

## Wage and Hour Division, Labor

## § 541.303

originality or talent in a recognized field of artistic or creative endeavor as opposed to routine mental, manual, mechanical or physical work. The exemption does not apply to work which can be produced by a person with general manual or intellectual ability and training.

(b) To qualify for exemption as a creative professional, the work performed must be “in a recognized field of artistic or creative endeavor.” This includes such fields as music, writing, acting and the graphic arts.

(c) The requirement of “invention, imagination, originality or talent” distinguishes the creative professions from work that primarily depends on intelligence, diligence and accuracy. The duties of employees vary widely, and exemption as a creative professional depends on the extent of the invention, imagination, originality or talent exercised by the employee. Determination of exempt creative professional status, therefore, must be made on a case-by-case basis. This requirement generally is met by actors, musicians, composers, conductors, and soloists; painters who at most are given the subject matter of their painting; cartoonists who are merely told the title or underlying concept of a cartoon and must rely on their own creative ability to express the concept; essayists, novelists, short-story writers and screen-play writers who choose their own subjects and hand in a finished piece of work to their employers (the majority of such persons are, of course, not employees but self-employed); and persons holding the more responsible writing positions in advertising agencies. This requirement generally is not met by a person who is employed as a copyist, as an “animator” of motion-picture cartoons, or as a retoucher of photographs, since such work is not properly described as creative in character.

(d) Journalists may satisfy the duties requirements for the creative professional exemption if their primary duty is work requiring invention, imagination, originality or talent, as opposed to work which depends primarily on intelligence, diligence and accuracy. Employees of newspapers, magazines, television and other media are not exempt

creative professionals if they only collect, organize and record information that is routine or already public, or if they do not contribute a unique interpretation or analysis to a news product. Thus, for example, newspaper reporters who merely rewrite press releases or who write standard recounts of public information by gathering facts on routine community events are not exempt creative professionals. Reporters also do not qualify as exempt creative professionals if their work product is subject to substantial control by the employer. However, journalists may qualify as exempt creative professionals if their primary duty is performing on the air in radio, television or other electronic media; conducting investigative interviews; analyzing or interpreting public events; writing editorials, opinion columns or other commentary; or acting as a narrator or commentator.

### § 541.303 Teachers.

(a) The term “employee employed in a bona fide professional capacity” in section 13(a)(1) of the Act also means any employee with a primary duty of teaching, tutoring, instructing or lecturing in the activity of imparting knowledge and who is employed and engaged in this activity as a teacher in an educational establishment by which the employee is employed. The term “educational establishment” is defined in § 541.204(b).

(b) Exempt teachers include, but are not limited to: Regular academic teachers; teachers of kindergarten or nursery school pupils; teachers of gifted or disabled children; teachers of skilled and semi-skilled trades and occupations; teachers engaged in automobile driving instruction; aircraft flight instructors; home economics teachers; and vocal or instrumental music instructors. Those faculty members who are engaged as teachers but also spend a considerable amount of their time in extracurricular activities such as coaching athletic teams or acting as moderators or advisors in such areas as drama, speech, debate or journalism are engaged in teaching. Such activities are a recognized part of the schools’ responsibility in contributing

## § 541.304

to the educational development of the student.

(c) The possession of an elementary or secondary teacher's certificate provides a clear means of identifying the individuals contemplated as being within the scope of the exemption for teaching professionals. Teachers who possess a teaching certificate qualify for the exemption regardless of the terminology (*e.g.*, permanent, conditional, standard, provisional, temporary, emergency, or unlimited) used by the State to refer to different kinds of certificates. However, private schools and public schools are not uniform in requiring a certificate for employment as an elementary or secondary school teacher, and a teacher's certificate is not generally necessary for employment in institutions of higher education or other educational establishments. Therefore, a teacher who is not certified may be considered for exemption, provided that such individual is employed as a teacher by the employing school or school system.

(d) The requirements of § 541.300 and Subpart G (salary requirements) of this part do not apply to the teaching professionals described in this section.

### § 541.304 Practice of law or medicine.

(a) The term "employee employed in a bona fide professional capacity" in section 13(a)(1) of the Act also shall mean:

(1) Any employee who is the holder of a valid license or certificate permitting the practice of law or medicine or any of their branches and is actually engaged in the practice thereof; and

(2) Any employee who is the holder of the requisite academic degree for the general practice of medicine and is engaged in an internship or resident program pursuant to the practice of the profession.

(b) In the case of medicine, the exemption applies to physicians and other practitioners licensed and practicing in the field of medical science and healing or any of the medical specialties practiced by physicians or practitioners. The term "physicians" includes medical doctors including general practitioners and specialists, osteopathic physicians (doctors of osteopathy), podiatrists, dentists (doctors

## 29 CFR Ch. V (7-1-10 Edition)

of dental medicine), and optometrists (doctors of optometry or bachelors of science in optometry).

(c) Employees engaged in internship or resident programs, whether or not licensed to practice prior to commencement of the program, qualify as exempt professionals if they enter such internship or resident programs after the earning of the appropriate degree required for the general practice of their profession.

(d) The requirements of § 541.300 and subpart G (salary requirements) of this part do not apply to the employees described in this section.

### Subpart E—Computer Employees

#### § 541.400 General rule for computer employees.

(a) Computer systems analysts, computer programmers, software engineers or other similarly skilled workers in the computer field are eligible for exemption as professionals under section 13(a)(1) of the Act and under section 13(a)(17) of the Act. Because job titles vary widely and change quickly in the computer industry, job titles are not determinative of the applicability of this exemption.

(b) The section 13(a)(1) exemption applies to any computer employee compensated on a salary or fee basis at a rate of not less than \$455 per week (or \$380 per week, if employed in American Samoa by employers other than the Federal Government), exclusive of board, lodging or other facilities, and the section 13(a)(17) exemption applies to any computer employee compensated on an hourly basis at a rate not less than \$27.63 an hour. In addition, under either section 13(a)(1) or section 13(a)(17) of the Act, the exemptions apply only to computer employees whose primary duty consists of:

(1) The application of systems analysis techniques and procedures, including consulting with users, to determine hardware, software or system functional specifications;

(2) The design, development, documentation, analysis, creation, testing or modification of computer systems or programs, including prototypes, based on and related to user or system design specifications;
