

## 208.7004

(g) Items peculiar to nuclear ordnance material where design characteristics or test-inspection requirements are controlled by the Department of Energy (DoE) or by DoD to ensure reliability of nuclear weapons.

(1) This exception applies to all items designed for and peculiar to nuclear ordnance regardless of agency control, or to any item which requires test or inspection conducted or controlled by DoE or DoD.

(2) This exception does not cover items used for both nuclear ordnance and other purposes if the items are not subject to the special testing procedures.

(h) Items to be acquired under FAR 6.302-6 (national security requires limitation of sources);

(i) Items to be acquired under FAR 6.302-1 (supplies available only from the original source for follow-on contract);

(j) Items directly related to a major system and which are design controlled by and acquired from either the system manufacturer or a manufacturer of a major subsystem;

(k) Items subject to rapid design changes, or to continuous redesign or modification during the production and/or operational use phases, which require continual contact between industry and the requiring department to ensure that the item meets the requirements:

(1) This exception permits the requiring department to contract for items of highly unstable design. For use of this exception, it must be clearly impractical, both technically and contractually, to refer the acquisition to the acquiring department. Anticipation that contracting by negotiation will be appropriate, or that a number of design changes may occur during contract performance is not in itself sufficient reason for using this exception.

(2) This exception also applies to items requiring compatibility testing, provided such testing requires continual contact between industry and the requiring department;

(l) Containers acquired only with items for which they are designed;

(m) One-time buy of a noncataloged item.

## 48 CFR Ch. 2 (10-1-10 Edition)

(1) This exception permits the requiring departments to contract for a non-recurring requirement for a noncataloged item. This exception could cover a part or component for a prototype which may be stock numbered at a later date.

(2) This exception does not permit acquisitions of recurring requirements for an item, based solely on the fact that the item is not stock numbered, nor may it be used to acquire items which have only slightly different characteristics than previously cataloged items.
