

## § 201.16

Counsel, U.S. Copyright Office, Copyright GC/I&R, P.O. Box 70400, Washington, DC 20024,” and deposited with the United States Postal Service.

[74 FR 39902, Aug. 10, 2009]

EFFECTIVE DATE NOTE: At 74 FR 39902, Aug. 10, 2009, §201.15 was added, effective Aug. 10, 2009 through July 1, 2011.

## § 201.16 [Reserved]

### § 201.17 Statements of Account covering compulsory licenses for secondary transmissions by cable systems.

(a) *General.* This section prescribes rules pertaining to the deposit of Statements of Account and royalty fees in the Copyright Office as required by section 111(d)(2) of title 17 of the United States Code in order for secondary transmissions of cable systems to be subject to compulsory licensing.

(b) *Definitions.* (1) Gross receipts for the “basic service of providing secondary transmissions of primary broadcast transmitters” include the full amount of monthly (or other periodic) service fees for any and all services or tiers of services which include one or more secondary transmissions of television or radio broadcast signals, for additional set fees, and for converter fees. In no case shall gross receipts be less than the cost of obtaining the signals of primary broadcast transmitters for subsequent retransmission. All such gross receipts shall be aggregated and the distant signal equivalent (DSE) calculations shall be made against the aggregated amount. Gross receipts for secondary transmission services do not include installation (including connection, relocation, disconnection, or reconnection) fees, separate charges for security, alarm or facsimile services, charges for late payments, or charges for pay cable or other program origination services: *Provided That*, the origination services are not offered in combination with secondary transmission service for a single fee.

(2) A *cable system* is a facility, located in any State, Territory, Trust Territory, or Possession, that in whole or in part receives signals transmitted or programs broadcast by one or more television broadcast stations licensed by

## 37 CFR Ch. II (7–1–10 Edition)

the Federal Communications Commission, and makes secondary transmissions of such signals or programs by wires, cables, microwave, or other communications channels to subscribing members of the public who pay for such service. A system that meets this definition is considered a “cable system” for copyright purposes, even if the FCC excludes it from being considered a “cable system” because of the number or nature of its subscribers or the nature of its secondary transmissions. The Statements of Account and royalty fees to be deposited under §201.17 of this section, shall be recorded and deposited by each individual cable system desiring its secondary transmissions to be subject to compulsory licensing. The owner of each individual cable system on the last day of the accounting period covered by a Statement of Account is responsible for depositing the Statement of Account and remitting the copyright royalty fees. For these purposes, and the purpose of §201.17 of this section, an “individual” cable system is each cable system recognized as a distinct entity under the rules, regulations, and practices of the Federal Communications Commission in effect on the last day of the accounting period covered by a Statement of Account, in the case of the preparation and deposit of a Statement of Account and copyright royalty fee. For these purposes, two or more cable facilities are considered as one individual cable system if the facilities are either:

(i) In contiguous communities under common ownership or control or

(ii) Operating from one headend.

(3) *FCC* means the Federal Communications Commission.

(4) In the case of cable systems which make secondary transmissions of all available FM radio signals, which signals are not electronically processed by the system as separate and discrete signals, an FM radio signal is “generally receivable” if:

(i) It is usually carried by the system whenever it is received at the system’s headend, and

(ii) As a result of monitoring at reasonable times and intervals, it can be expected to be received at the system’s headend, with the system’s FM antenna, at least three consecutive hours
