

§81.4

9 CFR Ch. I (1–1–08 Edition)

Certified status in accordance with §55.24 of this chapter; and

(2) The farmed or captive deer, elk, or moose is accompanied by a certificate issued in accordance with §81.4 of this part that identifies its herd of origin and its herd's CWD Herd Certification Program status, and states that it is not a CWD-positive, CWD-exposed, or CWD-suspect animal.

(b) *Animals captured for interstate movement and release.* If the captive deer, elk, or moose was captured for interstate movement and release from a free-ranging population, each animal must have two forms of animal identification, one of which is official animal identification, and a certificate accompanying the animal must document the source population to be low risk for CWD, based on a CWD surveillance program that is approved by the State Government of the receiving State and by APHIS.

(c) *Animals moved to slaughter.* The farmed or captive deer, elk, or moose must be moved directly to a recognized slaughtering establishment for slaughter, must have two forms of animal identification, one of which is official animal identification, and must be accompanied by a certificate issued in accordance with §81.4.

(d) *Research animal movements and permits.* A research animal permit is required for the interstate movement of cervids for research purposes. The permit will specify any special conditions of the movement determined by the Administrator to be necessary to prevent the dissemination of CWD. The Administrator may, at his or her discretion, issue the permit if he or she determines that the destination facility has adequate biosecurity and that the movement authorized will not result in the interstate dissemination of CWD.

(1) To apply for a research animal permit, contact an APHIS employee or State representative and provide the following information:

(i) The name and address of the person to whom the special permit is issued, the address at which the research cervids to be moved interstate are being held, and the name and address of the person receiving the cervids to be moved interstate;

(ii) The number and type of cervids to be moved interstate;

(iii) The reason for the interstate movement;

(iv) Any safeguards in place to prevent transmission of CWD during movement or at the receiving location; and

(v) The date on which movement will occur.

(2) A copy of the research animal permit must accompany the cervids moved, and copies must be submitted so that a copy is received by the State animal health official and the veterinarian in charge for the State of destination at least 72 hours prior to the arrival of the cervids at the destination listed on the research animal permit.

(e) *Interstate movements approved by the Administrator.* Notwithstanding any other provision of this part, interstate movement of farmed or captive deer, elk, and moose may be allowed on a case-by-case basis when the Administrator determines that adequate survey and mitigation procedures are in place to prevent dissemination of CWD and issues a permit for the movement.

§81.4 Issuance of certificates.

(a) *Information required on certificates.* A certificate must show any official animal identification numbers of each animal to be moved. A certificate must also show the number of animals covered by the certificate; the purpose for which the animals are to be moved; the points of origin and destination; the consignor; and the consignee. The certificate must include a statement by the issuing accredited veterinarian, State veterinarian, or Federal veterinarian that the animals were not exhibiting clinical signs associated with CWD at the time of examination and that the animals are from a herd participating in the CWD Herd Certification Program, and must provide the herd's program status; *Except that*, certificates issued for animals moved directly to slaughter do not need to state that the animals are from a herd participating in the CWD Herd Certification Program and must state that an APHIS employee or State representative has been notified in advance of the date the animals are being moved to slaughter.

(b) *Animal identification documents attached to certificates.* As an alternative to typing or writing individual animal identification on a certificate, another document may be used to provide this information, but only under the following conditions:

(1) The document must be a State form or APHIS form that requires individual identification of animals;

(2) A legible copy of the document must be stapled to the original and each copy of the certificate;

(3) Each copy of the document must identify each animal to be moved with the certificate, but any information pertaining to other animals, and any unused space on the document for recording animal identification, must be crossed out in ink; and

(4) The following information must be typed or written in ink in the identification column on the original and each copy of the certificate and must be circled or boxed, also in ink, so that no additional information can be added:

- (i) The name of the document; and
- (ii) Either the serial number on the document or, if the document is not imprinted with a serial number, both the name of the person who issued the document and the date the document was issued.

(Approved by the Office of Management and Budget under control number 0579-0237)

PART 82—EXOTIC NEWCASTLE DISEASE (END) AND CHLAMYDIOSIS

Subpart A—Exotic Newcastle Disease (END)

- Sec.
- 82.1 Definitions.
 - 82.2 Criteria for determining birds or poultry to be infected with, exposed to, or free from END.
 - 82.3 Quarantined areas.
 - 82.4 General provisions.
 - 82.5 Interstate movement of live birds and live poultry from a quarantined area.
 - 82.6 Interstate movement of dead birds and dead poultry from a quarantined area.
 - 82.7 Interstate movement of manure and litter from a quarantined area.
 - 82.8 Interstate movement of eggs, other than hatching eggs, from a quarantined area.
 - 82.9 Interstate movement of hatching eggs from a quarantined area.

82.10 Interstate movement of vehicles, cages, coops, containers, troughs, and other equipment from a quarantined area.

82.11 Issuance of permits.

82.12 Other interstate movements and special permits.

82.13 Denial and withdrawal of permits and special permits.

82.14 Removal of quarantine.

82.15 Replacement birds and poultry.

82.16 Extraordinary emergencies: applicability of regulations.

Subpart B—Chlamydiosis in Poultry

82.19 Definitions.

82.20 General restrictions.

82.21 Vehicles, cages, coops, containers, troughs, and other equipment used for infected poultry.

82.22 Cleaning and disinfecting premises.

82.23 Issuance of permits.

82.24 Other interstate movements and special permits.

82.25 Denial and withdrawal of permits and special permits.

AUTHORITY: 7 U.S.C. 8301-8317; 7 CFR 2.22, 2.80, and 371.4.

SOURCE: 61 FR 56883, Nov. 5, 1996, unless otherwise noted.

Subpart A—Exotic Newcastle Disease (END)

§ 82.1 Definitions.

As used in connection with this subpart, the following terms shall have the meaning set forth in this section.

Administrator. The Administrator of the Animal and Plant Health Inspection Service or any individual authorized to act for the Administrator.

Animal and Plant Health Inspection Service. The Animal and Plant Health Inspection Service of the United States Department of Agriculture.

Bird. Any member of the class *aves* other than poultry.

Dressed carcasses. Carcasses of birds or poultry that have been eviscerated, with heads and feet removed.

END. Any velogenic Newcastle disease. END is an acute, rapidly spreading, and usually fatal viral disease of birds and poultry.

Exposed. At risk of developing END because of association with birds or poultry infected with END, excrement from birds or poultry infected with
