#### §63.3004 What definitions apply to this subpart?

Terms used in this subpart are defined the Clean Air Act, in §63.2, and in this section as follows:

Administrator means the Administrator of the United States Environmental Protection Agency or his or her authorized representative (e.g., a State that has been delegated the authority to implement the provisions of this part).

Binder application vacuum exhaust means the exhaust from the vacuum system used to remove excess resin solution from the wet-formed fiberglass mat before it enters the drying and curing oven.

Deviation means any instance in which an affected source subject to this subpart, or an owner or operator of such a source:

(1) Fails to meet any requirement or obligation established by this subpart, including but not limited to any emission limit, or operating limit, or work practice standard;

(2) Fails to meet any term or condition that is adopted to implement an applicable requirement in this subpart and that is included in the operating permit for any affected source required to obtain such a permit: or

(3) Fails to meet any emission limit, or operating limit, or work practice Pt. 63, Subpt. HHHH, Table 1

standard in this subpart during startup, shutdown, or malfunction, regardless of whether or not such failure is permitted by this subpart.

Drying and curing oven means the process section that evaporates excess moisture from a fiberglass mat and cures the resin that binds the fibers.

Emission limitation means an emission limit, operating limit, or work practice standard.

Fiberglass mat production rate means the weight of finished fiberglass mat produced per hour of production including any trim removed after the binder is applied and before final packaging.

Loss-on-ignition means the percentage decrease in weight of fiberglass mat measured before and after it has been ignited to burn off the applied binder. The loss-on-ignition is used to monitor the weight percent of binder in fiberglass mat.

Nonwoven wet-formed fiberglass mat manufacturing means the production of a fiberglass mat by bonding glass fibers to each other using a resin solution. Nonwoven wet-formed fiberglass mat manufacturing is also referred to as wet-formed fiberglass mat manufacturing.

Roofing square means the amount of finished product needed to cover an area 10 feet by 10 feet (100 square feet) of finished roof.

Thermal oxidizer means an air pollution control device that uses controlled flame combustion inside a combustion chamber to convert combustible materials to noncombustible gases.

Urea-formaldehyde content in binder formulation means the mass-based percent of urea-formaldehyde resin in the total binder mix as it is applied to the glass fibers to form the mat.

#### §§63.3005-63.3079 [Reserved]

### TABLE 1 TO SUBPART HHHH OF PART 63-MINIMUM REQUIREMENTS FOR MONITORING AND RECORDKEEPING

As stated in §63.2998(c), you must comply with the minimum requirements for monitoring and recordkeeping in the following table:

You must monitor these parameters:	At this frequency:	And record for the monitored perameter:
Thermal oxidizer temperature a     Other process or control device parameters specified in your OMM <sup>b</sup> plan.		15-minute and 3-hour block averages. As specified in your OMM plan.

# Pt. 63, Subpt. HHHH, Table 2

# 40 CFR Ch. I (7-1-09 Edition)

You must monitor these parameters:	At this frequency:	And record for the monitored perameter:
3. Urea-formaldehyde resin solids applica- tion rate.	On each operating day, calculate the av- erage lb/hr application rate for each product manufactured during that day.	The average lb/hr value for each product manufactured during the day.
4. Resin free-formaldehyde content	For each lot of resin purchased	The value for each lot used during the operating day.
5. Loss-on-ignition <sup>c</sup>	Measured at least once per day, for each product manufactured during that day.	The value for each product manufac- tured during the operating day.
6. UF-to-latex ratio in the binder c	For each batch of binder prepared the operating day.	The value for each batch of binder pre- pared during the operating day.
<ol> <li>Weight of the final mat product per square (lb/roofing square)<sup>c</sup>.</li> </ol>	Each product manufactured during the operating day.	The value for each product manufac- tured during the operating day.
8. Average nonwoven wet-formed fiber- glass mat production rate (roofing squares per the hour) c.	For each product manufactured during the operating day.	The average value for each product manufactured during operating day.

<sup>a</sup> Required if a thermal oxidizer is used to control formaldehyde emissions.
 <sup>b</sup> Required if process modifications or a control device other than a thermal oxidizer is used to control emissions.
 <sup>c</sup> These parameters must be monitored and values recorded, but no operating limits apply.

# Table 2 to Subpart HHHH of Part 63—Applicability of General Provisions (40 CFR Part 63, Subpart A) to Subpart HHHH

As stated in §63.3001, you must comply with the applicable General Provisions requirements according to the following table:

Citation	Requirement	Applies to subpart HHHH	Explanation
§63.1(a)(1)-(4)	General Applicability	Yes.	
§ 63.1(a)(5)		No	[Reserved].
§63.1(a)(6)-(8)		Yes.	
§63.1(a)(9)		No	[Reserved].
§63.1(a)(10)–(14)		Yes.	[i locol rou].
§63.1(b)	Initial Applicability Determination	Yes	
§63.1(c)(1)	Applicability After Standard Es-	Yes.	
905.1(0)(1)	tablished.	165.	
§63.1(c)(2)		Yes	Some plants may be area sources.
§63.1(c)(3)		No	[Reserved].
§63.1(c)(4)–(5)		Yes.	
§63.1(d)		No	[Reserved].
§63.1(e)	Applicability of Permit Program	Yes.	[].
§63.2	Definitions	Yes	Additional definitions in § 63.3004.
§63.3	Units and Abbreviations	Yes.	3
§63.4(a)(1)–(3)	Prohibited Activities	Yes.	
§ 63.4(a)(4)		No	[Reserved].
§ 63.4(a)(5)		Yes.	[rieserveu].
§ 63.4(b)–(c)	Circumvention/Severability	Yes.	
	Construction/Reconstruction	Yes.	
§ 63.5(a)			
§63.5(b)(1)	Existing/Constructed/Reconstruc- tion.	Yes.	
§63.5(b)(2)		No	[Reserved].
§63.5(b)(3)–(6)		Yes.	
§63.5(c)		No	[Reserved].
§63.5(d)	Application for Approval of Con- struction/Reconstruction.	Yes.	
§63.5(e)	Approval of Construction/Recon-	Yes.	
	struction.		
§63.5(f)	Approval of Construction/Recon- struction Based on State Re- view.	Yes.	
§63.6(a)	Compliance with Standards and Maintenance—Applicability.	Yes.	
§63.6(b)(1)–(5)	New and Reconstructed Sources-Dates.	Yes.	
§63.6(b)(6)		No	[Reserved].
§63.6(b)(7)		Yes.	
§ 63.6(c)(1)–(2)	Existing Sources Dates	Yes	§63.2985 specifies dates.
§63.6(c)(3)–(4)	Existing Sources Dates	No	[Reserved].
		Yes.	[i lesel veu].
§ 63.6(c)(5)		No	[Beconved]
§63.6(d)	Operation and Maintenance De		[Reserved].
§63.6(e)	Operation and Maintenance Re-	Yes	§§63.2984 and 63.2987 specify
	quirements.	I	additional requirements.
