minimum and below the range maximum, the corresponding rate in the current GS rate range must be derived as follows:

Step A .......... Find the difference between the employee’s highest previous rate and the minimum rate for the GS rate range (for the employee’s current grade) in effect at the time the highest previous rate was earned.

Step B .......... Find the difference between the maximum rate and the minimum GS rate for the rate range identified in step A. (If the GS maximum rate was not payable because of the EX level V pay limitation, use the uncapped maximum rate.)

Step C .......... Divide the result from step A by the result from step B. Carry this result to the seventh decimal place and truncate, rather than round, the result. This decimal factor represents the employee’s relative position in the rate range.

Step D .......... Using the current GS rate range (for the employee’s current grade), find the difference between the maximum rate and the minimum rate. (If the maximum GS rate was not payable because of the EX level V pay limitation, use the uncapped maximum GS rate.)

Step E .......... Multiply the result from step D by the factor derived under step C.

Step F .......... Add the result from step E to the minimum rate for the employee’s current GS rate range and round to the next higher whole dollar. This rate is the maximum payable GS rate the agency may pay the employee (subject to the EX level V pay limitation).

(3) In applying §531.221(c) for an employee whose highest previous rate is a special rate, the highest previous rate (after any geographic conversion) must be compared directly to the current highest applicable rate range for the employee’s position of record and official worksite after reassignment. Thus, the rate identified under paragraph (c)(1) of this section is the maximum payable rate of basic pay.
