QUALITY CONTROL

§ 984.50 Grade, quality and size regulations.

(a) *Minimum standard for inshell walnuts.* Except as provided in §984.64, no handler shall handle inshell walnuts unless such walnuts are equal to or better than the requirements of U.S. No. 2 grade and baby size as defined in the then effective United States Standards for Walnuts (*Juglans regia*) in the Shell. This minimum standard may be modified by the Secretary on the basis of a Board recommendation or other information.

(b) *Minimum standard for shelled walnuts.* Except as provided in §984.64, no handler shall handle shelled walnuts unless such walnuts are equal to or better than the requirements of the U.S. Commercial grade as defined in the then effective United States Standards for Shelled Walnuts (*Juglans regia*) and the minimum size shall be pieces not more than 5 percent of which will pass through a round opening $\frac{5}{64}$ inch in diameter. This minimum standard may be modified by the Secretary on the basis of a Board recommendation or other information.

(c) *Effective period.* The minimum standards established pursuant to paragraphs (a) and (b) of this section and the provisions of this part relating to the administration thereof, shall continue in effect irrespective of whether the season average price for walnuts is above the parity level specified in section 2(1) of the Act.

(d) *Additional grade, size or other quality regulation.* The Board may recommend to the Secretary additional grade, size or other quality regulations, and may also recommend different regulations for different market destinations. If the Secretary finds on the basis of such recommendation or other information that such additional regulations would tend to effectuate the declared policy of the Act, he or she shall establish such regulations.

(e) *Minimum requirements for reserve.* The Board, with the approval of the Secretary, may specify the minimum kernel content and related requirements for any lot of walnuts acceptable

7 CFR Ch. IX (1-1-10 Edition)

for disposition for credit against a reserve obligation: *Provided*, That reserve walnuts exported must meet the requirements of paragraph (a) of this section if inshell, or paragraph (b) of this section if shelled.

[27 FR 9094, Sept. 13, 1962, as amended at 39 FR 35330, Oct. 1, 1974; 41 FR 31543, July 29, 1976; 73 FR 11339, Mar. 3, 2008]

§ 984.51 Inspection and certification of inshell and shelled walnuts.

(a) Before or upon handling of any walnuts for use as free or reserve walnuts, each handler at his or her own expense shall cause such walnuts to be inspected to determine whether they meet the then applicable grade and size regulations. Such inspection shall be performed by the inspection service or services designated by the Board with the approval of the Secretary; *Provided*, That if more than one inspection service is designated, the functions performed by each service shall be separate, and shall not duplicate each other. Handlers shall obtain a certificate for each inspection and cause a copy of each certificate issued by the inspection service to be furnished to the Board. Each certificate shall show the identity of the handler, quantity of walnuts, the date of inspection, and for inshell walnuts the grade and size of such walnuts as set forth in the United States Standards for Walnuts (*Juglans regia*) in the Shell. Certificates covering reserve shelled walnuts for export shall also show the grade, size, and color of such walnuts as set forth in the United States Standards for Shelled Walnuts (*Juglans regia*). The Board, with the approval of the Secretary, may prescribe procedures for the administration of this provision.

(b) Inshell merchantable walnuts certified shall be converted to the kernelweight equivalent at 45 percent of their inshell weight. This conversion percentage may be changed by the Board with the approval of the Secretary.

(c) Upon inspection, all walnuts for use as free or reserve walnuts shall be identified by tags, stamps, or other means of identification prescribed by the Board and affixed to the container by the handler under the supervision of the Board or of a designated inspector
