

## § 651.30

agricultural lands; coastal zones; designated wilderness or wilderness study areas; wild and scenic rivers; National Historic Landmarks (designated by the Secretary of the Interior); 100-year floodplains; wetlands; sole source aquifers (potential sources of drinking water); National Wildlife Refuges; National Parks; areas of critical environmental concern; or other areas of high environmental sensitivity.

(4) Cultural Resources as defined in AR 200-4.

(d) The use of a CX does not relieve the proponent from compliance with other statutes, such as RCRA, or consultations under the Endangered Species Act or the NHPA. Such consultations may be required to determine the applicability of the CX screening criteria.

(e) For those CXs that require a REC, a brief (one to two sentence) presentation of conclusions reached during screening is required in the REC. This determination can be made using current information and expertise, if available and adequate, or can be derived through conversation, as long as the basis for the determination is included in the REC. Copies of appropriate interagency correspondence can be attached to the REC. Example conclusions regarding screening criteria are as follows:

(1) "USFWS concurred in informal coordination that E/T species will not be affected".

(2) "Corps of Engineers determined action is covered by nationwide general permit".

(3) "SHPO concurred with action".

(4) "State Department of Natural Resources concurred that no effect to state sensitive species is expected".

### § 651.30 CX actions.

Types of actions that normally qualify for CX are listed in Appendix B of this part.

### § 651.31 Modification of the CX list.

The Army list of CXs is subject to continual review and modification, in consultation with CEQ. Additional modifications can be implemented through submission, through channels, to ASA (I&E) for consideration and consultation. Subordinate Army head-

## 32 CFR Ch. V (7-1-09 Edition)

quarters may not modify the CX list through supplements to this part. Upon approval, proposed modifications to the list of CXs will be published in the FEDERAL REGISTER, providing an opportunity for public review and comment.

### Subpart E—Environmental Assessment

#### § 651.32 Introduction.

(a) An EA is intended to facilitate agency planning and informed decision-making, helping proponents and other decision makers understand the potential extent of environmental impacts of a proposed action and its alternatives, and whether those impacts (or cumulative impacts) are significant. The EA can aid in Army compliance with NEPA when no EIS is necessary. An EA will be prepared if a proposed action:

(1) Is not an emergency (§ 651.11(b)).

(2) Is not exempt from (or an exception to) NEPA (§ 651.11(a)).

(3) Does not qualify as a CX (§ 651.11(c)).

(4) Is not adequately covered by existing NEPA analysis and documentation (§ 651.19).

(5) Does not normally require an EIS (§ 651.42).

(b) An EA can be 1 to 25 pages in length and be adequate to meet the requirements of this part, depending upon site-specific circumstances and conditions. Any analysis that exceeds 25 pages in length should be evaluated to consider whether the action and its effects are significant and thus warrant an EIS.

#### § 651.33 Actions normally requiring an EA.

The following Army actions normally require an EA, unless they qualify for the use of a CX:

(a) Special field training exercises or test activities in excess of five acres on Army land of a nature or magnitude not within the annual installation training cycle or installation master plan.

(b) Military construction that exceeds five contiguous acres, including contracts for off-post construction.
