§ 679.63 Catch weighing requirements for vessels and processors.

(a) What are the requirements for listed AFA catcher/processors and AFA motherships?—(1) Catch weighing. All groundfish landed by listed AFA catcher/processors or received by AFA motherships must be weighed on a NMFS-certified scale and made available for sampling by a NMFS certified observer. The owner and operator of a listed AFA catcher/processor or an AFA mothership must ensure that the vessel is in compliance with the scale requirements described at § 679.28(b), that each groundfish haul is weighed separately, and that no sorting of catch takes place prior to weighing.

(2) Observer sampling station. The owner and operator of a listed AFA catcher/processor or AFA mothership must provide an observer sampling station as described at § 679.28(d) and must ensure that the vessel operator complies with the observer sampling station requirements described at § 679.28(d) at all times that the vessel harvests groundfish or receives deliveries of groundfish harvested in the BSAI or GOA.

(b) What are the requirements for unlisted AFA catcher/processors? The owner or operator of an unlisted AFA catcher/processor must comply with the catch weighing and observer sampling station requirements set out in paragraph (a) of this section at all times the vessel is engaged in directed fishing for pollock in the BSAI.

(c) What are the requirements for AFA inshore processors?—(1) Catch weighing. All groundfish landed by AFA catcher vessels engaged in directed fishing for pollock in the BSAI must be sorted and weighed on a scale approved by the State of Alaska as described in § 679.28(c), and be made available for sampling by a NMFS certified observer. The observer must be allowed to test any scale used to weigh groundfish in order to determine its accuracy.

(2) The plant manager or plant liaison must notify the observer of the off-loading schedule for each delivery of BSAI pollock by an AFA catcher vessel at least 1 hour prior to offloading. An observer must monitor each delivery of BSAI pollock from an AFA catcher vessel and be on site the entire time the delivery is being weighed or sorted.

§ 679.64 Harvesting sideboard limits in other fisheries.

(a) Harvesting sideboards for listed AFA catcher/processors. The Regional Administrator will restrict the ability of listed AFA catcher/processors to engage in directed fishing for non-pollock groundfish species to protect participants in other groundfish fisheries from adverse effects resulting from the AFA and from fishery cooperatives in the BS subarea directed pollock fishery.

(1) How will groundfish sideboard limits for AFA listed catcher/processors be calculated? Except for Aleutian Islands pollock and BSAI Pacific cod, the Regional Administrator will establish annual AFA catcher/processor harvest limits for each groundfish species or species group in which a TAC is specified for an area or subarea of the BSAI as follows:

(i) Aleutian Islands Pacific ocean perch. The Aleutian Islands Pacific ocean perch harvest limit will be equal to the 1996 through 1997 aggregate retained catch of Aleutian Islands Pacific ocean perch by catcher/processors listed in Sections 208(e)(1) through (20) and 209 of the AFA in non-pollock target fisheries divided by the sum of the Aleutian Islands Pacific ocean perch catch in 1996 and 1997 multiplied by the remainder of the Aleutian Islands Pacific ocean perch TAC after the subtraction of the CDQ reserve under § 679.20(b)(1)(ii)(C) in the year in which the harvest limit will be in effect.

(ii) Pacific ocean perch calculated under paragraph (a)(1)(i)(A) of this section is determined by the Regional Administrator to be insufficient to meet bycatch needs of AFA catcher/processors in other directed fisheries for groundfish, the Regional Administrator will prohibit directed fishing for Aleutian Islands Pacific ocean perch by AFA catcher processors and establish the sideboard limits for AFA listed catcher/processors as follows:

§ 679.20(b)(1)(ii)(C) in the year in which the harvest limit will be in effect.
