#### **Environmental Protection Agency**

- (c) Engines or equipment that are temporarily exempt from EPA exhaust emission standards are also exempt from the requirements of this part 1060 for the same period as the exhaust exemption.
- (d) For equipment powered by more than one engine, all the engines installed in the equipment must be exempt from all applicable EPA exhaust emission standards for the equipment to also be exempt under paragraph (a) or (b) of this section.
- (e) In unusual circumstances, we may exempt components or equipment from the requirements of this part 1060 even if the equipment is powered by one or more engines that are subject to EPA exhaust emission standards. See 40 CFR part 1068. Such exemptions will be limited to:
  - (1) Testing. See 40 CFR 1068.210.
- (2) National security. See 40 CFR 1068.225.
- (3) Economic hardship. See 40 CFR 1068.245 and 1068.250.
- (f) Evaporative emission standards generally apply based on the model year of the equipment, which is determined by the equipment's date of final assembly. However, in the first year of new emission standards, equipment manufacturers may apply evaporative emission standards based on the model year of the engine as shown on the engine's emission control information label. For example, for fuel tank permeation standards starting in 2012, equipment manufacturers may order a batch of 2011 model year engines for installation in 2012 model year equipment, subject to the anti-stockpiling provisions of 40 CFR 1068.105(a). The equipment with the 2011 model year engines would not need to meet fuel tank permeation standards as long as the equipment is fully assembled by December 31, 2012.

## § 1060.640 What special provisions apply to branded equipment?

The following provisions apply if you identify the name and trademark of another company instead of your own on your emission control information label for equipment, as provided by §§ 1060.135 and 1060.137:

(a) You must have a contractual agreement with the other company

that obligates that company to take the following steps:

- (1) Meet the emission warranty requirements that apply under §1060.120. This may involve a separate agreement involving reimbursement of warranty-related expenses.
- (2) Report all warranty-related information to the certificate holder.
- (b) In your application for certification, identify the company whose trademark you will use and describe the arrangements you have made to meet your requirements under this section.
- (c) You remain responsible for meeting all the requirements of this chapter, including warranty and defect-reporting provisions.

## Subpart H—Averaging, Banking, and Trading Provisions

### § 1060.701 Applicability.

- (a) You are allowed to comply with the emission standards in this part with evaporative emission credits only if the exhaust standard-setting part explicitly allows it for evaporative emissions.
- (b) The following exhaust standardsetting parts allow some use of evaporative emission credits:
- (1) 40 CFR part 1045 for marine vessels.
- (2) 40 CFR part 1051 for recreational vehicles.
- (3) 40 CFR part 1054 for Small SI equipment.
- (c) As specified in 40 CFR part 1048, there is no allowance to generate or use emission credits with Large SI equipment.

# § 1060.705 How do I certify components to an emission level other than the standard under this part or use such components in my equipment?

As specified in this section, a fuelsystem component may be certified to a family emission limit (FEL) instead of the otherwise applicable emission standard. Note that the exhaust standard-setting part may apply maximum values for an FEL (i.e., FEL caps).

(a) Requirements for certifying component manufacturers. See subpart C of this part for instructions regarding the
