APPENDIX C TO PART 360—DEPOSIT FILE STRUCTURE

This is the structure for the data file to provide deposit data to the FDIC. If data or information are not maintained or do not apply, a null value in the appropriate field should be indicated. The file will be in a tab- or pipe-delimited ASCII format. Each file name will contain the institution's FDIC Certificate Number, an indication that it is a deposit file type and the date of the extract. The files will be encrypted using an FDIC-supplied algorithm. The FDIC will transmit to the covered institution the encryption algorithm over *FDICconnect*.

The total deposit balances and the number of deposit accounts in each deposit file must be reconciled to the subsidiary system control totals.

The FDIC intends to fully utilize a covered institution's understanding of its customers and the data maintained around deposit accounts. Should additional information be available to the covered institution to help the FDIC more quickly complete its insurance determination process, it may add this information to the end of this data file. Should additional data elements be provided, a complete data dictionary for these elements must be supplied along with a descrip-

tion of how this information could be best used to establish account ownership or insurance category.

The deposit data elements provide information specific to deposit account balances and account data. The sequencing of these elements, their physical data structures and the field data format and field length must be provided to the FDIC along with the data structures identified below.

A header record will also be required at the beginning of this file. This record will contain the number of accounts to be included in this file, the maximum number of characters contained in largest account title field maintained within the deposit file and the maximum number of characters contained in largest address field maintained within the deposit file.

NOTE: Each record must contain the account title/name and current account statement mailing address. Fields 17–33 relate to the account name and address information. Some systems provide for separate fields for account title/name, street address, city, state, ZIP, and country, all of which are parsed out. Others systems may simply provide multiple lines for name, street address, city, state, ZIP, with no distinction. Populate fields that best fit the system's data, either fields 17–27 or fields 28–33.

Field name	Field description	Comments	Format
1. DP_Acct_Identifier	Account Identifier The primary field used to identify the account. This field may be the Account Number.	The Account Identifier may be composed of more than one physical data element. If multiple fields are required to identify the account, data should be placed in separate fields and the FDIC instructed how these fields are combined to uniquely identify the account.	Character (25).
2. DP_Acct_Identifier—2	Account Identifier—2 If necessary, the second element used to identify the account.		Character (25).
3. DP_Acct_Identifier—3	Account Identifier—3 If necessary, the third element used to identify the account.		Character (25).
4. DP_Acct_Identifier—4	Account Identifier—4 If necessary, the fourth element used to identify the account.		Character (25).
5. DP_Acct_Identifier—5	Account Identifier—5 If necessary, the fifth element used to identify the account.		Character (25).
6. DP_Sub_Acct_Identifier	Sub-Account Identifier If available, the sub-account identifier for the account.	The Sub-Account Identifier may identify separate deposits tied to this account where there are different processing parameters such as interest rates or maturity dates, but all owners are the same.	Character (25).
7. DP_Bank_No	Bank Number The bank number assigned to the deposit account.		Character (15).
8. DP_Tax_ID	Tax ID The tax identification number maintained on the account.	For consumer accounts, typically, this would be the primary account holder's social security number ("SSN"). For business accounts it would be the federal tax identification number ("TIN"). Hyphens are optional in this field.	Character (15).
9. DP_Tax_Code	Tax ID Code The type of the tax identification number. Possible values are: • S = Social Security Number. • T = Federal Tax Identification Number. • O = Other.	Generally deposit systems have flags or indicators set to indicate whether the number is an SSN or TIN.	Character (1).
10. DP_Branch	Branch Number The branch or office associated with the account.	In lieu of a branch number this field may represent a specialty department or division.	Character (15).
11. DP_Cost_Center	Cost Center or G/L Code The identifier used for organization reporting or ownership of the account. Insert null value if the cost center is not carried in the deposit record.	This field ties to the general ledger accounts.	Character (20).
12. DP_Dep_Type	Deposit Type Indicator The type of deposit by office location. Possible values are: • D = Deposit (Domestic). • F = Foreign Deposit.	A deposit—also called a "domestic deposit"—includes only deposit liabilities payable in the United States, typically those deposits maintained in a domestic office of an insured depository institution, as defined in section 3(l) of the Federal Deposit Insurance Act (12 U.S.C. 1813(l)). A foreign deposit is a deposit liability in a foreign branch payable solely at a foreign branch or branches.	Character (1).
13. DP_Currency_Type	Currency Type The ISO 4217 currency code.		Character (3).

APPENDIX D TO PART 360—SWEEP/AUTOMATED CREDIT ACCOUNT FILE STRUCTURE

This is the structure of the data file to provide information to the FDIC on funds residing in investment vehicles linked to each non-closed deposit account or sub-account:
 (1) Involved in sweep activity where the

sweep investment vehicle is not a deposit and is reflected on the books and records of the covered institution or (2) which accepts automated credits. A single record should be used for each instance where funds affiliated with the deposit account are held in an alternative investment vehicle. For any alternative investment vehicle, a separate account may or may not exist. If an account
