

§ 223.24

12 CFR Ch. II (1–1–10 Edition)

\$100. The initial carrying value of the shares is \$100. The member bank initially must value the investment at \$100. Going forward, if the member bank's carrying value of the shares declines to \$40, the member bank must continue to value the investment at \$100.

(iii) *Contribution of the shares of an affiliate.* The parent holding company of a member bank owns 100 percent of the shares of a mortgage company and contributes 30 percent of the shares to the member bank. The member bank gives no consideration in exchange for the shares. If the initial carrying value of the shares is \$300, then the member bank initially must value the investment at \$300. Going forward, if the member bank's carrying value of the shares increases to \$500, the member bank must value the investment at \$500.

(b) *Timing—(1) In general.* A purchase of or investment in a security issued by an affiliate remains a covered transaction for a member bank for as long as the member bank holds the security.

(2) *A member bank's purchase of or investment in a security issued by a nonaffiliate that becomes an affiliate of the member bank.* A member bank's purchase of or investment in a security issued by a nonaffiliate that becomes an affiliate of the member bank must be treated according to the same transition rules that apply to credit transactions described in paragraph (b)(2) of § 223.21.

§ 223.24 What valuation principles apply to extensions of credit secured by affiliate securities?

(a) *Valuation of extensions of credit secured exclusively by affiliate securities.* An extension of credit by a member bank to a nonaffiliate secured exclusively by securities issued by an affiliate of the member bank must be valued at the lesser of:

(1) The total value of the extension of credit; or

(2) The fair market value of the securities issued by an affiliate that are pledged as collateral, if the member bank verifies that such securities meet the market quotation standard contained in paragraph (e) of § 223.42 or the

standards set forth in paragraphs (f)(1) and (5) of § 223.42.

(b) *Valuation of extensions of credit secured by affiliate securities and other collateral.* An extension of credit by a member bank to a nonaffiliate secured in part by securities issued by an affiliate of the member bank and in part by nonaffiliate collateral must be valued at the lesser of:

(1) The total value of the extension of credit less the fair market value of the nonaffiliate collateral; or

(2) The fair market value of the securities issued by an affiliate that are pledged as collateral, if the member bank verifies that such securities meet the market quotation standard contained in paragraph (e) of § 223.42 or the standards set forth in paragraphs (f)(1) and (5) of § 223.42.

(c) *Exclusion of eligible affiliated mutual fund securities—(1) The exclusion.* Eligible affiliated mutual fund securities are not considered to be securities issued by an affiliate, and are instead considered to be nonaffiliate collateral, for purposes of paragraphs (a) and (b) of this section, unless the member bank knows or has reason to know that the proceeds of the extension of credit will be used to purchase the eligible affiliated mutual fund securities collateral or will otherwise be used for the benefit of or transferred to an affiliate of the member bank.

(2) *Definition.* "Eligible affiliated mutual fund securities" with respect to a member bank are securities issued by an affiliate of the member bank that is an open-end investment company registered with the Securities and Exchange Commission under the Investment Company Act of 1940 (15 U.S.C. 80a-1 *et seq.*), if:

(i) The securities issued by the investment company:

(A) Meet the market quotation standard contained in paragraph (e) of § 223.42;

(B) Meet the standards set forth in paragraphs (f)(1) and (5) of § 223.42; or

(C) Have closing prices that are made public through a mutual fund "supermarket" website maintained by an unaffiliated securities broker-dealer or mutual fund distributor; and

Federal Reserve System

§ 223.31

(ii) The member bank and its affiliates do not own or control in the aggregate more than 5 percent of any class of voting securities or of the equity capital of the investment company (excluding securities held by the member bank or an affiliate in good faith in a fiduciary capacity, unless the member bank or affiliate holds the securities for the benefit of the member bank or affiliate, or the shareholders, employees, or subsidiaries of the member bank or affiliate).

(3) *Example.* A member bank proposes to lend \$100 to a nonaffiliate secured exclusively by eligible affiliated mutual fund securities. The member bank knows that the nonaffiliate intends to use all the loan proceeds to purchase the eligible affiliated mutual fund securities that would serve as collateral for the loan. Under the attribution rule in § 223.16, the member bank must treat the loan to the nonaffiliate as a loan to an affiliate, and, because securities issued by an affiliate are ineligible collateral under § 223.14, the loan would not be in compliance with § 223.14.

Subpart D—Other Requirements Under Section 23A

§ 223.31 How does section 23A apply to a member bank's acquisition of an affiliate that becomes an operating subsidiary of the member bank after the acquisition?

(a) *Certain acquisitions by a member bank of securities issued by an affiliate are treated as a purchase of assets from an affiliate.* A member bank's acquisition of a security issued by a company that was an affiliate of the member bank before the acquisition is treated as a purchase of assets from an affiliate, if:

(1) As a result of the transaction, the company becomes an operating subsidiary of the member bank; and

(2) The company has liabilities, or the member bank gives cash or any other consideration in exchange for the security.

(b) *Valuation—(1) Initial valuation.* A transaction described in paragraph (a) of this section must be valued initially at the greater of:

(i) The sum of:

(A) The total amount of consideration given by the member bank in exchange for the security; and

(B) The total liabilities of the company whose security has been acquired by the member bank, as of the time of the acquisition; or

(ii) The total value of all covered transactions (as computed under this part) acquired by the member bank as a result of the security acquisition.

(2) *Ongoing valuation.* The value of a transaction described in paragraph (a) of this section may be reduced after the initial transfer to reflect:

(i) Amortization or depreciation of the assets of the transferred company, to the extent that such reductions are consistent with GAAP; and

(ii) Sales of the assets of the transferred company.

(c) *Valuation example.* The parent holding company of a member bank contributes between 25 and 100 percent of the voting shares of a mortgage company to the member bank. The parent holding company retains no shares of the mortgage company. The member bank gives no consideration in exchange for the transferred shares. The mortgage company has total assets of \$300,000 and total liabilities of \$100,000. The mortgage company's assets do not include any loans to an affiliate of the member bank or any other asset that would represent a separate covered transaction for the member bank upon consummation of the share transfer. As a result of the transaction, the mortgage company becomes an operating subsidiary of the member bank. The transaction is treated as a purchase of the assets of the mortgage company by the member bank from an affiliate under paragraph (a) of this section. The member bank initially must value the transaction at \$100,000, the total amount of the liabilities of the mortgage company. Going forward, if the member bank pays off the liabilities, the member bank must continue to value the covered transaction at \$100,000. If the member bank, however, sells \$15,000 of the transferred assets of the mortgage company or if \$15,000 of the transferred assets amortize, the member bank may value the covered transaction at \$85,000.
