crop intended for harvest before planting of a succeeding crop or a succeeding crop interseeded with the preceding crop prior to intended harvest of the preceding crop. The acreage must be in an area where the practice is recognized as a good farming practice, as determined by CCC, and all crops are recognized by CCC as able to achieve the expected yield, as determined by CCC.

(d) CCC may consider crop acreage that is harvested more than once during the same crop year from the same plant as a single crop. The acreage must be in an area where the practice is recognized as a good farming practice, as determined by CCC.

(e) CCC may consider each planting period of multiple planted acreage as a separate crop. The acreage must be in an area where the practice is recognized as a good farming practice, as determined by CCC.

(f) CCC may define forage as separate crops according to the intended method of harvest, either mechanical harvest or grazed.

(g) Forage acreage intended to be grazed may be further defined as warm and cool season forage crops.

(h) Forage acreage intended to be mechanically harvested may be defined as a separate crop from grazed forage and may be separated based upon the commodity used as forage, to the extent such separation is allowed under paragraph (b) of this section.

(i) Crop acreage intended for the production of seed may be considered a separate crop from other intended uses, as determined by CCC, if all the following criteria apply:

1. The specific crop acreage is seeded, or intended to be seeded, with an intent of producing commercial seed as its primary intended use;
2. There is no possibility of other commercial uses of production from the same crop without regard to market conditions; and
3. The growing period of the specific crop acreage is uniquely conducive to the production of commercial seed and not conducive to the production of any other intended use of the crop, (e.g., vernalization in a biennial crop such as carrots and onions) and that accommodation renders the possibility of production for any other intended use of the crop improbable.

§ 1437.13 Multiple benefits.

(a) If a producer is eligible to receive payments under this part and benefits under any other program administered by the Secretary for the same crop loss, the producer must choose whether to receive the other program benefits or payments under this part, but shall not be eligible for both. The limitation on multiple benefits prohibits a producer from being compensated more than once for the same loss.

(b) The limitation on multiple benefits in paragraph (a) of this section shall not apply in any respect to Emergency Loans under subtitle C of the Consolidated Farm and Rural Development Act (7 U.S.C. 1961 et seq).

(c) The restriction on multiple benefits does not relieve the producer from the requirements of making a production and acreage report.

(d) If the other USDA program benefits are not available until after an application for benefits has been filed under this part, the producer may, to avoid this restriction on such other benefits, refund the total amount of the payment to the administrative FSA office from which the payment was received.

§ 1437.14 Payment and income limitations.

(a) NAP payments shall not be made in excess of $100,000 per person per crop year under this part.

(b) NAP payments shall not be made to a person who has qualifying gross revenues in excess of $2 million for the most recent tax year preceding the year for which assistance is requested. Qualifying gross revenue means:

1. With respect to a person who receives more than 50 percent of such person’s gross income from farming, ranching, and forestry operations, the annual gross income for the taxable year from such operations; and
2. With respect to a person who receives 50 percent or less of such person’s gross income from farming, ranching, and forestry operations, the person’s total gross income for the taxable year from all sources.
