such weeks the employee is in fact paid at an hourly rate and the minimum hourly guaranty which he was paid is his regular rate in that week. In the example just given, if the employee was guaranteed $5.50 an hour for productive working time, he would be paid $253 (46×$5.50) for the 46 hours of productive work (instead of the $245.50 earned at piece rates). In a week in which no waiting time was involved, he would be owed an additional $2.75 (half time) for each of the 6 overtime hours worked, to bring his total compensation up to $269.50 (46 hours at $5.50 plus 6 hours at $8.25). If he is paid at a different rate for waiting time, his regular rate is the weighted average of the 2 hourly rates, as discussed in §778.115.

§ 778.112 Day rates and job rates.

If the employee is paid a flat sum for a day’s work or for doing a particular job, without regard to the number of hours worked in the day or at the job, and if he receives no other form of compensation for services, his regular rate is determined by totaling all the sums received at such day rates or job rates in the workweek and dividing by the total hours actually worked. He is then entitled to extra half-time pay at this rate for all hours worked in excess of 40 in the workweek.

§ 778.113 Salaried employees—general.

(a) Weekly salary. If the employee is employed solely on a weekly salary basis, his regular hourly rate of pay, on which time and a half must be paid, is computed by dividing the salary by the number of hours which the salary is intended to compensate. If an employee is hired at a salary of $182.70 and if it is understood that this salary is compensation for a regular workweek of 35 hours, the employee’s regular rate of pay is $182.70 divided by 35 hours, or $5.22 an hour, and when he works overtime he is entitled to receive $5.22 for each of the first 40 hours and $7.83 (one and one-half times $5.22) for each hour thereafter. If an employee is hired at a salary of $220.80 for a 40-hour week his regular rate is $5.52 an hour.

(b) Salary for periods other than workweek. Where the salary covers a period longer than a workweek, such as a month, it must be reduced to its workweek equivalent. A monthly salary is subject to translation to its equivalent weekly wage by multiplying by 12 (the number of months) and dividing by 52 (the number of weeks). A semimonthly salary is translated into its equivalent weekly wage by multiplying by 24 and dividing by 52. Once the weekly wage is arrived at, the regular hourly rate of pay will be calculated as indicated above. The regular rate of an employee who is paid a regular monthly salary of $1,040, or a regular semimonthly salary of $520 for 40 hours a week, is thus found to be $6 per hour. Under regulations of the Administrator, pursuant to the authority given to him in section 7(g)(3) of the Act, the parties may provide that the regular rates shall be determined by dividing the monthly salary by the number of working days in the month and then by the number of hours of the normal or regular workday. Of course, the resultant rate in such a case must not be less than the statutory minimum wage.

[46 FR 7310, Jan. 23, 1981]

§ 778.114 Fixed salary for fluctuating hours.

(a) An employee employed on a salary basis may have hours of work which fluctuate from week to week and the salary may be paid him pursuant to an understanding with his employer that he will receive such fixed amount as straight time pay for whatever hours he is called upon to work in a workweek, whether few or many. Where there is a clear mutual understanding of the parties that the fixed salary is compensation (apart from overtime premiums) for the hours worked each workweek, whatever their number, rather than for working 40 hours or some other fixed weekly work period, such a salary arrangement is permitted by the Act if the amount of the salary is sufficient to provide compensation to the employee at a rate not less than the applicable minimum wage rate for every hour worked in those workweeks in which the number of hours he works is greatest, and if he receives extra compensation, in addition to such salary, for all overtime hours worked at a rate not less than one-half
