Commodity Credit Corporation, USDA

§ 1415.11 Restoration agreements.

(a) Restoration agreements are only authorized to be used in conjunction with easements and rental contracts. NRCS, in consultation with the program participant, determines if the grassland resources are adequate to meet the participant’s objectives and the purposes of the program, or if a restoration agreement is needed. Such a determination is also subject to the availability of funding. USDA may condition participation in the program upon the execution of a restoration agreement depending on the condition of the grassland resources. When the functions and values of the grassland are determined adequate by NRCS, a restoration agreement is not required. However, if a restoration agreement is required, NRCS will set the terms of the restoration agreement. The restoration plan component of the restoration agreement identifies conservation practices and activities necessary to restore or improve the functions and values of the grassland to meet both USDA and the participant’s objectives and the purposes of the program. If the functions and values of the grassland decline while the land is subject to a GRP easement or rental contract through no fault of the participant, the participant may enter into a restoration agreement at that time to improve the functions and values with USDA approval and when funds are available.

(b) The NRCS State Conservationist, with advice from the State Technical Committee and in consultation with FSA, determines the conservation practices and activities, and cost-share percentages, not to exceed statutory limits, available under the GRP. A list of conservation practices and activities approved for cost-share assistance under GRP restoration plans is available to the public through the local USDA Service Center. NRCS may work through the local conservation district with the program participant to determine the terms of the restoration plan. The conservation district may assist NRCS with determining eligible conservation practices and activities and approving restoration agreements.

(c) Only approved conservation practices and activities are eligible for cost-sharing. Payments under the GRP restoration agreements may be made to the participant of not more than 50 percent for the cost of carrying out the conservation practices or activities. As provided by the regulations at part 1400 of this chapter, payments made under one or more restoration agreements to a person or legal entity, directly or indirectly, may not exceed, in the aggregate, $50,000 per year.

(d) The participant is responsible for the operation and maintenance of conservation practices in accordance with the restoration agreement.

(e) All conservation practices must be implemented in accordance with the NRCS Field Office Technical Guide.

(f) Technical assistance is provided by NRCS, or an approved third party.

(g) If the participant is receiving cost-share for the same conservation practice or activity from another conservation program, USDA will adjust the GRP cost-share rate proportionately so that the amount received by
§ 1415.12 Modifications to easements and rental contracts.

(a) After an easement has been recorded, no substantive modification will be made to the easement.

(b) State Conservationists may approve modifications for restoration agreements and grazing management plans, or conservation plans where applicable, as long as the modifications do not affect the provisions of the easement and meet program objectives.

(c) USDA may approve modifications to rental contracts, including corresponding changes to conservation plans, grazing management plans, and restoration plans, to facilitate the practical administration and management of the enrolled area so long as the modification will not adversely affect the grassland functions and values for which the land was enrolled.

§ 1415.13 Transfer of land.

(a) Any transfer of the property prior to an applicant’s acceptance into the program shall void the offer of enrollment, unless at the option of the State Conservationist or State Executive Director, as appropriate, an offer is extended to the new landowner and the new landowner agrees to the same easement or rental contract terms and conditions.

(b) After acreage is accepted in the program, for easements with multiple payments, any remaining easement payments will be made to the original participant unless NRCS receives an assignment of proceeds.

(c) Future annual rental payments will be made to the successor participant.

(d) The new landowner is responsible for complying with the terms of the recorded easement and the contract successor is responsible for complying with the terms of the rental contract and for assuring completion of all activities and practices required by any associated restoration agreement. Eligible cost-share payments will be made to the new participant upon presentation that the successor assumed the costs of establishing the practices.

(e) With respect to any and all payments owed to participants, the United States bears no responsibility for any full payments or partial distributions of funds between the original participant and the participant’s successor. In the event of a dispute or claim on the distribution of cost-share payments, USDA may withhold payments without the accrual of interest pending an agreement or adjudication on the rights to the funds.
