§ 51.2285  sieve with 24⁄64 inch round openings. When a lot exceeds this minimum requirement, the actual percentage of halves may be specified. (See §51.2285.)

(c) Pieces. Lot consists of portions of kernels that cannot pass through a sieve with 24⁄64 inch round openings. (See §51.2285.)

(d) Small pieces. Lot consists of portions of kernels that pass through a sieve with 24⁄64 inch round openings, but that cannot pass through a sieve with 16⁄64 inch round openings. When desired, the actual size ranges within such size ranges may be specified. (See §51.2285.)

§ 51.2285  Tolerances for size.

(a) All percentages shall be calculated on the basis of weight.

(b) In order to allow for variations incident to proper sizing and handling, tolerances shall be permitted for the respective size classifications as indicated in Table III:

<table>
<thead>
<tr>
<th>Size classification</th>
<th>Tolerances for size</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Smaller than three-fourths halves</td>
</tr>
<tr>
<td>Halves</td>
<td>5</td>
</tr>
<tr>
<td>Pieces and halves 1</td>
<td>.................................</td>
</tr>
<tr>
<td>Pieces</td>
<td>.................................</td>
</tr>
<tr>
<td>Small pieces 2</td>
<td>.................................</td>
</tr>
</tbody>
</table>

1No part of any tolerance shall be used to reduce the percentage of halves required or specified in a lot of "pieces and halves".

2The tolerances of 10 percent and 2 percent for "small pieces" classification shall apply, respectively, to any smaller maximum or any larger minimum sizes specified.

APPLICATION OF TOLERANCES

§ 51.2286  Application of tolerances.

The tolerances provided in these standards are on a lot basis, and they shall be applied to a composite sample representative of the lot. However, any container or group of containers in which the walnuts are obviously of a quality materially different from that in the majority of containers shall be considered a separate lot, and shall be sampled separately.

DEFINITIONS

§ 51.2287  Well dried.

Well dried means that the portion of kernel is firm and crisp, not pliable or leathery.

§ 51.2288  Clean.

Clean means that the appearance of the individual portion of kernel, or of the lot as a whole, is not materially affected by adhering dust, dirt or other foreign material.

§ 51.2289  Shell.

Shell means the outer shell and/or the woody partition from between the halves of the kernel, and any fragments of either.

§ 51.2290  Insect injury.

Insect injury means that the insect, web, frass or other evidence of insects is present on the portion of kernel.

§ 51.2291  Rancidity.

Rancidity means that the portion of kernel is noticeably rancid to the taste. Rancidity should not be confused with a slightly astringent flavor of the pellicle (skin) or with staleness (the state at which the flavor is flat but not objectionable).

§ 51.2292  Damage.

Damage means any defect, other than color, which materially affects the appearance, or the edible or shipping quality of the individual portion of kernel, or of the lot as a whole. Any one of the following defects or any combination of defects the seriousness
