Department of Energy

conducted in accordance with the test requirements specified in section 6.5, Flow Capacity Test, of the ASME/ANSI Standard A112.18.1M–1996 (see § 430.22). Measurements shall be recorded at the resolution of the test instrumentation. Calculations shall be rounded off to the same number of significant digits as the previous step. The final water consumption value shall be rounded to one decimal place for non-metered faucets, or to two decimal places for metered faucets.

b. Urinals—The measurement of water flush volume for urinals, expressed in gallons per flush (gpf) and liters per flush (Lpf), shall be conducted in accordance with the test requirements specified in section 8.5, Water Consumption, of the ASME/ANSI Standard A112.19.6–1995 (see § 430.22).

APPENDIX U TO SUBPART B OF PART 430—UNIFORM TEST METHOD FOR MEASURING THE ENERGY CONSUMPTION OF CEILING FANS

1. Scope: This appendix covers the test requirements used to measure the energy performance of ceiling fans.

2. Definitions:
   a. Airflow means the rate of air movement at a specific fan-speed setting expressed in cubic feet per minute (CFM).
   b. Airflow efficiency means the ratio of airflow divided by power at a specific ceiling fan-speed setting expressed in CFM per watt (CFM/watt).

3. Test Apparatus and General Instructions: The test apparatus and instructions for testing ceiling fans shall conform to the requirements specified in Chapter 3, “Air-Delivery Room Construction and Preparation,” Chapter 4, “Equipment Set-up and Test Procedure,” and Chapter 6, “Definitions and Acronyms,” of the EPA’s “ENERGY STAR Testing Facility Guidance Manual: Building a Testing Facility and Performing the Solid State Test Method for ENERGY STAR Qualified Ceiling Fans,” Version 1.1, December 9, 2002 (incorporated by reference, see § 430.22). Record measurements at the resolution of the test instrumentation. Round off calculations to the same number of significant digits as the previous step. Round the final energy consumption value to the nearest whole number as follows:
   (i) A fractional number at or above the midpoint between the two consecutive whole numbers shall be rounded up to the higher of the two whole numbers;
   (ii) A fractional number below the midpoint between the two consecutive whole numbers shall be rounded down to the lower of the two whole numbers.

4. Test Measurement: Measure the airflow and airflow efficiency for ceiling fans, expressed in cubic feet per minute (CFM) and CFM per watt (CFM/watt), in accordance with the test requirements specified in Chapter 4, “Equipment Setup and Test Procedure,” of the EPA’s “ENERGY STAR Testing Facility Guidance Manual: Building a
