

shall make an environmental evaluation before approval. If the environmental evaluation shows that the implementation of a proposed FSA practice on an individual farm will have significant adverse effects on the quality of the human environment, the county committee will not approve the practice implementation until after the completion of the NEPA-EIS process in accordance with this part. For those actions for which technical assistance is provided by an agency other than FSA, and such technical agency is required by its regulations to implement NEPA requirements when providing such assistance, the county committee shall use the environmental determination and considerations of such agency instead of duplicating the NEPA-EIS process. Individual farm participation in acreage set-aside, acreage allotments, price support and loans and other similar or related programs will not significantly affect the quality of the human environment.

(e) Pooling agreements and special projects carried out under several FSA programs involving two or more farmers in a local geographic area will not normally require any major involvement with the NEPA process. However, the county committee shall, with the assistance of a local interdisciplinary team, as necessary, make an environmental evaluation of proposed pooling agreements or special projects that have a potential for significantly affecting the quality of the human environment. The NEPA process shall begin with the initial involvement of FSA personnel in the planning or development of pooling agreements or special projects. If it is determined from an environmental evaluation that the implementation of a proposed pooling agreement or a proposed special project will have a significant adverse impact on the quality of the human environment, the completion of the NEPA-EIS process in accordance with these regulations will be necessary before approval. For those actions for which technical assistance is provided by an agency other than FSA and such technical agency is required by its regulations to implement NEPA when providing such assistance the county committee shall use the environmental de-

terminations and considerations of such agency instead of duplicating the NEPA-EIS process.

§ 799.10 Criteria and identification of FSA actions as to degree of involvement under the NEPA process.

(a) FSA will for each of its legislative proposals, initial program implementations, program changes or any actions under its ongoing programs make a determination by the use of an environmental evaluation as to whether or not an environmental assessment or EIS is required.

(b) The NEPA regulations issued by CEQ at 40 CFR 1507.3(b)(2) in conjunction with the regulations at 40 CFR 1508.4 require agencies to determine those typical classes of actions for treatment under NEPA. The typical classes of FSA actions for treatment under NEPA are set forth as follows:

(1) Actions normally requiring an EIS are:

(i) Production adjustment programs to balance supply and demand of specified commodities, through cropland set-aside or other acreage diversion.

(ii) Agricultural Conservation Program.

(iii) Rural Clean Water Program.

(iv) Other major actions that are determined after an environmental evaluation and/or an environmental assessment to significantly affect the quality of the human environment.

(2) Actions normally not requiring an assessment or an EIS are:

(i) Individual farm participation in FSA programs.

(ii) Pooling agreements and special projects under FSA programs.

(iii) Production adjustment programs for tobacco, peanuts and extra long staple cotton.

(iv) Emergency Conservation Program.

(v) Water Bank Program.

(vi) Forestry Incentives Program.

(vii) Sugar Program.

(viii) Wool and Mohair Incentives Program.

(ix) Bee and Dairy Indemnity Programs.

(x) Commodity Income and Support and Disaster Protection Programs.

(xi) Facility Loan Program.

(xii) Grain Reserve Program.

(xiii) Livestock Feed Program.

§ 799.11

(xiv) Naval Stores Program.
(xv) Indian Acute Distress Donation Program.

(xvi) Other major actions that are determined after an environmental evaluation not to significantly affect the quality of the human environment.

(c) FSA will independently determine by an environmental evaluation whether an environmental assessment or an EIS is required on actions included in paragraph (b) of this section where the presence of extraordinary circumstances or other unforeseeable factors indicate that some other level of environmental review may be appropriate.

(d) If an environmental evaluation indicates that an action will significantly affect the quality of the human environment, the preparation of an environmental assessment and/or an EIS will be necessary before the action is carried out.

§ 799.11 Expedited procedures.

Where emergency circumstances make it necessary to take action with

7 CFR Ch. VII (1-1-08 Edition)

significant environmental impact without following the provisions of the NEPA regulations issued by CEQ, USDA, and FSA, FSA will, by working through the USDA Office of Environmental Quality, consult with CEQ and/or EPA about alternative arrangements (7 CFR 3100.35).

§ 799.12 Program termination.

An environmental assessment or an EIS will not be needed when a program or part of a program is discontinued because of a mandatory legislative requirement where the enabling legislation for such program does not provide authority to ameliorate or mitigate any resulting environmental effects on the quality of the human environment.

§ 799.13 Environmental information.

Interested persons may contact the Conservation and Environmental Protection Division, FSA, for information regarding FSA compliance with NEPA.
