

**§ 250.221****12 CFR Ch. II (1-1-10 Edition)**

(i) The Board has previously taken the position, in an interpretation involving the term *affiliate* under the Banking Act of 1933, that it would not require a member bank to obtain and publish a report of a corporation the majority of the stock of which is held by the member bank as executor or trustee, provided that the member bank holds such stock subject to control by a court or by a beneficiary or other principal and that the member bank may not lawfully exercise control of such stock independently of any order or direction of a court, beneficiary or other principal. 1933 Federal Reserve Bulletin 651. The rationale of that interpretation—which was reaffirmed by the Board in 1957—would appear to be equally applicable to the facts in the present case. In the circumstances, and on the basis of the Board's understanding that the bank will not vote any of Fund's shares or control in any manner the election of any of its directors, trustees, or other persons exercising similar functions, the Board has concluded that the situation in question would not fall within the purpose or coverage of section 20 of the Banking Act of 1933 and, therefore, would not involve a violation of the statute.

**§ 250.221 Issuance and sale of short-term debt obligations by bank holding companies.**

(a) The opinion of the Board of Governors of the Federal Reserve System has been requested recently with respect to the proposed sale of "thrift notes" by a bank holding company for the purpose of supplying capital to its wholly-owned nonbanking subsidiaries.

(b) The thrift notes would bear the name of the holding company, which in the case presented, was substantially similar to the name of its affiliated banks. It was proposed that they be issued in denominations of \$50 to \$100 and initially be of 12-month or less maturities. There would be no maximum amount of the issue. Interest rates would be variable according to money market conditions but would presumably be at rates somewhat above those permitted by Regulation Q ceilings. There would be no guarantee or indemnity of the notes by any of the banks in

the holding company system and, if required to do so, the holding company would place on the face of the notes a negative representation that the purchase price was not a deposit, nor an indirect obligation of banks in the holding company system, nor covered by deposit insurance.

(c) The notes would be generally available for sale to members of the public, but only at offices of the holding company and its nonbanking subsidiaries. Although offices of the holding company may be in the same building or quarters as its banking offices, they would be physically separated from the banking offices. Sales would be made only by officers or employees of the holding company and its nonbanking subsidiaries. Initially, the notes would only be offered in the State in which the holding company was principally doing business, thereby complying with the exemption provided by section 3(a)(11) of the Securities Act of 1933 (15 U.S.C. 77c) for "intra-state" offerings. If it was decided to offer the notes on an interstate basis, steps would be taken to register the notes under the Securities Act of 1933. Funds from the sale of the notes would be used only to supply the financial needs of the nonbanking subsidiaries of the holding company. These nonbank subsidiaries are, at present, a small loan company, a mortgage banking company and a factoring company. In no instance would the proceeds from the sale of the notes be used in the bank subsidiaries of the holding company nor to maintain the availability of funds in its bank subsidiaries.

(d) The sale of the thrift notes, in the specific manner proposed, is an activity described in section 20 of the Banking Act of 1933 (12 U.S.C. 377), that is, "the issue, flotation, underwriting, public sale or distribution \* \* \* of \* \* \* notes, or other securities". Briefly stated, this statute prohibits a member bank to be affiliated with a company "engaged principally" in such activity. Since the continued issuance and sale of such securities would be necessary to permit maintenance of the holding company's activities without substantial contraction and would be an integral part of its operations, the Board concluded that the issuance and sale of

**Federal Reserve System****§ 250.400**

such notes would constitute a principal activity of a holding company within the spirit and purpose of the statute. (For prior Board decisions in this connection, see 1934 Federal Reserve Bulletin 485, 12 CFR 218.104, 12 CFR 218.105 and 12 CFR 218.101.)

(e) In reaching this conclusion, the Board distinguished the proposed activity from the sale of short-term notes commonly known as *commercial paper*, which is a recognized form of financing for bank holding companies. For purposes of this interpretation, *commercial paper* may be defined as notes, with maturities not exceeding nine months, the proceeds of which are to be used for current transactions, which are usually sold to sophisticated institutional investors, rather than to members of the general public, in minimum denominations of \$10,000 (although sometimes they may be sold in minimum denominations of \$5,000). Commercial paper is exempt from registration under the Securities Act of 1933 by reason of the exemption provided by section 3(a)(3) thereof (15 U.S.C. 77c). That exemption is inapplicable where the securities are sold to the general public (17 CFR 231.4412). The reasons for such exemption, taken together with the abuses that gave rise to the passage of the Banking Act of 1933 ('the Glass-Steagall Act'), have led the Board to conclude that the issuance of commercial paper by a bank holding company is not an activity intended to be included within the scope of section 20.

(Interprets and applies 12 U.S.C. 377 and 1843)

[Reg. Y, 38 FR 35231, Dec. 26, 1973]

**§ 250.260 Miscellaneous interpretations; gold coin and bullion.**

The Board has received numerous inquiries from member banks relating to the repeal of the ban on ownership of gold by United States citizens. Listed below are questions and answers which affect member banks and relate to the responsibilities of the Federal Reserve System.

(a) May gold in the form of coins or bullion be counted as vault cash in order to satisfy reserve requirements? No. Section 19(c) of the Federal Reserve Act requires that reserve balances be satisfied either by a balance

maintained at the Federal Reserve Bank or by vault cash, consisting of United States currency and coin. Gold in bullion form is not United States currency. Since the bullion value of United States gold coins far exceeds their face value, member banks would not in practice distribute them over the counter at face value to satisfy customer demands.

(b) Will the Federal Reserve Banks perform services for member banks with respect to gold, such as safe-keeping or assaying? No.

(c) Will a Federal Reserve Bank accept gold as collateral for an advance to a member bank under section 10(b) of the Federal Reserve Act? No.

[39 FR 45254, Dec. 31, 1974]

**INTERPRETATIONS OF SECTION 32 OF THE GLASS-STEAGALL ACT****§ 250.400 Service of open-end investment company.**

An open-end investment company is defined in section 5(a)(1) of the Investment Company Act of 1940 as a company "which is offering for sale or has outstanding any redeemable security of which it is the issuer." Section 2(a)(31) of said act provides that a *redeemable security* means "any security, other than short-term paper, under the terms of which the holder, upon its presentation to the issuer or to a person designated by the issuer, is entitled (whether absolutely or only out of surplus) to receive approximately his proportionate share of the issuer's current net assets, or the cash equivalent thereof."

It is customary for such companies to have but one class of securities, namely, capital stock, and it is apparent that the more or less continued process of redemption of the stock issued by such a company would restrict and contract its activities if it did not continue to issue its stock. Thus, the issuance and sale of its stock is essential to the maintenance of the company's size and to the continuance of operations without substantial contraction, and therefore the issue and sale of its stock constitutes one of the primary activities of such a company.
