

§416.1029

are assuming the disability determination function or we are notified that the State is terminating the relationship.

§416.1029 Participation in research and demonstration projects.

We will invite State participation in federally funded research and demonstration projects to assess the effectiveness of the disability program and to ascertain the effect of program policy changes. Where we determine that State participation is necessary for the project to be complete, for example, to provide national uniformity in a claims process, State participation is mandatory.

§416.1030 Coordination with other agencies.

(a) The State will establish cooperative working relationships with other agencies concerned with serving the disabled and, insofar as practicable, use their services, facilities, and records to:

(1) Assist the State in developing evidence and making determinations of disability; and

(2) Insure that referral of disabled or blind persons for rehabilitation services will be carried out effectively.

(b) The State may pay these agencies for the services, facilities, or records they provide. The State will include these costs in its estimates of anticipated costs and reports of actual expenditures.

§416.1031 Confidentiality of information and records.

The State will comply with the confidentiality of information, including the security of systems, and records requirements described in 20 CFR part 401 and pertinent written guidelines (see §416.1033).

§416.1032 Other Federal laws and regulations.

The State will comply with the provisions of other Federal laws and regulations that directly affect its responsibilities in carrying out the disability determination function; for example, Treasury Department regulations on letters of credit (31 CFR part 205).

20 CFR Ch. III (4-1-10 Edition)

§416.1033 Policies and operating instructions.

(a) We will provide the State agency with written guidelines necessary for it to carry out its responsibilities in performing the disability determination function.

(b) The State agency making determinations of disability will comply with our written guidelines that are not designated as advisory or discretionary. (See §416.1002 for what we mean by written guidelines.)

(c) A representative group of State agencies will be given an opportunity to participate in formulating disability program policies that have an effect on their role in carrying out the disability determination function. State agencies will also be given an opportunity to comment before changes are made in written guidelines unless delay in issuing a change may impair service to the public.

PERFORMANCE STANDARDS

§416.1040 General.

The following sections provide the procedures and guidelines we use to determine whether the State agency is substantially complying with our regulations and other written guidelines, including meeting established national performance standards. We use performance standards to help assure effective and uniform administration of our disability program and to measure whether the performance of the disability determination function by each State agency is acceptable. Also, the standards are designed to improve overall State agency performance in the disability determination process and to ensure that benefits are made available to all eligible persons in an accurate and efficient manner. We measure the performance of a State agency in two areas—processing time and quality of documentation and decisions on claims. State agency compliance is also judged by State agency adherence to other program requirements.
