(3) Beginning model year 2008, base tire as defined in 49 CFR 523.2.
(4) Beginning model year 2010, front axle, rear axle and average track width as defined in 49 CFR 523.2.
(5) Beginning model year 2008, wheelbase as defined in 49 CFR 523.2, and
(6) Beginning model year 2008, footprint as defined in 49 CFR 523.2.
(xvii) Performance of the function described in §523.5(a)(5) of this chapter (indicate yes or no);
(xviii) Existence of temporary living quarters (indicate yes or no);
(xix) Frontal area;
(xx) Road load power at 50 miles per hour, if determined by the manufacturer for purposes other than compliance with this part to differ from the road load setting prescribed in 40 CFR 86.177–11(d);
(xxi) Optional equipment that the manufacturer is required under 40 CFR parts 86 and 600 to have actually installed on the vehicle configuration, or the weight of which must be included in the curb weight computation for the vehicle configuration, for fuel economy testing purposes.
(5) For each model type of automobile which is classified as an automobile capable of off-highway operation under part 523 of this chapter, provide the following data:
(i) Approach angle;
(ii) Departure angle;
(iii) Breakover angle;
(iv) Axle clearance;
(v) Minimum running clearance; and
(vi) Existence of 4-wheel drive (indicate yes or no).
(6) The fuel economy values provided under paragraphs (c) (2) and (4) of this section shall be determined in accordance with §537.9.
§ 537.8 Supplementary reports.

(a)(1) Except as provided in paragraph (d) of this section, each manufacturer whose most recently submitted semiannual report contained an average fuel economy projection under §537.7(b)(2) or, if no average fuel economy was projected under §537.7(b)(1), is less representative than the applicable average fuel economy standard and who now projects an average fuel economy which is less than the applicable standard shall file a supplementary report containing the information specified in paragraph (b)(1) of this section.
(2) Except as provided in paragraph (d) of this section, each manufacturer that determines that its average fuel economy for the current model year as projected under §537.7(b)(2) or, if no average fuel economy was projected under that section, as projected under §537.7(b)(1), is less representative than the manufacturer previously reported it to be under §537.7(b)(3), this section, or both, shall file a supplementary report containing the information specified in paragraph (b)(2) of this section.
(3) Each manufacturer whose pre-model year report omits any of the information specified in §537.7 (b), (c) (1) and (2), or (c)(4) (xvi) and (xxiv) shall file supplementary report containing the information specified in paragraph (b)(3) of this section.
(b)(1) The supplementary report required by paragraph (a)(1) of this section must contain:
(i) Such revisions of and additions to the information previously submitted by the manufacturer under this part regarding the automobiles whose projected average fuel economy has decreased as specified in paragraph (a)(1) of this section as are necessary—
(A) To reflect the decrease and its cause;
(B) To indicate a new projected average fuel economy based upon these additional measures.
(ii) An explanation of the cause of the decrease in average fuel economy that led to the manufacturer’s having to submit the supplementary report required by paragraph (a)(1) of this section.
(2) The supplementary report required by paragraph (a)(2) of this section must contain:
(i) A statement of the specific nature of and reason for the insufficiency in the representativeness of the projected average fuel economy;
(ii) A statement of specific additional testing or derivation of fuel economy values by analytical methods believed
§ 537.9 Determination of fuel economy values and average fuel economy.

(a) Vehicle configuration fuel economy values. (1) For each vehicle configuration for which a fuel economy value is required under paragraph (c) of this section and has been determined and approved under 40 CFR part 600, the manufacturer shall submit that fuel economy value.

(2) For each vehicle configuration specified in paragraph (a)(1) of this section for which a fuel economy value approved under 40 CFR part 600, does not exist, but for which a fuel economy value determined under that part exists, the manufacturer shall submit that fuel economy value.

(3) For each vehicle configuration specified in paragraph (a)(1) of this section for which a fuel economy value has been neither determined nor approved under 40 CFR part 600, the manufacturer shall submit a fuel economy value based on tests or analyses comparable to those prescribed or permitted under 40 CFR part 600 and a description of the test procedures or analytical methods used.

(b) Base level and model type fuel economy values. For each base level and model type, the manufacturer shall submit a fuel economy value based on the values submitted under paragraph (a) of this section and calculated in the same manner as base level and model type fuel economy values are calculated for use under subpart F of 40 CFR part 600.

(c) Average fuel economy. Average fuel economy must be based upon fuel economy values calculated under paragraph (b) of this section for each model type and must be calculated in accordance with subpart F of 40 CFR part 600, except that fuel economy values for running changes and for new base levels are required only for those changes made or base levels added before the
