

(1)(i) The design-builder must submit written acquisition and relocation procedures to the STD for approval prior to commencing right-of-way activities. These procedures should contain a prioritized appraisal, acquisition, and relocation strategy as well as check points for STD approval, such as approval of just compensation, replacement housing payment calculations, replacement housing payment and moving cost claims, appraisals, administrative and stipulated settlements that exceed determined thresholds based on a risk management analysis, etc. STD's which have an FHWA approved procedures manual, in accordance with 23 CFR 710.201(c), may comply with this section by requiring the design-builder to execute a certification in its proposal that it has received the approved right-of-way manual and will comply with the procedures.

(ii) The written relocation plan must provide reasonable time frames for the orderly relocation of residents and businesses on the project as provided at 49 CFR 24.205. It should be understood that these time frames will be based on best estimates of the time it will take to acquire the right-of-way and relocate families in accordance with certain legal requirements and time frames which may not be violated. Accordingly, the time frames estimated for right-of-way acquisition will not be compressed in the event other necessary actions preceding right-of-way acquisition miss their assigned due dates.

(2)(i) The design-builder must establish a project tracking system and quality control system. This system must show the appraisal, acquisition and relocation status of all parcels.

(ii) The quality control system may be administered by an independent consultant with the necessary expertise in appraisal, acquisition and relocation policies and procedures, who can make periodic reviews and reports to the design-builder and the STD.

(3) The STD may consider the establishment of a hold off zone around all occupied properties to ensure compliance with right-of-way procedures prior to starting construction activities in affected areas. The limits of this

zone should be established by the STD prior to the design-builder entering on the property. There should be no construction related activity within the hold off zone until the property is vacated. The design-builder must have written notification of vacancy from the right-of-way quality control consultant or STD prior to entering the hold off zone.

(4) Adequate access shall be provided to all occupied properties to insure emergency and personal vehicle access.

(5) Utility service must be available to all occupied properties at all times prior to and until relocation is completed.

(6) Open burning should not occur within 305 meters (1,000 feet) of an occupied dwelling.

(7) The STD will provide a right-of-way project manager who will serve as the first point of contact for all right-of-way issues.

(e) If the STD elects to perform all right-of-way services relating to the design-build contract, the provisions in § 710.311 will apply. The STD will notify potential offerors of the status of all right-of-way issues in the request for proposal document.

[67 FR 75935, Dec. 10, 2002]

Subpart D—Real Property Management

§ 710.401 General.

This subpart describes the acquiring agency's responsibilities to control the use of real property required for a project in which Federal funds participated in any phase of the project. Prior to allowing any change in access control or other use or occupancy of acquired property along the Interstate, the STD shall secure an approval from the FHWA for such change or use. The STD shall specify in the State's ROW operations manual, procedures for the rental, leasing, maintenance, and disposal of real property acquired with title 23 of the United States Code funds. The State shall assure that local agencies follow the State's approved procedures, or the local agencies own procedures if approved for use by the STD.
