be of short, finite duration not to exceed 1 year without exception, and usually shall not exceed 6 months. These agreements shall be closely monitored and shall not be renewed.

(5) Agreements for the testing use of the Argos DCS by equipment manufacturers shall be valid for 1 year from the date of initial testing, and may be renewed for additional 1-year periods.

(e)(1) Agreements for the collection of environmental data, by the GOES DCS, shall be valid for 5 years from the date of initial in-situ deployment, and may be renewed for additional 5-year periods.

(2) Agreements for the testing use of the GOES DCS, by equipment manufacturers, shall be valid for 1 year from the date of initial testing, and may be renewed for additional 1-year periods.

(3) Agreements for the collection of non-environmental data, via the GOES DCS, by government agencies, or nonprofit institutions where there is a government interest, shall be valid for 1 year from the date of initial in-situ deployment, and may be renewed for additional 1-year periods.

(4) Agreements for the episodic collection of non-environmental data, via the GOES DCS under §911.4(c)(4), shall be of short, finite duration not to exceed 1 year without exception, and usually shall not exceed 6 months. These agreements shall be closely monitored and shall not be renewed.

§911.8 Technical requirements.

(a) All platform operators of the NOAA DCS must use a data collection platform radio set whose technical and design characteristics are certified to conform to applicable specifications and regulations.

(b) Raw data from the NOAA space segment is openly transmitted and accessible.

(c) Accessibility of the NOAA DCS processed data from the ground segment is handled in accordance with the users specifications and system design limitations, subject to the provisions stated in paragraph (a) of this section.

[68 FR 45161, Aug. 1, 2003]

§911.7 Continuation of the NOAA Data Collection Systems.

(a) NOAA expects to continue to operate DCS on its geostationary and polar-orbiting satellites, subject to the availability of future appropriations. However, viable commercial space-based alternatives may eventually obviate the need for NOAA to operate its own space-based DCS.

(b) If use of the system in support of NOAA programs increases, it eventually may be necessary to further restrict system usage by other users. If such restrictions on use become necessary, or in the event that NOAA discontinues operation of GOES and/or POES, NOAA will provide, to the maximum extent practicable, advance notice and an orderly transition.

(c) NOAA will not be responsible for any losses resulting from the nonavailability of the NOAA DCS.

§911.6 Treatment of data.

(a) All NOAA DCS users must agree to permit NOAA and other agencies of the U.S. Government the full, open, timely, and appropriate use as determined by NOAA, of all environmental data collected from their platforms; this may include the international distribution of environmental data under the auspices of the World Meteorological Organization.

(b) Raw data from the NOAA space segment is openly transmitted and accessible.

(c) Accessibility of the NOAA DCS processed data from the ground segment is handled in accordance with the users specifications and system design limitations, subject to the provisions stated in paragraph (a) of this section.
