

§ 17.1001

NOTE TO §17.1000: In cases where a patient is admitted for inpatient care, health care providers furnishing emergency treatment who believe they may have a basis for filing a claim with VA for payment under 38 U.S.C. 1725 should contact VA within 48-hours after admission for emergency treatment. Such contact is not a condition of VA payment. However, the contact will assist the provider in understanding the conditions for payment. The contact may also assist the provider in planning for transfer of the veteran after stabilization.

(Authority: 38 U.S.C. 1725)

§ 17.1002 Substantive conditions for payment or reimbursement.

Payment or reimbursement under 38 U.S.C. 1725 for emergency services may be made only if all of the following conditions are met:

(a) The emergency services were provided in a hospital emergency department or a similar facility held out as providing emergency care to the public;

(b) The claim for payment or reimbursement for the initial evaluation and treatment is for a condition of such a nature that a prudent layperson would have reasonably expected that delay in seeking immediate medical attention would have been hazardous to life or health (this standard would be met if there were an emergency medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain) that a prudent layperson who possesses an average knowledge of health and medicine could reasonably expect the absence of immediate medical attention to result in placing the health of the individual in serious jeopardy, serious impairment to bodily functions, or serious dysfunction of any bodily organ or part);

(c) A VA or other Federal facility/provider was not feasibly available and an attempt to use them beforehand would not have been considered reasonable by a prudent layperson (as an example, these conditions would be met by evidence establishing that a veteran was brought to a hospital in an ambulance and the ambulance personnel determined that the nearest available appropriate level of care was at a non-VA medical center);
