

PART 360—STEEL IMPORT MONITORING AND ANALYSIS SYSTEM

Sec.

360.101 Steel import licensing.

360.102 Online registration.

360.103 Automatic issuance of import licenses.

360.104 Steel import monitoring.

360.105 Duration of the steel import licensing requirement.

360.106 Fees.

360.107 Hours of operation.

360.108 Loss of electronic licensing privileges.

AUTHORITY: 13 U.S.C. 301(a) and 302.

SOURCE: 70 FR 12136, Mar. 11, 2005, unless otherwise noted.

§ 360.101 Steel import licensing.

(a) *In general.* (1) All imports of basic steel mill products are subject to the import licensing requirements. These products are listed in Annex II. Registered users will be able to obtain steel import licenses on the Steel Import Monitoring and Analysis (SIMA) System Web site. This Web site contains two sections related to import licensing—the online registration system and the automatic steel import license issuance system. Information gathered from these licenses will be aggregated and posted on the import monitoring section of the SIMA system Web site.

(2) A single license may cover multiple products as long as certain information on the license (*e.g.*, importer, exporter, manufacturer and country of origin) remains the same. However, separate licenses for steel entered under a single entry will be required if the information differs. As a result, a single Customs entry may require more than one steel import license. The applicable license(s) must cover the total quantity of steel entered and should cover the same information provided on the Customs entry summary.

(b) *Entries for consumption.* All entries for consumption of covered steel products, other than the exception for “informal entries” listed in paragraph (d) of this section, will require an import license prior to the filing of Customs entry summary documents. The license number(s) must be reported on the entry summary (Customs Form 7501) at the time of filing. There is no require-

ment to present physical copies of the license forms at the time of entry summary. However, copies must be maintained in accordance with Customs’ normal requirements. Entry summaries submitted without the required license number(s) will be considered incomplete and will be subject to liquidated damages for violation of the bond condition requiring timely completion of entry.

(c) *Foreign Trade Zone entries.* All shipments of covered steel products into a foreign trade zones (FTZ), known as FTZ admissions, will require an import license prior to the filing of FTZ admission documents. The license number(s) must be reported on the application for FTZ admission and/or status designation (Customs form 214) at the time of filing. There is no requirement to present physical copies of the license forms at the time of FTZ admission; however, copies must be maintained in accordance with Customs’ normal requirements. FTZ admission documents submitted without the required license number(s) will not be considered complete and will be subject to liquidated damages for violation of the bond condition requiring timely completion of admission. A further steel license will not be required for shipments from zones into the commerce of the United States.

(d) *Informal entries.* No import license shall be required on informal entries of covered steel products, such as merchandise valued at less than \$2,000. This exemption applies to informal entries only, imports of steel valued at less than \$2,000 that are part of a formal entry will require a license. For additional information, refer to 19 CFR 143.21 through 143.28.

(e) *Other non-consumption entries.* Import licenses are not required on temporary importation bond (TIB) entries, transportation and exportation (T&E) entries or entries into a bonded warehouse. Covered steel products withdrawn for consumption from a bonded warehouse will require a license at the entry summary.

§ 360.102 Online registration.

(a) *In general.* (1) Any importer, importing company, customs broker or

importer's agent with a U.S. street address may register and obtain the user identification number necessary to log on to the automatic steel import license issuance system. Foreign companies may obtain a user identification number if they have a U.S. address through which they may be reached; P.O. boxes will not be accepted. A user identification number will be issued within two business days. Companies will be able to register online through the SIMA system Web site. However, should a company prefer to apply for a user identification number non-electronically, a phone/fax option will be available at Commerce during regular business hours.

(2) This user identification number will be required in order to log on to the steel import license issuance system. A single user identification number will be issued to an importer, customs broker or importer's agent. Operating units within the company (*e.g.*, individual branches, divisions or employees) will all use the same basic company user identification code but can supply suffixes to identify the branches. The steel import license issuance system will be designed to allow multiple users of a single identification number from different locations within the company to enter information simultaneously.

(b) *Information required to obtain a user identification number.* In order to obtain a user identification number, the importer, importing company, customs broker or importer's agent will be required to provide general information. This information will include: the filer company name, employer identification number (EIN) or Customs ID number (where no EIN is available), U.S. street address, phone number, contact information and e-mail address for both the company headquarters and any branch offices that will be applying for steel licenses. It is the responsibility of the applicant to keep the information up-to-date. This information will not be released by Commerce, except as required by U.S. law.

§ 360.103 Automatic issuance of import licenses.

(a) In general. Steel import licenses will be issued to registered importers,

customs brokers or their agents through an automatic steel import licensing system. The licenses will be issued automatically after the completion of the form.

(b) Customs entry number. Filers are not required to report a Customs entry number to obtain an import license but are encouraged to do so if the Customs entry number is known at the time of filing for the license.

(c) Information required to obtain an import license. (1) The following information is required to be reported in order to obtain an import license (if using the automatic licensing system, some of this information will be provided automatically from information submitted as part of the registration process):

- (i) Filer company name and address;
- (ii) Filer contact name, phone number, fax number and email address;
- (iii) Entry type (*i.e.*, Consumption, FTZ);
- (iv) Importer name;
- (v) Exporter name;
- (vi) Manufacturer name (filer may state "unknown");
- (vii) Country of origin;
- (viii) Country of exportation;
- (ix) Expected date of export;
- (x) Expected date of import;
- (xi) Expected port of entry;
- (xii) Current HTS number (from Chapters 72 or 73);
- (xiii) Quantity (in kilograms) and
- (xiv) Customs value (U.S. \$).

(2) Certain fields will be automatically filled out by the automatic license system based on information submitted by the filer (*e.g.*, product category, unit value). Filers should review these fields to help confirm the accuracy of the submitted data.

(3) Upon completion of the form, the importer, customs broker or the importer's agent will certify as to the accuracy and completeness of the information and submit the form electronically. After refreshing the page, the system will automatically issue a steel import license number. The refreshed form containing the submitted information and the newly issued license number will appear on the screen (the "license form"). Filers can print the license form themselves only at that time. For security purposes, users will

not be able to retrieve licenses themselves from the license system at a later date for reprinting. If needed, copies of completed license forms can be requested from Commerce during normal business hours.

(d) *Duration of the steel import license.* The steel import license can be applied for up to 60 days prior to the expected date of importation and until the date of filing of the entry summary documents, or in the case of FTZ entries, the filing of Customs form 214. The steel import license is valid for 75 days; however, import licenses that were valid on the date of importation but expired prior to the filing of entry summary documents will be accepted.

(e) *Correcting submitted license information.* Users will need to correct licenses themselves if they determine that there was an error submitted. To access a previously issued license, a user must log on with his user identification code and identify the license number and the volume (in kilograms) for the first product shown on the license. The information on the license should match the information presented on the CF-7501 entry summary document as closely as possible; this includes the value and volume of the shipment, the expected date of importation, and the customs district of entry.

(f) *Low-value licenses.* There is one exception to the requirement for obtaining a unique license for each Customs entry. If the total value of the covered steel portion of an entry is less than \$250, applicants may apply to Commerce for a low-value license that can be used in lieu of a single entry license for low-value entries.

§ 360.104 Steel import monitoring.

(a) Throughout the duration of the licensing requirement, Commerce will maintain an import monitoring system on the SIMA system Web site that will report certain aggregate information on imports of steel mill products obtained from the steel licenses. Aggregate data will be reported on a monthly basis by country of origin and steel mill product category and will include import quantity (metric tons), import Customs value (U.S. \$), and average unit value (\$/metric ton). The Web site

will also contain certain aggregate data at the 6-digit Harmonized Tariff Schedule level and will also present a range of historical data for comparison purposes. Provision of this aggregate data on the Web site may be revisited should concerns arise over the possible release of proprietary data.

(b) Reported monthly import data will be refreshed each week with new data on licenses issued during the previous week. This data will also be adjusted periodically for cancelled or unused steel import licenses, as appropriate.

§ 360.105 Duration of the steel import licensing requirement.

The licensing program will be in effect through March 21, 2013, but may be extended upon review and notification in the FEDERAL REGISTER prior to this expiration date. Licenses will be required on all subject imports entered during this period, even if the entry summary documents are not filed until after the expiration of this program. The licenses will be valid for 10 business days after the expiration of this program to allow for the final filing of required Customs documentation.

[74 FR 11476, Mar. 18, 2009]

§ 360.106 Fees.

No fees will be charged for obtaining a user identification number, issuing a steel import license or accessing the steel import surge monitoring system.

§ 360.107 Hours of operation.

The automatic licensing system will generally be accessible 24 hours a day, 7 days a week but may be unavailable at selected times for server maintenance. If the system is unavailable for an extended period of time, parties will be able to obtain licenses from Commerce directly via fax during regular business hours. Should the system be inaccessible for an extended period of time, Commerce would advise Customs to consider this as part of mitigation on any liquidated damage claims that may be issued.

§ 360.108 Loss of electronic licensing privileges.

Should Commerce determine that a filer consistently files inaccurate licensing information or otherwise abuses the licensing system, Commerce may revoke its electronic licensing privileges without prior notice. The filer will then only be able to obtain a license directly from Commerce. Because of the additional time need to review such forms, Commerce may require up to 10 working days to process such forms. Delays in filing caused by the removal of a filer's electronic filing privilege will not be considered a mitigating factor by the U.S. Customs Service.

PART 361—MEXICAN CEMENT IMPORT LICENSING SYSTEM

Sec.

361.101 Mexican Cement Import Licensing System.

361.102 Online registration.

361.103 Automatic issuance of import licenses.

361.104 Fees.

361.105 Hours of operation.

AUTHORITY: 13 U.S.C. 301(a) and 302.

SOURCE: 72 FR 10009, Mar. 6, 2007, unless otherwise noted.

§ 361.101 Mexican Cement Import Licensing System.

(a) *In general.* (1) On March 6, 2006, the Agreement between the Office of the United States Trade Representative and the Department of Commerce of the United States of America and the Ministry of Economy of the United Mexican States (Secretaria de Economia) on Trade in Cement (Agreement) was signed. Pursuant to the Agreement, the United States has agreed to implement an import licensing system for imports of merchandise covered by the scope of the anti-dumping duty order on Cement from Mexico. Some of the data to be collected is in addition to data currently collected by U.S. Customs and Border Protection (USCBP). The data collected by the Mexican Cement Import Licensing System will be used by the Department of Commerce (Commerce) to monitor imports of Mexican Cement, as the imports occur.

(2) Mexican Cement is defined as gray portland cement and clinker from Mexico. Gray portland cement is a hydraulic cement and the primary component of concrete. Clinker, an intermediate material produced when manufacturing cement, has no use other than being ground into finished cement. Specifically included within the scope of this definition are pozzolanic blended cements and oil well cements. Specifically excluded are white cement and Type "S" masonry cement. Gray portland cement is currently classifiable under the Harmonized Tariff Schedule of the United States (HTSUS) item number 2523.29 and cement clinker is currently classifiable under HTSUS item number 2523.10. Gray portland cement has also been entered under HTSUS item number 2523.90 as "other hydraulic cements." These HTSUS subheadings are provided for convenience and USCBP purposes; the written definition is controlling for purposes of this Agreement.

(3) The Mexican Cement Import Licensing System includes an online registration system. All imports of Mexican Cement covered by the scope of the Agreement, including samples, whether or not for consumption, are subject to the Mexican Cement Import Licensing requirements. Information gathered from these import licenses will be used to ensure that the terms of the Agreement are complied with and enforced.

(4) A single import license may cover multiple products if the following information reported on the import license remains the same: Company Name, Address, City, State, Zip, Contact Name, Contact Phone, Contact Fax, Contact E-mail, Importer Name, Exporter Name, Manufacturer Name, Country of Origin, Country of Exportation, Expected Port of Entry, Expected Date of Importation, Expected Date of Export, Customs Entry Number (if known), Date License Valid From, Date License Valid Through, Date of Application, Subregion of Final Destination, Type of Affiliation, U.S. Affiliate's Name, Address, County, City, State, Zip, Mexican Export License Number, and Disaster Relief Statement. Separate import licenses will be required for each type of Mexican Cement entry if the above information
