medical evidence the file does not contain such as clinical findings, laboratory tests, a diagnosis or prognosis necessary for decision.

(b) Situations requiring a consultative examination. A consultative examination may be purchased when the evidence as a whole, both medical and nonmedical, is not sufficient to support a decision on your claim. Other situations, including but not limited to the situations listed below, will normally require a consultative examination:

1. The additional evidence needed is not contained in the records of your medical sources;
2. The evidence that may have been available from your treating or other medical sources cannot be obtained for reasons beyond your control, such as death or noncooperation of a medical source;
3. Highly technical or specialized medical evidence that we need is not available from your treating or other medical sources;
4. A conflict, inconsistency, ambiguity or insufficiency in the evidence must be resolved, and we are unable to do so by recontacting your medical source; or
5. There is an indication of a change in your condition that is likely to affect your ability to work, or, if you are a child, your functioning, but the current severity of your impairment is not established.

§ 416.919h Your treating source.

When in our judgment your treating source is qualified, equipped, and willing to perform the additional examination or tests for the fee schedule payment, and generally furnishes complete and timely reports, your treating source will be the preferred source to do the purchased examination. Even if

§ 416.919f Type of purchased examinations.

We will purchase only the specific examinations and tests we need to make a determination in your claim. For example, we will not authorize a comprehensive medical examination when the only evidence we need is a special test, such as an X-ray, blood studies, or an electrocardiogram.

§ 416.919g Who we will select to perform a consultative examination.

(a) We will purchase a consultative examination only from a qualified medical source. The medical source may be your own physician or psychologist, or another source. If you are a child, the medical source we choose may be a pediatrician. For a more complete list of medical sources, see § 416.913.

(b) By “qualified,” we mean that the medical source must be currently licensed in the State and have the training and experience to perform the type of examination or test we will request; the medical source must also have the equipment required to provide an adequate assessment and record of the existence and level of severity of your alleged impairments.

(c) The medical source we choose may use support staff to help perform the consultative examination. Any such support staff (e.g., X-ray technician, nurse) must meet appropriate licensing or certification requirements of the State. See § 416.903a.

§ 416.919h Your treating source.

When in our judgment your treating source is qualified, equipped, and willing to perform the additional examination or tests for the fee schedule payment, and generally furnishes complete and timely reports, your treating source will be the preferred source to do the purchased examination. Even if
§ 416.919i Other sources for consultative examinations.

We will use a medical source other than your treating source for a purchased examination or test in situations including, but not limited to, the following situations:

(a) Your treating source prefers not to perform such an examination or does not have the equipment to provide the specific data needed;

(b) There are conflicts or inconsistencies in your file that cannot be resolved by going back to your treating source;

(c) You prefer a source other than your treating source and have a good reason for your preference;

(d) We know from prior experience that your treating source may not be a productive source, e.g., he or she has consistently failed to provide complete or timely reports.

[65 FR 11879, Mar. 7, 2000]

§ 416.919j Objections to the medical source designated to perform the consultative examination.

You or your representative may object to your being examined by a medical source we have designated to perform a consultative examination. If there is a good reason for the objection, we will schedule the examination with another medical source. A good reason may be that the medical source we designated had previously represented an interest adverse to you. For example, the medical source may have represented your employer in a workers’ compensation case or may have been involved in an insurance claim or legal action adverse to you. Other things we will consider include: The presence of a language barrier, the medical source’s office location (e.g., 2nd floor, no elevator), travel restrictions, and whether the medical source had examined you in connection with a previous disability determination or decision that was unfavorable to you. If your objection is that a medical source allegedly “lacks objectivity” in general, but not in relation to you personally, we will review the allegations. See §416.919s. To avoid a delay in processing your claim, the consultative examination in your case will be changed to another medical source while a review is being conducted. We will handle any objection to use of the substitute medical source in the same manner. However, if we had previously conducted such a review and found that the reports of the medical source in question conformed to our guidelines, we will not change your examination.

[65 FR 11879, Mar. 7, 2000]

§ 416.919k Purchase of medical examinations, laboratory tests, and other services.

We may purchase medical examinations, including psychiatric and psychological examinations, X-rays and laboratory tests (including specialized tests, such as pulmonary function studies, electrocardiograms, and stress tests) from a medical source.

(a) Subject to the provisions of §405.805(b)(2) of this chapter in claims adjudicated under the procedures in part 405 of this chapter, the rate of payment to be used for purchasing medical or other services necessary to make determinations of disability may not exceed the highest rate paid by Federal or public agencies in the State for the same or similar types of service. See §§416.1024 and 416.1026 of this part.

(b) If a physician’s bill, or a request for payment for a physician’s services, includes a charge for a laboratory test for which payment may be made under this part, the amount payable with respect to the test shall be determined as follows:

(1) If the bill or request for payment indicates that the test was personally performed or supervised by the physician who submitted the bill (or for whose services the request for payment was made) or by another physician with whom that physician shares his or her practice, the payment will be based on the physician’s usual and customary charge for the test or the rates of payment which the State uses for purchasing such services, whichever is the lesser amount.
