made to the person or legal entity that incurred costs or sacrificed income related to conservation practice implementation.

(5) Any cooperative association of producers that markets commodities for producers will not be considered to be a person eligible for payment.

(6) Eligibility for payments in accordance with part 1400, subpart G of this chapter, average adjusted gross income limitation, will be determined prior to contract approval.

(7) To be eligible for payments for conservation practices related to organic production or the transition to organic production, a participant will develop and implement an organic system plan as defined in §1466.3.

(8) Eligibility for higher payments in accordance with paragraph (b) of this section will be determined at the time of contract approval.

(9) Any participant that utilizes a unique identification number as an alternative to a tax identification number will utilize only that identifier for any and all other EQIP contracts to which the participant is a party. Violators will be considered to have provided fraudulent representation and be subject to full penalties of §1466.35.

(10) A participant will not be eligible for payments for conservation practices on eligible land if the participant receives payments or other benefits for the same practice on the same land under any other conservation program administered by USDA.

(11) The State Conservationist may issue advance payments to historically underserved producers up to 30 percent of the anticipated amount of the costs incurred for the purpose of purchasing materials or services to implement a conservation practice.

(12) Before NRCS will approve and issue final payment, the participant must certify that the conservation practice has been completed in accordance with the contract, and NRCS, or an approved TSP, must certify that the practice has been carried out in accordance with the applicable NRCS technical guidance.

§1466.25 Contract modifications and transfers of land.

(a) The participant and NRCS may modify a contract if both parties agree to the contract modification, the EQIP plan of operations is revised in accordance with NRCS requirements, and the contract is approved by the designated conservationist.

(b) It is the participant’s responsibility to notify NRCS when he/she either anticipates the voluntary or involuntary loss of control of the land covered by an EQIP contract.

(c) The participant and NRCS may agree to transfer a contract to another party.

(1) To receive an EQIP payment, the transferee must be determined by NRCS to be eligible to participate in EQIP and must assume full responsibility under the contract, including the O&M agreement for those conservation practices already installed and those conservation practices to be installed as a condition of the contract.

(2) If the transferee is ineligible or refuses to accept future payments, NRCS will terminate the contract and may require the transferor to refund and/or forfeit all payments received.

(d) NRCS may require a participant to refund all or a portion of any financial assistance earned under EQIP if the participant sells or loses control of the land covered by an EQIP contract and the new owner or controller is not eligible to participate in the program or refuses to assume responsibility under the contract.

(e) In the event a conservation practice fails through no fault of the participant, the State Conservationist may issue payments to re-establish the practice, at the rates established in accordance with §1466.23, provided such payments do not exceed the payment limitation requirements as set forth §1466.24.

(74 FR 2313, Jan. 15, 2009)

§1466.26 Contract violations and terminations.

(a) The State Conservationist may terminate, or by mutual consent with the parties, terminate the contract where:
(1) The parties to the contract are unable to comply with the terms of the contract as the result of conditions beyond their control;

(2) Termination of the contract would, as determined by the State Conservationist, be in the public interest; or

(3) A participant fails to correct a contract violation within the time period defined by NRCS.

(b) If a contract is terminated in accordance with the provisions of paragraphs (a)(1) and (a)(2) of this section, the State Conservationist may allow the participant to retain a portion of any payments received appropriate to the effort the participant has made to comply with the contract, or, in cases of hardship, where forces beyond the participant’s control prevented compliance with the contract. If a participant claims hardship, such claims must be clearly documented and cannot have existed when the applicant applied for participation in the program.

(c) If NRCS determines that a participant is in violation of the terms of a contract, O&M agreement, or documents incorporated by reference into the contract, NRCS shall give the participant a period of time, as determined by NRCS, to correct the violation and comply with the terms of the contract and attachments thereto. If a participant continues in violation, NRCS may terminate the EQIP contract in accordance with §1466.26(e).

(d) Notwithstanding the provisions of paragraph (c) of this section, a contract termination shall be effective immediately upon a determination by NRCS that the participant has submitted false information or filed a false claim, or engaged in any act, scheme, or device for which a finding of ineligibility for payments is permitted under the provisions of §1466.35, or in a case in which the actions of the party involved are deemed to be sufficiently purposeful or negligent to warrant a termination without delay.

(e) If NRCS terminates a contract due to breach of contract, the participant will forfeit all rights to future payments under the contract, pay liquidated damages, and refund all or part of the payments received, plus interest. Participants violating EQIP contracts may be determined ineligible for future NRCS-administered conservation program funding.

(1) NRCS may require a participant to provide only a partial refund of the payments received if a previously installed conservation practice can function independently, is not adversely affected by the violation or the absence of other conservation practices that would have been installed under the contract.

(2) The State Conservationist will have the option to reduce or waive the liquidated damages, depending upon the circumstances of the case.

(i) When terminating a contract, NRCS may reduce the amount of money owed by the participant by a proportion that reflects the good faith effort of the participant to comply with the contract or the existence of hardships beyond the participant’s control that have prevented compliance with the contract. If a participant claims hardship, that claim must be well documented and cannot have existed when the applicant applied for participation in the program.

(ii) In carrying out its role in this section, NRCS may consult with the local conservation district.

(f) The State Conservationist, in consultation with the State Technical Committee, may terminate a contract whereby a producer is receiving payments for conservation practices related to organic production, if the designated conservationist determines that the producer is not pursuing organic certification, or has been decertified.

(74 FR 2313, Jan. 15, 2009)

§ 1466.27 Conservation Innovation Grants (CIG).

(a) Definitions. In addition to the terms defined in §1466.3 of this part, the following definitions shall be applicable to this section:

(1) EQIP eligible means any farming entity, land, and practice that meets the definitions of EQIP as defined in 7 CFR 1466.

(2) Grant agreement means a document describing a relationship between NRCS and a State or local government, or other recipient whenever the principal purpose of the relationship is the
transfer of a thing of value to a recipient in order to accomplish a public purpose of support or stimulation authorized by Federal law, and substantial Federal involvement is not anticipated.

(3) **Grant Review Board** consists of the NRCS Deputy Chief for Programs, Deputy Chief for Science and Technology, Deputy Chief for Soil Survey and Resource Assessment, one Regional Assistant Chief, and one State Conservationist. The Review Board makes recommendations for grant awards to the Chief.

(4) **Peer Review Panel** means a panel consisting of Federal and non-Federal technical advisors who possess expertise in a discipline or disciplines deemed important to provide a technical evaluation of project proposals submitted under this notice.

(5) **Project** means the activities as defined within the scope of the grant agreement.

(6) **Project Director** means the individual responsible for the technical direction and management of the project as designated in the application.

(b) **Purpose and scope**—(1) **Purpose.** The purpose of CIG is to stimulate the development and adoption of innovative conservation approaches and technologies while leveraging Federal investment in environmental enhancement and protection, in conjunction with agricultural production. Notwithstanding any limitation of this part, NRCS will administer CIG in accordance with this section. Unless otherwise provided for in this section, the provisions of 7 CFR 3015 and related Departmental regulations will be used to administer grants under CIG.

(2) **Geographic scope.** Applications for CIG are accepted from the fifty States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands of the United States, American Samoa, and the Commonwealth of the Northern Mariana Islands.

(3) **Program scope.** Grants will be awarded using a two-tiered process. A nationwide grants competition will be announced in the FEDERAL REGISTER. In addition, at the Chief’s discretion, each State Conservationist may implement a separate State-level component of CIG.

(4) **Program focus.** Applications for CIG should demonstrate the use of innovative approaches and technologies to leverage Federal investment in environmental enhancement and protection, in conjunction with agricultural production. CIG will fund projects that promote innovative on-the-ground conservation, including pilot projects and field demonstrations of promising approaches or technologies. CIG projects are expected to lead to the transfer of conservation technologies, management systems, and innovative approaches (such as market-based systems) into NRCS technical manuals and guides, or to the private sector. Technologies and approaches eligible for funding in a project’s geographic area through EQIP are not eligible for CIG funding except where the use of those technologies and approaches demonstrates clear innovation. The burden falls on the applicant to sufficiently describe the innovative features of the proposed technology or approach.

(5) **Innovative conservation projects or activities.** For the purposes of CIG, the proposed innovative project or activity must encompass the development and field testing, evaluation, and implementation of:

(i) Conservation adoption incentive systems, including market-based systems; or,

(ii) Promising conservation technologies, practices, systems, procedures, and approaches.

To be given priority consideration, the innovative project or activity:

(iii) Will have been studied sufficiently to indicate a good probability for success;

(iv) Demonstrates, tests, evaluates, or verifies environmental (soil, water, air, plants, and animal) effectiveness, utility, affordability, and usability in the field;

(v) Adapts conservation technologies, practices, systems, procedures, approaches, and incentive systems to improve performance, and encourage adoption;

(vi) Introduces conservation systems, approaches, and procedures from another geographic area or agricultural sector; and
(vii) Adapts conservation technology, management, or incentive systems to improve performance.

(c) Availability of funding. (1) CIG funding will be available for single- or multi-year projects. Funding for CIG will be announced in the Federal Register through a Request for Proposals (RFP). The Chief will determine the funding level for CIG on an annual basis. Funds for CIG are derived from funds made available for EQIP. The Chief may establish funding limits for individual grants.

(2) Selected applicants may receive grants of up to 50 percent of the total project cost. Applicants must provide non-Federal funding for at least 50 percent of the project cost, of which up to one-half (25 percent of total project cost) may be from in-kind contributions. An exception regarding matching funds may be made for grants that are awarded to either a Beginning or Limited Resource Farmer or Rancher, or Indian Tribe, or a community-based organization comprised of or representing these entities. Up to 75 percent of the required matching funds for these projects may derive from in-kind contributions.

(3) CIG is designed to provide financial assistance to grantees. Procurement of any technical assistance required to carry out a project is the responsibility of the grantee. Technical oversight for grant projects will be provided by a Federal grant representative, who will be designated by NRCS.

(4) There are some costs that grantees may not cover using CIG funds, such as costs incurred prior to the effective date of the grant, entertainment costs, any indirect cost exceeding fifteen percent, or renovation or refurbishment of facilities. A detailed list of costs not allowed will be published in the Request for Proposals.

(d) Natural resource conservation concerns. CIG applications must describe the use of innovative approaches or technologies to address a natural resource conservation concern or concerns. The natural resource concerns for CIG will be identified by the Chief, and may change each year. The natural resource concerns will be published in the RFP.

(e) Eligibility information—(1) Organization or individual eligibility. To be eligible, CIG applicants must be an Indian Tribe; State or local unit of government; non-governmental organization; or individual.

(2) Project eligibility. To be eligible, projects must involve landowners who meet the eligibility requirements of §1466.8(b)(1) through (3) of this part. Further, all agricultural producers receiving a direct or indirect payment through participation in a CIG project must meet those eligibility requirements.

(3) Beginning and Limited Resource Farmers and Ranchers, and Indian Tribes. Up to 10 percent of the total funds available for CIG may be set-aside for applications from either a Beginning or Limited Resource Farmer or Rancher, or Indian Tribe, or a community-based organization comprised of or representing these entities. Funds not awarded from the set-aside pool will revert back into the general CIG funding pool.

(f) Application and submission information. The CIG RFP will contain guidance on how to apply for the grants competition. CIG will be advertised through the Federal Register, the NRCS Web site, and grants.gov. Grant applications will be available on the NRCS Web site, or by contacting NRCS at the address provided in the RFP. CIG grant applications will consist of standard cover sheet and budget forms, in addition to a narrative project description and required legal declarations and certifications.

(g) Application review and grant awards. Complete applications will be evaluated by a peer review panel and scored based on the Criteria for Proposal Evaluation identified in the RFP. Scored applications will be forwarded to a Grant Review Board. The Grant Review Board will make recommendations for awards to the Chief. Final award selections will be made by the Chief. Grant awards will be made by the NRCS National Office after selection of the grantees is made and after the grantee agrees to the terms and conditions of the NRCS Grant document.
