

## § 780.326

the duties designated as range production duties would be exempt. This is true even though the employee may perform some activities not directly related to the range production of livestock, such as putting up hay or constructing dams or digging irrigation ditches.

### § 780.326 On the range.

(a) For purposes of this exemption, "range" is defined generally as land that is not cultivated. It is land that produces native forage for animal consumption, and includes land that is revegetated naturally or artificially to provide a forage cover that is managed like range vegetation. "Forage" as used here means "browse" or herbaceous food that is available to livestock or game animals.

(b) The range may be on private or Federal or State land, and need not be open. Typically it is not only noncultivated land, but land that is not suitable for cultivation because it is rocky, thin, semiarid, or otherwise poor. Typically, also, many acres of range land are required to graze one animal unit (five sheep or one cow) for 1 month. By its nature, range production of livestock is most typically conducted over wide expanses of land, such as thousands of acres.

### § 780.327 Production of livestock.

For an employee to be engaged in the production of livestock, he must be actively taking care of the animals or standing by in readiness for that purpose. Thus, such activities as herding, handling, transporting, feeding, watering, caring for, branding, tagging, protecting, or otherwise assisting in the raising of livestock and in such immediately incidental duties as inspecting and repairing fences, wells, and windmills would be considered as the production of livestock. On the other hand, such work as terracing, reseeding, haying, and constructing dams, wells, and irrigation ditches would not be considered as the production of livestock within the meaning of the exemption.

### § 780.328 Meaning of livestock.

The term "livestock" includes cattle, sheep, horses, goats, and other domes-

## 29 CFR Ch. V (7-1-10 Edition)

tic animals ordinarily raised or used on the farm. This is further discussed in § 780.120. Turkeys or domesticated fowl are considered poultry and not livestock within the meaning of this exemption.

### § 780.329 Exempt work.

(a) The standard that must be used to determine whether the individual employee is exempt is that his primary duty must be the range production of livestock and that this duty necessitates his constant attendance on the range, on a standby basis, for such periods of time so as to make the computation of hours worked extremely difficult. The fact that an employee generally returns to his place of residence at the end of each day would not affect the application of the exemption.

(b) Thus, exempt work must be performed away from the "headquarters." The headquarters is not, however, to be confused with the "headquarters ranch." The term headquarters has reference to the place for the transaction of the business of the ranch (administrative center), as distinguished from buildings or lots used for convenience elsewhere. It is a particular location for the discharge of the management duties. Accordingly, the term "headquarters" would not embrace large acreage, but only the ranchhouse, barns, sheds, pen, bunkhouse, cookhouse, and other buildings in the vicinity. The balance of the "headquarters ranch" would be the "range."

(c) Furthermore, the legislative history indicates that this exemption was not intended to apply to feed lots or to any area where the stock involved would be near headquarters. Its sponsors stated that the exemption would apply only to those employees principally engaged in activities which require constant attendance on a standby basis, away from headquarters, such as herding, where the computation of hours worked would be extremely difficult. Such constant surveillance of livestock that graze and reproduce on range lands is necessary to see that the animals receive adequate care, water, salt, minerals, feed supplements, and protection from insects, parasites, disease, predators, adverse weather, etc.
