Toxocara canis and Toxascaris leonina and whipworm infections caused by Trichuris vulpis in dogs and in puppies 4 weeks of age or greater and 1 pounds of body weight or greater.

(iii) Limitations. Do not use in puppies less than 4 weeks of age and less than 1 pounds of body weight. Administer once a month. First dose given within 1 month after first exposure to mosquitoes and continue regular use until at least 1 month after end of mosquito season. Federal law restricts this drug to use by or on the order of a licensed veterinarian.

Cat and kittens—(i) Amount. 0.91 milligram per pound of body weight (2.0 milligrams per kilogram).

(ii) Indications for use. For prevention of heartworm disease caused by Dirofilaria immitis and the removal of adult Toxocara cati (roundworm) and Ancylostoma tubaeforme (hookworm) infections in cats 6 weeks of age or greater and 1.5 pounds body weight or greater.

(iii) Limitations. Do not use in kittens less than 6 weeks of age or 1.5 pounds body weight. Administer once a month. Federal law restricts this drug to use by or on the order of a licensed veterinarian.

Monensin oral dosage forms.

Monensin, as the base or the sodium salt, contains a minimum of 90 percent monensin activity derived from monensin A and a minimum of 95 percent derived from monensin A plus B. Using thin layer chromatography, the \( R_f \) value must be comparable to a reference standard (the \( R_f \) value is the distance the spots travel from the starting line divided by the distance the solvent front travels from the starting line). The loss on drying is not more than 10 percent when dried in vacuum at 60 °C for 2 hours.

Monensin blocks.

(a)(1) Specifications. Each pound of protein-mineral block contains 400 milligrams of monensin (0.088 percent) as monensin sodium.

(b) Sponsor. See No. 067949 in §510.600(c) of this chapter.

(c) Related tolerances. See §556.420 of this chapter.
