accrual of an interest cost at rates equal to the assumed discount rates.
   c. For a funded plan, the actual return on plan assets, if any, shall be determined based upon the fair value of plan assets at the beginning and the end of the period, adjusted for contributions and benefit payments.
   d. Plan amendments (including initiation of a plan) often include provisions that grant increased benefits based upon services rendered in prior period. Because plan amendments are granted with the expectation that the employer will realize economic benefits in future period, Statement No. 87 does not require the cost of providing such retroactive benefits (prior service cost) to be included in net periodic pension cost entirely in the year of the amendment but provides for recognition during the future service periods of those employees active at the date of the amendment who are expected to receive benefits under the plan.

   The cost of retroactive benefits (including benefits that are granted to retirees) is the increase in the projected benefit obligation at the date of the amendment. Except as noted below, prior service cost shall be amortized by assigning an equal amount to each future period of service of each employee active at the date of the amendments who is expected to receive benefits under the plan. If all or almost all of the plan’s participants are inactive, the cost of retroactive plan amendments affecting benefits of inactive participants shall be amortized based upon the remaining life expectancy of those participants rather than the remaining service period.

   To reduce the complexity and detail of the computations required, consistent use of an alternative amortization approach that more rapidly reduces the unrecognized cost of retroactive amendments is acceptable. For example, a straight-line amortization of the cost over the average remaining service period of employees expected to receive benefits under the plan is acceptable. The alternative method used shall be disclosed.

   In some situations, a history of regular plan amendments and other evidence may indicate that the period during which the employee expects to realize economic benefits from an amendment granting retroactive benefits is shorter than the entire remaining service period of the active employees. Identification of such situations...
Rural Utilities Service, USDA § 1767.41

requires an assessment of the individual circumstances and the substance of the particular plan situation. In those circumstances, the amortization of prior service cost shall be accelerated to reflect the more rapid expiration of the employer’s economic benefits and to recognize the cost in the periods benefited.

A plan amendment can reduce rather than increase the projected benefit obligation. Such a reduction shall be used to reduce an existing unrecognized prior service cost, and the excess, if any, shall be amortized on the same basis as the cost of benefit increases. e. Gains and losses are changes in the amount of either the projected benefit obligation or plan assets resulting from experience different from that assumed and changes in assumptions. Gains and losses include amounts that have been realized. Because gains and losses may reflect refinements in estimates as well as real changes in economic values, and because some gains in one period may be offset by losses in another or vice versa, the recognition of gains and losses as components of net pension cost of the period in which they arise is not required.

The expected return on plan assets shall be determined based upon the expected long-term rate of return on plan assets and the market-related value of plan assets. The market-related value of plan assets shall be either fair value or a calculated value that recognizes changes in fair value in a systematic and rational manner over not more than 5 years. Different ways of calculating market-related value may be used for different classes of assets but the manner of determining market-related value shall be applied consistently from year to year for each asset class.

Asset gains and losses are the differences between the actual return on assets during a period and the expected return on assets for that period. Assets gains and losses include both changes reflected in the market-related value of assets and changes not yet reflected in the market-related value (that is, the difference between the fair value of assets and the market-related value). Asset gains and losses not yet reflected in market-related values are not required to be amortized.

As a minimum, amortization of an unrecognized gain or loss (excluding asset gains and losses not yet reflected in market-related value) shall be included as a component of net pension cost for a year if, as of the beginning of the year, that unrecognized net gain or loss exceeds 10 percent of the greater of the projected benefit obligation or the market-related value of plan assets. If amortization is required, the minimum amortization shall be that excess divided by the average remaining service period of active employees expected to receive benefits under the plan. If all or almost all of a plan’s participants are inactive, the average remaining life expectancy of the inactive participants shall be used instead of average remaining service life.

Any systematic method of amortization of gains and losses may be used in lieu of the minimum specified in the previous paragraph provided that the minimum is used in any period in which the minimum is greater (i.e., reduces the net balance by more), the method is applied consistently, the method is applied similarly to both gains and losses, and the method is disclosed.

The gain or loss component of net periodic pension cost shall consist of the difference between the actual return on plan assets and the expected return on plan assets and amortization of the unrecognized net gain or loss from previous periods.

2. A liability (unfunded accrued pension cost) shall be recognized if the net periodic pension cost recognized pursuant to Statement No. 87 exceeds amounts the employer has contributed to the plan. An asset (prepaid pension cost) shall be recognized if the net periodic pension cost is less than the amounts the employer has contributed to the plan.

If the accumulated benefit obligation exceeds the fair value of plan assets, the employer shall recognize a liability (including unfunded accrued pension cost) that is at least equal to the unfunded accumulated benefit obligation. Recognition of an additional minimum liability is required if an unfunded accumulated benefit obligation exists
and an asset has been recognized as a prepaid pension cost, the liability already recognized as unfunded accrued pension cost is less than the unfunded accumulated benefit obligation, or no accrued or prepaid pension cost has been recognized.

If an additional minimum liability is recognized, an equal amount shall be recognized as an intangible asset, provided that the asset does not exceed the amount of unrecognized prior service cost. If an additional liability required to be recognized exceeds unrecognized prior service cost, the excess (which represents a net loss not yet recognized as a net periodic pension cost) shall be reported as a separate component (reduction) of equity.

When a new determination of the amount of additional liability is made to prepare a balance sheet, the related intangible asset and separate component of equity shall be eliminated or adjusted, as necessary.

3. An employer sponsoring a defined benefit pension plan shall disclose the following information:

a. A description of the plan including employee groups covered, type of benefit formula, funding policy, types of assets held and significant nonbenefit liabilities, if any, and the nature and effect of significant matters affecting comparability of information for all period presented.

b. The amount of net periodic pension cost for the period showing separately the service cost component, the interest cost component, the actual return on assets for the period, and the net total of other components.

c. A schedule reconciling the funded status of the plan with amounts reported in the employer’s balance sheet, showing separately, the fair value of plan assets, the projected benefit obligation identifying the accumulated benefit obligation and the vested benefit obligation, the amount of unrecognized prior service cost, the amount of unrecognized net gain or loss including asset gains and losses not yet reflected in market-related value), the amount of any remaining unrecognized net obligation or net asset existing at the date of initial application of Statement No. 87, the amount of any additional liability recognized, and the amount of net pension asset or liability recognized in the balance sheet (which is the net result of combining the previous six items).

d. The weighted-average assumed discount rate and rate of compensation increase (if applicable) used to measure the projected benefit obligation and the weighted-average expected long-term rate of return on plan assets.

e. If applicable, the amount and type of securities of the employer and related parties included in plan assets, and the approximate amount of annual benefits of employees and retirees covered by annuity contracts issued by the employer and related parties. Also, if applicable, the alternative amortization periods used.

f. An employer that sponsors two or more separate defined benefit pension plans shall determine net periodic pension cost, liabilities, and assets by separately applying the provisions of Statement No. 87 to each plan. In particular, unless an employer clearly has a right to use the assets of one plan to pay benefits of another, a liability required to be recognized for one plan shall not be reduced or eliminated because another plan has assets in excess of its accumulated benefit obligation or because the employer has prepaid pension cost related to another plan.

The required disclosures may be aggregated for all of an employer’s single-employer defined benefit plans, or plans may be disaggregated into groups so as to provide the most useful information. Plans with assets in excess of the accumulated benefit obligation, however, shall not be aggregated with plans that have accumulated benefit obligations that exceed plan assets.

Annuity Contracts

An annuity contract is a contract in which an insurance company unconditionally undertakes a legal obligation to provide specified benefits to specific individuals in return for a fixed consideration or premium. An annuity contract is irrevocable and involves the transfer of significant risk from the employer to the insurance company. Some annuity contracts (participating annuity contracts) provide that the
purchaser (either the plan or the employer) may participate in the experience of the insurance company. Under these contracts, the insurance company ordinarily pays dividends to the purchaser. If the substance of a participating contract is such that the employer remains subject to all or most of the risks and rewards associated with the benefit obligation covered and the assets transferred to the insurance company, that contract is not an annuity contract for purposes of Statement No. 87.

To the extent that benefits currently earned are covered by annuity contracts, the cost of these benefits shall be the cost of purchasing the contracts, except as noted below. That is, if all benefits attributed by the plan’s benefits formula to service in the current period are covered by nonparticipating annuity contracts, the cost of the contracts determines the service cost component of net pension cost for that period.

Benefits provided by the pension benefit formula beyond benefits provided by annuity contracts (for example, benefits related to future compensation levels) shall be accounted for according to the provisions applicable to plans not involving insurance contracts.

Benefits covered by annuity contracts shall be excluded from the projected benefit obligation and the accumulated benefit obligation. Except as noted below, annuity contracts shall be excluded from plan assets.

Some annuity contracts provide that the purchaser (either the plan or the employer) may participate in the experience of the insurance company. Under these contracts, the insurance company ordinarily pays dividends to the purchaser, the effect of which is to reduce the cost of the plan. The purchase price of a participating annuity contract ordinarily is higher than the price of an equivalent contract without participation rights. The cost of the participation right shall be recognized, at the date of purchase, as an asset. In subsequent periods, the participation right shall be measured at its fair value if the contract is such that the fair value is reasonably estimable. Otherwise, the participation right shall be measured at its amortized cost (not in excess of its net realizable value), and the cost shall be amortized systematically over the expected dividend period under the contract.

Other Contracts with Insurance Companies

Insurance contracts that are, in substance, equivalent to the purchase of annuities shall be accounted for as such. Other contracts with insurance companies shall be accounted for as investments and measured at fair value. For some contracts, the best available evidence of fair value may be contract value. If a contract has a determinable cash surrender value or conversion value, that is presumed to be its fair value.

Defined Contribution Plans

A defined contribution pension plan is a plan that provides pension benefits in return for services rendered, provides an individual account for each participant, and has terms that specify how contributions to the individual’s accounts are to be determined rather than the amount of pension benefits the individual is to receive. Under a defined contribution plan, the pension benefits a participant will receive depend only upon the amount contributed to the participant’s account, the returns earned on investments of those contributions, and forfeitures of other participants’ benefits that may be allocated to the participant’s account.

To the extent that a plan’s defined contributions to an individual’s account are to be made for periods in which that individual renders services, the net pension cost for a period shall be the contribution called for in that period. If a plan calls for contributions for periods after an individual retires or terminates, the estimated cost shall be accrued during the employee’s service period.

An employer that sponsors one or more defined contribution plans shall disclose the following separately from its defined benefit plan disclosures:

1. A description of the plan(s) including employee groups covered, the basis for determining contributions, and the nature and effect of significant matters affecting comparability of information for all periods presented.
2. The amount of cost recognized during the period.

A pension plan having characteristics of both a defined benefit plan and a defined contribution plan requires careful analysis. If the substance of the plan is to provide a defined benefit, as may be the case with some "target benefit" plans, the accounting and disclosure requirements shall be determined in accordance with the provisions applicable to a defined benefit plan.

Multiemployer Plans

A multiemployer plan is a pension plan to which two or more unrelated employers contribute, usually pursuant to one or more collective-bargaining agreements. A characteristic of multiemployer plans is that assets contributed by one participating employer may be used to provide benefits to employees of other participating employers since assets contributed by an employer are not segregated in a separate account or restricted to provide benefits only to employees of that employer.

An employer participating in a multiemployer plan shall recognize as net pension cost, the required contribution for the period and shall recognize as a liability, any contributions due and unpaid. The required contribution includes both current costs and prior service costs. If an employer elects to fund prior service cost in full at the inception of the plan, the total payment becomes the employer's required contribution, and accordingly, its pension cost for the period.

The following provisions are applicable to RUS borrowers participating in a multiemployer pension plan:

1. An electric utility participating in a multiemployer plan may defer current period pension expenses if the provisions of Statement of Financial Accounting Standards No. 71 (Statement No. 71), Accounting for the Effects of Certain Types of Regulation, are applied.

Under the provisions of Statement No. 71, pension costs may be deferred provided such costs are recovered through future rates.

2. An electric utility instituting an amendment to the NRECA Retirement and Security plan enters into a contractual agreement to pay the costs incurred (prior service pension costs) for the amendment. In such cases, the agreement is noncancelable and payable regardless of continued participation in the plan.

Since the utility is unconditionally committed to making these payments and such payments are not contingent upon the utility's continued participation in the plan, the recognition of that liability is appropriate. The costs associated with this liability shall be expensed, in their entirety, when the liability is recognized.

The accounting journal entries required to record the transactions associated with a multiemployer pension plan are as follows:

Sample 1—Current Pension Expense

The journal entry required to record the normal costs associated with the NRECA Retirement and Security Program is as follows:

Dr. Various Operations, Maintenance, and Administrative Expense Accounts
Dr. 107, Construction Work-in-Progress
Dr. 108.8, Retirement Work-in-Progress
Cr. 131.1, Cash—General

To record the payment of pension costs to NRECA.

NOTE: This entry shall not be recorded during the moratorium.

Sample 2—Prior Service Pension Expense

The journal entries required to record the prior service costs associated with the NRECA Retirement and Security Program are as follows:

1. If the RUS borrower elects to pay the prior service pension costs in full, and there is no deferral of costs under the provision of Statement No. 71, the following entry shall be recorded:

Dr. Various Operations, Maintenance, and Administrative Expense Accounts
Dr. 107, Construction Work-in-Progress
Dr. 108.8, Retirement Work-in-Progress
Cr. 131.1, Cash—General

To record the payment of prior service pension costs to NRECA.

2. If the RUS borrower elects to finance prior service pension costs over a period of years and there is no deferral...
of costs under the provisions of Statement No. 71, the following entries shall be recorded:

Dr. Various Operations, Maintenance, and Administrative Expense Accounts
Dr. 107, Construction Work-in-Progress
Dr. 108.8, Retirement Work-in-Progress
Cr. 224, Other Long-Term Debt
To record the liability to NRECA for prior service pension costs.

Dr. 224, Other Long-Term Debt
Dr. 427, Interest on Long-Term Debt
Cr. 131.1, Cash—General
To record the annual payment to NRECA for prior service pension costs.

3. If the RUS borrower elects to finance prior service pension costs over a period of years and such costs are being deferred and amortized in accordance with the provisions of Statement No. 71, the following entries shall be recorded:

Dr. 182.3, Other Regulatory Assets
Cr. 224, Other Long-Term Debt
To record the liability to NRECA for prior service pension costs.

Dr. Various Operations, Maintenance, and Administrative Expense Accounts
Dr. 107, Construction Work-in-Progress
Dr. 108.8, Retirement Work-in-Progress
Cr. 182.3, Other Regulatory Assets
To record the amortization of deferred prior service pension costs.

Dr. 224, Other Long-Term Debt
Dr. 427, Interest on Long-Term Debt
Cr. 131.1, Cash—General
To record the annual payment to NRECA for prior service pension costs.

4. If the RUS borrower elects to pay the prior service pension costs in full and such costs are being deferred and amortized in accordance with the provisions of Statement No. 71, the following entries shall be recorded:

Dr. 182.3, Other Regulatory Assets
Cr. 131.1, Cash—General
To record the payment to NRECA for prior service pension costs.

Dr. Various Operations, Maintenance, and Administrative Expense Accounts
Dr. 107, Construction Work-in-Progress
Dr. 108.8, Retirement Work-in-Progress
Cr. 182.3, Other Regulatory Assets
To record the amortization of deferred prior service pension costs.

It should be noted that although the above entries relate specifically to the NRECA Retirement and Security Program, they are applicable to all multiemployer pension plans.

An employer that participates in one or more multiemployer plans shall disclose the following separately from disclosures for a single-employer plan:

1. A description of the multiemployer plan(s) including the employee groups covered, the type of benefits provided (defined benefit or defined contribution), and the nature and effect of significant matters affecting comparability of information for all periods presented.

2. The amount of cost recognized during the period.

Multiple-Employer Plans

A multiple-employer plan is, in substance, aggregations of single-employer plans combined to pool their assets for investment purposes to reduce the cost of plan administration. Under a multiple-employer plan, assets are segregated and specifically identified to an employer. In addition, such plans may have features that allow participating employers to have different benefit formulas. Such plans shall be considered single-employer plans for financial accounting purposes and each employer’s accounting shall be based upon its respective interest in the plan.

607 Unproductive Time

Lost time relating to construction, operations and maintenance shall be allocated on the basis of direct payroll costs to the appropriate construction, operations or maintenance accounts in the month incurred. Lost time is defined as time on duty during which productive work is not performed due to inclement weather conditions, material shortages, machine repairs, or other reasons.

If lost time attributable to construction has a material effect on the construction accounts in any one month, these costs shall be deferred and distributed over a reasonable period of...
time by means of a predetermined percentage based upon direct labor.

608 Training Costs, Attendance at Meetings, Etc.

Utilities engage in many types of training programs. Seminars are conducted for directors, managers, office managers and social security and other payroll taxes spent by a manager or line foreman conducting weekly safety meetings shall be charged to the appropriate functional expense accounts including Account 590, Maintenance, Supervision and Engineering, and Account 920, Administrative and General Services.

609 Maintenance and Operations

"Operations" is the general term used to describe activities involved in the delivery of electric service, by means of a distribution system, to the end user. It pertains to the use of the utility's electric plant facilities and does not include activities intended to prevent or remedy an impending or actual breakdown of those facilities. These activities are classified as maintenance.

"Maintenance" is the general term used to describe the activities involved in the upkeep and repair, but not the enlargement or improvement, of property owned or leased and operated by the company. It does not include the replacement of retirement units.

610 Financial Forecast

Costs incurred and salaries paid to perform a 10-year financial forecast shall be charged to Account 920, Administrative and General Salaries. Related office supplies and expenses shall be charged to Account 921, Office Supplies and Expenses. When a forecast is performed by an outside consultant, the cost shall be charged to Account 923, Outside Services Employed.

611 Advertising Expense

The cost of advertising and the cost of informing the public about the electric cooperative’s activities shall be charged to Account 930.2, Miscellaneous General Expenses.

Most of a cooperative’s advertising is instructional in nature and relates the cooperative’s history and current activities. This type of advertising activity should not be confused with that directed towards the enactment of a specific law or laws directed toward obtaining a specific decision from a regulatory body. Political advertising of the type defined above shall be charged
to Account 426.4, Expenditures for Certain Civic, Political, and Related Activities.

612 Special Power Cost Study

A special power cost study is defined as a study to determine whether sufficient power will be available in the future. If additional power or power sources are needed, the study determines whether generation or purchase will supply the lesser cost. The study also indicates when additional power will be needed. As costs are incurred, they shall be charged to a subaccount of Account 186, Miscellaneous Deferred Debits. Upon completion of the study, the costs shall be charged to Account 557, Other Expenses, or amortized to Account 557 over a period of time not to exceed 5 years.

613 Mapping Costs

The purpose of posting completed work orders to system maps is to improve the operation of the system. These costs shall, therefore, be charged to Account 588, Miscellaneous Distribution Expenses. However, the cost of system mapping in the planning stage of construction is an acceptable overhead cost of the resulting construction.

614 Member Relations Costs

Many electric cooperatives hire employees whose duties concern a mixture of power use and member relations activities. The salaries for these employees shall be charged to Account 930.2, Miscellaneous General Expenses, except as provided below:

1. Account 912, Demonstrating and Selling Expenses, shall be charged with all labor, material, advertising, and other expenses incurred in promotional, demonstrating, and selling activities; the objective of which is to promote or retain the use of utility services by present or prospective customers.

2. Account 930.1, General Advertising Expenses, shall be charged with labor, material, and other expenses incurred in advertising and related activities, the cost of which by their content and purpose, are not provided for elsewhere.

3. Account 416, Costs and Expenses of Merchandising, Jobbing, and Contract Work, shall be charged with all costs specifically related to merchandising activities when the utility is engaged in a major merchandising program.

4. Account 426.4, Expenditures for Certain Civic, Political, and Related Activities, shall be charged with expenditures for the purpose of influencing public opinion with respect to the election or appointment of public officials, referenda, legislation, or ordinances (either with respect to the possible adoption of new referenda, legislation or ordinances or repeal or modification of existing referenda, legislation or ordinances); or approval, modification, or revocation of franchises; or for the purpose of influencing the decisions of public officials. Account 426.4 shall not include expenditures which are directly related to appearances before regulatory or other governmental bodies in connection with the borrower’s existing or proposed operations.

615 Statewide Fees

Additional fees collected by a statewide association from its members for construction of a statewide building shall be charged to Account 930.2, Miscellaneous General Expenses. Any amounts that are to be repaid by the state association shall be charged to Account 143, Other Accounts Receivable, or Account 123.23, Other Investments in Associated Organizations, depending upon the terms of the repayment.

616 Power Supply/Distribution Cooperative Borrowings

When a power supply cooperative borrows money from a distribution cooperative as the result of a long-term loan agreement, the money shall be recorded on the books of the power supply cooperative as general funds unless restricted to a specific purpose. If restricted, the funds shall be recorded in Account 128, Other Special Funds. The resulting liability shall be recorded in Account 224, Other Long-Term Debt. The transaction shall be charged to Account 123.23, Other Investments in Associated Organizations, on the books of the distribution cooperative.
617 Rate Discount Allowed by the Power Cooperative to Distribution Cooperatives Owning Connecting Transmission Lines

A distribution cooperative purchases power from a power cooperative. The distribution cooperative owns and operates the transmission line between the power cooperative’s facilities and the distribution facilities. Because of this, power is sold at the standard rate at which the power cooperative sells to other distribution cooperatives who do not own their transmission lines, less a discount. The discount or reduction in rate is based upon the distribution cooperative’s expense in operating and maintaining its transmission facilities. The contract between the power cooperative and the distribution cooperative must specifically state that the member shall receive a reduced rate or discount from the seller’s rate to other member cooperatives.

Under this type of arrangement, the distribution cooperative shall record the cost of purchased power by charging the net amount to Account 555, Purchased Power.

618 Theft Losses not Covered by Insurance

Utilities may suffer losses as a result of thefts of cash, materials and supplies, equipment, or electric plant-in-service that is not covered by insurance. The charges for nominal uninsured losses shall be recorded in the following accounts:

1. Cash—Account 924, Property Insurance, shall be charged.
2. Plant materials and operating supplies—Account 163, Stores Expense Undistributed, shall be charged.
3. Equipment—Account 163, Stores Expense Undistributed, shall be charged for stores equipment; and Account 184, Transportation Expense—Clearing, for transportation and garage equipment. The appropriate miscellaneous operations or administrative expense account (Account 506, 524, 539, 549, 566, 588, 905, 910, 916, or 930.2, as appropriate) shall be charged for all other equipment.
4. Electric Plant-in-Service—A retirement work order shall be prepared for electric plant constituting a unit of property. The loss due to retirement shall be charged to Account 108.6, Accumulated Provision for Depreciation of Distribution Plant. If the plant does not constitute a retirement unit, the loss shall be charged to the appropriate maintenance expense account.

619 Self Billing

To maintain the books of accounts on an accrual basis, bills for customers who self bill and have not sent in a reading or remittance, shall be estimated. A journal entry shall be made to record the estimated revenue and kWh sold by debiting accounts receivable and crediting the appropriate revenue accounts. The estimated bill shall be posted to the customer’s account and identified by an appropriate symbol indicating that it is an estimate. Reconciliation with the general ledger control is made in the usual manner.

620 Purchase Rebates

Some vendors from which electric cooperatives purchase plant materials and supplies and merchandise for resale are making purchase rebates based upon the quantity or dollar volume of purchases. These “quantity discounts” may be in the form of cash or credit memoranda, in the form of prepaid package travel arrangements, or a combination of such methods. The rebate shall be accounted for as a reduction in the cost of the material or appliances upon which it was based.

In some instances, the rebate may be for material or appliances that are no longer in stock or cannot be identified. If the rebate is based upon the purchase of plant materials and operating supplies that are normally charged to Account 154, Plant Materials and Operating Supplies, a credit shall be made to Account 163, Stores Expense Undistributed. If the rebate is based upon appliances and equipment held for merchandising or contract work, the credit shall be spread over the items in Account 155, Merchandise. To avoid materially distorting the cost of the remaining appliances, if a portion of the items upon which the rebate was based are no longer in stock, a portion of the credit shall be prorated to Account 416, Cost and Expenses of Merchandising, Jobbing, and Contract Work, on the
basis of the number of items sold to the quantity remaining in stock.

If the rebate is in the form of a travel package or travel arrangements, the value of the rebate shall be estimated and recorded as a reduction of the cost of the material or appliances upon which it was based in a manner similar to that of the cash rebates discussed above. The beneficiary of the travel or travel allowance shall be designated by or in accordance with policy established by the board of directors. The contra charge to the reduction in cost shall be to an appropriate account depending upon the relationship of the recipient to the cooperative. For employees, this shall be Account 926, Employee Pensions and Benefits; for directors or patrons, Account 930.2, Miscellaneous General Expenses.

621 Integrity Fund

The CFC Integrity Fund was established to assist borrowers in their attempts to stop takeover bids by investor-owned utilities. A borrower makes a contribution to the Integrity Fund in the form of cash or patronage capital refunds. CFC retains the contribution for a 5-year period during which time the borrower earns interest on the balance in its account. Each year, the borrower receives a statement indicating (both for the total fund and the individual borrower's share) the amount contributed, interest earned, disbursements made, and the ending balance. The disbursements from the fund are allocated to each contributing borrower's account based upon their individual account balances. At the end of the 5-year period, the balance in the account, if any, is refunded to the contributing borrower.

Since the contributing borrower will receive a refund only if its funds are not totally disbursed, the contribution shall be charged to expense in Account 426.1, Donations. If any part of the contribution is returned at the end of the 5-year period, the refund shall be credited to Account 421, Miscellaneous Nonoperating Income.

622 In-Substance Defeasance

An in-substance defeasance has been defined as the process whereby a debtor irrevocably places cash or other assets in a trust to be used solely for the purpose of satisfying scheduled payments of both principal and interest related to a specific debt obligation. Under the structural arrangements of an in-substance defeasance, the probability that the debtor will be required to make additional future debt payments is remote. In these specific circumstances, debt has been determined to be extinguished even though the debtor has not been legally released from his obligations under the debt instrument.

The trust established in a defeasance transaction is restricted as to the nature of the assets held. The trust must be funded with monetary assets that are essentially risk free as to the amount, timing, and collection of interest and principal. For debt denominated in United States dollars, “risk free” assets are limited to:

1. Direct obligations of the United States government;
2. Obligations guaranteed by the United States government; and
3. Securities that are backed by United States government obligations as collateral under an arrangement by which the interest and principal payments on the collateral, flow immediately through to the holder of the security.

The monetary assets of the trust must provide cash flows sufficient to coincide with the scheduled interest and principal payments on the defeased debt. If the trust is expected to pay the costs associated with the defeasance, such as trustee fees, these costs must be considered in determining the amount of funds required by the trust.

The principles of in-substance defeasance apply only to debt with specific maturities and fixed payment schedules and, as such, do not apply to debt with variable terms in which advance determination of debt service requirements is not possible.

Generally accepted accounting principles (GAAP) address the extinguishment of debt in Accounting Principles Board Opinion No. 26, and Statement of Financial Accounting Standard No. 76, Extinguishment of Debt. In accordance with these two statements, debt which has been defeased remains recorded in the regulated books of account as do the assets placed in the irrevocable
trust. They are not, however, recognized as an asset and liability for financial reporting purposes. The transaction, including the total amount of debt outstanding and the total amount of debt that is considered extinguished at the end of the period, must be disclosed in the footnotes to the financial statements as long as the debt remains outstanding.

Debt is frequently extinguished before its scheduled maturity. Debt may be extinguished by the use of the borrower's general funds, or by the reacquisition of another debt issue at a different interest rate or varying terms. As these assets are expected to be revenue producing during those years, both the assets and the revenue they generate may be utilized to meet maturing debt payments. Therefore, in most instances, the dollar value of the assets initially placed in the trust do not equal the dollar value of the outstanding principal balance. The difference represents an "economic" gain or loss to the borrower.

To provide consistency in reporting among all RUS borrowers, any gain or loss that is recognized for financial statement purposes should be reported in accordance with the provisions of General Instruction No. 17 of this part. Therefore, the gain or loss should be amortized (for reporting purposes) in equal monthly amounts over the remaining life of the original debt issue or the remaining life of the new issue. The gain or loss may be reported in the current period only in those instances in which it is immaterial to the financial statements.

The RUS Form 7, Financial and Statistical Report, and the RUS Form 12, Operating Report—Financial, must, however, reflect the actual amounts recorded in the books and records of the borrower.

623 Satellite or Cable Television Services

Many electric borrowers have become involved in either providing satellite or cable television services or obtaining satellite or cable television services for their own use. This section outlines the accounting to be followed when recording transactions involving satellite or cable television services.

1. Separate Subsidiary

If a borrower provides satellite or cable television services through a separate subsidiary, the investment in the subsidiary shall be recorded in Account 123.11, Investment in Subsidiary Companies. The net income or loss of the subsidiary shall be debited or credited to Account 123.11, as appropriate, with an offsetting entry to Account 418.1, Equity in Earnings of Subsidiary Companies.

2. Segment of Current Operations

If a borrower provides satellite or cable television services as part of its normal operations, the investment in satellite or cable television equipment shall be recorded in Account 121, Nonutility Property. All income associated with these services shall be recorded in Account 417, Revenues from Nonutility Operations, and the associated expenses shall be charged to Account 417.1, Expenses of Nonutility Operations.

3. Sale and Installation of Satellite or Cable Television Equipment

If a borrower sells or installs satellite or cable television equipment, the equipment purchased for resale shall be recorded in Account 156, Other Materials and Supplies, until sold. The revenues generated from such sales or installations shall be recorded in Account 415, Revenues from Merchandising, Jobbing, and Contract Work, and the associated expenses shall be charged to Account 416, Costs and Expenses of Merchandising, Jobbing, and Contract Work.

4. Equipment Purchased for Own Use

If a borrower purchases satellite or cable television equipment for its own use, the investment in the equipment shall be recorded in Account 397, Communication Equipment.

624 Pollution Control Bonds

The construction and installation of pollution control facilities are often financed by issuing tax exempt municipal securities. The funds generated from the sale of these securities are deposited into an account that is controlled by a designated trustee. The funds under the control of the trustee
are usually invested, earning interest, until they are needed.
Interest expense accrued on the pollution control bonds during the construction period shall be capitalized in Account 107, Construction Work-in-Progress. After construction is complete, all subsequent accruals of interest expense shall be charged to Account 427, Interest on Long-Term Debt.
Interest income earned during the construction period shall be recorded as a debit to Account 171, Interest and Dividends Receivable, and a credit to Account 107, Construction Work-in-Progress. Upon notification of receipt of the interest in the trustee account, Account 221.XX, Long-Term Debt—Pollution Control Bonds, shall be debited and Account 171, Interest and Dividends Receivable, shall be credited. Upon completion of construction, Account 419, Interest and Dividend Income, shall be credited for the amount of interest income earned during the period.
The entries required to account for the transactions associated with the issuance of pollution control bonds are as follows:
**Dr. 221.XX, Long-Term Debt—Pollution Control Bonds—Trustee**
**Cr. Account 221.XI, Long-Term Debt—Pollution Control Bonds**
To record the sale of pollution control bonds.
**Dr. 107, Construction Work-in-Progress**
**Cr. 232, Accounts Payable**
To record costs incurred in construction of pollution control facilities.
**Dr. 131.1, Cash—General Funds**
**Cr. 221.XX, Long-Term Debt—Pollution Control Bonds—Trustee**
To record the transfer of funds from the trustee.
**Dr. 107, Construction Work-in-Progress**
**Cr. 221.XX, Long-Term Debt—Pollution Control Bonds—Trustee**
To record interest expense on pollution control bonds.
**Dr. 171, Interest and Dividends Receivable**
**Cr. 107, Construction Work-in-Progress**
To record earnings from investments made by the trustee.
**Dr. 221.XX, Long-Term Debt—Pollution Control Bonds—Trustee**
**Cr. 171, Interest and Dividends Receivable**
To record receipt of interest income by the trustee account.
**Dr. XXX, Various Plant Accounts**
**Cr. 107, Construction Work-in-Progress**
To close completed construction to the primary plant accounts.

### 625 Prepayment of Debt

Many RUS borrowers have decided to redeem (prepay) their issues of long-term debt. As a result of this redemption, the borrower may incur a gain (discount) or a loss (penalty) on the early extinguishment of debt. The accounting for this gain or loss is highlighted in this section.

If debt is redeemed without refunding (paid with general funds), the gain or loss incurred shall be recorded in Account 189, Unamortized Loss on Reacquired Debt, or Account 257, Unamortized Gain on Reacquired Debt, as appropriate. The borrower shall amortize the recorded deferral on a monthly basis over the remaining life of the old debt issue. Amounts so amortized shall be charged to Account 428.1, Amortization of Loss on Reacquired Debt, or credited to Account 429.1, Amortization of Gain on Reacquired Debt—Credit, as appropriate.

If the debt is redeemed with refunding (refinanced), the gain or loss incurred shall be recorded in Account 189 or Account 257, as appropriate. The borrower may elect to account for the deferrals as follows:

1. Write them off immediately when the amounts are insignificant;
2. Amortize them by equal monthly amounts over the remaining life of the old debt issue; or
3. Amortize them by equal monthly amounts over the life of the new debt issue.

Once an election has been made, it shall be applied on a consistent basis. Regardless of the option selected, the amortization shall be charged to either Account 428.1 or 429.1, as appropriate.

Where a regulatory authority having jurisdiction over the borrower specifically disallows the rate principle of amortizing gains or losses on the redemption of long-term debt without refunding, and does not apply the gain or
loss to interest charges in computing
the borrower's rates, the alternative
method may be used to account for
gains or losses relating to the redemp-
tion of long-term debt with or without
refunding. The alternative method re-
quires that gains or losses be recorded
in Account 421, Miscellaneous Nonoper-
ating Income, or Account 426.5, Other
Deductions, as incurred. When the al-
ternative method is used, the borrower
shall include a footnote to the finan-
cial statements stating the reason for
using this method and its treatment
for rate making purposes.

§ 1767.41

626 Rural Economic Development
Loan and Grant Program

On December 21, 1987, Section 313,
Cushion of Credits Payments Program,
was added to the Rural Electrification
Act. Section 313 establishes a Rural
Economic Development Subaccount
and authorizes the Administrator of
the Rural Utilities Service to provide
zero interest loans or grants to RE Act
borrowers for the purpose of promoting
rural economic development and job
creation projects.

Subpart B, Rural Economic Develop-
ment Loan and Grant Program, 7 CFR
Part 1703, sets forth the policies and
procedures relating to the zero interest
loan program and for approving and ad-
ministering grants.

The accounting journal entries re-
quired to record the transactions asso-
ciated with a rural economic develop-
ment loan are as follows:

Dr. 224.17, RUS Notes Executed—Eco-
nomic Development—Debit
Cr. 224.16, Long-Term Debt—RUS
Economic Development Notes Exe-
cuted

To record the contractual obligation
to RUS for the Economic Development
Notes.

Dr. 131.12, Cash—General—Economic
Development Funds
Cr. 224.17, RUS Notes Executed—Eco-
nomic Development—Debit

To record the receipt of the economic
development loan funds.

Dr. 123, Investment in Associated Or-
ganizations or
Dr. 124, Other Investments
Cr. 131.12, Cash—General—Economic
Development Funds

To record the disbursement of Eco-
nomic development loan funds to the
project.

Dr. 131.1, Cash—General Funds
Cr. 421, Miscellaneous Nonoperating
Income

To record payment received from the
project for loan servicing charges.

Dr. 171, Interest and Dividends Receiv-
able
Cr. 419, Interest and Dividend Income

To record the interest earned on the
investment of rural economic develop-
ment loan funds.

Dr. 426.1, Donations or
Dr. 426.5, Other Deductions
Cr. 131.1, Cash—General Funds

To record the payment of interest
earned in excess of $500.00 on the in-
vestment of rural economic develop-
ment loan funds.

NOTE: Interest earned in excess of $500.00
must be used for the rural economic de-
velopment project for which the loan funds were
received or returned to RUS.

Dr. 131.12, Cash—General—Economic
Development Funds
Cr. 123, Investment in Associated Or-
ganizations or
Cr. 124, Other Investments

To record receipt of the repayment,
by the project, of economic develop-
ment loan funds.

Dr. 224.16, Long-Term Debt—RUS Eco-
nomic Development Notes Exe-
cuted
Cr. 131.12, Cash—General—Economic
Development Funds

To record the repayment, to RUS, of
the economic development loan funds.

The accounting journal entries re-
quired to record the transactions asso-
ciated with a rural economic develop-
ment grant are as follows:

Dr. 131.13, Cash—General—Economic
Development Grant Funds
Cr. 224.18, Other Long-Term Debt—
Grant Funds;
Cr. 208, Donated Capital; or
Cr. 421, Miscellaneous Nonoperating
Income

To record grant funds disbursed by
RUS. If the grant agreement requires
repayment of the funds upon termi-
nation of the revolving loan program,
Account 224.18 should be credited. If
the grant agreement states that there
is absolutely no obligation for repayment upon termination of the revolving loan program, the funds should be accounted for as a permanent infusion of capital by crediting Account 208. If, however, the grant agreement is silent as to the final disposition of the grant funds, Account 421 should be credited.

Dr. 123.3, Investment in Associated Organizations—Federal Economic Development Loans
Cr. 131.13, Cash—General—Economic Development Grant Funds
To record advances of Federal funds to associated organizations for authorized rural economic development projects.

Dr. 124.1, Other Investments—Federal Economic Development Loans
Cr. 131.13, Cash—General—Economic Development Grant Funds
To record advances of Federal funds to nonassociated organizations for authorized rural economic development projects.

Dr. 171, Interest and Dividends Receivable
Cr. 419, Interest and Dividend Income
To record the accrual of interest on loans made to associated and nonassociated organizations with Federal funds for authorized rural economic development projects.

Dr. 131.14, Cash—General—Economic Development Non-Federal Revolving Funds
Cr. 123.3, Investment in Associated Organizations—Non-Federal Economic Development Loans or
Cr. 124.1, Other Investments—Federal Economic Development Loans
To record repayment of loans made with Federal funds.

Dr. 123.4, Investment in Associated Organizations—Non-Federal Economic Development Loans
Cr. 131.14, Cash—General—Economic Development Non-Federal Revolving Funds
To record advances of non-Federal funds to associated organizations for authorized rural economic development projects.

Dr. 124.2, Other Investments—Non-Federal Economic Development Loans
Cr. 131.14, Cash—General—Economic Development Non-Federal Revolving Funds
To record advances of non-Federal funds to nonassociated organizations for authorized rural economic development projects.

Dr. 171, Interest and Dividends Receivable
Cr. 419, Interest and Dividend Income
To record the accrual of interest on loans made to associated and nonassociated organizations with non-Federal funds for authorized rural economic development projects.

Dr. 131.14, Cash—General—Economic Development Non-Federal Revolving Funds
Cr. 123.4, Investment in Associated Organizations—Non-Federal Economic Development Loans or
Cr. 124.2, Other Investments—Non-Federal Economic Development Loans
To record repayment of loans made with non-Federal funds.

627 Postretirement Benefits

Statement of Financial Accounting Standards No. 106, Employers' Accounting for Postretirement Benefits Other than Pensions (Statement No. 106), requires reporting entities to accrue the expected cost of postretirement benefits during the years the employee provides service to the entity. For purposes of applying the provisions of Statement No. 106, members of the board of directors are considered to be employees of the cooperative. Prior to the issuance of Statement No. 106, most reporting entities accounted for postretirement benefit costs on a "pay-as-you-go" basis; that is, costs were recognized when paid, not when the employee provided service to the entity in exchange for the benefits.

As defined in Statement No. 106, a postretirement benefit plan is a deferred compensation arrangement in which an employer promises to exchange future benefits for an employee's current services. Postretirement benefit plans may be funded or unfunded. Postretirement benefits include, but are not limited to, health care, life insurance, tuition assistance, day care, legal services, and housing
subsidies provided outside of a pension plan. This statement applies to both written plans and to plans whose existence is implied from a practice of paying postretirement benefits. An employer’s practice of providing postretirement benefits to selected employees under individual contracts with specified terms determined on an employee-by-employee basis does not, however, constitute a postretirement benefit plan under the provisions of this statement.

Postretirement benefit plans generally fall into three categories: single-employer defined benefit plans, multi-employer plans, and multiple-employer plans.

The accounting requirements set forth in this interpretation focus on single- and multiple-employer plans. The accounting requirements set forth in Statement No. 106 for multiemployer plans or defined contribution plans shall be adopted for borrowers electing those types of plans.

Under the provisions of Statement No. 106, there are two components of the postretirement benefit cost: the current period cost and the transition obligation. The transition obligation is a one-time accrual of the costs resulting from services already provided. Statement No. 106 allows the transition obligation to be deferred and amortized on a straight-line basis over the average remaining service period of the active employees. If the average remaining service life of the employees is less than 20 years, a 20-year amortization period may be used.

**Accounting Requirements**

All RUS borrowers must adopt the accrual accounting provisions and reporting requirements set forth in Statement No. 106. The transition obligation and accrual of the current period cost must be based upon an actuarial study. This study must be updated to allow the borrower to comply with the measurement date requirements of Statement No. 106; however, the study must, at a minimum, be updated every five years. RUS will not allow electric borrowers to account for postretirement benefits on a “pay-as-you-go” basis.

The deferral and amortization of the transition obligation does not require RUS approval provided that it complies with the provisions of Statement No. 106. If, however, a borrower elects to expense the transition obligation in the current period and subsequently defer this expense in accordance with Statement of Financial Accounting Standards No. 71, Accounting for the Effects of Certain Types of Regulation, the deferral must be approved by RUS.

In those states in which the commission will not allow the recovery of the transition obligation through future rates, the transition obligation must be expensed, in its entirety, in the year in which Statement No. 106 is adopted. A portion of the transition obligation may be charged to construction and retirement activities provided such charges are properly supported.

**Effective Date and Implementation**

For plans outside the United States and for defined benefit plans of employers that (a) are nonpublic enterprises and (b) sponsor defined benefit postretirement plans with no more than 500 plan participants in the aggregate, Statement No. 106 is effective for fiscal years beginning after December 15, 1994. For all other plans, Statement No. 106 is effective for fiscal years beginning after December 15, 1992.

RUS borrowers must comply with the implementation dates set forth in Statement No. 106. At the time of the adoption of Statement No. 106, rates must be in place sufficient to recover the current period expense and any amortization of the transition obligation. A copy of a board resolution or commission order, as appropriate, indicating that the transition obligation and current period expense have been included in the borrower’s rates must be submitted to RUS.

**Accounting Journal Entries—Transition Obligation**

The journal entries required to record the transition obligation are as follows:

1. If the borrower elects to expense the transition obligation in the current period and there is no deferral of costs, the following entry shall be recorded:
Dr. 435.1, Cumulative Effect on Prior Years of a Change in Accounting Principle

or

Dr. 926, Employee Pensions and Benefits

Dr. 107, Construction Work-in-Progress
Dr. 108.8, Retirement Work-in-Progress
Cr. 228.3, Accumulated Provision for Pensions and Benefits

To record the current period recognition of the transition obligation for postretirement benefits. Note: A portion of the transition obligation may be charged to construction and retirement activities provided such charges are properly supported.

2. If the borrower elects to defer and amortize the transition obligation in accordance with the provisions of Statement No. 71, the following entry shall be recorded:

Dr. 192.3, Other Regulatory Assets
Cr. 228.3, Accumulated Provision for Pensions and Benefits

To record the deferral of the transition obligation under the provisions of Statement No. 71.

Dr. Various Operations, Maintenance, and Administrative Expense Accounts
Dr. 107, Construction Work-in-Progress
Dr. 108.8, Retirement Work-in-Progress
Cr. 182.3, Other Regulatory Assets

To record the amortization of postretirement benefits expenses as they are recovered through rates in accordance with Statement No. 71.

3. The deferral and amortization of the transition obligation under the provisions of Statement No. 106 is considered to be an off balance sheet item. If, therefore, the borrower elects to defer and amortize the transition obligation on a straight-line basis over the average remaining service period of the active employees or 20 years in accordance with Statement No. 106, no entry is required. Instead, the transition obligation is recognized as a component of postretirement benefit cost as it is amortized. It should be noted, however, that the amount of the unamortized transition obligation must be disclosed in the notes to the financial statements.

Accounting Journal Entry—Current Period Expense

The current period postretirement expense should be recorded by the following entry:

Dr. Various Operations, Maintenance, and Administrative Expense Accounts
Dr. 107, Construction Work-in-Progress
Dr. 108.8, Retirement Work-in-Progress
Cr. 228.3, Accumulated Provision for Pensions and Benefits

To record current period postretirement benefit expense.

Dr. 228.3X, Accumulated Provision for Pensions and Benefits—Funded
Cr. 131.1, Cash—General

To record cash payments on a ‘pay-as-you-go’ basis for postretirement benefits.

Accounting Journal Entry—Funding

If a borrower elects to voluntarily fund its postretirement benefits obligation in an external, irrevocable trust, the following entry shall be recorded:

Dr. 228.3X, Accumulated Provision for Pensions and Benefits—Funded
Cr. 131.1, Cash—General

To record the funding of postretirement benefits expense into an external, irrevocable trust.

If a borrower elects to voluntarily fund its postretirement benefits obligation in an investment vehicle other than an external, irrevocable trust, the following entry shall be recorded:

Dr. 128, Other Special Funds
Cr. 131.1, Cash—General

To record the funding of postretirement benefits expense into an investment vehicle other than an external, irrevocable trust.

628 Postemployment Benefits

Statement of Financial Accounting Standards No. 112, Employers’ Accounting for Postemployment Benefits (Statement No. 112) establishes the standards of financial accounting and reporting for employers who provide benefits to former or inactive employees after employment but before retirement. Inactive employees are those who are not currently rendering service to the employer but who have not
been terminated, including employees who are on disability leave, regardless of whether they are expected to return to active service. For purposes of applying the provisions of Statement No. 112, former members of the board of directors are considered to be employees of the cooperative.

Postemployment benefits include benefits provided to former or inactive employees, their beneficiaries, and covered dependents. They include, but are not limited to, salary continuation, supplemental benefits (including workmen's compensation), health care, job training and counseling, and life insurance coverage. Benefits may be provided in cash or in kind and may be paid upon cessation of active employment or over a specified period of time.

The cost of providing postemployment benefits is considered to be a part of the compensation provided to an employee in exchange for current service and should, therefore, be accrued as the employee earns the right to be paid for future postemployment benefits. Applying the criteria set forth in Statement of Financial Accounting Standards No. 43, Accounting for Compensated Absences, a postemployment benefit obligation is accrued when all of the following conditions are met:

1. The employer’s obligation for payment for future absences is attributable to employees’ services already performed;
2. The obligation relates to employee rights that vest or accumulate. Vested rights are considered those rights for which the employer is obligated to make payment even if the employee terminates. Rights that accumulate are those earned, but unused rights to compensated absences that may be carried forward to one or more periods subsequent to the period in which they are earned;
3. Payment of the compensation is probable; and
4. The amount can be reasonably estimated.

If all of these conditions are not met, the employer must account for its postemployment benefit obligation in accordance with Statement of Financial Accounting Standards No. 5, Accounting for Contingencies (Statement No. 5) when it becomes probable that a liability has been incurred and the amount of that liability can be reasonably estimated.

If an obligation for postemployment benefits is not accrued in accordance with the provisions of Statement No. 5 or Statement No. 43 only because the amount cannot be reasonably estimated, the financial statements should disclose that fact.

**Accounting Requirements**

All RUS borrowers must adopt the accrual accounting provisions and reporting requirements set forth in Statement No. 112 as of the statement’s implementation date. A portion of the cumulative effect may be charged to construction and retirement activities provided such charges are properly supported. If a borrower elects to defer the cumulative effect of implementing Statement No. 112 in accordance with the provisions of Statement of Financial Accounting Standards No. 71, Accounting for the Effects of Certain Types of Regulation, the deferral must be approved by RUS.

**Effective Date and Implementation**

Statement No. 112 is effective for fiscal years beginning after December 15, 1993. Previously issued financial statements should not be restated.

RUS borrowers must comply with the implementation date set forth in Statement No. 112. At the time of the adoption of Statement No. 112, rates must be in place sufficient to recover the current period expense.

**Accounting Journal Entries**

The journal entries required to account for postemployment benefits are as follows:

- **Dr. 435.1, Cumulative Effect on Prior Years of a Change in Accounting Principle**
- **Dr. 107, Construction Work in Progress**
- **Dr. 108.8, Retirement Work in Progress**
- **Cr. 228.3, Accumulated Provision for Pensions and Benefits**

To record the cumulative effect of implementing Statement No. 112.

**Note:** A portion of the cumulative effect may be charged to construction and retirement activities provided such charges are...
properly supported. Account 435.1 is closed to Account 219.2, Nonoperating Margins.

If the borrower elects to defer and amortize the cumulative effect in accordance with the provisions of Statement No. 71, the following entry shall be recorded:

Dr. 182.3, Other Regulatory Assets
Cr. 228.3, Accumulated Provision for Pensions and Benefits

To record the deferral of the cumulative effect of implementing Statement No. 112 in accordance with the provisions of Statement No. 71.

Dr. Various Operations, Maintenance, and Administrative Expense Accounts
Dr. 107, Construction Work in Progress
Dr. 108.8, Retirement Work in Progress
Cr. 182.3, Other Regulatory Assets

To record the amortization of the cumulative effect of implementing Statement No. 112 as it is recovered through rates in accordance with Statement No. 71.

Dr. Various Operations, Maintenance, and Administrative Expense Accounts
Dr. 107, Construction Work in Progress
Dr. 108.8, Retirement Work in Progress
Cr. 228.3, Accumulated Provision for Pensions and Benefits

To record current period postemployment benefit expense.

NOTE: If postemployment benefits are accrued under the criteria set forth in Statement No. 43, this journal entry is made on a monthly basis. If, however, the accrual is based upon the provisions of Statement No. 5, this is a one-time entry unless the liability is reevaluated and subsequently adjusted.

629 Investments in Debt and Equity Securities

Statement of Financial Accounting Standards No. 115, Accounting for Certain Investments in Debt and Equity Securities (Statement No. 115), establishes the standards of financial accounting and reporting for investments in debt securities and for investments in equity securities that have readily determinable fair values. Statement No. 115 does not apply to investments in equity securities accounted for under the equity method nor to investments in consolidated subsidiaries.

At the time of acquisition, an entity must classify debt and equity securities into one of three categories: held-to-maturity, available-for-sale, or trading. At the balance sheet date, the appropriateness of the classifications must be reassessed.

Investments in debt securities are classified as held-to-maturity and are measured at amortized cost in the balance sheet only if the reporting entity has the positive intent and ability to hold these securities to maturity. Debt securities are not classified as held-to-maturity if the entity has the intent to hold the security only for an indefinite period; for example, if the security would become available for sale in response to changes in market interest rates and related changes in the security’s prepayment risk, needs for liquidity, changes in the availability of and the yield on alternative investments, changes in funding sources and terms, and changes in foreign currency risk.

Investments in debt securities that are not classified as held-to-maturity and equity securities that have readily determinable fair values are classified as either trading securities or available-for-sale securities and are measured at fair value in the balance sheet. Trading securities are those securities that are bought and held principally for the purpose of selling them in the near future. Trading generally reflects active and frequent buying and selling and trading securities are generally used with the objective of generating profits on short-term differences in prices. Available-for-sale securities are those investments not classified as either trading securities or held-to-maturity securities.

Statement No. 115 requires unrealized holding gains and losses for trading securities to be included in earnings in the current period. Unrealized holding gains and losses for available-for-sale securities are excluded from earnings; however, they are reported as a net amount in a separate component of shareholders’ equity until realized.

For individual securities classified as either available-for-sale or held-to-maturity, an entity must determine whether a decline in the security’s fair value below the amortized cost is other
than temporary. If the decline in fair value is determined to be permanent, that is, it is probable that the entity will not be able to collect all amounts due under the contractual terms of the security, the realized loss is accounted for in earnings of the current period. The new cost basis is not adjusted upward for subsequent recoveries in the fair value. Subsequent increases in the fair value of available-for-sale securities are included in the separate component of equity. Subsequent decreases are also included in the separate component of equity.

All trading securities are reported as current assets in the balance sheet and individual held-to-maturity and available-for-sale securities are classified as either current or noncurrent, as appropriate. Cash flows from the purchase, sale, or maturity of available-for-sale securities and held-to-maturity securities are classified in the statement of cash flows as cash flows from investing activities and reported gross for each security classification.

**Accounting Requirements**

All RUS borrowers must adopt the accounting, reporting, and disclosure requirements set forth in Statement No. 115 as of the statement’s implementation date. Unrealized holding gains or losses for trading securities shall be recorded in either Account 421, Miscellaneous Nonoperating Income, or Account 426.5, Other Deductions, as appropriate. Unrealized holding gains or losses for available-for-sale securities held by the corporate entity are recognized as a component of stockholder’s equity in Account 215.1, Unrealized Gains and Losses—Debt and Equity Securities. A contra account of the investment account shall be debited or credited accordingly. Unrealized gains and losses for available-for-sale securities held in a decommissioning fund shall increase or decrease, as appropriate, the reported value of the fund.

**Effective Date and Implementation**

Statement No. 115 is effective for fiscal years beginning after December 15, 1993. At the beginning of the entity’s fiscal year, the entity must classify its debt and equity securities on the basis of the entity’s current intent. This statement may not be applied retroactively to prior years’ financial statements. For fiscal years beginning prior to December 16, 1993, reporting entities are permitted to apply Statement No. 115 as of the end of a fiscal year for which annual financial statements have not previously been issued.

### 630 Split Dollar Life Insurance

The National Rural Electric Cooperative Association Split Dollar Life Insurance provides life insurance benefits to cooperative employees. The benefits provided under this policy consist of two components, the face value of the insurance policy and the accumulated cash surrender value. While the employee is the owner of the policy, the employee must sign a collateral assignment giving the cooperative absolute right to the cash surrender value of the policy. Under the terms of this collateral assignment, the employee must reimburse the cooperative for the premiums paid upon the employee’s termination of employment or attainment of the age of 62 if the employee wishes to maintain the insurance coverage. If death occurs prior to either of these events, the premiums paid to date by the cooperative are deducted from the death benefits payable to the policy beneficiary.

### Accounting Requirements

Financial Accounting Standards Board Technical Bulletin 85-4, Accounting for Purchase of Life Insurance (Bulletin 85-4), states that the amount that could be realized under an insurance contract as of the date of the financial statements should be reported as an asset. The change in the cash surrender or contract value of that asset during the period should be reported as an adjustment to the premiums paid in determining the expense or income to be recognized for the period. The cooperative shall, therefore, record the cash surrender value of the policy as an asset because of its absolute right to receive that value based upon the employee’s collateral assignment. Any receivable that may occur as a result of the employee reimbursement for the premiums paid is contingent upon the employee electing to maintain the insurance coverage after
termination of employment or reaching the age of 62 and is not recorded as an asset on the cooperative's records.

**Accounting Journal Entries**

The journal entries required to account for the NRECA Split Dollar Life Insurance Program are as follows:

Dr. 124, Other Investments  
Cr. Various Operations, Maintenance, and Administrative Expense Accounts  
To record an increase in the cash surrender value of the insurance contract.

or

Dr. Various Operations, Maintenance, and Administrative Expense Accounts  
Cr. 124, Other Investments  
To record a decrease in the cash surrender value of the insurance contract.

Dr. Various Operations, Maintenance, and Administrative Expense Accounts  
Dr. 107, Construction Work-in-Progress  
Dr. 108.8, Retirement Work-in-Progress  
Cr. 131.1, Cash—General  
To record the premium cost of the insurance contract.

631 Special Early Retirement Plan

The Special Early Retirement Plan (SERP) being offered through the National Rural Electric Cooperative Association (NRECA) constitutes an amendment to its Retirement and Security (R&S) program. The SERP is often chosen as a vehicle through which the cooperative may reduce the size of its workforce or replace more highly paid employees with lower paid entry level employees. If an employee covered by an NRECA retirement plan chose to retire before his/her normal retirement date, that employee would receive an actuarially reduced benefit. However, when a cooperative elects to offer a SERP, no such reduction is required. The cooperative selects the criteria under which an employee will be eligible to participate such as age, years of service, or a combination of age and benefit service requirements. As with other amendments to the R&S program, NRECA calculates the cost of the plan based upon the criteria selected by the cooperative and allows the cooperative to pay the cost immediately or on an installment basis.

Under this plan, the employee receives full retirement benefits in the form of either an immediate lump-sum settlement or annuity payments. It is not unusual for the cooperative to add an incentive to encourage participation such as medical or life insurance, either in whole or in part, until age 65. The actuarial analysis provided by NRECA includes the cost of the SERP and the estimated reduction and/or increase in costs associated with Statement of Financial Accounting Standards No. 106, Employer's Accounting for Postretirement Benefits Other Than Pensions (Statement No. 106).

**Statement of Financial Accounting Standards No. 87, Employer’s Accounting for Pensions (Statement No. 87)**

In accordance with the provisions of Statement No. 87, the costs associated with an amendment to a multiemployer plan are recognized when they become due and payable. Since NRECA calculates the amount due and payable at the time of the amendment, the entire amount due, whether paid immediately or financed through NRECA or any other institution, must be recognized as an expense at that time. This cost may, however, be deferred in accordance with the provisions of Statement of Financial Accounting Standards No. 71, Accounting for the Effects of Certain Types of Regulation (Statement No. 71).

**Accounting Journal Entries**

The journal entry required to record the additional pension costs associated with the SERP is as follows:

Dr. Various Operations, Maintenance, and Administrative Expense Accounts  
Dr. 107, Construction Work-in-Progress  
Dr. 108.8, Retirement Work-in-Progress  
Cr. 131.1, Cash—General  
or  
Cr. 224, Other Long-Term Debt  
To record the prior service pension costs incurred as a result of adopting the SERP.
If the borrower elects to defer and amortize the cost in accordance with Statement No. 71, the following entries shall be recorded:

Dr. 182.3, Other Regulatory Assets
Cr. 131.1, Cash—General
or
Cr. 224, Other Long-Term Debt
To record, under the provisions of Statement No. 71, the deferral of the prior service pension costs incurred as a result of adopting the SERP.

Dr. Various Operations, Maintenance, and Administrative Expense Accounts
Dr. 107, Construction Work-in-Progress
Dr. 108.8, Retirement Work-in-Progress
Cr. 182.3, Other Regulatory Assets
To record the amortization of deferred prior service pension costs as they are recovered through rates in accordance with Statement No. 71.

Statement No. 106

In the event that net reductions in postretirement benefits result from this plan amendment, the reductions are recognized as follows:

1. The amount of the reduction shall first reduce any existing unrecognized prior service cost;
2. Any remaining reductions shall next reduce any unrecognized transition obligation; and
3. Any remaining reduction shall be recognized in a manner consistent with the accounting for prior service postretirement benefit costs.

In accordance with Statement No. 106, prior service postretirement benefit costs are recognized in equal amounts in each remaining year of service for active plan participants. Because it is an off-balance sheet item, only a memorandum entry is required to reduce the amount of unrecognized prior service cost.

At adoption, Statement No. 106 permitted the recognition of the transition obligation in one of two ways. The transition obligation was recognized over the longer of the average remaining service period of current plan participants or 20 years, or it may have been recognized immediately. If the delayed recognition option was chosen under Statement No. 106, this, too, was an off-balance sheet item that requires only a memorandum entry to reduce the amount of unrecognized transition obligation. However, if the immediate recognition option was chosen, the cooperative either recorded the expense in that year or, with RUS approval, deferred the expense under the provisions of Statement No. 71. If the expense were recorded, in total, in the year of adoption, no unrecognized transition obligation remains to reduce. If, however, the transition obligation was deferred in accordance with Statement No. 71, the journal entry required to effect the reduction in Statement No. 106 expense is as follows:

Dr. 228.3, Accumulated Provision for Pensions and Benefits
Cr. 182.3, Other Regulatory Assets
To record a reduction in the deferred Statement No. 106 transition obligation resulting from the adoption of the SERP.

Note: The dollar value of this entry must not exceed the deferral shown on the balance sheet.

If, after the two previous reductions have been made, any net credit remains, it shall be recognized in a manner consistent with prior service costs; that is, as an off balance sheet item that is amortized over the remaining service lives (to full eligibility) of the active plan participants. The annual amortization reduces amounts normally charged to the various operations, maintenance, and administrative expense accounts and Account 228.3 as postretirement benefit expenses.

§ 1770.1 General.

(a) This subpart establishes RUS policies and procedures for the preservation of records of telecommunications borrowers.

(b) The regulations prescribed in this part apply to all books of account, contracts, records, memoranda, documents, papers, and correspondence prepared by or on behalf of the borrower as well as those which come into its possession in connection with the acquisition of property by purchase, consolidation, merger, etc.

(c) The regulations prescribed in this part shall not be construed as excusing compliance with any other lawful requirements for the preservation of records.

§ 1770.2 Designation of a supervisory official.

Each borrower shall designate one or more officials to supervise the preservation of its records.

§ 1770.3 Index of records.

(a) Each borrower shall maintain a master index of records. The master index shall identify the records retained, the related retention period, and the locations where the records are maintained. The master index shall be subject to review by RUS and RUS shall reserve the right to add records, or lengthen retention periods upon finding that retention periods may be insufficient for its purposes.

(b) At each office where records are kept or stored the borrower shall arrange, file, and index the records currently at that site so that they may be readily identified and made available to representatives of RUS.

§ 1770.4 Record storage media.

Each RUS borrower has the flexibility to select its own storage media subject to the following conditions:

(a) The storage media must have a life expectancy at least equal to the applicable retention period provided for in the master index of records, unless there is quality transfer from one media to another with no loss of data. Each transfer of data from one media to another must be verified for accuracy and documented.

(b) Each borrower is required to implement internal control procedures that assure the reliability of, and ready access to, data stored on machine-readable media. Internal control procedures must be documented by a responsible supervisory official.

(c) The records shall be indexed and retained in such a manner that they are easily accessible.
§ 1770.5

(d) The borrower shall have the hardware and software available to locate, identify, and reproduce the records in readable form without loss of clarity.

(e) At the expiration of the retention period, the borrower may use any appropriate method to destroy records.

(f) When any records are lost or destroyed before the expiration of the retention period set forth in the master index, a certified statement shall be added to the master index listing, as far as may be determined, the records lost or destroyed and describing the circumstances of the premature loss or destruction.

§ 1770.5 Periods of retention.

(a) Except as provided for in paragraphs (b), (c), and (d) of this section, record retention shall be consistent with Prudent Utility Practice. Prudent Utility Practice shall mean any of the practices, methods, and acts which, in the exercise of reasonable judgment, in light of the facts, including but not limited to, the practices, methods, and acts engaged in or approved by a significant portion of the telecommunications industry prior thereto, known at the time the decision was made, would have been expected to accomplish the desired result consistent with cost effectiveness, reliability, safety, and expeditiousness. It is recognized that Prudent Utility Practice is not intended to be limited to optimum practice, method, or act to the exclusion of all others, but rather is a spectrum of possible practices, methods, or acts which could have been expected to accomplish the desired result at the lowest reasonable cost consistent with cost effectiveness, reliability, safety, and expedition.

(b) Records supporting construction financed by RUS shall be retained until audited and approved by RUS.

(c) Records related to plant in service must be retained until the facilities are permanently removed from utility service, all removal and restoration activities are completed, and all costs are retired from the accounting records unless accounting adjustments resulting from reclassification and original costs studies have been approved by RUS or other regulatory body having jurisdiction.

(d) Life and mortality study data for depreciation purposes must be retained for 25 years or for 10 years after plant is retired whichever is longer.

§§ 1770.6–1770.9 [Reserved]

Subpart B—Uniform System of Accounts

§ 1770.10 General.

This subpart implements provisions of the standard RUS loan documents with respect to the accounting system accounts to be maintained by telecommunications borrowers of the Rural Utilities Service.

§ 1770.11 Accounting system requirements.

(a) Each RUS borrower subject to the jurisdiction of the Federal Communications Commission (FCC) or a State regulatory body shall maintain its accounts and records in accordance with the rules and regulations prescribed by that regulatory body.

(b) Each RUS borrower not subject to regulatory control as specified in § 1770.11(a) shall maintain its accounts and records in accordance with the FCC Uniform System of Accounts as set forth in part 32 of the Commission’s Rules and Regulations.

(1) RUS borrowers maintaining the accounts prescribed in 47 CFR part 32 for Class A companies as of June 15, 2005, shall continue to do so. RUS suspends implementation of the reduced number of Class A and B accounts, until the Federal-State Joint Conference has reviewed them.

(2) New borrowers under the RUS telecommunications program shall maintain the accounts prescribed in 47 CFR part 32 for Class A companies.

(3) RUS borrowers maintaining the accounts prescribed for Class B companies may adopt the Class A accounts if they desire more detailed and sophisticated accounting records.

§ 1770.12 Supplementary accounts.

(a) All borrowers shall maintain the supplementary accounts set forth in § 1770.15. These accounts conform in
number and title with accounts prescribed in the FCC Uniform System of Accounts. In those instances in which a State regulatory body having jurisdiction over an RUS borrower has prescribed a system of accounts differing from that of the FCC, the account titles prescribed by RUS in § 1770.15 shall remain unchanged; however, the supplementary account numbers shall be changed to conform with the State's accounting system.  

(b) In addition to the accounts set forth in § 1770.15, cooperative or other nonprofit borrowers shall maintain the supplementary accounts set forth in § 1770.16.  

(c) Borrowers are permitted to deviate from the specific subaccount numbers detailed in §§ 1770.15 and 1770.16 provided that the primary account numbers and account descriptions conform with those prescribed.

(Approved by the Office of Management and Budget under control number 0572–0003)

§ 1770.13 Accounting requirements.

(a) Each borrower shall maintain its books of accounts on the accrual basis of accounting. All transactions shall be recorded in the period in which they occur and reconciled monthly. The books of accounts shall be closed at the end of each fiscal year and financial statements shall be prepared for the period and audited in accordance with the provisions of 7 CFR part 1773, RUS Policy on Audits of Electric and Telephone Borrowers.

(b) All books of accounts, records, and memoranda shall be maintained in such a manner as to fully support the journal entries to which they relate. The books and records referred to herein shall include records of a nontechnical nature such as minute books, stock and membership records, reports, correspondence, and memoranda.

(c) Interpretations of Federal or State requirements shall be referred to the applicable commission exercising jurisdiction over the borrower.

(d) Interpretations of RUS accounting requirements shall be referred to the Assistant Administrator, Program Accounting and Regulatory Analysis, Rural Utilities Service.

§ 1770.14 Continuing property records.

Each borrower shall maintain continuing property records which detail the date of placement, location, description of property, and the original cost of the property record units. The continuing property record and other underlying records of construction costs shall be maintained so that upon retirement of one or more retirement units or of minor items without replacement when not included in the costs of retirement units, the actual cost of the plant retired can be determined.

§ 1770.15 Supplementary accounts required of all borrowers.

Accounts prescribed in the Stockholders’ Equity and Patronage Capital section shall be maintained by stock companies and cooperatives as appropriate.

1130.11  1220.12  Materials and Supplies

This account shall include the cost of materials and supplies held in stock including plant supplies, motor vehicles supplies, tools, fuel, other supplies and material and articles of the company in process of manufacture for supply stock.

Transportation charges and sales and use taxes, as far as practicable, shall be included as a part of the cost of the particular material to which they relate. Transportation and sales and use taxes which are not included as part of the cost of particular material shall be equitably apportioned among the accounts to which material is charged.

As far as practicable, cash and other discounts on material shall be deducted in determining cost of particular material to which they relate or credited to the account to which the material is charged. When such deduction is not practicable, discounts shall be equitably apportioned among the accounts to which material is charged.

Material recovered in connection with construction, maintenance or retirement of property shall be charged to this account as follows:

—Reusable items that, when installed or in service, were retirement units shall be included in this account at the original cost.
—Reusable minor items that, when installed or in service, were not retirement units shall be included in this account at current prices new.
—The cost of repairing reusable material shall be charged to the appropriate Plant Specific Operations Expense accounts.
—Scrap and nonusable material included in this account shall be carried at the estimated amount which will be received therefor. The difference between the amounts realized for scrap and nonusable material sold, and the amounts at which it is carried in this account shall be charged to the various accounts to which the expenditures are allocable. At all times, the total of the cash on hand and the unreimbursed expenditures shall equal the amount of the fund.

Interest paid on material bills, the payments of which are delayed, shall be charged to Account 7540, credited when the material was taken up in this account.

Interest paid on material bills, the payments of which are delayed, shall be charged to Account 7540, credited when the material was taken up in this account.

1150.1  1220.31  Petty Cash Fund

This account shall include funds in the custody of employees or agents for making minor disbursements. The fund shall be operated on an inprest basis. Expenditures shall be supported by receipts, and reimbursements to the fund shall be for the exact amount of such expenditures and shall be charged to the various accounts to which the expenditures are allocable. At all times, the total of the cash on hand and the unreimbursed expenditures shall equal the amount of the fund.

1150.2  1220.32  Change Fund

This account shall include funds in the custody of employees or agents for making change. Records shall be kept of the amount held by each person. Disbursements shall not be made from the fund.

1130.3  1220.13  Cash—Transfer of Funds

This account shall include all transfers of funds from one bank account to another. This account shall be charged with the amount of a check drawn for the transfer, and credited when the amount transferred is entered into the Cash Receipts Book.

1130.2  1220.12  Cash—Construction Fund Trustee

This account shall include all loan funds received from RUS, the Rural Telephone Bank, the Federal Financing Bank, the Bank for Cooperatives, the Rural Telephone Finance Cooperative, and all non-loan funds supplied by the borrower under the terms of the loan contract or otherwise required by RUS. The offsetting credit for funds received from RUS shall be to Account 4210.20, RUS Notes—Unadvanced, Dr.; funds received from the Rural Telephone Bank, to Account 4210.21, Telephone Bank Notes—Unadvanced, Dr.; funds received from the Federal Financing Bank, to Account 4210.22, Federal Financing Bank Notes—Unadvanced, Dr.; funds received from the Bank for Cooperatives, to Account 4210.23, Bank for Cooperatives Notes—Unadvanced, Dr.; and funds received from the Rural Telephone Finance Cooperative, to Account 4210.24, Rural Telephone Finance Cooperative Notes—Unadvanced, Dr.

1150.2  1220.32  Change Fund

This account shall include funds in the custody of employees or agents for making change. Records shall be kept of the amount held by each person. Disbursements shall not be made from the fund.

1130.2  1220.12  Cash—Construction Fund Trustee

This account shall include all loan funds received from RUS, the Rural Telephone Bank, the Federal Financing Bank, the Bank for Cooperatives, the Rural Telephone Finance Cooperative, and all non-loan funds supplied by the borrower under the terms of the loan contract or otherwise required by RUS. The offsetting credit for funds received from RUS shall be to Account 4210.20, RUS Notes—Unadvanced, Dr.; funds received from the Rural Telephone Bank, to Account 4210.21, Telephone Bank Notes—Unadvanced, Dr.; funds received from the Federal Financing Bank, to Account 4210.22, Federal Financing Bank Notes—Unadvanced, Dr.; funds received from the Bank for Cooperatives, to Account 4210.23, Bank for Cooperatives Notes—Unadvanced, Dr.; and funds received from the Rural Telephone Finance Cooperative, to Account 4210.24, Rural Telephone Finance Cooperative Notes—Unadvanced, Dr.

1130.3  1220.13  Cash—Transfer of Funds

This account shall include all transfers of funds from one bank account to another. This account shall be charged with the amount of a check drawn for the transfer, and credited when the amount transferred is entered into the Cash Receipts Book.

1130.2  1220.12  Cash—Construction Fund Trustee

This account shall include all loan funds received from RUS, the Rural Telephone Bank, the Federal Financing Bank, the Bank for Cooperatives, the Rural Telephone Finance Cooperative, and all non-loan funds supplied by the borrower under the terms of the loan contract or otherwise required by RUS. The offsetting credit for funds received from RUS shall be to Account 4210.20, RUS Notes—Unadvanced, Dr.; funds received from the Rural Telephone Bank, to Account 4210.21, Telephone Bank Notes—Unadvanced, Dr.; funds received from the Federal Financing Bank, to Account 4210.22, Federal Financing Bank Notes—Unadvanced, Dr.; funds received from the Bank for Cooperatives, to Account 4210.23, Bank for Cooperatives Notes—Unadvanced, Dr.; and funds received from the Rural Telephone Finance Cooperative, to Account 4210.24, Rural Telephone Finance Cooperative Notes—Unadvanced, Dr.

1130.3  1220.13  Cash—Transfer of Funds

This account shall include all transfers of funds from one bank account to another. This account shall be charged with the amount of a check drawn for the transfer, and credited when the amount transferred is entered into the Cash Receipts Book.

973
This account shall include the original cost of all other types of non-electronic circuit-switching equipment such as panel systems and their associated circuit-switching equipment. “Switching plant excludes switchboards which perform operator assistance functions and equipment which is an integral part thereof. It does not exclude equipment used solely for the recording of calling telephone numbers in connection with customer dialed charged traffic, dial tandem switches, and special switchboards used in conjunction with private line service; such equipment shall be classified to the particular switch that it serves.

2230.11 Central Office Transmission—Radio Systems—Satellite and Earth Station Facilities
This account shall include the original cost of a ownership interest in satellites (including land-side spares), other spare parts, materials, and supplies. It shall include launch insurance and other satellite launch costs. This account shall also include the original cost of earth stations and spare parts, materials, and supplies therefor.

2230.12 Central Office Transmission—Radio Systems—Other
This account shall include the original cost of radio equipment used to provide radio communication channels. Radio equipment is that equipment which is used for the generation, amplification, propagation, reception, modulation, and demodulation of radio waves in free space over which communications channels can be provided. This account shall also include the associated carrier and auxiliary equipment and patch bay equipment which is an integral part of the radio equipment. Such equipment may be located in central office buildings, terminal rooms, or repeater stations or may be mounted on towers, masts, or other supports.

2230.21 Central Office Transmission—Circuit Equipment
This account shall include the original cost of equipment which is used to reduce the number of physical pairs otherwise required to serve a given number of subscribers by utilizing carrier systems, concentration stages or combinations of both. It shall include equipment that provides for simultaneous use of a number of interoffice channels on a single transmission path. This account shall also include the original cost of equipment which is used for the amplification, regeneration, circuit patching, balancing or control of signals transmitted over interoffice communications transmission channels. This account shall include the original cost of equipment which utilizes the message path to carry signaling information or which utilizes separate channels between switching offices to transmit signaling information independent of the subscribers' communication paths or transmission channels. This account shall also include the original cost of associated material used in the construction of such plant. Circuit equipment may be located in central offices, in manholes, on poles, in cabinets or huts or at other locations.

This account excludes carrier and auxiliary equipment and patch bay which are recorded in Account 2230.12, Central Office Transmission—Radio Systems—Other

Retirement Work in Progress
This account shall be charged with the original cost of property retired from the telecommunications plant accounts. It shall also be charged with all of the costs incurred in removing the retired plant from service. This account shall be credited with the salvage value of materials recovered in the retirement of the telecommunications plant. At such time as the retirement work order is complete, the net income/loss resulting therefrom shall be transferred from this account to the appropriate primary plant depreciation reserve account.

4010.11 Accounts Payable to Affiliated Companies
This account shall include all amounts currently due to affiliated companies for recurring trade obligations, and not provided for in other accounts, such as those for traffic settlements, material and supplies, repairs to telecommunications plant, matured rents, and interest payable under monthly settlements on short-term loans, advances, and open accounts.

4010.21 Accounts Payable to Nonaffiliated Companies
This account shall include all amounts currently due to nonaffiliated companies for recurring trade obligations, and not provided for in other accounts, such as those for traffic settlements, materials and supplies, repairs to telecommunications plant, matured rents, and interest payable under monthly settlements on short-term loans, advances, and open accounts.

4010.22 Accounts Payable—Employees’ Income Tax Withheld
This account shall include income taxes payable that have been withheld from employees’ salaries.

4010.23 Accounts Payable—FICA Taxes Withheld
This account shall include FICA taxes payable that have been withheld from employees’ salaries.

4010.24 Accounts Payable—Federal Excise Taxes
This account shall include Federal excise taxes payable.

4010.25 Accounts Payable—Payroll
This account shall include amounts payable to the company’s employees in the form of salaries or wages.

4070.1 Income Taxes Accrued—Federal
For Class A companies, this account shall be credited and Accounts 7220, 7420, and 7630, as appropriate, shall be debited for the amount of Federal income taxes accrued during the current operating period.
For Class B companies, this account shall be credited and Accounts 7220.2, 7400.2, and 7600.3, as appropriate, shall be debited for the amount of Federal income taxes accrued during the current operating period.

4070.2 Income Taxes Accrued—State and Local

For Class A companies, this account shall be credited and Accounts, 7230, 7430, and 7630, as appropriate, shall be debited for the amount of state and local income taxes accrued during the current operating period.

For Class B companies, this account shall be credited and Accounts, 7200.3, 7400.3, and 7600.3, as appropriate, shall be debited for the amount of state and local income taxes accrued during the current operating period.

This account shall be credited and Account 7240.1/7200.41, Operating Taxes—Property, shall be debited for the amount of property taxes accrued during the current operating period.

This account shall be credited and the appropriate construction, depreciation, or expense account shall be debited for the employer's portion of FICA taxes accrued during the current operating period.

This account shall be credited and the appropriate construction, removal, or expense account shall be debited for the amount of Federal unemployment taxes accrued during the current operating period.

This account shall include the interest accrued as of the balance sheet date but not payable until after that date on RUS mortgage notes. Interest expense incurred during the period of construction of telecommunications plant shall be charged to Account 2004, Telecommunications Plant Under Construction—Long Term, and credited to Account 7340/7300.4, Allowance for Funds Used During Construction.

This account shall include the interest accrued as of the balance sheet date but not payable until after that date on Rural Telephone Bank mortgage notes. Interest expense incurred during the period of construction of telecommunications plant shall be charged to Account 2004, Telecommunications Plant Under Construction—Long Term, and credited to Account 7340/7300.4, Allowance for Funds Used During Construction.

This account shall include the interest accrued as of the balance sheet date but not payable until after that date on Federal Financing Bank mortgage notes. Interest expense incurred during the period of construction of telecommunications plant shall be charged to Account 2004, Telecommunications Plant Under Construction—Long Term, and credited to Account 7340/7300.4, Allowance for Funds Used During Construction.

This account shall include the interest accrued as of the balance sheet date but not payable until after that date on Bank for Cooperatives mortgage notes. Interest expense incurred during the period of construction of telecommunications plant shall be charged to Account 2004, Telecommunications Plant Under Construction—Long Term, and credited to Account 7340/7300.4, Allowance for Funds Used During Construction.

This account shall include the interest accrued as of the balance sheet date but not payable until after that date on Rural Telephone Finance Cooperative mortgage notes. Interest expense incurred during the period of construction of telecommunications plant shall be charged to Account 2004, Telecommunications Plant Under Construction—Long Term, and credited to Account 7340/7300.4, Allowance for Funds Used During Construction.

This account shall include the amount of wages, compensated absences, interest on indebtedness of the company, dividends on capital stock, and rents accrued as of the balance sheet date but not payable until after the date.

This account shall not include interest accrued on RUS, Rural Telephone Bank, Bank for Cooperatives, Federal Financing Bank, or Rural Telephone Finance Cooperative debt.

This account shall be credited for the amount of nonoperating state and local income taxes for the current period. This account shall also reflect subsequent adjustments to amounts previously charged. Taxes shall be accrued each month on an estimated basis and adjustments made as later data becomes available. No entries shall be made to this account to reflect interperiod tax allocation.

7400.4 Nonoperating Other Taxes

This account shall be charged and Account 4080.5, Other Taxes Accrued—Miscellaneous, shall be credited for all nonoperating taxes, other than Federal, state, and local income taxes, and payroll related taxes for the current period. Among the items includable in this account are property, gross receipts, franchise and capital stock taxes. This account shall also reflect subsequent adjustments to amounts previously charged.

7400.5 Provision for Deferred Nonoperating Income Taxes—Net

This account shall be charged or credited, as appropriate, with contra entries recorded in either Account 4110, Net Current Deferred Nonoperating Income Taxes, or Account 4350, Net Noncurrent Deferred Nonoperating Income Taxes, as appropriate, for nonoperating tax expenses that have been deferred. Subsidiary record categories shall be maintained to distinguish between property and nonproperty related deferrals and so that the company may separately report the amounts contained herein that relate to Federal, state, and local income taxes.

7600.1 Extraordinary Income Credits

This account shall be credited with nontypical, noncustomary, and infrequently recurring gains which would significantly distort the current year's income computed before such extraordinary items, if reported other than as extraordinary items. Income tax relating to the amounts recorded in this account shall be recorded in Account 7600.3, Current Income Tax Effect for Extraordinary Items—Net, and Account 7600.4, Provision for Deferred Income Tax Effect of Extraordinary Items—Net.

7600.2 Extraordinary Income Charges

This account shall be debited with nontypical, noncustomary, and infrequently recurring losses which would significantly distort the current year’s income computed before such extraordinary items, if reported other than as extraordinary items. Income tax relating to the amounts recorded in this account shall be recorded in Account 7600.3, Current Income Tax Effect for Extraordinary Items—Net, and Account 7600.4, Provision for Deferred Income Tax Effect of Extraordinary Items—Net.

7600.3 Current Income Tax Effect of Extraordinary Items—Net

This account shall be charged or credited and Account 4070.1, Income Taxes Accrued—Federal, or Account 4070.2, Income Taxes Accrued—State and Local, shall be credited or charged, as appropriate, for all current income tax effects (Federal, state, and local) of items included in Account 7600.1, Extraordinary Income Credits, and Account 7600.2, Extraordinary Income Charges. The accounts included in this section are those that have been deferred.

§ 1770.17 Expense matrix.

The expense accounts shall be maintained by the following subsidiary record categories, as appropriate to each account. Such subsidiary record categories shall be reported as required by 47 CFR part 43.

(a) **Salaries and wages.** This subsidiary record category shall include compensation to employees, such as wages, salaries, commissions, bonuses, incentive awards, and termination payments.

(b) **Benefits.** This subsidiary record category shall include payroll related benefits on behalf of employees such as the following:

1. **Pensions;**
984

§§ 1770.18–1770.24

(2) Savings plan contributions (company portion);
(3) Worker’s compensation required by law;
(4) Life, hospital, medical, dental, and vision plan insurance, and
(5) Social Security and other payroll taxes.

(c) Rents. (1) This subsidiary record category shall include amounts paid for the use of real and personal operating property. Amounts paid for real property shall be included in Account 6121, Land and Buildings Expense. This category includes payments for operating leases but does not include payments for capital leases.

(2) This subsidiary record category is applicable only to the Plant Specific Operations Expense accounts. Incidental rents, e.g., short-term rental car expense, shall be categorized as Other Expenses (see paragraph (d) of this section) under the account which reflects the function for which the incidental rent was incurred.

(d) Other expenses. This subsidiary record category shall include costs which cannot be classified to the other subsidiary record categories. Included are material and supplies, including provisioning (note also Account 6512, Provisioning Expense); contracted services; accident and damage payments, insurance premiums; traveling expenses and other miscellaneous costs.

(e) Clearances. This subsidiary record category shall include amounts transferred to Construction accounts (see 47 CFR 32.2000(c)(2)(i)), other Plant Specific Operations Expense accounts and/or Account 3100, Accumulated Depreciation (cost of removal; see 47 CFR 32.2000(g)(1)(i)(ii)), as appropriate, from Accounts 6112, Motor Vehicles Expense, 6114, Tools and Other Work Equipment Expense, 6534, Plant Operations and Administration Expense, and 6535, Engineering Expense. There shall also be transfers to Construction or other Plant Specific Operations Expense accounts, as appropriate, from Account 6512, Provisioning Expense. With respect to these expenses, companies may establish such clearing accounts as they deem necessary to accomplish substantially the same results, provided that within thirty (30) days of the opening of such accounts, companies shall notify the FCC of the nature and purpose thereof. Additional clearing accounts affecting other expense areas may be established with prior approval of the FCC. Should companies elect, the initial incurred subsidiary record category identification may be carried through to the final accounts without FCC approval.

[70 FR 25757, May 16, 2005]

§§ 1770.18-1770.24 [Reserved]

§ 1770.25 Unusual items and contingent liabilities.

Extraordinary items, prior period adjustments and contingent liabilities shall be submitted to RUS for review before being recorded in the company’s books of account. The materiality of corrections of errors in prior periods shall be measured in relation to the summary account level used for reporting purposes for Class A companies, or in relation to total operating revenues or total operating expenses for Class B companies. For Class A companies, no correction in excess of one percent of the aggregate summary account dollars or one million dollars, whichever is higher, may be recorded in current operating accounts without prior approval. For Class B companies, no correction which exceeds one percent of total operating revenues or one percent of total operating expenses, depending on the nature of the item, may be recorded in current operating accounts without prior approval.

[70 FR 25758, May 16, 2005]

Subpart C—Accounting Interpretations

SOURCE: 61 FR 39847, July 31, 1996, unless otherwise noted.

§ 1770.26 General.

(a) The standard provisions of the security instruments utilized by the Rural Utilities Service (RUS) and the Rural Telephone Bank (RTB) for all telecommunications borrowers require borrowers to at all times keep and safely preserve, proper books, records, and accounts in which full and true entries will be made of all of the dealings,
business, and affairs of the borrower in accordance with the methods and principles of accounting prescribed by the state regulatory body having jurisdiction over the borrower and by the Federal Communications Commission (FCC) in its Uniform System of Accounts for telecommunications companies (47 CFR part 32), as those methods and principles of accounting are supplemented from time to time by RUS.

(b) This subpart implements those standard provisions of the RUS and RTB security instruments by prescribing accounting principles, methodologies, and procedures applicable to all telecommunications borrowers for particular situations.

§ 1770.27 Definitions.

As used in this part:

Borrower is an RUS telecommunications borrower.

Cushion of Credit Account is a 5 percent interest bearing account established by RUS in which all voluntary payments or overpayments on Rural Electric and Telephone Revolving Funds after October 1, 1987, are deposited.

FCC is the Federal Communications Commission.

RAO is the Responsible Accounting Officer of the Federal Communications Commission.

RE Act is the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 et seq.).

RETRF is the Rural Electric and Telephone Revolving Fund.

RTB is the Rural Telephone Bank.

RUS is the Rural Utilities Service, an agency of the United States Department of Agriculture, or its predecessor or successor.

§§ 1770.28–1770.45 [Reserved]

APPENDIX TO SUBPART C OF PART 1770—
ACCOUNTING METHODS AND PROCEDURES REQUIRED OF ALL BORROWERS

All borrowers shall maintain and keep their books of accounts and all other books and records which support the entries in such books of accounts in accordance with the accounting principles prescribed in this appendix.

101 Postretirement Benefits

A. Statement of Financial Accounting Standards No. 106, Employers’ Accounting for Postretirement Benefits Other than Pensions (Statement No. 106), requires reporting entities to accrue the expected cost of post-retirement benefits during the years the employee provides service to the entity. For purposes of applying the provisions of Statement No. 106, members of the board of directors are considered to be employees of the
cooperative. Prior to the issuance of Statement No. 106, most reporting entities accounted for postretirement benefit costs on a “pay-as-you-go” basis; that is, costs were recognized as incurred and paid, not when the employee provided service to the entity in exchange for the benefits. (Statement 106 is available from the Financial Accounting Standards Board, 777 North Harbour Island Drive, 15th Floor, Washington, DC 20036.)

B. As defined in Statement No. 106, a postretirement benefit plan is a deferred compensation arrangement in which an employer promises to exchange future benefits for an employee’s current services. Postretirement benefit plans may be funded or unfunded. Postretirement benefits include, but are not limited to, health care, life insurance, tuition assistance, day care, legal services, and housing subsidies provided outside of a pension plan.

C. Statement No. 106 applies to both written plans and to plans whose existence is implied from a practice of paying postretirement benefits. An employer’s practice of providing postretirement benefits to selected employees under individual contracts with specific terms determined on an employee-by-employee basis does not, however, constitute a postretirement benefit plan under the provisions of this statement.

D. Postretirement benefit plans generally fall into three categories: single-employer defined benefit plans, multiemployer plans, and multiple-employer plans.

E. A single-employer plan is a postretirement benefit plan that is maintained by one employer. The term may also be applied to a plan that is maintained by related parties such as a parent and its subsidiaries. A multiemployer plan is a postretirement benefit plan in which two or more unrelated employers contribute, usually pursuant to one or more collective-bargaining agreements. One characteristic of a multiemployer plan is that the contributions are provided by one participating employer only to employees of other participating employers since assets contributed by an employer are not segregated in a separate account or restricted to provide benefits only to employees of that employer.

F. A multiple-employer plan is a postretirement benefit plan that is maintained by more than one employer but is not a multiemployer plan. A multiple-employer plan is generally not collectively bargained and is intended to allow participating employers to pool their plan assets for investment purposes and reduce the cost of plan administration. A multiple-employer plan maintains separate accounts for each employer so that contributions provide benefits only for employees of the contributing employer.

G. The accounting requirements set forth in this interpretation focus on single- and multiple-employer plans. The accounting requirements set forth in Statement No. 106 for multiemployer plans or defined contribution plans shall be adopted for borrowers electing those types of plans.

H. Under the provisions of Statement No. 106, there are two components of the postretirement benefit cost: the current period cost and the transition obligation. The transition obligation is a one-time accrual of the costs resulting from services already provided. Statement No. 106 allows the transition obligation to be deferred and amortized on a straight-line basis over the average remaining service period of the active employees. If the average remaining service period of the active employees is less than 20 years, a 20-year amortization period may be used.

I. Accounting Requirements

A. All borrowers shall adopt the accrual accounting provisions and reporting requirements as set forth in Statement No. 106. The transition obligation and accrual of the current period cost must be based upon an actuarial study. This study must be updated to allow the borrower to comply with the measurement date requirements of Statement No. 106; however, the study must, at a minimum, be updated every five years. Borrowers may not account for postretirement benefits on a “pay-as-you-go” basis.

B. Under the provisions of Statement No. 106, an entity may recognize the transition obligation, in its entirety, when Statement No. 106 is first adopted or the entity may elect to delay the recognition of the transition obligation. On December 26, 1991, however, the FCC issued FCC Rcd 7566, which requires telecommunications carriers to recognize the transition obligation on a delayed basis. RUS reviewed this issuance and has determined that borrowers must comply with this ruling and recognize the transition obligation on a delayed basis.

C. The deferral and amortization of the transition obligation on a delayed basis is considered to be an off balance sheet item. As a result, an accounting entry is not required at the time of adoption of Statement No. 106. Instead, the transition obligation is recognized as a component of postretirement benefit cost as it is amortized. The amount of the unamortized transition obligation must be disclosed in the notes to the financial statements.

D. In accordance with the provisions of Responsible Accounting Officer (RAO) Letter 20, released by the FCC on April 24, 1992, Account 4310, Other Long-Term Liabilities, shall be used to record the liability accrued for postretirement benefits. (RAO Letter 20 is available from the Federal Communications Commission, 1919 M Street, NW., Washington, DC 20554.) Borrowers shall credit this account for the net periodic cost of postretirement benefits for the current year and
shall debit this account for any fund payments made during the current year.

E. Net periodic postretirement benefit cost includes current period service cost, interest cost, return on plan assets, amortization of prior service cost, gains and losses, and amortization of the transition obligation. If fund payments create a debit balance in the postretirement benefits portion of Account 610, the debit balance applicable to post-retirement benefits shall be reported in Account 1410. Other Noncurrent Assets. Account 1410 shall also be used to record any prepaid postretirement benefit cost.

F. The benefits portion of the expense matrix for the appropriate Part 32 expense accounts shall be used to record the current period service cost component of the current year’s net periodic postretirement benefit cost. The interest cost component, return on plan assets, amortization of prior service cost, gains and losses, and amortization of the transition obligation shall be charged to the benefits portion of the expense matrix of Account 6720, Other General and Administrative.

II. Effective Date and Implementation

A. For plans outside the United States and for defined benefit plans of employers that (a) are nonpublic enterprises and (b) sponsor defined benefit postretirement plans with no more than 500 plan participants in the aggregate, Statement No. 106 is effective for fiscal years beginning after December 15, 1994. For all other plans, Statement No. 106 is effective for fiscal years beginning after December 15, 1992.

102 Rural Telephone Bank Stock

A. Capital stock issued by the Rural Telephone Bank consists of Class A, Class B, and Class C stock. Class A stock is issued only to the Administrator of RUS on behalf of the United States in exchange for capital furnished to RTB.

B. Class B stock is issued only to recipients of loans under Section 408 of the Rural Electrification Act (RE Act). Borrowers receiving loan funds pursuant to Section 408(a) (1) or (2) of the RE Act are required to invest 5 percent of the amount of loan funds approved in Class B stock. No dividends are payable on Class B stock. All holders of Class B stock are entitled to patronage refunds in the form of additional shares of RTB Class B Stock and credited to Account 7310, Dividend Income.

C. Class C stock is available for purchase by borrowers, corporations, and public bodies eligible to borrow under Section 408 of the RE Act, or by organizations controlled by such borrowers, corporations and public bodies. The payment of dividends is in accordance with the bylaws of the RTB.

Accounting Requirements

A. The purchase of RTB stock required by the RE Act shall be debited to Account 1402.1, Investments in Nonaffiliated Companies—Class B RTB Stock. Patronage refunds in the form of additional shares of RTB Class B Stock shall be debited to Account 1402.1 and credited to Account 1402.11, Investments in Nonaffiliated Companies—Class B RTB Stock—Cr.

B. Purchases of Class C RTB stock shall be debited to Account 1402.2, Investments in Nonaffiliated Companies—Class C RTB Stock. Cash dividends received on Class C RTB stock shall be credited to Account 7310, Dividend Income.

C. Once a borrower has repaid all of its RTB loans, it may request that its Class B stock be converted to Class C stock. When the conversion is made, Account 1402.1 shall be debited and Account 1402.1 shall be credited for the face value of the stock converted. Account 1402.21, Investments in Nonaffiliated Companies—Class C RTB Stock—Cr., shall be credited and Account 1402.11 shall be debited for the face value of the Class B stock that has been received as patronage refunds.

103 Cushion of Credit Investments

A. The RUS Cushion of Credit account is an investment account bearing an interest rate of 5 percent. All voluntary payments or overpayments on Rural Electric and Telephone Revolving Fund (RTRF) loans made after October 1, 1987, are deposited into this account in the appropriate borrower’s name.

Accounting Requirements

A. The following journal entries shall be used by RUS borrowers to record the transactions associated with cushion of credit payment:

1. Dr. 4210.18, RUS Notes—Advance Payments, Dr. Cr. 1130.1/1120.11, Cash—General Fund. To record the cushion of credit payment.

2. Dr. 4210.18, RUS Notes—Advance Payments, Dr. Cr. 7320/7300.2, Interest Income. To record interest earned on cushion of credit deposits.

3. Dr. 4210.12, RUS Notes, Cr. 4210.18, RUS Notes—Advance Payments, Dr. To apply cushion of credit payments (and interest) to the RUS note.

104 Rural Economic Development Loan and Grant Program

A. On December 21, 1987, Section 313, Cushion of Credit Payments Program (7 U.S.C. 901 et seq.), was added to the RE Act. Section 313 establishes a Rural Economic Development Subaccount and authorizes the Administrator of the RUS to provide zero interest loans or grants to RE Act borrowers for the
purpose of promoting rural economic development and job creation projects. Effective December 5, 1994, this authority was assigned to the Administrator, Rural Business and Cooperative Development Service.

B. 7 CFR part 1703, Subpart B, Rural Economic Development Loan and Grant Program, sets forth the policies and procedures relating to the zero interest loan program and for approving and administering grants.

Accounting Requirements

A. The accounting journal entries required to record the transactions associated with a Rural Economic Development grant are as follows:

1. Dr. 1130.4/1120.14, Cash—General Fund—Economic Development Grant Funds. Cr. 4210.25, RUS Notes—Economic Development Grant; Cr. 4540.41, Other Capital—Miscellaneous; or Cr. 7360/7300.6, Other Nonoperating Income. To record grant funds disbursed by RUS. If the grant agreement requires repayment of the funds upon termination of the revolving loan program, Account 4210.25 shall be credited. If the grant agreement states that there is absolutely no obligation for repayment upon termination of the revolving loan program, the funds shall be accounted for as a permanent infusion of capital by crediting Account 4540.41. If, however, the grant agreement is silent as to the final disposition of the grant funds, Account 7360/7300.6 shall be credited.

2. Dr. 1401.3, Other Investments in Affiliated Companies—Federal Economic Development Grant Funds. Cr. 4210.26, Economic Development Notes. To record a Federal revolving loan to an economic development project.

3. Dr. 1130.1/1120.11, Cash—General Fund. Cr. 7360/7300.6, Other Nonoperating Income. To record payment of loan servicing fees charged to the economic development project.

4. Dr. 1130.5/1120.15, Cash—General Fund—Economic Development Non-Federal Revolving Funds. Cr. 1401.1, Other Investments in Affiliated Companies—Federal Economic Development Grant Loans or Dr. 1402.4, Other Investments in Nonaffiliated Companies—Federal Economic Development Grant Loans. To record the repayment, by the project, of the Federal revolving loan.

5. Dr. 1401.2, Other Investments in Affiliated Companies—Non-Federal Economic Development Grant Loans or Dr. 1402.5, Other Investments in Nonaffiliated Companies—Non-Federal Economic Development Grant Loans. Cr. 1130.5/1120.15, Cash—General Fund—Economic Development Non-Federal Revolving Funds. To record a Non-Federal revolving loan to an economic development project.

6. Dr. 1210, Interest and Dividends Receivable Cr. 7320/7300.2, Interest Income. To record the interest earned on a Non-Federal revolving loan to an economic development project.

7. Dr. 1130.5/1120.15, Cash—General Fund—Economic Development Non-Federal Revolving Funds. Cr. 1401.2, Other Investments in Affiliated Companies—Non-Federal Economic Development Grant Loans or Cr. 1402.5, Other Investments in Nonaffiliated Companies—Non-Federal Economic Development Grant Loans. To record the repayment, by the project, of the Non-Federal revolving loan.

B. The accounting journal entries required to record the transactions associated with a Rural Economic Development loan are as follows:

1. Dr. 4210.26, Economic Development Notes—Unadvanced, Pr. Cr. 4210.25, Economic Development Notes. To record the contractual obligation to RUS for the Economic Development Notes.

2. Dr. 1130.6/1120.16, Cash—General Fund—Economic Development Loan Funds Cr. 4210.26, Economic Development Notes—Unadvanced, Dr. To record the receipt of the economic development loan funds.

3. Dr. 1401.3, Other Investments in Affiliated Companies—Federal Economic Development Grant Loans. Cr. 1130.6/1120.16, Cash—General Fund—Economic Development Loan Funds. Cr. 7360/7300.6, Other Nonoperating Income. To record payment of loan servicing fees charged to the economic development project.

4. Dr. 1130.1/1120.11, Cash—General Fund. Cr. 7360/7300.6, Other Nonoperating Income. To record payment of loan servicing fees charged to the economic development project.

5. Dr. 1210, Interest and Dividends Receivable Cr. 7320/7300.2, Interest Income. To record the interest earned on the investment of rural economic development loan funds.

6. Dr. 7370, Special Charges. Cr. 1130.1, Cash—General Funds. To record the payment of interest earned in excess of $500 on the investment of rural economic development loan funds. Note: Interest earned in excess of $500 must be used for the rural economic development project for which the loan funds were received or returned to RUS.

7. Dr. 1130.6/1120.16, Cash—General Fund—Economic Development Loan Funds. Cr. 1401.3, Other Investments in Affiliated
Companies—Federal Economic Development Loans or Cr. 1402.6. Other Investments in Nonaffiliated Companies—Federal Economic Development Loans. To record any dividend, by the project, of the economic development loan.

8. Dr. 4210.25, Economic Development Notes. Cr. 1130.6/1120.16. Cash—General Fund—Economic Development Loan Funds. To record the repayment, to RUS, of the economic development loan funds.

105 Satellite and Cable Television Services

A. This section outlines the accounting to be followed when recording transactions involving satellite or cable television services.

1. Separate Subsidiary. If a borrower provides satellite or cable television services through a separate subsidiary, the investment in the subsidiary shall be debited to Account 1401, Investments in Affiliated Companies. The net income or loss of the subsidiary shall be debited or credited to Account 1401, as appropriate, with an offsetting entry to Account 7360, Other Nonoperating Income.

2. Joint Venture. i. If a borrower provides satellite or cable television services through a joint venture, the borrower’s ownership interest dictates the accounting methodology. If the borrower has less than a 20 percent ownership interest in the joint venture, the investment is accounted for under the cost method in Account 1401, Investments in Nonaffiliated Companies. Under the cost method, the joint venture’s net income or loss is not recorded in the borrower’s records. Income is recognized only to the extent of any dividends declared by the joint venture. When a dividend is declared, the borrower shall debit Account 1210, Interests and Dividends Receivable, and credit Account 7310, Dividend Income. When the dividend is received in cash, the borrower shall debit Account 1130.1, Cash—General Fund, and credit Account 1210.

ii. If a borrower has a 20 percent or more ownership interest in the joint venture, the investment is accounted for under the equity method in Account 1401, Investments in Affiliated Companies. The borrower’s proportionate share of the joint venture’s net income or loss shall be debited or credited to Account 1401, as appropriate, with an offsetting entry to Account 7360, Other Nonoperating Income.

3. Segment of Current Operations. i. If a borrower provides satellite or cable television service as a segment of its current operations and there are no shared assets between this activity and the regulated telecommunications activities of the borrower, the investment shall be debited to Account 1406.1, Nonregulated Investments—Permanent Investment. The net income or loss from providing such service shall be debited or credited, as appropriate, to Account 1406.3, Nonregulated Investments—Current Net Income, with an offsetting entry to Account 7990, Nonregulated Net Income.

ii. If a borrower provides satellite or cable television services as a segment of its current operations and there are no shared assets between this activity and the regulated telecommunications activities of the borrower, the franchise and application fees shall be debited to a subaccount of Account 2690, Intangibles. The cost of the satellite or cable television equipment shall be debited to a subaccount of Account 1401, Investments in Affiliated Companies. The net income or loss from providing satellite or cable service shall be credited to Account 5280, Nonregulated Operating Revenue, while the associated expenses shall be recorded in a subaccount of the applicable regulated expense accounts.

4. Sale and Installation of Satellite or Cable Television Equipment. i. If a borrower sells or installs satellite or cable television equipment as a segment of its current operations and there are no shared assets between this activity and the regulated telecommunications activities of the borrower, the purchase of the equipment shall be debited to Account 1406.1, Nonregulated Investments—Permanent Investment. The net income or loss from providing such services shall be debited or credited, as appropriate, to Account 1406.3, Nonregulated Investments—Current Net Income, with an offsetting entry to Account 7990, Nonregulated Net Income.

ii. If a borrower sells or installs satellite or cable television equipment as a segment of its current operations and there are no shared assets between this activity and the regulated telecommunications activities of the borrower, the franchise and application fees shall be debited to a subaccount of Account 2690, Intangibles. The cost of the satellite or cable television equipment shall be debited to a subaccount of Account 1401, Investments in Affiliated Companies. The net income or loss from providing such services shall be debited or credited, as appropriate, to Account 1406.3, Nonregulated Investments—Current Net Income, with an offsetting entry to Account 7990, Nonregulated Net Income.

106 Consolidated Financial Statements

A. In October 1987, FASB issued Statement of Financial Accounting Standards No. 94, Consolidation of All Majority-Owned Subsidiaries (Statement No. 94). (Statement 94 is available from the Financial Accounting Standards Board, 401 Merritt 7, P.O. Box 5116, Norwalk, CT 06856–5116.) For purposes of reporting to RUS, Statement No. 94 shall be applied as follows:

1. A borrower that is a subsidiary of another entity shall prepare and submit to RUS separate financial statements even though this financial information is presented in the parent’s consolidated statements.

2. In those cases in which a borrower has a majority-ownership in a subsidiary, the borrower shall prepare consolidated financial statements in accordance with the requirements of Statement No. 94. These consolidated statements must also include supplementary schedules presenting a Balance Sheet and Income Statement for each majority-owned subsidiary included in the consolidated statements.

B. Although Statement No. 94 requires the consolidation of majority-owned subsidiaries, the RUS Form 479, Financial and Statistical Report for Telecommunications Borrowers, shall be prepared on an unconsolidated basis by all borrowers.

107 Allowance for Funds Used During Construction

A. Statement of Financial Accounting Standard No. 34, Capitalization of Interest Cost, established the standards for capitalizing interest cost as a part of the historical cost of acquiring certain assets. In order to capitalize interest, the asset must require a period of time to complete or to get it ready for its intended use. This standard applies to all entities that construct facilities for their own use and should be applied by RUS Telecommunications borrowers as follows:

1. Only actual interest costs incurred on external borrowings qualify to be capitalized. The interest rate used to calculate the amount of interest to be capitalized is based on the companies external borrowings. If a construction project is associated with specific debt, the interest rate on that debt is used to calculate interest cost to be capitalized. If the project is not associated with a specific debt, a weighted average of the rates of all existing debt shall be applied to expenditures for the project. There is no materiality threshold for adoption of this standard (47 CFR 32.26).

2. If a borrower is involved in a joint construction project, all determinations as to the amount of interest incurred and qualified for capitalization must be based on individual financing arrangements with regard to the Interest During Construction rules.

3. The capitalization period shall end when the asset is substantially complete and ready for its intended use.

Disclosures

A. The following information with respect to interest cost shall be disclosed in the financial statements or related notes:

1. For an accounting period in which some interest cost is capitalized, the amount of interest cost incurred and charged to expense during the period.

2. For an accounting period in which some interest cost is capitalized, the total amount of interest cost incurred during the period and the amount thereof that has been capitalized.

108 Reporting Comprehensive Income

A. In June 1997, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 130, Reporting Comprehensive Income. This statement requires that all items that meet the definition of the components of comprehensive income be reported in the financial statements for the period in which they are recognized. Statement 130 establishes a distinction between comprehensive income and other comprehensive income.

1. Comprehensive income is composed of net income and other comprehensive income. The net income is the result of operations resulting from the aggregation of revenues, expenses, gains and losses that are not items that comprise other comprehensive income.

2. Other comprehensive income is composed of the following:

(a) Foreign currency items,
(b) Minimum pension liability adjustments, and
(c) Unrealized gains and losses on certain investments in debt and equity securities.

Gains or losses on investment securities included in the net income of the current period that also had been included in other comprehensive income as unrealized holding gains or losses in a prior period must be adjusted (called reclassification adjustments) in the presentation of other comprehensive income in the current period.

B. Comprehensive income expressed as a formula would be:

Net Income + items of other comprehensive income = comprehensive income

While Statement 130 requires that comprehensive income should be divided into two broad display classifications, net income and other comprehensive income, it does not prescribe a specific format for displaying comprehensive income in the financial statements.

C. RUS Telecommunications borrowers that present a single Statement of Operations and Patronage Capital should present the components of other comprehensive income below the total for net income and then present the reconciliation of patronage capital (Retained Earnings). Borrowers that present a separate Statement of Patronage Capital (or Retained Earnings) should display the beginning balance of patronage capital (or retained earnings), net income for the period, other items of comprehensive income and total comprehensive income before
the presentation of other items of patronage capital (or retained earnings) for the period.

109 Disclosures about Pensions and Other Postretirement Benefits

A. Statement of Financial Accounting Standards (SFAS) No. 132, Employers’ Disclosures about Pensions and Other Postretirement Benefits, issued in February 1998, is effective for fiscal years beginning after December 15, 1998. This statement revises employers’ disclosure requirements for pension and other postretirement benefit plans. It does not change the measurement or recognition of those plans. The statement also permits reduced disclosures for nonpublic entities, which are defined as any entity other than one:

1. Whose debt or equity securities trade in a public market either on a domestic or foreign stock exchange or in the over-the-counter market, including securities quoted only locally or regionally;
2. That makes a filing with a regulatory agency in preparation for the sale of any class of debt or equity securities in a public market, or
3. That is controlled by an entity covered by 1 or 2 above.

Public Entities and Those Controlled by Public Entities

A. A commercial RUS Telecommunications borrower that meets the definition of a public entity and sponsors one or more defined benefit pension or postretirement benefit plan shall provide the following information on a comparative basis for the statements presented:

1. A reconciliation of beginning and ending balances of the benefit obligation showing separately, if applicable, the effects during the period attributable to each of the following:
   (a) Service cost,
   (b) Interest cost,
   (c) Contributions by plan participants,
   (d) Actuarial gains and losses,
   (e) Foreign currency exchange rate changes,
   (f) Benefits paid,
   (g) Plan amendments,
   (h) Business combinations,
   (i) Divestitures,
   (j) Curtailments,
   (k) Settlements, and
   (l) Special termination benefits.
2. A reconciliation of beginning and ending balances of the fair value of plan assets showing separately, if applicable, the effects during the period attributable to each of the following:
   (a) Actual return on plan assets,
   (b) Foreign currency exchange rate changes,
   (c) Contributions by the employer,
   (d) Contributions by plan participants,
   (e) Benefits paid,
   (f) Business combinations,
   (g) Divestitures, and
   (h) Settlements.
3. The funded status of the plans, the amounts not recognized in the statement of financial position, and the amounts recognized in the statement of financial position, including:
   (a) The amount of any unamortized prior service cost,
   (b) The amount of any unrecognized net gain or loss (including asset gains and losses not yet reflected in market-related value),
   (c) The amount of any remaining unamortized, unrecognized net obligation or net asset existing at the initial date of application of SFAS No. 87, Employers’ Accounting for Pensions, or SFAS No. 106, Employers’ Accounting for Postretirement Benefits Other Than Pensions,
   (d) The net pension or other postretirement benefit prepaid assets or accrued liabilities,
   (e) Any intangible asset and the amount of accumulated other comprehensive income recognized pursuant to paragraph 37 of SFAS No. 87, as amended,
4. The amount of net periodic benefit cost recognized, showing separately:
   (a) The service cost component,
   (b) The interest cost component,
   (c) The expected return on plan assets for the period,
   (d) The amortization of the unrecognized transition obligation or transition asset,
   (e) The amount of recognized gains and losses, the amount of prior service cost recognized, showing separately:
   (f) The amount of gain or loss recognized due to a settlement or curtailment,
5. The amount included within other comprehensive income for the period arising from a change in the additional minimum pension liability recognized pursuant to paragraph 37 of SFAS No. 87, as amended,
6. On a weighted-average basis, the following assumptions used in the accounting for the plans:
   (a) Assumed discount rate,
   (b) Rate of compensation increase (for pay-related plans), and
   (c) Expected long-term rate of return on plan assets,
7. The assumed health care cost trend rate(s) for the next year used to measure the expected cost of benefits covered by the plan (gross eligible charges) and a general description of the direction and pattern of change in the assumed trend rates thereafter, together with the ultimate trend rate(s) and when that rate is expected to be achieved,
8. The effect of a one-percentage-point increase and the effect of a one-percentage-point decrease in the assumed health care
cost trend rates on (for purposes of this disclosure, all other assumptions shall be held constant, and the effects shall be measured based on the substantive plan that is the basis for the accounting:

(a) The aggregate of the service and interest cost components of net periodic postretirement health care benefit cost, and

(b) The accumulated postretirement benefit obligation for health care benefits.

9. If applicable, the amounts and types of securities of the employer and related parties included in plan assets, the approximate amount of future annual benefits of plan participants covered by insurance contracts issued by the employer or related parties, and any significant transactions between the employer or related parties and the plan during the period.

10. If applicable, any alternative amortization method used to amortize prior service amounts or unrecognized net gains and losses pursuant to paragraphs 26 and 33 of SFAS No. 87 or paragraphs 53 and 60 of SFAS No. 106.

11. If applicable, any substantive commitment, such as past practice or a history of regular benefit increases, used as the basis for accounting for the benefit obligation.

12. If applicable, the cost of providing special or contractual termination benefits recognized during the period and a description of the nature of the event.

13. An explanation of any significant change in the benefit obligation or plan assets not otherwise apparent in the other disclosures.

B. RUS Telecommunications borrowers that sponsor two or more pension or postretirement plans may aggregate the required disclosures. If the disclosures are aggregated, the aggregate benefit obligation and aggregate fair value of plan assets for plans with benefit obligations in excess of plan assets must be disclosed.

C. RUS Telecommunications borrowers sponsoring defined contribution plans shall disclose the amount of cost recognized for defined contribution pension or other postretirement benefit plans during the period separately from the amount of cost recognized for defined benefit plans. The disclosures shall include a description of the nature and effect of any significant changes during the period affecting comparability, such as a change in the rate of employer contributions, a business combination, or a divestiture.

Nonpublic Entities

A. RUS commercial and cooperative type borrowers that meet the definition of a nonpublic entity, as previously defined, may elect to meet the following reduced disclosure requirements:

1. The benefit obligation.
2. Fair value of plan assets.
3. Funded status of the plan.
4. Employer contributions.
5. Participant contributions.
7. The amounts recognized in the statement of financial position, including the net pension and other postretirement benefit prepaid assets or accrued liabilities and any intangible asset and the amount of accumulated other comprehensive income recognized pursuant to paragraph 37 of SFAS No. 87, as amended.

8. The amount of net periodic benefit cost recognized and the amount included within other comprehensive income arising from a change in the minimum pension liability recognized pursuant to paragraph 37 of SFAS No. 87, as amended.

9. On a weighted-average basis, the following assumptions used in the accounting for the plans: Assumed discount rate, rate of compensation increase (for pay-related plans), and expected long-term rate of return on plan assets.

10. The assumed health care cost trend rate(s) for the next year used to measure the expected cost of benefits covered by the plan (gross eligible charges) and a general description of the direction and pattern of change in the assumed trend rates thereafter, together with the ultimate trend rate(s) and when that rate is expected to be achieved.

11. If applicable, the amounts and types of securities of the employer and related parties included in plan assets, the approximate amount of future annual benefits of plan participants covered by insurance contracts issued by the employer or related parties, and any significant transactions between the employer or related parties and the plan during the period.

12. The nature and effect of significant nonroutine events, such as amendments, combinations, divestitures, curtailments, and settlements.

B. The majority of RUS Telecommunications borrowers will fall within the definition of nonpublic entities with exception of those held by publicly traded holding companies.

Multiemployer Plans

A. An RUS Telecommunications borrower shall disclose the amount of contributions to multiemployer plans during the period. The borrower may disclose total contributions to multiemployer plans without disaggregating the amounts attributable to pensions and other postretirement benefits. The disclosures shall include a description of the nature and effect of any changes affecting comparability, such as a change in the rate of employer contributions, a business combination, or a divestiture.

B. In some cases, withdrawal from a multiemployer plan results in an obligation to the
plan for a portion of the plan’s unfunded accumulated postretirement benefit obligation. If it is either probable or reasonably possible that (a) an employer would withdraw from the plan under circumstances that would give rise to an obligation or (b) an employer’s contribution to the fund would be increased during the remainder of the contract period to make up a shortfall in the funds necessary to maintain the negotiated level of benefit coverage, the employer shall apply the provisions of SFAS No. 5, Accounting for Contingencies.

PART 1773—POLICY ON AUDITS OF RUS BORROWERS

Subpart A—General Provisions

Sec. 1773.1 General.
§ 1773.1 General

(a) This part implements those standard provisions of the security instrument utilized by the Rural Utilities Service (RUS) for both electric and telecommunications borrowers and by the Rural Telephone Bank (RTB) for its telecommunications borrowers. The provisions require borrowers to prepare and furnish to RUS, at least once during each 12-month period, a full and complete report of its financial condition, operations, and cash flows, in form and substance satisfactory to RUS, audited and certified by an independent certified public accountant (CPA), satisfactory to RUS, and accompanied by a report of such audit, in form and substance satisfactory to RUS.

(b) This part §1773 applies to both RUS and RTB borrowers. For the purposes of RTB borrowers, as used in this part §1773, RUS means RTB and Administrator means Governor unless the text indicates otherwise.

(c) This complies with the 1994 revision of Government Auditing Standards, issued by the Comptroller General of the United States, United States General Accounting Office, including amendments dated May 13, 1999, and July 30, 1999.

(d) An auditor’s report, report on compliance and on internal control over financial reporting, and management letter are required to meet the reporting provisions of the RUS security instrument.

1. The auditor’s report must state that the audit was conducted in accordance with generally accepted government auditing standards (GAGAS).

2. The management letter must state that the audit was conducted in accordance with this part.

3. A report of the audit, in form and substance satisfactory to RUS, cannot be issued unless and until an audit has been performed in accordance with GAGAS and this part.

4. A borrower is in violation of provisions of its security instrument with RUS if the borrower fails to provide an audit performed in compliance with GAGAS and this part. RUS security instruments normally provide for notice and an opportunity to cure such violations before RUS can exercise certain remedies.

5. A report prepared in connection with a review or compilation of financial statements, as defined in Statement of Standards for Accounting and Review Services No. 1, Compilation and Review of Financial Statements, does not satisfy the requirements of the RUS security instrument.

6. A report, as described in Statement on Auditing Standards (SAS) No. 62, entitled “Special Reports”, or in SAS No. 75, entitled “Engagements to Apply Agreed-upon Procedures to Specified Elements, Accounts, or Items of a Financial Statement”, does not satisfy the RUS loan security instrument requirements.

7. An annual report containing audited financial statements does not satisfy the RUS security instrument requirements.

(e) This part further implements those provisions of the standard RUS security instrument by setting forth the criteria for CPAs to be deemed satisfactory to RUS and the audit procedures and documentation standards that must be performed before a report of the audit satisfactory to RUS can be prepared and issued.

§ 1773.2 Definitions.

As used in this part:
AA-PARA means Assistant Administrator, Program Accounting and Regulatory Analysis.
Administrator means the Administrator of RUS and, as provided in §1773.2 (b), Governor.
AICPA means the American Institute of Certified Public Accountants.
Audit means an examination of financial statements by an independent CPA for the purpose of expressing an opinion on the fairness with which those statements present financial position, results of operations, and changes in cash flows in conformity with generally accepted accounting principles (GAAP) and for determining whether the borrower has complied with applicable laws, regulations, and contracts for those transactions and events reflected in the financial statements.
Borrower means an entity that has an outstanding RUS, RTB, or FFB loan or loan guarantee, or that has received a grant for electric, telecommunications, distance learning, or telemedicine purposes under the act.

CPA means certified public accountant. The terms CPA and CPA firm are used interchangeably.

FFB means the Federal Financing Bank, an instrumentality and wholly owned corporation of the United States.

Fraud has the same meaning prescribed in SAS No. 82 entitled “Consideration of Fraud in Financial Statements”.

GAAP means generally accepted accounting principles.

GAGAS means generally accepted government auditing standards as set forth in Government Auditing Standards, Standards for Audit of Governmental Organizations, Programs, Activities, and Functions, issued by the Comptroller General of the United States.

GAO means the General Accounting Office.

Governor means the Governor of the RTB.

Illegal act has the same meaning prescribed in SAS No. 54, entitled “Illegal Acts by Clients”.

OIG means the Office of Inspector General, United States Department of Agriculture.

OMB means the Office of Management and Budget.

Regulatory asset means an asset resulting from an action of a regulator as prescribed in Statement of Financial Accounting Standards (SFAS) No. 71, entitled “Accounting for the Effects of Certain Types of Regulation”.

Regulatory liability means a liability imposed on a regulated enterprise by an action of a regulator as prescribed in SFAS No. 71, entitled “Accounting for the Effects of Certain Types of Regulation”.

Related party has the same meaning prescribed in SFAS No. 57, entitled “Related Party Disclosures”.

Related party transaction has the same meaning prescribed in SFAS No. 57, entitled “Related Party Disclosures”.

Reportable condition has the same meaning prescribed in SAS No. 60, entitled “Communication of Internal Control Structure Related Matters Noted in an Audit”.

RTB means the Rural Telephone Bank.

RUS Bulletin 1773–1, Policy on Audits of RUS Borrowers, is a publication prepared by RUS that contains the RUS regulation 7 CFR part 1773 and exhibits of sample audit reports, financial statements, and a management letter used in preparing audit of RUS borrowers. This bulletin is available from USDA, Rural Utilities Service, Program Development and Regulatory Analysis, 1400 Independence Ave., SW., Stop 1522, Washington, DC 20250, or available on the internet at http://www.usda.gov/rus/.

SAS means Statement on Auditing Standards as prescribed by the AICPA.

SEC Practice Section means the Securities and Exchange Commission Practice Section of the AICPA.

State means any state or territory of the United States, or the District of Columbia.

Uniform System of Accounts means, for telecommunications borrowers, the Uniform System of Accounts for Telecommunications Companies, prescribed by the Federal Communications Commission and published at 47 CFR Part 32, as supplemented by RUS pursuant to 7 CFR Part 1770, Accounting Requirements for RUS Telephone Borrowers, subpart B, Uniform System of Accounts, and for electric borrowers,
Subpart B—RUS Audit Requirements

§ 1773.3 Annual audit.

(a) Each borrower must have its financial statements audited annually by a CPA selected by the borrower and approved by RUS as set forth in §1773.4.

(b) Each borrower must establish an annual as of audit date within twelve months of the date of receipt of the first advance of funds from grants and insured and guaranteed loans approved by RUS and RTB and must prepare financial statements as of the date established.

(c) Until all loans made or guaranteed by RUS have been repaid, the borrower must furnish three copies of the auditor’s report, report on compliance and on internal control over financial reporting, and management letter to RUS within 120 days of the as of audit date.

(d) A borrower that qualifies as a unit of state or local government or Indian tribe as such terms are defined in the Single Audit Act of 1984 (31 U.S.C. 7501 et seq.), the Single Audit Act Amendments of 1996 (31 U.S.C. 7505 et seq.) and OMB Circular A–133, Audits of States, Local Governments, and Non-Profit Organizations (copy available from the Executive Office of the President, Publication Services, 725 17th St., NW., Suite 2200, Washington, DC 20502, 202–395–7332), must comply with this part as follows:

(i) A borrower that elects to comply with this part must select a CPA that meets the qualifications set forth in §1773.5.

(ii) If an audit is performed in accordance with the Single Audit Act of 1984 and the Single Audit Act Amendments of 1996, an auditor’s report that meets the requirements of the Single Audit Act of 1984, and the Single Audit Act Amendments of 1996, will be sufficient to satisfy that borrower’s obligations under this part.

(e) OMB Circular A–133, Audits of States, Local Governments, and Non-Profit Organizations does not apply to audits of RUS electric and telecommunications cooperatives and commercial telecommunications borrowers.

§ 1773.4 Borrower responsibilities.

(a) Selection of a qualified CPA. The borrower’s board of directors is responsible for the selection of a qualified CPA that meets the requirements set forth in §1773.5. When selecting a CPA, the borrower should consider, among other matters:

(1) The qualifications of CPAs available to do the work;

(2) The CPA’s experience in performing audits of utilities; and

(3) The CPA’s ability to complete the audit and submit the reports and management letter within 90 days of the as of audit date.

(b) Board approval of selection. The board’s approval of a CPA must be recorded by a board resolution that states:

(1) The CPA meets RUS’s qualifications to perform an audit; and

(2) The borrower and CPA will enter into an audit agreement in accordance with §1773.6.

(c) Notification of selection. When the initial selection or subsequent change
§ 1773.5 Qualifications of CPA.

For purposes of the RUS standard security instrument, any CPA that meets the qualifications criteria of this section and enters into an audit agreement with the borrower that complies with §1773.6, will be considered satisfactory to RUS.

(a) Certification. The accountant that audits the financial statements of an RUS borrower must be a CPA in good standing of some state. The CPA does not have to be licensed by the state in which the borrower is located; however, the CPA must abide by the rules and regulations of professional conduct promulgated by the accountancy board of the state in which the borrower is located.

(b) Independence. The CPA must be independent. A CPA will be considered independent if the CPA:

(1) Meets the standards for independence contained in the AICPA Code of Professional Conduct in effect at the time the CPA's independence is under review;

(2) Does not have and has not had any direct financial interest or any material indirect financial interest in the borrower during the period covered by the audit; and

(3) Is not and was not, during the period under audit, connected with the borrower as a promoter, underwriter, trustee, director, officer, or employee.

(c) Peer review requirement. The CPA must belong to and participate in a peer review program, and must have undergone a satisfactory peer review of
the accounting and audit practice conducted by an approved peer review program under paragraph (c)(4) of this section, unless a waiver is granted under paragraph (c)(7) of this section. The reviewing organization must not be affiliated with or have had its most recent peer review conducted by the organization currently being reviewed (reciprocal reviews). After the initial peer review has been performed, the CPA must undergo a peer review of the accounting and audit practice within 36 months of the issuance of the previous peer review or at such additional times as designated by the peer review executive committee.

(1) A CPA that receives an unqualified peer review report will be satisfactory to RUS provided that the CPA meets the other criteria set forth in this section.

(2) If a CPA receives a qualified or adverse peer review report, the CPA must undergo a second peer review within 18 months of the date of the qualified or adverse report. A CPA that receives an unqualified second peer review report will be satisfactory to RUS provided that the CPA meets the other criteria set forth in this section.

(3) A CPA that receives a second qualified or adverse peer review report will not be satisfactory to RUS.

(4) Approved peer review programs. The following peer review programs are approved by RUS:

(i) The peer review programs conducted by the AICPA;

(ii) The peer review program conducted by the regulated audit program group of the National Conference of CPA Practitioners; and

(iii) An independent peer review program that, in RUS’s determination, requires its members to:

(A) Ensure that the CPA can legally engage in the practice of certified public accounting;

(B) Adhere to the quality control standards established by the AICPA;

(C) Submit to peer reviews of the CPA’s accounting and audit practice every 36 months or at such additional times as designated by its own executive committee; and

(D) Ensure that all professionals in the firm, including CPAs and nonCPAs, take part in the qualifying continuing professional education requirements of GAGAS, as set forth in paragraphs (c)(4)(iii)(D)(1) and (c)(4)(iii)(D)(2). A qualified continuing professional education course is one which meets the standards of the AICPA.

(1) An auditor responsible for planning, directing, conducting, or reporting on government audits must complete, every two years, at least eighty hours of continuing education and training which contributes to the auditor’s professional proficiency. At least twenty hours must be completed in any one year of the two-year period; and

(2) An individual responsible for planning, directing, and conducting substantial portions of the field work, or reporting on the government audit, must complete at least 24 of the 80 hours of continuing education and training in subjects directly related to the government environment and to government auditing. If the audited entity operates in a specific or unique environment, auditors must receive training that is related to that environment.

(5) Submission of reports. The CPA must submit to the Assistant Administrator, Program Accounting and Regulatory Analysis, a copy of any peer review report and accompanying letter of comment, if any, within 60 days of the date such report and letter of comment are released by the peer review group.

(i) If the peer review report indicates that a follow-up review will be made, the CPA must submit subsequent reports to the Assistant Administrator, Program Accounting and Regulatory Analysis, within 60 days of the date such reports are released by the peer review group.

(ii) A peer review report must be submitted to the Assistant Administrator, Program Accounting and Regulatory Analysis, at least once every 36 months, or more frequently, if required by the peer review program.

(iii) A copy of the peer review report, accompanying letter of comment, and the partners’ inspections must be made available to OIG, upon request.

(6) Waiver of the peer review requirement. (i) A CPA may request that the Administrator, RUS, waive the peer review requirement. To be eligible for a
Rural Utilities Service, USDA

§ 1773.6 Auditor communication.

(a) During the planning stages of a financial statement audit, GAGAS and AICPA standards require the auditor to communicate certain information regarding the nature and extent of testing and reporting on compliance with laws and regulations and internal control over financial reporting. The communication must include the nature of any additional testing of compliance and internal control required by laws and regulations or otherwise requested, and whether the auditors are planning to provide opinions on compliance with laws and regulations and internal control over financial reporting. This communication must take the form of an audit engagement letter prepared by the CPA and formally accepted by the board of directors or an audit committee representing the board of directors. The engagement letter must also encompass those items prescribed in SAS 83, entitled “Establishing an Understanding with the Client”. It must also include the following:

(1) The borrower and the CPA acknowledge that the audit is being performed and the auditor’s report, report on compliance and on internal control over financial reporting, and management letter is being issued in order to enable the borrower to comply with the provisions of RUS’s security instrument;

(2) The borrower and CPA acknowledge that RUS will consider the borrower to be in violation of its security instrument with RUS if the borrower fails to have an audit performed and documented in compliance with GAGAS and this part;

(3) The CPA represents that he/she meets the requirements under this part to be satisfactory to RUS;

(4) The CPA will perform the audit and will prepare the auditor’s report, report on compliance and on internal control over financial reporting, and management letter in accordance with the requirements of this part;

(5) The CPA will document the audit work performed in accordance with GAGAS, the professional standards of the AICPA, and the requirements of this part;

(6) The CPA will make all audit-related documents, including auditor’s reports, workpapers, and management letters available to RUS or its representatives (OIG and GAO), upon request, and will permit the photocopying of all audit-related documents;

(7) The CPA will follow the requirements of reporting fraud and illegal acts as outlined in §1773.9.

(b) The audit agreement may include such additional terms and conditions as the CPA and borrower deem appropriate, including, but not limited to:

(1) The CPA will report all audit findings to the board of directors as required in §1773.20(b); and

(2) The auditor’s report, report on compliance, report on compliance and on internal controls over financial reporting, and management letter with copies for transmittal to RUS, and supplemental lenders, if applicable, will be submitted to the borrower’s board of directors within 90 days of the as of audit date;

(c) A copy of the audit agreement must be available at the borrower’s office for inspection by RUS personnel.
§ 1773.7 Audit standards.

(a) The audit must be performed in accordance with GAGAS and this part. The auditor must be familiar with the requirements of GAGAS in effect at the audit date unless the borrower is directed otherwise, in writing, by RUS.

(b) The audit must include such tests of the accounting records and such other auditing procedures that are sufficient to enable the CPA to express an opinion on the financial statements and to issue the required report on compliance and on internal control over financial reporting and the management letter.

(c) Audit scope limitation.

(1) The borrower will not limit the scope of the audit to the extent that the CPA is unable to meet RUS’s audit requirements or to provide an unqualified opinion that the financial statements are presented fairly in conformity with GAAP.

(2) The security instrument provision requiring the submission of a report of the audit is not satisfied if the CPA must qualify the opinion in the auditor’s report due to limitations placed on the scope of the audit by the borrower.

(3) If the CPA determines during the audit that an unqualified opinion cannot be issued due to a scope limitation imposed by the borrower, the CPA should use professional judgment to determine what levels of the borrower’s management should be informed.

(4) After informing the borrower’s management, if the scope limitation is not adequately resolved, the CPA should immediately contact the AA-PARA, RUS, U.S. Department of Agriculture, Washington, DC 20250–1523. The AA-PARA will endeavor to resolve the matter with the borrower.

§ 1773.8 Audit date.

(a) The annual audit must be performed as of the end of the same calendar month each year unless prior approval to change the as of audit date is obtained, in writing, from RUS.

(1) A borrower may request a change in the as of audit date by writing to the AA-PARA at least 60 days prior to the newly requested as of audit date.

(2) The time period between the prior as of audit date and the newly requested as of audit date must be no longer than twenty-four months. For example, a borrower that wishes to change its as of audit date from December 31, 20X1, to June 30, must make the change effective no later than June 30, 20X3.

(b) Comparative financial statements must be prepared and audited for the twelve months ending as of the new audit date and for the twelve months immediately preceding that period.

(c) A borrower that changes its as of audit date from December 31, 20X1, to June 30, 20X3, must have the CPA report on statements in the following manner:

<table>
<thead>
<tr>
<th>Previously issued statements</th>
<th>Statements prepared as of new audit date</th>
</tr>
</thead>
<tbody>
<tr>
<td>12/31/20X1; 12/31/20X0 (Statement need not be re-issued)</td>
<td>6/30/20X3; 6/30/20X2</td>
</tr>
</tbody>
</table>

§ 1773.9 Disclosure of fraud, illegal acts, and other noncompliance.

(a) In accordance with GAGAS, the auditor must design the audit to provide reasonable assurance of detecting fraud that is material to the financial statements and material misstatements resulting from direct and material illegal acts, and noncompliance with the provisions of contracts or grant agreements that could have a direct and material effect on financial statements amounts.

(b) If specific information comes to the auditor’s attention that provides evidence concerning the existence of possible illegal acts that could have a material indirect effect on the financial statements or material noncompliance with the provisions of contracts
or grant agreements that could have a material indirect effect on the financial statements, auditors should apply audit procedures specifically directed to ascertaining whether an illegal act or noncompliance with provisions of contract or grant agreements has occurred.

(c) Pursuant to the terms of its audit engagement letter with the borrower, the CPA must immediately report, in writing, all instances of fraud and all indications or instances of illegal acts, whether material or not, to:

(1) The president of the borrower’s board of directors;

(2) The Assistant Administrator, Program Accounting and Regulatory Analysis; and

(3) OIG, as follows:

(i) For the States of Delaware, District of Columbia, Maryland, Pennsylvania, Virginia, West Virginia, Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Puerto Rico, Rhode Island, Vermont and the Virgin Islands, report to USDA-OIG-Audit, Northeast Region, Regional Inspector General, 6505 Belcrest Road, room 428–A, Hyattsville, Maryland 20782;

(ii) For the States of Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, and Tennessee, report to USDA-OIG-Audit, Southeast Region, Regional Inspector General, 401 W. Peachtree Street, NW., room 2328, Atlanta, Georgia 30308–3520;

(iii) For the States of Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin, report to USDA-OIG-Audit, Midwest Region, Regional Inspector General, 111 N. Canal Street, Suite 1130, Chicago, Illinois 60606;

(iv) For the States of Arkansas, Louisiana, New Mexico, Oklahoma, and Texas, report to USDA-OIG-Audit, Southwest Region, Regional Inspector General, 101 South Main, room 324, Temple, Texas 76501;

(v) For the States of Colorado, Iowa, Kansas, Missouri, Montana, Nebraska, North Dakota, South Dakota, Wyoming, and Utah, report to USDA-OIG-Audit, Great Plains Region, Regional Inspector General, P.O. Box 293, Kansas City, Missouri 64191; and

§ 1773.20 CPA’s submission of the auditor’s report, report on compliance, report on compliance and on internal controls over financial reporting, and management letter.

(a) Time limit. As soon as possible after completion of the audit, but within 90 days of the as of audit date, the CPA should deliver the auditor’s report, report on compliance and on internal control over financial reporting, and management letter to the president of the borrower’s board of directors. As a minimum, copies should be provided for each member of the board of directors and the manager. Further, three copies must be provided to the borrower for transmittal to RUS.

(b) Communication with the board of directors. In addition to providing sufficient copies of the auditor’s report, report on compliance and on internal control over financial reporting, and management letter for each member of the borrower’s board of directors, RUS requires that the CPA report all audit findings to the borrower’s board of directors. RUS recommends that audit
findings be communicated orally; however, the communication may be oral or written, at the borrower’s discretion. If the information is communicated orally, the CPA must document the communication by appropriate memoranda or notations in the workpapers. If the CPA communicates in writing, a copy of the written communication must be included in the CPA’s audit workpapers or permanent file.

(c) Matters to be communicated. Matters communicated to the board of directors must include, but are not limited to the matters to be communicated to the audit committee as prescribed in SAS No. 61, entitled “Communication with Audit Committee”:

(1) The initial selection of and changes in significant accounting policies;
(2) The methods used to account for significant or unusual transactions and the effects of significant accounting policies in controversial or emerging areas;
(3) The process utilized by management to formulate significant accounting estimates and the basis for the CPA’s conclusions regarding the reasonableness of these estimates;
(4) Audit findings and recommendations, including audit adjustments that either individually or in the aggregate have a significant effect on the borrower’s financial statements;
(5) The CPA’s responsibility for other information presented with the audited financial statements, any audit procedures performed, and the results thereof;
(6) Any disagreements with management, whether or not satisfactorily resolved, concerning matters that individually or in the aggregate may be significant to the borrower’s financial statements or the auditor’s report, report on compliance and on internal control over financial reporting, or management letter;
(7) Significant matters that were the subject of consultations with other accountants;
(8) Significant issues discussed with management with regard to the initial or recurring retention of the CPA; and
(9) Any serious difficulties encountered in dealing with management during the performance of the audit.

§ 1773.21 Borrower’s review and submission of the auditor’s report, report on compliance and internal control over financial reporting, and management letter.

(a) The borrower’s board of directors should note and record receipt of the auditor’s report, report on compliance and on internal control over financial reporting, and management letter and any action taken in response to the reports or management letter in the minutes of the board meeting at which such reports and management letter are presented.

(b) The borrower must furnish RUS with three copies of the auditor’s report, report on compliance and on internal control over financial reporting, and management letter within 120 days of the as of audit date. Any provision in RUS’s security instrument that requires such documents to be furnished to RUS in a shorter period of time may be disregarded.

(c) The borrower must furnish RUS with three copies of its plan for corrective action, if any, within 180 days of the as of audit date.

(d) The borrower must furnish RUS, within 120 days of the as of audit date, with a copy of each special report, summary of recommendations or similar communications, if any, received from the CPA as a result of the audit.

(e) All required submissions to RUS described in paragraphs (a) through (d) of this section should be sent to: Assistant Administrator, Program Accounting and Regulatory Analysis, Stop 1523, 1400 Independence Ave., SW, Washington, DC 20250–1523.

§ 1773.30 General.

(a) The CPA must prepare the following (examples of which are set forth in RUS Bulletin 1773–1):
   (1) An auditor’s report;
   (2) A report on compliance and on internal control over financial reporting; and
   (3) A management letter.

(b) The CPA should deliver the auditor’s report, report on compliance and on internal control over financial reporting, and management letter (with copies as required in §1773.20) to the borrower as soon as possible after completion of the audit but not more than 90 days after the as of audit date.

§ 1773.31 Auditor’s report.

The CPA must prepare a written report on comparative balance sheets, statements of revenue and patronage capital (or income and retained earnings, depending upon the structure of the borrower) and statements of cash flows. This report must be signed by the CPA, cover all statements presented, and refer to the separate report on compliance and on internal control over financial reporting issued in conjunction with the auditor’s report. The auditor’s report should also state that the report on compliance and on internal control over financial reporting is an integral part of a GAGAS audit, and in considering the results of the audit, this report should be read along with the auditor’s report on the financial statements.

[66 FR 27836, May 21, 2001]

§ 1773.32 Report on compliance and on internal control over financial reporting.

As required by GAGAS, the CPA must prepare a written report describing the auditors testing of compliance with applicable laws, regulations, contracts, and grants, and on internal control over financial reporting and present the results of those tests. This report must be signed by the CPA and must include, as a minimum:

(a) The scope of the CPA’s testing of compliance with laws and regulations and internal control over financial reporting including whether or not the tests performed provided sufficient evidence to support an opinion on compliance or internal control over financial reporting and whether the CPA is providing such opinions;

(b) If conditions believed to be material weaknesses considered to be reportable conditions are disclosed, the report should identify the material weaknesses that have come to the CPA’s attention;

(c) If no reportable instances of noncompliance and no reportable conditions were found, the CPA must issue a report as illustrated in RUS Bulletin 1773–1.

(d) If material instances of noncompliance and reportable conditions are identified, the CPA must issue a report as illustrated in RUS Bulletin 1773–1.

(e) Other nonmaterial instances of noncompliance should not be disclosed in the report on compliance and on internal control over financial reporting, but should be reported in a separate communication to the board of directors, preferably in writing. All such communications must be documented in the workpapers and submitted to RUS in compliance with §1773.21.

(f) If the CPA has issued a separate letter detailing immaterial instances of noncompliance, the report on compliance and on internal control over financial reporting must be modified to include a statement such as:

We noted certain immaterial instances of noncompliance, which we have reported to the management of (borrower’s name) in a separate letter dated (month, day, year).

(g) If the CPA has issued a separate letter to management to communicate other matters involving the design and operation of the internal control over financial reporting, the report on compliance and on internal control over financial reporting must be modified to include a statement such as:

However, we noted other matters involving the internal control over financial reporting that we have reported to the management of
§ 1773.33 Management letter.

The CPA must prepare a management letter that includes, at a minimum, comments on:

(a) Audit procedures. State whether the audit has been performed in accordance with this part;

(b) Special reports. State whether any special reports, summaries of recommendations, or similar communications were furnished to the borrower’s management during the course of the audit or during interim audit work, and provide a description of the information furnished;

(c) Accounting and records. Comment on the adequacy and effectiveness of the borrower’s accounting procedures, discuss the general condition of the records, and outline any recommendations for improvement. Comment on the adequacy and fairness of the methods used in accumulating and recording labor, material, and overhead costs, and the distribution of these costs to construction, retirement, and maintenance or other expense accounts, and where appropriate, include:

(1) Whether continuing property records (CPRs) have been established, are updated on a current basis, at least annually, and are reconciled with the controlling general ledger plant accounts;

(2) Whether construction clearing accounts are cleared promptly of costs of completed construction to the proper classified plant accounts and whether depreciation was accrued on such completed construction from the date the plant was placed in service;

(3) Whether retirements of plant are currently and systematically recorded and properly priced;

(4) Whether all costs associated with retirements of plant are properly accounted for in the accumulated provision for depreciation accounts and comment on any unusual charges or credits to such accounts; and

(5) Whether RUS approval was obtained for the sale, lease or transfer of capital assets secured under the mortgage when approval is required, and whether proceeds from the sale or lease of plant, material or scrap were handled in conformance with RUS requirements.

(d) Materials control. Comment on the adequacy of the control over materials and supplies.

(e) Compliance with RUS loan and security instrument provisions. State whether the following provisions of RUS’ loan and security instruments have been complied with:

(1) For electric borrowers, provisions related to:

(i) The requirements for a borrower to obtain written approval of mortgagees to enter into any contract for the management, operation, or maintenance of the borrower’s system if the contract covers all or substantially all (90 percent) of the electric system. For purposes of this part, the following contracts shall be deemed as requiring RUS approval:

(A) Management contracts in which the borrower has contracted to have another borrower or other entity manage its affairs;

(B) Management contracts in which the borrower has contracted to manage another borrower or other utility system;

(C) Operations and maintenance contracts in which the borrower has contracted to have another borrower or other entity operate and/or maintain all or substantially all (90 percent) of the physical plant facilities of the borrower.

(D) Operations and maintenance contracts in which the borrower has contracted to operate and maintain the physical plant facilities of another borrower or other utility system; and

(ii) The requirement for a borrower to prepare and furnish mortgagees annual financial and statistical reports on the borrower’s financial condition and operations. For borrowers with a December 31 year end, the CPA must state whether the information represented by the borrower as having

\[\text{(borrower’s name) in a separate letter dated (month, day, year).}\]

been submitted to RUS in its most recent December 31 RUS Form 7 or Form 12 is in agreement with the borrower’s audited records. For borrowers with a year end other than December 31, the CPA must state whether the information appears reasonable based upon the audit procedures performed. If the borrower represents that an amended report has been filed as of December 31, the comments must relate to the amended report.

(2) For telecommunications borrowers, provisions relating to the requirement for a borrower to obtain written approval of the mortgagees to enter into:

(i) Any contract, agreement or lease between the borrower and an affiliate other than as allowed under 7 CFR part 1744, subpart E;

(ii) The requirement for a borrower to prepare and furnish mortgagees annual financial and statistical reports on the borrower’s financial condition and operations. For borrowers with a December 31 year end, the CPA must state whether the information represented by the borrower as having been submitted to RUS in its most recent December 31 RUS Form 479 is in agreement with the borrower’s audited records. For borrowers with a year end other than December 31, the CPA must state whether the information appears reasonable based upon the audit procedures performed. If the borrower represents that an amended report has been filed as of December 31, the comments must relate to the amended report.

(f) Related party transactions. State whether all material related party transactions have been disclosed in the notes to the financial statements in accordance with SFAS No. 57, entitled “Related Party Disclosures”. If the audit did not disclose any related party transactions considered to be material, either individually or in the aggregate, so state;

(g) Depreciation rates. For electric borrowers, comment when the depreciation rates used in computing monthly accruals are not in compliance with RUS requirements (See RUS Bulletin 183-1, Depreciation Rates and Procedures), which require the use of depreciation rates that are within the ranges established by RUS for each primary plant account, or with the requirements of the State regulatory body having jurisdiction over the borrower’s depreciation rates; and

(h) Deferred debits and deferred credits. For electric borrowers, provide a detailed analysis of the totals reported as deferred debits and deferred credits, including, but not limited to, margin stabilization plans, revenue deferral plans, and expense deferrals. The CPA must state whether RUS has approved, in writing, each regulatory asset and liability.

(i) Investments. For electric and telecommunications borrowers, provide a detailed schedule of all investments in subsidiary and affiliated companies accounted for on either the cost or equity basis. This requirement includes investments in corporations, limited liability corporations and partnerships, joint ventures, etc. For all investments list the name of the entity, ownership percentage, and the principal business in which the entity is engaged. For investments recorded on the cost basis include the original investment, advances, dividends declared or paid in the current and prior years and the net investment. For investments recorded on the equity basis include the ownership percentage, original investment, advances, and current and prior years’ earnings and losses, including accumulated losses in excess of the original investment.

§§ 1773.34–1773.37 [Reserved]

Subpart E—RUS Required Audit Procedures and Documentation

§ 1773.38 Scope of engagement.

(a) RUS requires that the audit procedures set forth in §§1773.39 through 1773.45 be performed annually by the CPA during the audit of the RUS borrowers’ financial statements, which audit procedures may be in addition to the conduct of a GAGAS audit.
(b) The CPA must exercise professional judgment in determining whether any auditing procedures in addition to those mandated by GAGAS or this part should be performed in order to afford a reasonable basis for rendering the auditor’s report, report on compliance and on internal control over financial reporting, and management letter.

§ 1773.39 Utility plant and accumulated depreciation.

(a) General. The audit of these accounts must include tests of additions, replacements, retirements, and changes. Based upon the CPA’s determination of materiality, an appropriate sample of transactions must be selected for testing. The CPA’s workpapers must document that he/she:

(1) Examined direct labor and material transactions to determine whether the borrower’s accounting records reflect a complete accumulation of costs;

(2) Examined indirect costs and overhead charges to determine if they conform to the Uniform System of Accounts;

(3) Reviewed the costs of completed construction and retirement projects to determine if they were cleared promptly from the work in progress accounts to the classified plant in service accounts and the related depreciation reserves;

(4) Examined direct purchases of special equipment and general plant;

(5) Determined the degree of accuracy and control of costing retirements, including tests of salvage and removal costs;

(6) Reviewed the borrower’s work order procedures; and

(7) Reviewed depreciation rates for adequate support, compared them to RUS guidelines, and determined if they are in compliance.

(b) Construction work in progress. (1) The workpapers must include a summary of open work orders reconciled to the general ledger. The CPA must note on the summary any unusual or non-typical projects.

(2) Based upon the CPA’s determination of materiality, an appropriate sample of work orders must be selected for testing. The CPA’s workpapers must document that he/she:

(i) Reviewed equipment purchases charged to work orders, including payments and receiving reports;

(ii) Reviewed contracts showing the scope of the work, the nature of the contract, the contract amount, and scheduled payments and reviewed supporting documents to determine that all services contracted for were in fact rendered;

(iii) Reviewed time cards and pay rates for several employees who allocate their time to work orders;

(iv) Reviewed the nature of material and supplies issued to the project, traced amounts and quantities to supporting documents, and reviewed the reasonableness of clearing rates for assignment of stores expense to the work order;

(v) Reviewed the accuracy of the computation of overheads applied to the work order; and

(vi) Reviewed other costs charged to the work order for support and propriety.

(3) Based upon the CPA’s determination of materiality, an appropriate sample of completed contracts must be selected for testing. The CPA’s workpapers must document that he/she:

(i) Scheduled payments to contractors and traced to verify payments and supporting invoices;

(ii) Traced contract costs to final closeout documents, to the general ledger, and to the continuing property records; and

(iii) Verified the costs of owner furnished materials, if applicable.

(4) The CPA must review the borrower’s procedures for unitization and classification of work order and contract costs. Based upon the CPA’s determination of materiality, an appropriate sample of transactions must be selected for testing. The CPA’s workpapers must document that he/she:

(i) Reviewed the tabulation of record units for construction from the work order staking sheets to the tabulation of record units, to the unitization sheets, and to the continuing property records;
(ii) Reviewed the procedures for unitizing and distributing costs of completed construction to the plant accounts;

(iii) Verified that standard costs were being used;

(iv) Evaluated the basis for development of standard costs; and

(v) Determined that costs of completed construction were cleared promptly from work in progress accounts.

(c) Continuing property records. Based upon the CPA’s determination of materiality, an appropriate sample of transactions must be selected for testing. The CPA’s workpapers must document that he/she:

(1) Determined whether the subsidiary plant records agree with the controlling general ledger plant accounts;

(2) Noted differences in the workpapers; and

(3) Commented, in the management letter, on any discrepancies.

(d) Retirement work-in-progress. Based upon the CPA’s determination of materiality, an appropriate sample of transactions must be selected for testing. The CPA’s workpapers must document that he/she:

(1) Determined that plant retirements are currently and systematically recorded and priced on the basis of the continuing property records, and determined that costs of removal have been properly accounted for;

(2) Explained the method used in computing the cost of units of plant retired if continuing property records have not been established and determined whether costs appeared reasonable; and

(3) Determined the manner in which net losses due to retirements were accounted for and traced clearing entries to the depreciation reserve, the plant accounts, and the continuing property records.

(e) Provision for accumulated depreciation. The CPA’s workpapers must include an analysis of transactions. Based upon the CPA’s determination of materiality, an appropriate sample of transactions must be selected for testing. The CPA’s workpapers must document that he/she:

(1) Verified the depreciation accruals for the period, including the depreciation base;

(2) Reviewed the basis of the depreciation rates, any change in rates and the reason therefor, and, if appropriate, determined whether the rates are in compliance with RUS requirements or with the requirements of the state regulatory body having jurisdiction over the borrower’s depreciation rates;

(3) Reviewed salvage and removal costs; and

(4) Searched for unrecorded retirements.

(f) Other reserves. The CPA’s workpapers must include an account analysis for all other material plant reserves, such as the reserve for the amortization of plant acquisition adjustments. Based upon the CPA’s determination of materiality, an appropriate sample of transactions must be selected for testing. The CPA’s workpapers must document that appropriate tests of transactions were performed.

(g) Narrative. The CPA must prepare and include in the workpapers a comprehensive narrative on the scope of work performed, observations made, and conclusions reached. Specific matters covered in this narrative must include:

(1) The nature of construction and other additions;

(2) The control over, and the accuracy of pricing retirements;

(3) The accuracy of distributing costs to classified utility plant accounts;

(4) An evaluation of the method of:

(i) Capitalizing the direct loadings on labor and material costs;

(ii) Distributing transportation costs and other expense clearing accounts; and

(iii) Capitalizing overhead costs;

(5) The tests of depreciation;

(6) A review of agreements such as those relating to acquisitions, property sales, and leases which affect the plant accounts; and

(7) Notations, if applicable, of RUS approval of property sales and the propriety of the disposition of the proceeds.
§ 1773.40 Regulatory assets.

The CPA’s workpapers must document whether all regulatory assets comply with the requirements of SFAS No. 71. For electric borrowers only, the CPA’s workpapers must document whether all regulatory assets have received RUS approval.

[59 FR 660, Jan. 6, 1994]

§ 1773.41 Extraordinary retirement losses.

The CPA’s workpapers must contain an analysis of retirement losses, including any required approval by a regulatory commission with jurisdiction in the matter, or RUS, in the absence of commission jurisdiction.

§ 1773.42 Clearing accounts.

The CPA’s workpapers must contain an analysis of all clearing accounts. Based upon the CPA’s determination of materiality, an appropriate sample of transactions should be selected for testing. The CPA’s workpapers must document that transactions were reviewed for proper allocation between expense and capital accounts.

§ 1773.43 Capital and equity accounts.

(a) Capital stock. For privately owned companies, the workpapers must include analyses of all stock transactions during the audit period. Based upon the CPA’s determination of materiality, an appropriate sample of transactions must be selected for testing. The CPA’s workpapers must document that he/she:

1. Reviewed the subsidiary records and reconciled them to the general ledger control account;
2. Reviewed authorizations and issuances or redemptions of capital stock for proper approvals by the board of directors, stockholders, and regulatory commissions;
3. Determined that transactions were made in accordance with the appropriate provisions of the articles of incorporation, bylaws, and RUS loan documents; and
4. Determined that transactions were recorded in accordance with the Uniform System of Accounts.

(b) Memberships. For cooperative organizations, the workpapers must include an analysis of the membership transactions during the audit period. Based upon the CPA’s determination of materiality, an appropriate sample of transactions must be selected for testing. The CPA’s workpapers must document that he/she:

1. Reviewed the subsidiary records and reconciled them to the general ledger control account; and
2. Determined that transactions were made in accordance with the appropriate provisions of the articles of incorporation, bylaws, and RUS loan documents.

(c) Patronage capital, retained earnings, margins, and other equities. The workpapers must include an analysis of the patronage capital, retained earnings, margins and other equities, and any related reserve accounts. Based upon the CPA’s determination of materiality, an appropriate sample of transactions must be selected for testing. The CPA’s workpapers must document that he/she:

1. Determined that the transactions were made in accordance with the appropriate provisions of the articles of incorporation, bylaws, RUS loan documents, Uniform System of Accounts, or orders of regulatory commissions;
2. Traced payments to underlying support; and
3. Determined whether, under the terms of the RUS security instrument, restrictions of retained earnings or margins are required and, if so, whether they have been properly recorded.

§ 1773.44 Long-term debt.

The CPA’s workpapers must document that he/she:

(a) Confirmed RUS, FFB, and RTB debt to the appropriate confirmation schedule (RUS Form 690, Confirmation Schedule Obligation to the FFB as of; or Form 691, Confirmation Schedule—Long-term Obligation to RUS as of; or RTB Form 12, Confirmation Schedule); and

(b) Confirmed other long-term debt directly with the lender;
(c) Examined notes executed or canceled during the audit period; and
(d) Tested accrued interest computations.
§ 1773.45 Regulatory liabilities.

The CPA’s workpapers must document whether all regulatory liabilities comply with the requirements of SFAS No. 71. For electric borrowers only, the CPA’s workpapers must document whether all regulatory liabilities have received RUS approval.

§ 1775.3 Availability of forms and regulations.

Information about the forms, instructions, regulations, bulletins, OMB Circulars, Treasury Circulars, standards, documents and publications cited in this part is available from any USDA/Rural Development Office or the Rural Utilities Service, United States Department of Agriculture, Washington, DC 20250–1500.

§ 1775.4 Allocation of funds.

The National Office of the Rural Utilities Service will administer grant funds and will allocate them on a competitive basis.

§ 1775.5 Limitations.

Grant funds may not be used to:

(a) Duplicate current services or replace or substitute support normally provided by other means, such as those performed by an association’s consultant in developing a project, including feasibility, design, and cost estimates.

(b) Fund political or lobbying activities.

(c) Purchase real estate or vehicles, improve or renovate office space, or repair and maintain privately owned property.

(d) Pay the costs for construction, improvement, rehabilitation, modification, or operation and maintenance of water, wastewater, and solid waste disposal facilities.

(e) Construct or furnish a building.

(f) Intervene in the Federal regulatory or adjudicatory proceedings.

(g) Sue the Federal Government or any other government entities.

(h) Pay for any other costs that are not allowable under OMB Circular A-87, OMB Circular A-110, OMB Circular A-102 or OMB Circular A-122.

(i) Make contributions or donations to others.

(j) Fund projects that duplicate technical assistance given to implement action plans under the National Forest-Dependent Rural Communities Economic Diversification Act of 1990 (7 U.S.C. 6613). Applicants cannot receive both grants made under this part and grants that the Forest Service makes to implement the action plans for five continuous years from the date of grant approval by the Forest Service.

1. The Forest Service helps rural communities that are dependent upon national forest resources diversify existing industries and economies. It establishes rural forestry and economic diversification action teams that prepare technical assistance plans for these rural communities to expand their local economies and reduce their dependence on national forest resources. The Forest Service provides assistance to implement the action plans through grants, loans, cooperative agreements, or contracts.

2. To avoid duplicate assistance, applicants must contact the Forest Service to find out if any geographical areas or local areas in a State have received grants for technical assistance to an economically disadvantaged community. These areas are defined as national forest-dependent communities under 7 U.S.C. 6612. Applicants will provide documentation to the Forest Service and Rural Utilities Service that they have contacted each agency.

(k) To pay an outstanding judgment obtained by the United States in a Federal Court (other than in the United States Tax Court), which has been recorded. An applicant will be ineligible to receive a loan or grant until the judgment is paid in full or otherwise satisfied.

(l) Recruit applications for the RUS’s water and waste loan or any other loan or grant program. Grant funds cannot be used to create new business; however, they can be used to assist with application preparation.

§ 1775.6 Equal opportunity requirements.

The policies and regulations contained in subpart E of part 1901 of this title apply to grants made under this part.

§ 1775.7 Environmental requirements.

The policies and regulations contained in part 1794 of this title apply to grants made for the purposes in §§ 1775.36 and 1775.66.

§ 1775.8 Other Federal statutes.

Other Federal statutes and regulations are applicable to grants awarded under this part. These include but are not limited to:

(a) 7 CFR part 1, subpart A—USDA implementation of Freedom of Information Act.

(b) 7 CFR part 3—USDA implementation of OMB Circular No. A–129 regarding debt collection.

(c) 7 CFR part 15, subpart A—USDA implementation of Title VI of the Civil Rights Act of 1964, as amended.

(d) 7 CFR part 1794, RUS Implementation of the National Environmental Policy Act.

(e) 7 CFR part 1901, subpart E—Civil Rights Compliance Requirements.

(f) 7 CFR part 3015—Uniform Federal Assistance Regulations.

(g) 7 CFR part 3016—USDA Implementation of OMB Circular Nos. A–102 and A–97, Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments.

(i) 7 CFR part 3018—Restrictions on Lobbying, prohibiting the use of appropriated funds to influence Congress or a Federal agency in connection with the making of any Federal grant and other Federal contracting and financial transactions.

(j) 7 CFR part 3019—USDA implementation of OMB Circular A–110, Uniform Administrative Requirements for Grants and Agreements With Institutions of Higher Education, Hospitals, and Other Nonprofit Organizations.

(k) 7 CFR part 3052—USDA implementation of OMB Circular No. A–133 regarding audits of institutions of higher education and other nonprofit institutions.

(l) 29 U.S.C. 794, section 504—Rehabilitation Act of 1973, and 7 CFR part 15B (USDA implementation of statute), prohibiting discrimination based upon physical or mental handicap in Federally assisted programs.

§ 1775.9 OMB control number.

The information collection requirements contained in this part have been approved by the Office of Management and Budget and have been assigned OMB control number 0572–0112.

Subpart B—Grant Application Processing

§ 1775.10 Applications.

(a) Filing period. Applications may be filed on or after October 1 and must be received by close of business or postmarked by midnight December 31. If an application is received either before October 1 or after December 31, the receiving office will return it to the applicant.

(b) Where to file. (1) An applicant will apply to the appropriate State Office of Rural Development if the project will serve a single state.

(2) An applicant will apply to the National Office if the project will serve multiple states. The application must be submitted to the following address: Assistant Administrator, Water and
§ 1775.10

Environmental Programs, Rural Utilities Service, Washington, DC 20250–1570.

(3) Electronic applications will be accepted prior to the filing deadline through the Federal Government’s eGrants Web site (Grants.gov) at http://www.grants.gov. Applicants should refer to instructions found on the Grants.gov Web site to submit an electronic application. A DUNS number and a Central Contractor Registry (CCR) registration is required prior to electronic submission. The sign-up procedures, required by Grants.gov, may take several business days to complete.

(c) Application requirements. To file an application, an organization must provide their DUNS number. An organization may obtain a DUNS number from Dun and Bradstreet by calling (1–866–705–7611). To file a complete application, the following information should be submitted:

(1) Standard Form 424, “Application for Federal Assistance (For Non-Construction).”

(3) Form AD–1047, “Certification Regarding Debarment, Suspension, and Other Responsibility Matters—Primary Covered Transaction.”

(4) Form AD 1049, “Certification Regarding Drug-Free Workplace Requirements (Grants) Alternative I—For Grantees Other Than Individuals.”

(5) Form AD 1048, “Certification Regarding Debarment.”

(6) Attachment regarding assistance provided to Rural Development Employees as required by RD Instruction 1900–D.

(7) Form RD 400–4, “Assurance Agreement.”

(8) Form RD 400–1, “Equal Opportunity Agreement.”

(9) Indirect Cost Rate Agreement (if applicable, applicant must include approved cost agreement rate schedule).

(10) Statement of Compliance for Title VI of the Civil Rights Act of 1964.

(11) SF LLL, “Disclosure of Lobbying Activities” (include only if grant is over $100,000).

(12) Certification regarding Forest Service grant.

(d) Supporting information. All applications shall be accompanied by:

(1) Evidence of applicant’s legal existence and authority in the form of:

(i) Certified copies of current authorizing and organizational documents for new applicants or former grantees where changes were made since the last legal opinion was obtained in conjunction with receipt of an RUS grant, or, certification that no changes have been made in authorizing or organizing documents since receipt of last RUS grant by applicant.

(ii) Current annual corporation report, Certificate of Good Standing, or statement they are not required.

(iii) For public nonprofits, Certificate of Continued Status from local attorney (if applicable).

(iv) Certified list of directors/officers with their respective terms.

(2) Evidence of tax exempt status from the Internal Revenue Service (IRS), if applicable.

(3) Narrative of applicant’s experience in providing services similar to those proposed. Provide brief description of successfully completed projects including the need that was identified and objectives accomplished.

(4) Latest financial information to show the applicant’s financial capacity to carry out the proposed work. A current audit report is preferred, however applicants can submit a balance sheet and an income statement in lieu of an audit report.

(5) List of proposed services to be provided.

(6) Estimated breakdown of costs (direct and indirect) including those to be funded by grantee as well as other sources. Sufficient detail should be provided to permit the approval official to determine reasonableness, applicability, and allowability.

(7) Evidence that a Financial Management System is in place or proposed.

(8) Documentation on each of the priority ranking criteria listed in §1775.11 as follows:

(i) List of the associations to be served and the State or States where assistance will be provided. Identify associations by name, or other characteristics such as size, income, location, and provide MHI and population.
(ii) Description of the type of technical assistance and/or training to be provided and the tasks to be contracted.

(iii) Description of how the project will be evaluated and provide clearly stated goals and the method proposed to measure the results that will be obtained.

(iv) Documentation of need for proposed service. Provide detailed explanation of how the proposed services differ from other similar services being provided in the same area.

(v) Personnel on staff or to be contracted to provide the service and their experience with similar projects.

(vi) Statement indicating the number of months it takes to complete the project or service.

(vii) Documentation on cost effectiveness of project. Provide the cost per association to be served or proposed cost of personnel to provide assistance.

(viii) Other factors for consideration, such as emergency situation, training need identified, health or safety problems, geographic distribution, Rural Development Office recommendations, etc.

§ 1775.11 Priority.

The application and supporting information will be used to determine the applicant’s priority for available funds. All applications will be reviewed and scored for funding priority in accordance with RUS Guide 1775–2. Points will be given only for factors that are well documented in the application package and, in the opinion of the RUS, meet the objective outlined under each factor. The following is a listing of the criteria that will be used to select the applications that meet the objectives of the technical assistance program.

(a) Projects proposing to give priority for available services to rural communities having a population less than 5,500 and/or below 2,500.

(b) Projects proposing to give priority for available services to low income communities.

(c) Projects that will provide assistance in a multi-State area.

(d) Projects will be awarded for work plans that clearly describe the goals and objectives of the project, how they will be accomplished in targeted communities, and what measurement of accomplishment will be used.

(e) Projects containing needs assessment (i.e. actual issue or problem being addressed) clearly defined and supported by data.

(f) Projects containing evaluation methods that are specific to the activity, clearly defined, measurable, and with projected outcomes.

(g) Applicants proposing to use at least 75 percent of the total grant amount for their own staff, or the staff of an affiliated organization to provide services for a project instead of contracting with an outside organization for the services.

(h) Projects providing technical assistance/training that accomplish the objective within a 12-month or less timeframe.

(i) Projects primarily providing “hands on” technical assistance and training, i.e., on-site assistance as opposed to preparation and distribution of printed material, to communities with existing water and waste systems which are experiencing operation and maintenance or management problems.

(j) Cash or in kind support of project from non-federal sources.

(k) Ability to demonstrate sustainability of project without Federal financial support.

§ 1775.12 Grant processing.

(a) Single State applications. (1) Grant applications submitted at the State level will receive a letter acknowledging receipt and confirmation that all information required for a full application was included in the packet. The State will notify the applicant of missing information. The applicant will have 14 business days to respond.

(2) The State Office will review applications for eligibility. Those applicants that are deemed ineligible will be notified. Applicants deemed eligible will be forwarded to the National Office for funding consideration.

(3) The National Office will review all applications received from State Offices. Applications will compete on a priority basis and will be scored and ranked. The applications receiving the
highest scores and subject to the availability of funds will be selected for final processing. The National Office will send these applications back to the State Office for processing. The State Office will notify the applicant(s) that they have been selected for funding.

(4) Applicants not selected for funding due to low priority rating shall be notified by the State Office.

(b) National and multi-State applications. (1) National and multi-State applications submitted to the National Office will receive a letter acknowledging receipt and confirmation that all information required for a full application was included in the packet. The National Office shall notify the applicant of missing information. The applicant will have 14 business days to respond.

(2) The National Office will review applications for eligibility. Those applications that are deemed ineligible will be notified. Applications deemed eligible will be reviewed and given a rating score. Applications receiving the highest scores will be grouped with those received from State Offices for funding consideration.

(3) The National Office will review all applications received. Applications will compete on a priority basis and will be scored and ranked. The applications receiving the highest scores and subject to the availability of funds will be notified by the National Office that they have been selected for funding. The National Office shall conduct final processing of multi-State and national applications.

(4) Multi-State and National applicants not selected for funding due to low priority rating will be notified by the National Office.

(c) Low priority applications. Applications that cannot be funded in the fiscal year received will not be retained for consideration in the following fiscal year and will be handled as outlined in paragraph (a)(4) or (b)(4) of this section.

§ 1775.13 Grant agreement.

Applicants selected for funding will complete a grant agreement, RUS Guide 1775–1, which outlines the terms and conditions of the grant award.

§§ 1775.14–1775.17 [Reserved]

§ 1775.18 Fund disbursement.

Grantees will be reimbursed as follows:

(a) SF–270, “Request for Advance or Reimbursement,” will be completed by the grantee and submitted to either the State or National Office not more frequently than monthly.

(b) Upon receipt of a properly completed SF–270, the funds will be requested through the field office terminal system. Ordinarily, payment will be made within 30 days after receipt of a proper request for reimbursement.

(c) Grantees are encouraged to use women- and minority-owned banks (a bank which is owned at least 50 percent by women or minority group members) for the deposit and disbursement of funds.

§ 1775.19 Grant cancellation or major changes.

Any change in the scope of the project, budget adjustments of more than 10 percent of the total budget, or any other significant change in the project must be reported to and approved by the approval official by written amendment to RUS Guide 1775–1. Any change not approved may be cause for termination of the grant.

§ 1775.20 Reporting.

(a) Grantees shall constantly monitor performance to ensure that time schedules are being met, projected work by time periods is being accomplished, and other performance objectives are being achieved.

(b) SF–269, “Financial Status Report (short form),” and a project performance activity report will be required of all grantees on a quarterly basis, due 30 days after the end of each calendar quarter.

(c) A final project performance report will be required with the last SF–269 due 90 days after the end of the last quarter in which the project is completed. The final report may serve as the last quarterly report.

(d) All multi-State grantees are to submit an original of each report to the National Office. Grantees serving only one State are to submit an original of each report to the State Office.
§ 1775.35 Eligibility.

(a) Entities eligible for grants must be private nonprofit organizations with tax exempt status, designated by the Internal Revenue Service. A nonprofit
organization is defined as any corporation, trust, association, cooperative, or other organization that:

(1) Is operated primarily for scientific, education, service, charitable, or similar purposes in the public interest.

(2) Is not organized primarily for profit.

(3) Uses its net proceeds to maintain, improve, and/or expand its operations.

(b) Entities must be legally established and located within a state as defined in § 1775.2.

(c) Organizations must be incorporated by December 31 of the year the application period occurs to be eligible for funds.

(d) Private businesses, Federal agencies, public bodies, and individuals are ineligible for these grants.

(e) Applicants must also have the proven ability, background, experience (as evidenced by the organization’s satisfactory completion of project(s) similar to those proposed), legal authority, and actual capacity to provide technical assistance and/or training on a regional basis to associations as provided in § 1775.33. To meet the requirement of actual capacity, an applicant must either:

(1) Have the necessary resources to provide technical assistance and/or training to associations in rural areas through its staff, or

(2) Be assisted by an affiliate or member organization which has such background and experience and which agrees, in writing, that it will provide the assistance, or

(3) Contract with a nonaffiliated organization for not more than 49 percent of the grant to provide the proposed assistance.

§ 1775.36 Purpose.

Grants may be made to organizations as defined in § 1775.35 to enable such organizations to assist associations to:

(a) Identify and evaluate solutions to water problems of associations in rural areas relating to source, storage, treatment, and/or distribution.

(b) Identify and evaluate solutions to waste problems of associations in rural areas relating to collection, treatment, and/or disposal.

(c) Prepare water and/or waste disposal loan/grant applications.

(d) Provide technical assistance/training to association personnel that will improve the management, operation, and maintenance of water and waste facilities.

(e) Pay the expenses associated with providing the technical assistance and/or training authorized in paragraphs (a) through (d) of this section.

§ 1775.37 Allocation of funds.

At least 10 percent of available funds will be used for funding single State projects based on the priority criteria.

§§ 1775.38–1775.60 [Reserved]

Subpart D—Solid Waste Management Grants

§ 1775.61 Authorization.

This subpart sets forth the policies and procedures for making Solid Waste Management (SWM) grants authorized under section 310B of the CONACT.

§ 1775.62 [Reserved]

§ 1775.63 Objectives.

The objectives of the program are to:

(a) Reduce or eliminate pollution of water resources, and

(b) Improve planning and management of solid waste sites.

§ 1775.64 [Reserved]

§ 1775.65 Eligibility.

(a) Entities eligible for grants must be either:

(1) Private nonprofit organizations with tax exempt status designated by the Internal Revenue Service. A nonprofit organization is defined as any corporation, trust, association, cooperative, or other organization that:

(i) Is operated primarily for scientific, education, service, charitable, or similar purposes in the public interest.

(ii) Is not organized primarily for profit.

(iii) Uses its net proceeds to maintain, improve, and/or expand its operations.

(2) Public bodies.
(3) Federally acknowledged or State-recognized Native American tribe or group.
(4) Academic institutions.
(b) Entities must be legally established and located within a state as defined in §1775.2.
(c) Organizations must be incorporated by December 31 of the year the application period occurs to be eligible for funds.
(d) Private businesses, Federal agencies, and individuals are ineligible for these grants.
(e) Applicants must also have the proven ability; background; experience, as evidenced by the organization’s satisfactory completion of project(s) similar to those proposed; legal authority; and actual capacity to provide technical assistance and/or training on a regional basis to associations as provided in §1775.63. To meet the requirement of actual capacity, an applicant must either:
(1) Have the necessary resources to provide technical assistance and/or training to associations in rural areas through its staff, or
(2) Be assisted by an affiliate or member organization which has such background and experience and which agrees, in writing, that it will provide the assistance, or
(3) Contract with a nonaffiliated organization for not more than 49 percent of the grant to provide the proposed assistance.

§ 1775.66 Purpose.
Grants may be made to organizations as defined in §1775.65 to enable such organizations to assist associations to:
(a) Provide technical assistance and/or training to reduce the solid waste stream through reduction, recycling, and reuse.
(b) Provide training to enhance operator skills in maintaining and operating active landfills.
(c) Provide technical assistance and/or training for operators of landfills which are closed or will be closed in the near future with the development/implementation of closure plans, future land use plans, safety and maintenance planning, and closure scheduling within permit requirements.
(d) Evaluate current landfill conditions to determine the threats to water resources.
(e) Pay the expenses associated with providing the technical assistance and/or training authorized in paragraphs (a) through (d) of this section.

§ 1775.67 Allocation of funds.
The maximum amount for a single applicant for a Solid Waste Management project will be 25 percent of available grant funds.

§ 1775.68 Exception authority.
The Administrator may, in individual cases, make an exception to any requirement or provision of this part which is not inconsistent with the authorizing statute or other applicable law and is determined to be in the Government’s interest.

§§ 1775.69–1775.99 [Reserved]
Subpart A—General

§ 1776.1 Purpose.

This part sets forth the policies and procedures for making grants to private, non-profit organizations to finance the construction, refurbishing and servicing of individually-owned household water well systems in rural areas for individuals with low or moderate income.

§ 1776.2 Uniform Federal Assistance Provisions.

(a) This program is subject to the general provisions that apply to all grants made by USDA and that are set forth in 7 CFR Part 3015—Uniform Federal Assistance Regulations.

(b) This program is subject to the uniform administrative requirements that apply to all grants made by USDA to non-profit organizations and that are set forth in 7 CFR Part 3019—Uniform Administrative Requirements for Grants And Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations.

(c) This program is subject to OMB Circular No. A–122 (Revised): Cost Principles for Non-Profit Organizations.

§ 1776.3 Definitions.

Administrative expenses means expenses incurred by a grant recipient that are of the type more particularly described in Section 13 of this part.

Applicant means a private, non-profit organization that applies for a HWWS grant under this part.

Centralized Servicing Center (CSC) means the centralized loan servicing center within the United States Department of Agriculture, Rural Development. CSC provides nationwide services for borrowers that have received financing from Rural Development programs.

Construction means building or assembling a water well system or portion thereof, that is not a water well system or portion thereof being constructed in connection with a new building.

Eligible individual means an individual who is a member of a household the members of which have a combined income (for the most recent 12-month period for which the information is available) that is not more than 100 percent of the median nonmetropolitan household income for the State or territory in which the individual resides, according to the most recent decennial census of the United States.

Grant agreement means the contract between RUS and the grant recipient which sets forth the terms and conditions governing a particular grant awarded under this part.

Grant recipient means an applicant that has been awarded a HWWS grant under this part.

HWWS means household water well system.

HWWS grant means a grant awarded by RUS to a grant recipient under this part.

HWWS loan means a loan made by a grant recipient to a loan recipient using the direct or indirect proceeds of a HWWS grant awarded under this part.

Loan recipient means an eligible individual who has received a HWWS loan.

Refurbishing means to renovate or to restore a water well system or portion thereof to near new condition.

Revolved funds means the cash portion of the revolving loan fund that is not composed of HWWS grant funds, including repayments of revolving HWWS loans, fees, and interest collected on HWWS loans.

Revolving loan fund means the loan fund established by the grant recipient to carry out the purposes of this part, such fund comprising the proceeds of a HWWS grant and other related assets.

Rural area means any area other than a city or town that has a population of greater than 50,000 inhabitants; and the urbanized area contiguous and adjacent to such city or town.

RUS means the Rural Utilities Service, a Federal agency delivering the United States Department of Agriculture’s Rural Development Utilities Program.

Servicing means making repairs or performing maintenance on a water well system or portion thereof.

USDA means the United States Department of Agriculture.
§ 1776.4 [Reserved]

Subpart B—HWWS Grants

§ 1776.5 Eligibility to receive a HWWS grant.

(a) The applicant must be a private organization.
(b) The applicant must be organized as a non-profit organization.
(c) The applicant must have legal capacity and lawful authority to perform the obligations of a grant recipient under this part. Example 1: If the organization is incorporated as a non-profit corporation, it must have corporate authority under state law and its corporate charter to engage in the practice of making loans to individuals. Example 2: if the organization is an unincorporated association, state law may prevent the organization from entering into binding contracts, such as a grant agreement.
(d) The applicant must have sufficient expertise and experience in lending and in promoting the safe and productive use of individually-owned household water well systems and ground water to assure the likelihood that the objectives of this part can be achieved.

§ 1776.6 Notice of availability of funds.

(a) In Fiscal Year 2005, applications will be accepted for this program from May 19, 2005, until July 18, 2005, at which time the application period will close. An applicant may withdraw, substitute, amend or supplement its application at any time before the application period closes. Once the application period has closed, all applications will be final.
(b) For subsequent fiscal years, if any funds for this program are available, the Secretary will publish a notice to that effect. The notice will establish the period during which applications for such funds may be submitted for consideration.

§ 1776.7 HWWS Grant application process.

(a) The applicant must complete and submit the following standard forms to RUS to apply for a HWWS grant under this part:

(1) Application for Federal Assistance: Standard Form 424,
(2) Budget Information—Non-Construction Programs: Standard Form 424A, and
(3) Assurances—Non-Construction Programs: Standard Form 424B.
(b) The applicant must submit a written work plan that demonstrates the feasibility of the applicant’s lending program to meet the objectives of this part.
(c) The applicant should submit a narrative establishing the basis for any claims that it has substantial expertise in promoting the safe and productive use of individually-owned household water well systems. The Secretary will give priority to an applicant that demonstrates it has substantial experience of this type.
(d) The applicant must submit:
(1) A pro forma balance sheet at start-up and projected balance sheets for at least three additional years,
(2) Financial statements for the last three years, or from inception of the operations of the grant recipient if less than three years, and
(3) Projected cash flow and earnings statements for at least three years, supported by a list of assumptions showing the basis for the projections. The projected earnings statement and balance sheets must include one set of projections specific to the revolving loan fund, and a separate set of projections that detail the proposed applicant organization’s total operations.
(e) The applicant may submit such additional information as it elects to support and describe its plan for achieving the objectives of this part.

§ 1776.8 Methods for submitting applications.

(a) Applications may be filed in either paper or electronic format. RUS will not accept applications by fax or e-mail.
(b) Paper applications for HWWS grants may be delivered by the U.S. Postal Service (USPS) or courier delivery services. Applications submitted by mail or courier must be postmarked no later than the filing deadline to be considered for the grant period. Applications delivered by mail or courier must
§ 1776.9 Scoring applications.

(a) Applications that are incomplete or ineligible will be returned to the applicant, accompanied by a statement explaining why the application is being returned.

(b) Promptly after an application period closes, all applications that are complete and eligible will be ranked competitively based on the following scoring criteria:

1. Degree of expertise and experience in promoting the safe and productive use of individually-owned household water well systems and ground water. Up to 30 points
2. Degree of expertise and successful experience in making and servicing loans to individuals. Up to 20 points
3. Percentage of applicant contributions. Points allowed under this paragraph will be based on written evidence of the availability of funds from sources other than the proceeds of a HWWS grant to pay part of the cost of a loan recipient’s project. In-kind contributions will not be considered. Funds from other sources as a percentage of the HWWS grant and points corresponding to such percentages are as follows:
   (i) 0 to 9 percent—ineligible;
   (ii) 10 to 25 percent—5 points;
   (iii) 26 to 30 percent—10 points;
   (iv) 31 to 50 percent—15 points; and
   (v) 51 percent or more—20 points
4. Extent to which the work plan demonstrates a well thought out, comprehensive approach to accomplishing the objectives of this part, clearly defines who will be served by the project, and appears likely to be sustainable. Up to 20 points
5. Extent to which the goals and objectives are clearly defined, tied to the work plan, and measurable. Up to 10 points
6. Lowest ratio of projected administrative expenses to loans advanced. 10 points
7. Administrator’s discretion, considering such factors as creative outreach ideas for marketing HWWS loans to rural residents, the amount of funds requested in relation to the amount of needs demonstrated in the work plan, previous experiences demonstrating excellent utilization of a revolving loan fund grant, and optimizing the use of agency resources. Up to 10 points

(c) All qualifying applications under this part will be scored based on the criteria contained in this section. Awards will be made based on the highest ranking applications and the amount of financial assistance available for HWWS grants. All applicants will be notified in writing of the score each application receives.

§ 1776.10 Grant agreement.

RUS and the grant recipient will enter into an agreement setting forth the terms and conditions governing a particular HWWS grant award. RUS will furnish the form of grant agreement. No funds awarded under this part shall be disbursed to the grant recipient before the grant agreement is binding and RUS has received a fully executed counterpart of the grant agreement.
§ 1776.11 Revolving loan fund.

The grant recipient shall establish and maintain a revolving loan fund for the purposes set forth in §1776.12. All loans made to loan recipients shall be drawn from the revolving loan fund. The loans shall be serviced, and the revolving loan fund shall be maintained, as set forth in §1776.17.

§ 1776.12 Use of HWWS grant proceeds.

(a) Except as otherwise provided in the next paragraph, HWWS grant proceeds shall be used solely for the purpose of providing loans to eligible individuals for the construction, refurbishing, and servicing of individual household water well systems in rural areas that are or will be owned by the eligible individuals.

(b) A grant recipient may use HWWS grant funds to pay administrative expenses associated with providing the assistance described in the immediately preceding paragraph.

(c) A grant recipient may not use grant funds in any manner inconsistent with the terms of the grant agreement.

§ 1776.13 Administrative expenses.

(a) Subject to the limitations provided in paragraphs (b), (c) and (d) of this section, the grant recipient may use grant funds to pay administrative expenses associated with providing HWWS loans.

(b) Administrative expenses incurred in any calendar year which exceed 10 percent of the HWWS loans made by the grant recipient during that same period do not qualify for reimbursement.

(c) Administrative expenses incurred prior to the execution of the grant agreement by RUS do not qualify for reimbursement.

(d) Allowability of administrative expense costs shall be determined in accordance with 7 CFR 3019.27.

§ 1776.14 Eligibility to receive a HWWS loan.

(a) The loan recipient must be an eligible individual.

(b) The loan recipient must either own and occupy the home being improved with the proceeds of the HWWS loan, or be occupying the home as the purchaser under a legally enforceable land purchase contract which is not in default by either the seller or the purchaser.

(c) The home using the water well system being funded from proceeds of the HWWS loan must be located in a rural area.

(d) The water well system being funded from the proceeds of the HWWS loan may not be associated with the construction of a new dwelling.

(e) The water well system being funded from the proceeds of the HWWS loan may not be used to substitute for water service available from collective water systems. Example: Loan recipient wishes to restore an old well which had been abandoned when the dwelling was connected to a water line belonging to a water district.

(f) A loan recipient must not be suspended or debarred from participation in Federal programs.

§ 1776.15 Terms of loans.

(a) HWWS loans under this part—

(1) Shall have an interest rate of 1 percent;

(2) Shall have a term not to exceed 20 years; and

(3) Shall not exceed $8,000 for each household water well system.

(b) The grant recipient must set forth the HWWS loan terms in written documentation signed by the loan recipient.

(c) Grant recipients must develop and use HWWS loan documentation that conforms to the terms of this part, the grant agreement, and the laws of the state or states having jurisdiction.

§ 1776.16 Loan servicing.

(a) If RUS determines that HWWS loans may be serviced by CSC, then the grant recipient will enter into an agreement with the Centralized Servicing Center for servicing all HWWS loans made from the revolving loan fund. All HWWS loan payments will be received by and processed at the Centralized Servicing Center. The grant recipient will be charged a fee for this service, and such fee should be included in the projected financial statements and work plan submitted as part of the
§ 1776.17 Revolving loan fund maintenance.

As long as any part of the HWWS grant remains available for lending, and loans made from the revolving loan fund have an outstanding balance due, the grant recipient must maintain the revolving loan fund for the purposes set forth in §1776.13.

(a) All HWWS grant funds received by a grant recipient must be deposited into the revolving loan fund.

(b) The grant recipient may transfer additional assets into the revolving loan fund.

(c) All cash and other assets of the revolving loan fund shall be deposited in a separate bank account or accounts.

(d) No cash or other assets of any other fund maintained by the grant recipient shall be commingled with the cash and other assets of the revolving loan fund.

(e) All moneys deposited in such bank account or accounts shall be money of the revolving loan fund.

(f) Loans to loan recipients are advanced from the revolving loan fund.

(g) The revolving loan fund will consist of receivables created by making loans, the grant recipient’s security interest in collateral pledged by loan recipients, collections on the receivables, interest, fees, and any other income or assets derived from the operation of the revolving loan fund.

(h) The portion of the revolving loan fund that consists of HWWS grant funds, on a last-in-first-out basis, may be used for only those purposes set forth in this part.

(i) The grant recipient must submit an annual budget of proposed administrative costs for RUS approval. The amount removed from the revolving loan fund for administrative costs in any year must be reasonable; must not exceed the actual cost of operating the revolving loan fund, including loan servicing and providing technical assistance; and must not exceed the amount approved by RUS in the grant recipient’s annual budget.

(j) A reasonable amount of revolving funds must be used to create a reserve for bad debts. Reserves should be accumulated over a period of years. The total amount should not exceed maximum expected losses, considering the quality of the grant recipient’s portfolio of loans. Unless the grant recipient provides loss and delinquency records that, in the opinion of RUS, justifies different amounts, a reserve for bad debts of 6 percent of outstanding loans must be accumulated over three years and then maintained as set forth in the grant agreement.

(k) Any cash in the revolving loan fund from any source that is not needed for debt service, approved administrative costs, or reasonable reserves must be available for additional loans to loan recipients.

(l) All reserves and other cash in the revolving loan fund not immediately needed for loans to loan recipients or other authorized uses must be deposited in accounts in banks or other financial institutions. Such accounts must be fully covered by Federal deposit insurance or fully collateralized with U.S. Government obligations, and must be interest bearing. Any interest earned thereon remains a part of the revolving loan fund.
§ 1777.1 General.

(a) This part outlines Rural Utilities Service (RUS) policies and procedures for making Water and Waste Disposal (WWD) loans and grants authorized under section 306C of the Consolidated Farm and Rural Development Act (7 U.S.C. 1926(c)), as amended.

(b) Agency officials will maintain liaison with officials of other Federal, State, regional, and local development agencies to coordinate related programs to achieve rural development objectives.

(c) Agency officials shall cooperate with appropriate State agencies in making loans and/or grants that support State strategies for rural area development.

(d) Funds allocated in accordance with this part will be considered for use by Indian tribes within the State regardless of whether State development strategies include Indian reservations within the State’s boundaries. Indians residing on such reservations must have an equal opportunity to participate in this program.

(e) Federal statutes provide for extending the Agency’s financial programs without regard to race, color, religion, sex, national origin, marital status, age, or physical/mental handicap (provided the participant possesses the capacity to enter into legal contracts).

§ 1777.2 [Reserved]

§ 1777.3 Objective.

The objective of the Section 306C WWD Loans and Grants program is to provide water and waste disposal facilities and services to low-income rural communities whose residents face significant health risks.

§ 1777.4 Definitions.

Applicant. Entity that receives the Agency loan or grant under this part. The entities can be public bodies such as municipalities, counties, districts, authorities, or other political subdivisions of a State, and organizations operated on a not-for-profit basis such as associations, cooperatives, private corporations, or Indian tribes on Federal and State reservations, and other Federally recognized Indian tribes.

Colonia. Any identifiable community designated in writing by the State or county in which it is located; determined to be a colonia on the basis of objective criteria including lack of potable water supply, lack of adequate sewage systems, and lack of decent, safe, and sanitary housing, inadequate roads and drainage; and existed and was generally recognized as a colonia before October 1, 1989.

Cooperative. A cooperative formed specifically for the purpose of the installation, expansion, improvement, or operation of water supply or waste disposal facilities or systems.

Individual. Recipient of a loan or grant through the applicant to facilitate use of the applicant’s water and/or waste disposal system.

Rural areas. Includes unincorporated areas and any city or town with a population not in excess of 10,000 inhabitants according to the most recent decennial census of the United States. They can be located in any of the 50 States, the Commonwealth of Puerto Rico, the Western Pacific Territories, Marshall Islands, Federated States of Micronesia, Republic of Palau, and the U.S. Virgin Islands.

Statewide Nonmetropolitan Median Household Income (SNMHI). Median household income of the State’s nonmetropolitan counties and portions of metropolitan counties outside of cities, towns or places of 50,000 or more population.
§§ 1777.5–1777.10 [Reserved]

§ 1777.11 Making, processing, and servicing loans and grants.

Unless specifically modified by this part, loans and/or grants will be made, processed, and serviced in accordance with part 1780 of this chapter.

§ 1777.12 Eligibility.

(a) The provisions of paragraphs (a) (1) and (2) of this section do not apply to a rural area recognized as a colonia. Otherwise, the facility financed under this part must provide water and/or waste disposal services to rural areas of a county where, on the date preapplication is received by the Agency, the:

(1) Per capita income of the residents is not more than 70 percent of the most recent national average per capita income, as determined by the Department of Commerce; and

(2) Unemployment rate of the residents is not less than 125 percent of the most recent national average unemployment rate, as determined by the Bureau of Labor Statistics.

(b) Residents of the rural area to be served must face significant health risks due to the fact that a significant proportion of the community’s residents do not have access to, or are not served by, adequate, affordable, water and/or waste disposal systems. The file should contain documentation to support this determination.

§ 1777.13 Project priority.

Paragraphs (a) through (d) of this section indicate items and conditions which must be considered in selecting preapplications for further development. When ranking eligible preapplications for consideration for limited funds, Agency officials must consider the priority items met by each preapplication and the degree to which those priorities are met.

(a) Preapplication. The preapplication and supporting information submitted with it will be used to determine applicant eligibility and the proposed project’s priority for available funds. Applicants determined ineligible will be advised of their appeal rights in accordance with 7 CFR part 11.

(b) State Office review. All preapplications will be reviewed and scored for funding priority at each State Office using RUS Bulletin 1777–2. Funds will be requested from the National Office, Attention: Water and Waste Processing, using RUS Bulletin 1777–3. Eligible applicants that cannot be funded should be advised that funds are not available and advised of their appeal rights as set forth in 7 CFR part 11.

(c) National Office. The National Office will allocate funds on a project-by-project basis as requests are received. If the amount of funds requested exceeds the amount of funds available, the total project score will be used to select projects for funding. The RUS Administrator may assign up to 35 additional points that will be considered in the total points for items such as geographic distribution of funds, severity of health risks, etc.

(d) Selection priorities. The priorities described below will be used to rate preapplications and in selecting projects for funding. Points will be distributed as indicated in paragraphs (d)(1) through (d)(5) of this section and will be used in selecting projects for funding. A copy of RUS Bulletin 1777–2, used to rate applications, should be placed in the case file for future reference.

(1) Population. The proposed project will serve an area with a rural population:

(i) Not in excess of 1,500—30 points.

(ii) More than 1,500 and not in excess of 3,000—20 points.

(iii) More than 3,000 and not in excess of 5,500—10 points.

(2) Income. The median household income of population to be served by the proposed project is:

(i) Not in excess of 50 percent of the statewide nonmetropolitan median household income—40 points.

(ii) More than 50 percent and not in excess of 60 percent of the statewide nonmetropolitan median household income—20 points.

(iii) More than 60 percent and not in excess of 70 percent of the statewide nonmetropolitan median household income—10 points.
(3) **Joint financing.** The amount of joint financing committed to the proposed project is:
   (i) Twenty percent or more private, local, or State funds except Federal funds channeled through a State agency—10 points.
   (ii) Five to 19 percent private, local, or State funds except Federal funds channeled through a State agency—5 points.

(4) **Colonia.** (See definition in §1777.4). The proposed project will provide water and/or waste disposal services to the residents of a colonia—50 points.

(5) **Discretionary.** In certain cases, the State Program Official may assign up to 15 points for items such as natural disaster, to improve compatibility/coordination between the Agency’s and other agencies’ selection systems, to assist those projects that are the most cost effective, high unemployment rate, severity of health risks, etc. A written justification must be prepared and attached to RUS Bulletin 1777–2 each time these points are assigned.

§§ 1777.22–1777.30 [Reserved]

§ 1777.31 **Rates.**

(a) Applicant loans will bear interest at the rate of 5 percent per annum.
   (b) Individual loans will bear interest at the rate of: 
      (1) Five percent per annum; or
      (2) The Federal Financing Bank rate for loans of a similar term at the time of Agency loan approval, whichever is less.

§§ 1777.32–1777.40 [Reserved]

§ 1777.41 **Individual loans and grants.**

(a) The amount of loan and grant funds approved by the Agency will be based on the need shown in the application and an implementation plan submitted by the applicant. The implementation plan will include such things as: purpose, how funds will be used, proposed application process, construction requirements, control and disbursement of funds, etc. The implementation plan will be attached to RUS Bulletin 1777–1.
   (b) RUS Bulletin 1777-1 is a Memorandum of Agreement which sets forth the procedures and regulations for making and servicing loans and grants made by applicants to individuals. The State Program Official is authorized to enter into a Memorandum of Agreement with any applicant providing loans and/or grants to individuals. The Memorandum of Agreement can be

§§ 1777.14–1777.20 [Reserved]

§ 1777.21 **Use of funds.**

(a) **Applicant.** Funds may be used to:
   (1) Construct, enlarge, extend, or otherwise improve community water and/or waste disposal systems. Otherwise improve would include extending service lines to and/or connecting residence’s plumbing to the system.
   (2) Make loans and grants to individuals for extending service lines to and/or connecting residences to the applicant’s system. The approval official must determine that this is a practical and economical method of connecting individuals to the community water and/or waste disposal system. Loan funds can only be used for loans, and grant funds can only be used for grants.
   (3) Make improvements to individual’s residence when needed to allow use of the water and/or waste disposal system.
   (4) Grants can be made up to 100 percent of eligible project costs.

(b) **Individuals.** Funds may be used to:
   (1) Extend service lines to residence.
   (2) Connect service lines to residence’s plumbing.
   (3) Pay reasonable charges or fees for connecting to a community water and/or waste disposal system.
   (4) Pay for necessary installation of plumbing and related fixtures within dwellings lacking such facilities. This is limited to one bathtub, sink, commode, kitchen sink, water heater, and outside spigot.
   (5) Construction and/or partitioning off a portion of dwelling for a bathroom, not to exceed 4.6 square meters (48 square feet) in size.
   (6) Pay reasonable costs for closing abandoned septic tanks and water wells when necessary to protect the health and safety of recipients of a grant in paragraphs (b)(1) or (b)(2) of this section and is required by local or State law.
§ 1777.42 Delegation of authority.

The State Program Official is responsible for the overall implementation of the authorities contained in this part and may redelegate any such authority to appropriate Agency employees.

§ 1777.43 Bulletins.

RUS Bulletin 1780–12 referenced in part 1780 of this chapter and RUS Bulletin 1777–1, 1777–2 and 1777–3 are for use in administering loans and/or grants made under this part. Bulletins, instructions and forms are available from any USDA/Rural Development office or the Rural Utilities Service, United States Department of Agriculture, Washington, DC 20250–1500.

§§ 1777.44–1777.99 [Reserved]

§ 1777.100 OMB control number.

The reporting and recordkeeping requirements contained in this part have been approved by the Office of Management and Budget and assigned OMB control number 0570–0001. Public reporting burden for this collection of information is estimated to vary from 5 to 30 hours per response with an average of 17.5 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to U.S. Department of Agriculture, Clearance Officer, OIRM, Room 404–W, Washington, DC 20250; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

SOURCE: 68 FR 46078, Aug. 5, 2003, unless otherwise noted.

§ 1778.1 General.

(a) This part outlines policies and procedures for making Emergency Community Water Assistance Grants (ECWAG) authorized under Section 306A of the Consolidated Farm and Rural Development Act (7 U.S.C. 1926(a)), as amended. Any processing or servicing activity conducted pursuant
Rural Utilities Service, USDA § 1778.4

to this part involving authorized assistance to Agency employees, members of their families, known close relatives, or business or close personal associates, is subject to the provisions of subpart D of part 1900 of this title. Applicants for this assistance are required to identify any known relationship or association with an Agency employee.

(b) Agency officials will maintain liaison with officials of other Federal, State, regional and local development agencies to coordinate related programs to achieve rural development objectives.

(c) Agency officials shall cooperate with appropriate State agencies in making grants that support State strategies for rural area development.

(d) Funds allocated for use in accordance with this part are also to be considered for use by Indian tribes within the State regardless of whether State development strategies include Indian reservations within the State’s boundaries. Indians residing on such reservations must have an equal opportunity along with other rural residents to participate in the benefits of this program. This includes equal application of outreach activities of Field Offices.

(e) Federal statutes provide for extending the Agency financial programs without regard to race, color, religion, sex, national origin, marital status, age, or physical/mental handicap (provided the participant possesses the capacity to enter into legal contracts).

§ 1778.2 [Reserved]

§ 1778.3 Objective.

The objective of the ECWAG Program is to assist the residents of rural areas that have experienced a significant decline in quantity or quality of water, or in which such a decline is considered imminent, to obtain or maintain adequate quantities of water that meets the standards set by the Safe Drinking Water Act (42 U.S.C. 300f et seq.) (SDWA).

§ 1778.4 Definitions.

Acute shortage. An acute shortage is a situation in which the system either cannot deliver water at all through its distribution system or can only deliver water on a sporadic basis.

Emergency. Occurrence of an incident such as, but not limited to, a drought; earthquake; flood; tornado; hurricane; disease outbreak; or chemical spill, leakage, or seepage.

Rural areas. Includes any area not in a city or town with a population in excess of 10,000 inhabitants, according to the latest decennial census of the United States, located in any of the fifty States, the Commonwealth of Puerto Rico, the Western Pacific Territories, Marshall Islands, Federated States of Micronesia, Republic of Palau, and the U.S. Virgin Islands.

Significant decline in quality. A significant decline in quality of potable water occurs when the present community source or delivery system does not meet, as a result of an emergency, the current SDWA requirements. For a private source or delivery system a significant decline in quality occurs when the water is no longer potable as a result of an emergency. As used in this Subpart, the term significant decline in quality may also include a situation where a significant decline is likely to occur within one year from the date of the filing of an application.

Significant decline in quantity. A significant decline in the quantity is caused by a disruption of the potable water supply by an emergency. The disruption in quantity of water prevents the present source or delivery system from supplying potable water needs to rural residents. This would not include a decline in excess water capacity. As used in this Subpart, the term significant decline in quantity may also include a situation where a significant decline is likely to occur within one year from the date of the filing of an application.

Statewide Nonmetropolitan Median Household Income (SNMHI). Median household income of the State’s nonmetropolitan counties and portions of metropolitan counties outside of cities, towns or places of 50,000 or more population.

§ 1778.5 [Reserved]

§ 1778.6 Eligibility.

(a) Grants may be made to public bodies and private nonprofit corporations serving rural areas. Public bodies include counties, cities, townships, incorporated towns and villages, boroughs, authorities, districts, and other political subdivisions of a State. Public bodies also include Indian tribes on Federal and State reservations and other Federally recognized Indian Tribal groups in rural areas.

(b) In the case of grants made to alleviate a significant decline in quantity or quality of water available from the water supplies of rural residents, the applicant must demonstrate that the decline occurred within two years of the date the application was filed with the Agency. This would not apply to grants made for repairs, partial replacement, or significant maintenance on an established water system. In situations involving imminent decline, evidence must be presented to demonstrate that the decline is likely to occur within one year of the date the application is filed with the Agency.

§ 1778.7 Project priority.

Paragraph (d) of this section indicates items and conditions which must be considered in selecting applications for further development. When ranking eligible applications for consideration for limited funds, Agency officials must consider the priority items met by each application and the degree to which those priorities are met.

(a) Applications. The application and supporting information submitted with it will be used to determine the proposed project’s priority for available funds.

(b) State Office review. All applications will be reviewed and scored for funding priority using RUS Bulletin 1778–1. Eligible applicants that cannot be funded should be advised that funds are not available.

(c) National Office review. Each year all funding requests will be reviewed by the National Office beginning 30 days after funds from the annual appropriation are made available to the Agency. Reviews will continue throughout the fiscal year as long as funds are available. Projects selected for funding will be considered based on the priority criteria and available funds. Projects must compete on a national basis for available funds, and the National Office will allocate funds to State offices on a project by project basis.

(d) Selection priorities. The priorities described below will be used by the State Program Official to rate applications and by the Assistant Administrator of Water and Environmental Programs to select projects for funding. Points will be distributed as indicated in paragraphs (d)(1) through (d)(5) of this section and will be considered in selecting projects for funding. A copy of RUS Bulletins 1778–1 and 1778–2 used to rate applications, should be placed in the case file for future reference.

(1) Population. The proposed project will serve an area with a rural population:

(i) Not in excess of 1,500—30 points.

(ii) More than 1,500 and not in excess of 3,000—20 points.

(iii) More than 3,000 and not in excess of 5,000—15 points.

(iv) Over 5,000—0 points.

(2) Income. The median household income of population to be served by the proposed project is:

(i) Not in excess of 70% of the statewide nonmetropolitan median household income—30 points.

(ii) More than 70% and not in excess of 80% of the statewide nonmetropolitan median household income—20 points.

(iii) More than 80% and not in excess of 90% of the statewide nonmetropolitan median household income—10 points.

(iv) Over 90% of the statewide nonmetropolitan median household income—0 points.

(3) Significant decline. Points will be assigned for only one of the following paragraphs when the primary purpose of the proposed project is to correct a significant decline that has occurred in the:

(i) Quantity of water available from private individually owned wells or other individual sources of water—30 points; or
(ii) Quantity of water available from an established system’s source of water—20 points; or
(iii) Quality of water available from private individually owned wells or other individual sources of water—30 points; or
(iv) Quality of water available from an established system’s source of water—20 points.

(4) Imminent decline. The proposed project will attempt to avert an imminent decline expected to occur during the one-year period following the filing of an application—10 points.

(NOTE: If points were assigned above for a significant decline, no points will be awarded for imminent decline.)

(5) Acute shortage. Grants made in accordance with §1778.11(b) of this part to assist an established water system remedy an acute shortage of quality water or correct a significant decline in the quantity or quality of water that is available—10 points.

(6) Discretionary. In certain cases the Administrator may assign up to 30 points for items such as geographic distribution of funds, rural residents hauling water, severe contamination levels, etc.

§ 1778.8 [Reserved]

§ 1778.9 Uses.

Grant funds may be used for the following purposes:
(a) Waterline extensions from existing systems.
(b) Construction of new waterlines.
(c) Repairs to an existing system.
(d) Significant maintenance to an existing system.
(e) Construction of new wells, reservoirs, transmission lines, treatment plants, and other sources of water.
(f) Equipment replacement.
(g) Connection and/or tap fees.
(h) Pay costs that were incurred within six months of the date an application was filed with the Agency to correct an emergency situation that would have been eligible for funding under this part.
(i) Any other appropriate purpose such as legal fees, engineering fees, recording costs, environmental impact analyses, archaeological surveys, possible salvage or other mitigation measures, planning, establishing or acquiring rights associated with developing sources of, treating, storing, or distributing water.

(j) Assist rural water systems to comply with the requirements of the Federal Water Pollution Control Act (33 U.S.C. 1251 et seq.) (FWPCA) or the SDWA when such failure to comply is directly related to a recent decline in quality of potable water. This would not apply to changes in the requirements of FWPCA or SDWA.

(k) Provide potable water to communities through means other than those covered above for not to exceed 120 days when a more permanent solution is not feasible in a shorter time frame.

§ 1778.10 Restrictions.

(a) Grant funds may not be used to:
(1) Assist any city or town with a population in excess of 10,000 inhabitants according to the most recent decennial census of the United States. Facilities financed by RUS may be located in non-rural areas. However, loan and grant funds may be used to finance only that portion of the facility serving rural areas, regardless of facility location.
(2) Assist a rural area that has a median household income in excess of the statewide nonmetropolitan median household income according to the most recent decennial census of the United States.
(3) Finance facilities which are not modest in size, design, cost, and are not directly related to correcting the potable water quantity or quality problem.
(4) Pay loan or grant finder’s fees.
(5) Pay any annual recurring costs that are considered to be operational expenses.
(6) Pay rental for the use of equipment or machinery owned by the rural community.
(7) Purchase existing systems.
(8) Refinance existing indebtedness, except for short-term debt incurred in accordance with §1778.9(h).
(9) Make reimbursement for projects developed with other grant funds.
(10) Finance facilities that are not for public use.

(b) Nothing in paragraph (a)(1) of this section shall preclude rural areas from
submitting joint proposals for assistance under this part. Each entity applying for financial assistance under this part to fund their share of a joint project will be considered individually.

§ 1778.11 Maximum grants.
(a) Grants not to exceed $500,000 may be made to alleviate a significant decline in quantity or quality of water available to a rural area that occurred within two years of filing an application with the Agency, or to attempt to avoid a significant decline that is expected to occur during the twelve month period following the filing of an application.
(b) Grants made for repairs, partial replacement, or significant maintenance on an established system to remedy an acute shortage or significant decline in the quality or quantity of potable water, or an anticipated acute shortage or significant decline, cannot exceed $150,000.
(c) Grants under this part, subject to paragraphs (a) and (b) of this section, shall be made for 100 percent of eligible project costs.

§ 1778.12 Set-aside.
(a) At least 70 percent of all grants made under this grant program shall be for projects funded in accordance with §1778.11(a).
(b) At least 50 percent of the funds appropriated for this grant program shall be allocated to rural areas with populations not in excess of 3,000 inhabitants according to the most recent decennial census of the United States.

§ 1778.13 Other considerations.
(a) Civil rights compliance requirements. All grants made under this part are subject to Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d et seq.) as outlined in subpart E of part 1901 of this title.
(b) Environmental requirements. All projects must have appropriate environmental reviews in accordance with RUS requirements.
(c) Uniform Relocation and Real Property Acquisition Policies Act (42 U.S.C. 4601 et seq.). All projects must comply with the requirements set forth in 7 CFR Part 21.
(d) Flood and mudslide hazard area precautions. If the project is located in a flood or mudslide area, then flood or mudslide insurance must be provided as required in subpart A of part 1806 of this title (RD Instruction 426.2).
(e) Governmentwide debarment and suspension (nonprocurement) and requirements for drug-free work place. All projects must comply with the requirements set forth in the U.S. Department of Agriculture regulations 7 CFR part 3017 and RD Instruction 1940-M.
(f) Intergovernmental review. All projects funded under this part are subject to Executive Order 12372 (3 CFR, 1983 Comp., p. 197), which requires intergovernmental consultation with State and local officials. These requirements are set forth in U.S. Department of Agriculture regulations 7 CFR part 3015, Subpart V, and RD Instruction 1940–J.

§§ 1778.15–1778.20 [Reserved]

§ 1778.21 Application processing.
(a) The material submitted with the application should include the Preliminary Engineering Report, population and median household income of the area to be served, description of project, and nature of emergency that caused the problem(s) being addressed by the project. The documentation must clearly show that the applicant has had a significant decline in the quantity or quality of potable water or an acute shortage of potable water, or that such a decline or shortage is imminent, and that the proposed project will eliminate or alleviate the problem. For projects to be funded in accordance with §1778.11 (a), evidence must be furnished that a significant decline in the quantity or quality occurred within two years before filing the application with the Agency, or is expected to occur within one year after filing the application.
(b) When favorable action will not be taken on an application, the applicant will be notified in writing by the State Program Official of the reasons why the request was not favorably considered. Notification to the applicant will state that a review of this decision by
the Agency may be requested by the applicant in accordance with 7 CFR part 11.

§ 1778.22 Planning development and procurement.

Planning development and procurement for grants made under this part will be in accordance with subpart C of Part 1780 of this chapter. A certification should be obtained from the State agency or the Environmental Protection Agency if the State does not have primacy, stating that the proposed improvements will be in compliance with requirements of the SDWA.

§ 1778.23 Grant closing and disbursement of funds.

(a) Grants will be closed in accordance with §1780.45 of part 1780 of this chapter.

(b) RUS Bulletin 1780–12, “Water or Waste Grant Agreement,” will be executed by all applicants.

(c) The Agency’s policy is not to disburse grant funds from the Treasury until they are actually needed by the applicant. Grant funds will be disbursed by using multiple advances.

§§ 1778.24–1778.30 [Reserved]

§ 1778.31 Performing development.

(a) Applicable provisions of subpart C of part 1780 of this chapter will be followed in performing development for grants made under this part.

(b) After filing an application in accordance with §1778.21 and when immediate action is necessary, the State Program Official may concur in an applicant's request to proceed with construction before funds are obligated provided the RUS environmental requirements are complied with. The applicant must be advised in writing that:

(1) Any authorization to proceed or any concurrence in bid awards, contract concurrence, or other project development activity, is not a commitment by the Agency to provide grant funds under this part.

(2) The Agency is not liable for any debt incurred by the applicant in the event that funds are not provided under this part.

§§ 1778.32–1778.33 [Reserved]

§ 1778.34 Grant servicing.

(a) Grants will be serviced in accordance with §1951.215 of subpart E of part 1951 of this title and subpart O of part 1951 of this title.

(b) The grantee will provide an audit report in accordance with §1780.47 of part 1780 of this chapter.

§ 1778.35 Subsequent grants.

Subsequent grants will be processed in accordance with the requirements set forth in this part. The initial and subsequent grants made to complete a previously approved project must comply with the maximum grant requirements set forth in §1778.11.

§ 1778.36 [Reserved]

§ 1778.37 Forms, Instructions and Bulletins.

Bulletins, instructions and forms referenced are for use in administering grants made under this part and are available from any USDA/Rural Development office or the Rural Utilities Service, United States Department of Agriculture, Washington, DC 20250–1500.

§§ 1778.38–1778.99 [Reserved]

§ 1778.100 OMB control number.

The information collection requirements contained in this part have been approved by the Office of Management and Budget and assigned OMB control number 0572–0110.

PART 1779—WATER AND WASTE DISPOSAL PROGRAMS GUARANTEED LOANS

1779.17 Exception authority.
1779.18–1779.19 [Reserved]
1779.20 Eligibility.
1779.21–1779.23 [Reserved]
§ 1779.1 General.

(a) This part contains the regulations for Water and Waste Disposal (WW) loans guaranteed by the Agency and applies to lenders, holders, borrowers, and other parties involved in making, guaranteeing, holding, servicing, or liquidating such loans.

(b) The purpose of the WW guaranteed loan program is to provide a loan guarantee for the construction or improvement of water and waste projects serving the financially needy communities in rural areas. This purpose is achieved through bolstering the existing private credit structure through the guarantee of quality loans which will provide lasting benefits.

§ 1779.2 Definitions.

The following general definitions are applicable to the terms used in this part:

Agency. The Rural Utilities Service which is within the Rural Development mission area of the United States Department of Agriculture or its successor agencies with authority delegated by the Secretary of Agriculture to administer the Water and Waste Disposal Programs.

Application. An Agency prescribed form to request an Agency guarantee (available in any Agency office).

Arm’s length transaction. The sale, lease, or disposition of assets in which the title to the property passes to a ready, willing, and able third party who is not affiliated with, or related to, and has no security, monetary, or stockholder interest in the borrower or transferor at the time of the transaction.

Assignment Guarantee Agreement. The signed agreement among the Agency, the lender, and the holder setting forth the terms and conditions of an assignment of the guaranteed portion of a loan or any part thereof (available in any Agency office).

Borrower. The entity that borrows money from the lender.

Collateral. Property pledged to secure the guaranteed loan.

Conditional Commitment for Guarantee. The Agency’s written statement to the
lender that the material submitted is approved subject to the completion of all conditions and requirements contained in the commitment (available in any Agency office).

Guaranteed loan. A loan made and serviced by a lender for which the Agency and lender have entered into a Lender’s Agreement and for which the Agency has issued a Loan Note Guarantee.

Holder. The person or entity (other than the lender) who holds all or a part of the guaranteed portion of the loan with no servicing responsibilities. When the lender assigns part or all of the guaranteed portion of the loan to an assignee, the assignee becomes a holder when the Assignment Guarantee Agreement is signed by all parties.

Immediate family. Individuals who are closely related by blood or by marriage, or within the same household, such as a spouse, parent, child, brother, sister, aunt, uncle, grandparent, grandchild, niece, or nephew.

In-house expenses. In-house expenses include, but are not limited to, employees’ salaries, retainers being paid to lawyers, travel, and overhead.

Insurance. Fire, windstorm, lightning, hail, explosion, riot, civil commotion, aircraft, vehicles, smoke, builder’s risk, liability, property damage, flood or mudslide, worker’s compensation, fidelity bond, malpractice, or any similar insurance that is available and needed to protect the security or that is required by law.

Joint financing. Two or more lenders (or any combination of lenders and other financial sources) making separate relatively contemporaneous loans or grants to supply the funds required by one borrower. For example, such joint financing may consist of the Agency’s financial assistance with the Economic Development Administration, Department of Housing and Urban Development (HUD), or other Federal and State agencies, and private and quasi-public financial institutions.

Lender. The person or organization making and responsible for servicing the loan. The lender is also referred to in this part as the applicant who is requesting a guarantee during the preapplication and application stage of processing.

Lender’s Agreement. The signed agreement between the Agency and the lender containing the lender’s responsibilities when the Loan Note Guarantee is issued (available in any Agency office).

Loan Note Guarantee. The signed commitment issued by the Agency containing the terms and conditions of the guarantee of an identified loan (available in any Agency office).

Market value. The amount for which property would sell for its highest and best use at a voluntary sale in an arm’s length transaction.

Note. An evidence of debt. In those instances where the Agency guarantees a bond issue, “note” shall also be construed to include a bond or other evidence of indebtedness, as appropriate.

Participation. Sale of an interest in a loan in which the lender retains the note, collateral securing the note, and all responsibility for loan servicing and liquidation.

Principals of borrowers. The owners, officers, directors, entities, and supervisors directly involved in the operation and management of the borrower.

Protective advances. Advances made by the lender for the purpose of preserving and protecting the collateral where the debtor has failed to, and will not or cannot, meet obligations to protect or preserve collateral.

Rural and rural area. Any area not in a city or town with a population in excess of 10,000 inhabitants, according to the latest decennial census of the United States.

Service area. The area reasonably expected to be served by the project being financed by the guaranteed loan.

State. Any of the 50 States, the Commonwealth of Puerto Rico, the Virgin Islands of the United States, Guam, American Samoa, Commonwealth of the Northern Mariana Islands, Republic of the Marshall Islands, Republic of Palau, and the Federated States of Micronesia.

State Bond Banks and State Bond Pools. An entity authorized by the State to issue State debt instruments and utilize the funds received to finance the construction or improvement of
drinking water or waste disposal facilities.

State Director. The Rural Development State Director or the staff member who has been delegated authority to perform action on behalf of the State Director.

Substantive change. Any change in the purpose of the loan or any change in the financial condition of the borrower or the collateral which would jeopardize the performance of the loan.

Transfer and assumption. The conveyance by a debtor to an assuming party of the assets, collateral, and liabilities of the loan in return for the assuming party’s binding promise to pay the outstanding debt.

Waste disposal. Sanitary sewer (treatment and collection), solid waste, and storm drainage facilities.

WW. An acronym for Water and Waste Disposal.

§ 1779.3 Full faith and credit.

The Loan Note Guarantee constitutes an obligation supported by the full faith and credit of the United States and is not contestable except for fraud or misrepresentation (including negligent misrepresentation) of which the lender or holder has actual knowledge, participates in, or condones. A note which provides for the payment of interest on interest shall not be guaranteed and any Loan Note Guarantee or Assignment Guarantee Agreement attached to, or relating to, a note which provides for the payment of interest on interest shall be void. The Loan Note Guarantee will not be enforceable by the lender to the extent any loss is occasioned by violation of usury laws, negligent servicing, or failure to obtain the required security regardless of the time at which the Agency acquires knowledge of the foregoing. Any losses occasioned will not be enforceable by the lender to the extent that loan funds are used for purposes other than those specifically approved by the Agency in its Conditional Commitment for Guarantee. Negligent servicing is defined as the failure to perform those services which a reasonably prudent lender would perform in servicing its own portfolio of loans that are not guaranteed. The term includes not only the concept of a failure to act, but also not acting in a timely manner, acting in a manner contrary to the manner in which a reasonably prudent lender would act up to the time of loan maturity, or until a final loss is paid. The Loan Note Guarantee or Assignment Guarantee Agreement in the hands of a holder shall not cover interest accruing 90 days after the holder has demanded repurchase by the lender, nor shall the Loan Note Guarantee or Assignment Guarantee Agreement in the hands of a holder cover interest accruing 90 days after the lender or Agency has requested the holder to surrender the evidence of debt for repurchase.

§ 1779.4 Conditions of guarantee.

A loan guarantee under this part will be evidenced by a Loan Note Guarantee issued by the Agency. Each lender will also execute a Lender’s Agreement.

(a) The entire loan will be secured by the same security with equal lien priority for the guaranteed and non-guaranteed portions of the loan. The non-guaranteed portion of the loan will not be paid first nor given any preference or priority over the guaranteed portion.

(b) The lender will be responsible for servicing the entire loan and will remain mortgagee or secured party of record notwithstanding the fact that another party may hold a portion of the loan.

(c) When a guaranteed portion of a loan is sold to a holder, the holder shall have all rights of the lender under the Loan Note Guarantee to the extent of the portion purchased. The lender will remain bound by all the obligations under the Loan Note Guarantee, Lender’s Agreement, and Agency program regulations. If the Agency makes a payment to a holder, then the lender must reimburse the Agency.

(d) A lender will receive all payments of principal and interest on the account of the entire loan and will promptly remit to each holder a pro rata share, less any lender servicing fee.

(e) The lender may retain all of the unguaranteed portion of the loan or may sell part of the unguaranteed portion of the loan through participation. However, the lender is required to retain 5 percent of the loan amount from...
§ 1779.17 Exception authority.

The Administrator may, in individual cases, make an exception to any requirement or provision of this part which is not inconsistent with the authorizing statute or other applicable law and is determined to be in the Government’s interest.
§§ 1779.18–1779.23 [Reserved]

§ 1779.20 Eligibility.

(a) Availability of credit from other sources. The Agency must determine that the borrower is unable to obtain the required credit without the loan guarantee from private, commercial, or cooperative sources at reasonable rates and terms for loans for similar purposes and periods of time. The Agency must also determine if an outstanding judgment obtained by the United States in a Federal Court (other than the U.S. Tax Court) has been entered against the borrower or if the borrower has an outstanding delinquent debt with any Federal agency. Such judgment or delinquency shall cause the potential borrower to be ineligible to receive a loan guarantee until the judgment is paid in full or otherwise satisfied or the delinquency is cured.

(b) Legal authority and responsibility. (1) Each borrower must have, or will obtain, the legal authority necessary to construct, operate, and maintain the proposed facility and services. They must also have legal authority for obtaining, giving security for, and repaying the proposed loan. (2) The borrower shall be responsible for operating, maintaining, and managing the facility and services, and providing for the continued availability and use of the facility and services at reasonable rates and terms.

(c) Applicant. Eligible entities are: (1) A public body such as a municipality, county, district, authority, or other political subdivision of a State located in a rural area. (2) An organization operated on a not-for-profit basis, such as an association, cooperative, or private corporation. The organization must be an association controlled by a local public body or bodies, or have a broadly based ownership by or membership of people of the local community; or (3) Indian tribes on Federal and State reservations and other federally recognized Indian tribes.

(d) Facility location. Facilities must be located in rural areas, except: For utility services such as drinking water, sanitary sewer, solid waste disposal or storm drainage facilities serving both rural and non-rural areas. In such cases, Agency funds may be used to finance only that portion serving rural areas, regardless of facility location.

(e) Facilities for public use. All facilities financed under the provisions of this part shall be for public purposes. (1) Facilities will be installed to serve any user within the service area who desires service and can be feasibly and legally served. (2) In no case will boundaries for the proposed service area be chosen in such a way that any user or area will be excluded because of race, color, religion, sex, marital status, age, disability, or national origin. (3) The lender will determine that, when feasible and legally possible, inequities within the proposed project’s service area for the same type service proposed will be remedied by the owner on, or before, completion of the project. Inequities are defined as unjustified variations in availability, adequacy, or quality of service. User rate schedules for portions of existing systems or facilities that were developed under different financing, rates, terms, or conditions do not necessarily constitute inequities.

§§ 1779.21–1779.23 [Reserved]

§ 1779.24 Eligible loan purposes.

(a) To construct, enlarge, extend, or otherwise improve rural drinking water, sanitary sewage, solid waste disposal, and storm wastewater disposal facilities. (b) To construct or relocate public buildings, roads, bridges, fences, or utilities, and to make other public improvements necessary for the successful operation or protection of facilities authorized in paragraph (a) of this section. (c) To relocate private buildings, roads, bridges, fences, or utilities, and other private improvements necessary for the successful operation or protection of facilities authorized in paragraph (a) of this section. (d) For payment of other utility connection charges as provided in service contracts between utility systems. (e) When a necessary part of the project relates to those facilities authorized in paragraphs (a), (b), (c) or (d)
of this section the following may be considered:

(1) Reasonable fees and costs such as: legal, engineering, administrative services, fiscal advisory, recording, environmental analyses and surveys, possible salvage or other mitigation measures, planning, establishing or acquiring rights;

(2) Costs of acquiring interest in land: rights, such as water rights; leases; permits; rights-of-way; and other evidence of land or water control or protection necessary for development of the facility;

(3) Purchasing or renting equipment necessary to install, operate, maintain, extend, or protect facilities;

(4) Cost of additional applicant labor and other expenses necessary to install and extend service;

(5) In unusual cases such as a low-income area, the cost for connecting the user to the main service line;

(6) Interest incurred during construction in conjunction with multiple advances or interest on interim financing;

(7) Initial operating expenses, including interest, for a period ordinarily not exceeding one year when the applicant is unable to pay such expenses;

(8) The purchase of existing facilities when it is necessary either to improve service or prevent the loss of service; and

(9) Refinancing non-Agency debts incurred by, or on behalf of, an applicant when all of the following conditions exist:

(i) The debts being refinanced are a secondary part of the total loan unless the debt being refinanced is an Agency direct loan;

(ii) The debts were incurred for the facility or service being financed or any part thereof; and

(iii) Arrangements cannot be made with the creditors to extend or modify the terms of the debts so that a sound basis will exist for making a loan.

(10) Refinancing Agency debts.

§ 1779.25 Eligible loan purposes.

Loan funds may not be used to finance:

(a) Facilities which are not modest in size, design, and cost;

(b) Loan or grant finder’s fees;

(c) The construction of any new combined storm and sanitary sewer facilities;

(d) Any portion of the cost of a facility which does not serve a rural area;

(e) That portion of project costs normally provided by a business or industrial user, such as wastewater pretreatment;

(f) Rental for the use of equipment or machinery owned by the applicant;

(g) For other purposes not directly related to operating and maintenance of the facility being installed or improved; or

(h) The payment of a judgment which would disqualify an applicant for a loan under §1779.20(a).

§ 1779.26 [Reserved]

§ 1779.27 Lenders.

(a) Eligible lenders. Eligible lenders may participate in the loan guarantee program. These lenders must be subject to credit examination and supervision by an appropriate agency of the United States or a State that supervises and regulates credit institutions. A lender must have the capability to adequately service loans for which a guarantee is requested. Eligible lenders are:

(1) Any Federal or State chartered bank or savings and loan association;

(2) Any mortgage company that is a part of a bank holding company;

(3) Co-Bank, National Rural Utilities Cooperative Finance Corporation, Farm Credit Bank of the Federal Land Bank, or other Farm Credit System institution with direct lending authority authorized to make loans of the type guaranteed by this part;

(4) An insurance company regulated by a State or National insurance regulatory agency;

(5) State Bond Banks or State Bond Pools; and

(6) Other lenders that possess the legal powers necessary and incidental to making and servicing guaranteed loans involving community development-type projects. Lenders under this category must be approved by the National Office prior to the issuance of the loan guarantee.

(b) Conflict of interest. When the lender’s officers, stockholders, directors, or partners (including their immediate
§ 1779.28 Transfer of lenders or borrowers (prior to issuance of Loan Note Guarantee).

(a) Prior to issuance of the loan guarantee, the Agency may approve the transfer of an outstanding Conditional Commitment for Guarantee from the present lender to a new eligible lender: Provided, That:

(1) The former lender states in writing why it does not wish to continue to be the lender for this project;

(2) No substantive changes in ownership or control of the borrower have occurred;

(3) No substantive changes in the borrower’s written plan, scope of work, or changes in the purpose or intent of the project have occurred; and

(4) No substantive changes in the loan agreement or Conditional Commitment for Guarantee are required.

(b) The substitute lender must execute a new application for loan and guarantee (available in any Agency office).

(c) If approved, the Agency will issue a letter of amendment to the original Conditional Commitment for Guarantee reflecting the new lender who will acknowledge acceptance of the offer in writing.

(d) Once the Conditional Commitment for Guarantee is issued, the Agency will not approve any substitution of borrowers, including changes in the form of the legal entity, except a change in the legal entity may be requested when the original borrower is replaced with substantially the same individuals or officers with the same interest as originally approved.

§ 1779.29 Fees and charges by lender.

(a) Routine charges and fees. The lender may establish charges and fees for the loan if they do not exceed those charged other borrowers for similar types of transactions. “Similar types of transactions” mean those transactions involving the same type of loan for which a non-guaranteed loan borrower would be assessed charges and fees.

(b) Late payment fees. Late payment charges will not be covered by the Loan Note Guarantee. Such charges may not be added to the principal and interest due under any guaranteed note. Late payment charges may be made only if:

(1) They are routinely made by the lender in all types of loan transactions;

(2) Payment has not been received within the customary timeframe allowed by the lender; or

(3) The lender agrees with the borrower, in writing, that the rate or method of calculating the late payment charges will not be changed to increase charges while the Loan Note Guarantee is in effect.

(c) Guarantee fees. The guaranteed loan fee will be the applicable guarantee fee rate multiplied by the principal loan amount multiplied by the percent of guarantee. The one-time guarantee fee is paid when the Loan Note Guarantee is issued.

(1) The fee will be paid to the Agency by the lender and is nonreturnable. The lender may pass the fee to the borrower.

(2) The guarantee fee rates are available in any Agency office.

§ 1779.30 Loan guarantee limitations.

(a) The guarantee will be 90 percent of eligible loss.

(b) The lender will retain a minimum of 5 percent of the total loan amount. The retained amount must be from the unguaranteed portion of the loan and cannot be participated to another lender.

§§ 1779.31–1779.32 [Reserved]

§ 1779.33 Interest rates.

(a) General. Rates will be negotiated between the lender and the borrower. They may be either fixed or variable rates. Interest rates will be those rates customarily charged borrowers in similar circumstances in the ordinary
§ 1779.37 Insurance and fidelity bonds.

The lender must provide evidence that the borrower has adequate insurance and fidelity bond coverage by loan closing or start of construction, whichever occurs first. Adequate coverage must be maintained for the life of the

§ 1779.37

Insurance and fidelity bonds.

The lender must provide evidence that the borrower has adequate insurance and fidelity bond coverage by loan closing or start of construction, whichever occurs first. Adequate coverage must be maintained for the life of the
§§ 1779.38–1779.41

loan and is subject to Agency review and approval.

§§ 1779.38–1779.41 [Reserved]

§ 1779.42 Design and construction requirements.

The lender will provide the Agency with a written certification at the end of construction that all funds were utilized for authorized purposes. The borrower and the lender will authorize designs and plans based upon the preliminary architectural and engineering reports or plans approved by the lender and concurred in by the Agency. The borrower will take into consideration any lender or Agency comments when the facility is being designed.

(a) Architectural and engineering practices. All project facilities must be designed utilizing accepted architectural and engineering practices and must conform to applicable Federal, State, and local codes and requirements. The lender must ensure that the planned project will be completed within the available funds and, once completed, will be suitable for the borrower’s needs.

(b) Construction monitoring. The lender will monitor the progress of construction and undertake the reviews and inspections necessary to ensure that construction proceeds in accordance with the approved plans, specifications, and contract documents and that funds are used for eligible project costs. The lender must expeditiously report any problems in project development to the Agency.

(c) Equal employment opportunities. For all construction contracts in excess of $10,000, the contractor must comply with Executive Order 11246 (30 FR 12319, 3 CFR, 1964–1965 Comp., p. 339) entitled “Equal Employment Opportunity” as amended and as supplemented by applicable Department of Labor regulations (41 CFR part 60-1). The borrower and lender are responsible for ensuring that the contractor complies with these requirements.

(d) Americans with Disabilities Act. WW loans which involve the construction of, or addition to, facilities that accommodate the public and commercial facilities as defined by the Americans with Disabilities Act (42 U.S.C. 12181–et seq.) must comply with that Act. The lender and borrower are responsible for compliance.

(e) Administrative. When the Agency reviews the preliminary architectural and engineering reports or plans, they must also consider all applicable Federal laws such as the seismic requirements of Executive Order 12699 (55 FR 835, 3 CFR, 1990 Comp., p. 269), the debarment requirements of 7 CFR part 3017, and the Copeland Anti-Kickback Act (18 U.S.C. 874).

§ 1779.43 Other Federal, State, and local requirements.

In addition to the specific requirements of this part and beginning on the date of issuance of the Loan Note Guarantee, proposals for facilities financed in whole or in part with a loan guaranteed by the Agency will be coordinated with all appropriate Federal, State, and local agencies. Borrowers and lenders will be required to comply with any Federal, State, or local laws or regulatory commission rules which are in existence and which affect the project including, but not limited to:

(a) Applicant’s authority to design, construct, develop, operate, and maintain the proposed facilities;

(b) Borrowing money, giving security, and raising revenues for repayment;

(c) Land use zoning;

(d) Health, safety, and sanitation standards as well as design and installation standards; and

(e) Protection of the environment and consumer affairs.

§§ 1779.44–1779.46 [Reserved]

§ 1779.47 Economic feasibility requirements.

All projects financed under the provisions of this section must be based on taxes, assessments, revenues, fees, or other sources of revenues in an amount sufficient to provide for facility operation and maintenance, a reasonable reserve, and debt payment. The lender is responsible for determining the credit quality and economic feasibility of the proposed loan and must address all elements of the credit quality in a written financial feasibility analysis which includes adequacy of equity,
Rural Utilities Service, USDA

§ 1779.52 Processing.

(a) Preapplications. (1) The preapplication package may be submitted either alone or the necessary information may be submitted simultaneously with the application. The preapplication package will contain:

(i) An Application for Federal Assistance on a form provided by the Agency (available in any Agency office);

(ii) State intergovernmental or other type review comments and recommendations for the borrower’s project (clearinghouse comments, if applicable);

(iii) Support documentation necessary to make an eligibility determination such as financial statements, audits, copies of organizational documents, or existing debt instruments; and

(iv) Documentation of lender eligibility in accordance with §1779.27.

(2) If the Agency determines that the project may meet requirements and is likely to be funded, the lender must submit a complete application if it has not previously submitted one.

(b) Applications. Contents of application package:

(1) Application for Loan and Guarantee on a form prescribed by the Agency (available in any Agency office);

(2) Proposed loan agreement;

(3) Environmental Report. (See RUS Bulletin 1794A–602; this document is available in any Agency State Office or online at http://www.usda.gov/rus/water/ees/index.htm);

(4) Preliminary architectural or engineering report (PER);

(5) Cost estimates;

(6) Appraisal reports (as appropriate);

(7) Credit reports (as appropriate);

(c) Separate collateral. All collateral must secure the entire loan. The lender will not take separate security to secure only the unguaranteed portion of the loan. The lender will not require compensating balances or certificates of deposit as a means of eliminating the lender’s exposure on the unguaranteed portion of the loan.

§§ 1779.49–1779.51 [Reserved]

§ 1779.48 Collateral.

(a) Lender responsibility. The lender is responsible for obtaining and maintaining proper and adequate collateral to protect the interest of the lender, the holder, and the Government.

(b) Type of collateral. Collateral must be of such a nature that repayment of the loan is reasonably ensured when considered with the integrity and ability of project management, soundness of the project, and the borrower’s prospective earnings. The collateral may include, but is not limited to, the following: General obligation bonds, revenue bonds, pledge of taxes or assessments, assignment of facility revenue, land, easements, rights-of-way, water rights, buildings, machinery, equipment, accounts receivable, contracts, cash, or other accounts or assignments of leases or leasehold interest.

(c) Separate collateral. All collateral must secure the entire loan. The lender will not take separate security to secure only the unguaranteed portion of the loan. The lender will not require compensating balances or certificates of deposit as a means of eliminating the lender’s exposure on the unguaranteed portion of the loan.
§ 1779.53 Evaluation of application.

If the Agency determines that the borrower is eligible, the proposed loan is for an eligible purpose, there is reasonable assurance of repayment ability, sufficient collateral and equity exists, the proposed loan complies with all applicable statutes and regulations, the environmental impact analyses is complete, and adequate funds are available, the Agency will provide the lender and the borrower with the Conditional Commitment for Guarantee, listing all conditions for the guarantee. Applicable requirements will include the following:

(a) Approved use of guaranteed loan funds (source and use of funds);
(b) Rates and terms of the loan;
(c) Scheduling of payments;
(d) Number of customers;
(e) Security and lien priority;
(f) Appraisals;
(g) Insurance and bonding;
(h) Financial reporting;
(i) Equal opportunity and nondiscrimination;
(j) Mitigation measures for environmental issues (if necessary);
(k) Americans with Disabilities Act;
(l) By-laws and articles of incorporation changes; and
(m) Other requirements necessary to protect the Government.

§§ 1779.54–1779.58 [Reserved]

§ 1779.59 Review of requirements.

(a) Lender and borrower. The lender and borrower must complete and sign the Acceptance of Conditions and return a copy to the Agency as soon as possible. Notwithstanding the preceding sentence, if certain conditions cannot be met, the lender and borrower may propose alternate conditions for Agency consideration.

(b) Cancellation. If the lender decides at any time after receiving a Conditional Commitment for Guarantee that it no longer wants a guarantee, the lender must immediately advise the Agency of the cancellation.

(c) Modifications. The lender agrees that once the Conditional Commitment for Guarantee is issued and accepted by the lender and borrower, it will not be modified as to the scope of the project, overall facility concept, project purpose, use of proceeds, or other terms and conditions.

§§ 1779.60–1779.62 [Reserved]

§ 1779.63 Conditions precedent to issuance of the Loan Note Guarantee.

The Loan Note Guarantee will not be issued until:

(a) The lender certifies that:

(1) No changes have been made in the lender’s loan conditions and requirements since the issuance of the Conditional Commitment for Guarantee except those approved in the interim by the Agency in writing.

(2) All planned property acquisition has been completed and all development has been substantially completed in accordance with plans, specifications, and applicable building codes. No costs have exceeded the amounts approved by the lender and the Agency.

(3) Required insurance is in effect.

(4) The loan has been properly closed and the required security instruments have been obtained on any after-acquired property that cannot be covered initially under State statutory provisions.

(5) The borrower has marketable title to the collateral then owned by the borrower, subject to the instrument securing the loan to be guaranteed and subject to any other exceptions approved, in writing, by the Agency.

(6) When required, the entire amount of the loan for working capital has been disbursed except in cases where the Agency has approved disbursement over an extended time.

(7) All other requirements of the Conditional Commitment for Guarantee have been met.

(8) Lien priorities are consistent with requirements of the Conditional Commitment for Guarantee.

(9) The loan proceeds have been disbursed for purposes and in amounts consistent with the Conditional Commitment for Guarantee and as specified on the application for the guaranteed loan. A copy of a detailed statement by
the lender detailing the use of loan funds will be attached to support this certification.

(10) There has been no substantive adverse change in the borrower’s financial condition nor any other adverse change in the borrower during the period of time from the Agency’s issuance of the Conditional Commitment for Guarantee to issuance of the Loan Note Guarantee. The lender’s certification must address all adverse changes of the borrower and the guarantors. For purposes of this paragraph (a)(10), the term borrower includes any parent, affiliate, or subsidiary of the borrower.

(11) All Federal, State, and local design and construction requirements have been met.

(12) The lender understands and will meet the requirements of the Debt Collection Act (31 U.S.C. Chapter 37).

(13) The lender would not make the loan without an Agency guarantee.

(b) The lender has executed and delivered the Lender’s Agreement and closing report for the guaranteed loan along with the appropriate guarantee fee.

(c) The lender has advised the Agency of plans to sell or assign any part of the loan as provided in the Lender’s Agreement.

(d) Where applicable, the lender must certify that the borrower has obtained:

(1) A legal opinion relative to the title to rights-of-way and easements. Lenders are responsible for ensuring that borrowers have obtained valid, continuous, and adequate rights-of-way and easements needed for the construction, operation, and maintenance of a facility.

(2) A title opinion or title insurance showing ownership of the land and all mortgages or other lien defects, restrictions, or encumbrances, if any. It is the responsibility of the lender to ensure that the borrower has obtained and recorded such releases, consents, or subordinations to such property rights from holders of outstanding liens or other instruments as may be necessary for the construction, operation, and maintenance of the facility and to provide the required security. For example, when a site is for major structures and the lender and borrower are able to obtain only a right-of-way or easement on such a site rather than a fee simple title, such a title opinion must be requested.

(e) If the Loan Note Guarantee cannot be issued before the Conditional Commitment expires, the lender must submit a written request for an extension of the expiration date. The lender must document and certify to paragraph (a)(1) and (a)(11) of this section specifically identifying any modifications.

(f) Coincident with, or immediately after, loan closing, the lender will contact the Agency and provide those documents and certifications required in this section. For loans to public bodies, lenders may require an opinion from recognized bond counsel regarding the adequacy of the preparation and issuance of the debt instruments. Only when the Agency is satisfied that all conditions for the guarantee have been met will the Loan Note Guarantee be executed.

§ 1779.64 Issuance of Lender’s Agreement, Loan Note Guarantee, and Assignment Guarantee Agreement.

(a) Lender’s Agreement. If the Agency finds that all requirements have been met, the lender and the Agency will execute the Lender’s Agreement. The original will be retained by the Agency and a signed duplicate original will be retained by the lender. A separate Lender’s Agreement must be executed for each loan to be guaranteed by the Agency.

(b) Loan Note Guarantee. (1) Upon receipt of the executed Lender’s Agreement and after all requirements have been met, the Agency will execute the Loan Note Guarantee. All originals of the Loan Note Guarantee will be provided to the lender and attached to the note.

(2) If the lender has selected the multi-note system, a Loan Note Guarantee will be prepared and attached to each note the borrower issues. All the notes will be listed on the Loan Note Guarantee. Not more than ten notes will be issued for the guaranteed portion (unless the Agency and borrower agree otherwise) and one note issued for the unguaranteed portion.
§ 1779.65 Lender’s sale or assignment of the guaranteed portion of loan.

The lender may retain all of the guaranteed loan. The lender must not sell or participate any amount of the guaranteed or non-guaranteed portion of the loan to the borrower or to members of the borrower’s immediate families, the borrower’s officers, directors, stockholders, other owners, or a subsidiary or affiliate. Disposition of the guaranteed portion of a loan may not be made prior to full disbursement, completion of construction, and acquisition of real estate and equipment without the prior written approval of the Agency. If the lender desires to market all or part of the guaranteed portion of the loan at, or subsequent to, loan closing, the loan must not be in default.

(a) Assignment. Any sale or assignment by the lender of the guaranteed portion of the loan must be accomplished in accordance with the conditions in the Lender’s Agreement.

(b) Participation. The lender may obtain participation in the loan under its normal operating procedures.

(c) Minimum retention. The lender is required to hold in its own portfolio or retain a minimum of 5 percent of the total loan amount. This amount must be of the non-guaranteed portion of the loan and cannot be participated to another. The lender may sell the remaining amount of the non-guaranteed portion of the loan only through participation.

§§ 1779.66–1779.68 [Reserved]

§ 1779.69 Loan servicing.

(a) Lender responsibilities. The lender is responsible for servicing the entire loan in accordance with the lender’s loan agreement. The unguaranteed portion of the loan will not be paid first nor given any preference or priority over the guaranteed portion of the loan. The lender is responsible for taking all servicing actions that a prudent lender would perform in servicing a portfolio of loans that are not guaranteed. This responsibility includes, but is not limited to, the collection of payments; obtaining compliance with the covenants and provisions in the note, loan agreement, security instrument, or any supplemental agreements; obtaining and analyzing financial statements; verifying the payment of taxes and insurance premiums; and maintaining liens on collateral. The lender must notify the Agency of any violation of the loan agreement with the borrower within 30 days of such violation.

(b) Financial reports. The lender must obtain the financial statements required by the Loan Agreement. The lender must submit the borrower’s annual financial statements to the Agency within 120 days of the end of the borrower’s fiscal year. The lender must analyze the financial statements and provide the Agency with a written summary of the lender’s analysis and conclusions, including trends, strengths, weaknesses, extraordinary transactions, and other indications of the financial condition of the borrower. Additionally, when applicable, the lender will require an audit in accordance with Office of Management and Budget (OMB) circulars (available in any Agency office).

(c) Delinquent loans. The lender will service delinquent loans in accordance with the Lender’s Agreement and reasonable and prudent lending standards.

(d) Loan balances. The lender must report to the Agency the outstanding principal and interest balance on each guaranteed loan semiannually.
(e) Collateral inspections. The lender will inspect the collateral as often as necessary to properly service the loan.

§§ 1779.70–1779.72 [Reserved]

§ 1779.73 Replacement of loss, theft, destruction, mutilation, or defacement of Loan Note Guarantee or Assignment Guarantee Agreement.

(a) Replacement. The Agency may issue a replacement Loan Note Guarantee or Assignment Guarantee Agreement which may have been lost, stolen, destroyed, mutilated, or defaced to the lender or holder upon receipt of a certificate of loss and an indemnity bond in accordance with this section.

(b) Lender responsibilities. When a Loan Note Guarantee or Assignment Guarantee Agreement is lost, stolen, destroyed, mutilated, or defaced while in the custody of the lender or holder, the lender will coordinate the activities of the party who seeks the replacement documents and will submit the required documents to the Agency for processing. The requirements for replacement are as follows:

(1) A certificate of loss properly notarized which includes:

(i) Legal name and present address of either the lender or the holder who is requesting the replacement forms;
(ii) Legal name and address of the lender of record;
(iii) Capacity of person certifying;
(iv) Full identification of the Loan Note Guarantee or Assignment Guarantee Agreement, including the name of the borrower, Agency case number, date of the Loan Note Guarantee, Assignment Guarantee Agreement, face amount of the evidence of debt purchased, date of evidence of debt, present balance of the loan, percentages of guarantee and, if Assignment Guarantee Agreement, the original named holder and the percentage of the guaranteed portion of the loan assigned to that holder. Any existing parts of the document to be replaced must be attached to the certificate;
(v) A full statement of circumstances of the loss, theft, or destruction of the Loan Note Guarantee or Assignment Guarantee Agreement; and
(vi) The holder shall present evidence demonstrating current ownership of the Loan Note Guarantee and Note or Assignment Guarantee Agreement. If the present holder is not the same as the original holder, a copy of the endorsement of each successive holder in the chain of transfer from the initial holder to present holder must be included. If copies of the endorsement cannot be obtained, best available records of transfer must be presented to the Agency (e.g., order confirmation, canceled checks).

(2) An indemnity bond acceptable to the Agency shall accompany the request for replacement except when the holder is the United States, a Federal Reserve Bank, a Federal Government corporation, a State or Territory, or the District of Columbia.

(3) All indemnity bonds must be issued and payable to the United States of America. The bond shall be in an amount not less than the unpaid principal and interest. The bond shall hold the Government harmless against any claim or demand which might arise or against any damage, loss, costs, or expenses which might be sustained or incurred by reasons of the loss or replacement of the instruments.

§ 1779.74 [Reserved]

§ 1779.75 Defaults by borrower.

(a) Lender notification to Agency. The lender must notify the Agency when a borrower is 30 days past due on a payment, has not met its responsibilities of providing the required financial statements, or is otherwise in default. The lender will continue to keep the Agency informed on a bimonthly basis until such time as the loan is no longer in default. If a monetary default exceeds 60 days, the lender will arrange a meeting with the borrower to resolve the default. The lender will provide a summary of the meeting and any decisions or actions agreed upon.

(b) Servicing options. In considering servicing options, the prospects for providing a permanent cure without adversely affecting the risks to the Agency and the lender must be the paramount objective. Temporary curative actions (such as payment deferments or collateral subordination) must strengthen the loan and be in the best financial interest of the lender and
§§ 1779.76–1779.77  
7 CFR Ch. XVII (1–1–08 Edition)

the Agency. Some of these actions may require concurrence of the holder.

(c) Multi-note. If the loan was closed with the multi-note option, the lender may need to possess all notes to take some servicing actions. In those situations where the Agency is holder of some of the notes, the Agency may endorse the notes back to the lender, provided a proper receipt is received from the lender which defines the reason for the transfer. Under no circumstances will the Agency endorse the original Loan Note Guarantee to the lender.

§§ 1779.76–1779.77 [Reserved]

§ 1779.78 Repurchase of loan.

(a) Repurchase by lender. The lender has the option to repurchase the loan from a holder within 30 days of written demand from the holder when the borrower is in default not less than 60 days on payment. The repurchase will be for an amount equal to the unpaid guaranteed portion of principal and accrued interest less the lender’s servicing fee. The guarantee does not cover the note interest to the holder on the guaranteed loan accruing after 90 days from the date of the demand letter to the lender. The holder will concurrently send a copy of the demand to the Agency. The lender will accept an assignment without recourse from the holder upon repurchase. The lender is encouraged to repurchase the loan to facilitate the accounting of funds, resolve the problem, and permit the borrower to cure the default, where reasonable. The lender will notify the holder and the Agency of its decision within 30 days of receipt of demand from the holder.

(b) Agency repurchase. (1) If the lender does not repurchase as provided in paragraph (a) of this section, the Agency will purchase from the holder the unpaid principal balance of the guaranteed portion together with accrued interest to date of repurchase (less the lender’s servicing fee) within 30 days after a specific written demand directed to the Agency. The copy of the demand on the lender is not sufficient. The guarantee will not cover the note interest to the holder on the guaranteed loan accruing after 90 days from the date of the original demand letter.

The lender shall not charge the Agency any servicing fees nor are any such fees collectible from the Agency.

(2) The holder’s demand to the Agency must include a copy of the written demand made upon the lender. The holder or duly authorized agent must also include evidence of the right to require payment from the Agency. Such evidence will consist of either the original of the Loan Note Guarantee properly endorsed to the Agency or the original of the Assignment Guarantee Agreement properly assigned to the Agency without recourse including all rights, title, and interest in the loan. The Agency will be subrogated to all rights of the holder. The holder must include in the demand the amount due including unpaid principal, unpaid interest to date of demand, and interest subsequently accruing from the date of demand to the proposed payment date. Unless otherwise agreed to by the Agency, such proposed payment will not be later than 30 days from the date of demand.

(3) The lender must promptly provide the Agency with the information necessary for the Agency’s determination of the appropriate amount due the holder upon the Agency’s notification to the lender of the holder’s demand for payment. This information must be certified by an authorized officer of the lender. Any discrepancy between the amount claimed by the holder and the information submitted by the lender must be resolved before payment will be approved. The Agency will notify both parties and such conflict will suspend the running of the 30-day payment requirement.

(4) Any purchase by the Agency does not change, alter, or modify any of the lender’s obligations to the Agency arising from the loan or guarantee nor does it waive any of the Agency’s rights against the lender. The Agency may set off against the lender all rights inuring to the Agency as the holder of the instrument against the Agency’s obligation to the lender under the Loan Note Guarantee.

(c) Repurchase for servicing. When the lender determines that repurchase of the guaranteed portion of the loan is necessary to service the loan, the holder must sell the guaranteed portion to
the lender for the unpaid principal and interest balance (less the lender’s servicing fee). The guarantee does not cover interest accruing after 90 days from the date the lender’s or Agency’s letter requesting the holder to tender its guaranteed portion. The lender must not repurchase from the holder for arbitrage purposes to further its own financial gain. Any repurchase must be made only after the lender obtains the Agency written approval. If the lender does not repurchase the portion from the holder, the Agency may, at its option, purchase such guaranteed portion for servicing purposes.

§ 1779.81 Liquidation.

Liquidation will occur when the lender concludes that liquidation of the guaranteed loan is necessary because of default or third party actions that the borrower cannot, or will not, cure or eliminate within a reasonable period of time and the Agency concurs with the lender; or the Agency, at any time, independently concludes that liquidation is necessary. The lender will proceed as expeditiously as possible, including giving any notices or taking any legal actions required by the security instruments.

(a) General. If a lender has made a loan guaranteed by the Agency under previous regulations, the lender has the option to liquidate the loan under the provisions of this part or under the provisions of previous regulations. The lender will notify the Agency in writing within 10 days after its decision to liquidate, which regulatory provisions it chooses to use. The lender may not choose some provisions of one regulation and other provisions of the other regulation.

(b) Acquiring property titles. If a lender acquires title to property, the Agency may elect to permit the lender the option of calculating the final loss settlement using the net proceeds received at the time of the ultimate disposition of the property. The lender must submit to the Agency a written request to use this option within 15 days of acquiring title and the Agency must agree, in writing, prior to the lender submitting any request for estimated loss payment.

(c) Liquidation plan. The lender will submit to the Agency, in writing, a proposed, detailed liquidation plan.
plan. Upon approval by the Agency of the liquidation plan, the lender will commence liquidation. The lender's liquidation plan must include, but is not limited to, the following:

(1) Such proof as the Agency requires to establish the lender's ownership of the guaranteed loan notes and related security instruments, a copy of the payment ledger or other documentation which reflects the outstanding loan balance and accrued interest to date, and the method of computing the interest;

(2) A complete list of collateral;

(3) The recommended liquidation methods for making the maximum collection possible on the indebtedness and the justification for such methods, including the recommended action for acquiring and disposing of all collateral;

(4) Necessary steps for preservation of the collateral;

(5) Copies of the borrower's latest available financial statements;

(6) An itemized list of estimated liquidation expenses expected to be incurred and justification for each expense;

(7) A schedule to periodically report to the Agency on the progress of the liquidation;

(8) Estimated protective advance amounts with justification;

(9) Proposed protective bid amounts on collateral to be sold at auction and a discussion of how the amounts were determined;

(10) If a voluntary conveyance is considered, the proposed amount to be credited to the guaranteed debt;

(11) Legal opinions, as needed; and

(12) If the outstanding balance of principal and interest is less than $250,000, the lender will obtain an estimate of fair market and potential liquidation value of the collateral. If the outstanding balance of principal and interest is $250,000 or more, the lender will obtain an independent appraisal report on all collateral securing the loan which will reflect the fair market value and potential liquidation value. The independent appraiser's fee will be shared equally by the Agency and the lender.

(d) Partial liquidation plan. If actions are necessary to immediately preserve and protect the collateral, a partial liquidation plan may be submitted and, when approved, must be followed by a complete liquidation plan prepared by the lender.

(e) Disposition of collateral. Disposition of collateral acquired by the lender must be approved, in writing, by the Agency when:

(1) The lender's cost to acquire the collateral of a borrower exceeds the potential recovery value of the security and the lender proposes abandoning the collateral in lieu of liquidation; or

(2) The acquired collateral is to be sold to the borrower, borrower's stockholders or officers, or the lender or lender's stockholders or officers.

(f) Agency liquidation. The Agency will liquidate at its option only when it is a holder and there is reason to believe the lender is not likely to initiate liquidation efforts that will result in maximum recovery. When the Agency liquidates, proceeds derived from the sale of the collateral will be applied first to reasonable liquidation expenses and second to the guaranteed portion of the loan.

(g) Final loss payment. Final loss payments will be made only after all collateral has been properly accounted for and liquidation expenses are determined to be reasonable and within approved limits. Any estimated loss payments made to the lender will be credited against the final loss on the guaranteed loan. The amount of an estimated loss payment must be credited as a deduction from the principal balance of the loan.

§ 1779.82 [Reserved]

§ 1779.83 Protective advances.

Protective advances can only be added to the loan account for purposes of requirements to preserve the value of the security. Protective advances constitute an indebtedness of the borrower to the lender and must be secured by collateral to the same extent as principal and interest. Protective advances include, but are not limited to, advances made for taxes, annual assessments, ground rent, hazard and flood insurance premiums affecting the
collateral (including any other expenses necessary to protect the collateral). Attorney fees are not a protective advance.

(a) Agency approval. The Agency must approve, in writing, all protective advances on loans within its loan approval authority which exceed a total cumulative advance amount of $5,000 to the same borrower. Protective advances must be reasonable when associated with the value of the collateral being preserved.

(b) Preserving collateral. When considering protective advances, sound judgment must be exercised in determining that the additional funds advanced will actually preserve collateral and recovery is actually enhanced by making the advance.

§ 1779.84 Additional loans or advances.

The lender will not make additional expenditures or new loans to the borrower without first obtaining the written approval of the Agency even though such expenditures or loans will not be guaranteed.

§ 1779.85 Bankruptcy.

(a) Calculating losses. Report of Loss form (available in any Agency office) will be used for calculating estimated and final loss determinations.

(b) Lender responsibility. The lender is responsible for protecting the guaranteed loan debt and all the collateral securing it in bankruptcy proceedings. These responsibilities include, but are not limited to, the following:

(1) Filing a proof of claim, where necessary, and all necessary papers and pleadings;

(2) Attending and, where necessary, participating in meetings of the creditors and all court proceedings;

(3) Immediately seeking adequate protection of the collateral if it is subject to being used by the trustee in bankruptcy or the debtor in possession;

(4) Where appropriate, seeking involuntary conversion of a pending chapter 11 case to a liquidation proceeding or seeking dismissal of the proceedings; and

(5) Keeping the Agency adequately and regularly informed, in writing, of all aspects of the proceedings.

(c) Appraisals. In a chapter 9 or chapter 11 reorganization, the lender must obtain an independent appraisal of the collateral if the Agency believes an independent appraisal is necessary. The Agency and the lender will share the appraisal fee equally.

(d) Liquidation expenses. Only expenses authorized by the court of chapter 9 plans or chapter 11 reorganizations, or chapters 11 or 7 liquidation (unless the liquidation is by the lender), may be deducted from the collateral proceeds.

(e) Repurchase from the holder. The Agency or the lender, with the approval of the Agency, may initiate the repurchase of the unpaid guaranteed portion of the loan from the holder. If the lender is the holder, an estimated loss payment may be filed at the initiation of a chapter 7 proceeding or after a chapter 9 or chapter 11 proceeding becomes a liquidation proceeding. Any loss payment on loans in bankruptcy must be approved by the Agency.

(f) Chapter 11 bankruptcy. If a borrower has filed for protection under chapters 9 or 11 of the United States Code for a reorganization (but not chapter 13) and all or a portion of the debt has been discharged, the lender may request an estimated loss payment of the guaranteed portion of the accrued interest and principal discharged by the court. If the court approves revisions to the chapter 9 plan or chapter 11 reorganization plan, subsequent estimated loss payments may be requested in accordance with the court approved changes. Once the reorganization plan has been satisfactorily completed, the lender is responsible for submitting the documentation necessary for the Agency to review and adjust the estimated loss claim to reflect any actual discharge of principal and interest and to reimburse the lender for any court ordered interest-rate reduction under the terms of the reorganization plan.

(g) Agency approval of estimated liquidation expenses. The Agency must approve, in advance and in writing, the lender’s estimated liquidation expenses of collateral in a liquidation if the liquidation is performed by the lender. These expenses must be reasonable and customary and not include in-house expenses of the lender.
(h) Reconciliation. In the event that the estimated loss payment exceeds the actual loss, the lender will reimburse the Agency the amount in excess of the actual loss plus interest at the note rate from the date of the estimated loss payment.

§§ 1779.86-1779.87 [Reserved]

§ 1779.88 Transfers and assumptions.

(a) General. For all transfers and assumptions, the lender must concur in the plans for disposition of funds in the transferor’s debt service, reserve, and operation and maintenance account. The Agency will approve, in writing, transfers and assumptions of loans to transferees who will continue the original purpose of the guaranteed loan subject to the following applicable provisions:

(1) When the transaction is to a member of the borrower’s organization, it will be at an amount which will not result in a loss to the lender.

(2) Transfers to eligible borrowers will receive preference if recovery to the lender from the sale price is not less than it would be if the transfer was to an ineligible borrower.

(3) The present borrower is unable or unwilling to accomplish the objectives of the guaranteed loan, and the transfer will be to the lender’s and Agency’s advantage.

(4) The transferee will assume an amount at least equal to either the present market value or the debt, whichever is less.

(b) Transfers to an eligible borrower. (1) The total indebtedness may be transferred to an eligible borrower on the same terms.

(2) The total indebtedness may be transferred to another eligible borrower on the same or different terms and the pro rata share of any eligible loss paid to the lender.

(3) Less than the total indebtedness may be transferred to another eligible borrower on the same or different terms and the pro rata share of any eligible loss paid to the lender.

(4) A guaranteed loan for which the transferee is eligible may be made in connection with a transfer subject to the policies and procedures governing the type of loan being made.

(5) If the transferor is to receive a payment for the equity, the total debt must be assumed.

(c) Ineligible borrower. Transfers to ineligible borrowers are considered only when needed as a method for servicing problem cases when an eligible transferee is not available. Transfers should not be considered as a means by which members can obtain equity or as a method of providing a source of easy credit for purchasers. Transfers must meet the following requirements:

(1) All transfers to ineligible borrowers will include a one-time non-refundable transfer fee to the Agency of no more than 1 percent. Transfer fees will be collected, and payments applied, in accordance with paragraph (d) of this section.

(2) For all loans covered by this part, the Agency may approve a transfer of indebtedness to, and assumption of, a loan by a transferee who does not meet the eligibility requirements for the kind of loan being assumed when the ineligible borrower will:

(i) Make a significant down payment, and

(ii) Agree to pay the remaining balance within not more than 15 years. Installments will be at least equal to the amount amortized over a period not greater than the remaining life of the debt being transferred, and the balance will be due the fifteenth year.

(3) Interest rates to ineligible transferees will be the rate specified in the note of the transferor or the rates customarily charged borrowers in similar circumstances in the ordinary course of business and are subject to Agency review and approval. The rates may be either fixed or variable.

(i) Transferees must have the ability to repay as determined by the lender the debt according to the Assumption Agreement and must have the legal authority to enter into the contract. The transferee will submit a current balance sheet to the lender. The lender will obtain and analyze the credit history of the transferee.

(ii) The transferor may receive equity payments only when the full amount of the debt is assumed. However, equity payments will not be made on more favorable terms than those on
which the balance of the debt will be paid.

(d) Transfer fees. Transfer fees are a one-time nonrefundable cost to be collected by the lender at the time of application or proposal.

(1) The transfer fees will be a standard fee plus the cost of the appraisal.

(2) The lender will collect and submit the fee to the Agency.

(3) The Agency may waive the transfer fee if it determines that such waiver is in the best interest of the Agency.

(e) Processing transfers and assumptions. (1) In any transfer and assumption case, the transferor (including any guarantor) may be released from liability by the lender only with prior Agency written concurrence and only when the value of the collateral being transferred is at least equal to the amount of the loan, or part of the loan, being assumed. If the transfer is for less than the entire debt:

(i) The Agency must determine that the transferor and any guarantor have no reasonable debt-paying ability considering their assets and income at the time of transfer, and

(ii) The lender must certify that the transferor has cooperated in good faith, used due diligence to maintain the collateral against loss, and has otherwise fulfilled all of the regulations of this part to the best of the borrower’s ability.

(2) The lender will make, in all cases, a complete credit analysis to determine viability of the project (subject to the Agency review and approval) including any requirement for deposit in an escrow account as security to meet the determined equity requirements for the project.

(3) The lender will confirm that the transaction can be properly transferred and the conveyance instruments will be filed, registered, or recorded as appropriate and legally permissible.

(4) The assumption will be made on the lender’s form of Assumption Agreement and will contain the Agency case number of the transferor and transferee.

(5) Loan terms cannot be changed by the Assumption Agreement unless previously approved in writing by the Agency with the concurrence of holder and the transferor (including guarantor if it has not been released from personal liability). Any new loan terms cannot exceed those authorized in this part. The lender’s request will be supported by:

(i) An explanation of the reasons for the proposed change in the loan terms, and

(ii) Certification that the lien position securing the guaranteed loan will be maintained or improved, and proper hazard insurance will be continued in effect.

(6) In the case of a transfer and assumption, it is the lender’s responsibility to see that all such transfers and assumptions will be noted on all originals of the Loan Note Guarantee. The lender will provide the Agency a copy of the Transfer and Assumption Agreement.

(7) If a loss should occur upon a complete transfer of assets and assumption for less than the full amount of the debt and the transferor-debtor (including personal guarantor) is released from personal liability (as provided in paragraph (e)(1)(i) of this section), the lender (if holding the guaranteed portion) may file an estimated Report of Loss to recover their pro rata share of the actual loss at that time. Approved protective advances and accrued interest made during the arrangement of a transfer and assumption, if not assumed by the transferee, will be entered on the estimated Report of Loss.

§ 1779.89 Mergers.

(a) General. The Agency may approve mergers or consolidations (herein referred to as “mergers”) when the resulting organization will be eligible for an Agency guaranteed loan and assumes all the liabilities and acquires all the assets of the merged borrower. Mergers may be approved when:

(1) The merger is in the best interest of the Government and the merging borrower:

(2) The resulting borrower can meet all required conditions as contained in specific loan note agreements; and

(3) All property can be legally transferred to the resulting borrower.

(b) Distinguishing mergers from transfers and assumptions. Mergers occur when one entity combines with another
entity in such a way that the first entity ceases to exist as a separate entity while the other continues. In a consolidation, two or more entities combine to form a new, consolidated entity with the original entity ceasing to exist. Such transactions must be distinguished from transfers and assumptions in which a transferee will not necessarily go out of existence, and the transforee will not always take all the transferor’s assets nor assume all the transferor’s liabilities.

§ 1779.90 Disposition of acquired property.

(a) General. When the lender acquires title to the collateral and the final loss claim is not paid until final disposition, the lender must proceed as quickly as possible to develop a plan to fully protect the collateral, and the lender must dispose of the collateral without delay.

(b) Re-title collateral. Any collateral accepted by the lender must not be titled in the Agency's name in whole or in part. The Agency’s position is that of a guarantor relating to losses, not a lender.

(c) Collateral preservation. After acquiring the collateral, the lender must protect the collateral from deterioration (weather, vandalism, etc.). Hazard insurance in an amount necessary to cover the fair market value of the collateral must be maintained.

(d) Collateral sale. (1) The lender will prepare and submit to the Agency a plan on the best method of sale, keeping in mind any prospective purchasers. The Agency must approve the plan in writing. If an existing approved liquidation plan addresses the disposition of acquired property, no further review is required unless modification of the plan is needed.

(2) Anytime there is a case when the conversion of collateral to cash can reasonably be expected to result in a negative net recovery amount, abandonment of the collateral should be considered. The Agency must approve abandonment in writing.

§§ 1779.91–1779.93 [Reserved]

§ 1779.94 Determination and payment of loss.

In all liquidation cases, final settlement will be made with the lender after the collateral is liquidated. The Agency will have the right to recover losses paid under the guarantee from any liable party.

(a) General. If the lender takes title to collateral, any loss will be based on the collateral value at the time the lender obtains title.

(b) Loss calculations. The Report of Loss form (available in any Agency office) will be used for calculations of all estimated and final loss determinations. Estimated loss payments may only be approved after the lender has submitted a liquidation plan approved by the Agency.

(c) Estimated loss payments. When the lender is conducting the liquidation and owns any of the guaranteed portion of the loan, it may request an estimated loss payment by submitting an estimate of loss that will occur in connection with liquidation of the loan. An estimated loss payment may be approved after the Agency has approved the liquidation plan.

(1) The lender will prepare and submit a Report of Loss using the appraised value in lieu of amount received from sale of collateral.

(2) The estimated loss payment shall be calculated as of the date of such payment. The total amount of the loss payment remitted by the Agency will be applied by the lender on the guaranteed portion of the loan debt. Such application does not release the borrower from liability. At the time of final loss settlement, the lender may notify the borrower that the loss payment has been so applied.

(3) After liquidation has been completed, a final Report of Loss will be submitted by the lender to the Agency.

(d) Final report of loss. In all cases, a final Report of Loss must be submitted to the Agency. Before Agency approval of any final loss report, the lender must account for all funds obtained, disposition of the collateral, all costs incurred, and any other information necessary for the successful completion of liquidation. Upon receipt of the final
accounting and Report of Loss, the Agency may conduct an audit and will determine the final loss. The lender will make its records available to, and otherwise assist, the Agency in making any audit it requires of the Report of Loss. The documentation accompanying the Report of Loss must support the loss claimed.

(1) The lender must document and show that all of the collateral has been accounted for and properly liquidated and that liquidation proceeds have been properly accounted for and applied correctly on the loan. The Agency must be satisfied that the lender has accomplished this in the manner contained herein and that the lender has maximized the collections in conducting the liquidation.

(2) The lender must show a breakdown on any protective advance amount as to the payee, purpose of the expenditure, date paid, evidence that the amount expended was proper, and that the amount was actually paid.

(3) The lender must show a breakdown of liquidation expenses as to the payee, purpose of the expenditure, date paid, evidence that the amount expended was proper, and that the amount was actually paid.

(4) Accrued interest should be supported by attachments showing how the amount was accrued by the lender. A copy of the promissory note and ledger will be attached. If the interest rate was a variable rate, the lender must include documentation of changes in the selected base rate and when the changes in the loan rate became effective.

(e) Liquidation income. Any net rental or other income that has been received by the lender from the collateral will be applied on the guaranteed loan debt.

(f) Liquidation costs. Certain reasonable liquidation costs will be allowed during the liquidation process. The liquidation costs must be submitted as a part of the liquidation plan. Such costs will be deducted from gross proceeds received from the disposition of collateral unless the costs have been previously determined by the lender (with Agency concurrence) to be protective advances. If changed circumstances after submission of the liquidation plan require a revision of liquidation costs, the lender will obtain the Agency’s written concurrence prior to proceeding with the proposed changes. No in-house expenses of the lender will be allowed.

(g) Protective advance losses. In those instances where the lender made authorized protective advances, the lender may claim recovery for the guaranteed portion of any loss of monies advanced as well as interest resulting from such protective advances. These claims shall be included in the final Report of Loss.

(h) Final loss approval. After the final Report of Loss has been tentatively approved:

(1) If the actual loss is greater than any estimated loss payment, such loss will be paid by the Agency;
(2) If the actual loss is less than any estimated loss payment, the lender will reimburse the Agency;
(3) If the Agency conducted the liquidation, it will provide an accounting to the lender and will pay the lender in accordance with the Loan Note Guarantee.

(i) Loss limits. The amount payable by the Agency to the lender cannot exceed the limits contained in the Loan Note Guarantee. If the Agency conducts the liquidation, loss occasioned by accruing interest will be covered by the guarantee only to the date the Agency accepts this responsibility. When the liquidation is conducted by the lender, loss occasioned by accruing interest will be covered to the extent of the guarantee to the date of final settlement provided the lender proceeds expeditiously with the liquidation plan approved by the Agency.

§ 1779.95 Future recovery.
After a loan has been liquidated and a final loss has been paid by the Agency, any future funds which may be recovered by the lender will be pro-rated between the Agency and the lender in accordance with the guaranteed percentage even if the Loan Note Guarantee has been terminated.

§ 1779.96 Termination of Loan Note Guarantee.
The Loan Note Guarantee under this part will terminate automatically:
§§ 1779.97–1779.99

(a) Upon full payment of the guaranteed loan; or
(b) Upon full payment of any loss obligation or negotiated loss settlement except for future recovery provisions; or
(c) Upon written request from the lender to the Agency, provided that the lender holds all of the guaranteed portion and the original Loan Note Guarantee is returned to the Agency.

§§ 1779.100–1779.99 [Reserved]

§ 1779.100 OMB control number.
The reporting and recordkeeping requirements contained in this part have been approved by the Office of Management and Budget and have been assigned OMB control number 0572–0122.

PART 1780—WATER AND WASTE LOANS AND GRANTS

Subpart A—General Policies and Requirements

Sec.
1780.1 General.
1780.2 Purpose.
1780.3 Definitions and grammatical rules of construction.
1780.4 Availability of forms and regulations.
1780.5 [Reserved]
1780.6 Application information.
1780.7 Eligibility.
1780.8 [Reserved]
1780.9 Eligible loan and grant purposes.
1780.10 Limitations.
1780.11 Service area requirements.
1780.12 [Reserved]
1780.13 Rates and terms.
1780.14 Security.
1780.15 Other Federal, State, and local requirements.
1780.16 [Reserved]
1780.17 Selection priorities and process.
1780.18 Allocation of program funds.
1780.19 Public information.
1780.20–1780.23 [Reserved]
1780.24 Approval authorities.
1780.25 Exception authority.
1780.26–1780.30 [Reserved]

Subpart B—Loan and Grant Application Processing

1780.31 General.
1780.32 Timeframes for application processing.
1780.33 Application requirements.
1780.34 [Reserved]
1780.35 Processing office review.
1780.36 Approving official review.
1780.37 Applications determined ineligible.
1780.38 [Reserved]
1780.39 Application processing.
1780.40 [Reserved]
1780.41 Loan or grant approval.
1780.42 Transfer of obligations.
1780.43 [Reserved]
1780.44 Actions prior to loan or grant closing or start of construction, whichever occurs first.
1780.45 Loan and grant closing and delivery of funds.
1780.46 [Reserved]
1780.47 Borrower accounting methods, management reporting and audits.
1780.48 Regional commission grants.
1780.49 Rural or Native Alaskan villages.
1780.50–1780.52 [Reserved]

Subpart C—Planning, Designing, Bidding, Contracting, Constructing and Inspections

1780.53 General.
1780.54 Technical services.
1780.55 Preliminary engineering reports and Environmental Reports.
1780.56 [Reserved]
1780.57 Design policies.
1780.58–1780.60 [Reserved]
1780.61 Construction contracts.
1780.62 Utility purchase contracts.
1780.63 Sewage treatment and bulk water sales contracts.
1780.64–1780.66 [Reserved]
1780.67 Performing construction.
1780.68 Owner’s contractual responsibility.
1780.69 [Reserved]
1780.70 Owner’s procurement regulations.
1780.71 [Reserved]
1780.72 Procurement methods.
1780.73 [Reserved]
1780.74 Contracts awarded prior to applications.
1780.75 Contract provisions.
1780.76 Contract administration.
1780.77–1780.79 [Reserved]

Subpart D—Information Pertaining to Preparation of Notes or Bonds and Bond Transcript Documents for Public Body Applicants

1780.80 General.
1780.81 Policies related to use of bond counsel.
1780.82 [Reserved]
1780.83 Bond transcript documents.
1780.84–1780.86 [Reserved]
1780.87 Permanent instruments for Agency loans.
1780.88 [Reserved]
1780.89 Multiple advances of Agency funds using permanent instruments.
1780.90 Multiple advances of Agency funds using temporary debt instruments.
1780.91–1780.93 [Reserved]
1780.94 Minimum bond specifications.
§ 1780.1 General.

(a) This part outlines the policies and procedures for making and processing direct loans and grants for water and waste projects. The Rural Utilities Service (RUS) shall cooperate fully with State and local agencies in making loans and grants to assure maximum support to the State strategy for rural development. Agency officials and their staffs shall maintain coordination and liaison with State agency and substate planning districts.

(b) The income data used in this part to determine median household income must be that which most accurately reflects the income of the service area. The median household income of the service area and the nonmetropolitan median household income of the State will be determined from income data from the most recent decennial census of the United States. If there is reason to believe that the census data is not an accurate representation of the median household income within the area to be served, the reasons will be documented and the applicant may furnish, or the Agency may obtain, additional information regarding such median household income. Information will consist of reliable data from local, regional, State or Federal sources or from a survey conducted by a reliable impartial source. The nonmetropolitan median household income of the State may only be updated on a national basis by the RUS National Office. This will be done only when median household income data for the same year for all Bureau of the Census areas is available from the Bureau of the Census or other reliable sources. Bureau of the Census areas would include areas such as: Counties, County Subdivisions, Cities, Towns, Townships, Boroughs, and other places.

(c) RUS debt instruments will require an agreement that if at any time it shall appear to the Government that the borrower is able to refinance the amount of the indebtedness to the Government then outstanding, in whole or in part, by obtaining a loan for such purposes from responsible cooperative or private credit sources, at reasonable rates and terms for loans for similar purposes and periods of time, the borrower will, upon request of the Government, apply for and accept such loan in sufficient amount to repay the Government and will take all such actions as may be required in connection with such loan.

(d) Funds allocated for use under this part are also for the use of Indian tribes within the State, regardless of whether State development strategies include Indian reservations within the State’s boundaries. Native Americans residing on such reservations must have equal opportunity to participate in the benefits of these programs as compared with other residents of the State. Such tribes might not be subject to State and local laws or jurisdiction. However, any requirements of this part that affect applicant eligibility, the adequacy of RUS’s security, or the adequacy of service to users of the facility and all other requirements of this part must be met.

(e) RUS financial programs must be extended without regard to race, color, religion, sex, national origin, marital status, age, or physical or mental handicap.

(f) Any processing or servicing activity conducted pursuant to this part involving authorized assistance to Agency employees, members of their families, known close relatives, or business or close personal associates, is subject to the provisions of subpart D of part 1900 of this title. Applicants for assistance are required to identify any known relationship or association with a RUS employee.

(g) Water and waste facilities will be designed, installed, and operated in accordance with applicable laws which include but are not limited to the Safe Drinking Water Act, Clean Water Act and the Resource Conservation and Recovery Act.
§ 1780.2 Purpose.

Provide loan and grant funds for water and waste projects serving the most financially needy communities. Financial assistance should result in reasonable user costs for rural residents, rural businesses, and other rural users.

§ 1780.3 Definitions and grammatical rules of construction.

(a) Definitions. For the purposes of this part:

Agency means the Rural Utilities Service and any United States Department of Agriculture (USDA) employee acting on behalf of the Rural Utilities Service in accordance with appropriate delegations of authority.

Agency identified target areas means an identified area in the State strategic plan or other plans developed by the Rural Development State Director.

Approval official means the USDA official at the State level who has been delegated the authority to approve loans or grants.

Edible Dwelling Unit (EDU) means the level of service provided to a typical rural residential dwelling.

Parity bonds means bonds which have equal standing with other bonds of the same Issuer.

Poverty line means the level of income for a family of four, as defined in section 673(2) of the Community Services Block Grant Act (42 U.S.C. 9902(2)).

Processing office means the office designated by the State program official to accept and process applications for water and waste disposal assistance.

Project means all activity that an applicant is currently undertaking to be financed in whole or part with RUS assistance.

(h) RUS financed facilities will be consistent with any current development plans of State, multijurisdictional areas, counties, or municipalities in which the proposed project is located.

(i) Each RUS financed facility will be in compliance with appropriate State or Federal agency regulations which have control of the appropriation, diversion, storage and use of water and disposal of excess water.

(j) Water and waste applicants must demonstrate that they possess the financial, technical, and managerial capability necessary to consistently comply with pertinent Federal and State laws and requirements. In developing water and waste systems, applicants must consider alternatives of ownership, system design, and the sharing of services.

(k) Applicants should be aware of and comply with other Federal statute requirements including but not limited to:

(1) Section 504 of the Rehabilitation Act of 1973. Under section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 794 et seq.), no handicapped individual in the United States shall, solely by reason of their handicap, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving RUS financial assistance;

(2) Civil Rights Act of 1964. All borrowers are subject to, and facilities must be operated in accordance with, Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000e et seq.) and subpart E of part 1901 of this title, particularly as it relates to conducting and reporting of compliance reviews. Instruments of conveyance for loans and/or grants subject to the Act must contain the covenant required by §1901.202(e) of this title;

(3) The Americans with Disabilities Act (ADA) of 1990. This Act (42 U.S.C. 12101 et seq.) prohibits discrimination on the basis of disability in employment, State and local government services, public transportation, public accommodations, facilities, and telecommunications. Title II of the Act applies to facilities operated by State and local public entities which provide services, programs and activities. Title III of the Act applies to facilities owned, leased, or operated by private entities which accommodate the public; and

(4) Age Discrimination Act of 1975. This Act (42 U.S.C. 6101 et seq.) provides that no person in the United States shall on the basis of age, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance.

1056
Protective advances are payments made by a lender for items such as insurance or taxes in order to preserve and protect the security or the lien or priority of the lien securing the loan.

Rural and rural areas means any area not in a city or town with a population in excess of 10,000 inhabitants, according to the latest decennial census of the United States.

Rural Development means the mission area of the Under Secretary for Rural Development. Rural Development State and local offices will administer this water and waste program on behalf of the Rural Utilities Service.

Service area means the area reasonably expected to be served by the project.

Servicing office means the office designated by the State program official to service water and waste disposal loans and grants.

Similar system cost means the average annual EDU user cost of a system within a community having similar economic conditions and being served by the same type of established system. Similar system cost shall include all charges, taxes, and assessments attributable to the system including debt service, reserves and operation and maintenance costs.

State program official means the USDA official at the State level who has been delegated the responsibility of administering the water and waste disposal programs under this regulation for a particular State or States.

Statewide nonmetropolitan median household income means the median household income of the State’s nonmetropolitan counties and portions of metropolitan counties outside of cities, towns or places of 50,000 or more population.

“includes” and “including” are not limiting, and “or” is not exclusive. The terms defined in paragraph (a) of this section include the plural as well as the singular, and the singular as well as the plural.

§ 1780.4 Availability of forms and regulations.

Information about the availability of forms, instructions, regulations, bulletins, OMB Circulars, Treasury Circulars, standards, documents and publications cited in this part is available from any USDA/Rural Development office or the Rural Utilities Service, United States Department of Agriculture, Washington, DC 20250–1500.

§ 1780.5 [Reserved]

§ 1780.6 Application information.

(a) The Rural Development State Director in each State will determine the office and staff that will be responsible for delivery of the program (processing office) and designate an approving office. Applications will be accepted by the processing office.

(b) The applicant’s governing body should designate one person to act as contact person with the Agency during loan and grant processing. Agency personnel should make every effort to involve the applicant’s contact person when meeting with the applicant’s professional consultants or agents.

§ 1780.7 Eligibility.

Facilities financed by water and waste disposal loans or grants must serve rural areas.

(a) Eligible applicant. An applicant must be:

(1) A public body, such as a municipality, county, district, authority, or other political subdivision of a state, territory or commonwealth;

(2) An organization operated on a not-for-profit basis, such as an association, cooperative, or private corporation. The organization must be an association controlled by a local public body or bodies, or have a broadly based ownership by or membership of people of the local community; or

(b) Rules of grammatical construction. Unless the context otherwise indicates,
§ 1780.8 [Reserved]

§ 1780.9 Eligible loan and grant purposes.

Loan and grant funds may be used only for the following purposes:

(a) To construct, enlarge, extend, or otherwise improve rural water, sanitary sewage, solid waste disposal, and storm wastewater disposal facilities.

(b) To construct or relocate public buildings, roads, bridges, fences, or utilities, and to make other public improvements necessary for the successful operation or protection of facilities authorized in paragraph (a) of this section.

(c) To relocate private buildings, roads, bridges, fences, or utilities, and other private improvements necessary for the successful operation or protection of facilities authorized in paragraph (a) of this section.

(d) For payment of other utility connection charges as provided in service contracts between utility systems.

(e) When a necessary part of the project relates to those facilities authorized in paragraphs (a), (b), (c) or (d) of this section the following may be considered:

(1) Loan or grant funds may be used for:

(3) Indian tribes on Federal and State reservations and other Federally recognized Indian tribes.

(b) Eligible facilities. Facilities financed by RUS may be located in non-rural areas. However, loan and grant funds may be used to finance only that portion of the facility serving rural areas, regardless of facility location.

(c) Eligible projects. (1) Projects must serve a rural area which, if such project is completed, is not likely to decline in population below that for which the project was designed.

(2) Projects must be designed and constructed so that adequate capacity will or can be made available to serve the present population of the area to the extent feasible and to serve the reasonably foreseeable growth needs of the area to the extent practicable.

(3) Projects must be necessary for orderly community development and consistent with a current comprehensive community water, waste disposal, or other current development plan for the rural area.

(d) Credit elsewhere. Applicants must certify in writing and the Agency shall determine and document that the applicant is unable to finance the proposed project from their own resources or through commercial credit at reasonable rates and terms.

(e) Legal authority and responsibility. Each applicant must have or will obtain the legal authority necessary for owning, constructing, operating, and maintaining the proposed facility or service and for obtaining, giving security for, and repaying the proposed loan. The applicant shall be responsible for operating, maintaining, and managing the facility, and providing for its continued availability and use at reasonable user rates and charges. This responsibility shall be exercised by the applicant even though the facility may be operated, maintained, or managed by a third party under contract or management agreement. Guidance for preparing a management agreement is available from the Agency. Such contracts, management agreements, or leases must not contain options or other provisions for transfer of ownership.

(f) Economic feasibility. All projects financed under the provisions of this section must be based on taxes, assessments, income, fees, or other satisfactory sources of revenues in an amount sufficient to provide for facility operation and maintenance, reasonable reserves, and debt payment. If the primary use of the facility is by business and the success or failure of the facility is dependent on the business, then the economic viability of that business must be assessed.

(g) Federal Debt Collection Act of 1990 (28 U.S.C. 3001 et seq.). An outstanding judgment obtained by the United States in a Federal Court (other than in the United States Tax Court), which has been recorded, shall cause the applicant to be ineligible to receive a loan or grant until the judgment is paid in full or otherwise satisfied.

(i) Reasonable fees and costs such as: legal, engineering, administrative services, fiscal advisory, recording, environmental analyses and surveys, possible salvage or other mitigation measures, planning, establishing or acquiring rights;
(ii) Costs of acquiring interest in land; rights, such as water rights, leases, permits, rights-of-way; and other evidence of land or water control or protection necessary for development of the facility;
(iii) Purchasing or renting equipment necessary to install, operate, maintain, extend, or protect facilities;
(iv) Cost of additional applicant labor and other expenses necessary to install and extend service; and
(v) In unusual cases, the cost for connecting the user to the main service line.
(2) Only loan funds may be used for:
(i) Interest incurred during construction in conjunction with multiple advances or interest on interim financing;
(ii) Initial operating expenses, including interest, for a period ordinarily not exceeding one year when the applicant is unable to pay such expenses;
(iii) The purchase of existing facilities when it is necessary either to improve service or prevent the loss of service;
(iv) Refinancing debts incurred by, or on behalf of, an applicant when all of the following conditions exist:
(A) The debts being refinanced are a secondary part of the total loan;
(B) The debts were incurred for the facility or service being financed or any part thereof; and
(C) Arrangements cannot be made with the creditors to extend or modify the terms of the debts so that a sound basis will exist for making a loan; and
(v) Prepayment of costs for which RUS grant funds were obligated.
(3) Grant funds may be used to restore loan funds used to prepay grant obligated costs.
(f) Construction incurred before loan or grant approval.
(1) Funds may be used to pay obligations for eligible project costs incurred before loan or grant approval if such requests are made in writing by the applicant and the Agency determines that:
(i) Compelling reasons exist for incurring obligations before loan or grant approval;
(ii) The obligations will be incurred for authorized loan or grant purposes; and
(iii) The Agency’s authorization to pay such obligations is on the condition that it is not committed to make the loan or grant; it assumes no responsibility for any obligations incurred by the applicant; and the applicant must subsequently meet all loan or grant approval requirements, including environmental and contracting requirements.
(2) If construction is started without Agency approval, post-approval in accordance with this section may be considered, provided the construction meets applicable requirements including those regarding approval and environmental matters.
(g) Water or sewer service may be provided through individual installations or small clusters of users within an applicant’s service area. The approval official should consider items such as: quantity and quality of the individual installations that may be developed; cost effectiveness of the individual facility compared with the initial and long term user cost on a central system; health and pollution problems attributable to individual facilities; operational or management problems peculiar to individual installations; and permit and regulatory agency requirements.
(1) Applicants providing service through individual facilities must meet the eligibility requirements in §1780.7.
(2) The Agency must approve the form of agreement between the applicant and individual users for the installation, operation, maintenance and payment for individual facilities.
(3) If taxes or assessments are not pledged as security, applicants providing service through individual facilities must obtain security necessary to assure collection of any sum the individual user is obligated to pay the applicant.
(4) Notes representing indebtedness owed the applicant by a user for an individual facility will be scheduled for

1059
§ 1780.10 Limitations.

(a) Loan and grant funds may not be used to finance:

(1) Facilities which are not modest in size, design, and cost;

(2) Loan or grant finder’s fees;

(3) The construction of any new combined storm and sanitary sewer facilities;

(4) Any portion of the cost of a facility which does not serve a rural area;

(5) That portion of project costs normally provided by a business or industrial user, such as wastewater pretreatment, etc.;

(6) Rental for the use of equipment or machinery owned by the applicant;

(7) For other purposes not directly related to operating and maintenance of the facility being installed or improved; and

(8) A judgment which would disqualify an applicant for a loan or grant as provided for in §1780.7(g).

(b) Grant funds may not be used to:

(1) Reduce EDU costs to a level less than similar system cost;

(2) Pay any costs of a project when the median household income of the service area is more than 100 percent of the nonmetropolitan median household income of the State;

(3) Pay project costs when other loan funding for the project is not at reasonable rates and terms; and

(4) Pay project costs when other funding is a guaranteed loan obtained in accordance with 7 CFR part 1779 of this title.

(c) Grants may not be made in excess of the following percentages of the RUS-eligible project development costs. Facilities previously installed will not be considered in determining the development costs.

<table>

§ 1780.11 Service area requirements.

(a) All facilities financed under the provisions of this part shall be for public use. The facilities will be installed so as to serve any potential user within the service area who desires service and can be feasibly and legally served. This does not preclude:

(1) Financing or constructing projects in phases when it is not practical to finance or construct the entire project at one time; and

(2) Financing or constructing facilities where it is not economically feasible to serve the entire area, provided economic feasibility is determined on the basis of the entire system and not by considering the cost of separate extensions to or parts thereof; the applicant publicly announces a plan for extending service to areas not initially receiving service from the system; and potential users located in the areas not to be initially served receive written notice from the applicant that service will not be provided until such time as it is economically feasible to do so.

(b) Should the Agency determine that inequities exist within the applicant’s service area for the same type of service proposed (i.e., water or waste
disposal) such inequities will be remedied by the applicant prior to loan or grant approval or included as part of the project. Inequities are defined as unjustified variations in availability, adequacy or quality of service. User rate schedules for portions of existing systems that were developed under different financing, rates, terms or conditions do not necessarily constitute inequities.

(c) Developers are normally expected to provide utility-type facilities in new or developing areas in compliance with appropriate State statutes. RUS financing will be considered to an eligible applicant only in such cases when failure to complete development would result in an adverse economic condition for the rural area (not the community being developed); the proposal is necessary to the success of a current area development plan; and loan repayment can be assured by:

(1) The applicant already having sufficient assured revenues to repay the loan; or

(2) Developers providing a bond or escrowed security deposit as a guarantee sufficient to meet expenses attributable to the area in question until a sufficient number of the building sites are occupied and connected to the facility to provide enough revenues to meet operating, maintenance, debt service, and reserve requirements. Such guarantees from developers will meet the requirements in §1780.39(c)(4)(ii); or

(3) Developers paying cash for the increased capital cost and any increased operating expenses until the developing area will support the increased costs; or

(4) The full faith and credit of a public body where the debt is evidenced by general obligation bonds; or

(5) The loan is to a public body evidenced by a pledge of tax revenue or assessments; or

(6) The user charges can become a lien upon the property being served and income from such lien can be collected in sufficient time to be used for its intended purposes.

§1780.13 Rates and terms.

(a) General. (1) Each loan will bear interest at the rate prescribed in RD Instruction 440.1, exhibit B. The interest rates will be set by the Agency for each quarter of the fiscal year. All rates will be adjusted to the nearest one-eighth of one per centum. The rate will be the lower of the rate in effect at the time of loan approval or the rate in effect at the time of loan closing unless the applicant otherwise chooses.

(2) If the interest rate is to be that in effect at loan closing on a loan involving multiple advances of RUS funds using temporary debt instruments, the interest rate charged shall be that in effect on the date when the first temporary debt instrument is issued.

(b) Poverty rate. The poverty interest rate will not exceed 5 per centum per annum. All poverty rate loans must comply with the following conditions:

(1) The primary purpose of the loan is to upgrade existing facilities or construct new facilities required to meet applicable health or sanitary standards; and

(2) The median household income of the service area is below the higher of the poverty line, or 80 percent of the Statewide nonmetropolitan median household income.

(c) Intermediate rate. The intermediate interest rate will be set at the poverty rate plus one-half of the difference between the poverty rate and the market rate, not to exceed 7 percent per annum. It will apply to loans that do not meet the requirements for the poverty rate and for which the median household income of the service area is not more than 100 percent of the nonmetropolitan median household income of the State.

(d) Market rate. The market interest rate will be set using as guidance the average of the Bond Buyer (11–GO Bond) Index for the four weeks prior to the first Friday of the last month before the beginning of the quarter. The market rate will apply to all loans that do not qualify for a different rate under paragraph (b) or (c) of this section.

(e) Repayment terms. The loan repayment period shall not exceed the useful life of the facility, State statute or 40
years from the date of the note or bond, whichever is less. Where RUS grant funds are used in connection with an RUS loan, the loan will be for the maximum term permitted by this part, State statute, or the useful life of the facility, whichever is less, unless there is an exceptional case where circumstances justify making an RUS loan for less than the maximum term permitted. In such cases, the reasons must be fully documented.

(1) Principal payments may be deferred in whole or in part for a period not to exceed 36 months following the date the first interest installment is due. If for any reason it appears necessary to permit a longer period of deferment, the Agency may authorize such deferment. Deferments of principal will not be used to:
   (i) Postpone the levying of taxes or assessments;
   (ii) Delay collection of the full rates which the borrower has agreed to charge users for its services as soon as those services become available;
   (iii) Create reserves for normal operation and maintenance;
   (iv) Make any capital improvements except those approved by the Agency which are determined to be essential to the repayment of the loan or to maintain adequate security; and
   (v) Make payment on other debt.

(2) Payment date. Loan payments will be scheduled to coincide with income availability and be in accordance with State law. If State law only permits principal plus interest (P&I) type bonds, annual or semiannual payments will be used. If practical monthly payments will be scheduled one full month following the date of loan closing; or semiannual or annual payments will be scheduled six or twelve full months, respectively, following the date of loan closing or any deferment period. Due dates falling on the 29th, 30th or 31st day of the month will be avoided.

(3) In all cases, including those in which RUS is jointly financing with another lender, the RUS payments of principal and interest should approximate amortized installments.

§ 1780.14 Security.

Loans will be secured by the best security position practicable in a manner which will adequately protect the interest of RUS during the repayment period of the loan. Specific security requirements for each loan will be included in a letter of conditions.

(a) Public bodies. Loans to such borrowers, including Federally recognized Indian tribes as appropriate, will be evidenced by notes, bonds, warrants, or other contractual obligations as may be authorized by relevant laws and by borrower’s documents, resolutions, and ordinances. Security, in the following order of preference, will consist of:
   (1) The full faith and credit of the borrower when the debt is evidenced by general obligation bonds; and/or
   (2) Pledges of taxes or assessments; and/or
   (3) Pledges of facility revenue and, when it is the customary financial practice in the State, liens will be taken on the interest of the applicant in all land, easements, rights-of-way, water rights, water purchase contracts, water sales contracts, sewage treatment contracts, and similar property rights, including leasehold interests, used or to be used in connection with the facility whether owned at the time the loan is approved or acquired with loan funds.

(b) Other-than-public bodies. Loans to other-than-public body applicants and Federally recognized Indian tribes, as appropriate, will be secured in the following order of preference:
   (1) Assignments of borrower income will be taken and perfected by filing, if legally permissible; and
   (2) A lien will be taken on the interest of the applicant in all land, easements, rights-of-way, water rights, water purchase contracts, water sales contracts, sewage treatment contracts and similar property rights, including leasehold interest, used, or to be used in connection with the facility whether owned at the time the loan is approved or acquired with loan funds. In unusual circumstances where it is not legally permissible or feasible to obtain a lien on such land (such as land rights obtained from Federal or local government agencies, and from railroads) and the approval official determines that
the interest of RUS is otherwise adequately secured, the lien requirement may be omitted as to such land rights. For existing borrowers where the Agency already has a security position on real property, the approval official may determine that the interest of the Government is adequately secured and not require additional liens on such land rights. When the subsequent loan is approved or the acquisition of real property is subject to an outstanding lien indebtedness, the next highest priority lien obtainable will be taken if the approval official determines that the loan is adequately secured.

(c) Joint financing security. For projects utilizing joint financing, when adequate security of more than one type is available, the other lender may take one type of security with RUS taking another type. For projects utilizing joint financing with the same security to be shared by RUS and another lender, RUS will obtain at least a parity position with the other lender. A parity position is to ensure that with joint security, in the event of default, each lender will be affected on a proportionate basis. A parity position will conform with the following unless an exception is granted by the approval official:

(1) It is not necessary for loans to have the same repayment terms. Loans made by other lenders involved in joint financing with RUS should be scheduled for repayment on terms similar to those customarily used in the State for financing such facilities.

(2) The use of a trustee or other similar paying agent by the other lender in a joint financing arrangement is acceptable to RUS. A trustee or other similar paying agent will not normally be used for the RUS portion of the funding unless required to comply with State law. The responsibilities and authorities of any trustee or other similar paying agent on projects that include RUS funds must be clearly specified by written agreement and approved by the State program official and the Office of the General Counsel (OGC). RUS must be able to deal directly with the borrower to enforce the provisions of loan and grant agreements and perform necessary servicing actions.

(3) In the event adequate funds are not available to meet regular installments on parity loans, the funds available will be apportioned to the lenders based on the respective current installments of principal and interest due.

(4) Funds obtained from the sale or liquidation of secured property or fixed assets will be apportioned to the lenders on the basis of the pro rata amount outstanding; provided, however, funds obtained from such sale or liquidation for a project that included RUS grant funds will be apportioned as required by the grant agreement.

(5) Protective advances must be charged to the borrower’s account and be secured by a lien on the security property. To the extent consistent with State law and customary lending practices in the area, repayment of protective advances made by either lender, for the mutual protection of both lenders, should receive first priority in apportionment of funds between the lenders. To ensure agreement between lenders, efforts should be made to obtain the concurrence of both lenders before one lender makes a protective advance.

§ 1780.15 Other Federal, State, and local requirements.

Proposals for facilities financed in whole or in part with RUS funds will be coordinated with appropriate Federal, State and local agencies. If there are conflicts between this part and State or local laws or regulatory commission regulations, the provisions of this part will control. Applicants will be required to comply with Federal, State, and local laws and any regulatory commission rules and regulations pertaining to:

(a) Organization of the applicant and its authority to own, construct, operate, and maintain the proposed facilities;

(b) Borrowing money, giving security therefore, and raising revenues for the repayment thereof;

(c) Land use zoning; and

(d) Health and sanitation standards and design and installation standards unless an exception is granted by RUS.
§ 1780.16 Selection priorities and process.

When ranking eligible applications for consideration for limited funds, Agency officials must consider the priority items met by each application and the degree to which those priorities are met. Points will be awarded as follows:

(a) Population priorities. (1) The proposed project will primarily serve a rural area having a population not in excess of 1,000—25 points;
(2) The proposed project primarily serves a rural area having a population between 1,001 and 2,500—15 points;
(3) The proposed project primarily serves a rural area having a population between 2,501 and 5,500—5 points.

(b) Health priorities. The proposed project is:
(1) Needed to alleviate an emergency situation, correct unanticipated diminution or deterioration of a water supply, or to meet Safe Drinking Water Act requirements which pertain to a water system—25 points;
(2) Required to correct inadequacies of a wastewater disposal system, or to meet health standards which pertain to a wastewater disposal system—25 points;
(3) Required to meet administrative orders issued to correct local, State, or Federal solid waste violations—15 points.

(c) Median household income priorities. The median household income of the population to be served by the proposed project is:
(1) Less than the poverty line if the poverty line is less than 80% of the statewide nonmetropolitan median household income—30 points;
(2) Less than 80 percent of the statewide nonmetropolitan median household income—20 points;
(3) Equal to or more than the poverty line and below 80% and 100%, inclusive, of the State’s nonmetropolitan median household income—15 points.

(d) Other priorities. (1) The proposed project will: merge ownership, management, and operation of smaller facilities providing for more efficient management and economical service—15 points;
(2) The proposed project will enlarge, extend, or otherwise modify existing facilities to provide service to additional rural areas—10 points;
(3) Applicant is a public body or Indian tribe—5 points;
(4) Amount of other than RUS funds committed to the project is:
(i) 50% or more—15 points;
(ii) 20% to 49%—10 points;
(iii) 5%—19%—5 points;
(5) Projects that will serve Agency identified target areas—10 points;
(6) Projects that primarily recycle solid waste products thereby limiting the need for solid waste disposal—5 points;
(7) The proposed project will serve an area that has an unreliable quality or supply of drinking water—10 points.

(e) In certain cases the State program official may assign up to 15 points to a project. The points may be awarded to projects in order to improve compatibility and coordination between RUS’s and other agencies’ selection systems, to ensure effective RUS fund utilization, and to assist those projects that are the most cost effective. A written justification must be prepared and placed in the project file each time these points are assigned.

(f) Cost overruns. An application may receive consideration for funding before others at the State or National Office level when it is a subsequent request for a previously approved project which has encountered construction cost overruns. The cost overruns must be due to high bids or unexpected construction problems that cannot be reduced by negotiations, redesign, use of bid alternatives, rebidding or other means. Cost overruns exceeding 20% of the development cost at time of loan or grant approval or where the scope of the original purpose has changed will not be considered under this paragraph.

(g) National office priorities. In selecting projects for funding at the National Office level State program official points may or may not be considered. The Administrator may assign up to 15 additional points to account for items such as geographic distribution of funds, the highest priority projects within a state, and emergency conditions caused by economic problems or natural disasters. The Administrator...
may delegate the authority to assign the 15 points to appropriate National Office staff.

§ 1780.18 Allocation of program funds.

(a) General. (1) The purpose of this part is to set forth the methodology and formulas by which the Administrator of the RUS allocates program funds to the States. (The term “State” means any of the States of the United States, the Commonwealth of Puerto Rico, any territory or possession of the United States, or the Western Pacific Areas.)

(2) The formulas in this part are used to allocate program loan and grant funds to Rural Development State offices so that the overall mission of the Agency can be carried out. Considerations used when developing the formulas include enabling legislation, congressional direction, and administration policies. Allocation formulas ensure that program resources are available on an equal basis to all eligible individuals and organizations.

(3) The actual amounts of funds, as computed by the methodology and formulas contained herein, allocated to a State for a funding period, are distributed to each State office. The allocated amounts are available for review in any Rural Development State office.

(b) Definitions—(1) Amount available for allocations. Funds appropriated or otherwise made available to the Agency for use in authorized programs. On occasion, the allocation of funds to States may not be practical for a particular program due to funding or administrative constraints. In these cases, funds will be controlled by the National Office.

(2) Basic formula criteria, data source and weight. Basic formulas are used to calculate a basic State factor as a part of the methodology for allocating funds to the States. The formulas take a number of criteria that reflect the funding needs for a particular program and through a normalization and weighting process for each of the criteria calculate the basic State factor (SF). The data sources used for each criteria are believed to be the most current and reliable information that adequately quantifies the criterion. The weight, expressed as a percentage, gives a relative value to the importance of each of the criteria.

(3) Basic formula allocation. The result of multiplying the amount available for allocation less the total of any amounts held in reserve or distributed by base or administrative allocation times the basic State factor for each State. The basic formula allocation (BFA) for an individual State is equal to:

\[
BFA = \frac{\text{Amount available for allocation} - \text{NO reserve} - \text{total base and administrative allocations}}{\text{Total amount of funds available for allocation this year}} \times \text{SF}
\]

(4) Transition formula. (i) A formula based on a proportional amount of previous year allocation used to maintain program continuity by preventing large fluctuations in individual State allocations. The transition formula limits allocation shifts to any particular State in the event of changes from year to year of the basic formula, the basic criteria, or the weights given the criteria. The transition formula first checks whether the current year’s basic formula allocation is within the transition range (plus or minus 20 percentage points of the proportional amount of the previous year’s BFA). The formula follows:

\[
\text{Transition Range} = 1.0 + \frac{\text{Maximum 20%}}{100} \times \frac{\text{Amount available for allocation this year} \times \text{State previous year BFA}}{\text{Amount available for allocation previous year}}
\]

(ii) If the current year’s State BFA is not within the transition range in paragraph (b)(4)(i) of this section, the State formula allocation is changed to the amount of the transition range limit closest to the BFA amount. After having performed this transition adjustment for each State, the sum of the funds allocated to all States will differ from the amount of funds available for BFA. This difference, whether a positive or negative amount, is distributed
to all States receiving a formula allocation by multiplying the difference by the SF. The end result is the transition formula allocation. The transition range will not exceed 40% (plus or minus 20%), but when a smaller range is used it will be stated in the individual program section.

(5) **Base allocation.** An amount that may be allocated to each State dependent upon the particular program to provide the opportunity for funding at least one typical loan or grant in each Rural Development State office. The amount of the base allocation may be determined by criteria other than that used in the basic formula allocation such as Agency historic data.

(6) **Administrative allocations.** Allocations made by the Administrator in cases where basic formula criteria information is not available. This form of allocation may be used when the Administrator determines the program objectives cannot be adequately met with a formula allocation.

(7) **Reserve.** An amount retained under the National Office control for each loan and grant program to provide flexibility in meeting situations of unexpected or justified need occurring during the fiscal year. The Administrator may make distributions from this reserve to any State when it is determined necessary to meet a program need or Agency objective. The Administrator may retain additional amounts to fund authorized demonstration programs.

(8) **Pooling of funds.** A technique used to ensure that available funds are used in an effective, timely and efficient manner. At the time of pooling those funds within a State’s allocation for the fiscal year or portion of the fiscal year, depending on the type of pooling, that have not been obligated by the State are placed in the National Office reserve. The Administrator will establish the pooling dates for each affected program.

(i) **Mid-year:** Mid-year pooling occurs near the midpoint of the fiscal year.

(ii) **Year-end:** Year-end pooling usually occurs near the first of August.

(iii) **Emergency:** The Administrator may pool funds at any time that it is determined the conditions upon the initial allocation was based have changed to such a degree that it is necessary to pool funds in order to efficiently carry out the Agency mission.

(9) **Availability of the allocation.** Program funds are made available to the Agency on a quarterly basis.

(10) **Suballocation by the Rural Development State Director.** The State Director may be directed or given the option of suballocating the State allocation to processing offices. When suballocating the State Director may retain a portion of the funds in a State office reserve to provide flexibility in situations of unexpected or justified need. When performing a suballocation the State Director will use the same formula, criteria and weights as used by the National Office.

(c) **Water and waste disposal loans and grants—**

(1) **Amount available for allocations.** See paragraph (b)(1) of this section.

(2) **Basic formula criteria, data source and weight.** See paragraph (b)(2) of this section.

(i) **The criteria used in the basic formula are:**

(A) State’s percentage of national rural population will be 50 percent.

(B) State’s percentage of national rural population with incomes below the poverty level will be 25 percent.

(C) State’s percentage of national nonmetropolitan unemployment will be 25 percent.

(ii) Data source for each of these criteria is based on the latest census data available. Each criterion is assigned a specific weight according to its relevance in determining need. The percentage representing each criterion is multiplied by the weight factor and summed to arrive at a State factor (SF). The SF cannot exceed .05, as follows:

\[
SF = (\text{criterion in paragraph (b)(1)(i) of this section} \times 50 \text{ percent}) + (\text{criterion in paragraph (b)(1)(ii) of this section} \times 25 \text{ percent}) + (\text{criterion in paragraph (b)(1)(iii) of this section} \times 25 \text{ percent})
\]

(3) **Basic formula allocation.** See paragraph (b)(3) of this section. States receiving administrative allocations do not receive formula allocations.

(4) **Transition formula.** See paragraph (b)(4) of this section. The percentage
range for the transition formula equals 30 percent (plus or minus 15%).

(5) **Base allocation.** See paragraph (b)(5) of this section. States receiving administrative allocations do not receive base allocations.

(6) **Administrative allocation.** See paragraph (b)(6) of this section. States participating in the formula and base allocation procedures do not receive administrative allocations.

(7) **Reserve.** See paragraph (b)(7) of this section. Any State may request reserve funds by forwarding a request to the National Office. Generally, a request for additional funds will not be honored unless the State has insufficient funds to obligate the loan requested.

(8) **Pooling of funds.** See paragraph (b)(8) of this section. Funds are generally pooled at mid-year and year-end. Pooled funds will be placed in the National Office reserve and will be made available administratively.

(9) **Availability of the allocation.** See paragraph (b)(9) of this section. The allocation of funds is made available for States to obligate on an annual basis although the Office of Management and Budget apportions it to the Agency on a quarterly basis.

(10) **Suballocation by the State Director.** See paragraph (b)(10) of this section. The State Director has the option to suballocate funds to processing offices.

§ 1780.25 Exception authority.

The Administrator may, in individual cases, make an exception to any requirement or provision of this part which is not inconsistent with the authorizing statute or other applicable law and is determined to be in the Government’s interest.
Subpart B—Loan and Grant Application Processing

§ 1780.31 General.

(a) Applicants are encouraged to contact the Agency processing office early in the planning stages of their project. Agency personnel are available to provide general advice and assistance regarding RUS programs, other funding sources, and types of systems or improvements appropriate for the applicants needs. The Agency can also provide access to technical assistance and other information resources for other project development issues such as public information, income surveys, developing rate schedules, system operation and maintenance, and environmental compliance requirements. Throughout the planning, application processing and construction of the project, Agency personnel will work closely and cooperatively with the applicant and their representatives, other State and Federal agencies and technical assistance providers.

(b) The processing office will handle initial inquiries and provide basic information about the program. They are to provide the application, SF 424.2, “Application for Federal Assistance (For Construction),” assist applicants as needed in completing SF 424.2, and in filing a request for intergovernmental review. Federally recognized Indian tribes are exempt from intergovernmental review. The processing office will explain eligibility requirements and meet with the applicant whenever necessary to discuss application processing.

(c) Applicants can make a written request for an eligibility determination in lieu of filing an SF 424.2 along with the information required by §1780.33. Applicants seeking only an eligibility determination, should contact the processing office to obtain a list of the items needed to make this determination. An eligibility determination for loan or grant assistance will not give an applicant priority for funding as set forth in §1780.17.

(d) Applications that are not developed in a reasonable period of time taking into account the size and complexity of the proposed project may be removed from the State’s active file. Applicants will be consulted prior to taking such action.

(e) Starting with the earliest discussion with prospective applicants, the State Environmental Coordinator shall discuss with prospective applicants and be available for consultation during the application process the environmental review requirements for evaluating the potential environmental consequences of the project. Pursuant to 7 CFR part 1794 and guidance in RUS Bulletin 1794A–602, the environmental review requirements shall be performed by the applicant simultaneously and concurrently with the project’s engineering planning and design. This should provide flexibility to consider reasonable alternatives to the project and development methods to mitigate identified adverse environmental effects. Mitigation measures necessary to avoid or minimize any adverse environmental effects must be integrated into project design.

§ 1780.32 Timeframes for application processing.

(a) The processing office will determine if the application is properly assembled. If not, the applicant will be notified within fifteen federal working days as to what additional submittal items are needed.

(b) The processing and approval offices will coordinate their reviews to ensure that the applicant is advised about eligibility and anticipated fund availability within 45 days of the receipt of a completed application.

§ 1780.33 Application requirements.

An initial application consists of the following:

(a) One copy of a completed SF 424.2;

(b) A copy of the State intergovernmental comments or one copy of the filed application for State intergovernmental review; and

(c) Two copies of the preliminary engineering report (PER) for the project.

(1) The PER may be submitted to the processing office prior to the rest of the application material if the applicant desires a preliminary review.
(2) The processing office will forward one copy of the PER with comments and recommendations to the State staff engineer for review upon receipt from the applicant.

(3) The State staff engineer will consult with the applicant’s engineer as appropriate to resolve any questions concerning the PER. Written comments will be provided by the State staff engineer to the processing office to meet eligibility determination time lines.

(d) Written certification that other credit is not available.

(e) Supporting documentation necessary to make an eligibility determination such as financial statements, audits, organizational documents, or existing debt instruments. The processing office will advise applicants regarding the required documents. Applicants that are indebted to RUS will not need to submit documents already on file with the processing office.

(f) Environmental Report. For those actions listed in §§1794.22(b) and 1794.23(b), the applicant shall submit, in accordance with RUS Bulletin 1794A–602, two copies of the completed Environmental Report.

(1) Upon receipt of the Environmental Report, the processing office shall forward one copy of the report with comments and recommendation to the State Environmental Coordinator for review.

(2) The State Environmental Coordinator will consult with the applicant as appropriate to resolve any environmental concerns. Written comments will be provided by the State Environmental Coordinator to the processing office to meet eligibility determination time lines.

(g) The applicant’s Internal Revenue Service Taxpayer Identification Number (TIN). The TIN will be used by the Agency to assign a case number which will be the applicant’s or transferee’s TIN preceded by State and County Code numbers. Only one case number will be assigned to each applicant regardless of the number of loans or grants or number of separate facilities, unless an exception is authorized by the National Office.

(h) Other Forms and certifications. Applicants will be required to submit the following items to the processing office, upon notification from the processing office to proceed with further development of the full application:

(1) Form RD 442-7, “Operating Budget”;

(2) Form RD 1910-11, “Application Certification, Federal Collection Policies for Consumer or Commercial Debts”;

(3) Form RD 400-1, “Equal Opportunity Agreement”;

(4) Form RD 400-4, “Assurance Agreement”;

(5) Form AD–1047, “Certification Regarding Debarment, Suspension and other Responsibility Matters”;

(6) Form AD–1049, Certification regarding Drug-Free Workplace Requirements (Grants) Alternative I For Grantees Other Than Individuals;

(7) Certifications for Contracts, Grants, and Loans (Regarding Lobbying); and

(8) Certification regarding prohibited tying arrangements. Applicants that provide electric service must provide the Agency a certification that they will not require users of a water or waste facility financed under this part to accept electric service as a condition of receiving assistance.

§ 1780.34 [Reserved]

§ 1780.35 Processing office review.

Review of the application will usually include the following:

(a) Nondiscrimination. Boundaries for the proposed service area must not be chosen in such a way that any user or area will be excluded because of race, color, religion, sex, marital status, age, handicap, or national origin. This does not preclude construction of the project in phases as noted in §1780.11 as long as it is not done in a discriminatory manner.

(b) Grant determination. Grants will be determined by the processing office in accordance with the following provisions and will not result in EDU costs below similar system user cost.

(1) Maximum grant. Grants may not exceed the percentages in §1780.10(c) of the eligible RUS project development costs listed in §1780.9.
(2) **Debt service.** Applicants will be considered for grant assistance when the debt service portion of the average annual EDU cost, for users in the applicant’s service area, exceeds the following percentages of median household income:

(i) 0.5 percent when the median household income of the service area is equal to or below 80% of the statewide nonmetropolitan median income.

(ii) 1.0 percent when the median household income of the service area exceeds the 0.5 percent requirement but is not more than 100 percent the statewide nonmetropolitan household income.

(3) **Similar system cost.** If the grant determined in paragraph (b)(2) of this section results in an annual EDU cost that is not comparable with similar systems, the Agency will determine a grant amount based on achieving EDU costs that are not below similar system user costs.

(4) **Wholesale service.** When an applicant provides wholesale sales or services on a contract basis to another system or entity, similar wholesale system cost will be used in determining the amount of grant needed to achieve a reasonable wholesale user cost.

(5) **Subsidized cost.** When annual cost to the applicant for delivery of service is subsidized by either the state, commonwealth, or territory, and uniform flat user charges regardless of usage are imposed for similar classes of service throughout the service area, the Agency may proceed with a grant in an amount necessary to reduce such delivery cost to a reasonable level.

(c) **User charges.** The user charges should be reasonable and produce enough revenue to provide for all costs of the facility after the project is complete. The planned revenue should be sufficient to provide for all debt service, debt reserve, operation and maintenance, and, if appropriate, additional revenue for facility replacement of short-lived assets without building a substantial surplus. Ordinarily, the total debt service reserve will be equal to one average annual loan installment which will accumulate at the rate of one-tenth of the total each year.

§ 1780.36 Approving official review.

Projects may be obligated as their applications are completed and approved.

(a) **Selection of applications for further processing.** The application and supporting information submitted will be used to determine the applications selected for further development and funding. After completing the review, the approval official will normally select those eligible applications with the highest priority scores for further processing. When authorizing the development of an application for funding, the following will be considered:

(1) Funds available in State allocation;

(2) Anticipated allocation of funds for the next fiscal year; and

(3) Time necessary for applicant to complete the application.

(b) **Lower scoring projects.** (1) In cases where preliminary cost estimates indicate that an eligible, high scoring application is unfeasible or would require an amount of funding from RUS that exceeds either 25 percent of a State’s current annual allocation or an amount greater than that remaining in the State’s allocation, the approval official may instead select the next lower scoring application for further processing provided the high scoring applicant is notified of this action and given an opportunity to revise the proposal and resubmit it.

(2) If it is found that there is no effective way to reduce costs or no other funding sources, the approval official, after consultation with applicant, may submit a request for an additional allocation of funds for the proposed project to the National Office. The request should be submitted during the fiscal year in which obligation is anticipated. Such request will be considered along with all others on hand. A written justification must be prepared and placed in the project file.

§ 1780.37 Applications determined ineligible.

If at any time an application is determined ineligible, the processing office will notify the applicant in writing of the reasons. The notification to the applicant will state that an appeal of this
§ 1780.39 Application processing.

(a) Processing conference. Before starting to assemble the full application, the applicant should arrange through the processing office an application conference to provide a basis for orderly application assembly. The processing office will explain program requirements, public information requirements and provide guidance on preparation of items necessary for approval.

(b) Professional services and contracts related to the facility. Fees provided for in contracts or agreements shall be reasonable. The Agency shall consider fees to be reasonable if they are not in excess of those ordinarily charged by the profession as a whole for similar work when RUS financing is not involved. Applicants will be responsible for providing the services necessary to plan projects including design of facilities, environmental review and documentation requirements, preparation of cost and income estimates, development of proposals for organization and financing, and overall operation and maintenance of the facility. Applicants should negotiate for procurement of professional services, whereby competitors’ qualifications are evaluated and the most qualified competitor is selected, subject to negotiations of fair and reasonable compensation. Contracts or other forms of agreement between the applicant and its professional and technical representatives are required and are subject to RUS concurrence.

(1) Engineering and architectural services. (i) Applicants shall publicly announce all requirements for engineering and architectural services, and negotiate contracts for engineering and architectural services on the basis of demonstrated competence and qualifications for the type of professional services required and at a fair and reasonable price.

(ii) When project design services are procured separately, the selection of the engineer or architect shall be done by requesting qualification-based proposals and in accordance with this section.

(iii) Applicants may procure engineering and architectural services in accordance with applicable State statutes or local requirements provided the State Director determines that such procurement meets the intent of this section.

(2) Other professional services. Professional services of the following may be necessary: Attorney, bond counsel, accountant, auditor, appraiser, environmental professionals, and financial advisory or fiscal agent (if desired by applicant). Guidance on entering into an agreement for legal services is available from the Agency.

(3) Bond counsel. Unless otherwise provided by subpart D of this part, public bodies are required to obtain the service of recognized bond counsel in the preparation of evidence of indebtedness.

(4) Contracts for other services. Contracts or other forms of agreements for other services including management, operation, and maintenance will be developed by the applicant and presented to the Agency for review and concurrence. Guidance on entering into a management agreement is available from the Agency.

(c) User estimates. Applicants dependent on users fees for debt payment or operation and maintenance expenses shall base their income and expense forecast on realistic user estimates. For users presently not receiving service, consideration must be given to the following:

(1) An estimated number of maximum users should not be used when setting user fees and rates since it may be several years before all residents will need service by the system. In establishing rates a realistic number of users should be employed.

(2) New user cash contributions. The amount of cash contributions required will be set by the applicant and considered in by the approval official. Contributions should be an amount high enough to indicate sincere interest on the part of the potential user, but not so high as to preclude service to low income families. Contributions ordinarily should be an amount approximating one year’s minimum user fee,
and shall be paid in full before loan closing or commencement of construction, whichever occurs first. Once economic feasibility is ascertained based on a demonstration of potential user cash contributions, the contribution, membership fee or other fees that may be imposed are not a loan requirement under this section. A new user cash contribution is not required when:

(i) The Agency determines that the potential users as a whole in the applicant’s service area cannot make cash contributions; or

(ii) State statutes or local ordinances require mandatory use of the system and the applicant or legal entity having such authority agrees in writing to enforce such statutes, or ordinances.

(3) An enforceable user agreement with a penalty clause is required (RUS Bulletin 1780–9 can be used) except:

(i) For users presently receiving service; or

(ii) Where mandatory use of the system is required.

(4) Individual vacant property owners will not be considered when determining project feasibility unless:

(i) The owner has plans to develop the property in a reasonable period of time and become a user of the facility; and

(ii) The owner agrees in writing to make a monthly payment at least equal to the proportionate share of debt service attributable to the vacant property until the property is developed and the facility is utilized on a regular basis. A bond or escrowed security deposit must be provided to guarantee this monthly payment and to guarantee an amount at least equal to the owner’s proportionate share of construction costs. If a bond is provided, it must be executed by a surety company that appears on the Treasury Department’s most current list (Circular 570, as amended) and be authorized to transact business in the State where the project is located. The guarantee shall be payable jointly to the borrower and the United States of America.

(5) Applicants must provide a positive program to encourage connection by all users as soon as service is available. The program will be available for review and concurrence by the processing office before loan closing or commencement of construction, whichever occurs first. Such a program shall include:

(i) An aggressive information program to be carried out during the construction period. The applicant should send written notification to all signed users in advance of the date service will be available, stating the date users will be expected to have their connections completed, and the date user charges will begin;

(ii) Positive steps to assure that installation services will be available. These may be provided by the contractor installing the system, local plumbing companies, or local contractors;

(iii) Aggressive action to see that all signed users can finance their connections.

(d) Interim financing. For all loans exceeding $500,000, where funds can be borrowed at reasonable interest rates on an interim basis from commercial sources for the construction period, such interim financing may be obtained so as to preclude the necessity for multiple advances of RUS loan funds. However, the approval official may make an exception when interim financing is cost prohibitive or unavailable. Guidance on informing the private lender of RUS’s commitment is available from the Agency. When interim commercial financing is used, the application will be processed, including obtaining construction bids, to the stage where the RUS loan would normally be closed, that is immediately prior to the start of construction. The RUS loan should be closed as soon as possible after the disbursal of all interim funds.

(e) Reserve requirements. Provision for the accumulation of necessary reserves over a reasonable period of time will be included in the loan documents.

(1) General obligation or special assessment bonds. Ordinarily, the requirements for reserves will be considered to have been met if general obligation or other bonds which pledge the full faith and credit of the political subdivision are used, or special assessment bonds are used, and if such bonds provide for the annual collection of sufficient
taxes or assessments to cover debt service.
(2) Other than general obligation or special assessment bonds. Each borrower will be required to establish and maintain reserves sufficient to assure that loan installments will be paid on time, for emergency maintenance, for extensions to facilities, and for replacement of short-lived assets which have a useful life significantly less than the repayment period of the loan. Borrowers issuing bonds or other evidences of debt pledging facility revenues as security will plan their debt reserve to provide for at least one average annual loan installment. The debt reserve will accumulate at the rate of one-tenth of an average annual loan installment each year unless prohibited by state law.

(f) Membership authorization. For organizations other than public bodies, the membership will authorize the project and its financing. Form RD 1942-8, “Resolution of Members or Stockholders,” may be used for this authorization. The approval official may accept RUS Bulletin 1780-28, “Loan Resolution Security Agreement,” without such membership authorization when State statutes and the organization’s charter and bylaws do not require such authorization; and
(1) The organization is well established and is operating with a sound financial base; or
(2) The members of the organization have all signed an enforceable user agreement with a penalty clause and have made the required meaningful user cash contribution.

(g) Insurance. The purpose of RUS’s insurance requirements is to protect the government’s financial interest based on the facility financed with loan funds. It is the responsibility of the applicant and not that of RUS to assure that adequate insurance and fidelity or employee dishonesty bond coverage is maintained. The requirements below apply to all types of coverage determined necessary. The approval official may grant exceptions to normal requirements when appropriate justification is provided establishing that it is in the best interest of the applicant and will not adversely affect the government’s interest.

(1) Insurance requirements proposed by the applicant will be accepted if the processing office determines that proposed coverage is adequate to protect the government’s financial interest. Applicants are encouraged to have their attorney, consulting engineer, and/or insurance provider(s) review proposed types and amounts of coverage, including any deductible provisions.
(2) The use of deductibles may be allowed by RUS providing the applicant has financial resources which would likely be adequate to cover potential claims requiring payment of the deductible.
(3) Fidelity or employee dishonesty bonds. Applicants will provide coverage for all persons who have access to funds, including persons working under a contract or management agreement. Coverage may be provided either for all individual positions or persons, or through “blanket” coverage providing protection for all appropriate employees. An exception may be granted by the approval official when funds relating to the facility financed are handled by another entity and it is determined that the entity has adequate coverage or the government’s interest would otherwise be adequately protected. The amount of coverage required by RUS will normally approximate the total annual debt service requirements for the RUS loans.
(4) Property insurance. Fire and extended coverage will normally be maintained on all structures except as noted below. Ordinarily, RUS should be listed as mortgagee on the policy when RUS has a lien on the property. Normally, major items of equipment or machinery located in the insured structures must also be covered. Exceptions:
(i) Reservoirs, pipelines and other structures if such structures are not normally insured;
(ii) Subsurface lift stations except for the value of electrical and pumping equipment therein.
(5) General liability insurance, including vehicular coverage.
(6) Flood insurance required for facilities located in special flood-and mudslide-prone areas.
§ 1780.40

(7) Worker’s compensation. The borrower will carry worker’s compensation insurance for employees in accordance with State laws.

(h) [Reserved]

(i) The processing office will assure that appropriate forms and documents listed in RUS Bulletin 1780–6 are complete. Letters of conditions will not be issued unless funds are available.

§ 1780.41 Loan or grant approval.

(a) The processing office will submit the following to the approval official:

(1) Form RD 1942–45, “Project Summary”;

(2) Form RD 442–7, “Operating Budget”;

(3) Form RD 442–3, “Balance Sheet” or a financial statement or audit that includes a balance sheet;

(4) Form RD 442–14, “Association Project Fund Analysis”;

(5) “Letter of Conditions”;

(7) Form RD 1940–1, “Request for Obligations of Funds”;

(b) Approval and applicant notification will be accomplished by mailing to the applicant on the obligation date a copy of Form RD 1940–1. The date the applicant is notified is also the date the interest rate at loan approval is established.

§ 1780.42 Transfer of obligations.

An obligation of funds established for an applicant may be transferred to a different (substituted) applicant provided:

(a) The substituted applicant is eligible and has the authority to receive the assistance approved for the original applicant; and

(b) The need, purpose(s) and scope of the project for which RUS funds will be used remain substantially unchanged.

§ 1780.43 [Reserved]

§ 1780.44 Actions prior to loan or grant closing or start of construction, whichever occurs first.

(a) Applicants must provide evidence of adequate insurance and fidelity or employee dishonesty bond coverage.

(b) Verification of users and other funds. In connection with a project that involves new users and will be secured by a pledge of user fees or revenues, the processing office will authenticate the number of users. Ordinarily, each signed user agreement will be reviewed and checked for evidence of cash contributions. If during the review any indication is received that all signed users may not connect to the system, there will be such additional investigation made as deemed necessary to determine the number of users who will connect to the system.

(c) Initial compliance review. An initial compliance review should be completed under subpart E of part 1901 of this title.

(d) Applicant contribution. An applicant contributing funds toward the project cost shall deposit these funds in its project account before start of construction. Project costs paid with applicant funds prior to the required deposit time shall be appropriately accounted for.

(e) Excess RUS loan and grant funds. If there is a significant reduction in project cost, the applicant’s funding needs will be reassessed. Decreases in RUS funds will be based on revised project costs and current number of users, however, other factors including RUS regulations used at the time of loan or grant approval will remain the same. Obligated loan or grant funds not needed to complete the proposed project will be deobligated. Any reduction will be applied to grant funds first. In such cases, applicable forms, the letter of conditions, and other items will be revised.

(f) Evidence of and disbursement of other funds. Applicants expecting funds from other sources for use in completing projects being partially financed with RUS funds will present
evidence of the commitment of these funds from such other sources. An agreement should be reached with all funding sources on how funds are to be disbursed before the start of construction. RUS funds will not be used to pre-finance funds committed to the project from other sources.

(g) Acquisition of land, easements, water rights, and existing facilities. Applicants are responsible for acquisition of all property rights necessary for the project and will determine that prices paid are reasonable and fair. RUS may require an appraisal by an independent appraiser or Agency employee.

(1) Rights-of-way and easements. Applicants will obtain valid, continuous and adequate rights-of-way and easements needed for the construction, operation, and maintenance of the facility.

(i) The applicant must provide a legal opinion relative to the title to rights-of-way and easements. Form RD 442-22, “Opinion of Counsel Relative to Rights-of-Way,” may be used. When a site is for major structures such as a reservoir or pumping station and the applicant is able to obtain only a right-of-way or easement on such a site rather than a fee simple title, the applicant will furnish a title report thereon by the applicant’s attorney showing ownership of the land and all mortgages or other lien defects, restrictions, or encumbrances, if any.

(ii) For user connections funded by RUS, applicants will obtain adequate rights to construct and maintain the connection line or other facilities located on the user’s property. This right may be obtained through formal easement or user agreements.

(2) Title for land or existing facilities. Title to land essential to the successful operation of facilities or title to facilities being purchased, must not contain any restrictions that will adversely affect the suitability, successful operation, security value, or transferability of the facility. Preliminary and final title opinions must be provided by the applicant’s attorney. The opinions must be in sufficient detail to assess marketability of the property. Form RD 1927-9, “Preliminary Title Opinion,” and Form RD 1927-10, “Final Title Opinion,” may be used to provide the required title opinions.

(i) In lieu of receiving title opinions from the applicant’s attorney, the applicant may use a title insurance company. If a title insurance company is used, the applicant must provide the Agency a title insurance binder, disclosing all title defects or restrictions, and include a commitment to issue a title insurance policy. The policy should be in an amount at least equal to the market value of the property as improved. The title insurance binder and commitment should be provided to the Agency prior to requesting closing instructions. The Agency will be provided a title insurance policy which will insure RUS’s interest in the property without any title defects or restrictions which have not been waived by the Agency.

(ii) The approval official may waive title defects or restrictions, such as utility easements, that do not adversely affect the suitability, successful operation, security value, or transferability of the facility.

(3) Water rights. The following will be furnished as applicable:

(i) A statement by the applicant’s attorney regarding the nature of the water rights owned or to be acquired by the applicant (such as conveyance of title, appropriation and decree, application and permit, public notice and appropriation and use).

(ii) A copy of a contract with another company or municipality to supply water; or stock certificates in another company which represents the right to receive water.

(4) Lease agreements. Where the right of use or control of real property not owned by the applicant is essential to the successful operation of the facility during the life of the loan, such right will be evidenced by written agreements or contracts between the owner of the property and the applicant. Lease agreements shall not contain provisions for restricted use of the site of facility, forfeiture or summary cancellation clauses. Lease agreements shall provide for the right to transfer, encumber, assign and sub-lease without restriction. Lease agreements will ordinarily be written for a term at least equal to the term of the loan. Such lease contracts or agreements will be approved by the approval official with
the advice and counsel of OGC, as necessary.

(h) Obtaining loan closing instructions. The information required by OGC will be transmitted to OGC with request for closing instructions. Upon receipt of closing instructions, the processing office will discuss with the applicant and its engineer, attorney, and other appropriate representatives, the requirements contained therein and any actions necessary to proceed with closing. State program officials have the option to work with OGC to obtain waivers for closing instructions in certain cases. Closing instructions are not required for grants.

§ 1780.45 Loan and grant closing and delivery of funds.

(a) Loan closing. Notes and bonds will be completed on the date of loan closing except for the entry of subsequent RUS multiple advances where applicable. The amount of each note will be in multiples of not less than $100. The amount of each bond will ordinarily be in multiples of not less than $1,000.

1. Form RD 440–22, “Promissory Note (Association or Organization),” will ordinarily be used for loans to non-public bodies.
2. RUS Bulletins 1780–27, “Loan Resolution (Public Bodies),” or 1780–28, “Loan Resolution Security Agreement,” will be adopted by public and other-than-public bodies. These resolutions supplement other provisions in this part.
3. Subpart D of this part contains instructions for preparation of notes and bonds evidencing indebtedness of public bodies.

(b) Loan disbursement. (1) Multiple advances. Multiple advances will be used only for loans in excess of $100,000. Advances will be made only as needed to cover disbursements required by the borrower over a 30-day period.

1. Subpart D of this part contains instructions for making multiple advances to public bodies.
2. Advances will be requested by the borrower in writing. The request should be in sufficient amounts to pay cost of construction, rights-of-way and land, legal, engineering, interest, and other expenses as needed. The borrower may use Form RD 440–11, “Estimate of Funds Needed for 30 Day Period Commencing XXX,” to show the amount of funds needed during the 30-day period.

(2) RUS loan funds obligated for a specific purpose, such as the paying of interest, but not needed at the time of loan closing will remain in the Finance Office until needed unless State statutes require all funds to be delivered to the borrower at the time of closing. Loan funds may be advanced to prepay costs under §1780.9(e)(2)(iv). If all funds must be delivered to the borrower at the time of closing to comply with State statutes, funds not needed at loan closing will be handled as follows:

1. Deposited in an appropriate borrower account, such as debt service or construction accounts; or
2. Deposited in a joint bank account under paragraph (e)(3) of this section.

(c) Grant closing. RUS Bulletin 1780–12 “Water or Waste System Grant Agreement” of this part will be completed and executed in accordance with the requirements of grant approval. The grant will be considered closed when RUS Bulletin 1780–12 has been properly executed. Processing or approval officials are authorized to sign the grant agreement on behalf of RUS. For grants that supplement RUS loan funds, the grant should be closed simultaneously with the closing of the loan. However, when grant funds will be disbursed before loan closing, as provided in paragraph (d)(1) of this section, the grant will be closed not later than the delivery date of the first advance of grant funds.

(d) Grant disbursements. RUS policy is not to disburse grant funds from the Treasury until they are actually needed by the applicant. Applicant funds will be disbursed before the disbursal of any RUS grant funds. RUS loan funds will be disbursed before the disbursal of any RUS grant funds except when:

1. Interim financing of the total estimated amount of loan funds needed during construction is arranged; and
2. All interim funds have been disbursed; and
3. RUS grant funds are needed before the RUS loan can be closed.

(e) Use and accountability of funds. (1) Arrangements will be agreed upon for the prior concurrence by the Agency of
§ 1780.47

(b) Method of accounting and preparation of financial statements. Annual organization-wide financial statements must be prepared on the accrual basis of accounting, in accordance with generally accepted accounting principles (GAAP), unless State statutes or regulatory agencies provide otherwise, or an exception is granted by the Agency. An organization may maintain its accounting records on a basis other than...
accrual accounting, and make the necessary adjustments so that annual financial statements are presented on the accrual basis.

(c) Record retention. Each borrower shall retain all records, books, and supporting material for 3 years after the issuance of the audit or management reports. Upon request, this material will be made available to RUS, Office of the Inspector General (OIG), United States Department of Agriculture (USDA), the Comptroller General, or to their assignees.

(d) Audits. All audits are to be performed in accordance with the latest revision of the generally accepted government auditing standards (GAGAS), developed by the Comptroller General of the United States. In addition, the audits are also to be performed in accordance with various Office of Management and Budget (OMB) Circulars. The type of audit each borrower is required to submit will be designated by RUS. Further guidance on preparing an acceptable audit can be obtained from RUS. It is not intended that audits required by this part be separate and apart from audits performed in accordance with State and local laws. To the extent feasible, the audit work should be done in conjunction with those audits. Audits shall be annual unless otherwise prohibited and supplied to the processing office as soon as possible but in no event later than 150 days following the period covered by the audit. OMB Circulars are available in any USDA/RUS office.

(e) Borrowers exempt from audits. All borrowers who are exempt from audits, will, within 60 days following the end of each fiscal year, furnish the RUS with annual financial statements, consisting of a verification of the organization’s balance sheet and statement of income and expense by an appropriate official of the organization. Forms RD 442-2, “Statement of Budget, Income and Equity,” and 442-3 may be used.

(f) Management reports. These reports will furnish management with a means of evaluating prior decisions and serve as a basis for planning future operations and financial strategies. In those cases where revenues from multiple sources are pledged as security for an RUS loan, two reports will be required: one for the project being financed by RUS and one combining the entire operation of the borrower. In those cases where RUS loans are secured by general obligation bonds or assessments and the borrower combines revenues from all sources, one management report combining all such revenues is acceptable. The following management data will be submitted by the borrower to the processing office. These reports at a minimum will include a balance sheet and income and expense statement.

1. Quarterly reports. A quarterly management report will be required for the first year for new borrowers and for all borrowers experiencing financial or management problems for one year from the date problems were noted. If the borrower’s account is current at the end of the year, the processing office may waive the required reports.

2. Annual management reports. Prior to the beginning of each fiscal year the following will be submitted to the processing office. (If Form RD 442-2 is used as the annual management report, enter data in column three only of Schedule 1, and complete all of Schedule 2.)

(i) Two copies of the management reports and proposed “Annual Budget”.

(ii) Financial information may be reported on Form RD 442-2 which includes Schedule 1, “Statement of Budget, Income and Equity,” and Schedule 2, “Projected Cash Flow” or information in similar format.

(iii) A copy of the rate schedule in effect at the time of submission.

(g) Substitute for management reports. When RUS loans are secured by the general obligation of the public body or tax assessments which total 100 percent of the debt service requirements, the State program official may authorize an annual audit to substitute for other management reports if the audit is received within 150 days following the period covered by the audit.

§ 1780.48 Regional commission grants.

Grants are sometimes made by regional commissions for projects eligible for RUS assistance. RUS has agreed to administer such funds in a manner similar to administering RUS assistance.
§ 1780.49 Rural or Native Alaskan villages.

(a) General. (1) This section contains regulations for providing grants to remedy the dire sanitation conditions in rural Alaskan villages using funds specifically made available for this purpose.

(2) Unless specifically modified by this section, grants will be made, processed, and serviced in accordance with this subpart.

(b) Definitions—(1) Dire sanitation condition. For the purpose of this section a dire sanitation condition exists where:

(i) Recurring instances of a waterborne communicable disease have been documented; or

(ii) No community-wide water and sewer system exists and individual residents must haul water to or human waste from their homes and/or use pit privies.

(2) Rural or Native Alaskan village. A rural or Native Alaskan community which meets the definition of a village under State statutes and does not have a population in excess of 10,000 inhabitants, according to the latest decennial Census of the United States.

(c) Eligibility. (1) The applicant must be a rural or Native Alaskan village.

(2) The median household income of the village cannot exceed 110 percent of the statewide nonmetropolitan household income.

(3) A dire sanitation condition must exist in the village.

(4) The applicant must obtain 25 percent of project development costs from State or local contributions. The local contribution can be from loan funds authorized under this part.

(d) Grant amount. Grants will be made for up to 75 percent of the project development costs.

(e) Use of funds. Grant funds can be used to pay reasonable costs associated with providing potable water or waste disposal services to residents of rural or Native Alaskan villages.

(f) Construction. (1) If the State of Alaska is contributing to the project costs, the project does not have to meet the construction requirements of this subpart.

(2) If a loan is made in accordance with this part for part of the local contribution, all of the requirements of this part apply.

§ 1780.53 General.

This subpart is specifically designed for use by owners including the professional or technical consultants or agents who provide assistance and services such as engineering, environmental, inspection, financial, legal or other services related to planning, designing, bidding, contracting, and constructing water and waste disposal facilities. These procedures do not relieve the owner of the contractual obligations that arise from the procurement of these services. For this subpart, an owner is defined as an applicant, borrower, or grantee.

§ 1780.54 Technical services.

Owners are responsible for providing the engineering, architect and environmental services necessary for planning, designing, bidding, contracting, inspecting, and constructing their facilities. Services may be provided by the owner's “in house” engineer or architect or through contract, subject to Agency concurrence. Engineers and architects must be licensed in the State where the facility is to be constructed.

§ 1780.55 Preliminary engineering reports and Environmental Reports.

Preliminary engineering reports (PERs) must conform to customary professional standards. PER guidelines for water, sanitary sewer, solid waste, and storm sewer are available from the Agency. Environmental Reports must meet the policies and intent of the National Environmental Policy Act and RUS procedures. Guidelines for preparing Environmental Reports are available in RUS Bulletin 1794A–602.

[64 FR 29946, June 4, 1999]

§ 1780.56 [Reserved]

§ 1780.57 Design policies.

Facilities financed by the Agency will be designed and constructed in accordance with sound engineering practices, and must meet the requirements of Federal, State and local agencies.

(a) Environmental review. Facilities financed by the Agency must undergo an environmental impact analysis in accordance with the National Environmental Policy Act and RUS procedures. Facility planning and design must not only be responsive to the owner’s needs but must consider the environmental consequences of the proposed project. Facility design shall incorporate and integrate, where practicable, mitigation measures that avoid or minimize adverse environmental impacts. Environmental reviews serve as a means of assessing environmental impacts of project proposals, rather than justifying decisions already made. Applicants may not take any action on a project proposal that will have an adverse environmental impact or limit the choice of reasonable project alternatives being reviewed prior to the completion of the Agency’s environmental review.

(b) Architectural barriers. All facilities intended for or accessible to the public or in which physically handicapped persons may be employed must be developed in compliance with the Architectural Barriers Act of 1968 (42 U.S.C. 4151 et seq.) as implemented by 41 CFR 101–19.6, section 504 of the Rehabilitation Act of 1973 (42 U.S.C 1474 et seq.) as implemented by 7 CFR parts 15 and 15b, and Titles II and III of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.).

(c) Energy/environment. Facility design should consider cost effective energy-efficient and environmentally-sound products and services.

(d) Fire protection. Water facilities should have sufficient capacity to provide reasonable fire protection to the extent practicable.

(e) Growth capacity. Facilities should have sufficient capacity to provide for reasonable growth to the extent practicable.

(f) Water conservation. Owners are encouraged, when economically feasible, to incorporate water conservation practices into a facility’s design. For existing water systems, evidence must be provided showing that the distribution system water losses do not exceed reasonable levels.
(g) **Conformity with State drinking water standards.** No funds shall be made available under this part for a water system unless the Agency determines that the water system will make significant progress toward meeting the standards established under title XIV of the Public Health Service Act (commonly known as the ‘Safe Drinking Water Act’) (42 U.S.C. 300f et seq.).

(h) **Conformity with Federal and State water pollution control standards.** No funds shall be made available under this part for a water treatment discharge or waste disposal system unless the Agency determines that the effluent from the system conforms with applicable Federal and State water pollution control standards.

(i) **Combined sewers.** New combined sanitary and storm water sewer facilities will not be financed by the Agency. Extensions to existing combined systems can only be financed when separate systems are impractical.

(j) **Dam safety.** Projects involving any artificial barrier which impounds or diverts water, or the rehabilitation or improvement of such a barrier, must comply with the provisions for dam safety as set forth in the Federal Guidelines for Dam Safety (Government Printing Office stock No. 041–001–00187–5, Superintendent of Documents, Attn: New Orders, P.O. Box 371954, Pittsburgh, PA 15250–7954) as prepared by the Federal Coordinating Council for Science, Engineering and Technology.

(k) **Pipe.** All pipe used shall meet current American Society for Testing Materials (ASTM) or American Water Works Association (AWWA) standards.

(l) **Water system testing.** For new water systems or extensions to existing water systems, leakage shall not exceed limits set by either ASTM or AWWA whichever is the more stringent.

(m) **Metering devices.** Water facilities financed by the Agency will have metering devices for each connection. An exception to this requirement may be granted by the State program official when the owner demonstrates that installation of metering devices would be a significant economic detriment and that environmental considerations would not be adversely affected by not installing such devices. Sanitary sewer projects should incorporate water system metering devices whenever practicable.

(n) **Economical service.** The facility’s design must provide the most economical service practicable.

(o) **Seismic safety.** All new structures, fully or partially enclosed, used or intended for sheltering persons or property will be designed with appropriate seismic safety provisions in compliance with the Earthquake Hazards Reduction Act of 1977 (42 U.S.C. 7701 et seq.), and Executive Order 12699. Seismic Safety of Federal and Federally Assisted or Regulated New Building Construction (3 CFR, 1990 Comp., p. 269). Designs of components essential for system operation and substantial rehabilitation of structures that are used for sheltering persons or property should incorporate seismic safety provisions to the extent practicable. RUS implementing regulations for seismic safety are in 7 CFR part 1972, subpart C.

§§ 1780.58–1780.60 [Reserved]

§ 1780.61 **Construction contracts.**

Contract documents must be sufficiently descriptive and legally binding in order to accomplish the work as economically and expeditiously as possible.

(a) **Standard construction contract documents.** If the construction contract documents utilized are not in the format previously approved by the Agency, OGC’s review of the construction contract documents will be obtained prior to their use.

(b) **Contract review and concurrence.** The owner’s attorney will review the executed contract documents, including performance and payment bonds, and will certify that they are adequate, and that the persons executing these documents have been properly authorized to do so. The contract documents, engineer’s recommendation for award, and bid tabulation sheets will be forwarded to the Agency for concurrence prior to awarding the contract. All contracts will contain a provision that they are not effective until they have
been concurred in by the Agency. The State program official or designee is responsible for concurring in construction contracts with the legal advice and guidance of the OGC when necessary.

§ 1780.62 Utility purchase contracts.

Applicants proposing to purchase water or other utility service from private or public sources shall have written contracts for supply or service which are reviewed and concurred in by the Agency. To the extent practical, the Agency review and concurrence of such contracts should take place prior to their execution by the owner. OGC advice and guidance may be requested. Form RD 442-30, “Water Purchase Contract,” may be used when appropriate.

If the Agency loan will be repaid from system revenues, the contract will be pledged to the Agency as part of the security for the loan. Such contracts will:

(a) Include a commitment by the supplier to furnish, at a specified point, an adequate quantity of water or other service and provide that, in case of shortages, all of the supplier’s users will proportionately share shortages.

(b) Set out the ownership and maintenance responsibilities of the respective parties including the master meter if a meter is installed at the point of delivery.

(c) Specify the initial rates and provide a type of escalator clause which will permit rates for the association to be raised or lowered proportionately as certain specified rates for the supplier’s regular customers are raised or lowered. Provisions may be made for altering rates in accordance with the decisions of the appropriate State agency which may have regulatory authority.

(d) Cover period of time which is at least equal to the repayment period of the loan. State program officials may approve contracts for shorter periods of time if the supplier cannot legally contract for such period, or if the owner and supplier find it impossible or impractical to negotiate a contract for the maximum period permissible under State law, provided:

1. The supplier is subject to regulations of the Federal Energy Regulatory Commission or other Federal or State agency whose jurisdiction can be expected to prevent unwarranted curtailment of supply; or

2. The contract contains adequate provisions for renewal; or

3. A determination is made that in the event the contract is terminated, there are or will be other adequate sources available to the owner that can feasibly be developed or purchased.

(e) Set out in detail the amount of connection or demand charges, if any, to be made by the supplier as a condition to making the service available to the owner. However, the payment of such charges from loan funds shall not be approved unless the Agency determines that it is more feasible and economical for the owner to pay such a connection charge than it is for the owner to provide the necessary supply by other means.

(f) Provide for a pledge of the contract to the Agency as part of the security for the loan.

(g) Not contain provisions for:

1. Construction of facilities which will be owned by the supplier. This does not preclude the use of money paid as a connection charge for construction to be done by the supplier.

2. Options for the future sale or transfer. This does not preclude an agreement recognizing that the supplier and owner may at some future date agree to a sale of all or a portion of the facility.

3. If it is impossible to obtain a firm commitment for either an adequate quantity or sharing shortages proportionately, a contract may be executed and concurred in provided adequate evidence is furnished to enable the Agency to make a determination that the supplier has adequate supply and/or treatment facilities to furnish its other users and the applicant for the foreseeable future; and:

1. The supplier is subject to regulations of the Federal Energy Regulatory Commission or other Federal or State agency whose jurisdiction can be expected to prevent unwarranted curtailment of supply; or

2. A suitable alternative supply could be arranged within the repayment ability of the borrower if it should become necessary; or
§ 1780.70 Owner's procurement regulations.

Owner's procurement requirements must comply with the following standards:

(a) Code of conduct. Owners shall maintain a written code or standards of conduct which shall govern the performance of their officers, employees or agents engaged in the award and administration of contracts supported by Agency funds. No employee, officer or agent of the owner shall participate in the selection, award, or administration of a contract supported by Agency funds if a conflict of interest, real or apparent, would be involved. Examples of such conflicts would arise when: the employee, officer or agent; any member of their immediate family; their partner; or an organization which employs, or is about to employ, any of the above; has a financial or other interest in the firm selected for the award.

1. The owner's officers, employees or agents shall neither solicit nor accept gratuities, favors or anything of monetary value from contractors, potential contractors, or parties to subagreements.

2. To the extent permitted by State or local law or regulations, the owner's standards of conduct shall provide for penalties, sanctions, or other disciplinary actions for violations of such standards by the owner's officers, employees, agents, or by contractors or their agents.

(b) Maximum open and free competition. All procurement transactions, regardless of whether by sealed bids or by negotiation and without regard to dollar value, shall be conducted in a manner that provides maximum open and free competition. Procurement procedures shall not restrict or eliminate competition. Examples of what are considered to be restrictive of competition include, but are not limited to: placing unreasonable requirements on firms in order for them to qualify to do business; noncompetitive practices between firms; organizational conflicts of interest; and unnecessary experience and bonding requirements. In specifying materials, the owner and its consultant will consider all materials normal, suitable for the project commensurate with sound engineering practices and project requirements. The Agency shall consider fully any recommendation made by the owner concerning the technical design and choice of materials to be used for a facility. If the Agency determines that a design or material, other than those that were recommended, should be considered by
including them in the procurement process as an acceptable design or material in the water or waste disposal facility, the Agency shall provide such owner with a comprehensive justification for such a determination. The justification will be documented in writing.

(c) Owner’s review. Proposed procurement actions shall be reviewed by the owner’s officials to avoid the purchase of unnecessary or duplicate items. Consideration should be given to consolidation or separation of procurement items to obtain a more economical purchase. Where appropriate, an analysis shall be made of lease versus purchase alternatives, and any other appropriate analysis to determine which approach would be the most economical. To foster greater economy and efficiency, owners are encouraged to enter into State and local intergovernmental agreements for procurement or use of common goods and services.

(d) Solicitation of offers, whether by competitive sealed bid or competitive negotiation, shall:

(1) Incorporate a clear and accurate description of the technical requirements for the material, product or service to be procured. When it is impractical or uneconomical to make a clear and accurate description of the technical requirements, a “brand name or equal” description may be used to define the performance or other salient requirements of a procurement. The specific feature of the name brands which must be met by the offeror shall be clearly stated; and

(2) Clearly specify all requirements which offerors must fulfill and all other factors to be used in evaluating bids or proposals.

(e) Affirmative steps should be taken to assure that small, minority, and women businesses are utilized when possible as sources of supplies, equipment, construction and services.

(f) Contract pricing. Cost plus a percentage of cost method of contracting shall not be used.

(g) Unacceptable bidders. The following will not be allowed to bid on, or negotiate for, a contract or subcontract related to the construction of the project:

(1) An engineer as an individual or firm who has prepared plans and specifications or who will be responsible for monitoring the construction;

(2) Any firm or corporation in which the owner’s engineer is an officer, employee, or holds or controls a substantial interest;

(3) The governing body’s officers, employees, or agents;

(4) Any member of the immediate family or partners in the entities referred to in paragraphs (g)(1), (g)(2) or (g)(3) of this section; or

(5) An organization which employs, or is about to employ, any person in the entities referred to in paragraphs (g)(1), (g)(2), (g)(3) or (g)(4) of this section.

(h) Contract award. Contracts shall be made only with responsible parties possessing the potential ability to perform successfully under the terms and conditions of a proposed procurement. Consideration shall include but not be limited to matters such as integrity, record of past performance, financial and technical resources, and accessibility to other necessary resources. Contracts shall not be made with parties who are suspended or debarred by any Agency of the United States Government.

§ 1780.71 [Reserved]

§ 1780.72 Procurement methods.

Procurement shall be made by one of the following methods: Small purchase procedures; competitive sealed bids (formal advertising); competitive negotiation; or noncompetitive negotiation. Competitive sealed bids (formal advertising) is the preferred procurement method for construction contracts.

(a) Small purchase procedures. Small purchase procedures are those relatively simple and informal procurement methods that are sound and appropriate for a procurement of services, supplies or other property, costing in the aggregate not more than $100,000. If small purchase procedures are used for a procurement, written price or rate quotations shall be requested from at least three qualified sources.

(b) Competitive sealed bids. In competitive sealed bids (formal advertising), an invitation for sealed bids is publicly
advertised and a firm-fixed-price contract (lump sum or unit price) is awarded to the responsible bidder whose bid, conforming with all the material terms and conditions of the invitation for bids, is lowest, price and other factors considered. When using this method the following shall apply:

1. The invitation for bids shall be publicly advertised at a sufficient time prior to the date set for opening of bids. The invitation shall comply with the requirements in §1780.70(d). Bids shall be solicited from an adequate number of qualified sources;

2. All bids shall be opened publicly at the time and place stated in the invitation for bids;

3. A firm-fixed-price contract award shall be made by written notice to that responsible bidder whose bid, conforming to the invitation for bids, is lowest. When specified in the bidding documents, factors such as discounts and transportation costs shall be considered in determining which bid is lowest; and

4. Any or all bids may be rejected by the owner when it is in its best interest.

(c) Competitive negotiation. In competitive negotiations, proposals are requested from a number of sources and the Request for Proposal is publicized. Negotiations are normally conducted with more than one of the sources submitting offers. Competitive negotiation may be used if conditions are not appropriate for the use of formal advertising and where discussions and bargaining with a view to reaching agreement on the technical quality, price, other terms of the proposed contract and specifications may be necessary. If competitive negotiation is used for a procurement, the following requirements shall apply:

1. Proposals shall be solicited from an adequate number of qualified sources to permit reasonable competition consistent with the nature and requirements of the Procurement. The Request for Proposal shall be publicized and reasonable requests by other sources to compete shall be honored to the maximum extent practicable;

2. The Request for Proposal shall identify all significant evaluation factors and their relative importance;

3. The owner shall provide mechanisms for technical evaluation of the proposals received, determination of responsible offerors for the purpose of written or oral discussions, and selection for contract award; and

4. Award may be made to the responsible offeror whose proposal will be most advantageous to the owner. Unsuccessful offerors should be promptly notified.

(d) Noncompetitive negotiation. Noncompetitive negotiation is procurement through solicitation of a proposal from only one source, or after solicitation of a number of sources, competition is determined inadequate. Noncompetitive negotiation may be used when the award of a contract is not feasible under small purchase or competitive sealed bids. Circumstances under which a contract may be awarded by noncompetitive negotiations are limited to the following:

1. The item is available only from a single source; or

2. There exists a public exigency or emergency and the urgency for the requirement will not permit a delay incident to competitive solicitation; or

3. After solicitation of a number of sources, competition is determined inadequate; or

4. No acceptable bids have been received after formal advertising; or

5. The procurement is for professional services; or

6. The aggregate amount does not exceed $100,000.

§ 1780.73 [Reserved]

§ 1780.74 Contracts awarded prior to applications.

Owners awarding construction or other procurement contracts prior to filing an application, must provide evidence that is satisfactory to the Agency that the contract was entered into without intent to circumvent the requirements of Agency regulations.

(a) Modifications. The contract shall be modified to conform with the provisions of this part. Where this is not possible, modifications will be made to the extent practicable and, as a minimum, the contract must comply with
§ 1780.75 Contract provisions.

In addition to provisions required for a valid and legally binding contract, any recipient of Agency funds shall include the following contract provisions in all contracts.

(a) Remedies. Contracts other than small purchases shall contain provisions or conditions which will allow for administrative, contractual, or legal remedies in instances where contractors violate or breach contract terms, and provide for such sanctions and penalties as may be appropriate. A realistic liquidated damage provision should be included in all contracts for construction.

(b) Termination. All contracts exceeding $10,000, shall contain suitable provisions for termination by the owner including the manner by which it will be effected and the basis for settlement. In addition, such contracts shall describe conditions under which the contract may be terminated for default as well as conditions where the contract may be terminated because of circumstances beyond the control of the contractor.

(c) Surety. In all contracts for construction or facility improvements exceeding $100,000, the owner shall require bonds or cash deposit in escrow assuring performance and payment each in the amount of 100 percent of the contract cost. The surety will be in the form of performance bonds and payment bonds. For contracts of lesser amounts, the owner may require surety. When a surety is not provided, contractors will furnish evidence of payment in full for all materials, labor, and any other items procured under the contract. Form RD 1924–10, “Release by Claimants,” and Form RD 1924–9, “Certificate of Contractor’s Release,” may be used for this purpose. Companies providing performance bonds and payment bonds must hold a certificate of authority as an acceptable surety on Federal bonds as listed in Treasury Circular 570 as amended and the surety must be listed as having a license to do business in the State where the facility is located.

(d) Equal employment opportunity. All contracts awarded in excess of $10,000 by owners shall contain a provision requiring compliance with Executive Order 11246 (3 CFR, 1966 Comp., p. 339), entitled, “Equal Employment Opportunity,” as amended by Executive Order 11375 (3 CFR, 1968 Comp., p. 321), and as supplemented by Department of Labor regulations 41 CFR chapter 60.

(e) Anti-kickback. All contracts for construction shall include a provision for compliance with the Copeland “Anti-Kickback” Act (18 U.S.C. 874). This Act provides that each contractor shall be prohibited from inducing, by any means, any person employed in the construction, completion, or repair of public work, to give up any part of the compensation to which they are otherwise entitled. The owner shall report suspected or reported violations to the Agency.

(f) Records. All negotiated contracts (except those of $10,000 or less) awarded by owners shall include a provision to the effect that the owner, the Agency, the Comptroller General of the United States, or any of their duly authorized representatives, shall have access to any books, documents, papers, and records of the contractor which are directly pertinent to a specific Federal loan or grant program for the purpose of making audits, examinations, excerpts, and transcriptions. Owners shall require contractors to maintain all required records for 3 years after making final payment and all other pending matters are closed.

(g) State energy conservation plan. Contracts shall incorporate mandatory
standards and policies relating to energy efficiency which are contained in the State energy conservation plan issued in compliance with the Energy Policy and Conservation Act (42 U.S.C. 6201).

(b) Change orders. The construction contract shall require that all contract change orders be concurred in by the Agency.

(i) Agency concurrence. All contracts must contain a provision that they shall not be effective unless and until the State program official or designee concurs in writing.

(j) Retainage. All construction contracts shall contain adequate provisions for retainage. No payments will be made that would deplete the retainage nor place in escrow any funds that are required for retainage nor invest the retainage for the benefit of the contractor. The retainage shall not be less than an amount equal to 5 percent of an approved partial payment estimate until the project is substantially complete and accepted by the owner, consulting engineer and Agency. The contract must provide that additional amounts may be retained if the job is not proceeding satisfactorily.

(k) Other compliance requirements. Contracts in excess of $100,000 shall contain a provision which requires compliance with all applicable standards, orders, or requirements issued under section 306 of the Clean Air Act (42 U.S.C. 1857(h)), section 508 of the Clean Water Act (33 U.S.C. 1368), Executive Order 11738 (3 CFR, 1974 Comp., p.209), and Environmental Protection Agency (EPA) regulations 40 CFR part 15, which prohibit the use under non-exempt Federal contracts, grants or loans of facilities included on the EPA List of Violating Facilities. The provision shall require reporting of violations to the Agency and to the U.S. Environmental Protection Agency, Assistant Administrator for Enforcement. Solicitations and contract provisions shall include the requirements of 4 CFR 15.4(c) as set forth in RUS Bulletin 1780–14.

§ 1780.76 Contract administration.

Owners shall be responsible for maintaining a contract administration system to monitor the contractors’ performance and compliance with the terms, conditions, and specifications of the contracts.

(a) Preconstruction conference. Prior to beginning construction, the owner will schedule a preconstruction conference where the consulting engineer will review the planned development with the Agency, owner, resident inspector, attorney, contractor, and other interested parties. The conference will thoroughly cover applicable items included in Form RD 1924–16, “Record of Pre-construction Conference,” and the discussions and agreements will be documented.

(b) Monitoring reports. The owner is required to monitor construction and provide a report to the Agency giving a full explanation under the following circumstances:

(1) Reasons why approved construction schedules were not met;

(2) Analysis and explanation of cost overruns and how payment is to be made for the same; and

(3) If events occur which have a significant impact upon the project.

(c) Inspection. Full-time resident inspection is required for all construction unless a written exception is made by the Agency upon written request of the owner. Unless otherwise agreed, the resident inspector will be provided by the consulting engineer. Prior to the preconstruction conference, the consulting engineer will submit a resume of qualifications of the resident inspector to the owner and to the Agency for acceptance in writing. If the owner provides the resident inspector, it must submit a resume of the inspector’s qualifications to the project inspector to the owner and to the Agency for acceptance in writing prior to the preconstruction conference. The resident inspector will work under the technical supervision of the project engineer and the role and responsibilities will be defined in writing.

(d) Inspector’s daily diary. The resident inspector will maintain a record of the daily construction progress in the form of a daily diary and daily inspection reports. The daily entries shall be made available to the Agency personnel and will be reviewed during project inspections. The original complete set will be furnished to the owner.
upon completion of construction. RUS Bulletin 1780–18 is available from the Agency for preparing daily inspection reports or the reports can be provided in other formats approved by the State staff engineer.

(e) Payment for Construction. Form RD 1924–18, “Partial Payment Estimate,” or other similar form may be used for construction payments. If Form 1924–18 is not used, prior concurrence by the State staff engineer must be obtained.

(1) Payment of contract retainage will not be made until such retainage is due and payable under the terms of the contract.

(2) Invoices for the payment of construction costs must be approved by the owner, project engineer and concurred in by the Agency.

(3) The review and acceptance of project costs, including construction payment estimates by the Agency shall not attest to the correctness of the amounts, the quantities shown, or that the work has been performed under the terms of agreements or contracts.

(f) Prefinal inspections. A prefinal inspection will be made by the owner, resident inspector, project engineer, contractor, representatives of other agencies involved, and Agency representative (preferably the State staff engineer or designee). The inspection results will be recorded by the project engineer and a copy provided to all interested parties.

(g) Final inspection. A final inspection will be made by the Agency before final payment is made.

(h) Changes in development plans. (1) Changes in development plans shall be reviewed and approved by the Agency provided:

(i) Funds are available to cover any additional costs; and

(ii) The change is for an authorized loan or grant purpose; and

(iii) It will not adversely affect the soundness of the facility operation or the Agency’s security; and

(iv) The change is within the scope of the contract.

(2) Changes will be recorded on Form RD 1924–7, “Contract Change Order,” or other similar form if approved by the State program official or designee. Regardless of the form, change orders must be approved by the State program official or designee.

(3) Changes should be accomplished only after Agency approval and shall be authorized only by means of contract change order. The change order will include items such as:

(i) Any changes in labor and material;

(ii) Changes in facility design;

(iii) Any decrease or increase in quantities based on final measurements that are different from those shown in the bidding schedule; and

(iv) Any increase or decrease in the time to complete the project.

(4) All changes shall be recorded on chronologically numbered contract change orders as they occur. Change orders will not be included in payment estimates until approved by all parties.

§§ 1780.77–1780.79  [Reserved]

Subpart D—Information Pertaining to Preparation of Notes or Bonds and Bond Transcript Documents for Public Body Applicants

§ 1780.80 General.

This subpart includes information for use by public body applicants in the preparation and issuance of evidence of debt (bonds, notes, or debt instruments, referred to as bonds in this subpart) and other necessary loan documents.

§ 1780.81 Policies related to use of bond counsel.

The applicant is responsible for preparation of bonds and bond transcript documents. The applicant will obtain the services and opinion of recognized bond counsel experienced in municipal financing with respect to the validity of a bond issue, except for issues of $100,000 or less. With prior approval of the approval official, the applicant may elect not to use bond counsel. Such issues will be closed in accordance with the following:

(a) The applicant must recognize and accept the fact that application processing may require additional legal and administrative time;
(b) It must be established that not using bond counsel will produce significant savings in total legal costs;

(c) The local attorney must be able and experienced in handling this type of legal work;

(d) The applicant must understand that it will likely have to obtain an opinion from bond counsel at its expense should the Agency require refinancing of the debt;

(e) Bonds will be prepared in accordance with this regulation and conform as closely as possible to the preferred methods of preparation stated in §1780.94; and

(f) Closing instructions must be issued by OGC.

§ 1780.82 [Reserved]

§ 1780.83 Bond transcript documents.

Any questions relating to Agency requirements should be discussed with Agency representatives. Bond counsel or local counsel, as appropriate, must furnish at least two complete sets of the following to the applicant, who will furnish one complete set to the Agency:

(a) Copies of all organizational documents;

(b) Copies of general incumbency certificate;

(c) Certified copies of minutes or excerpts from all meetings of the governing body at which action was taken in connection with the authorizing and issuing of the bonds;

(d) Certified copies of documents evidencing that the applicant has complied fully with all statutory requirements incident to calling and holding a favorable bond election, if one is necessary;

(e) Certified copies of the resolutions, ordinances, or other documents such as the bond authorizing resolutions or ordinances and any resolution establishing rates and regulating use of facility, if such documents are not included in the minutes furnished;

(f) Copies of the official Notice of Sale and the affidavit of publication of the Notice of Sale when State statute requires a public sale;

(g) Specimen bond, with any attached coupons;

(h) Attorney’s no-litigation certificate;

(i) Certified copies of resolutions or other documents pertaining to the bond award;

(j) Any additional or supporting documents required by bond counsel;

(k) For loans involving multiple advances of Agency loan funds, a preliminary approving opinion of bond counsel (or local counsel if no bond counsel is involved) if a final unqualified opinion cannot be obtained until all funds are advanced. The preliminary opinion for the entire issue shall be delivered at or before the time of the first advance of funds. It will state that the applicant has the legal authority to issue the bonds, construct, operate and maintain the facility, and repay the loan, subject only to changes occurring during the advance of funds, such as litigation resulting from the failure to advance loan funds, and receipt of closing certificates;

(l) Final unqualified approving opinion of bond counsel, (and preliminary approving opinion, if required) or local counsel if no bond counsel is involved, including an opinion as to whether interest on bonds will be exempt from Federal and State income taxes. With approval of the State program official, a final opinion may be qualified to the extent that litigation is pending relating to Indian claims that may affect title to land or validity of the obligation. It is permissible for such opinion to contain language referring to the last sentence of section 306 (a)(1) or to section 309A (h) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1926 (a)(1) or 1929a (h)).

§§ 1780.84–1780.86 [Reserved]

§ 1780.87 Permanent instruments for Agency loans.

Agency loans will be evidenced by an instrument determined legally sufficient and in accordance with the following order of preference:

(a) First preference—Form RD 440–22, “Promissory Note”. Refer to paragraph (b) of this section for methods of various frequency payment calculations;

(b) Second preference—single instruments with amortized installments. A single instrument providing for amortized
installments which follows Form RD 440–22 as closely as possible. The full amount of the loan must show on the face of the instrument, and there must be provisions for entering the date and amount of each advance on the reverse or an attachment. When principal payments are deferred, the instrument will show that “interest only” is due on interest-only installment dates, rather than specific dollar amounts. The payment period including the “interest only” installment cannot exceed 40 years, the useful life of the facility, or State statute limitations, whichever occurs first. The amortized installment, computed as follows, will be shown as due on installment dates thereafter.

(1) Monthly payments. Multiply by twelve the number of years between the due date of the last interest-only installment and the final installment to determine the number of monthly payments. When there are no interest-only installments, multiply by twelve the number of years over which the loan is amortized. Then multiply the loan amount by the amortization factor and round to the next higher dollar.

(2) Semiannual payments. Multiply by two the number of years between the due date of the last interest-only installment and the due date of the final installment to determine the correct number of semiannual periods. When there are no interest-only installments, multiply by two the number of years over which the loan is amortized. Then multiply the loan amount by the applicable amortization factor.

(3) Annual payments. Subtract the due date of the last interest-only installment from the due date of the final installment to determine the number of annual payments. When there are no interest-only installments, the number of annual payments will equal the number of years over which the loan is amortized. Then multiply the loan amount by the applicable amortization factor and round to the next higher dollar.

(c) Third preference—single instruments with installments of principal plus interest. If a single instrument with amortized installments is not legally permissible, use a single instrument providing for installments of principal plus interest accrued on the principal balance. For bonds with semiannual interest and annual principal, the interest is calculated by multiplying the principal balance times the interest rate and dividing this figure by two. Principal installments are to be scheduled so that total combined interest and principal payments closely approximate amortized payments.

(1) The repayment terms concerning interest only installments described in paragraph (b) of this section apply.

(2) The instrument shall contain in substance provisions indicating:

(i) Principal maturities and due dates;

(ii) Regular payments shall be applied first to interest due through the next principal and interest installment due date and then to principal due in chronological order stipulated in the bond; and

(iii) Payments on delinquent accounts will be applied in the following sequence:

(A) Billed delinquent interest;

(B) Past due interest installments;

(C) Past due principal installments;

(D) Interest installment due; and

(E) Principal installment due.

(d) Fourth preference—serial bonds with installments of principal plus interest. If instruments described under the first, second, and third preferences are not legally permissible, use serial bonds with a bond or bonds delivered in the amount of each advance. Bonds will be numbered consecutively and delivered in chronological order. Such bonds will conform to the minimum requirements of §1780.94. Provisions for application of payments will be the same as those set forth in paragraph (c)(2)(ii) of this section.

(e) Coupon bonds. Coupon bonds will not be used unless required by State statute. Such bonds will conform to the minimum requirements of §1780.94.

§ 1780.88 [Reserved]

§ 1780.89 Multiple advances of Agency funds using permanent instruments.

Where interim financing from commercial sources is not used, Agency loan proceeds will be disbursed on an “as needed by borrower” basis in
§ 1780.90 Multiple advances of Agency funds using temporary debt instruments.

When none of the instruments described in §1780.87 are legally permissible or practical, a bond anticipation note or similar temporary debt instrument may be used. The debt instrument will provide for multiple advances of Agency funds and will be for the full amount of the Agency loan. The instrument will be prepared by bond counsel, or local counsel if bond counsel is not involved, and approved by the State program official and OGC. At the same time the Agency delivers the last advance, the borrower will deliver the permanent bond instrument and the canceled temporary instrument will be returned to the borrower. The approved debt instrument will show at least the following:

(a) The date from which each advance will bear interest;
(b) The interest rate as determined by §1780.13;
(c) A payment schedule providing for interest on outstanding principal at least annually; and
(d) A maturity date which shall be no earlier than the anticipated issuance date of the permanent instruments and no longer than the 40-year statutory limit.

§§ 1780.91–1780.93 [Reserved]

§ 1780.94 Minimum bond specifications.

The provisions of this section are minimum specifications only and must be followed to the extent legally permissible.

(a) Type and denominations. Bond resolutions or ordinances will provide that the instruments be either a bond representing the total amount of the indebtedness or serial bonds in denominations customarily accepted in municipal financing (ordinarily in multiples of not less than $1,000). Single bonds may provide for repayment of principal plus interest or amortized installments. Amortized installments are preferred by the Agency.

(b) Bond registration. Bonds will contain provisions permitting registration for both principal and interest. Bonds purchased by the Agency will be registered in the name of “United States of America” and will remain so registered at all times while the bonds are held or insured by the Government. The Agency address for registration purposes will be that of the Finance Office.

(c) Size and quality. Size of bonds and coupons should conform to standard practice. Paper must be of sufficient quality to prevent deterioration through ordinary handling over the life of the loan.

(d) Date of bond. Bonds will normally be dated as of the day of delivery. However, the borrower may use another date if approved by the Agency. Loan closing is the date of delivery of the bonds or the date of delivery of the first bond when utilizing serial bonds, regardless of the date of delivery of the funds. The date of delivery will be stated in the bond if different from the date of the bond. In all cases, interest will accrue from the date of delivery of the funds.

(e) Payment date. Loan payments will be scheduled to coincide with income availability and be in accordance with State law.

(1) If income is available monthly, monthly payments are recommended unless precluded by State law. If income is available quarterly or otherwise more frequently than annually, payments must be scheduled on such basis. However, if State law only permits principal plus interest (P&I) type bonds, annual or semiannual payments will be used.

(2) The payment schedule will be enumerated in the evidence of debt, or that is not feasible, in a supplemental agreement.

(3) If feasible, the first payment will be scheduled one full month, or other period, as appropriate, from the date of loan closing or any deferment period. Due dates falling on the 29th, 30th, and 31st day of the month will be avoided. When principal payments are deferred, interest-only payments will be scheduled at least annually.

(f) Extra payments. Extra payments are derived from the sale of basic chattel or real estate security, refund of unused loan funds, cash proceeds of
property insurance and similar actions which reduce the value of basic security. At the option of the borrower, regular facility revenue may also be used as extra payments when regular payments are current. Unless otherwise established in the note or bond, extra payments will be applied as follows:

1. For loans with amortized debt instruments, extra payments will be applied first to interest accrued to the date of receipt of the payment and second to principal.

2. For loans with debt instruments with P&I installments, the extra payment will be applied to the final unpaid principal installment.

3. For borrowers with more than one loan, the extra payment will be applied to the account secured by the lowest priority of lien on the property from which the extra payments was obtained. Any balance will be applied to other Agency loans secured by the property from which the extra payment was obtained.

4. For assessment bonds, see paragraph (k) of this section.

The place of payments on bonds purchased by the Agency will be determined by the Agency.

Redemptions. Bonds will normally contain customary redemption provisions. However, no premium will be charged for early redemption on any bonds held by the Government.

Additional revenue bonds. Parity bonds may be issued to complete the project. Otherwise, parity bonds may not be issued unless acceptable documentation is provided establishing that net revenues for the fiscal year following the year in which such bonds are to be issued will be at least 120 percent of the average annual debt serviced requirements on all bonds outstanding, including the newly-issued bonds. For purposes of this section, net revenues are, unless otherwise defined by State statute, gross revenues less essential operation and maintenance expenses. This limitation may be waived or modified by the written consent of bondholders representing 75 percent of the then-outstanding principal indebtedness. Junior and subordinate bonds may be issued in accordance with the loan resolution.

Precautions. The following types of provisions in debt instruments should be avoided:

1. Provisions for the holder to manually post each payment to the instrument.

2. Provisions for returning the permanent or temporary debt instrument to the borrower in order that it, rather than the Agency, may post the date and amount of each advance or repayment on the instrument.

4. Defeasance provisions in loan or bond resolutions. When a bond issue is defeased, a new issue is sold which supersedes the contractual provisions of the prior issue, including the refinancing requirement and any lien on revenues. Since defeasance in effect precludes the Agency from requiring refinancing before the final maturity date, it represents a violation of the statutory refinancing requirement; therefore, it is disallowed. No loan documents shall include a provision of defeasance.

Assessment bonds. When security includes special assessment to be collected over the life of the loan, the instrument should address the method of applying any payments made before they are due. It may be desirable for such payments to be distributed over remaining payments due, rather than to be applied in accordance with normal procedures governing extra payments, so that the account does not become delinquent.

Multiple debt instruments. The following will be adhered to when preparing debt instruments:

1. When more than one loan type is used in financing a project, each type of loan will be evidenced by a separate debt instrument or series of debt instruments;

2. Loans obligated in different fiscal years and those obligated with different terms in the same fiscal year will be evidenced by separate debt instruments;

3. Loans obligated for the same loan type in the same fiscal year with the same term may be combined in the same debt instrument;
Rural Utilities Service, USDA

§ 1781.2

(4) Loans obligated in the same fiscal year with different interest rates that will be closed at the same interest rate may be combined in the same debt instrument.

§ 1780.95 Public bidding on bonds.

Bonds offered for public sale shall be offered in accordance with State law and in such a manner to encourage public bidding. The Agency will not submit a bid at the advertised sale unless required by State law, nor will reference to Agency’s rates and terms be included. If no acceptable bid is received, the Agency will negotiate the purchase of the bonds.

§§ 1780.96–1780.100 [Reserved]

PART 1781—RESOURCE CONSERVATION AND DEVELOPMENT (RCD) LOANS AND WATERSHED (WS) LOANS AND ADVANCES

Sec. 1781.1 Purpose.

1781.2 Policy.

(a) Rural Utilities Service (RUS), is an agency of the United States Department of Agriculture established pursuant to section 232 of the Department of Agriculture Reorganization Act of 1994 (Pub. L. 103–354, 108 Stat. 3178), successor to the Farmers’s Home Administration. Natural Resources Conservation Service (NRCS), is an agency of the United States Department of Agriculture established pursuant to section 232 of the Department of Agriculture Reorganization Act of 1994 (Pub. L. 103–354, 108 Stat. 3178), successor to the Soil Conservation Service. RUS will make WS and RCD loans available to sponsoring local public bodies, agencies, and nonprofit organizations to assist them in obtaining the local cost of WS works of improvement and RCD measures. Any processing or servicing activity conducted pursuant to this part involving authorized assistance to RUS employees, members of their families, known close relatives, or business or close personal associates, is subject to the provisions of subpart D of Part 1900 of this title. Applicants for this assistance are required to identify any known relationship or association with an RUS employee. RUS will assist the local sponsors and the NRCS in making loans from NRCS construction funds as WS advances when needed for the development of future water supplies or for site preservation.

(b) Rural Development State and local offices will administer these programs on behalf of RUS and will coordinate application processing with
§ 1781.3 Authorities, responsibilities, and delegation of authority.

(a) NRCS provides technical and financial assistance to sponsoring local organizations for developing WS and RCD area plans and for individual RCD measures or projects and watershed works of improvement. The watershed work plan for developing, operating, and maintaining watershed works of improvement must be agreed upon by sponsoring local organizations and NRCS. When approved, it is the basis for extending technical and cost sharing assistance from watershed funds. The RCD area plan is prepared for the development of the RCD area by sponsoring local organizations with assistance from NRCS and other agencies, endorsed by the Governor or by the agency designated by the Governor, and accepted by the Secretary of Agriculture or his delegate. It includes objectives, planned courses of action, and RCD measures or projects to be developed. It is amended as necessary to include continuing activities and needs in the RCD area.

(b) RUS receives and processes applications for WS loans and NRCS WS advances and RCD loans and makes and services such loan and advances. WS loans are made by RUS from either Public Law 534 (78th Cong.) funds authorized in the Flood Control Act of 1944 (33 U.S.C. 701 et seq.) or Public Law 566 (83rd Cong.) funds authorized in the Watershed Protection and Flood Prevention Act of 1954 (68 Stat. 666) to cover a part or all of the local cost for a watershed work of improvement.

(c) WS loans and WS advances may be made to project sponsors in watershed project areas for which:
   (1) A watershed work plan has been approved administratively or by resolutions adopted by the Committee on Agriculture and Forestry of the Senate and by the Committee on Agriculture of the House of Representatives; and
   (2) Federal assistance has been authorized for the installation of works of improvement by the Administrator of NRCS.

(d) RCD loans may be made in areas authorized for RCD program assistance by the Secretary of Agriculture and for which an RCD plan design or area plan has been accepted by the State NRCS Conservationist.

(e) Delegation of authority. The Rural Development State Director is authorized to approve WS and RCD loans subject to limitations in RUS Staff Instruction 1780-1 and conditions of this part. The Rural Development State Director is authorized to relegate authority in accordance with this part to the Chief, Community Programs; or other members of the State Office staff.

(f) NRCS is responsible for providing technical and financial assistance to sponsoring local organizations for planning and developing WS and RCD areas. This includes development of WS and RCD plans and WS works of improvement and RCD measures or projects.

(g) RUS is responsible for making and servicing WS loans and advances and RCD loans.

(h) The NRCS-RUS Agreements in RUS Bulletin’s 1781 and 1781–2 include further responsibilities and functions of NRCS and RUS in WS and RCD areas.

§ 1781.4 Definitions.

(a) Watershed (WS) project. An authorized area in which watershed assistance from NRCS and other U.S. Department of Agriculture (USDA) agencies including WS loans and advances may be provided. Watershed assistance is provided in two types of watershed projects identified by the Public Law under which they are authorized.

   (2) Public Law-566 Watershed. A small watershed of not more than 250,000 acres authorized in accordance with the Watershed Protection and Flood Prevention Act, August 4, 1954, Public Law 83–566 as amended.

(b) Resource Conservation and Development (RCD) area. An area in which RCD program assistance from NRCS and other USDA agencies has been authorized. It usually includes all or part of more than one county and may be co-terminous with substate planning and
development areas. RCD loans are authorized under Section 32 of Title III of the Bankhead-Jones Farm Tenant Act (7 U.S.C. 1011).

(c) Watershed plan. A plan agreed upon by sponsoring local organizations and the NRCS for developing, operating, and maintaining watershed works of improvement.

(d) RC&D measure plan. A plan document for a land area, directly controlled or under the jurisdiction of the sponsoring public bodies or public non-profit organization. It involves one of the measure purposes eligible for RC&D cost sharing assistance. The document sets forth what will be done, how, when and by whom, and involves RC&D technical and/or financial assistance.

(e) RC&D area plan. A plan prepared by sponsoring local organizations with assistance from NRCS and other agencies for the development of the RC&D area which has been endorsed by the Governor or his designated agency and accepted by the Secretary of Agriculture or his delegate. It includes objectives, planned courses of action, and RC&D measures to be developed. It is amended as necessary to include continuing activities and needs in the RC&D area.

(f) Watershed works of improvement. Structural, nonstructural, and land treatment measures included in a watershed plan which are to be installed in a watershed project.

(g) RC&D measure or project. An activity or development indicated in the RC&D area plan as being needed to achieve RC&D area goals and objectives.

(h) Cost sharing. The WS and RC&D legislative authorities provide for sharing certain costs of installing WS works of improvement or RC&D measures by the Federal Government and by sponsoring local organizations. Federal cost sharing from WS and RC&D funds is provided by NRCS for certain WS works of improvement and RC&D measures. Information on amounts, purposes, and procedures for cost sharing is available from the NRCS.

(i) Local cost. The part of the cost of a WS work of improvement or a RC&D measure or project that is to be paid by a sponsoring local organization.

(j) Public agency or public body. A State agency or department or instrumentality, county, municipality or other political subdivision or instrumentality of a State or agencies or districts created by or pursuant to State law for making improvements of a public nature or providing public services such as soil and water conservation districts, irrigation districts, drainage districts, flood prevention and control districts, school districts, other special purpose districts, municipal corporations or similar governmental units.

(k) Non-profit corporation. Mutual and other irrigation, water users, water supply, drainage, or waste disposal companies or associations, ditch companies, grazing, recreation and forestry associations and similar associations and organizations generally designated as private corporations operating on a non-profit basis. They may be organized and chartered under special law, general nonprofit corporation law, or general profit corporation law, if operated on a nonprofit basis under adequate charter, bylaw, mortgage or supplementary agreement provisions which will assure continued operation in that manner.

(l) Sponsoring local organization. A local public agency or body or a local nonprofit corporation having authority under State law to plan, develop, maintain and operate WS works of improvement or RC&D measures or projects included in a WS or RC&D area plan. The name of the sponsoring local organization must be included in the plan and sponsorship must be evidenced by execution of the plan.

(m) Watershed loan. A loan made by RUS from watershed funds to a sponsoring local organization to develop a WS work of improvement.

(n) RC&D loan. A loan made by RUS from RC&D funds to a local sponsoring organization to develop a RC&D measure or project. RC&D loans are made from RC&D funds to enable sponsoring local organizations to provide a part or all of the local share of cost for an RC&D measure.

(o) Watershed advance. A loan made from NRCS watershed construction funds to develop a future water supply or for the preservation of a site for a work of improvement authorized in a watershed plan.
§ 1781.5 Eligibility.

To be eligible for a WS loan, WS advance, or an RCD loan, the sponsoring local organization must meet the following requirements as applicable. Questions on eligibility will be referred to the Regional Attorney, OGC for legal advice prior to development of a loan docket.

(a) Be named in the WS or RCD plan as a sponsor of the development to be financed.

(b) Be legally organized and established in the WS or RCD area with legal authority, responsibility and capability to develop and operate the facility for which assistance is requested.

(c) Have authority under and comply with Federal, State and local laws on such matters as:

(1) Organizing, installing, operating, and maintaining proposed WS works of improvement or RCD measures or projects.

(2) Borrowing money, giving security, levying taxes, making assessments or raising revenues for operation and maintenance of the facility and repayment of loans.

(3) Land use zoning.

(4) Acquiring necessary property, lands, and rights.

(5) Obtaining approval of construction plans and specifications by appropriate Federal, State, and local agencies and construction facilities.

(6) Health and sanitation standards, water pollution control, and environmental regulations.

(7) Design and installation standards.

(8) Public service commission or similar State public body rules and regulations.

(d) Be financially sound and capable of providing service essential to the rural development needs of the area.

(e) If it is a nonprofit corporation.

(1) Membership should be broadly based and representative of the area benefiting from the facility. Membership on the governing board of the corporation will be limited to those living in the area to be benefited unless for justifiable reasons the Rural Development State Director gives prior approval for other than local residents to serve on the board of directors.

(2) The corporation must propose a facility which will primarily serve or generate other substantial, tangible benefits for farmers and other residents of the area. In the case of a recreational development at least two-thirds of the membership must be farmers and other residing in the area.

(3) Nonprofit corporations will not be formed to serve an area which could be served by a public agency which has adequate authority to provide the needed service unless prior approval of the National Office is obtained.

§ 1781.6 Loan purposes.

(a) WS and RCD loans. WS and RCD loans may be used for:

(1) Water development, storage, treatment and conveyance to farms for irrigation and other farm use, including farmstead, livestock, orchard, and crop spraying.

(2) Drainage systems and facilities in farm areas to sustain agricultural production or protect farmers and rural residents from water damage.

(3) Agricultural water management practices for annual streamflow stabilization, recharging ground water reservoirs, and conserving water supplies by management and control of vegetation along waterways and in drainage basins.

(4) Soil conservation and water control facilities such as dikes, terraces, detention reservoirs, stream channels, ditches, and other special land treatment and stabilization measures needed to protect farms and rural residents from water damage, provided such facilities cannot be installed or improved
under, or will not conflict with, other public programs such as those administered by the Corps of Engineers.

(5) Special treatment measures or equipment primarily, though not exclusively, for flood prevention and control:
   (i) Facilities and equipment for fire prevention and control,
   (ii) Tree planting and establishment of other vegetative cover for stabilizing critical runoff and sediment-producing areas,
   (iii) Structural and vegetative measures to stabilize stream channels and gullies,
   (iv) Basic farm conservation practices to control runoff, erosion, and sedimentation.

(6) Installing, repairing, and improving water storage facilities, including outlets for immediate and future domestic, municipal and industrial water supply and water quality management, and conveying water to treatment facilities or distribution systems. When payment of loans for such facilities are primarily dependent upon revenues from use of water stored the loan approval official must determine the adequacy of facility for use of the water before a loan is closed.

(7) Public water based recreation and fish and wildlife developer loans will only be made to public bodies for the local share of cost for such developments for which NRCS is providing technical or financial assistance from WS or RCD funds. Loans will not be made for developments larger or more elaborate than that which is included in the WS or RCD plan. Loans may include funds for:
   (i) Construction of necessary water resource improvements such as storage capacity in multipurpose and single purpose reservoirs, water level control structures in reservoirs and streams, and stream channel improvements necessary for the development of the facilities. This may include practices for improvement of fish and wildlife habitat and environment and related areas and facilities for proper protection and management of the development,
   (ii) Essential developments, improvements, equipment and facilities for access, public health and safety, and efficient operation management and maintenance; such as energy utilities, water supply and waste disposal systems, maintenance buildings, fences, cattle guards, roads and trails, parking, picnicking, camping, beaches, playgrounds, and related shelters and equipment.

(8) Soil and water management for agriculture-related pollutant control. Measures to reduce agriculture-related pollutants that adversely affect the community and the general public. Measures may include, but are not limited to, holding ponds, debris basins, diversions, terraces, and community distribution systems.

(9) Acquiring fee simple title to lands or perpetual easements, or rights-of-way for sites for works of improvement or project measures and related costs for removal, relocation, or replacement of existing improvements including relocation payments for displaced persons, business enterprises and facilities, and other related purposes. Funds for land acquisition will be limited to costs necessary for WS works of improvement or RCD measures. Final construction plans will indicate minimum essential lands and rights-of-way to be acquired. In some cases, sponsoring local organizations may need to acquire lands in excess of actual needs when it is expedient for planned development. If the Rural Development State Director determines that the acquisition of excess land is necessary or expedient for the orderly development of a WS works of improvement, or RCD measure, he may authorize the action subject to the following conditions:
   (i) The applicant must agree to sell excess land as soon as practicable and apply the proceeds, together with any income from excess land, on the debt to RUS,
   (ii) The applicant must furnish legal evidence of authority to acquire additional land and dispose of it as agreed,
   (iii) Evidence must be provided to justify acquisition of additional land,
   (iv) Easements for land or water resource protection structures must be perpetual and must not include clauses...
that terminate the easement with the dissolution or abandonment of the applicant organization. Loan funds will not be used for an easement that deviates in any way from that provided in the standard NRCS form unless modifications of it are approved by both NRCS and RUS.

(10) Acquisition of water supply or water right by purchase or by appropriation under local, State, and Federal laws. The loan may include funds for the purchase of land on which the water supply or water right is presently being used when:

(i) The water supply or water right cannot be purchased without the land; and

(ii) The value of the land is not the major portion of the cost; and

(iii) Any excess land thus acquired will be sold as soon as possible and the proceeds applied on the loan.

(11) Purchase of equipment and machinery necessary for development and operation of planned WS works of improvement or RCD measures or projects including:

(i) Special-purpose equipment. Purchase or rent special-purpose equipment to install or maintain any community facility in categories in paragraph (a)(11) of this section or to establish on farms soil and water conservation measures such as terraces, ponds, land leveling for irrigation or drainage, subsolting, seeding, tree planting, and removal of brush, scattered trees, and stumps, provided:

(A) Such equipment is not otherwise available when needed.

(B) There is sufficient need and local demand to justify ownership or rental.

(C) Rates to be charged include, among other things, an allowance for depreciation, obsolescence, and replacement based upon the recommendations of the equipment manufacturer or the experience of contractors engaged in providing services for similar types of work.

(ii) Forestry equipment and services. Purchase or rent basic special-purpose equipment, facilities, certain land or land rights, and supplies needed for furnishing services for the establishment, improvement, protection, and harvesting of timber (not processing) suitable for lumber, pulp, poles or posts; providing that the forest program and forest practices benefiting from such services are in accordance with approved conservation practices for the development, use, and control of water resources on farms and in forests. Special-purpose equipment may include such items as tractors, bull dozers, plows, planters, trucks, loaders, firefighting equipment, and sprayers. Facilities may include such items as ponds and reservoirs, pipelines, buildings for storage of equipment and supplies, nurseries, access roads, fire lanes, and lookout towers. Supplies may include such things as seed, seedlings, fertilizers, fencing, and pesticides. Land or land-rights acquisition will be limited to that necessary for sites for facilities listed above which are directly related to the forestry program. Loans for these purposes may be made only when the equipment, supplies, and facilities to be provided:

(A) Are not readily available when needed.

(B) Will be justified by local need and demand.

(C) Will be available to users at rates sufficient to cover loan amortization, obsolescence, replacement, operation, and cost of supplies.

(D) Will more efficiently serve the group through cooperative effort.

(12) Refinancing debt obligations of the sponsoring local organization that were incurred before application for a WS or RCD loan when that is not the primary purpose of the loan and:

(i) The debt being refinanced was for works of improvement or measures for which loan funds could be used; and

(ii) The debt is a valid obligation of the sponsor; and

(iii) Creditors will not modify payment terms on existing debts, and the organization cannot pay existing debts and a loan from RUS over the same period of time; and

(iv) Long-term debts will not be refinanced unless necessary to provide a sound basis for the loan or WS advance and concurrence is obtained from the National Office.

(13) If repayment is based on revenues, loan funds (not WS advances) can be used for payment of interest installments until the facility is generating
§ 1781.7 Loan and advance limitations
and obligations incurred before
loan closing.

(a) WS and RCD loan limitations. (1) Loans will not be used for:

(i) Land treatment measures on individual farms except as provided in §1781.6(a)(5)(iv).

(ii) Buildings and facilities to be used for lodging, dining or entertainment purposes.

(iv) Services such as those listed in paragraph (a)(16) of this section.

(b) RCD loans. Purposes for which RCD loans may be made in addition to those included in paragraph (a) of this section are:

(1) Solid waste management. Lands, equipment and facilities to collect, transport, and dispose of solid waste in sanitary landfills for which NRCS is providing technical assistance.

(2) Shifts-in-land use. Lands for uses such as grazing, forestry, wildlife, natural areas and parks, greenbelts, and other open spaces.

(3) Purchase existing facilities. Purchase existing facilities for shift-in-land use, soil and water development, conservation, control and use when it is determined that purchase is necessary to provide efficient service through a facility owned and operated by a public agency (or a nonprofit corporation in a rural area), or the owner is either unwilling or unable to make improvements, enlargement, or extensions needed to provide significant additional or improved service for present users or for a new group of users at reasonable rates.

(c) NRCS watershed advances. NRCS watershed advances are loans that may be made from NRCS construction funds for the following purposes included in a watershed work plan agreement:

(1) To pay construction costs including cost of engineering and related services for increasing reservoir capacity (including intake and outlet structures) for a future water supply for municipal, domestic, industrial, or agricultural uses.

(2) To preserve sites for authorized watershed works of improvement by acquiring land, easements, and rights-of-ways or other property rights.

§ 1781.7 Loan and advance limitations
and obligations incurred before
loan closing.

(a) WS and RCD loan limitations. (1) Loans will not be used for:

(i) Land treatment measures on individual farms except as provided in §1781.6(a)(5)(iv).

(ii) Buildings and facilities to be used for lodging, dining or entertainment purposes.
§ 1781.7  

(iii) Building industrial parks or constructing facilities in them, or establishing private industrial or commercial enterprises, or purchasing land to be used primarily for industrial purposes.

(iv) Paying costs allocated to structural measures for flood prevention.

(v) Facilities for the production and harvesting of fish and wildlife such as hatcheries, rearing ponds, and related facilities other than those under natural conditions.

(vi) Facilities primary for treatment and distribution of water or for sewerage, collection and treatment for domestic or industrial use or for municipal or community systems.

(vii) Electric generating, transmission, and distribution facilities, except when provided as part of the minimum basic facilities for recreation and fish and wildlife developments authorized in §1781.6(a)(7).

(viii) Storm and sanitary sewers and solid waste disposal facilities other than authorized in §1781.6(b)(1).

(ix) Payment for a tract of land, easements, or rights-of-ways on which NRCS will share the cost if the amount to be paid with loan funds exceeds the difference between the NRCS share and the value on which the NRCS share is based.

(x) Purchasing tracts of land primarily for resale to private developers or individuals for agricultural or nonagricultural use.

(xii) Buildings for residential, commercial, or industrial use.

(xiii) Developments on private property primarily for the benefit of the individual property owner.

(xiv) Payment of that part of the cost of facilities, improvements, and practices that could be earned by participation in agricultural conservation programs unless such cost cannot be covered by purchase orders or assignments to material suppliers or contractors. If a loan is made for such purposes for which practice or cost share payments exceed $500, RUS will obtain an assignment on such payments to be paid on the loan.

(xv) Primarily for water and sewage treatment plants and distribution systems.

(xvi) Drainage facilities primarily for the benefit of other than rural areas.

(xvii) Any single RCD measure that requires a loan of more than $500,000.

(xviii) The total amount of principal outstanding for all WS loans made for one or more watershed works of improvement in a single watershed project, whether made to one or more sponsoring organizations, will not exceed $10,000,000.

(b) Watershed advance limitations.

(1) A WS advance for future water supply will not be used for acquiring property rights including lands, easements, and rights-of-way; water rights; administration of contracts; storage capacity for immediate municipal use; pipelines from the reservoir to place of use; or for other uses such as irrigation, fish and wildlife, and recreation.

(2) A WS advance for increasing reservoir capacity for future water supply will not exceed 30 percent of the total installation cost of one structure.

(3) A WS advance for site preservation will not exceed that determined necessary by NRCS except to purchase land in excess of actual needs in accordance with the provisions of §1781.6(a)(7).

(4) Before a project agreement is entered into, there must be satisfactory evidence that the borrower will develop the site to be acquired or will use the future water supply and that revenue will be sufficient to meet all scheduled installments.

(c) Obligations incurred before loan closing.

(1) WS loans, WS advances, and RCD loans may be used for payment of obligations incurred before loan closing when the Rural Development State Director determines that:

(i) The obligations incurred are necessary for planned developments; and

(ii) The obligations are incurred for authorized loan purposes; and

(iii) Contracts and construction plans meet RUS and NRCS standards; and

(iv) The applicant has legal authority to incur the obligations at the time proposed; and

(v) The Rural Development State Director authorizes such action in a letter to the applicant.

(2) The Rural Development State Director's letter will specifically state that the permission is granted on the
condition that RUS is not committed
to make a loan and assumes no respon-
sibility for any obligation incurred by
the applicant because of the permission
granted and that the loan will be
closed subject to compliance with
agency regulations including closing
instructions of the Regional Attorney
Office of the General Counsel.

§ 1781.8 Rates and terms—WS loans
and WS advances and RCD loans.

(a) Interest rates. The interest rate for
WS loans, WS advances and RCD loans
will be at a rate not to exceed the cur-
rent market yield for outstanding mu-
nicipal obligations with remaining pe-
riods to maturity comparable to the
average maturity for the loan, adjusted
to the nearest 1/8 of 1 percent.

(1) For loans, unless otherwise re-
quired by State law, interest will ac-
crue from date of check delivery where
Form RD 440–22, “Promissory Note (As-
sociation Organization),” is used. Where
bonds are used interest will ac-
crue from the applicable dates recorded
on the bonds. Where multiple loan dis-
bursements are used interest will ac-
crue from date of check.

(2) Interest on an advance for future
water supply will begin as required by
State law, when water is first used
from the future water storage capacity
installed with advance, or ten years
from the scheduled date of the comple-
tion of the facility, whichever date is
earlier.

(3) Interest on an advance for preser-
vation of sites will begin on the date
the advance is closed.

(b) Length of repayment period. The re-
payment period on loans may not ex-
ceed the shortest of the following peri-
don:

(1) The statutory limitation on the
sponsoring local organization’s bor-
rowing authority.

(2) Fifty (50) years for WS loans and
WS advances and 30 years for RCD
loans from the date when the principal
benefits from the WS works of im-
provement or RCD measure being fi-
nanced first become available.

(3) The useful life of the WS works of
improvement or RCD measure being fi-
nanced with loan or advance funds.

(c) Deferred or partial payments. De-
ferred or partial payments may be au-
thorized in the following cir-
cumstances:

(1) Payments need to be delayed until
the receipt of income from taxes or
other revenues is enough to meet a reg-
ular installment but not exceed:

(i) The completion date of the facil-
ity;

(ii) The date when benefits from the
facility begins; but

(iii) In no case for more than 5 years
for other than future water supply.

(2) Payments will depend on the in-
creased returns expected from planned
improvements, or from the installation
on individual farms of land develop-
ment or other soil and water improve-
ments essential for obtaining benefits
from the improvement to be installed
with loan funds.

(3) They will not be used to permit
the accelerated payment of other
debts, to make capital improvements,
or to create operating reserves.

(4) Where prohibited by State stat-
utes; interest payments will not be de-
ferred even though payments on prin-
cipal may be deferred.

(5) Loans or advances for future
water supply will be repaid within the
life of the reservoir structure but in no
event later than 50 years for WS and 30
years for RCD after the reservoir struc-
ture is built. Payments on the prin-
cipal amount may be deferred one year
after the water is first used from the
storage capacity installed with the ad-
vance or for 10 years from the sched-
uled completion date of the structures,
whichever occurs first.

(i) Interest will begin for a future
water supply as required by State law,
or when water is first used from the fu-
ture storage capacity or 10 years from
the scheduled date of completion of the
facility, whichever occurs first.

(ii) If State law requires that interest
be charged and repaid before water is
first used or earlier than 10 years from
completion date of the structure, inter-
est payments will be scheduled to com-
ply with State law even though pay-
ments of principal may be deferred.

(iii) The borrower should be encour-
eged to begin repayments as soon as
practicable after the reservoir is built
even though this liberal deferment pol-
icy exists.
(iv) WS advances for preservation of sites must be fully repaid before beginning construction of the works of improvement for which such sites were acquired.

(A) Unless a WS advance is to be repaid with a WS loan, installments will be scheduled at the earliest possible date following the date of closing the advance. The date and amount of each such installment will be fixed to coincide with the receipt of income from taxes or other revenues.

(B) Payments for both principal and interest on a WS advance for preservation of sites may be scheduled for payment in one installment to be paid on the date of the closing of a WS loan which includes funds for the repayment of the WS advance.

(C) Interest on a WS advance for preservation of sites will begin on the date the WS advance is closed.

(d) Payment amortization and application.

(1) A borrower may make prepayments on WS loans, WS advances or RCD loans in any amount at any time.

(2) Payments will be applied first to interest accrued to the date of receipt of payment, and second to the principal balance. If the regular payments plus any prepayments exceed the cumulative amount due, the excess payments will be applied on the next installment first to interest, then principal. Loan refunds and proceeds from the sale of security property, however, will be applied on the final unpaid installment.

(3) Payments will be scheduled annually beginning one year following the date of loan closing or one year following the end of any approved deferment period, unless another annual due date is required by State statute or upon prior written authorization from the National Office. In those cases where loans are being made under statutes requiring a repayment date other than this, the Rural Development State Director will send a copy of the Regional Attorney’s opinion that such is required, to the Finance Office.

(4) When a single obligation instrument is used, amortized installments will be required. When this cannot be done because of state law, serial bonds or a single bond having installments of principal plus interest, stated separately, will be used. In cases where the payment of interest has been deferred, all collections will be applied to interest until such interest has been paid. Also, when a full installment is not paid when due, the payment made will be applied first to accrued interest.

(5) In cases where the indebtedness will be represented by serial bonds or a single bond having installments of principal plus interest, stated separately, annual payments of principal and interest will be scheduled to permit them to be paid in amounts approximately equal to the amounts that would be required for annual amortized installments.

(6) If the borrower will be retiring other debts represented by bonds or notes, the payment on such bonds may be considered in developing the payment schedule for the RUS loan. In some cases, it may be desirable to reduce the amount of payments to RUS in the early years of the loan in order to preclude the necessity for refinancing the outstanding debt. When such payment schedules are proposed, National Office authorization will be obtained prior to loan approval.

(7) Payment date. Insofar as loan payments are consistent with income availability, applicable State statutes, and commercial customs in the preparation of bonds or other evidence of indebtedness, they should be scheduled on a monthly basis either in the bond or other evidence of indebtedness or through the use of a supplemental agreement. Such requirements will be accomplished not later than the time of loan closing. When monthly payments are required, such payments will be scheduled beginning one full month following the date of loan closing or the end of any approved deferment period. Subsequent monthly payments will be scheduled each full month thereafter. In those cases where evidence of indebtedness calls for annual or semiannual payments, they will be scheduled beginning six or twelve full months, respectively following the date of loan closing or the end of any approved deferment period. Subsequent payments will be scheduled each sixth or twelfth full month respectively, thereafter. When the evidence of indebtedness is dated the 29th, 30th, or
31st day of a month, the payment date will be scheduled the 28th day of the month.

§ 1781.9 Security, feasibility, evidence of debt, title, insurance and other requirements.

(a) Security. WS loans, WS advances, and RCD loans will be secured in accordance with applicable provisions of §1780.14 of this chapter.

(b) Feasibility. All projects financed under the provisions of this part must be based on taxes, assessments, revenues, fees, or other satisfactory sources in an amount that will provide for facility operation and maintenance, a reasonable reserve, and payment of the debt. The Rural Development State Director may obtain needed assistance in determining economic feasibility from officials of NRCS and other appropriate USDA agencies. See §1780.7(f) of this chapter for applicable economic feasibility requirements and feasibility reports.

(c) Notes, bonds, and bond transcript documents. See subpart D of Part 1780 of this chapter for applicable requirements and provisions.

(d) Insurance. See §1780.39(g) of this chapter for requirements.

(e) National flood insurance. The requirements of the National Flood Insurance Act of 1968 (42 U.S.C. 4001 et seq.) as amended by the Flood Disaster Protection Act of 1973 (42 U.S.C. 4003 et seq.) will be complied with in accordance with applicable provisions of RD Instruction 1901-L. Also see §1780.39(g) of this chapter.

(f) Borrower contracts and bonds. See subpart C of Part 1780 of this chapter for applicable provisions.

(g) Title requirements. (1) Title evidence for land, easements, and rights-of-way to be acquired with proceeds of loans or advances will be furnished by the sponsoring local organization in accordance with NRCS policies and procedures.

(2) RUS will specify and approve the form and content of instruments for conveying title to or interest in real estate on which a lien will be taken to secure a WS loan, WS advance, or RCD loan. These should be consistent with the applicable provisions of §1780.14 of this chapter. The Rural Development State Director will make his decision after consultation with the Regional Attorney and the State Conservationist. He will notify NRCS in writing of his decision. Thereafter, title clearance will be completed under NRCS regulations except that a marketable title must be obtained on any tract of land, a part of which will be sold as excess land in accordance with §1781.6(a)(9). In addition to the title evidence required by NRCS, applicants will furnish an opinion of legal counsel on all land and interest in land acquired with loan or advance funds.

(h) Purchasing lands, rights and facilities. The amounts paid for lands, rights, and facilities with loan funds will be not more than that determined to be reasonable and fair by the loan approval official based upon an appraisal of the current market value made by an Rural Development employee or an independent appraiser.

(i) Water rights. Applicants will be required to comply with applicable State and local laws and regulations governing appropriating, diverting, storing and using water, changing the place and manner of use of water, and in disposing of water. All of the rights of any landowner, appropriator, or user of water from any source will be fully honored in all respects as they may be affected by facilities installed with WS loans and advances and RCD loans. If, under the provisions of State law, notice of the proposed diversion or storage of water by the applicant may be filed, the applicant will be required to file such a notice. An applicant must furnish evidence to provide reasonable assurance that its water rights will be or have been properly established, will not interfere with prior vested rights, will likely not be contested or enjoined by other water users or riparian owners, and will be within the provisions of any applicable interstate compact.

§ 1781.10 [Reserved]

§ 1781.11 Other considerations.

(a) Technical assistance. When pipelines from reservoirs to treatment plants are included in watershed work
plans. NRCS will not furnish engineering services for their design or installation. When such pipelines are to be financed by WS or RCD loans, RUS will supervise the activities of the private engineers retained for the purpose. Such RUS supervision will include, among other things, approval of private engineer’s contracts, approval of plans and specifications, authorization of contract awards, spot checks of engineering inspection, and final inspection and acceptance.

(b) Professional services. Applicants will be responsible for providing the services necessary to plan projects including design of facilities, preparation of cost and income estimates, development of proposals for organization and financing, and overall operation and maintenance of the facility. Necessary professional services may include such as that of an engineer, architect, attorney, bond counsel, accountant, auditor, and financial advisor or fiscal agent. Form RD 442–19, “Agreement for Engineering Services,” may be used when appropriate. RUS Bulletin 1780–7, “Legal Service Agreement” may be used to prepare the agreement for legal services.

(c) Other services. Contracts for other services such as management, operation, and maintenance will be developed by the applicant and presented to the RUS official developing the docket for review and approval.

(d) Fees for services. Fees provided for in contracts, agreements or services will not be more than those ordinarily charged by the profession for similar work when RUS financing is not involved.

(e) State pollution control or Environmental Protection Agency standards. Facilities will be designed, installed and operated to prevent pollution of water in excess of established standards. Effluent disposal will conform with appropriate State and Federal Water Pollution Control Standards.

(f) Water pollution. When repayment of a WS loan, WS advance, or RCD loan will be dependent upon income from the use or sale of water, RUS approval will be contingent upon a determination that the proposed use of stored water for recreation or municipal supply might not be permitted by a State health department because the water is being polluted from an upstream or other source.

(g) Environmental requirements. Actions will be taken to comply with the National Environmental Policy Act (42 U.S.C. 4321 et seq.) in accordance with subpart G of part 1940 of this title. When environmental assessments and environmental impact statements have been prepared on WS plans or RCD area plans by NRCS, a separate environmental impact statement or assessment on WS works of improvement or RCD measures for which a WS loan, WS advance, or RCD loan is requested will not be necessary unless the NRCS environmental review fails to meet the requirements of subpart G of part 1940 of this title. The Rural Development State Director should document the action taken by NRCS in compliance with the requirements of the National Environmental Policy Act and formally adopt the impact statement or assessment if satisfactory. If a determination is made that a further analysis of the environmental impact is needed, the Rural Development State Director will make necessary arrangements with the State NRCS conservationist for such action to be taken before a loan is made.

(h) National Historic Preservation Act. All projects will comply with the provisions of the National Historic Preservation Act of 1966 (16 U.S.C. 470 et seq.) in accordance with RD Instruction 1901–F.

(i) Civil Rights Act of 1964. Recipients of WS loans, WS advances, or RCD loans are subject to Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d et seq.), which prohibits discrimination because of race, color, or national origin. Borrowers must agree not to discriminate in their operations by signing Form RD 400–4, “Nondiscrimination Agreement,” before loan closing. This requirement should be discussed with the applicant as early in the negotiations as possible. Necessary actions will be taken in accordance with RD Instruction 1901–E.

(j) Appraisals. When required by the Rural Development State Director, appraisals will be made by an Rural Development official designated or an independent appraiser. Form RD 442–10,
"Appraisal Report—Water and Waste Disposal Systems," with appropriate supplements, may be modified as needed for use with the type of facilities being appraised.

(k) Architectural Barriers Act of 1968. All facilities financed with RUS loans and grants which are accessible to the public or in which physically handicapped persons may be employed or reside must be developed in compliance with this act (42 U.S.C. 4151 et seq.).

§ 1781.12 Preapplication and application processing.

(a) WS and RCD loans—(1) Preapplications. (i) The processing office or other person designated by the Rural Development State Director may assist the applicant in completing SF 424.1, "Application for Federal Assistance (For Non-construction)," and will forward one of SF 424.1 to the Rural Development State Director.

(ii) The Rural Development State Director will review SF 424.1 along with other necessary information and will coordinate selection of preapplications to be processed with NRCS. He will consult with NRCS State Conservationist concerning the status of the WS plan or RCD measure plan, the estimated time schedule for construction and cost of the proposed works to be installed with the loan, cost sharing funds to be made available to the applicant, and other pertinent information.

(iii) Form AD–622, "Notice of Preapplication Review Action," will be prepared and signed by the Rural Development State Director within forty-five (45) days from receipt of the preapplication in the processing office stating the results of the review action. An original and one copy of Form AD–622 will be sent to the processing office who will deliver the original to the applicant.

(2) Applications. (i) The application includes applicable forms and information indicated in RUS Instruction 1780. When the Rural Development State Director determines that an application will be further processed and Form AD–622 is delivered, he will designate a community program specialist (field), or a member of the community program staff to assist the processing office and the applicant with assembling and processing the application.

(ii) The processing office should arrange needed conferences with the applicant and its legal and engineering consultants, and when necessary, arrange for review of other Rural Development officials, and provide bulletins, forms, instructions and other assistance with assembling and processing the application. A processing checklist and time schedule will be established by using Form RD 1942–40, “Processing Check List (Public Bodies),” or Form RD 1942–39, “Processing Check List (Other than Public Bodies).” The processing office will send a letter and a copy of the processing checklist to the applicant to confirm decisions reached at the conference. The original and a copy of the processing checklist will be kept in the processing office and will be posted current as application processing actions are taken. The copy will be circulated from the processing office to the State Office for use in updating copies of the forms retained, after which it will be returned from the State Office to the processing office.

(3) Dockets. WS loan, WS advance, and RCD loan dockets will be developed and assembled in accordance with applicable RUS Instruction 1780.

(b) Watershed advances. Applications for WS advances will be developed and processed with NRCS assistance as necessary.

(1) The Rural Development State Director will arrange with the NRCS State Conservationist to be advised when a local sponsoring organization applies to NRCS for a WS advance.

(2) The Rural Development State Director will request the NRCS State Conservationist to provide information justifying the WS advance along with a written recommendation that it be made. This will include:

(i) Economic feasibility of the proposed WS advance.

(ii) Evidence of the legal authority of the sponsoring local organization to incur the obligation and make required payments.

(iii) Any limitations on the issuance of additional bonds or notes which may be imposed by the provisions of bond ordinances or on resolutions which authorize the issuance of any outstanding
§ 1781.13 Planning, options, and appraisals.

(a) WS and RCD area plans are developed by sponsoring local agencies and organizations with technical assistance from NRCS and other Federal and State agencies. These plans include WS works of improvement and RCD measures to be developed or constructed for which NRCS construction funds may be made available on a cost share basis along with funds provided by the sponsoring local organization, a portion or all of which may be obtained by a WS loan and/or WS advance or a RCD loan.

(b) Current information on the availability of cost share funds and purposes for which they may be used is provided by NRCS. The amount of NRCS cost share funds and the amount of funds to be provided by the sponsoring local organizations will be indicated in each plan. The estimated amount of WS loan, WS advance or RCD loan anticipated by the sponsoring local organization should also be included.

(c) Plans for the development or construction of individual WS works of improvement and RCD measures must be developed in accordance with NRCS technical assistance. In every case they will be approved by the NRCS State conservationist and the Rural Development State Director or their designated agent when a WS loan, WS advance or RCD loan is made.

(d) Options and appraisals related to the purchase of real estate for which a WS loan, WS advance, or RCD loan is made must be developed in accordance with NRCS and RUS requirements and approved by RUS. The determination of present market value will be made in accordance with §1780.44(g) of this chapter.

§ 1781.15 Planning and performing development.

Planning and performing development will be handled in accordance with subpart C of part 1780 of this chapter and guidance from NRCS.
§ 1781.17 Docket preparation and processing.

(a) Loan dockets. Dockets for WS loans, WS advances and RCD loans will be prepared in accordance with the applicable provisions of part 1780 of this chapter.

(1) Time for preparation of docket. Docket preparation may begin as soon as a preliminary draft of the watershed plan or RCD area plan, together with an estimate of costs and benefits, have been prepared with the assistance of NRCS and approved by the sponsoring local organization applicant. However, the applicant must understand that approval of the WS loan, WS advance, or RCD loan will not be determined until the work plan has been authorized for assistance by NRCS. To the extent practicable, docket preparation may be completed by that time to facilitate the availability of funds when needed.

(2) Instructions for preparation of docket. When the Rural Development State Director has determined that plans and other requirements are completed to the extent that preparation of the loan docket may begin, he will send the processing office a memorandum giving complete instructions for docket preparation, with a list of documents to be included in the docket.

(3) Objectives of the docket. The docket should include information for use in determining that:

(i) The sponsoring local organization:

(A) Has legal authority to construct and operate the proposed facility, borrow money, give security, incur debt, and generate revenue needed for operation, maintenance, reserves, debt payment, and other cash requirements.

(B) Is a sponsor or cosponsor of the WS plan or RCD work plan and is otherwise eligible for assistance.

(ii) Funds will be used for authorized purposes.

(iii) The source of income to be pledged for debt payment and the security proposed is adequate.

(iv) Actions required for loan closing are administratively satisfactory, legally sufficient and properly documented in accordance with Agency regulations.

(4) Assembly of the docket. The docket will be assembled in accordance with paragraph (a)(2) of this section and will include the following:

(i) A copy of the WS works of improvement agreement or RCD measure agreement.

(ii) A copy of the Operation and Maintenance Agreement between NRCS and the WS or RCD sponsoring local organization for the WS works of improvement or the RCD measure.

(iii) A statement from the NRCS State Conservationist concurring in the feasibility of the WS work of improvement or RCD measure and that NRCS is providing financial and/or technical assistance in accordance with applicable WS or RCD authorities.

(5) Narrative by processing office. This should be included in or attached to the Project Summary. It should relate project costs to benefits of the WS or RCD loan or WS advance. Minimum and average individual charges, tax levies or assessments should be given where applicable. Where taxes or assessments on land will be levied, acres should be indicated and average cost per acre should be given. Analyses of income from recreational facilities should be based on the best information available from local, State, and Federal agencies concerned with such recreation facilities. Determination of water rates, schedules, and estimated consumption of water should be made by the same methods as for loans for domestic water and irrigation.

(b) Loan processing by State Office—(1) Review of the docket. The processing office will check the docket for accuracy and completeness and forward it to the State Office with their recommendations. The Rural Development State Director will review the docket to determine that:

(i) All documents are accurate and complete.
(ii) The proposed loan complies with WS and RCD program policies and procedures of both RUS and NRCS.
(iii) Security is adequate and the repayment plan is sound.
(iv) Funds requested are for authorized purposes.
(v) Actions are in compliance with requirements of applicable Federal and State laws.

(2) Letter of conditions. When the Rural Development State Director determines that the docket is complete and the proposed activity is feasible, he will prepare a proposed letter of conditions under which the application may be further processed. The letter will be delivered to and discussed with the applicant. Upon acceptance of the conditions the applicant will indicate intentions to meet the conditions by a letter of interest and the application will be further processed.

(3) Legal review. The complete docket and proposed letter of conditions will be forwarded to the Regional Attorney, OGC for review and preparation of closing instructions. If it is not possible to issue closing instructions at that time, the Regional Attorney, will issue a preliminary legal opinion commenting upon the applicants legal existence, authority to incur debt and give security for the WS loan, WS advance, or RCD loan requested and actions to be taken before closing instructions may be issued.

(4) Authorization for approval. When the Rural Development State Director receives closing instructions or a preliminary legal opinion for a WS loan, WS advance, or RCD loan that is not within his approval authority he will send this information along with the letter, the proposed letter of conditions, and a memorandum recommending approval to the National Office. A copy of his memorandum will be sent to the processing office. If the proposed action is within the Rural Development State Director’s approval authority he need not submit the material listed in this paragraph (b)(4) to the National Office unless he wants review and comments before approval.

(c) WS advance processing. (1) When the Rural Development State Director has concurred with the NRCS State Conservationist in the inclusion of a WS advance in a watershed plan, preparation of the advance docket can be initiated and will be processed in the same manner as for a WS loan. Where both a WS loan and WS advance are planned only one docket will be prepared to include both the WS loan and WS advance.

(2) If the advance appears to be sound and proper, the Rural Development State Director will send a proposed memorandum of concurrence to the NRCS State Conservationist. The memorandum will state that RUS concurs in the execution of a work of improvement agreement for which NRCS will obligate advance funds and that RUS will accept the proposed obligations of the applicant to repay the advance subject to conditions specified in or attached to the memorandum. These conditions will include all appropriate requirements in accordance with paragraph (b)(2) of this section and will specify compliance with closing instructions issued by the Regional Attorney. It will also indicate that preparation of the WS advance docket will be in accordance with paragraph (a) of this section.

(3) The Rural Development State Director and the NRCS State Conservationist will sign the memorandum of concurrence to NRCS when:
(i) It has been determined that funds for the advance will be obligated by NRCS; and
(ii) The WS advance docket, has been approved; and
(iii) Closing instructions have been issued by the Regional Attorney; and
(iv) The Rural Development State Director and NRCS State Conservationist have determined that the applicant can comply with all requirements of the letter of conditions and closing instructions.

§1781.18 Feasibility.

(a) Before WS loan, WS advance, or RCD loan is approved, a determination of feasibility will be made by the Rural Development State Director based upon a review of plans developed in cooperation with NRCS personnel. The feasibility determination must have the concurrence of the NRCS State Conservationist before a WS loan, WS advance, or RCD loan is approved.
(b) A written assessment of the project’s feasibility will be made by the processing office, Architect/Engineer, and Program Chief in their recommendations or comments on the Project Summary. These should reflect concurrence of the respective NRCS personnel in counterpart positions with whom they cooperate in administering these programs.

§ 1781.19 Approval, closing, and cancellation.

(a) Approval and closing actions will be taken in accordance with the applicable provisions of part 1780 of this chapter and the following requirements have been met:

(1) The WS or RCD plan has been approved for operations by NRCS and the applicant is an official sponsoring or co-sponsoring local organization for the plan as evidenced by being included in the list of sponsoring or co-sponsoring local organizations in the plan.

(2) Closing instructions or a preliminary legal opinion has been prepared by the Regional Attorney.

(3) The governing body of the applicant’s sponsoring local organization has formally passed and approved the loan resolution.

(4) The Rural Development State Director and NRCS State Conservationist have determined that all planned actions can be carried out as proposed in the project plan and the docket.

(5) The NRCS State Conservationist and Rural Development State Director have mutually agreed on the priority to be given the WS loan or WS advance, or RCD loan. In making this determination, consideration will be given to the relative priority of the WS works of improvement or RCD measures to all other such work in the State and the anticipated availability of Federal and local funds to assure continuity of action and work until the project is completed. When funds are to be provided by NRCS for a WS or RCD loan or a WS advance such funds must be obligated by NRCS before closing.

(6) Public bodies will be required to use bond counsel in accordance with subpart D of part 1780 of this chapter.

(b) When favorable action is not taken on a WS loan, WS advance, or RCD loan, the Rural Development State Director will notify the NRCS State Conservationist and the applicant in writing and, if possible, arrange for a meeting of RUS and NRCS representatives with the applicant to explain the action. WS loans, WS advances, or RCD loans may be canceled before closing.

§ 1781.20 Disbursement of WS and RCD loan funds and WS advance funds.

(a) WS and RCD loan funds will be disbursed by the processing office in accordance with the applicable provisions of §1780.45 of this chapter and RUS Bulletin 1781–1, paragraph (5). Funds will be made available to the borrower as needed for payment of development or other costs for which the loan is made. The processing office must determine that the payment is for an authorized purpose and is for benefits accrued to the borrower. This will require evidence from NRCS in accordance with the applicable provisions of RUS Bulletin 1781–1, “Memorandum of Understanding Between RUS and NRCS.”

(b) WS advance funds may be disbursed in the same manner as WS loan funds if such funds are transferred to RUS by NRCS for disbursement or they may be disbursed by NRCS. When WS advance funds are disbursed by NRCS, payments from advance of funds will be reported to the Rural Development State Director each month to be reported to the Finance Office and charged to the borrower’s account. This action will be taken in accordance with the applicable provisions of RUS Bulletin 1781–1 or RUS Bulletin 1781–2 and agreement between the NRCS State Conservationist and Rural Development State Director as follows:

(1) When a future water supply is being developed with NRCS, WS advance funds, the NRCS State Conservationist will send the Rural Development State Director a monthly report of funds disbursed. This will include three (3) copies of Form NRCS-AS-49a and 49b, “Contract Payment Estimate and Construction Progress Report,” along with a transmittal Memorandum showing the sequential number (first, second, third, etc.) of the payment, the amount and date of payment, the
check number by which the payment was made and the cumulative amount of advance funds disbursed to date. When the works of improvement, for which WS advance funds are used is completed the final report will, in addition to the above, show the date that construction was completed and the total amount of WS advance funds used.

(2) WS advances for construction costs will be set out each month on Form NRCS-49a. The Rural Development State Director should make arrangements with the NRCS State Conservationist to be supplied each month with a copy of Form NRCS 49a when advance funds are included together with an official statement from the NRCS State Administrative Officer giving the date of the check and the exact amount of each advance of funds made under the advance provisions of the project agreement or of any engineering services agreement or other supplementary agreement which further implements the proposal for the advance in the project agreement. The original will be sent immediately to the Finance Office and a copy provided for the processing office file.

(3) When WS advance funds are used to acquire property for site preservation the same reporting procedure as for a future water supply will be used except that Form NRCS-AS-49a and 49b if used, should be adopted to indicate fund use. As payments are made on land on which a mortgage or other security instrument is required, such instruments will be executed in accordance with instructions from the Regional Attorney, OGC.

(4) The Rural Development State Director must send the bond or note evidencing WS advance indebtedness of the borrower to the Finance Office along with reports of payments from advance funds disbursed by NRCS. A copy of the bond or note and copy of each report of payment will be sent to the processing office.

(c) Actions subsequent to closing of loans or advances. Actions will be taken in accordance with §1780.44 of this chapter.

§ 1781.21 Borrower accounting methods, management, reporting, and audits.

These activities will be handled in accordance with the provisions of §1780.47 of this chapter.

§ 1781.22 Subsequent loans.

Subsequent loans will be processed in accordance with this part.

§ 1781.23 Servicing.

Servicing will be handled in accordance with the provisions of subpart E of part 1951 of this title.

§ 1781.24 State supplements and availability of bulletins, instructions, forms, and memorandums.

(a) State supplements will be issued as needed in accordance with applicable provisions of part 1780 of this chapter.

(b) Bulletins, instructions, forms and memorandums are available from any USDA/Rural Development office or the Rural Utilities Service, United States Department of Agriculture, Washington, DC. 20250–1500.

§§ 1781.25–1781.100 [Reserved]
§ 1782.1 Purpose.

This part outlines the Rural Utilities Service’s (RUS), an agency delivering the United States Department of Agriculture’s (USDA) Rural Development Utilities Programs, hereinafter referred to as Rural Development and/or Agency, policies and procedures for servicing direct and insured Water and Waste Disposal (WWD) loans and grants; Watershed loans and advances; Resource Conservation and Development loans; Technical Assistance and Training grants; Emergency Community Water Assistance grants; Solid Waste Management grants; and section 306C WWD loans and grants.

§ 1782.2 Objectives.

Loan and grant servicing is provided by Rural Development in order to assist recipients in complying with the established objectives and requirements for loans and grants, repaying loans on schedule, acting in accordance with any necessary agreements, and protecting Rural Development’s financial interest. Servicing by Rural Development includes, but is not limited to, the review of budgets, management reports, audits, and financial statements; performing operational inspections; providing, arranging, or recommending technical assistance; evaluating environmental impacts of proposed actions by the borrower; and performing civil rights compliance and graduation reviews.

§ 1782.3 Definitions.

The following definitions apply to this part:

Acceleration. A written notice informing the borrower that the total unpaid principal and interest is due and payable immediately.

Adjustment. Satisfactory of a debt, including release of liability, when acceptance by the Agency is conditioned upon completion of payment of the adjusted amount at a specific time or times, with or without the payment of any consideration when the adjustment offer is approved. An adjustment is not a final settlement until all payments under the adjustment agreement have been made.

Administrator. Administrator of the Rural Utilities Service, an agency delivering the United States Department of Agriculture’s Utilities Programs.

Agency. The Rural Utilities Service, an Agency delivering the United States Department of Agriculture’s Rural Development Utilities Programs, or any employee acting on its behalf in accordance with appropriate delegations of authority.

Assumption of debt. Agreement by one party to legally bind itself to pay the debt incurred by another.

Borrower. Recipient of Agency or predecessor Agency loan assistance.

Cancellation. Final discharge of debt with a release of liability.

Charge-off. Write off of a debt and termination of servicing activity without release of liability. A charge-off is a decision by the Agency to remove debt from Agency receivables, however, future payments may be received.

Compromise. Satisfaction of a debt including a release of liability by accepting a lump-sum payment of less than the total amount owed.

Defeasance. Defeasance is the use of invested proceeds from a new bond issue to repay outstanding bonds in accordance with the repayment schedule of the outstanding bonds. The new issue supersedes the contractual agreements from the prior issue.

Disposition of facility. Relinquishing control of a facility to another entity.

False information. Information, known by the applicant to be incorrect, provided with the intent to obtain benefits which would not have been obtainable based on correct information.

Government. The United States of America, acting through the Agency. USDA, Rural Development and Agency may be used interchangeably throughout this part.

Grantee. Recipient of Agency or predecessor Agency grant assistance, technical assistance, or services.

Letter of Conditions. A written document that describes the conditions
§ 1782.4 Availability of forms and regulations.

Information about the availability of forms, regulations, bulletins, and procedures referenced in this chapter are available in any office of Rural Development USDA, Washington, DC 20250-1500 or at the Web site http://www.usda.gov/rus/water.

§ 1782.5 Nondiscrimination.

Each instrument of conveyance required for a transfer, assumption, sale of facility, or other servicing action under this subpart will comply with Title VI of the Civil Rights Act of 1964 (Pub. L. 88–352), Title IX of the Education Amendments of 1972 (Pub. L. 92-318), section 504 of the Rehabilitation Act of 1973 (Pub. L. 93–112), and other Federal statutes and regulations issued pursuant thereto that prohibit discrimination on the basis of race, color, national origin, handicap, religion, age, or sex in programs or activities receiving Federal financial assistance. Such provisions apply for as long as the property continues to be used for the same or similar purposes for which the Federal assistance was extended, or for so long as the purchaser owns it, whichever is later.

§ 1782.6 [Reserved]

§ 1782.7 Grants.

Servicing actions relating to Agency grants are governed by the provisions of several regulations and executive orders, including, but not limited to, 7 CFR parts 3015, 3016, 3017, 3018, 3019, 3021, and 3052 as applicable, and Executive Order (E.O.) 12803. Grantees remain responsible for property acquired with grant funds in accordance with terms of a grant agreement and applicable regulations.

§ 1782.8 Payments.

Payments will be applied in accordance with the terms of the debt instrument. Information on nontypical payments can be obtained from the Servicing official or office. All new borrowers will use pre-authorized debits as required in their Letter of Conditions.

§ 1782.9 Environmental requirements.

Servicing actions involving lease or sale of Agency-owned property will be reviewed for compliance with 7 CFR part 1794 as required in § 1794.3. The appropriate environmental review will be completed prior to approval of the servicing action.
§ 1782.10 Audit requirements.

Audits for loans will be required in accordance with §1780.47 of this chapter. If the borrower becomes delinquent or is experiencing problems, the servicing official will require an audit or other documentation deemed necessary to resolve the delinquency. The provisions of 7 CFR 3052 address audit requirements for recipients of Federal grants.

§ 1782.11 Refinancing requirements.

If at any time it appears to the Government that the borrower is able to refinance the amount of the indebtedness then outstanding, in whole or in part, by obtaining a loan for such purposes from responsible cooperative or private credit sources, at reasonable rates and terms, the borrower will, upon request of the Government, apply for and accept such loan in sufficient amount to repay the Government and will take all such actions as may be required in connection with such loan.

§ 1782.12 Sale or exchange of security property.

A cash sale of all or a portion of a borrower's assets or an exchange of security property may be approved subject to the conditions set forth in this section.

(a) Approval conditions. Approval may be given when the servicing official determines that:

(1) The consideration is for the full amount of the debt or the present fair market value as determined by an appraisal completed by a qualified Rural Development employee or an independent appraiser as determined appropriate by the approval official;

(2) The sale or exchange will not prevent carrying out the purpose of the loan;

(3) The remaining property is adequate security for the loan and the transaction will not adversely affect the Agency's security position;

(4) If the property to be sold or exchanged will be used for similar purposes that the loan was made, the purchaser will:

(i) Execute Form RD 400-4, "Assurance Agreement." The instrument of conveyance will contain the civil rights covenant referenced in 7 CFR 1901.202(e); and

(ii) Provide the Agency with a written agreement assuming all rights and obligations of the original borrower, and

(5) Proceeds remaining after paying any reasonable and necessary selling expenses are to be used for one or more of the following purposes:

(i) To pay Agency debt, pay on debts secured by a prior lien, and pay on debts secured by a parity or subsequent lien if it is to the Agency's advantage;

(ii) To purchase or acquire property more suited to the borrower's needs, providing the Agency's security position is maintained; and

(iii) To develop or enlarge the facility if necessary to improve the borrower's debt-paying ability, place the operation on a sounder financial basis, or further the loan objectives and purposes.

(b) Sale of assets financed with Agency grants. The requirements for the sale or disposition of assets financed with Agency grants are determined by the terms of the grant agreement, 7 CFR parts 3015, 3016, and 3019, and E.O. 12803, as applicable.

(c) Release from liability. If a borrower can no longer meet the objectives of the loan, the property may be sold. If the full amount of the borrower's debt is paid or assumed, the State Director may release the borrower from liability.

§ 1782.13 Transfer of security and assumption of loans.

It is the Agency's policy to approve transfers and assumptions to transferees that will continue the original purpose of the loan. Assistant Administrator written concurrence is required when the transfer exceeds the State Director's loan approval authority. The transfer will be approved in accordance with the following requirements:

(a) General requirements for transferees. The fulfillment of the following requirements for transfers will be determined by the approval official, in his or her discretion:

1) The transferees must meet the eligibility requirements of 7 CFR part 1780 and provide the same information
required in 7 CFR part 1780, subpart B, for application processing.
(2) The transfer will not be disadvantageous to the Government as determined by the approval official.
(3) If the Agency debt(s) exceeds the present market value of the security as determined by an appraisal, the transferee will assume an amount at least equal to the present market value.
(4) The Agency must concur in plans for disposition of funds in any reserve account, including project construction bank accounts. A reserve account may be considered as a transferable asset.
(5) The transferee will assume all of the borrower’s responsibilities regarding loans. The transferee will also agree to accept the original loan conditions plus any conditions set forth by the Agency with regard to the transfer.
(6) A current appraisal will be completed to establish the present market value of the security when the full debt is not being assumed.
(7) There must be no lien, judgement, or similar claims of other parties against the Agency security being transferred unless the transferee is willing to accept such claims. The Agency must also determine that the claims will not prevent the transferee from repaying the Agency debt, meeting all operating and maintenance costs, and maintaining required reserves. The written consent of any other lienholder will be obtained where required.
(8) A letter of conditions establishing requirements to be met in connection with the transfer will be issued, and the transferee will be required to execute Form RD 1942-46, “Letter of Intent to Meet Conditions,” prior to closing of the transfer.
(9) The transferee will obtain insurance according to Agency requirements.
(10) The effective date of the transfer is the date the transfer is closed, which is the same date Form RD 1531–15, “Community Programs Assumption Agreement,” or other appropriate assumption agreement which is executed and delivered by all necessary parties.
(11) Title to all assets will be conveyed from the transferor to the transferee unless all parties concerned, including the Agency, agree upon other arrangements. All instruments of conveyance will contain the necessary nondiscrimination covenant as referred to in §1782.5.
(12) If the transfer and assumption is to one or more members of the borrower’s organization, there must not be a loss to the Government.
(13) The State Director is authorized to approve transfers to eligible transferees at the same interest rate as on the borrower’s note(s) or bond(s). The maturity of the debt instrument for the assumed debt may not exceed the lesser of the repayment period authorized in 7 CFR part 1780 for a “new” loan or the expected life of the facility.
(14) Agency National Office concurrence is required for transfers not in compliance with paragraphs (a)(1) through (13) of this section.

(b) Loan requirements for eligible transferees. If a loan is evidenced and secured by a note and lien on real or chattel property, Form RD 1531–15, or other appropriate assumption agreement will be executed by the transferee. If a bond secures a loan, transfer documents will be developed by bond counsel and approved by the Office of the General Counsel (OGC), USDA.

(1) Loans being transferred and assumed may be combined when the security is the same, new terms are being provided, a new debt instrument will be issued, and the loans have the same interest rate and are for the same purpose. If applicable, 7 CFR part 1780 will govern the preparation of any new debt instruments required.
(2) A loan may be made in connection with a transfer if the transferee meets all eligibility and other requirements for the kind of loan being made. Such a loan will be considered as a separate loan and must be evidenced by a separate debt instrument. However, it is permissible to have one authorizing loan resolution or ordinance if permitted by State statutes.
(3) Any development funds remaining in a bank account that are not refunded to the Agency will be transferred to a bank account for the transferee. This will occur simultaneously with the closing of the transfer, and the funds will be used in completing planned development.
§ 1782.17 Release from liability.

Transferees may be released from liability when their debt is paid in full or when the debt is settled in accordance with § 1782.20 of this part.

(d) Transfer of facility financed with Agency grants. The requirements for the sale or disposition of assets financed with Agency grants are determined by the terms of the grant agreement, 7 CFR parts 3015, 3016, and 3019, and E.O. 12803, as applicable.

§ 1782.14 Protection of service areas—7 U.S.C. 1926(b).

(a) 7 U.S.C. 1926(b) was enacted to protect the service area of Agency borrowers with outstanding loans, or those loans sold in the sale of assets authorized by the “Joint Resolution Making Continuing Appropriations for the Fiscal Year 1987, Pub. L. 99–591, 100 Stat. 3341 (1986).” From loss of users due to actions or activities of other entities in the service area of the Agency financed system. Without this protection, other entities could extend service to users within the service area, and thereby undermine the purpose of the congressionally mandated water and waste loan and grant programs and jeopardize the borrower’s ability to repay its Agency debt.

(b) Responsibility for initiating action in response to those actions prohibited by 7 U.S.C. 1926(b) rests with the borrower.

§ 1782.16 Defeasance of Agency indebtedness.

Defeasance, or amending outstanding loan instruments and agreements to permit defeasance of Agency debt instruments, is prohibited.

§ 1782.17 Parity lien.

In order for the Agency to agree to a parity lien position, the borrower must submit a written request to the servicing office.

(a) The written request for parity must contain the following items:

(1) An explanation of the purpose of the request for parity; amount of loan for which parity is requested; description of security property; type of security instrument; name and address of financial institution requesting the transaction; and other information determined necessary by the servicing official to evaluate the request.

(2) Current financial statements or an audit, if available or determined necessary by the servicing official.

(3) An annual operating budget which projects income and expenses for a typical year’s operation. If construction is involved, the budget must be projected through the first full year of operation following completion of the planned improvements.

(4) A copy of the proposed security instrument.

(5) A certification from the borrower that the Agency debt cannot be refinanced at reasonable rates and terms.

(6) An appraisal, when the primary security is real estate or determined necessary by the servicing official in order to determine the adequacy of loan security or repayment ability.

(7) A certification that any development work will comply with subpart C of part 1780 of this chapter.

(b) Requests for parity must comply with requirements of paragraph (a) of this section, requirements as specified in the bond or loan documents, the requirements as specified in 7 CFR part 1780, subpart D, and as provided in applicable State law.

(c) If the borrower has met all of the requirements in paragraphs (a) and (b) of this section and the proposal is determined to be in the Government’s interest, the Agency will then grant approval of the borrower’s request for
parity. The following factors will be considered in assessing whether the request is in the Government’s interest:

1. The value of the added assets compared with the amount of new debt to be secured;
2. The value of the assets already pledged under the security documents, and any effects of the proposed transaction on the value of those assets;
3. The ratio of the total outstanding debt secured under the security documents to the value of all assets pledged as security under the security documents;
4. The borrower’s ability to repay its debt owed to the Government;
5. The overall financial viability of the borrower;
6. The borrower’s current relationship with the Agency (i.e. no defaults under the loan documents);
7. Such other factors that may be relevant in individual cases, as determined by the Agency.

§ 1782.18 [Reserved]

§ 1782.19 Third party agreements.

The State Director may authorize third party operation, maintenance, and management of an Agency financed facility. The borrower’s attorney must review the contract, management agreement, written lease, or other third party agreement and issue an opinion to the Agency as to their legal sufficiency. The borrower shall retain the legal authority necessary for owning, constructing, operating, and maintaining the facility.

§ 1782.20 Debt Settlement.

Pursuant to 7 U.S.C. 1981, this section prescribes policies for debt settlement of Water and Waste Disposal loans; Watershed loans and advances; Resource Conservation and Development loans; and 306 (c) Water and Waste Facility loans. Within the Omnibus Consolidated Rescissions and Appropriations Act of 1996 (Public Law 104–134) is the Debt Collection Improvement Act of 1996. This law provides that any non-tax debt or claim owed to the United States that has been delinquent for a period of 180 days shall be turned over to the Secretary for appropriate action to collect or terminate collection actions on the debt or claim. Debt that is in litigation or foreclosure, with a collection agency or designated Federal debt collection center, or that will be disposed of under an asset sales program, is exempt from transfer to the Secretary.

(a) General requirements for debt settlement. (1) The debt or any extension thereof on which settlement is requested must be due and payable. The debt will be due and payable either under the terms of the note or other instrument, or by acceleration, unless the debt is to be cancelled without application under paragraph (e)(2) of this section or charged off under paragraph (f) of this section.

2. Normally, all security will be disposed of prior to the date of application for debt settlement unless it is necessary to abandon security through the debt settlement process. In such cases, debt settlement may proceed if the servicing official determines that further collection efforts would be ineffective, uneconomical, and not in the best interests of the Government.

3. Debtors will not be permitted to sell security and use the proceeds as part or all of a compromise/adjustment debt settlement offer.

4. Requests for debt settlement will consist of Form RD 1956–1 “Application For Settlement of Indebtedness,” current financial information, description and estimated market value of collateral, and status of operation (i.e., number of users, compliance with environmental issues, etc.).

5. Office of General Counsel (OGC) advice on compliance with State or Federal statutes that may affect the debt settlement action must be requested.

(b) Debts ineligible for settlement. Debts will not be settled if:

1. Referral to the Office of Inspector General and/or to OGC is contemplated or pending because of suspected criminal violation.

2. Civil action to protect the interest of the Government is contemplated or pending.

3. An investigation for suspected fiscal irregularity is contemplated or pending, or

4. The debtor requests settlement of a claim that has been referred to or a
judgment obtained by the United States Attorney. The settlement offer and any related payment must be submitted directly to the United States Attorney for consideration.

(c) Types of debt settlement. Typically, debt settlement will be accomplished through compromise/adjustment, charge-off, or cancellation. Any debt remaining after the security has been liquidated, by sale or transfer, will be cancelled if there are no other assets from which to collect the debt. The servicing official will proceed with advice from OGC and the National Office, as required.

(d) Compromise and adjustment. Debts may be compromised or adjusted and security retained by the debtor, provided:

1. The debtor is unable to pay the indebtedness in full,
2. The debtor has offered an amount equal to the present fair market value of all security or facility financed, and
3. The debtor has offered any additional amount that the debtor is able to pay.

(e) Cancellation. Non-judgment debts, regardless of the amount, may be cancelled with or without application by the debtor.

(1) With application by the debtor. Debts may be cancelled upon application of the debtor, subject to the following conditions:

1. The servicing official furnishes a favorable recommendation concerning the cancellation;
2. There is no known security for the debt and the debtor has no other assets from which the debt could be collected;
3. The debtor is unable to pay any part of the debt and has no reasonable prospect of being able to do so; and
4. The debt or any extension thereof is due and payable under the terms of the note or other instrument or due to acceleration by written notice prior to the date of application.

(2) Without application by debtor. Debts may be cancelled upon a favorable recommendation of the servicing official in the following instances:

1. Debtor discharged in bankruptcy. If there is no security for the debt, debts discharged in bankruptcy shall be cancelled by the use of Form RD 1956-1. A copy of the Bankruptcy Court’s Discharge Order must be attached.
2. Impractical to obtain debtor’s signature. Debts may be cancelled if it is impractical to obtain a signed application and the requirements of paragraphs (e)(1) of this section are met. Form RD 1956-1 will document the specific reason(s) why it was impossible or impracticable to obtain the signature of the debtor. If the debtor refused to sign the application, the reason(s) should be documented.

(f) Charge-off—(1) Judgment debts. Judgment debts, regardless of the amount, may be charged off without the debtor’s signature upon a favorable recommendation of the servicing official provided:

1. The United States Attorney’s file is closed, and
2. The requirements of paragraph (e)(2)(ii) of this section, if applicable, have been met, or 2 years have elapsed since any collections were made on the judgment. The debtor must also have no equity in the property subject to the lien or upon which a lien can be obtained.

(2) Non-judgment debts. Debts that cannot be settled under other sections of this part may be charged off without the debtor’s signature upon a favorable recommendation of the servicing official in the following instances:

1. When OGC advises in writing that the claim is legally without merit or that evidence necessary to prove the claim in court cannot be provided; or
2. When there is no known security for the debt, the debtor has no other assets from which the debt could be collected, and the debtor:
   A. Is unable to pay any part of the debt and has no reasonable prospect of being able to do so; or
   B. Is able to pay part or all of the debt but refuses to do so, and OGC provides an opinion to the effect that the Government cannot enforce collection of a significant amount from assets or income.

§ 1782.21 [Reserved]

§ 1782.22 Exception authority.

The Administrator may, in individual cases, make an exception to any requirement or provision of this part
which is not inconsistent with the authorizing statute or other applicable law and is determined to be in the Government’s interest. Requests for exceptions must be made in writing by the State Director and supported with documentation to explain the adverse effect on the Government’s interest, propose alternative course(s) of action, and show how the adverse affect will be eliminated or minimized if the exception is granted. The exception decision will be documented in writing, signed by the Administrator, and retained in the files.

§ 1782.23 Use of Rural Development loans and grants for other purposes.

(a) If, after making a loan or a grant, the Administrator determines that the circumstances under which the loan or grant was made have sufficiently changed to make the project or activity for which the loan or grant was made available no longer appropriate, the Administrator may allow the borrower or grantee to use property (real and personal) purchased or improved with the loan or grant funds, or proceeds from the sale of property (real and personal) purchased with such funds, for another project or activity that:

1. Will be carried out in the same area as the original project or activity;
2. Meets the criteria for a loan or grant described in section 381E(d) of the Consolidated Farm and Rural Development Act (Pub. L. 87–128), as amended; and
3. Satisfies such additional requirements as are established by the Administrator.

(b) If the new use of the property is under the authority of another USDA Agency Administrator, the other Administrator will be consulted on whether the new use will meet the criteria of the other program. Since the new project or activity must be carried out in the same area as the original project or activity, a new rural area determination will not be necessary.

(c) Borrowers and grantees that wish to use the proceeds for other purposes may make their request through the appropriate Rural Development State Office. Permission to use this option will be exercised on a case-by-case basis on applications submitted through the State Office to the Administrator for consideration. If the proposal is approved, the Administrator will issue a memorandum to the State Director outlining the conditions necessary to complete the transaction.

§§ 1782.24–1782.99 [Reserved]

§ 1782.100 OMB Control Number.

The information collection requirements in this part are approved by the Office of Management and Budget (OMB) and assigned OMB Control Number 0572–0137.

PART 1783—REVOLVING FUNDS FOR FINANCING WATER AND WASTEWATER PROJECTS (REVOLVING FUND PROGRAM)

Subpart A—General

Sec.
1783.1 What is the purpose of the Revolving Fund Program?
1783.2 What Uniform Federal Assistance Provisions apply to the Revolving Fund Program?
1783.3 What definitions are used in this regulation?

1783.10 What is the grant agreement?
1783.11 What is the revolving loan fund?
1783.12 What are eligible uses of grant proceeds?
1783.13 What administrative expenses may be funded with grant proceeds?

Subpart C—Revolving Loan Program Loans

1783.14 What are the eligibility criteria for RFP loan recipients?
1783.15 What are the terms of RFP loans?
1783.16 How will loans from the revolving fund be serviced?

Subpart A—General

§ 1783.1 What is the purpose of the Revolving Fund Program?

This part sets forth the policies and procedures for making grants to qualified private, non-profit entities to capitalize revolving funds for the purpose of providing financing to eligible entities for pre-development costs associated with proposed water and wastewater projects or with existing water and wastewater systems, and short-term costs incurred for replacement equipment, small-scale extension of services, or other small capital projects that are not part of the regular operations and maintenance activities of existing water and wastewater systems.

§ 1783.2 What Uniform Federal Assistance Provisions apply to the Revolving Fund Program?

(a) This program is subject to the general provisions that apply to all grants made by USDA and that are set forth in 7 CFR Part 3015—Uniform Federal Assistance Regulations.

(b) This program is subject to the uniform administrative requirements that apply to all grants made by USDA to non-profit organizations and that are set forth in 7 CFR Part 3019—Uniform Administrative Requirements for Grants And Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations.

(c) This program is subject to OMB Circular No. A–122 (Revised): Cost Principles for Non-Profit Organizations.

§ 1783.3 What definitions are used in this regulation?

Administrative expenses means expenses incurred by a grant recipient that are of the type more particularly described in § 1783.12.

Applicant means a private, non-profit organization that applies for an RFP grant under this part.

CONACT means the Consolidated Farm and Rural Development Act.

Eligible entity means an entity eligible to obtain a loan, loan guarantee or grant under paragraph 1 or paragraph 2 of section 306(a) the CONACT (codified at 7 U.S.C. 1926(a)(1) and (2)).

Grant agreement means the contract between RUS and the grant recipient which sets forth the terms and conditions governing a particular grant awarded under this part.

Grant recipient means a private, non-profit entity that has been awarded a grant under this part.

Loan recipient means an eligible entity that has received an RFP loan.

Revolved funds means the cash portion of the revolving loan fund that is not composed of RFP grant funds, including cash comprising repayments of RFP loans, fees relating to RFP loans and interest collected on RFP loans.

Revolving loan fund means the loan fund established by the grant recipient to carry out the purposes of this part, such fund comprising the proceeds of an RFP grant and other related assets.

RFP means Revolving Fund Program.

RFP grant means a grant from RUS to a grant recipient under this part.

RFP loan means a loan from a grant recipient using the direct or indirect proceeds of an RFP grant awarded under this part.

Rural and rural area means a city, town or unincorporated area that has a population of no more than 10,000 inhabitants, according to the latest decennial census of the United States.

RUS means the Rural Utilities Service, a Federal agency delivering the USDA’s Rural Development Utilities Program.

USDA means the United States Department of Agriculture.

§ 1783.4 [Reserved]

Subpart B—Revolving Loan Program Grants

§ 1783.5 What are the eligibility criteria for grant recipients?

(a) The applicant must be a private entity.

(b) The applicant must be organized as a non-profit entity.

(c) The applicant must have the legal capacity and lawful authority to perform the obligations of a grantee under this part.
Example 1 to paragraph (c): If the organization is incorporated as a non-profit corporation, it must have corporate authority under state law and its corporate charter to engage in the practice of making loans to legal entities.

Example 2 to paragraph (c): If the organization is an unincorporated association, state law may prevent the organization from entering into binding contracts, such as a grant agreement.

d) The applicant must have sufficient expertise and experience in making and servicing loans to assure the likelihood that the objectives of this part can be achieved.

§ 1783.6 When will applications for grants be accepted?

In Fiscal Year 2004, applications will be accepted for this RFP grant program from October 6, 2004, until December 6, 2004, at which time the initial application period shall close. An applicant may withdraw, substitute, amend or supplement its application at any time prior to the closing of the initial application period. Once the initial application period has closed, all applications shall be considered final. For subsequent fiscal years, if any funds for this program are available, the Secretary will publish a notice to that effect. The notice will establish the period during which applications for such funds may be submitted for consideration.

§ 1783.7 What is the grant application process?

(a) The applicant must complete and submit the following items to RUS to apply for a grant under this part:

(1) Application for Federal Assistance: Standard Form 424;
(2) Budget Information—Non-Construction Programs: Standard Form 424A;
(3) Assurances—Non-Construction Programs: Standard Form 424B;
(4) Evidence of applicant’s legal existence and authority in the form of certified copies of organizational documents and a certified list of directors and officers with their respective terms;
(5) Evidence of tax exempt status, and
(6) Most recent annual audit conducted by an independent auditor.

(b) The applicant must submit a written work plan that demonstrates the ability of the applicant to make and service loans to eligible entities under this program and the feasibility of the applicant’s lending program to meet the objectives of this part.

c) The applicant should submit a narrative establishing the basis for any claims that it has substantial expertise in making and servicing loans. The Secretary will give priority to an applicant that demonstrates it has substantial experience of this type.

d) The applicant may submit such additional information as it elects to support and describe its plan for achieving the objectives of the part.

§ 1783.8 What are the acceptable methods for submitting applications?

(a) Applications for RFP grants may be submitted by U.S. Mail. Applications submitted by mail must be addressed as follows: Rural Utilities Service, U.S. Department of Agriculture, 1400 Independence Avenue, SW., STOP 1548, Washington, DC 20250–1548. The outside of the application should be marked: “Attention: Assistant Administrator, Water and Environmental Programs.” Applications submitted by mail must be postmarked not later than the filing deadline to be considered during the period for which the application was submitted.

(b) In lieu of submitting an application by U.S. Mail, an applicant may file its application electronically by using the Federal Government’s eGrants Web site (Grants.gov) at http://www.grants.gov. Applicants should refer to instructions found on the Grants.gov Web site for procedures for registering and using this facility. Applicants who have not previously registered on Grants.gov should allow a sufficient number of business days to complete the process necessary to be qualified to apply for Federal Government grants using electronic submissions. Electronic submissions must be filed not later than the filing deadline to be considered during the period for which the application was submitted.

(c) The methods of submitting applications may be changed from time to time to reflect changes in addresses and electronic submission procedures.
Applicants should refer to the most recent notice of funding availability for notice of any such changes. In the event of any discrepancy, the information contained in the notice must be followed.

§ 1783.9 What are the criteria for scoring applications?
(a) Applications that are incomplete or ineligible will be returned to the applicant, accompanied by a statement explaining why the application is being returned.
(b) Promptly after an application period closes, all applications that are complete and eligible will be ranked competitively based on the following scoring criteria:

(1) Degree of expertise and successful experience in making and servicing commercial loans, with a successful record, for the following number of full years:
   (i) At least 1 but less than 3 years—5 points
   (ii) At least 3 but less than 5 years—10 points
   (iii) At least 5 but less than 10 years—20 points
   (iv) 10 or more years—30 points
(2) Extent to which the work plan demonstrates a well thought out, comprehensive approach to accomplishing the objectives of this part, clearly defines who will be served by the project, clearly articulates the problem/issues to be addressed, identifies the service area to be covered by the RFP loans, and appears likely to be sustainable. Up to 40 points.
(3) Percentage of applicant contributions. Points allowed under this paragraph will be based on written evidence of the availability of funds from sources other than the proceeds of an RFP grant to pay part of the cost of a loan recipient’s project. In-kind contributions will not be considered. Funds from other sources as a percentage of the RFP grant and points corresponding to such percentages are as follows:
   (i) Less than 20%—ineligible
   (ii) At least 20% but less than 50%—10 points
   (iii) 50% or more—20 points
(4) Extent to which the goals and objectives are clearly defined, tied to the work plan, and are measurable. Up to 15 points.
(5) Lowest ratio of projected administrative expenses to loans advanced. Up to 10 points.
(6) The evaluation methods for considering loan applications and making RFP loans are specific to the program, clearly defined, measurable, and are consistent with program outcomes. Up to 20 points.
(7) Administrator’s discretion, considering such factors as creative outreach ideas for marketing RFP loans to rural residents; the amount of funds requested in relation to the amount of needs demonstrated in the work plan; previous experiences demonstrating excellent utilization of a revolving loan fund grant; and optimizing the use of agency resources. Up to 10 points.
(c) All qualifying applications under this part will be scored based on the criteria contained in this section. Awards will be made based on the highest ranking applications and the amount of financial assistance available for RFP grants. All applicants will be notified of the results in writing on form AD–622.

§ 1783.10 What is the grant agreement?
RUS and the grant recipient will enter into a contract setting forth the terms and conditions governing a particular RFP grant award. RUS will furnish the form of grant agreement. No funds awarded under this part shall be disbursed to the grant recipient before the grant agreement is binding and RUS has received a fully executed counterpart of the grant agreement.

§ 1783.11 What is the revolving loan fund?
The grant recipient shall establish and maintain a revolving loan fund for the purposes set forth in §1783.12. The revolving loan fund shall be comprised of revolving loan fund grant funds and the grant recipient’s contributed funds. All revolving loan fund loans made to loan recipients shall be drawn from the revolving loan fund. All revolving loan fund loans shall be serviced and the revolving loan fund maintained, in accordance with this part and applicable law.
§ 1783.12 What are eligible uses of grant proceeds?

(a) Grant proceeds shall be used solely for the purpose of establishing the revolving loan fund to provide loans to eligible entities for:

(1) Pre-development costs associated with proposed water and wastewater projects or with existing water and wastewater systems, and

(2) Short-term costs incurred for replacement equipment, small-scale extension of services, or other small capital projects that are not part of the regular operations and maintenance activities of existing water and wastewater systems.

(b) A grant recipient may not use grant funds in any manner inconsistent with the terms of the grant agreement.

§ 1783.13 What administrative expenses may be funded with grant proceeds?

RFP grant funds may not be used for any purposes not described in § 1783.12, including, without limitation, payment or reimbursement of any of the grant recipient’s administrative costs or expenses. Administrative expenses may, however, be paid or reimbursed from revolving loan fund assets that are not RFP grant funds, including revolved funds and cash originally contributed by the grant recipient.

Subpart C—Revolving Fund Program Loans

§ 1783.14 What are the eligibility criteria for RFP loan recipients?

(a) A loan recipient must be an eligible entity as defined in § 1783.3.

(b) The loan recipient must be unable to finance the proposed project from their own resources or through commercial credit at reasonable rates and terms.

(c) The loan recipient must have or will obtain the legal authority necessary for owning, constructing, operating and maintaining the proposed service or facility, and for obtaining, giving security for, and repaying the proposed loan.

(d) The project funded by the proceeds of an RFP loan must be located in, or the services provided as the result of such project must benefit, rural areas.

§ 1783.15 What are the terms of RFP loans?

(a) RFP loans under this part—

(1) Shall have an interest rate that is determined by the grant recipient and approved by RUS;

(2) Shall have terms not to exceed 10 years; and

(3) Shall not exceed the lesser of $100,000 or 75 percent of the total cost of a project. The total outstanding balance for all loans under this program to any one entity shall not exceed $100,000.

(b) The grant recipient must set forth the RFP loan terms in written documentation signed by the loan recipient.

(c) Grant recipients must develop and use RFP loan documentation that conforms to the terms of this part, the grant agreement, and the laws of the state or states having jurisdiction.

§ 1783.16 How will the loans given from the revolving fund be serviced?

The grant recipient shall be responsible for servicing all loans, to include preparing loan agreements, processing loan payments, reviewing financial statements and debt reserves balances, and other responsibilities such as enforcement of loan terms. Loan servicing will be in accordance with the work plan approved by the Agency when the grant is awarded for as long as any loan made in whole or in part with Agency grant funds is outstanding.

PART 1785—LOAN ACCOUNT COMPUTATIONS, PROCEDURES AND POLICIES FOR ELECTRIC AND TELEPHONE BORROWERS

Subpart A [Reserved]

Subpart B—RUS Cushion of Credit Account Computations and Procedures

Sec.
1785.66 General.
1785.67 Definitions.
1785.68 Establishing an RUS cushion of credit payment account.
1785.69 Cushion of credit payment account computations.
Rural Utilities Service, USDA

§ 1785.68 Establishing an RUS cushion of credit payment account.

A cushion of credit account shall be automatically established by RUS for each borrower who makes a payment after October 1, 1987, in excess of amounts then due on an RUS note. Such account will bear interest at a rate of 5 percent per annum. All payments on RUS notes which are in excess of required payments and not otherwise designated shall be deposited in

§ 1785.66 General.

This subpart B sets forth policies and procedures on the RUS cushion of credit payments program. The cushion of credit payments program will be maintained only for insured loans evidenced by obligations of the Fund. A subaccount within the Fund is hereby established for purposes of promoting rural economic development. It shall be known as the "Rural Economic Development Subaccount." The assets of the subaccount shall be obtained from crediting (on a monthly basis) a sum determined by multiplying the outstanding cushion of credit payments made after October 1, 1987, by the difference (converted on a monthly basis) between the average weighted interest rate paid on outstanding certificates of beneficial ownership issued by the Fund and the 5 percent rate of interest provided to borrowers on cushion of credit payments, repayment of loans made pursuant to Section 313 of the Act, and other sources as provided by law. This subaccount shall be used to provide grants or zero interest loans to borrowers under the Act for the purpose of promoting rural economic development.

§ 1785.67 Definitions.

Accumulated (deferred) interest means interest allowed to accumulate up to, and including, the basis date of RUS notes covering loans approved before June 5, 1957. The accumulated interest is payable in equal periodic installments over the remaining life of the notes.

Act means the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 et seq.).

Advance payment means a voluntary unscheduled payment on an RUS note, made prior to October 2, 1987, credited to the advance payment account of a borrower.

Cushion of Credit Payment means a voluntary unscheduled payment on an RUS note made after October 1, 1987, credited to the cushion of credit account of a borrower.

Current interest means interest payable periodically as it accrues.

Fund means the Rural Electrification and Telephone Revolving Fund established pursuant to the Act.

Interest credit means interest earned on balances in advance payment or cushion of credit accounts. Since the periodic installments are established by the terms of the notes, the interest credits cannot serve to change the total amount of each installment; therefore, an amount equal to the interest credits is added to the principal installment due. On receipt of the full installments, amounts equal to the interest credits (the principal offsets) are added to the respective advance payment accounts.

Prepayment means a voluntary unscheduled payment which the borrower instructs RUS to apply directly and immediately to the principal of an RUS note.

RUS notes means those notes, bonds, or other obligations evidencing indebtedness created by loans made by RUS pursuant to titles I, II, or III of the Act.

Subaccount means the Rural Economic Development Subaccount established pursuant to the Act as part of the Fund.
§ 1785.69 Cushion of credit payment account computations.

(a) Deposits. Cushion of credit payments are credited to the borrowers’ cushion of credit accounts.

(b) Interest. Interest at the rate of 5 percent per annum shall be credited on a quarterly basis to cushion of credit accounts. Interest earned will appear as a reduction in the interest billed on the borrower’s RUS notes and will be separately shown on RUS Form 694, “Statement of Interest and Principal Due.”

§ 1785.70 Application of RETRF cushion of credit payments.

(a) If a maturing installment on an RUS note or a note which has been guaranteed by RUS is not received by its due date, funds will be withdrawn from the borrower’s cushion of credit account and applied as of the installment due date beginning with the oldest of such notes as follows: first, to current interest then due on all notes; second, to the accumulated interest due, if any, on all notes; and third, to the principal then due on all notes. In those instances where a borrower has prior to October 2, 1987, maintained an advance payment account with RUS, its cushion of credit account will be applied in accordance with the provisions of this section prior to using any balance remaining in its advance payment account to pay interest and principal installments on notes. Computations required under this section have been made by RUS as of October 2, 1987; however, on or before May 25, 1989 any borrower may make a one time irrevocable election to have all such computations made as of April 5, 1989, by filing written notice to that effect with Robert D. Ruddy, Director, Fiscal Accounting Division, Rural Utilities Service, Washington, DC 20250–1500.

(b) A borrower may reduce the balance of its cushion of credit account only if the amount obtained from the reduction is used to make scheduled payments on loans made or guaranteed under the Act.

[54 FR 13669, Apr. 5, 1989; 54 FR 17703, Apr. 25, 1989]

Subpart A—General [Reserved]

§§ 1786.1–1786.24 [Reserved]

Subpart B—Prepayment of RUS Guaranteed Federal Financing Bank Loans Pursuant to Section 306(A) of the RE Act

§ 1786.25 Purpose.

This subpart contains the general regulations of the Rural Utilities Service (RUS) for implementing the provisions of (a) section 306(A) of the Rural Electrification Act of 1936, as amended (RE Act); (b) section 633 of the Rural Development, Agriculture, and Related Agencies Appropriations Act, 1988 (Pub. L. 100–202) (the continuing resolution); and (c) section 637 of the Rural Development, Agriculture, and Related Agencies Appropriations Act, 1989 (Pub. L. 100–460) (the 1989 Appropriations Act) which permit, in certain circumstances, loans made by the Federal Financing Bank (FFB) and guaranteed by the Administrator of RUS to be prepaid by RUS electric and telephone borrowers by paying the outstanding principal balance due on the FFB loan, using a private loan with the existing RUS guarantees or using internally generated funds.

§ 1786.26 Policy.

It is the policy of RUS to facilitate the prepayment of FFB loans in accordance with the provisions of section...
§ 1786.27 Definitions and rules of construction.

(a) Definitions. For the purposes of this subpart, the following terms shall have the following meanings:

Administrator means the Administrator of RUS.

Application Category shall have the meaning set forth in §1786.29(c).

Application period means a period during which RUS is accepting applications to make prepayments pursuant to this subpart, and initially means:

(1) In the case of telephone borrowers, the period commencing on February 12, 1990 and ending on March 12, 1990;

(2) In the case of financially distressed borrowers, the period commencing October 1, 1990 and ending on July 30, 1993; or

(3) In the case of other borrowers, the period to be announced by RUS.

Borrower means any organization which has an outstanding FFB loan guaranteed by RUS under the RE Act.

Business Day means any day other than a Saturday, a Sunday, a legal public holiday under 5 U.S.C. section 6103 for the purposes of statutes relating to pay and leave of employees, or any other day declared to be legal holiday for the purposes of statutes relating to pay and leave of employees by Federal statute or Federal Executive Order.

Date Received means the date inscribed on the Notice of Intent to Prepay the Federal Financing Bank, by an authorized official of RUS, as the date the application was received.

Documentation means all or part of the agreements relating to a prepayment under this part, irrespective of whether RUS is a party to each agreement, including all exhibits to such agreements.

Electric Program Applications shall have the meaning specified in §1786.29(c)(1).

Existing Loan Guarantee means a guarantee of payment issued by RUS to FFB pursuant to the RE Act for an FFB loan made on or before July 2, 1986.

Fees means any fees, costs or charges, incurred in connection with obtaining the private loan used to make the prepayment including without limitation, accounting fees, filing fees, legal fees (including fees and disbursements charged by counsel representing the borrower), printing costs, recording fees, trustee fees, underwriting fees, capital stock purchases or other equity investment requirements of the lender, and other related transaction expenses.

Financially Distressed Borrower means an RUS-financed electric system determined by the Administrator to be either (1) in default or near default on interest or principal payments due on loans made or guaranteed under the RE Act, and is making a good faith effort to increase rates and reduce costs to avoid or mitigate default; or (2) participating in a work out or debt restructuring plan with RUS, either as the borrower being restructured or as a borrower providing assistance as part of the work out or restructuring.

Financially Viable Lender means:

(1) A lender (i) which has a capital and surplus of at least $50 million; (ii) is a beneficiary of an irrevocable letter of credit, in form and substance satisfactory to the Administrator, payable to it in the amount of $50 million; (iii) is the beneficiary of a guarantee, in form and substance satisfactory to the Administrator, in the amount of $50 million from a lending institution with a capital and surplus of at least $50 million; or (iv) has other credit support, in form and substance satisfactory to the Administrator, in the amount of $50 million; or

(2) In the event of a prepayment totaling less than $100 million, a lender (i) which has a capital and surplus of at
least $10 million; (ii) is a beneficiary of an irrevocable letter of credit, in form and substance satisfactory to the Administrator, payable to it in the amount of $10 million; (iii) is the beneficiary of a guarantee, in form and substance satisfactory to the Administrator, in the amount of $10 million from a lending institution with a capital and surplus of at least $10 million; or (iv) has other credit support, in form and substance satisfactory to the Administrator, in the amount of $10 million.

FFB means the Federal Financing Bank, an instrumentality and wholly owned corporation of the United States.

FFB Loan means one or more advances, or a part of one or more advances, made on or before July 2, 1986, by FFB on a promissory note or notes executed by a borrower and guaranteed by RUS pursuant to section 306 of the RE Act (7 U.S.C. 936).

Guarantee means the original endorsement, in the form specified by RUS which is executed by the Administrator and shall be an obligation supported by the full faith and credit of the United States and incontestable except for fraud or misrepresentation of which the holder had actual knowledge at the time it became a holder.

Increase in Loan Guarantee Risk means the change in any of the components of loan guarantee risk associated with the private loan which in the judgment of RUS increases the magnitude or duration of the loan guarantee risk currently assumed by RUS in connection with the existing loan guarantee;

Internally Generated Funds means money belonging to the borrower other than: (1) Proceeds of loans made or guaranteed under the RE Act or (2) funds on deposit in the cash construction trustee account;

Lender means the organization making and servicing the private loan which is to be guaranteed under the provisions of this subpart and used to prepay the FFB loan. The term lender does not include the FFB, or any other Government agency.

Loan Guarantee Agreement means the written contract by and among the lender, the borrower, the Administrator, and such other parties that RUS may require, setting forth the terms and conditions of a guarantee issued pursuant to the provisions of this subpart.

Loan Guarantee Risk means the risk as determined by RUS associated with guaranteeing a loan for a particular borrower. Components of loan guarantee risk include the following:

1. The outstanding principal balance of a loan;
2. The dollar weighted average interest rate (stated as an annual percentage rate) on a loan;
3. The final maturity date of a loan;
4. The annual principal amortization of the loan; and
5. Any other factor that as determined by RUS increases the magnitude or duration of the guarantee.

Mortgage means the mortgage and security agreements by and among the borrower and RUS, as from time to time supplemented, amended and restated.

Notice of Intent to Prepay the Federal Financing Bank means the notice in the form specified in §1786.33 hereof.

Prepayment Authority shall have the meaning specified in §1786.29(a).

Private Loan means a loan or loans to be guaranteed under the provisions of this part and used to prepay an FFB loan.

Pro-rated Percentage shall have the meaning specified in §1786.30(b)(1).
§ 1786.28 Qualifications.

(a) Borrowers. To qualify to prepay an FFB loan pursuant to this subpart, the borrower must:

(1) Demonstrate that the FFB loan was outstanding on July 2, 1986;

(2) Prepay the FFB loan by:

(i) Using a private loan with the existing loan guarantee;

(ii) Using internally generated funds; or

(iii) Using a combination of a private loan with the existing loan guarantee and internally generated funds; and

(3) Certify that any savings resulting from such prepayment will be passed on to its customers, or used to improve the financial strength of the borrower in cases of financial hardship.

(b) Lenders. To participate pursuant to this subpart, in a borrower’s prepayment of an FFB loan by means of a private loan, the lender must:

(1) Be a private legally organized lender, or a lender established pursuant to the Farm Credit Act of 1971, as amended;

(2)(i) Be subject to credit examination and supervision by either an agency of the United States or a state and be in good standing with its licensing authority and have met the requirements, if any, of licensing, lending and loan servicing in the state where the collateral for the Loan is located;

(ii) Be a financially viable lender; or

(iii) Be a trust administered by an entity meeting the requirements of paragraph (b)(2)(i) or (ii) of this section; and

(3) Have the capability to adequately service the private loan either by using its own resources or by contracting for such resources with a financially viable lender. Under no circumstances may the borrower or an affiliate of the borrower service the private loan. A qualified lender may participate out each private loan to entities other than a Government agency, the borrower, or an affiliate of the borrower, provided that such participation shall be on terms and conditions satisfactory to the Administrator.

(c) Private Loans. A borrower who qualifies pursuant to §1786.28(a) may at its option elect to use a private loan to make a prepayment, or a portion of a prepayment, pursuant to this subpart.

Service or Servicing means the following activities:

(1) The billing and collecting of the private loan payments from the borrower;

(2) Notifying the Administrator promptly of any default in the payment of principal and interest on the private loan and submitting a report, as soon as possible thereafter, setting forth the servicer’s views as to the reason for the default, how long the servicer expects the borrower to be in default, and what corrective actions the borrower states it is taking to achieve a current debt service position;

(3) Notifying the Administrator of any known violations or defaults by the borrower under the lending agreement, loan guarantee agreement, the mortgage, or related security instruments, or conditions of which the servicer or the lender is aware which might lead to nonpayment, violation or other default; and

(4) Such other activities as may be specified in the loan guarantee agreement.

Settlement Date means the date the borrower disburses funds to the FFB in order to complete a prepayment pursuant to this subpart, and shall be a date agreed to by RUS, and a date on which both the FFB and the Federal Reserve Bank of New York are open for business.

Standard Electric Program Application shall have the meaning specified in §1786.29(c)(1).

Telephone Borrower means a borrower that provides telephone service as defined in 7 CFR 1735.2(a).

Telephone Program Applications shall have the meaning specified in §1786.29(c)(2).

(b) Rules of Construction. Unless the context shall otherwise indicate, the terms defined in §1786.27(a) hereof include the plural as well as the singular, and the singular as well as the plural. The words “herein,” “hereof” and “hereunder”, and words of similar import, refer to this subpart as a whole.

Private loans, the proceeds of which are used exclusively to prepay FFB loans, shall be eligible for a guarantee under this subpart. The Administrator shall endorse a guarantee on each note evidencing a qualifying private loan. The private loan shall be structured in a manner which in the judgment of RUS shall not result in an increase in loan guarantee risk and shall comply with the following:

1. The private loan shall provide for the periodic payment of interest by the borrower not less frequently than annually, at either a variable or fixed rate in a manner which shall not result in an increase in loan guarantee risk. (i.e. The dollar weighted average interest rate on the private loan shall be less than or equal to the dollar weighted average interest rate on the FFB loan being prepaid, so that:

\[ C_r = C_o + \frac{\sum_{i=1}^{n} (C_o - A_i)T_i}{(J-n)} \]

Where,
- \( C_r \) = The revised interest rate cap;
- \( C_o \) = The original interest rate cap at the time of prepayment;
- \( A_i \) = The average interest rate actually charged in the \( i \)th period;
- \( T_i \) = Length of the \( i \)th period expressed in years;
- \( n \) = The number of years that have elapsed since the initial prepayment;
- \( J \) = The initial term of the private loan, at the time of prepayment;
Subject to the constraint that \( A_1 \) must be less or equal to \( C_o \).

2. Principal payments on the private loan shall be made either quarterly, semiannually, or annually and shall commence on or before the last day of the calendar year during which the prepayment pursuant to this subpart was made.

3. With the approval of the Administrator, the lender may refund the private loan with the proceeds of another loan from the same lender, with the existing guarantee and under terms, conditions, and a structure substantially similar to the private loan, on such dates as the lender, the borrower and RUS may agree, provided however, that such a refunding loan shall comply with the provisions of §1786.28(c) hereof. Additionally, with the approval of the Administrator, the private loan may be prepaid either in whole or in part at any time by the borrower using its general funds.

4. The private loan and the guaranteed note evidencing the private loan shall not be directly or indirectly part of a transaction the income of which is excluded from gross income for the purposes of Chapter I of the Internal Revenue Code of 1986.

5. The guaranteed note evidencing the private loan shall not be transferable or assignable except
   (i) With the written approval of the Administrator;
   (ii) In the event that the guaranteed note evidencing the private loan is held by a trust, to a similar trust, in connection with a refunding loan made by the lender pursuant to §1786.28(c)(3); or
   (iii) As an undivided pro rata interest in a pool of obligations.

6. The loan documentation shall provide RUS with the right to accelerate the note evidencing the private loan upon the occurrence of any “Event of Default” under the mortgage with the effect that all of the unpaid principal and interest on any such note shall become immediately due and payable to RUS, and RUS shall continue to pay under its guarantee the principal of and interest on such note without taking into account such acceleration. The loan documentation shall also provide RUS with a right, upon the occurrence of such an “Event of Default,” to accelerate payment on its guarantee and accelerate payment on the note evidencing the private loan on the earlier of any date the interest rate on the private loan is reset, without premium or penalty; any date the borrower may
§ 1786.29 Prepayment authority, program allocations, categories of prepayment applications and financially distressed borrowers’ reserve.

(a) Prepayment Authority. So long as the aggregate amount of prepayments made after December 22, 1987, including prepayments made pursuant to §1786.28(d) and §1786.28(e), under section 306(A) of the RE Act, does not exceed $2.5 billion, the approval of the Secretary of the Treasury is not required in order to make a prepayment pursuant to this subpart (such amount of prepayments is hereinafter called prepayment authority).

(b) Program Allocations. In accordance with the provisions of section 637 of the 1989 Appropriations Act, $350 million of prepayment authority is allocated to RUS-financed electric systems and $150 million of prepayment authority is allocated to RUS-financed telephone utilities. The amounts of prepayment authority allocated to electric program borrowers and telephone program borrowers shall not be transferred between programs. Borrowers may not sell, assign, or otherwise transfer prepayment authority to another borrower.

(c) Categories of Prepayment Applications. Applications received by RUS from borrowers desiring to prepay pursuant to this subpart will be separated into the following two application categories:

(1) Electric Program Applications. Electric program applications are applications to make a prepayment pursuant to this subpart from RUS-financed
§ 1786.30 Processing procedure.

(a) Priority of Processing. The determination of the order or method in which applications or portions of applications will be processed by RUS pursuant to this subpart rests solely within the discretion of the Administrator. RUS expects that a number of prepayment applications will be processed simultaneously. In the event that it becomes necessary to establish priorities of processing, prepayment applications will be processed without regard to the date received, generally in the following order of priority:

1. Applications from telephone borrowers;
2. Applications from financially distressed borrowers;
3. Applications from all other borrowers. When assigning priority to such applications, RUS will consider a number of factors, including without limitation, (i) the number of prepayment applications being processed by the area office; (ii) the novelty or complexity of the proposed transaction; (iii) the method of prepayment; and (iv) the availability of resources. In the event that RUS receives during the initial application period, prepayment applications from such borrowers in an amount less than remaining prepayment authority for each respective program, RUS will establish a new application period and publish a notice to that effect in the Federal Register.

(b) Pro-rated Applications. Standard electric program applications, and telephone program applications will be prorated within their respective application categories to permit partial prepayments in the event that the aggregate amount of prepayment applications received during the application period exceeds the amount of prepayment authority allocated to that application category. In such circumstances, the amount of each borrower’s permitted prepayment shall be determined within each respective application category, as follows:

1. The principal amount of FFB advances under each individual application, which, if prepaid pursuant to this subpart, would result in an economic savings to the borrower, shall be divided by the aggregate principal amount of FFB advances under all of the applications, which, if prepaid pursuant to the subpart, would result in an economic savings to the borrower, in order to determine a percentage (hereinafter called a pro-rated percentage) for each borrower;
2. Each borrower’s share of the prepayment authority for its application category shall be equal to the product of (i) the prepayment authority times...
§ 1786.31 Application procedure.

Applications to make a prepayment pursuant to this subpart shall be submitted to RUS on such forms as RUS may prescribe in the following manner:
(a) Application. Each borrower desiring to make a prepayment pursuant to this subpart shall submit an application to RUS. No application from a borrower will be accepted by RUS prior to the commencement of the application period. An application shall not be deemed submitted to RUS until it is received by RUS, and the “Date Received” has been inscribed on the Notice of Intent to Prepay the Federal Financing Bank by an authorized official of RUS. Incomplete applications may be returned to the borrower at the discretion of RUS and thereafter must be resubmitted in order to be processed. To be considered complete, the application should include the following:
(1) “Notice of Intent to Prepay the Federal Financing Bank” in the form specified in §1786.33 hereof;
(2) A listing of each FFB loan advance to be prepaid by loan designation, RUS note number, RUS account number, advance date, maturity date, original amount, outstanding balance, and interest rate;
(3) Evidence that the borrower meets the qualification provisions of §1786.28(a) of these regulations;
(4) The certification set forth in part A of the Notice of Intent to Prepay the Federal Financing Bank executed by the chief executive officer of the borrower;
(5) In the event that a borrower submits a prepayment application which proposes to utilize a portion of the financially distressed borrowers’ reserve, a certification signed by the chief executive officer of the system to the effect that the borrower is either (i) in default or near default on interest or principal payments due on loans made or guaranteed under the RE Act, and is making a good faith effort to increase rates and reduce costs to avoid or mitigate default; or (ii) participating in a work out or debt restructuring plan with RUS, either as the borrower being restructured or as a borrower providing assistance as part of the work out or restructuring and stating why the borrower is in default or near default.

(b) Election of Method of Prepayment. Prior to requesting RUS to schedule a settlement date, the borrower shall (1) elect whether it will use a private loan, internally generated funds, or a combination of a private loan and internally generated funds to make the prepayment, by completing part C of its Notice of Intent to Prepay the Federal Financing Bank; (2) specify in part C of the Notice of Intent to Prepay the Federal Financing Bank a date after which
a prepayment closing may be scheduled; (3) if appropriate, execute the certification set forth in part C of the Notice of Intent to Prepay the Federal Financing Bank; and (4) return a completed copy of the Notice of Intent to Prepay the Federal Financing Bank to the RUS area office.

(c) Final Documentation. All documentation in connection with a proposed prepayment made pursuant to this subpart shall have been submitted to RUS in final form, no later than 5 business days prior to the settlement date agreed to by the borrower and RUS. To be considered complete, the final documentation shall include the following material:

(1) A completed copy of the Notice of Intent to Prepay the Federal Financing Bank;
(2) In the event that a borrower proposes to utilize a private loan in connection with a prepayment or a portion of a prepayment,
   (i) Evidence, in form and substance satisfactory to RUS, that the borrower has an irrevocable commitment from the lender to close the private loan on the settlement date at an interest rate that meets the requirements of §1786.28(c)(1);
   (ii) Evidence that the lender meets the qualification provisions of §1786.28(b);
   (iii) Evidence that the private loan meets the qualification provisions of §1786.28(c); and
   (iv) The final documentation for the private loan;
(3) Estimate of fees, and expenses, including any taxes, in connection with the prepayment transaction;
(4) A certified copy of a resolution of the board of directors of the borrower approving the certification cited above and requesting RUS approval of the prepayment.
(5) In the case of financially distressed borrowers, evidence in form and substance satisfactory to the Administrator that the benefits of prepayment will not be used to reduce rates and that any Federal or state regulatory body having jurisdiction over the borrower’s rates has acknowledged its awareness of this requirement;
(6) In the event that borrower is unable to deliver final documentation or the evidence specified in accordance with §1786.31(c), RUS may reschedule the settlement date at its discretion.

(Approved by the Office of Management and Budget under control number 0572–0088)

§ 1786.32 Settlement procedure.

(a) General. Settlements in connection with prepaying FFB loans pursuant to this subpart shall be conducted in accordance with the provisions of this section.

(b) Settlement Date. The prepayment will be settled and if a private loan is utilized, the guarantee will be delivered, on a settlement date agreed upon by the borrower and RUS. Prior to scheduling a settlement date for a borrower’s prepayment pursuant to this subpart, RUS shall have received the material specified in §1786.31(b).

(c) Place of Settlement. All settlements will take place in Washington, DC, at a location of the borrower’s choosing; provided however, if more than one settlement is proposed for the same settlement date, RUS reserves the right to coordinate the date and location of the settlements with borrowers involved.

(d) Repayment of FFB. Prior to 1:00 p.m. prevailing local time in New York, New York, on the settlement date, the borrower shall wire immediately available funds to RUS through the Department of the Treasury account at the Federal Reserve Bank of New York or shall provide for payment to RUS in another manner acceptable to RUS and FFB, in an amount sufficient to pay the outstanding principal of the FFB loan being prepaid plus accrued interest from the last payment date to and including the settlement date.

(e) Documentation. The borrower shall deliver, or cause to be delivered to RUS and FFB, not less than 3 business days prior to the settlement date, a written notice of the settlement date and a complete listing of each FFB loan advance to be prepaid or partially prepaid, in the format required by §1786.31(a)(2). In the event that a private loan is used in connection with the prepayment, the following executed documents, opinions and material shall be delivered at the settlement:
§ 1786.33  Forms.

Guarantees and loan guarantee agreements executed by RUS pursuant to this subpart will be on forms prescribed by RUS. Such forms will include, without limitation, additional details on servicing, procedures for notifying RUS of a default, the manner for requesting payment on a guarantee. The Notice of Intent to Prepay the Federal Financing Bank shall be substantially in the form specified by RUS. RUS may also prescribe standard forms of certifications to be used in connection with materials required to be furnished pursuant to §1786.31 of this subpart.

§ 1786.34  Access to records of lenders, servicers, and trustees.

The lender, the servicer, or the trustee will permit representatives of RUS (or other agencies of the U.S. Department of Agriculture authorized by that Department) to inspect and make copies of any of their records pertaining to RUS guaranteed loans. Such inspection and copying may be made during regular office hours of the respective party or any other time the party and RUS find convenient.

§ 1786.35  Loss, theft, destruction, mutilation, or defacement of RUS guarantee.

(a) Authorized representative. Except where the evidence of debt was or is a bearer instrument, the RUS Administrator is authorized on behalf of RUS to issue a replacement guarantee(s) for one(s) which may have been lost, stolen, destroyed, mutilated, or defaced. Such replacement(s) shall be issued only to the lender or holder and only upon receipt of an acceptable certificate of loss and an indemnity bond.

(b) Requirements. When a guarantee(s) is lost, stolen, destroyed, mutilated, or defaced while in the custody of the lender, or holder, the lender will coordinate the activities of the party who seeks the replacement documents and will submit the required documents to RUS for processing. The requirements for replacement are as follows:

(1) A certificate of loss properly notarized which includes:

(i) Legal name and present address of the owner, requesting the replacement forms;

(ii) Legal name and address of lender of record;

(iii) Capacity of person certifying;

(iv) Full identification of the guaranteee, including the name of the borrower, date of the guarantee, face amount of the evidence of debt purchased, date of evidence of debt and
§ 1786.51 Definitions.

As used in this subpart:

Act means the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 et seq.).
§ 1786.52  Administrator means the Administrator of RUS.

Discounted Present Value shall have the meaning specified in §1786.53.

Fund means the Rural Electrification and Telephone Revolving Fund established pursuant to the Act.

REA means the Rural Electrification Administration formerly an agency of the United States Department of Agriculture and predecessor agency to RUS with respect to administering certain electric and telephone loan programs.

RUS Loan Agreement means the agreement between the borrower and RUS providing for loans pursuant to the Act.

§ 1786.53 Discounted present value.

The Discounted Present Value shall be calculated five business days before prepayment is made by summing the present values of all remaining payments by using the following formula:

\[
\text{Present Value} = \sum_{k=1}^{n} \frac{P_k}{\prod_{i=1}^{k} \left[ 1 + \frac{D_1}{365} + \frac{D_2}{366} \right] \times I}
\]

Where:
- \(P_k\) = Total payment including interest, due on the \(k^{th}\) payment date following the prepayment date.
- \(n\) = Total number of remaining payments dates.
- \(I\) = The discount rate, in decimals, which shall be the average rate on utility bonds bearing a rating of “Aa” as set forth in that issue of Moody’s Public Utility News Reports most recently published prior to the date on which Discounted Present Value is calculated.
- \(D_1\) = Number of days in the \(1^{st}\) payment period that are in a non-leap year (365 day year).
- \(D_2\) = Number of days in the \(1^{st}\) payment period that are in a leap year (366 day year).

§ 1786.54 Eligibility criteria.

To be eligible to prepay RUS Notes at the Discounted Present Value a borrower must comply with the following criteria:

(a) The borrower must be current on all payments due on its outstanding RUS Notes and all other payment obligations owed to RUS and the Rural Telephone Bank.

(b) The borrower must agree to prepay all of its outstanding RUS Notes.

(c) The borrower must identify the source of private financing that will be used to refinance its outstanding RUS Notes, which financing may not include obligations the income of which is exempt from taxation under the Internal Revenue Code of 1986.

(d) The borrower must have expended all funds advanced on account of the RUS Notes for the purposes for which such funds were advanced.

(e) The borrower must agree to a rescission of the unadvanced balance of the RUS Notes.

(f) The borrower must agree that the borrower, its successors or assigns,
Rural Utilities Service, USDA

§ 1786.59

shall pay to the Government, as a condition of receiving additional loans or loan guarantees pursuant to Titles I, II and III of the Act, an amount equal to the aggregate of the difference with respect to each of the RUS Notes between the amount outstanding on the RUS Note and the Discounted Present Value of the RUS Note upon prepayment with interest accruing quarterly; the interest rates shall be the rates provided in the respective RUS Notes.

(g) If the borrower is a party to a wholesale power contract with a power supplier financed pursuant to the Act, the borrower must provide the Administrator with such assurances as the Administrator may request that it will meet its obligations to the power supplier.

§ 1786.55 Application procedure.

Any borrower seeking to prepay its RUS Notes under this subpart should apply to the appropriate RUS Area Director by submitting:

(a) A board resolution that:

(1) Requests approval of the prepayment of the borrower’s outstanding RUS Notes, and

(2) States the intent of the borrower to comply with all eligibility criteria set forth in §1786.54 of this subpart.

(b) A list of all RUS Notes together with the outstanding amount on such notes.

(c) Such additional information as the Administrator shall request.

§ 1786.56 Approval of applications.

The applications will ordinarily be reviewed and, if satisfactory, approved, and closing schedule based on the order in which executed prepayment agreements are received. The Administrator may limit the number of applications approved and closings scheduled from time to time taking into account, among other matters, the financial interests and administrative considerations of the Government.

§ 1786.57 Prepayment agreement.

Upon approving an application for prepayment under this subpart, the Administrator shall notify the borrower and deliver to the borrower for its execution a prepayment agreement which shall set forth and provide:

(a) The RUS Notes to be prepaid and when the Discounted Present Value will be calculated.

(b) The place and conditions for closing.

(c) Agreement that the unadvanced balance of RUS Notes shall be rescinded.

(d) Agreement that the borrower, or its successors or assigns, shall pay to the Government, as a condition of receiving additional loans or loan guarantees pursuant to Titles I, II and III of the Act, an amount equal to the aggregate of the difference with respect to each of the RUS Notes between the amount outstanding on the RUS Note and the Discounted Present Value of the RUS Note upon prepayment with interest accruing quarterly; the interest rates shall be the rates provided in the respective RUS Notes.

(e) Assurances that the borrower will meet its obligations to any power supplier financed pursuant to the Act.

(f) Such other terms and conditions as the Administrator deems appropriate.

§ 1786.58 Security.

If, after prepayment of RUS Notes, the Government should continue to hold liens on the borrower’s property that secure loans made or guaranteed pursuant to the Act, the Administrator of RUS or the Governor of the Rural Telephone Bank, as the case may be, will consider request for the accommodation of such liens for the purpose of providing security for loans the proceeds of which were used to prepay RUS Notes. Such lien accommodations shall be limited in amount to the Discounted Present Value of the RUS Notes plus such costs, as the Administrator shall determine to be reasonable, incurred by the borrower in obtaining such loans.

§ 1786.59 Loan fund audit.

Within 6 months of closing RUS shall have the right to audit transactions involving the RUS construction fund established and maintained by the borrower pursuant to the terms of the RUS Loan Agreement and to inspect all books, records, accounts and other documents and papers of the borrower.
§ 1786.60

Should RUS determine that the borrower has made disbursements of funds advanced pursuant to RUS Notes which do not comply with the requirements of the RUS Loan Agreement, the borrower shall be required to pay to the Government an amount equal to the difference between the amount which the borrower prepaid on such RUS Notes evidencing RUS loan funds which were improperly disbursed and the amount which the borrower would otherwise have been required to return to the Government as a result of non-compliance if the borrower had not prepaid such RUS Notes. (See 7 CFR part 1721)

§ 1786.60 Closing.

(a) The borrower shall be responsible for obtaining all approvals necessary to consummate the transaction as required by the prepayment agreement including such approvals as may be required by regulatory bodies and other lenders.

(b) The RUS Notes shall be prepaid at a closing to be held in accordance with the prepayment agreement; Provided, however, That no closing may be scheduled for after September 30, 1987. At closing, a borrower shall prepay the RUS Notes by paying to the Government an amount equal to the Discounted Present Value of the RUS Notes. The closing shall otherwise be conducted as prescribed in the prepayment agreement.

§ 1786.61 Other prepayments.

RUS loan documentation generally permits borrowers to prepay RUS Notes by paying the outstanding balance due therein. Nothing in this subpart shall prohibit any borrower from prepaying its outstanding RUS Notes in accordance with the terms thereof. The provisions of this subpart shall not be applicable to such prepayment.

§§ 1786.62–1786.74 [Reserved]

Subpart E—Discounted Prepayments on RUS Notes in the Event of a Merger of Certain RUS Electric Borrowers

SOURCE: 56 FR 37268, Aug. 6, 1991, unless otherwise noted.

§ 1786.95 Purpose.

This subpart sets forth the policies and procedures of RUS whereby certain electric borrowers may prepay outstanding RUS Notes at the Discounted Present Value of the RUS Notes with private financing.

§ 1786.96 Definitions.

As used in this subpart:

Act means the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 et seq.).

Administrator means the Administrator of RUS.

Consolidation means:

(1) The combination, pursuant to state law, of two or more borrower or nonborrower organizations into a new successor organization that takes over the assets and assumes the liabilities of those organizations; or

(2) Any other transaction including an acquisition which has substantially the same effect.

Discounted Present Value shall have the meaning specified in § 1786.98.

Fund means the Rural Electrification and Telephone Revolving Fund pursuant to the Act.

Merger means:

(1) The combination, pursuant to state law, of two or more borrower or nonborrower organizations into an existing survivor organization that takes over the assets and assumes the liabilities of the merged organizations; or

(2) Any other transaction including an acquisition which has substantially the same effect.

REA means the Rural Electrification Administration formerly an agency of the United States Department of Agriculture and predecessor agency to RUS with respect to administering certain electric and telephone loan programs.

RUS means the Rural Utilities Service, an agency of the United States Department of Agriculture established pursuant to Section 232 of the Federal

**RUS Loan Agreement** means the agreement between the borrower and RUS providing for loans pursuant to the Act.

**RUS Notes** means those notes, bonds or other obligations evidencing indebtedness created by loans made or guaranteed by RUS pursuant to titles I and III of the Act (7 U.S.C. 901–940).

§ 1786.97 Prepayment.

There were 29 former RUS electric borrowers that prepaid their direct or insured loans under section 306B(a) of the Act prior to October 1, 1987. (See subpart C of this part.) These borrowers are listed in appendix A to subpart E of this part. Any RUS electric borrower which is the result of a merger or consolidation involving any of these 29 former borrowers and a borrower with outstanding Notes may, after meeting all requirements of this subpart, prepay all outstanding RUS Notes issued or assumed by the borrower upon paying the lesser of the outstanding balance or the Discounted Present Value. Such prepayment must be made not later than one year after the effective date of the merger or consolidation.

§ 1786.98 Discounted present value.

(a) The Discounted Present Value shall be calculated by RUS before prepayment is made by summing the present values of all remaining payments on all outstanding notes according to the following formula to compute the discounted present value of each note and adjusting as here and after provided for tax exempt financing.

\[
\text{Present Value} = \sum_{k=1}^{n} \prod_{i=1}^{k} \left[ \frac{P_k}{1 + \frac{D_1}{365} + \frac{D_2}{366}} \right] \times I
\]

Where:

- \( P_k \) = Total payment, including interest, due on the \( k \)th payment date following the prepayment date.
- \( n \) = Total number of remaining payment dates.
- \( I \) = The discount rate applied to each transaction will be ascertained by using data specified in the “Federal Reserve Statistical Release” which is published each Monday. (See appendix B to subpart E of this part.) The specific discount rate will be the discount rate(s) specified in the “Treasury Constant Maturities” section of this publication eight working days prior to the closing. In applying the discount rate, the 1-year Treasury rate will be used for all notes with a remaining term of less than 2 years; the 2-year Treasury rate for notes with maturities between 2 and 3 years; the 3-year Treasury rate for all notes with maturities between 3 and 5 years; the 5-year Treasury rate for all notes with maturities between 5 and 7 years; the 7-year Treasury rate for all notes with maturities between 7 and 10 years; the 10-year Treasury rate for all notes with maturities between 10 and 30 years; and the 30-year Treasury rate for all notes with maturities longer than 30 years.
- \( D_1 \) = Number of days in the \( i \)th payment period that are in a non-leap year (365 day year).
- \( D_2 \) = Number of days in the \( i \)th payment period that are in a leap year (366 day year).

(b) Notwithstanding paragraph (a) of this section, in the event that the borrower shall elect to prepay using tax exempt financing, the calculation of the Discounted Present Value shall be adjusted to make the discount the equivalent of fully taxable financing.

§ 1786.99 Eligibility criteria.

To be eligible to prepay RUS Notes at the Discounted Present Value, a borrower must comply with the following criteria:

(a) The borrower must be current on all payments due on its outstanding RUS Notes and all other payment obligations owed to RUS;
§ 1786.100 Application procedure.

Any borrower seeking to prepay its RUS Notes under this Subpart should apply to the appropriate RUS Area Director not less than 60 days prior to one year after the effective date of the merger or consolidation by submitting:

(a) A board resolution that:
   (1) Requests approval of the prepayment of the borrower’s outstanding RUS Notes;
   (2) States the intent of the borrower to comply with all eligibility criteria set forth in §1786.99 of this subpart; and
   (3) Identifies the source of financing.

(b) A list of all RUS Notes together with the outstanding amount on such notes.

(c) An opinion of counsel as to the effective date of the merger or consolidation.

(d) Such additional information as the Administrator will request.

§ 1786.101 Approval of application.

The applications will be reviewed and, if satisfactory, approved. Closing will be scheduled upon approval.

§ 1786.102 Prepayment agreement.

Upon approving an application for prepayment under this subpart, the Administrator shall notify the borrower and deliver to the borrower for its execution a prepayment agreement which shall set forth and provide:

(a) The RUS Notes to be prepaid and when the Discounted Present Value will be calculated.
(b) The place, date and conditions for closing.
(c) Agreement that the unadvanced balance of RUS Notes shall be rescinded.
(d) Agreement that the borrower, or its successors or assigns, shall pay to the Government, as a condition of receiving additional loans or loan guarantees pursuant to titles I and III of the Act, an amount equal to the aggregate of the difference with respect to each of the RUS Notes between the amount outstanding on the RUS Note and the Discounted Present Value of the prepaid RUS Note; with interest accruing quarterly. The interest rates shall be the rates provided in the respective RUS Notes.
(e) Assurances that the borrower will meet its obligations to any power supplier financed pursuant to the Act.
(f) Such other terms and conditions as the Administrator deems appropriate.

§ 1786.103 Security.
If, after prepayment of RUS Notes, the Government should continue to hold liens on the borrower’s property, the Administrator of RUS will consider a request for the accommodation of such liens for the purpose of providing security for loans the proceeds of which were used to prepay RUS Notes. Such lien accommodations shall be limited in amount to the Discounted Present Value of the RUS Notes plus such costs, as the Administrator shall determine to be reasonable, incurred by the borrower in obtaining such loans.

§ 1786.104 Loan fund audit.
RUS shall have the right to audit within 6 months of closing, transactions involving the RUS construction fund established and maintained by the borrower pursuant to the terms of the RUS Loan Agreement and to inspect all books, records, accounts and other documents and papers of the borrower. Should RUS determine that the borrower has made disbursements of funds advanced pursuant to RUS Notes which do not comply with the requirements of the RUS Loan Agreement, the borrower shall be required to pay the Government an amount equal to the difference between the amount which the borrower prepaid on such RUS Notes evidencing RUS loans funds which were improperly disbursed and the amount which the borrower would otherwise have been required to return to the Government as a result of non-compliance if the borrower had not prepaid such RUS Notes. (See 7 CFR part 1721, Post-Loan Policies and Procedures for Insured Electric Loans.)

§ 1786.105 Closing.
(a) The borrower shall be responsible for obtaining all approvals necessary to consummate the transaction as required by the prepayment agreement, including such approvals as may be required by regulatory bodies and other lenders.
(b) The RUS Notes shall be prepaid at a closing to be held in accordance with the prepayment agreement. RUS shall designate the date of closing which in no event shall be later than one year after the effective date of the merger or consolidation. At closing, in addition to paying all current interest due on the date of prepayment, a borrower shall prepay the RUS Notes by paying to the Government an amount equal to the lesser of the outstanding balance or the Discounted Present Value of the RUS Notes. The closing shall otherwise be conducted as prescribed in the prepayment agreement.

§ 1786.106 Other prepayments.
RUS loan documentation generally permits borrowers to prepay RUS Notes by paying the outstanding balance due thereon. Nothing in this subpart shall prohibit any borrower from prepaying its outstanding RUS Notes in accordance with the terms thereof. The provisions of this subpart shall not be applicable to such prepayment.

Footnotes:
1. The daily effective federal funds rate is a weighted average of rates on trades through N.Y. brokers.
2. Weekly figures are averages of 7 calendar days ending on Wednesday of the current week; monthly figures include each cal-
   lendar day in the month.
3. Annualized using a 360-day year or bank interest.
4. Quoted on a discount basis.
5. An average of offering rates on commercial paper placed by several leading dealers for firms whose bond rating is AA or the
   equivalent.
6. An average of offering rates on paper directly placed by finance companies.
7. Representative closing yields for acceptances of the highest rated money center banks.
8. An average of dealer offering rates on nationally traded certificates of deposit.
10. One of several base rates used by banks to price short-term business loans.
12. Auction date for daily data; weekly and monthly averages computed on an issue-date basis.
14. Unweighted average of rates on all outstanding bonds not due or callable in less than 10 years, including one very low
   yielding “flower” bond.
15. Estimate of the yield on a recently offered, A-rated utility bond with a maturity of 30 years and call protection of 5 years; Fri-
   day quotations.
16. Bond buyer Index, general obligation, 20 years to maturity, mixed quality; Thursday quotations.
17. Contract interest rates on commitments for fixed-rate first mortgages. Source: FHLMC.

NOTE: Weekly and monthly figures are averages of business days unless otherwise noted.

Description of the Treasury Constant Maturity Series
Yields on Treasury securities at “constant maturity” are interpolated by the U.S. Treasury from the daily yield curve. This curve, which relates the yield on a security to its time to maturity, is based on the closing market bid yields on actively traded

---

Page 1143
Treasury securities in the over-the-counter market. These market yields are calculated from composites of quotations reported by five leading U.S. Government securities dealers to the Federal Reserve Bank of New York. The constant maturity yield values are read from the yield curve at fixed maturities, currently 1, 2, 3, 5, 7, 10, and 30 years. This method produces a yield for a 10-year maturity, for example, even if no outstanding security has exactly 10 years remaining to maturity.

Subpart F—Discounted Prepayments on RUS Electric Loans

SOURCE: 59 FR 13620, Mar. 22, 1994, unless otherwise noted.

§ 1786.150 Purpose.

This subpart sets forth the policies and procedures of RUS whereby borrowers may prepay, with private financing or internally generated funds, outstanding RUS Notes evidencing electric loans at the Discounted present value of the RUS Notes, pursuant to the provisions of section 306(B) of the RE Act as amended by Public Law 102–428, 106 Stat. 2183, adopted October 21, 1992.

§ 1786.151 Definitions and rules of construction.

(a) Definitions. As used in this subpart:

Administrator means the Administrator of the Rural Utilities Service (RUS).

Borrower means any organization which has an outstanding note(s) evidencing electric loans made by RUS, or has previously prepaid such notes under subparts C and E of this part.

Business day means any day on which both the RUS and the Federal Reserve Bank of New York are open for business.

Construction Fund Account means the Cash—Construction Fund—Trustee Account, maintained by the borrower pursuant to the terms of the outstanding RUS Loan Contract.

Closing shall mean one of the several contemplated closings of the prepayment of the Qualified Notes prescribed by the Prepayment agreement.

Closing date shall mean any business day identified as such by the Government in its preclosing notice delivered to the Company pursuant to §1786.158.

Closing request shall mean a request by the borrower of the Government to schedule a closing for certain Qualified Notes on the date requested therein.

Direct loan means a loan made pursuant to section 4 of the RE Act.

Discounted present value shall have the meaning set forth in §1786.153.

Distribution borrower means a borrower that sells electric power and energy at retail in rural areas.

Electric loan means a Direct loan or an Insured loan made for the purpose of furnishing electric energy to persons in rural areas.

Final maturity means the final date on which all outstanding principal and accrued interest on an electric loan is due and payable.

Government means the United States of America, acting through the Administrator of the Rural Utilities Service.

Insured loan means a loan made pursuant to Section 305 of the RE Act.

Lien accommodation means the sharing of the Government’s (RUS’s) lien on property, usually all property, covered by the lien of the RUS Mortgage.

Loan guarantee means a loan guarantee under Section 306 of the RE Act.

Power supply borrower means a borrower that sells or intends to sell electric power at wholesale to distribution or power supply borrowers pursuant to RUS wholesale power contracts.

Preclosing notice shall mean a notice delivered by the Government to the borrower in response to a closing request, identifying the closing date, the Qualified Notes to be prepaid at such closing and documents to be delivered by the borrower to the Government prior to the closing date.

Prepayment agreement shall have the meaning set forth in §1786.158.

Qualified Notes shall have the meaning set forth in §1786.154.

RE Act means the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 et seq.).

RUS means the Rural Utilities Service, an agency of the United States Department of Agriculture.
Rural Utilities Service, USDA  § 1786.153

RUS Loan Contract means the agreement, as amended, supplemented, or restated from time to time, between a borrower and RUS providing for loans or loan guarantees pursuant to the RE Act.

RUS Mortgage means collectively those mortgages and security agreements made by and among the borrower, the Government, and third parties, if any, securing indebtedness evidencing electric loans or loan guarantees made pursuant to the RE Act.

Rural development loans means loans or grants made pursuant to Rural development programs.

Rural development programs means loan or grant programs under the authority of the Administrator pursuant to sections 313, 501, and 502 of the RE Act.

Supplemental lender means a private lender whose loan to the borrower is secured by the RUS mortgage.

Tax exempt financing means borrowing evidenced by bonds, notes and other evidence of indebtedness the income of which is excluded from gross income for the purposes of Chapter 1 of the Internal Revenue Code of 1986 (26 U.S.C. ch. 1).

(b) Rules of construction. Unless the context shall otherwise indicate, the terms defined in paragraph (a) of this section include the plural as well as the singular, and the singular as well as the plural.

§ 1786.152 Prepayments of RUS loans.

An electric loan made under the RE Act shall not be sold or prepaid at a value that is less than the outstanding principal balance, except that, on request of a borrower, an electric loan made under the RE Act, or a portion of such a loan, that was advanced before May 1, 1992, or has been advanced for not less than 2 years, shall be prepaid by the borrower at the lesser of the outstanding principal balance of the loan or the discounted present value thereof.

§ 1786.153 Discounted present value.

(a) The discounted present value shall be calculated by summing the present values of all remaining payments on all Qualified Notes to be prepaid according to the following formula and adjusted as provided in paragraph (b) of this section if tax exempt financing is used.

\[
\text{Present Value} = \sum_{k=1}^{n} \prod_{i=1}^{k} \left[ 1.0 + \left( \frac{P_k}{365} + \frac{D_1}{366} \right) \right]^{-1} \left( \frac{D_2}{366} \right)
\]

Where:
The Greek letter, Sigma (\(\Sigma\)) means the sum of the following terms.
The Greek letter, Pi (\(\Pi\)) means the product of the following terms.
\(P_k\)=Total payment, including interest due on the \(k\)th payment date following the prepayment date.
\(n\)=Total number of remaining payment dates to final maturity.
\(D_1\)=Number of days in the \(i\)th payment period that are in a non-leap year (365-day year).
\(D_2\)=Number of days in the \(i\)th payment period that are in a leap year (366-day year).
\(I\)=The discount rate applied to each transaction ascertained by using data specified in the “Federal Reserve Statistical Release” (H.15 (519)), which is published each Monday. The availability of this Release will be announced when the information is available by telephone on (202) 452-3206. See adjustment for tax exempt refinancing at paragraph (b) of this section. The specific discount rate will be based on the discount rate(s) specified in the “Treasury Constant Maturities” section of this publication 8 business days prior to the closing and will be interpolated from that information as follows.

Notes: 1. The arithmetic mean between the 3-year and 5-year Treasury Constant Maturities; i.e., if 3-year rate is 3.00% and the 5-year rate is 4.00% then the rate used would be 3.50%.
2. The arithmetic mean between the 5-year and 7-year Treasury Constant Maturities computed as above.
3. A straight line interpolated rate between the 7-year rate and the 10-year rate. (See formula below)
4. A straight line interpolated rate between the 10-year note rate and the 20-year Bond rate. (See formula below)
5. A straight line interpolated rate between the 20-year bond rate and the 30-year bond rate using the following formula:

\[
I = B + \frac{((C - E) \times (A - B))}{F - E}
\]

Where:
- I = The discount rate interpolated from the cost of money to the Treasury.
- A = The Treasury interest rate for the most recently published maturity (in years) that is the shortest Treasury term (in years) which is greater than the borrower's remaining term (in years) to final maturity; i.e., (if the note to be prepaid has a final maturity of more than 10 years then this rate is the 20-year Treasury rate.)
- B = The Treasury interest rate for the most recently published maturity (in years) that is the longest Treasury term (in years) which is less than the borrower's remaining term (in years) to final maturity; i.e., (if the note to be prepaid has a final maturity of more than 10 years but less than 20 years then this term is the 10-year Treasury rate.)
- C = The remaining number of full years to the final maturity of the borrower's note. Drop all fractions of a year and use the remaining full years.
- E = The published Treasury term (in years) to maturity which is the longest term to maturity for the published term that is less than the remaining term (in years) to final maturity of the borrower's note; i.e., (if the note to be prepaid has remaining years to maturity between 11 and 20 years then this term would be 10 or if the note to be prepaid has remaining years to maturity between 21 years and 30 years then this term would be 20.)
- F = The published Treasury term (in years) to maturity which is the shortest term to maturity for the published term that is greater than the remaining term (in years) to maturity of the borrower's note; i.e., (if the note to be prepaid has remaining years to maturity between 11 and 20 years then this term would be 20 or if the remaining years to maturity is between 21 and 30 years then this term would be 30).

Note: The percentage terms used in the above formula will be truncated to two decimal places. The discount rate shall be adjusted to ensure that the borrower receives a benefit that is no greater than the benefit the borrower would receive if the borrower used financing that was not tax exempt. The borrower shall certify in writing whether the financing will be tax exempt.

(b)(1) In the event that the borrower prepays a loan under paragraph (a) of this section using, directly or indirectly, tax exempt financing, the discount rate will be determined from the published table in the Federal Register. For example, if the note to be discounted matures in the year 1999 then the discount rate will be the interest rate for the year 1999. RUS will publish a schedule of interest rates for municipal rate loans in the Federal Register at the beginning of each calendar quarter. The published rates in effect eight business days prior to closing will be used for the discount rates. All notes to be prepaid that have remaining years to maturity of more than 20 years will be discounted at the interest rate in effect for new RUS municipal rate loans of comparable maturity at the time of closing.
§ 1786.154 Qualified Notes.

An eligible borrower may prepay Qualified Notes under this subpart at the discounted present value. A Qualified Note is a note evidencing an RUS electric loan, all advances of which were made prior to May 1, 1992, or not less than 2 years prior to the date of prepayment closing. See §§1786.155(a)(3) and 1786.158 (h) and (j).

§ 1786.155 Eligible borrower.

(a) To be eligible to prepay an electric loan under this subpart, the borrower must be in compliance with the following:

1. The borrower shall be current on all payment obligations on outstanding loans made or guaranteed by RUS. For the purpose of determining eligibility for prepayment, a default by a power supply borrower from which a distribution borrower purchases wholesale power shall not be considered a default by the distribution borrower;

2. There shall exist no material defaults under the borrower’s RUS Loan Contract and Mortgage;

3. The borrower shall have expended all funds advanced pursuant to the RUS Loan Contract for the purposes for which such funds were advanced. A borrower will not be eligible to prepay under this subpart if it has any funds advanced pursuant to the RUS Loan Contract in its Construction Fund Account; and

4. The borrower shall be current on all obligations under any wholesale power contract with an RUS financed power supply borrower.

(b) The eligibility of borrowers that have had any indebtedness representing loans made or guaranteed by RUS restructured shall be determined on a case by case basis considering the terms and conditions of the restructuring agreement.

§ 1786.156 Application procedure.

Any borrower seeking to prepay Qualified Notes under this subpart should apply to the appropriate RUS Regional Director or the Director of the Power Supply Division. The application shall provide the following:

(a) Borrower’s RUS designation;

(b) Borrower’s name and address;

(c) A certified copy of a resolution of the board of directors of the borrower that the borrower wishes to enter into a prepayment agreement providing for the prepayment of all or a portion of its Qualified Notes;

(d) Listing of each Qualified Note to be prepaid by loan designation, RUS account number, advance date, maturity date, original amount, and outstanding principal balance;

(e) Evidence that the borrower has the ability to obtain the financing necessary to prepay its Qualified Notes listed in paragraph (d) of this section and identification of the source of financing and the need if any of obtaining a lien accommodation from RUS; and

(f) Such additional information as the Administrator may request.

§ 1786.157 Approval of applications.

(a) Ordinarily, within 30 days of receipt, an application will be reviewed and the borrower will be notified as to whether the application has been approved. If the application has not been approved, the borrower will be informed as to the reasons. If the application is approved the borrower shall thereafter be provided with a prepayment agreement for execution.

(b) The Administrator may limit the number of applications approved and closings scheduled from time to time, taking into account, among other matters, administrative considerations of the RUS.

§ 1786.158 Terms and conditions of prepayment agreement.

Upon receipt of a satisfactory application, RUS shall provide to the borrower for its execution a prepayment agreement, in form and substance satisfactory to RUS, which may include the following:

(a) Provide for the prepayment of one or more Qualified Notes from time to time, but no more than two closings may be scheduled in any calendar year unless a third closing is for the prepayment of all outstanding electric loans of the borrower;

(b) Set forth procedures and forms through which the borrower will notify the Government of each election it makes to prepay certain Qualified Notes;
§ 1786.159 Initial closing.

(a) Upon receipt of the prepayment agreement, the borrower may submit, pursuant to the terms of the prepayment agreement, a closing request which shall request a closing date no less than 30 business days from the date of the request.

(b) The Government will respond to each subsequent closing request by delivering a preclosing notice to the borrower not less than 10 business days prior to the date which the Government, after reviewing the borrower's closing request, selects as a closing date.

§ 1786.160 Subsequent closings.

(a) Each subsequent prepayment after the initial closing shall be facilitated with the submission of an additional closing request by the borrower. Each closing request must request a closing date no less than 30 business days from the date of the request.

(b) The Government will respond to each subsequent closing request by delivering a preclosing notice to the borrower not less than 10 business days prior to the date which the Government, after reviewing the borrower's closing request, selects as a closing date in each case.

§ 1786.161 Return of Qualified Notes and release of lien.

Upon payment to RUS at closing of the full amount specified in the notice delivered by RUS to the borrower pursuant to the terms of the prepayment agreement (see §1786.158(e)), RUS will deliver to the borrower at closing those Qualified Notes which have been paid.
§ 1786.162 Outstanding loan documents.
(a) Except as expressly provided in this subpart, the borrower shall comply with all provisions of its RUS Loan Contract, its outstanding notes issued to RUS, and the RUS Mortgage.
(b) Nothing in this subpart shall affect any rights of supplemental lenders under the RUS Mortgage, or other creditors of the borrower.
(c) Nothing in this subpart shall prohibit a borrower from making prepayments of any loans pursuant to the RE Act in accordance with the terms of such loans.

§ 1786.163 Existing wholesale power contracts.
(a) If the borrower is a party to a wholesale power contract with a power supply borrower financed pursuant to the RE Act, the Administrator may require that the borrower and the power supply borrower enter into a supplement to the outstanding wholesale power contract providing substantially as follows:

SAMPLE CONTRACT TERMS
So long as any of the notes evidencing secured loans of the power supply borrower are outstanding, the borrower will not, without the approval in writing of the power supply borrower and the Administrator, take or suffer to be taken any steps for reorganization or dissolution, or to consolidate with or merge into any corporation, or to sell, lease or transfer (or make any agreement therefor) all or a substantial portion of its assets, whether now owned or hereafter acquired. The power supply borrower will not unreasonably withhold or condition its consent to any such, reorganization, dissolution, consolidation, or merger, or to any such sale, lease or transfer (or any agreement therefor) of assets. The power supply borrower will not unreasonably withhold or condition such consent except in cases where to do otherwise would result in rate increases for the other members of the power supply borrower or impair the ability of the power supply borrower to repay its secured loans in accordance with its terms, or adversely affect system performance in a material way. Notwithstanding the foregoing, the borrower may take or suffer to be taken any steps for reorganization or dissolution or to consolidate with or merge into any corporation or to sell, lease or transfer (or make any agreement therefor) all or a substantial portion of its assets, whether now owned or hereafter acquired without the power supply borrower’s consent, so long as the borrower shall pay such portion of the outstanding indebtedness on the power supply borrower’s notes or other obligations as shall be determined by the power supply borrower with the prior written consent of the Administrator and shall otherwise comply with such reasonable terms and conditions as the Administrator and power supply borrower may require either: (1) To eliminate any adverse effect that such action seems likely to have on the rates of the other members of the power supply borrower, or (2) To assure that the power supply borrower’s ability to repay the secured loans and other obligations of the power supply borrower in accordance with their terms is not impaired.

The Administrator may require, among other things, that any payment owed under (2) of the preceding sentence that represents a portion of the power supply borrower’s indebtedness on Notes shall be paid by the borrower in the manner necessary to accomplish a defeasance of those obligations in accordance with the loan documents relating there to, or be paid directly to the holders of the Notes for application by them as prepayments in accordance with the provisions of such documents, or be paid to the power supply borrower and held and invested in a manner satisfactory to the Administrator.

[End of sample contract terms]
(b) The Administrator may exempt a borrower from the requirement to enter into a supplement to its outstanding wholesale power contract if the Administrator determines that such requirement is burdensome and unnecessary in light of the provisions of the existing wholesale power contract, other security arrangements of the power supply borrower, and any other relevant facts and circumstances. Normally such exemption will be granted only with the concurrence of the power supply borrower.

§ 1786.164 Loan fund audit.
In the event that a borrower shall prepay all its outstanding electric loans RUS shall have the right to audit
within six (6) months of closing transactions involving the RUS Construction Fund Account established and maintained by the borrower pursuant to the terms of the RUS Loan Contract and to inspect all books, records, accounts, and other documents and papers of the borrower. Should RUS determine that the borrower has made disbursements of funds advanced pursuant to the RUS Loan Contracts which do not comply with the requirements thereof, the borrower shall be required to pay the RUS an amount equal to the difference between the amount which the borrower prepaid under this subpart with respect to such advances, and the amount which the borrower would otherwise have been required to return to the RUS as a result of noncompliance if the borrower had not prepaid such advances, plus interest. (See 7 CFR part 1721, Post-Loan Policies and Procedures for Insured Electric Loans.)

§ 1786.165 Reporting.

Borrowers that no longer have any loans made or guaranteed by RUS and are considering applying for other financial assistance pursuant to the RE Act are encouraged to file the end-of-year operating report, RUS Form 7.

§ 1786.166 Approvals.

The borrower shall be responsible for obtaining all approvals necessary to consummate the transaction as required by the prepayment agreement, including such approvals as may be required by regulatory bodies and other lenders.

§ 1786.167 Restrictions to additional RUS financing.

(a) No borrower that prepays an electric loan at a discount as provided under this subpart may apply for or receive direct or insured loans during the 120 months from the most recent closing date, except at the discretion of the Administrator. During the 120 month period the Administrator may consider providing an insured loan if, among other matters, it is necessary to assure repayment of, or protect the Government's security for any outstanding loans or loan guarantees, or the borrower's system has suffered severe physical plant related damage due to conditions beyond its control and the borrower is unable to obtain financing at reasonable terms to restore the system from non-RUS sources, including the Federal Emergency Management Agency, and from private sources. Upon expiration of the 120 months, such borrowers may apply for direct or insured loans in the same manner as other borrowers provided that such borrowers may not apply for direct or insured loans for facilities, construction of which commenced prior to the expiration of the 120 months. Special provisions for mergers involving a borrower that has prepaid pursuant to this subpart are in 7 CFR 1717.158.

(b) Borrowers that prepay their direct or insured RUS loans under this subpart remain eligible for certain types of financial assistance under the RE Act, including loan guarantees and rural development loans.

§ 1786.168 Borrowers who prepaid under this part prior to October 21, 1992.

(a) A borrower that had prepaid, prior to the date of enactment of Public Law 102–428 (106 Stat. 2183) on October 21, 1992, at a discount rate as provided at 7 CFR part 1786, subpart C:

(1) Shall not be eligible except at the discretion of the Administrator as stated in paragraph §1786.167(a), to apply for or receive direct or insured loans during the 180-month period beginning on the date of the prepayment; and

(2) Shall not be eligible to apply for or receive direct or insured loans from RUS until the borrower has repaid to the RUS the sum of:

(i) The amount (if any) by which the discount the borrower received by reason of the prepayment exceeds the discount the borrower would have received had the discount been based on the cost of funds to the Department of the Treasury as calculated at §1786.153 at the time of the prepayment; and

(ii) Interest on the amount described in paragraph (a)(2)(i) of this section for the period beginning on the date of the prepayment and ending on the date of the repayment, at a rate equal to the average annual cost of borrowing by the Department of the Treasury. This
rate will be calculated first on the date of prepayment and at one year intervals from that date based on the same U.S. Treasury issues published in the Federal Reserve Statistical Release closest to that date. The Treasury rate of interest to be applied for each year will be the rate for the Treasury issue of comparable maturity to the number of years from the prepayment date to the repayment date and at one year intervals thereafter.

(b) If a borrower and the Administrator have entered into an agreement with respect to a prepayment occurring before October 21, 1992, this section shall supersede any provision in the agreement relating to the restoration of eligibility for loans under the RE Act.

(c) Borrowers who prepaid prior to October 1, 1987, are eligible for assistance under the RE Act in the same manner as other borrowers with respect to loan guarantees and the rural development loans.

(d) During the 180 month period described in paragraph (a)(1) of this section the Administrator may consider providing an insured loan, if the conditions described in §1786.167(a) exist.

(e) Borrowers may not apply for direct or insured loans for facilities, construction of which commenced prior to the expiration of the 180 month period described in paragraph (a)(1) of this section.

§ 1786.200 Purpose.

This subpart sets forth the policies and procedures of RUS through the existing FFB program, whereby borrowers may prepay and refinance outstanding FFB Notes evidencing electric or telephone loans with FFB, pursuant to the provisions of section 306(C) of the RE Act as added by Public Law 103-66, 107 Stat. 312, enacted August 10, 1993.

§ 1786.201 Definitions and rules of construction.

(a) Definitions. As used in this subpart:

Administrator means the Administrator of the Rural Utilities Service (RUS).

Borrower means any organization which has an outstanding note(s) evidencing electric or telephone loans guaranteed by RUS from FFB.

Business day means any such day on which both the Federal Financing Bank and Federal Reserve Bank—New York are open for business.

Electric loan means a loan made by FFB and guaranteed by RUS under section 306 of the RE Act for electric service.

FFB means the Federal Financing Bank, an instrumentality and wholly owned corporation of the United States.

Government means the United States of America, acting through the Administrator of the Rural Utilities Service.

Loan guarantee means RUS’s guarantee under section 306 of the RE Act of a loan from FFB.
§ 1786.202 Prepayment and refinancing of RUS guaranteed FFB loans.

The borrower of an electric or telephone loan made by the FFB and guaranteed by RUS under section 306 of the RE Act may, at the option of the borrower, refinance or prepay a loan or an advance on the loan, or any portion of the loan or advance in accordance with section 306C of the RE Act, after meeting certain conditions using the procedures prescribed in the note. After refinancing existing notes under this section, additional prepayments or refinancings will be governed by the terms of the refinancing note(s).

§ 1786.203 Special considerations.

Generally all FFB borrowers with loans guaranteed by RUS whose FFB notes have not been accelerated are eligible to prepay or refinance under this part. All requests for prepayment or refinancing will be processed in accordance with this subpart except that some requests for refinancing and prepayments are more complicated and thus will involve special considerations. These requests will have to be handled on a case by case basis and include:

(a) Telephone borrowers who are required to meet certain terms of their indenture;

(b) Borrowers who have amended their old form note or have already repriced prior to September 30, 1993;

(c) Borrowers that have been involved in a merger or consolidation;

(d) Borrowers whose obligations to RUS, FFB notes, or security instruments differ from those normally used;

(e) A request to prepay or refinance an amount of less than $100,000 or an amount of less than the full amount of an advance outstanding; or

(f) A request to prepay or refinance a note that includes unadvanced loan funds.

Paymen date means the date that payment is due and is the last day in a calendar quarter.

Prepayment penalty means the same as prepayment premium.

Prepayment premium shall have the meaning set forth at §1786.207.

RE Act means the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 et seq.).

REA means the Rural Electrification Administration formerly an agency of the United States Department of Agriculture and predecessor agency to RUS with respect to administering certain electric and telephone loan programs.

Refinancing note shall have the meaning set forth at §1786.206.

RUS loan contract means the agreement, as amended, supplemented, or restated from time to time, between a borrower and RUS providing for loans or loan guarantees pursuant to the RE Act.

RUS mortgage means collectively those mortgages and security agreements made by and between the borrower and the Government, securing indebtedness evidencing electric and telephone loans or loan guarantees pursuant to the RE Act.

Supplemental lender means a private lender whose loan to the borrower is secured under an RUS mortgage.

Telephone loan means a loan made by FFB and guaranteed by RUS under section 306 of the RE Act for telephone service.

(b) Rules of construction. Unless the context shall otherwise indicate, the terms defined in paragraph (a) of this section include the plural as well as the singular, and the singular as well as the plural. The words “herein,” “hereof,” and “hereunder”, and words of similar import, refer to this subpart as a whole.

§ 1786.204 Limitations.
(a) No more than three refinancing notes will be executed for any borrower per calendar year.
(b) The borrower may not select a term for the refinanced advance that ends after the maturity date set for that advance.

§ 1786.205 Application procedure.
(a) Any borrower seeking to prepay or refinance an advance from the FFB under this subpart should apply by letter to the appropriate RUS Regional Director or, in the case of power supply borrowers, to the Director of the Power Supply Division. The borrower will be required to submit applications and elections in a digital format to be supplied by RUS. The application letter shall provide the following:
(1) Borrower’s RUS designation;
(2) Borrower’s name and address;
(3) Listing of each note to be prepaid by loan designation, RUS note number, RUS account number, advance date, maturity date, original amount, outstanding balance, and date(s) of any substitute FFB note(s) amending the original FFB Note;
(4) A statement of the borrower’s intention to finance the premium by an addition to principal balance or to pay the premium in cash or with unsecured debt;
(5) A statement of the maturity options that the borrower wishes to select;
(6) Such additional information as the Administrator may request.
(b) Requests for refinancing or prepayment will ordinarily be processed in the order that they are received. Borrower’s may withdraw an application by notifying the appropriate RUS office in which they filed the application.
(c) When the request for prepayment or refinancing is approved for processing the borrower will be provided with appropriate instructions, documents and forms which may include but are not limited to the following:
(1) An FFB refinancing note;
(2) Resolution of Board of Directors;
(3) Legal Opinion;
(4) Certificate of Secretary;
(5) Waiver of Notice;
(6) Notice to borrower electing an effective date other than a scheduled quarterly payment date (if applicable);
(7) Documentation of obligations secured pursuant to section 1786.208 if any; and
(8) Security instrument.

(Approved by the Office of Management and Budget under control number 0572-0032)

§ 1786.206 Refinancing note.
(a) RUS will issue a replacement guaranty for refinancing notes delivered to FFB to replace and substitute for existing FFB notes in connection with any refinancing by FFB pursuant to section 306C of the RE Act.
(b) Generally, refinancing notes will, to the extent practicable, consolidate all of a borrower’s existing FFB notes which have been guaranteed by RUS and containing terms and conditions as FFB may require and RUS and the borrower may accept.
(c) Notwithstanding any contrary provision contained in this subpart, RUS will give preference to processing refinancings that utilize a generic form of refinancing note in the event that FFB prescribes one.

§ 1786.207 Prepayment premium.
(a) A premium shall be assessed against a borrower that refinances or prepays a loan or loan advance, or any portion of a loan or advance, under this section. RUS will collect the prepayment premium as calculated by FFB. FFB will calculate this premium as described in this section. Except as provided in paragraph (b) of this section, the premium shall be equal to the lesser of:
(1) The difference between the outstanding principal balance of the loan being refinanced and the present value of the loan discounted at a rate equal to the then current cost of funds to the Department of the Treasury for obligations of comparable maturity to the loan being refinanced or prepaid;
§ 1786.208 Increased principal.

A borrower can meet the premium requirements by increasing the outstanding principal balance of the loan advance that is being refinanced. If it does so the borrower shall make a payment at the time of the refinancing equal to 2.5 percent of the amount of the premium that is added to the outstanding principal balance of the loan.

§ 1786.209 Outstanding loan documents.

(a) Except as expressly provided in this subpart, the borrower shall comply with all provisions of its RUS loan contract, its outstanding notes issued to RUS, and the RUS mortgage.

(b) Nothing in this subpart shall affect any rights of supplemental lenders under the RUS mortgage or the rights of any other creditors of the borrower.

(c) Nothing in this subpart shall prohibit a borrower from making prepayments on any loans pursuant to the RE Act in accordance with the terms thereof or as may be otherwise permitted by law.

§ 1786.210 Approvals.

The borrower shall be responsible for obtaining all approvals necessary to consummate the transaction as required by the refinancing note, including such approvals as may be required by regulatory bodies and other lenders.
§ 1788.2 General insurance requirements.

(a) Borrowers will take out, as the respective risks are incurred, and maintain the classes and amounts of insurance in conformance with generally accepted utility industry standards for such classes and amounts of coverage for utilities of the size and character of the borrower and consistent with Prudent Utility Practice. Prudent Utility Practice shall mean any of the practices, methods, and acts which, in the exercise of reasonable judgment, in light of the facts, including but not limited to, the practices, methods, and acts engaged in or approved by a significant portion of the electric utility industry in the case of an electric borrower or of the telecommunications industry in the case of a telecommunications borrowers prior thereto, known at the time the decision was made, would have been expected to accomplish the desired result consistent with cost-effectiveness, reliability, safety, and expedition. It is recognized that Prudent Utility Practice is not intended to be limited to optimum practice, method, or act to the exclusion of all others, but rather is a spectrum of possible practices, methods, or act which could have been expected to accomplish the desired result at the lowest reasonable cost consistent with cost-effectiveness, reliability, safety, and expedition.

(b) The foregoing insurance coverage shall be obtained by means of bond and policy forms approved by regulatory authorities having jurisdiction, and, with respect to insurance upon any part of the mortgaged property securing an RUS loan, shall provide that the insurance shall be payable to the mortgagees as their interests may appear by means of the standard mortgagee clause without contribution. Each policy or other contract for such insurance shall contain an agreement by the

RUS means the Rural Utilities Service and includes the Rural Telephone Bank.

RUS loan means a loan made or guaranteed by RUS.

(c) RUS may revise these requirements on a case by case basis for borrowers with unusual circumstances.
insurer that, notwithstanding any right of cancellation reserved to such insurer, such policy or contract shall continue in force for at least 30 days after written notice to each mortgagee of suspension, cancellation, or termination.

(c) In the event of damage to or the destruction or loss of any portion of the mortgaged property which is used or useful in the borrower’s business and which shall be covered by insurance, unless each mortgagee shall otherwise agree, the borrower shall replace or restore such damaged, destroyed, or lost portion so that such mortgaged property shall be in substantially the same condition as it was in prior to such damage, destruction, or loss and shall apply the proceeds of the insurance for that purpose. The borrower shall replace the lost portion of such mortgaged property or shall commence such restoration promptly after such damage, destruction, or loss shall have occurred and shall complete such replacement or restoration as expeditiously as practicable, and shall pay or cause to be paid out of the proceeds of such insurance form all costs and expenses in connection therewith.

(d) Sums recovered under any policy or fidelity bond by the borrower for a loss of funds advanced under a note secured by a mortgage or recovered by any mortgagee or holder of any note secured by the mortgage for any loss under such policy or bond shall, unless applied as provided in the preceding paragraph, be used as directed by the borrower’s mortgage.

(e) Borrowers shall furnish evidence annually that the required insurance and fidelity coverage has been in force for the entire year, and that the borrower has taken all steps currently necessary and will continue to take all steps necessary to ensure that the coverage will remain in force until all loans made or guaranteed by RUS are paid in full. Such evidence shall be in a form satisfactory to RUS. Generally a certification included as part of the RUS Financial and Statistical Report filed by the borrower annually (RUS Form 7 or Form 12 for electric borrowers, RUS Form 479 for telecommunications borrowers, or the successors to these forms) is sufficient evidence of this coverage.

§ 1788.3 Flood insurance.

(a) Borrowers shall purchase and maintain flood insurance for buildings in flood hazard areas to the extent available and required under the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4001, et seq.) The insurance should cover, in addition to the building, any machinery, equipment, fixtures, and furnishings contained in the building.

(b) The National Flood Insurance Program (see 44 CFR Part 59 et seq.) provides for a standard flood insurance policy; however, other existing insurance policies which provide flood coverage may be used where flood insurance is available in lieu of the standard flood insurance policy. Such policies must be endorsed to provide:

1. That the insurer give 30 days written notice of cancellation or non-renewal to the insured with respect to the flood insurance coverage. To be effective, such notice must be mailed to both the insured and RUS and other mortgagees if any and must include information as to the availability of flood insurance coverage under the National Flood Insurance Program, and

2. That the flood insurance coverage is at least as broad as the coverage offered by the Standard Flood Insurance Policy.

§ 1788.4 Disclosure of irregularities and illegal acts.

(a) Borrowers must immediately report, in writing, all irregularities and all indications or instances of illegal acts in its operations, whether material or not, to RUS and the Office of the Inspector General (OIG). See 7 CFR 1773.9(c)(3) for OIG addresses. The reporting requirements for borrowers are the same as those for CPA’s set forth in §1773.9

(b) Borrowers are required to make full disclosure to the bonding company of the dishonest or fraudulent acts.

§ 1788.5 RUS endorsement required.

In the case of a cooperative or mutual organization, RUS requires that the following:
Endorsement Waiving Immunity From Tort Liability’’ be included as a part of each public liability, owned, non-owned, hired automobile, and aircraft liability, employers’ liability policy, and boiler policy.

The Insurer agrees with the Rural Utilities Service that such insurance as is afforded by the policy applies subject to the following provisions:

1. The Insurer agrees that it will not use, either in the adjustment of claims or in the defense of suits against the Insured, the immunity of the Insured from tort liability, unless requested by the Insured to interpose such defense.

2. The Insured agrees that the waiver of the defense of immunity shall not subject the Insurer to liability of any portion of a claim, verdict or judgment in excess of the limits of liability stated in the policy.

3. The Insurer agrees that if the Insured is relieved of liability because of its immunity, either by interposition of such defense at the request of the Insured or by voluntary action of a court, the insurance applicable to the injuries on which such suit is based, to the extent to which it would otherwise have been available to the Insured, shall apply to officers and employees of the Insured in their capacity as such; provided that all defenses other than immunity from tort liability which would be available to the Insurer but for said immunity in suits against the Insured or against the Insurer under the policy shall be available to the Insurer with respect to such officers and employees in suits against such officers and employees or against the Insurer under the policy.

§ 1788.6 RUS right to place insurance.

If a borrower fails to purchase or maintain the required insurance and fidelity coverage, the mortgagors may place required insurance and fidelity coverage on behalf and in the name of the borrower. The borrower shall pay the cost of this coverage, as provided in the loan documents.

§§ 1788.7–1788.10 [Reserved]

Subpart B—Insurance for Contractors, Engineers, and Architects, Electric Borrowers

§ 1788.11 Minimum insurance requirements for contractors, engineers, and architects.

(a) Each electric borrower shall include the provisions in this paragraph in its agreements with contractors, engineers, and architects, said agreements that are wholly or partially financed by RUS loans or guarantees. The borrower should replace “Contractor” with “Engineer” or “Architect” as appropriate.

1. The Contractor shall take out and maintain throughout the period of this Agreement insurance of the following minimum types and amounts:
   a. Worker’s compensation and employer’s liability insurance, as required by law, covering all their employees who perform any of the obligations of the contractor, engineer, and architect under the contract. If any employer or employee is not subject to workers’ compensation laws of the governing State, then insurance shall be obtained voluntarily to extend to the employer and employee coverage to the same extent as though the employer or employee were subject to the workers’ compensation laws.
   b. Public liability insurance covering all operations under the contract shall have limits for bodily injury or death of not less than $1 million each occurrence, limits for property damage of not less than $1 million each occurrence, and $1 million aggregate for accidents during the policy period. A single limit of $1 million of bodily injury and property damage is acceptable. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.
   c. Automobile liability insurance on all motor vehicles used in connection with the contract, whether owned, non-owned, or hired, shall have limits for bodily injury or death of not less than $1 million per person and $1 million each occurrence, and property damage limits of $1 million for each occurrence. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

2. The Owner shall have the right at any time to require public liability insurance and property damage liability insurance greater than those required in paragraphs (a)(1)(b) and (a)(1)(c) of this section. In any such event, the additional premium or premiums payable solely as the result of such additional insurance shall be added to the Contract price.

3. The Owner shall be named as Additional Insured on all policies of insurance required in (a)(1)(b) and (a)(1)(c) of this section.

4. The policies of insurance shall be in such form and issued by such insurer as shall be satisfactory to the Owner. The Contractor shall furnish the Owner a certificate evidencing compliance with the foregoing requirements that shall provide not less than 30 days prior written notice to the Owner of any cancellation or material change in the insurance.
(b) Electric borrowers shall also ensure that all architects and engineers working under contract with the borrower have insurance coverage for Errors and Omissions (Professional Liability Insurance) in an amount at least as large as the amount of the architectural or engineering services contract but not less than $500,000.

(c) The borrower may increase the limits of insurance if desired.

(d) The minimum requirement of $1 million of public liability insurance does not apply to contractors performing maintenance work, janitorial-type services, meter reading services, rights-of-way mowing, and jobs of a similar nature. However, borrowers shall ensure that the contractor performing the work has public liability coverage at a level determined to be appropriate by the borrower.

(e) If requested by RUS, the borrower shall provide RUS with a certificate from the contractor, engineer, or architect evidencing compliance with the requirements of this section.

§ 1788.12 Contractors' bonds.

Electric borrowers shall require contractors to obtain contractors’ bonds when required by part 1726, Electric System Construction Policies and Procedures, of this chapter. Surety companies providing contractors’ bonds shall be listed as acceptable sureties in the U.S. Department of Treasury Circular No. 570. The circular is maintained through periodic publication in the Federal Register and is available on the Internet under ftp://ftp.fedworld.gov/pub/tel/sureties.txt, and on the Department of the Treasury’s computer bulletin board at 202-874-6817.

Subpart C—Insurance for Contractors, Engineers, and Architects, Telecommunications Borrowers

§ 1788.46 General.

This subpart sets forth RUS policies for minimum insurance requirements for contractors, engineers, and architects performing work under contracts which are wholly or partially financed by RUS loans or guarantees with telecommunications borrowers.

§ 1788.47 Policy requirements.

(a) Contractors, engineers, and architects performing work for borrowers under construction, engineering, and architectural service contracts shall obtain insurance coverage, as required in §1788.48, and maintain it in effect until work under the contracts is completed.

(b) Contractors entering into construction contracts with borrowers shall furnish a contractors’ bond, except as provided for in §1788.49, covering all of the contractors’ undertaking under the contract.

(c) Borrowers shall make sure that their contractors, engineers, and architects comply with the insurance and bond requirements of their contracts.

§ 1788.48 Contract insurance requirements.

Contracts entered into between borrowers and contractors, engineers, and architects shall provide that they take out and maintain throughout the contract period insurance of the following types and minimum amounts:

(a) Workers’ compensation and employers’ liability insurance, as required by law, covering all their employees who perform any of the obligations of the contractor, engineer, and architect under the contract. If any employer or employee is not subject to the workers’ compensation laws of the governing state, then insurance shall be obtained voluntarily to extend to the employer and employee coverage to the same extent as though the employer or employee were subject to the workers’ compensation laws.

(b) Public liability insurance covering all operations under the contract shall have limits for bodily injury or death of not less than $1 million each occurrence, limits for property damage of not less than $1 million each occurrence, and $1 million aggregate for accidents during the policy period. A single limit of $1 million of bodily injury and property damage is acceptable. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.
(c) Automobile liability insurance on all motor vehicles used in connection with the contract, whether owned, non-owned, or hired, shall have limits for bodily injury or death of not less than $1 million per person and $1 million per occurrence, and property damage limits of $1 million for each occurrence. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

(d) When a borrower contracts for the installation of major equipment by others than the supplier or for the moving of major equipment from one location to another, the contractor shall furnish the borrower with an installation floater policy. The policy shall cover all risks of damage to the equipment until completion of the installation contract.

§ 1788.49 Contractors' bond requirements.

Construction contracts in amounts in excess of $250,000 for facilities shall require contractors to secure a contractors' bond, on a form approved by RUS, attached to the contract in a penal sum of not less than the contract price, which is the sum of all labor and materials including owner-furnished materials installed in the project. RUS Form 168b is for use when the contract exceeds $250,000. RUS Form 168c is for use when the contractor's surety has accepted a Small Business Administration guarantee and the contract is for $1,000,000 or less. For minor construction contracts under which work will be done in sections and no section will exceed a total cost of $250,000, the borrower may waive the requirement for a contractors' bond.

§ 1788.50 Acceptable sureties.

Surety companies providing contractors' bonds shall be listed as acceptable sureties in the U.S. Department of Treasury Circular No. 570. The circular is maintained through periodic publication in the FEDERAL REGISTER and is available on the Internet under ftp://ftp.fedworld.gov/pub/tel/sureties.txt, and on the Department of the Treasury's computer bulletin board at 202-874-6817.
§ 1789.150 Purpose.

This part sets forth policies and the procedures for implementing subsection (c) of section 18 of the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 et seq.) (RE Act) which authorizes the Rural Utilities Service (RUS) to use the services of Consultants funded by the Borrowers to facilitate timely action on Applications by Borrowers for financial assistance and other approvals.

§ 1789.151 Definitions.

As used in this part:

Administrator means the Administrator of the Rural Utilities Service (RUS).

Application means a request for financial assistance under the RE Act or such other approvals as may be required of the RUS pursuant to the terms of outstanding loan or security instruments or otherwise.

Borrower means any organization which has an outstanding loan(s) made or guaranteed by RUS or its predecessor agency, the Rural Electrification Administration (REA) under the RE Act or any organization which has submitted or submits an Application before RUS.

Consultant means a person or firm which has been retained pursuant to this subpart under a contract to provide financial, legal, engineering, environmental, or other technical advice and services.

Consultant Contract means a contract for the performance of consulting services for RUS, to be paid using funds provided by a Borrower, which may be in the form of a Retainer Contract, purchase order, or other form as may be appropriate.

Escrow Account means an account established pursuant to § 1789.158.

Escrow Agreement means an agreement, between a Borrower, a Consultant and a Third-party Commercial Institution, meeting the requirements of § 1789.167.

Final Invoice means the closing Invoice prepared for a given Task Order.

Financial Consultant means a Consultant retained pursuant to this part to provide financial advisory services.

Funding Agreement means an agreement, between a Borrower and a Consultant, providing for the Borrower to fund the costs of a Task Order and otherwise meeting the requirements of § 1789.166.

Indemnification Agreement means an agreement by a Borrower meeting the requirements of § 1789.162.

Invoice means an invoice prepared by a Consultant pursuant to the terms of a Consultant Contract.

Legal Consultant means any Consultant retained pursuant to this part to provide legal services to RUS.

Notice of Proposal to Fund means a notice meeting the requirements of § 1789.156 provided to RUS by the Borrower.

Organizational conflict of interest means that because of other activities or relationships with other persons, a person is unable or potentially unable to render impartial assistance or advice to the Government, or the person’s objectivity in performing the contract work is or might be otherwise impaired, or a person has an unfair competitive advantage.

Retainer Contract means a Consultant Contract providing for a minimum required payment to a Consultant irrespective of whether services are utilized by RUS thereunder.

Task Order means a written request for consultant services pursuant to the terms of a Consultant Contract.

Third-party Commercial Institution means a commercial financial institution mutually acceptable to the Borrower and the Consultant.

§ 1789.152 Policy.

(a) As provided in this subpart, RUS may, at its discretion, use the services of Consultants funded by a Borrower where such services will facilitate timely action on an Application by such Borrower for financial assistance or other approvals. Such Consultants may provide financial, legal, engineering, environmental or other technical advice and services in connection with the review of an Application.
(b) With the approval of RUS, a Borrower may fund the cost of consulting services in connection with the review by RUS of an Application by such Borrower. Such funding shall be provided pursuant to the terms of a Funding Agreement between the Borrower and the Consultant designated by RUS.

(c) RUS may not, without the consent of the Borrower, require, as a condition of processing any Application for approval, that the Borrower agree to pay the costs of a Consultant hired to provide services to RUS.

(d) The government shall retain sole discretion in the selection of Consultants to provide services to RUS and the form of contract utilized. RUS may either use the services of one or more Consultants retained under Retainer Contracts or the government may elect to retain a Consultant not otherwise on retainer. The government shall have sole discretion to prescribe terms and conditions of Consultant Contracts.

(e) RUS shall retain sole discretion as to whether to further pursue use of an outside consultant for the relevant application in the event the Borrower does not enter into the agreements referenced in §1789.158(c)(3)(iii) within 60 days of the government providing to the Borrower the information set forth in §1789.158(c)(3).

§1789.153 Borrower funding.

Borrowers shall use their general funds for the purposes of funding consultant services hereunder. Borrowers may not use the proceeds of loans made or guaranteed under the RE Act for costs incurred by Borrowers pursuant to the funding of consultant services for RUS.

§1789.154 Eligible borrowers.

All Borrowers are eligible to fund consultant services under this part.

§1789.155 Approval criteria.

RUS will consider approving the use of consultant services funded by a Borrower on a case by case basis taking into account, among other matters, the following:

(a) Whether such services are required to facilitate timely action on a Borrower’s Application. RUS shall determine what represents timely action with respect to each Application considering, among other matters, the review period normally required for such projects by RUS and other lenders and the consequences to the Borrower of adjusting the review period.

(b) The availability of staff resources, the priorities of other projects then before RUS, and the efficiencies to be realized from the use of consultant services.

(c) Whether it is in the best interest of RUS to use Borrower-funded Consultants. Certain types of projects, such as those involving issues of program-wide significance, may not be well suited for the use of Borrower-funded Consultants.

§1789.156 Proposal procedure.

(a) In the event RUS determines that consideration should be given to the use of a Borrower-funded consultant in connection with the review of an Application, the RUS Regional Director or the Director of the Power Supply Division, as appropriate, will discuss with the Borrower the nature of the Application and the projected review period required of RUS. If RUS concludes that the projected review period will not result in timely action on the Application, and after being so notified in writing by RUS the Borrower wishes to fund consultant services to facilitate RUS review, the Borrower shall submit to the same Director a funding proposal. The proposal shall set forth the following:

(1) Identification in the heading or caption as a Notice of Proposal to Fund Consulting Services;

(2) Borrower’s REA/RUS designation;

(3) Borrower’s legal name and address;

(4) A description of the Application, critical issues and concerns relating to the Application, time deadlines, and the consequences of any delays in RUS review;

(5) A description of the consulting service(s) that would facilitate timely RUS review of the Application; and

(6) Such additional documents and information as RUS may request.
§ 1789.157 Consultant contract.

(a) The Federal Acquisition Regulation (FAR), 48 CFR Ch. 1, and the Agriculture Acquisition Regulation (AGAR), 48 CFR Ch. 4, shall apply to all Consultant Contracts entered into pursuant to this part except as provided in this section.

(1) Contracts for Legal Consultants shall provide for a technical representative from OGC.

(2) All Consultant Contracts shall provide for an escrow account funding mechanism pursuant to this part and for the government’s sole discretion in determining whether payments are to be made from the Escrow Account to the Consultant.

(3) All Consultant Contracts shall provide that payment of all obligations for work performed thereunder must be satisfied by amounts available in the Escrow Account; with the exception of the annual retainer fee, if any, Consultants shall not be entitled to any payments from the government.

(b) The provisions of paragraph (a) of this section shall be given prominent emphasis in requests for proposals issued under this part.

§ 1789.158 Implementation.

(a) Upon making a determination to go forward with Borrower funding for consulting services, RUS shall initiate a procurement request for a Consultant to provide the services. The government may either contract with a Consultant on a case by case basis or elect to use a Consultant pursuant to an outstanding Retainer Contract. The Borrower will not be informed of the Consultant selected until such time as the government provides the information set forth in paragraph (c)(3) of this section.

(b) If the government determines to contract with a Consultant on a case by case basis, the government shall notify the Borrower of the applicable procedures.

(c) If the government determines to contract with a Consultant under an outstanding Retainer Contract, the following procedures will normally apply:

(1) Pursuant to the terms of the contract, the government will prepare a draft Task Order requesting consultant services in connection with the review of the Borrower’s Application. The draft Task Order shall set forth for the Consultant’s review and acceptance, a description of the services to be provided and applicable time frames for the provision of such services.

(2) The government will request that the Consultant:

(i) Notify the government as to the acceptability of the form and substance of the draft Task Order;

(ii) Notify the government as to its ability to provide a satisfactory conflict of interest certification consistent with the requirements of the FAR (48 CFR ch. 1); and

(iii) Provide a cost estimate for the draft Task Order.

(3) When the government is satisfied with the response(s) received pursuant to paragraph (c)(2) of this section, the government shall promptly provide to the Borrower:

(i) A copy of the draft Task Order identifying the Consultant;

(ii) The Consultant’s cost estimate for the draft Task Order; and

(iii) Contract information required to enable the Borrower to develop a Funding Agreement, an Escrow Agreement and an Indemnification Agreement (the “agreements”).

(4) The Borrower shall develop and submit to the government for approval executed originals of:

(i) The agreements; and

(ii) A certified copy of a resolution of the board of directors authorizing the Borrower to enter into the agreements and to take such other action as is necessary to effect the purposes of the agreements.

(5) Upon receiving written RUS approval of the agreements and the form and substance of the board resolution, the Borrower shall:
§ 1789.159 Contract administration.

The government shall be solely responsible for the administration of a Consulting Contract and shall have complete control over the scope of the Consultant’s work, the timetable for performance, the standards to be applied in determining the acceptability of deliverables and the approval of payment of Invoices.

§ 1789.160 Access to information.

The Borrower shall not have rights in nor right of access to the work product of the Consultant. All analyses, studies, opinions, memoranda, and other documents and information provided by the Consultant pursuant to a Consulting Contract may be released and made available to the Borrower only with the approval of RUS. This section does not restrict release of information by RUS pursuant to the Freedom of Information Act (5 U.S.C. 552(a)(2)) or other legal process.

§ 1789.161 Conflicts of interest.

The standard for determining organizational conflicts of interest shall be as set forth in the FAR subpart 9.5 (48 CFR part 9, subpart 9.5); however, the identification of the existence of an organizational conflict of interest may be made by either the Administrator or the cognizant Contracting Officer. In the event an organizational conflict of interest is determined to exist, the cognizant Contracting Officer shall take the actions prescribed at FAR 9.504 (48 CFR 9.504) to attempt to avoid, neutralize or mitigate the conflict. Should these actions be deemed by the Administrator and the Contracting Officer to adequately resolve the conflict, the contracting action with the offeror/contractor may proceed. Should the Administrator or the Contracting Officer determine that an organizational conflict of interest still exists such that contract award or other contracting action cannot be taken (award of task/delivery order, etc.) the offeror/contractor shall be so informed by the Contracting Officer and be provided a reasonable opportunity to respond in accordance with FAR 9.504(e) (48 CFR 9.504(e)). After considering the contractor’s response, if it is found by both the Administrator and Contracting Officer to remedy the conflict of interest, the contracting action may proceed. If the Administrator and Contracting Officer determine that the contractor’s response does not resolve the conflict of interest, yet continuing with the contracting action with the offeror/contractor in question is considered in the best interest of the United States, a waiver in accordance with FAR 9.503 (48 CFR 9.503) may be executed. This waiver shall be submitted under the Contracting Officer’s signature and approved by the Administrator. The Administrator has been delegated Head of Contracting Activity authority by the USDA Senior Procurement Executive solely for the purpose of waiver approval.

§ 1789.162 Indemnification agreement.

As a condition of approving Borrower funding, the government will require the Borrower to enter into an Indemnification Agreement, in form and substance satisfactory to RUS, providing that the Borrower will indemnify and hold harmless the government and any officers, agents or employees of the government from any and all liability, including costs, fees, and settlements arising out of, or in any way connected with the payment of the Consultant’s fee pursuant to the Consultant Contract. The Indemnification Agreement may recognize, as a condition of liability thereunder, the rights of the borrower to prompt notice, to use of counsel of its own choosing, and to participation in any settlement of a claim against which indemnification is sought.
§ 1789.163 Waiver.

RUS may waive any requirement or procedure of this subpart by determining that its application in a particular situation would not be in the government’s interest, except that certain provision that the subject contracts are subject to the provisions of the FAR (48 CFR ch. 1) and AGAR (48 CFR ch. 4).

§§ 1789.164–1789.165 [Reserved]

Subpart B—Escrow Account
Funding and Payments

§ 1789.166 Terms and conditions of funding agreement.

Funding Agreements between the Borrower and a Consultant shall be in form and substance satisfactory to RUS and provide for, among other matters, the following:

(a) Specific reference by number to the applicable Consulting Contract entered into between the government and the Consultant;

(b) Specific reference by number to the applicable Task Order (where applicable);

(c) A brief description of the Application;

(d) A requirement that Invoices make specific reference to:
   (1) The applicable contract and Task Order(s); and
   (2) The Escrow Account from which payment is to be made;

(e) A requirement that the Final Invoice for a Task Order be clearly identified as such;

(f) A description of the services to be provided by the Consultant to RUS and the applicable time frames for the provision of such services;

(g) Agreement that the Borrower shall pay for the Consultant services provided to RUS under the applicable contract through an Escrow Account established pursuant to an Escrow Agreement, the Consultant shall not provide services to RUS under the applicable contract unless there are sufficient funds in the Escrow Account to pay for such services, the Consultant shall seek compensation for services provided under the applicable contract from, and only from, funds made available through the Escrow Account, and

(h) The Consultant must submit all Invoices to the government for approval.

(i) A form of Escrow Agreement satisfactory to the Borrower, Consultant and the designated Third-party Commercial Institution;

(j) Acknowledgment by the Consultant of the Indemnification Agreement provided by the Borrower to the government;

(k) The Funding Agreement shall not be effective unless and until approved in writing by RUS.

§ 1789.167 Terms and conditions of escrow agreement.

Escrow Agreements between and among the Borrower, Consultant and Third-party Commercial Institution shall be in form and substance satisfactory to RUS and provide for, among other matters, the following:

(a) Specific reference by number to the applicable contract for services;

(b) Specific reference by number to the applicable Task Order;

(c) Specific reference by number to the Escrow Account into which funds are to be deposited;

(d) Invoices to specifically identify the applicable contract and Task Order(s);

(e) Funds to be held in the Escrow Account by the escrow agent until paid to the Consultant pursuant to the government’s authorization;

(f) The Escrow Account to be closed and all remaining funds remitted to the Borrower after payment of the Final Invoice, unless otherwise directed by the government;

(g) The government, the Consultant and the Borrower to have the right to be informed, in a timely manner and in such form as they may reasonably request, as to the status of and activity in the Escrow Account; and

(h) The Escrow Agreement shall not be effective unless and until approved in writing by RUS.
§ 1792.102 Definitions.

As used in this subpart, the following terms have the following meaning:

Administrator—Administrator of RUS or the Governor of the Rural Telephone Bank or his or her designee.

Borrower—An entity which borrows or seeks to borrow money from, or arranges financing with the assistance of RUS through guarantees, lien accommodations or lien subordinations.

Building—Any structure, fully or partially enclosed, used or intended for sheltering persons or property.

Federally assisted—The provision of financing assistance by RUS through loans, loan guarantees, grants, and lien accommodations and subordinations.

Grant recipient—Any entity which receives a grant from RUS.

Lien accommodation—The consensual sharing of the government’s (RUS’s) lien on property or the release of government’s lien on property.

Lien subordination—Agreement that the government’s (RUS) lien on property will rank below the lien of another entity.

Model Code—A building code developed for the adoption of local or state authorities or to be used as the basis of a local or state building code.

NEHRP—National Earthquake Hazards Reduction Program.

Registered—A person licensed by the State(s) or Authority(ies) to perform architectural or engineering services in the State(s) where construction occurs.

RUS—Rural Utilities Service, and for the purposes of this subpart, shall include the Rural Telephone Bank. For the purposes of RTB borrowers, as used in this subpart, RUS means RTB and Administrator means Governor.

State—Each of the 50 States of the United States, the District of Columbia, and territories and possessions of the United States which are authorized
§ 1792.103 Seismic design and construction standards for new buildings.

(a) In the design and construction of federally assisted buildings, the borrowers and grant recipients must utilize the seismic provisions of the most recent edition of those standards and practices that are substantially equivalent to or exceed the seismic safety level in the 2000 edition of the NEHRP Recommended Provisions for the Development of Seismic Regulation for New Buildings.

(b) Each of the following model codes or standards provides a level of seismic safety substantially equivalent to that provided by the 2000 NEHRP Recommended Provisions and are appropriate for federally assisted new building construction:

2. 2002 American Society of Civil Engineers (ASCE) 7, Minimum Design Loads for Buildings and Other Structures. Copies are available from the American Society of Civil Engineers, Publications Marketing Department, 1801 Alexander Bell Drive, Reston, VA 20191–4400. E-mail: marketing@asce.org. Telephone: (800) 548–2723. Fax: (703) 295–6211.

(c) The NEHRP Recommended Provisions for the Development of Seismic Regulations for New Buildings is available from the Office of Earthquakes and Natural Hazards, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472.

§ 1792.104 Seismic acknowledgments.

For each applicable building, borrowers and grant recipients must provide RUS a written acknowledgment from a registered architect or engineer responsible for the building design stating that seismic provisions pursuant to §1792.103 of this subpart will be used in the design of the building.

(a) For projects in which plans and specifications are required to be submitted to RUS, this acknowledgement shall be on the title page of the drawings included with the final plans and specifications. This acknowledgement will include the identification and date of the model code or standard that is used in the seismic design of the building project. The plans and specifications must be dated, signed, and sealed by the registered architect or engineer.

(b) For projects in which plans and specifications are not submitted, this acknowledgement shall be in the form of a statement from the architect or engineer responsible for the building design. The statement shall identify the model code or standard identified that is used in the seismic design of the building or buildings and, shall be dated and signed.

[69 FR 23642, Apr. 30, 2004]
Subpart A—General

§ 1794.1 Purpose.

(a) This part contains the policies and procedures of the Rural Utilities Service (RUS) for implementing the requirements of the National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321–4346); the Council on Environmental Quality (CEQ) Regulations for Implementing the Procedural Provisions of NEPA (40 CFR parts 1500 through 1508) and certain related Federal environmental laws, statutes, regulations, and Executive Orders (EO) that apply to RUS programs and administrative actions.

(b) The policies and procedures contained in this part are intended to help RUS officials make decisions that are based on an understanding of environmental consequences, and take actions that protect, restore, and enhance the environment. In assessing the potential environmental impacts of its actions, RUS will consult early with appropriate Federal, State, and local agencies and other organizations to provide decision-makers with information on the issues that are truly significant to the action in question.

§ 1794.2 Authority.

(a) This part derives its authority from and is intended to be compliant with NEPA, CEQ Regulations for Implementing the Procedural Provisions of NEPA, and other RUS regulations.

(b) Where practicable, RUS will use NEPA analysis and documents and review procedures to integrate the requirements of related environmental statutes, regulations, and orders.

(c) This part integrates the requirements of NEPA with other planning and environmental review procedures required by law, or by RUS practice including but not limited to:

§ 1794.3

(2) The National Historic Preservation Act (16 U.S.C. 470 et seq.);
(3) Farmland Protection Policy Act (7 U.S.C. 4201 et seq.);
(4) E.O. 11593, Protection and Enhancement of the Cultural Environment (3 CFR, 1971 Comp., p. 154);
(5) E.O. 11514, Protection and Enhancement of Environmental Quality (3 CFR, 1970 Comp., p. 164);
(6) E.O. 11988, Floodplain Management (3 CFR, 1977 Comp., p. 117);
(7) E.O. 11990, Protection of Wetlands (3 CFR, 1977 Comp., p. 121); and

(d) Applicants are responsible for ensuring that proposed actions are in compliance with all appropriate RUS requirements. Environmental documents submitted by the applicant shall be prepared under the oversight and guidance of RUS. RUS will evaluate and be responsible for the accuracy of all information contained therein.

§ 1794.3 Actions requiring environmental review.

The provisions of this part apply to actions by RUS including the approval of financial assistance pursuant to the Electric, Telecommunications, and Water and Waste Programs, the disposal of property held by RUS pursuant to such programs, and the issuance of new or revised rules, regulations, and bulletins. Approvals provided by RUS pursuant to loan contracts and security instruments, including approvals of lien accommodations, are not actions for the purposes of this part and the provisions of this part shall not apply to the exercise of such approvals.

§ 1794.4 Metric units.

RUS normally will prepare environmental documents using non-metric equivalents with one of the following two options: metric units in parentheses immediately following the non-metric equivalents or a metric conversion table as an appendix. Environmental documents prepared by or for a RUS applicant should follow the same format.

§ 1794.5 Responsible officials.

The Administrator of RUS has the responsibility for Agency compliance with all environmental laws, regulations, and EOs that apply to RUS programs and administrative actions. Responsibility for ensuring environmental compliance for actions taken by RUS has been delegated as follows:

(a) Electric and telecommunications programs. The appropriate Assistant Administrator is responsible for ensuring compliance with this part for the respective programs.

(b) Water and waste program. The Assistant Administrator for this program is responsible for ensuring compliance with this part at the national level. The State Director is the responsible official for ensuring compliance with this part for actions taken at the State Office level.

§ 1794.6 Definitions.

The following definitions, as well as the definitions contained in 40 CFR part 1508 of the CEQ regulations, apply to the implementation of this part:

Applicant. The organization applying for financial assistance or other approval from either the Electric or Telecommunications programs or the organization applying for a loan or grant from the Water and Waste program.

Distributed Generation. The generation of electricity by a sufficiently small electric generating system as to allow interconnection of the system near the point of service at distribution voltages or customer voltages. A distributed generating system may be fueled by any source, including but not limited to renewable energy sources.

Emergency situation. A natural disaster or system failure that may involve an immediate or imminent threat to public health, safety, or the human environment.

Environmental Report (ER). The environmental documentation normally submitted by applicants for proposed actions subject to compliance with §§1794.22 through 1794.24. An ER for the Water and Waste Program refers to the environmental review documentation normally included as part of the Preliminary Engineering Report.
Environmental review. Any one or all of the levels of environmental analysis described under subpart C of this part. Equivalent Dwelling Unit (EDU). Level of water or waste service provided to a typical rural residential dwelling.

Important land resources. Defined pursuant to the U.S. Department of Agriculture’s Departmental Regulation 9500–3, Land Use Policy, as important farmland, prime forestland, prime rangeland, wetlands, and floodplains. Copies of this Departmental Regulation are available from USDA, Rural Utilities Service, Washington, DC 20250.

Loan design. Document required by 7 CFR part 1737.

Multiplexing center. A field site where a telecommunications provider houses a device that combines individual subscriber circuits onto a single system for economical connection with a switching center. The combiner, or “multiplexer,” may be mounted on a pole, on a concrete pad, or in a partial or full enclosure such as a shelter, or small building.

Natural Resource Management Guide. Inventory of natural resources, land uses, and environmental factors specified by Federal, State, and local authorities as deserving some degree of protection or special consideration. The guide describes the standards or types of protection that apply.

Preliminary Engineering Report (PER). Document required by 7 CFR part 1780 for Water and Waste Programs. A PER is prepared by an applicant’s engineering consultant documenting a proposed action’s preliminary engineering plan and design and the applicable environmental review activities as required in this part. Upon approval by RUS, the PER, or a portion thereof, shall serve as the RUS environmental document.

Supervisory Control and Data Acquisition System (SCADA). Electronic monitoring and control equipment installed at electric substations and switching stations.

Third party consultant. A party selected by RUS to prepare the EIS for proposed actions described in §1794.25 where the applicant initiating the proposal agrees to fund preparation of the document in accordance with the provisions of 7 CFR Part 1789. “Use of Consultants Funded by Borrowers” and Section 759A of the Federal Agriculture Improvement and Reform Act of 1996 (7 U.S.C. 2204b(b)).

§ 1794.7 Guidance.

(a) Electric and Telecommunications Programs. For further guidance in the preparation of public notices and environmental documents, RUS has prepared a series of program specific guidance bulletins. RUS Bulletin 1794A–600 provides guidance in preparing the ER for proposed actions classified as categorical exclusions (CEs) (§1794.22(a)); RUS Bulletin 1794A–601 provides guidance in preparing the ER for proposed actions which require EAs (§1794.23(b) and (c)); and RUS Bulletin 1794A–603 provides guidance in conducting scoping for proposed actions classified as requiring an EA with scoping or an EIS. Copies of these bulletins are available upon request by contacting the Rural Utilities Service, Publications Office, Program Development and Regulatory Analysis, Stop 1522, 1400 Independence Avenue, SW., Washington, DC 20250–1522.

(b) Water and waste program. RUS Bulletin 1794A–602 provides guidance in preparing the ER for proposed actions classified as CEs (§1794.22(b)) and EAs (§1794.23(b)). A copy of this bulletin is available upon request by contacting the appropriate State Director. State Directors may provide supplemental guidance to meet state and local laws and regulations and to provide for orderly application procedures and efficient service to applicants. State Directors shall obtain the Administrator’s approval for all supplements to RUS Bulletin 1794A–602. Each State Office shall maintain an updated Natural Resource Management Guide and provide applicants with pertinent sections or a copy of the current edition thereof.

§§ 1794.8–1794.9 [Reserved]

Subpart B—Implementation of the National Environmental Policy Act

§ 1794.10 Applicant responsibilities.

As described in subpart C of this part, applicants shall prepare the applicable environmental documentation concurrent with a proposed action's engineering, planning, and design activities. RUS shall assist applicants by outlining the types of information required and shall provide guidance and oversight in the development of the documentation. Documentation shall not be considered complete until all public review periods, as applicable, have expired and RUS concurrence, as set forth in the appropriate decision document and associated public notice, has been issued.

§ 1794.11 Apply NEPA early in the planning process.

The environmental review process requires early coordination with and involvement of RUS. Applicants should consult with RUS at the earliest stages of planning for any proposal that may require RUS action. For proposed actions that normally require an EIS, applicants shall consult with RUS prior to obtaining the services of an environmental consultant.

§ 1794.12 Consideration of alternatives.

In determining what are reasonable alternatives, RUS considers a number of factors. These factors may include, but are not limited to, the proposed action's size and scope, state of the technology, economic considerations, legal and socioeconomic concerns, availability of resources, and the timeframe in which the identified need must be fulfilled.

§ 1794.13 Public involvement.

(a) In carrying out its responsibilities under NEPA, RUS shall make diligent efforts to involve the public in the environmental review process through public notices and public hearings and meetings.

(1) All public notices required by this part shall describe the nature, location, and extent of the proposed action and indicate the availability and location of additional information. They shall be published in newspaper(s) of general circulation within the proposed action's area of environmental impact and the county(s) in which the proposed action will take place or such other places as RUS determines.

(2) The number of editions in which the notices should be published will be specified in the Bulletins referenced in §1794.7 or established on a project-by-project basis. Alternative forms of notice may also be necessary to ensure that residents located in the area affected by the proposed action are notified. The applicant should not publish notices for compliance with this part until so notified by RUS.

(3) A copy of all comments received by the applicant concerning environmental aspects of the proposed action shall be provided to RUS in a timely manner. RUS and applicants shall assess and consider public comments both individually and collectively. Responses to public comments will be appended to the applicable environmental document.

(4) RUS and applicants shall make available to the public those project-related environmental documents that RUS determines will enhance public participation in the environmental process. These materials shall be placed in locations convenient for the public as determined by RUS in consultation with applicants. Included with the documentation shall be a list of other project-related information that shall be available for inspection through a designated RUS or applicant contact person.

(5) Public hearings or meetings shall be held at reasonable times and locations concerning environmental aspects of a proposed action in all cases where, in the opinion of RUS, the need for hearings or meetings is indicated in order to develop adequate information on the environmental implications of the proposed action. Public hearings or meetings conducted by RUS will be coordinated to the extent practicable with other meetings, hearings, and environmental reviews which may be held or required by other Federal, state and
local agencies. Applicants shall, as necessary, participate in all RUS conducted public hearings or meeting.

(6) Scoping procedures, in accordance with 40 CFR 1501.7, are required for proposed actions normally requiring an EA with scoping (§1794.24) or an EIS (§1794.25). RUS may require scoping procedures to be followed for other proposed actions where appropriate to achieve the purposes of NEPA.

(b) The applicant shall have public notices described in this section published in a newspaper(s). Applicants shall obtain proof of publication from the newspaper(s) for inclusion into the applicable environmental document. Where the proposed action requires an EIS RUS shall, in addition to applicant published notices, publish notice in the FEDERAL REGISTER. In all cases, RUS may publish notices in the FEDERAL REGISTER as appropriate.

§ 1794.15 Limitations on actions during the NEPA process.

(a) General. Until RUS concludes its environmental review process, the applicant shall take no action concerning the proposed action which would have an adverse environmental impact or limit the choice of reasonable alternatives being considered in the environmental review process (40 CFR 1506.1). The RUS environmental review process is concluded when:

(1) A categorical exclusion determination has been made for proposals listed under §§1794.21 and 1794.22.

(2) Applicant notices announcing the RUS FONSI determination have been published for proposals listed under §§1794.23 and 1794.24.

(3) Applicant notices announcing the RUS Record of Decision have been published for proposals listed under §1794.25.

(b) Electric program. In determining which applicant activities related to a proposed action can proceed prior to completion of the environmental review process, RUS must determine, among other matters that:

(1) The activity shall not have an adverse environmental impact and shall not preclude the search for other alternatives. For example, purchase of water rights, optioning or transfer of land title, or continued use of land as historically employed will not have an adverse environmental impact. However, site preparation or construction at or near the proposed site (e.g. rail spur) or development of a related facility (e.g. opening a captive mine) normally will have an adverse environmental impact.

(2) Expenditures are minimal. To be minimal, the expenditure must not exceed the amount of loss which the applicant could absorb without jeopardizing the Government’s security interest in the event the proposed action is not approved by the Administrator, and must not compromise the objectivity of RUS environmental review. Notwithstanding other considerations, expenditures equivalent to up to 10 percent of the proposed action’s cost normally will not compromise RUS objectivity. Expenditures for the purpose of producing documentation required for
§ 1794.16 Tiering.

It is the policy of RUS to prepare programmatic level analysis in order to tier an EIS and an EA where:

(a) It is practicable, and

(b) There will be a reduction of delay and paperwork, or where better decision making will be fostered (40 CFR 1502.20).

§ 1794.17 Mitigation.

(a) General. In addition to complying with the requirements of 40 CFR 1502.14(f), it is RUS policy that a discussion of mitigative measures essential to render the impacts of the proposed action not significant will be included in or referenced in the Finding of No Significant Impact (FONSI) and the Record of Decision (ROD).

(b) Water and waste program. (1) Mitigation measures which involve protective measures for environmental resources cited in this part or restrictions or limitations on real property located in the service areas of the proposed action shall be negotiated with applicants and any relevant regulatory agency so as to be enforceable. All mitigation measures incorporating land use issues shall recognize the rights and responsibilities of landholders in making private land use decisions and recognize the responsibility of governments in influencing how land may be used to meet public needs.

(2) Mitigation measures shall be included in the letter of conditions.

(3) RUS has the responsibility for the post approval construction or security inspections or monitoring to ensure that all mitigation measures included in the environmental documents have been implemented as specified in the letter of conditions.

§ 1794.20 Control.

Electric and telecommunications programs. For environmental review purposes, RUS has identified and established categories of proposed actions (§§ 1794.21 through 1794.25). An applicant may propose to participate with other parties in the ownership of a project where the applicant(s) does not have sufficient control to alter the development of the project. In such a case, RUS shall determine whether the applicant participants have sufficient control and responsibility to alter the development of the proposed project prior to determining its classification. Where the applicant proposes to participate with other parties in the ownership of a proposed project and all applicants cumulatively own:

(a) Five percent or less of a project is not considered a Federal action subject to this part;

(b) Thirty-three and one-third percent or more of a project shall be treated in its usual category;

(c) More than five percent but less than 33 1/3 percent of a project, RUS shall determine whether the applicant participants have sufficient control and responsibility to alter the development of the proposal such that RUS's action will be considered a Federal action subject to this part. Consideration shall be given to such factors as:

(1) Whether construction would be completed regardless of RUS financial assistance or approval;

(2) The stage of planning and construction;

(3) Total participation of the applicant;

(4) Participation percentage of each utility; and

(5) Managerial arrangements and contractual provisions.

§ 1794.21 Categorically excluded proposals without an ER.

(a) General. Certain types of actions taken by RUS do not normally require an ER. Proposed actions within this classification are:
§ 1794.21

(1) The issuance of bulletins and information publications that do not concern environmental matters or substantial facility design, construction, or maintenance practices;

(2) Procurement activities related to the operation of RUS;

(3) Personnel and administrative actions; and

(4) Repairs made because of an emergency situation to return to service damaged facilities of an applicant’s system.

(b) Electric and telecommunications programs. Applications for financial assistance for the types of proposed actions listed in this paragraph (b) normally do not require the submission of an ER. These types of actions are subject to the requirements of §1794.31. Applicants shall sufficiently identify all proposed actions so their proper classification can be determined. Detailed descriptions shall be provided for each proposal noted in this section. RUS normally requires additional information in addition to a description of what is being proposed, to ensure that proposals are properly classified. In order to provide for extraordinary circumstances, RUS may require development of an ER for proposals listed in this section. Proposed actions within this classification are:

(1) Purchase of land where use shall remain unchanged, or the purchase of existing water rights where no associated construction is involved;

(2) Additional or substitute financial assistance for proposed actions which have previously received environmental review and approval from RUS, provided the scope of the proposal and environmental considerations have not changed;

(3) Rehabilitation or reconstruction of transportation facilities within existing rights-of-way (ROW) or generating facility sites. A description of the rehabilitation or reconstruction shall be provided to RUS;

(4) Changes or additions to microwave sites, substations, switching stations, telecommunications switching or multiplexing centers, buildings, or small structures requiring new physical disturbance or fencing of less than one acre (0.4 hectares). A description of the additions or changes and the area to be impacted by the expansion shall be provided to RUS;

(5) Internal modifications or equipment additions (e.g., computer facilities, relocating interior walls) to structures or buildings;

(6) Internal or minor external changes to electric generating or fuel processing facilities and related support structures where there is negligible impact on the outside environment. A description of the changes shall be provided to RUS;

(7) Ordinary maintenance or replacement of equipment or small structures (e.g., line support structures, line transformers, microwave facilities, telecommunications remote switching and multiplexing sites);

(8) The construction of telecommunications facilities within the fenced area of an existing substation, switching station, or within the boundaries of an existing electric generating facility site. A description of the facilities to be constructed shall be provided to RUS;

(9) SCADA and energy management systems involving no new external construction;

(10) Testing or monitoring work (e.g., soil or rock core sampling, monitoring wells, air monitoring);

(11) Studies and engineering undertaken to define proposed actions or alternatives sufficiently so that environmental effects can be assessed;

(12) Construction of electric power lines within the fenced area of an existing substation, switching station, or within the boundaries of an electric generating facility site;

(13) Contracts for certain items of equipment which are part of a proposed action for which RUS is preparing an EA or EIS, and which meet the limitations on actions during the NEPA process as established in 40 CFR 1506.1(d) and contained in §1794.15(b)(2);

(14) Rebuilding of power lines or telecommunications cables where road or highway reconstruction requires the applicant to relocate the lines either within or adjacent to the new road or highway easement or right-of-way. A description of the facilities to be constructed shall be provided to RUS;
(15) Phase or voltage conversions, reconductoring or upgrading of existing electric distribution lines, or telecommunications facilities. A description of the facilities to be constructed shall be provided to RUS;

(16) Construction of new power lines, substations, or telecommunications facilities on industrial or commercial sites, where the applicant has no control over the location of the new facilities. Related off-site facilities would be treated in their normal category. A description of the facilities to be constructed shall be provided to RUS;

(17) Participation by an applicant(s) in any proposed action where total applicant financial participation will be five percent or less;

(18) Construction of a battery energy storage system at an existing generating station or substation site. A description of the facilities to be constructed shall be provided to RUS;

(19) Additional bulk commodity storage (e.g., coal, fuel oil, limestone) within existing generating station boundaries. A certification attesting to the current state of compliance of the existing facilities and a description of the facilities to be added shall be provided to RUS;

(20) Proposals designed to reduce the amount of pollutants released into the environment (e.g., precipitators, baghouse or scrubber installations, and coal washing equipment) which will have no other environmental impact outside the existing facility site. A description of the facilities to be constructed shall be provided to RUS;

(21) Construction of standby diesel electric generators (one megawatt or less total capacity) and associated facilities, for the primary purpose of providing emergency power, at an existing applicant headquarters or district office, telecommunications switching or multiplexing site, or at an industrial, commercial or agricultural facility served by the applicant. A description of the facilities to be constructed shall be provided to RUS;

(22) Construction of onsite facilities designed for the transfer of ash, scrubber wastes, and other byproducts from coal-fired electric generating stations for recycling or storage at an existing coal mine (surface or underground). A description of the facilities to be constructed shall be provided to RUS;

(23) Changes or additions to an existing water well system, including new water supply wells and associated pipelines within the boundaries of an existing well field or generating station site. A description of the changes or additions shall be provided; and

(24) Repowering or uprating of an existing unit(s) at a fossil-fueled generating station in order to improve the efficiency or the energy output of the facility. Repowering or uprating that results in increased fuel consumption or the substitution of one fuel combustion technology with another is excluded from this classification.

(25) Electric generating facilities of less than 100 kilowatts at any one site for the purpose of providing service to customers or facilities such as stock tanks and irrigation pumps.

(26) New bulk commodity storage and associated handling facilities within existing fossil-fueled generating station boundaries for the purpose of cofiring bio-fuels and refuse derived fuels. A description of the facilities to be constructed shall be provided to RUS.

(c) Water and waste program. Applications for financial assistance for certain proposed actions do not normally require the submission of an ER. Applicants shall sufficiently identify all proposed actions so their proper classification can be determined. These types of actions are subject to the requirements of §1794.31. In order to provide for extraordinary circumstances, RUS may require development of an ER for proposals listed in this section. Proposed actions within this classification are:

(1) Management actions relating to invitation for bids, award of contracts, and the actual physical commencement of construction activities;

(2) Proposed actions that primarily involve the purchase and installation of office equipment or motorized vehicles;

(3) The award of financial assistance for technical assistance, planning purposes, environmental analysis, management studies, or feasibility studies; and
§ 1794.22 Categorically excluded proposals requiring an ER.

(a) Electric and telecommunications programs. Applications for financial assistance for the types of proposed actions listed in this section normally require the submission of an ER and are subject to the requirements of §1794.32. Proposed actions within this classification are:

(1) Construction of electric power lines and associated facilities designed for or capable of operation at a nominal voltage of either:
   (i) Less than 69 kilovolts (kV);
   (ii) Less than 230 kV if no more than 25 miles (40.2 kilometers) of line are involved; or
   (iii) 230 kV or greater involving no more than three miles (4.8 kilometers) of line.

(2) Construction of buried and aerial telecommunications lines, cables, and related facilities.

(3) Construction of microwave facilities, SCADA, and energy management systems involving no more than five acres (2 hectares) of physical disturbance at any single site.

(4) Construction of cooperative or company headquarters, maintenance facilities, or other buildings involving no more than 10 acres (4 hectares) of physical disturbance or fenced property.

(5) Changes to existing transmission lines that involve less than 20 percent pole replacement, or the complete rebuilding of existing distribution lines within the same ROW. Changes to existing transmission lines that require 20 percent or greater pole replacement will be considered the same as new construction.

(6) Changes or additions to existing substations, switching stations, telecommunications switching or multiplexing centers, or external changes to buildings or small structures requiring one acre (0.4 hectare) or more but no more than five acres (2 hectares) of new physically disturbed land or fenced property.

(7) Construction of substations, switching stations, or telecommunications switching or multiplexing centers requiring no more than five acres (2 hectares) of new physically disturbed land or fenced property.

(8) Construction of distributed generation totaling 10 MW or less at an existing utility, industrial, commercial or educational facility site. There is no capacity limit for a generating facility located at or adjacent to an existing landfill site that is powered by refuse derived fuel. All new associated facilities and related electric power lines shall be covered in the ER.

(9) Installation of new generating units or the replacement of existing generating units at a hydroelectric facility or dam which result in no change in the normal maximum surface area or normal maximum surface elevation of the existing impoundment. All new associated facilities and related electric power lines shall be covered in the ER.

(10) Construction of new water supply wells and associated pipelines not located within the boundaries of an existing well field or generating station site; and

(11) Purchase of existing facilities or a portion thereof where use or operation will remain unchanged. The results of a facility environmental audit can be substituted for the ER.

(12) Installing a heat recovery steam generator and steam turbine with a rating of 200 MW or less on an existing combustion turbine generation site for the purpose of combined cycle operation. All new associated facilities and related electric power lines shall be covered in the ER.

(b) Water and waste program. For certain proposed actions, applications for financial assistance normally require the submittal of an ER as part of the PER. These types of actions are subject to the requirements of §1794.32. Proposed actions within this classification are:
§ 1794.23 Proposals normally requiring an EA.

RUS will normally prepare an EA for all proposed actions which are neither categorical exclusions (§§1794.21 and 1794.22) nor normally requiring an EIS (§1794.25). For certain actions within this class, scoping and document procedures contained in §§1794.50 through 1794.54 shall be followed (see §1794.24).

The following are proposed actions which normally require an EA and shall be subject to the requirements of §§1794.40 through 1794.44.

(a) General. Issuance or modification of RUS regulations concerning environmental matters.

(b) Telecommunications and water and waste programs. An EA shall be prepared for announcements for financial assistance for all proposed actions not specifically defined as a CE or otherwise specifically categorized by the Administrator on a case-by-case basis.

(c) Electric program. Applications for financial assistance for certain proposed actions normally require the preparation of an EA. Proposed actions falling within this classification are:

(1) Rehabilitation of existing facilities, functional replacement or rehabilitation of equipment, or the construction of new ancillary facilities adjacent or appurtenant to existing facilities, including but not limited to, replacement of utilities such as water or sewer lines and appurtenances for existing users with modest or moderate growth potential, reconstruction of curbs and sidewalks, street repaving, and building modifications, renovations, and improvements;

(2) Facility improvements to meet current needs with a modest change in use, size, capacity, purpose or location from the original facility. The proposed action must be designed for predominantly residential use with other new or expanded users being small-scale, commercial enterprises having limited secondary impacts;

(3) Construction of new facilities that are designed to serve not more than 500 EDUs and with modest growth potential. The proposed action must be designed for predominantly residential use with other users being small-scale, commercial enterprises having limited secondary impacts;

(4) The extension, enlargement or construction of interceptors, collection, transmission or distribution lines within a one-mile (1.6-kilometer) limit from existing service areas estimated from any boundary listed as follows:

(i) The corporate limits of the community being served;

(ii) If there are developed areas immediately contiguous to the corporate limits of a community, the limits of these developed areas; or

(iii) If an unincorporated area is to be served, the limits of the developed areas;

(5) Installation of new water supply wells or water storage facilities that are required by a regulatory authority or standard engineering practice as a backup to existing production well(s) or as reserve for fire protection;

(6) Actions described in §1794.21(c)(4) which alter the purpose, operation, location, or design of the proposed action as originally approved, and such alteration is equivalent in magnitude or type as described in paragraphs (b)(1) through (b)(5) of this section; and

(7) The lease or disposal of real property by RUS, which may result in a change in use of the real property in the reasonably foreseeable future and such change, is equivalent in magnitude or type as described in paragraphs (b)(1) through (b)(5).

(c) Specialized criteria for not granting a CE for water and waste projects.

An EA must be prepared if a proposed action normally classified as a CE meets any of the following:

(1) Will either create a new or relocate an existing discharge to or a withdrawal from surface or ground waters;

(2) Will result in substantial increases in the volume or the loading of pollutants from an existing discharge to receiving waters;

(3) Will cause a substantial increase in the volume of withdrawal from surface or ground waters at an existing site; or

(4) Would provide capacity to serve more than 500 EDUs or a 30 percent increase in the existing population whichever is larger.

§ 1794.24 Proposals normally requiring an EA with scoping.

(a) General. Applications for financial assistance for certain proposed actions require the use of a scoping procedure in the development of the EA. These types of actions are subject to the requirements of §§1794.50 through 1794.54. RUS has the discretion to modify or waive the requirements listed in §1794.52 for a proposed action in this category.

(b) Electric program. Proposed actions falling within this classification are:

1. The construction of electric power lines and related facilities designed for and capable of operation at a nominal voltage of 69 kV or more but less than 230 kV where more than 25 miles (40 kilometers) of power line are involved;
2. The construction of substations or switching stations requiring greater than five acres (2 hectares) of new physical disturbance at a single site; and
3. Construction of facilities designed for the transfer and storage of ash, scrubber wastes, and other byproducts from coal-fired electric generating stations that will be located beyond the existing facility site boundaries.
4. Installing a heat recovery steam generator and steam turbine with a rating of more than 200 MW on an existing combustion turbine generation site for the purpose of combined cycle operation. All new associated facilities and related electric power lines shall be covered in the EA.
5. Construction of a natural gas pipeline to serve an existing gas-fueled generating facility.

Proposals normally requiring an EIS.

Applications for financial assistance for certain proposed actions that may significantly affect the quality of the human environment shall require the preparation of an EIS.

(a) Electric program. An EIS will normally be required in connection with proposed actions involving the following types of facilities:

1. New electric generating facilities of more than 50 MW (nameplate rating) other than fuel cell, combustion turbine, combined cycle, or diesel generators. All new associated facilities and related electric power lines shall be covered in the EIS; and

2. A new mining operation when the applicants have effective control (e.g., dedicated mine or purchase of a substantial portion of the mining equipment).

(b) Proposals listed above are subject to the requirements of §§1794.60, 1794.61, 1794.63, and 1794.64. Preparation of a supplemental draft or final EIS in accordance with 40 CFR 1502.9 shall be subject to the requirements of §§1794.62 and 1794.64.

(c) Telecommunications and water and waste programs. No groups or sets of proposed actions normally require the preparation of an EIS. The environmental review process, as described in this part, shall be used to identify those proposed actions for which the preparation of an EIS is necessary. If an EIS is required, RUS shall proceed directly to its preparation. Prior completion of an EA is not mandatory.

§ 1794.31 Classification.

(a) Electric and telecommunications programs. RUS will normally determine the proper environmental classification of projects based on its evaluation of the project description set forth in the construction work plan or loan design which the applicant is required to submit with its application for financial assistance. Each project must be sufficiently described to ensure its proper classification. RUS may require the applicant to provide additional information on a project where appropriate.

(b) Water and waste program. RUS will normally determine the proper environmental classification for projects based on its evaluation of the preliminary planning and design information.

§ 1794.32 Environmental report.

(a) For proposed actions listed in §1794.21(b) and (c), the applicant is normally not required to submit an ER.

(b) For proposed actions listed in §1794.22(a) and (b), the applicant shall normally submit an ER. Guidance in preparing the ER for Electric and Telecommunication proposals is contained in RUS Bulletin 1794A–600. Guidance in preparing the ER for Water and Waste proposals is contained in RUS Bulletin 1794A–602. The applicant may be required to publish public notices and provide evidence of such if the proposed action is located in, impacts, or converts important land resources.
§ 1794.33 Agency action.

RUS may act on an application for financial assistance upon determining, based on the review of documents as set forth in §1794.32 and such additional information as RUS deems necessary, that the project is categorically excluded.

§§ 1794.34–1794.39 [Reserved]

Subpart E—Procedure for Environmental Assessments

§ 1794.40 General.

This subpart applies to proposed actions described in §1794.23. Where appropriate to carry out the purposes of NEPA, RUS may impose, on a case-by-case basis, additional requirements associated with the preparation of an EA. If at any point in the preparation of an EA, RUS determines that the proposed action will have a significant effect on the quality of the human environment, the preparation of an EIS shall be required and the procedures in subpart G of this part shall be followed.

§ 1794.41 Document requirements.

Applicants will provide an ER in accordance with the appropriate guidance documents referenced in §1794.7. After RUS has evaluated the ER and has determined the ER adequately addresses all applicable environmental issues, the ER will normally serve as RUS' EA. However, RUS reserves the right to prepare its own EA from the information provided in the ER. RUS will take responsibility for the scope and content of an EA.

§ 1794.42 Notice of availability.

Prior to RUS making a finding in accordance with §1794.43 and upon RUS authorization and guidance, the applicant shall have a notice published which announces the availability of the EA and solicits public comments on the EA.

§ 1794.43 Agency finding.

If RUS finds, based on an EA that the proposed action will not have a significant effect on the quality of the human environment, RUS will prepare a FONSI. Upon authorization of RUS, the applicant shall have a notice published which informs the public of the RUS finding and the availability of the EA and FONSI. The notice shall be prepared and published in accordance with RUS guidance.

§ 1794.44 Timing of agency action.

RUS may take its final action on proposed actions requiring an EA (§1794.23) at any time after publication of applicant notices that a FONSI has been made and any required review period has expired. When substantive comments are received on the EA, RUS may provide an additional period (15 days) for public review following the publication of its FONSI determination. Final action shall not be taken until this review period has expired.

[68 FR 45159, Aug. 1, 2003]

§§ 1794.45–1794.49 [Reserved]

Subpart F—Procedure for Environmental Assessments With Scoping

§ 1794.50 Normal sequence.

For proposed actions covered by §1794.24 and other actions determined by the Administrator to require an EA with scoping, RUS and the applicant will follow the same procedures for scoping and the requirements for notices and documents as for proposed actions normally requiring an EIS through the point where project scoping has been completed. Following project scoping, RUS will make a judgment to have an EA prepared or contract for the preparation of an EIS.

[68 FR 45159, Aug. 1, 2003]

§ 1794.51 Preparation for scoping.

(a) As soon as practicable after RUS and the applicant have developed a schedule for the environmental review process, RUS shall have its notice of intent to prepare an EA or EIS and schedule scoping meetings (§1794.13) published in the FEDERAL REGISTER (see 40 CFR 1508.22). The applicant shall have published, in a timely manner, a notice similar to RUS' notice.
§ 1794.52 Scoping meetings.

(a) Both RUS and the applicant shall have a notice published which announces a public scoping meeting is to be conducted, either in conjunction with the notice of intent or as a separate notice.

(b) The RUS notice shall be published in the Federal Register at least 14 days prior to the meeting(s). The applicant’s notice shall be published in a newspaper at least 10 days prior to the meeting(s). Other forms of media may also be used by the applicant to notice the meetings.

(c) Where an environmental document is the subject of the hearing or meeting, that document will be made available to the public at least 10 days in advance of the meeting.

(d) The scoping meeting(s) will be held in the area of the proposed action at such place(s) as RUS determines will best afford an opportunity for public involvement. Any person or representative of an organization, or government body desiring to make a statement at the meeting may make such statement in writing or orally. The format of the meeting may be one of two styles. It can either be of the traditional style which features formal presentations followed by a comment period, or the open house style in which attendees are able to individually obtain information on topics or issues of interest within an established time period. The applicant or its consultant shall prepare a record of the scoping meeting. The record shall consist of a transcript when a traditional meeting format is used or a summary report when an open house format is used.

(e) As soon as practicable after the scoping meeting(s), RUS, as lead agency, shall determine the significant issues to be analyzed in depth and identify and eliminate from detailed study the issues which are not significant or which have been covered by prior environmental review. RUS will develop a proposed scope for further environmental study and review. RUS shall send a copy of this proposed scope to cooperating agencies and the applicant, and allow recipients 30 days to comment on the scope's adequacy and emphasis. After expiration of the 30-day period, RUS shall provide written guidance to the applicant concerning the scope of environmental study to be performed and information to be gathered.

§ 1794.53 Environmental report.

(a) After scoping procedures have been completed, RUS shall require the applicant to develop and submit an ER. The ER shall be prepared under the supervision and guidance of RUS staff and RUS shall evaluate and be responsible for the accuracy of all information contained therein.

(b) The applicant’s ER will normally serve as the RUS EA. After RUS has reviewed and found the ER to be satisfactory, the applicant shall provide RUS with a sufficient number of copies of the ER to satisfy the RUS distribution plan.

(c) The ER shall include a summary of the construction and operation monitoring and mitigation measures for the proposed action. These measures
may be revised as appropriate in response to comments and other information, and shall be incorporated by summary or reference into the FONSI.

[68 FR 45160, Aug. 1, 2003]

§ 1794.54 Agency determination.

Following the scoping process and the development of a satisfactory ER by the applicant or its consultant that will serve as the agency’s EA, RUS shall determine whether the proposed action is a major Federal action significantly affecting the quality of the human environment. If RUS determines the action is significant, RUS will continue with the procedures in subpart G of this part. If RUS determines the action is not significant, RUS will proceed in accordance with §§1794.42 through 1794.44. For proposals subject to the procedures of subpart F, RUS shall publish notices in the Federal Register that announce the availability of the EA and solicit public comments on the EA (refer to §1794.42) and the RUS finding and the availability of the EA and FONSI (refer to §1794.43).

[68 FR 45160, Aug. 1, 2003]

§§ 1794.55–1794.59 [Reserved]

Subpart G—Procedure for Environmental Impact Statements

§ 1794.60 Normal sequence.

For proposed actions requiring an EIS (see §1794.25), the NEPA process shall proceed in the same manner as for proposed actions requiring an EA with scoping through the point at which the scoping process is completed (see §1794.52).

§ 1794.61 Environmental impact statement.

An EIS shall be prepared in accordance with 40 CFR part 1502. Funding, in whole or in part, for an EIS can be obtained from any lawful source (e.g., cooperative agreements developed in accordance with Section 759A, Federal Agricultural Improvement and Reform Act of 1996, Pub. L. 104-127 and 31 U.S.C. 6301). A third-party consultant selected by RUS and funded by the applicant (7 CFR part 1789) may prepare the EIS.

(a) After a draft or final EIS has been prepared, RUS and the applicant shall concurrently have a notice of availability for the document published. The time period allowed for review will be a minimum of 45 days for a draft EIS and 30 days for a final EIS. This period is measured from the date that the U.S. Environmental Protection Agency (EPA) publishes a notice in the Federal Register in accordance with 40 CFR 1506.10.

(b) In addition to circulation required by 40 CFR 1502.19, the draft and final EIS (or summaries thereof, at RUS discretion) shall be circulated to the appropriate state, regional, and metropolitan clearinghouses.

(c) Where a final EIS does not require substantial changes from the draft EIS, RUS may document required changes through errata sheets, insertion pages, and revised sections to be incorporated into the draft EIS. In such cases, RUS shall circulate such changes together with comments on the draft EIS, responses to comments, and other appropriate information as its final EIS. RUS will not circulate the draft EIS again, although RUS will provide the draft EIS if requested within 30 days of publication of notice of availability of the final EIS.

§ 1794.62 Supplemental EIS.

(a) A supplement to a draft or final EIS shall be prepared, circulated, and given notice by RUS and the applicant in the same manner (exclusive of scoping) as a draft and final EIS (see §1794.61).

(b) Normally RUS and the applicant will have published notices of intent to prepare a supplement to a final EIS in those cases where a ROD has already been issued.

(c) RUS, at its discretion, may issue an information supplement to a final EIS where RUS determines that the purposes of NEPA are furthered by doing so even though such supplement is not required by 40 CFR 1502.9(c)(1). RUS and the applicant shall concurrently have a notice of availability published. The notice requirements

1181
§ 1794.63 Record of decision.
(a) Upon completion of the review period for a final EIS, RUS will have its ROD prepared in accordance with 40 CFR 1505.2.
(b) Separate RUS and applicant notices of availability shall be published concurrently. The notices shall summarize the RUS decision and announce the availability of the ROD. Copies of the ROD will be made available upon request from the point of contact identified in the notice.

§ 1794.64 Timing of agency action.
(a) RUS may take its final action or execute commitments on proposed actions requiring an EIS or Supplemental EIS at any time after the ROD has been published.
(b) For budgetary purposes some financial assistance may be approved conditionally with a stipulation that no funds shall be advanced until a ROD has been prepared.

§§ 1794.65–1794.69 [Reserved]

Subpart H—Adoption of Environmental Documents

§ 1794.70 General.
This subpart covers the adoption of environmental documents prepared by other Federal agencies. Where applicants participate in proposed actions for which an EA or EIS has been prepared by or for another Federal agency, RUS may adopt the existing EA or EIS in accordance with 40 CFR 1506.3.

§ 1794.71 Adoption of an EA.
RUS may adopt a Federal EA or EIS or a portion thereof as its EA. RUS shall make the EA available and assure that notice is provided in the same manner as if RUS had prepared the EA.

§ 1794.72 Adoption of an EIS.
(a) Where RUS determines that an existing Federal EIS requires additional information to meet the standards for an adequate statement for RUS proposed action, RUS may adopt all or a portion of the EIS as a part of its draft EIS. The circulation and notice provisions for a draft and final EIS (see §1794.61) apply.
(b) If RUS was not a cooperating agency but determines that another Federal agency’s EIS is adequate, RUS shall adopt that agency’s EIS as its final EIS. RUS and the applicant shall have separate notices published advising of RUS adoption of the EIS and independent determination of its adequacy.
(c) If the adopted EIS is generally available and meets RUS standards, RUS shall have a public notice published informing the public of its action and availability of the EIS to interested parties upon request. If the adopted EIS is not generally available, RUS shall have a public notice published informing the public of its action and will circulate copies of the EIS in accordance with 40 CFR 1502.19 and 40 CFR 1506.3.

§ 1794.73 Timing of agency action.
Where RUS has adopted another agency’s environmental documents, the timing of the action shall be subject to the same requirements as if RUS had prepared the required EA or EIS.

§ 1794.74 Incorporation of environmental materials.
RUS may incorporate into its environmental documents, environmental documents or portions thereof prepared by state, or local agencies or other parties for purposes other than compliance with the requirements of NEPA. RUS will circulate the incorporated documents as a part of its EA or draft and final EIS in the same manner as if prepared by RUS.

§§ 1794.75–1794.79 [Reserved]

1806.27 Acceptable policies and servicing.
1806.28 Borrowers required to escrow.

EXHIBIT A TO SUBPART B—COVERAGE AND PREMIUM RATES

EXHIBIT B TO SUBPART B—SERVICING COMPANY

Subpart A—Real Property Insurance

§ 1806.1 General.

(a) Authority. This subpart sets forth the policies and procedures regarding insurance requirements on real property which serves as security for a debt under the Multi-Family Housing Programs of the Rural Housing Service (RHS). Any references herein to the Farmers Home Administration (FmHA) or its employees are intended to mean FSA or RHS, as applicable, and their employees. This subpart is inapplicable to Farm Service Agency, Farm Loan Programs.

(b) Borrower to furnish insurance. The real estate mortgage executed by the borrower provides that he will furnish and continually maintain and pay for insurance on buildings situated or constructed on the property with companies, in amounts, and on terms and conditions satisfactory to the FmHA or its successor agency under Public Law 103–354 until the loan is repaid.

(c) Borrower’s selection of company. The borrower may select the insurance company provided that the company and insurance policy comply with all the requirements set forth in this Instruction.

(d) Responsibility. The County Supervisor is responsible for taking all actions in connection with insurance as may be necessary to protect the security interest of the FmHA or its successor agency under Public Law 103–354. Any unusual situation that may arise with respect to obtaining or servicing insurance should be referred to the State Director. The State Director will refer any questions of a legal nature to the Office of the General Counsel (OGC).

(e) Use of Form FmHA or its successor agency under Public Law 103–354 426–1, “Valuations of Buildings.” The minimum insurance required will be indicated in the appraisal report by the employee who makes the appraisal of property that includes insurable buildings. In the case where no real estate appraisal is required or the appraisal report does not indicate the minimum insurance coverage, Form FmHA or its successor agency under Public Law 103–354 426–1 will be prepared by the County Supervisor. Reevaluation of the buildings will not be done on appraisal reports; however, when new buildings are constructed or values increase or decrease materially and revaluation is necessary to properly reflect the buildings’ security interest of the FmHA or its successor agency under Public Law 103–354, the County Supervisor will prepare or revise Form FmHA or its successor agency under Public Law 103–354 426–1 as appropriate. Changes made on
§ 1806.2 Companies and policies.

Property insurance policies or other evidence of insurance will be accepted from borrowers when the requirements outlined herein are complied with fully.

(a) Companies. It is desirable that companies be licensed to do business in the particular State or other jurisdiction where the property is located, or that they be otherwise authorized by law to transact business within such State or other jurisdiction (hereinafter called “State”). If the required insurance is not available locally at comparable rates from an insurance company licensed or otherwise authorized to do business in the State, insurance may be accepted from another company if (1) the OGC advises that policies issued by such company will not be rendered unenforceable by virtue of the company’s failure to be licensed or otherwise authorized to transact business in the State and that the company is a legal entity which may be sued in the State where the insured property is located, and (2) the State Director determines that the company is reputable and financially sound. In making the above determinations, the State Director will consider all relevant available information such as that which may be obtained from financial statements, Best’s Insurance Reports, State insurance authorities, and other lending institutions.

(b) Insurance policies—(1) Standard policies. If a standard fire insurance policy has been adopted for the State, it should be used unless State statutes exempt the company from the regulations requiring its use. The standard policy is one containing substantially the same standard provisions adopted or recommended by legislative action or by order of the supervisory insurance authorities of the State in which the security is located.

(2) Other policies. To be acceptable, any other insurance policies must conform to the requirements of this Instruction.

(i) “Homeowner’s” policies, “All Physical Loss” policies, “Broad Form” policies, and other such all-inclusive policies are acceptable if they otherwise meet the requirements of this Instruction.

(ii) A builder’s risk policy naming the borrower as the insured or a builder’s risk endorsement for a policy issued to the borrower may be accepted during the period a building is under construction if the policy otherwise meets the requirements of this Instruction. If such a policy or endorsement does not automatically convert to full coverage when the building is completed, acceptable insurance must be obtained simultaneously with the expiration of the builder’s risk provisions of the policy.

(iii) A builder’s risk insurance policy issued to a contractor only may not be substituted for the property insurance, the borrower is required to provide.

(iv) Borrowers eligible for insurance under the National Flood Insurance Act of 1968, as amended by the Flood Disaster Act of 1973, will be serviced in accordance with subpart B of this part.

(3) State instructions. If the State Director and the OGC consider it advisable, a State Instruction may be issued to help County Supervisors identify standard insurance policies adopted for the State. The Instruction should also furnish a guide to assist in identifying other acceptable insurance policy forms that are commonly used by insurance companies in the State, recognizing that such information is not all inclusive.

(4) Binders. Whenever there is a justifiable reason for not issuing a policy or endorsement, as required, a written binder will be acceptable for a period not to exceed 60 days from the effective date of the insurance. The written binder must have attached thereto the approved form of mortgage clause. Such a binder will be submitted to the County Supervisor in lieu of an insurance policy or endorsement and the insurance policy or endorsement will be submitted on or before the expiration date of the binder. The State Director,
with the advice of the OGC and subject to prior approval of the National Office, may issue a State Instruction authorizing such binders to be accepted for periods longer than 60 days.

(5) Submission of Policies. (i) For Farmer Program (FP) loans secured by a first lien, the original policy or declaration page must be delivered to the County Supervisor. The original policy or declaration page will be returned to the borrower after one year using Form FmHA or its successor agency under Public Law 103–354, “Notice of Expiration of Insurance.”

(ii) For Single Family Housing (SFH) loans secured by a first lien, the original policy or declaration page must be delivered to the closing agent.

(iii) In cases where an FP or SFH loan is secured by other than a first lien and the mortgage clauses include the names of the prior mortgagees, a certificate of insurance, copy of the policy, or other evidence of insurance is acceptable.

(iv) The County Supervisor will process an advance to pay for insurance only in strict compliance with provisions of §1806.6 of this subpart.

(6) Master sets. If the master sets meet all of the requirements of this Instruction they may be accepted in lieu of an original policy for each FmHA or its successor agency under Public Law 103–354 borrower.

(i) One complete master set of the different insurance forms for policies issued by the insurance company must be on file in each County Office where the company insures property of FmHA or its successor agency under Public Law 103–354 borrowers.

(ii) The “Declaration Page” furnished by the insurer, company for each borrower insured, in lieu of a complete policy, will be filed in the borrower’s case folder. When a “Declaration Page” in the form of a computer printout is used by an insurance company an endorsement on every policy issued by that company or a letter from that company will be obtained and attached to the printout. However, a letter signed by an authorized official of the company and addressed to the State Director may cover all policies issued by that company in the State. Any such endorsements or letters should clearly state that the company considers the printout to be an original “Declaration Page”. Such endorsements or letters are not necessary if the printout itself clearly states that it is an original “Declaration Page.”

(7) Name and location. The policy should contain names of all the borrowers who are owners of the property being insured, and it will be returned for correction if it does not do so. The location of the property should be so described in the policy that the property can easily be identified. The complete legal description of the property by metes and bounds is not required. Any deviation from the requirements of this paragraph must first be cleared with the National Office.

(8) Loss or damage covered. Buildings must be insured against loss or damage by fire, lightning, windstorm, hail, explosion, riot, civil commotion, aircraft, vehicles, and smoke.

(9) Effective date of insurance. If there are insurable buildings located on the property, the borrower will arrange with his agent or company to have adequate insurance in force at the time the loan, assumption, or credit sale is closed so that the policy will properly insuring the borrower and the mortgagees. When new buildings are erected or major improvements are made to existing buildings, such insurance will be made effective as of the date materials are delivered to the property. The County Supervisor will make no payments from loan funds for labor or materials until the borrower has furnished adequate insurance to protect the interest of the FmHA or its successor agency under Public Law 103–354 in the buildings being erected or improved.

(10) Term. The borrower will be required to furnish insurance for a term of at least one year with evidence that a full year’s premium is paid. The term “premium” as used herein includes any assessments which may be charged to the borrower. If the assessments are of the type imposed only after a loss occurs involving property insured by the insurance company, then the borrower must present evidence (such as a letter from the company) that he currently does not owe any such assessments. The borrower may receive a discount for insuring for a longer period such as
three years or five years and with an annual premium. If the insurance contains an automatic renewal clause, its provision should be substantially the following to be acceptable to FmHA or its successor agency under Public Law 103-354:

This policy will be automatically extended for successive terms at expiration of the original term and of each extension thereof, upon payment of renewal premiums. It is a condition of this policy that if the policy expires or is canceled for nonpayment of premium, or for any other reason, the mortgagor will be given 10 days notice.

(11) Mortgage clause. The standard mortgage clause adopted by the State must be attached to or printed in the policy, or Form FmHA or its successor agency under Public Law 103-354 426-2, “Property Insurance Mortgage Clause (Without Contribution),” must be attached to or the provisions thereof printed in the policy. A letter signed by an authorized official of an insurance company to the State Director, stating that all insurance policies the company issues in the State and in which the FmHA or its successor agency under Public Law 103-354 has a mortgage interest incorporates all of the provisions of Form FmHA or its successor agency under Public Law 103-354 426-2 may be accepted in lieu of attaching Form FmHA or its successor agency under Public Law 103-354 426-2 to each policy. If such a blanket letter is used, the FmHA or its successor agency under Public Law 103-354 will be named in the loss payable clause and a State Instruction will be issued, after prior approval is obtained from the National Office, authorizing the use of such method.

(i) If the use of a mortgage clause, other than the standard mortgage clause (without contribution), has been made mandatory by State laws or insurance regulations, a State Instruction will be issued, after prior approval is obtained from the National Office, authorizing the use of such a form.

(ii) When an approved mortgage clause is printed in the policy a “Loss Payable Clause” is acceptable provided the FmHA or its successor agency under Public Law 103-354, as mortgagor, would receive payment in case of loss even though the company would not be liable to the borrower. A “Loss Payable Clause” which contains the statement that the mortgagor is “subject to all terms and conditions of the policy” is not acceptable.

(iii) Whenever a new mortgage clause including the interest of the FmHA or its successor agency under Public Law 103-354 is issued after the policy has been in force, the new mortgage clause must be signed by an authorized agent or officer of the company that issued the policy. Form FmHA or its successor agency under Public Law 103-354 426-6, “Transmittal of Property Insurance Mortgage Clause,” may be used to transmit the mortgage clause to the insurance official.

(iv) The FmHA or its successor agency under Public Law 103-354 and all other mortgagees whose interests are insured by the policy will be shown either in the mortgage clause or in the “Declaration Page” in the order of priority of their mortgages.

(A) “United States of America (Farmers Home Administration or its successor agency under Public Law 103-354)” will be named in the mortgage clause for direct and insured loan mortgages naming FmHA or its successor agency under Public Law 103-354 as mortgagor, whether in its own right or as trustee under a 2(f) or other agreement with a State Rural Rehabilitation Corporation.

(B) “United States of America (Farmers Home Administration or its successor agency under Public Law 103-354), as first mortgagee or as statutory agent and insurer of such mortgagee,” will be named in the mortgage clause for insured FO mortgages naming the lender as mortgagor, whether the mortgage is held by the original or a subsequent lender or by the insurance fund or by FmHA or its successor agency under Public Law 103-354 under a trust agreement or declaration of trust.

(C) If the designation is not identical to that set forth in paragraphs (b)(11)(iv)(A) or (B) of this section, whichever is applicable, it will be sufficient if the mortgagor is readily identifiable as the Farmers Home Administration or its successor agency under Public Law 103-354.
(c) Evidence of premium payment. (1) When Form FmHA or its successor agency under Public Law 103–354 426–2 is attached to or the provisions thereof are printed in the policy, or a blanket letter from an insurance company incorporating the provisions of Form FmHA or its successor agency under Public Law 103–354 426–2 in all policies in which the FmHA or its successor agency under Public Law 103–354 has a mortgagee interest in effect, in accordance with paragraph (b)(11) of this section, no evidence of premium or assessment payment is required except for the first year of the loan. When a subsequent FP or section 502 RH loan is made to build, buy or rehabilitate essential buildings an endorsement to the existing policy including coverage for the property improved will be sufficient.

(2) [Reserved]

(d) Policy restrictions. (1) Any insurance on essential buildings as defined in §1806.3 having restrictions which limit the amount of collectable insurance must meet the FmHA or its successor agency under Public Law 103–354 requirements set forth below (except for the clause described in paragraph (d)(1)(iv) of this section which is never acceptable); otherwise, such restrictions must be eliminated or modified to afford the required protection.

(i) Coinsurance clause. This clause generally provides that in consideration of a reduced rate, the borrower agrees to maintain insurance on his buildings up to a specified percentage (usually 80 percent) of their value and that the company will not be liable for a greater proportion of any partial loss than the amount of insurance bears to the specified percentage of either the undepreciated replacement value or the depreciated replacement value (actual cash value). For example, an 80 percent coinsurance clause can be accepted only where the amount of insurance on each insured building is at least equal to 80 percent of the appropriate replacement value of the insured building.

(ii) Three-fourths' value clause. This clause provides that the liability of the company shall be limited to three-fourths of the depreciated replacement value of the buildings covered at the time of the loss, not to exceed the amount of insurance. This clause may be accepted if the unpaid balance of the loan is not greater than three-fourths of the depreciated replacement value of the building and the amount of insurance is at least equal to the unpaid balance of the loan and any prior liens and no building is insured for more than three-fourths of its depreciated replacement value.

(iii) Loss deductible clause. (A) For all loans other than RRH, RCH, and LH organizations this clause generally provides that loss to each building to the extent of the limitation is not recoverable. The company is liable only for loss to each building in excess of such limitation stated in the clause. This clause may be accepted where the limitation does not exceed $150, or one percent of the insurance coverage whichever is greater. In no case, however, may the limitation on any one building exceed $500.00.

(B) For RRH, RCH, and LH organization loans this clause generally provides that loss to each project to the extent of the limitation is not recoverable. The company is liable only for loss to each project in excess of such limitation stated in the clause. This clause may be accepted where the limitation does not exceed $500.00.

(1) Option 1—Up to one-fourth of one percent (0.0025) of the insurable value. Maximum deductible $5,000.
§ 1806.2 7 CFR Ch. XVIII (1–1–08 Edition)

(2) Option 2—Up to a maximum deductible of $500 on any project with an insurable value not exceeding $200,000.

(3) Option 3—Option 1 may be chosen and increased above the maximum deductible by an amount equivalent to funds specifically escrowed in the project replacement reserve account as an offset to the increased deductible.

(4) Option 4—Option 2 may be chosen and increased above the maximum deductible by an amount equivalent to funds specifically escrowed in the project replacement reserve account as an offset to the increased deductible.

(5) The funds used to increase the deductible in Option 3 or Option 4 may be from project funds if it does not create an unsecure financial situation for the project. Also, non-project funds may be used for Option 3 or 4 and then repaid by withdrawal from the project at the rate of 75 percent of the annual insurance premium savings earned by the amount of escrow deposit, up to the amount deposited.

(6) The funds escrowed to increase the authorized deductible will be placed in the project reserve account as an increased amount in and above the amount required by the Loan Agreement/Resolution and so annotated in the borrower’s accounting system.

(iv) Three-fourths’ loss clause. This clause provides that the company will not pay more than three-fourths of any loss, nor more than three-fourths of the amount of insurance in force. This clause is never acceptable and must be eliminated.

(v) Deferred loss payable clause. This clause provides that, if the amount payable under the policy for any loss to any building insured shall be in excess of a specified portion, (usually 60 percent) of the amount of insurance on such building, the company will withhold from its initial loss payment any sum in excess of the specified portion of the amount of insurance on such building. If the building sustaining such loss is repaired or replaced within six months from the date of the fire and at or within 300 feet of the original location, as described in the policy, the company upon receipt of evidence to that effect from the insured will pay the full balance withheld from the initial payment, provided the amount expended in repairing or replacing the building damaged or destroyed will equal or exceed the amount of loss as determined under the terms of the policy. Failure to repair or replace any insured building within the time and manner provided will constitute acceptance of the initial payment as full and final settlement under the policy with respect to the loss. This clause may be accepted if the amount of insurance is for the full depreciated replacement value (actual cash value) of the building and the unpaid balance of the loan and any prior lien(s) is not greater than the initial loss payment made by the company.

(vi) Construction specifications and use conditions. If the insurance policy contains clauses which specify certain standards of construction or prescribes certain uses of the property for the insurance to be valid, the policy is acceptable only if the property meets such specifications or conditions at the time of acceptance. For example, if the policy provides that the chimney be constructed of a certain type of material, the County Supervisor should be assured that the required material has been used, or if the policy provides that farming operations are not carried out on the premises he should be assured that this condition is met.

(2) Policies generally will not be accepted if, under the terms of the policies or local laws, contributions or assessments may be made against the FmHA or its successor agency under Public Law 103–354. However, policies which impose assessments on the borrower may be accepted only if the FmHA or its successor agency under Public Law 103–354 mortgage will be recorded prior to any failure of the borrower to pay any such assessments. Policies also will not be accepted if, by their terms or other conditions, loss payments are contingent upon collective action by the Board of Directors, or the stockholders, or the members.

(e) Buildings on leaseholds. The policy will indicate that the insured is the lessee or tenant and not the owner of the buildings securing the FmHA or its successor agency under Public Law 103–354 loan; or, if he is the owner of the building on the leased land, the policy will indicate that the insured is the
§ 1806.3 Coverage requirements.

The County Supervisor should encourage the borrower for his own protection to insure for their depreciated replacement value (actual cash value) all essential buildings. Essential buildings include the dwelling and any other buildings that are necessary for the operation of the property or that provide income to assure orderly repayment of the loan. If insurance is for less than the depreciated replacement value of all essential buildings, the County Supervisor will see that the coverage is obtained on one or more of the most essential buildings. The minimum amount of coverage will be furnished as prescribed below:

(a) Loans secured by a first lien. (1) When the unpaid balance of the FmHA or its successor agency under Public Law 103–354 loan secured by a first lien is equal to or greater than the depreciated replacement value of the essential buildings, or the cost of adequate essential buildings which can be constructed for amounts less than the depreciated replacement value of the existing buildings to be insured. The minimum insurance required on an essential building valued at $6,600 would be $7,000, and that required on an essential building valued at $6,400 would be $6,000.

(2) When the unpaid balance of the loan is less than the sum of the depreciated replacement value of the essential buildings to be insured, the total amount of insurance must be at least equal to the lesser of (i) the unpaid balance of the loan, or (ii) the cost of adequate essential buildings which can be constructed for amounts less than the depreciated replacement value of the existing buildings to be insured.

(3) When, by the use of loan funds or otherwise, buildings are erected or substantial improvements are made to essential buildings, the amount of insurance will be adjusted in accordance with paragraphs (a)(1) or (2) of this section, whichever is applicable.

(b) Loans secured by other than first liens. The amount of insurance on buildings in the case of FmHA or its successor agency under Public Law 103–354 loans secured by other than a first lien will be the same as required in paragraph (a) of this section, with the understanding that the unpaid balance of the loan will be deemed for this purpose to be the amount of the total real estate mortgage indebtedness owed all prior mortgagees named in the mortgage clause, plus the debt to the FmHA or its successor agency under Public Law 103–354 which is secured by real estate mortgage.

(c) Exception of buildings from insurance. (1) Insurance will not be required on a building:

(i) That is not essential.

(ii) In such a state of disrepair that the cost of insurance would be prohibitive.

(iii) Which has a depreciated replacement value of $2,500 or less.

(iv) Which is being or has been repaired with a section 504 loan of $7,500 or less. Families receiving section 504 loans should be encouraged but not required to carry insurance on their home.

(v) On LH security property which was not built or repaired with FmHA or its successor agency under Public Law 103–354 loan funds provided that the State Director determines that the
§ 1806.4 Examining and general servicing of insurance.

(a) Examination by county office of policies, endorsements, binders, and other evidence of insurance. Upon receipt in the County Office of a policy, endorsement, binder, or other evidence of insurance, submitted by a borrower, it will be examined promptly for compliance with the requirements of this Instruction. If the evidence of insurance is found to be acceptable, it will be placed in the borrower’s case folder.

(1) Unacceptable policies. (i) When the borrower furnishes any policy or other evidence of insurance which does not meet the requirements of this Instruction such policy or other evidence of insurance will be returned to the borrower with the reasons why it is not acceptable.

(ii) If the borrower does not furnish acceptable insurance by the date the previous policy expired or was canceled, the County Supervisor will proceed as provided in §1806.6.

(2) Expiration Records and Notices. (i) In cases other than those involving FP or section 502 RH borrowers, the County Supervisor will notify the borrower of the expiration of his insurance at least 30 days in advance of such expiration unless he has received written evidence that the insurance has been renewed. FP and Section 502 RH borrowers will be informed during the tenth month after the date of loan closing of their responsibility to carry insurance. Form FmHA or its successor agency under Public Law 103–354 426–4 will be sent to these borrowers, regardless of whether there is evidence that the insurance has been renewed. Thereafter, the County Supervisor will not be required to further determine whether the borrower has adequately maintained insurance; however, if a further notice of expiration is received in the County Office, the County Supervisor will again notify the borrower by using Form FmHA or its successor agency under Public Law 103–354 426–4 of his responsibility.

(3) Release of mortgage interest. When the borrower’s loan has been paid in full and the satisfaction or release of the mortgage has been executed, the County Supervisor or his delegate will execute the following Release of Mortgage Interest on the mortgage clause attached to the policy or other evidence of insurance and transmit it with
the policy or other evidence of insurance, the paid-in-full note, and the satisfaction to the borrower:

It is understood and agreed that the interest of the United States of America in the property insured hereunder ceased as of (Date of Final Payment), and that the Government shall have no interest in any loss or damage to such property occurring thereafter.

(4) Lost or misplaced policies. When an unexpired insurance policy or other evidence of insurance is lost or misplaced, it will be necessary to obtain a replacement policy or other evidence of insurance. The County Supervisor is authorized to sign a Lost Policy Receipt on behalf of the FmHA or its successor agency under Public Law 103–354. For FP and section 502 RH loans, this paragraph applies only during the period the policy is retained in the County Office.

(5) Disposition of expired and canceled policies. An expired or canceled policy or other evidence of insurance will be returned to the borrower, unless there is a loss settlement pending.

(b) Special servicing of insurance—(1) Vacancy or unoccupancy—tenant occupancy—increased hazard. If the County Supervisor has knowledge that insured property is vacant or unoccupied or that the ownership or occupancy has changed from owner to tenant, or that the hazards otherwise are increased, he will examine the policy to determine whether the policy permits such conditions. Unless the insurance permits such conditions, the County Supervisor will immediately notify the company or agent in writing. In any case where there is an additional premium due because of vacancy, unoccupancy, tenant occupancy, or other increased hazard, and upon demand to FmHA or its successor agency under Public Law 103–354 from the company or agent because the borrower cannot, or will not, pay the additional premium, it may be paid in accordance with FmHA or its successor agency under Public Law 103–354 Instruction 2024–A, to the company or agent. For FP and section 502 RH borrowers, property insurance will not be obtained except in cases where an unusual and severe hazard exists and insurance is necessary to protect the interests of the Government.

(2) Transfer of property. (i) When a borrower or transferee requests the consent of FmHA or its successor agency under Public Law 103–354 to a transfer of the security property which already has been made, or when the County Supervisor learns that any such transfer has been made, he will immediately inform the transferee that the mortgage requires the owner to provide and maintain adequate insurance acceptable to, and with loss payable to, FmHA or its successor agency under Public Law 103–354 as mortgagee. The transferee may obtain a new insurance policy or the transferor may have the insurance company or agent issue an endorsement to the current insurance policy changing the name of the assured to that of the transferee. If a new insurance policy is obtained, the old policy or other evidence of insurance will be returned to the transferor unless there is an unsettled loss. If there is an unsettled loss, the policy or other evidence of insurance will not be returned until the claim has been settled. The County Supervisor, with the concurrence of the State Director and the OGC, will notify the borrower and transferee that acceptance of the new policy or endorsement will not constitute consent by the Government to the transfer even though the Government is protected by a loss payable clause in such an insurance policy.

(ii) In a transfer with assumption, insurance will be required in the same amount and according to the same provisions as for an initial loan of the same type.

(3) Voluntary conveyance of property to the Government and foreclosure. Insurance will not be carried on buildings which the Government has acquired. After a foreclosure sale has been held, or after a deed of conveyance to the Government in lieu of foreclosure has been filed for record, insurance will not be maintained by the Government (whether or not subject to redemption).

§ 1806.5 Losses.

(a) Protecting property. It is the responsibility of the borrower to immediately notify the County Supervisor and insurance company or agent of any loss or damage to insured property and collect the amount of the loss. When the County Supervisor learns of a loss to property which secures an FmHA or its successor agency under Public Law 103–354 loan, he will:

(1) Check the borrower’s casefile for an insurance policy or other evidence of insurance. When a policy or other evidence of insurance has not been retained by the FmHA or its successor agency under Public Law 103–354, such as for FP and section 502 RH borrowers, the County Supervisor will determine whether the property was insured and whether FmHA or its successor agency under Public Law 103–354 was named as mortgagee in the insurance policy.

(2) Determine that the borrower has taken such steps as are necessary to protect the interest of the FmHA or its successor agency under Public Law 103–354 in the security property against further damage. When serious problems arise with respect to protecting the property from further damage, the borrower cannot or will not arrange adequate protection for the property, or when legal action appears to be necessary, the County Supervisor will arrange for emergency protection and immediately refer the case with complete information to the State Director.

(b) Loss covered by insurance. (1) If the FmHA or its successor agency under Public Law 103–354 is listed as mortgagee in the insurance policy, the County Supervisor will collect the amount of the loss and may consent to the borrower using funds to repair or replace damaged or destroyed property or to apply loss proceeds to his loan account or to any prior liens that might exist in the order of their priority.

(2) If the FmHA or its successor agency under Public Law 103–354 is not listed as mortgagee in the insurance policy, the County Supervisor will contact the borrower to determine whether he has received the loss proceeds. If the borrower has received the loss proceeds but not yet paid for improvements to repair or replace the property, or has not received the loss proceeds the County Supervisor will:

(i) Notify the insurance company in writing of the FmHA or its successor agency under Public Law 103–354’s interest in the security property and request that the loss proceeds be made payable jointly to the FmHA or its successor agency under Public Law 103–354 and the borrower.

(ii) Inform the borrower of his responsibility for repairing or replacing the damaged or destroyed property or for authorized disposition of the loss proceeds as outlined in paragraph (b)(1) of this section.

(c) Loss drafts—when loan is secured by a first mortgage. (1) A loss draft which in the opinion of the County Supervisor represents a satisfactory adjustment of the loss will be endorsed immediately without recourse and deposited in a supervised bank account to be used in repairing or replacing the damaged building, except:

(i) Where the amount of the loss is $1,000 or less and the borrower will use the funds for repairing or replacing an essential building, the loss draft may be endorsed without recourse and given to the borrower upon satisfactory proof that the repairs or replacements have been made, or upon satisfactory assurance that the work will be performed.

(ii) When (A) the essential buildings are not to be repaired or replaced and other suitable buildings are not to be erected, or (B) a balance remains after all repairs, replacements, and other authorized disbursements have been made, such insurance funds will be applied on prior liens or as an extra payment to the borrower’s loan accounts secured by the real estate or disposed of in accordance with the general principles applicable to the use of proceeds from the sale of a part of the security contained in applicable security servicing regulations for the type loan involved.

(iii) An insurance payment for loss or damage to a nonessential building the borrower voluntarily insured will be (A) applied on prior liens, or to current delinquencies to FmHA or its successor agency under Public Law 103–354 or as an extra payment on the borrower’s loan accounts secured by real estate, (B) disposed of as authorized by the
RHS, RBS, RUS, FSA, USDA § 1806.5

State Director in accordance with the general principles applicable to the use of proceeds from the sale of a part of the security contained in applicable security servicing regulations for the type loan involved, or (C) used for other purposes as authorized by the State Director if the loan is adequately secured and the loan account is current.

(iv) When the indebtedness secured by the insured property has been paid in full or the draft is in payment for loss of property on which the FmHA or its successor agency under Public Law 103-354 has no claim, a loss draft which includes the FmHA or its successor agency under Public Law 103-354 as a joint payee may be endorsed without recourse and delivered to the borrower.

(d) Loss drafts—When loan is secured by other than first mortgage. (1) When the loss draft does not include the interest of a prior mortgagee, it will be processed as provided in paragraph (c) of this section.

(2) When the loss draft includes the interest of a prior mortgagee, the County Supervisor is authorized to endorse and process the draft as follows:

(i) When the prior mortgagee will permit the use of such loss funds to repair or replace the damaged building, the draft may be endorsed without recourse upon satisfactory proof that the repairs or replacements have been made or upon satisfactory assurance that the work will be performed.

(ii) When the amount of the draft does not exceed the amount of the indebtedness then secured by the prior mortgage as stated in writing by the holder of the prior mortgage, and the holder of the prior mortgage has agreed in a written instrument to the County Supervisor that he will apply such funds as a payment on the borrower’s prior mortgage indebtedness, the draft may be endorsed without recourse.

(iii) When the amount of the draft exceeds the amount of the indebtedness then secured by the prior mortgage, as stated in writing by the holder, and he has agreed in writing to pay such indebtedness from the loss funds, the draft will be endorsed without recourse only after all parties named as payees in the draft have signed an agreement to deliver the draft “in escrow” to a bank acceptable to the named parties. The agreement will specify the manner in which the funds will be disbursed by the bank, as escrow agent, to the several mortgagees named in the draft. After the loss funds have been collected by the bank, it will issue cashier’s checks in the manner prescribed in the escrow agreement (see exhibit A for suggested form). If this procedure is found to be impractical in an individual instance, the State Director may authorize an alternative method for disbursing the loss funds to protect the Government’s financial interest.

(iv) Drafts which have been endorsed by all other payees will be endorsed immediately without recourse. Such drafts or other loss funds will be processed in accordance with the methods described in paragraph (c) of this section.

(e) Servicing insurance losses under special circumstances—(1) Foreclosures and voluntary conveyances. Losses on properties in process of foreclosure or voluntary conveyance will be handled with the advice of the OGC. If the necessary cooperation of the borrower cannot be obtained, the State Director, with the advice of the OGC, will determine the proper action to be taken. To the extent feasible from a legal and practical standpoint, all loss payments should be received for a damaged or destroyed building and applied on the borrower’s real estate indebtedness before title to the property is taken by the Government through foreclosure sale, voluntary conveyance, or otherwise, unless absolute assignment has been made by the borrower to the Government of all loss funds due from the insurance company.

(2) Subrogation agreements. When a company claims nonliability to the borrower and subrogation to the rights of the FmHA or its successor agency under Public Law 103-354, the County Supervisor will forward a full report of the facts in the case to the State Director. The State Director will upon advice from OGC, instruct the County Supervisor regarding further action to be taken.

(f) Repairs and replacements. When any loss payments have been deposited in a supervised bank account, all repairs and replacements done by or
under the direction of the borrower, or by contract, will be planned, performed, inspected, and paid for in the same manner as improvements financed with loan funds.

(g) Completing adjustment. The borrower must complete the adjustment of the loss with the company or its authorized representatives. The County Supervisor, upon request of the borrower may consult with the borrower regarding the loss adjustment, but will not enter into negotiations with insurance adjusters or company representatives relative to the adjustment or settlement of losses on borrower property, or make any commitments, or sign any forms in connection with the adjustment of the loss. The FmHA or its successor agency under Public Law 103–354 will not waive any rights which it may have against the company except when the borrower’s account or the FmHA or its successor agency under Public Law 103–354 claim has been paid-in-full.

(1) The County Supervisor will maintain a proper followup on all losses until satisfactory settlement has been made by the company.

(2) Where the County Supervisor has evidence that the adjustment agreed to by the borrower is significantly less than the amount of damage to which the borrower is entitled under the terms of the policy, the loss draft accompanied by a report will be sent to the State Director so that he may reopen the adjustment, if he considers it is in the interest of the FmHA or its successor agency under Public Law 103–354 to do so.

(3) When it appears evident that the amount of the loss is $1,000 or less, the County Supervisor may rely on estimates of contractors, building supply firms, reliable carpenters, or other evidence rather than personal inspection in determining whether the adjustment is equitable and the Government’s interest is protected.

(h) Reinstatement after loss. In cases where insurance in the amount of the loss is not reinstated automatically by the provisions of the policy, it will be the responsibility of the County Supervisor to have the borrower reinstate as much of the insurance as may be necessary to fulfill the requirements of the FmHA or its successor agency under Public Law 103–354.

(i) Losses not covered by insurance. When a loss occurs and insurance is not in force, the County Supervisor will:

(1) Inform the borrower that he has violated the security instrument by not providing insurance coverage and that it is his responsibility to make the needed replacements or repairs.

(2) If the borrower is unable or unwilling to make needed repairs or replacements from his own resources, the County Supervisor will submit complete information to the FmHA or its successor agency under Public Law 103–354 official authorized to determine whether FmHA or its successor agency under Public Law 103–354 will or will not continue with the loan. The County Supervisor’s report will include recommendations on the following items:

(i) The advisability and possibility of making a subsequent loan to pay for needed repairs.

(ii) Subordination of the FmHA or its successor agency under Public Law 103–354 real estate lien to permit the borrower to obtain funds for needed repairs from another source.

(iii) The possibility of the borrower obtaining funds secured by a junior lien from another source.

(iv) Whether an advance is needed to protect the Government’s interest in the property.

(3) If the loan will not be continued with the borrower, it must be serviced in accordance with the applicable Instructions.

(4) If the borrower has improperly disposed of loss proceeds, the County Supervisor will refer the case with complete information and recommendations to the State Director. The State Director will consult the Regional Attorney when necessary and advise the County Supervisor as to appropriate servicing actions.

§ 1806.6 Failure of borrower to provide insurance.

When a borrower fails to provide and maintain property insurance which meets the requirements set forth in §1806.2 of this subpart, every effort will be made to have the borrower provide
coverage acceptable to FmHA or its successor agency under Public Law 103–354. It will be emphasized that under the terms of the security instrument, it is the borrower’s responsibility to provide and maintain proper insurance coverage. Existing borrowers required to escrow will be notified by letter at least 90 days prior to initiating escrowing for insurance. Failure to provide insurance is a nonmonetary default and will be a consideration in determining if the loan is to be continued. For FP or SFH borrowers not required to escrow, the County Supervisor will obtain insurance coverage and voucher for the insurance premium only in cases where: An unusual and severe hazard, such as recurring fires or unstable ground conditions, exists, or, an SFH borrower on a moratorium is unable to pay the insurance premium and the borrower requests that FmHA or its successor agency under Public Law 103-354 pay the premium. For SFH borrowers required to escrow, force placed insurance will be obtained if the borrower fails to provide acceptable insurance. Borrowers being phased into escrow will be given at least 30 days to obtain coverage, after which force placed insurance will be obtained. If the escrow account contains insufficient funds to pay the insurance when due, the County Supervisor will request the borrower to pay an amount equal to the difference between the premium due and the escrow balance in a lump sum within 30 days after notification. If the borrower fails to remit the amount requested, the amount will be advanced and charged to the borrower’s account as a recoverable cost. The amortization period for an advance due to an escrow shortage will be one year. Insurance coverage shall be provided continuously unless the property is acquired by FmHA or its successor agency under Public Law 103-354. The cost of obtaining such a policy shall be advanced and charged to the borrower’s account as a recoverable cost. Amortization of the charge will be handled in accordance with7 CFR part 3550. If a borrower indebted for other than an FP or SFH loan fails to provide acceptable insurance, the Servicing Official will take the following action:

(a) Expired policies. (1) The County Supervisor will request the insurance agency or broker who issued the expired policy to issue a new policy which is acceptable to the FmHA or its successor agency under Public Law 103-354.

(i) The new policy will be effective as of the date of the County Supervisor’s contact with the insurance agency or broker or as soon thereafter as possible, and will be for a term of one year. If State insurance regulations require a longer term, the State Director will issue a State Instruction authorizing County Supervisors to obtain policies for the minimum period permitted by State insurance regulations.

(ii) The FmHA or its successor agency under Public Law 103-354 will be shown in the loss payable clause and in the mortgage clause in the proper order of priority.

(iii) Insurance coverage on each building usually will be the same as shown on the expired policy if it meets or exceeds FmHA or its successor agency under Public Law 103-354 requirements. If the coverage shown on the expired policy does not meet FmHA or its successor agency under Public Law 103-354 requirements, proper coverage will be obtained.

(iv) The County Supervisor will, if possible, have an automatic renewal provision included in the policy.

(v) If the borrower refuses to pay the insurance premium with his own funds or arrange with the agent for subsequent payment by premium not or otherwise, the County Supervisor will pay the amount of the insurance premium in accordance with FmHA or its successor agency under Public Law 103-354 Instruction 2024-A. The amount of the premium payment will be charged to the borrower’s FmHA or its successor agency under Public Law 103–354 account with the highest lien priority as a recoverable cost item.

(vi) If the insurance agency or broker who issued the expired policy refuses to issue a new policy, the County Supervisor will have the borrower designate in writing another insurance agency or broker from whom the insurance can be obtained.
§ 1806.6

(vii) After the County Supervisor and the borrower exhaust all efforts to obtain acceptable insurance, the County Supervisor will request advice from the State Office as to companies issuing acceptable policies in the State and from which the borrower might be able to obtain an acceptable policy. If the borrower still cannot obtain an acceptable policy from any such company, and the determination has been made to continue with the borrower, the County Supervisor will temporarily accept from the borrower the available insurance policy the FmHA or its successor agency under Public Law 103–354 determines most nearly conforms to the requirements of §1806.2 of this subpart.

(A) In making this determination, the following deficiencies become more objectionable in the order from (1) to (5) paragraphs (a)(1)(vii)(A) of this section:

(1) A policy written for an initial term of less than one year.

(2) A policy which will insure the most essential buildings but will not cover all essential buildings.

(3) A policy which covers major risks such as fire and lightning, but does not include one or more of the other risks specified in §1806.2(8).

(4) A policy for a lesser amount of insurance than is required by §1806.3.

(5) A policy that is issued by a company which is not licensed to do business in the State or otherwise does not meet the requirements of §1806.3.

(B) Whenever adequate insurance becomes available, the County Supervisor will require the borrower to deliver to the County Office an acceptable insurance policy. The temporary policy will be returned to the borrower for cancellation after all losses claimed under the policy have been settled.

(C) If the borrower is unable to furnish a property insurance policy of any kind, he is still responsible for the debt in the event of loss.

(D) If the County Supervisor accepts an inadequate insurance policy under these conditions or the borrower fails to furnish any insurance policy, the County Supervisor will include in his report to the State Director an explanation of the efforts he and the borrower made to obtain acceptable insurance and his justification for accepting an inadequate policy, or for not obtaining an insurance policy of any kind.

(b) Insurance canceled for reasons other than nonpayment of insurance premium.

(1) The County Supervisor, immediately upon receipt of a 10-day notice of cancellation for a policy, will urge the borrower to provide acceptable insurance.

(2) If the borrower fails to provide acceptable insurance before the cancellation is effective, the County Supervisor will contact the insurance agency or broker who issued the insurance policy to determine the reasons for cancellation and, if possible, have the policy reinstated.

(3) If the insurance company will not reinstate the policy, the County Supervisor will attempt to obtain an acceptable insurance policy from another agency or broker in accordance with the provisions of paragraph (a) of this section.

(c) Insurance canceled for nonpayment of premium.

(1) The County Supervisor, immediately upon receiving a 10-day cancellation notice for a policy, will, if possible, contact the borrower in an effort to have him pay the insurance premium from his own funds or arrange with the agent for subsequent payment by premium note, or otherwise.

(2) If the borrower does not pay or arrange to pay the premium before the policy cancellation is effective, the County Supervisor will, before the cancellation becomes effective, notify the insurance company or broker by certified mail (return receipt requested), that the FmHA or its successor agency under Public Law 103–354 as mortgagee (or trustee) will pay the premium for one year to continue the policy in effect for that period. The County Supervisor will, in accordance with FmHA or its successor agency under Public Law 103–354 Instruction 2024–A, pay the amount of the premium for a period of one year. The amount of the premium will be charged to the borrower’s loan account as a recoverable cost item.

(3) If a property insurance mortgage clause other than Form FmHA or its successor agency under Public Law 103–354 426–2 is used in connection with the policy and the insurance company or broker refuses to accept payment from

1198
(a) Authority. This subpart prescribes the policies and procedures to be followed in implementing the National Flood Insurance Act of 1968 as amended by the Flood Disaster Protection Act of 1973. The provisions of these Acts are applicable to Farmers Home Administration (FmHA) or its successor agency under Public Law 103–354 authorities permitting financing of buildings of any type now located in or to be located in special flood or mudslide prone areas as designated by the Federal Insurance Administration (FIA) of the Department of Housing and Urban Development (HUD), and any machinery, equipment, fixtures and furnishings contained or to be contained therein. This subpart does not apply to Farm Service Agency, Farm Loan Programs and to Rural Rental Housing, Rural Cooperative Housing, or Farm Labor Housing programs of the Rural Housing Service.

(b) Background. The Congress has found that annual losses throughout the nation caused by floods and mudslides are increasing at an alarming rate, largely as a result of the accelerated development and concentration of populations in areas subject to floods and mudslides. The availability of Federal funds in the form of loans, grants, guarantees, insurance and other forms of financial assistance are often determining factors in the utilization of land and the location and construction of industrial, commercial and residential facilities.

(c) Scope. The National Flood Insurance Program (the program) was authorized and created because the private insurance industry has been unable to provide insurance coverage at reasonable prices for such natural disasters as floods and mudslides. Subsidized and affordable insurance has been made available under the Act through an agreement between the Federal Insurance Administration and the National Flood Insurers Association.

Subpart B—National Flood Insurance

Source: 39 FR 17093, May 13, 1974, unless otherwise noted.
§ 1806.22 Areas of responsibility.

(a) Federal Insurance Administration (FIA). (1) Identify and publish information with respect to all areas in the country which are subject to floods and mudslides and designate those areas on Flood Hazard Boundary maps.

(2) Notify affected communities of their designations and encourage them to adopt and enforce land use and other control measures and to adopt ordinances or laws which will regulate and control construction in areas designated as having special flood or mudslide hazards.

(3) Make flood insurance available at reasonable rates in sufficient amounts, within the statutory limits, to adequately protect owners against loss to their buildings and contents when those buildings are located in or will be located in designated special flood and mudslide prone areas in communities participating in the National Flood Insurance Program.

(b) Farmers Home Administration or its successor agency under Public Law 103–354. The State Director, after being notified by the FmHA or its successor agency under Public Law 103–354 National Office or FIA of designated flood or mudslide hazard areas and receiving flood hazard boundary maps identifying the hazard areas, FIA insurance rate charts, or other information concerning the program, will inform the appropriate County Supervisors and provide them the maps, rate charts, and other relevant information concerning the program in areas they serve. Permanent records indicating the date a community was notified as containing identified flood hazard areas, communities participating in the program, and communities eligible to participate but not participating in the program will be maintained in the State Office. County Supervisors will notify, in writing, those borrowers whose insurable buildings are located in designated flood or mudslide hazard areas of the availability of national flood insurance and encourage them to obtain flood insurance to protect their and the Government’s financial interest.

(c) Community. Communities are required to participate in the National Flood Insurance Program within 1 year after notification of its formal identification as a community containing one or more special flood and mudslide prone areas, or by July 1, 1975, whichever is later, or be denied Federal financial assistance or Federally-related financial assistance for acquisition or construction purposes in such areas. Communities wishing to qualify for the program may submit a completed application to: Administrator, Federal Insurance Administration, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410.

(d) Lender. The lender must determine whether real property is located in an area identified as having special flood or mudslide hazards and cannot discharge the responsibility merely by obtaining a self-certification from the applicant that the property is not located in an area having special flood hazards.

§ 1806.23 Definitions.

For the purpose of this subpart, the following definitions apply:

(a) Financial assistance means any form of direct, insured or guaranteed loan, including reamortization and assumption on new terms of any loan, any form of grant, or other form of direct or indirect assistance extended by the FmHA or its successor agency under Public Law 103–354.

(b) Financial assistance for acquisition or construction purposes means any form of Federal financial assistance which is intended in whole or in part for the acquisition, construction, reconstruction, or substantial improvement of any building and for any machinery, equipment, fixtures and furnishings contained or to be contained in such buildings.

(c) Community means any state or political subdivision thereof, such as county, parish, township, city or other local government which has zoning and building code jurisdiction over a particular area having special flood hazards.

(d) Eligible community means a community in which the Administrator of FIA has authorized the sale of flood insurance under the program.
(e) Designated special flood or mudslide prone area means those areas in a community subject to flood or mudslide which have been identified by flood hazard boundary maps or those areas not identified by maps but where, due to emergency, the FIA Administrator has authorized the sale of flood insurance.

(f) Flood means a general and temporary condition of partial or complete inundation of normally dry land areas from the overflow of streams, rivers, or other inland water, the collapse or subsidence of land along the shore of a lake or other body of water as a result of erosion or undermining caused by waves or currents of water exceeding anticipated cyclical levels, or abnormally high tidal water or rising coastal waters resulting from severe storms, hurricanes, or tidal waves resulting from volcano eruptions or earthquakes.

(g) Mudslide or mudflow means a major occurrence involving the appearance of a large river or flow of "liquid mud" down a hillside, usually as a result of earlier brushfires followed by heavy rains over a widespread area.

(h) Flood insurance means insurance coverage for floods and/or mudslides under the program or otherwise acceptable to FIA.

(i) Building means any walled and roofed structure, other than a gas or liquid tank, that is principally above ground and affixed to a permanent site. Residential and most types of industrial, commercial, and agricultural buildings, such as lumber sheds, machinery storage sheds, grain storage bins, and silos, are included in this definition.

(j) Substantial improvement means any repair, reconstruction or improvement of a structure, the cost of which equals or exceeds 50 percent of the actual cash value of the structure either before the improvement is started or, if the structure has been damaged and is being restored, before the damage occurred.

§ 1806.24 Eligibility.

In addition to an applicant meeting the requirements for the type of financial assistance requested, the following requirements for eligibility of applicants for financial assistance for acquisition and construction purposes in designated special flood and mudslide prone areas must be met:

(a) If flood insurance is available, to be eligible after March 1, 1974, the applicant must have purchased a flood insurance policy at the time the loan or grant is closed.

(b) Applicants will not receive financial assistance in those communities that have been notified as having special flood and mudslide prone areas and where flood insurance is not available within 1 year after such notification or by July 1, 1975, whichever is later.

§ 1806.25 Conditions.

FmHA or its successor agency under Public Law 103–354 financial assistance may be extended to eligible applicants meeting the eligibility requirements of §1806.24 of this subpart, provided the following conditions are also met:

(a) Dwelling and multi-unit housing facilities. (1) If the financial assistance is to buy a dwelling or multi-unit housing facility:

(i) The first floor elevation of the habitable space of the dwelling or housing unit must be above the 100-year flood level.

(ii) The housing must be served by public utilities and facilities, such as sewer, gas, electrical and water systems that are located and constructed to minimize or eliminate flood damage, or have an onsite water supply system and waste disposal system located so as to avoid impairment of such systems and contamination from the waste disposal system to the water supply system from flooding.

(2) If the financial assistance is to build or provide substantial improvement, the requirements of paragraph (a)(1) of this section must be met and all construction must meet requirements of the applicable development standards, and:

(i) A building permit must be issued by the appropriate governing officials having jurisdiction in the area and compliance must be had with the zoning code or other established legal requirements of the area for reducing or eliminating flood or mudslide damage.

(ii) The structure must be designed and anchored to prevent flotation, collapse or lateral movement of the structure.
(iii) Construction materials and utility equipment that are resistant to flood damage must be used.

(iv) Construction methods and practices that will minimize flood damage must be followed.

(3) If the financial assistance is to make minor repairs, the conditions of paragraphs (a)(1) (i) and (ii) and (2) (i), (ii) and (iii) of this section must be met or the building must have existed on the site prior to the date the area was identified as having special flood or mudslide hazards and the loan approval official must determine that the dwelling is suitable as a residence.

(4) When applications for financial assistance are received in areas identified as having special flood and mudslide hazards, the loan approval official will consider the expected severity and frequency of floods and mudslides in determining whether any housing loans should be made in the area. He should be sure, if loans are made, that the objectives of the loans can be accomplished and the Government’s financial interest will be adequately protected.

(b) Nonresidential buildings. Construction plans and specifications for new buildings or improvements to existing buildings must comply with flood plain area management or control laws, regulations or ordinances.

(c) Flood insurance coverage. (1) Any property on which flood insurance is required must be covered by such insurance during its anticipated economic and useful life in an amount at least equal to its development or replacement cost (except estimated land cost), or to the maximum limit of coverage made available with respect to the particular type of property under the National Flood Insurance Program, whichever is less. However, if the financial assistance provided is in the form of a loan, the amount of flood insurance required need not exceed the outstanding principal balance of the loan and need not be required beyond the term of the loan.

(2) The contents of a building must be insured separately from a building but coverage cannot be written on the contents of a three-walled machinery shed or similar type open building.

(3) Flood insurance shall not be required on any state owned property that is covered under an adequate state policy of self-insurance satisfactory to the Secretary of HUD, who will publish a list of states with such policies.

(4) It will be emphasized that under the terms of the security instrument it is the borrower’s responsibility to provide and maintain proper flood insurance coverage. If flood insurance is not provided on any property for which it is required, the flood insurance premium will be paid to protect the Government’s security interest. For borrowers required to escrow for flood insurance, payment of the premium will be handled in accordance with §1806.28 of this subpart. Existing borrowers required to escrow will be notified by letter at least 90 days prior to initiating escrowing for flood insurance. If FmHA or its successor agency under Public Law 103–354 pays the flood insurance premium for borrowers not required to escrow, the cost will be charged to the borrower’s account as a recoverable cost. Failure to provide flood insurance is a nonmonetary default and will be a consideration in determining if the loan is to be continued.

§ 1806.26 Coverage and premium rates.

Exhibit A sets forth limits of coverage and chargeable premium rates under the program. Insurance policies under the program can be obtained from any licensed property insurance agent or broker serving the eligible community or from the National Flood Insurers Association Serving Company (Serving Company) for the state. The Servicing Company for each state is shown in exhibit B.

§ 1806.27 Acceptable policies and servicing.

The general acceptance of policies and servicing of insurance will be performed in accordance with Subpart A of this part. Any unusual situations that may arise with respect to obtaining or servicing flood insurance should be referred to the State Director. The State Director will attempt to resolve
any problems concerning the flood insurance program in the state with the Servicing Company. Flood hazard boundary maps, insurance rate tables, the insurability of specific structures, and other information concerning the program may be obtained from the Servicing Company. Difficulties in administering the program which the State Director is unable to resolve should be referred to the National Office for Assistance.

§ 1806.28 Borrowers required to escrow.

For borrowers required to use escrow accounts for the payment of real estate taxes and insurance, the flood insurance premium will be paid when due from funds contained in the escrow account. If the escrow account contains insufficient funds to pay the flood insurance premium when due, the County Supervisor will request the borrower to pay an amount equal to the difference between the premium due and the escrow balance in a lump sum within 30 days after notification. If the borrower fails to remit the amount requested, the amount will be advanced and charged to the borrower’s account as a recoverable cost. The amortization period for an advance due to an escrow shortage will be one year. Amortization of the charge will be handled in accordance with 7 CFR part 3550. When a borrower has more than one loan secured by the real estate on which the flood insurance premium is being paid, the advance will be charged to the initial or lowest numbered loan.

EXHIBIT A TO SUBPART B OF PART 1806—COVERAGE AND PREMIUM RATES

1. The following table sets forth the limits of coverage available under the program:

<table>
<thead>
<tr>
<th>Type of structure</th>
<th>Structure coverage</th>
<th>Contents of coverage</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Subsidized</td>
<td>Total</td>
</tr>
<tr>
<td>Single family, residential</td>
<td>$35,000</td>
<td>$70,000</td>
</tr>
<tr>
<td>All other, residential</td>
<td>$100,000</td>
<td>$200,000</td>
</tr>
</tbody>
</table>

1 For Alaska, Hawaii, and the Virgin Islands, the following limits of coverage apply: Structure coverage for one family residential is $50,000 subsidized and $100,000 total coverage, and structure coverage for other residential is $150,000 subsidized and $300,000 total coverage.

2 Includes hotels and motels with normal occupancy of less than 6 months.

3 Coverage in amounts exceeding the subsidized limits is available only after an actuarial cost has been established and flood insurance rate may be issued.

4 Contents of a building must be insured separately from the building. Therefore, coverage cannot be written on the contents of a three-walled machinery shed or a similar type open building.

2. The following table sets forth the applicable premium rates:

<table>
<thead>
<tr>
<th>Type of structure</th>
<th>Rates per $100 of coverage (subsidized only)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Structures</td>
</tr>
<tr>
<td>All residential</td>
<td>$0.25</td>
</tr>
<tr>
<td>All nonresidential</td>
<td>$0.40</td>
</tr>
</tbody>
</table>

1 Actuarial (nonsubsidized) rates are applicable to any structure, the construction or substantial improvement of which started after Dec. 31, 1974, or the date on which the initial rate map was issued, whichever is later, in identified areas having special flood or mudslide hazards.

PART 1810—INTEREST RATES, TERMS, CONDITIONS, AND APPROVAL AUTHORITY

Subpart A—Interest Rates, Amortization, Guarantee Fee, Annual Charge, and Fixed Period

Sec. 1810.1 Information concerning interest rates, amortization, guarantee fee, annual charge, and fixed period.

1810.2 Adjustment of interest rates for certain loans involving use of or construction on prime or unique farmland.

(a) For essential community facility loans, insured farm ownership loans for recreation or non-farm enterprises, insured farm operating loans for recreation enterprises, soil and water loans for recreation purposes, individual recreation loans, and insured business and industry loans, the interest rate will be increased by two per centum per annum if the project being financed will involve the use of, or construction on, prime or unique farmland. Prime or unique farmland is as defined in §657.5 (a) and (b) of title 7, Code of Federal Regulations (1980).

(b) The two per centum interest rate increase will not apply if the applicant/borrower is a public body or Indian tribe and has demonstrated to FmHA or its successor agency under Public Law 103–354 that there are no suitable options for locating the proposed essential community facility project on land that is not prime or unique farmland.

(c) For each essential community facility loan and insured business and industry loan the District Director, after consultation with the Soil Conservation Service (SCS), will determine whether the proposed project will involve the use of, or construction on, prime or unique farmland. For each insured farm ownership loan for a recreation or non-farm enterprise, insured farm operating loan for a recreation enterprise, soil and water loan for a recreational purpose, or individual recreation loan, the County Supervisor, after consultation with SCS, will determine whether the proposed project will involve the use of, or construction on, prime or unique farmland. The determination will be documented by FmHA or its successor agency under Public Law 103–354 and made a part of the official case file.

EXHIBITS A–B TO SUBPART G [RESERVED]

EXHIBIT C TO SUBPART G—SUBORDINATION BY THE GOVERNMENT FOR USE WITH RURAL HOUSING SITE LOANS

Subparts A–F [Reserved]

Subpart G—Rural Housing Site Loan Policies, Procedures, and Authorizations

SOURCE: 35 FR 16087, July 1, 1970, unless otherwise noted.

§ 1822.261 General.

This subpart sets forth the policies and procedures and delegates authority for making Rural Housing Site (RHS) loans under sections 523 and 524 of the Housing Act of 1949. Any processing or servicing activity conducted pursuant to this subpart involving authorized assistance to FmHA or its successor agency under Public Law 103–354 employees, members of their families, known close relatives, or business or close personal associates, is subject to the provisions of subpart D of part 1900 of this chapter. Applicants for this assistance are required to identify any known relationship or association with an FmHA or its successor agency under Public Law 103–354 employee. Section 523 loans are direct loans for the purchase and development of building sites for housing to be built by the self-help method; they have additional requirements which are contained in § 1822.278.

[35 FR 16087, July 1, 1970, as amended at 58 FR 224, Jan. 5, 1993]

§ 1822.262 Objective.

The basic objective of RHS loans is to assist public or private nonprofit organizations interested in providing sites for housing, to acquire and develop land in rural areas. This land will be subdivided into adequate building sites and sold on a nonprofit basis to (a) families eligible for low and moderate income section 502 Rural Housing (RH) loans, including self-help housing; (b) cooperative Rural Cooperative Housing (RCH) applicants and broadly based nonprofit Rural Rental Housing (RRH) applicants; and (c) applicants eligible for Housing and Urban Development (HUD) sections 235 and 236 insured mortgages.

§ 1822.263 Definitions.

As used in this subpart:
(a) A private nonprofit organization is a corporation which: is owned and controlled by private persons; is organized and operated for purposes other than making gains or profits for the corporation or members; and, is legally precluded from distributing to its members any gains or profits.
(b) A public nonprofit organization is a nonprofit corporation other than a private nonprofit corporation, including a
§ 1822.264 Eligibility requirements.

(a) Eligibility of applicant. To be eligible for an RHS loan, the applicant must be a private or public nonprofit organization as defined in § 1822.263(a) or (b) which is authorized to provide housing sites on a nonprofit basis. 

(1) If it is a private nonprofit organization as defined in § 1822.263(a), it should also:

(i) Have a membership of at least 10 community leaders.

(ii) Plan to adopt, if it is being newly organized, articles of incorporation and bylaws that generally conform to model articles and bylaws provided by the State director which will be consistent with State law and with changes appropriate to the purposes and powers of an eligible applicant under this subpart.

(2) [Reserved]

(b) Authorized representative of applicant. The Farmers Home Administration (FmHA) or its successor agency under Public Law 103-354 will deal only with the applicant or the representative’s technical advisors. An authorized representative of the applicant must have no pecuniary interest in the award of the engineering, architectural or construction contracts, necessary equipment, or the purchase or development of the land.

§ 1822.265 Loan purposes.

RHS loans may be made to qualified applicants:

(a) For the purchase and development of adequate sites, including the construction of essential access roads, streets, utility lines, and necessary equipment which will become a permanent part of the development. If public water and waste disposal facilities are not available and cannot reasonably be provided on a community basis with other financing, including FmHA or its successor agency under Public Law 103-354 Water and Waste Disposal Association loans, funds may be included for this purpose.

(b) For the payment of necessary engineering fees, legal fees, and closing costs.

(c) For the payment of actual cash cost of incidental administrative expenses such as postage, telephone, advertising, and temporary secretarial help, if funds to pay these expenses are not otherwise available. The estimated cost of these items should be identified and shown in the budget.

(d) To provide for needed landscaping, planting, seeding, or sodding, or other necessary facilities related to buildings such as walks, parking areas, and driveways.

(e) When legally required by proper local, county, and State Governmental bodies as a condition for subdivision approval, RHS loan funds may be used to provide common areas playgrounds and tot lots, provided such facilities are dedicated to, and maintained by, a public body.

[42 U.S.C. 1480; delegation of authority by the Sec. of Agri., 7 CFR 2.23; delegation of authority by the Asst. Sec. for Rural Development, 7 CFR 2.70]

§ 1822.266 Limitations.

(a) Loan limits. No RHS loan(s) will be made to any applicant which will result in the applicant’s owning an unpaid principal balance of more than $100,000 on such loan(s) unless prior authorization for a larger loan is obtained from the national office. No such loan will exceed the development cost as defined in §1822.263(d), or the value of the property as improved with the loan. These limitations also apply to cases in which the same persons hold a majority of the membership interests or constitute a majority of the directors of two or more applicants.

(b) Limitations of use of loan funds. Loans will not be made for:

(1) The purchase of land in excess of the immediate and identified needs in the locality.

(2) The purchase of land from a member of an applicant-organization, or from another organization in which any member of the applicant-organization has an interest, without prior consent of the national office.

(3) Refinancing of debts, except in accordance with paragraph (e) of this section.

(4) Payment of any fee, charge, or commission to any broker, negotiator, or other person for the referral of a prospective applicant or solicitation of a loan.

(5) Payment of any fee, salary, commission, profit, or compensation to an applicant, or to any officer, director, trustee, stockholder, member or agent of an applicant, except as provided in §1822.265(b). No contract or agreement for services to be paid for with loan funds should be executed by the applicant without prior approval by the State director.

(c) Sale of developed sites. The sites developed with a section 524 loan must be for housing low- and moderate-income families and may be sold to families, nonprofit organizations, public agencies, and cooperatives eligible for assistance under any section of title V of the Housing Act of 1949, or under any other law which provides financial assistance. For example, this may include:

(1) Individuals with low and moderate incomes eligible for HUD mortgages.

(2) Individuals with low and moderate incomes eligible for VA guaranteed loans.

(3) Individuals with low or moderate incomes eligible for a loan from any private lender which is authorized by law to provide financial assistance for housing.

(4) Nonprofit organizations funded by Federal, State, or local governments carrying out programs for low- and moderate-income families to obtain housing.

(5) State or local public agencies such as a housing authority or a housing finance development agency carrying out programs for low- and moderate-income families to obtain housing.

(d) Suitability of sites. Sites will meet the requirements of the planned use; for example, individual housing or multiple housing or any combination thereof. Building sites must be well located and designed to provide a desirable living environment. Generally a loan will not be made for the development of less than 10 units, but they need not be contiguous.

(e) Obligations incurred before loan closing. When an applicant files an application for a loan, the county supervisor will advise the applicant that development work must not be started and obligations for work, materials, or land purchase must not be incurred before the loan is closed. If, nevertheless, the applicant incurs obligations for work, materials, or land purchase before the loan is closed, the State director may authorize the use of loan funds to pay such obligations only when he finds that all the following conditions exist:

(1) The obligations were incurred after the applicant filed a written application for a loan.

(2) The applicant is unable to pay such obligations from its own resources or to obtain credit from other sources, and failure to authorize the use of loan funds to pay such debts would impair the applicant’s financial position.

(3) The obligations were incurred for authorized loan purposes.

(4) Contracts, materials, development and any land purchase meet FmHA or its successor agency under Public Law 103–354 standards and requirements.
§ 1822.267 Special conditions.

(a) Evidence of need. Loans will be made on the basis of the applicant providing firm information as to the number of sites to be developed and evidence of a need for the proposed building sites in the locality.

(b) Nondiscrimination. The borrower will be required to agree not to discriminate or permit discrimination, in accordance with section 3 of the loan resolution form “(Rural Housing Site Loan to Nonprofit Corporation),” available at all FmHA or its successor agency under Public Law 103–354 offices.

(c) Supervisory assistance. Supervision will be provided borrowers to the extent necessary to achieve the objectives of the loan and to protect the interests of the Government. County supervisors will counsel with applicants in selecting locations that will provide essential services and facilities and will result in the development of desirable residential communities.

(d) Loan resolution. A Loan Resolution will be adopted by the applicant’s Board of Directors or similar governing body using a form entitled “(Rural Housing Site Loan to Nonprofit Corporation)” available at all FmHA or its successor agency under Public Law 103–354 offices. If any provisions are not appropriate to a particular case, proposed substitute language should be submitted to the national office with the recommendations of the State director.

(e) Development policies. Development will be planned and performed in accordance with subparts A and C of part 1924 of this chapter, and certain information in a guide entitled “Planning and Developing Building Sites” available at all FmHA or its successor agency under Public Law 103–354 offices.

(f) Water and waste disposal facilities. If public water and waste disposal facilities are not available and these facilities will be provided on a community basis with funds included in the RHS loan or with other financing, provision should be made to form an organization with members who will provide continuing maintenance and management of facilities. The cost of the facilities should be considered as a cost of developing the sites and included in the price charged for the lots when they are sold.

(g) Compliance with local codes and regulations. Planning and development of sites will comply with all State, county, and local planning and zoning requirements, and will be for housing that will conform with any applicable laws, ordinances, codes, and regulations governing such matters as construction, heating, plumbing, electrical installation, fire prevention, health, and sanitation.

(h) Optioning of land. If a loan includes funds to purchase real estate, the applicable provisions of subpart A of part 1943 regarding options will be followed. After the loan is approved, the county supervisor will have Form FmHA or its successor agency under Public Law 103–354 440–35, “Form Letter—Acceptance of Option,” or other appropriate form of acceptance, completed, signed by the applicant, and mailed to the seller.

(i) Use of and accountability for loan funds. Supervised bank accounts will not be used except when their requirement is made or authorized by the State director for cases where adequate bonding is not available. If a supervised bank account is used, collateral for deposits of funds will be pledged when the supervised bank account exceeds $100,000. All loan funds and funds from other sources to be used to pay the development costs of the site, as well as proceeds from the sale of any sites, will be deposited in accordance with part 1902, subpart A of this chapter. The county supervisor will see that funds for land purchase are paid to the seller simultaneously with loan closing. After the loan is closed, monthly reports will be provided to FmHA or its successor agency under Public Law 103–354 of all disbursements made and income received by the borrower. Reports for each month will be submitted to the FmHA or its successor agency under Public Law 103–354 county office.
during the first 10 days of the next month. No expenditures will be made without prior FmHA or its successor agency under Public Law 103–354 consent for items which are not included in the FmHA or its successor agency under Public Law 103–354 approved development cost estimate or for amounts greater than those set forth in such estimate.

(j) Insurance. The State director will determine the minimum amounts and types of insurance the applicant will carry:

(1) Suitable workman’s compensation insurance will be carried by the applicant for all its employees.

(2) The applicant will be advised of the possibility of incurring liability and encouraged, or required when appropriate, to obtain liability insurance.

(k) Bonding. (1) Approved corporate surety bonds will be required in all cases involving a development contract in excess of $20,000, unless an exception is made by the national office. In other cases, the county supervisor will determine whether a surety bond is required.

(2) The applicant will provide fidelity bond coverage for its officers and employees entrusted with the receipt, custody, and disbursement of its funds and the custody of any other negotiable or readily saleable personal property. The amount of the bond will be at least equal to the maximum amount of such funds including funds in bank accounts, and property that the applicant will have in its possession or control at any one time. If permitted by State law, the United States will be named coobligee in the bond. Form FmHA or its successor agency under Public Law 103–354 440–24, “Position Fidelity Schedule Bond,” may be used if permitted by State law.

(1) Conditional commitments for construction of homes on developed sites. Conditional commitments may be issued on sites developed with an RHS section 524 loan to permit homes to be constructed on sites prior to the sale of the site to eligible purchaser in accordance with the following:

(1) The requirements of 7 CFR 3550.70 must be met and a conditional commitment issued prior to the start of construction of the home.

(2) The conditional commitment must be issued to an RHS borrower who can legally provide the proposed housing and has the experience and training in construction to the extent necessary to assure that the housing will be built or jointly to the RHS loan borrower and a builder who has the legal capacity, training and experience necessary to construct the housing. In all cases the following language will be added under “other conditions” on Form FmHA or its successor agency under Public Law 103–354 1944–11, “Conditional Commitment”:

(i) “Not withstanding the other provisions of this commitment the sale of completed homes on sites developed with section 524 Rural Housing Site loans will be limited to families eligible for assistance under any section of title V of the Housing Act of 1949 or under any other law which provides financial assistance for housing low- and moderate-income families. The approval of FmHA or its successor agency under Public Law 103–354 will be obtained prior to the sale of each home. The request for approval shall be submitted to the local FmHA or its successor agency under Public Law 103–354 office along with an application for an RH 502 loan or a financial statement from the purchaser and verification of the other credit that is available.”

(ii) The benefits of the nonprofit development of the site(s) must be passed on to the purchaser. This will result in this site being sold for $ (price to be determined as provided for in (§ 1822.275(b))).

(3) In arriving at the commitment price for the site and the completed home, the value will be based on the present market value of the house only, plus the nonprofit selling price of the lot.

(4) If in order to obtain interim financing for the construction of the homes, the RHS loan borrower requests a subordination by FmHA or its successor agency under Public Law 103–354 on individual lots, the State Director may approve the subordination by completing and executing a subordination in the format of exhibit C of this subpart.

(5) FmHA or its successor agency under Public Law 103–354’s lien on any
§ 1822.268 Rates, terms, and source of funds.

(a) Interest rate. Upon request of the applicant, the interest rate charged by FmHA or its successor agency under Public Law 103–354 will be the lower of the interest rates in effect at the time of loan approval or loan closing. If an applicant does not indicate a choice, the loan will be closed at the interest rate in effect at the time of loan approval. Interest rates are specified in exhibit B of FmHA or its successor agency under Public Law 103–354 Instruction 440.1 (available in any FmHA or its successor agency under Public Law 103–354 office) for the type assistance involved.

(b) Repayment period. Final payment will be due 2 years after the date of the loan. When necessary to carry out the loan purposes, the national office may authorize extension of maturity dates. As lots are sold before the final due date of the note, the proceeds of the sales will be applied on the account or any prior lien, or, with the prior approval of the national office, used in a manner consistent with the purposes of the loan and the security interest of the Government.

(c) Source of funds. Loans under this subpart will be made as insured loans, except that loans under §1822.278 to develop building sites for sale in connection with self-help projects will be made as direct loans.

§ 1822.269 Security.

Each loan will be secured by a mortgage on the property purchased or improved with the loan, and a security interest in the funds held by the corporation in trust for the Government, in accordance with the provisions of the required Loan Resolution.

§ 1822.270 Technical, legal, and other services.

(a) Appraisals. The property will be appraised by an FmHA or its successor agency under Public Law 103–354 employee authorized to make real estate appraisals. The appraisal will consist of a narrative statement prepared and signed by the authorized employee describing in detail the items considered in arriving at the value of the property. Two values will be established by the appraiser:

(1) The fair market value of the total property “as is”.

(2) The aggregate fair market value of the building sites after development.

(i) In determining the value of the property, the appraiser will consider the value and selling prices of similar building sites in the area. The selling prices of similar sites must be fully documented.

(ii) [Reserved]

(b) Title Clearance and Legal Services. For a loan to a public nonprofit organization, title clearance and legal services will be obtained in accordance with instructions from the OGC, observing the provisions of subpart B of part 1927 of this chapter to the extent feasible. For a loan to a private nonprofit organization, the provisions of subpart B of part 1927 of this chapter regarding title clearance and legal services will apply. The applicant will be encouraged to have the same approved closing agent, where practical, perform the title clearance work in connection with the purchase of the property.
land and the sale of the individual sites.

(c) Contracts for legal services. On projects requiring more legal services than are customarily required for title clearance alone, the applicant will be required to have a written contract when loan funds will be used for legal services. All such contracts will be subject to review and approval by the State director and therefore should be submitted to the State Director before execution by the applicant. Contracts will provide the types of service to be performed and the amount of fees to be paid either in lump sum on the completion of all services or in installments as services are performed.

(d) Engineering services. On projects requiring engineering services, a written contract will be required between the engineer and the borrower. All such contracts will be subject to review and approval by the State director and therefore should be submitted to the State Director before execution by the applicant. The form of contract must conform with standard professional practices and describe the types of services to be performed and fees to be paid.

§ 1822.271 Processing applications.

(a) Application. The application will be in the form of a letter to the county supervisor with the following information included in or attached to the letter:

(1) Name and address of applicant.
(2) A copy of, or an accurate citation to, the specific provisions of State law under which the applicant is organized; a copy of the applicant’s articles of incorporation, bylaws, and other authorizing documents; the names and addresses of the applicant’s members, directors, and officers; and if another organization is a member of the applicant organization its name, address, and principal business.
(3) A current, dated, and signed financial statement showing assets, and liabilities, together with information on the repayment schedule and status of each debt.
(4) Evidence of inability to obtain credit from other sources.
(5) General description of the project.
(i) Location and size of tract or tracts to be bought and/or developed.
(ii) Number and size of individual sites planned together with a detailed plot plan.
(iii) Preliminary engineering plans, if available.
(6) Estimated cost and amount of loan needed.
(7) Explanation of applicant’s financial contribution to the project.
(8) A map showing the location of and other supporting information on neighborhood and existing facilities such as distance to shopping area, neighborhood churches, available transportation, drainage, sanitation facilities, water supply available or planned, and access to essential services such as doctors, dentists, and hospitals.
(9) If facilities such as water and sewage systems, paved streets, and utilities are not currently available, information on when and how they will be provided.
(10) Evidence of the need for the proposed sites in the locality by low- and moderate-income families and other qualified applicants that are likely to be able to obtain financing for a home.
(11) Written evidence of any State, county, or local planning, zoning, or other ordinances imposing additional restrictions or requirements upon the proposed sites.

(b) County supervisor’s review and evaluation of applications. The county supervisor will:

(1) Determine that the applicant meets the eligibility requirements of §1822.264.
(2) Verify that the information provided is accurate and complete.
(3) Determine that:
(i) The sites will be located in a good residential area and that essential facilities and services will be provided.
(ii) The lots will be reasonable in cost and of a type FmHA or its successor agency under Public Law 103–354 can appropriately finance.
(iii) There is an immediate and ready market for the proposed sites in the planned location.
(iv) The total number of sites planned does not exceed the number of
loans the county supervisor can reasonably expect to include in the rural housing program or for which other credit is reasonably assured when the sites are developed.

(v) Proposed subdivisions will comply with the local codes and ordinances and also meet the requirements of subpart C of part 1924 of this chapter.

(4) Evaluate the manner in which the applicant plans to conduct its business and financial affairs.

(5) Comment on the background of the members, directors and officials.

(6) If he has questions about the proposal, send the incomplete docket to the State office for advice.

(7) If for any reason the loan cannot be made, inform the applicant.

(c) Completion of the docket. If the county supervisor determines that the applicant is eligible and the loan will be sound and proper, he should request the applicant to make any needed revisions. In addition to the items required in the application the docket must include:

(1) A plot plan and detailed preliminary plans and specifications for development of the building sites.

(2) A detailed cost breakdown of the project for such items as land and rights-of-way, utility installations or connections, on-site improvements, engineering and legal services, and estimated interest.

(3) If water and sanitary facilities are not publicly owned, a complete statement as to how they will be provided and details about their ownership and operation.

(4) Satisfactory evidence of review and approval of the proposed development by applicable State and local officials whose approval is required by State or local laws, ordinances, or regulations.

(5) Satisfactory evidence that the appropriate public bodies will accept and maintain all public facilities, including common areas, playgrounds, and tot lots, when dedicated to such bodies.

(d) Preparation of docket forms—(1) Request for obligation of funds and fund analysis. Form RD 3660–51, “Multiple Family Housing Obligation Fund Analysis” will be completed in accordance with the Forms Manual Insert (FMI).

(2) County committee certification or recommendation. County committees will not be used to review RHS loan applications.

(e) Assembly, review and distribution of complete loan docket items. When all items required for the complete loan docket have been furnished, they will be examined thoroughly to make sure they are properly and accurately prepared and are complete in all respects, including dates and signatures. The loan docket items will be assembled in the following order and distributed as follows:

7 CFR Ch. XVIII (1–1–08 Edition)
The complete docket will be sent to the State office together with the District Director’s comments and recommendations and a draft for a press release.

The State Director is authorized to approve loans in accordance with this subpart and subpart A of part 1901 of this chapter. As soon as it is evident that a loan will be approved, the State Director will complete exhibit A to subpart C of part 2015 of this chapter. The State Director may redelegate approval authority to qualified State Office employees. When a docket or preliminary application is received in the State Office, the State Director will:

1. Utilize the services of technicians on his staff and from other agencies in evaluating the application.

2. Review the applicant’s articles of incorporation and bylaws. If they conform to approved forms for the State as provided in §1822.264(a)(1)(ii), the State director need not obtain a preliminary opinion from the OGC. In all other cases the State director will, and in any case may, submit the docket with any comments or questions to the OGC for a preliminary opinion as to whether the applicant and the proposed loan meet or can meet the requirements of State law and this subpart.

3. If additional information is needed to adequately evaluate the application, return the loan docket to the District Director with any comments and recommendations for further processing.

4. If the docket is sufficiently complete to enable the State Director to determine that the applicant is eligible and the loan would be sound and proper, issue a proposed memorandum of approval listing any specific conditions that must be met before loan closing.

5. If the applicant is not eligible or the loan would not be sound and proper
§ 1822.272 Approval or disapproval of a loan.

The provisions of 7 CFR part 3560, subpart B will be followed.

[69 FR 69103, Nov. 26, 2004]

§ 1822.273 Actions subsequent to loan approval.

After the loan is approved, actions to be taken will be in accordance with 7 CFR part 3560, subpart B.

[69 FR 69103, Nov. 26, 2004]

§ 1822.274 Loan closing.

(a) Applicable instructions. The complete loan docket will be sent to the OGC for loan closing instructions. RHS loans will be closed in accordance with applicable provisions of subpart B of part 1927 of this chapter, and State Instructions which supplement this Instruction, and closing instructions of the OGC, and with the assistance of the approved attorney, representatives of the title insurance company, or local attorney, whichever is appropriate.

(b) Mortgage. Unless the OGC determines the Form to be inappropriate, real estate mortgage Form FmHA or its successor under Public Law 103–354 1927–1 (state). “Real Estate Mortgage for ______” will be used for all RHS section 524 loans modified as prescribed by or with the advice of the OGC with respect to the name, address, and other identification of the borrower, the style of execution, and the acknowledgement. Additional paragraphs will be included in the mortgage to read as follows:

The borrower agrees not to discriminate in the sale of the dwelling financed under this mortgage due to a prospective purchaser’s race, color, national origin, sex, religion, age, marital status, or handicap. The borrower further agrees to comply with all Federal, State, or local laws and ordinances prohibiting discrimination in the sale of housing. The borrower’s failure or refusal to comply with this agreement will be a basis for the FmHA or its successor agency under Public Law 103–354 to deny future requests for participation in its rural housing programs and activities.

This instrument also secures the obligations and covenants of borrower set forth in Borrower’s Loan Resolution of ___ (date), which is hereby incorporated herein by reference.

(c) Promissory note. Form RD 3560–52, “Promissory Note,” will be used. Instructions for preparation will be in accordance with the FMI and the following:

(1) The total amount to be shown in the note will be the amount of the loan shown on Form RD 3560–51. The note will be dated the date of the loan closing.

(2) The note will be signed in accordance with subpart B of part 1927 of this chapter and the forms manual insert for Form RD 3560–52 (available in any FmHA or its successor agency under Public Law 103–354 office).

(3) Payments shall not be deferred.

(d) Recorded mortgage. When the real estate mortgage is returned by the recording official, the county supervisor will retain the original in the borrower’s case folder. If the original is retained by the recording official for the county records, a conformed copy including the recording data showing the date and place of recordation and book and page number will be prepared and filed in the borrower’s case folder. A copy of the mortgage will be delivered to the borrower but will be conformed only if required by State law or if it is the custom of other lenders in the area.

(e) Date of loan closing. An RHS loan is considered closed when the mortgage is filed of record.

§ 1822.275 Actions after sites are developed.

The building sites will be sold on a nonprofit basis to eligible families or
organizations as described in §1822.266(c).

(a) An option, Form FmHA or its successor agency under Public Law 103–354 440–34, “Option to Purchase Real Property,” will be executed. The site will be clearly identified by a land survey.

(b) The sale price of each individual site will not be more than a sufficient amount to pay a proportionate part of the RHS loan and any other actual costs of buying, developing, and selling the building site.

(c) The proceeds from sale of the building sites will be applied on the RHS loan and any prior lien or, with the prior approval of the National Office, used in a manner consistent with the purpose of the loan and the security interest of the Government. The sites will be released from the mortgage in accordance with 7 CFR part 3550, subpart D or otherwise in accordance with prior approval of the National Office.

§ 1822.276 Subsequent RHS loans.

A subsequent RHS loan is an RHS loan to an applicant indebted for an initial RHS loan. Subsequent RHS loans will be made on the same basis as initial RHS loans.

§ 1822.277 Complaints regarding discrimination in opportunity to buy developed sites.

Any applicant wishing to purchase a site financed by an RHS loan who believes he or she has been discriminated against because of race, color, national origin, sex, handicap, or age, may file a complaint with the County Supervisor or State Director. Any such complaint will be handled in accordance with 7 CFR 3560.2.

§ 1822.278 Special requirements for RHS section 523 loans (loans to organizations providing sites for self-help housing).

Loans to organizations which will provide sites for self-help housing (RHS sec. 523 loans) will be made under the provisions of this subpart with the following exceptions:

(a) Eligibility. The applicant must be a nonprofit organization engaged in assisting self-help projects.

(b) Interest. The interest rate will be 3 percent per annum on the unpaid principal balance.

(c) Source of funds. These will be direct loans made from the self-help fund.

(d) Evidence of need. Loans to newly formed organizations will be made on the basis of the applicant’s providing firm information as to the number of sites to be developed and the names of eligible bona fide prospective purchasers who are assured of available home financing. Loans to organizations currently involved in mutual self-help housing projects may be made without submitting a list of the names of prospective site purchasers. There must, however, be definite evidence that enough families are available who are eligible and who will buy the sites when they are developed.

(e) Multiple advances. These loans may be disbursed over a period not to exceed 18 months from the date of the first advance.

(f) Note forms. Form RD 3560–52, “Multiple Family Housing Promissory Note,” will be used. See §1822.274 (c).

(g) Mortgage. Unless the OGC determines the Form to be inappropriate, real estate mortgage Form FmHA or its successor agency under Public Law 103–354 1927–1 (state), “Real Estate for (Direct Loan),” will be used modified as prescribed by or with the advice of the OGC with respect to the name, address, and other identification of the borrower, the style of execution, and the acknowledgment. Additional paragraphs will be included in the mortgage to read as follows:

The borrower agrees not to discriminate in the sale of the dwelling financed under this mortgage due to a prospective purchaser’s race, color, national origin, sex, religion, age, marital status, or handicap. The borrower further agrees to comply with all Federal, State, or local laws and ordinances prohibiting discrimination in the sale of housing. The borrower’s failure or refusal to comply with this agreement will be a basis for the FmHA or its successor agency under Public Law 103–354 to deny future requests
§ 1822.279

for participation in its rural housing programs and activities.

This instrument also secures the obligations and covenants of borrower set forth in Borrower’s Loan Resolution of (date), which is hereby incorporated herein by reference.

§ 1822.279 Loan supervision and servicing.

Loan supervision and loan servicing will be provided according to 7 CFR part 3560.

[69 FR 69104, Nov. 26, 2004]

EXHIBITS A–B TO SUBPART G TO PART 1822 [RESERVED]

EXHIBIT C TO SUBPART G OF PART 1822—SUBORDINATION BY THE GOVERNMENT FOR USE WITH RURAL HOUSING SITE LOANS

Whereas, The United States of America acting through the Farmers Home Administration or its successor agency under Public Law 103–354 (hereinafter called the “Government”) is the holder of the following-described instrument(s) executed by

of County, State of (hereinafter called the “Borrower”)

<table>

And whereas, (hereinafter called the “Lender”) has agreed to provide a loan to the borrower or to a builder designated by the borrower to construct a home on the property described in this instrument.

Now Therefore, in consideration of the Lender’s agreement to make such loan to the borrower, the Government hereby consents to the Borrower obtaining said loan from the lender, and agrees to and hereby surrenders in favor of the Lender and his successors and assigns its liens or security interests created or evidenced by the above-described instrument(s) insomuch as they cover the following described property:

Except That, The Government shall retain a first lien or security interest in the above-described property in an amount of $ ___.

Such first lien will be released only when satisfactory evidence is provided indicating that the lot with completed home is being sold to a family eligible for assistance under any section of Title V of the Housing Act of 1949 or under any other law which provides financial assistance for housing low- and moderate-income families and that the benefits of the nonprofit development of the site are being passed on to the eligible purchaser and that the amount of that first lien is paid on the Borrower’s Rural Housing Site Loan debt to the Government.

This subordination is limited to the amount actually loaned by the Lender to the Borrower for the foregoing purpose, but shall not exceed $ ___.

Only the above described property is affected by this subordination. This subordination shall not otherwise affect or modify the obligations secured by the aforesaid lien instrument(s), and the said obligations shall continue in force and effect until fully paid, satisfied, and discharged.

No member of Congress shall be admitted to any share or part of this agreement or to any benefit that may arise thereupon.

In Witness Whereof, The United States of America has caused these presents to be signed on the _____ day of _____, 19—, pursuant to delegated authority published in 7 CFR, Part 1800.

50–60 (T–9) REA Specifications—Single Pole Steel Structures, Complete with Arms 12/71.

50–70 (U–1) REA Specifications for 15 kV and 25 kV Primary Underground Power Cable 12/87.

50–72 (U–4) REA Specifications for Electrical Equipment Enclosures (5–35 kV) 10/79.

50–73 (U–5) REA Specifications for Pad-Mounted Transformers (Single and Three-Phase) 1/77.

50–74 (U–6) REA Specifications for Secondary Pedestals (600 Volts and Below) 10/79.

50–91 (S–3) REA Specifications for Step-Down Distribution Substation Transformers (34.4–138 kV) 1/78.

345–6 REA Standard for Splicing Plastic-insulated Cables (PC–2) 1/78.

345–13 REA Specifications for Aerial and Underground Telephone Cable (PE–22) 1/83.

345–29 REA Specifications for Self-supporting Cable (PE–38) 2/82

345–39 REA Specifications for Telephone Station Protectors 3/83

345–52 REA Standard for Service Entrance and Station Protector Installations (PC–5A) 1/80.

345–52 REA Standard for Station Installations (PC–5B) 4/81

345–54 REA Specifications for Telephone Cable Splicing Connectors (PE–52) 12/71.

345–63 REA Standard for Acceptance Tests and Measurements of Telephone Plant (PC–4) 5/76.

345–65 REA Specifications for Cable Shield Bonding Connectors (PE–33) 6/78.

345–69 REA Specifications for Two-wire Voice Frequency Repeater Equipment (PE–29) 1/78.

345–72 REA Specifications for Filled Splice Cases (PE–74) 1/76

345–75 REA Specifications for Electronic Trunk Circuits (PE–65) 1/77.

345–168 REA Specifications for Equipment for Direct Distance Dialing (Form 538) 10/77.
Material Approved for Incorporation by Reference

### Table of CFR Titles and Chapters

(Revised as of January 1, 2008)

#### Title 1—General Provisions

I  Administrative Committee of the Federal Register (Parts 1–49)
II  Office of the Federal Register (Parts 50–299)
IV  Miscellaneous Agencies (Parts 400–500)

#### Title 2—Grants and Agreements

**Subtitle A—Office of Management and Budget Guidance for Grants and Agreements**

I  Office of Management and Budget Governmentwide Guidance for Grants and Agreements (Parts 100–199)
II  Office of Management and Budget Circulars and Guidance (200–299)

**Subtitle B—Federal Agency Regulations for Grants and Agreements**

III  Department of Health and Human Services (Parts 300–399)
VI  Department of State (Parts 600–699)
VIII  Department of Veterans Affairs (Parts 800–899)
IX  Department of Energy (Parts 900–999)
XI  Department of Defense (Parts 1100–1199)
XIV  Department of the Interior (Parts 1400–1499)
XV  Environmental Protection Agency (Parts 1500–1599)
XVIII  National Aeronautics and Space Administration (Parts 1880–1899)
XXII  Corporation for National and Community Service (Parts 2200–2299)
XXIV  Housing and Urban Development (Parts 2400–2499)
XXV  National Science Foundation (Parts 2500–2599)
XXVI  National Archives and Records Administration (Parts 2600–2699)
XXVII  Small Business Administration (Parts 2700–2799)
XXVIII  Department of Justice (Parts 2800–2899)
XXXII  National Endowment for the Arts (Parts 3200–3299)
XXXIII  National Endowment for the Humanities (Parts 3300–3399)
XXXV  Export-Import Bank of the United States (Parts 3500–3599)
XXXVII  Peace Corps (Parts 3700–3799)

List of CFR Sections Affected

All changes in this volume of the Code of Federal Regulations that were made by documents published in the Federal Register since January 1, 2001, are enumerated in the following list. Entries indicate the nature of the changes effected. Page numbers refer to Federal Register pages. The user should consult the entries for chapters and parts as well as sections for revisions.
