

(2) Any work required to be done in accordance with the provisions of the Walsh-Healey Public Contracts Act (49 Stat. 2036);

(3) Any contract for the carriage of freight or personnel by vessel, airplane, bus, truck, express, railway line, or oil or gas pipeline where published tariff rates are in effect;

(4) Any contract for the furnishing of services by radio, telephone, telegraph, or cable companies, subject to the Communications Act of 1934;

(5) Any contract for public utility services, including electric light and power, water, steam, and gas;

(6) Any employment contract providing for direct services to a Federal agency by an individual or individuals;

(7) Any contract with the Post Office Department, (now the U.S. Postal Service) the principal purpose of which is the operation of postal contract stations.

§4.116 Contracts for construction activity.

(a) *General scope of exemption.* The Act, in paragraph (1) of section 7, exempts from its provisions "any contract of the United States or District of Columbia for construction, alteration and/or repair, including painting and decorating of public buildings or public works." This language corresponds to the language used in the Davis-Bacon Act to describe its coverage (40 U.S.C. 276a). The legislative history of the McNamara-O'Hara Service Contract Act indicates that the purpose of the provision is to avoid overlapping coverage of the two acts by excluding from the application of the McNamara-O'Hara Act those contracts to which the Davis-Bacon Act is applicable and in the performance of which the labor standards of that Act are intended to govern the compensation payable to the employees of contractors and subcontractors on the work. (See H. Rept. 798, pp. 2, 5, and H. Rept. 948, pp. 1, 5, also Hearing, Special Subcommittee on Labor, House Committee on Education and Labor, p. 9 (89th Cong., 1st sess.)) The intent of section 7(1) is simply to exclude from the provisions of the Act those construction contracts which involve the employment of persons whose wage rates and

fringe benefits are determinable under the Davis-Bacon Act.

(b) *Contracts not within exemption.* Section 7(1) does not exempt contracts which, for purposes of the Davis-Bacon Act, are not considered to be of the character described by the corresponding language in that Act, and to which the provisions of the Davis-Bacon Act are therefore not applied. Such contracts are accordingly subject to the McNamara-O'Hara Act where their principal purpose is to furnish services in the United States through the use of service employees. For example, a contract for clearing timber or brush from land or for the demolition or dismantling of buildings or other structures located thereon may be a contract for construction activity subject to the Davis-Bacon Act where it appears that the clearing of the site is to be followed by the construction of a public building or public work at the same location. If, however, no further construction activity at the site is contemplated the Davis-Bacon Act is considered inapplicable to such clearing, demolition, or dismantling work. In such event, the exemption in section 7(1) of the McNamara-O'Hara Act has no application and the contract may be subject to the Act in accordance with its general coverage provisions. It should be noted that the fact that a contract may be labeled as one for the sale and removal of property, such as salvage material, does not negate coverage under the Act even though title to the removable property passes to the contractor. While the value of the property being sold in relation to the services performed under the contract is a factor to be considered in determining coverage, where the facts show that the principal purpose of removal, dismantling, and demolition contracts is to furnish services through the use of service employees, these contracts are subject to the Act. (See also §4.131.)

(c) *Partially exempt contracts.* (1) Instances may arise in which, for the convenience of the Government, instead of awarding separate contracts for construction work subject to the Davis-Bacon Act and for services of a different type to be performed by service employees, the contracting officer may include separate specifications for

§4.117

each type of work in a single contract calling for the performance of both types of work. For example, a contracting agency may invite bids for the installation of a plumbing system or for the installation of a security alarm system in a public building and for the maintenance of the system for one year. In such a case, if the contract is principally for services, the exemption provided by section 7(1) will be deemed applicable only to that portion of the contract which calls for construction activity subject to the Davis-Bacon Act. The contract documents are required to contain the clauses prescribed by §4.6 for application to the contract obligation to furnish services through the use of service employees, and the provisions of the McNamara-O'Hara Act will apply to that portion of the contract.

(2) *Service or maintenance contracts involving construction work.* The provisions of both the Davis-Bacon Act and the Service Contract Act would generally apply to contracts involving construction and service work where such contracts are principally for services. The Davis-Bacon Act, and thus the exemption provided by section 7(1) of the Act, would be applicable to construction contract work in such hybrid contracts where:

(i) The contract contains specific requirements for substantial amounts of construction, reconstruction, alteration, or repair work (hereinafter referred to as construction) or it is ascertainable that a substantial amount of construction work will be necessary for the performance of the contract (the word "substantial" relates to the type and quantity of construction work to be performed and not merely to the total value of construction work (whether in absolute dollars or cost percentages) as compared to the total value of the contract); and

(ii) The construction work is physically or functionally separate from, and as a practical matter is capable of being performed on a segregated basis from, the other work called for by the contract.

29 CFR Subtitle A (7-1-09 Edition)

§4.117 Work subject to requirements of Walsh-Healey Act.

(a) The Act, in paragraph (2) of section 7, exempts from its provisions "any work required to be done in accordance with the provision of the Walsh-Healey Public Contracts Act" (49 Stat. 2036, 41 U.S.C. 35 *et seq.*). It will be noted that like the similar provision in the Contract Work Hours and Safety Standards Act (40 U.S.C. 329(b)), this is an exemption for "work", i.e., specifications or requirements, rather than for "contracts" subject to the Walsh-Healey Act. The purpose of the exemption was to eliminate possible overlapping of the differing labor standards of the two Acts, which otherwise might be applied to employees performing work on a contract covered by the Service Contract Act if such contract and their work under it should also be deemed to be covered by the Walsh-Healey Act. The Walsh-Healey Act applies to contracts in excess of \$10,000 for the manufacture or furnishing of materials, supplies, articles or equipment. Thus, there is no overlap if the principal purpose of the contract is the manufacture or furnishing of such materials etc., rather than the furnishing of services of the character referred to in the Service Contract Act, for such a contract is not within the general coverage of the Service Contract Act. In such cases the exemption in section 7(2) is not pertinent. See, for example, the discussion in §§ 4.131 and 4.132.

(b) Further, contracts principally for remanufacturing of equipment which is so extensive as to be equivalent to manufacturing are subject to the Walsh-Healey Act. Remanufacturing shall be deemed to be manufacturing when the criteria in paragraph (b)(1) or (2) of this section are met.

(1) Major overhaul of an item, piece of equipment, or materiel which is degraded or inoperable, and under which all of the following conditions exist:

(i) The item or equipment is required to be completely or substantially torn down into individual components parts; and

(ii) Substantially all of the parts are reworked, rehabilitated, altered and/or replaced; and
