

are likely to be affected by or vulnerable to sea level rise.

(3) Indian lands not held in trust by the Federal Government.

(c) In many urban areas or where the shoreline has been modified extensively, natural system relationships between land and water may be extremely difficult, if not, impossible, to define in terms of direct and significant impacts. Two activities that States should consider as causing direct and significant impacts on coastal waters in urban areas are sewage discharges and urban runoff. In addition, States should consider dependency of uses on water access and visual relationships as factors appropriate for the determination of the inland boundary in highly urbanized areas.

§ 923.32 Lakeward or seaward boundary.

(a)(1) For states adjoining the Great Lakes, the lakeward boundary of the State's coastal zone is the international boundary with Canada or the boundaries with adjacent states. For states adjacent to the Atlantic or Pacific Ocean, or the Gulf of Mexico, the seaward boundary is the outer limit of state title and ownership under the Submerged Lands Act (48 U.S.C. 1301 *et seq.*), the Act of March 2, 1917 (48 U.S.C. 749), the Covenant to Establish a Commonwealth of the Northern Mariana Islands in Political Union with the United States of America, as approved by the Act of March 24, 1976 (48 U.S.C. 1681 note) or section 1 of the Act of November 10, 1963, (48 U.S.C. 1705, as applicable).

(2) The requirement for defining the seaward boundary of a State's coastal zone can be met by a simple restatement of the limits defined in this section, unless there are water areas which require a more exact delineation because of site specific policies associated with these areas. Where States have site specific policies for particular water areas, these shall be mapped, described or referenced so that their location can be determined reasonably easily by any party affected by the policies.

(b) The seaward limits, as defined in this section, are for purposes of this program only and represent the area

within which the State's management program may be authorized and financed. These limits are irrespective of any other claims States may have by virtue of other laws.

§ 923.33 Excluded lands.

(a) The boundary of a State's coastal zone must exclude lands owned, leased, held in trust or whose use is otherwise by law subject solely to the discretion of the Federal Government, its officers or agents. To meet this requirement, the program must describe, list or map lands or types of lands owned, leased, held in trust or otherwise used solely by Federal agencies.

(b) The exclusion of Federal lands does not remove Federal agencies from the obligation of complying with the consistency provisions of section 307 of the Act when Federal actions on these excluded lands have spillover impacts that affect any land or water use or natural resource of the coastal zone within the purview of a state's management program. In excluding Federal lands from a State's coastal zone for the purposes of this Act, a State does not impair any rights or authorities that it may have over Federal lands that exist separate from this program.

§ 923.34 Interstate boundary.

States must document that there has been consultation and coordination with adjoining coastal States regarding delineation of any adjacent inland and lateral seaward boundary.

Subpart E—Authorities and Organization

SOURCE: 61 FR 33809, June 28, 1996, unless otherwise noted.

§ 923.40 General.

(a) This subpart sets forth the requirements for management program approvability with respect to authorities and organization. The authorities and organizational structure on which a State will rely to administer its management program are the crucial underpinnings for enforcing the policies which guide the management of the uses and areas identified in its management program. There is a direct

relationship between the adequacy of authorities and the adequacy of the overall program. The authorities need to be broad enough in both geographic scope and subject matter to ensure implementation of the State's enforceable policies. These enforceable policies must be sufficiently comprehensive and specific to regulate land and water uses, control development, and resolve conflicts among competing uses in order to assure wise use of the coastal zone. (Issues relating to the adequate scope of the program are dealt with in § 923.3.)

(b) The entity or entities which will exercise the program's authorities is a matter of State determination. They may be the state agency designated pursuant to section 306(d)(6) of the Act, other state agencies, regional or interstate bodies, and local governments. The major approval criterion is a determination that such entity or entities are required to exercise their authorities in conformance with the policies of the management program. Accordingly, the essential requirement is that the State demonstrate that there is a means of ensuring such compliance. This demonstration will be in the context of one or a combination of the three control techniques specified in section 306(d)(11) of the Act. The requirements related to section 306(d)(12) of the Act are described in §§ 923.42 through 923.44 of this subchapter.

(c) In determining the adequacy of the authorities and organization of a state's programs, the Assistant Administrator will review and evaluate authorities and organizational arrangements in light of the requirements of this subpart and the finding of section 302(h) of the Act.

(d) The authorities requirements of the Act dealt with in this subpart are those contained in subsections 306(d)(2)(D)—Means of Control; 306(d)(10)—Authorities; 306(d)(10)(A)—Control Development and Resolve Conflicts; 306(d)(10)(B)—Powers of Acquisition; 306(d)(11)—Techniques of Control; and 307(f)—Air and Water Quality Control Requirements. The organization requirements of the Act dealt with in this subpart are those contained in sections 306(d)(2)(F)—Organizational

Structure; 306(d)(6)—Designated State Agency; and 306(d)(7)—Organization.

§ 923.41 Identification of authorities.

(a)(1) The management program must identify the means by which the state proposes to exert control over the permissible land uses and water uses within the coastal zone which have a direct and significant impact on the coastal waters, including a listing of relevant state constitutional provisions, laws, regulations, and judicial decisions. These are the means by which the state will enforce its coastal management policies. (See section 304(6a) of the Act.)

(2) The state chosen agency or agencies (including local governments, area-wide agencies, regional agencies, or interstate agencies) must have the authority for the management of the coastal zone. Such authority includes the following powers:

(i) To administer land use and water use regulations to control development to ensure compliance with the management program, and to resolve conflicts among competing uses; and

(ii) To acquire fee simple and less than fee simple interests in land, waters, and other property through condemnation or other means when necessary to achieve conformance with the management program.

(b) In order to meet these requirements, the program must identify relevant state constitutional provisions, statutes, regulations, case law and such other legal instruments (including executive orders and interagency agreements) that will be used to carry out the state's management program, including the authorities pursuant to sections 306(d)(10) and 306(d)(11) of the Act which require a state to have the ability to:

(1) Administer land and water use regulations in conformance with the policies of the management program;

(2) Control such development as is necessary to ensure compliance with the management program;

(3) Resolve conflicts among competing uses; and
