§ 648.62 Northern Gulf of Maine (NGOM) scallop management area.

(a) The NGOM scallop management area is the area north of 42°20’ N. lat. and within the boundaries of the Gulf of Maine Scallop Dredge Exemption Area as specified in §648.80(a)(11). To fish for or possess scallops in the NGOM scallop management area, a vessel must have been issued a scallop permit as specified in §648.4(a)(2).

(1) If a vessel has been issued a NGOM scallop permit, the vessel is restricted to fishing for or possessing scallops only in the NGOM scallop management area.

(2) Scallop landings by all vessels issued LAGC scallop permits, including IFQ scallop permits, and fishing in the NGOM scallop management area shall be deducted from the NGOM scallop total allowable catch specified in paragraph (b) of this section. Scallop landings by IFQ scallop vessels fishing in the NGOM scallop management area shall be deducted from their respective scallop IFQs. Landings by limited access scallop vessels fishing under the scallop DAS program shall not be deducted from the NGOM total allowable catch specified in paragraph (b) of this section.

(3) A vessel issued a NGOM or IFQ scallop permit that fishes in the NGOM may fish for, possess, or retain up to 200 lb (90.7 kg) of shucked or 25 bu (8.81 hL) of in-shell scallops, and may possess up to 50 bu (17.6 hL) of in-shell scallops seaward of the VMS Demarcation Line. A vessel issued an incidental catch general category scallop permit that fishes in the NGOM may fish for, possess, or retain only up to 40 lb of shucked or 5 U.S. bu (1.76 hL) of in-shell scallops, and may possess up to 10 bu (3.52 hL) of in-shell scallops seaward of the VMS Demarcation Line.

(b) Total allowable catch. The total allowable catch for the NGOM scallop management area shall be specified through the framework adjustment process. The total allowable catch for the NGOM scallop management area shall be based on the Federal portion of the scallop resource in the NGOM. The total allowable catch shall be determined by historical landings until additional information on the NGOM scallop resource is available, for example through an NGOM resource survey and assessment. The total allowable catch and allocations as specified in §648.53(a) shall not include the total allowable catch for the NGOM scallop management area, and landings from the NGOM scallop management area shall not be counted against the total allowable catch and allocations specified in §648.53(a).

(1) NGOM TAC. The TAC for the NGOM is 70,000 lb (31.8 mt) for the 2010 fishing year.

(2) Unless a vessel has fished for scallops outside of the NGOM scallop management area and is transiting NGOM scallop management area with all fishing gear stowed in accordance with §648.23(b), no vessel issued a scallop permit pursuant to §648.4(a)(2) may possess, retain, or land scallops in the NGOM scallop management area once the Regional Administrator has provided notification in the Federal Register that the NGOM scallop total allowable catch in accordance with this paragraph (b) has been reached. A vessel that has not been issued a Federal scallop permit that fishes exclusively in state waters is not subject to the closure of the NGOM scallop management area.

(c) VMS requirements. Except scallop vessels issued a limited access scallop permit pursuant to §648.4(a)(2)(i) that have properly declared a trip under the scallop DAS program, a vessel issued a scallop permit pursuant to §648.4(a)(2) that intends to fish for scallops in the NGOM scallop management area or fishes for, possesses, or lands scallops in or from the NGOM scallop management area, must declare a NGOM scallop management area trip and report scallop catch through the vessel’s VMS unit, as required in §648.10.

(d) Gear restrictions. Except scallop vessels issued a limited access scallop permit pursuant to §648.4(a)(2)(i) that have properly declared a trip under the scallop DAS program, the combined dredge width in use by, or in possession on board, LAGC scallop vessels fishing in the NGOM scallop management area may not exceed 19.5 ft (3.2 m), measured at the widest point in the ball of the dredge.
