

or value of a textile component that is cut to shape (but not to length, width, or both) in the U.S. (including the Commonwealth of Puerto Rico) from foreign fabric and exported to a beneficiary country for assembly into an article that is then returned to the U.S. and entered, or withdrawn from warehouse, for consumption on or after July 1, 1996. For purposes of this paragraph, the terms “textile component” and “fabric” have reference only to goods covered by the definition of “textile or apparel product” set forth in § 102.21(b)(5) of this chapter.

(e) *Articles wholly grown, produced, or manufactured in a beneficiary country.* Any article which is wholly the growth, product, or manufacture of a beneficiary country, including articles produced or manufactured in a beneficiary country exclusively from materials which are wholly the growth, product, or manufacture of a beneficiary country or countries, shall normally be presumed to meet the requirements set forth in paragraph (a) of this section.

(f) *Country of origin marking.* The general country of origin marking requirements that apply to all importations are also applicable to articles imported under the CBI.

[T.D. 84-237, 49 FR 47993, Dec. 7, 1984; 49 FR 49575, Dec. 20, 1984, as amended by T.D. 95-69, 60 FR 46197, Sept. 5, 1995; T.D. 95-69, 60 FR 55995, Nov. 6, 1996; T.D. 00-68, 65 FR 59658, Oct. 5, 2000; CBP Dec. 10-29, 75 FR 52450, Aug. 26, 2010]

§ 10.196 Cost or value of materials produced in a beneficiary country or countries.

(a) *“Materials produced in a beneficiary country or countries” defined.* For purposes of § 10.195, the words “materials produced in a beneficiary country or countries” refer to those materials incorporated in an article which are either:

(1) Wholly the growth, product, or manufacture of a beneficiary country or two or more beneficiary countries; or

(2) Subject to the limitations set forth in § 10.195(a), substantially transformed in any beneficiary country or two or more beneficiary countries into a new or different article of commerce

which is then used in any beneficiary country in the production or manufacture of a new or different article which is imported directly into the U.S.

Example 1. A raw, perishable skin of an animal grown in one beneficiary country is sent to another beneficiary country where it is tanned to create nonperishable “crust leather”. The tanned product is then imported directly into the U.S. Because the material of which the imported article is composed is wholly the growth, product, or manufacture of one of more beneficiary countries, the entire cost or value of that material may be counted toward the 35 percent value requirement set forth in § 10.195.

Example 2. A raw, perishable skin of an animal grown in a non-beneficiary country is sent to a beneficiary country where it is tanned to create nonperishable “crust leather”. The tanned skin is then imported directly into the U.S. Although the tanned skin represents a new or different article of commerce produced in a beneficiary country within the meaning of § 10.195(a), the cost or value of the raw skin may not be counted toward the 35 percent value requirement because (1) the tanned material of which the imported article is composed is not wholly the growth, product, or manufacture of a beneficiary country and (2) the tanning operation creates the imported article itself rather than an intermediate article which is then used in the beneficiary country in the production or manufacture of an article imported into the U.S. The tanned skin would be eligible for duty-free treatment only if the direct costs attributable to the tanning operation represent at least 35 percent of the appraised value of the imported article.

Example 3. A raw, perishable skin of an animal grown in a non-beneficiary country is sent to a beneficiary country where it is tanned to create nonperishable “crust leather”. The tanned material is then cut, sewn and assembled with a metal buckle imported from a non-beneficiary country to create a finished belt which is imported directly into the U.S. Because the operations performed in the beneficiary country involved both the substantial transformation of the raw skin into a new or different article and the use of that intermediate article in the production or manufacture of a new or different article imported into the U.S., the cost or value of the tanned material used to make the imported article may be counted toward the 35 percent value requirement. The cost or value of the metal buckle imported into the beneficiary country may not be counted toward the 35 percent value requirement because the buckle was not substantially transformed in the beneficiary country into a new or different article prior to its incorporation in the finished belt.

§ 10.197

Example 4. A raw, perishable skin of an animal grown in the U.S. Virgin Islands is sent to a beneficiary country where it is tanned to create nonperishable “crust leather”, which is then imported directly into the U.S. The tanned skin represents a new or different article of commerce produced in a beneficiary country within the meaning of §10.195(a), and under §10.195(b), the raw skin from which the tanned product was made is considered to have been grown in a beneficiary country for the purpose of applying the 35 percent value requirement. The tanned material of which the imported article is composed is considered to be wholly the growth, product, or manufacture of one or more beneficiary countries with the result that the entire cost or value of that material may be counted toward the 35 percent value requirement.

(b) *Questionable origin.* When the origin of a material either is not ascertainable or is not satisfactorily demonstrated to the port director, the material shall not be considered to have been grown, produced, or manufactured in a beneficiary country.

(c) *Determination of cost or value of materials produced in a beneficiary country.* (1) The cost or value of materials produced in a beneficiary country or countries includes:

(i) The manufacturer’s actual cost for the materials;

(ii) When not included in the manufacturer’s actual cost for the materials, the freight, insurance, packing, and all other costs incurred in transporting the materials to the manufacturer’s plant;

(iii) The actual cost of waste or spoilage (material list), less the value of recoverable scrap; and

(iv) Taxes and/or duties imposed on the materials by any beneficiary country, provided they are not remitted upon exportation.

(2) Where a material is provided to the manufacturer without charge, or at less than fair market value, its cost or value shall be determined by computing the sum of:

(i) All expenses incurred in the growth, production, or manufacture of the material, including general expenses;

(ii) An amount for profit; and

(iii) Freight, insurance, packing, and all other costs incurred in transporting the material to the manufacturer’s plant.

19 CFR Ch. I (4–1–11 Edition)

If the pertinent information needed to compute the cost or value of a material is not available, the appraising officer may ascertain or estimate the value thereof using all reasonable ways and means at his disposal.

§ 10.197 Direct costs of processing operations performed in a beneficiary country or countries.

(a) *Items included in the direct costs of processing operations.* As used in §10.195 and §10.198, the words “direct costs of processing operations” mean those costs either directly incurred in, or which can be reasonably allocated to, the growth, production, manufacture, or assembly of the specific merchandise under consideration. Such costs include, but are not limited to the following, to the extent that they are includable in the appraised value of the imported merchandise:

(1) All actual labor costs involved in the growth, production, manufacture or assembly of the specific merchandise, including fringe benefits, on-the-job training, and the cost of engineering, supervisory, quality control, and similar personnel;

(2) Dies, molds, tooling, and depreciation on machinery and equipment which are allocable to the specific merchandise;

(3) Research, development, design, engineering, and blueprint costs insofar as they are allocable to the specific merchandise and;

(4) Costs of inspecting and testing the specific merchandise.

(b) *Items not included in the direct costs of processing operations.* Those items which are not included within the meaning of the words “direct costs of processing operations” are those which are not directly attributable to the merchandise under consideration or are not “costs” of manufacturing the product. These include, but are not limited to:

(1) Profit; and

(2) General expenses of doing business which are either not allocable to the specific merchandise or are not related to the growth, production, manufacture, or assembly of the merchandise,
